

## Federated States of Micronesia Maritime Boundaries

### Territorial Seas Zone

In exercise of the authority of the President of the Federated States of Micronesia (FSM) pursuant to 18 F.S.M.C. §107 of the Code of the Federated States of Micronesia (Annotated) to issue regulation establishing the Territorial Seas (TS) of the Federated States of Micronesia, the President hereby declares the Territorial Seas of the Federated States of Micronesia measured from the appropriate baselines of islands, atolls and reefs referenced to World Geodetic System 1984, as follows:

#### Ngulu Territorial Seas (12M)

- 1) The outer limit of the territorial sea of Ngulu is the line commencing at point **FSMSTS0001** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
- 2) In the table:
  - a) Lines are generated by reference to points; and
  - b) The columns in the table set out the following information about the points:
    - i) The point identifier (Point ID) is shown in the first column in the table;  
(1) TS, as in *FSMSTS...*, means Territorial Sea; and
    - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

### Sorol Territorial Seas (12M)

- 1) The outer limit of the territorial sea of **Sorol** is the line commencing at point **FSMSTS0219** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
- 2) In the table:
  - a) Lines are generated by reference to points; and
  - b) The columns in the table set out the following information about the points:
    - i) The point identifier (Point ID) is shown in the first column in the table;
      - (1) TS, as in *FSMSTS...*, means Territorial Sea; and
    - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

### **Woleai Territorial Seas (12M)**

- 1) The outer limit of the territorial sea of **Woleai** is the line commencing at point **FSMSTS0509** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
- 2) In the table:
  - a) Lines are generated by reference to points; and
  - b) The columns in the table set out the following information about the points:
    - i) The point identifier (Point ID) is shown in the first column in the table;

- (1) TS, as in *FSMTS...*, means Territorial Sea; and
- ii) The geographic coordinates for each point are shown in the second and third columns of the table.

### West Fayu Territorial Seas (12M)

- 1) The outer limit of the territorial sea of **West Fayu** is the line commencing at point **FSMTS1052** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
- 2) In the table:
  - a) Lines are generated by reference to points; and
  - b) The columns in the table set out the following information about the points:

- i) The point identifier (Point ID) is shown in the first column in the table;
- (1) TS, as in *FSMTS...*, means Territorial Sea; and
- ii) The geographic coordinates for each point are shown in the second and third columns of the table.

### Satawal Territorial Seas (12M)

1) The outer limit of the territorial sea of **Satawal** is the line commencing at point **FSMTS1187** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.

2) In the table:

- a) Lines are generated by reference to points; and
- b) The columns in the table set out the following information about the points:
  - i) The point identifier (Point ID) is shown in the first column in the table;
    - (1) TS, as in *FSMTS...*, means Territorial Sea; and
  - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

**Pikelot Territorial Seas (12M)**

- 1) The outer limit of the territorial sea of **Pikelot** is the line commencing at point **FSMTS1310** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
- 2) In the table:
  - a) Lines are generated by reference to points; and
  - b) The columns in the table set out the following information about the points:
    - i) The point identifier (Point ID) is shown in the first column in the table;
      - (1) TS, as in *FSMTS...*, means Territorial Sea; and

ii) The geographic coordinates for each point are shown in the second and third columns of the table.

### Gaferut Territorial Seas (12M)

- 1) The outer limit of the territorial sea of **Gaferut** is the line commencing at point **FSMTS1427** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
- 2) In the table:
  - a) Lines are generated by reference to points; and
  - b) The columns in the table set out the following information about the points:
    - i) The point identifier (Point ID) is shown in the first column in the table;
      - (1) TS, as in *FSMTS...*, means Territorial Sea; and
    - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

### **Faraulep Territorial Seas (12M)**

- 1) The outer limit of the territorial sea of **Faraulep** is the line commencing at point **FSMTS1552** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
- 2) In the table:
  - a) Lines are generated by reference to points; and
  - b) The columns in the table set out the following information about the points:
    - i) The point identifier (Point ID) is shown in the first column in the table;
      - (1) TS, as in *FSMTS...*, means Territorial Sea; and
    - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

### Ulithi/Losiep/Gielop Territorial Seas (12M)

1) The outer limit of the territorial sea of **Ulithi, Losiep, and Gielop** is the line commencing at point **FSMSTS1809** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.

2) In the table:

a) Lines are generated by reference to points; and

b) The columns in the table set out the following information about the points:

i) The point identifier (Point ID) is shown in the first column in the table;

(1) TS, as in *FSMSTS...*, means Territorial Sea; and

ii) The geographic coordinates for each point are shown in the second and third columns of the table

### Yap Territorial Seas (12M)

1) The outer limit of the territorial sea of **Yap** is the line commencing at point **FSMSTS2040** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.

2) In the table:

a) Lines are generated by reference to points; and

b) The columns in the table set out the following information about the points:

i) The point identifier (Point ID) is shown in the first column in the table;

(1) TS, as in *FSMSTS...*, means Territorial Sea; and

ii) The geographic coordinates for each point are shown in the second and third columns of the table.

### **Pulap/Puluwat Territorial Seas (12M)**

- 1) The outer limit of the territorial sea of **Pulap** and **Puluwat** is the line commencing at point **FSMSTS2239** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
- 2) In the table:
  - a) Lines are generated by reference to points; and
  - b) The columns in the table set out the following information about the points:
    - i) The point identifier (Point ID) is shown in the first column in the table;
      - (1) TS, as in *FSMSTS...*, means Territorial Sea; and

ii) The geographic coordinates for each point are shown in the second and third columns of the table.

1) The outer limit of the territorial sea of **Pulusuk** is the line commencing at point **FSMSTS2447** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.

2) In the table:

a) Lines are generated by reference to points; and

b) The columns in the table set out the following information about the points:

i) The point identifier (Point ID) is shown in the first column in the table;

(1) TS, as in *FSMSTS...*, means Territorial Sea; and

ii) The geographic coordinates for each point are shown in the second and third columns of the table.

**Satawan/Etal/Lukunor Territorial Seas (12M)**

- 1) The outer limit of the territorial sea of **Satawan, Etal and Lukunor** is the line commencing at point **FSMTS2723** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
- 2) In the table:
  - a) Lines are generated by reference to points; and
  - b) The columns in the table set out the following information about the points:
    - i) The point identifier (Point ID) is shown in the first column in the table;
      - (1) TS, as in *FSMTS...*, means Territorial Sea; and
    - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

### Losap>Nama Territorial Seas (12M)

- 1) The outer limit of the territorial sea of **Losap** and **Nama** is the line commencing at point **FSMETS2990** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
- 2) In the table:
  - a) Lines are generated by reference to points; and
  - b) The columns in the table set out the following information about the points:
    - i) The point identifier (Point ID) is shown in the first column in the table;
      - (1) TS, as in *FSMETS...*, means Territorial Sea; and
    - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

### Chuuk/Neoch Territorial Seas (12M)

- 1) The outer limit of the territorial sea of **Chuuk** and **Neoch** is the line commencing at point **FSMTS3172** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
- 2) In the table:
  - a) Lines are generated by reference to points; and
  - b) The columns in the table set out the following information about the points:
    - i) The point identifier (Point ID) is shown in the first column in the table;
      - (1) TS, as in *FSMTS...*, means Territorial Sea; and
    - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

**Murilo/Nomwin/East Fayu Territorial Seas (12M)**

1) The outer limit of the territorial sea of **Murilo**, **Nomwin** and **East Fayu** is the line commencing at point **FSMTS3527** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.

2) In the table:

- a) Lines are generated by reference to points; and
- b) The columns in the table set out the following information about the points:
  - i) The point identifier (Point ID) is shown in the first column in the table:
    - (1) TS, as in *FSMTS...*, means Territorial Sea; and
  - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

### **Namonuito Territorial Seas (12M)**

1) **Namonuito** islands form two separate territorial seas. The outer limit of the first territorial sea of **Namonuito** is the line commencing at point **FSMETS3924** in Table-1 below and running along geodesic sequentially connecting each point in the table and ending at the last point **FSMETS4163**. The outer limit of the second territorial sea of **Namonuito** is the line commencing at point **FSMETS4164** in Table-2 below and running along geodesic sequentially connecting each point and ending at the last point **FSMETS4299**.

2) In the tables:

a) Lines are generated by reference to points; and

b) The columns in each table set out the following information about the points:

i) The point identifier (Point ID) is shown in the first column in each table;

(1) TS, as in *FSMETS...*, means Territorial Sea; and

ii) The geographic coordinates for each point are shown in the second and third columns of the tables.

**Minto Territorial Seas (12M)**

- 1) The outer limit of the territorial sea of **Minto** is the line commencing at point **FSMSTS4300** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
- 2) In the table:
  - a) Lines are generated by reference to points; and
  - b) The columns in the table set out the following information about the points:
    - i) The point identifier (Point ID) is shown in the first column in the table;
      - (1) TS, as in *FSMSTS...*, means Territorial Sea; and
    - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

### **Oroluk Territorial Seas (12M)**

- 1) The outer limit of the territorial sea of **Oroluk** is the line commencing at point **FSMSTS4457** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.

2) In the table:

- a) Lines are generated by reference to points; and
- b) The columns in the table set out the following information about the points:
  - i) The point identifier (Point ID) is shown in the first column in the table;
    - (1) TS, as in *FSMTS...*, means Territorial Sea; and
  - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

### **Nukuoro Territorial Seas (12M)**

- 1) The outer limit of the territorial sea of **Nukuoro** is the line commencing at point **FSMSTS4700** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
- 2) In the table:
  - a) Lines are generated by reference to points; and
  - b) The columns in the table set out the following information about the points:
    - i) The point identifier (Point ID) is shown in the first column in the table;
      - (1) TS, as in *FSMSTS...*, means Territorial Sea; and
    - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

### **Kapingamarangi Territorial Seas (12M)**

- 1) The outer limit of the territorial sea of **Kapingamarangi** is the line commencing at point **FSMSTS4879** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
- 2) In the table:
  - a) Lines are generated by reference to points; and
  - b) The columns in the table set out the following information about the points:
    - i) The point identifier (Point ID) is shown in the first column in the table;
      - (1) TS, as in *FSMSTS...*, means Territorial Sea; and
    - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

### Sapwuafik Territorial Seas (12M)

- 1) The outer limit of the territorial sea of **Sapwuafik** is the line commencing at point **FSMTS5058** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
- 2) In the table:
  - a) Lines are generated by reference to points; and
  - b) The columns in the table set out the following information about the points:
    - i) The point identifier (Point ID) is shown in the first column in the table;
      - (1) TS, as in *FSMTS...*, means Territorial Sea; and
    - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

### **Pingelap Territorial Seas (12M)**

- 1) The outer limit of the territorial sea of **Pingelap** is the line commencing at point **FSMTS5262** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
- 2) In the table:
  - a) Lines are generated by reference to points; and
  - b) The columns in the table set out the following information about the points:
    - i) The point identifier (Point ID) is shown in the first column in the table;
      - (1) TS, as in *FSMTS...*, means Territorial Sea; and
    - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

**Pohnpei/Pakin/Ant Territorial Seas (12M)**

- 1) The outer limit of the territorial sea of **Pohnpei, Pakin** and **Ant** is the line commencing at point **FSMTS5552** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
- 2) In the table:
  - a) Lines are generated by reference to points; and
  - b) The columns in the table set out the following information about the points:
    - i) The point identifier (Point ID) is shown in the first column in the table;
      - (1) TS, as in *FSMTS...*, means Territorial Sea; and
      - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

### **Kosrae Territorial Seas (12M)**

1) The outer limit of the territorial sea of **Kosrae** is the line commencing at point **FSMTS5902** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.

2) In the table:

a) Lines are generated by reference to points; and

b) The columns in the table set out the following information about the points:

i) The point identifier (Point ID) is shown in the first column in the table;

(1) TS, as in *FSMTS...*, means Territorial Sea; and

ii) The geographic coordinates for each point are shown in the second and third columns of the table.
