COORDINATES DEFINING THE OUTER LIMITS OF THE CONTINENTAL SHELF OF THE REPUBLIC OF LIBERIA.....	8

1. Introduction

- 1.1 This Executive Summary forms part of the Submission made by the Republic of Liberia to the Commission on the Limits of the Continental Shelf ('The Commission') in accordance with paragraph 8 of Article 76 of the United Nations Convention on the Law of the Sea, 1982 ('the Convention'). The Submission has been made in support of the establishment by the Republic of Liberia of the outer limits of the continental shelf that lies beyond 200 nautical miles ('M') from the territorial sea baseline.
- 1.2 The Republic of Liberia recalls that where the continental shelf extends beyond 200 M from the territorial sea baselines, a coastal State seeking to establish the outer limits of the continental shelf beyond 200 M is required under paragraph 8 of Article 76 to submit information on such outer limits to the Commission, which makes recommendations to the coastal State concerning the outer limits of the continental shelf consistent with Article 76 of the Convention.
- 1.3 The Republic of Liberia is a coastal State located in the westernmost sub-region of the African continent. The nation was founded in 1822 and became Africa's first republic in 1847 after declaring independence from the American Colonization Society. The Republic of Liberia is one of the founding members of the United Nations and is a party to the Convention, having signed it on the day that it was opened for signature on 10 December 1982, and subsequently ratified it on 25 September 2008. The Convention entered into force for Liberia on 24 October 2008.
- 1.4 The geographical location and regional setting of the Republic of Liberia is presented in Figure 1. The coastline of the Republic of Liberia faces the Atlantic Ocean to the southwest, and is bounded to the north-west by the neighbouring coastal State of Sierra Leone and by Cote d'Ivoire to the southeast. It also shares a land boundary to the northeast with Guinea. The total land area of Liberia is approximately 96,369 km² and the total length of the coast is approximately 313 nautical miles. The population of Liberia has recently been estimated to be approximately 4.73 million (Liberia Country Profile, World Bank 2018).
- 1.5 The Republic of Liberia has enacted various legislation and Presidential Executive Orders establishing maritime zones over the years based on the prevailing rules and principles of international law. This includes the Act to establish and delimit the Territorial Sea and Contiguous Zone of the Republic of Liberia, approved 24 June 1968 ('1968 Act'), which was later replaced by the Act to approve the Executive Order issued by the President of Liberia on 24 December 1976, approved 16 February 1977 ('1977 Act'). The 1968 Act declared the baseline of Liberia to be the low-water line along the coast. The Act also established the Territorial Sea as a belt of waters adjacent to the land territory of Liberia. The 1977 Act declared that the territorial sea of Liberia established under the 1968 Act extended further seaward to a distance of 200 nautical miles from the territorial sea baseline.
- 1.6 In the period of time that has followed the entry into force of the Convention for the Republic of Liberia, the following Executive Orders have been issued:
 - Executive Order No. 39 of 12 January 2012, Delimiting the Maritime Zones of the Republic of Liberia;
 - Executive Order No. 48 of 10 January 2013, Extension of Executive Order No. 39 Delimiting the Maritime Zones of the Republic of Liberia; and,

- Executive Order No. 59 of 28 April 2014, Extension of Executive Order No. 48 Delimiting the Maritime Zones of the Republic of Liberia.

Executive Order No. 59 is presently in effect and establishes the national maritime zones of Liberia through an extension of Executive Order No. 48. New national maritime zone legislation is under development for consideration and enactment by the Legislature.

- 1.7 As provided for under paragraph 1 of Article 76, the Republic of Liberia has a continental shelf comprising the seabed and subsoil of the submarine areas that extend beyond the territorial sea throughout the natural prolongation of the relevant land territory to the outer edge of the continental margin, up to the limits provided for in paragraphs 4 to 6 of Article 76.
- 1.8 This Submission represents a full submission in respect of the continental shelf where it extends beyond 200 M from the territorial sea baseline of the Republic of Liberia. For the purposes of preparing this Submission, Liberia has applied the relevant provisions of Article 76 of the Convention, the Rules of Procedure of the Commission on the Limits of the Continental Shelf (CLCS/40/Rev. 1) adopted by the Commission on 17 April 2008 ('Rules of Procedure') and, the Scientific and Technical Guidelines of the Commission on the Limits of the Continental Shelf (CLCS/11) adopted by the Commission on 13 May 1999 ('the Guidelines').

Figure 1. The Geographic location and regional setting of the Republic of Liberia.

2. Absence of Disputes

- 2.1 The maritime zone entitlements of the Republic of Liberia overlap with those of the adjacent coastal States of Sierra Leone and Côte d'Ivoire. The settlement of these boundaries will likely require the delimitation of overlapping areas of territorial sea, exclusive economic zone and continental shelf. In time, it may also require the delimitation of areas of continental shelf that extend beyond 200 M from the territorial sea baselines.
- 2.2 The Republic of Liberia recalls that Article 9 of Annex II of the Convention provides that the actions of the Commission shall not prejudice matters relating to the delimitation of boundaries between States with opposite or adjacent coasts. The Commission has therefore adopted a practice, contained in Annex I to the Rules of Procedure, which operates to prevent the consideration of a submission that would require the examination by the Commission of a disputed continental shelf without the consent of the affected parties in dispute. In this regard, Liberia confirms in accordance with paragraph 2(a) of Annex I of the Rules of Procedure that the area of continental shelf that forms the basis of the present Submission is not the subject of any dispute with any other State.
- 2.3 The Republic of Liberia confirms also that the Submission is made without prejudice to the delimitation of outstanding maritime boundaries with Sierra Leone and Côte d'Ivoire. In this regard, the Republic of Liberia will seek to delimit maritime boundaries with neighbouring coastal States through negotiation, consistent with the applicable rules and principles of the Convention.

3. Form of Submission, Maps and Tables

- 3.1 In accordance with Article 1 of Annex III to the Rules of Procedure and paragraphs 9.1.3 to 9.1.6 of the Guidelines, the Submission consists of three parts comprising:
 - this Executive Summary (LIB-ES-DOC);
 - the Main Body (LIB-MB-DOC); and,
 - Supporting scientific and technical data, presented in digital form (LIB-SD).

This Executive Summary provides a brief outline of the continental shelf beyond 200M, including a depiction of the outer limits of the continental shelf determined by the Republic of Liberia.

- 3.2 Two maps illustrating the outer limits of the continental shelf of the Republic of Liberia have been constructed using large-scale Admiralty Charts and are attached to this Executive Summary as A0 maps (LIB-ES-DOC-MAP 1 and LIB-ES-DOC-MAP 2). The outer limits of the continental shelf are also presented at:
 - Figure 2 (depicting the outer limit line); and,
 - Figure 3 (depicting the outer limit line and information concerning the provisions of Article 76 invoked).

4. Provisions of Article 76 Invoked

- 4.1 The Republic of Liberia has invoked paragraphs 3, 4(a)(ii), 5 and 7 of Article 76 of the Convention in support of the determination of the outer limits of the continental shelf included in this Submission, as outlined in Section 6 of this Executive Summary.

5. Geographic, Morphological and Geological Overview

- 5.1 The continental shelf of the Republic of Liberia extends beyond 200 M from the territorial sea baseline in the region of the Liberian High, which forms part of the West African continental margin between southern Guinea and Liberia. The Liberian High formed during the process of the extension and magmatic continental break-up of Africa and South America that began in the Early Cretaceous and ultimately led to the formation of mass transport depositional systems.
- 5.2 According to paragraph 2.2.3 of the Guidelines, the Republic of Liberia is required to demonstrate that the natural prolongation of its relevant land territory extends beyond 200 M from the territorial sea baseline.
- 5.3 The relevant area of the Liberian High is the submerged prolongation of the landmass of the Republic of Liberia. The slope in this region consists of two parts - an upper steep slope and a lower flatter slope, formed by mass-transport depositional processes associated with slope failure and erosion. The base of the continental slope of Liberia lies at the outer edge of the lower slope, which in the northwest grades into the Sierra Leone basin and, in the southeast, is truncated by the St Paul Fracture Zone.
- 5.4 A detailed examination of the geology and geomorphology of the area covered by the Submission is contained in the Main Body of the Submission (LIB-MB-DOC), which includes a discussion that demonstrates clearly the natural prolongation of the continental shelf from the land territory of the Republic of Liberia.

6. The Outer Limits of the Continental Shelf

- 6.1 Scientific and technical data submitted by the Republic of Liberia in support of the Submission establishes that the outer edge of the continental margin extends beyond 200 M measured from the territorial sea baseline. Accordingly, the Republic of Liberia has defined the outer limits of the continental shelf by applying the rules of paragraphs 4 to 10 of Article 76 of the Convention.
- 6.2 In accordance with paragraph 7 of Article 76 of the Convention, the Republic of Liberia has established the outer limits of the continental shelf beyond 200 M by fixed points defined by longitude and latitude connected by straight lines not exceeding 60 M. The GEOCAP software package was used to determine the optimized location of the fixed points on the combined formula line in addition to the 200 M line of Liberia.
- 6.3 The outer limits of the continental shelf of the Republic of Liberia are defined by 455 Fixed Points ('FP') comprising 453 fixed points on the Hedberg line and two fixed points on the 200 M line measured from the Territorial Sea baseline of the Republic of Liberia. Table 1 lists the coordinates of the Article 76 fixed points constructed to define the outer limits of the continental shelf of the Republic of Liberia in both decimal degrees ('DD') and, in degrees, minutes and seconds ('DMS').
- 6.4 The area of continental shelf that extends beyond 200 M measured from the territorial sea baseline of the Republic of Liberia is approximately 74,480 sq. km.

7. Commissioners Who Provided Assistance during the Preparation of the Submission

- 7.1 No members of the Commission provided advice concerning the preparation of the Submission. The Submission was prepared by the Liberia Maritime Authority with the assistance of Cooley (UK) LLP.

REPUBLIC OF LIBERIA
SUBMISSION TO THE COMMISSION ON THE LIMITS OF THE CONTINENTAL SHELF

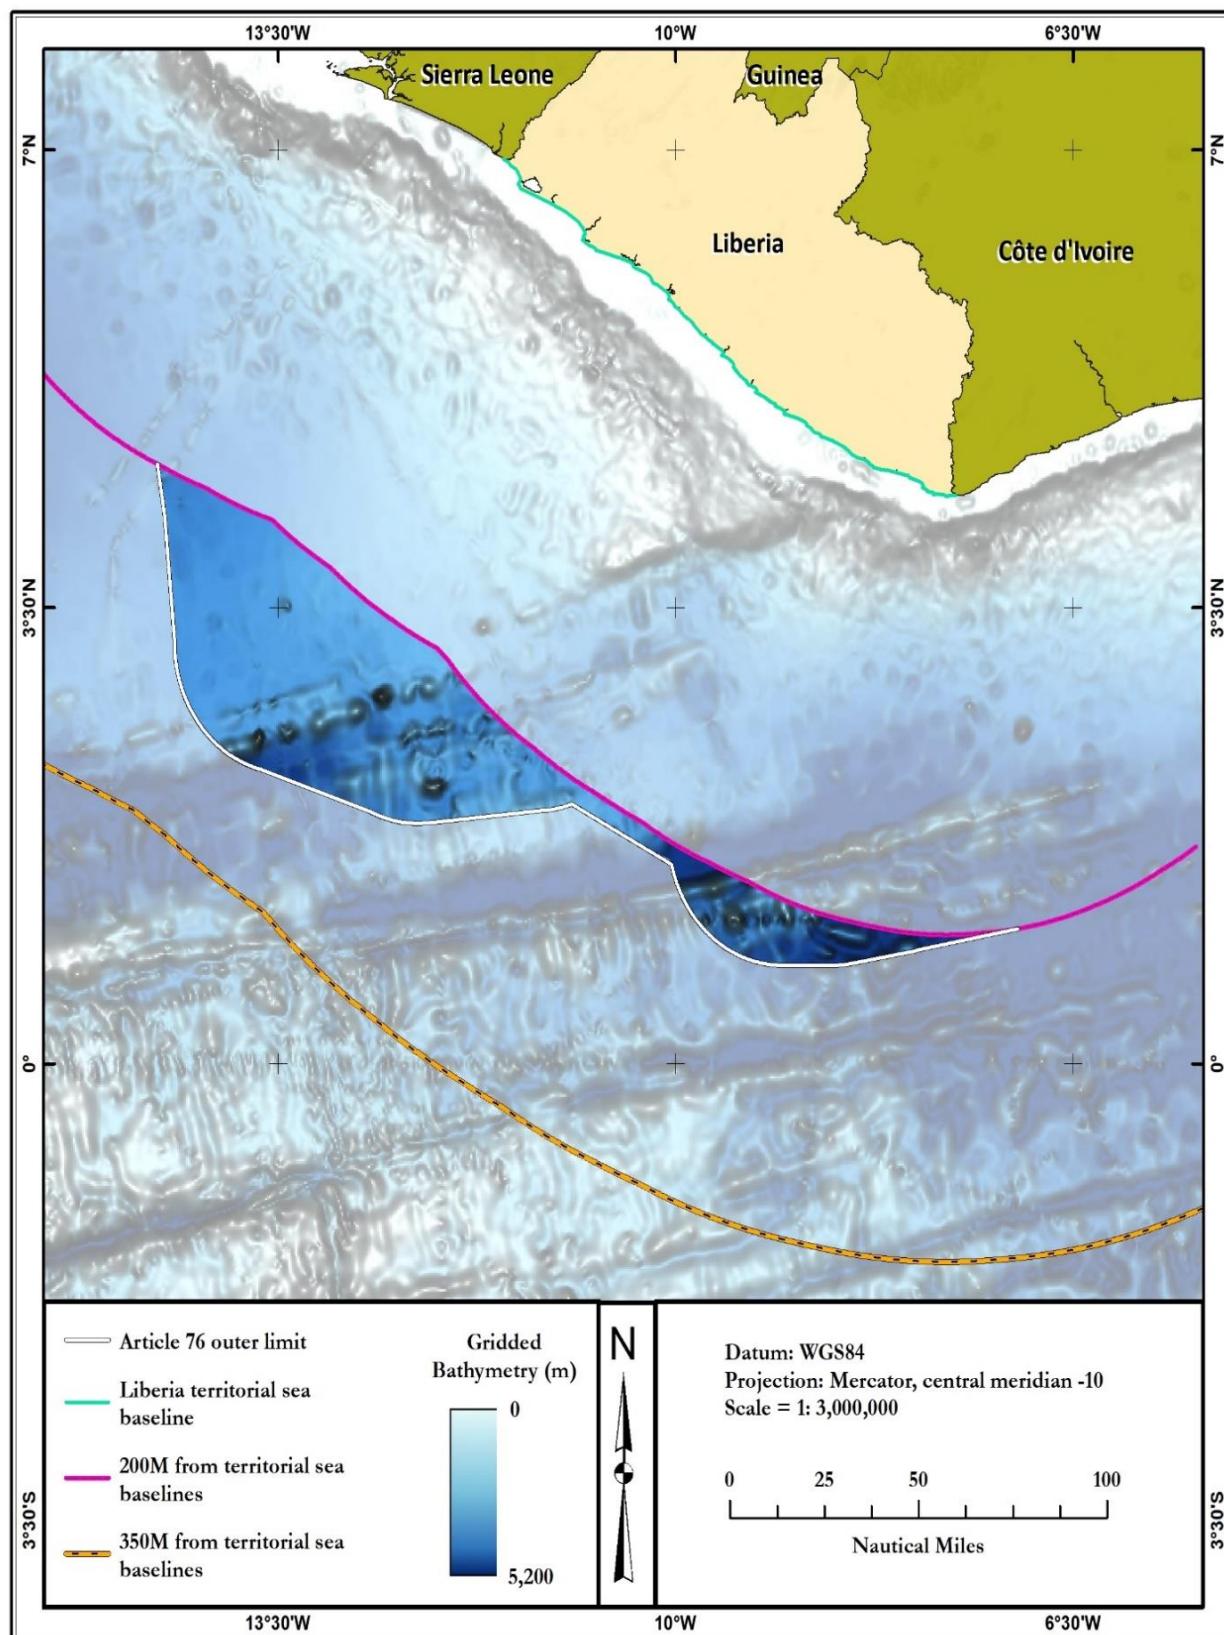

Figure 2. Map illustrating the outer limits of the continental shelf of the Republic of Liberia showing the outer limit line and area of continental shelf extending beyond 200 M from the territorial sea baseline.

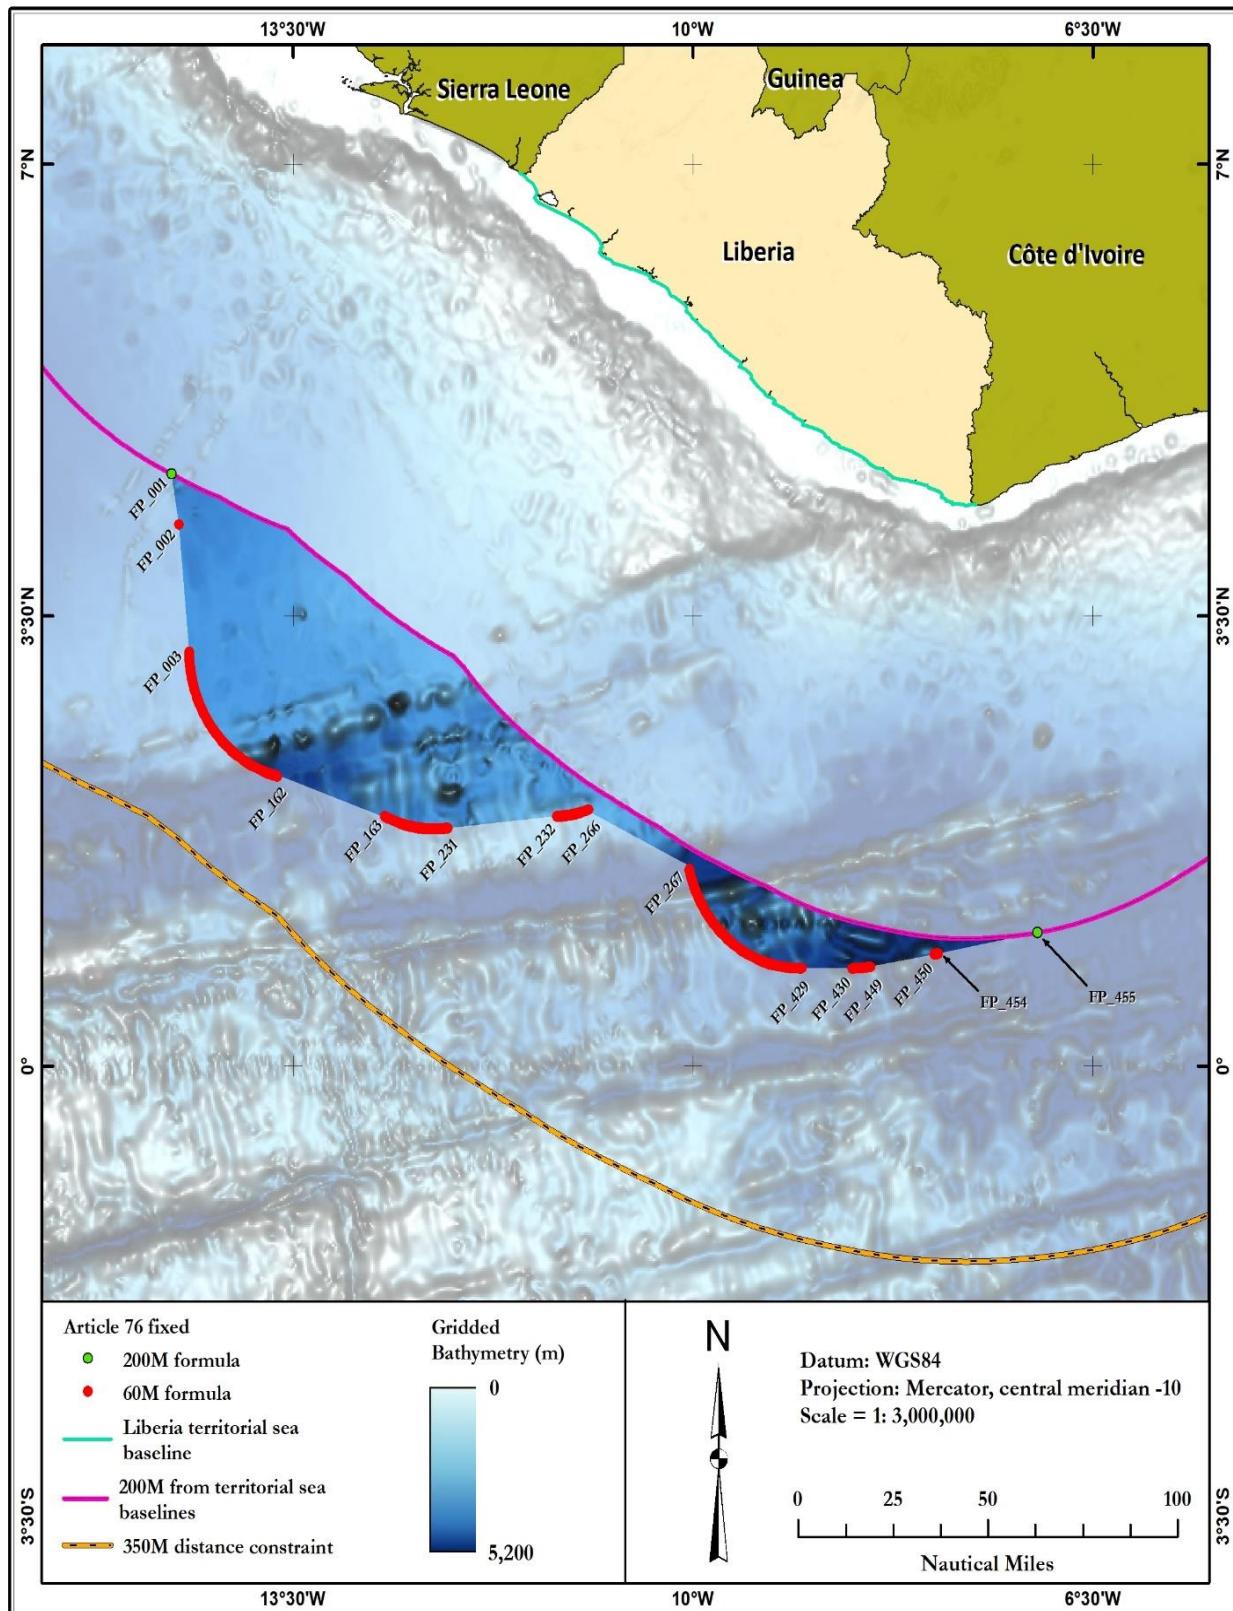

Figure 3. Outer limits of the continental shelf and provisions of Article 76 invoked. 200 M line shown as pink line. 350 M line shown as dark blue line. Hedberg Formula Points shown as red dots unless located on the Liberia 200 M line, in which case they shown as a blue dot. The formula line shown as a light blue line.
