1 Introduction

This submission to the Commission on the Limits of the Continental Shelf is made by the Government of the French Republic pursuant to Article 76, paragraph 8, and article 4 of Annex II of the United Nations Convention on the Law of the Sea, in support of the establishment of the outer limits of the continental shelf beyond the 200 nautical miles from the baselines from which the breadth of the territorial sea is measured, in the areas of French Guiana and New Caledonia. This submission is a partial submission, as was the one presented jointly with Spain, Ireland and the United Kingdom of Great Britain and Northern Ireland on the 19th of May 2006, for the region of the Celtic Sea and the Bay of Biscay.

2 The continental shelf

The present submission deals only with the outer limit of the continental shelf in the areas of French Guiana and New Caledonia. In accordance with paragraph 3 of Annex I of the Rules and Procedures, submissions for other parts of the continental shelf will be made at a later stage, without prejudging the resolution of pending questions related to the determination of limits in those parts of the continental shelf claimed by France and any other State.

2.1 French Guiana

The extension of the continental shelf beyond 200 miles from the baselines of French Guiana is located at the base of the margin of the Atlantic Ocean, between the Demerara Plateau and the Amazon deep sea fan (Figure 1). The continental shelf is adjacent to the one of Surinam to the west, and to the Brazilian one to the south east.

The French Continental Shelf

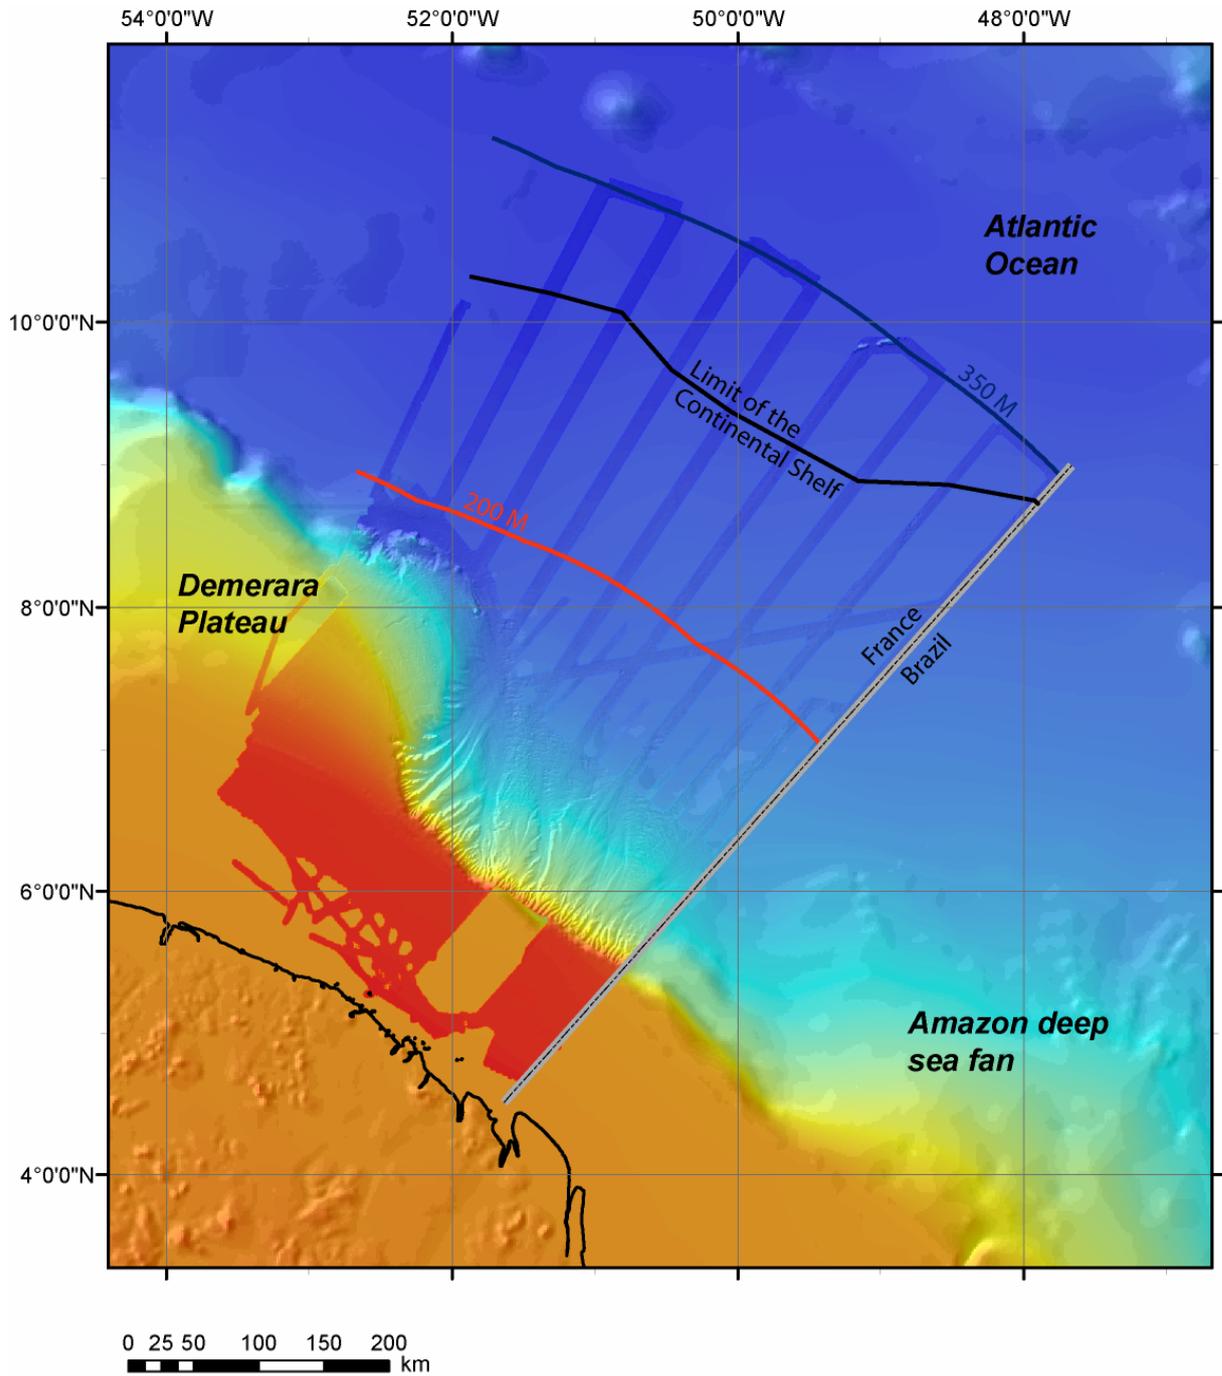

Figure 1 : The continental shelf in the area of French Guiana
(Projection: Mercator 10°N)

The French Continental Shelf

2.2 New Caledonia

The extension of the continental shelf beyond 200 miles from the baselines of New Caledonia is divided in two areas, one to the south east and the other to the south west (Figure 2).

2.2.1 South East

The extension of the continental shelf in the region to the south east of New Caledonia is located where the Loyalty Ridge terminates against the Cook Fracture Zone (Figure 2). The area covers the eastern margin of the Loyalty Ridge and its junction with the South Fiji Basin. The extension is limited to the west by the area under Australian jurisdiction (EEZ). In the area beyond 200 miles, a potential overlap of claims exists between the continental shelves of France, Australia and New Zealand.

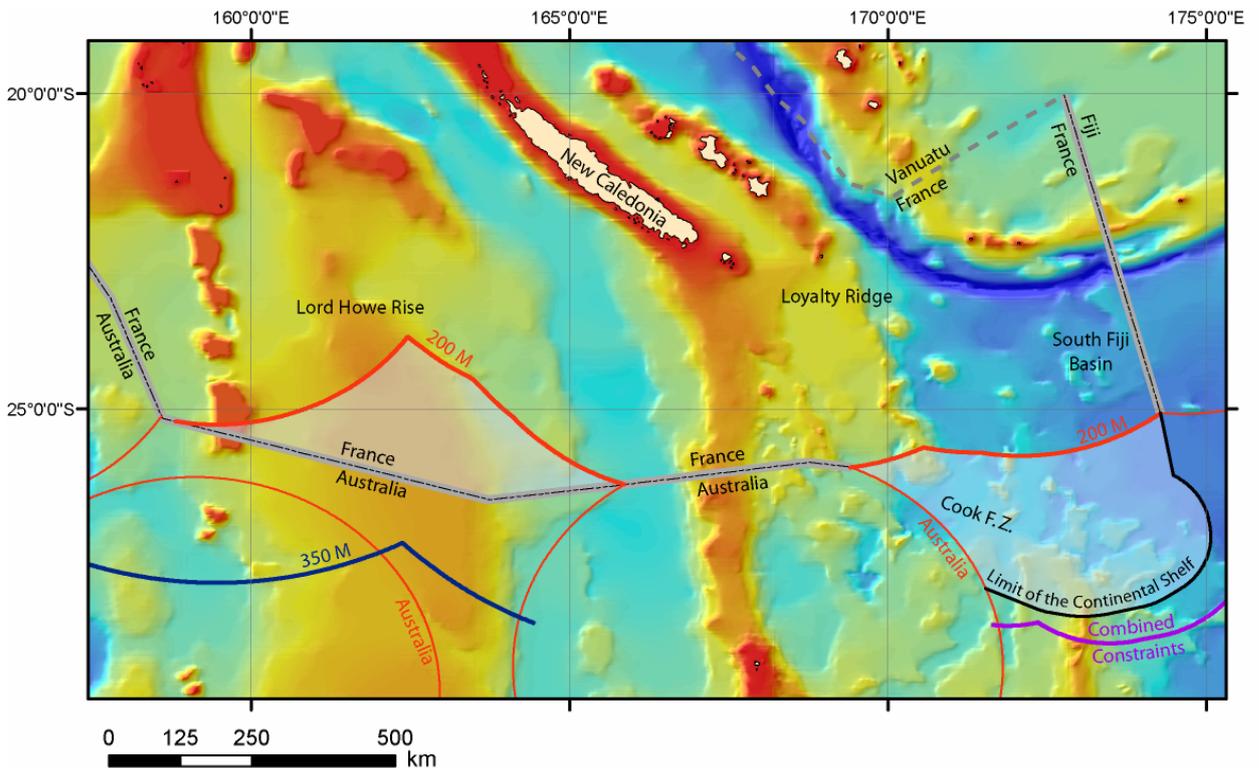

Figure 2 : The continental shelf in the area of New Caledonia
(Projection: Mercator 20°S)

2.2.2 South West

The extension of the continental shelf in the area to the south west of New Caledonia is situated on the Lord Howe Rise (Figure 2). This extension is limited to the south by the Maritime Delimitation Agreement between France and Australia dated January 4th, 1982. Due to this agreement, the entire area is located within the outer limit of the continental margin.

3 Specific provisions invoked to support this partial submission

The outer limits contained in this partial submission are based on the provisions of Articles 76(1), 76.4 (a)(i), 76.4 (a)(ii) and 76.4 (b) of the United Nations Convention on the Law of the Sea and on the Agreement for Maritime Delimitation between France and Australia of January 4th, 1982 (United Nations Publications, Volume 1329, page 107).

4 Absence of disputes

In accordance with paragraph 2(a) of Annex I to the Commission's Rules of Procedures, France wishes to inform the Commission that the continental shelf in the area of French Guiana is not the subject of any dispute between France and any other State. The continental shelf in the south east sector of New Caledonia (the area of the Loyalty Ridge) is the subject of exchanges of *notes verbales* between France and Australia on the one hand, and France and New Zealand on the other. With these exchanges, the three States provide the Commission with the assurance that their respective submissions can be treated without prejudice to issues related to the delimitation of the continental shelf between them.

5 Description of the outer limits of the continental shelf

5.1 French Guiana

France has used the lines determined by the 1% sediment thickness formula (the Gardiner or Irish Formula) for the area offshore French Guiana. On the seismic data provided, sufficient sediment thickness has been demonstrated to allow the application of this formula of 1% sediment thickness with respect to the shortest distance to the foot of the slope. Accordingly, 8 fixed points have been established, which, combined with a 9th fixed point located on the delimitation with Brazil, form the outer limit of the continental shelf offshore French Guiana (Figure 3).

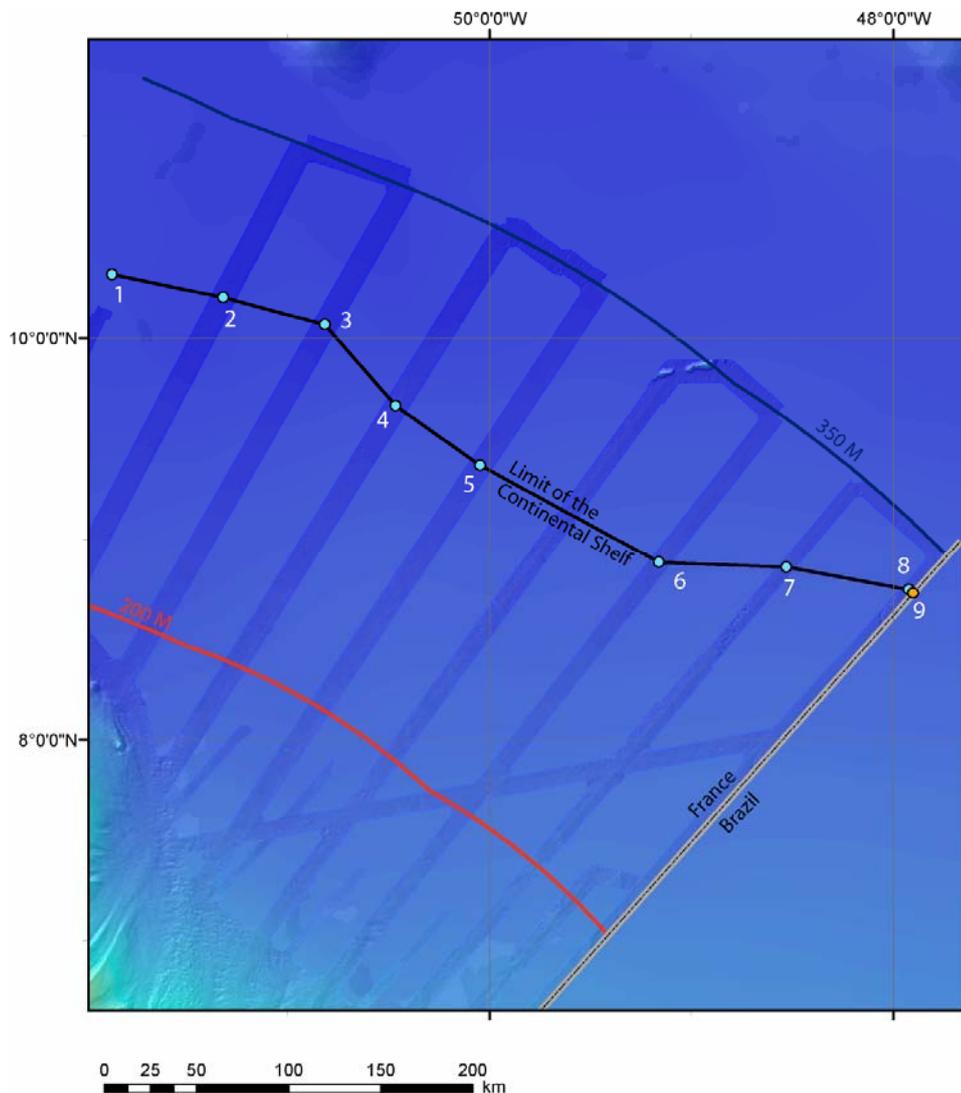

Figure 3 : Detailed map of the outer limit of the continental shelf in the area of French Guiana

The French Continental Shelf

5.2 New Caledonia

5.2.1 South East

In this submission, for the sector to the south east of New Caledonia (the zone of the Loyalty Ridge), the outer limit of the continental shelf has been constructed by 191 fixed points: 190 fixed points are based on the Hedberg Formula, and 1 fixed point is located on the 200 miles limit, as measured from the French baselines (Figure 4).

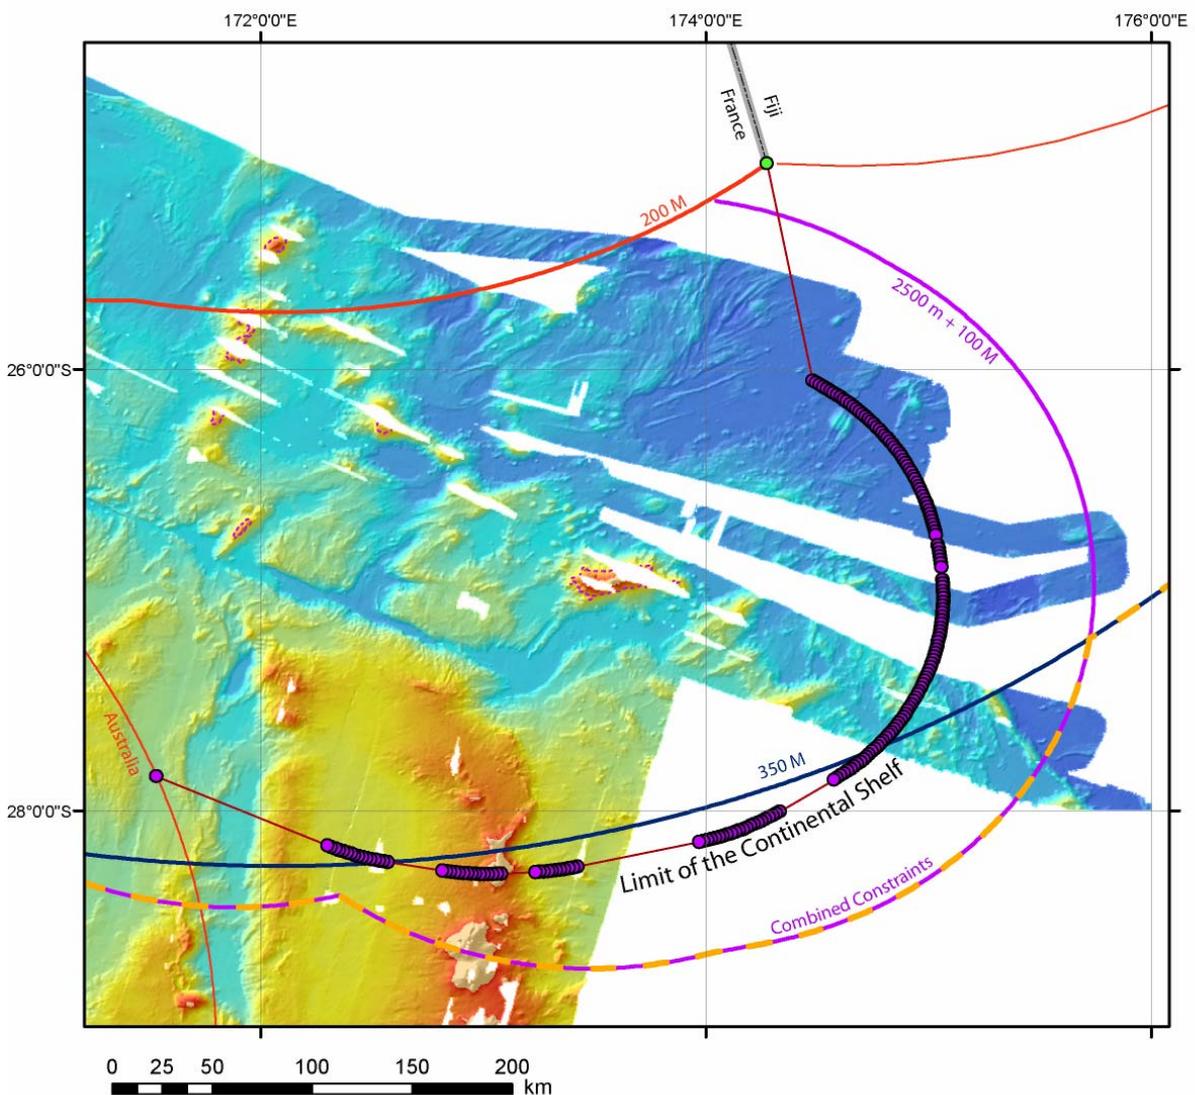

Figure 4 : Detailed map of the outer limit of the continental shelf in the southeastern sector of New Caledonia

5.2.2 South West

In this submission, for the sector to the south west of New Caledonia (the area of the Lord Howe Rise) the demonstration of natural prolongation leads to the conclusion that the continental margin covers the entire area beyond 200 miles, up to the limit established by the Agreement of Maritime Delimitation between France and Australia of the 4th of January 1982.

6 State bodies responsible for the preparation of this partial continental shelf submission

This submission, as well as all maps, figures, appendices and data bases, were prepared by EXTRAPLAC, a consortium constituted of the French Research Institute for Exploitation of the Sea (Ifremer), the Hydrographic and Oceanographic Service of the Navy (SHOM), IFP, and the French Polar Institute Paul-Emile Victor (IPEV), coordinated by the General Secretariat for the Sea.

The part of this submission that concerns New Caledonia associates also in its preparation the Territory of New Caledonia, via its Geological Service (SGNC) of the Department of Industry, Mines and Energy of New Caledonia (DIMENC).

EXTRAPLAC is a national multi-year program dedicated to the continental shelf extension and funded by the French Government through the Department of Industry

Table 2 : List of coordinates defining the outer limit of the continental shelf in the area to the south east of New Caledonia

All coordinates relate to the WGS 84 geodetic reference system

Appendix 3: The outer limit of the continental shelf in the area to the south west of New Caledonia

The continental shelf in the area to the south west of New Caledonia (the area of the Lord Howe Rise) extends up to the limit established by the Maritime Delimitation Agreement between France and Australia, dated January 4th, 1982 (United Nations Publications, Volume 1329, page 107).
