Subprogramme 5: distribution of proposed resources for 2023 (before recosting)
(Number of posts/thousands of United States dollars)

Extrabudgetary resources

14.148 Extrabudgetary resources for the subprogramme are estimated at \$61,550,000 and would provide for 132 posts (3 D-1, 12 P-5, 32 P-4, 18 P-3, 11 P-2/1 and 56 Local level), as well as non-post resources. The resources would be used mainly to support the scaling up of efforts to improve waste management and strengthen collaboration with countries and stakeholders towards a pollution-free planet. The estimated resource level for 2023 reflects no change compared with the estimates for 2022.

**Subprogramme 6
Finance and economic transformations**

14.149 The proposed regular budget resources for 2023 amount to \$2,002,000 and reflect an increase of \$33,000 compared with the appropriation for 2022. The proposed increase is explained in paragraph 14.107 (d). Additional details on the distribution of resources in 2023 are reflected in table 14.33 and figure 14.XXX.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

14.150 Extrabudgetary resources for the subprogramme are estimated at \$39,600,000 and would provide for 100 posts (2 D-2, 3 D-1, 12 P-5, 17 P-4, 25 P-3, 15 P-2/1, 2 National Professional Officer and 24 Local level), as well as non-post resources. The resources would be used mainly to support countries and other stakeholders in increasing advocacy of sustainable economies, including trade policies, to accelerate the shift to more sustainable and equitable patterns of consumption, production and investment. In addition, the resources will support the enhancement of economic principles and standards enabling private finance and business, and associated value chains, to improve their environmental sustainability. The estimated resource level for 2023 reflects no change compared with the estimates for 2022.

**Subprogramme 7
Science policy**

14.151 The proposed regular budget resources for 2023 amount to \$3,147,100 and reflect an increase of \$66,000 compared with the appropriation for 2022. The proposed increase is explained in paragraph 14.107 (e). Additional details on the distribution of resources in 2023 are reflected in table 14.34 and figure 14.XXXI.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

14.152 Extrabudgetary resources for the subprogramme are estimated at \$22,000,000 and would provide for 74 posts (6 D-1, 11 P-5, 12 P-4, 9 P-3, 5 P-2/1 and 31 Local level), as well as non-post resources. The resources would be used mainly to empower Governments and other stakeholders to make evidence-based decisions through environmental assessments, identification of emerging issues and fostering of policy action to achieve the outcomes of subprogramme 1, Climate action, subprogramme 3, Nature action, and subprogramme 5, Chemicals and pollution action. The estimated resource level for 2023 reflects no change compared with the estimates for 2022.

Programme support

- 14.153 The programme support component comprises services provided mainly by the Corporate Services Division. The objective is to ensure efficient and effective development and delivery of the programmatic priorities of the medium-term strategy, underpinned by sound management and leadership practices with a reinforced accountability framework that clarifies roles and responsibilities. Programme management and support provide guidance on programme and project design, delivery and closure; governance of resources; corporate policy development and oversight; programme monitoring and reporting; building of staff knowledge and capacity; and the development of programme and resource management tools that support decision-making.
- 14.154 The Division is also responsible for the strategic management of UNEP financial, human and information technology resources, ensuring alignment of the resources with programmatic needs and strategic objectives, such as gender balance in the workplace. It works in close collaboration and coordination with the United Nations Office at Nairobi and its other United Nations service providers, including the United Nations Office at Geneva, in respect of accounting, payroll and payments, recruitment and staff services, staff development, network and other systems administration, information and communications technology, procurement and inventory management. It also interacts with the United Nations Office at Nairobi in the areas of host country relations, buildings management, conference management, medical services, and security and safety.
- 14.155 The proposed regular budget resources for 2023 amount to \$1,138,100 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of resources in 2023 are reflected in table 14.35 and figure 14.XXXII.

Extrabudgetary resources

14.156 Extrabudgetary resources for the component are estimated at \$19,900,000 and would provide for 90 posts (3 D-1, 8 P-5, 15 P-4, 14 P-3, 2 P-2/1 and 48 Local level), as well as non-post resources. The resources would be used mainly to support effective programme delivery; governance of resources; corporate policy development and oversight; enhanced risk management; programme monitoring and reporting; building of staff knowledge and capacity; and the development of programme and resource management tools that support decision-making. The estimated resource level for 2023 reflects no change compared with the estimates for 2022.

Annex I

Organizational structure and post distribution for 2023¹

Abbreviations: ASG, Assistant Secretary-General; GS (OL), General Service (Other level); GS (PL), General Service (Principal level); LL, Local level; NPO, National Professional Officer; RB, regular budget; USG, Under-Secretary-General; XB, extrabudgetary.

¹ The proposed reassignments and redeployments (geographical), explained in paragraph 14.107 above, are presented entirely within the "Regional offices" organizational unit of the organigramme and do not entail a change in the organizational structure.

Annex II

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Board of Auditors

[A/76/5/Add.7](#), chap. II

The Board recommends that UNEP tailor a standard operating procedure that clearly defines the responsibility of the divisions/regional offices in aligning the actual expenses with the allocated budget in total and within subprogrammes (para. 67).

The Board recommends that UNEP enhance reporting to the Budget Steering Committee with regard to the budget performance of divisions and regional offices to take necessary action in case of an overrun of expenses with regard to the entire budget and/or at a subprogramme level (para. 68).

Advisory Committee on Administrative and Budgetary Questions

[A/76/7](#)

The Advisory Committee trusts that an update, with more detailed information, on the assistance provided by UNEP in the implementation of phase two of the environment strategy, including to individual peacekeeping missions, will be provided in the next overview report on the financing of peacekeeping operations (para. IV.113).

The recommendation has been implemented. The standard operating procedures have been issued and budget performance reports are issued monthly. In addition, various monitoring reports have been developed in Umoja.

The recommendation has been implemented. In 2021, UNEP provided a budget performance report to the Budget Steering Committee. This will continue in the subsequent years.

The direct role of UNEP in the Rapid Environment and Climate Technical Assistance Facility ceased in 2021 with the strategic work in setting up the facility completed and the structure and operations fully in place. UNEP maintains a role in strategic guidance through a position on the Steering Committee of the Facility.

Annex III

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Level</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 2, Digital transformations in supporting environmental action	3	P-4	Reassignment of 3 P-4 Humanitarian Officers as Data Specialists	The proposed reassignment of these posts relates to the realignment of the programmatic structure of UNEP as approved by the United Nations Environment Assembly in its decision 5/2 and the General Assembly in its resolution 76/236 . In that context, reassignments are proposed to align the functions of these positions with the new subprogramme 2, Digital transformations in supporting environmental action, and to accelerate the digital transformation of UNEP over the next four years through a focus on stronger capabilities for data, innovation, strategic foresight, behavioural science, and results.
Subprogramme 2, Digital transformations in supporting environmental action	1	P-3	Reassignment of 1 P-3 Coordinator Programme Management as Data Analyst and redeployment (geographical) of the same post from Manama to Beirut (see also reason for change below for geographical redeployment)	The proposed reassignments are presented entirely within the “Regional offices” organizational unit of the organigramme (see annex I).
Subprogramme 3, Nature action	1	D-1	Redeployment (geographical) of 1 D-1 Chief of Service Programme Management from Manama to Beirut	The proposed redeployments (geographical) would strengthen the regional presence of UNEP and enhance support provided to the countries of the region as they progress towards the achievement of environmental dimensions of the Sustainable Development Goals. Moreover, the proposed redeployments would consolidate the presence of UNEP in the region and contribute towards the full, efficient, and effective implementation of mandates.
	1	P-4	Redeployment (geographical) of 1 P-4 Programme Management Officer from Manama to Beirut	The proposed redeployments (geographical) would also strengthen and optimize collaboration by UNEP with other United Nations entities operating within the region, in line with the Secretary General’s reform agenda and General Assembly resolution 72/279 .
Subprogramme 4, Environmental governance	1	P-3	Redeployment (geographical) of 1 P-3 Programme Management Officer from Manama to Beirut	The proposed redeployments (geographical) are presented entirely within the “Regional offices” organizational unit of the organigramme (see annex I) and do not entail a change in the location of the posts within the organizational structure.
Subprogramme 6, Finance and economic transformations	1	P-3	Redeployment (geographical) of 1 P-3 Programme Management Officer from Manama to Beirut

Foreword

Over the course of 2023, the United Nations Human Settlements Programme (UN-Habitat) will act on its bold and ambitious vision of “a better quality of life for all in an urbanizing world”, working with Member States and partners to build inclusive, safe, resilient and sustainable cities and communities. UN-Habitat promotes urbanization as a positive transformative force for people and communities, reducing inequality, discrimination and poverty.

The midterm review of the strategic plan for the period 2020–2023 demonstrated its strength as a robust framework to guide the normative and operational work of UN-Habitat while enabling adaptation to evolving conditions. As the world emerges from the coronavirus disease (COVID-19) pandemic, we see even more clearly the systemic inequalities in urban areas. The urban poor are the least responsible and the most vulnerable. Cities are the epicentre of environmental challenges, facing eroding seashores, increasing energy demands and the greatest impact from more frequent disasters. As UN-Habitat rises to these challenges, the budget set out in the present document stabilizes its core funding, ensuring the proper balance and integration of normative and operational work.

Sustainable urban development has a catalytic impact on development, delivering improved living conditions for those furthest behind. Well-planned urbanization resulting in efficient cities drives the sustainable development agenda across social and cultural change, environmental protection and economic growth. In addition, sustainable urban transformation presents an opportunity to work with all types of actors, in particular those traditionally excluded from such processes. We must act now.

The proposed budget for 2023 positions UN-Habitat to effectively deliver on its mandates and to efficiently respond to emerging situations across its programme of work.

(Signed) Maimunah **Mohd Sharif**
Executive Director, United Nations Human Settlements Programme

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 15.1 The United Nations Human Settlements Programme (UN-Habitat) is responsible for sustainable urbanization and human settlements in the United Nations system. It supports Member States in the development of sustainable cities and human settlements through its normative and operational work at the global, regional, national and local levels. UN-Habitat also leads and coordinates the monitoring of and reporting on global progress in the implementation of the New Urban Agenda and Sustainable Development Goal 11. The mandate derives from priorities established by General Assembly resolutions and decisions, including resolution 3327 (XXIX), by which the Assembly established the United Nations Habitat and Human Settlements Foundation, and resolution 32/162, by which the Assembly established the United Nations Centre for Human Settlements (Habitat). The Assembly, through its resolution 56/206, transformed it to the United Nations Human Settlements Programme (UN-Habitat), effective 1 January 2002. The Assembly, through its resolution 73/239, established a new governance structure for the Programme, consisting of the universal UN-Habitat Assembly, the 36-member Executive Board and the Committee of Permanent Representatives.
- 15.2 The Programme's support is aimed at developing the capacity at all levels of government and other key stakeholders to formulate and implement policies, plans and concrete activities for sustainable urban development. Such support is also provided through the implementation of projects under the regular programme of technical cooperation and the United Nations Development Account.

Strategy and external factors for 2023

- 15.3 Globally, 56 per cent of the population lives in cities. This share is expected to rise to 70 per cent by 2050, continuing to make urbanization one of the most significant trends of the twenty-first century. Regional and sociopolitical disparities continue to influence who benefits from urbanization. However, some 90 per cent of urban growth is taking place in less developed regions, where it is largely unplanned and capacities and resources are most constrained, while in other parts of the world many cities are experiencing negative growth and shrinking populations. Unplanned urban growth fuels the expansion of informal settlements and slums, resulting in an increase in urban poverty, inequality and lack of adequate and affordable housing. Globally, more than 1.6 billion people live in inadequate housing and more than 1 billion live in slums and informal settlements. Of significance to the programme of work are the estimated 281 million international migrants in 2020, most of whom live in urban areas, often under difficult conditions.
- 15.4 High levels of inequality and exclusion are persistent trends in urban areas; income inequality has increased in urban areas for more than two thirds of the world's population since 1980. Cities are also hotspots for environmental and energy challenges, accounting for 60 to 80 per cent of global energy consumption, 70 per cent of global greenhouse gas emissions and more than 70 per cent of resource use. The urban poor, living in risk-prone and underserved areas, suffer the worst consequences of climate change-related disasters and natural and human-made crises. The coronavirus disease (COVID-19) pandemic has exacerbated the systemic inequalities that exist across territories and urban areas, where the urban poor are disproportionately affected because of crowded and underserved environments. Supporting knowledge-based approaches for urban and territorial development will contribute to improving living conditions in all settlements and reducing disadvantages in specific locations. Support will be provided to local governments to invest in social, economic, institutional and financial innovations for a sustainable socioeconomic recovery. Partnerships will catalyse support for cities in building more resilient budgets and fiscal frameworks in support of local service delivery and local economic development. As set out in its report *Cities*

and Pandemics: Towards a More Just, Green and Healthy Future, UN-Habitat will support cities in reshaping urban planning solutions that are more sustainable and integrated, supported by innovation and technology to become healthier and more resilient.

- 15.5 The strategy of UN-Habitat for delivering the programme plan in 2023 continues to be driven by the strategic plan for the period 2020–2023. In the midterm review of the plan (HSP/OECPR.2021/2), it was concluded that it remains a solid framework for recovery and a road map for achieving the Sustainable Development Goals. The new organizational structure, put in place in early 2020, has allowed for more coherence across the normative and operational work of UN-Habitat and more integrated programming, delivering results against more outcomes across the subprogrammes, as detailed in the Programme’s project portfolio review (HSP/EB.2021/19/Add.1).
- 15.6 In addition, UN-Habitat flagship programmes continue to innovate fast-track integration between its normative and operational work, scaling up and accelerating the impact of the organization. In 2023, UN-Habitat will further advance the following flagship programmes:
- (a) “Sustainable Development Goals Cities” (SDG Cities), which is aimed at advancing the overall implementation of the Goals at the local level by supporting cities in developing reliable data, undertaking evidence-based planning and implementing transformative projects (contributing to all subprogrammes);
 - (b) “RISE-UP: resilient settlements for the urban poor”, which works to leverage large-scale investment to build urban adaptation and climate resilience in global hotspots of vulnerability and address issues of spatial inequality (contributing mainly to subprogrammes 1 and 3);
 - (c) “Inclusive cities: enhancing the positive impacts of urban migration”, which supports local and national authorities in creating inclusive and urban environments for all people (contributing mainly to subprogrammes 1 and 4);
 - (d) “Inclusive, vibrant neighborhoods and communities”, which supports urban regeneration of towns and cities with a view to addressing spatial inequality (contributing mainly to subprogrammes 1 and 3);
 - (e) “People-centred smart cities”, which supports digital transformation for sustainable urbanization (contributing mainly to subprogrammes 1 and 2).
- 15.7 In 2023, the programme will continue to mainstream social inclusion as a process and outcome to address cross-cutting issues relating to women and girls, older persons, persons with disabilities, children and young people. UN-Habitat will continue to strengthen its programmatic approach to leaving no one behind by focusing on the spatial dimension of exclusion and the self-reinforcing mechanisms of marginalization, thereby assisting Governments in providing basic services, housing and public goods in the most deprived areas of cities. UN-Habitat thematic areas of resilience and urban safety remain cross-cutting in guiding frameworks, tools and capacity-building materials, setting standards, proposing norms and principles and sharing good practices on social inclusion issues. Global networks such as the Global Land Tool Network, the Global Water Operators’ Partnerships Alliance, the Resilient Cities Network, the Global Network on Safer Cities, the Global Network of Urban Planning and Design Labs and the Global Network of Public Space will be systematically engaged to develop and test these tools.
- 15.8 To better meet the needs of Member States and to engage a wider audience, UN-Habitat will strengthen capacity-building initiatives, digitization of tools and virtual e-learning programmes. The UN-Habitat capacity-building strategy for the implementation of the Sustainable Development Goals and the New Urban Agenda, adopted by its Executive Board in 2020, provides a clear framework to facilitate greater coordination, coherence and monitoring of results and to improve the delivery of capacity-building services to Member States and local governments for greater impact and resource efficiency.
- 15.9 UN-Habitat will continue to build on its experience of implementing large-scale programmes and projects at the local, national and regional levels to guide technical cooperation work and ensure that

it has a demonstrable impact on the lives of beneficiaries. Over the years, UN-Habitat has developed a wide range of diverse projects, focused in large part on integrated programming for sustainable urbanization, as well as activities ranging from crisis response to post-disaster and post-conflict reconstruction and rehabilitation.

- 15.10 In its catalytic role as a knowledge hub and partner convenor, UN-Habitat will carry out advocacy, communication and outreach activities across the four subprogramme themes and mobilize public and political support. It will serve as the secretariat, co-chair and champion of Local2030 Coalition in the Decade of Action for the Sustainable Development Goals to mobilize the support of national Governments, private industry, local governments and various non-State organizations, together with the United Nations system, to coordinate action at the local level to accelerate the achievement of the Goals. It will continue to leverage advocacy and knowledge platforms, including its own website, the Urban Agenda Platform and key global events such as World Cities Day and World Habitat Day, regional ministerial conferences and the 2023 UN-Habitat Assembly.
- 15.11 As a focal point for sustainable urbanization and human settlements, UN-Habitat will continue to monitor and report on global trends and provide evidence for policymaking. It will further develop the Urban Agenda Platform, the global urban monitoring framework, an agreed operational definition of urban areas and specialized tools for spatial analysis. Progress will continue to be made in 2023 in the deployment of technologies for data collection and analysis, visualization and management of information. UN-Habitat will also continue to support Member States and other stakeholders in reporting on the implementation of the New Urban Agenda, including as part of the reporting on the Sustainable Development Goals (voluntary national and local reviews) and towards other global agendas.
- 15.12 For 2023, UN-Habitat planned deliverables will support Member States in their ongoing management of and recovery from the COVID-19 pandemic. Such planned deliverables and activities include assisting Governments in supporting increased access to water and sanitation and adequate housing, advocating for the prevention of evictions and measuring and reducing spatial vulnerability under subprogramme 1, as well as preparing urban planning strategies and local resilience programmes under all subprogrammes. UN-Habitat will also deploy advisory services, innovative solutions and knowledge packages to support Member States towards sustainable socioeconomic recovery while also addressing climate change, guided by the Secretary-General's policy brief on COVID-19 in an urban world under all subprogrammes.
- 15.13 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. Examples of lessons learned and best practices include the continuation of virtual and hybrid meeting modalities where possible for technical support and for expert group meetings, and the development of online training to complement existing tools of UN-Habitat. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.
- 15.14 With regard to cooperation with other entities at the global, regional, national and local levels, UN-Habitat will continue its close cooperation with international and regional organizations and other regional actors, such as the Organisation for Economic Co-operation and Development (on national urban policies), the World Bank and the European Union (on urban recovery frameworks), as well as regional development banks. UN-Habitat will maintain its focus on partnerships with local authorities and their associations and city networks, as well as partnerships with grass-roots organizations, foundations, international financial institutions, the private sector and academic institutions to support municipal efforts in the localization of the Sustainable Development Goals.
- 15.15 With regard to inter-agency coordination and liaison, UN-Habitat will continue to collaborate with the Department of Economic and Social Affairs and the United Nations regional economic and social

commissions and strengthen its strategic partnerships with other United Nations agencies, building on the United Nations system-wide strategy on sustainable urban development and agency-specific collaborative frameworks. It will also collaborate with the resident coordinator system to improve the integration of urban issues and territorial approaches through the common country assessments and the formulation of the United Nations Sustainable Development Cooperation Frameworks.

- 15.16 To pursue stronger integration of environmental sustainability into urban development, UN-Habitat will continue to strengthen its collaboration with the United Nations Environment Programme. It will collaborate with the Office of the United Nations High Commissioner for Refugees, the United Nations Development Programme (UNDP), the International Organization for Migration, the United Nations Office for Disaster Risk Reduction, the World Food Programme, the Mayors Migration Council and the Resilient Cities Network to integrate sustainable urban development into resilience, humanitarian response and urban recovery. UN-Habitat will collaborate with the World Health Organization and the United Nations Children's Fund on the monitoring of water and sanitation and the integration of health considerations into its planning work. It will reinforce its partnership with the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) to strengthen gender equality and the empowerment of women in its work and initiatives.
- 15.17 With regard to external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) Adequate unearmarked extrabudgetary resources are available to implement the planned work and produce the deliverables;
 - (b) Countries remain committed to the New Urban Agenda and the 2030 Agenda for Sustainable Development;
 - (c) Ongoing requests are received from national and local governments for policy advice and technical assistance from UN-Habitat in the development and implementation of their urban policies, plans and strategies;
 - (d) Urban indicators, data and information are used to formulate policies, with adequate mechanisms available for impact monitoring and performance assessments;
 - (e) Countries in which UN-Habitat delivers large programmes will maintain political, economic and social conditions that allow for the implementation of programmes and projects.
- 15.18 UN-Habitat integrates a gender perspective in its operational activities, deliverables and results, as appropriate, to ensure the safety of women and their inclusion in cities by utilizing its strategic results framework and gender policy and action plan, which are aligned with the strategic plan for the period 2020–2023. Furthermore, the Advisory Group on Gender Issues advises the Executive Director on how to best promote gender equality and the empowerment of women in sustainable urban development through its flagship programmes. UN-Habitat, in collaboration with UN-Women, will continue to support Member States with policy, legislation, planning and financing instruments to implement integrated and inclusive land and housing policies that incorporate a gender perspective, improve tenure security for all and address the intersecting areas of Sustainable Development Goals 5 and 11.
- 15.19 In line with the United Nations Disability Inclusion Strategy, UN-Habitat will continue to work with its partners, including the World Blind Union and World Enabled, to integrate disability inclusion into its programmatic work. It will create a comprehensive accessibility assessment and action plan that will ensure that disability inclusion is mainstreamed throughout the organization's work, highlight good practices and identify key areas that require capacity development, technical resources and assistance. The action plan will strengthen the environmental and social safeguards framework that is applied to all projects, and disability inclusion will be incorporated as an integral part of each project submitted for approval.

Programme performance in 2021

Impact of the pandemic

- 15.20 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular cities being asked to delay technical support for the Sustainable Development Goals under all subprogrammes and city resilience plans under subprogramme 4, as the priority remained the immediate response to and recovery from the pandemic. The programme shifted its focus to raise awareness of the New Urban Agenda and the development of the related online courses available in all official languages of the United Nations, working closely with the Economic and Social Commission for Western Asia for Arabic, in order to scale up outreach and awareness around the transformative potential of sustainable urbanization, which in return could facilitate recovery from the pandemic and help to accelerate progress towards the Goals.

Legislative mandates

- 15.21 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

3327 (XXIX)	Establishment of the United Nations Habitat and Human Settlements Foundation	71/327	The United Nations in global economic governance
34/114	Global report on human settlements and periodic reports on international cooperation and assistance on human settlements	72/146 72/226	Policies and programmes involving youth Implementation of the outcomes of the United Nations Conferences on Human Settlements and on Housing and Sustainable Urban Development and strengthening of the United Nations Human Settlements Programme (UN-Habitat)
42/146	Realization of the right to adequate housing		
53/242	Report of the Secretary-General on environment and human settlements		Women in development
55/2	United Nations Millennium Declaration	72/234	Eradicating rural poverty to implement the 2030 Agenda for Sustainable Development
S-25/2	Declaration on Cities and Other Human Settlements in the New Millennium	74/237	United Nations Conference on the Midterm Comprehensive Review of the Implementation of the Objectives of the International Decade for Action, "Water for Sustainable Development", 2018–2028
56/206	Strengthening the mandate and status of the Commission on Human Settlements and the status, role and functions of the United Nations Centre for Human Settlements (Habitat)	75/212	Ensuring access to affordable, reliable, sustainable and modern energy for all
64/292	The human right to water and sanitation	75/221	Implementation of the outcomes of the United Nations Conferences on Human Settlements and on Housing and Sustainable Urban Development and strengthening of the United Nations Human Settlements Programme (UN-Habitat)
67/291	Sanitation for All	75/224	
70/1	Transforming our world: the 2030 Agenda for Sustainable Development		
71/256	New Urban Agenda		

UN-Habitat Assembly resolutions and decisions

1/1	United Nations Human Settlements Programme strategic plan for the period 2020–2023	1/4	Achieving gender equality through the work of the United Nations Human Settlements Programme to support inclusive, safe, resilient and sustainable cities and human settlements
1/2	United Nations System-Wide Guidelines on Safer Cities and Human Settlements		
1/3	Enhancing capacity-building for the implementation of the New Urban Agenda and the urban dimension of the 2030 Agenda for Sustainable Development	Decision 1/3	Arrangements for the transition towards the new governance structure of the United Nations Human Settlements Programme

Executive Board decisions

2019/1	Implementation of the strategic plan for the period 2014–2019 and the strategic plan for the period 2020–2023, and approval of the work programme and budget for 2020	2021/2	Financial, budgetary and administrative matters of the United Nations Human Settlements Programme, including improvement of its internal management, policies and procedures and its actions to strengthen protection against sexual and any other type of exploitation and abuse and sexual harassment in the workplace
2019/2	Financial, budgetary and administrative matters of the United Nations Human Settlements Programme		
2019/3	Implementation of normative and operational activities of the United Nations Human Settlements Programme, including the resolutions and decisions of the United Nations Human Settlements Assembly	2021/3	Implementation of the normative and operational activities of the United Nations Human Settlements Programme, including the resolutions and decisions of the United Nations Habitat Assembly and reporting on the programmatic activities of the United Nations Human Settlements Programme in 2020, as well as the subprogrammes, flagship programmes and technical cooperation activities, and update on the United Nations Human Settlements Programme response to the coronavirus pandemic
2020/3	Implementation of the strategic plan for the period 2014–2019, the strategic plan for the period 2020–2023, approval of the draft work programme and draft budget for 2021, implementation by the United Nations Human Settlements Programme of the reform of the development system and management of the United Nations, and alignment of the planning cycles of the Programme with the quadrennial comprehensive policy review process	2021/6	Work programme and budget, implementation of the strategic plan for the period 2020–2023, and alignment of the planning cycles of the United Nations Human Settlements Programme with the quadrennial comprehensive policy review process
2020/4	Financial, budgetary and administrative matters of the United Nations Human Settlements Programme		
2020/5	Implementation of normative and operational activities of the United Nations Human Settlements Programme, including resolutions and decisions of the United Nations Habitat Assembly, and reporting on the programmatic activities of the Programme in 2020 and the implementation of subprogrammes, flagship programmes and technical cooperation activities	2021/7	Implementation of the normative and operational activities of the United Nations Human Settlements Programme, reporting on its programmatic activities in 2021, implementation of its subprogrammes, flagship programmes and technical cooperation activities and the high-level meeting of the General Assembly to assess progress in the implementation of the New Urban Agenda
2021/1	Status of the draft work programme and the draft budget for 2022; implementation by the United Nations Human Settlements Programme of the reform of the development system and management of the United Nations and alignment of the United Nations Human Settlements Programme planning cycles with the quadrennial comprehensive policy review process		

Committee of Permanent Representatives recommendations

1/1	Implementation of the resolutions adopted by the United Nations Habitat Assembly at its first session, in May 2019	1/3	Quadrennial report of the Secretary-General on the implementation of the New Urban Agenda, the high-level meeting of the General Assembly to assess progress in the implementation of the New Urban Agenda, and the eleventh session of the World Urban Forum
1/2	Implementation of resolution 1/1 on the United Nations Human Settlements strategic plan for the period 2020–2023		

Governing Council resolutions

19/4	Cooperation between the United Nations Human Settlements Programme and the United Nations Environment Programme	20/6	Best practices, good policies and enabling legislation in support of sustainable urbanization and the attainment of internationally agreed development goals
19/11	Strengthening the United Nations Habitat and Human Settlements Foundation		

Part IV International cooperation for development

20/16	Enhancing the involvement of civil society in local governance	24/5	Pursuing sustainable development through national urban policies
21/3	Guidelines on decentralization and strengthening of local authorities	24/7	Making slums history: a worldwide challenge
21/7	Sustainable public-private partnership incentives for attracting large-scale private-sector investment in low-income housing	24/9	Inclusive national and local housing strategies to achieve the Global Housing Strategy paradigm shift
21/8	Africa fund/financing mechanism on slum prevention and upgrading	24/11	Promoting sustainable urban development by creating improved economic opportunities for all, with special reference to youth and gender
21/9	Women's land and property rights and access to finance		
21/10	Strengthening the Habitat and Human Settlements Foundation: experimental financial mechanisms for pro-poor housing and infrastructure	24/13	Country activities by the United Nations Human Settlements Programme
22/9	South-South cooperation in human settlements	25/1	Contribution of the United Nations Human Settlements Programme to the post-2015 development agenda in order to promote sustainable urban development and human settlements
23/3	Support for pro-poor housing	25/2	Strengthening national ownership and operational capacity
23/4	Sustainable urban development through access to quality urban public spaces	25/6	International guidelines on urban and territorial planning
23/8	Third United Nations conference on housing and sustainable urban development	25/7	United Nations Human Settlements Programme governance reform
23/10	Future activities by the United Nations Human Settlements Programme in urban economy and financial mechanisms for urban upgrading, housing and basic services for the urban poor	26/4	Promoting safety in cities and human settlements
23/17	Sustainable urban development through expanding equitable access to land, housing, basic services and infrastructure	26/5	Regional technical support on sustainable housing and urban development by regional consultative structures
24/2	Strengthening the work of the United Nations Human Settlements Programme on urban basic services	26/6	World Urban Forum
		26/9	Human settlements development in the Occupied Palestinian Territory

Economic and Social Council resolutions

2003/62	Coordinated implementation of the Habitat Agenda	2020/7	Affordable housing and social protection systems for all to address homelessness
2017/24	Human settlements	2021/7	Mainstreaming a gender perspective into all policies and programmes in the United Nations system

Subprogramme 1**Reduced spatial inequality and poverty in communities across the urban-rural continuum***General Assembly resolution*

69/213	Role of transport and transit corridors in ensuring international cooperation for sustainable development	76/133	Inclusive policies and programmes to address homelessness, including in the aftermath of the coronavirus disease (COVID-19)
74/141	The human rights to safe drinking water and sanitation		
74/299	Improving global road safety		

Subprogramme 2**Enhanced shared prosperity of cities and regions***General Assembly resolution*

75/176	The right to privacy in the digital age		
--------	---	--	--

Governing Council resolutions

24/3 Inclusive and sustainable urban planning and elaboration of international guidelines on urban and territorial planning

UN-Habitat Assembly resolution

1/5 Enhancing urban-rural linkages for sustainable urbanization and human settlements

**Subprogramme 3
Strengthened climate action and improved urban environment**

General Assembly resolutions

63/217	Natural disasters and vulnerability	74/219	Protection of global climate for present and future generations of humankind
67/263	Reliable and stable transit of energy and its role in ensuring sustainable development and international cooperation	75/216	Disaster risk reduction
69/225	Promotion of new and renewable sources of energy	75/218	Implementation of the United Nations Convention to Combat Desertification in Those Countries Experiencing Serious Drought and/or Desertification, particularly in Africa
73/228	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States	75/219	Implementation of the Convention on Biological Diversity and its contribution to sustainable development

Governing Council resolutions

22/3 Cities and climate change

**Subprogramme 4
Effective urban crisis prevention and response**

General Assembly resolutions

69/280	Strengthening emergency relief, rehabilitation and reconstruction in response to the devastating effects of the earthquake in Nepal	73/150	Assistance to refugees, returnees and displaced persons in Africa
69/283	Sendai Framework for Disaster Risk Reduction 2015–2030	73/230	Effective global response to address the impacts of the El Niño phenomenon
73/139; 74/118	Strengthening of the coordination of emergency humanitarian assistance of the United Nations	74/115	International cooperation on humanitarian assistance in the field of natural disasters, from relief to development
		74/160	Protection of and assistance to internally displaced persons

Governing Council resolutions

20/17	Post-conflict, natural and human-made disaster assessment and reconstruction	26/2	Enhancing the role of UN-Habitat in urban crisis response
23/18	Natural disaster risk reduction, preparedness, prevention and mitigation as a contribution to sustainable urban development		

Deliverables

15.22 Table 15.1 lists all cross-cutting deliverables of the programme.

Table 15.1
Cross-cutting deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	1
1. Implementation of the outcome of the United Nations Conference on Housing and Sustainable Urban Development (Habitat III) and strengthening of the United Nations Human Settlements Programme (UN-Habitat): report of the Secretary-General	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	7	19	17	29
Meetings of:				
2. The governing bodies (UN-Habitat Assembly, Executive Board and Committee of Permanent Representatives)	4	16	12	26
3. The Committee for Programme and Coordination	1	1	1	1
4. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
5. The Fifth Committee	1	1	1	1
6. The General Assembly on the review of the implementation of the New Urban Agenda	–	–	2	–
B. Generation and transfer of knowledge				
Publications (number of publications)	8	1	5	2
7. UN-Habitat flagship reports	5	–	2	–
8. <i>World Cities Report</i>	2	–	1	1
9. Second quadrennial report on the implementation of the New Urban Agenda	–	–	1	–
10. UN-Habitat annual report	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: consultations with all Member States on resolutions of the General Assembly and of the Economic and Social Council; briefings to all Member States on sustainable development issues and processes.				
Databases and substantive digital materials: social media materials and infographics for the high-level meeting on the implementation of the New Urban Agenda, social media materials about the New Urban Agenda and New Urban Agenda Illustrated, social media materials for the <i>World Cities Report</i> and the UN-Habitat annual report; Global Urban Indicators database; indicator framework to monitor the implementation of the quadrennial comprehensive policy review used by all Member States.				
D. Communication deliverables				
Outreach programmes, special events and information materials: flyers and factsheets about the high-level meeting on the implementation of the New Urban Agenda, materials, and flyers about the New Urban Agenda.				
External and media relations: interviews or commentaries about UN-Habitat flagship reports, <i>World Cities Report</i> ; articles or blogs about revitalizing the New Urban Agenda ahead of the high-level meeting on the implementation of the New Urban Agenda.				
Digital platforms and multimedia content: Urban Agenda Platform (www.urbanagendaplatform.org).				

Evaluation activities

15.23 The following evaluations completed in 2021 have guided the proposed programme plan for 2023:

- (a) Office of Internal Oversight Services (OIOS) and Joint Inspection Unit:
 - (i) Strengthening the role of evaluation and the application of evaluation findings on programme design, delivery and policy directives (OIOS);
 - (ii) Evaluation of the prevention, response and victim support efforts against sexual exploitation and abuse by United Nations Secretariat staff and related personnel (OIOS);
 - (iii) Evaluation synthesis of strategic planning (OIOS);

- (iv) Review of policies and platforms in support of learning: towards more coherence, coordination and convergence (Joint Inspection Unit);
- (v) Review of United Nations system support for landlocked developing countries to implement the Vienna Programme of Action (Joint Inspection Unit);
- (b) UN-Habitat:
 - (i) Evaluation of the impact and outcomes of the tenth session of the World Urban Forum;
 - (ii) Evaluation of the UN-Habitat policy and plan for gender equality and the empowerment of women in urban development and human settlements 2014–2019;
 - (iii) End-term programme evaluation of the Kabul Strengthening Municipal Nahias Programme 2016–2020;
 - (iv) Terminal evaluation of programme support for land governance for peace, stability and reconstruction;
 - (v) Evaluation of programme support for the development of the national urban policy and the New Urban Agenda in the Plurinational State of Bolivia;
 - (vi) Evaluation of RE-INTEG Mogadishu: innovative durable solutions for internally displaced persons and returnees in Mogadishu;
 - (vii) Final evaluation of project support for improving the living environment and disaster prevention capacity in Cambodia;
 - (viii) Evaluation of the UN-Habitat National Urban Policy Programme;
 - (ix) Terminal evaluation of programme support for land governance for peace, stability and reconstruction in post-conflict era (2014–2019) in the eastern Democratic Republic of the Congo.

15.24 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2023. For example, on the basis of recommendations from the evaluation of the tenth session of the World Urban Forum, UN-Habitat will strengthen results-based management of the next World Urban Forum programme starting in 2023, with improved indicators and appropriate baselines and targets to measure impact and outcomes. Lessons from the evaluation of its gender equality policy and plan have been used to address management of the Advisory Group on Gender Issues. As highlighted in the OIOS report on strengthening the role of evaluation, UN-Habitat presented the challenge of inadequate staffing and financial resources to its Executive Board with the intent of mobilizing additional extrabudgetary resources to address these challenges. On the basis of recommendations stemming from the evaluation of the programme in the Democratic Republic of the Congo, UN-Habitat will improve partnerships and coordination throughout its programmes and projects in 2023.

15.25 The following evaluations are planned for 2023:

- (a) Evaluations to be conducted by OIOS: UN-Habitat, subprogramme 2;
- (b) Evaluations to be conducted by the Joint Inspection Unit: the programme of work for 2023 will include system-wide projects and one management and administration review;
- (c) Evaluations to be conducted by UN-Habitat:
 - (i) 10 thematic or umbrella programmes/projects that will be closing in 2023;
 - (ii) Evaluation of two country programmes;
 - (iii) 2 thematic evaluations.

Programme of work

Subprogramme 1

Reduced spatial inequality and poverty in communities across the urban-rural continuum

Objective

- 15.26 The objective, to which this subprogramme contributes, is to reduce inequality between and within communities and to reduce poverty in communities across the urban-rural continuum through increased and equal access to basic services, sustainable mobility, accessible and safe public space, increased and secure access to land, adequate and affordable housing and effective human settlements growth and regeneration.

Strategy

- 15.27 To contribute to the objective, the subprogramme will:
- (a) Develop and disseminate toolkits, standards and technical guidelines to Member States and engage partner cities and local governments in policy dialogues, peer-to-peer support, the sharing of best practices, training sessions and other capacity-building initiatives in the areas of water, sanitation and energy, in a digitizing world;
 - (b) Mobilize national and local governments to improve their waste management practices and resource efficiency by rethinking, reducing, reusing and recycling materials and waste before and after consumption;
 - (c) Provide Member States with policy, legislation, planning and financing instruments to implement integrated, inclusive and gender-sensitive land and housing policies;
 - (d) Advocate for adequate, affordable housing and the prevention of unlawful forced evictions, as well as the implementation of sustainable building codes, regulations and sustainability certification tools for the housing sector;
 - (e) Provide technical assistance to national and local governments and cities seeking to develop specific bankable, catalytic and pilot urban interventions for urban expansion and regeneration and support partner cities in institutionalizing different approaches on urban regeneration through the development of specific plans, policies, technical guidelines and toolkits, in line with the International Guidelines on Urban and Territorial Planning and principles of sustainable urbanization;
 - (f) Support national and local governments in the recovery from COVID-19 in cities and human settlements by disseminating toolkits, best practices and technical guidelines for addressing the structural inequalities exposed by the pandemic, and scale up access to basic and social services, sustainable mobility and safe public space, in particular in urban slums and informal settlements and for people in vulnerable situations;
 - (g) Increase the focus on homelessness and recommend possible indicators on access to adequate, safe and affordable housing in the aftermath of the pandemic, in collaboration with the Department of Economic and Social Affairs.
- 15.28 In doing so, the subprogramme will assist Member States in making progress towards achieving Sustainable Development Goals 1, 2, 5, 6, 7, 10, 11, 12, 14 and 15.
- 15.29 The above-mentioned work is expected to result in:
- (a) Safer, more accessible and inclusive public spaces in urban areas;

- (b) Increased accessibility to adequate and affordable housing in urban areas, and strengthened capacities of policymakers to implement sustainable land governance systems;
- (c) Transformation and regeneration of urban areas into socially and economically inclusive neighbourhoods that offer improved quality of life to all, including improved access to basic services.

Programme performance in 2021

Enhanced waste management and resource efficiency in the world’s cities

15.30 Rapid urbanization, population growth and changing lifestyles have led to increased solid waste generation in the world’s cities, often overburdening existing systems. Uncontrolled solid waste is a threat to public and environmental health and one of the main sources of marine litter. UN-Habitat has been working with local governments and other stakeholders on improving waste data and monitoring, strengthening knowledge, technical capacity and governance, raising awareness and increasing investments for and commitments to waste management improvement. In 2021, the subprogramme launched the Waste Wise Cities tool, a practical guide to assess the environmental performance of municipal solid waste management, and invited member cities of the Waste Wise Cities network to collect baseline solid waste data. This has allowed local governments to close data gaps, enabling evidence-based decision-making, action planning and progress monitoring against the Sustainable Development Goals. Progress towards the objective is presented in the performance measure below (see figure 15.I).

Figure 15.I

Performance measure: number of local governments collecting data on municipal solid waste management using the Waste Wise Cities tool

Planned results for 2023

Result 1: inclusive, vibrant neighborhoods and communities

Programme performance in 2021 and target for 2023

- 15.31 The subprogramme’s work contributed to the adoption of urban regeneration policies by 17 cities, which did not meet the planned target of 32 cities, owing to local governments reprioritizing their efforts to respond to the COVID-19 pandemic. This caused a delay in the roll-out of activities and the establishment of partnerships of the subprogramme.
- 15.32 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 15.II).

Figure 15.II
Performance measure: number of cities adopting urban regeneration policies with support from the United Nations Human Settlements Programme (cumulative)

Result 2: increased access to basic services, sustainable mobility and slum upgrading programmes to strengthen community resilience to pandemics such as COVID-19 in slums and informal settlements

Programme performance in 2021 and target for 2023

- 15.33 The subprogramme’s work contributed to 2.9 million people in slums and informal settlements in 45 countries receiving access to basic services, which met the planned target.
- 15.34 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 15.III).

Figure 15.III
Performance measure: number of people in slums and informal settlements in 45 countries with access to basic services (cumulative)

(Millions)

Result 3: enhanced and expanded service delivery by local water and sanitation service providers
Proposed programme plan for 2023

- 15.35 While there has been progress in extending access to water and sanitation services in recent decades, billions of people still cannot count on clean drinking water and safe sanitation systems. Local water and sanitation service providers have a role to play in reaching the water- and sanitation-related dimensions of the Sustainable Development Goals, yet many face enormous challenges in supplying

existing and fast-growing urban populations. The subprogramme, under the Global Water Operators’ Partnerships Alliance, organized peer support exchanges between water operators, with the objective of strengthening their capacity, enhancing their performance and enabling them to provide better local water and sanitation services to more beneficiaries.

Lessons learned and planned change

- 15.36 The lesson for the subprogramme was the need to provide a tailored approach to support sanitation operators, distinct from the approach for water service providers, given their diverse institutional arrangements and service delivery models at the local level. In applying the lesson, the subprogramme will work with Governments, financing institutions, regional organizations and other major water operators’ partnership programmes to develop technical capacity among sanitation service providers on city-wide inclusive sanitation. The subprogramme will also encourage local sanitation operators to become members of the Global Water Operators’ Partnerships Alliance to enable access to the wide range of knowledge and technical support available. This will enable operators to expand their coverage and provide a broad range of sanitation services, including in informal settlements, in order to support progress on the second principle of the Sustainable Development Goals, namely leaving no one behind.
- 15.37 Expected progress towards the objective is presented in the performance measure below (see figure 15.IV).

Figure 15.IV
Performance measure: number of local sanitation operators providing more inclusive sanitation services (cumulative)

Deliverables

- 15.38 Table 15.2 lists all deliverables for the subprogramme.

Table 15.2
Subprogramme 1: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	50	50	36	36
1. Projects on urban basic services: mobility, water and sanitation, energy and solid waste management and safe, inclusive and accessible public space	15	15	12	12
2. Project on development of national and local policies on urban heritage, historical landscape and culture	1	1	1	1
3. Projects on housing, slum upgrading, innovative financing for housing and land readjustment and on integrated urban and territorial renewal and regeneration	12	12	8	8
4. Projects on land tenure security, land-based financing and implementation of the Secretary-General's guidance note on land and conflict	10	10	7	7
5. Projects on integrated urban and territorial planning and effective planning laws	9	9	6	6
6. Projects on urban monitoring, evidence-based policies for crime prevention and community safety and social cohesion in cities and human settlements	3	3	2	2
Seminars, workshops and training events (number of days)	79	79	49	53
7. Workshops and training sessions on urban basic services: mobility, water and sanitation, energy and solid waste management	29	29	20	20
8. Workshops and training sessions on slum upgrading, housing, heritage in urban development, regeneration and urban growth, urban design governance, public space, Global Network of Urban Planning and Design Labs and crime prevention and urban safety	20	20	12	12
9. Global and regional training workshops on land, housing, slum upgrading, housing studios and practitioner labs	7	7	5	5
10. Technical workshops on monitoring the Sustainable Development Goals and the New Urban Agenda	2	2	1	5
11. Training sessions on policy, planning and design, governance, legislation and finance and data collection	14	14	8	8
12. Training sessions on land and conflict and on land tenure, governance and financing; and expert group meetings on urban land governance in the Arab States region	7	7	3	3
Publications (number of publications)	3	3	3	1
13. Publication on land tenure and land degradation	1	1	1	–
14. Publication on land governance	1	1	1	–
15. Publication on affordable and sustainable housing, including homelessness	1	1	1	1
Technical materials (number of materials)	19	18	11	11
16. Compendium of policies, plans, good practices and experiences on city planning, urban regeneration, heritage conservation and extension	2	1	1	1
17. Best practices, guides, standards and case studies on increased and equal access to basic services, sustainable mobility and public space	2	2	2	2
18. Guide for land management and spatial plans for poverty reduction and spatial equality	2	2	1	1
19. Guidelines on the right to adequate housing and prevention of homelessness among those in vulnerable situations, including migrants	2	2	1	1
20. Guide series for innovative land, legal and financial mechanisms in relation to conservation and regeneration	1	1	1	1

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
21. Toolkits, housing profiles and technical guides for city leaders on planning, on managing and implementing affordable and sustainable housing and on slum upgrading programmes	4	4	2	2
22. Series of guides and tools to improve land management and tenure security	2	3	1	1
23. Guidelines and handbooks on slum upgrading solutions	3	2	2	2
24. Neighbourhood planning guidelines on participation and inclusive regeneration	1	1	–	–

C. Substantive deliverables

Consultation, advice and advocacy: technical advice to requesting Member States on implementation, monitoring and implementation of the New Urban Agenda and the Sustainable Development Goals; advisory services on the right to housing and tenure security for all, urban law reform and effective urban regeneration and growth management, urban land administration and management to different stakeholders (national and local governments, civil society, private sector, academic institutions and other United Nations entities).

Databases and substantive digital materials: UrbanLex database on urban law and digital materials on global commitments related to land, housing, urban basic services, mobility, energy, water and sanitation, solid waste management, air quality, climate change mitigation and adaptation, and cultural heritage; database currently contains 2,269 legal instruments from 105 countries and 6 geographic regions, categorized in 7 thematic areas.

D. Communication deliverables

Outreach programmes, special events and information materials: networks including Global Network of Public Space; Best Practices Awards; events with approximately 500 participants, brochures, leaflets and spotlights on slum upgrading, urban regeneration, public space and housing, urban land governance and management.

External and media relations: media kits, press releases, web stories and social media content on inclusive cities.

Digital platforms and multimedia content: video documentaries, infographics, presentations and webinars and 2 open digital platforms on urban safety, heritage, regeneration and urban growth.

Subprogramme 2 Enhanced shared prosperity of cities and regions

Objective

- 15.39 The objective, to which this subprogramme contributes, is to enhance the shared prosperity of cities and regions through improved spatial connectivity and productivity, increased and equitably distributed locally generated revenue and expanded deployment of frontier technologies and innovation.

Strategy

- 15.40 To contribute to the objective, the subprogramme will:
- (a) Support Member States and other partners in enhancing the contribution made by urbanization to productivity and inclusive economic development through the formulation of national urban policies and related legal, financial and implementation frameworks integrated into whole-of-government planning, policy and financing frameworks; knowledge transfer; capacity-building; and the development of tools on urban and rural territorial planning and design that supports balanced economic development across subnational territories;
 - (b) Provide technical assistance, capacity-building and advisory services to cities with regard to developing participatory and accountable budgeting approaches and optimizing local revenue systems through data collection, digitization and the development of municipal databases, and work to leverage private sources of capital for sustainable urban development;
 - (c) Strengthen the capacity of national and local governments to effectively procure, test and implement frontier technologies and innovations such as sensor networks, machine-to-machine communication,

artificial intelligence, virtual and augmented reality, geographic information systems, remote sensing and big data processing and visualization, while supporting their digital transition;

- (d) Provide a framework for socioeconomic recovery from COVID-19, climate action and safeguarding the environment and biodiversity, working at the subnational territorial level and taking account of local challenges, specificities, resources and opportunities, with a focus on the recovery of locally generated revenue, including land-based financing.
- 15.41 In doing so, the subprogramme will assist Member States in making progress towards Sustainable Development Goals 1, 8, 9, 10 and 11.
- 15.42 The above-mentioned work is expected to result in:
- Balanced territorial development and better-connected human settlements, while contributing to improved social inclusion, poverty reduction and climate action;
 - Enactment by local authorities of institutional and legal reforms conducive to the generation of additional financial resources, including through public-private partnerships and land-based revenue and financing tools;
 - Strengthened capacity of cities to address inequalities and bridge social, spatial and digital divides;
 - Local economic recovery measures from COVID-19.

Programme performance in 2021

Increasing municipal revenues for sustainable development

- 15.43 In 2021, the subprogramme continued to support cities in generating local revenue for sustainable development. In the self-declared autonomous region of Somaliland, the subprogramme, as part of the United Nations Joint Programme on Local Governance and Decentralized Service Delivery, supported local government counterparts on property registration. The work involved demarcating subzone boundaries, updating district administrative maps, classifying and naming roads, installing road signs and implementing mobile electronic payment systems. Across eight cities in the region, revenue increased by \$5.4 million between 2020 and 2021, including a \$2 million increase in Hargeysa. The increase in revenue enabled improved delivery of basic urban services through an increased budgetary allocation to infrastructure development. Following this success, the subprogramme has initiated similar technical support in Somalia, in the municipality of Garoowe in Puntland and the district of Baidoa in South-West State.
- 15.44 Progress towards the objective is presented in the performance measure below (see figure 15.V).

Figure 15.V

Performance measure: revenue generated in cities in the self-declared autonomous region of Somaliland and in Somali cities (cumulative)

(Millions of United States dollars)

Planned results for 2023

Result 1: strengthened capacities of cities to accelerate the implementation of the Sustainable Development Goals by linking evidence-based policies to investments

Programme performance in 2021 and target for 2023

- 15.45 The subprogramme's work contributed to 489 cities using the Sustainable Development Goal Cities initiative urban indicator and monitoring platform, which exceeded the planned target of 450 cities.
- 15.46 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 15.VI).

Figure 15.VI

Performance measure: number of cities using the Sustainable Development Goal Cities initiative urban indicator and monitoring platform (cumulative)

Result 2: a people-centred approach to urban innovation, digital technologies, smart cities and urbanization processes adopted by cities

Programme performance in 2021 and target for 2023

- 15.47 The subprogramme's work contributed to 5 local governments adopting people-centred digital transformation and smart city strategies that address the digital divide, which did not meet the planned target of 10 local governments. The target was not met owing to COVID-19 travel restrictions, which caused delays in implementation.
- 15.48 The subprogramme's work also contributed to 10 countries implementing urban innovation challenges, which met the planned target.
- 15.49 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 15.3).

Table 15.3
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Member States at the UN-Habitat Assembly note the potential of frontier technologies and innovation for sustainable urban development	10 cities benefit from a flagship programme on people-centred smart cities	5 local governments adopt people-centred digital transformation and smart city strategies that address digital divide 10 countries implement urban innovation challenges	20 local authorities implement digital transformation and smart city strategies and benefit from innovations addressing the digital divide	25 local authorities implement digital transformation and smart city strategies and benefit from innovations addressing the digital divide

Result 3: regional spatial development plans in Ethiopia for improved prosperity and balanced socioeconomic development

Proposed programme plan for 2023

15.50 The subprogramme recognizes that urbanization in most developing countries drives enormous changes in the spatial distribution of people, resources and consumption of land. However, in many countries, in particular in the developing world, these aspects are inadequately harnessed for sustainable development and often urbanization challenges outpace development gains. To harness urbanization and mitigate its negative externalities, there is need for a coordinated approach and clear policy directions accompanied by territorial spatial planning that promote well-functioning systems of cities and improved rural-urban linkages. The subprogramme has initiated a three-year programme of formulating regional spatial development plans across 10 regions of Ethiopia that will facilitate local and regional economic growth when implemented, through conducive road networks, land use designation and infrastructure development. Initial baseline studies are under way.

Lessons learned and planned change

15.51 The lesson for the subprogramme was the importance of effective spatial planning for the implementation of national development plans and the need to strengthen capacity in this area. In applying the lesson, the subprogramme will build the capacity of planning and economic development institutions in 10 regional states of Ethiopia and support them in formulating and implementing regional spatial development plans. These plans will include land use and regional infrastructure network schemes aimed at generating improved prosperity and balanced socioeconomic development, in line with national development goals.

15.52 Expected progress towards the objective is presented in the performance measure below (see table 15.4).

Table 15.4
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	Regional authorities in Ethiopia support the conduct of local economic and spatial studies in 10 regions	Regional authorities draft regional spatial development plans	Regional authorities endorse 10 regional spatial development plans

Deliverables

15.53 Table 15.5 lists all deliverables for the subprogramme.

Table 15.5

Subprogramme 2: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	50	48	29	29
1. Projects on spatial connectivity, urban policies and spatial frameworks, urban planning and design, urban-rural linkages and integrated territorial development, city planning, extension and design	15	20	14	14
2. Projects on spatial productivity, local economic development, urban and municipal finance, financing urban basic services and infrastructure	15	15	7	7
3. Projects on best practices, centres of excellence, university partnerships, prosperity indices, frontier technologies and legal and governance frameworks for sustainable, inclusive and innovative development of cities and regions	20	13	8	8
Seminars, workshops and training events (number of days)	66	66	39	39
4. Policy dialogues, seminars, workshops and training events on spatial connectivity, urban planning and design, metropolitan planning, urban and rural linkages, action planning, urban and territorial planning and national urban policies	44	44	25	25
5. Training events and workshops on use of information and communications technology, innovation, frontier technologies, best practices, legal and governance frameworks and prosperity indices for sustainable urban development and implementation of the New Urban Agenda and the Sustainable Development Goals	21	21	6	6
6. Training events and workshops on urban productivity, local economic development, urban and municipal finance, public financial management and local governance	1	1	8	8
Publications (number of publications)	2	2	2	2
7. National cities reports	2	2	2	2
Technical materials (number of materials)	30	30	11	11
8. Technical materials on spatial connectivity, urban planning and design, metropolitan planning, urban and rural linkages, action planning, urban and territorial planning and national urban policies	10	10	5	5
9. Technical materials on spatial productivity, local economic development, urban and municipal finance, financing urban basic services and infrastructure	10	10	3	3
10. Technical materials on frontier technologies and innovation, best practices, legal and governance frameworks and prosperity indices for sustainable urban development and implementation of the New Urban Agenda and the Sustainable Development Goals	10	10	3	3
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services to 20 Member States on national urban policy, urban-rural linkages, metropolitan development, territorial development, urban monitoring financing sustainable urban development, smart cities and private-sector focused engagement frameworks.				
Databases and substantive digital materials: national urban policy database comprising 159 countries; compendium of urban-rural linkages case studies; global municipal database, which includes 50 countries and 109 cities.				
D. Communication deliverables				
Outreach programmes, special events and information materials: brochures, leaflets, profiles and events on national urban policy, urban-rural linkages, metropolitan development, territorial development, urban monitoring financing sustainable urban development, smart cities and private-sector focused engagement frameworks.				
External and media relations: communiqués, press statements, press conferences and other communication materials to the media or other external entities.				
Digital platforms and multi-media content: content for social media.				

Subprogramme 3

Strengthened climate action and improved urban environment

Objective

- 15.54 The objective, to which this subprogramme contributes, is strengthened climate action and improved urban environments through reducing greenhouse gas emissions and improving air quality, improving resource efficiency and protecting ecological assets, and the effective adaptation of communities and infrastructure to climate change.

Strategy

- 15.55 To contribute to the objective, the subprogramme will:
- (a) Provide technical support for the development of low-emission city development that addresses emerging climate risks, adaptation investments, basic service provision and the integration of low-emission development and air quality strategies into urban mobility, public space and urban development strategies;
 - (b) Provide assistance on sustainable approaches to urban climate action to requesting Member States through knowledge transfer, capacity-building, policy advice and peer-to-peer engagement in regional networks;
 - (c) Broaden its engagement with Member States to scale up the urban dimension of nationally determined contributions and national adaptation plans, while strengthening the evidence base;
 - (d) Promote solutions to climate action for urban and peri-urban environmental protection, restoration and open public spaces, promote integrated solid waste management and address marine plastic litter reduction through the development of tools and guidelines as well as field projects;
 - (e) Support the development of energy- and resource-efficient standards for buildings and the integration of energy and resource efficiency principles into country-specific building and planning codes;
 - (f) Provide assistance in the formulation of policy and legislation, urban planning and design, multilevel governance and financing instruments through its flagship programme entitled “RISE-UP: resilient settlements for the urban poor”, which focuses on mobilizing investments to address climate resilience issues affecting urban communities in vulnerable situations;
 - (g) Support the implementation of global adaptation initiatives, such as the National Adaptation Plan Global Support Programme and the Nationally Determined Contributions Partnership, which contributes to the implementation the Paris Agreement on climate change;
 - (h) Promote an integrated approach to socioeconomic development, climate and health resilience through the provision of technical advice on technologies, processes and investment opportunities in the context of COVID-19.
- 15.56 In doing so, the subprogramme will assist Member States in making progress towards achieving Sustainable Development Goals 1, 5, 6, 7, 8, 9, 10, 11, 12, 11, 13, 14 and 15.
- 15.57 The above-mentioned work is expected to result in:
- (a) Multidimensional climate action and urban environment planning by partner cities that preserves, regenerates and restores urban biodiversity and reduces air and water pollution;
 - (b) Mobilization of additional financial resources for adaptation to climate change at the national and subnational levels;
 - (c) Development of COVID-19 recovery plans by partner cities and Member States;
 - (d) More climate- and pandemic-resilient cities, human settlements and communities.

Programme performance in 2021

Strengthened local climate action through innovation

- 15.58 To achieve the goals set out in the Paris Agreement, local climate action needs to be significantly accelerated. The subprogramme contributed to the acceleration of innovation in urban climate action. With a broad range of national and local government partners and other stakeholders, 27 Urban Thinkers Campuses on climate action were held, providing a space for critical exchange between urban researchers, professionals and decision makers.
- 15.59 The Innovate4Cities 2021 conference, held from 11 to 15 October 2021 under the theme “Science and innovation partnerships driving inclusive, resilient and climate-neutral cities”, was co-hosted by UN-Habitat and the Global Covenant of Mayors for Climate and Energy and co-sponsored by the Intergovernmental Panel on Climate Change, with registered participants from 159 countries. The conference outcomes guide city-level climate action, research and innovation in support of closing the implementation gap and makes such innovations available to urban practitioners. To sustain the momentum of urban climate innovation at the local level, the subprogramme held the first city innovation challenge to match the innovation needs of cities with the capacity of innovators. Initially four cities in Latin America, Africa and Europe were chosen and solutions to a wide range of challenges were offered by experts in the field to inform the development of innovative climate change mitigation measures. In 2022, the four cities will work with a task force of experts to kick-start the implementation process.
- 15.60 Progress towards the objective is presented in the performance measure below (see figure 15.VII).

Figure 15.VII

Performance measure: number of cities developing innovative climate change mitigation measures

Planned results for 2023

Result 1: accelerated climate action in 16 cities and eight countries around the world

Programme performance in 2021 and target for 2023

- 15.61 The subprogramme’s work contributed to 16 cities enacting legal frameworks for low-emission development strategies, which met the planned target.
- 15.62 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 15.VIII).

Figure 15.VIII
Performance measure: number of cities enacting legal frameworks for low-emission development strategies with support from the United Nations Human Settlements Programme (cumulative)

Result 2: participatory urban resilience action in sub-Saharan Africa

Programme performance in 2021 and target for 2023

15.63 The subprogramme’s work contributed to 12 distinct resilience action frameworks developed in sub-Saharan Africa, which did not meet the planned target of 14. The target was not met because of implementation delays experienced by three cities owing to COVID-19-related issues. Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 15.IX).

Figure 15.IX
Performance measure: total number of distinct resilience action frameworks developed in sub-Saharan Africa (cumulative)

Result 3: increased climate resilience of urban communities in Jordan and Lebanon

Proposed programme plan for 2023

15.64 The crisis in the Syrian Arab Republic has had profound humanitarian, socioeconomic and environmental impacts on the country’s population. Jordan and Lebanon are the largest refugee-hosting countries in the world relative to the size of their national population, and the two countries are the most water-scarce in the region, a challenge that has been further aggravated by climate change. Taking into consideration climate change vulnerabilities in selected cities, the subprogramme has developed urban master planning frameworks to increase the climate resilience of urban communities.

Lessons learned and planned change

15.65 The lesson for the subprogramme was that a stand-alone approach to climate change resilience without incorporating broader environmental, social and economic dimensions will not be as effective. In applying the lesson, the subprogramme will devise a comprehensive climate change adaptation system integrated into urban master plans that employs several complementary measures that can enable

economic growth and job creation, promote inclusion and social cohesion and foster sustainable urbanization. As part of these efforts, the subprogramme will build the capacity of municipalities and target communities to implement rainwater harvesting systems, greywater treatment and reuse systems, permaculture piloting and water-use-efficient irrigation systems using treated water.

15.66 Expected progress towards the objective is presented in the performance measure below (see figure 15.X).

Figure 15.X

Performance measure: number of people in Jordan, Lebanon and the Syrian Arab Republic who have benefited from climate change adaptation actions identified through the master planning process

Deliverables

15.67 Table 15.6 lists all deliverables of the subprogramme.

Table 15.6

Subprogramme 3: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	32	32	15	22
1. Projects on improving urban air quality, the urban environment, climate change mitigation, and increased access to low-emission basic services, more sustainable infrastructure and buildings	4	4	2	2
2. Improved policies, legal instruments, plans and strategies for better urban air quality, the urban environment, climate change mitigation and low-emission basic services and sustainable infrastructure and buildings	3	3	1	1
3. Projects on resilience-building and adaptation of communities and infrastructure to climate change, and disaster risk reduction	11	11	6	10
4. Projects on effective adaptation of communities and infrastructure to climate change, informed by participatory processes, assessments of local vulnerabilities and innovative data collection (i.e. remote sensing) and processing	6	6	3	6
5. Projects on urban environmental management and restoration, biodiversity protection, circular economy and ecosystem services	4	4	1	1
6. Projects on urban resource management and efficiency, including circular economy, efficient use of urban land, service provision and sustainable water and waste management, and promotion of cleaner energy and energy efficiency	4	4	2	2
Seminars, workshops and training events (number of days)	100	100	38	43
7. Seminars, workshops and training events for partners and those in vulnerable situations (e.g. in informal settlements) on climate change mitigation, air quality and low-emission basic services	35	35	10	10

Part IV International cooperation for development

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
8. Seminars, workshops and training events on effective adaptation of communities and infrastructure to climate change	55	55	25	25
9. Seminars, workshops and training events on sustainable city models and their application, sustainable infrastructure and urban planning	5	5	–	5
10. Training on environment and climate dimensions and Sustainable Development Goal monitoring in urban areas	5	5	3	3
Publications (number of publications)	3	3	3	3
11. Publication on climate change mitigation and air quality	1	1	1	1
12. Publication on effective adaptation of communities of slums and other urban communities in vulnerable situation in urban neighbourhoods, and infrastructure, to climate change	1	1	1	1
13. Publication on improved low-emission urban services and resource efficiency (e.g. focusing on technological innovation)	1	1	1	1
Technical materials (number of materials)	12	12	5	5
14. Technical materials on improved resource efficiency and protection of ecological assets, including sectoral materials	2	2	1	1
15. Technical materials on climate change mitigation and air quality	3	3	1	1
16. Technical materials on climate action, basic services or environment in human settlements	3	3	1	1
17. Technical materials on national, regional and local guidelines, plans, coordination mechanisms and strategies on climate action, the urban environment, ecosystems and biodiversity, ecological assets and ecosystem services	2	2	1	1
18. Technical materials on improved low-emission urban services, resource efficiency and (electric) mobility solutions and infrastructure (including monitoring)	2	2	1	1

C. Substantive deliverables

Consultation, advice and advocacy: advisory services to 16 Member States on reducing urban greenhouse gas emissions to achieve climate change mitigation and adaptation, improving air quality and low-emission urban services, improving resource efficiency and protecting ecological assets.

Databases and substantive digital materials: databases on urban climate- or environment-relevant subjects, and substantive digital materials (i.e. simulations) on reduced greenhouse gas emissions and improved air quality, including a database on climate initiatives in Rwanda, risk and vulnerability analysis in the Lao People’s Democratic Republic and a solutions toolbox for electromobility.

D. Communication deliverables

Outreach programmes, special events and information materials: brochures, campaign and events on reduced greenhouse gas emissions and improved air quality, improved resource efficiency and protection of ecological assets, effective adaptation of communities and infrastructure to climate change.

External and media relations: articles on reduced greenhouse gas emissions and improved air quality, improved resource efficiency and protection of ecological assets and effective adaptation of communities and infrastructure to climate change.

Digital platforms and multimedia content: websites and content for social media accounts; multimedia content on reduced greenhouse gas emissions and improved air quality, improved resource efficiency and protection of ecological assets and effective adaptation of communities and infrastructure to climate change.

**Subprogramme 4
Effective urban crisis prevention and response**

Objective

- 15.68 The objective, to which this subprogramme contributes, is to enhance urban crisis prevention and response and advance social integration and inclusive communities as well as improved living standards and the inclusion of migrants, refugees, internally displaced persons and returnees.

Strategy

- 15.69 To contribute to the objective, the subprogramme will:
- (a) Engage in-country comprehensive, participatory and inclusive operational programmes to respond to crises affecting all members of the community, including those in vulnerable situations; and implement fit-for-purpose land administration towards the achievement of tenure security for all in crisis-affected areas, while supporting measures for national urban frameworks that adopt inclusive urban governance and planning approaches;
 - (b) Support implementation by Member States of inclusive, evidence-based, sustainable recovery approaches, such as the urban recovery framework for post-conflict situations to support urban resilience recovery, applying area-based approaches and community inclusive participatory and bottom-up processes, while ensuring age, gender and diversity representation;
 - (c) Build the capacity of national, regional and local actors to increase social cohesion between communities, reducing discrimination and xenophobia with full respect for human rights in urban crisis situations;
 - (d) Prioritize improved living standards and the inclusion of migrants, refugees, internally displaced persons and returnees by providing urban crisis-response expertise and supporting integrated urban development strategies that address the needs of both host communities and the displaced, in support also of the Secretary-General's action agenda on internal displacement;
 - (e) Enhance UN-Habitat normative guidance and operational support in urban and rural displacement contexts on the evidence-based impact of migration and displacement on urbanization, within the framework of the flagship programme "Inclusive cities: enhancing the positive impacts of urban migration";
 - (f) Develop evidence-based local disaster risk reduction and resilience strategies in line with the Sendai Framework for Disaster Risk Reduction 2015–2030 and implement disaster risk reduction and resilience strategies;
 - (g) Develop and improve urban profiling and urban-specific recovery frameworks, tools and approaches, supporting local implementation, mobilizing urban stakeholder networks and complementing work led by the World Bank, the European Union and UNDP at the national level;
 - (h) Work with cities and informal settlements within cities and rural areas, through normative and operational activities, on building resilience to a broad range of threats, including health emergencies, and the inclusion of urban recovery in national COVID-19 recovery strategies.
- 15.70 In doing so, the subprogramme will assist Member States in making progress towards achieving Sustainable Development Goals 1, 5, 8, 9, 10, 11, 13 and 16.
- 15.71 The above-mentioned work is expected to result in:
- (a) An increased proportion of the population in crisis-affected communities engaging in local decision-making with regard to reconstruction projects and improved social inclusion, strengthened land tenure and improved access to adequate housing and basic services;
 - (b) An increased number of cities where refugees, migrants, internally displaced persons, returnees and host communities have access to secure tenure, sustainable basic services and social services, adequate housing, safety and security;
 - (c) The reduction of multidimensional risks and increased protection for those in vulnerable situations in cities;
 - (d) Strengthened systems for analysis and decision-making concerning resilient infrastructure at the city level, in particular in crisis settings.

Programme performance in 2021

Improved access to sustainable and resilient housing for internally displaced women and girls in northern Mozambique

- 15.72 The subprogramme provided inclusive, sustainable housing solutions to displaced women and girls affected by the humanitarian crisis in the region, in collaboration with the Government of Mozambique (Agency for the Integrated Development of the North, Province of Cabo Delgado, Ministry of Gender, Youth and Social Action and local authorities).
- 15.73 In the village of Marocani, the subprogramme, in partnership with UN-Women, initiated a one-year recovery pilot project, which targeted 50 women-headed families. A community-driven model of human settlement planning and management was used as part of a resilience and social integration programme, assisting in housing reconstruction through training, supervision and the provision of materials. This access to adequate shelter and employment supported women in overcoming some of the additional vulnerabilities caused by the COVID-19 pandemic. To help to further mitigate the effects of the pandemic, the subprogramme supported municipal authorities across Mozambique, including in Cabo Delgado, in increasing access to basic services.
- 15.74 Progress towards the objective is presented in the performance measure below (see table 15.7).

Table 15.7
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	–	50 women-headed families with strengthened capacities in resilient housing reconstruction, enabling shelter and employment

Planned results for 2023

Result 1: inclusive cities: enhancing the positive impacts of urban migration

Programme performance in 2021 and target for 2023

- 15.75 The subprogramme’s work contributed to 133 cities applying participatory planning technologies, which met the planned target.
- 15.76 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 15.XI).

Figure 15.XI
Performance measure: number of cities applying participatory planning methodologies (cumulative)

Result 2: a new approach to strengthen city resilience

Programme performance in 2021 and target for 2023

- 15.77 The subprogramme’s work contributed to nine cities implementing the City Resilience Global Programme, which met the planned target.
- 15.78 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 15.XII).

Figure 15.XII
Performance measure: number of cities implementing the City Resilience Global Programme (cumulative)

Result 3: strengthened urban recovery and resilience and improved access to basic services in the Syrian Arab Republic

Proposed programme plan for 2023

- 15.79 The UN-Habitat urban recovery framework developed by the subprogramme primarily targets neighbourhoods hosting groups in vulnerable situations and has three main outcomes: the development of urban, area-based recovery and neighbourhoods, including better physical access to areas of public space; the restoration of basic and social services, especially water, sanitation and solid waste management; and improved and sustained community resilience and social cohesion. The framework was applied in the heavily damaged cities of Dara’a and Dayr al-Zawr in the Syrian Arab Republic as part of a joint programme on urban and rural resilience implemented by six United Nations agencies (Food and Agriculture Organization of the United Nations, UNDP, United Nations Population Fund, UN-Habitat, United Nations Children’s Fund and World Food Programme). Direct beneficiaries of the interventions include over 55,000 returnees, some 10,000 Palestinian refugees in the United Nations Relief and Works Agency for Palestine Refugees in the Near East camp and around 39,000 internally displaced persons.

Lessons learned and planned change

15.80 The lessons for the subprogramme were the need to ensure participatory processes, backed by community buy-in, to promote social cohesion among different groups and the need to have a flexible approach to programming that can respond to developments in the security context. In applying the lesson, the subprogramme will further increase its engagement with local communities to ensure continued implementation and ensure that any required adjustments to programming are made with the participation of municipal authorities and local communities.

15.81 Expected progress towards the objective is presented in the performance measure below (see table 15.8).

Table 15.8
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	Municipal authorities and local communities supported to develop neighbourhood action plans for nine neighbourhoods in two cities in the Syrian Arab Republic through joint participatory area-based planning	Improved physical access to four neighbourhoods in two cities in the Syrian Arab Republic and plans developed for the rehabilitation of water, sanitation and waste management services	Nine rehabilitated neighbourhoods and improved access to basic services in two cities in the Syrian Arab Republic

Deliverables

15.82 Table 15.9 lists all deliverables of the subprogramme.

Table 15.9

C. Substantive deliverables

Consultation, advice and advocacy: advisory services provided to Member States on urban crisis mitigation and response and on enhancing urban resilience to multi-hazard threats, including crises related to migration and displacement.

Databases and substantive digital materials: data platform on urban migration.

D. Communication deliverables

Outreach programmes, special events and information materials: global and regional information materials, brochures, leaflets and online awareness-raising materials on the UN-Habitat flagship programme on migration focusing on social inclusion and the response to migration and displacement, at the global and regional/country levels, with an emphasis on partnerships and comprehensive responses through the application of various tools on housing and land property rights, spatial planning, housing and urban governance.

Digital platforms and multimedia content: content for social media accounts, blogs and websites related to the social and economic inclusion of migrants, refugees, internally displaced persons and returnees in urban crisis contexts.

B. Proposed post and non-post resource requirements for 2023

Overview

15.83 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 15.10 to 15.12.

Table 15.10

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2021 expenditure	2022 appropriation	Changes				2023 estimate (before recosting)

15.84 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 15.13 to 15.15 and figure 15.XIII.

15.85 As reflected in tables 15.13 (1) and 15.14 (1), the overall resources proposed for 2023 amount to \$14,095,300 before recosting, reflecting a net increase of \$819,500 (or 6.2 per cent) compared with the appropriation for 2022. Resource changes result from three factors, namely: (a) technical adjustments; (b) new and expanded mandates; and (c) other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

15.86 As reflected in table 15.13 (1), resource changes reflect a decrease of \$615,400, as follows:

Subprogramme 1, Reduced spatial inequality and poverty in communities across the urban-rural continuum (decrease of \$149,500), Subprogramme 2, Enhanced shared prosperity of cities and regions (decrease of \$156,100), Subprogramme 3, Strengthened climate action and improved urban environment (decrease of \$155,100) and

Subprogramme 4, Effective urban crisis prevention and response (decrease of \$154,700).

These decreases are related to the non-recurrent provision for the quadrennial report on progress in the implementation of the New Urban Agenda, in accordance with General Assembly resolution [71/235](#), as reflected in the 2022 programme budget.

New and expanded mandates

- 15.87 As reflected in table 15.13 (1), resource changes reflect an increase of \$69,000, as follows:

Subprogramme 1, Reduced spatial inequality and poverty in communities across the urban-rural continuum. This is related to the inclusion of non-recurrent requirements to contribute to a report on inclusive social development policies and programmes to address homelessness, to be prepared in collaboration with the Department of Economic and Social Affairs, pursuant to General Assembly resolution [76/133](#). The General Assembly requested the Secretary-General to submit a report, at its seventy-eighth session, on the progress that has been achieved and challenges that remain in the implementation of inclusive social development policies and programmes to address homelessness, including through recommendations for possible indicators on social protection and access for all to adequate, safe and affordable housing in the aftermath of COVID-19. The resources of \$69,000 would provide for a housing specialist for six months to produce the report on inclusive policies and programmes to address homelessness, including in the aftermath of COVID-19. The consultant will provide expertise on housing, focusing on national housing policies and social policies for the homeless and recommending possible indicators on access to adequate, safe and affordable housing in the aftermath of COVID-19.

Other changes

- 15.88 UN-Habitat funding is received through four segments, namely, the regular budget, foundation non-earmarked, foundation earmarked (also known as foundation special purpose) and technical cooperation. Regular budget resources are designated to fund normative and intergovernmental functions, while foundation non-earmarked resources are used to fund normative and core operational functions.
- 15.89 On 23 December 2016, the General Assembly adopted resolution [71/256](#) on the New Urban Agenda. In light of the Agenda, and with a view to enhancing the effectiveness of UN-Habitat, the General Assembly requested the Secretary-General to submit to the General Assembly during its seventy-first session an evidence-based and independent assessment of UN-Habitat. In its report on that assessment (see [A/71/1006](#)), the High-level Independent Panel to Assess and Enhance the Effectiveness of UN-Habitat made recommendations to enhance the effectiveness, efficiency, accountability and oversight of the programme in four specific areas: its normative and operational mandates, its governance structure, its partnerships and its financial capability. The Panel recommended that the first priority must be to save, stabilize and then rapidly strengthen UN-Habitat to equip it for a renewed role based on the 2030 Agenda and the New Urban Agenda. The Panel also recommended a renewed commitment to its normative mission of sustainable urbanization and leaving no one behind and the exploration of options for increasing its financial capacity to fill gaps in normative and core functions. On 25 January 2018, in its resolution [72/226](#), the General Assembly took note of the Panel's report, decided to continue to promote the normative work of UN-Habitat and urged UN-Habitat to ensure that its normative and operational activities are balanced.
- 15.90 Building upon the report of the High-level Independent Panel and upon the subsequent resolution of the General Assembly, UN-Habitat conducted an internal review of its effectiveness, efficiency and accountability in its normative and operational mandates with a view to filling gaps in normative, core operational and financial capacities. The review was anchored in the need for UN-Habitat to rebalance its normative and operational work in order to safeguard its primary role of developing norms and standards, setting urban policies and frameworks for sustainable cities, conducting assessments and evaluations of existing cities, disseminating best practices on innovative approaches to urbanization, projecting future trends, reviewing the status of the world's cities and tracking progress and emerging issues related to the New Urban Agenda. While normative and operational

funding sources are not fungible, UN-Habitat will continue to ensure that its normative policies and its project-based operations work in conjunction and are synergistic.

- 15.91 Current posts funded by the regular budget provide intergovernmental bodies with the substantive support and inputs for deliberations related to sustainable urbanization and social inclusion in the urban development process. They also provide intergovernmental support to the General Assembly, the Economic and Social Council and its high-level political forum on sustainable development and provide substantive input to policy development to support the implementation of the 2030 Agenda on Sustainable Development. Current posts develop and oversee the implementation of the strategy for UN-Habitat to lead, coordinate and promote its work on sustainable urbanization and human settlements at the global level; support the work of UN-Habitat to promote sustainable urbanization across the United Nations system; support the mainstreaming of gender, equity and social inclusion in the urban development process, including through the Inter-Agency Network on Youth Development and its task forces; and support for the normative and intergovernmental processes related to capacity-building for, and implementation of, the New Urban Agenda through the quadrennial report.
- 15.92 The need for UN-Habitat to safeguard its primary normative role is emphasized in the New Urban Agenda. In particular, UN-Habitat seeks to address inequity, exclusion and vulnerability in urban development, as well as to address the impact of urbanization on the climate change emergency, noting that environmentally sustainable urban development provides a key opportunity to reduce that impact. The unique normative mandate of UN-Habitat is to provide capacity development and tools to national, subnational and local governments in designing, planning and managing sustainable urban development. As part of the rebalancing effort, a functional analysis was conducted to validate that normative and intergovernmental work are appropriately funded by the regular budget. As a result of that review, seven posts that are principally associated with normative and intergovernmental work in UN-Habitat were identified for realigned funding from the regular budget.
- 15.93 As reflected in table 15.13 (1) and in annex III, the increase of \$1,365,900 mainly relates to the establishment of seven posts (1 D-1, 4 P-4, 1 P-3 and 1 Local level). These posts are proposed for conversion from foundation non-earmarked resources to the regular budget. The distribution across the components and subprogrammes is as follows:
- (a) **Policymaking organs.** The increase of \$187,400 relates mainly to the proposed conversion of one P-3 Coordination Officer post (\$175,400), as detailed in annex III. The additional increase of \$12,000 relates mainly to non-post cost requirements associated with this post and will provide for contractual services (\$4,100) owing to costs owed to the provider under the service-level agreement for information technology and communications services; general operating expenses (\$3,600) owing to the service-level agreement for common services and medical and host country services; fixed telecommunications support, security and policing services and utilities; supplies and materials (\$300); and office automation equipment (\$4,000);
 - (b) **Executive direction and management.** The increase of \$431,300 relates mainly to the proposed conversion of two Programme Management Officer and Special Assistant (P-4) posts to the regular budget (\$415,100), as detailed in annex III. The additional increase of \$16,200 under non-post resources relates mainly to requirements associated with these posts and would provide for contractual services (\$4,100) related to the information, communication and technology service-level agreement cost from the service provider; general operating expenses (\$4,000) owing to the service-level agreement for common services, medical and host country services, fixed telecommunications support, security and policing services and utilities; supplies and materials (\$600); and office automation equipment (\$8,000) under furniture and equipment;
 - (c) **Subprogramme 1, Reduced spatial inequality and poverty in communities across the urban-rural continuum.** The increase of \$200 relates to changes in planned destinations for the subprogramme in 2023;
 - (d) **Subprogramme 2, Enhanced shared prosperity of cities and regions.** The decrease of \$900 relates to changes in planned destinations for the subprogramme in 2023;

- (e) **Subprogramme 3, Strengthened climate action and improved urban environment.** The increase of \$217,100 mainly relates to the proposed conversion of one Programme Management Officer (P-4) post (\$202,300) to the regular budget, as detailed in annex III. The additional net increase of \$15,100 relates mainly to non-post costs associated with this post and will provide for contractual services (\$4,100) owing to costs owed to the provider under the service-level agreement for information technology and communications services; general operating expenses (\$6,700) owing to the service-level agreement for common services, medical and host country services, fixed telecommunications support, security and policing services and utilities; supplies and materials (\$300) and office automation equipment (\$4,000) under furniture and equipment;
- (f) **Subprogramme 4, Effective urban crisis prevention and response.** The increase of \$214,500 mainly relates to the proposed conversion to the regular budget of one Programme Management Officer (P-4) post (\$202,300), as detailed in annex III. The additional increase of \$12,200 relates mainly to non-post costs associated with this post and would provide for contractual services (\$2,700) owing to costs owed to the provider under the service-level agreement for information technology and communications services; general operating expenses (\$4,000) owing to the service-level agreement for common services, medical and host country services, fixed telecommunications support, security and policing services and utilities; supplies and materials (\$300) and office automation equipment (\$4,000). An increase of \$1,200 under travel of staff reflects a higher provision owing to travel planned for attending the high-level political forum;
- (g) **Programme support.** The increase of \$316,300 relates to the proposed conversion of one Chief of Service (D-1) post and one Senior Information Technology Assistant (Local level) post (\$291,900) to the regular budget, as detailed in annex III. The additional increase of \$24,400 relates mainly to non-post requirements associated with these posts and would provide for contractual services (\$8,300) owing to costs owed to the provider under the service-level agreement for information technology and communications services; general operating expenses (\$7,200) related to the service-level agreement for common services, medical and host country services, fixed telecommunications support, security and policing services and utilities; supplies and materials (\$600) and office automation equipment (\$8,000).

Extrabudgetary resources

- 15.94 As reflected in tables 15.13 (2) and 15.14 (2), UN-Habitat expects to continue to receive both cash and in-kind contributions, in addition to the regular budget resources. In 2023, extrabudgetary resources are estimated at \$148,837,600 and would provide for 76 posts, as presented in table 15.14 (2), reflecting a decrease of 38.5 per cent compared with the final \$242,174,600 estimated for 2022. This estimated decrease is attributable mainly to the proposed alignment of extrabudgetary estimates with the levels of pledged voluntary contributions received and programme executed in recent years.
- 15.95 The resources would be used mainly to carry out technical cooperation projects, at the request of Member States, as described under the respective subprogrammes.
- 15.96 The extrabudgetary resources under this section are subject to the oversight of the Executive Board, which has delegated authority from the UN-Habitat Assembly.

Policymaking organs

- 15.97 The resources proposed under this component would provide for requirements relating to the UN-Habitat Assembly, the Executive Board and the Committee of Permanent Representatives. In December 2018, the General Assembly adopted resolution [73/239](#), by which it established a new governance structure for UN-Habitat, consisting of the universal UN-Habitat Assembly, a 36-member

Part IV International cooperation for development

Executive Board and a Committee of Permanent Representatives. Table 15.16 provides information on the standing intergovernmental organs and related resource requirements under the regular budget.

**Table 15.16
Policymaking organs**

(Thousands of United States dollars)

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2023 estimate (before recosting)</i>	
			<i>2022 appropriation</i>	<i>2023 estimate (before recosting)</i>
UN-Habitat Assembly	Provides policy guidance on human settlements and sustainable urbanization and strategic oversight of UN-Habitat. It approves the UN Habitat four-year strategic plan. It reports every four years on its work to the General Assembly through the Economic and Social Council at its substantive session. It meets every four years for five days. Its first session was held in May 2019; the next will be held in June 2023.	Mandate: General Assembly resolution 73/239 and note by the Secretary-General (A/73/726) UN-Habitat Assembly rules of procedure Membership: 193 government officials Number of sessions in 2023: 1	585.2	772.6
Committee of Permanent Representatives	Permanent intersessional subsidiary body of the UN-Habitat Assembly. It is responsible for a high-level midterm review of the implementation of UN Habitat Assembly decisions and resolutions and of the UN-Habitat strategic plan, and for preparing for the next session of the UN Habitat Assembly. It meets twice every four years: once prior to the UN Habitat Assembly session, in preparation for that session, and a second time for a high-level midterm review. The first open-ended meeting of the Committee for a high-level midterm review was held from 29 June to 1 July 2021. The next open-ended meeting of the Committee will be held in May 2023.	Mandate: General Assembly resolution 73/239 and 56/206 and note by the Secretary-General (A/73/726) UN-Habitat Assembly rules of procedure Membership: 193 government officials Number of sessions in 2023: 1	–	–
Executive Board	Permanent intersessional subsidiary body of the UN-Habitat Assembly. It is responsible for strengthening the oversight of UN Habitat operations and enhancing the accountability, transparency, efficiency and effectiveness of UN Habitat. It oversees the preparation of the draft strategic plan before its approval by the UN-Habitat Assembly and is responsible for the review and approval of the annual programme of work and budget and the resource mobilization strategy, in accordance with the strategic plans and political guidelines provided by the UN Habitat Assembly. The Executive Board meets two to three times in a year and held its second session of 2021 on 15 and 16 November 2021. The first session for 2022 will be held from 29 to 31 March 2022.	Mandate: General Assembly resolution 73/239 ; note by the Secretary-General (A/73/726) UN-Habitat Assembly resolution 1/1, adopted by the Assembly at its first session, in May 2019 UN-Habitat Assembly rules of procedure Executive Board rules of procedure Membership: 36 government officials Number of sessions in 2023: 2	–	–
Total			585.2	772.6

15.98 The proposed regular budget resources for 2023 amount to \$772,600 and reflect an increase of \$187,400 in the resource level compared with the appropriation for 2022. The proposed increase is explained in paragraph 15.93 (a). Additional details on the distribution of the proposed resources for 2023 are reflected in table 15.17 and figure 15.XIV.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

15.99 Extrabudgetary resources for policymaking organs are estimated at \$307,400 and would provide for non-post resources. The resources would be used mainly to support the policymaking organs of UN-Habitat. These resources would complement the regular budget resources and enhance the capacity of the Governing Bodies Secretariat to support the new governance structure of UN-Habitat, including the co-financing meetings of the UN-Habitat Assembly and the Executive Board. The estimated decrease of \$595,300 is attributable mainly to the proposed alignment of extrabudgetary estimates with the levels of pledged voluntary contributions received and programme executed in recent years.

Executive direction and management

- 15.100 The executive direction and management component comprises the Office of the Executive Director, the Office of the Deputy Executive Director, the Office of the Chief of Staff, liaison offices in New York, Brussels, Bangkok and Geneva, the Governing Bodies Secretariat, the Legal Unit and the Independent Evaluation Unit. The Executive Director is also supported by the Office of the Principal Adviser, which undertakes special assignments.
- 15.101 The overall responsibilities of the executive direction and management component include the following functions:
- (a) To provide overall direction, translating the vision of the Executive Director and the guidance from the Executive Board into the Programme's work priorities;
 - (b) To foster relationships with Member States and keep abreast of the needs of the Executive Board, the Committee of Permanent Representatives, the UN-Habitat Assembly and stakeholders affiliated with the Economic and Social Council;
 - (c) To coordinate the planning and ensure the implementation of the UN-Habitat strategic plan by ensuring the overall effectiveness of the Programme's organizational structure. It provides direction and alignment through the Executive Committee, which is chaired by the Executive Director, whom it assists in providing policy direction in order to ensure the effectiveness of the Programme;
 - (d) To contribute, in close cooperation with other United Nations agencies, to discussions on, and the implementation of, United Nations reforms, in particular in relation to improving system-wide coherence in United Nations development work, with a special focus on sustainable urbanization;
 - (e) To foster the mainstreaming of gender and disability inclusion into the four subprogrammes of UN-Habitat.
- 15.102 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), UN-Habitat continues to incrementally improve the environmental management performance of its operations and facilities management in a number of ways. In 2021, in partnership with the Secretariat and in accordance with the United Nations Framework Convention on Climate Change, UN-Habitat offset all its greenhouse gas emissions. In the same year, UN-Habitat compiled a more comprehensive emissions inventory for the "Greening the Blue" report of UNEP; that inventory will serve as the institutional baseline going forward, and efforts are being made to include measured data from larger regional offices in the information for the 2022 report. UN-Habitat also partakes in a comprehensive waste management and recycling scheme whereby waste is sorted at source in offices. In addition, the main UN-Habitat office building in Nairobi is powered by a partial solar photovoltaic electricity system. Finally, UN Habitat complies with the principles of paperless meetings, whereby all Executive Board and UN-Habitat Assembly meetings are paper-free and conference materials are shared by USB drive, electronically or through applications. In addition to its efforts in relation to operational matters, and in alignment with the expanded scope of the Strategy for Sustainability Management in the United Nations System, 2020-2030, UN-Habitat has made progress in revamping its Environmental and Social Safeguards System in order to reduce the environmental impact of its programmes and projects.
- 15.103 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 15.18. In 2021, UN-Habitat initiated a procedure whereby any travel request not in compliance with the United Nations advance booking policy is to be cleared by the Office of the Executive Director. While compliance with regard to the timely submission of documentation remained high in 2021, compliance with regard to the subsequent purchase of tickets was impaired by uncertainty concerning travel restrictions. Since 2021, UN-Habitat has been reviewing compliance with the United Nations advance booking policy on a quarterly basis.

Section 15 Human settlements

**Table 15.18
Compliance rate**

(Percentage)

	Actual 2019	Actual 2020	Actual 2021	Planned 2022	Planned 2023

Air tickets purchased at least 2 weeks before the commencement of travel	19	51	36	100	100

15.104 The proposed regular budget resources for 2023 amount to \$1,922,800 and reflect an increase of \$431,300 compared with the appropriation for 2022. The proposed increase is explained in paragraph 15.93 (b). Additional details on the distribution of the proposed resources for 2023 are reflected in table 15.19 and figure 15.XV.

Extrabudgetary resources

15.105 Extrabudgetary resources for executive direction and management are estimated at \$5,000,300 and would provide for 18 posts (1 Assistant Secretary-General, 1 D-1, 1 P-5, 5 P-4, 2 P-3, 1 P-2/1, 1 National Professional Officer and 6 Local level), as well as non-post resources. The resources would be used to assist in the overall executive direction and management of UN-Habitat, including the planning, coordination, management and assessment of the programme of work and strategic plan of the Programme. The estimated decrease of \$543,300 is attributable mainly to the proposed alignment of extrabudgetary estimates with the levels of pledged voluntary contributions received and programme executed in recent years.

Programme of work

Subprogramme 1

Reduced spatial inequality and poverty in communities across the urban-rural continuum

15.106 The proposed regular budget resources for 2023 amount to \$2,350,000 and reflect a net decrease of \$80,300 compared with the appropriation for 2022. The proposed decrease is explained in paragraphs 15.86, 15.87 and 15.93 (c). Additional details on the distribution of the proposed resources for 2023 are reflected in table 15.20 and figure 15.XVI.

Extrabudgetary resources

15.107 Extrabudgetary resources for the subprogramme are estimated at \$35,311,800 and would provide for seven posts (1 D-1, 2 P-5, 1 P-4 and 3 Local level), as well as non-post resources. The resources would be used mainly for technical cooperation projects with requesting countries in the areas of urban development, digital transformation strategies, regional development and on-the-job capacity development and training for local government officials, in order to better manage inclusive urban development following the new challenges to basic service provision posed by the COVID-19 pandemic. Given the impact of the pandemic, subprogramme 1, in conjunction with other subprogrammes, will contribute to the pursuit of holistic responses to better support countries in their efforts to overcome the adversity and economic and social challenges resulting from the pandemic. Furthermore, under the subprogramme, extrabudgetary resources would also be used to promote and stimulate the engagement of the private sector in public-private partnerships that take into consideration the economic, social and environmental dimensions of sustainable urban development.

15.108 The estimated decrease of \$25,204,300 is attributable mainly to the proposed alignment of extrabudgetary estimates with the levels of pledged voluntary contributions received and programme executed in recent years.

**Subprogramme 2
 Enhanced shared prosperity of cities and regions**

15.109 The proposed regular budget resources for 2023 amount to \$2,579,000 and reflect a net decrease of \$157,000 compared with the appropriation for 2022. The proposed decrease is explained in paragraphs 15.86 and 15.93 (d). Additional details on the distribution of the proposed resources for 2023 are reflected in table 15.21 and figure 15.XVII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

15.110 Extrabudgetary resources for the subprogramme are estimated at \$37,802,400 and would provide for six posts (2 P-5, 2 P-4 and 2 P-3), as well as non-post resources. The resources would be used mainly to implement technical cooperation projects with requesting countries in order to develop innovative solutions to address key urban challenges and to prepare people-centred, “smart city” strategies aimed at reducing the digital divide and improving the quality of life of urban dwellers. Given the impact of the pandemic, subprogramme 2, in conjunction with other subprogrammes, mainly subprogrammes 1 and 4, will contribute to the pursuit of holistic responses to better support cities in their efforts to overcome the adversity and the economic and social challenges resulting from the pandemic. Under the subprogramme, UN-Habitat will work with cities to generate improved spatial data in real time on the local social and economic impact of COVID-19, and to channel this evidence into the formulation of strengthened national and subnational urban policies and local urban recovery interventions. In addition, under the subprogramme, UN-Habitat will continue to support cities in

their efforts to strengthen own-source revenue generation and to support regions in their efforts to strengthen urban-rural linkages in order to enhance local economic recovery and increase basic infrastructure provision. Furthermore, under the subprogramme, UN-Habitat intends to use extrabudgetary resources to promote people-centred, “smart city” strategies and challenge-driven innovation in order to accelerate COVID-19 recovery and build resilience in cities.

- 15.111 The estimated decrease of \$90,400 is attributable mainly to the proposed alignment of extrabudgetary estimates with the levels of pledged voluntary contributions received and programme executed in recent years.

Subprogramme 3 Strengthened climate action and improved urban environment

- 15.112 The proposed regular budget resources for 2023 amount to \$2,501,200 and reflect a net increase of \$62,000 compared with the appropriation for 2022. The proposed increase is explained in paragraphs 15.86 and 15.93 (e). Additional details on the distribution of the proposed resources for 2023 are reflected in table 15.22 and figure 15.XVIII.

Extrabudgetary resources

- 15.113 Extrabudgetary resources for the subprogramme are estimated at \$32,292,400 and would provide for 12 posts (1 D-1, 3 P-5, 2 P-4 and 6 Local level), as well as non-post resources. The resources would be used mainly to carry out technical cooperation projects with requesting countries in order to fulfil increased ambitions to combat climate change at the national and local levels, with a particular emphasis on climate-resilient informal settlements and capacity for integrated low-emission development and climate resilience planning at the city level. Given the impact of the pandemic, subprogramme 3, in conjunction with other subprogrammes, will contribute to promoting sustainable mobility and ensuring access to basic services, public space and adequate and affordable housing in the pursuit of a holistic approach to the achievement of a resilient and sustainable recovery from the pandemic. For example, under the subprogramme, support will be expanded for low-emission development strategies that facilitate access to green public spaces. The subprogramme will further support planning for, and the implementation of, climate resilience strategies that support health resilience, in particular through climate-resilient water and sanitation facilities, which will enhance hygiene. In addition, the subprogramme will continue to support multilevel climate governance systems in support of the implementation of the Paris Agreement, including through the support of the integration of urban development issues in nationally determined contributions. Furthermore, under the subprogramme, UN-Habitat intends to use extrabudgetary resources to develop urban climate finance tools suitable for small and medium-sized cities in the least developed countries and small island developing States.
- 15.114 The estimated decrease of \$37,221,900 is attributable mainly to the proposed alignment of extrabudgetary estimates with the levels of pledged voluntary contributions received and programme executed in recent years.

**Subprogramme 4
 Effective urban crisis prevention and response**

- 15.115 The proposed regular budget resources for 2023 amount to \$2,540,200 and reflect a net increase of \$59,800 compared with the appropriation for 2022. The proposed increase is explained in paragraphs 15.86 and 15.93 (f). Additional details on the distribution of the proposed resources for 2023 are reflected in table 15.23 and figure 15.XIX.

Extrabudgetary resources

15.116 Extrabudgetary resources for the subprogramme are estimated at \$33,904,200 and would provide for 12 posts (1 D-1, 1 P-5, 1 P-4, 1 National Professional Officer and 8 Local level), as well as non-post resources. The resources would be used mainly for technical cooperation projects aimed at the implementation of pilot projects under the new Global Programme on Migration in selected countries and at the headquarters level. Those projects would include rolling out resilience-building programmes and tools in order to support cities in their efforts to gather and analyse resilience data, understand risks and create realistic action plans that would potentially improve the lives of all urban inhabitants affected by crises (natural or human-caused). Furthermore, under the subprogramme, UN-Habitat also intends to use extrabudgetary resources to support the sustainable return of internally displaced persons through the provision of basic services and the improvement of living conditions, with a focus on resilience-building and sustainability.

15.117 The estimated decrease of \$25,849,300 is attributable to the proposed alignment of extrabudgetary estimates with the levels of pledged voluntary contributions received and programme executed in recent years.

Programme support

15.118 The proposed regular budget resources for 2023 amount to \$1,429,500. The proposed increase of \$316,400 is explained in paragraph 15.93 (g). Additional details on the distribution of the proposed resources for 2022 are reflected in table 15.24 and figure 15.XX.

Table 15.24

Extrabudgetary resources

- 15.119 Extrabudgetary resources for the subprogramme are estimated at \$4,219,100 and would provide for 21 posts (5 P-4, 3 P-3, 2 P-2/1, 1 National Professional Officer and 10 Local level), as well as non-post resources. The resources would assist the Under-Secretary-General in discharging responsibilities in the areas of personnel, finance and general administration. The estimated decrease of \$3,832,500 is attributable mainly to the proposed alignment of extrabudgetary estimates with the levels of pledged voluntary contributions received and programme executed in recent years.

Annex II

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/76/7](#) and [A/76/7/Corr.1](#)

The Advisory Committee considers that, in the course of its consultations, UN-Habitat should analyse the cost recovery methodology utilized by other organizations, such as UNDP and UNICEF, and consider alignment with those organizations (para. IV.131).

While UN-Habitat, as part of the United Nations Secretariat, aligns its cost recovery practices with the cost recovery policy of the Secretariat, including its cost allocation methodology, UN-Habitat regularly consults with other organizations on current and best practices.

Annex III

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Policymaking organs	1	P-3	Conversion of 1 post of Coordination Officer from foundation non-earmarked resources to regular budget	To perform intergovernmental functions in the Governing Bodies Secretariat; to undertake liaison and communication with Member States; to ensure the accountability and transparency of UN-Habitat; and to maintain effective oversight.
Executive direction and management	2	P-4	Conversion of post of Programme Management Officer (Human Settlements Officer) and post of Special Assistant from foundation non-earmarked resources to regular budget	To perform normative functions in the Office of the Executive Director and in the New York Office to coordinate reporting on Member State capacity-building for the implementation of the New Urban Agenda and the urban dimension of the 2030 Agenda for Sustainable Development via the Urban Agenda Platform and the Global Urban Monitoring Framework; and, at headquarters in Nairobi, to provide direct support to the Executive Director in the direction and management of the normative work of UN-Habitat.
Subprogramme 3, Strengthened climate action and improved urban environment	1	P-4	Conversion of post of Programme Management Officer (Human Settlements Officer) from foundation non-earmarked resources to regular budget	To contribute to normative functions in the Global Solutions Division by developing and maintaining norms and standards, policies, procedures, guidance and toolkits in the area of environmentally sustainable urban development, including the reduction of greenhouse gas emissions to improve air quality, resource efficiency and protection of ecological assets by promoting nature-based solutions to climate action for urban and peri-urban environmental protection, restoration of green public space, integrated solid waste management and reduction in marine plastics.
Subprogramme 4, Effective urban crisis prevention and response	1	P-4	Conversion of post of Programme Management Officer (Human Settlements Officer) from foundation non-earmarked resources to regular budget	To contribute to normative functions in the Global Solutions Division by developing and maintaining norms and standards, policies, procedures, guidance and toolkits to mainstream gender, equity and social inclusion in the urban development process to ensure resilient cities, including improving living standards and ensuring the inclusion of migrants, refugees, internally displaced persons, and returnees to urban life, as well as supporting evidence-based local disaster risk reduction and resilience strategies aligned with the Sendai Framework for Disaster Risk Reduction 2015–2030.
Programme support	1	D-1	Conversion of post of Chief of Service from foundation non-earmarked resources to regular budget	To contribute to core operations and intergovernmental support functions in the Management Advisory and Compliance Service related to oversight of corporate strategy on compliance matters, budget preparation, workforce planning, audit response and core administrative support services to the programme of work and to serve as the primary interlocutor with Member States on matters of management and compliance.
	1	LL	Conversion of post of Senior Information Technology Assistant from foundation non-earmarked resources to regular budget	To contribute to the dissemination and reporting of normative work, including support for the development of tools in the areas of smart cities, universal connectivity and urban transportation systems.

Abbreviation: LL, Local level.

Foreword

The United Nations Office on Drugs and Crime (UNODC) is committed to achieving peace, security, human rights and sustainable development for all by assisting Member States in addressing the evolving challenges posed by drugs, crime, terrorism and corruption.

Guided by its Strategy 2021–2025 and working through its network of field offices and headquarters in Vienna, UNODC provides holistic and evidence-based support to Member States, with a particular focus on women, gender equality and youth empowerment and an emphasis on multisectoral innovative approaches implemented through inclusive partnerships.

In 2022, the normative, technical and research support provided by UNODC to States continued to address the impact of the global coronavirus disease (COVID-19) pandemic across the Office’s mandate areas. The Office also sharpened its focus on emergent threats hindering the achievement of the Sustainable Development Goals by 2030, including crimes that affect the environment and the use of information and communications technologies for criminal purposes. Alongside programme activities addressing these challenges, UNODC is providing secretariat services to the Ad Hoc Committee to Elaborate a Comprehensive International Convention on Countering the Use of Information and Communications Technologies for Criminal Purposes, which began its work on the draft of the convention through sessions in New York and Vienna.

The Office’s proposed programme budget for 2023, supported by nine subprogrammes and aligned with the 2030 Agenda for Sustainable Development, is aimed at accelerating the effectiveness and efficiency of responses to the interconnected challenges posed by drugs, crime, corruption and terrorism. It reflects the commitment of UNODC to strengthening multilateral solutions and leveraging data and expertise while contributing closely with strategic partners to harness synergies and provide value.

In 2023, UNODC will continue to enhance its comprehensive support to Member States in addressing issues within its mandates, to achieve maximum impact and better serve the people at greatest risk of being left behind.

(Signed) Ghada Fathi **Waly**
Executive Director, United Nations Office on Drugs and Crime

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 16.1 The United Nations Office on Drugs and Crime (UNODC) is responsible for supporting Member States in making the world safer from drugs, crime and terrorism, with a view to promoting security and justice for all. The mandate derives from the priorities established in relevant United Nations conventions and General Assembly resolutions, including Assembly resolutions [45/179](#), [46/152](#) and [46/185](#) C. The thematic focus areas of the Office range from combating transnational organized crime to strengthening drug use prevention and treatment and care for drug use disorders; from promoting alternative development to preventing and combating corruption; and from crime prevention and criminal justice reform to terrorism prevention. The work of the Office is grounded in a series of international instruments for which the Office acts as guardian and advocate. They include the three international drug control conventions, the United Nations Convention against Corruption, the United Nations Convention against Transnational Organized Crime and the Protocols thereto, the 19 international conventions and protocols against terrorism and the United Nations standards and norms in crime prevention and criminal justice. In 2022, transnational organized crime, including illicit drug trafficking, and terrorism continued to pose major threats to security, development and good governance around the world. Corruption, the use of information and communications technologies, including artificial intelligence, for criminal purposes and crimes affecting the environment, particularly unregulated and illegal plundering of non-renewable resources and trafficking in endangered species of flora and fauna, are linked to State fragility and undermine the rule of law. The illicit cultivation, manufacture and consumption of and trafficking in drugs and psychotropic substances and the diversion of their precursors remain a risk to the health, dignity and hopes of millions of people. They lead to the loss of human life and the depletion of social cohesion and capital. UNODC support aimed at addressing these challenges, facilitating multilateral cooperation and developing the capacity of Governments to formulate and implement coherent policies for sustainable development, while mainly funded through extrabudgetary resources, will also continue to be provided through the implementation of the regular programme of technical cooperation and United Nations Development Account projects.

Strategy and external factors for 2023

- 16.2 As a United Nations entity whose mandates contribute to the three pillars of the United Nations, namely peace and security, development and human rights, the Office supports Member States in promoting justice and the rule of law and assists them in their fight against crime in all its dimensions, preventing and combating transnational organized crime, corruption and international terrorism and countering the world drug problem.
- 16.3 UNODC does so through three broad, interconnected and mutually supportive work streams:
- (a) Normative work, including policy advocacy and legislative assistance to promote the ratification and implementation of the relevant international treaties and the provision of secretariat and substantive services to the treaty-based, governing and other Member State-driven bodies that help to identify areas of focus, challenges, responses and commitments in relevant mandate areas relating to drugs, crime, corruption and counter-terrorism;
 - (b) Research and policy support work to expand the evidence base and inform policymaking processes at the national, regional and global levels, through increased knowledge and understanding of drug and crime issues;

- (c) Technical cooperation to enhance the capacity of Member States and other stakeholders to prevent and counter illicit drugs, crime, corruption and terrorism at the local, national, regional and global levels through the Office's specialized assistance, expertise and extensive field presence.
- 16.4 In line with the 2030 Agenda for Sustainable Development, the Office will address the relationship between sustainable development and the fight against drugs, crime, corruption and terrorism. The Ministerial Declaration on Strengthening Our Actions at the National, Regional and International Levels to Accelerate the Implementation of Our Joint Commitments to Address and Counter the World Drug Problem, adopted in 2019, the outcome document of the special session of the General Assembly on the world drug problem, held in 2016, and the political declaration adopted at the special session of the General Assembly against corruption, held in 2021 (see Assembly resolution [S-32/1](#), annex), highlight the importance of the Office's mandate areas. In addition, the Commission on Crime Prevention and Criminal Justice and the Commission on Narcotic Drugs have provided a platform for sharing expertise and experiences in the areas of crime prevention and criminal justice and of drug control. The mandates emanating therefrom will continue to provide an impetus for the Office to integrate its programmes into broader initiatives across the United Nations system that will, in turn, foster greater national ownership and sustainability.
- 16.5 In 2023, the work of the Office will continue to be guided by the UNODC Strategy 2021–2025, which positions UNODC to use its role as a custodian of complementary mandates and an impartial knowledge broker to help Member States to identify comprehensive and innovative solutions to respond to drug and crime challenges, strengthen good governance and build inclusive, equitable and resilient societies. The Office will do so through an integrated and people-centred approach, leveraging existing partnerships and forging new ones and promoting cross-sectoral and cross-border cooperation. The focus of the Office will be sharpened to strengthen more systematic coordination across its five thematic areas, to address the nodal links between the world drug problem, organized crime, corruption and economic crime, terrorism and the criminal justice system, within the broader framework of the increased well-being of people, paying particular attention to those in vulnerable situations to ensure that no one is left behind. The strengthening of UNODC capacity in key cross-cutting areas, including mainstreaming human rights, a gender perspective and youth in all its work, will contribute to addressing the integration of UNODC mandates and the 2030 Agenda. Furthermore, the Office will continue to enhance its capacity and impact through a revisited fundraising plan and a reinvigorated communication strategy. The implementation of the Office's Strategic Vision for Africa 2030 and the Strategic Vision for Latin America and the Caribbean 2022–2025, and development of the UNODC Strategic Vision for Nigeria 2030, are examples of guides for targeted interventions sensitive to the distinct challenges faced by different geographical areas.
- 16.6 Research and analysis will play a fundamental role in ensuring that UNODC programmes and technical advice are based on solid evidence. The Office will strengthen its research capacity and improve the relevance, accessibility and usability of data and analysis, including by collecting disaggregated data and combining traditional sources with new technologies and methodologies. UNODC will further invest in effective planning based on results-based management, strong evidence, risk management and the recommendations of independent evaluations to maximize impact, optimize capacity and harness innovation and a culture of learning.
- 16.7 As transnational organized crime becomes more complex, multifaceted and adaptable in seizing new opportunities, UNODC will continue to be at the forefront of efforts to respond to these evolving challenges, leveraging its field presence and thematic leadership in its mandate areas. Recognizing the threat that criminal activities affecting the environment pose to ecosystems, as well as to economies, public health, human safety, food security and livelihoods, and in line with Conference of the Parties to the United Nations Convention against Transnational Organized Crime resolution 10/6, adopted in 2020, UNODC will continue to strengthen Member States' capacity in preventing and combating trafficking in natural resources and intensify its focus in the area of illicit trade of hazardous waste and illegal mining. Furthermore, acknowledging the increasing gravity of criminal activities related to the use of information and communications technologies, to which individuals and institutions alike are highly vulnerable, the Office has leveraged its resources and catalytic role

to facilitate States' negotiations on the elaboration of a comprehensive international convention on the use of information and communications technologies for criminal purposes.

- 16.8 For 2023, the Office's planned deliverables will support Member States in their ongoing management of and recovery from the coronavirus disease (COVID-19) pandemic. Such planned deliverables and activities include producing knowledge materials and providing technical assistance and capacity-building, under all subprogrammes, to support Member States in mitigating drug, crime and corruption challenges which have a potential to slow down the recovery from the pandemic. For example, UNODC will continue to organize meetings on the impact of COVID-19 on matters related to drugs and crime within the framework of UNODC intergovernmental bodies, under subprogramme 9, component 1; and strengthen the ability of criminal justice systems to prepare for, respond to and recover from the crisis, under subprogrammes 4, 5 and 8 and subprogramme 9, component 1.
- 16.9 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. Examples of lessons learned and best practices include the understanding that offering events in a virtual or hybrid format strengthens remote participation of a wider range of stakeholders, as the Fourteenth United Nations Congress on Crime Prevention and Criminal Justice demonstrated. Lessons learned also include reducing group sizes to comply with social distancing measures, shifting from the delivery of in-person services and activities to virtual or hybrid formats, incorporating technological solutions to increase outreach, and developing and disseminating up-to-date support in the form of policy briefs, guidance notes and capacity-building and technical assistance to meet Member States' needs, including conducting research and analysis on the impact of COVID-19 on drugs and organized crime, as seen in subprogrammes 1, 3, 4, 5, 6, 7 and 8 and subprogramme 9, component 1. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.
- 16.10 With regard to cooperation with other entities, in implementing its strategic priority to advance partnership-building, UNODC will expand its close work with international and regional organizations, including the African Union, the Association of Southeast Asian Nations, the Economic Community of West African States, the International Development Law Organization, the Inter-Parliamentary Union, the Organization of American States, the Organization for Security and Cooperation in Europe, the Shanghai Cooperation Organization, the Southern African Development Community and the World Anti-Doping Agency, to enhance common approaches. UNODC will strengthen systematic South-South cooperation, enabling flows of know-how and expertise between countries that share similar challenges. In addition, the Office will facilitate multi-stakeholder engagement to see the systematic mainstreaming of partnerships with civil society across all UNODC work streams. Within these partnerships, UNODC will promote an evidence-based analysis and understanding of the nature of the challenges faced by Member States and design coherent programmes and policies to make progress towards the implementation of the 2030 Agenda and the achievement of the Sustainable Development Goals, in particular Goal 16.
- 16.11 With regard to inter-agency coordination and liaison, UNODC is represented in United Nations coordination mechanisms and groups at the national, regional and headquarters levels. The Office has established various joint projects and coordination groups that involve other entities of the United Nations system and close partners, in the areas of gender equality and women's empowerment (United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women)); drug use prevention and treatment and rehabilitation for drug use disorders (World Health Organization (WHO)); law enforcement (International Criminal Police Organization); border management (World Customs Organization); corruption (United Nations Development Programme); trafficking in persons and the smuggling of migrants (International Organization for Migration, Office of the United Nations High Commissioner for Refugees and Inter-Agency Coordination Group against Trafficking in Persons); terrorism prevention (Office of Counter-Terrorism of the Secretariat and

entities cooperating in connection with the United Nations Global Counter-Terrorism Coordination Compact); access to justice for children (United Nations Children's Fund); education for justice (United Nations Educational, Scientific and Cultural Organization); and ensuring coherence in the collection of statistics pertaining to its mandates (Statistics Division of the Department of Economic and Social Affairs of the Secretariat). The Office remains an active co-sponsor of the Joint United Nations Programme on HIV/AIDS (UNAIDS) and is the substantive leader in the area of HIV prevention, treatment and care among people who use drugs and in prison settings.

- 16.12 With regard to the external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) Extrabudgetary resources, including more funding for fundamental roles through core resources as part of the funding compact, continue to be available, allowing the Office to support Member States in combating rapidly evolving transnational organized criminal networks and their links to corruption and the weakening of State structures;
 - (b) Member States recognize, in their policies, programmes and budgets, that challenges related to security, justice and the rule of law must be addressed as part of an integrated, nationally owned effort to implement the 2030 Agenda;
 - (c) The United Nations system, international financial institutions and other multilateral organizations highlight the importance of strengthening fiscal governance and preventing the leakage of public funds in order to sustainably address issues under the UNODC mandate and implement the 2030 Agenda in a holistic manner;
 - (d) Member States share real-time statistical and operational data with the UNODC Research and Trend Analysis Branch and with their counterparts across borders.
- 16.13 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate. It will do so through the United Nations Office at Vienna/UNODC Strategy and Action Plan for Gender Equality and the Empowerment of Women (2022–2026), which will continue to provide a framework to guide the Office's support to Member States for the achievement of the 2030 Agenda and, specifically, Sustainable Development Goal 5. The Action Plan is aligned with the UNODC Strategy 2021–2025, which includes outcomes related to gender equality and women's empowerment. UNODC will work with Member States to prevent violence against women and girls; enhance gender-responsive policing with full respect for human rights; increase access to gender-responsive justice; improve gender balance in the criminal justice sector, particularly at the decision-making and managerial levels; and implement gender-responsive penal and prison reforms. A dedicated Gender Team is located in the Office of the Director-General/Executive Director to coordinate the implementation of the renewed Strategy and is supported by an organization-wide network of gender strategy focal points across headquarters and field offices.
- 16.14 In line with the United Nations Disability Inclusion Strategy, the United Nations Office on Drugs and Crime will update its former action plan (2021–2022) for the period 2023–2024 to improve the incorporation of disability inclusion into the policies, planning, programmes and operations of the United Nations Office at Vienna/UNODC, integrating learnings of 2021 and 2022.

Programme performance in 2021

Impact of the pandemic

- 16.15 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular on the intergovernmental and normative events and capacity-building activities of the United Nations Office on Drugs and Crime, for which the Office, under all subprogrammes, changed the approach from in-person to virtual and adjusted programmatically and operationally to rapidly respond to Member States' evolving needs, as described in subprogramme 8 and subprogramme 9, component 1.

- 16.16 In addition, in order to support Member States on issues related to the COVID-19 pandemic, within the overall scope of the objectives and with a view to enabling a fast recovery while leaving no one behind, the Office developed and disseminated policy briefs, guidance notes and operational advice, developed virtual methodologies for Member States to meet critical needs and conducted research and analysis on the impact of COVID-19 on drugs and organized crime, as described under subprogrammes 1, 5, 6, 7 and 8 and subprogramme 9, component 1.
- 16.17 Finally, the Office has aimed to catalyse the challenges posed by COVID-19 to find new creative and innovative ways of reaching its audience. For example, subprogramme 7 identified new ways of communicating with the ever-growing number of social media users worldwide and, in cooperation with Member State partners, managed to increase visibility of the work of the Office.

Legislative mandates

- 16.18 The list below provides all mandates entrusted to the programme.

Conventions and protocols

- Single Convention on Narcotic Drugs of 1961 as amended by the 1972 Protocol
- Convention on Psychotropic Substances of 1971
- United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances of 1988
- United Nations Convention against Transnational Organized Crime and the Protocols thereto
- Protocol to Prevent, Suppress and Punish Trafficking in Persons, Especially Women and Children, supplementing the United Nations Convention against Transnational Organized Crime
- Protocol against the Smuggling of Migrants by Land, Sea and Air, supplementing the United Nations Convention against Transnational Organized Crime
- Protocol against the Illicit Manufacturing of and Trafficking in Firearms, Their Parts and Components and Ammunition, supplementing the United Nations Convention against Transnational Organized Crime
- United Nations Convention against Corruption

General Assembly resolutions

S-20/2	Political Declaration	48/12	Measures to strengthen international cooperation against the illicit production, sale, demand, traffic and distribution of narcotic drugs and psychotropic substances and related activities

Economic and Social Council resolutions and decisions

1993/40	Implementation of measures to prevent the diversion of precursor and essential chemicals to the illicit manufacture of narcotic drugs and psychotropic substances	1999/30	Review of the United Nations International Drug Control Programme: strengthening the United Nations machinery for international drug control within the scope of the existing international drug control treaties and in accordance with the basic principles of the Charter of the United Nations
---------	---	---------	--

¹ Particular reference is made to the Political Declaration and Plan of Action on International Cooperation towards an Integrated and Balanced Strategy to Counter the World Drug Problem (see [E/2009/28-E/CN.7/2009/12](#), chap. I.C).

Part IV International cooperation for development

2001/14	Prevention of diversion of precursors used in the illicit manufacture of synthetic drugs	2013/41; 2015/23; 2017/18	Implementation of the United Nations Global Plan of Action to Combat Trafficking in Persons
2005/14	Model bilateral agreement on the sharing of confiscated proceeds of crime or property covered by the United Nations Convention against Transnational Organized Crime and the United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances of 1988	2015/24	Improving the quality and availability of statistics on crime and criminal justice for policy development
2006/23; 2007/22	Strengthening basic principles of judicial conduct	2013/42	United Nations Guiding Principles on Alternative Development
2007/20; 2009/22; 2011/35; 2013/39	International cooperation in the prevention, investigation, prosecution and punishment of economic fraud and identity-related crime	2018/17	The rule of law, crime prevention and criminal justice in the context of the Sustainable Development Goals
2007/21	Information-gathering instrument in relation to United Nations standards and norms in crime prevention and criminal justice	2019/21	Technical assistance provided by the United Nations Office on Drugs and Crime related to counter-terrorism
2007/23	Supporting national efforts for child justice reform, in particular through technical assistance and improved United Nations system-wide coordination	2019/23	Combating transnational organized crime and its links to illicit trafficking in precious metals and illegal mining, including by enhancing the security of supply chains of precious metals
2009/23	Support for the development and implementation of the regional programmes of the United Nations Office on Drugs and Crime	2021/7	Mainstreaming a gender perspective into all policies and programmes in the United Nations system
2009/25	Improving the collection, reporting and analysis of data to enhance knowledge of trends in specific areas of crime	Decision 2009/251	Frequency and duration of the reconvened sessions of the Commission on Narcotic Drugs and the Commission on Crime Prevention and Criminal Justice
2010/20; 2011/34	Support for the development and implementation of an integrated approach to programme development at the United Nations Office on Drugs and Crime	Decision 2011/259	Joint meetings of the reconvened sessions of the Commission on Narcotic Drugs and the Commission on Crime Prevention and Criminal Justice
2011/36; 2013/40	Crime prevention and criminal justice responses against illicit trafficking in endangered species of wild fauna and flora	Decisions 2013/246; 2015/234; 2017/236; 2021/218	Improving the governance and financial situation of the United Nations Office on Drugs and Crime: extension of the mandate of the standing open-ended intergovernmental working group on improving the governance and financial situation of the United Nations Office on Drugs and Crime
2012/19	Strengthening international cooperation in combating transnational organized crime in all its forms and manifestations		

Commission on Crime Prevention and Criminal Justice resolutions

20/4	Promoting further cooperation in countering transnational organized crime	21/3	Strengthening international cooperation to address the links that in some cases may exist between transnational organized criminal activities and terrorist activities
20/9; 54/17	Improving the governance and financial situation of the United Nations Office on Drugs and Crime: work of the standing open-ended intergovernmental working group on improving the governance and financial situation of the United Nations Office on Drugs and Crime on evaluation and oversight	22/2; 24/1; 26/1	Improving the governance and financial situation of the United Nations Office on Drugs and Crime: recommendations of the standing open-ended intergovernmental working group on improving the governance and financial situation of the United Nations Office on Drugs and Crime
21/1	Strengthening Government oversight of civilian private security services and the contribution of such services to crime prevention and community safety		

Commission on Narcotic Drugs resolutions

44/14	Measures to promote the exchange of information on new patterns of drug use and on substances consumed	58/1; 60/3	Improving the governance and financial situation of the United Nations Office on Drugs and Crime: recommendations of the standing open-ended intergovernmental working group on improving the governance and financial situation of the United Nations Office on Drugs and Crime
49/3	Strengthening systems for the control of precursor chemicals used in the manufacture of synthetic drugs		
51/14	Promoting coordination and alignment of decisions between the Commission on Narcotic Drugs and the Programme Coordinating Board of the Joint United Nations Programme on HIV/AIDS	58/5	Supporting the collaboration of public health and justice authorities in pursuing alternative measures to conviction or punishment for appropriate drug-related offences of a minor nature
52/7	Proposal concerning quality evaluation of the performance of drug analysis laboratories	58/10	Promoting the use of the international electronic import and export authorization system for licit international trade in narcotic drugs and psychotropic substances
53/11	Promoting the sharing of information on the potential abuse of and trafficking in synthetic cannabinoid receptor agonists	58/11	Promoting international cooperation in responding to new psychoactive substances and amphetamine-type stimulants, including methamphetamine
54/3	Ensuring the availability of reference and test samples of controlled substances at drug testing laboratories for scientific purposes		
54/6	Promoting adequate availability of internationally controlled narcotic drugs and psychotropic substances for medical and scientific purposes while preventing their diversion and abuse	59/4	Development and dissemination of international standards for the treatment of drug use disorders
		59/5	Mainstreaming a gender perspective in drug-related policies and programmes
54/8	Strengthening international cooperation and regulatory and institutional frameworks for the control of precursor chemicals used in the illicit manufacture of synthetic drugs	59/7	Promotion of proportionate sentencing for drug-related offences of an appropriate nature in implementing drug control policies
54/11	Improving the participatory role of civil society in addressing the world drug problem	60/4	Preventing and responding to the adverse health consequences and risks associated with the use of new psychoactive substances
55/1	Promoting international cooperation in responding to the challenges posed by new psychoactive substances	60/5	Increasing international coordination relating to precursors and non-scheduled precursor chemicals used in the illicit manufacture of narcotic drugs and psychotropic substances
55/2	Promoting programmes aimed at the treatment, rehabilitation and reintegration of drug-dependent persons released from prison settings		
55/12	Alternatives to imprisonment for certain offences as demand reduction strategies that promote public health and public safety	60/6	Intensifying coordination and cooperation among United Nations entities and relevant domestic sectors, including the health, education and criminal justice sectors, to address and counter the world drug problem
56/4	Enhancing international cooperation in the identification and reporting of new psychoactive substances	61/5	Promoting the implementation of the electronic International Import and Export Authorization System for licit trade in narcotic drugs and psychotropic substances
56/10	Tools to improve data collection to monitor and evaluate the implementation of the Political Declaration and Plan of Action on International Cooperation towards an Integrated and Balanced Strategy to Counter the World Drug Problem	61/8	Enhancing and strengthening international and regional cooperation and domestic efforts to address the international threats posed by the non-medical use of synthetic opioids
56/13	Precursors: raising awareness on the diversion in international trade of non-scheduled substances for use as alternatives to scheduled substances in the illicit manufacture of narcotic drugs and psychotropic substances	61/9	Protecting children from the illicit drug challenge
		62/3; 63/5	Promoting alternative development as a development-oriented drug control strategy
57/9	Enhancing international cooperation in the identification and reporting of new psychoactive substances and incidents involving such substances	62/5	Enhancing the capacity of Member States to adequately estimate and assess the need for internationally controlled substances for medical and scientific purposes

Part IV International cooperation for development

62/9	Budget for the biennium 2020–2021 for the Fund of the United Nations International Drug Control Programme	63/3	Promoting awareness-raising, education and training as part of a comprehensive approach to ensuring access to and the availability of internationally controlled substances for medical and scientific purposes and improving their rational use
63/1	Promoting efforts by Member States to address and counter the world drug problem, in particular supply reduction-related measures, through effective partnerships with private sector entities		

Commission on Narcotic Drugs statements and declarations

Ministerial Declaration on Strengthening Our Actions at the National, Regional and International Levels to Accelerate the Implementation of Our Joint Commitments to Address and Counter the World Drug Problem	Joint Ministerial Statement of the 2014 high-level review by the Commission on Narcotic Drugs of the implementation by Member States of the Political Declaration and Plan of Action on International Cooperation towards an Integrated and Balanced Strategy to Counter the World Drug Problem

---	---	---	--

² Adopted on 8 June 2021 by a recorded vote of 165 to 4.

Section 16 International drug control, crime and terrorism prevention and criminal justice

2004/38	Follow-up on strengthening the systems of control over chemical precursors and preventing their diversion and trafficking	2009/6; 2013/11; 2015/2	Joint United Nations Programme on HIV/AIDS (UNAIDS)
2005/28	Frequency of meetings of Heads of National Drug Law Enforcement Agencies, Europe	Decision 2009/250	Proposed amendment to the Single Convention on Narcotic Drugs of 1961 as amended by the 1972 Protocol
2007/9	The need for a balance between demand for and supply of opiates used to meet medical and scientific needs		

Commission on Narcotic Drugs resolutions and decisions

46/2	Strengthening strategies regarding the prevention of human immunodeficiency virus/acquired immunodeficiency syndrome in the context of drug abuse	52/8	Use of pharmaceutical technology to counter drug-facilitated sexual assault (“date rape”)
47/1	Optimizing integrated drug information systems	52/9	Strengthening measures against the laundering of assets derived from drug trafficking and related offences
47/2	Prevention of HIV/AIDS among drug users	52/11	Follow-up to the Ministerial Conference on Illicit Drug Trafficking, Transnational Organized Crime and Terrorism as Challenges for Security and Development in the Caribbean
48/2	Strengthening the drug programme of the United Nations Office on Drugs and Crime and the role of the Commission on Narcotic Drugs as its governing body		
48/12	Expanding the capacity of communities to provide information, treatment, health care and social services to people living with HIV/AIDS and other blood-borne diseases in the context of drug abuse and strengthening monitoring, evaluation and reporting systems	52/12	Improving the collection, reporting and analysis of data to monitor the implementation of the Political Declaration and Plan of Action on International Cooperation towards an Integrated and Balanced Strategy to Counter the World Drug Problem
49/4	Responding to the prevalence of HIV/AIDS and other blood-borne diseases among drug users	53/1	Promoting community-based drug use prevention
50/2	Provisions regarding travellers under medical treatment with internationally controlled drugs	53/2	Preventing the use of illicit drugs within Member States and strengthening international cooperation on policies of drug abuse prevention
50/5	Identifying sources of precursors used in illicit drug manufacture	53/4	Promoting adequate availability of internationally controlled licit drugs for medical and scientific purposes while preventing their diversion and abuse
50/10	Prevention of diversion of drug precursors and other substances used for the illicit manufacture of narcotic drugs and psychotropic substances	53/5	Strengthening regional cooperation between Afghanistan and transit States and the contribution of all affected countries to counter-narcotics efforts, based on the principle of common and shared responsibility
50/11	International cooperation in preventing the illegal distribution of internationally controlled licit substances via the Internet		
51/9	The need for a balance between demand for and supply of opiates used to meet medical and scientific needs	53/8	Strengthening international cooperation in countering the world drug problem focusing on illicit drug trafficking and related offences
51/11	Links between illicit drug trafficking and illicit firearms trafficking	53/9	Achieving universal access to prevention, treatment, care and support for drug users and people living with or affected by HIV
52/1	Promoting international cooperation in addressing the involvement of women and girls in drug trafficking, especially as couriers	53/10	Measures to protect children and young people from drug abuse
52/3	International support to States in East Africa in their efforts to combat drug trafficking	53/12	Strengthening systems for the control of the movement of poppy seeds obtained from illicitly grown opium poppy crops
52/4	Progress made towards strengthening international support for States in West Africa in their efforts to combat drug trafficking	53/13	Use of “poppers” as an emerging trend in drug abuse in some regions

Part IV International cooperation for development

53/15	Strengthening international cooperation and regulatory and institutional frameworks for the control of substances frequently used in the manufacture of narcotic drugs and psychotropic substances	56/16	Enhancing international cooperation to strengthen efforts in West Africa to counter illicit drug trafficking
54/2	Promoting international cooperation to prevent drug-affected driving	57/2	Drug abuse prevention through sport: promoting a society free of drug abuse through sport and the Olympic ideal
54/4; 55/4	Follow-up on the proposal to organize an international workshop and conference on alternative development	57/3	Promoting prevention of drug abuse based on scientific evidence as an investment in the well-being of children, adolescents, youth, families and communities
54/5	Promoting rehabilitation- and reintegration-oriented strategies in response to drug use disorders and their consequences that are directed at promoting health and social well-being among individuals, families and communities	57/4	Supporting recovery from substance use disorders
54/12	Revitalization of the principle of common and shared responsibility in countering the world drug problem	57/6	Education and training on drug use disorders
54/13	Achieving zero new infections of HIV among injecting and other drug users	57/7	Providing sufficient health services to individuals affected by substance use disorders during long-term and sustained economic downturns
54/14	Measures to support African States in their efforts to combat the world drug problem	57/8	Raising awareness and strengthening international cooperation in combating drug trafficking, which, in some cases, misuses activities related to opium poppy seeds for illicit purposes, also produced from illicit opium poppy crops
54/15	Promotion of international cooperation to assist the States most affected by the transit of drugs	57/10	Preventing the diversion of ketamine from legal sources while ensuring its availability for medical use
55/5	Promoting strategies and measures addressing specific needs of women in the context of comprehensive and integrated drug demand reduction programmes and strategies	57/11	Strengthening and expanding international cooperation to counter the threats posed by illicit production and manufacturing, trafficking and abuse of drugs in the Greater Mekong subregion
55/6	Developing an international electronic import and export authorization system for licit trade in narcotic drugs and psychotropic substances	58/2	Supporting the availability, accessibility and diversity of scientific evidence-based treatment and care for children and young people with substance use disorders
55/7	Promoting measures to prevent drug overdose, in particular opioid overdose	58/3	Promoting the protection of children and young people, with particular reference to the illicit sale and purchase of internationally or nationally controlled substances and of new psychoactive substances via the Internet
55/10	Promoting evidence-based drug prevention strategies and policies	58/4	Promoting the implementation of the United Nations Guiding Principles on Alternative Development
56/7	Promoting the development and use of the international electronic import and export authorization system for licit international trade in narcotic drugs and psychotropic substances	58/6	Strengthening international cooperation in preventing and combating illicit financial flows linked to drug trafficking, from the anti-money-laundering perspective
56/8	Promoting initiatives for the safe, secure and appropriate return for disposal of prescription drugs, in particular those containing narcotic drugs and psychotropic substances under international control	58/7	Strengthening cooperation with the scientific community, including academia, and promoting scientific research in drug demand and supply reduction policies in order to find effective solutions to various aspects of the world drug problem
56/9	Strengthening of the principle of common and shared responsibility as the basis for guiding international action in combating the world drug problem with a comprehensive and balanced approach	60/2	Strengthening international cooperation to assist the States most affected by the illicit transit of drugs, especially developing countries, based on the principle of common and shared responsibility
56/14	Strengthening international cooperation in addressing the non-medical use and abuse, the illicit manufacture and the illicit domestic and international distribution of tramadol		

Section 16 International drug control, crime and terrorism prevention and criminal justice

60/7	Promoting scientific evidence-based community, family and school programmes and strategies for the purpose of preventing drug use among children and adolescents	62/7	Promoting measures to prevent and treat viral hepatitis C attributable to drug use
60/8	Promoting measures to prevent HIV and other blood-borne diseases associated with the use of drugs, and increasing financing for the global HIV/AIDS response and for drug use prevention and other drug demand reduction measures	63/4	Promoting the involvement of youth in drug prevention efforts
60/9	Enhancing the capacity of law enforcement, border control and other relevant agencies to counter illicit drug trafficking through training	64/3	Promoting scientific evidence-based, quality, affordable and comprehensive drug prevention, treatment, sustained recovery and related support services
61/2	Strengthening efforts to prevent drug abuse in educational settings	64/4	Improving data collection on, and responses to, the harmful effects of the non-medical use of pharmaceuticals containing narcotic drugs, psychotropic substances or new psychoactive substances
61/4	Promoting measures for the prevention of mother-to-child transmission of HIV, hepatitis B and C and syphilis among women who use drugs	64/5	Facilitating access to comprehensive, scientific evidence-based drug demand reduction services and related measures, including for people impacted by social marginalization
61/7	Addressing the specific needs of vulnerable members of society in response to the world drug problem	Decision 50/2	Review of dronabinol and its stereoisomers
61/11	Promoting non-stigmatizing attitudes to ensure the availability of access to and delivery of health, care and social services for drug users	Decision 53/1	Transfer of phenylacetic acid from Table II to Table I of the United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances of 1988
62/6	Promoting measures to prevent transmission of HIV attributable to drug use among women and for women who are exposed to risk factors associated with drug use, including by improving access to post-exposure prophylaxis	Decision 59/7	Inclusion of phenazepam in Schedule IV of the Convention on Psychotropic Substances of 1971

**Subprogramme 3
Countering corruption**

General Assembly resolutions

S-32/1	Our common commitment to effectively addressing challenges and implementing measures to prevent and combat corruption and strengthen international cooperation	67/192; 68/195; 69/199; 71/208; 73/190; 75/194	Preventing and combating corrupt practices and the transfer of proceeds of corruption, facilitating asset recovery and returning such assets to legitimate owners, in particular to countries of origin, in accordance with the United Nations Convention against Corruption
61/209; 62/202; 63/226; 64/237	Preventing and combating corrupt practices and transfer of assets of illicit origin and returning such assets, in particular to the countries of origin, consistent with the United Nations Convention against Corruption	73/191; 74/276	Special session of the General Assembly against corruption

Economic and Social Council resolutions

2006/24	International cooperation in the fight against corruption		financial flows resulting from criminal activities
2011/32	Strengthening international cooperation in combating the harmful effects of illicit		

Conference of the States Parties to the United Nations Convention against Corruption resolutions and decisions

1/1; 2/1	Review of implementation	1/4	Establishment of an intergovernmental working group on asset recovery
1/2	Information-gathering mechanism on the implementation of the United Nations Convention against Corruption	1/5	Technical assistance

Part IV International cooperation for development

1/7	Consideration of bribery of officials of public international organizations	6/9; 7/7; 8/11	Strengthening the implementation of the United Nations Convention against Corruption in small island developing States
2/3; 3/3	Asset recovery		
2/4	Strengthening coordination and enhancing technical assistance for the implementation of the United Nations Convention against Corruption	6/10	Education and training in the context of anti-corruption
		7/1	Strengthening mutual legal assistance for international cooperation and asset recovery
2/5	Consideration of the issue of bribery of officials of public international organizations	7/2	Preventing and combating corruption in all its forms more effectively, including, among others, when it involves vast quantities of assets, based on a comprehensive and multidisciplinary approach, in accordance with the United Nations Convention against Corruption
3/1	Review mechanism		
3/2	Preventive measures		
4/1; decision 5/1	Mechanism for the Review of Implementation of the United Nations Convention against Corruption	7/3	Promoting technical assistance to support the effective implementation of the United Nations Convention against Corruption
4/2	Convening of open-ended intergovernmental expert meetings to enhance international cooperation	7/4	Enhancing synergies between relevant multilateral organizations responsible for review mechanisms in the field of anti-corruption
4/3	Marrakech declaration on the prevention of corruption		
4/4	International cooperation in asset recovery	7/5	Promoting preventive measures against corruption
5/1	Enhancing the effectiveness of law enforcement cooperation in the detection of corruption offences in the framework of the United Nations Convention against Corruption	7/8	Corruption in sport
		8/1	Strengthening of international cooperation on asset recovery and of the administration of frozen, seized and confiscated assets
5/2	Strengthening the implementation of the criminalization provisions of the United Nations Convention against Corruption, in particular with regard to solicitation	8/2	Celebrating the tenth anniversary of the Mechanism for the Review of Implementation of the United Nations Convention against Corruption
5/4; 6/6; 7/6; 8/8; 9/6	Follow-up to the Marrakech declaration on the prevention of corruption		
5/5	Promotion of the contribution of young people and children in preventing corruption and fostering a culture of respect for the law and integrity	8/3	Promoting integrity in the public sector among States parties to the United Nations Convention against Corruption
		8/4	Safeguarding sport from corruption
6/1	Continuation of the review of implementation of the United Nations Convention against Corruption	8/5	Enhancing integrity by raising public awareness
6/2	Facilitating international cooperation in asset recovery and the return of proceeds of crime	8/6	Implementation of international obligations to prevent and combat bribery as defined under the United Nations Convention against Corruption
6/3	Fostering effective asset recovery

Commission on Crime Prevention and Criminal Justice resolutions

19/5	International cooperation in the forensic field
------	---

Commission on Narcotic Drugs resolutions and decisions

1 (XXXIII)	Cooperation in the strengthening of action against the illicit drug traffic through training in the African region	58/9	Promoting the role of drug analysis laboratories worldwide and reaffirming the importance of the quality of the analysis and results of such laboratories
12 (XXXVIII)	Scientific and technical cooperation in the control of drug abuse and illicit trafficking	59/3	Promoting informal networking within the scientific community and the sharing of scientific evidence-based findings that may inform policies and practices to address the world drug problem
1 (XXXIX)	Scientific and technical cooperation in the control of drug abuse and illicit trafficking: development of drug profiling/signature analysis in support of a scientific approach to law enforcement	59/8	Promotion of measures to target new psychoactive substances and amphetamine-type stimulants
42/3	Monitoring and verification of illicit cultivation		Laboratory support for the implementation of the scheduling decisions of the Commission on Narcotic Drugs
47/5	Illicit drug profiling in international law enforcement: maximizing outcome and improving cooperation	61/3	Enhancing detection and identification capacity for synthetic drugs for non-medical use by increasing international collaboration
48/1	Promoting the sharing of information on emerging trends in the abuse of and trafficking in substances not controlled under the international drug control conventions	62/2	Advancing effective and innovative approaches, through national, regional and international action, to address the multifaceted challenges posed by the non-medical use of synthetic drugs, particularly synthetic opioids
50/4	Improving the quality and performance of drug analysis laboratories	62/4	Promoting and improving the collection and analysis of reliable and comparable data to strengthen balanced, integrated, comprehensive, multidisciplinary and scientific evidence-based responses to the world drug problem
50/9	Use of drug characterization and chemical profiling in support of drug law enforcement intelligence-gathering and operational work, as well as trend analysis	63/2	Strengthening the subsidiary bodies of the Commission on Narcotic Drugs
53/7	International cooperation in countering the covert administration of psychoactive substances related to sexual assault and other criminal acts		Improved and streamlined annual report questionnaire
54/9	Improving quality and building monitoring capacity for the collection, reporting and analysis of data on the world drug problem and policy responses to it	Decision 60/1	
56/5	Promoting the sharing of expertise in and knowledge on forensic drug profiling	Decision 63/15	

Subprogramme 7
Policy support

General Assembly resolutions

66/180	Strengthening crime prevention and criminal justice responses to protect cultural property, especially with regard to its trafficking	71/243; 75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
68/178	Protection of human rights and fundamental freedoms while countering terrorism		

Economic and Social Council decisions

Decisions 2013/246; 2015/234; 2017/236; 2021/218	Improving the governance and financial situation of the United Nations Office on Drugs and Crime: extension of the mandate of the standing open-ended intergovernmental working group on improving the governance and financial situation of the United Nations Office on Drugs and Crime
--	---

Subprogramme 8
Technical cooperation and field support

General Assembly resolutions

74/238; 76/220	Operational activities for development of the United Nations system	74/302	Implementation of the recommendations contained in the report of the Secretary-General on the causes of conflict and the promotion of durable peace and sustainable development in Africa
74/253	Enhancing accessibility for persons with disabilities to conferences and meetings of the United Nations system		
74/301; 75/322	New Partnership for Africa's Development: progress in implementation and international support		

Commission on Narcotic Drugs resolutions

52/13	Improving the governance and financial situation of the United Nations Office on Drugs and Crime	54/7	Paris Pact initiative

Economic and Social Council resolutions

1966/1106 (XL)	Implementation of the Single Convention on Narcotic Drugs, 1961	1996/29	Action to strengthen international cooperation to control precursors and their substitutes used in the illicit manufacture of controlled substances, in particular amphetamine-type stimulants, and to prevent their diversion
1967/1196 (XLII); 1991/48	Administrative arrangements to ensure the full technical independence of the International Narcotics Control Board		
1973/1775 (LIV)	Keeping in force the administrative arrangements to ensure the full technical independence of the International Narcotics Control Board	2003/39	Strengthening systems of control over chemical precursors and preventing their diversion and trafficking
1992/29	Measures to prevent the diversion of precursor and essential chemicals to the illicit manufacture of narcotic drugs and psychotropic substances	2004/38	Follow-up on strengthening the systems of control over chemical precursors and preventing their diversion and trafficking

Commission on Narcotic Drugs resolutions

62/1	Strengthening international cooperation and comprehensive regulatory and institutional frameworks for the control of precursors used in the illicit manufacture of narcotic drugs and psychotropic substances	62/4	Advancing effective and innovative approaches, through national, regional and international action, to address the multifaceted challenges posed by the non-medical use of synthetic drugs, particularly synthetic opioids
62/2	Enhancing detection and identification capacity for synthetic drugs for non-medical use by increasing international collaboration	62/8	Supporting the International Narcotics Control Board in fulfilling its treaty-mandated functions in cooperation with Member States and in collaboration with the Commission on Narcotic Drugs and the World Health Organization

Deliverables

16.19 Table 16.1 lists all cross-cutting deliverables of the programme.

Table 16.1

Cross-cutting deliverables for the period 2021-2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	3	3	3	3
Meetings of:				
1. The Fifth Committee	1	1	1	1
2. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
3. The Committee for Programme and Coordination	1	1	1	1
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	2	2	2
4. On gender equality	1	1	1	1
5. On the independent evaluation function	1	1	1	1
Seminars, workshops and training events (number of days)	5	5	6	7
6. Food-for-thought sessions related to gender equality	4	3	4	4
7. Conference on gender equality	–	1	1	1
8. Side events on topics related to gender equality	1	1	1	2
Technical materials (number of materials)	19	16	22	20
9. On topics related to gender equality	1	–	6	4
10. On evaluation (independent, joint and system-wide evaluations and synthesis studies)	17	15	15	15
11. On evaluation tools, methodologies and approaches	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services for multilateral efforts in the fields of drug control, crime prevention, anti-corruption and terrorism prevention and cooperation with Member States, intergovernmental organizations and civil society, as applicable, including at the regional level; advocacy of drug control, crime prevention, anti-corruption and terrorism prevention issues with Member States and civil society.				
Databases and substantive digital materials: UNODC web-based evaluation application.				
D. Communication deliverables				
Outreach programmes, special events and information materials: evaluation briefs (approximately 4), webinars and annual review of evaluation efforts; speaking engagements, conferences, information dissemination and public awareness activities and representation of the Secretary-General at international events and forums, as appropriate, for advocacy purposes.				
Digital platforms and multimedia content: UNODC website and social media accounts with updated content.				

Evaluation activities

16.20 The following evaluations completed in 2021 have guided the proposed programme plan for 2023:

- (a) Reports of the Office of Internal Oversight Services (OIOS) entitled: “Strengthening the role of evaluation and the application of evaluation findings in programme design, delivery and policy directives” (A/76/69); “Evaluation of the United Nations Office on Drugs and Crime” (E/AC.51/2021/6); and “Evaluation synthesis of strategic planning” (IED-21-001);

- (b) Evaluations conducted by the UNODC Independent Evaluation Section on terrorism prevention; UNODC programming in West and Central Asia (including Afghanistan, Pakistan, the Islamic Republic of Iran and Central Asia); corruption prevention; firearms trafficking; wildlife crime in South-East Asia; corruption risk mitigation in the Plurinational State of Bolivia; measuring of financial flows in Latin America; International Narcotics Control Board precursor control; forest crimes in Peru; counter-terrorism in Maldives; prevention of radicalization in prisons in Kyrgyzstan; civil society support to fight corruption; prison reform in Sri Lanka; legal aid for women in West Africa; and drug trafficking and reduction of coca crops in the Plurinational State of Bolivia.
- 16.21 In 2023, UNODC will strengthen its investments in utilization-focused evaluations in line with its Strategy 2021–2025, its annual evaluation plan and its Revised Evaluation Policy, in accordance with the administrative instruction on evaluation in the United Nations Secretariat (ST/AI/2021/3). Moreover, the results of and lessons learned from the 2021 evaluations have been taken into account for the proposed programme plan for 2023 to enhance and mainstream the design and implementation of evaluations in the Office’s mandated areas of work. Dedicated evaluation capacity-building efforts will further be piloted and scaled up. Moreover, innovative meta-syntheses of UNODC evaluations will ensure the provision of information at an aggregate level for organizational learning and improved decision-making at UNODC. To contribute to enhancing the vision for collaboration with the United Nations system, joint system-wide meta-syntheses, together with other evaluation functions in the United Nations system, will ensure aggregate results to inform policymaking. Enhanced collaboration would include cooperation with the Office of Counter-Terrorism, the United Nations Interregional Crime and Justice Research Institute, the United Nations Development Programme and other United Nations organizations on evaluation in the context of preventing and countering terrorism and violent extremism, as and when conducive to terrorism.
- 16.22 The following evaluations are planned for 2023:
- (a) Reports of OIOS on strengthening the role of evaluation and the application of evaluation findings in programme design, delivery and policy directives and on the thematic evaluation of the contribution of Secretariat entities to the Sustainable Development Goals;
- (b) Evaluations at the strategic, programmatic and project levels by the UNODC independent evaluation function covering multiple UNODC subprogrammes, as well as various regions.

Programme of work

Subprogramme 1

Countering transnational organized crime

Objective

- 16.23 The objective, to which this subprogramme contributes, is to prevent and combat transnational organized crime and illicit trafficking.

Strategy

- 16.24 To contribute to the objective, the subprogramme will:
- (a) Promote international cooperation on transnational organized crime among relevant authorities within Member States, regional entities and other partners, through global, regional and interregional initiatives;
- (b) Promote adherence to and implementation of the international drug control conventions and the United Nations Convention against Transnational Organized Crime and the Protocols thereto;

- (c) Support the Conference of the Parties to the United Nations Convention against Transnational Organized Crime, including the Mechanism for the Review of the Implementation of the Convention and the Protocols thereto, by assisting States parties to participate successfully in the review process, both as countries under review and reviewers;
- (d) Work, both normatively and operationally, in countering emerging and evolving crimes, such as the use of information and communications technologies for criminal purposes, trafficking in cultural property, and wildlife crime and crime affecting the environment;
- (e) Serve as the secretariat for the open-ended ad hoc intergovernmental committee of experts, representative of all regions, to elaborate a comprehensive international convention on countering the use of information and communications technologies for criminal purposes and support Member States in preparation for its sessions;
- (f) Provide tailored technical assistance to Member States, by building the capacities of central authorities and other criminal justice actors in international cooperation in criminal matters and acting as a facilitator of mutual legal assistance requests through its support to international judicial cooperation networks and to individual Member States, particularly in trafficking cases;
- (g) Promote the interdiction of contraband and support post-seizure criminal justice cooperation along drug trafficking routes aimed at disrupting the organized crime groups behind them, including through Governments, the international community, civil society, the private sector and other actors, and proactively promote the use of special investigative techniques against drug trafficking and in related organized crime investigations, through tailored technical assistance and capacity-building activities;
- (h) Support Member States in their application of the Human Trafficking, Smuggling of Migrants and Firearms Protocols, including through legislative and policy support, training on the investigation and prosecution of related offences and global data collection and analysis to build an evidence base for strategic decisions at the policy and operational levels.

16.25 The above-mentioned work is expected to result in:

- (a) Active and effective participation of States parties to the United Nations Convention against Transnational Organized Crime in the Mechanism for the Review of the Implementation of the Convention and the Protocols thereto and strengthened legislative and strategic frameworks to prevent and counter organized crime;
- (b) Increased international cooperation and strengthened institutional and legislative capacity of Member States and States parties the Convention to detect, prevent, investigate and prosecute transnational organized crime and new and emerging crimes;
- (c) Reduced trafficking in drugs, firearms and other contraband through the dismantling of greater numbers of organized criminal groups.

Programme performance in 2021

Informed decision-making through timely insight into the impact of the pandemic on trafficking in persons

16.26 The COVID-19 pandemic has had a devastating impact on victims of trafficking in persons and led to the increased targeting and exploitation of children. The subprogramme conducted a global study to understand and document the effects of the pandemic on trafficking in persons, trafficking victims and front-line organizations intervening against this crime and protecting its victims.⁸ The study showed that measures to curb the spread of the virus increased the risk of trafficking for people in

⁸ UNODC, *The Effects of the COVID-19 Pandemic on Trafficking in Persons and Responses to the Challenges: A Global Study of Emerging Evidence* (Vienna, 2021).

vulnerable situations, exposed victims to further exploitation and limited access to essential services for victims of this crime. The study also assessed how front-line organizations responded to the challenges posed by the pandemic and continued to deliver essential services despite restrictions, providing Member States with evidence-based recommendations to continue addressing trafficking in persons and assist victims effectively in times of crisis.

16.27 Progress towards the objective is presented in the performance measure below (see table 16.2).

Table 16.2
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
No lessons learned or recommendations globally available to Member States on addressing trafficking in persons in time of pandemic	Member States equipped with recommendations to support trafficking victims during the COVID-19 pandemic based on rapid stocktaking	Member States further equipped with targeted recommendations to develop strategies to investigate and prosecute human trafficking, as well as to support front-line responders and victims in times of crisis

Planned results for 2023

Result 1: mainstreaming digital forensic evidence

Programme performance in 2021 and target for 2023

- 16.28 The subprogramme’s work contributed to enhancing the capacity of national police forces to analyse digital media for over 2,000 criminal cases per year, which met the planned target.
- 16.29 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 16.3).

Table 16.3
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
National police force and UNODC collaborate to set up the first digital forensics laboratory to respond to the country’s specific needs	Increase in the knowledge and capacity of the Digital Forensics Unit for handling digital evidence	National police forces are able to analyse digital media for over 2,000 criminal cases per year	National police forces and prosecutors in West Africa analyse digital media in criminal cases	National police forces undertake investigations based on digital evidence or forensic analysis

Result 2: harmonized legislative and institutional frameworks and enhanced international cooperation and evidence-based approaches in line with the Firearms Protocol

Programme performance in 2021 and target for 2023

- 16.30 The subprogramme’s work contributed to a total of 13 countries (three additional, namely Burkina Faso, the Central African Republic and Mali) that have adopted new laws in line with the Firearms Protocol, which did not meet the planned target of a total of 17 Member States that have adopted

legislative and institutional frameworks in line with the Firearms Protocol and relevant instruments. The target was not met owing to delays in legislative processes.

- 16.31 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 16.I).

Figure 16.I

Performance measure: number of Member States that have adopted legislative and institutional frameworks in line with the Firearms Protocol and relevant instruments (cumulative)

Result 3: strengthened implementation of the United Nations Convention against Transnational Organized Crime through participation in its Implementation Review Mechanism and enhancement of normative frameworks against organized crime

Proposed programme plan for 2023

- 16.32 Since the adoption of the United Nations Convention against Transnational Organized Crime, the subprogramme has been working to highlight the importance of implementing the Convention and its three Protocols through robust legislative and strategic frameworks and to ensure the continued relevance of the Convention and its Protocols to the responses of Member States in countering organized crime. In its resolutions 9/1 and 10/1, respectively, the Conference of the Parties to the Convention established, and launched the review process of, the Mechanism for the Review of the Implementation of the United Nations Convention against Transnational Organized Crime and the Protocols thereto, a peer review process to support States parties in the effective implementation of these instruments.

Lessons learned and planned change

- 16.33 The launch of the Mechanism presents an unprecedented opportunity to leverage the generated political momentum to strengthen the implementation of the Convention and its three Protocols at the national, regional and international levels. In applying the lesson, the subprogramme will provide comprehensive support to Member States on two parallel tracks: assisting States in their substantive participation in the Mechanism; and supporting their efforts to strengthen their implementation of the Convention by enhancing legislative and strategic frameworks, including by implementing the observations emanating from the Mechanism.
- 16.34 Expected progress towards the objective is presented in the performance measure below (see figure 16.II).

Figure 16.II
Performance measure: number of States with enhanced capacity to implement the United Nations Convention against Transnational Organized Crime (cumulative)

Deliverables

16.35 Table 16.4 lists all deliverables of the subprogramme.

---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Consultation, advice and advocacy: advisory services on accession to the United Nations Convention against Transnational Organized Crime and the Protocols thereto for at least 15 remaining non-parties to those instruments; advisory services on legislative implementation of the instruments for at least 20 States parties; advocacy on the implementation of the instruments for all 190 States parties; advisory services for at least five Member States and the International Narcotics Control Board in relation to the three drug control conventions.

Databases and substantive digital materials: Sharing Electronic Resources and Laws on Crime (SHERLOC) platform, containing over 10,000 annotated legislative excerpts and more than 3,000 case summaries covering 15 crime types.

**Subprogramme 2
A comprehensive and balanced approach to counter the world
drug problem**

Objective

- 16.36 The objective, to which this subprogramme contributes, is to ensure comprehensive and balanced responses to the world drug problem through integrated demand reduction and related measures, supply reduction and related measures, and enhanced international cooperation.

Strategy

- 16.37 To contribute to the objective, the subprogramme will:
- (a) Promote comprehensive and balanced approaches to countering the world drug problem in full conformity with the purposes and principles of the Charter of the United Nations and the three international drug control conventions and in line with scientific evidence;
 - (b) Assist Member States, upon request, in:
 - (i) Implementing the three international drug control conventions as well as all international drug policy commitments to address and counter the world drug problem;
 - (ii) Establishing and/or expanding drug use prevention approaches and services, as well as drug dependence treatment, care and rehabilitation services and systems for people with drug use disorders;
 - (iii) Establishing and/or expanding HIV/AIDS prevention, treatment and care and support services for people who use drugs, including people in prison and other custodial settings;
 - (iv) Establishing and/or expanding the access to and availability of controlled substances for medical and scientific use;
 - (c) Support Member States' progress in each of the above-mentioned areas through advocacy, the provision of technical assistance, capacity-building, regional strategic planning sessions, support for policy development, expert group consultations and conferences, the provision of standards and operational guidelines based on science and evidence, and the development and dissemination of manuals, toolkits, reports and issue papers based on science and evidence;
 - (d) Assist Member States, upon request, by promoting sustainable livelihoods to reduce the illicit cultivation of drug crops through alternative development, including, where appropriate, preventive alternative development;
 - (e) Support the production of high-quality consumable goods, such as coffee, saffron and cacao, in communities affected by or at risk of illicit cultivation and production of and trafficking in

narcotic drugs and psychotropic substances, in cooperation with United Nations country teams, multilateral organizations and the private sector;

- (f) Enhance online capacity-building opportunities, expand the collaborative sharing of data, research and best practices through online platforms and endeavour to support basic infrastructure provision and market access for alternatives to the illicit cultivation of drug crops;
- (g) Support global, regional and interregional cooperation in countering drug trafficking by promoting the exchange of criminal intelligence and encouraging multilateral operations that target transnational criminal organizations involved in drug trafficking, while working in synergy with subprogramme 1 and providing enhanced and better coordinated technical assistance in accordance with the principle of shared responsibility;
- (h) Build the capacity of national counterparts, at the request of Member States, to detect, interdict, investigate and prosecute drug-related offences, to strengthen maritime, air and land border control, and to identify and dismantle drug trafficking networks;
- (i) Facilitate the exchange of best practices and training curricula, methodologies and materials through the network of law enforcement (police, customs, specialized drug law enforcement agencies and others) training institutions, in coordination with subprogramme 1, helping Member States to make progress towards the achievement of Sustainable Development Goals 3, 4, 5, 10 and 16.

16.38 The above-mentioned work is expected to result in:

- (a) Increased access to quality health-care services that include evidence-based interventions in the areas of drug abuse prevention, drug dependence treatment, HIV/AIDS prevention, treatment and care, and access to controlled substances, for medical and scientific use;
- (b) Increased resilience and quality of life of and diversified, licit, sustainable income for families in rural areas affected by or at risk of illicit cultivation and production of and trafficking in narcotic drugs and psychotropic substances;
- (c) Reduced illicit supply of drugs through joint and coordinated work by law enforcement authorities to track and dismantle networks engaging in drug production, trafficking and distribution.

Programme performance in 2021

Drug use, drug use disorders and related consequences in Africa are mitigated

16.39 In 2021, the subprogramme provided technical support to Côte d'Ivoire, Senegal and Tunisia in conducting school-based and family programmes to prevent drug use and trained 75 health-care providers in the Democratic Republic of the Congo on safe access to controlled substances for medical purposes. The subprogramme developed standard operating procedures in Nigeria to increase access to HIV referral services and established HIV testing and counselling centres in Egypt, Morocco and Tunisia. The subprogramme also provided technical support to improve living and working conditions in prisons in Malawi and South Africa and established a site for agonist therapy in prisons in Kenya.

16.40 Progress towards the objective is presented in the performance measure below (see table 16.5).

Table 16.5
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
Increased awareness of 10 countries on drug prevention activities, alternatives to incarceration (in appropriate cases of a minor nature) ^a and the need for increased access to HIV services for people who use drugs and people in prison and other custodial settings	Adoption by 10 countries of measures to provide alternatives to conviction and punishment ^a and improved access to HIV services for people who use drugs and people in prison and other custodial settings	Improved access to HIV services in prison and in the community in Egypt, Kenya, Malawi, Morocco, Nigeria, South Africa and Tunisia Côte d’Ivoire, Senegal and Tunisia implement evidence-based drug prevention measures Enhanced capacity of 75 health-care providers in the Democratic Republic of the Congo on access to controlled substances for medical purposes

^a Measures to provide alternatives to conviction or punishment are undertaken in accordance with the three international drug control conventions and with due regard for national, constitutional, legal and administrative systems in appropriate cases of a minor nature.

Planned results for 2023

Result 1: a balanced, integrated drug demand reduction and supply reduction approach to be applied by selected countries in Africa

Programme performance in 2021 and target for 2023

- 16.41 The subprogramme’s work contributed to Angola, Mozambique and Namibia opening new Port Control Units and addressing drug demand reduction and HIV prevention, treatment and care, which did not meet the planned target of an increased number of countries with integrated services. The target was not met owing to a shift of focus to strengthening integrated services in existing countries instead of expanding to new countries.
- 16.42 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 16.6).

Table 16.6
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Relevant authorities strengthen their capacity to provide a continuum of care to people who use drugs	Relevant air and port control units in Angola, Kenya, Madagascar, Mozambique, Namibia, Uganda and the United Republic of Tanzania are strengthened as part of the integrated programmes that	Angola, Mozambique and Namibia open new Port Control Units, as part of integrated supply and demand reduction programmes	Increased number of countries with strengthened supply and demand reduction responses, with a focus on increasing access to controlled drugs and preventing their diversion	Relevant countries expand drug demand reduction services and supply reduction activities, including air and port control trainings

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
	also address drug demand reduction and HIV prevention, treatment and care			

Result 2: national drug demand reduction programmes follow quality standards

Programme performance in 2021 and target for 2023

- 16.43 The subprogramme’s work contributed to three Member States (Bolivia (Plurinational State of), Dominican Republic and Nigeria) initiating programmes to develop and implement national quality standards related to drug use prevention and drug use disorder treatment implementation, which met the planned target.
- 16.44 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 16.III).

Figure 16.III

Performance measure: number of countries initiating programmes to develop or implement national quality standards (annual)

Result 3: sustainable livelihoods through alternative development

Proposed programme plan for 2023

- 16.45 Vulnerable communities, often marginalized, cultivate illicit crops when they are unable to obtain sufficient income from legal activities as a result of lack of markets, weak infrastructure, armed conflict, lack of land tenure rights, insecurity and the absence of basic social services. The subprogramme has supported the formation and development of farmer cooperatives to support sustainable incomes for affected communities.

Lessons learned and planned change

- 16.46 The lesson for the subprogramme was that, as part of the balanced approach to drug control, alternative development interventions need to employ environmentally sound techniques accounting for climate change mitigation. In applying the lesson, the subprogramme will initiate an organic certification process for farmers working in alternative development cooperatives in the Lao People’s Democratic Republic and promote agroforestry systems with permanent crops as an alternative to shifting cultivation.

16.47 Expected progress towards the objective is presented in the performance measure below (see table 16.7).

Table 16.7
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Member States engage in policy dialogue on alternative development	Vanmai Cooperative formally established in the Lao People's Democratic Republic	Malongo signs long-term agreement with Vanmai Cooperative and issues the first payment to coffee growers in the Plurinational State of Bolivia and the Lao People's Democratic Republic	Increased policy dialogue to consider how environmental and climate change strategies can be implemented in alternative development policies and programmes	Communities implement alternative development initiatives that consider the environment and climate change
Eradication of 40,000 ha of coca crops; 99,000 families to switch to licit crops	The programme in the Plurinational State of Bolivia exports its first shipment of coffee			

Deliverables

16.48 Table 16.8 lists all deliverables of the subprogramme.

Table 16.8
Subprogramme 2: deliverables for the period 2021–2023, by category and subcategory

C. Substantive deliverables				
Consultation, advice and advocacy: advisory services on law enforcement and the implementation of the drug control conventions; substantive and technical advice on evidence-based prevention and treatment, HIV/AIDS prevention, treatment and care, and alternative development and sustainable livelihoods; substantive and technical advice to the International Society of Substance Use Professionals annual conference, with approximately 1,000 participants from 100 countries; side events at the session of the Commission on Narcotic Drugs, with 75 Member States represented and approximately 750 persons participating; and advocacy for drug use prevention through online “Listen First” materials targeting youth, parents and policymakers.				
D. Communication deliverables				
Outreach programmes, special events and information materials: International Day against Drug Abuse and Illicit Trafficking on 26 June, with 100 countries participating and over 1,000 national and local events.				

Subprogramme 3 Countering corruption

Objective

- 16.49 The objective, to which this subprogramme contributes, is to prevent and counter corruption through the effective implementation of the United Nations Convention against Corruption.

Strategy

- 16.50 To contribute to the objective, the subprogramme will:
- (a) Provide policy and legislative advice, build the capacities of relevant actors and facilitate the transfer of expertise in the areas of prevention, international cooperation, asset recovery, criminalization and law enforcement;
 - (b) Assist Member States, upon request, in strengthening public sector institutions and the role of civil society, parliamentarians, the private sector, academia, youth and the general public in the prevention of corruption, including by providing technical assistance to States in the follow-up to country reviews conducted under the Mechanism for the Review of Implementation of

the United Nations Convention against Corruption, as well as other types of technical assistance;

- (c) Implement the mandates given by policymaking and treaty bodies, in particular the Conference of the States Parties to the Convention, its subsidiary bodies and other governing organs, and support related intergovernmental processes, including the follow-up to the special session of the General Assembly against corruption, held in 2021;
- (d) Promote international cooperation regarding the investigation, prosecution and adjudication of corruption and related offences and provide technical assistance on the recovery of stolen assets, including through the Global Operational Network of Anti-Corruption Law Enforcement Authorities and the convening of expert group meetings;
- (e) Develop and disseminate knowledge products on the implementation of the Convention and assist Member States, upon request, in producing data and conducting statistical and analytical studies and research into corruption, including in collaboration with academia and other stakeholders; and further emphasize South-South cooperation and encourage the sharing of knowledge and good practices at the national and regional levels.

16.51 The above-mentioned work is expected to result in:

- (a) States parties participating actively and effectively in the Mechanism for the Review of Implementation of the United Nations Convention against Corruption;
- (b) States' legal, policy and institutional frameworks addressing corruption risks in line with the Convention;
- (c) Anti-corruption practitioners and other stakeholders having and using the capacity to prevent and counter corruption;
- (d) Policymakers, practitioners and other stakeholders using evidence-based knowledge and tools on anti-corruption to inform decision-making;
- (e) Partners actively supporting and promoting implementation of the Convention in a coordinated effort;
- (f) States being able to systematically and in a timely manner trace, seize, freeze, confiscate and return assets stolen by officials through acts of corruption, within the framework of the Convention.

Programme performance in 2021

Effective integrity education to foster ethical decision-making in the private sector

16.52 Within the framework of its Global Integrity Education project, the subprogramme has established working groups bringing together private sector representatives and academics in Kenya, Mexico and Pakistan. In 2020, the working groups adapted 16 university modules on integrity to the local context. In 2021, the subprogramme trained 295 lecturers from 18 universities on how to teach the modules. More than 90 per cent of the lecturers surveyed indicated that the trainings were highly relevant to their work, which contributed to creating a "talent supply chain" of university graduates empowered to act as ethics ambassadors when joining the private sector. Since 2020, more than 7,650 university students in the target countries have been taught using the university modules on integrity, complemented by guest lectures from the business community, fostering their growth as champions of integrity.

16.53 Progress towards the objective is presented in the performance measure below (see table 16.9).

Table 16.9
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
Joint business-academia working groups established in Kenya, Mexico and Pakistan	Contextualized and validated university modules on integrity developed by joint business-academia working groups	Strengthened capacities of university lecturers and improved knowledge of university students on topics related to integrity in the three target countries

Planned results for 2023

Result 1: fast-tracking the implementation of the United Nations Convention against Corruption by States parties

Programme performance in 2021 and target for 2023

- 16.54 The subprogramme’s work contributed to the fast-tracking of the implementation of the United Nations Convention against Corruption under five regional platforms (South-East Asia, East Africa, South America and Mexico, Southern Africa and Western Balkans) and supported 47 country-level activities to fast-track implementation of the Convention, which exceeded the planned target of 31.
- 16.55 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 16.IV).

Figure 16.IV

Performance measure: number of country-level activities to fast-track implementation of the United Nations Convention against Corruption (annual)

Result 2: renewed political commitment to the fight against corruption

Programme performance in 2021 and target for 2023

- 16.56 The subprogramme’s work contributed to improving the capacity of and cooperation among Member States in the fight against corruption by leading the preparatory process conducive to the adoption of a concise and action-oriented political declaration at the special session of the General Assembly against corruption in June 2021, demonstrating Member States’ commitment to prevent and counter corruption and to take stock of its implementation, which met the planned target.

16.57 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 16.10).

Table 16.10
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Adoption by the Conference of the States Parties to the Convention, for subsequent adoption by the General Assembly, of a resolution on the special session of the General Assembly against corruption	Adoption by the General Assembly of resolution 74/276 and decision 74/568 on the special session of the General Assembly against corruption	Adoption of a concise and action-oriented political declaration at the special session of the General Assembly against corruption in 2021	States translate the political declaration adopted at the special session of the General Assembly against corruption in 2021 into actionable and practical measures to advance the global fight against corruption	States implement the political declaration adopted at the special session of the General Assembly against corruption in 2021 (see Assembly resolution S-32/1, annex)

Result 3: enhanced cross-border cooperation between anti-corruption law enforcement authorities

Proposed programme plan for 2023

16.58 The subprogramme established the Global Operational Network of Anti-Corruption Law Enforcement Authorities (GlobE Network), a global platform for information exchange between front-line anti-corruption law enforcement authorities, offering knowledge, resources and tools needed to track, investigate and prosecute cases of cross-border corruption. Since its launch in June 2021, the GlobE Network has attracted 81 new members from 48 countries.

Lessons learned and planned change

16.59 The lesson for the subprogramme was that there was a need to address the strong demand for such a network to further enhance cross-border cooperation between anti-corruption practitioners and, in turn, effectively counter cross-border corruption offences. In applying the lesson, and drawing on its experience in supporting similar networks, the subprogramme will strengthen outreach to national anti-corruption law enforcement authorities to increase membership and organize annual meetings of the GlobE Network to connect anti-corruption policy and practice communities, and will develop practical resources and tools to enhance users' knowledge and capacity on the investigation and prosecution of cross-border corruption cases.

16.60 Expected progress towards the objective is presented in the performance measure below (see figure 16.V).

Figure 16.V
Performance measure: number of countries joining the Global Operational Network of Anti-Corruption Law Enforcement Authorities (annual)

Deliverables

16.61 Table 16.11 lists all deliverables of the subprogramme.

Table 16.11

13. On anti-corruption	3	3	4	4
14. E-learning modules	–	24	–	2
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services throughout the process of operating the Implementation Review Mechanism with regard to, inter alia, preparing the governmental experts for conducting country reviews through the provision of training courses to 50 governmental experts to conduct reviews under the Mechanism, facilitation of the completion and analysis of self-assessment checklist responses, conduct of 20 country visits and drafting of country review reports and executive summaries.				
Databases and substantive digital materials: database of laws and jurisprudence, as well as of non-legal knowledge relevant to the United Nations Convention against Corruption, including for issues related to asset recovery; database of competent authorities, asset recovery focal points and central authorities; the Tools and Resources for Anti-Corruption Knowledge (TRACK) anti-corruption portal; the GlobE Network portal; electronic tools and training materials on standards, policies, operational procedures and good practices in the implementation of the Convention by States parties.				

Subprogramme 4 Terrorism prevention

Objective

- 16.62 The objective, to which this subprogramme contributes, is to strengthen a criminal justice regime against terrorism that is effective and is implemented by Member States in line with internationally agreed rule of law and human rights standards, the United Nations Global Counter-Terrorism Strategy and relevant United Nations conventions and resolutions.

Strategy

- 16.63 To contribute to the objective, the subprogramme will:
- (a) Provide normative and capacity-building support to prevent terrorism and violent extremism as and when conducive to terrorism, at the request of Member States, by initiating and supporting the development of cooperation frameworks with Member States at the national, regional and global levels, based on the strategic objectives of Member States and in line with internationally agreed rule of law and human rights standards and relevant United Nations conventions and resolutions;

- (b) Implement projects, in coordination with and through integrated planning with partners, that support Governments with terrorism prevention, in particular the United Nations Global Counter-Terrorism Coordination Compact and its working groups, helping Member States to make progress towards Sustainable Development Goals 5 and 16;
- (c) Deliver counter-terrorism technical assistance tools and training activities to requesting Member States, in accordance with its mandate under resolutions of the General Assembly⁹ and the Security Council,¹⁰ as well as the United Nations Global Counter-Terrorism Strategy, adopted by the Assembly in 2006 in its resolution 60/288, and the biennial reviews of the Strategy.

16.64 The above-mentioned work is expected to result in:

- (a) Ratification by Member States of an increased number of international legal instruments against terrorism and enactment and revision of domestic counter-terrorism legislation;
- (b) Development by Member States of strategies, policies and action plans for combating terrorism;
- (c) Effective criminal justice investigation, prosecution and adjudication of terrorism cases in line with the relevant international legal instruments and norms, standards and good practices;
- (d) Increased national, regional and international cooperation between law enforcement and judicial entities;
- (e) Advanced implementation by Member States of the United Nations Global Counter-Terrorism Strategy and relevant United Nations conventions and resolutions through structural changes in their legal measures and internal functioning, including investigation, prosecution and adjudication, that are sustainable over time.

Programme performance in 2021

Member States' increased adherence to the international legal instruments to prevent and combat terrorism

- 16.65 In 2021, five Member States became parties to all 19 international legal instruments against terrorism, doubling the number of countries that have reached full adherence. Ten Member States have now adhered to all 19 instruments. Overall, Member States' adherence to the international legal instruments against terrorism now stands at 67.75 per cent.
- 16.66 Progress towards the objective is presented in the performance measure below (see figure 16.VI).

⁹ See General Assembly resolutions 72/194, 72/284 and 74/175.

¹⁰ See Security Council resolution 2482 (2019) and previous related Council resolutions.

Figure 16.VI
Performance measure: number of Member States becoming parties to all 19 international legal instruments against terrorism (annual)

Planned results for 2023

Result 1: strengthened capacity of criminal justice officials to prevent terrorism

Programme performance in 2021 and target for 2023

- 16.67 The subprogramme’s work contributed to increased capacity of criminal justice officials in Sri Lanka to investigate and process terrorism-related cases, which met the planned target.
- 16.68 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 16.12).

Table 16.12
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	Criminal justice officials are certified to process terrorism cases in line with applicable international law	Officials are able to resolve and process terrorism cases in line with applicable international law, including a gender perspective	Meetings of a regional information exchange forum are held to strengthen inter-agency and regional cooperation between law enforcement and judicial officials	Regional platform is established for cross-border cooperation in counter-terrorism cases

Result 2: terrorists are brought to justice in line with internationally agreed rule of law and human rights standards

Programme performance in 2021 and target for 2023

- 16.69 The subprogramme’s work contributed to 1,536 criminal justice officials trained on the investigation, prosecution and adjudication of terrorism cases, which did not meet the planned target of 1,700 criminal justice officials trained. The target was not met as the training of criminal justice officials

took place in smaller group sizes than had been originally anticipated in order to comply with social distancing measures instated owing to COVID-19.

- 16.70 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 16.VII).

Figure 16.VII

Performance measure: number of criminal justice officials trained on the investigation, prosecution and adjudication of terrorism cases (annual)

Result 3: strengthened response to growing terrorism challenges in Central, West and South Asia

Proposed programme plan for 2023

- 16.71 The needs for technical assistance in support of counter-terrorism measures are changing in Central, West and South Asia and beyond. The subprogramme continued to support requesting Member States to strengthen criminal justice institutions in full respect of the rule of law and human rights. UNODC assistance, rooted in the rule of law and human rights, was recognized by the Special Rapporteur on the promotion and protection of human rights and fundamental freedoms while countering terrorism in her report to the General Assembly in 2021 ([A/76/261](#)).

Lessons learned and planned change

- 16.72 The lesson for the subprogramme was that the flexible and specialized support provided to strengthen counter-terrorism responses enabled the subprogramme's technical assistance project to remain relevant to the needs of stakeholders, as outlined in the recommendations provided by a recent independent in-depth evaluation.¹¹ In applying the lesson, the subprogramme will increase the development and implementation of tailored counter-terrorism programming for requesting Member States to respond to emerging threats.
- 16.73 Expected progress towards the objective is presented in the performance measure below (see table 16.13).

¹¹ UNODC, Independent Evaluation Section, *Independent In-Depth Evaluation: Strengthening the Legal Regime against Terrorism* (Vienna, 2021).

Table 16.13
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	Member States reassess their counter-terrorism technical assistance needs following the withdrawal of international forces from Afghanistan and changes in the country's governance	Member States request support to develop criminal justice measures and mechanisms to prevent and counter terrorism	Member States and relevant institutions adopt measures and mechanisms to prevent and counter terrorism

Deliverables

16.74 Table 16.14 lists all deliverables of the subprogramme.

Table 16.14
Subprogramme 4: deliverables for the period 2021–2023, by category and subcategory

Databases and substantive digital materials: SHERLOC counter-terrorism tools containing over 2,400 pieces of counter-terrorism legislation, including the database of national central authorities for counter-terrorism cases and the online Counter-terrorism Learning Platform for over 3,600 members.

D. Communication deliverables

Outreach programmes, special events and information materials: global parliamentary summit on terrorism; brochures, flyers and information kits in legal, criminal justice and related areas; International Day of Remembrance of and Tribute to the Victims of Terrorism.

Digital platforms and multimedia content: content for website and social media accounts.

Subprogramme 5 Justice

Objective

- 16.75 The objective, to which this subprogramme contributes, is to prevent crime and ensure more effective, fair, humane and accountable criminal justice systems as a basis for the rule of law and sustainable development.

Strategy

- 16.76 To contribute to the objective, the subprogramme will:
- (a) Promote the development and facilitate the application of United Nations standards and norms on crime prevention and criminal justice through coordination with all relevant sectors in national criminal justice systems and all crime prevention and criminal justice reform actors (such as the police, prosecution services, judiciary, including the juvenile justice system, lawyers, legal aid providers, community-based experts and prison staff);
 - (b) Provide assistance, upon request, to Member States' crime prevention and criminal justice actors by supporting institution-building and providing capacity-building and technical advice in cooperation with other sectors, including education, health and social services, in the areas of: community and knowledge-based crime prevention to address risk factors and root causes of offending and reoffending; access to justice, including through policing with full respect for human rights, access to legal aid, alternatives to imprisonment and restorative justice; violence against women and violence against children; and penal and prison reform, including related to the treatment of violent extremist¹² prisoners, radicalization and social reintegration upon release;
 - (c) Develop and disseminate practical tools, such as guidance notes, handbooks, training curricula and model legislation, and support crime prevention and criminal justice actors in applying these tools, and share studies, good practices and information technology resources;
 - (d) Incorporate cross-cutting issues related to victims and witnesses, gender equality in the criminal justice system and children in the criminal justice system;
 - (e) Provide technical assistance, upon request, to Member States' crime prevention and criminal justice actors on preparation, response and recovery from crisis, including through robust legal frameworks, holistic and inclusive short-term crisis strategies and related actions, and longer-term institution-building.

¹² The terms "violent extremist" and "violent extremism" refer to violent extremism as and when conducive to terrorism (see General Assembly resolutions [71/209](#) and [72/194](#)).

- 16.77 In doing the above, the subprogramme will help Member States to make progress towards the achievement of Sustainable Development Goals 5, 11 and 16.
- 16.78 The above-mentioned work is expected to result in:
- (a) Enhanced coordination between justice actors, for example, between police officers, defence lawyers and investigating judges to address excessive and arbitrary police and pretrial detention;
 - (b) Improved frequency and quality in application of alternatives to imprisonment in appropriate cases;
 - (c) Improved prosecution and adjudication of cases of violence against women and girls;
 - (d) Improved prevention of and responses to violence against children through crime prevention and criminal justice strategies and programmes;
 - (e) Increased access to justice for the vulnerable segments of the population and increased public trust in the justice system, including through countrywide legal aid services that are accessible to all and are tailored to the rights and needs of the population;
 - (f) Enhanced support for social reintegration of prisoners and prevention of recidivism, including for violent extremist prisoners;
 - (g) Prevention of victimization and creation of safer communities;
 - (h) Empowerment of women and girls within crime prevention and criminal justice programmes and systems;
 - (i) Continued functioning of criminal justice systems during health and other crises and equal access to criminal justice services, and reduced risk of violations of the rights of those affected disproportionately, in particular detainees, prisoners and victims of crime;
 - (j) Strengthened responses of criminal justice actors to negative impacts of health and other crises on criminal justice systems and increased responsiveness to future crises.

Programme performance in 2021

Member States are better placed to effectively manage violent extremist prisoners and to prevent radicalization to violence in prisons

- 16.79 The subprogramme improved States' approaches to classifying offenders according to custody and work needs. Offenders' individual needs were addressed through education, vocational and life skills training and treatment for mental health and substance use disorders. The subprogramme also designed tools to assess the specific risks and needs of violent extremist prisoners and detained foreign terrorist fighters to foster their rehabilitation and reintegration.
- 16.80 These efforts led to the shift from the subjective identification of risk factors towards evidence-based methods. Accountability in the management of prisons was increased through the elimination of discriminatory practices and the development of gender-sensitive legislation, tools and actions with full respect for human rights. This approach helped Member States to identify risks and needs of violent extremist prisoners, address radicalization and terrorist recruitment and implement tailored and gender-sensitive strategies to manage and counter terrorist narratives within the prison system.
- 16.81 Progress towards the objective is presented in the performance measure below (see figure 16.VIII).

Figure 16.VIII
Performance measure: number of Member States using evidence-based tools to manage violent extremist prisoners and prevent radicalization in prisons with the support of the United Nations Office on Drugs and Crime (cumulative)

Planned results for 2023

Result 1: communities are more resilient to crime and violence

Programme performance in 2021 and target for 2023

- 16.82 The subprogramme’s work contributed to 10 States developing gender-sensitive crime prevention strategies, sharing information on crime and victimization, promoting community-based efforts to address violence against women and engagement of youth at risk of victimization or getting involved in crime, including violent extremism as and when conducive to terrorism, and using sport to provide skills training and strengthen resilience, which met the planned target.
- 16.83 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 16.IX).

Figure 16.IX
Performance measure: number of States that develop and implement gender-sensitive crime prevention policies and programmes with the support of the United Nations Office on Drugs and Crime (cumulative)

Result 2: people in contact with the criminal justice system have increased access to justice services

Programme performance in 2021 and target for 2023

- 16.84 The subprogramme’s work contributed to 20 Member States implementing activities to increase equal access to justice for all, including community-oriented policing, enhancing the capacity of justice actors to ensure quality and specialized legal aid services, including to victims of crime and women and girls, and improving access to fair and effective restorative justice programmes, which met the planned target.

16.85 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 16.X).

Figure 16.X
Performance measure: number of Member States in which the United Nations Office on Drugs and Crime implemented one or more activities to increase equal access to justice for all (cumulative)

Result 3: criminal justice systems

Proposed programme plan for 2023

16.86 In addition to addressing violence against women and the treatment of women in prison, the subprogramme has mainstreamed a gender perspective in its broader work on crime prevention, legal aid, police and prison reform and justice for children, particularly since the adoption of the Kyoto Declaration on Advancing Crime Prevention, Criminal Justice and the Rule of Law: Towards the Achievement of the 2030 Agenda for Sustainable Development, which was endorsed by the General Assembly in its resolution 76/181, resolution 26/3 of the Commission on Crime Prevention and Criminal Justice on mainstreaming a gender perspective into crime prevention and criminal justice policies and programmes and into efforts to prevent and combat transnational organized crime, and the United Nations Office at Vienna/UNODC Strategy for Gender Equality and the Empowerment of Women (2018–2021).

Lessons learned and planned change

16.87 The lesson for the subprogramme was the importance of a gender perspective in supporting crime prevention and criminal justice reform, as stressed in numerous evaluation reports.¹³ In applying the lesson, the subprogramme will reflect the concerns and experiences of women, men, girls and boys throughout the programme cycle. It will support countries in addressing structural barriers, including discriminatory laws, policies and practices and bias of criminal justice practitioners. Examples of technical assistance include crime prevention programmes that examine risk reduction strategies which mainstream a gender perspective and promote equality with respect to attitudes and roles in the justice system, and policy support to promote the recruitment, retention and promotion of women in the police, capacity-building on gender-responsive non-custodial measures and promote gender-responsive legal aid.

16.88 Expected progress towards the objective is presented in the performance measure below (see figure 16.XI).

¹³ See UNODC, *Final Independent Project Evaluation of Support to Crime Prevention and Criminal Justice Reform* (Vienna, 2018), and other independent evaluation reports of UNODC programmes and projects in the area of justice, available at www.unodc.org/unodc/en/evaluation/reports_topic_justice.html.

Consultation, advice and advocacy: substantive and technical advice (remotely and in-person) on crime prevention and criminal justice to 18 Member States, other relevant organizations and agencies and national and regional programmes; advice on best practices in crime prevention and criminal justice reform.				

Subprogramme 6

Research, trend analysis and forensics

Objective

- 16.90 The objective, to which this subprogramme contributes, is to ensure that Member States have enhanced knowledge of trends on drugs and crime for effective scientific and evidence-based policy formulation, and access to and use of quality forensic science data, information and tools in their efforts against drugs, crime and terrorism.

Strategy

- 16.91 To contribute to the objective, the subprogramme will:
- (a) Provide timely and accurate statistics and analyses of world drug and crime problems, with particular attention to specific manifestations of crime and its transnational dimensions through the production of global and thematic reports, an online monitoring platform and a data-sharing portal;
 - (b) Generate high-quality and relevant evidence through strengthened research capacity in the field and technical oversight at headquarters, as well as in coordination with the Centres of Excellence in Mexico and the Republic of Korea;
 - (c) Support countries, through workshops, trainings, the provision of guidelines and other capacity-building efforts, in the collection of and reporting on data regarding drugs and crime, as required, to monitor progress against certain Sustainable Development Goals and targets, in particular Goals 3 and 16, as they relate to drug use, trafficking, illicit financial flows, justice, crime and crime-related violence;
 - (d) Build capacity of national statistical offices and other relevant national institutions, upon request, to produce, disseminate and analyse drug and crime data and statistics, and assist Member States, upon request, in identifying trends, emerging issues and priorities in drugs, crime and corruption;
 - (e) Provide technical assistance and expert advice to drug-testing laboratories, forensic institutions and Member States on forensics standard setting, early warning systems and the exchange of quality forensic data and services for policymaking and decision-making;
 - (f) Develop and disseminate forensic best practices guidelines and scientific-technical publications on drugs and crime;
 - (g) Provide scientific support to the three treaty bodies under the international drug conventions, namely the Commission on Narcotic Drugs, the International Narcotics Control Board and WHO;
 - (h) Provide data and analysis to spur transformative change, as agreed upon by Member States, and produce knowledge and tools on drugs and crime that are based on existing deliverables and adapted to support national and multilateral responses to the COVID-19 recovery, including the use of new modalities for the delivery of its scientific and forensic services.
- 16.92 The above-mentioned work is expected to result in:
- (a) Enhanced knowledge among Member States, the international community and other relevant stakeholders on formulating strategic responses to existing and emerging drugs and crime issues;
 - (b) Increased capacity of Member States to produce and analyse statistical data on trends, including trends in specific and emerging drugs and crime issues;

- (c) Improved scientific and forensic capacity of forensic service providers to meet internationally accepted standards of performance through quality assurance and technical support;
- (d) Enhanced scientific and forensic capacity of law enforcement personnel and national drug testing and toxicology laboratories.

Programme performance in 2021

Forensic personnel and front-line law enforcement and customs officers receive training on the safe handling of synthetic opioids and the identification of drugs and chemicals used in their illicit manufacture

- 16.93 The subprogramme provides support to requesting Member States to improve national forensic capacity to meet internationally accepted standards and promotes the use of scientific and forensic data in strategic operations, policymaking and decision-making processes. The pandemic-related restrictions required the development of innovative methods for the delivery of laboratory and scientific services to law enforcement officers and forensic personnel in Member States. To ensure the continuation of these services, the subprogramme established a recording studio within the United Nations Narcotics Laboratory and adapted its curricula for in-person training to a virtual environment.
- 16.94 In 2021, the subprogramme provided virtual and in-person training for law enforcement and customs officers and forensic personnel from 20 countries on the use of UNODC drug and precursor testing kits and handheld spectrometer devices for the field identification of drugs and precursor chemicals, the safe handling of synthetic opioids and the correct use and removal of personal protective equipment. Furthermore, personalized kits containing all the essential elements of personal protective equipment were developed and incorporated into the training courses delivered.
- 16.95 Progress towards the objective is presented in the performance measure below (see figure 16.XII).

Figure 16.XII

Performance measure: number of countries and personnel in receipt of in-person or virtual training on forensics (annual)

Planned results for 2023

Result 1: countries more effectively respond to the threat posed by synthetic drugs

Programme performance in 2021 and target for 2023

- 16.96 The subprogramme's work contributed to the strengthened response to synthetic drugs by 140 additional countries through the United Nations Toolkit on Synthetic Drugs, which exceeded the planned target of an increase of 30 countries. The target was exceeded through the launch of a

dedicated website for the Toolkit, the creation of new modules and a series of country-level outreach activities.

16.97 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 16.XIII).

Figure 16.XIII
Performance measure: growth in the number of countries strengthening their responses to synthetic drugs (annual)

Result 2: more timely responses by Member States to drug trends and emerging issues through an expanded monitoring platform

Programme performance in 2021 and target for 2023

16.98 The subprogramme’s work contributed to the provision of timely and accurate statistics and analyses of world drug and crime problems and the generation of prompt responses based on improved detection, processing and visualization of drug trafficking trends and threats by 68 entities using the online monitoring platform, which exceeded the target of 45.

16.99 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 16.XIV).

Figure 16.XIV
Performance measure: number of entities using the monitoring platform for timely information on drugs (cumulative)

Result 3: timely information and evidence to prevent and combat the smuggling of migrants and related crimes, and to protect the rights of people who are smuggled

Proposed programme plan for 2023

16.100 The subprogramme established the UNODC Observatory on Smuggling of Migrants in 2019 to assess the characteristics, drivers and impacts of migrant smuggling in rapidly changing contexts. It collects data on the smuggling of migrants through field research in an increasing number of Member States and complements those data with targeted surveys with people on the move and migrant smugglers in origin and transit countries. The Observatory provides up-to-date evidence on the modus operandi of migrant smugglers, smuggling routes, financial aspects and abuses suffered in the context of migrant smuggling, which enhances knowledge on the crime for evidence-based policy formulation.

Lessons learned and planned change

16.101 The lesson for the subprogramme was that empirical evidence and data collated, when analysed through in-house technical expertise, could support Member States to inform their responses to combat migrant smuggling and protect the rights of smuggled migrants, as set out in the Protocol against the Smuggling of Migrants by Land, Sea and Air, supplementing the United Nations Convention against Transnational Organized Crime. In applying the lesson, the subprogramme will conduct qualitative and quantitative research and data collection in an increasing number of countries and make the data and research findings available in a timely manner on an accessible and user-friendly web-based platform.

16.102 Expected progress towards the objective is presented in the performance measure below (see figure 16.XV).

Figure 16.XV

Performance measure: number of countries covered by the United Nations Office on Drugs and Crime Observatory on Smuggling of Migrants and visits to the web-based platform

Deliverables

16.103 Table 16.16 lists all deliverables of the subprogramme.

Table 16.16
Subprogramme 6: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies

6. Research publications on drug control and crime prevention	5	5	5	5
7. Forensic publications on drug control and crime prevention	4	4	4	4
8. Journals on narcotics, and crime and society	1	1	1	1
Technical materials (number of materials)	14	15	14	14
9. On the monitoring of illicit drug crops	5	5	5	5
10. On drug control and crime prevention	9	9	9	9
11. E-learning modules	–	1	–	–
C. Substantive deliverables				
Consultation, advice and advocacy: consultation, advice and advocacy to Governments, international, regional and national organizations, institutions and laboratories on drugs and crime statistics (35 events annually, including briefings, workshops and dissemination events) and on forensics.				
Databases and substantive digital materials: international statistics on crime, based on responses to the annual crime trend survey; international statistics on illicit drugs; online database of individual drug seizures (40,000 visits); and early warning advisory on new psychoactive substances (3,000 sessions per month, 30 news clips/alerts per year); United Nations Toolkit on Synthetic Drugs; UNODC Observatory on Smuggling of Migrants.				

Subprogramme 7 Policy support

Objective

- 16.104 The objective, to which this subprogramme contributes, is to advance institutional reform and strengthen policy and operational responses by Member States on drug control, crime prevention and criminal justice.

Strategy

- 16.105 To contribute to the objective, the subprogramme will:
- (a) Provide assistance to headquarters and field-based offices related to supporting institutional reforms and ensuring policy coherence through strengthening policy dialogue and enhancing interdivisional coordination;

- (b) Further institutionalize a results-based management culture across UNODC by providing technical advice and quality oversight with a view to further strengthening transparency and accountability in UNODC interventions;
- (c) Undertake policy analysis and coordinate with other United Nations agencies on emerging and cross-cutting issues related to drugs, crime, corruption and terrorism, in particular in promoting the Sustainable Development Goals and the empowerment of youth;
- (d) Strengthen the strategic engagement of non-governmental stakeholders in assisting Member States to prevent and combat corruption, crime, terrorism and the illegal use of drugs as determined in relevant treaties and in support of the Sustainable Development Goals;
- (e) Conduct dialogues with donor Governments, Member States, international organizations and private sector entities to mobilize resources and carry out targeted advocacy and communication activities through the use of traditional and digital media in substantive areas, such as combating transnational organized crime, trafficking in drugs and corruption, helping Member States in attaining progress towards the Sustainable Development Goals, including Goals 16 and 17.

16.106 The above-mentioned work is expected to result in:

- (a) Increased awareness and capacity of Member States to address the interlinked issues of drugs, crime, corruption and terrorism at the global, regional, national and local levels and ensure that these issues are reflected within broader national development efforts;
- (b) Strengthened collaboration between civil society, academia, the private sector and Member States in the implementation of relevant conventions and policy instruments;
- (c) The promotion and protection of civic space and the meaningful participation of civil society on issues related to drugs, crime and corruption, in accordance with the United Nations Guidance Note on the Protection and Promotion of Civic Space;¹⁴
- (d) Greater public awareness of issues related to drugs, crime, corruption and terrorism.

Programme performance in 2021

Member States receive integrated support to prevent, monitor and respond to drug and crime challenges

16.107 In 2019, Member States requested to engage in a dialogue with the Executive Director of UNODC for a revised longer-term strategy for the Office, including its headquarters and a strengthened and sustainable field network.¹⁵ The subprogramme's work contributed to the development of the UNODC Strategy 2021–2025, launched in early 2021, which outlines the Office's contribution to the United Nations pillars of peace and security, development and human rights and its threefold role, encompassing normative work, research and technical assistance, across five thematic areas, namely drugs, transnational organized crime, corruption, terrorism, and crime and criminal justice systems.

16.108 The new Strategy provides a comprehensive framework to help Member States to respond to drug and crime challenges, strengthen good governance and build inclusive, equitable and resilient societies. It builds on a people-centred approach to sustainably improve the lives of the most vulnerable and mainstream human rights, gender equality, the empowerment of women, the protection of children and youth empowerment and provides more systematic integration and coordination across thematic areas, as well as more cross-sectoral and cross-border cooperation for increased efficiency, innovations and partnerships.

¹⁴ See www.ohchr.org/Documents/Issues/CivicSpace/UN_Guidance_Note.pdf.

¹⁵ See paragraph 29 of resolution 28/4 of the Commission on Crime Prevention and Criminal Justice and paragraph 32 of resolution 62/9 of the Commission on Narcotic Drugs.

16.109 Progress towards the objective is presented in the performance measure below (see table 16.17).

Table 16.17
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
Member States request dialogue for a revised longer-term strategy	Member States participate in consultations with UNODC for development of the strategy	UNODC Strategy 2021–2025 endorsed by Member States Member States receive regular updates on the implementation of the UNODC Strategy 2021–2025, including through the new monitoring and reporting framework

Planned results for 2023

Result 1: urban safety governance – local governments adopt integrated and inclusive policies for safer urban areas

Programme performance in 2021 and target for 2023

- 16.110 The subprogramme’s work contributed to three cities adopting integrated and inclusive approaches to enhance urban safety governance, which did not meet the planned target of six cities. The target was not met owing to lockdown measures that affected research teams’ capability to collect data from concerned communities. Nevertheless, remote collection of data enabled the conduct of pilot urban safety governance assessments in four cities. Through coordination between policymakers and communities, reports were issued and action plans developed corresponding to needs identified in three of the cities under assessment.
- 16.111 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 16.XVI).

Figure 16.XVI
Performance measure: number of cities adopting integrated and inclusive approaches to enhance urban safety governance (cumulative)

Result 2: increased stakeholder engagement in the implementation of the United Nations Convention against Transnational Organized Crime

Programme performance in 2021 and target for 2023

- 16.112 The subprogramme's work contributed to five additional countries volunteering to host dialogues on organized crime between non-governmental stakeholders and national authorities, bringing the total number of volunteering countries to seven, which exceeded the planned target of four.
- 16.113 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 16.XVII).

Figure 16.XVII

Performance measure: number of countries volunteering to host dialogues on organized crime between non-governmental stakeholders and national authorities (cumulative)

Result 3: improved public awareness of issues surrounding drugs, crime, corruption and terrorism

Proposed programme plan for 2023

- 16.114 In order to communicate with the ever-growing number of global social media users and in cooperation with Member State partners, the subprogramme developed new products, such as the "UNODC explains" series, for which experts were trained to record themselves on their mobile phones. Furthermore, it produced and posted interactive content on various social media channels, including animated questionnaires and Twitter polls, which resulted in increased engagement.

Lessons learned and planned change

- 16.115 The lesson for the subprogramme was that leveraging technology and innovation allows UNODC to better target its audience and maximize the reach of its messaging. In applying the lesson, the subprogramme will explore new channels of digital communications, focus on developing more engaging products, such as animated videos, and increase its focus on multilingualism. This approach is expected to contribute to higher visibility for issues under the Office's mandate and increased global awareness on the impact of the work of the United Nations on people's lives.
- 16.116 Expected progress towards the objective is presented in the performance measure below (see figure 16.XVIII).

Figure 16.XVIII
Performance measure: number of followers on the United Nations Office on Drugs and Crime social media channels (annual)

Deliverables

16.117 Table 16.18 lists all deliverables of the subprogramme,

Table 16.18

9. On results-based management and mainstreaming the 2030 Agenda	1	1	1	1
D. Communication deliverables				
Outreach programmes, special events and information materials: global campaigns to observe the International Day against Drug Abuse and Illicit Trafficking, the World Day against Trafficking in Persons and the International Anti-Corruption Day; promotional materials on UNODC mandate areas, including on the Commission on Narcotic Drugs and the Commission on Crime Prevention and Criminal Justice; fundraising initiatives and strategic partnerships with international financial institutions, international organizations and the private sector in support of the United Nations voluntary trust fund for victims of trafficking in persons, especially women and children.				
External and media relations: press releases and events.				
Digital platforms and multimedia content: UNODC website and social media channels; social media packages, including audiovisual and text content.				

Subprogramme 8

Technical cooperation and field support

Objective

- 16.118 The objective, to which this subprogramme contributes, is to strengthen Member State-owned programmes countering drugs, crime and terrorism.

Strategy

- 16.119 To contribute to the objective, the subprogramme will:
- (a) Provide policy advice, strategic guidance and coordination to all UNODC field offices for the development and implementation of integrated operational programmes and ensure their full implementation, notably through synergies with other areas of work in UNODC;
 - (b) Ensure operational accountability and programmatic efficiency, including by engaging in the development of business operational strategies and common back offices, monitoring risks and ensuring the inclusion of results-based management in the planning, monitoring and reporting of all UNODC field presences;
 - (c) Provide substantive, technical and policy advice through its field offices, according to their mandates and at the request of Member States, and ensure the inclusion of governance, security and preventing and countering drugs, crime and terrorism with full respect for human rights in the implementation of joint United Nations programmes through technical assistance;
 - (d) Support the development of regional strategies and operational programmes promoting the joint pursuit of justice, public security and development that build on the normative and technical assistance of the Office, through policy dialogue and coordination, and by serving as a common platform for joint efforts with United Nations partners, international financial institutions, other multilateral bodies and civil society;
 - (e) Provide technical and legislative assistance among partner countries designed to foster full ownership by regional entities to support the establishment of South-South cooperation and interregional cooperation;
 - (f) Provide targeted capacity-building to Member States to support the achievement of the Sustainable Development Goals, including through North-South, South-South and triangular cooperation.
- 16.120 This work is expected to result in:
- (a) Member States receiving enhanced support to promote justice and the rule of law and build resilient societies through a UNODC field offices network that is fit for purpose to achieve results, create impact and ensure a people-centred approach in improving the lives of the most vulnerable, including people with disabilities;
 - (b) A UNODC field presence that is fully aligned with the United Nations development system reform by improving capacities of Member States to participate more effectively in cross-border and transnational cooperation countering drugs, crime and terrorism;
 - (c) Member States advancing in evidence-based and tailored programmes in priority areas of UNODC mandates to support relevant Sustainable Development Goals and the security and human rights agendas based on contextual needs assessments;
 - (d) Renewed cooperation and coherence with offices of the United Nations resident coordinators and regional Development Coordination Office desks under both development system and business operations reforms which enhance the efficiency of UNODC support to Member States.

Programme performance in 2021

Member States' emerging COVID-19 impacts and priorities addressed

- 16.121 In 2021, at the request of Member States to translate new priorities and policy guidance into technical assistance, the subprogramme held extensive field consultations to reflect the new reality in upcoming regional strategic visions and programmes. The subprogramme also responded to Member States' evolving needs in coordination with respective United Nations country teams and assisted 49 countries in developing socioeconomic response plans. Furthermore, through its field network, the subprogramme worked to incorporate essential elements under the Office's mandate in new United Nations Sustainable Development Cooperation Frameworks.
- 16.122 Progress towards the objective is presented in the performance measure below (see table 16.19).

Table 16.19

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	Containment of COVID-19 in prisons, border posts and ports, drug rehabilitation centres, social care centres and schools	Member States' new priorities reflected in two regional strategic visions and two regional programmes
	Over 1,000 front-line health workers trained on safe service delivery to those who are vulnerable	49 countries develop inter-agency action plans and socioeconomic response plans
	Enhanced capacities of health and criminal justice professionals on COVID-19-related issues	37 United Nations Sustainable Development Cooperation Frameworks that reflect issues under the Office's mandate

Planned results for 2023

Result 1: improved regional security through strategic expertise and integrated programming in Mozambique

Programme performance in 2021 and target for 2023

- 16.123 The subprogramme's work contributed to improved regional security in Mozambique, including through seizures of illicit firearms and drugs by the Port Control Unit, the successful investigation and prosecution of 90 cases of money-laundering and the recovery of assets worth \$9.7 million, as well as reforestation and an increase in the lion population at the Gorongosa National Park, which met the planned targets.
- 16.124 The planned targets of increased law enforcement joint operations and mentorship programmes, decreases or stability in rates of drug abuse and HIV/AIDS prevalence and training curricula integrated in relevant training institutes were not met owing to a shift in Member States' priorities in the light of the COVID-19 pandemic.
- 16.125 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 16.20).

Table 16.20
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Opening of the UNODC office in Mozambique	Adoption of the Maputo road map	Seizures of unregistered firearms and illicit drugs	Increased number of training and study visits to strengthen cooperation with neighbouring Member States on issues related to terrorism	Port Control Unit established at a second seaport
Strategic dialogue leading to new United Nations Sustainable Development Cooperation Framework, including key deliverables under relevant Sustainable Development Goals, including Goals 3, 16 and 17	Regional trilateral maritime crime planning cell established with the United Republic of Tanzania and South Africa	Successful investigation and prosecution of 90 cases of money-laundering with recovered assets worth \$9.7 million	Increased number of adjudications of criminal cases facilitated through improved laboratories and use of scientific evidence	Successful investigation and prosecution of terrorism cases
	Port Control Unit established at a first seaport and airport cargo area	Wildlife and forest areas being restored in key parts of Mozambique	Joint airport interdiction task force established and operational at Maputo International Airport	Prison reforms enacted in line with the Nelson Mandela Rules, the Tokyo Rules and the Bangkok Rules
	Increase in seizures at ports, airports and land borders		Establishment of transnational crime units	Strengthened national policy framework on the management of frozen, seized and confiscated assets

Result 2: regional strategic vision for Latin America and the Caribbean to address crime, drugs and terrorism threats

Programme performance in 2021 and target for 2023

- 16.126 The subprogramme's work, including the development of the UNODC Strategic Vision for Latin America and the Caribbean 2022–2025, contributed to seven joint initiatives and programmes launched through the multi-partner trust fund in Latin America, which met the planned target.
- 16.127 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 16.XIX).

Figure 16.XIX
Performance measure: number of joint initiatives and programmes launched through the multi-partner trust fund in Latin America (cumulative)

Result 3: strengthened rule of law and protection of those who are vulnerable in small island developing States in the Pacific

Proposed programme plan for 2023

16.128 Small island developing States, owing to their remote geography, are dependent on international trade and foreign aid and are vulnerable to the socioeconomic impact of COVID-19. These vulnerabilities are further compounded by the negative impacts of organized crime, violence and corruption. The subprogramme has compiled data on synthetic drugs and forged partnerships for anti-corruption and countering migrant smuggling programmes in the Pacific. In 2021, the subprogramme contributed to the development of common country analysis and cooperation frameworks in Fiji, Papua New Guinea and Samoa.

Lessons learned and planned change

16.129 The lesson for the subprogramme was that existing cross-thematic and inter-agency collaboration in small island developing States was not sufficient to counter organized crime in the region. In applying the lesson, the subprogramme will strengthen collaboration with ministries of justice, civil society and community members to provide legislative and policy support and build capacity to address organized crime and corruption in Pacific small island developing States, including through peer-to-peer learning and the exchange of best practices.

16.130 Expected progress towards the objective is presented in the performance measure below (see table 16.21).

Table 16.21
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Data collection and evidence base on synthetic drugs strengthened in the Pacific	Partnerships established for anti-corruption and countering migrant smuggling in the Pacific	Common country analysis and cooperation frameworks of Fiji, Papua New Guinea and Samoa reflect UNODC mandates under Sustainable Development Goals 3, 16 and 17	Improved data collection systems on human trafficking Enhanced South-South cooperation through peer-to-peer learning and exchange platforms	Improved legal and policy frameworks to address corruption and organized crime for Pacific small island developing States Pacific small island developing States actively and effectively participate in the

Table 16.22

Subprogramme 8: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	18	15	20	13
1. Regional and country programmes on UNODC mandate areas	18	15	20	13
Technical materials (number of materials)	–	7	–	2
2. On business continuity, United Nations reform and the efficiency agenda	–	3	–	2
3. On UNODC mandate areas (e-learning modules)	–	4	–	–
Seminars, workshops and training events (number of days)	–	–	–	13
4. On programme development and the 2030 Agenda	–	–	–	13
C. Substantive deliverables				
Consultation, advice and advocacy: consultations with Member States and partners on UNODC strategic and programme priorities, new programme initiatives and options, including partnerships; strategic and operational field support and substantive oversight services; and advisory services for approximately 150 Member States and stakeholders on policies, strategies and cooperation frameworks in UNODC mandate areas.				
D. Communication deliverables				
Outreach programmes, special events and information materials: national campaigns to observe the International Day against Drug Abuse and Illicit Trafficking, the World Day against Trafficking in Persons and the International Anti-Corruption Day; and fundraising initiatives and strategic partnerships with international financial institutions, international organizations and the private sector specifically focused on country or regional contexts.				
External and media relations: monthly web stories for the UNODC website and field offices websites, highlighting key developments and updates in the work of the field office network.				
Digital platforms and multimedia content: field offices websites.				
E. Enabling deliverables				
Safety and security: safety and security services to approximately 120 physical field office locations globally in 90 countries.				

Subprogramme 9, component 1**Provision of secretariat services and substantive support to the Commission on Narcotic Drugs, the Commission on Crime Prevention and Criminal Justice and the United Nations Congress on Crime Prevention and Criminal Justice****Objective**

- 16.132 The objective, to which component 1 of this subprogramme contributes, is to ensure the effective and efficient functioning of the United Nations intergovernmental bodies dealing with issues relating to drugs, crime and terrorism, as well as the effective and efficient functioning of the standing open-ended intergovernmental working group on improving the governance and financial situation of UNODC and of the United Nations Congress on Crime Prevention and Criminal Justice in fulfilling their advisory roles.

Strategy

- 16.133 To contribute to the objective, the component will:
- (a) Support the Commission on Narcotic Drugs and its five subsidiary bodies (the Subcommittee on Illicit Drug Traffic and Related Matters in the Near and Middle East and the regional meetings of heads of national drug law enforcement agencies) through the provision of substantive and organizational services;
 - (b) Provide substantive and technical support to the Commission on Crime Prevention and Criminal Justice and to the United Nations Congress on Crime Prevention and Criminal Justice, including the follow-up to the Fourteenth Congress and the implementation of the provisions of its outcome document;
 - (c) Provide support to the standing open-ended intergovernmental working group on improving the governance and financial situation of UNODC by facilitating the preparations for and the organization of the formal and informal meetings of the working group, thereby helping Member States to make progress towards Sustainable Development Goals 3, 5, 8, 10, 11, 16 and 17;
 - (d) Support Member States in responding to post-COVID-19 requirements by organizing meetings on matters related to drugs and crime in the framework of the Commissions and subsidiary bodies, as well as on the work of UNODC within the open-ended intergovernmental working group, in innovative formats, including both in-person and online components.
- 16.134 The above-mentioned work is expected to result in:
- (a) Enhanced cooperation among Member States in accelerating the implementation of international drug policy commitments made over the past decade;
 - (b) Enhanced cooperation among Member States in the implementation of comprehensive strategies for crime prevention towards social and economic development and integrated approaches to challenges faced by criminal justice systems;
 - (c) Enhanced understanding of Member States of governance and financial matters relating to UNODC;
 - (d) Increased knowledge of the impact of COVID-19 on matters related to drugs and crime and in turn enhanced capacity of Member States to address related challenges;
 - (e) Increased participation by a broad and inclusive group of representatives.

Programme performance in 2021

Global participation in the world's largest conference on crime prevention and criminal justice during the COVID-19 pandemic

- 16.135 The component led the preparation for and the conduct of the Fourteenth United Nations Congress on Crime Prevention and Criminal Justice, held in Kyoto, Japan, in March 2021. This Congress was a congress of many firsts: the first major United Nations meeting hosted away from Headquarters during the COVID-19 pandemic, the first United Nations meeting hosted on an online conference centre and the first Congress organized in a hybrid format. Held under the overall theme “Advancing crime prevention, criminal justice and the rule of law: towards the achievement of the 2030 Agenda”, the Congress brought together over 5,000 participants representing a record of 152 Member States, 114 non-governmental organizations, 37 intergovernmental organizations, 600 individual experts and several United Nations entities and institutes.
- 16.136 A major outcome of the preparatory work led by the Secretariat was that the online conference centre unified over 1,000 in-person participants in Kyoto with over 4,000 participants joining online globally in “one Congress experience”. Its unique set-up enabled online participants to easily switch between different meetings and events of the Congress, including plenary meetings, workshops, special events, ancillary meetings and online exhibitions, thereby allowing all participants, in-person and online, to equally and meaningfully contribute to the Congress deliberations.
- 16.137 Progress towards the objective is presented in the performance measure below (see figure 16.XX).

Figure 16.XX

Performance measure: Member States participating in the United Nations Congress on Crime Prevention and Criminal Justice expressing full satisfaction with the quality and timeliness of technical and substantive services provided by the Secretariat to the Governing Bodies

(Percentage)

Planned results for 2023

Result 1: strengthened crime prevention, criminal justice and rule of law towards the achievement of the 2030 Agenda

Programme performance in 2021 and target for 2023

- 16.138 The component's work contributed to 94 per cent of Member States participating in the meetings of the Commission on Crime Prevention and Criminal Justice expressing full satisfaction with the quality and timeliness of technical and substantive services provided by UNODC, which exceeded the planned target of 70 per cent.
- 16.139 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 16.XXI).

Figure 16.XXI

Performance measure: Member States participating in the meetings of the Commission on Crime Prevention and Criminal Justice expressing full satisfaction with the quality and timeliness of technical and substantive services provided by the Secretariat to the Governing Bodies

(Percentage)

Result 2: strengthened support to the implementation of international drug policy commitments towards the achievement of the 2030 Agenda

Programme performance in 2021 and target for 2023

- 16.140 The component’s work contributed to 96 per cent of Member States participating in the meetings of the Commission on Narcotic Drugs expressing full satisfaction with the quality and timeliness of technical and substantive services provided by the Secretariat to the Governing Bodies, which exceeded the planned target of 75 per cent.
- 16.141 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 16.XXII).

Figure 16.XXII

Performance measure: Member States participating in the meetings of the Commission on Narcotic Drugs expressing full satisfaction with the quality and timeliness of technical and substantive services provided by the Secretariat to the Governing Bodies

(Percentage)

Result 3: strengthened crime prevention, criminal justice and rule of law towards the achievement of the 2030 Agenda through the effective follow-up to the Kyoto Declaration

Proposed programme plan for 2023

16.142 In March 2021, at the Fourteenth United Nations Congress on Crime Prevention and Criminal Justice, Member States adopted the Kyoto Declaration on Advancing Crime Prevention, Criminal Justice and the Rule of Law: Towards the Achievement of the 2030 Agenda for Sustainable Development, which sets the global agenda in crime prevention and criminal justice for the coming years in the broader context of the 2030 Agenda. Governments agreed on concrete actions to advance crime prevention, to strengthen criminal justice and to promote the rule of law and international cooperation, taking into account the impact of COVID-19. The component supported the preparation and management of the Congress and the negotiation at the Commission on Crime Prevention and Criminal Justice of the outcome of the Congress, the Kyoto Declaration, and assisted Member States in developing a multi-year workplan on its implementation. The component supported the Commission with the organization of intersessional thematic discussions to facilitate the exchange of challenges, good practices and lessons learned on the topics contained in the Declaration.

Lessons learned and planned change

16.143 The lesson for the component was that effective follow-up to the Kyoto Declaration and the achievement of legitimate and universally accepted policy results require comprehensive and inclusive participation in the meetings of all delegations and interested stakeholders; hybrid formats were helpful to this end and also helped to maximize participation in view of persistent global travel restrictions. In applying the lesson, the component will explore innovative ways of virtual participation in the thematic discussions on the follow-up to the Declaration, including by enabling delegations to invite additional experts to join remotely, subject to available resources, thereby promoting inclusive and comprehensive participation. Furthermore, the component will support the Commission in further enhancing its online presence to ensure that more representatives can follow progress made in the implementation of the Declaration.

16.144 Expected progress towards the objective is presented in the performance measure below (see figure 16.XXIII).

Figure 16.XXIII

Performance measure: Member States participating in the meetings of the Commission on Crime Prevention and Criminal Justice expressing full satisfaction with the quality and timeliness of technical and substantive services provided by the Secretariat to the Governing Bodies

(Percentage)

Deliverables

16.145 Table 16.23 lists all deliverables of the component.

Table 16.23

Subprogramme 9, component 1: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	71	49	65	66
1. Reports to the General Assembly on international cooperation to counter the world drug problem and on crime prevention and criminal justice, including reports on the United Nations Congress on Crime Prevention and Criminal Justice	4	6	5	5
2. Notes to the Economic and Social Council on the contribution of the Commission on Narcotic Drugs and of the Commission on Crime Prevention and Criminal Justice to the annual high-level political forum on sustainable development	2	2	2	2
3. Annual reports to the Economic and Social Council on the Commission on Narcotic Drugs and of the Commission on Crime Prevention and Criminal Justice	4	4	4	4
4. Annual reports to the Commission on Crime Prevention and Criminal Justice	14	14	12	13
5. Reports to the Commission on Narcotic Drugs	13	11	14	14
6. Reports and notes by the Secretariat to subsidiary bodies of the Commission on Narcotic Drugs	30	10	24	24
7. Notes by the Secretariat to the Commission on Narcotic Drugs and the Commission on Crime Prevention and Criminal Justice	2	2	2	2
8. Documentation for ad hoc expert group meetings related to the Commission on Narcotic Drugs	2	–	2	2
Substantive services for meetings (number of three-hour meetings)	164	134	154	158
Meetings of:				
9. The Fourteenth United Nations Congress on Crime Prevention and Criminal Justice	–	23	–	–
10. The Economic and Social Council	6	6	6	6
11. The Commission on Crime Prevention and Criminal Justice	46	42	46	46
12. The Commission on Narcotic Drugs	46	36	46	46
13. The subsidiary bodies of the Commission on Narcotic Drugs	50	15	40	40
14. The standing open-ended intergovernmental working group on improving the governance and financial situation of UNODC	12	12	12	16
15. Ad hoc expert groups related to the Commission on Narcotic Drugs	4	–	4	4
B. Generation and transfer of knowledge				
Publications (number of publications)	5	4	5	5
16. On the manufacture of narcotic drugs and psychotropic substances and their precursors	1	1	1	1
17. Directory of competent national authorities under the international drug control treaties	1	1	1	1
18. Schedules and tables of the international drug control conventions	3	2	3	3
Technical materials (number of materials)	–	11	–	–
19. E-learning modules	–	11	–	–
C. Substantive deliverables				
Consultation, advice and advocacy: substantive and technical advice to the Vienna-based Commissions, representatives of Member States, permanent missions in Vienna and other relevant stakeholders relating to the work of the Commissions; notes verbales as notifications under the international drug control treaties; advice on the follow-up to the mandates contained in the relevant resolutions and decisions adopted by the Commissions.				

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

Databases and substantive digital materials: database on the manufacture of narcotic drugs and psychotropic substances and their precursors; database on resolutions and decisions by the Commission on Narcotic Drugs and the Commission on Crime Prevention and Criminal Justice.

D. Communication deliverables

Outreach programmes, special events and information materials: special events of the Commissions, including the launch of the annual *World Drug Report*.

Digital platforms and multimedia content: web stories highlighting key developments in the work of the Commissions and the United Nations Congress on Crime Prevention and Criminal Justice; dedicated websites for the Commissions, the Congress, the follow-up to the special session of the General Assembly on the world drug problem held in 2016 and the follow-up to the 2019 ministerial segment of the Commission on Narcotic Drugs; secure web pages for use by the Commission on Narcotic Drugs, the Commission on Crime Prevention and Criminal Justice and the standing open-ended intergovernmental working group on improving the governance and financial situation of UNODC; regular content on social media accounts related to the Commission on Narcotic Drugs, the Commission on Crime Prevention and Criminal Justice, the follow-up to the 2016 special session of the General Assembly and the United Nations Congress on Crime Prevention and Criminal Justice.

Subprogramme 9, component 2 Provision of secretariat services and substantive support to the International Narcotics Control Board

Objective

- 16.146 The objective, to which component 2 of this subprogramme contributes, is to ensure the effective and efficient functioning of the International Narcotics Control Board in fulfilling its treaty-based mandate, through such measures as monitoring and promoting the full implementation of and full compliance with the three international drug control treaties and supporting Member States in implementing their treaty obligations.

Strategy

- 16.147 To contribute to the objective, the component will:
- (a) Provide independent secretariat services and substantive support to the International Narcotics Control Board, including ensuring that the Board is provided with advice on treaty implementation;
 - (b) Raise awareness of Governments and the international community about the implementation of the international drug control conventions, particularly through the publication and dissemination of the treaty-mandated reports of the Board, and on the need to develop and implement national drug control policies and regulatory control systems for narcotic drugs, psychotropic substances and precursor chemicals, helping Member States to make progress towards Sustainable Development Goals 3, 10, 11 and 16;
 - (c) Support Governments in meeting their treaty-based obligations for reporting to the Board, monitoring the international movement of precursors and the illicit use of internationally controlled and non-scheduled precursors, and promoting cooperation and the exchange of import and export authorizations, including through the INCB Learning programme and the International Import and Export Authorization System (I2ES), as well as information on licit and illicit activity, through electronic means such as the Pre-Export Notification Online (PEN Online) system and the Precursors Incident Communication System, projects Prism and Cohesion and task force efforts, helping Member States to make progress towards Goals 11, 16 and 17;
 - (d) Provide technical advice to the Board in assessing substances for scheduling recommendations under the 1988 Convention;

- (e) Build the capacity of and enhance cooperation among law enforcement, customs, postal and other national agencies to ensure the availability of controlled substances for licit purposes and to safely detect and interdict controlled substances, new psychoactive substances and non-medical synthetic opioids, through the Global Rapid Interdiction of Dangerous Substances (GRIDS) Programme, helping Member States to make progress towards Goals 3, 16 and 17;
- (f) Enhance preparedness for emergency situations by training competent national authorities on identifying and responding to changing patterns in trafficking in and abuse of controlled substances, new psychoactive substances and non-medical synthetic opioids that may take place owing to emergency situations and on the implementation of the simplified control measures during emergency situations.

16.148 The above-mentioned work is expected to result in:

- (a) Advancement of the Board's dialogue with Governments to promote the implementation of the drug control conventions and the Board's recommendations and engagement on treaty-related matters;
- (b) Effective functioning of the international system for licit trade in controlled substances;
- (c) More accurate identification and reporting by Governments on their needs for and consumption of narcotic drugs and psychotropic substances for medical and scientific purposes;
- (d) Increased availability of and access to controlled substances, with improved cooperation among Member States to ensure a steady balance between the supply of and demand for controlled substances;
- (e) Decreased availability of precursor chemicals for the illicit manufacture of drugs;
- (f) Reduction in the trafficking in and illicit consumption of internationally controlled substances and new psychoactive substances;
- (g) Improved response of Member States to changes related to emergency situations, including the COVID-19 pandemic, and their impacts on the demand for and trafficking of new psychoactive substances and non-medical synthetic opioids;
- (h) Improved response by Member States to emergency situations requiring expedited trade in and humanitarian supply of controlled substances for medical purposes.

Programme performance in 2021

Dangerous substances and non-medical synthetic opioids prevented from reaching end users

16.149 The component, through the GRIDS Programme of the International Narcotics Control Board, has been supporting Governments in the establishment and strengthening of public-private partnerships to prevent the exploitation of the private sector for the manufacture, movement, marketing and monetization of dangerous substances. Memorandums of understanding have been concluded with the Oceania Customs Organization, the Universal Postal Union and the World Customs Organization to facilitate international collaboration and effective responses to address this important issue. The GRIDS Programme also supports intelligence generation and dissemination through the Project Ion Incident Communication System (IONICS), which is dedicated to real-time communication of incidents involving suspicious shipments, trafficking, manufacture or production of dangerous substances. The amount of such information shared has increased over the years and has facilitated the identification of trafficking in these drugs, resulting in the interception of shipments by government authorities.

16.150 Progress towards the objective is presented in the performance measure below (see figure 16.XXIV).

Figure 16.XXIV
Performance measure: number of pieces of information on trafficking in new psychoactive substances exchanged in real time among Member States (annual)

Planned results for 2023

Result 1: safeguarding the capacity of the International Narcotics Control Board to monitor the treaty-mandated reporting by Governments to prevent diversion of internationally controlled substances

Programme performance in 2021 and target for 2023

- 16.151 The component’s work contributed to the continued operation by the Board of the international drug control system without disruption, with 100 per cent of processes, estimates and assessments established, on the basis of the replies received in form B, form B/P and form D, which met the planned target.
- 16.152 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 16.XXV).

Figure 16.XXV
Performance measure: processes, estimates and assessments established by year end, on the basis of the replies received in form B, form B/P and form D
 (Percentage)

Result 2: uninterrupted trade in internationally controlled drugs during emergencies and other urgent situations

Programme performance in 2021 and target for 2023

- 16.153 The component’s work contributed to improved understanding by Member States of supply problems and best practices to facilitate the availability of controlled substances during emergency situations,

which did not meet the target of the revision of model guidelines in consultation with WHO and Member States. The target was not met owing to external constraints faced by partners.

- 16.154 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 16.24).

Table 16.24
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
WHO/INCB model guidelines for the international provision of controlled medicines for emergency medical care serve as a basis for the international provision of controlled drugs for emergency care	Recognition that the WHO/INCB model guidelines should be updated to better guide Member States in ensuring provision of controlled drugs during emergency situations such as COVID-19	INCB guidance ^a developed and INCB/WHO/UNO DC joint statement delivered	Adoption of updated model guidelines by Member States	Awareness-raising on the use of the INCB guidance and WHO/INCB model guidelines

Abbreviation: INCB, International Narcotics Control Board.

^a International Narcotics Control Board, “Lessons from countries and humanitarian aid organizations in facilitating the timely supply of controlled substances during emergency situations”, August 2021.

Result 3: reduced availability of non-scheduled chemicals, designer precursors, material and equipment used in the manufacture of illicit drugs

Proposed programme plan for 2023

- 16.155 The proliferation of non-scheduled chemicals and designer precursors in illicit drug manufacture challenges the functioning of the international precursor control system, as recognized in, inter alia, resolution 60/5 of the Commission on Narcotic Drugs. Global efforts to counter illicit drug manufacture are additionally hampered by the lack of international attention on the diversion of material and equipment used in such manufacture, pursuant to article 13 of the 1988 Convention. In its resolution 62/4, the Commission encouraged the International Narcotics Control Board to develop guidelines on this topic. The component’s work has contributed to raising awareness and advancing global policy on these issues through the development of guidance and the organization of expert group meetings.

Lessons learned and planned change

- 16.156 The lesson for the component was the importance of increased multilateral exchanges, for example, the expert group meetings and consultations with Member States, to grow support for the Board’s efforts and build global consensus on non-scheduled chemicals and equipment used in illicit drug manufacture. In applying the lesson, the component will increase its strategic engagement with counterparts and stakeholders on these topics.
- 16.157 Expected progress towards the objective is presented in the performance measure below (see table 16.25).

Table 16.25

Performance measure: reduced availability of non-scheduled chemicals, designer precursors, material and equipment used in illicit drug manufacture

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Analysis of national approaches to address non-scheduled chemicals completed by INCB Increased engagement of experts on article 13 of the 1988 Convention	Enhanced knowledge of Member States on prevention and investigation of the diversion of materials and equipment essential for illicit drug manufacture through INCB guidelines	Two global consultative meetings and side event of the Commission on Narcotic Drugs on non-scheduled chemicals Guidelines to Prevent and Investigate the Diversion of Materials and Equipment Essential for Illicit Drug Manufacture in the context of article 13 of the United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances of 1988 available in all official languages of the United Nations	Catalogue of measures addressing non-scheduled chemicals available to Member States INCB guidance document on article 13 and equipment available to policymakers at the Commission on Narcotic Drugs At a Commission side event on equipment, Member States are made aware of various options and approaches to prevent equipment from being used in illicit drug manufacture and to increase operational use of article 13	Member States are able to address the proliferation of non-scheduled chemicals and apply article 13 and the technical documents, including through cooperation with industry

Abbreviation: INCB, International Narcotics Control Board.

Deliverables

16.160 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 16.30 to 16.32 and figure 16.XXVI.

16.161 As reflected in tables 16.30 (1) and 16.31 (1), the overall resources proposed for 2023 amount to \$21,866,600 before recosting, reflecting a net decrease of \$57,500 (or 0.3 per cent) compared with the appropriation for 2022. Resource changes result from two factors, namely: (a) a technical adjustment; and (b) other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Figure 16.XXVI
Distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

16.162 As reflected in table 16.30 (1), resource changes reflect a net decrease of \$57,500 under subprogramme 1, Countering transnational organized crime, related to the removal of one-time provisions under travel of staff (\$35,400) and contractual services (\$22,100) related to the non-recurrent resource requirements for the Ad Hoc Committee to Elaborate a Comprehensive International Convention on Countering the Use of Information and Communications Technologies for Criminal Purposes, pursuant to General Assembly resolution [75/282](#).

Extrabudgetary resources

16.163 As reflected in tables 16.30 (2) and 16.31 (2), UNODC receives both cash and in-kind contributions, which complement regular budget resources and continue to be vital for the delivery of its mandates. In 2023, projected extrabudgetary resources (cash contributions) of \$330,594,500 would provide for 559 posts, as presented in table 16.31 (2).

16.164 The resources will be used mainly to carry out technical cooperation projects, at the request of Member States. Extrabudgetary resources represent 93.8 per cent of the total resources for this programme.

16.165 The extrabudgetary resources under this section are subject to the oversight of the Commission on Narcotic Drugs and the Commission on Crime Prevention and Criminal Justice, pursuant to General Assembly resolutions [46/185 C](#) and [61/252](#), section XI.

16.166 Anticipated in-kind contributions will provide for donated right of use for 15 premises at the following locations: Abu Dhabi; Brasilia; Libreville; Rome; Turin, Italy; Tripoli; Mexico City; Abuja; Lagos, Nigeria; Islamabad; Panama City; Lima; Manila; Dakar; and Ashgabat, with an estimated value of \$1,400,000, and other services such as expert advice, use of training facilities and provision of supplies and equipment, with an estimated value of \$600,000.

Policymaking organs

16.167 The resources proposed under this component would provide for requirements relating to standing intergovernmental organs and expert bodies, special sessions of the General Assembly and intergovernmental processes the servicing of which is the responsibility of UNODC. The provisions for experts serving on committees in their individual capacity are in accordance with Assembly resolution 2491 (XXIII), as amended by resolutions 41/176, 42/25, section VI, and 43/217, section IX, while the provisions for members of the functional commissions are in accordance with Assembly resolutions 1798 (XVII), 2128 (XX) and 2245 (XXI). Table 16.33 provides information on the standing intergovernmental organs and related resource requirements under the regular budget.

Table 16.33

Policymaking organs

(Thousands of United States dollars)

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2022 appropriation</i>	<i>2023 estimate (before recosting)</i>
United Nations congresses on crime prevention and criminal justice	The United Nations congresses on crime prevention and criminal justice provide a forum for: (a) the exchange of views among States, intergovernmental organizations, non-governmental organizations and individual experts representing various professions and disciplines; (b) the exchange of experience in research, law and policy development; (c) the identification of emerging trends and issues in crime prevention and criminal justice; (d) the provision of advice and comments on selected matters submitted to it by the Commission on Crime Prevention and Criminal Justice; and (e) the submission of suggestions for the consideration of the Commission regarding possible subjects for the programme of work.	Mandate: General Assembly resolutions 46/152, 56/119 and 74/171 and decision 74/550 B Membership: 193 government officials Number of sessions in 2023: 0	—	—
Ad Hoc Committee to Elaborate a Comprehensive International Convention on Countering the Use of Information and Communications Technologies for Criminal Purposes	The Ad Hoc Committee was established to elaborate a comprehensive international convention on countering the use of information and communications technologies for criminal purposes, taking into full consideration existing international instruments and efforts at the national, regional and international levels on combating the use of information and communications technologies for criminal purposes, in particular the work and outcomes of the Expert Group to Conduct a Comprehensive Study on Cybercrime. The holding of three sessions in 2023, in person or in both an in-person and a virtual format, is planned.	Mandate: General Assembly resolution 75/282 Membership: 193 government officials Number of sessions in 2023: 3	—	—
Commission on Crime Prevention and Criminal Justice	The Commission on Crime Prevention and Criminal Justice is a functional body of the Economic and Social Council. It is the principal policymaking body of the United Nations with respect to crime prevention and criminal justice. The Commission has been entrusted with the functions of a preparatory body for the United Nations congresses on crime prevention and criminal justice. In addition to being the governing body of the UNODC crime programme, the Commission is authorized to approve the budget of the United Nations Crime Prevention and Criminal Justice Fund.	Mandate: Economic and Social Council resolution 1992/1 Membership: 40 government officials Number of sessions in 2023: 2	55.0	55.0

Section 16 International drug control, crime and terrorism prevention and criminal justice

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2022 appropriation</i>	<i>2023 estimate (before recosting)</i>
Commission on Narcotic Drugs and its subsidiary bodies	<p>The Commission on Narcotic Drugs is the principal policymaking body of the United Nations with respect to international drug control and has specific mandates deriving from international drug control treaties. The Commission is authorized to approve the budget of the Fund of the United Nations International Drug Control Programme.</p> <p>The Economic and Social Council has established subsidiary bodies of the Commission to coordinate the mechanisms for drug law enforcement cooperation at the regional level. The subsidiary bodies are: (a) the Subcommission on Illicit Drug Traffic and Related Matters in the Near and Middle East, of which there are 23 representatives; and (b) meetings of the heads of national drug law enforcement agencies, Africa, Asia and the Pacific, Europe, and Latin America and the Caribbean, whose membership is based on that of the relevant regional commission.</p>	<p>Mandate: Economic and Social Council resolution 1999/30</p> <p>Membership: 53 government officials</p> <p>Number of sessions in 2023: 2</p>	158.8	158.8
Standing open-ended intergovernmental working group on improving the governance and financial situation of the United Nations Office on Drugs and Crime	<p>The standing open-ended intergovernmental working group was established to improve the governance and financial situation of UNODC. The working group plays an important role in preparing decisions and action by the Commission on Narcotic Drugs and the Commission on Crime Prevention and Criminal Justice in a number of key areas, including strategic and budgetary matters, the programmatic work of UNODC and its financial situation, evaluation and oversight, and improving the methods of work of the Commissions.</p>	<p>Mandate: Economic and Social Council decisions 2009/251 and 2022/316</p> <p>Membership: N/A</p> <p>Number of sessions in 2023: 4 (seventh mandate, comprising 4 formal meetings)</p>	–	–
International Narcotics Control Board	<p>The International Narcotics Control Board is a treaty-based, quasi-judicial body responsible for evaluating, promoting, assisting Governments in and monitoring their compliance with the provisions of the three international drug control treaties (the Single Convention on Narcotic Drugs of 1961 as amended by the 1972 Protocol, the Convention on Psychotropic Substances of 1971 and the United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances of 1988). The Board assesses national and international drug control efforts, establishes and maintains an ongoing dialogue with Governments, conducts technical training and publishes various annual and technical reports mandated under the Conventions. In the event a country fails to cooperate with the Board or a country takes action that may endanger the aims of the Conventions, that country may consequently face measures invoked under article 14 of the 1961 Convention, article 19 of the 1971 Convention or article 22 of the 1988 Convention.</p> <p>The Board continually examines the functioning of the international drug control regime, identifies shortcomings in its implementation by Governments party to the three main international drug control treaties and formulates recommendations for further action addressed to national drug control agencies and relevant international and regional organizations. Those recommendations, which are aimed at assisting Governments in fully complying with their treaty obligations and at further developing the international drug control regime, are included every year</p>	<p>Mandate: General Assembly resolution 1774 (XVII); Economic and Social Council resolutions 1966/1106 (XL) and 1967/1196 (XLII); and the 1961 Convention as amended by the 1972 Protocol, article 9</p> <p>Membership: 13 members</p> <p>Number of sessions in 2023: 3</p>	505.1	505.1

Part IV International cooperation for development

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2022 appropriation</i>	<i>2023 estimate (before recosting)</i>
	in the annual report of the Board, for dissemination to all Governments. In addition, the Board produces an annual report on the implementation of article 12 of the 1988 Convention and two annual technical publications, on narcotic drugs and psychotropic substances.			
Conference of the Parties to the United Nations Convention against Transnational Organized Crime	<p>The Conference of the Parties to the United Nations Convention against Transnational Organized Crime was established to improve the capacity of States parties to combat transnational organized crime and to promote and review the implementation of the Convention and the Protocols thereto.</p> <p>Over the years, the Conference has established the following series of working groups to assist it in promoting and reviewing the implementation of the Convention and the Protocols thereto (listed in chronological order of establishment): the Working Group of Government Experts on Technical Assistance; the Working Group on International Cooperation; the Working Group on Trafficking in Persons; the Working Group on the Smuggling of Migrants; the Working Group on Firearms; and the open-ended intergovernmental meeting to explore all options regarding an appropriate and effective review mechanism for the United Nations Convention against Transnational Organized Crime and the Protocols thereto.</p>	<p>Mandate: General Assembly resolutions 55/25 and 55/255; the United Nations Convention against Transnational Organized Crime, article 32, and rule 3 of the rules of procedure for the Conference</p> <p>Membership: 190 government officials</p> <p>Number of sessions in 2023: 0</p>	–	–
Conference of the States Parties to the United Nations Convention against Corruption and its subsidiary bodies	<p>The Conference of the States Parties to the United Nations Convention against Corruption was established to improve the capacity of and cooperation between States parties to achieve the objectives set forth in the Convention and to promote and review its implementation. UNODC is the secretariat of the Conference, which provides policy guidance to UNODC for the development and execution of activities related to combating corruption.</p> <p>The Conference has established the Implementation Review Group and two open-ended intergovernmental working groups to further the implementation of specific aspects of the Convention (namely, asset recovery and prevention), as well as open-ended intergovernmental expert meetings on international cooperation.</p>	<p>Mandate: General Assembly resolution 58/4; the United Nations Convention against Corruption, article 63; and rule 3 of the rules of procedure for the Conference</p> <p>Membership: 189 government officials</p> <p>Number of sessions in 2023: 1</p>	–	–
Total			718.9	718.9

16.168 The proposed regular budget resources for 2023 amount to \$718,900 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 16.34.

Executive direction and management

- 16.169 The executive direction and management component comprises the Office of the Executive Director and the Independent Evaluation Section.
- 16.170 The Executive Director is responsible for coordinating and providing leadership for all United Nations drug control and crime prevention activities to ensure the coherence of actions within the programme and the coordination, complementarities and non-duplication of such activities across the United Nations system. In that capacity, the Executive Director participates in the work of the United Nations System Chief Executives Board for Coordination. The Executive Director acts on behalf of the Secretary-General in fulfilling the responsibility that devolves upon her under the terms of international treaties and resolutions of United Nations organs relating to international drug control or crime prevention. The responsibilities are combined with those of the Director-General of the United Nations Office at Vienna. The Office of the Executive Director is integrated with that of the Director-General and is supported with resources from the regular budget under part C of section 1, Overall policymaking, direction and coordination.
- 16.171 The core functions of the Office of the Executive Director are: (a) to assist the Executive Director in the overall executive direction and management of UNODC; (b) to facilitate inter-office cooperation in the implementation of workplans and administrative matters; (c) to ensure the timely implementation of decisions and the coordination of inputs from all organizational units to the activities of the Office; and (d) to support the Executive Director in the overall leadership and coordination of the activities of UNODC with extensive research and substantive information to advise on issues of policy, resources and results management.
- 16.172 The Office of the Executive Director also coordinates cross-cutting institutional change processes, such as the systematic inclusion of gender equality aspects in all areas of UNODC work and reaching gender parity in staff. To that end, the Office of the Executive Director includes a gender team that coordinates the implementation of the United Nations Office at Vienna/UNODC Strategy and Action Plan for Gender Equality and the Empowerment of Women (2022–2026) to ensure delivery of United Nations commitments on gender equality and the empowerment of women, including Sustainable Development Goal 5. Through a range of activities, including the development of gender mainstreaming guidelines and tools, the gender team has enhanced institutional processes to measure and report on gender-related Sustainable Development Goal results and provides capacity-building for personnel to further strengthen gender mainstreaming across the UNODC programme of work. The United Nations Office at Vienna/UNODC has also established the annual Gender Award to recognize high-impact projects, policies, programmes, strategies and practices by either a team or individuals at Headquarters and in the field offices.
- 16.173 The Independent Evaluation Section provides evaluation-based knowledge for decision-making to the Executive Director and Member States. In 2021, despite the COVID-19 pandemic, the Section finalized 15 evaluations. The strategic evaluation of the institutional dimension of the work of the United Nations Office at Vienna/UNODC to advance gender equality and the empowerment of

women was conducted and is anticipated to be finalized in the first half of 2022. Moreover, the Section, in coordination with the UNODC Terrorism Prevention Branch and in cooperation with the Office of Counter-Terrorism and the United Nations Interregional Crime and Justice Research Institute, finalized the first United Nations system-wide meta-synthesis of evaluations under the United Nations Global Counter Terrorism Strategy. Internal evaluation capacity was enhanced, including through the launch of a pilot for field-based evaluation capacity development in Mexico. New guidance was developed, including a toolkit for evaluating crime prevention and terrorism, and a project management user manual for the web-based tool Unite Evaluations. The evaluation policy was revised and will be launched in 2022. Unite Evaluations was used for all UNODC evaluations and facilitated access to recommendations and lessons learned to support evidence-based decisions.

- 16.174 In 2023, the Section will further strengthen its investments in utilization-focused evaluations in line with the implementation of the UNODC Strategy 2021–2025, the UNODC annual evaluation plan and the revised UNODC evaluation policy, aligning with the administrative instruction on evaluation in the United Nations Secretariat (ST/AI/2021/3). Furthermore, the results and lessons learned from the 2021 evaluations will pave the way for an enhancement and mainstreaming of the evaluation processes and evaluation guidelines, templates and tools of UNODC. Dedicated internal and external evaluation capacity-building efforts will be further piloted and scaled up. Moreover, innovative meta-syntheses of UNODC evaluation reports will ensure the provision of information at an aggregate level for organizational learning. Joint system-wide meta-syntheses, together with other evaluation functions in the United Nations system of evaluations, will further respond to United Nations reforms for aggregate results to inform policymaking.
- 16.175 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the United Nations Office at Vienna and UNODC are integrating environmental management practices into their operations. The Vienna headquarters is a climate-neutral facility, running 100 per cent on renewable energy. Since 2020, the Vienna-based organizations of the common system have started to renew entrances, replace existing air curtains and upgrade or refurbish all elevator cabins, and have continued to upgrade air conditioning units from the 1978 standards, and to replace pipes and insulation throughout the Vienna International Centre. These measures will result in a further reduction of the environmental impact of the Vienna International Centre. These projects will continue through 2023, to further reduce the Centre's carbon footprint.
- 16.176 Information on compliance with regard to the timely submission of documentation and advance booking for air travel is reflected in table 16.35. The low travel compliance rate in 2021 (18 per cent) was largely due to the impact of the COVID-19 pandemic and the resulting changes at short notice of travel options, as well as the imposition and lifting of travel restrictions, which prevented UNODC from undertaking travel missions in a predictive and timely manner. Nevertheless, in 2021 several awareness-raising sessions were held with staff at large, as well as quarterly compliance rates shared, to emphasize the importance of and requirement to comply with the advance purchase rule. Compliance rates continue to be monitored, and statistics and trends distributed to managers on a quarterly basis.

Table 16.35

Compliance rate

(Percentage)

	<i>Actual 2019</i>	<i>Actual 2020</i>	<i>Actual 2021</i>	<i>Planned 2022</i>	<i>Planned 2023</i>

Air tickets purchased at least 2 weeks before the commencement of travel	24	19	18	100	100

16.177 The proposed regular budget resources for 2023 amount to \$827,100 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 16.36 and figure 16.XXVII.

Table 16.36

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

16.178 Extrabudgetary resources for the component are estimated at \$4,300,800 and would provide for 18 posts (1 D-1, 6 P-4, 3 P-3, 3 P-2 and 5 GS (OL)) in the Office of the Executive Director and the Independent Evaluation Section, as well as non-post resources. In the Office of the Executive Director, the resources would support the implementation of the United Nations Office at Vienna/UNODC Strategy and Action Plan for Gender Equality and the Empowerment of Women (2022–2026). In the Independent Evaluation Section, the resources would provide for continued investments in innovative evaluation products and services, national evaluation capacity-building, knowledge management, and communication and information technology tools.

Programme of work

Subprogramme 1 Countering transnational organized crime

16.179 The proposed regular budget resources for 2023 amount to \$3,713,900 and reflect a decrease of \$57,500 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 16.162. Additional details on the distribution of the proposed resources for 2023 are reflected in table 16.37 and figure 16.XXVIII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

- 16.180 Extrabudgetary resources for the subprogramme are estimated at \$130,621,300 and would provide for 170 posts (7 P-5, 81 P-4, 49 P-3, 7 P-2/1, 2 GS (PL) and 24 GS (OL)), as well as non-post resources. The resources would provide for legal advisory services and other technical cooperation activities to assist countries in implementing the United Nations Convention against Transnational Organized Crime and the Protocols thereto and the international drug control conventions, as well as to make further progress towards the achievement of Sustainable Development Goal 16, relating to peace, justice and strong institutions. The expected decrease of \$6,785,000 is attributable mainly to an expected decrease in activities for the projects on migrant smuggling and human trafficking in North Africa and strengthening of institutional capacities to fight against illegal deforestation in Colombia.

Subprogramme 2**A comprehensive and balanced approach to counter the world drug problem**

- 16.181 The proposed regular budget resources for 2023 amount to \$734,700 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 16.38 and figure 16.XXIX.

Extrabudgetary resources

16.182 Extrabudgetary resources for the subprogramme are estimated at \$57,896,700 and would provide for 32 posts (5 P-5, 12 P-4, 7 P-3, 1 P-2/1 and 7 GS (OL)), as well as non-post resources. The resources would provide effective, comprehensive and balanced responses to the world drug problem in compliance with the three drug control conventions and other relevant United Nations treaties through normative and technical cooperation. The resources would also provide for advisory services and field projects at the global, regional and national levels to support Member States on evidence-based drug prevention, treatment and rehabilitation, HIV/AIDS prevention, alternative development and sustainable livelihoods, including new initiatives against organized wildlife crime and environmental crime. The expected increase of \$10,836,200 is attributable mainly to the implementation of various initiatives in the area of alternative development, including support of illicit crop-substitution strategies in Colombia.

**Subprogramme 3
 Countering corruption**

16.183 The proposed regular budget resources for 2023 amount to \$2,773,200 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 16.39 and figure 16.XXX.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

16.184 Extrabudgetary resources for the subprogramme are estimated at \$18,400,400 and would provide for 35 posts (2 P-5, 18 P-4, 6 P-3 and 9 GS (OL)), as well as non-post resources. The resources would provide for a broad set of advisory services, training courses, seminars and workshops, knowledge products and tools, as well as field projects, to support Member States in the ratification and implementation of the United Nations Convention against Corruption. The expected decrease of \$3,007,700 is attributable mainly to an expected decrease in the activities under the global programme to prevent and combat corruption through effective implementation of the United Nations Convention against Corruption in support of Sustainable Development Goal 16.

Subprogramme 4 Terrorism prevention

16.185 The proposed regular budget resources for 2023 amount to \$1,305,100 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 16.40 and figure 16.XXXI.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

16.186 Extrabudgetary resources for the subprogramme are estimated at \$17,827,200 and would provide for 29 posts (1 P-5, 10 P-4, 11 P-3, 1 P-2/1 and 6 GS (OL)), as well as non-post resources. The resources support the provision of legal and capacity-building technical assistance on the ratification and

implementation of the international legal instruments against terrorism in order to promote and strengthen criminal justice responses to terrorism in accordance with international human rights law and the rule of law. The expected decrease of \$1,219,400 is attributable mainly to an expected decrease in the activities of the project on terrorism prevention in the South-East Asia region.

Subprogramme 5 Justice

16.187 The proposed regular budget resources for 2023 amount to \$1,317,700 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 16.41 and figure 16.XXXII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

16.188 Extrabudgetary resources for the subprogramme are estimated at \$45,218,100 and would provide for 52 posts (1 P-5, 17 P-4, 23 P-3, 3 P-2/1 and 8 GS (OL)), as well as non-post resources. The resources would enable support to Member States in their efforts to develop effective strategies, policies and programmes to prevent crime and to improve criminal justice systems in line with international standards and norms. Examples of areas of work include the treatment of prisoners, the prevention and addressing of violence against children and women, legal aid, women in prisons and maritime crime. The expected decrease of \$7,984,700 is attributable mainly to scaled-down activities of the Global Maritime Crime Programme and in the area of prison reform.

**Subprogramme 6
Research, trend analysis and forensics**

16.189 The proposed regular budget resources for 2023 amount to \$2,999,000 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 16.42 and figure 16.XXXIII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

16.190 Extrabudgetary resources for the subprogramme are estimated at \$28,255,400 and would provide for 90 posts (1 D-2, 1 D-1, 3 P-5, 16 P-4, 27 P-3, 4 P-2/1, 1 GS (PL) and 37 GS (OL)), as well as non-post resources. The resources would support studies and in-depth global analyses of emerging transnational crime threats, including monitoring and analysis of migrant smuggling networks and the involvement of organized crime in smuggling. These resources would also be used to support research work for the *World Wildlife Crime Report* and the *Global Study on Homicide*, as well as to increase the availability and quality of comparable and real-time data on world drug and crime problems using innovative methods and new technologies. These resources would also contribute to strengthening the technical and forensic capacity of Member States through quality assurance support, laboratory training and assistance in the creation of early warning systems, especially for new psychoactive substances. In addition, these resources would also address an expanded mandate and cover a number of forensic issues in the drug and crime segments, with greater emphasis on laboratory research and monitoring activities in support of drug trend analysis and surveys. The increase of \$791,000 is attributable mainly to a project on strengthening forensic services and chains of custody in the Middle East and North Africa region.

**Subprogramme 7
 Policy support**

16.191 The proposed regular budget resources for 2023 amount to \$1,030,100 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 16.43 and figure 16.XXXIV.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

16.192 Extrabudgetary resources for the subprogramme are estimated at \$7,369,600 and would provide for 30 posts (1 D-1, 6 P-4, 10 P-3 and 13 GS (OL)), as well as non-post resources. The resources would provide for, inter alia, the enhancing of communication and public information, the training of UNODC staff on results-based management, the operation of the Programme Review Committee and travel costs for engagement in relevant inter-agency forums. The decrease of \$83,100 is attributable mainly to a reduction of activities in the area of partnership engagement and external relationships.

Subprogramme 8 Technical cooperation and field support

16.193 The proposed regular budget resources for 2023 amount to \$579,500 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 16.44 and figure 16.XXXV.

Table 16.44

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

16.194 Extrabudgetary resources for the subprogramme are estimated at \$11,232,500 and would provide for 57 posts (8 D-1, 15 P-5, 14 P-4, 9 P-3, 1 GS (PL) and 10 GS (OL)), as well as non-post resources. The resources would support integrated programming and cross-sectoral technical cooperation, strategic direction, monitoring and results-oriented reporting of UNODC field-based programmes, as well as field security support. The decrease of \$765,100 is attributable mainly to a lower level of activities expected in support of integrated programming and cross-sectoral technical cooperation.

Subprogramme 9

Provision of secretariat services and substantive support to the United Nations intergovernmental bodies, the International Narcotics Control Board and the United Nations Congress on Crime Prevention and Criminal Justice

16.195 The proposed regular budget resources for 2023 amount to \$5,423,600 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 16.45 and figure 16.XXXVI.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

16.196 Extrabudgetary resources for the subprogramme are estimated at \$5,592,500 and would provide for 20 posts (2 P-5, 5 P-4, 4 P-3, 1 P-2/1 and 8 GS (OL)), as well as non-post resources. The resources would support the work of intergovernmental bodies and activities to reduce trafficking in dangerous non-medical synthetic opioids and other new psychoactive substances and to limit their supply to consumer markets. The increase of \$716,900 is attributable mainly to the Global Rapid Interdiction of Dangerous Substances (GRIDS) Programme.

Programme support

16.197 The proposed regular budget resources for 2023 amount to \$443,800 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 16.46 and figure 16.XXXVII.

Table 16.46

Figure 16.XXXVII
Programme support: distribution of proposed resources for 2023 (before recosting)

(Thousands of United States dollars)

Extrabudgetary resources

16.198 Extrabudgetary resources for the component are estimated at \$3,880,000 and would provide for 26 posts (1 P-4, 1 P-3, 2 P-2/1, 5 GS (PL) and 17 GS (OL)), as well as non-post resources. The resources would provide for the provision of software products to Member States within the thematic areas of the substantive mandates of the Office.

Annex I

Organizational structure and post distribution for 2023

1. Two charts showing the organizational structure of the United Nations Office on Drugs and Crime (UNODC) are presented below. Chart A reproduces the approved organizational structure for 2022, as contained in document [A/76/6 \(Sect. 16\)](#). Chart B presents the proposed organizational structure for 2023.

Justification for the proposed changes

2. As outlined in the UNODC Strategy 2021–2025, in order to strengthen more systematic coordination across the five thematic areas of UNODC and ensure that its normative, research and technical assistance work is mutually reinforcing, the organizational structure of UNODC is proposed to be changed as follows:

(a) The work of the Prevention, Treatment and Rehabilitation and the HIV/AIDS Sections, as well as the work on alternative development, would be relocated to the Laboratory and Scientific Service, which would be renamed the Drugs, Laboratory and Scientific Services Branch under the Division for Policy Analysis and Public Affairs. The Branch would bring together the delivery of UNODC normative and technical assistance and expert advisory services in the laboratory, forensic science and health sectors, ensuring that Member States have access to, and use, quality laboratory and forensic science services of an internationally accepted standard in their efforts against drugs and crime. The Branch would be responsible for the operation of the United Nations Narcotics Laboratory in Vienna, established by the General Assembly in resolution [834 \(IX\)](#) (1954), and the implementation of the substantive work programmes on forensic and scientific services and on drug use prevention and health;

(b) The Justice Section would be relocated under the Division for Treaty Affairs and renamed the Crime Prevention and Criminal Justice Section, in line with the UNODC Strategy 2021–2025. This would reflect the increased focus of UNODC mandates on the Section's normative work on the United Nations standards and norms in crime prevention and criminal justice, which form the basis for the role of the Section as a knowledge hub and technical assistance provider in relevant areas;

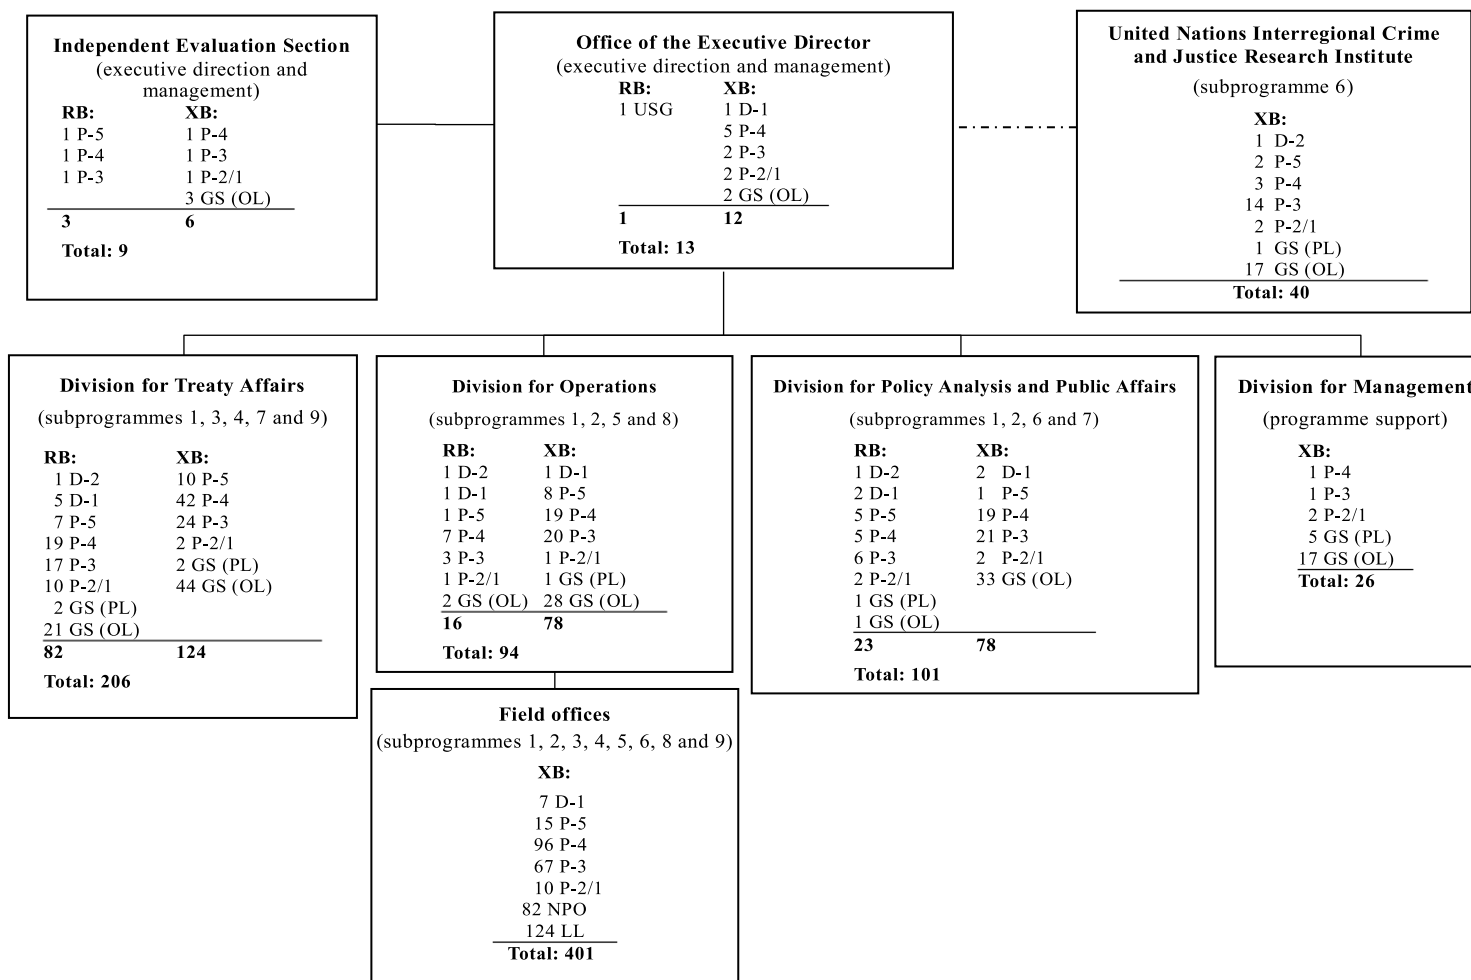

(c) The Implementation Support Section of the Organized Crime and Illicit Trafficking Branch would be renamed the Firearms Trafficking Section. The Section would support the intergovernmental and normative work related to the Protocol against the Illicit Manufacturing of and Trafficking in Firearms, Their Parts and Components and Ammunition, supplementing the United Nations Convention against Transnational Organized Crime, and related instruments and would provide assistance to Member States to promote full and effective implementation of the Firearms Protocol and generally prevent and counter the illicit manufacturing, trafficking and misuse of firearms, their parts and components and ammunition, and their links to related crimes;

(d) A Border Management Branch would be established within the Division for Operations, bringing together UNODC expertise on countering cross-border trafficking at sea, on land and by air. UNODC programmes in these areas tackle the full range of crime types by focusing on the common skills that border control, law enforcement and prosecution agencies need to counter illicit trade through ports and airports, across land borders and by sea. The Branch would also bring together all UNODC work on crimes that have an impact on the environment to ensure that the illicit trade in wildlife, fish, timber, waste and minerals is addressed coherently;

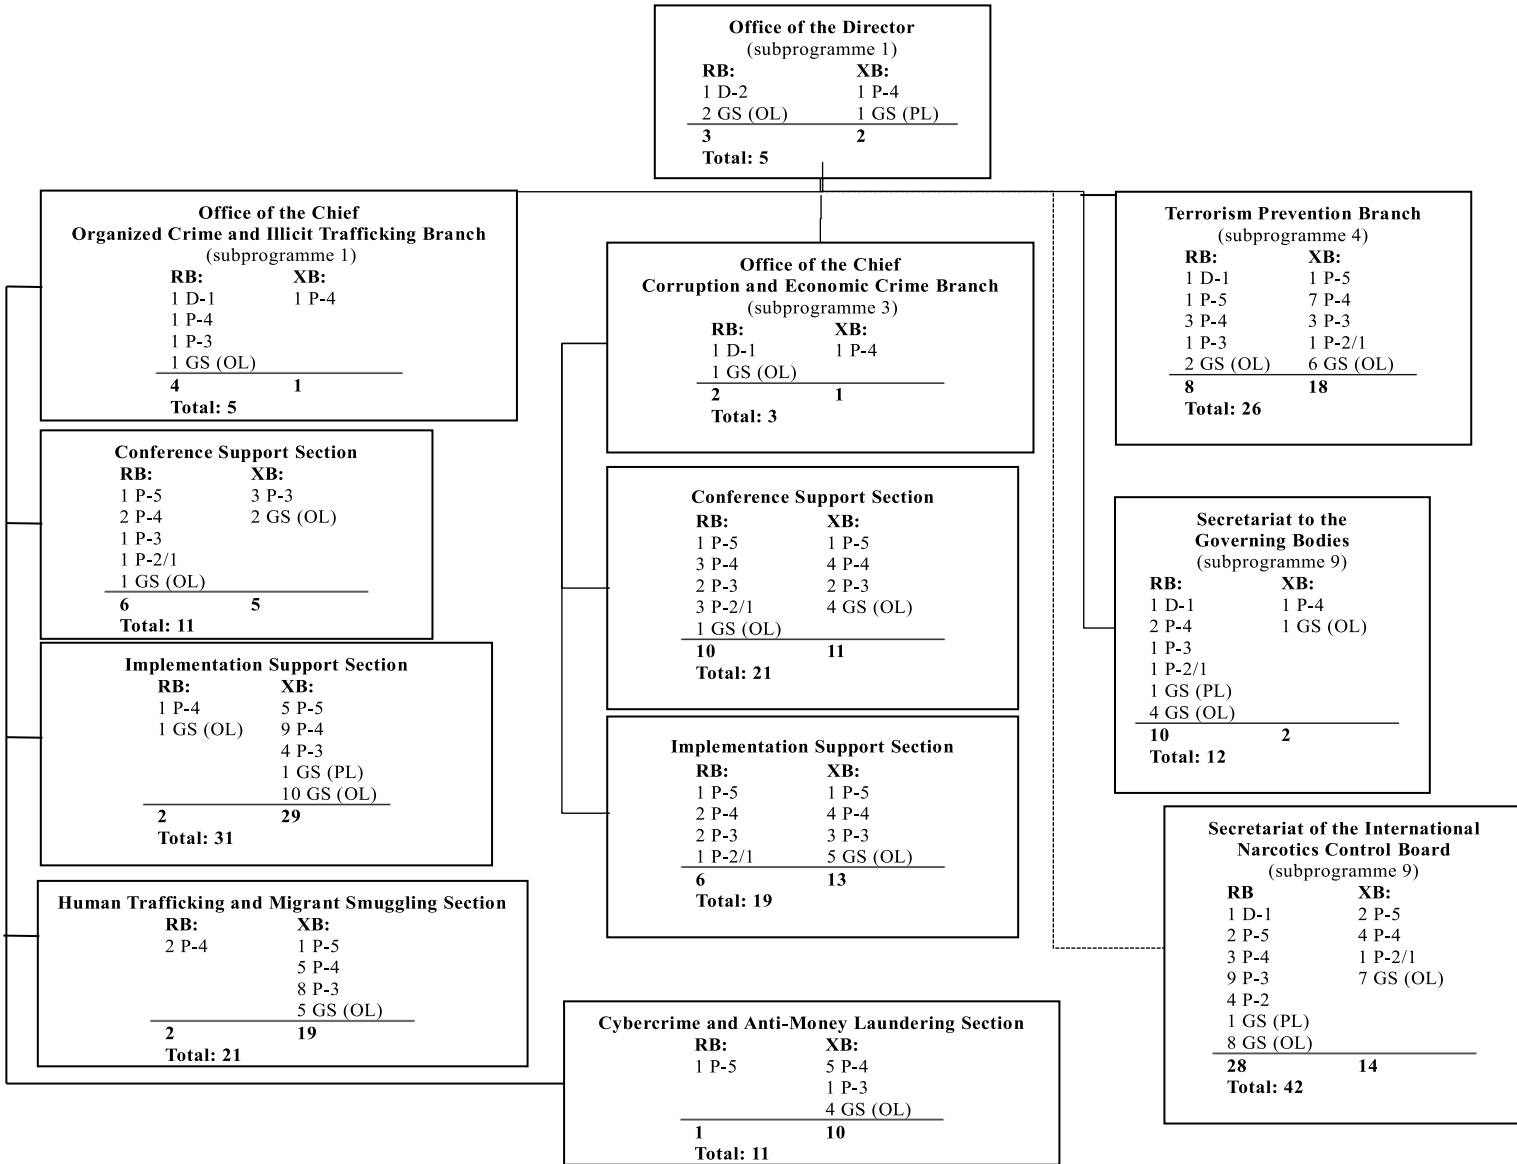

(e) The Drug Prevention and Health Branch, consisting of the Prevention, Treatment and Rehabilitation and the HIV/AIDS Sections and the Sustainable Livelihoods Unit, would cease operations, with the Prevention, Treatment, and Rehabilitation and HIV/AIDS Sections relocated to the Drugs, Laboratory and Scientific Services Branch, and the Sustainable Livelihoods Unit merged with the newly established Border Management Branch.

Annex II

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Board of Auditors

[A/76/5/Add.10](#), chap. II

The Board recommends that UNODC headquarters, together with the UNODC country office in Afghanistan, continue to take the measures related to the critical full cost recovery tier faced by the country office and manage the actions tending to approach a desirable or manageable full cost recovery level (para. 24).

Implementation is in progress. In 2021, the UNODC country office in Afghanistan demonstrated improvement in managing the full cost recovery and succeeded in reducing the full cost-recovery rate as a result of the efficiency measures, in spite of the political instability in the country resulting in low project implementation. The situation is monitored on a regular basis and further improvements are expected in the context of 2022 implementation.

The Board recommends that UNODC carry out a risk assessment in the strategic, governance, compliance, operations and financial pillars, as included in the Secretariat's risk universe, and update the risk register and the risk response and treatment plan accordingly (para. 34).

Implementation is in progress. In line with the updated Secretariat risk management framework, the UNODC interdivisional exercise to update and revise the enterprise risk register and risk treatment plan has been initiated, is ongoing and is expected to continue until mid-2022.

The Board recommends that UNODC update the risk areas and/or categories on the risk register and risk profile as a product of the consideration of new emerging risks (para. 35).

Implementation is in progress. Please refer to comments on the recommendation contained in [A/76/5/Add.10](#), chap. II, para. 34.

The Board recommends that UNODC define, through a formal document and in a comprehensive way, the form, duties, responsibilities, expected results and geographical coverage for its field office network structure (para. 51).

Implementation is in progress. UNODC has advanced in the discussion and mapping of its field presence. Currently, there are concrete proposals related to field categories, naming, geographical scope and expected functions.

Advisory Committee on Administrative and Budgetary Questions

[A/76/7](#)

The Advisory Committee looks forward to an update on the use of hybrid and in-person meetings by UNODC in intergovernmental settings, in the context of the proposed programme budget for 2023 (para IV.141).

UNODC serviced multiple intergovernmental meetings and processes, in either an online or a hybrid format, during the coronavirus disease (COVID-19) pandemic. Surveys were circulated after each formal meeting; the feedback from participants has generally shown that, while online/remote participation has increased the level of expert participation from capitals, there was a strong preference for formal meetings and negotiations to be held in person, due to persistent technical issues, time zone differences and difficulties in conducting lengthy, multilateral negotiations remotely.

Brief description of the recommendation

Action taken to implement the recommendation

The Advisory Committee looks forward to an update, in the proposed programme budget for 2023, on fundraising efforts, as well as on the efforts to increase the proportion of unearmarked contributions (para. IV.135).

Nevertheless, Member States expect additional online/remote participation to continue to be an option, even when in-person participation is possible. As such, the meetings of the Commission on Crime Prevention and Criminal Justice and the Commission on Narcotic Drugs continue to be held in a hybrid format, facilitating in-person participation where feasible while also enabling online participation. The use of an online conference platform offering networking functions and facilitating the interaction between in-person and online participants has been welcomed by delegations.

In 2021, as one of the efficiency enablers of the UNODC Strategy 2021–2025, UNODC approved a fundraising plan aimed at expanding and diversifying the partnership base. The new Strategy provides a vehicle for more flexible donor funding through innovative approaches and, in this vein, inherent in the fundraising plan is the matching of partner priorities with UNODC mandates, expertise and cross-cutting themes.

Donor briefings and outreach have been intensified on thematic and regional programmes promoting more flexible funding for strategic priorities outlined in the UNODC Strategy 2021–2025. UNODC has also increased the number of high-level strategic discussions with donor partners where the general-purpose shortfalls are part of the discussions. UNODC is also articulating the thematic areas of the Strategy in regional programmes such as the UNODC Strategic Vision for Africa 2030, which provides donors the opportunity to provide soft-earmarked contributions. The standing open-ended intergovernmental working group on improving the governance and financial situation of the United Nations Office on Drugs and Crime is regularly apprised of the general-purpose situation and requested to favourably address the general-purpose shortfall.

Annex III

Summary of proposed post changes by component and subprogramme

<i>Subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 1, Countering transnational organized crime	1	P-4	Redeployment of 1 P-4 Crime Prevention and Criminal Justice Officer within subprogramme 1	The redeployment of one Crime Prevention and Criminal Justice Officer (P-4) within the Organized Crime and Illicit Trafficking Branch from the Implementation Support Section to the Conference Support Section of the Organized Crime and Illicit Trafficking Branch as part of the restructuring as described in annex I.
	1	GS (OL)	Redeployment of 1 GS (OL) Programme Management Assistant within subprogramme 1	The redeployment of one Programme Management Assistant (GS (OL)) within the Organized Crime and Illicit Trafficking Branch from the Implementation Support Section to the Office of the Chief of the Organized Crime and Illicit Trafficking Branch as part of the restructuring as described in annex I.
Subprogramme 9, component 2, Provision of secretariat services and substantive support to the International Narcotics Control Board	(1)	P-4	Reclassification of 1 post from Drug Control and Crime Prevention Officer (P-4) to Drug Control and Crime Prevention Officer (P-3)	The downward reclassification of one Drug Control and Crime Prevention Officer (P-4) to the P-3 level would provide substantive support to the Standing Committee and implementation of its decisions, under the supervision of the Chief of the Narcotics Control and Estimates Section. This post would no longer serve as the Secretary of the International Narcotics Control Board's Standing Committee on Estimates and can therefore be performed at the P-3 level.
	1	P-3		
	(1)	P-3	Reclassification of 1 post of Legal Officer (P-3) to Legal Officer (P-4)	The upward reclassification of one Legal Officer (P-3) to the P-4 level would provide legal advice to the International Narcotics Control Board and enable the Board to better fulfil its mandate under the international drug control conventions, in particular by providing advice to the Board on the interpretation of complex legal issues related to the compliance by State parties with the provisions of the three international drug control conventions and through the analysis of national legislation and regulations developed by parties to implement the provisions of the treaties.

Foreword

The year 2023 presents an opportunity for the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) to accelerate the implementation of its strategic plan 2022–2025, with a focus on integrated and well-coordinated approaches to address the root causes of gender inequality and effect broader systems change.

Through its mandate of normative, coordination and programmatic support, UN-Women will work closely with Member States and partners across and outside of the United Nations system to drive the acceleration of the Beijing Declaration and Platform for Action and the achievement of the 2030 Agenda for Sustainable Development and Sustainable Development Goal 5 in particular. UN-Women will continue to serve as a global knowledge centre on gender equality and the empowerment of women, providing thought leadership, advocacy and capacity-building on key issues, with a focus on significantly enhancing cooperation and accountability across the United Nations system. The Entity will prioritize the creation of opportunities for young people to engage equally and meaningfully in decision-making spaces and continue the focus on leaving no one behind, including by addressing multiple and intersecting forms of discrimination.

The proposed programme plan is formulated to maximize the achievement of the agreed objectives and the fulfilment of the mandate of UN-Women. It sets out examples of progress, including steps to ensure that in 2023, UN-Women will continue to achieve measurable results, fill critical knowledge gaps and build long-term resilience among the women and girls of the world.

(Signed) Sima **Bahous**
Under-Secretary-General/Executive Director, UN-Women

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 17.1 The United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) is responsible for supporting the achievement of gender equality and the empowerment of all women and girls as actors and beneficiaries of sustainable development, human rights, humanitarian action and peace and security. The mandate derives from the priorities established in relevant General Assembly, Economic and Social Council and Security Council resolutions, including General Assembly resolutions [64/289](#), in which the Assembly established UN-Women as a composite entity that functions as a secretariat, carries out operational activities at the country and regional levels and leads, coordinates and promotes the accountability of the United Nations system in its work on gender equality and the empowerment of women; [70/1](#) on the 2030 Agenda for Sustainable Development, pursuant to which UN-Women supports the gender-responsive implementation of the 2030 Agenda; [72/279](#) on repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system; and [75/233](#) on the quadrennial comprehensive policy review of operational activities for development of the United Nations system, in which the Assembly called on the United Nations development system to enhance and accelerate gender mainstreaming through the full implementation of the System-wide Action Plan on Gender Equality and the Empowerment of Women, developed under the leadership of UN-Women.
- 17.2 The mandate of UN-Women endows it with a unique role and capacity to: (a) support the strengthening and development of global norms and standards, including with country-level experiences; (b) promote more effective coordination, coherence and gender mainstreaming across the United Nations system in support of commitments for gender equality and the empowerment of women; and (c) support Member States, upon request, to translate global norms and standards into legislation, policies and development plans as part of its operational activities. UN-Women also has a critical role in supporting the mobilization of civil society, the private sector and other relevant stakeholders, at all levels, in support of the implementation of the Beijing Declaration and Platform for Action and the gender-responsive implementation of the 2030 Agenda.

Strategy and external factors for 2023

- 17.3 The UN-Women strategic plan 2022–2025 guides the Entity's activities and its strategic direction, objectives and approaches to support the efforts of Member States to accelerate the realization of gender equality and the empowerment of all women and girls, as well as the enjoyment of all human rights by women and girls (General Assembly resolution [76/142](#)).
- 17.4 The strategic plan is based on an extensive consultative process and draws from analysis of progress and persistent challenges, including recommendations from the 25-year review and appraisal of the Beijing Declaration and Platform for Action, as well as lessons learned from the Entity's first decade.
- 17.5 In the next four years, UN-Women will continue its work on its established thematic impact areas: (a) governance and participation in public life; (b) women's economic empowerment; (c) ending violence against women and girls; and (d) women and peace and security, humanitarian action and disaster risk reduction. UN-Women will focus on integrated approaches to address the root causes of gender inequality and effect broader systems change by advancing seven systemic outcomes across the four thematic impact areas, given the interconnected nature of global challenges: (a) the strengthening of global normative frameworks and gender-responsive laws, policies and institutions; (b) financing for gender equality; (c) positive social norms, including by engaging men and boys; (d) equitable by women to services, goods and resources; (e) women's voices, leadership and agency;

- (f) the production, analysis and use of gender statistics, sex-disaggregated data, and knowledge; and
(g) United Nations system coordination for gender equality and the empowerment of women.
- 17.6 UN-Women will continue to implement its programme by leveraging its normative support function, United Nations system coordination and operational activities, as mandated by its founding resolution, in an integrated and mutually reinforcing manner for transformative results.
- 17.7 UN-Women will continue to act as a knowledge hub to support gender mainstreaming and provide research and data analysis to inform policies, strategies and other interventions, and substantive and technical support and expertise to Member States upon request. It will continue to facilitate the mainstreaming of a gender perspective into intergovernmental norms and standards. It will also provide support to Member States, upon request, in implementing commitments to gender equality and the empowerment of women and girls through operational activities. UN-Women will continue to work in partnership with a range of actors and support civil society, the private sector and other relevant stakeholders, at the request of Member States, when applicable, for accelerated action for gender equality and the empowerment of women and girls.
- 17.8 UN-Women will continue to engage closely as a key partner in a repositioned United Nations development system, as it is a strong priority of the Under-Secretary-General/Executive Director to enhance the engagement of the Entity in that area. Thus, UN-Women will take full advantage of the repositioned United Nations development system opportunities for integrated, cost-effective support to partners. Furthermore, the Entity has placed and will continue to place business transformation at the heart of its new organizational effectiveness and efficiency framework, creating a stronger culture of accountability and strengthening organizational performance management through a cascading internal management system to ensure that the organizational effectiveness and efficiency is a comprehensive management and leadership process to drive the implementation of the strategic plan.
- 17.9 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the coronavirus disease (COVID-19) pandemic. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.
- 17.10 With regard to inter-agency coordination and liaison, UN-Women will continue to comprehensively leverage its coordination mandate for gender equality and the empowerment of women. UN-Women will continue to enhance support for gender mainstreaming, including through inter-agency mechanisms, and the implementation of the United Nations System-wide Action Plan on Gender Equality and the Empowerment of Women and the United Nations country team System-wide Action Plan gender equality scorecard. With a view to working better together, UN-Women will continue to build strategic partnerships with United Nations entities, including through inter-agency mechanisms, to deliver results for women and girls in a coordinated and coherent way. Further, the Entity will collaborate with other United Nations entities, including through the Inter-Agency and Expert Group on Sustainable Development Goal Indicators, providing a gender perspective on methodology development, monitoring and follow-up, as well as capacity development. UN-Women will also collaborate specifically with departments and offices of the Secretariat, including on issues related to women and peace and security, sexual violence in conflict, gender mainstreaming in peacekeeping operations and gender parity (*ibid.*).
- 17.11 Where it has a country presence, UN-Women will support the integration of a gender perspective in United Nations country team programming processes, including the United Nations Sustainable Development Cooperation Framework roll-out process, joint initiatives, collective advocacy and coordination to ensure a coherent system-wide approach in operational activities. UN-Women will

continue to chair or co-chair the gender theme groups¹ of United Nations country teams and provide technical leadership for the implementation of the United Nations country team System-wide Action Plan gender equality scorecard and the United Nations country team gender equality marker.

- 17.12 With regard to the external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) The continued availability of voluntary contributions, which account for approximately 98 per cent of UN-Women resources;
 - (b) The commitment of Member States to advance gender equality and the empowerment of all women and girls, including by achieving consensus on that issue in relevant intergovernmental meetings;
 - (c) The commitment of Member States to adopt and implement laws, policies and strategies and create and maintain an enabling environment for civil society and women’s organizations in their work for the promotion of gender equality and the empowerment of women and girls.
- 17.13 In line with the United Nations Disability Inclusion Strategy and the UN-Women global strategy on disability inclusion, the Entity will continue to accelerate the effective mainstreaming of disability inclusion in its institutional processes and programming, including mitigating measures to overcome any operational challenges. At the corporate level, UN-Women will continue to chair the United Nations Inter-agency Group on Gender Equality and Disability Inclusion. Where it has a country presence, UN-Women will support gender-responsive disability inclusion and an intersectional approach in United Nations country team programming processes, including the United Nations Sustainable Development Cooperation Framework roll-out process, joint initiatives, collective advocacy and coordination to ensure a coherent system-wide approach in operational activities. Together with the Disability Team of the Executive Office of the Secretary-General, the Entity will develop a disability marker system to promote both the accountability and sustainability of disability inclusion work.

Programme performance in 2021

Impact of the pandemic

- 17.14 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular, the scaling down of the session of the Commission on the Status of Women for the second year in a row, with no participation from capital-based delegates or civil society in a session that typically includes the participation of more than 140 ministers, their delegations and other national delegations. To mitigate that impact, UN-Women continued to use alternative forms of gatherings and consultations, using virtual meeting platforms. In addition, it continued to support Member States and other stakeholders in their COVID-19 responses through advice, outreach, advocacy and other knowledge products or services, within the overall scope of the objectives.

Legislative mandates

- 17.15 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

34/180	Convention on the Elimination of All Forms of Discrimination against Women	54/4	Optional Protocol to the Convention on the Elimination of All Forms of Discrimination against Women
50/42	Fourth World Conference on Women		
50/203	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action	54/134 S-23/2	International Day for the Elimination of Violence against Women Political declaration

¹ See <https://unsdg.un.org/resources/gender-theme-groups-standards-and-procedures>.

Section 17 UN-Women

S-23/3	Further actions and initiatives to implement the Beijing Declaration and Platform for Action	74/128	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly
62/136	Improvement of the situation of women in rural areas		
64/289	System-wide coherence	74/235	Women in development
66/130	Women and political participation	75/158	Trafficking in women and girls
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development	75/160	Intensifying global efforts for the elimination of female genital mutilation
70/1	Transforming our world: the 2030 Agenda for Sustainable Development	75/161	Intensification of efforts to prevent and eliminate all forms of violence against women and girls: sexual harassment
71/243 ; 75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system	76/140	Improvement of the situation of women and girls in rural areas
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system	76/141	Violence against women migrant workers

Economic and Social Council resolutions and decisions

76 (V)	Communications concerning the status of women	2005/232	Declaration of the Commission on the Status of Women on the occasion of the tenth anniversary of the Fourth World Conference on Women
304 (XI)	Report of the Commission on the Status of Women (fourth session)		
1992/19	Communications on the status of women	2009/16	Working Group on Communications on the Status of Women of the Commission on the Status of Women
1996/6	Follow-up to the Fourth World Conference on Women		
1996/31	Consultative relationship between the United Nations and non-governmental organizations	2015/6	Future organization and methods of work of the Commission on the Status of Women
1999/257	Enabling the Commission on the Status of Women to continue to carry out its mandate	2019/2 ; 2020/9 ; 2021/7	Mainstreaming a gender perspective into all policies and programmes in the United Nations system
		2020/15	Multi-year programme of work of the Commission on the Status of Women

Security Council resolutions

Agreed conclusions of the Commission on the Status of Women

1996	Implementation of strategic objectives and action in the critical area of concern: poverty	1997	Women and the environment
		1997	Women in power and decision-making
1996	Women and the media	1997	Women and the economy
1996	Child and dependent care, including sharing of work and family responsibilities	1997	Education and training of women
		1998	Violence against women

Part IV International cooperation for development

1998	Women and armed conflict	2007	Elimination of all forms of discrimination and violence against the girl child
1998	Human rights of women		
1998	The girl child	2008	Financing for gender equality and the empowerment of women
1999	Women and health		
1999	Institutional mechanisms for the advancement of women	2009	The equal sharing of responsibilities between women and men, including caregiving in the context of HIV/AIDS
2001	Women, the girl child and human immunodeficiency virus/acquired immunodeficiency syndrome	2011	Access and participation of women and girls in education, training and science and technology, including for the promotion of women's equal access to full employment and decent work
2001	Gender and all forms of discrimination, in particular racism, racial discrimination, xenophobia and related intolerance	2013	Elimination and prevention of all forms of violence against women and girls
2002	Eradicating poverty, including through the empowerment of women throughout their life cycle, in a globalizing world	2014	Challenges and achievements in the implementation of the Millennium Development Goals for women and girls
2002	Environmental management and the mitigation of natural disasters		
2003	Participation in and access of women to the media, and information and communication technologies and their impact on and use as an instrument for the advancement and empowerment of women	2015	Political declaration on the occasion of the twentieth anniversary of the Fourth World Conference on Women
2004	The role of men and boys in achieving gender equality	2016	Women's empowerment and the link to sustainable development
2004	Women's equal participation in conflict prevention, management and resolution and in post-conflict peacebuilding	2017	Women's empowerment in the changing world of work
2004	Women's equal participation in conflict prevention, management and resolution and in post-conflict peacebuilding	2018	Challenges and opportunities in achieving gender equality and the empowerment of rural women and girls
2005	Political declaration on the occasion of the tenth anniversary of the Fourth World Conference on Women	2019	Social protection systems, access to public services and sustainable infrastructure for gender equality and the empowerment of women and girls
2006	Enhanced participation of women in development: an enabling environment for achieving gender equality and the advancement of women, taking into account, inter alia, the fields of education, health and work	2020	Political declaration on the occasion of the twenty-fifth anniversary of the Fourth World Conference on Women
2006	Equal participation of women and men in decision-making processes at all levels	2021	Women's full and effective participation and decision-making in public life, as well as the elimination of violence, for achieving gender equality and the empowerment of all women and girls

Deliverables

17.16 Table 17.1 lists all cross-cutting deliverables of the programme.

6. Advisory Committee on Administrative and Budgetary Questions	1	1	1	1

Evaluation activities

- 17.17 The following evaluations completed in 2021 have guided the proposed programme plan for 2023:
- Evaluation on the Entity’s United Nations system coordination and broader convening role in ending violence against women;
 - Evaluation on the approach of UN-Women to innovation;
 - Meta-synthesis of the Entity’s evaluations;
 - Thirty-nine decentralized evaluations, including eight country portfolio evaluations and five regional evaluations.
- 17.18 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2023. For example, the evaluation on the Entity’s United Nations system coordination and broader convening role in ending violence against women found that the UN-Women mandate to “lead, promote and coordinate” gender mainstreaming and the empowerment of women across the United Nations system was a strong, strategic asset; however, current system-wide accountability and reporting frameworks were inadequate to enable effective coordination for system-wide results in thematic areas. In response to the evaluation findings, UN-Women strengthened its results framework in its strategic plan to better reflect its United Nations system coordination efforts to support the achievement and systematic reporting of results in key thematic areas such as ending violence against women and girls. Further, in response to the evaluation on the Entity’s approach to innovation, UN-Women will continue its role as a knowledge hub to support gender analysis (General Assembly resolution [74/235](#)) and gender mainstreaming. UN-Women will develop more comprehensive and organized systems and practices for capturing and sharing lessons learned in the process of piloting and testing innovative initiatives that might have a significant potential impact on gender equality and the empowerment of women. The results and lessons learned from decentralized, country portfolio and regional evaluations were applied by the respective UN-Women offices to strengthen their technical support and advice, advocacy support, training and capacity development in the majority of results covered by the subprogrammes.
- 17.19 The following evaluations are planned for 2023:
- Evaluation on support by UN-Women to capacity development;
 - Evaluation on the work by UN-Women in the area of women’s economic empowerment;
 - Evaluation on support by UN-Women to civil society;
 - Evaluation on financing for gender equality;
 - Approximately 10 country portfolio and regional evaluations;
 - Decentralized evaluations to be planned and undertaken by programmatic offices in 2023, in accordance with the parameters established in the UN-Women evaluation policy.

Programme of work

Subprogramme 1

Intergovernmental support, coordination and strategic partnerships

Objective

- 17.20 The objective, to which this subprogramme contributes, is to strengthen the achievement of gender equality and the empowerment of all women and girls, including full enjoyment of their human rights.

Strategy

- 17.21 To contribute to the objective, the subprogramme will:
- (a) Support the normative processes of intergovernmental bodies, including the Commission on the Status of Women, by facilitating the exchange of good practices and lessons learned among Governments and other relevant stakeholders, including through meetings, the issuance of reports and the presentation of analyses and policy options that enable discussion on key gender equality issues;
 - (b) Lead, coordinate and promote the accountability of the United Nations system for gender equality and the empowerment of women, and gender mainstreaming. This includes providing expertise, advocacy, monitoring of the development of relevant tools and guidance and capacity-building within the United Nations system. Actions towards system-wide improvement of the status of women will also be undertaken;
 - (c) Develop strategic partnerships by enabling civil society actors and other stakeholders to engage in intergovernmental processes, including through information dissemination, the convening of stakeholders to share lessons learned and recommendations for actions and the provision of funding for attending capacity- and alliance-building opportunities.
- 17.22 In doing so, the subprogramme will assist Member States in their efforts to achieve Sustainable Development Goal 5 and in the systematic mainstreaming of a gender perspective in the implementation of the 2030 Agenda for Sustainable Development.
- 17.23 The above-mentioned work is expected to result in:
- (a) A strengthened global normative framework and increased reflection of a gender perspective in the outcomes of intergovernmental processes;
 - (b) An enabling working environment to accelerate gender mainstreaming and gender parity goals in the United Nations system, leading to greater achievement of results towards gender equality;
 - (c) Enhanced cooperation among stakeholders and Governments on gender equality and the empowerment of women, as well as enhanced opportunities for stakeholders to present lessons learned and good practices in conjunction with intergovernmental processes, and the availability of a growing resource base.

Programme performance in 2021

Leaving no women and girls with disabilities behind

- 17.24 In the 2030 Agenda for Sustainable Development, Member States pledged to leave no one behind. In that regard, UN-Women increased its focus on the empowerment of women and girls with

disabilities in line with its internal disability strategy, the United Nations Disability Inclusion Strategy and the Convention on the Rights of Persons with Disabilities.

- 17.25 The subprogramme enhanced inter-agency coordination and collaboration to systematically address the situation of women and girls with disabilities. Specifically, the subprogramme supported the development of a global toolkit and resource guide to support United Nations country teams and diverse stakeholders to effectively implement an intersectional approach; a United Nations inter-agency joint programme to support countries in the design and implementation of disability-inclusive COVID-19 response and recovery strategies; and a joint UN-Women and United Nations Development Programme cross-regional programme to address stigma and barriers to the full and effective participation of women and girls with disabilities in all aspects of social, political and economic life.
- 17.26 In 2021, United Nations country teams in 50 countries were supported through the development of inter-agency knowledge products, services and capacity development initiatives, resulting in better understanding and integration of disability inclusion and leaving-no-one-behind approaches in their work. This also equipped the country teams to better support requests by Member States to foster disability inclusion in their respective policies and programmes.
- 17.27 Progress towards the objective is presented in the performance measure below (see figure 17.I).

Figure 17.I
Performance measure: number of United Nations country teams integrating disability inclusion in their work

Planned results for 2023

Result 1: climate action becomes gender-responsive

Programme performance in 2021 and target for 2023

- 17.28 The subprogramme’s work contributed to 100 decisions on issues related to gender equality and the empowerment of women adopted by the Conference of the Parties to the United Nations Framework Convention on Climate Change, which exceeded the planned target of 90 decisions.
- 17.29 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 17.II).

Figure 17.II
Performance measure: number of decisions on issues related to gender equality and the empowerment of women adopted by the Conference of the Parties to the United Nations Framework Convention on Climate Change (cumulative)

Result 2: systematic mainstreaming of a gender perspective in the implementation of the 2030 Agenda for Sustainable Development

Programme performance in 2021 and target for 2023

- 17.30 The subprogramme’s work contributed to 75 per cent of countries incorporating a gender perspective into the voluntary national reviews at the high-level political forum on sustainable development, which exceeded the planned target of 54 per cent.
- 17.31 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 17.III).

Figure 17.III
Performance measure: percentage of national voluntary reviews at the high-level political forum on sustainable development that integrate a gender perspective (General Assembly resolution 76/142) (annual)

Result 3: Youth as agents of change in the achievement of the Sustainable Development Goals

Proposed programme plan for 2023

17.32 Recalling General Assembly resolution 70/1 and in keeping with Assembly resolution 74/121, youth are recognized as agents of change in the achievement of the Sustainable Development Goals. Moreover, the UN-Women strategic plan underscores the importance of the voice, leadership and participation of young people, in particular adolescent girls and young women, in decision-making, as well as in UN-Women programming at the global, regional and country levels. However, young women and girls continue to be excluded from decision-making processes, undermining the collective ability to address gender equality. In line with intergovernmentally agreed outcomes, the subprogramme has been advocating for systematic and sustainable inclusion of young people in intergovernmental processes and creating opportunities for their meaningful engagement in decision-making spaces. Since 2015, the subprogramme has held youth forums prior to the annual session of the Commission on the Status of Women, creating opportunities for young people from more than 300 youth organizations to directly engage with Member States through high-level intergenerational dialogues. The subprogramme has also held at least 200 dialogues in different countries that have strengthened intergenerational partnerships with young people.

Lessons learned and planned change

17.33 With the rise in virtual connections resulting from the COVID-19 pandemic, the lesson learned for the subprogramme was the need to leverage the multiple opportunities and partnerships with youth organizations and other United Nations entities, to engage with a growing youth constituency and further increase the systematic, diverse and influential participation of young women in intergovernmental processes. In applying the lesson, the subprogramme will implement an expanded programme of capacity-strengthening for young women's engagement and advocacy to influence the achievement of gender equality and contribute to the implementation of the 2030 Agenda. The subprogramme will offer a series of virtual skills-building workshops on advocacy and effective political participation, for example, in the Commission on the Status of Women, high-level political forums and Human Rights Council processes. It will also convene political dialogues focused on barriers to mainstreaming youth issues in national sectoral policies, resulting in one policy paper per year that supports the localization of global agendas and frameworks on young people. Such efforts will enable the subprogramme to foster the effective engagement of young people at all levels.

17.34 Expected progress towards the objective is presented in the performance measure below (see figure 17.IV)

Figure 17.IV

Performance measure: number of young women and girls with strengthened capacities for engagement in intergovernmental policy discussions and forums (annual)

Deliverables

17.35 Table 17.2 lists all deliverables of the subprogramme.

On gender parity in the United Nations system and on the implementation of the System-wide Action Plan on Gender Equality and the Empowerment of Women, the United Nations country team System-wide Action Plan gender equality scorecard and the United Nations country team gender equality marker	8	9	11	10
C. Substantive deliverables				
Consultation, advice and advocacy: cross-sectoral interactive dialogues and ministerial round tables, with broad regional representation and participation from Governments, United Nations entities, women's organizations and the private sector; multi-stakeholder expert side events on gender equality and the empowerment of women in key meetings, conferences and summits, for an average of 100 participants per event, comprising representatives of Member States, women's and other civil society organizations, United Nations entities and think tanks; expert consultations on gender mainstreaming in a thematic area or sector in which gender considerations are absent or need strengthening, with at least 4 to 6 experts and representatives of Governments, United Nations entities and civil society organizations (per consultation).				
D. Communication deliverables				
Digital platforms and multimedia content: UN-Women website.				

Subprogramme 2

Policy and programme activities

Objective

- 17.36 The objective, to which this subprogramme contributes, is to enhance efforts in the elimination of discrimination against women and girls and the achievement of gender equality in, among other things, the fields of sustainable development, human rights and peace and security, including through enhanced accountability of the United Nations system.

Strategy

- 17.37 To contribute to the objective, the subprogramme will:
- (a) Serve as a global knowledge centre on gender equality and the empowerment of women, including in the areas of women and peace and security, ending violence against women, the economic empowerment of women and gender-responsive governance, by undertaking and disseminating research, analysis and evaluation of trends, including on new and emerging issues and their impact on the situation of women;
 - (b) Provide advisory, technical and advocacy support, training and capacity development, including through field offices, to Member States, upon request, to advance the implementation of their commitments on gender equality and the empowerment of women, in line with their national priorities;
 - (c) Ensure the accountability of the United Nations system, including the United Nations country and regional teams and their gender theme groups, by offering guidance and through engagement in their work on gender equality and the empowerment of women.
- 17.38 In doing so, the subprogramme will assist Member States in their efforts to achieve Sustainable Development Goal 5 and in the gender-responsive implementation of the 2030 Agenda.
- 17.39 The above-mentioned work is expected to result in:
- (a) Policies and actions taken by national and regional bodies to implement United Nations instruments, standards and resolutions that contribute to gender equality and the empowerment of women, focusing on the Beijing Declaration and Platform for Action, the outcome of the twenty-third special session of the General Assembly and the Convention on the Elimination of All Forms of Discrimination against Women;
 - (b) Increased capacity of Member States to implement, monitor and evaluate laws, policies and strategies that contribute to the achievement of gender equality and the empowerment of women and girls and the realization of their human rights (General Assembly resolution [76/142](#));
 - (c) Improved ability of United Nations programmes to support more effectively Member States, at their request, in the implementation of commitments to eliminate discrimination against women and girls.

Programme performance in 2021

Engaging the trade community in mainstreaming a gender perspective in trade and financial inclusion

- 17.40 The United Nations Conference on Trade and Development (UNCTAD) regularly organizes trade policy dialogues to inform and engage the trade delegations of the permanent missions to the United

Nations Office at Geneva on key issues related to trade policy, as the headquarters of the World Trade Organization, the International Trade Centre (ITC) and UNCTAD are located in Geneva.

- 17.41 In 2021, through its Geneva liaison office, the subprogramme partnered with UNCTAD and ITC to organize a special trade policy dialogue focused on gender equality. Under the theme “Applying a gender lens to financial inclusion”, the dialogue outlined the specific challenges faced by women in accessing finance, highlighting innovative policies and initiatives to promote financial inclusion. In addition to mainstreaming a gender perspective in trade for the first time, the dialogue provided an opportunity for the subprogramme to engage a new audience, namely, the trade delegations of Member States and other stakeholders working on trade and economic policy. It also enabled the subprogramme to highlight its work in this area, including flagship projects in West and Central Africa that promote tailored financial services for women in partnership with the private sector. The inter-agency collaboration led to UNCTAD and UN-Women developing a joint project in Africa on analysing the impacts of the African Continental Free Trade Area on the achievement of gender equality.
- 17.42 Progress towards the objective is presented in the performance measure below (see table 17.3).

Table 17.3
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	–	Enhanced understanding by trade delegations of Member States of a gender perspective in relation to potential impacts on trade. UNCTAD engaged in a joint project to analyse the impacts of the African Continental Free Trade Area on the achievement of gender equality.

Planned results for 2023

Result 1: national statistical systems strengthened to produce and use gender statistics to monitor the achievement of the Sustainable Development Goals and national policies

Programme performance in 2021 and target for 2023

- 17.43 The subprogramme’s work contributed to strengthened capacities of 6,890 data producers and users in the collection, analysis, dissemination and use of gender statistics, which exceeded the planned target of 6,016 data producers and users.
- 17.44 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 17.V).

Figure 17.V
Performance measure: number of data producers and users with increased capacities on data and gender statistics (cumulative)

Result 2: evidence-based implementation of national action plans on women and peace and security

Programme performance in 2021 and target for 2023

- 17.45 The subprogramme’s work contributed to 86 adopted national action plans on women and peace and security with monitoring indicators, which exceeded the planned target of 84 plans.
- 17.46 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 17.VI).

Figure 17.VI
Performance measure: number of adopted national action plans on women and peace and security with monitoring indicators (cumulative)

Result 3: Towards women’s full and equal participation in political life

Proposed programme plan for 2023

- 17.47 Over the period 2018–2021, women’s representation in parliament increased from 23.4 to 26.2 per cent globally, and the number of countries with gender-balanced parliaments (over 40 per cent women) tripled, from 11 countries to 32 countries. Despite this, significant progress is still required to reach

gender balance at all levels of elected positions. Since 2019, the subprogramme has supported national partners, including legislatures at the national and local levels, electoral stakeholders and civil society, through technical assistance, comparative knowledge transfer and targeted advocacy, contributing to the drafting and passage of 19 new laws that promote gender balance in decision-making.

Lessons learned and planned change

17.48 The lesson for the subprogramme was the need to strengthen its targeted advocacy to further promote the use of temporary special measures to reduce barriers to women’s participation in political life. Temporary special measures can include a wide range of legislative, executive, administrative and other regulatory instruments, policies and practices, including outreach programmes and quota systems, and have been shown to increase women’s representation in elected positions when they are well designed and effectively implemented at all levels. In applying the lesson, the subprogramme will leverage collective United Nations action, together with the Executive Office of the Secretary-General, the Department of Political and Peacebuilding Affairs and other United Nations partners, to advocate with Governments, upon request, to enhance the implementation of temporary special measures and to help countries with no temporary special measures in place to adopt such measures to improve women’s representation in elections and decision-making bodies. The subprogramme will also generate knowledge and information on the use of temporary special measures to support their design and implementation.

17.49 Expected progress towards the objective is presented in the performance measure below (see figure 17.VII).

Figure 17.VII

Performance measure: number of countries with legislative frameworks that promote gender balance in elections and decision-making institutions (cumulative)

Deliverables

17.50 Table 17.4 lists all deliverables of the subprogramme.

8. Workshops on gender statistics	28	50	30	25
Publications (number of publications)	2	2	1	2
9. Inventory of United Nations activities to end violence against women	1	1	1	1
10. <i>Progress of the World's Women</i>	1	–	–	1
11. <i>Beyond COVID-19: A Feminist Plan for Sustainability and Social Justice</i>	–	1	–	–
Technical materials (number of materials)	4	4	4	5
12. On the priority themes/issues decided by the Commission on the Status of Women	1	1	1	1
13. On essential services to respond to violence against women and on integrating gender equality into macroeconomic policies	2	2	2	3
14. On the implementation of Security Council resolution 1325 (2000) on women and peace and security and its agenda	1	1	1	1

C. Substantive deliverables

Consultation, advice and advocacy: technical advice to Member States, at their request, and non-governmental organizations on access to financial markets and services for women, gender-responsive budgeting, gender-responsive development plans at the national and local levels, gender equality policies, strategies and action plans; technical advice to strengthen the role of national women’s machinery in the development, implementation and monitoring of gender equality policies, strategies and actions plans; country-level advice and assistance on the implementation of the women and peace and security agenda to develop and implement national action plans; consultation on priority themes and issues in preparation for the session of the Commission on the Status of Women; technical advice to ministries of finance, planning and women’s affairs, at their request, on integrating a gender perspective into policies on macroeconomics, and social protection systems, decent work and the care economy, to achieve the Sustainable Development Goals.

Databases and substantive digital materials: Global Database on Violence against Women.

D. Communication deliverables

Outreach programmes, special events and information materials: brochures for the promotion of the Commission on the Status of Women and booklets and pamphlets on various topics relevant to gender equality and the empowerment of women.

External and media relations: media releases reaching global and geographically diverse public, technical expert and Government audiences on various topics related to women, including on UN-Women flagship publications.

Digital platforms and multimedia content: web platforms on financing for gender equality, the political participation of women, and gender equality and HIV/AIDS.

Library services: preserved documentation of the institutional memory related to UN-Women.

B. Proposed post and non-post resource requirements for 2023

Overview

17.51 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 17.5 to 17.7.

Table 17.5

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2021 expenditure ^a	2022 appropriation	Changes				2023 estimate (before recosting)

17.52 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 17.8 to 17.10 and figure 17.VIII.

17.53 As reflected in tables 17.8 (1) and 17.9 (1), the overall resources proposed for 2023 amount to \$9,957,600 before recosting, reflecting no change compared with the appropriation for 2022. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Figure 17.VIII

Distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

**Explanation of variances by factor, component and subprogramme****Overall resource changes****Other changes**

17.54 As reflected in table 17.8 (1), the net effect of the proposed changes is cost-neutral. The breakdown of changes is as follows:

- Subprogramme 1, Intergovernmental support, coordination and strategic partnerships.** The decrease of \$300 reflects the outward redeployment under travel of staff to subprogramme 2 to support substantive servicing of ad hoc expert group meetings to be held away from Headquarters;
- Subprogramme 2, Policy and programme activity.** The increase of \$300 reflects the inward redeployment as described in 17.54 (a) above;

- (c) **Programme support.** The proposed increase of \$30,800 in post costs is due to the upward reclassification of a P-3 to a P-4 post under the Strategy, Planning, Resources and Effectiveness Division (see annex III) and is offset by a decrease of \$30,800 under contractual services. The net effect of the proposed changes is cost-neutral.

Extrabudgetary resources

- 17.55 As reflected in tables 17.8 (2) and 17.9 (2), UN-Women expects to continue to receive cash contributions, which complement regular budget resources. In 2023, extrabudgetary resources are estimated at \$500,000,000 and would provide for 465 posts, as presented in table 17.9 (2), and reflect no change compared with the estimate for 2022.
- 17.56 The resources would be used to provide support for the overall executive direction and management, including the planning, coordination, management and assessment of the programme of work and the strategic plan of UN-Women and the production of the programme’s deliverables. In addition, the resources would provide support under subprogramme 1, to engage with intergovernmental bodies, and under subprogramme 2, to provide support to Member States, at their request, in the implementation of their national commitments to eliminating discrimination against women and girls, empowering women and achieving equality between women and men as partners and beneficiaries of sustainable development, human rights of women and girls, humanitarian action and peace and security. Extrabudgetary resources represent 98.0 per cent of the total resources for this section.
- 17.57 The extrabudgetary resources under this section are subject to the oversight of the Executive Board of UN-Women.

Policymaking organs

- 17.58 The resources proposed under this component would provide for requirements relating to the substantive servicing and meetings of the Commission on the Status of Women. Table 17.11 provides information on the standing intergovernmental organs and related resource requirements under the regular budget.

Table 17.11
Policymaking organs
 (Thousands of United States dollars)

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional info</i>	<i>2022 appropriation</i>	<i>2023 estimate (before recosting)</i>
Commission on the Status of Women	The Commission has a central role within the United Nations system in monitoring the implementation of the Beijing Declaration and Platform for Action and in advising the Economic and Social Council thereon. The Commission holds a ministerial segment, including interactive high-level round tables in parallel chambers, two interactive expert panels on the priority theme of each session, a panel on an emerging issue, an interactive dialogue to review a theme from an earlier session and other high-level interactive dialogues. Under Council resolutions 76 (V), 304 (XI) and 1983/27, the Secretary-General is mandated to prepare lists of confidential and non-confidential communications on the status of women for submission to the Commission.	Mandate: Economic and Social Council resolutions 11 (II) and 1989/45 Membership: 45 government officials Number of sessions in 2023: 1 (sixty-seventh session)	109.7	109.7
Total			109.7	109.7

- 17.59 The proposed regular budget resources for 2023 amount to \$109,700 and reflect no change in the resource level compared with the appropriation for 2022. Additional details are reflected in table 17.12.

Total	–	109.7	–	–	–	–	–	109.7	

Extrabudgetary resources

- 17.60 Extrabudgetary resources for this component are estimated at \$818,100 and would provide for conference services, including document preparation, translation and conference facilities to support the meetings of the Executive Board.

Executive direction and management

- 17.61 The executive direction and management component comprises the Office of the Under-Secretary-General/Executive Director and the Independent Evaluation and Audit Services.
- 17.62 The core functions of the Office of the Under-Secretary-General/Executive Director are: (a) to assist and support the overall executive direction and management of UN-Women, including the planning, coordination, management and assessment of the programme of work of UN-Women; (b) to facilitate inter-office cooperation in the implementation of organizational priorities, workplans and administrative matters; and (c) to ensure the timely implementation of decisions and coordination of input from all organizational units to the activities of the Office. The Independent Evaluation and Audit Services provides independent assurance and advice on UN-Women programmes, controls, business systems and processes.
- 17.63 The Office of the Under-Secretary-General/Executive Director also coordinates and provides guidance for the support of the intergovernmental process, operational activities in the field and United Nations system coordination efforts. It also provides strategic policy support and support in managing communications with Member States, the United Nations system and civil society. Furthermore, it coordinates organizational efforts for advocacy, expanding partnerships and seizing new opportunities to promote gender equality and the empowerment of women.
- 17.64 The Strategy, Planning, Resources and Effectiveness Division integrates corporate strategy, resource management and performance measurement and monitors corporate performance and budget implementation to support improved decision-making and governance to manage for results, while ensuring increased transparency and accountability.
- 17.65 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, UN-Women continues to integrate environmental management practices into its operations. In 2021, UN-Women continued to use its e-filing system and its PaperSmart tool, which enables delegations to download documents electronically and substantially reduces the printing of documents, while still allowing for printing at the request of delegations. In

Part IV International cooperation for development

2023, UN-Women will continue to enhance its use of videoconferencing and other online collaboration tools for meetings involving remote offices to help further reduce travel.

- 17.66 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 17.13. Senior management is committed to the implementation of the advance purchasing and travel policy. In 2021, UN-Women official duty travels were limited to situations in which there was a critical need for in-person presence. COVID-19-related restrictions and border closures reduced the ability to plan in advance for travel. Most travels were unplanned and occurred owing to ad hoc requests from stakeholders, such as government counterparts, civil society and other such partners, or when UN-Women officials were requested to attend outside events, meetings or workshops. This explains the low compliance rate of 19 per cent for travels in 2021.

Table 17.13
Compliance rate
(Percentage)

	<i>Actual 2019</i>	<i>Actual 2020</i>	<i>Actual 2021</i>	<i>Planned 2022</i>	<i>Planned 2023</i>
Timely submission of documentation	90	90	19	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	90	90	19	100	100

- 17.67 The proposed regular budget resources for 2023 amount to \$973,400 and reflect no change in the resource level compared with the appropriation for 2022. Additional details are reflected in table 17.14 and figure 17.IX.

Extrabudgetary resources

- 17.68 Extrabudgetary resources for executive direction and management are estimated at \$12,660,800 and would provide for 26 posts (1 ASG, 2 D-2, 4 P-5, 7 P-4, 6 P-3, 1 P-2/1, 2 General Service (Principal level) and 3 General Service (Other level)), as well as non-post resources. The resources would be used to assist in the overall executive direction and management of UN-Women, including the planning, coordination, management and assessment of the programme of work and strategic plan of the Entity. The estimated increase of \$325,100 reflects the inward redeployment of one D-2 from subprogramme 2 to head the Strategy, Planning, Resources and Effectiveness Division.

Intergovernmental support, coordination and strategic partnerships

17.69 The proposed regular budget resources for 2023 amount to \$4,677,400 and reflect a decrease of \$300 compared with the appropriation for 2022. The proposed decrease is explained in paragraphs 17.54 (a) and 17.54 (b). Additional details on the distribution of resources in 2023 are reflected in table 17.15 and figure 17.X.

Extrabudgetary resources

17.70 Extrabudgetary resources for the subprogramme are estimated at \$22,042,200 and would provide for 33 posts (1 D-2, 3 D-1, 6 P-5, 3 P-4, 13 P-3, 2 P-2/1 and 5 General Service (Other level)), as well as non-post resources. The resources would be used to engage with and support the intergovernmental bodies and processes to strengthen the integration of gender equality issues in discussions and outcomes; enhance consultation with and support for civil society organizations to participate in intergovernmental processes, including through increased outreach, funding and capacity-building; and carry out system-wide coordination of the gender mainstreaming efforts of the United Nations system, as well as system-wide coordination and monitoring of the status of women in the United Nations system and fulfilment of other commitments of the Beijing Declaration and Platform for Action. The 2023 requirements reflect no change in the resource level compared with the estimates for 2022.

**Subprogramme 2
 Policy and programme activities**

17.71 The proposed regular budget resources for 2023 amount to \$3,513,300 and reflect an increase of \$300 compared with the appropriation for 2022. The proposed increase is explained in paragraphs 17.54 (a) and 17.54 (b). Additional details on the distribution of resources in 2023 are reflected in table 17.16 and figure 17.XI.

Subprogramme 2: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

17.72 Extrabudgetary resources for the subprogramme are estimated at \$426,734,500 and would provide for 355 posts (14 D-1, 72 P-5, 36 P-4, 17 P-3, 5 P-2/1, 30 General Service (Principal level), 105 General Service (Other level) and 76 National Professional Officers), as well as non-post resources. The resources would enable support for Member States, upon their request, in the implementation of their national commitments to eliminate discrimination against women and girls, empower women and achieve equality between women and men as partners and beneficiaries of development, human rights, humanitarian action and peace and security. The estimated decrease of \$325,100 is due to the redeployment of a post of D-2 (Director) to executive direction and management to head the Strategy, Planning, Resources and Effectiveness Division.

Programme support

17.73 Responsibility for this area is vested in the Management and Administration Division, the Human Resources Division and partially by the Strategy, Planning, Resources and Effectiveness Division of UN-Women. The Divisions cover the areas of finance and budget, administrative services, procurement and facilities management, information technology services, security, operational oversight and accountability, audit coordination and human resources. In addition, the Divisions provide administrative and operational support for the implementation of the programme activities of UN-Women.

17.74 The proposed regular budget resources for 2023 amount to \$683,900 and reflect no change in the resource level compared with the appropriation for 2022, despite the cost-neutral proposals indicated in paragraph 17.54. Additional details on the distribution of resources in 2023 are reflected in table 17.17 and figure 17.XII.

Extrabudgetary resources

17.75 Extrabudgetary resources for the subprogramme are estimated at \$37,744,400 and would provide for 51 posts (1 D-2, 3 D-1, 4 P-5, 9 P-4, 10 P-3, 2 P-2/1, 15 General Service (Principal level) and 7 General Service (Other level)), as well as non-post resources. The resources would assist in discharging responsibilities in the areas of personnel, finance and general administration.

Annex II**Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies**

*Brief description of the recommendation**Action taken to implement the recommendation*

**Advisory Committee on Administrative and Budgetary Questions
(A/76/7)**

While appreciating the importance of ensuring that the perspectives and contributions of women are fully engaged in fulfilling the mandate of UN-Women, the Advisory Committee again encourages the Entity to continue its efforts towards gender balance (para. IV.157).

While seeing merit in the proposed establishment of the new Division, the Advisory Committee notes that its establishment requires the approval of the General Assembly and the Executive Board of UN-Women. The Committee trusts that further information in support of the proposal will be provided to the General Assembly at the time of its consideration of the present report (para. IV.161).

UN-Women will continue to monitor the representation of women and men working for the Entity. While the relative share of women and men has remained stable over the years, since 2017, there has been a 33 per cent increase in the number of men among staff proportional to the Entity's overall staff growth. This is further supported by the increased efforts of the Organization to improve diversity in recruitment, specifically through outreach activities.

UN-Women provided the requested information to the Fifth Committee of the General Assembly at the informal hearing on section 17 during the main part of the seventy-sixth session of the Assembly.

Annex III

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Executive direction and management	1	D-2	Redeployment of 1 Director from the Strategy, Planning, Resources and Effectiveness Division to the Office of the Executive Director	The post will be used to reinstate the position of Director, to ensure the capacity and experience necessary to support the core functions of the Office of the Under-Secretary-General/Executive Director. The Director will also provide high-level strategic advice to the new Executive Director and lead and manage the support of the intergovernmental process, operational activities in the field and United Nations system coordination efforts.
Programme support	1	P-3	Reclassification of 1 Finance and Budget Officer at the P-3 level to the P-4 level	<p>The post of Finance and Budget Officer (P-3), under the Strategy, Planning, Resources and Effectiveness Division, was initially created to support the Chief of the Budget Section with respect to the planning and preparation of the budget submissions; management, monitoring and reporting of the regular budget; and advisory support and technical guidance to operational staff on corporate issues related to financial planning and management.</p> <p>This position has since taken a more substantive role in leading and coordinating the preparation process of both the programme plan and resource requirements and providing support to senior management and executive leadership in their review. The associated responsibilities also include coordinating and guiding the working group for the development of the annual programme plan, composed of focal points of relevant UN-Women divisions, in line with United Nations Secretariat guidelines, recommendations and decisions of specialized intergovernmental bodies, and the Entity's strategic priorities; advising and guiding section heads in the elaboration of their resource requirements proposal and the management of their allotments; and building the capacity of staff newly assigned to the regular budget process, to ensure knowledge-building across the relevant sections. The P-4 Finance and Budget Officer would also provide support to UN-Women senior management and executive leadership in meetings of legislative organs and expert bodies. Reclassification of this post would ensure continued support to UN-Women at a level corresponding to the increased scope of responsibility.</p>

Foreword

In 2023, the Economic Commission for Africa (ECA) will leverage its convening, think-tank and operational core functions to build on the successes of past years and deliver ideas and actions for a prosperous Africa.

Guided by its five strategic directions,¹ the Commission will focus on fast-tracking the 2030 Agenda for Sustainable Development and Agenda 2063 of the African Union for a resilient and sustainable recovery from the coronavirus disease (COVID-19) pandemic.

The priorities will include addressing rising inequalities through gender measures; youth engagement and job creation; building more resilient food, education and health systems; designing and implementing a climate-resilient green and blue economy and realizing a just energy transition² pathway; promoting private sector development and partnerships; restoring financial liquidity, maximizing avenues for domestic resources, improving public spending efficiency and leveraging innovative and external financing tools; managing debt and tackling illicit financial flows; promoting economic diversification and industrialization; utilizing the African Continental Free Trade Area to leverage regional economic integration, intracontinental trade, digital connectivity and transformation; and facilitating African common positions.

In fulfilling its mandate, ECA will remain faithful to mainstreaming a gender perspective, fostering the inclusion of persons with disabilities and adopting climate neutral practices in its operational activities, deliverables and results.

(Signed) Vera **Songwe**
Under-Secretary-General of the United Nations and
Executive Secretary, Economic Commission for Africa

¹ See the annual report of ECA to the Economic and Social Council for 2018 ([E/2018/38](#)). Based on the note by the Executive Secretary of the Commission to the Committee of Experts of the Conference of African Ministers of Finance, Planning and Economic Development ([E/ECA/COE/37/14](#)), the five strategic directions are: (a) build ECA analytical capabilities; (b) formulate macroeconomic and structural policy; (c) design innovative financing models; (d) integrate regional and subregional transboundary initiatives; and (e) advocate continental ideas at the global level.

² See *Theme Report on Enabling SDGs through Inclusive, Just Energy Transitions: Towards the Achievement of SDG 7 and Net-Zero Emissions*, prepared in support of the high-level dialogue on energy (United Nations publication, 2021).

I. Economic Commission for Africa

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 18.1 The Economic Commission for Africa (ECA) is responsible for promoting the economic and social development of its member States, fostering intraregional integration and promoting international cooperation for the development of Africa. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, as well as Economic and Social Council resolution 671 A (XXV). The coronavirus disease (COVID-19) pandemic in Africa has revealed some threats but also some opportunities towards strengthening the social and economic resilience of member States and ensuring the attainment of the outcomes of the 2030 Agenda for Sustainable Development and Agenda 2063: The Africa We Want, of the African Union.
- 18.2 ECA has a critical role to play in providing sets of innovative solutions, as well as demand-driven and tailor-made policy and technical advice to member States and regional economic communities in pursuit of sustainable development and the rise of more prosperous, resilient and inclusive societies. ECA interventions include cutting-edge research and related integrated policy and capacity support, focused on: economic diversification and industrialization; investments in infrastructure, productive sectors and domestic resource mobilization; the operationalization of the African Continental Free Trade Area (AfCFTA); and digital transformation. ECA also supports capacity development of Governments to formulate and implement policies for sustainable development through the implementation of the regular programme for technical cooperation and United Nations Development Account projects.

Strategy and external factors for 2023

- 18.3 The ECA programme strategy focuses on transformational changes to make a measurable contribution to the 2030 Agenda and Agenda 2063, utilizing an integrated and coherent approach. In pursuing its mandate, ECA will continue to concentrate on five strategic directions:
- (a) Deploying knowledge to support policymaking to drive the development agenda of Africa;
 - (b) Formulating policy options to accelerate economic diversification and job creation for the transformation of Africa;
 - (c) Designing and implementing financing models and leveraging them for the development of human, physical and social infrastructure assets;
 - (d) Supporting ideas and actions to foster deeper regional integration and the development of regional public goods, with a focus on social inclusion and taking into account synergies between the economic and social development programmes of Africa;
 - (e) Advocating a common position for Africa at the global level and developing regional responses as a contribution to global governance issues.
- 18.4 In pursuing these strategic directions, ECA will utilize its convening function, through provision of multilateral and multi-stakeholder platforms; its think-tank function, conducting interdisciplinary research and analysis of key challenges facing member States and Africa as a whole, while promoting peer learning and development; and its operational function, through provision of direct policy advice and support to member States, including in cooperation with other United Nations system entities.

- 18.5 ECA will further mainstream policy guidance and recommendations, taking into account the relevant provisions of intergovernmental policy organs and platforms, and promote cooperation among the regional economic communities for a sound and expeditious implementation of regional agreements within the context of the various United Nations-African Union partnership frameworks. ECA will further build on its medium-term programme framework (2022–2025) aimed at providing forward-looking planning guidance and bringing together all the streams of work of its divisions and subregional offices and the African Institute for Economic Development and Planning, along transformative areas of focus that provide entry points for subprogramme activities in 2023.
- 18.6 In 2023, ECA will continue to facilitate the identification and proposal of innovative financing tools to boost domestic resource mobilization, and address debt servicing as a main mitigating measure. Its activities will also entail targeted support for national development planning and the creation of an enabling business environment in relation to food systems and will address land, energy and infrastructure. The sustained operationalization of AfCFTA will play a critical role in support for the deepening of value chains in Africa in various productive areas, including the pharmaceutical sector. Furthermore, ECA support will be geared towards increasing investments in climate action for enhanced national resilience, harnessing a green economy in the context of sustainable development and poverty eradication, and the blue economy. ECA will also pursue its role in spearheading digital transformation on the continent. As part of the United Nations reform agenda, ECA will use the Regional Collaborative Platform for Africa and opportunity and issue-based coalitions, together with direct support for the resident coordinator system and United Nations country teams, as the main delivery channels for its services.
- 18.7 For 2023, the Commission’s planned deliverables will support member States in their ongoing management of and recovery from the COVID-19 pandemic. Such planned deliverables and activities include: capacity development of member States in debt management and revenue collection for resilient recovery (under subprogramme 1, ECA will help member States in their application of domestic resource mobilization efforts); enhanced capacity of member States to design and implement a climate-resilient green economy in the context of sustainable development and poverty eradication and the blue economy (subprogramme 5); inclusive digital transformation (subprogrammes 5 and 6, with a special focus on women and girls); the promotion of micro-, small and medium-sized enterprises (MSMEs) as an engine for sustainable development (subprogramme 7, component 1); economic diversification through the operationalization of AfCFTA (subprogramme 7, component 3); and capacity strengthening of member States for mainstreaming risk management into policy planning and development (subprogramme 8).
- 18.8 Reflecting the importance of continuous improvement and responding to the needs and requests of member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. Examples of lessons learned and best practices include addressing the challenges brought by the pandemic to national statistical systems and operations, in particular face-to-face data collection in the field, through tailor-made services. The planned changes for 2023 cover the promotion and application of new technologies towards changing the way price data is collected and member States implementing the road map on transformation and modernization of their official statistics (subprogramme 2). With respect to subprogramme 7, component 4, technical assistance will be used to provided member States and regional economic communities in developing national strategies for their AfCFTA activities and diversifying their blue economy activities through knowledge production, conducting market access studies and policy dialogues. Building on lessons learned from previous programme performance, additional dedicated capacity-building activities will be conducted for both the private and public sectors in 2023. The component will also strengthen strategic collaboration and partnerships with United Nations country teams and external policy think tanks and the shift from in-person meetings to virtual mechanisms. Other mainstreamed lessons are related to e-learning (subprogramme 8), which has proved to be a very successful and useful platform during the pandemic. The subprogramme will continue to diversify training modalities to enable beneficiaries to access high-quality digital deliverables to develop, strengthen and share critical development planning and policymaking knowledge and skills. At the same time, it is assumed that

those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.

- 18.9 With regard to cooperation with other entities at the global, regional, national and local levels, ECA will continue to coordinate the work of the United Nations system to support the African Union Commission to seek partnerships and support from various development partners and donors with a view to increasing and sustaining its resource base. Specifically, ECA will build on its existing strategic partnerships with regional and subregional organizations, central banks, universities, think tanks, other research institutions, civil society and private sector organizations and forge new partnerships in advancing attainment of the 2030 Agenda and Agenda 2063. With regard to South-South and triangular cooperation, ECA will continue to leverage value-adding partnerships premised on the principle of enhancing complementarity and development impact. In addition, more focus will be put on devising an effective and sustainable mechanism for project delivery.
- 18.10 With regard to inter-agency coordination and liaison, ECA will continue to promote collaborative delivery through cross-sectoral initiatives that cut across goals and targets and ensure effective linkages between regional, subregional and national perspectives. This will include working through the Regional Collaborative Platform for Africa and enhanced collaboration with regional United Nations entities, the Department of Economic and Social Affairs, the United Nations Conference on Trade and Development (UNCTAD), resident coordinators and country teams through opportunity and issue-based coalitions to ensure more coordinated responses and a cogent collective contribution to the fulfilment of the 2030 Agenda and Agenda 2063.
- 18.11 With regard to the external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) Identified sustainable long-term recovery pathways to COVID-19 are consolidated and followed;
 - (b) The operationalized Regional Collaborative Platform for Africa is used to channel ECA contributions and support for the implementation of African Union-United Nations cooperation frameworks;
 - (c) Member States and regional economic communities continue to cooperate among and between themselves for harmonized actions, focusing on the implementation of the 2030 Agenda and Agenda 2063 and the operationalization AfCFTA;
 - (d) Intergovernmental policy organs and forums provide continued policy advice on emerging priorities.
- 18.12 The Commission integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, the objective of subprogramme 6 is to accelerate the pace of member States to implement and report on their global and regional commitments related to gender equality and the empowerment of women and girls. The subprogramme will continue to provide technical support to the Commission's other subprogrammes to ensure that a gender perspective is reflected in their programmes of work. The subprogramme will also strengthen the capacity of member States, through the provision of tailored technical support, advisory services and hands-on training, in gender equality, the empowerment of women and girls, inclusiveness and economic diversification, women's entrepreneurship and the integration of a gender perspective into national policies and programmes.
- 18.13 In line with the United Nations Disability Inclusion Strategy, ECA will pursue the implementation of measures to ensure the inclusion of persons with disabilities, including those related to programme design, implementation and evaluation and policies on the operational aspects, including for reasonable accommodation of related requests and consultations with persons with disabilities. At ECA, specialized assistive equipment will continue to be provided at the headquarters compound in Addis Ababa and at subregional offices to enhance accessibility for persons with disabilities. The

programme will also endeavour to contribute to the development and implementation of specific joint projects with other United Nations entities.

Programme performance in 2021

Impact of the pandemic

- 18.14 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular with respect to the need to enhance the capacity of member States to analyse the macroeconomic impact of the pandemic for tailor-made recovery policy responses, including national AfCFTA strategies geared to enhance intraregional trading, while also focusing on the inclusive and equitable development of the pharmaceutical sector under subprogramme 2.
- 18.15 In addition, in order to support member States on matters related to the COVID-19 pandemic, within the overall scope of the objectives, ECA provided technical advice on the elaboration of national development plans, focusing on policy reforms and enhanced domestic resource mobilization, as well as capacity development geared to strengthened resilience of small and medium-sized enterprises (SMEs) to COVID-19 impacts in Southern Africa through the deployment of a digital platform on technology and innovation under subprogramme 7, components 4 and 5. Under subprogramme 8, ECA also provided training targeting government officials and policymakers on macroeconomic issues in the context of COVID-19. In addition, through subprogramme 9, ECA analysed the features of vulnerability exposed by COVID-19 and developed analytical and diagnostic policy tools for member States' social policy responses to recover and build improved resilience.

Legislative mandates

- 18.16 The list below provides all mandates entrusted to the programme.

General Assembly resolutions and decisions

S-21/2	Key actions for the further implementation of the Programme of Action of the International Conference on Population and Development	65/214 65/274	Human rights and extreme poverty Cooperation between the United Nations and the African Union
57/144	Follow-up to the outcome of the Millennium Summit	65/280	Programme of Action for the Least Developed Countries for the Decade 2011–2020
57/270 B	Integrated and coordinated implementation of and follow-up to the outcomes of the major United Nations conferences and summits in the economic and social fields	65/314 66/130	Modalities for the fifth High-level Dialogue on Financing for Development Women and political participation
58/220	Economic and technical cooperation among developing countries	66/137	United Nations Declaration on Human Rights Education and Training
58/269	Strengthening of the United Nations: an agenda for further change	66/224 68/145	People's empowerment and development Strengthening collaboration on child protection within the United Nations system

Deliverables

18.17 Table 18.1 lists all cross-cutting deliverables of the programme.

Table 18.1

Cross-cutting deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	5	8	8	8
1. Coordination meetings on the African Union-United Nations Framework for the Implementation of Agenda 2063 and the 2030 Agenda for Sustainable Development	2	2	2	2
2. Annual Africa Business Forum	1	1	1	1
3. Meetings of the Regional Coordination Platform for Africa	–	2	2	2
4. Meetings of the Fifth Committee	–	1	1	1
5. Meetings of the Committee for Programme and Coordination	1	1	1	1
6. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
B. Generation and transfer of knowledge				
Publications (number of publications)	2	3	2	2
7. Overview of economic and social conditions in Africa to the Conference of African Ministers of Finance, Planning and Economic Development and the ECA Committee of Experts	–	1	1	1
8. African Union-United Nations Framework for the Implementation of Agenda 2063 and the 2030 Agenda for Sustainable Development	2	2	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: advocacy and advice for the implementation of the African Union-United Nations Framework for the Implementation of Agenda 2063 and the 2030 Agenda.				
D. Communication deliverables				
Outreach programmes, special events and information materials: Information materials focused on regional integration and emerging socioeconomic issues for awareness-raising with Member States.				

Evaluation activities

18.18 The following evaluations completed in 2021 have guided the proposed programme plan for 2023:

- (a) Office of Internal Oversight Services (OIOS) evaluation of the Macroeconomic and Governance Division;
- (b) Evaluation on the capacity-building programme on the compilation and application of environmentally extended supply-use tables in Africa (Development Account project);
- (c) Evaluation on support for boosting Intra-African trade (African Trade Policy Centre);
- (d) Joint Inspection Unit (JIU) report on the review of United Nations system support for landlocked developing countries to implement the Vienna Programme of Action ([JIU/REP/2021/2](#));
- (e) JIU report on business continuity management in United Nations system organizations ([JIU/REP/2021/6](#)).

18.19 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2023. For example, in the evaluation of subprogramme 1, OIOS observed the need for ECA to strengthen subprogramme-wide performance monitoring because of a perceived gap in recording the results achieved. Similarly, an internal evaluation of the programme

on support for boosting intra-African trade under subprogramme 2 found out that there was a need to put in place robust institutionalized results-based management and monitoring/reporting systems. In response to those findings and recommendations, both subprogrammes have been aiming to strengthen their monitoring, reporting and evaluation processes, through targeted training in results-based management specifically conceived and delivered by ECA and cross-divisional quarterly accountability and programme performance review meetings.

18.20 The following evaluations are planned for 2023:

- (a) Evaluation on migration statistics and skills recognition in Africa for implementing the Global Compact for Safe, Orderly and Regular Migration;
- (b) Evaluation on regional and national natural resources-based industrialization policies for inclusive and sustainable development in Southern Africa;
- (c) Evaluation of the effectiveness and efficiency of ECA subprogramme level monitoring and reporting regimes;
- (d) Evaluation of the ECA partnership strategy and its outcomes.

Programme of work

Subprogramme 1 Macroeconomic policy and governance

Objective

18.21 The objective, to which this subprogramme contributes, is to achieve structural transformation and inclusive growth in Africa through strengthened and effective development planning, macroeconomic policy analysis and enhanced public sector finance management and governance.

Strategy

18.22 To contribute to the objective, the subprogramme will:

- (a) Publish policy-relevant knowledge products underpinned by cutting-edge research;
- (b) Support member States to honour their national and international development commitments by tracking progress in the implementation of the 2030 Agenda and Agenda 2063 and customizing policy-relevant tools such as the integrated planning and reporting toolkit, to assist countries in the design, implementation and monitoring of their national development plans;
- (c) Provide tailor-made support to expedite the graduation of African countries from the least developed country classification. This will involve influencing the substantive content and implementation of the new programme of action for least developed countries to be adopted at the Fifth United Nations Conference on the Least Developed Countries;
- (d) Build the capacity of member States to design and implement policy frameworks that promote transparency and accountability in public financial management and optimize resource mobilization and allocation;
- (e) Convene platforms for policy dialogue on matters related to macro policy, economic governance and development planning and contribute to the organization of the annual session of the Conference of African Ministers of Finance, Planning and Economic Development;
- (f) Continually innovate ECA macromodelling tools to support evidence-based policymaking and strengthen the capacity of policymakers to predict and assess the macro impacts of economic shocks, including those posed by the COVID-19 pandemic.

- 18.23 The above-mentioned work is expected to result in:
- (a) A more coordinated and integrated policy design and implementation by member States;
 - (b) The accelerated and sustainable graduation of African least developed countries;
 - (c) More robust evidence-based policymaking by member States;
 - (d) Increased mobilization of domestic and international resources by member States for development and investment in priority areas;
 - (e) Improved debt management and reduced debt vulnerabilities among member States.

Programme performance in 2021

Strengthened evidence-based macroeconomic policymaking capacity of Member States for effective COVID-19 response

18.24 The COVID-19 pandemic, which triggered one of the deepest global recessions, caused unprecedented economic challenges, especially for emerging and developing economies. Addressing these challenges required evidence-based policy responses. In this context, the subprogramme contributed to improving the capacity of member States to evaluate the impact of COVID-19 on national economies using macroeconomic models and inform evidence-based policymaking that responds to the pandemic and facilitates economic recovery. It provided technical support to Kenya, the Niger and Senegal in 2021 to customize the ECA macroeconomic model and trained national policymakers in integrating the elements of assessing the socioeconomic impact of COVID-19. In addition, ECA organized a macroeconomic modelling workshop for policymakers to share experiences on impact evaluation of COVID-19 response programmes. In Kenya, the subprogramme conducted a customized modelling capacity-building workshop. In the Niger and Senegal, the subprogramme organized inception meetings where preliminary model forecasting results were presented to policymakers, taking into consideration their specific country performances and their responses to the COVID-19 pandemic.

18.25 Progress towards the objective is presented in the performance measure below (see figure 18.I).

Figure 18.I

Performance measure: number of countries with increased evidence-based macroeconomic policymaking capacity to address the impact of COVID-19 (cumulative)

Planned results for 2023

Result 1: curbing illicit financial flows to enhance domestic resource mobilization

Programme performance in 2021 and target for 2023

- 18.26 The subprogramme's work contributed to five additional member States establishing the capacity to curb illicit financial flows, which exceeded the planned target of four countries using the United Nations methodology to measure Sustainable Development Goals indicator 16.4.1.
- 18.27 The subprogramme's work also contributed to one country launching stolen asset recovery cases, which did not meet the planned target of three countries. The target was not met mainly owing to the complexity and multiplicity of processes involved, including legal processes, and the fragmented nature of the applicable asset recovery frameworks.
- 18.28 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 18.II).

Figure 18.II

Performance measure: number of countries that establish methodologies to measure the magnitude of illicit financial flows (as per indicator 16.4.1) (cumulative)

Result 2: improved capacity in development planning for sustainable development and structural transformation in Africa

Programme performance in 2021 and target for 2023

- 18.29 The subprogramme's work contributed to the deployment and adoption of the integrated planning and reporting toolkit in an additional six countries bringing the cumulative total to 15, which exceeded the planned target of 14 countries.
- 18.30 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 18.III).

Figure 18.III

Performance measure: number of countries adopting development planning tools (cumulative)

Result 3: strengthened debt management capacities of countries for resilient recovery

Proposed programme plan for 2023

- 18.31 Africa's debt-to-gross development product (GDP) ratio has increased significantly since 2000, while domestic revenue mobilization remained stagnant during the same period. COVID-19 has worsened the continent's situation, which was already fiscally constrained before the pandemic, exacerbated by high debt-to-GDP ratios, high fiscal deficits and high borrowing costs, exposing the continent to severe macroeconomic vulnerabilities and instability. The subprogramme had carried out activities and produced knowledge products supporting member States in their domestic resource mobilization efforts, however comprehensive work has not been done to strengthen Africa's debt management capacities to ensure a resilient recovery from COVID-19.

Lessons learned and planned change

- 18.32 The lesson for the subprogramme was the need to meet an increased demand for technical capacity development support to strengthen countries' revenue mobilization drives, together with debt management and revenue collection. In applying the lesson, the subprogramme will improve the technical capacity of member States to engage effectively in financial and debt management discussions with the international community with regard to their mitigation and recovery strategies. Furthermore, the subprogramme will support countries to use debt management and debt sustainability performance indicators, such as by providing technical support in developing and implementing debt management strategies and policies.
- 18.33 Expected progress towards the objective is presented in the performance measure below (see figure 18.IV).

Figure 18.IV

Performance measure: number of policy interventions related to financial and debt management developed and/or implemented (cumulative)

Deliverables

18.34 Table 18.2 lists all deliverables of the subprogramme.

Table 18.2

Subprogramme 1: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	1
1. Report on overview of economic and social conditions in Africa to the Conference of African Ministers of Finance, Planning and Economic Development and the ECA Committee of Experts	1	1	1	1
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	6	4	11	8
2. On countering illicit financial flows from Africa	1	1	1	–
3. On the use of the ECA macroeconomic model for selected countries	4	2	4	3
4. On the integrated planning and reporting toolkit	–	–	5	3
5. Internship and fellowship programme for young African economists to build their capacity to formulate, implement and monitor development policies and programmes	1	1	1	1
6. On strengthening the capacity of member States in public finance	–	–	–	1
Seminars, workshops and training events (number of days)	2	2	2	3
7. Workshop on macroeconomic modelling for African policymakers and experts	2	2	2	2
8. Training event on public finance and development and planning in Africa (policy dialogue)	–	–	–	1
Publications (number of publications)	3	3	2	2
9. Africa Sustainable Development Report	1	1	1	1
10. Economic Report on Africa	1	1	1	1
11. Economic Governance Report	1	1	–	–
Technical materials (number of materials)	10	10	10	8
12. On emerging economic issues and challenges to growth and development in Africa	3	3	3	2
13. Policy briefs on emerging issues related to macroeconomic analysis, economic governance and public finance	3	3	3	2
14. Africa quarterly economic performance and outlook report	4	4	4	4
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services to five member States on emerging macroeconomic and governance issues and development planning; technical advice to the African Peer Review Mechanism secretariat in the area of country self-assessments and integration of outcomes from the assessments into national development plans and related processes. Advisory services to regional and continental bodies (e.g., Economic Community of West African States (ECOWAS), AfCFTA and the African Union).				
D. Communication deliverables				
Outreach programmes, special events and information materials: annual African Economic Conference; Pan-African Conference on Illicit Financial Flows and Taxation.				
Digital platforms and multimedia content: multimedia content on development planning, the 2030 Agenda and Agenda 2063.				

Subprogramme 2

Regional integration and trade

Objective

- 18.35 The objective, to which this subprogramme contributes, is to strengthen regional cooperation and integration among member States through increased trade flows, improved industrialization and increased investment.

Strategy

- 18.36 To contribute to the objective, the subprogramme will:
- (a) Continue to work with the African Union (the African Union Commission, the regional economic communities, the African Union Development Agency of the New Partnership for Africa's Development and the AfCFTA secretariat), resident coordinator offices and UNCTAD and with development partners to provide advisory services and technical support to member States on market access and business opportunities from AfCFTA to minimize potential adverse effects (import surges, dumping, customs revenue loss risks) in the context of AfCFTA and multilateral and bilateral trade issues, including related to the World Trade Organization, such as regional trade protocols, the African Growth and Opportunity Act and economic partnership agreements;
 - (b) Develop and disseminate policy tools, instruments and guidelines and help to identify opportunities for diversification, value addition and the development of manufacturing and industrial clusters for member States in support of the Action Plan for Accelerated Industrial Development of Africa, contributing to the achievement of Sustainable Development Goal 9, and provide technical support to member States;
 - (c) Provide training (with a particular focus on landlocked developing countries and regional economic communities) related to the implementation of existing regional cooperation and provide technical assistance for the implementation of the African Digital Transformation Strategy;
 - (d) Provide advisory services and technical assistance to member States and regional economic communities on regional integration, national, regional and continental competition policies, intellectual property policies and measures for investment facilitation;
 - (e) Provide advisory services and training for negotiators on the Agreement Establishing AfCFTA in the light of the second phase of issues related to the Agreement;
 - (f) Disseminate evidence-based analysis with recommendations for responding to the impacts of COVID-19 on trade and provide support to requesting member States in their efforts to implement these recommendations.
- 18.37 The above-mentioned work is expected to result in:
- (a) Countries implementing the recommendations contained in their respective AfCFTA strategies in order to better harness the benefits of the Agreement;
 - (b) More coherent, coordinated and responsive interfaces between AfCFTA and the free trade areas and customs unions of the regional economic communities;
 - (c) More coherent trade and industrialization policies aligned with the 2030 Agenda and Agenda 2063;
 - (d) Accelerated industrialization and increased diversification of productive capacities and production patterns;
 - (e) Reduced transaction risks and intermediation costs for member States;

- (f) An improved business environment characterized by enhanced opportunities for private sector operators to leverage transboundary opportunities and improved market access conditions for African exports;
- (g) Informed policy decisions by member States and advocacy efforts around continental strategic initiatives such as AfCFTA.

Programme performance in 2021

Strengthened capacity of women entrepreneurs to access finance and investment through AfCFTA in the context of COVID-19

- 18.38 Following the start of trading under AfCFTA on 1 January 2021 and in support of the AfCFTA secretariat’s mandate, the subprogramme continued to provide technical support for the business competitiveness of women in SMEs to allow them to recover in a post-pandemic context. Trade through AfCFTA is potentially a powerful tool to tackle the dent that the pandemic left on the targeted group, which was disproportionately hit compared with businesses led by men. The subprogramme engaged in knowledge-sharing and training on the potential advantages of AfCFTA and in building the capacities of women in SMEs in the subregional rules and payment system mechanism, the discovery of various sources of funding and mentorship. The women entrepreneurs were empowered to participate in policymaking dialogues. Their recommendations contributed to creating policies that aim to increase SME productivity and create job opportunities for women entrepreneurs.
- 18.39 Progress towards the objective is presented in the performance measure below (see figure 18.V).

Figure 18.V

Performance measure: number of policy recommendations adopted on trade policy issues that were proposed by women entrepreneurs, traders and organizations in the context of COVID-19 (cumulative)

Planned results for 2023

Result 1: making the most of the African Continental Free Trade Area

Programme performance in 2021 and target for 2023

- 18.40 The subprogramme’s work contributed to 34 countries increasing their ratio of intra-African trade to total trade, which did not meet the planned target of 35 countries in 2020. The target was not met owing to the delay in the start of trading under AfCFTA, originally scheduled for 1 July 2020 and delayed to 1 January 2021 because of the impact of COVID-19.
- 18.41 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 18.VI).

Figure 18.VI

Performance measure: number of countries that increased their ratio of intra-African trade to their total trade (cumulative)^a

^a Owing to the impact of the COVID-19 pandemic, the actual data for 2021 is not yet available to compare against the planned target of 45 countries increasing the ratio of their intra-African trade to their total trade.

Result 2: member States adopt and implement recommendations for increasing regional integration

Programme performance in 2021 and target for 2023

18.42 The subprogramme’s work contributed to 21 member States adopting recommendations from the report entitled *Assessing Regional Integration in Africa X: Africa’s Services Trade Liberalization and Integration under the AfCFTA*,³ which exceeded the planned target of 20 member States.

18.43 The subprogramme’s work also contributed to 10 member States implementing recommendations from the report, which met the planned target.

18.44 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 18.VII).

Figure 18.VII

Performance measure: number of member States that adopted and implemented recommendations from the report *Assessing Regional Integration in Africa X* (cumulative)

Result 3: strengthened capacities of member States for inclusive and equitable development in the pharmaceutical sector

Proposed programme plan for 2023

18.45 Medicines consume a large proportion of the health-care budgets of African nations. Reasons for this include inefficient models for procuring pharmaceuticals, long lead times for international

³ United Nations publication, 2022.

orders, high costs for transport and distribution, poor capacity in logistics and storage, limited public finances and gaps in the global and local production of medicines. ECA has been developing a scalable and sustainable pharmaceutical framework for action. The intended high-level improvements are increased trade in manufactured goods between African countries, more affordable medicines and the creation of much-needed fiscal space for Governments in an era of rising debts.

Lessons learned and planned change

18.46 The lesson for the subprogramme was that, to address the above-mentioned challenges faced by member States, it needed to focus more on the implementation of evidence-based policies proposed by ECA. In applying the lesson, the subprogramme will put more emphasis on offering advisory services and technical assistance upon request to member States and pan-African institutions for the implementation of strategic and technical solutions such as domesticating AfCFTA provisions; developing national AfCFTA implementation plans; developing a regional implementation strategy; collaborating with the private sector to implement the AfCFTA sensitization and advocacy strategies; and inclusion of those who are vulnerable in AfCFTA.

18.47 Expected progress towards the objective is presented in the performance measure below (see figure 18.VIII).

Figure 18.VIII

Performance measure: number of member States that implemented recommendations on inclusive and equitable development in the pharmaceutical sector (cumulative)

Deliverables

18.48 Table 18.3 lists all deliverables of the subprogramme.

15. On assessing regional integration in Africa	–	1	1	1
16. On revisiting policy, legislation and institutions for industrial development in Africa	1	1	1	1
Technical materials (number of materials)	1	4	4	4
17. On investments	–	1	1	1
18. On topical international and intraregional trade issues	1	1	1	1
19. On the African Union integration agenda	–	1	1	1
20. On industrialization in Africa	–	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services in response to the needs expressed by all 54 member States and regional or subregional cooperation groups in the context of NEPAD and the Framework for a Renewed United Nations-African Union Partnership on Africa's Integration and Development Agenda 2017–2027; analytical advice for implementation of the Vienna Programme of Action.				
Databases and substantive digital materials: observatory on regional integration in Africa.				
D. Communication deliverables				
Outreach programmes, special events and information materials: information materials on regional integration and trade; information kits on the activities of the African Trade Policy Centre; high-level policy dialogue on trade.				
Digital platforms and multimedia content: content for the subprogramme's social media accounts on regional integration and trade.				

Subprogramme 3

Private sector development and finance

Objective

- 18.49 The objective, to which this subprogramme contributes, is to enhance the business environment to leverage the role of the private sector and its investments in the economic growth and transformation of Africa, to improve land-tenure security, in particular for women, and to enhance innovative private sector financing and investment for infrastructure, energy and services, and agriculture.

Strategy

- 18.50 To contribute to the objective, the subprogramme will:
- (a) Produce knowledge products with policy recommendations, offer advisory services and technical assistance and convene member States in areas of particular importance for accelerating agricultural development and food systems transformation, including regionally integrated agricultural value chains, climate change management, risk management, agribusiness and agro-industrial development, including agro-poles, intra-African trade, food security and nutrition, food safety and land governance;
 - (b) Support member States in implementing the African Union Declaration on Land Issues and Challenges in Africa and other associated commitments by working with the African Union Commission and the African Development Bank (AfDB) to achieve the Sustainable Development Goals and Agenda 2063. In particular, support regional economic communities, African universities and research institutions and civil society organizations towards knowledge generation and technical and advisory services to improve land tenure security for land users, especially women, reduce youth marginalization and create an enabling environment for responsible land-based investments by the private sector in land-related sectors such as agriculture and infrastructural development to boost energy and transport for successful implementation of AfCFTA;
 - (c) Work with the African Union Commission, the African Union Development Agency, AfDB and regional economic communities to operationalize the second priority plan of the Programme for Infrastructure Development in Africa and assist with technical analysis in the context of AfCFTA, and to promote the African air transport market, improve road safety and digitalize the continent's infrastructure;
 - (d) Support the development of home-grown solutions for Africa by stepping up its work with member States, regional partners and international organizations in developing best practices in public-private partnership models that attract private sector participation and investment in energy and infrastructure, and advocating capital support for existing and new rail projects in Africa;
 - (e) Collaborate with strategic partners in ensuring that the deliverables contribute to enhancing the capacity of member States to provide viable and sustainable post-COVID-19 pandemic solutions that enable African economies;
 - (f) Support member States and market participants in exploring investment and co-investment opportunities in infrastructure, real estate and other sectors in close cooperation with pension funds, asset management firms, private equity firms and financial institutions;
 - (g) Provide technical assistance and disseminate best practices to member States to identify priority growth sectors and develop and implement policies, strategies and programmes to improve their competitiveness, attract investment and stimulate entrepreneurship;
 - (h) Support member States in developing and deepening their domestic debt markets as a sustainable method for mobilizing additional resources for development financing needs, allowing Governments to maintain fiscal stability and reduce their debt burden and their

reliance on foreign debt borrowing, which puts economies under strain, in particular for countries exposed to currency risks;

- (i) Promote economic and financial empowerment of African women entrepreneurs and assist women fund managers in developing an innovative financing platform that will promote the growth of women-owned or women-led companies and crowd in capital for supporting member States in making progress towards Sustainable Development Goals 1, 5, 8, 9, 11 and 17.

18.51 The above-mentioned work is expected to result in:

- (a) An improved standing of Africa in the global business environment rankings;
- (b) A business climate conducive to improved access to markets and a diversified investor base with an increased appetite for domestic currency debt markets;
- (c) Mobilized capital, both domestically and internationally, including through venture capital, private equity and impact investment;
- (d) Improved competitiveness, productivity, value addition and trade in agricultural goods and services and accelerated food systems transformation towards inclusive, resilient and nutrition-oriented systems;
- (e) Enhanced private sector role and land-based investments in agriculture and other sectors that promote women and youth entrepreneurship and safeguard the rights of local communities and the environment;
- (f) Improved policy and regulatory reforms following the African Union framework and guidelines on land policy in Africa and the guiding principles for large-scale land-based investments in Africa, and effective land administration;
- (g) Increased energy access by member States, the implementation of innovative financing for energy and infrastructure for the transformation of Africa, advocacy for the African position at the global level and the development of regional responses;
- (h) Increased efficiency and safety of the African transport sector, including through cheaper finance from the private sector to support rail stock procurement, and reduced road fatalities and injuries and cost of road accidents to the African economies;
- (i) Improved coping and recovery capacity from COVID-19 for member States at the national and regional levels, in particular in the African transport and energy sectors.

Programme performance in 2021

Strengthened food systems of African countries through a common position inspired by the United Nations Food Systems Summit

18.52 To accelerate the implementation of the decade of action and delivery for sustainable development, the Secretary-General convened a United Nations Food Systems Summit to build consensus on the future direction for global food systems. The platform provided an opportunity for African countries to renew commitments and sustain the momentum towards achieving the goals and objectives of Africa-based frameworks for promoting food systems and agricultural transformation. In this regard, the subprogramme partnered with the African Union Commission and the African Union Development Agency and convened the member States and key stakeholders towards developing a common African position on the Food Systems Summit. The African common position on food systems was rigorously reviewed by stakeholders, including by the ECA-led regional dialogue on African food systems held at the Africa Regional Forum on Sustainable Development, and ultimately presented to the Summit by the Chair of the African Union. The subprogramme contributed to global advocacy on food systems through a global policy brief on the Summit, which served as a basis for advocacy at the Summit and a road map for implementing its decisions. As a result of the awareness-

raising efforts, 42 African countries initiated regional or national dialogues resulting in national food system transformation strategies.

18.53 Progress towards the objective is presented in the performance measure below (see table 18.4).

Table 18.4
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	Member States requested United Nations Headquarters to engage with the regional commissions in organizing regional dialogues for the preparation of the United Nations Food Systems Summit	The African common position for the Food Systems Summit was developed, endorsed by the African Union Specialized Technical Committee on Agriculture, Rural Development, Water and Environment and presented at the Summit by the Chair of the African Union. It served as a basis for strategic transformations for 42 African countries that held national dialogues and developed food systems transformation strategies

Planned results for 2023

Result 1: enhanced investment in energy infrastructure through land policy reforms

Programme performance in 2021 and target for 2023

18.54 The subprogramme’s work contributed to seven countries reviewing regulatory and non-regulatory barriers for energy sector development, especially those related to land, which did not meet the planned target of four countries aligning their land policies with the energy sector. The target was not met owing to COVID-19 pandemic-related restrictions on travel, which limited the subprogramme’s ability to conduct in-person capacity-building, advisory services and progress monitoring in the targeted countries.

18.55 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 18.5).

Table 18.5
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	10 countries reviewed their power sector regulatory frameworks and identified non-energy barriers affecting their implementation	Seven countries reviewed their regulatory and non-regulatory barriers to energy sector development, especially those related to land	Three additional countries harmonize land and energy policies and strategies	One additional country harmonizes land and infrastructure policies and strategies

Section 18 Economic and social development in Africa

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
		Three countries were identified to form part of the study to align land and energy policies and strategies		

Result 2: increased access to financing for infrastructure development through public-private partnerships

Programme performance in 2021 and target for 2023

- 18.56 The subprogramme’s work contributed to a scoping study on public-private partnerships in Africa to identify the bottlenecks and constraints in advancing their sustainable implementation, which did not meet the planned target of harmonization of private-public partnership frameworks in six countries in line with countries’ private-public partnership laws and at least three countries implementing North-South and South-South private-public partnerships in infrastructure projects. The target was not met owing to COVID-19-related travel restrictions, which limited the ability of the subprogramme to provide in-person advisory services, activity implementation and monitoring.
- 18.57 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 18.6).

Table 18.6
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
North-South and South-South private-public partnership cooperation agreements for project development and technology transfer are in place in six member States (Cameroon, Côte d’Ivoire, Kenya, Malawi, Uganda and Zambia)	North-South and South-South private-public partnership cooperation agreements for project development and technology transfer are in place in six member States (Cameroon, Côte d’Ivoire, Kenya, Malawi, Uganda and Zambia)	South Africa, Kenya and Mozambique determined their current status and planned trajectory for private-public partnerships	At least three countries adopt international tools and standards in private-public partnerships North-South and South-South cooperation agreements for project development and technology transfer in six target countries	Six member States have access to capacity-building programmes instituted for private-public partnership units African forum for private-public partnerships is established

Result 3: enhanced capacity of member States to design and implement policies to improve the business environment

Proposed programme plan for 2023

- 18.58 Domestic resource mobilization is essential to finance the continent’s sustainable development agenda and reduce the need for external financing, which has declined significantly since the COVID-19 pandemic. Vibrant financial markets also play a crucial role in channelling resources to productive investments and fostering growth. The subprogramme undertook capacity development with universities in Cameroon, Ghana, Morocco, Namibia, Senegal, South Africa and the United

Republic of Tanzania and supported curricula development in Kenya. It offered technical assistance on investments in agriculture and mainstreaming a gender perspective in land and agricultural policies in the Democratic Republic of the Congo, Guinea and Malawi. Lastly, the subprogramme assisted in the promotion of value chains in accordance with African Union and ECA guidelines in Zambia and Zimbabwe and assisted on issues related to land governance in the East African Community and land and investments in the Common Market for Eastern and Southern Africa (COMESA).

Lessons learned and planned change

- 18.59 The lesson for the subprogramme was that to increase investor confidence in long-term project financing, it is vital to build coalitions and engage with high-level champions for successful advocacy to enhance the business environment for private sector investments in food systems, agriculture, land, energy and infrastructural services. In applying the lesson, the subprogramme will increase its efforts in building coalitions with its partners, including the African Union Commission, the African Union Development Agency, United Nations agencies and others to accelerate the design, adoption and implementation of policies for enhanced private sector investments in target sectors. Furthermore, the subprogramme’s work will evolve to include developing programmes and policies to assist countries in developing and structuring innovative financing instruments and strengthen institutional capacity to improve domestic markets.
- 18.60 Expected progress towards the objective is presented in the performance measure below (see table 18.7)

Table 18.7
Performance measure

---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Consultation, advice and advocacy: advisory services to three universities in three countries on the review of curricula on agriculture and land governance in Africa and to four member States on policy, legal and institutional reforms to support women’s land tenure security and entrepreneurship; advice on mainstreaming a gender perspective in land and agriculture policies and programmes, for the adoption of guidelines on the development of agro-poles, mainstreaming national agricultural, industrial and trade policy in AfCFTA strategies, promoting healthy and nutritious food, and improving risk management for building resilience; advocacy for regional transport policies and programmes such as the Yamoussoukro Decision, the single African air transport market, the Programme for Infrastructure Development in Africa and the Africa Transport Policy Programme; advice to member States on the issuance of bonds in Africa to enhance environmental sustainability and development finance in Africa; the African financial summit on the margins of the National Association of Securities Professionals; the annual African Private Equity and Venture Capital Conference; the conference on land policy in Africa; the policy dialogue to facilitate the establishment of a consortium of pension funds in African member States; advice to three member States in developing regional agricultural value chains in accordance with the African Union framework and guidelines for such chains and in mainstreaming land governance issues in agriculture; high-level policy forums to advocate on behalf of youth in such areas as agribusiness and employment; two high-level policy forums to advocate food safety and ending hunger and improving nutrition; advice on the implementation of the Programme for Infrastructure Development in Africa; policy design and advice to the African Union Specialized Technical Committee on Transport, Transcontinental and Interregional Infrastructures, Energy and Tourism; technical advice on the African continental power system master plan project and the African single electricity market.

Databases and substantive digital materials: toolkit for mapping land-based investment opportunities for agriculture and agribusiness in Africa; interactive map on large-scale land-based investments (including agro-industrial parks).

D. Communication deliverables

Outreach programmes, special events and information materials: information materials on energy infrastructure; capital markets development index.

**Subprogramme 4
Data and statistics**

Objective

- 18.62 The objective, to which this subprogramme contributes, is to strengthen the production, dissemination and use of credible data, statistics and geospatial information at the national, regional and global levels for evidence-based policy and decision-making.

Strategy

- 18.63 To contribute to the objective, the subprogramme will:
 - (a) Support African national statistical systems in transforming their data governance and management methods by digitalizing the data collection, compilation and dissemination process for statistical areas, including censuses and civil registration systems, and provide technical assistance and training in the design and implementation of national strategies for the development of statistics and national spatial data infrastructure with related integrated geospatial information frameworks;
 - (b) Maintain and regularly update databases that are accessible for public use, ensuring the availability of harmonized statistics and data disaggregated by location on such topics as African economies, demographics, social indicators, the environment and other statistics needed for monitoring and reporting on the implementation of the 2030 Agenda and Agenda 2063;
 - (c) Provide training and make platforms available for the exchange of best practices among member States and their respective statistical agencies;

- (d) Enhance communication about and advocacy for the use of statistics and geospatial information through national celebrations of African Statistics Day, engagement on social media and design and distribution of communication and advocacy materials;
- (e) Provide technical assistance to support national efforts to fast-track the development of a continental strategy for a geospatial response to the COVID-19 pandemic;
- (f) Integrate policy advice and sustained capacity-building activities on data and statistics to support member States to enhance monitoring and reporting on the implementation of the 2030 Agenda and Agenda 2063.

18.64 The above-mentioned work is expected to result in:

- (a) Enhanced capacity and efficiency of national statistical systems in the collection of comparable and harmonized statistics at various levels of disaggregation and improved statistical operations, including the conduct of censuses and survey processing and analysis and dissemination of timely data;
- (b) Improved uptake and use of modern methods, innovative tools and technologies for statistical operations in national statistical systems;
- (c) Improved uptake of data and statistics and geospatial information management, closer collaboration between components and stakeholders of the national statistical systems and better coordinated geospatial data infrastructures;
- (d) Increased resilience of national statistical systems;
- (e) Increased commitment, investment and ownership of the processes of production, analysis, dissemination and use of statistics and spatial information;
- (f) Enhanced monitoring and reporting on the implementation of the 2030 Agenda and Agenda 2063.

Programme performance in 2021

Reduced time for census taking, from traditional to digital censuses

18.65 In past rounds of censuses, manual data collection processes have been lengthy and labour-intensive and came with risks of lower data accuracy and reduced utility of the data. The subprogramme has harnessed technology to improve the timeliness, efficiency and effectiveness of data from censuses in Africa, making them technology driven. It developed digital applications, which were used by Ghana and Sierra Leone. Based on best practices and lessons learned from Ethiopia and Kenya, the first countries previously assisted to convert from manual to digital census systems, the subprogramme developed a digital census services technology ecosystem that comprises a census monitoring dashboard, provisioning tools, operations tracking systems and an electronic census question repository. These applications automatically load the correct documents, questionnaires, manuals, maps and software onto each tablet and ensure distribution to the right enumeration and supervision areas. Electronic dashboards were deployed in Ghana and Sierra Leone to monitor progress and the quality of the census enumeration. A tablet-sharing programme enabled additional countries to use the information technology equipment after those that had completed their censuses. The use of tablets and smartphones contributed to strengthening the production of credible data, statistics and geospatial information in Africa.

18.66 Progress towards the objective is presented in the performance measure below (see figure 18.IX).

Figure 18.IX
Performance measure: number of member States that completed digital censuses

Result 1: increased visibility through civil registration and good legal identity

Programme performance in 2021 and target for 2023

18.67 The subprogramme’s work contributed to the strengthening and improvement of civil registration systems by providing technical assistance on digitalization, decentralization and advocacy, with five countries registering at least 50 per cent of births within 24 months, which met the planned target.

18.68 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 18.X).

Figure 18.X
Performance measure: number of countries that register at least 50 per cent of births within 24 months (cumulative)

Result 2: enhanced capacities of member States to develop and implement integrated geospatial information frameworks

Programme performance in 2021 and target for 2023

18.69 The subprogramme’s work contributed to enhanced capacities of member States to develop and implement integrated geospatial information frameworks, with 10 countries developing and implementing national action plans on integrated geospatial information frameworks, which met the planned target.

- 18.70 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 18.XI).

Figure 18.XI

Performance measure: number of countries developing and implementing national action plans on an integrated geospatial information framework (cumulative)

Result 3: enhanced capacity of member States to transform and modernize their statistical systems

Proposed programme plan for 2023

- 18.71 High-quality economic statistics are critical for evidence-based policy and decision-making, tracking member States' progress towards achieving the Sustainable Development Goals and supporting AfCFTA. The subprogramme has enhanced capacity and provided technical support for member States to produce and disseminate harmonized and comparable economic statistics and national accounts in line with international statistical standards. The subprogramme assisted in the compilation of national accounts in member States, focusing mainly on updating and rebasing of GDP, compiling supply-use tables, building the trade-in-value-added model and applications and participation in the global update of the 2008 System of National Accounts.

Lessons learned and planned change

- 18.72 The lesson for the subprogramme was that there was a need to introduce new and alternative ways of doing business to support national statistical offices in addressing the operational challenges brought by COVID-19, including on face-to-face statistical data collection activities in the field. In applying the lesson, the subprogramme will promote and apply the new technologies, including computer-assisted telephone interviewing and telephone surveys, to change the way price data is collected and support member States in implementing the road map on digital transformation and modernization of their official statistics. Countries will be supported in strengthening their consumer price indexes, agriculture statistics, energy statistics and other economic indicators, as well as in transforming their data governance and management methods by digitalizing the data collection, compilation and dissemination process for statistical areas.
- 18.73 Expected progress towards the objective is presented in the performance measure below (figure 18.XII).

Figure 18.XII

Performance measure: number of member States that implemented the road map on digital transformation and modernized official statistics

Deliverables

18.74 Table 18.9 lists all deliverables of the subprogramme.

Table 18.9

C. Substantive deliverables

Consultation, advice and advocacy: technical advice on civil registration and vital statistics, on the 2023 round of population and housing censuses for member States in Africa and on Sustainable Development Goal indicators.

Advice to the annual meetings of the Committee of Directors General of National Statistics Offices of the African Union, African Statistical Coordination Committee, Statistical Commission, consultative meeting on strengthening and harmonization of economic statistics in Africa, and high-level forums on global geospatial information management.

Technical advice to member States on the implementation of civil registration frameworks and systems; advice on the implementation and revision of national strategies for the development of statistics; digitalization and the integration of data science initiatives; survey methodology and coordination of the national statistical system and statistical legislation (including administrative data systems and other sources); and to national statistical offices on the application of data dissemination and exchange systems; consultation with member States and regional stakeholders for the validation of data for the African Statistical Yearbook; advocacy for the adoption of strategies and methodologies by member States and regional bodies to make official statistics open by default; advice on the development and management of civil registration and vital statistics strategic plans; production and dissemination of gender statistics; advocacy to strengthen the gender statistics focal point network; advocacy to strengthen population and housing censuses; advice on the adoption and technical implementation of the 2008 System of National Accounts in Africa by member States.

Technical advice to five member States in developing integrated geospatial information frameworks at the national and regional levels; technical assistance in the integration of geospatial and statistical information, the implementation of the African Geodetic Reference Frame and the development of fundamental themes and standards for geospatial datasets; technical assistance and advisory services in the implementation of global and regional initiatives and programmes (African Space Agency, Group on Earth

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
Observations, African initiative under the Global Earth Observation System of Systems, Global Monitoring for Environment and Security programme, Regional Centre for Mapping of Resources for Development, African Regional Institute for Geospatial Information Science and Technology, Digital Earth Africa and others).				
Databases and substantive digital materials: ECA statistical data portal (ECAStats); geospatial databases, online applications, services and platforms; Africa GeoPortal.				
D. Communication deliverables				
Outreach programmes, special events and information materials: African Statistics Day; annual Africa Symposium on Statistical Development for some 300 participants; outreach programmes for publications: facts and figures on African and major world economies and advocacy materials on African Statistics Day; Geographic Information Systems Day; desktop/mobile versions of Executive Statistics Monitoring mobile application.				

Subprogramme 5 Technology, climate change and natural resources management

Objective

- 18.75 The objective, to which this subprogramme contributes, is to advance inclusive and sustainable development through strengthened capacity of member States to harness new technologies and innovation, natural resources and the green and blue economies, and to enhance climate resilience.

Strategy

- 18.76 To contribute to the objective, the subprogramme will:
- (a) Conduct policy research and provide technical assistance to member States on new technologies, innovation and digital transformation methodologies and frameworks, including the good digital identification framework, to support the formulation and implementation of national and regional policies, complemented by peer learning, dialogue and consensus-building platforms, to help member States make progress towards the achievement of Sustainable Development Goals 4, 5, 8, 9, 13 and 17;
 - (b) Conduct policy research and provide technical support and advisory services to member States in the design and implementation of mineral policies, strategies and plans that are aligned with the principles of the Africa Mining Vision. This will be complemented by peer learning and policy dialogues on extractives-led productive linkages, which will include consideration of COVID-19 impacts, environmental and social aspects and matters related to gender equality;
 - (c) Conduct policy research and provide training for policymakers, experts and practitioners, convene regional platforms, in particular the Africa Regional Forum on Sustainable Development, and increase country-level technical assistance on the green economy, the circular economy,⁴ sustainable development and poverty eradication, including conducting voluntary national and local reviews through region-wide initiatives and targeted country support, to assist member States make progress towards the achievement of Goals 1, 2, 11, 12 and 15;
 - (d) Provide technical advice to the African Union Commission, regional economic communities and intergovernmental organizations on sustainable planning, policy formulation and governance of the blue economy in line with the African Union's Africa Blue Economy Strategy, complemented by training for policymakers on the different perspectives and sectors of the blue economy and by assessments of living species, geomorphological analysis and

⁴ See United Nations Environment Assembly resolution 5/11 ([UNEP/EA.5/Res.11](#)).

mapping of floors of water bodies, including underground waters, in general and oceans in particular, to assist member States make progress towards the achievement of Goal 14;

- (e) Conduct policy research and analysis and convene regional dialogues on the climate resilience and disaster vulnerability of African economies, societies and ecosystems, and broaden advisory services, technical assistance and training on integrated implementation of climate actions, modelling of the economic impacts of climate change and private sector investments for the implementation of nationally determined contributions and the achievement of Goal 13 and related Goals;
- (f) Strengthen the capacity of Africa for a sustainable recovery from the pandemic and raise awareness on the links between climate change, the economy and health issues, including pandemics, through publications and other knowledge products, while supporting member States with options for the prioritization of stimulus plans for sustainable recovery from the pandemic;
- (g) Build the capacity of member States to generate the workforce needed to assess, maintain, develop and produce health technologies and promote investment in innovations, focusing on COVID-19, supported by ongoing work on building human capital and innovation through education, competitions and design schools for innovators.

18.77 The above-mentioned work is expected to result in:

- (a) Improved public services, conducive to private sector investment in new and emerging technologies, to foster the transition to innovation and the digital economy;
- (b) Strengthened platforms for interactions between the academic, industrial and business sectors and Governments to stimulate commitment to low-emission growth and the development and deployment of frontier and appropriate technologies;
- (c) Strengthened implementation of the good digital identification framework principles as enabling factors for digital transformation, inclusive growth and development;
- (d) Natural resource-rich African countries achieving diversification in their policies and strategies, through economic linkages between their natural resources sector and other sectors;
- (e) Expanded uptake of effective policies and good practices for inclusive and sustainable growth, poverty eradication and sustainable development;
- (f) Improved knowledge and enhanced policy frameworks on the blue economy at the subregional and national levels and sustainable measures at the national, subregional and continental levels;
- (g) Robust development policies, strategies and plans that capitalize on the challenges posed by climate change to the transition to low-emission and climate-resilient economies, with increased private sector investment in the implementation of the Sustainable Development Goals;
- (h) Attainment of common positions and effective means of implementation of climate responses that capitalize on the continent's abundant natural resources, including its renewable resources (energy, water, marine and other resources) to achieve inclusive and sustainable development;
- (i) Revised nationally determined contributions that are streamlined with national development frameworks, plans and programmes and sustainable recovery from COVID-19, climate resilience and increased awareness of the link between climate change and health.

Programme performance in 2021

Enhanced capacity of member States to implement a green, sustainable and climate-resilient recovery from COVID-19 and adopt suitable technology to accelerate their sustainable development

- 18.78 Despite increased momentum towards sustainable finance investments, given the specific climate, environmental and social considerations in Africa sustainable investments remain scarce. The subprogramme initiated sustainable recovery studies to correlate value and job creation in both traditional and green economies, focusing on key sectors such as energy, natural capital and transport. To leverage further financial flows, studies were published in two pilot countries (Democratic Republic of the Congo and South Africa). The findings of the studies are consistent and demonstrate how investing in a green economy in the context of sustainable development and poverty eradication in these countries would unleash the potential of development while limiting the degradation of nature and the impact of climate change. It provides appropriate data for States to leverage financial opportunities towards resilient sustainable development. The Democratic Republic of the Congo engaged with ECA to better structure the value chain around battery minerals. South Africa issued a green bond to restructure its financing for a sustainable energy transition.
- 18.79 Progress towards the objective is presented in the performance measure below (see figure 18.XIII).

Figure 18.XIII

Performance measure: number of countries that identified/determined opportunities for technology adoption and climate-resilient COVID-19 recovery

Planned results for 2023

Result 1: increased investment in climate action in Africa

Programme performance in 2021 and target for 2023

- 18.80 The subprogramme's work provided support to five member States to plan for and revise their nationally determined contributions and also access stimulus funds in the context of a green, sustainable and climate-resilient recovery, which met the planned target.
- 18.81 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 18.10).

Table 18.10
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
10 countries engaged in the Sustainable Development Goal 7 initiative	Private sector investments in clean energy actions under the Goal 7 initiative in three countries (Ethiopia, Senegal and South Africa)	Five countries revised their nationally determined contributions (Burkina Faso, Eswatini, Liberia, Namibia and Zimbabwe)	At least eight countries engage with the private sector in the implementation of nationally determined contributions	Four countries strengthen the Goal 7 initiative and climate, land, energy and water strategies Four countries implement revised nationally determined contributions and integrate climate resilience in their national development policies and plans

Result 2: increased resilience through channelling resources to respond to the COVID-19 pandemic and climate change

Programme performance in 2021 and target for 2023

- 18.82 The subprogramme’s work contributed to four countries developing policy options including investments for a climate-resilient green and blue economic recovery, which met the planned target.
- 18.83 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 18.11).

Table 18.11
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	Two countries (Rwanda and Seychelles) developed policy options for a climate-resilient blue economy pathway	Three countries (Democratic Republic of the Congo, Congo and Sudan, member States under the Africa Regional Forum on Sustainable Development) developed policy options including investments for a climate-resilient green and blue economic recovery	At least two countries implement initiatives for such purposes as securing finance for a climate-resilient green and blue economic recovery	Four policies are developed in member States on green and blue economic recovery

Result 3: adoption of good digital identification framework principles for a sustainable and inclusive digital transformation

Proposed programme plan for 2023

18.84 The use of digital technology as part of the response to the COVID-19 pandemic highlighted its potential to catalyse inclusive and sustainable growth in Africa, contributing significantly to the attainment of the Sustainable Development Goals. Legal frameworks with minimum requirements for the establishment of digital identification platforms through a continental approach are essential to enable African countries to maximize the benefits of digital technologies in the post-pandemic environment. The subprogramme supported formulation and implementation of the African Union Digital Transformation Strategy (2020–2030). In line with the Strategy, the subprogramme contributed to four countries adopting and implementing nationwide inclusive digital transformation plans, including national digital strategies, digital identification frameworks and systems, digital platforms and advanced research tools such as artificial intelligence. This work contributed to fostering innovation towards information and communications technology (ICT) and digital transformation, building digital economies, promoting digital markets and enhancing digital security.

Lessons learned and planned change

18.85 The lesson for the subprogramme was that in order to support the creation of enabling digital frameworks, it needed a proven implementation road map to demonstrate to decision-makers all the benefits of a digital transformation. In addition, there was a need for digital policy recommendations for building value through AfCFTA, while enabling privacy, data protection and electronic transactions. In applying the lesson, the subprogramme will expand its support to six member States to formulate policies and strategies, including implementation road maps for good digital identification, that enable them to adopt new and emerging technologies such as artificial intelligence, the Internet of things and biotechnology by overcoming the sizeable deficit in digital infrastructure gaps.

18.86 Expected progress towards the objective is presented in the performance measure below (see figure 18.XIV)

Figure 18.XIV

Performance measure: member States that formulated policies to adopt new and emerging digital technologies (cumulative)

Deliverables

18.87 Table 18.12 lists all deliverables of the subprogramme.

45. Documentation for meetings of the African Union and NEPAD in the areas of new technologies and innovation, the environment and natural resources, a green economy in the context of sustainable development and poverty eradication and climate change in the context of the 2030 Agenda and Agenda 2063	–	1	2	1
46. Tools and methods for country natural capital accounts and managing investments in the blue economy	1	1	–	1
47. Climate change and development in Africa after the COVID-19 pandemic	–	1	–	1
48. Implementation of good digital identification framework principles in supporting member States' national digital transformation initiatives ^a	–	1	–	3
49. Continental geospatial database on the African blue economy	1	–	–	–
50. Country natural capital accounts (water accounts)	2	–	–	–
51. African regional centres of excellence in the Atlantic and Western Indian Oceans	1	–	–	–
52. Framework classification and management for marine minerals and energy	1	–	–	–
53. Path to 2030–2063: outlook on resources for the transformation of Africa	1	–	–	–
54. Continental and subregional atlases on the blue economy	1	–	–	–
55. Tools for strengthening the capacity of member States to negotiate, implement and monitor Africa Mining Vision-aligned local policies and strategies	1	–	–	–

C. Substantive deliverables

Consultation, advice and advocacy: advisory services to two member States and two regional and subregional cooperation groups on the framework for a renewed United Nations-African Union partnership on Africa's integration and development agenda for 2017–2027; technical advice to the secretariat of the African Peer Review Mechanism; advisory services to three countries on climate change; advisory services to two countries on a green economy in the context of sustainable development and poverty eradication and natural resources; advisory services to three countries on innovation and technology in Africa; high-level expert dialogues on science, technology and innovation with approximately 35 representatives from African countries; high-level policy event on a green economy in the context of sustainable development and poverty eradication and structural transformation in Africa with 70 participants.

African climate talks to gather inputs from around 100 African stakeholders on the continent's interests in global climate governance discourses, such as the Conference of the Parties to the United Nations Framework Convention on Climate Change; advisory services on policies and strategies on technology and innovation to two countries, on a green economy in the context of sustainable development and poverty eradication and the blue economy to two countries and on climate change and natural resources management to three countries; advisory services and documentation for the African Union-NEPAD meetings in the areas of new technologies and innovation, the environment and natural resources, a green economy in the context of sustainable development and poverty eradication and climate change in the context of the 2030 Agenda and Agenda 2063; African regional review of the implementation of the outcomes of the World Summit on the Information Society with representatives of all African countries and the African Internet Governance Forum (African platform for multi-stakeholder policy dialogue on prevailing and emerging issues on Internet governance for 400 participants).

D. Communication deliverables

Outreach programmes, special events and information materials: brochures, flyers, briefs and information kits on technology, climate change, a green economy in the context of sustainable development and poverty eradication and the blue economy, the environment and natural resources management and logistics, including newsletters.

External and media relations: press releases related to the issuance of major publications and events on technology, climate change, a green economy in the context of sustainable development and poverty eradication and the blue economy, the environment and natural resources management and logistics.

Digital platforms and multimedia content: websites, social media and platforms on technology, climate change, a green economy in the context of sustainable development and poverty eradication and the blue economy, the environment and natural resources management and logistics.

^a This deliverable is one of the focus areas of the digital centre for excellence and is aimed at supporting member States to adopt and implement good digital identification framework principles, which ECA has developed together with the African Union. The deliverable is integrated into the work of the Technology, Climate Change and Natural Resources Management Division of ECA as part of the digital centre for excellence being merged into the Technology and Innovation Section of the Division. The targets for actual and planned results have also been included as part of the process for 2021 and 2023.

Subprogramme 6

Gender equality and women's empowerment

Objective

- 18.88 The objective, to which this subprogramme contributes, is to achieve gender equality and women's empowerment in Africa, through accelerating the pace of implementation by member States of and their reporting on their global and regional commitments related to gender equality and the empowerment of women and girls and to enhance their implementation of policies and programmes for the empowerment of women and girls.

Strategy

- 18.89 To contribute to the objective, the subprogramme will:
- (a) Undertake policy research and technical advisory services and increase knowledge, develop capacity and stimulate discussion on topical issues relating to gender equality and women's empowerment, to ensure gender-sensitive development outcomes, building on the African Women's Report;
 - (b) Work on women's economic empowerment, harnessing demographic dividends for women's employment and quality education for women and girls, placing particular emphasis on digital transformation;
 - (c) Provide technical support to member States in mainstreaming a gender perspective in their sectoral development policies and programmes, as well as support across ECA subprogrammes on their deliverables for member States, and develop the capacity of national gender machineries and line ministries to mainstream a gender perspective in sectoral policies prioritized by member States and building on ECA knowledge products. Through consultation and close collaboration on programme and project design, monitor related gender statistics to ensure coherence with global and regional frameworks on gender equality and women's empowerment, the ECA gender policy and the ECA gender strategy and harmonize results in line with relevant framework outcomes;
 - (d) Provide technical support to member States to measure progress and report on the status of implementation of their national programmes and policies related to their global and regional commitments, building on the results of the regional review of the Beijing Declaration and Platform for Action, the African Gender and Development Index and the Africa Gender Index;
 - (e) Roll out the African Gender and Development Index and the Africa Gender Index, in collaboration with partners, in the remaining countries that have not yet implemented them, assisting member States in their progress towards achieving Sustainable Development Goal 5;
 - (f) Undertake research and analysis on resilience as a result of the COVID-19 pandemic, to focus more on the impact of external shocks, including through research on existing and underlying risks and vulnerabilities faced by women and girls, across relevant thematic areas of the subprogramme's work.
- 18.90 The above-mentioned work is expected to result in:
- (a) Strengthened consideration of a gender perspective in the planning and implementation of national policies and programmes, to ensure outcomes that address gender equality and women's empowerment;
 - (b) Improved capacity of policymakers to identify and respond to global and regional frameworks on gender equality and women's empowerment and align their national development outcomes, to fulfil national commitments and ensure policy coherence;

- (c) Increased knowledge and strengthened capacities of member States to design and develop policies that address resilience, including as part of COVID-19 response and recovery, to address challenges faced by women and girls;
- (d) Increased knowledge on the role of policymakers in the implementation of policies, legislation and programmes to achieve greater influence and positive impacts on gender equality and women’s empowerment;
- (e) Increased opportunities, greater economic empowerment and improved livelihoods for women and girls across Africa, as a result of smart policies and tools designed to address existing and emerging discrepancies in gender equality.

Programme performance in 2021

Increased capacity of member States to identify digital solutions that promote the economic empowerment of women and girls

- 18.91 Technological inequality is widening globally, with those who are digitally connected reaping benefits while many remain excluded. Africa is the region with the lowest proportion of Internet users, at 33 per cent in 2020 compared with a global average of 63 per cent. The gender-related digital divide has also widened. The global gap between Internet usage by women and girls and by men has narrowed from 11.0 per cent in 2013 to 8 per cent in 2020, but in Africa in the same period the gap increased from 21 per cent to 31 per cent.
- 18.92 The subprogramme has increased the knowledge of member States through policy analysis, exemplified by the validation of the findings of the 2021 publication *African Women’s Report: Digital Finance Ecosystems – Pathways to Women’s Economic Empowerment in Africa*, and developed the capacity of government officials and experts on digital solutions for economic empowerment. Through the recommendations of the fourth session of the Committee on Social Policy, Poverty and Gender, member States underlined the importance of strengthening science, technology, engineering and mathematics education and training for women and girls, as well as implementing digital solutions to increase their resilience to external shocks.
- 18.93 Progress towards the objective is presented in the performance measure below (see table 18.13).

Table 18.13
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
29 per cent of women in Africa use mobile Internet, excluding North Africa, compared with a global baseline of 48 per cent	Capacity of 2,000 women and girls across the continent developed on digital skills to bridge the gender-related digital divide, at the joint ECA and International Telecommunication Union continental hybrid (online and in person) camp	Improved knowledge and capacities of policymakers in Cameroon, Ghana, Rwanda, South Africa and Tunisia to apply solutions for digital finance as a pathway to women’s economic empowerment

Planned results for 2023

Result 1: assessing the cost of achieving Sustainable Development Goal 5 in five selected countries

Programme performance in 2021 and target for 2023

- 18.94 The subprogramme's work contributed to the development of an analytical framework to cost education targets related to Sustainable Development Goal 5 on gender equality and the empowerment of women and girls, which did not meet the planned target of costing being completed for five countries to inform investment and resource allocation. The target was not met because there were delays in finalizing the analytical framework as originally planned for 2020, which was moved to 2021, owing to the heavy impact of the COVID-19 pandemic on fiscal policies and the redirection of funds towards COVID-19 recovery in both years, which made it difficult for ECA to perform costing calculations based on existing methodologies in 2020.
- 18.95 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 18.14).

Table 18.14

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
African Gender and Development Index regional synthesis report and 25-year review of the implementation of the Beijing Declaration and Platform for Action, which identified priorities and challenges from 15 country analyses and 50 national reports respectively	African Gender and Development Index implemented in two member States to inform the choice of sectors to be included in the subsequent costing exercise	Improved knowledge of five member States to calculate the cost of achieving education targets related to Goal 5 through the development of an analytical framework	Five countries identify gaps across economic, social and political blocs and integrate costing measures into planning, monitoring and evaluation of gender equality programmes	Strengthened capacity of five member States to utilize the African Gender and Development Index to design, report and monitor programmes and progress made in achieving selected targets for Goal 5

Result 2: enhanced capacity of member States to address gender equality in the economic and digital transformation of African countries

Programme performance in 2021 and target for 2023

- 18.96 The subprogramme's work contributed to 100 per cent of survey respondents, representing member States, having enhanced their knowledge on the gender-related digital divide, which exceeded the planned target of 60 per cent.
- 18.97 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 18.15).

Table 18.15
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
African Gender and Development Index regional synthesis report and 25-year review of the implementation of the Beijing Declaration and Platform for Action, which identified priorities and challenges from 15 country analyses and 50 national reports respectively	Preliminary findings for the <i>African Women's Report 2021</i> , which will focus on digital finance as a pathway to women's economic empowerment, providing a comprehensive overview of the digital finance architecture	100 per cent of survey respondents, representing member States, have enhanced their knowledge on the gender-related digital divide Outcome statement by member States on the importance of promoting digital finance for achieving women's economic empowerment across the region	Five African countries revise policies and programmes designed to narrow the gender-related digital divide	Improved knowledge of five member States to formulate policies that promote digital skills and training for women and girls and science, technology, engineering and mathematics employment for women
33 per cent of Internet users in Africa are women, as a baseline performance measure				

Result 3: strengthened capacity of member States to integrate a gender perspective into their sectoral policies

Proposed programme plan for 2023

18.98 To achieve transformational change, a gender perspective must be infused into all policy sectors and spheres of influence. Efforts to mainstream a gender perspective in sectoral policies have been ongoing. An ECA gender policy and strategy has been developed for policymakers in all member States, to provide a robust framework to design, implement, monitor and evaluate programmes and policies delivered to member States. The subprogramme has also undertaken a regional gender analysis of the effects of climate change in key sectors such as artisanal and small-scale mining.

Lessons learned and planned change

18.99 The lesson for the subprogramme was the need for closer country collaboration for better uptake of policy recommendations, in order for ECA to accelerate capacity-building of line ministries and national machineries for gender equality. This would help to address barriers to gender equality and ensure a central place for women's empowerment in sectoral policies. In applying the lesson, the subprogramme will work more directly with member States in order to operationalize ECA knowledge products and expand its technical assistance and knowledge tools to enhance the knowledge and skills of member States to design and implement gender-sensitive sector policies. The subprogramme will utilize the ECA gender policy and strategy to provide further structure in the monitoring and evaluation of its interventions.

18.100 Expected progress towards the objective is presented in the performance measure below (see table 18.16).

Table 18.16
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Enhanced capacity of seven countries to mainstream a gender perspective in national planning processes and sectoral policies	Increased capacity of three member States to integrate a gender perspective into their national AfCFTA strategies	Increased capacity of three member States in designing gender-sensitive policies focused on the artisanal and small-scale mining sector and informing policy and finance for nationally determined contribution plans	Increased capacity of five member States in designing gender-sensitive policies, including women's leadership	Five member states integrate a gender perspective into their sectoral policies and national development planning

Deliverables

18.101 Table 18.17 lists all deliverables of the subprogramme.

Table 18.17
Subprogramme 6: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	2	2	–	3
1. Report to the Committee on Social Policy, Poverty and Gender on the work of the subprogramme	1	1	–	2
2. Final outcome report of the Committee on Social Policy, Poverty and Gender	1	1	–	1
Substantive services for meetings (number of three-hour meetings)	1	1	–	1
3. Biennial session of the Committee on Social Policy, Poverty and Gender	1	1	–	1
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	2	4	4
4. On mainstreaming a gender perspective in national plans, policies and programmes in countries that request technical advisory services	1	1	1	2
5. On the demographic dividend with a gender perspective to enhance the capacity of member States to harness the demographic dividend and achieve gender equality	1	1	–	–
6. On supporting member States in using the subprogramme's measurement tools to report on their gender equality commitments	–	–	1	1
7. On assessing the cost of achieving Sustainable Development Goal 5	–	–	1	–
8. On enhancing the capacity of member States to address the gender-related digital divide and positively reimagine a gender perspective in the economic and digital transformation of African countries	–	–	1	1
Seminars, workshops and training events (number of days)	10	8	9	8
9. Workshop on the African Women's Report	4	4	–	2
10. Workshop on the Women's Entrepreneurship Report	2	2	–	–

Part V Regional cooperation for development

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
11. Training event on the African Gender and Development Index	2	2	5	4
12. Workshop on the African women’s leadership report	2	–	–	–
13. Seminar on gender equality and women’s empowerment, including ECA-wide showcasing of divisions’ and subregional offices’ work in support of member States	–	–	2	–
14. Workshop on policies and programmes to narrow the gender-related digital divide	–	–	2	2
Publications (number of publications)	2	2	2	1
15. African Women’s Report based on thematic and topical issues	1	1	–	1
16. African women’s leadership report to assess the status of women in leadership positions	1	1	1	–
17. Analytical report on ECA work in support of gender-sensitive sectoral policies	–	–	1	–
Technical materials (number of materials)	3	3	3	2
18. Technical notes on the Africa Gender Index and the African Gender and Development Index	1	1	–	1
19. On climate change and gender equality and women’s empowerment in Africa	1	1	–	–
20. On gender equality and women’s empowerment and the extractive industry in Africa to connect research with the governance of the artisanal and small-scale mining sector	1	1	–	–
21. Policy brief on gender equality in the economic and digital transformation of African countries	–	–	3	1
C. Substantive deliverables				
Consultation, advice and advocacy: special event on International Women’s Day (2023) and the 16 Days of Activism against Gender-based Violence campaign as part of the global campaign and support for the preparatory ministerial meeting, attended by 15 participants from African countries, for the Commission on the Status of Women.				
D. Communication deliverables				
Digital platforms and multimedia content: knowledge platforms for information-sharing and advocacy on gender equality and women’s empowerment to deepen dialogue and policy options using the subprogramme’s social media accounts.				
External and media relations: press releases on the subprogramme’s website after the hosting and organization of each event.				

**Subprogramme 7
Subregional activities for development**

**Component 1
Subregional activities in North Africa**

Objective

18.102 The objective, to which the component contributes, is to enhance the employment creation environment in North Africa through strengthened economic diversification and regional integration and a better recognition of migrant workers’ qualifications and skills.

Strategy

18.103 To contribute to the objective, the component will:

- (a) Develop evidence-based policies, strategies and reforms and provide technical assistance to support diversification and build resilient economies in North Africa;

- (b) Analyse, in collaboration with others, employment creation through SMEs in North Africa, with a focus on a green economy in the context of sustainable development and poverty eradication, digitalization, gender equality and post-COVID-19 recovery;
- (c) Provide advisory services and hold subregional consultations on the implementation of AfCFTA, in partnership with ministries of trade, the African Union and the European Union;
- (d) Provide technical assistance and training for selected African countries on migration-related data and capacity-building towards recognition of the skills and qualifications of African workers;
- (e) Conduct research on demographic trends, the digital skills gap and productive employment creation in Africa in collaboration with United Nations and external partners.

18.104 The above-mentioned work is expected to result in:

- (a) Member States having adopted evidence-based macroeconomic policies and structural reforms to enhance productive employment, redirecting resource allocations towards sectors that have high potential in terms of competitiveness;
- (b) Member States having designed appropriate policies and strategies that foster regional integration, enhance productivity and create new jobs in higher-skilled sectors;
- (c) Improved availability and use of migration statistics and greater recognition of skills across the continent;
- (d) Member States having created a conducive environment for SMEs to generate productive and sustainable jobs, especially for women and youth in North Africa.

Programme performance in 2021

Enhanced tax revenue mobilization in the Sudan

18.105 The Sudan's tax revenues relative to GDP have been in the single digits and among the lowest globally, limiting the country's capacity, including in provision of education and health-care services and facilitation of large infrastructure investments. The component provided technical assistance to the Sudan Taxation Chamber in reviewing prevailing administrative tax practices and addressing key challenges in auditing six economic sectors. In partnership with the Egyptian Tax Authority, the component also provided technical assistance to enhance value added tax collection, develop new audit methodologies for monthly and annual tax returns and improve income tax law implementation. Subsequently, the share of large taxpayers in total tax revenues increased from 50 per cent to 70 per cent, contributing to an increase in the tax revenue to GDP ratio.

18.106 Progress towards the objective is presented in the performance measure below (see figure 18.XV).

Figure 18.XV

Performance measure: ratio of tax revenue to gross domestic product in the Sudan (annual)

Planned results for 2023

Result 1: North African countries adopt best practices for job creation

Programme performance in 2021 and target for 2023

18.107 The component’s work contributed to raising awareness on 34 best practices in employment creation in 15 African countries, enhancing their capacity to better assess the gaps in public policies and design and implement suitable policies for employment creation, which did not meet the planned target of at least one country in the North African subregion decreasing its unemployment rate through the implementation of one job creation programme. The target was not met as national unemployment rates did not decrease, mainly owing to the impact of the COVID-19 pandemic on the labour market.

18.108 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 18.18).

Table 18.18

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
North African countries gain interest in employment creation for sustainable development and become engaged in regional dialogue	Three North African countries (Egypt, Morocco and Tunisia) engaged in the development of suitable policies to reduce the negative impact of COVID-19 on employment	15 African countries had enhanced capacity to better assess the gaps in public policies and design and implement suitable policies for employment creation	An additional country in the North African subregion decreases its unemployment rate through the implementation of one job creation programme	One country with increased capacity to assess public policy gaps as well as design and adopt policies or programmes for employment creation

Result 2: increased policy design capacity of North African countries to foster regional integration

Programme performance in 2021 and target for 2023

- 18.109 The component’s work contributed to strengthening member States’ capacities, with six countries having designed effective policies to foster regional integration in line with AfCFTA, which exceeded the planned target of four countries.
- 18.110 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 18.XVI).

Figure 18.XVI

Performance measure: number of member States and regional economic communities that design appropriate policies to foster regional integration (cumulative)

Result 3: small and medium-sized enterprises as engines of sustainable development in North Africa

Proposed programme plan for 2023

- 18.111 SMEs and microenterprises account for more than 90 per cent of total firms and between 50 per cent and 90 per cent of employment in North Africa. SMEs are critical for private sector development and inclusive growth, as well as innovation and competitiveness. The component builds its policy analysis and advisory services on the Subregional Office for North Africa and ECA analyses in these areas, for example through the Office’s ongoing analytical work on the impact of the COVID-19 shock on firms in selected North African countries (Algeria, Morocco and Tunisia), based on primary data collected by the Office and on analyses of performance and access to credit by family firms in North Africa, based on World Bank enterprise surveys for Egypt, Morocco and Tunisia. It also uses findings related to best practices for job creation and female entrepreneurship in Egypt, Ghana and Mauritius, prepared by the Subregional Office and Oxford Economics, and the ECA African Gender and Development Index.

Lessons learned and planned change

- 18.112 The lesson for the component was that it needed to meet the increased need for analysis and policy advice, which would enable North African countries to pay greater attention to previously unexplored areas, such as the importance of good management and diverse firm ownership in obtaining access to finance. In applying the lesson, the component will include innovation and the adoption of environmentally sound practices by entrepreneurs in the analysis and policy advice for member States. The work will also examine barriers and opportunities for specific subgroups of SMEs, such as family-owned firms. The Subregional Office for North Africa plans to focus its Intergovernmental Committee of Senior Officials and Experts and the related expert group meeting

around these areas in 2022 and collaborate with other divisions and subregional offices in ECA, for example the African Institute for Economic Development and Planning and the Subregional Office for West Africa.

18.113 Expected progress towards the objective is presented in the performance measure below (see table 18.19)

Table 18.19
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
–	–	One country (Tunisia) received analysis and policy advice for strengthening the capacity of SMEs, including through innovative sources of finance and environmentally sound practices	One country adopting innovative and sustainable policies and strategies for enhancing the capacity of SMEs	One additional country adopting innovative and sustainable policies and strategies for enhancing the capacity of SMEs

Deliverables

18.114 Table 18.20 lists all deliverables of the component.

Table 18.20
Subprogramme 7, component 1: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	4	4	4	4
1. Report to the Intergovernmental Committee of Senior Officials and Experts for North Africa	1	1	1	1
2. Subregional profile on socioeconomic development in the member States	1	1	1	1
3. Regional and international agendas and other special initiatives in the member States	1	1	1	1
4. Annual report on the work of ECA in North Africa	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	11	11	11	11
5. Session of the Intergovernmental Committee of Senior Officials and Experts for North Africa	11	11	11	11
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	3	3	2
6. On the implementation of the Agreement Establishing AfCFTA	1	1	1	1
7. On boosting employment for young people and women targeted at senior policymakers from North Africa	–	–	1	1

Section 18 Economic and social development in Africa

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
Seminars, workshops and training events (number of days)	4	2	2	2
10. North Africa Development Forum (employment)	2	–	–	1
11. Employment forum	2	2	–	1
12. Workshop on macroeconomic trends and prospects in North Africa	–	–	1	–
13. Workshop on implementing selected areas of the United Nations Global Compact related to data and skills recognition (subregional)	–	–	1	–
Publications (number of publications)	1	1	3	4
14. Labour market and demographic trends, employment and entrepreneurship	1	1	1	1
15. Structural transformation and distortions in North Africa	–	–	1	1
16. Impact of COVID-19 on firms in North Africa	–	–	1	–
17. Trade and regional integration	–	–	–	1
18. How SMEs in North Africa can improve their sustainable governance	–	–	–	1
Technical materials (number of materials)	3	2	1	1
19. On employment	–	–	1	1
20. On institutional quality and structural transformation	1	1	–	–
21. On migration	1	–	–	–
22. On implementation of the Agreement Establishing AfCFTA	1	1	–	–

C. Substantive deliverables

Consultations, advice and advocacy: advisory services to four member States to develop national macroeconomic models; advisory services to two member States to implement their national strategies on implementation of the Agreement Establishing AfCFTA; advisory services to at least four member States to produce datasets on migration; advisory services to two member States on aligning their development strategy to sustainability challenges, with a focus on firm practices related to sustainability.

D. Communication deliverables

Digital platforms and multimedia content: knowledge management website; three maintained platforms: electronic documents management, collaborative space, and customer relationship management of communities of practice.

External and media relations: press releases, newsletters, briefings, social media and other communication materials.

Component 2 Subregional activities in West Africa

Objective

- 18.115 The objective, to which this component contributes, is to advance inclusive development in West Africa through strengthening countries' capacity to integrate challenges related to demographic dynamics into their policies and planning processes and achieve regional integration.

Strategy

- 18.116 To contribute to the objective, the component will:
- Reinforce the Centre for Demographic Dynamics for Development, which was created in 2019 to accelerate the attainment of a demographic dividend in West Africa, including through capacity-building and provision of tailored technical assistance for national experts and officials and through generating evidence and applying analytical expertise on using a planning, programming and budgeting system that integrates information concerning demographic dividends;

- (b) Address requests from member States and regional entities pertaining to accelerating the attainment of a demographic dividend and promote the use in at least six West African countries of a budgeting framework that is sensitive to demographic dividends, and strengthen regional integration through the implementation of AfCFTA and other regional integration dimensions in West African countries;
- (c) Respond to capacity-building requests aimed at harnessing the opportunities unleashed by demographic dividends, building on the comparative advantage of ECA to undertake analysis and research on demographic issues (subprogramme 9), combined with its macroeconomic expertise (subprogramme 1);
- (d) Provide knowledge, tools and policies on the acceleration of a demographic transition and related implications for sustainable development, including family dynamics, migration and migrants, health and mortality, ageing and living conditions, historical demography, civil registration, gender equality and the empowerment of women and girls, youth and durable peace and resilience in Africa, among other things;
- (e) Pursue a strategic partnership with the ECOWAS Commission to finalize the first five-year strategic plan for the implementation of ECOWAS Vision 2050 and continue to advocate the mainstreaming of the Vision's strategic pillars in the national development plans of member States;
- (f) Work in partnership with the resident coordinator offices in West Africa, the United Nations regional offices in West Africa, the United Nations Office for West Africa and the Sahel (UNOWAS) and the Office of the Special Coordinator for Development in the Sahel to support efforts to achieve the Sustainable Development Goals, with a focus on Goals 4, 5, 8, 10, 16 and 17;
- (g) Deliver comprehensive and analytical insights into the existing socioeconomic work on subregional priorities, expand its support in the context of countries' COVID-19 socioeconomic responses and support to reformulate or review demographic-economic policies in partnership with national demographic dividend observatories and universities.

18.117 The above-mentioned work is expected to result in:

- (a) Mainstreamed policies related to demographic dynamics in countries' public policy frameworks, including planning, programming and budgeting systems;
- (b) Deepened regional economic and monetary integration through the operationalization of ECOWAS Vision 2050;
- (c) Informed sustainable development policies in West Africa in the context of COVID-19 socioeconomic responses;
- (d) Enhanced capacities of countries and regional organizations to speed up implementation of the internationally agreed agendas, including AfCFTA, and women and youth being empowered to seize the opportunities of AfCFTA.

Programme performance in 2021

Enhanced public policy processes to harness demographic dividends

18.118 Demographic transition offers a window of opportunity for accelerated economic growth. The results from changes in the age structure of a population go beyond the economy to affect many other aspects, including quality of life, eradication of poverty and territorial mobility. The component has been repositioned to advance the integration of dimensions related to demographic dynamics for development into countries' development plans and policies. Based on this new strategic orientation, the subprogramme engaged with countries to harness demographic dividends, including through capacity-building and knowledge production on demographic-economic issues. The latter requires

expertise and skills in specific areas of demographic-economics and planning tools, including models, assessments of progress towards the attainment of demographic dividends making use of national transfer accounts and country profiles, and a budgeting framework sensitive to the demographic dividend approach.

18.119 To this end, in 2021 the abilities of experts from the ministries in charge of population affairs and development planning and from the national population observatories or commissions of 14 countries were strengthened. Thus, in Mali, the public budgeting framework sensitive to the demographic dividend was endorsed by the authorities and informed the 2021 national budget deliberations. In the Niger, the authorities provided support to formulate the country’s gender demographic dividend monitoring index. Concerning Liberia’s road map on harnessing the demographic dividend, support was provided and the country’s national transfer account profile was published in September 2021. The profile was included in the series of national transfer account profiles and constitutes the global overview profile for the ECOWAS region. Currently, the component is focused on high-level policy dialogues by countries on budgeting frameworks that are sensitive to the demographic dividend, so as to advocate an effective increase in the allocation of public resources to the pillars of the demographic dividend.

18.120 Progress towards the objective is presented in the performance measure below (see figure 18.XVII).

Figure 18.XVII

Performance measure: number of countries enabled to apply demographic dynamics for development principles in their budgeting processes (annual)

Planned results for 2023

Result 1: consolidated 2021 achievements in supporting the ECOWAS Commission and recommendations translated into actions

Programme performance in 2021 and target for 2023

18.121 The component’s work contributed to the adoption of ECOWAS Vision 2050, which met the planned target.

18.122 The component’s work also contributed to two countries, the Niger and Nigeria, integrating the key pillars of Vision 2050 into their respective national development plans, which did not meet the planned target of at least two West African countries operationalizing Vision 2050. The target was not met owing to unforeseen delays related to the adoption of Vision 2050 in the context of COVID-19, and the subprogramme will continue to support both countries to domesticate further Vision 2050’s strategic pillars.

18.123 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 18.21).

Table 18.21
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Assessment of ECOWAS Vision 2020 and formulation of the post-2020 vision, with the prioritization of accelerated implementation of the ECOWAS capacity-development plan	First draft of the Vision 2050 blueprint and its first medium-term implementation plan	ECOWAS Vision 2050 adopted and two countries committed to mainstreaming the Vision's strategic pillars into their national development plans	At least two additional West African countries domesticate ECOWAS Vision 2050, including with special emphasis on regional economic and monetary integration	Vision 2050's first strategic implementation plan is adopted by ECOWAS

Result 2: strengthened national strategies for implementing the African Continental Free Trade Area

Programme performance in 2021 and target for 2023

- 18.124 The component's work contributed to the ratification of AfCFTA by 13 West African countries, which exceeded the planned target of 12 ratifications.
- 18.125 The component's work also contributed to the formulation, validation and ongoing implementation of eight national AfCFTA strategies and one regional strategy (ECOWAS), for a total of nine strategies, which met the planned target.
- 18.126 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 18.22).

Table 18.22
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Agreement Establishing AfCFTA launched by the African Union on 7 July 2019 in Niamey No ECOWAS member country ratified the Agreement No national AfCFTA strategies validated by countries	11 ECOWAS countries ratified the Agreement 6 ECOWAS countries validated AfCFTA national strategies (Côte d'Ivoire, Guinea, Niger, Senegal, Sierra Leone and Togo)	13 ECOWAS countries ratified the Agreement 9 ECOWAS countries validated their AfCFTA national strategies (Burkina Faso, Côte d'Ivoire, Ghana, Guinea, Niger, Nigeria, Senegal, Sierra Leone and Togo)	13 ECOWAS countries ratified the Agreement (cumulative) 10 ECOWAS countries validated AfCFTA national strategies (cumulative)	11 ECOWAS countries validated AfCFTA national strategies (cumulative) 8 ECOWAS countries implemented key activities included in their respective national AfCFTA strategic action plan

Result 3: strengthened capacities of member States to develop and implement a planning, programming and budgeting system that integrates the demographic dividend

Proposed programme plan for 2023

18.127 In 2020, the component contributed, in partnership with the Regional Consortium for Generational Economics Research and the Government of Mali, to the implementation of a budgeting framework sensitive to a demographic dividend. The approach was supported by the strong political engagement of the Ministry of Finance (Directorate of the Budget), the Parliament and the National Demographic Dividend Observatory. The work included restructuring the classic budget (2008–2018) to a functional budget targeting demographic dividend pillars (human capital, governance, economic structure and professional and social networks), calculating and analysing budget elasticities and proposing a budget structure to better harness the demographic dividend. The outcome of the initiative led to more investment in human capital, health and education towards a rapid demographic transition and the empowerment of youth and women for the best life-cycle-deficit coverage. In October 2021, the component assisted in developing six road maps for developing budgeting frameworks sensitive to the demographic dividend for the 2022–2025 period (for Benin, Burkina Faso, Côte d’Ivoire, Niger, Senegal and Togo).

Lessons learned and planned change

18.128 The lesson for the component was that, to engage the main officials and assure that road maps for budgeting frameworks that are sensitive to the demographic dividend are implemented, it needed to build policy engagement and capacity at the early stage of the planning, programming and budgeting process. In applying the lesson, the component will engage with: (a) the ministries in charge of planning to integrate demographic dividend priorities into development plans and programmes, (b) the ministries in charge of finance to generate evidence on the national priorities as described in the national budget expenditure structure, and (c) networks of parliamentarians, which are a critical component in the budget validation process. This will ensure effective implementation of these road maps until 2025, including through allocation of resources to the pillars of a demographic dividend.

18.129 Expected progress towards the objective is presented in the performance measure below (see figure 18.XVIII).

Figure 18.XVIII

Performance measure: member States that adopted a planning, programming and budgeting system integrating a demographic dividend (cumulative)

Deliverables

18.130 Table 18.23 lists all deliverables of the component.

Table 18.23

Subprogramme 7, component 2: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	2	2	2	2
1. Report to the Intergovernmental Committee of Senior Officials and Experts for West Africa on the implementation of the work of ECA in West Africa	1	1	1	1
2. Annual report on the progress on implementation of agreed-upon regional and international development agendas in West Africa	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	16	16	16	16
3. Annual session of the Intergovernmental Committee of Senior Officials and Experts for West Africa	8	8	8	8
4. Annual meeting of West African intergovernmental organizations to foster coordination and synergies among regional sustainable development initiatives ^a	8	8	8	8
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	1	1	1
5. Strengthening the institutional capacity of regional economic communities, intergovernmental organizations, national Governments, national observatories of the demographic dividend and parliaments to capitalize on demographic dynamics for development in West Africa	1	1	1	1
Seminars, workshops and training events (number of days)	14	14	14	14
6. Workshop on matters pertaining to the development of West Africa: opportunities and challenges of demographic dynamics in West Africa for think tanks	9	9	9	9
7. Training events on strengthening member States' capacities in demographic-economic dynamics for development	5	5	5	5
Publications (number of publications)	3	6	3	3
8. On country and subregional profiles	2	2	2	2
9. On economic and social structural transformation in West Africa	1	4	1	1
Technical materials (number of materials)	2	3	2	2
10. On sustainable economic and social transformation in West Africa	1	2	1	1
11. On demographic dynamics for development	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: expert advice to 15 member States (Governments, parliaments, national observatories of the demographic dividend, universities), upon request, and advisory services on the monitoring and implementation of strategies, statistics development, regional integration, demographic dynamics for development and sustainable development in West Africa and making progress towards the Sustainable Development Goals.				
D. Communication deliverables				
Outreach programmes, special events and information materials: deliverables related to the Intergovernmental Committee of Senior Officials and Experts, parliamentary networks and events for the launch of flagship reports and related publications.				
External and media relations: press releases, newsletter (KAKAKI NEWS) and provision of other communication materials to the media.				

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
Digital platforms and multimedia content: West African subregion-specific content for the ECA website; West African business linkages platform, network of West African economic journalists, social media platforms such as Yammer, Twitter and Facebook, and communities of practice.				
Library services: exhibition of ECA knowledge products through various channels, including dissemination of recent publications during special events, upgrading information on the ECA main repository and sharing of knowledge products.				

^a The former framework (subregional coordination mechanism) was replaced by the Regional Collaborative Platform for Africa. While the wording of the deliverable was changed, it retains the same purpose, that is, to reinforce collaboration among United Nations entities to support the priorities of the African Union and the regional economic communities.

Component 3 Subregional activities in Central Africa

Objective

- 18.131 The objective, to which this component contributes, is to expand the manufacturing and high-value service sectors and increase the share of tradeable and manufactured goods in total exports, deepen regional value chains and improve the competitiveness and productivity of local economies in order to accelerate economic diversification and structural transformation in Central Africa.

Strategy

- 18.132 To contribute to the objective, the component will:
- (a) Support the operationalization and implementation of economic diversification strategies, visions and master plans, formulated in Cameroon, Chad, the Congo and Equatorial Guinea, and support the formulation of similar policies in other Central African countries, advocating a conducive business climate in Central Africa;
 - (b) Train United Nations country teams and member States in Central Africa on the use of the ECA integrated planning and reporting toolkit;
 - (c) Collect and collate market access information and trade opportunity data and provide advisory services and technical assistance to member States in translating their national AfCFTA strategies into specific and bankable projects, programmes and reforms, including targeted advisory services to support the agricultural and pharmaceutical sectors;
 - (d) Build on the Central Africa consensual transport master plan and support the subregion in the transformation of transport corridors into development corridors through the GIS-enabled spatial planning and hotspot analysis tool;
 - (e) Provide advisory services and technical assistance to member States, in collaboration with the ECA African Centre of Excellence on Digital Identity, Trade and Economy, related to ICT infrastructure and regulatory frameworks required for the digital transition, including support for the establishment of technology innovation centres in two selected countries, the development of electronic commerce and the implementation of digital identity systems in collaboration with subprogramme 4;
 - (f) Provide technical assistance to member States in Central Africa to ensure a focus on fiscal space for economic diversification and support the harmonization of trade instruments of the Economic Community of Central African States and the Central African Economic and Monetary Community, to inform the formulation of a consolidated industrial development and economic diversification master plan for Central Africa;

- (g) Provide technical assistance and advisory services to socialize the ECA macro model in Central Africa and train a critical mass of experts in relevant units concerning the administration of member States, including through dedicated courses provided through subprogramme 8, in close collaboration with the Debt Management Facility of the World Bank;
- (h) Strengthen collaboration with private sector bodies and develop a reform agenda conducive to triggering the changes needed to reach productivity and competitiveness targets in partnership with the private sector, subregional think tanks and regional economic communities;
- (i) Support the inclusion of pro-growth and pro-jobs policies in development strategies, supporting member States in making progress towards the Sustainable Development Goals and more specifically Goals 8, 9 and 12;
- (j) Provide analysis on the socioeconomic impact of COVID-19 on the economies of member States and propose policy measures aimed at strengthening the resilience of local economies to external shocks, including those caused by COVID-19-related trade and supply-side disruptions.

18.133 The above-mentioned work is expected to result in:

- (a) The emergence of regional value chains and industrial clusters and an expansion of the manufacturing and high-value service sectors;
- (b) An increase of the share of intra-Central African trade in the subregion's total trade;
- (c) Extensive integration of the relevant economic diversification-related goals and targets of the 2030 Agenda and Agenda 2063 in national development strategies and plans, common country analyses and United Nations sustainable development cooperation frameworks;
- (d) Increased integration of local economies in regional value chains in the framework of AfCFTA;
- (e) Increased productivity of local firms by better use of ICT;
- (f) A strengthened role of the private sector in economic diversification in Central Africa and the identification of policy and market failures.

Programme performance in 2021

Value chain development for economic diversification in Central Africa

18.134 Following the Democratic Republic of the Congo business forum on the topic “Fostering the development of a battery, electric vehicle and renewable energy industry value chain and market in Africa”, the Democratic Republic of the Congo Battery Council was established and special purpose vehicles were set up that will enable citizens and enterprises to invest in the development of battery precursor value chains and in related skills development. Several countries signed a comprehensive memorandum of understanding with the spectrum of actors from industry and public and civil society concerning value chain development and sourcing of raw materials for electric vehicle parts. The Democratic Republic of the Congo, a leader in global cobalt production, will join forces with countries that source copper, manganese and the other critical minerals necessary to create a robust supply and value chains and promote resource-driven industrialization. Other African countries involved in the initiative include Gabon, a supplier of raw materials for electric vehicles (nickel, manganese), and Zambia, with its sourcing of copper. While Morocco is already well-integrated in the global value chains of the automobile and aeronautics industries, it would benefit from being better integrated in intra-African value chain schemes in securing intermediate automotive parts. The component supported countries in signing the memorandum of understanding at the Africa-wide level, allowing countries to join forces to tap into the knowledge, expertise and technology they need to compete in the emerging clean-production driven electric vehicle manufacturing.

18.135 Progress towards the objective is presented in the performance measure below (see table 18.24).

Table 18.24
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	–	Following the Democratic Republic of the Congo business forum in 2021, stakeholders from Central African countries and other African regions sign the memorandum of understanding aimed at increasing Africa's share in the global manufacturing value added output for battery precursors and electric vehicles

Planned results for 2023

Result 1: switching from design to implementation of economic diversification strategies

Programme performance in 2021 and target for 2023

- 18.136 The component's work contributed to equip Cameroon with three models and tools for macroeconomic and trade planning, which met the planned target.
- 18.137 The component's work also contributed to a high level of investment in the non-oil sector in Cameroon, the Congo and the Democratic Republic of the Congo, made possible by bankable projects, with \$1 billion mobilized for projects in the Democratic Republic of the Congo, which met the planned target.
- 18.138 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 18.25).

Table 18.25
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Six out of seven countries covered by the component ratified the Agreement Establishing AfCFTA	Finalization and adoption of national AfCFTA strategies for Cameroon and the Congo	Central Africa equipped with a macro and trade model to secure fiscal space for economic diversification (3 models/tools: trade decision support model (TRADE-DSM), GIS-enabled hotspot analysis, and the integrated planning and reporting tool in Cameroon)	Central Africa equipped with bankable projects, innovative partnerships, initiatives and tools in support of economic diversification	Central Africa equipped with bankable projects, innovative partnerships, initiatives and tools in support of economic diversification
Finalization of a national economic diversification strategy for Chad	Submission of requests by Gabon and Equatorial Guinea for the establishment of innovation centres			2 bankable projects, initiatives and tools endorsed, launched or implemented with ECA support
Finalization of AfCFTA strategies for Cameroon and Chad	Recognition of the "Made in Central Africa" label as a major industrial policy tool for maximizing the benefits of AfCFTA	3 projects:		
Agreement signed by the Congo and Gabon to implement free roaming between the two countries		Development of a timber special economic zone in		

Part V Regional cooperation for development

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Capacity-building of 463 economic operators and representatives of public administrations on the procedure for the approval of industrial products for the preferential tariff of Central Africa	for Central African countries	<p>Bertoua, Cameroon, as part of the Kribi-Edea-Douala growth triangle development</p> <p>Development of nitrogen/phosphorus/potassium special economic zone in Pointe-Noire, the Congo</p> <p>Development of special economic zone for batteries and electric vehicles in the Democratic Republic of the Congo</p>		

Result 2: policy changes conducive to economic diversification in the context of building forward and building better from the socioeconomic impacts of the COVID-19 pandemic and the operationalization of AfCFTA

Programme performance in 2021 and target for 2023

- 18.139 The Component’s work contributed to intensive engagements in decision-making processes, namely: in Cameroon on timber and pharmaceutical industrial clusters and for the first strategic priority in Cameroon’s United Nations Development Cooperation Framework, 2022–2026; in Gabon on the mainstreaming of natural capital accounts in the national accounts; and in the Congo, within a call for a new social compact, resulting in three additional policy decisions aimed at harnessing economic diversification in Central Africa. This brought the cumulative number of policy changes to five, which exceeded the planned target of four policy changes adopted towards economic diversification and industrial development.
- 18.140 Progress towards the objective and the target for 2023 is presented in the performance measure below (see figure 18.XIX).

Figure 18.XIX
Performance measure: number of policy changes adopted towards economic diversification and industrial development (cumulative)

Result 3: strengthened capacity of member States to mobilize sustainable financing by mainstreaming natural capital in the national accounts

Proposed programme plan for 2023

18.141 In 2021, the component implemented a pilot project on strengthening natural capital accounting towards expanding fiscal space and mobilizing innovative finance for economic diversification in Gabon. A non-recurrent publication on natural capital and rebasing economic wealth in Central Africa was finalized and an ad hoc expert group meeting was held on the issue to share lessons with the entire Central Africa region. The subprogramme is expanding the activity to embrace other central African countries, to integrate the contribution of natural capital into national accounts and to engage in GDP rebasing. The rebased national accounts will be used to support resource mobilization for development, including sustainable financing (such as green bonds and climate change-related funds). The component plans to organize expert group meetings for policymakers and the private sector and to team up with academia to train the trainers and have a subregional critical mass of experts on the subject.

Lessons learned and planned change

18.142 The lesson for the component was that the strengthening of partnerships in and beyond the United Nations family and with both the public and private sectors in the delivery of programmes will yield huge benefits for member States and regional economic communities that wish to mobilize sustainable financing. In applying the lesson, the component will strengthen its partnership with African financial institutions to implement special economic zones and industrial clusters and promote sustainable economic diversification in Cameroon, the Congo and the Democratic Republic of the Congo. Furthermore, the component will establish partnerships with the African Export-Import Bank, the Arab Bank for Economic Development in Africa and AfDB and expand its work in Cameroon, the Congo, the Democratic Republic of the Congo and Gabon.

18.143 Expected progress towards the objective is presented in the performance measure below (see figure 18.XX)

Figure 18.XX

Performance measure: number of countries that applied natural capital accounting methods in rebasing their national accounts (cumulative)

Deliverables

18.144 Table 18.26 lists all deliverables of the component.

Table 18.26

Subprogramme 7, component 3: deliverables for the period 2021–2023, by category and subcategory

15. Policy brief on emerging issues in Central Africa	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services and high-level policy dialogues with Central African member States on the implementation and monitoring of economic diversification and AfCFTA strategies.				
D. Communication deliverables				
Outreach programmes, special events and information materials: brochures and knowledge products, press briefings, media visits, newsletters and press releases on achievements on economic diversification and change leadership in the subregion.				
Digital platforms and multimedia content: maintenance of websites, digital platforms and communities of practices on economic diversification, industrialization and the Sustainable Development Goals.				

Component 4

Subregional activities in East Africa

Objective

- 18.145 The objective, to which this component contributes, is to achieve deeper regional integration in East Africa by advancing the operationalization of AfCFTA, increasing intraregional investments, harnessing the blue economy and enhancing regional tourism.

Strategy

- 18.146 To contribute to the objective, the component will:
- (a) Intensify support to countries and regional economic communities for the effective implementation of their national and regional AfCFTA strategies, providing knowledge and capacity-building services and facilitating regional policy dialogue for the private and public sectors, intergovernmental bodies and regional economic communities on investment promotion, innovative sources of finance for SMEs and cost-effective trade logistics;
 - (b) Conduct AfCFTA-related impact assessments and surveys, including the AfCFTA country business index, to identify progress in the implementation of AfCFTA and identify bottlenecks and opportunities associated with stagnant levels of intraregional trade, including integration of post-pandemic recovery measures in national development planning;
 - (c) Conduct knowledge production and policy dialogue and provide technical assistance and capacity-building services to countries and regional economic communities to enhance their readiness for negotiations and arrangements to be made concerning the outstanding protocols and instruments of AfCFTA, including those on investments, competition, property rights, electronic commerce and gender equality;
 - (d) Promote the development of regional value chains through studies, policy dialogue and technical assistance for the creation or operationalization of commodity exchanges and markets and special economic zones;
 - (e) In collaboration with subprogrammes 4, 5 and 8, develop and apply collected data and analytical tools to assess the socioeconomic and environmental potential of blue economy resources of member States;
 - (f) Convene a subregional forum to raise awareness on various issues in the area of the blue economy, including the threat of maritime insecurity and its related effects on the costs of transport, logistics and trade and the exploitation of waterways such as lakes and rivers to enhance the movement of goods between countries, and develop the potential of the blue economy to diversify goods and services and promote AfCFTA, notably in that regard multisectoral approaches to fisheries, maritime transport, management of freshwater resources, tourism, deep-sea mining and women's access to natural resources, contributing to the progress of member States towards Goals 5, 6, 13, 14 and 17;
 - (g) Support capacity-building of youth in the development of bankable and impactful projects in the area of the blue economy;
 - (h) Support the implementation of guidelines for urban tourism, in line with the recommendations set out in the African tourism strategy, and provide training for member States and regional economic communities on the production of high-quality tourism statistics in the subregion, in partnership with subprogrammes 4 and 9, the World Tourism Organization and the World Bank;
 - (i) Develop tourism satellite accounts in two more countries in 2023 and hold consultative and validation meetings with relevant tourism bodies and regional economic communities on building the resilience of the tourism sector against external shocks such as COVID-19,

including through cultural tourism products and sustainable employment opportunities for women and young people. This work will contribute to the progress of member States towards Goals 5, 8, 11 and 12.

- 18.147 The above-mentioned work is expected to result in:
- (a) Higher levels of intraregional trade in goods and services;
 - (b) Harmonization of investment regimes and promotion strategies and improved regulatory frameworks for investment;
 - (c) Enhanced incorporation of blue economy policies and strategies into national development planning frameworks;
 - (d) Deeper regional integration through the sustainable management of transboundary water resources and the improved connectivity of landlocked countries;
 - (e) Standardized methodologies for tourism data collection and analysis in the subregion;
 - (f) Increased diversification potential and economic resilience to external shocks, in particular of the tourism sector, with a view to building economies in the post-COVID-19 pandemic era through operationalization of AfCFTA.

Programme performance in 2021

Adoption of national development plans in response to the COVID-19 pandemic

18.148 The outbreak of the COVID-19 pandemic in early 2020 triggered a health and socioeconomic emergency and, at the time, existing national development plans could not mitigate its negative impacts on the countries' economies. The component assisted member States to understand the effect of COVID-19 on their economies through pandemic-related impact assessments. The impact assessment reports recommended that member States consider developing new national response and recovery plans to consider the socioeconomic effects of COVID-19 and to promote the needed rapid resumption of growth. In line with the above, the component assisted in the formulation of Djibouti's national development plan for 2020–2024. In collaboration with other subprogrammes, the component supported Djibouti with analysis to assess its macroeconomic framework, explore ways of expanding the fiscal space that had been hit by COVID-19 and identify policy reforms that would improve the performance of State-owned enterprises and enhance capacities for domestic resource mobilization. Furthermore, Djibouti was supported in the integration of inputs, such as inclusion through economic diversification, job creation, connectivity through regional integration and institutional development, in assessing the potential of the blue economy and in the costing of the plan.

18.149 Progress towards the attainment of the objective is presented in the performance measure below (see table 18.27).

Table 18.27
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	Strengthened national capacities and technical support provided in the analysis of the macroeconomic framework, debt sustainability and suitable reforms for State-owned enterprises, with a view to improving and widening the fiscal space, especially in the context of	Djibouti formulated and adopted its national development plan for 2020–2024, which integrated strategically important impact assessments related to the pandemic

2019 (actual)

2020 (actual)

2021 (actual)

COVID-19, thereby improving financing prospects for the national development plan and fostering recovery and sustainable development

Planned results for 2023

Result 1: harnessing deeper regional integration in Africa

Programme performance in 2021 and target for 2023

18.150 The component’s work contributed to 10 countries (Burundi, Democratic Republic of the Congo, Djibouti, Ethiopia, Kenya, Rwanda, Somalia, Uganda, Seychelles and the United Republic of Tanzania) ratifying AfCFTA, which exceeded the planned target of eight countries.

18.151 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 18.XXI).

Figure 18.XXI

Performance measure: number of ratifications of the Agreement Establishing the African Continental Free Trade Area (cumulative)

Result 2: strengthened capacity of member States to harness the potential of the blue economy, including tourism, within AfCFTA

Programme performance in 2021 and target for 2023

18.152 The component’s work contributed to developing 11 policy frameworks and tools in the area of the blue economy, which did not meet the planned target of 13 policy frameworks and tools developed by member States. The target was not met owing to the adverse impact of COVID-19-related restrictions on travel, which limited the component’s ability to conduct in-person interventions and capacity-building in targeted countries.

18.153 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 18.28).

Table 18.28
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Four policy and dialogue platforms on subregional development priorities, such as regional integration and trade, the blue economy and tourism	Nine policy frameworks and tools developed by member States on the blue economy One country (Seychelles) finalized draft tourism satellite accounts (awaiting government approval)	Eleven policy frameworks and tools developed by member States on the blue economy Two member States (Kenya and the United Republic of Tanzania (Zanzibar)) finalized tourism satellite accounts	At least two additional member States implement subregional initiatives in the area of the blue economy	An additional three member States implement subregional initiatives in the area of the blue economy

Result 3: enhanced capacity of member States to design and implement policy frameworks on trade, the blue economy and tourism

Proposed programme plan for 2023

18.154 Trade, the blue economy and tourism are economic sectors that attracted more attention and interest in 2021, owing to their potential and their role in the recovery from the COVID-19 pandemic. The component supported knowledge generation on trade, the blue economy and tourism for member States to contribute to the identification of diversification strategies that can be adopted to strengthen trade and investment.

Lessons learned and planned change

18.155 The lesson learned for the component was the need to use a more comprehensive modality for the technical assistance provided to member States and regional economic communities to apply the policy frameworks and tools already developed to create more economic opportunities to mitigate the impact of COVID-19. In response, the component will focus on assisting member States and regional economic communities to implement their national trade strategies for AfCFTA and diversify their blue economy activities through conducting workshops, market access studies and dedicated capacity-building activities, in addition to providing knowledge production and policy dialogues for both the private and public sectors. In applying the lesson, the component will strengthen strategic collaboration and partnerships with United Nations country teams and external policy think tanks and shift from in-person to virtual mechanisms to ensure that the approach provides agile and sustainable technical support. In addition, the component will support countries in the development and implementation of policies and strategies and in the application of the frameworks and tools developed in 2021.

18.156 Expected progress towards the objective is presented in the performance measure below (see table 18.29)

Table 18.29
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	Two member States with enhanced capacity to design policy frameworks in the areas of trade, the blue economy and tourism	One additional member State with enhanced capacity to design policy frameworks in trade, the blue economy or tourism Two member States implemented policy and strategy frameworks in trade, the blue economy or tourism	Two additional member States implemented policy and strategy frameworks in trade, the blue economy or tourism

Deliverables

18.157 Table 18.30 lists all deliverables of the component.

Table 18.30
Subprogramme 7, component 4: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	2	2	2	2
1. Documentation for the Intergovernmental Committee of Senior Officials and Experts for East Africa	2	2	2	2
Substantive services for meetings (number of three-hour meetings)	8	8	8	8
2. Session of the Intergovernmental Committee of Senior Officials and Experts for East Africa	8	8	8	8
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	1	3	5
3. On trade in services and emergence of regional value chains	1	1	1	1
4. On e-commerce opportunities and challenges in East Africa	–	–	–	1
5. On urban tourism and the blue economy in East Africa	–	–	1	2
6. Fellowship programme for young African economists to build their capacity in the area of regional integration and trade	1	–	1	1
Seminars, workshops and training events (number of days)	10	12	10	33
7. Seminars on regional integration, trade and AfCFTA in East Africa	5	5	5	5
8. Workshops on trade, investment, competition, gender equality and women's empowerment and e-commerce in East Africa	–	–	1	1
9. Workshops on commodity exchanges, deepening of regional value chains and role of trade corridors to foster AfCFTA in East Africa	–	–	–	2
10. Workshop on competition and intellectual property rights policies and regulatory advances in East Africa	–	–	–	3

Part V Regional cooperation for development

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
11. Workshops on AfCFTA and its opportunities and challenges for women and youth in East Africa	–	–	–	2
12. Workshops on Islamic financing and sustainable financing	–	–	–	2
13. Workshops on access to financing investments: financial technology and the role of cryptocurrencies for regional investment	–	–	–	3
14. Workshops on social cohesion and linkages between development and humanitarian assistance	1	–	1	3
15. Workshop on e-commerce opportunities and challenges in East Africa	–	–	–	3
16. Workshops on ocean economy policy experiences from East Africa	2	2	1	4
17. Workshops on tourism satellite accounts in East Africa	1	4	1	4
18. Training event on strategies to enhance the services trade in East Africa	1	1	1	1
Publications (number of publications)	4	5	5	5
19. Subregional profile	1	1	1	1
20. On the regional integration and operationalization of AfCFTA in East Africa	1	–	1	1
21. On social cohesion in the context of open regionalism	–	1	–	–
22. On ocean economy policy experiences from East Africa	1	1	1	1
23. On tourism satellite accounts in East Africa	1	1	1	1
24. On strategies to enhance the trade in services and investment in East Africa	–	1	1	1
Technical materials (number of materials)	3	3	3	3
25. On priority socioeconomic development issues in East Africa	3	3	3	3

C. Substantive deliverables

Consultation, advice and advocacy: advisory services to all 14 member States in the subregion on implementation of the Agreement Establishing AfCFTA, inclusive growth and economic and social transformation through inter-agency coordination.

D. Communication deliverables

Outreach programmes, special events and information materials: quarterly booklets, pamphlets, fact sheets, wallcharts and information kits and videos to reach all 14 countries in the subregion.

External and media relations: quarterly engagements with national and regional media outlets (written blogs and interviews targeting 14 countries); and electronic briefs and press releases on major activities of the Subregional Office for East Africa, including regional updates to reach all 14 countries in the subregion.

Digital platforms and multimedia content: monthly web-based information bulletins on global outreach.

Component 5 Subregional activities in Southern Africa

Objective

- 18.158 The objective, to which this component contributes, is to deepen regional integration and strengthen capacities to achieve inclusive industrialization for the reduction of poverty and inequality in Southern Africa.

Strategy

- 18.159 To contribute to the objective, the component will:
- (a) Provide technical support and expert advisory services to the Southern African Development Community (SADC), COMESA and member States and their private sectors to strengthen their capacities to advance inclusive industrialization and regional integration through

implementation of the SADC industrialization strategy and road map (2015–2063) and the COMESA industrial policy (2015–2030) and their alignment with national industrialization policies, in collaboration with the United Nations Industrial Development Organization, UNCTAD, the Food and Agriculture Organization of the United Nations, resident coordinator offices, AfDB and private sector associations, universities and research institutions;

- (b) Undertake policy research and analysis on inclusive industrialization, regional integration and trade, private sector development, and poverty and inequality, provide technical assistance to member States, regional economic communities and intergovernmental organizations and disseminate best practices at the subregional and national levels in Southern Africa;
- (c) Develop and disseminate policy tools and guidelines to promote industrialization, including value addition, manufacturing and value chain development, at the national and subregional levels in Southern Africa, contributing to the achievement of Sustainable Development Goal 9;
- (d) Support SADC in the implementation of the new strategic vision for Southern Africa (Vision 2050) and its 10-year strategic plan and the SADC regional indicative strategic development plan for 2020–2030, contributing to the progress of member States towards the achievement of Goals 9, 1 and 10;
- (e) Collaborate with subregional entities and partners such as the SADC and COMESA Business Councils in engaging with the private sector, including MSMEs, through leveraging digitalization, science, technology and innovation to facilitate business development and enhance productivity and competitiveness;
- (f) Contribute to the creation of institutional and learning support structures and tools to assist MSMEs to harness innovative approaches to promote their competitiveness and ensure the growth of the private sector in the subregion;
- (g) Provide continued technical support to the regional economic communities and member States on AfCFTA in facilitating national consultations and awareness-raising on the free trade area process, ratification of the Agreement Establishing AfCFTA and developing and implementing AfCFTA national and subregional strategies, thereby contributing to the progress of member States towards the attainment of Goals 1 and 10;
- (h) Build the capacities of member States and the private sector to address the impact of COVID-19 by rolling out initiatives aimed at supporting the recovery from the pandemic and the resurgence of MSMEs and strengthening their resilience to future shocks.

18.160 The above-mentioned work is expected to result in:

- (a) Implementation of the SADC industrialization strategy and road map and the COMESA industrial policy to enhance the capacities of MSMEs by digital information-sharing and exchange among entrepreneurs, trade and enterprise support agencies and policymakers;
- (b) Development of transboundary industrial clusters and special economic zones in selected member States, such as the common industrial park between Zambia and Zimbabwe;
- (c) Creation of a harmonized and enabling policy environment at the subregional and national levels to anchor the promotion of self-sustained and balanced growth, diversification of the manufacturing base and an improvement in industry competitiveness with matured regional commodity value chains;
- (d) Increased resilience and competitiveness of MSMEs through leveraging of science, technology and innovative approaches that address the impacts of the COVID-19 pandemic and other future external shocks;
- (e) Increased intraregional trade in goods and services, including enhanced regional integration and intraregional trade in Southern Africa.

Programme performance in 2021

Enhanced digital capacity of micro-, small and medium-sized enterprises in Southern Africa

18.161 Digital technologies have the potential to enable MSMEs in Southern Africa to expand their national, regional and international market reach, facilitating economic growth and job creation, and to support MSMEs to address the impacts of COVID-19 and similar shocks. To enhance the capacities of MSMEs, the component designed and deployed a digital platform on technology and innovation for MSMEs in Southern Africa. This was done in partnership with the SADC Business Council, a subregional apex body for the private sector that represents national and regional apex business associations of the 16 SADC member States. The platform supports the creation of a regional network and community of technology and innovation for MSMEs, entrepreneurs, practitioners and policymakers. It will enhance technology and innovation learning, facilitate uptake of appropriate technologies that improve agility and productivity and improve MSME resilience and competitiveness during and beyond COVID-19, facilitating the inclusive industrialization agenda. The platform will become fully functional and operational in 2023 and will be linked to other national innovation and trade platforms to be developed between 2022 and 2023 under the United Nations Development Account thirteenth tranche of projects, targeting six beneficiary countries. Furthermore, the component delivered an online training course on technology and innovation for African businesses, followed by a webinar on the role of technology and innovation for MSMEs in Southern Africa. The courses equipped participants with knowledge on the use of technology and innovation in addressing the impacts of COVID-19 and enhancing competitiveness and MSME resilience to future shocks.

18.162 Progress towards the objective is presented in the performance measure below (see table 18.31)

Table 18.31

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	–	MSMEs in Southern Africa have access to a digital platform on technology and innovation

Planned results for 2023

Result 1: from policy to action: deepened industrialization in Southern Africa

Programme performance in 2021 and target for 2023

18.163 The component's work contributed to two additional member States, Malawi and Zimbabwe, that have developed their costed national action plans on industrial policy harmonization and aligned their national industrialization frameworks with the SADC industrialization strategy and road map with ECA support, bringing the total number of member States from four to six, which met the planned cumulative target of six Southern African countries that developed or aligned the SADC industrialization strategy and road map in national frameworks.

18.164 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 18.XXII).

Figure 18.XXII

Performance measure: number of Southern African countries that incorporate key elements of the SADC industrialization strategy and road map (cumulative)

Result 2: inclusive industrialization in Southern Africa through private sector development

Programme performance in 2021 and target for 2023

18.165 The component's work contributed to one additional member State, Eswatini, that developed its national financing model for MSMEs and a national action plan to guide implementation, which did not meet the planned target of three additional member States that have developed initiatives aimed at promoting the integration of MSMEs in the inclusive industrialization and trade agenda. The target was not met, especially for member States with Internet and connectivity challenges, owing to COVID-19-related travel restrictions, which limited the component's ability to organize in-person capacity development activities. In response to recent developments, the component's work will evolve to increase the focus on integration in Southern Africa.

18.166 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 18.XXIII).

Figure 18.XXIII

Performance measure: number of member States that have developed initiatives aimed at promoting the integration of micro-, small and medium-sized enterprises in the inclusive industrialization agenda (cumulative)

Result 3: accelerating intraregional trade through AfCFTA in Southern Africa**Proposed programme plan for 2023**

18.167 Intraregional trade is a key component for deepening regional integration and achieving sustainable development in Southern Africa. The roll-out of AfCFTA supports national and regional efforts towards integrated regional markets and regional value chains, facilitating development gains. The component provided support to member States in the subregion in ratifying the Agreement Establishing AfCFTA and in developing national implementation strategies. As of 2021, all beneficiary countries, except for Botswana and Mozambique, had ratified the Agreement. By the same date, Malawi, Namibia, Zambia and Zimbabwe had completed and validated their national implementation strategies.

Lessons learned and planned change

18.168 The lesson for the component was that adequate consultations with Governments and all relevant stakeholders, including the regional economic communities and the private sector, were critical for AfCFTA-related strategy formulation and implementation. A regional integration lens will allow for a broader developmental perspective that promotes coordinated and integrated implementation and the development of regional value chains that include social and environmental dimensions. In applying the lesson, the component will undertake further consultations with relevant national stakeholders, including MSMEs, and regional economic communities for increased buy-in and sustainability of strategies. Furthermore, the component will enhance its AfCFTA strategy development-related interventions by building on the experiences of SADC, COMESA and the tripartite (SADC-COMESA-East African Community) free trade agreements.

18.169 Expected progress towards the objective is presented in the performance measure below (see figure 18.XXIV)

Figure 18.XXIV

Performance measure: number of countries in Southern Africa that have developed and started implementation of national AfCFTA strategies (cumulative)

Deliverables

18.170 Table 18.32 lists all deliverables of the component.

Table 18.32

Subprogramme 7, component 5: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	2	4	4	4
1. Annual report on the work of ECA in Southern Africa	1	1	1	1
2. Report to the Intergovernmental Committee of Senior Officials and Experts for Southern Africa	1	1	1	1
3. Report on key economic and social developments and prospects for regional integration in Southern Africa	–	1	1	1
4. Progress report on regional and international agendas and other special initiatives in Southern Africa	–	1	1	1
Substantive services for meetings (number of three-hour meetings)	8	8	8	8
5. Annual session of the Intergovernmental Committee of Senior Officials and Experts for Southern Africa	8	8	8	8
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	2	2	2
6. On industrialization and regional integration in Southern Africa	1	1	1	1

Seminars, workshops and training events (number of days)	5	5	6	6
8. Training event on regional integration in Southern Africa	3	3	2	2
9. Workshop on economic and social development in Southern Africa	2	2	2	2
10. Training event on inclusive industrialization and regional integration	–	–	2	2
Publications (number of publications)	2	2	2	2
11. On regional integration in Southern Africa	1	1	1	1
12. On industrialization in Southern Africa	1	1	1	1
Technical materials (number of materials)	2	2	2	2
13. On industrialization and economic transformation in Southern Africa	1	1	1	1
14. On economic and social development	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services, including technical knowledge, upon request by member States, regional economic communities and intergovernmental organizations, on inclusive industrialization and regional integration and operationalization of AfCFTA, and consultation and advice for the work of 11 United Nations country teams in Southern Africa (in Angola, Botswana, Eswatini, Lesotho, Malawi, Mauritius, Mozambique, Namibia, South Africa, Zambia and Zimbabwe) covered by the component (Subregional Office for Southern Africa).				
Databases and substantive digital materials: database on economic and social statistics.				
D. Communication deliverables				
Outreach programmes, special events and information material: events and quarterly electronic newsletters on inclusive industrialization and regional integration.				
Digital platforms and multimedia content: web-based information, content for social media accounts and communities of practice.				

Subprogramme 8

Economic development and planning

Objective

- 18.171 The objective, to which this subprogramme contributes, is to strengthen African countries' development planning and to improve their capacity to formulate and manage effective public sector policies for structural transformation and sustainable development.

Strategy

- 18.172 To contribute to the objective, the subprogramme will:
- (a) Continue delivering face-to-face and online training based on enriched content on sectoral, national and regional development and medium to long-term planning to deal with the socioeconomic impact of the COVID-19 pandemic, based on updated content on economic and social policy formulation and management;
 - (b) Continue to promote peer learning and collaboration among African development planners through a community of practice and provide wide access to its digitized knowledge repository on the evolution of development planning in Africa and through policy briefs and research papers;
 - (c) In cooperation with resident coordinator offices, other subprogrammes and components and external partners, enhance countries' capacity to monitor and evaluate the implementation of the 2030 Agenda and Agenda 2063 using the integrated planning and reporting toolkit developed by ECA, assisting member States in making progress towards the achievement of the Sustainable Development Goals, with a focus on Goals 1, 5, 8 and 17;
 - (d) Foster knowledge generation, cross-fertilization and knowledge-sharing through research products, fellowship programmes, development seminars and high-level policy dialogues;
 - (e) Continue to emphasize the mainstreaming of a gender perspective and youth-related issues in all relevant public policies through the identification of relevant courses in which gender equality and youth-related content, such as entrepreneurship, employment, a green economy in the context of sustainable development and poverty eradication, innovation and digital transformation, will be included, contributing to the progress of member States in achieving Goals 7 and 8;
 - (f) Stemming from the impact of COVID-19 on country planning processes, a risk management dimension will be integrated into capacity-building and research programmes.
- 18.173 The above-mentioned work is expected to result in:
- (a) Development planners being better informed and equipped to effect cross-cutting COVID-19-responsive development planning processes, in support of structural transformation;
 - (b) Enhanced competence of professional planners and policymakers in mainstreaming the COVID-19 context and risk in policy management and development planning, strengthening the inclusiveness of economies and their resilience to shocks;
 - (c) Officials and other stakeholders being capable of more effectively formulating, managing and influencing public policies;
 - (d) More inclusive approaches to the formulation of development policies by Member States.

Programme performance in 2021

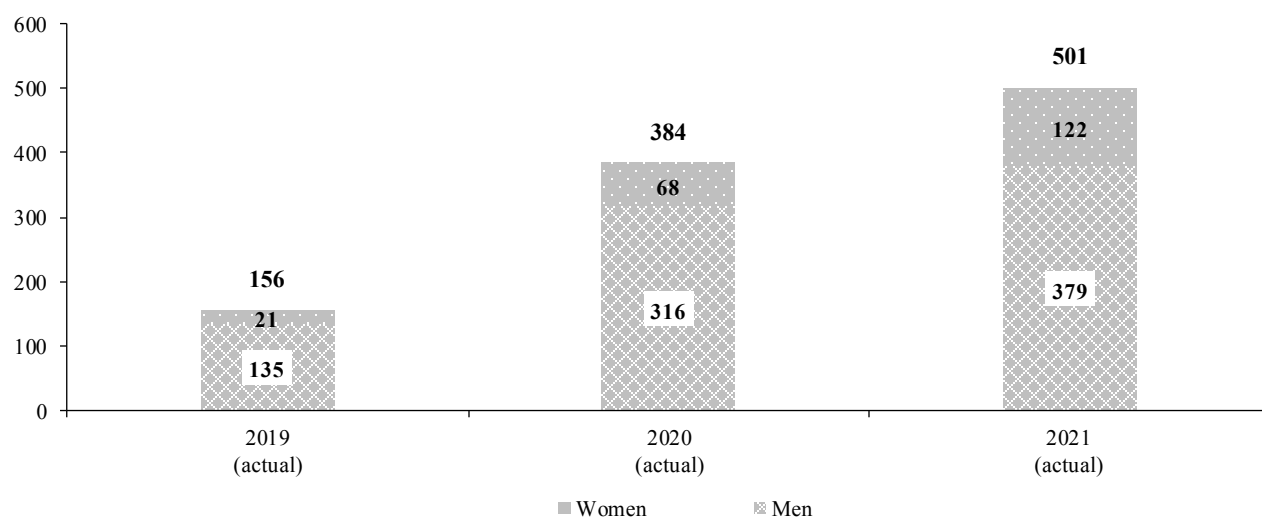

Strengthened capacity of member States in macroeconomic and socioeconomic policy development for COVID-19 response and recovery

18.174 The COVID-19 pandemic severely affected the economic development of member States by reducing GDP and increasing interest rates. This situation contributed to debt distress, exacerbated by damped trade, volatile commodity prices and macroeconomic uncertainty. To alleviate this socioeconomic condition, the subprogramme strengthened the capacity of 501 government officials and policymakers (including 122 women) on macroeconomic-related issues. This was achieved through eight courses, three webinars and a community of practice session (involving 15 countries), focused on how to mitigate the pandemic impacts and stimulate member States' economic growth. The training encompassed topics such as the macroeconomic framework for an inclusive green economy amid the new COVID-19 wave. In collaboration with the Open Society Initiative for West Africa, the subprogramme gathered information on member States' economic response in the production of five case studies on debt management and fiscal policies, with a focus on the macroeconomic situation in the aftermath of the first COVID-19 outbreak. Training programmes at the African Institute for Economic Development and Planning in 2021 resulted in 75 per cent of public officials attesting, with concrete evidence, to have utilized the knowledge, skills and tools they attained to positively influence socioeconomic policy in their respective countries. Finally, a special initiative, the Young Economists Network, was launched involving 744 Master's or doctorate students in 70 universities from 27 countries.

18.175 Progress towards the objective is presented in the performance measure below (see figure 18.XXV).

Figure 18.XXV

Performance measure: beneficiaries with increased capacity in macroeconomic policy analysis, modelling and planning (cumulative)

Planned results for 2023

Result 1: improved public sector management and development planning

Programme performance in 2021 and target for 2023

- 18.176 The subprogramme's work contributed to 441 experts having strengthened their capacities in public policy formulation through analytical research activities and the delivery of 40 online training programmes leading to building the capacity of 3,029 officials (946 women), which exceeded the planned target of 3,000 trainees (800 women).
- 18.177 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 18.XXVI).

Figure 18.XXVI

Performance measure: number of trainees acquiring knowledge and skills through training at the African Institute for Economic Development and Planning in public policy formulation (annual)

Result 2: enhanced capacity of professional planners and policymakers for more inclusive and resilient economies

Programme performance in 2021 and target for 2023

- 18.178 The subprogramme's work contributed to the development of five national policies, in Botswana, Burkina Faso, the Central African Republic, the Comoros and Madagascar, directed towards building more inclusive and resilient economies by member States, which met the planned target.
- 18.179 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 18.XXVII).

Figure 18.XXVII

Performance measure: number of policies developed by member States directed towards building more inclusive and resilient economies (cumulative)

Result 3: strengthened capacity of member States for mainstreaming risk management into policy planning and development

Proposed programme plan for 2023

- 18.180 The emergency caused by the COVID-19 pandemic has revealed the vulnerability and deficiency in the design of policy management and development planning. Emergency responses across the world have led to drastic changes in local and global development trajectories within a very short period. Yet how these changes will take shape in the future depend on underlying historical and socioeconomic forces. In this context, it is essential to make investment decisions based on a risk analysis that contributes to appropriate decisions and to consider the effects of uncertainty on development planning and strategic objectives. Therefore, the subprogramme decided to integrate risk management into its training and research activities to provide planners with innovative approaches to design and mainstream sustainable risk management frameworks in policy planning and development. These activities will strengthen member States' capacity to craft and implement enhanced processes for understanding risk and mitigating outcomes that may change owing to impacts of risk events such as global health threats and climate disasters. They will serve as drivers of risk resilience mainstreaming in strategic policy planning and the design and implementation of risk reduction programmes essential to achieving the Sustainable Development Goals.

Lessons learned and planned change

- 18.181 The lesson for the subprogramme was that countries' economic performance has drastically suffered owing to COVID-19. The pandemic has highlighted the urgency to address risks within development planning and to create a conducive environment for mainstreaming. In applying the lesson, the subprogramme will, in consultation with member States, continue in 2023 to design and deliver training and research programmes in the areas of risk management and risk mainstreaming in development planning processes. These activities will enhance and develop the practical knowledge and skills of officials to reduce gaps in understanding around risk analysis, explore mainstreaming incentives and bottlenecks, analyse the full spectrum of societal, geopolitical and environmental risk and technological impacts on countries' macroeconomy, and operationalize the risks within new or existing development planning frameworks. In addition, they will support the implementation of procedures to reduce vulnerability, treating risk reduction agendas as an integral part of national development planning processes rather than being overlooked for the benefit of other issues.
- 18.182 Expected progress towards the objective is presented in the performance measure below (see figure 18.XXVIII)

Figure 18.XXVIII

Performance measure: policies developed by member States that include integrated risk management (cumulative)

Deliverables

18.183 Table 18.33 lists all deliverables of the subprogramme.

Table 18.33

Section 18 Economic and social development in Africa

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
Seminars, workshops and training events (number of days)	16	16	20	20
9. Seminars on various aspects of development planning and economic management to build the capacity of African senior policymakers through mutual learning and knowledge exchange	10	10	12	12
10. Workshops on curriculum development, gathering experts to develop new training courses addressing the deduced and expressed capacity development needs of Member States	6	6	8	8
Publications (number of publications)	2	1	4	4
11. On economic management and development planning	2	1	4	4
Technical materials (number of materials)	45	41	34	27
12. On economic management and development planning	35	27	24	12
13. On development planning and economic management for use in self-paced distance learning uploaded to classified knowledge repositories	10	14	10	15
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services to five member States and three regional economic communities on economic management, development planning and capacity-building; field visits will allow an evaluation of the impact of the classroom learning in areas such as industrialization, transport and infrastructure, agriculture, mining and natural resources management and tourism, in collaboration with subprogrammes concerned and the United Nations system.				
Databases and substantive digital materials: two communities of practice for African development planners.				
D. Communication deliverables				
Outreach programmes, special events and information materials: high-level policy dialogues involving policymakers, the private sector and subject-matter experts to debate various issues pertaining to African economic development and planning, with particular emphasis on those related to the 2030 Agenda.				
External outreach and media relations: information kit for the African Institute for Economic Development and Planning comprising a strategic plan, training brochures, booklets, leaflets, kakemonos, banners and assorted accessories.				
Library services: books, journals and other library materials on economic management and development planning in French and English.				

Subprogramme 9 Poverty, inequality and social policy

Objective

- 18.184 The objective, to which this subprogramme contributes, is to eradicate extreme poverty and reduce inequality through member States having improved policies and strategies for social investment and productive urban job creation.

Strategy

- 18.185 To contribute to the objective, the subprogramme will:
- (a) Develop analytical knowledge and provide technical assistance for improving member States' capacities in designing national policies and strategies for eradication of extreme poverty, protection of the economically vulnerable and reduction of inequalities with a focus on health, social protection, population and development and migration;
 - (b) Provide technical assistance, organize regional dialogue and foster learning on strategies that promote inclusion and equitable development in Africa;

- (c) Develop analytical knowledge and provide technical assistance to member States in the implementation and appraisal of the Global Compact for Safe, Orderly and Regular Migration, the Madrid International Plan of Action on Ageing, 2002, the Programme of Action of the International Conference on Population and Development, the Addis Ababa Declaration on Population and Development in Africa beyond 2014 and the New Urban Agenda;
- (d) Develop the knowledge of member States, provide technical assistance and facilitate regional policy learning and dialogue related to urban job creation, development of urban strategies and investment frameworks and economic resilience strategies, helping member States to make progress towards Sustainable Development Goal 11;
- (e) Provide technical assistance in measuring and monitoring urbanization dynamics in partnership with the African Union Commission, UN-Habitat, AfDB and the organization United Cities and Local Governments of Africa.

18.186 The above-mentioned work is expected to result in:

- (a) Enhanced, evidence-based policy options for poverty eradication, protection of the economically vulnerable and reduction in inequality;
- (b) Strengthened responses by member States to address poverty, inequalities, migration and population and development;
- (c) Increased prioritization of productive urban job creation in national development planning, with a view to eradicating extreme poverty and reducing inequality;
- (d) Enhanced measurement and monitoring of urbanization dynamics by member States;
- (e) Improved economic and financial recovery and resilience in African countries.

Programme performance in 2021

Strengthened national capacities for developing and implementing targeted social policies to respond to COVID-19

18.187 The COVID-19 pandemic had devastating impacts in Africa, slowing economic growth, disrupting businesses and employment and pushing millions into extreme poverty, thus reversing more than two decades of progress in poverty reduction. The subprogramme analysed the features of vulnerability exposed by COVID-19 and developed analytical and diagnostic policy tools for member States’ responses to recover and build improved resilience. These tools were applied in five member States’ policy formulation processes.

18.188 Progress towards the objective is presented in the performance measure below (see table 18.34).

Table 18.34
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 Actual</i>
–	–	Five member States (Chad, Kenya, Mauritania, Mozambique and Nigeria) formulated inclusive social policies with strengthened national capacities to formulate such policies through the production of policy tools for interactive engagement with national policymakers

Planned results for 2023

Result 1: adoption of urban frameworks for urban job creation in Africa

Programme performance in 2021 and target for 2023

- 18.189 The subprogramme's work contributed to the formulation of an urban strategy and investment framework for national development planning, integration of urban job priorities in national development and industrial plans and urban economic recovery and resilience strategies in seven member States (Cameroon (Yaoundé), Chad, Djibouti, Ethiopia, Ghana (Accra), Uganda, and Zimbabwe (Harare)), which exceeded the planned target of formulating urban strategies and investment frameworks for national development planning.
- 18.190 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 18.35).

Table 18.35

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Countries adopt African priorities for the implementation of the New Urban Agenda through the Specialized Technical Committee on Public Service, Local Government, Urban Development and Decentralization	Strengthened capacities of six national and local governments in the design, implementation and monitoring of urban strategies for national development planning and attainment of the Sustainable Development Goals	Formulation of an urban strategy and investment framework, including their integration into national development planning in seven member States at the national and local levels	Strengthened capacities of five member States to design strategies for accelerated urban job creation in the context of national development planning	Improved knowledge and capacities of four additional member States to design strategies that leverage the economic and financial potential of urbanization for job creation

Result 2: increased national capacities to design inclusive policies

Programme performance in 2021 and target for 2023

- 18.191 The subprogramme contributed to improved knowledge and skills of five member States using tools to design inclusive social policies for reducing risk and vulnerability, which exceeded the planned target of four States.
- 18.192 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 18.XXIX).

Figure 18.XXIX

Performance measure: number of member States that used tools to design inclusive social policies for reducing risk and vulnerability (cumulative)

Result 3: enhanced capacity of member States to leverage continental initiatives for promoting youth policies

Proposed programme plan for 2023

18.193 The vulnerabilities exposed by COVID-19 have been particularly severe for young people without social protection and who are informally employed. The subprogramme built on its analytical work on youth policies and youth employment with a focus on accelerating productive job creation and leveraging continental initiatives such as AfCFTA.

Lessons learned and planned change

18.194 The lesson learned for the subprogramme was that it needed to increase internal capacity on the thematic area of youth and youth policies and align it to the member States’ need for renewed analytical and innovative responses to address the persistent and growing youth employment challenge in Africa. In applying the lesson, the subprogramme will develop specific youth programmes, including on aspects of social protection, skill development and employment creation options. The analytical work will be deepened through leveraging continental initiatives for improved job creation and inclusive social policies through engagement with resident coordinator offices, contributing to the production of policy diagnostic tools and enhancing the capacity of member States’ policymakers.

18.195 Expected progress towards the objective is presented in the performance measure below (see figure 18.XXX).

Figure 18.XXX

Performance measure: number of countries with increased capacity in designing youth policies that leverage continental initiatives (cumulative)

Deliverables

18.196 Table 18.36 lists all deliverables of the subprogramme.

Table 18.36

Subprogramme 9: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	–	1
1. Report to the Committee on Social Policy, Poverty and Gender	1	1	–	1
Substantive services for meetings (number of three-hour meetings)	4	4	–	4
2. Meetings of the Committee on Gender, Poverty and Social Policy	4	4	–	4
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	3	5	3
3. On urbanization and development to build the capacity of national policymakers	1	2	2	1
4. On social policy in Africa to enhance the capacities of policymakers in selected countries	1	1	2	1
5. Fellowship programme for young African scholars to build their capacity in the demographic dividend, employment, urbanization and migration	–	–	1	1
Seminars, workshops and training events (number of days)	12	12	13	11
6. Workshops on urbanization and development to build the policy capacity of member States	6	6	4	4
7. Workshop on peace and security in Africa in the context of the concept of “human security” in accordance with General Assembly resolution 66/290	–	–	1	1
8. Workshops on social policies and policy dialogues for national policymakers in selected countries	6	6	8	6
Publications (number of publications)	4	4	5	6
9. African Social Development Report	1	1	–	1
10. On the state of urbanization in Africa for evidence-based policymaking	1	1	1	1
11. On strategies to reduce the poverty gap in Africa	1	1	1	–
12. On the Africa Human Security Index (qualitative and quantitative)	–	–	–	1
13. On international migration in Africa	–	–	1	–
14. Africa Migration Report	1	1	–	1
15. Regional report on the Madrid International Plan of Action on Ageing	–	–	1	1
16. Regional report on the International Conference on Population and Development	–	–	1	1
Technical materials (number of materials)	2	2	3	3
17. On better monitoring of urbanization dynamics	–	–	1	1
18. On urbanization to raise awareness of African policymakers	1	1	1	–
19. On security and development in Africa in the context of the concept of “human security” in accordance with General Assembly resolution 66/290	–	–	–	1
20. On poverty and inequality	1	1	1	1

C. Substantive deliverables

Consultation, advice and advocacy: knowledge products and improved data and statistics for evidence-based policies, strategies and investment to national policymakers in selected member States; advice for improved capacities in policy formulation, implementation and monitoring; policy dialogues for enhanced policy learning and exchange at the national and regional levels; high-level political dialogue on the Africa Human Security Index.

Part V Regional cooperation for development

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

D. Communication deliverables

Outreach programmes, special events and information materials: flyers, brochures and advocacy materials on the work of the subprogramme, special events at relevant global and regional events, webinars and online seminars.

External and media relations: press and media communication on the role of cities and social policy in the development of Africa.

Digital platforms and multimedia content: digital platform and visualization on voluntary local reviews, poverty and vulnerability, youth employment and the Africa Human Security Index, among other things.

B. Proposed post and non-post resource requirements for 2023

Overview

18.197 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 18.37 to 18.39.

Table 18.37

^a Includes two temporary posts (1 P-3 and 1 National Professional Officer).

18.198 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 18.40 to 18.42 and figure 18.XXXI.

18.199 As reflected in tables 18.40 (1) and 18.41 (1), the overall resources proposed for 2023 amount to \$77,273,700 before recosting, reflecting a decrease of \$142,300 (or 0.2 per cent) compared with the appropriation for 2022. Resource changes result from one factor, namely, other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Other changes

- 18.200 As reflected in table 18.40 (1), resource changes reflect a decrease of \$142,300, as follows:
- (a) **Subprogramme 4, Data and statistics.** The decrease of \$17,300 relates to the proposed reassignment of one post of Senior Information Systems Assistant as Senior Programme Management Assistant (Local level), which is subject to a 50 per cent vacancy rate in accordance with established practice, as detailed in annex III;
 - (b) **Subprogramme 7, Subregional activities for development.** The decrease of \$20,700 relates to the proposed reassignment of one post of Light Vehicle Driver as Team Assistant (Local level), under component 1, Subregional activities in North Africa, which is subject to a 50 per cent vacancy rate in accordance with established practice, as detailed in annex III;
 - (c) **Programme support.** The decrease of \$104,300 relates to:
 - (i) The proposed abolition of one post of Accounting Assistant (Local level), as detailed in annex III (\$37,400);
 - (ii) The proposed reassignment of three Local level posts, namely one post of Information Management Assistant as Documents Management Assistant, one post of Administrative Assistant as Programme Management Assistant, and one post of Team Assistant as Meeting Services Assistant, which are subject to a 50 per cent vacancy rate in accordance with established practice, as detailed in annex III (\$51,900);
 - (iii) The proposed conversion of two Local level posts to the National Professional Officer level, namely one post from Finance Assistant to Associate Finance Officer and one from Senior Accounting Assistant to Associate Finance Officer, which are subject to a 50 per cent vacancy rate in accordance with established practice, as detailed in annex III (\$15,000).

Extrabudgetary resources

- 18.201 As reflected in tables 18.40 (2) and 18.41 (2), ECA expects to continue to receive both cash and in-kind contributions, which complement regular budget resources. For 2023, extrabudgetary resources are estimated at \$22,492,100 and would provide for 71 posts, as presented in table 18.41 (2). The extrabudgetary resources are mobilized mostly from bilateral sources under agreements between ECA and global and regional institutions and organizations concerned with African development. Resources would primarily finance technical cooperation activities and build the capacities of member States in a number of priority areas, such as macroeconomic modelling for African policymakers and experts; supporting the accelerated programme on civil registration and vital statistics; boosting of intra-African trade; strengthening advisory capacities for land governance in Africa; developing privacy and data protection frameworks in implementing digital identification systems in Africa; building capacity for inclusive and equitable African trade arrangements; deepening African trade integration through effective implementation of the Agreement Establishing AfCFTA to support economic integration and operationalizing AfCFTA; supporting private sector development; and pooling procurement of essential drugs, products and local pharmaceutical production. The expected increase of \$1,317,800 is due mainly to increased requirements for consultants, advisory services and expert group meetings. Extrabudgetary resources represent 22.5 per cent of the total estimated resources for ECA.
- 18.202 The extrabudgetary resources under this section are subject to the oversight of the Under-Secretary-General of ECA, who has delegated authority from the Secretary-General.

Policymaking organs

18.203 The resources proposed under this component would provide for requirements relating to standing intergovernmental organs and expert bodies and intergovernmental processes, the servicing of which is the responsibility of ECA. The Commission provides the legislative mandate and policy guidance for the work of the secretariat. The terms of reference of the Commission were established by the Economic and Social Council in its resolution [671 A \(XXV\)](#) of 29 April 1958 and subsequent amendments. The Commission is composed of 54 members and reports to the Economic and Social Council. Table 18.43 provides information on the standing intergovernmental organs and related resource requirements.

Table 18.43

Policymaking organs

(Thousands of United States dollars)

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2022 appropriation</i>	<i>2023 estimate (before recosting)</i>
Conference of African Ministers of Finance, Planning and Economic Development	The Commission holds annual sessions to review the work of its secretariat, approve its annual programme of work and make decisions on the recommendations of its subsidiary bodies and of the Executive Secretary. The annual session also serves as a forum for articulating the position of Africa on development issues on the agenda of the United Nations. The Committee of Experts is an integral part of the session of the Commission that meets prior to and provides technical support for the Conference of African Ministers of Finance, Planning and Economic Development.	Mandate: Economic and Social Council resolution 671 A (XXV) of 29 April 1958 Membership: 54 government officials Number of sessions in 2022: 1 Number of sessions in 2023: 1	234.8	234.8
Intergovernmental Committee of Senior Officials and Experts	The five subregional intergovernmental committees of senior officials and experts meet annually between February and March prior to and report to the Conference of African Ministers of Finance, Planning and Economic Development. They oversee the overall formulation and implementation of the programme of work and priorities of the subregional offices and make recommendations on issues concerning economic and social development in their subregions, and also on the promotion and strengthening of subregional economic cooperation and integration. They also provide a platform for subregional ministerial caucuses for the discussion of specific subregional development challenges, whose outcomes are brought to the attention of the Conference.	Mandate: Economic and Social Council resolution 671 A (XXV) of 29 April 1958 and subsequent amendments Membership: 54 government officials Number of sessions in 2022: 1 Number of sessions in 2023: 1	Included in the budget of the subregional offices	Included in the budget of the subregional offices
Committee on Economic Governance	The Committee was established to provide evidence-based advice and guidance on economic governance issues, including promoting sound macroeconomic management and inclusive development strategies, fighting corruption and illicit financial flows out of Africa, in addition to networking and support for regional and global governance process such as the African Peer Review Mechanism and representation of Africa at international forums such as the Group of 20.	Mandate: Economic Commission for Africa resolution 966 (LII) of 26 March 2019 Membership: 54 government officials Number of sessions in 2022: 1 Number of sessions in 2023: 1	52.5	52.5
Committee on Statistics and Data	The Committee provides a forum to deliberate on issues related to statistics and data; give guidance on emerging issues in data production, exchange and analysis; introduce innovation in data; and explore capacity and data gaps. The Committee ensures that all member countries have the capability to provide data on a variety of development issues and endeavours to promote the coordination of statistical activities, to foster good statistical practices and to ensure consistent functioning of the statistical system in Africa.	Mandate: Economic Commission for Africa resolution 966 (LII) of 26 March 2019 Membership: 54 government officials Number of sessions in 2022: 1 Number of sessions in 2023: 1	52.5	52.5

Section 18 Economic and social development in Africa

<i>Policy-making organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2022 appropriation</i>	<i>2023 estimate (before recosting)</i>
Committee on Private Sector Development, Regional Integration, Trade, Infrastructure, Industry and Technology	The Committee provides a forum for dialogue and consensus-building in the important areas of private sector development, regional integration and trade, infrastructure, industry and technology and, more significantly, serves as a catalyst for accelerating progress at the national and regional levels in these fields. The Committee focuses on topical and emerging issues of relevance to these identified areas, with a view to taking stock of related progress made by African member States.	Mandate: Economic Commission for Africa resolution 966 (LII) of 26 March 2019 Membership: 54 government officials Number of sessions in 2022: 1 Number of sessions in 2023: 1	52.5	52.5
Committee on Climate Change, Blue Economy, Agriculture and Natural Resources Management	The Committee provides guidance and direction to the work of the Commission on advancing sustainable development, in particular through agricultural transformation, enhanced management and transformation of African land and natural resources, integration of climate resilience in national development plans and the transition to sustainable development, including through technology and innovation. As a policy dialogue and consensus-building forum, the Committee provides direction on the future work and strategic focus of the Commission on key emerging issues relating to agriculture, the blue economy, climate change, land and natural resources management and the green economy, in support of the attainment of the development objectives of the 2030 Agenda and Agenda 2063, and also support for the implementation of the Africa Mining Vision and the African Union Declaration on Land Issues and Challenges in Africa, both adopted by African Heads of State and Government in 2009, and the Paris Agreement on climate change.	Mandate: Economic Commission for Africa resolution 966 (LII) of 26 March 2019 Membership: 54 government officials Number of sessions in 2022: 1 Number of sessions in 2023: 1	52.5	52.5
Committee on Social Development, Poverty and Gender	The Committee reviews the work undertaken under the subprogrammes on gender equality and women's empowerment and on poverty, inequality and social policy. The Committee provides a forum for analysing the work done by ECA as it relates to the priorities of Africa on poverty and inequality reduction, sustainable urbanization, gender equality and women's empowerment, and social policy. The Committee is also important as a policy dialogue and consensus-building forum to strategically direct future work in these important areas of the African development agenda, and more significantly serves as a catalyst for accelerating progress at the national and regional levels in these fields. The Committee places an emphasis on topical and emerging issues of relevance to its identified areas of focus, with a view to taking stock of progress made by African member States in these areas and identifying policy directions.	Mandate: Economic Commission for Africa resolution 966 (LII) of 26 March 2019 Membership: 54 government officials Number of sessions in 2022: 1 Number of sessions in 2023: 1	52.5	52.5
Total			497.3	497.3

18.204 The proposed regular budget resources for 2023 amount to \$497,300 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 18.44 and figure 18.XXXII.

Executive direction and management

- 18.205 The Executive Direction and Management component comprises the Office of the Executive Secretary, the Office of the Deputy Executive Secretary (Programmes), the Office of the Deputy Executive Secretary (Programme Support), the Strategic Planning, Oversight and Results Division and business continuity.
- 18.206 The Office of the Executive Secretary and the offices of the deputy executive secretaries maintain and manage effective partnerships and collaborate with major African organizations, such as the African Union Commission and AfDB, regional economic communities and other key stakeholders, to promote synergies across policies on major development issues. The Office of the Executive Secretary ensures that the development priorities and positions of Africa on critical issues are reflected at the global level and provides policy guidance and leadership with respect to the formulation of regional strategies and programmes, in line with the goals set out in the 2030 Agenda and Agenda 2063. In addition, it plays a critical leadership role in the implementation of the Joint United Nations-African Union Framework for an Enhanced Partnership in Peace and Security and the African Union-United Nations Framework for the Implementation of Agenda 2063 and the 2030

Agenda for Sustainable Development and on special initiatives that reinforce the work of ECA and thus provide further impetus to the African development agenda.

- 18.207 The Office of the Executive Secretary provides support in determining the overall strategic direction and management of the ECA secretariat, ensuring the optimal use of resources in line with best practices and promoting environmental sustainability and disability inclusion.
- 18.208 The Office of the Deputy Executive Secretary (Programme Support) is responsible for building and maintaining the Commission’s strategic partnerships with development partners and major stakeholders. Furthermore, it is responsible for mobilizing extrabudgetary resources to support new and emerging priorities of importance to the development goals of member States. It represents the United Nations Legal Counsel in Addis Ababa, provides advice to ECA senior management on all legal matters and represents the Secretary-General in matters before the United Nations Dispute Tribunal. The Office is also responsible for ensuring business continuity.
- 18.209 The Strategic Planning, Oversight and Results Division includes the Evaluation Section, the Corporate Policy, Planning, Monitoring and Reporting Section, the Standards and Quality Assurance Section and the Joint Security Support Office. The Division supports and advises the Executive Secretary on matters relating to overall strategic direction, priorities and policies in the areas of programme coordination and planning, monitoring, evaluation and quality assurance, including reporting on the implementation of the ECA programme of work within a results-oriented framework to ensure organizational effectiveness. Furthermore, it coordinates ECA performance reporting to relevant intergovernmental bodies and reports on the implementation of relevant resolutions and decisions of those bodies. The Division responds to requests from Headquarters on programmatic matters, contributes to global initiatives and supports ECA subprogrammes in implementing guidelines and directives established by the General Assembly. It maintains liaison with and coordinates ECA-wide reporting to oversight bodies, including OIOS and external auditors.
- 18.210 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, ECA is integrating environmental management practices into its operations. In 2023, ECA will continue to reduce its greenhouse gas footprint and will maintain its greenhouse gas neutrality by offsetting its remaining footprint.
- 18.211 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 18.45. ECA endeavours to redouble its efforts to plan well in advance and raise awareness with programme managers about the importance of early nomination of travellers and the policy regarding advance booking. In addition, ECA continues its corporate agreement with the airlines, which provides for extended ticketing time limits and thus mitigates the impact on cost of late purchases.

Air tickets purchased at least two weeks before the commencement of travel	15	22	8.4	100	100

- 18.212 The proposed regular budget resources for 2023 amount to \$8,451,600 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 18.46 and figure 18.XXXIII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

18.213 Extrabudgetary resources for executive direction and management are estimated at \$190,000 and would provide for non-post resources. The resources would support the Mo Ibrahim Foundation leadership programme. The expected decrease of \$28,000 is due to a lower number of fellows.

Programme of work

Subprogramme 1 Macroeconomic policy and governance

18.214 The proposed regular budget resources for 2023 amount to \$3,335,600 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 18.47 and figure 18.XXXIV.

Table 18.47

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

18.215 Extrabudgetary resources for the subprogramme are estimated at \$610,200 and would provide for non-post resources. The resources would assist technical cooperation projects, research and analysis on emerging economic issues and challenges to sustainable development and growth in Africa, macroeconomic modelling for African policymakers and convening of the African Economic Conference. The expected increase of \$610,200 is due mainly to increased estimates to organize the conference and support the project on illicit financial flows from Africa.

**Subprogramme 2
Regional integration and trade**

18.216 The proposed regular budget resources for 2023 amount to \$3,016,000 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 18.48 and figure 18.XXXV.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

18.217 Extrabudgetary resources for the subprogramme are estimated at \$6,184,400 and would provide for 10 posts (1 D-1, 3 P-3, 3 P-2, 2 National Professional Officer and 1 Local Level), as well as non-post resources. The resources would enable technical cooperation projects, research and analysis, field support, advocacy and public information in the areas of strengthening African countries and the regional economic communities’ institutional capacities, boosting intra-African trade and informal cross-border trade data collection and operationalizing AfCFTA. The expected decrease of \$1,214,200 is due mainly to decreased estimates for the project on deepening Africa’s trade integration through effective implementation of AfCFTA, to support economic integration.

**Subprogramme 3
Private sector development and finance**

18.218 The proposed regular budget resources for 2023 amount to \$2,659,100 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 18.49 and figure 18.XXXVI.

Subprogramme 3: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

18.219 Extrabudgetary resources for the subprogramme are estimated at \$1,524,400 and would provide for non-post resources. The resources would provide for technical cooperation projects, research and analysis in the area of implementation of the single African air transport market; development of curricula on land governance in Africa; and stock exchange development and integration in Africa. The expected increase of \$1,207,600 is due mainly to a study on the implications of energy on AfCFTA; alignment of energy infrastructure policies and land reform; innovative finance and financial market development in Africa; and expert group meetings on local currency sovereign ratings and mobilization of institutional investors.

Subprogramme 4 Data and statistics

18.220 The proposed regular budget resources for 2023 amount to \$4,511,400 and reflect a decrease of \$17,300 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 18.200 (a) above. Additional details on the distribution of the proposed resources for 2023 are reflected in table 18.50 and figure 18.XXXVII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

18.221 Extrabudgetary resources for the subprogramme are estimated at \$2,425,800 and would provide for four posts (1 P-4, 1 P-3 and 2 Local level), as well as non-post resources. The resources would support technical cooperation projects, research and analysis and field support in the areas of monitoring of the Sustainable Development Goals and statistics in Africa, basic agricultural statistics and the data for health initiative. The expected increase of \$798,200 is due mainly to planned additional workshops and seminars on a statistical data exchange system; gender statistics; geospatial datasets; and data collection, compilation and application on the consumer price index.

**Subprogramme 5
Technology, climate change and natural resources management**

18.222 The proposed regular budget resources for 2023 amount to \$3,025,800 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 18.51 and figure 18.XXXVIII.

Extrabudgetary resources

18.223 Extrabudgetary resources for the subprogramme are estimated at \$2,095,100 and would provide for four posts (3 P-5 and 1 Local level), as well as non-post resources. The resources would enable technical cooperation projects, research and analysis and field support in the areas of climate-resilient development policies in Africa and enhancing capacity in climate change, an inclusive sustainable economy, natural resources and innovation and technology in Africa. The expected decrease of \$433,900 is due mainly to the completion of projects, including the Africa Climate Resilient Investment Facility and the joint research on private sector involvement in climate information services.

**Subprogramme 6
Gender equality and women’s empowerment**

18.224 The proposed regular budget resources for 2023 amount to \$980,300 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 18.52 and figure 18.XXXIX.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

18.225 Extrabudgetary resources for the subprogramme are estimated at \$49,300 and would provide for one Local level post. The expected decrease of \$46,800 is due to an anticipated reduction in the African Women Impact Fund due to non-receipt of commitment from donors to renew funding. The programme continues its efforts to mobilize extrabudgetary resources.

Subprogramme 7

Subregional activities for development

Component 1

Subregional activities in North Africa

18.226 The proposed regular budget resources for 2023 amount to \$3,103,700 and reflect a decrease of \$20,700 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 18.200 (b). Additional details on the distribution of the proposed resources for 2023 are reflected in table 18.53 and figure 18.XL.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

18.228 Extrabudgetary resources for the component are estimated at \$100,000 and would provide for non-post resources. The resources would support technical cooperation projects, research and analysis, field support and advocacy in the areas of regional integration, economic transformation and demographic dynamics for development. The expected decrease of \$238,700 is due mainly to holding fewer expert group meetings for the operationalization of the AfCFTA project. The activities are consolidated under subprogramme 2.

**Component 3
 Subregional activities in Central Africa**

18.229 The proposed regular budget resources for 2023 amount to \$3,838,200 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 18.55 and figure 18.XLII.

Figure 18.XLIV
Subprogramme 7, component 5: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

18.232 Extrabudgetary resources for the component are estimated at \$293,500 and would provide for non-post resources. The resources would support technical cooperation projects, research and analysis, field support and advocacy in the areas of inclusive industrialization and regional integration in Southern Africa. The expected increase of \$293,500 is due mainly to new requests from member States, regional economic communities and intergovernmental organizations for advisory services, seminars, workshops, field projects and capacity-building.

Subprogramme 8 Economic development and planning

18.233 The proposed regular budget resources for 2023 amount to \$1,410,300 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 18.58 and figure 18.XLV.

(Thousands of United States dollars)

Extrabudgetary resources

18.234 Extrabudgetary resources for the subprogramme are estimated at \$1,623,000 and will provide for 20 posts (5 National Professional Officers and 15 Local level), as well as non-post resources. The resources would contribute to the operationalization of the African Institute for Economic Development and Planning and will enable the training of participants from member States in economic development and planning. The 2023 estimated resource level reflects no change compared with the estimates for 2022.

Subprogramme 9 Poverty, inequality and social policy

18.235 The proposed regular budget resources for 2023 amount to \$2,955,200 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 18.59 and figure 18.XLVI.

Figure 18.XLVI
Subprogramme 9: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

- 18.236 Extrabudgetary resources for the subprogramme are estimated at \$708,100 and would provide for non-post resources. The resources would assist technical cooperation projects, research and analysis and field support, including capacity-building in the areas of international migration, population and development, urbanization and development, and ageing (activities related to the Madrid International Plan of Action on Ageing). The expected increase of \$419,900 would enable the implementation of projects such as those on policy formulation and implementation of peace and security in Africa.

Programme support

- 18.237 Programme support is comprised of the Division of Administration and the Publications, Conference and Knowledge Management Division. The Division of Administration ensures the effective implementation of the Commission's mandate by providing administrative and financial support, guaranteeing compliance with United Nations regulations and rules, policies and procedures and spearheading business continuity initiatives.
- 18.238 In 2023, the component will continue to ensure efficient support for the functions and services performed at ECA headquarters in Addis Ababa, the five subregional offices and the African Institute for Economic Development and Planning. It will also continue to collaborate with the United Nations agencies, funds and programmes based in Ethiopia to support the United Nations common services framework through the operations management team.
- 18.239 The key focus will be on supporting the implementation of United Nations system-wide projects, including the strategic capital plan, the provision of effective career advancement and development support to staff members, the further delegation of authority to the subregional offices in the areas of human and financial resources management, the supervision of the \$57 million Africa Hall project, the coordination of business continuity and organizational resilience initiatives, coordination with the 28 United Nations entities serving in Ethiopia on business continuity and operational matters and coordination with member organizations and offices to further strengthen the medical services provided at the United Nations Health-Care Centre.
- 18.240 The proposed regular budget resources for 2023 amount to \$30,625,700 and reflect a decrease of \$104,300 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 18.200 (c). Additional details on the distribution of the proposed resources for 2023 are reflected in table 18.60 and figure 18.XLVII.

Programme support: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

18.241 Extrabudgetary resources for the component are estimated at \$6,688,300 and would provide for 32 posts (1 P-3, 2 National Professional Officer and 29 Local level), as well as non-post resources. The resources would support the United Nations Health-Care Centre; library, learning, knowledge and information services; conference management services; interpretation, translation and editing services; administration and financial services; human resources management; facilities management; and supply chain management. The expected decrease of \$50,000 reflects an anticipated decrease in funds from funding partners in the area of health care.

II. Regional Commissions New York Office

Proposed post and non-post resource requirements for 2023

Overview

- 18.242 The Regional Commissions New York Office is a joint office representing, coordinating and providing policy advice to the five regional commissions, namely, the Economic Commission for Africa, the Economic and Social Commission for Asia and the Pacific, the Economic Commission for Europe, the Economic Commission for Latin America and the Caribbean and the Economic and Social Commission for Western Asia. Its overall objective is to backstop the effective implementation of legislative mandates at the regional level.
- 18.243 In pursuing the objective, the Office assumes the following interrelated key functions: providing strategic policy advice to the regional commissions on United Nations deliberations and global policy frameworks that have a bearing on their positioning and the implementation of their programmes of work; supporting representation and outreach vis-à-vis relevant intergovernmental and inter-agency bodies with a view to informing decision-making from a regional perspective; enhancing coordination and cooperation among the regional commissions; and making their knowledge products readily accessible to a wide range of stakeholders.
- 18.244 In the area of policy advice, the Office carries out analysis and produces policy papers and concept notes on a wide range of topics. In 2021, the Office coordinated, under the leadership of the Coordinator of the Regional Commissions and with the Executive Office of the Secretary-General, the organization of high-level round tables on extractive industries. The Regional Commissions New York Office supported the five regional round tables and the preparation of an interregional policy brief on extractive industries and coordinated inputs to the Secretary-General's policy brief prepared for the global round table on extractive industries held in May 2021.
- 18.245 The Office, working closely with the regional commissions and the Executive Office of the Secretary-General, contributed to the Secretary-General's policy brief on illicit financial flows. With the Coordinator, the Regional Commissions New York Office co-led efforts to advance the work on the operationalization of measures to combat illicit financial flows.
- 18.246 During 2021, the Office played a key role in coordinating a joint policy brief on transforming food systems launched on the margins of the United Nations Food Systems Summit held in 2021 and a joint statement by the five executive secretaries calling for enhanced regional cooperation to develop solutions for capturing CO₂ emissions. The Office also facilitated a side event jointly organized by the regional commissions during the twenty-sixth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change on the theme "Bridging the gap in climate finance".
- 18.247 Another priority pursued in 2021 was facilitating the interlinkages between global and regional policymaking processes. The Office played a central role in supporting the follow-up and review of the 2030 Agenda, notably by strengthening coherence and interaction among entities at the global, regional and national levels. The Office has also continued to advocate for the recognition of the regional dimensions and the role of the regional commissions and the regional forums on sustainable development in the follow-up and review of the 2030 Agenda. In that context, the Office has ensured harmonization of reporting at the global level, including to the high-level political forum on sustainable development and the Economic and Social Council, and steered ideas for joint analytical products and outreach activities. The Office organized on the margins of the high-level political forum in 2021 a special event on "Messages from the regions: harnessing the regional dimension to support post-COVID-19 recovery and accelerate the attainment of the SDGs" and hosted a voluntary national review laboratory under the theme "How do inclusive voluntary national reviews help accelerate implementation of the 2030 Agenda? Experiences from the regions".
- 18.248 In the context of the repositioning of the United Nations development system, the Office played a key role in advising the regional commissions on a coordinated approach to rolling out the regional reform.

It also provided policy advice in support of the Coordinator's participation in the meetings of the United Nations Sustainable Development Group principals in such areas as the management and accountability framework, the positioning of the regional collaborative platforms to better support accelerated implementation of the Sustainable Development Goals and system-wide reporting of results.

- 18.249 Lastly, the Office continued to promote strategic coordination among the regional commissions through its role as secretary of the meetings of the executive secretaries. It has also promoted collaboration on several substantive issues among the regional commissions and with other United Nations entities through its networks of focal points.
- 18.250 The Office represents the five regional commissions, headquartered in the five regions of the world, with a combined staff of 1,882. Working closely with the Coordinator, the Office undertakes global representation and advocacy on their behalf as well as representation in inter-agency mechanisms, ensuring their effective contributions to system-wide initiatives.
- 18.251 The representation and advocacy efforts in 2021 contributed to continued recognition on the part of Member States of the regional dimensions of development and the inclusion of explicit mandates for the regional commissions in resolutions adopted by the General Assembly and the Economic and Social Council. The Office prepared and introduced to the Council the annual report of the Secretary-General on regional cooperation.
- 18.252 The Office collaborated with the offices of the Presidents of the General Assembly and of the Economic and Social Council in support of their priorities. In 2021, the Office facilitated contributions to high-level events convened by the President of the Assembly on delivering climate action and digital inclusion for all and to preparatory events for high-level meetings slated for 2022 on road safety and the New Urban Agenda. Such opportunities enabled the Office to continue to highlight regional innovations and perspectives to shape global policymaking and advocate for the role of the regional commissions during the operational activities for development segment of the Council.
- 18.253 The Office also organized the 2021 dialogue of the executive secretaries with the Second Committee of the General Assembly on the theme "Rising global inequalities: turning promises into action". The dialogue presented regional perspectives on the impacts of the pandemic and highlighted how the regional commissions continue to work towards tackling inequalities, paving the way for long-term resilience and sustainable recovery in the regions.
- 18.254 The Office participated actively in internal mechanisms supporting the preparation of the 2021 meeting of the high-level political forum on sustainable development and in the working group on United Nations engagement with the Group of 20, supporting efforts to streamline the coordination of United Nations support to the Group of 20 Presidency.
- 18.255 The Office undertook a mapping of potential partnerships to identify and cultivate those that can add value by increasing the scale, reach and impact of its work. In 2021, the Office organized with Coventry University of the United Kingdom of Great Britain and Northern Ireland an event entitled "Africa Conversations", aimed at fostering dialogue and cooperation with academia with a focus on accelerated implementation of the Sustainable Development Goals. The Office also facilitated partnerships between the regional commissions and civil society, the private sector and youth networks, including partnerships with Youth Advocates Ghana and the Ugandan National Chamber of Commerce and Industry.
- 18.256 The Office promoted collaboration among the regional commissions and, to that end, supported the conceptualization and formulation of joint projects on illicit financial flows and climate action to be financed through the United Nations Development Account and ensured that the regional dimension was well reflected in policy decisions adopted by the Steering Committee of the Development Account.
- 18.257 In that context, the Office will provide, in close consultation with the Coordinator and the Executive Office of the Secretary-General, strategic advice and coordination support to the regional commissions as they advance their priorities in such areas as the rethinking of the international financial architecture. In advancing the priority relating to people-centred and gender-responsive health and social protection systems, the Regional Commissions New York Office will support advocacy efforts around the implementation of the global vaccination plan at the regional level and

the design and implementation of initiatives in support of a renewed social contract, as well as the annual meeting with heads of regional organizations. The regional commissions will be actively involved in advancing new metrics, including complementary measures to GDP to measure inclusive and sustainable growth and prosperity.

- 18.258 With the objective of fast-tracking the implementation of the Sustainable Development Goals, the Office will also identify engagement and advocacy opportunities, coordinate effective participation of the regional commissions in inter-agency mechanisms and leverage key moments for strategic visibility and uptake of regional solutions and perspectives. The Office will foster collaboration and peer learning among the regional commissions, leveraging their comparative advantages. It will also broker, nurture and scale up value-adding partnerships within the United Nations system and with external actors towards accelerating progress on the 2030 Agenda.
- 18.259 In pursuit of its objective, the Office will systematically hold regular dialogues to strengthen internal coordination, including with the regional commissions and the Executive Office of the Secretary-General, to ensure coherent and effective support to global initiatives and processes. Lastly, the Regional Commissions New York Office will further strengthen its support to the follow-up and review of the 2030 Agenda and the Sustainable Development Goals, bringing regional innovations and best practices to global discussions and ensuring that outcomes of the regional forums feed into the high-level political forum.
- 18.260 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 18.61. In 2021, the Office had 89 per cent compliance with the timely submission of travel documentation and 100 per cent compliance with the purchase of air tickets within established timelines for the two human resources-related travels undertaken.

Table 18.61
Compliance rate
(Percentage)

	<i>Actual 2019</i>	<i>Actual 2020</i>	<i>Actual 2021</i>	<i>Planned 2022</i>	<i>Planned 2023</i>
Timely submission of documentation	50	89	89	100	100
Air tickets purchased at least two weeks before the commencement of travel	–	100	100	100	100

- 18.261 The proposed regular budget resources for 2023 amount to \$1,037,500 and reflect no change in the resource level compared with the appropriation for 2022. The proposed level of resources provides for the full, efficient and effective implementation of mandates. Additional details are reflected in tables 18.62 to 18.65 and figure 18.XLVIII.

^a Proposed reassignment.

^b Proposed conversion.

II. Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

A. Economic Commission for Africa

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions **A/76/7 and A/76/7/Corr.1**

The Advisory Committee requested, but did not receive, information on the number of staff making use of flexible working arrangements, as well as their respective durations, and trusts that detailed information will be included in the context of the next programme budget submission (para. V.11)

ECA complies with the Organization's policy on flexible working arrangements for staff. Details on the use of flexible working arrangements will be provided separately to the Advisory Committee in the supplementary information on the proposed programme budget for 2023.

Office of Internal Oversight Services **Report No. 2019/147**

ECA should, in coordination with the concerned tripartite partner, take steps to fully provide the required funding and staff capacity to the Joint Secretariat Support Office to enable it to provide strategic support to joint programmes and initiatives, including the policy centres (para. 16, recommendation 2).

This recommendation remains under discussion with the African Union. However, the Joint Secretariat Support Office has been recently moved to the Strategic Planning Section and the Office is now resourced with necessary staff capacity.

The Economic Commission for Africa (ECA) should take action to improve the processing times for both donor and grant documents by establishing and monitoring performance indicators for all stages of the process (para. 27, recommendation 3).

The full use of the Umoja grant management module has helped to improve processing times. The recommendations has been closed by the Office of Internal Oversight Services (OIOS).

ECA should develop a plan to implement accepted recommendations from the resource mobilization strategy review including assigning responsibility and timeframe for implementation and periodically tracking the status (para. 30, recommendation 5).

Under the strategy, 10 recommendations were to be implemented; 80–85 per cent of the recommendations have been complied with and the remainder have been overtaken by events. Closure by OIOS will be requested in early May 2022.

Audit of the renovation of Africa Hall and visitors' centre construction projects in the Economic Commission for Africa **Report No. OIOS-2021-00768**

ECA should grant Umoja roles to procurement officials in line with their delegation of authority.

ECA has provided the necessary training and has granted Umoja roles to procurement officials in line with their delegation of authority. The recommendation has thus been closed.

ECA should update the manual for the Africa Hall project to include formal claims management processes and procedures to provide guidance on avoiding claims and litigations and to respond to them appropriately, should they occur.

Claims management procedures and processes were finalized by ECA and submitted to United Nations Headquarters for final approval.

B. Regional Commissions New York Office

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/76/7](#) and [A/76/7/Corr.1](#)

The Advisory Committee notes the efforts of the Office in promoting cooperation among the regional commissions and trusts that the Secretary-General will provide consolidated information on best practices and lessons learned, including as a result of the COVID-19 pandemic, in the context of the next programme budget submission (para. V.22).

The meeting of the executive secretaries, which is serviced by the Office, continues to serve as the premier space for the five regional commissions to discuss priorities for interregional cooperation. In addition to the formal meetings, the executive secretaries hold regular strategic meetings to receive briefings, discuss time-sensitive and emerging issues, identify synergies and agree on key messages and representation in high-level inter-agency mechanisms^a and global forums.^b This, coupled with exchanges using an instant messaging tool, enabled almost real-time information-sharing.

The Office also organizes the biannual strategic dialogue of the executive secretaries with the Deputy Secretary-General in May and November for in-depth discussions of their priorities and achievements, synergies and emerging issues. The Office also organizes the meetings of the executive secretaries with heads of United Nations departments and entities to take stock of ongoing joint work and identify opportunities for strengthened collaboration.

For the first time, in 2021 the informal meeting of the deputy executive secretaries was instituted by the Office to facilitate sharing of experience, discuss coordinated approaches and follow through on the decisions taken by the executive secretaries. Informed by the meeting of the executive secretaries, this practice is helping to bridge coordination gaps and drives the operationalization of decisions and commitments taken by the executive secretaries.

In 2021, the Office facilitated opportunities for the regional commissions to come together to identify entry points to showcase regional innovations, discuss priorities and challenges and agree in advance on key global events to jointly formulate coordinated policy briefs, released in time to inform global policymaking. Examples include the joint policy briefs on the transition of extractive industries to sustainable systems and transforming food systems.

The meetings of the informal network of technical focal points from across the commissions backstopped by the Office, including in areas such as programme planning, financing for development, the 2030 Agenda for Sustainable Development, the New Urban Agenda, food systems and extractives, serve as the platform for

experience-sharing and designing interregional projects and initiatives (including joint outreach events and knowledge products) in priority areas identified by the executive secretaries.

Readouts of inter-agency coordination meetings and important events attended by the Office on behalf of the regional commissions are circulated widely, highlighting entry points for collaboration and best practices for scaling up.

Guided by its revamped media and outreach plan, the Office launched a new website and upgraded its social media presence in 2021 to serve as a gateway to the broad range of knowledge, data and regional innovations spearheaded by the five regional commissions. Its engagement with permanent representatives of Member States based in New York centred on showcasing the work of the commissions and creating partnerships. The newsletter produced by the Office has been redesigned to spotlight innovative practices coming from the regional commissions and is circulated widely in the United Nations system and among Member States.

**Joint Inspection Unit
Cooperation among the United Nations Regional
Commissions (JIU/REP/2015/3)**

The executive secretaries of the regional commissions should explore the possibility of establishing a common online platform for knowledge-management, more systematic exchanges of lessons learned and good practices as well as an advocacy tool, in order to increase the profile and visibility of their activities and promote their products at the global level (para. 91, recommendation 3).

Guided by the 2030 Agenda for Sustainable Development, the regional commissions have continued to strengthen their cooperation in the areas of policy advocacy and knowledge exchange and in the framework of capacity-building projects.

The regional commissions have continued to meet regularly at the principal and technical levels, exchanging information and best practices, and developed joint advocacy and knowledge products on issues relevant to the 2030 Agenda, such as financing for development, digital inclusion, inequality, climate change, food systems, extractive industries and the COVID-19 response, to name a few.

As a result of the repositioning of the regional assets of the United Nations development system, the regional commissions, with an enhanced leadership role as co-chairs of the regional collaborative platforms, continued to support regional knowledge management hubs to allow Member States, resident coordinators and United Nations country teams to easily identify and access available regional assets to respond, in real time, to national needs and priorities.

The hubs are critical regional public goods for the countries in each region and beyond. Discussion

Section 18 Economic and social development in Africa

Brief description of the recommendation

Action taken to implement the recommendation

continues on interoperability of these regional knowledge management hub systems across the regions and linkages with the global level.

An interregional meeting to facilitate knowledge exchange and experience sharing on the rollout of the regional reform is being explored for 2022.

^a Examples of inter-agency mechanisms in which the regional commissions participated in 2021 include: meetings of the United Nations Sustainable Development Group, meetings of the principals of the core group on finance and the core group on beyond GDP, to name but a few.

^b High-level events include the General Assembly high-level dialogue on energy, the Economic and Social Council partnership forum and coordination segment, the 2021 forum on financing for development follow-up, the 2021 high-level political forum on sustainable development, the twenty-sixth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, high-level meetings on delivering climate action, road safety and the New Urban Agenda convened by the President of the General Assembly, and Economic and Social Council special meetings on international cooperation in tax matters and on natural resources, peaceful societies and sustainable development.

III. Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 4, Data and statistics	1	LL	Reassignment of 1 Senior Information Systems Assistant as Senior Programme Management Assistant	The proposed reassignment is presented within the subprogramme 4 organizational unit of the organization chart (see annex I) and does not entail a change in the geographical location of the post within the organizational structure
Subprogramme 7, component 1, Subregional activities in North Africa	1	LL	Reassignment of 1 Light Vehicle Driver as Team Assistant	The proposed reassignment is intended to provide a wide range of administrative support for the Subregional Office for North Africa. The support ranges from secretarial and logistics support during high-level meetings to the generation of standard reports. It also includes organization of information and reference materials, as well as maintaining schedules for meetings and follow-up on financial matters. The proposed reassignment is presented within the subprogramme 7, component 1, organizational unit of the organization chart (see annex I) and does not entail a change in the geographical location of the post within the organizational structure
Programme support	(1)	LL	Abolishment of 1 Accounting Assistant	The post is proposed for abolition as the unit has been reorganized to have some of the functions combined and consolidated under the role of the National Professional Officer post proposed for conversion in the Payroll and Disbursement Unit. The remaining posts would cover the functions of the post proposed for abolition
	(1)	LL 1 NPO	Conversion of 1 Finance Assistant to Associate Finance Officer	The conversion is proposed to strengthen the Budget and Finance Section following the issuance of new accounting and reporting requirements under the International Public Sector Accounting Standards (IPSAS). The proposed conversion is intended to address the increased responsibilities of the Payroll and Disbursement Unit owing to the increasing shift from processing-focused tasks to more analysis of data
	(1)	LL 1 NPO	Conversion of 1 Senior Accounting Assistant to Associate Finance Officer	The proposed conversion is intended to address the increased responsibilities of the Payroll and Disbursement Unit owing to the increasing shift from processing-focused tasks to more analysis of data.
	1	LL	Reassignment of 1 Information Management Assistant as Documents Management Assistant	The reassignment is proposed to address the shift from language reference assistance within the Documents Planning and Monitoring Unit to document management activities. The previous responsibilities of the post have become obsolete owing to the introduction of e-Luna by the Department for General Assembly and Conference Management. Following the automation, the functions of the post have been absorbed by the translators
	1	LL	Reassignment of 1 Administrative Assistant as Programme Management Assistant	The reassignment is proposed to address the strategic and programmatic needs of the merged publications and conference management sections
	1	LL	Reassignment of 1 Team Assistant as Meetings Services Assistant	The reassigned post would provide estimates of planned events and staff costs, statistics of meetings held and process all financial transactions, including through cost recovery

IV. Overall summary of financial and post resources

Foreword

Given the wide-reaching socioeconomic impacts of the coronavirus disease (COVID-19) pandemic, a broad-based recovery to renew progress and recoup the time lost is now essential for the attainment of the Sustainable Development Goals by the end of the decade.

With recovery uneven and fraught with uncertainties, the Economic and Social Commission for Asia and the Pacific (ESCAP) will take an integrated approach aimed at protecting our planet, ensuring prosperity and leaving no one behind. Such an approach will allow countries to address structural weaknesses, build resilience and ensure sustainability. Multilateralism through consensus-building and regional cooperation will be key to our common agenda to advance sustainable development in Asia and the Pacific.

Improved knowledge management and use of data will allow for a better understanding of where the region stands, why we are here and what could happen next. They will allow for the development of a wider range of policies, based on evidence, to tackle our daunting challenges and transform the region.

As we promote the sharing of country experiences and best practices, we will continue to accord priority to the least developed countries, landlocked developing countries and small island developing States and, within countries, to the people who are most vulnerable.

The implementation of the 2030 Agenda for Sustainable Development rests with each one of us, through our partnerships with the United Nations development system and regional and subregional organizations, as well as with the private sector and civil society.

As ESCAP celebrates its seventy-fifth anniversary and looks forward to the next 25 years, it will remain at the forefront of change in Asia and the Pacific.

(Signed) Armida Salsiah **Alisjahbana**
Executive Secretary, Economic and Social Commission for Asia and the Pacific

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 19.1 As the regional intergovernmental platform of the United Nations, the Economic and Social Commission for Asia and the Pacific (ESCAP) assists its members and associate members in pursuing solutions for sustainable development. The mandate derives from the priorities established in relevant resolutions and decisions of the General Assembly and the Economic and Social Council, including Council resolution 37 (IV), by which the Commission was established, and Council resolution 1895 (LVII), which amended its mandate to include the social dimension of integrated development.
- 19.2 Through its three core functions, namely, research and analysis, the facilitation of intergovernmental consensus-building and norm-setting, and capacity development, ESCAP supports the integrated implementation of the 2030 Agenda for Sustainable Development. To fulfil these functions, ESCAP is guided by General Assembly resolutions, including Assembly resolution 74/4, in which the Assembly endorsed the political declaration of the high-level political forum on sustainable development entitled “Gearing up for a decade of action and delivery for sustainable development: political declaration of the Sustainable Development Goals Summit”. At the regional level, the regional road map for implementing the 2030 Agenda in Asia and the Pacific, endorsed by the Commission in its resolution 73/9, serves as the reference framework.
- 19.3 The work of the Commission is also grounded in its resolutions 76/2 and 77/1, by which the Commission reaffirmed the importance of international and regional cooperation to strengthen the resilience of member States to the socioeconomic effects of pandemics, including issues related to health. The congruence of the Commission’s conference structure to its programme priorities further increases the efficiency and effectiveness of its work.

Strategy and external factors for 2023

- 19.4 Through the balanced integration of the economic, social and environmental pillars of sustainable development, the programme’s strategy for 2023 aims for a recovery from the pandemic that leads to the accelerated implementation of the 2030 Agenda. In line with the theme of the seventy-eighth session of the Commission, “A common agenda to advance sustainable development in Asia and the Pacific”, the approach delineates the regional cooperation required for its advancement.
- 19.5 The Commission’s overall programme strategy pivots on the integrated approach of its nine subprogrammes, including subregion-specific research, analysis and tools. Through these subprogrammes, ESCAP addresses the needs and requests of its member States, with attention given to those in special situations, namely, the least developed countries, landlocked developing countries and small island developing States.
- 19.6 In 2023, ESCAP will work to address structural challenges and develop solutions with and for member States to move from short-term mitigation measures to building resilience and sustainability, alleviating poverty and inequality and investing in the welfare of people, especially people in vulnerable situations, including women, youth, older persons, migrants and persons with disabilities. Recognizing the synergies between the Beijing Declaration and Platform for Action and the 2030 Agenda, ESCAP will continue to facilitate regional policy dialogue to further implement the outcomes of the 25-year review of the implementation of the Beijing Declaration and Platform for Action to advance gender equality and women’s economic empowerment. ESCAP will support efforts to embed inclusive and gender- and care-sensitive social protection in national development agendas through the Action Plan to Strengthen Regional Cooperation on Social Protection in Asia

and the Pacific, endorsed by member States at the seventy-seventh session of the Commission. By extension, this will entail facilitating member States' actions towards regional cooperation, including to promote equitable health-care systems.

- 19.7 In accordance with the Sustainable Development Goals to be reviewed at the 2023 high-level political forum, ESCAP will explore opportunities to align the recovery efforts of member State with climate change mitigation and adaptation strategies and promote low greenhouse gas emission development strategies to enable countries to achieve their climate commitments under the Paris Agreement. It will also work with its member States to identify pathways by which an orderly energy transition that drives economies towards net zero emissions allows access to affordable, reliable, sustainable and modern energy for all and to advance disaster risk management.
- 19.8 To assist member States in implementing decisions adopted at the twenty-sixth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, the sixteenth session of the Conference of the Parties serving as the Meeting of the Parties to the Kyoto Protocol and the third session of the Conference of the Parties serving as the Meeting of the Parties to the Paris Agreement, ESCAP will promote the integration of the concept of adaptation into local, national and regional planning and the further raising of mitigation ambitions through nationally determined contributions.
- 19.9 In support of the Addis Ababa Action Agenda, ESCAP will analyse macroeconomic policy and financing for development, particularly with a view to broadening member States' fiscal space through the development of integrated national financing frameworks. It plans to facilitate the sharing of best practices and lessons learned on solutions to align government spending with sustainable development and explore innovative, sustainable and digital financing instruments, in addition to encouraging Governments to consider further debt relief measures and accelerate efforts to combat tax evasion through regional and international cooperation.
- 19.10 ESCAP will support the implementation of the new Regional Action Programme for Sustainable Transport Development in Asia and the Pacific (2022–2026) adopted at the fourth Ministerial Conference on Transport, including by developing capacity-building projects to strengthen regional and interregional transport connectivity, fast-tracking transformative action in transport for the delivery of the Sustainable Development Goals and addressing the environmental dimension of international supply chains and the introduction of digital and intelligent transport systems. It will encourage the cooperation of member States and coordinate their efforts to improve transport infrastructure and to remove related constraints to ensure a seamless and sustainable transport system in the Asia-Pacific region.
- 19.11 Another focus for ESCAP in 2023 will be trade facilitation and digitization, supported through, inter alia, the implementation of the Framework Agreement on Facilitation of Cross-border Paperless Trade in Asia and the Pacific. Building on the lesson that digital readiness, universal broadband connectivity and digital capacity have played key roles in monitoring and effectively responding to the coronavirus disease (COVID-19) pandemic, ESCAP will further identify policy options to reduce the digital divide across and within countries, with a focus on countries in special situations as well as on rural communities.
- 19.12 Data and statistics remain key means to facilitate the implementation of the 2030 Agenda. ESCAP will therefore deepen its support on Sustainable Development Goal progress assessment at the regional, subregional and national levels. It will also accord priority to providing support to ESCAP members and associate members in the implementation of the Ministerial Declaration on Building a More Resilient Future with Inclusive Civil Registration and Vital Statistics, which highlights the crucial role of civil registration and vital statistics in enabling governments and authorities to prepare for and respond to crises such as the global COVID-19 pandemic, with an emphasis on reaching the most vulnerable. Building on the work of the Statistical Commission, it will also focus on supporting member States in implementing complementary statistics relating to gross domestic product (GDP) that will measure inclusive and sustainable growth and prosperity. In 2023, ESCAP will continue to apply innovative approaches to data analytics and management by integrating the Data Strategy of

the Secretary-General for Action by Everyone, Everywhere, into its research and analysis, intergovernmental norm-setting and capacity development and its business operations to fully unlock the Commission's data and analytics potential in implementing its mandates.

- 19.13 As the principal intergovernmental platform in Asia and the Pacific, ESCAP will continue to promote the generation of innovative policies for integrated, inclusive and sustainable development and to build consensus on norms and agreements to address shared challenges. ESCAP will also foster regional dialogue and cooperation, with an emphasis on transboundary issues, through the third Asian and Pacific Energy Forum and the seventh Asian and Pacific Population Conference, among others.
- 19.14 Together with a broad range of partners, including member States, United Nations development system entities, other international and regional organizations, the private sector and civil society, ESCAP will convene the tenth Asia-Pacific Forum on Sustainable Development in 2023. The Forum will enable multi-stakeholder engagement for the regional follow-up and review of the implementation of the 2030 Agenda. Planned activities include an annual report highlighting progress towards the attainment of the Sustainable Development Goals, together with policy recommendations to accelerate achievement, in addition to building capacities to conduct voluntary national reviews through, inter alia, better use of data and statistics as well as stakeholder engagement.
- 19.15 As more than half its member States belong to the group of countries in special situations, ESCAP is mainstreaming the implementation of the various programmes of action for least developed countries, landlocked developing countries and small island developing States into all of its subprogrammes to support those countries in implementing relevant goals and targets. ESCAP also supports, as a member of the inter-agency task force on least developed country graduation, those member States that are on the cusp of graduating from the category of least developed country, with 5 of the 11 least developed countries in the region due to graduate by 2026.
- 19.16 Reflecting the importance of continuous improvement and responding to the needs of member States, ESCAP has mainstreamed lessons learned and best practices related to the adjustments to and adaptation of its programme resulting from the COVID-19 pandemic. This includes its hybrid mode of programme delivery, which has proven to be a valuable tool under prevailing circumstances and has facilitated broader participation from the Commission's membership and produced planned results. While ESCAP has incorporated pandemic-related impacts into all its intergovernmental, analytical and technical cooperation activities, it plans to focus its efforts on developing resilient solutions in support of sustainable development for the region.
- 19.17 With regard to cooperation with other entities at the global, regional, national and local levels, ESCAP will collaborate with regional and subregional organizations, as well as development partners, to strategically implement its programme, including through South-South cooperation, triangular cooperation, regional partnerships and proactive engagement with other organizations and entities as appropriate. Each component under subprogramme 8 aims at strengthening cooperation, in particular with subregional organizations on transboundary issues. In 2023, ESCAP will also expand its collaboration with regional development banks and the private sector.
- 19.18 With regard to inter-agency coordination and liaison, ESCAP works with an array of United Nations development system entities at the global, regional and national levels in support of the Secretary-General's development reform. Its multisectoral expertise contributes to global products, as well as to common country assessments and United Nations Sustainable Development Cooperation Frameworks, and its subregional offices serve as the main point of contact for resident coordinator offices and United Nations country teams. Jointly with the Regional Bureau for Asia and the Pacific of the United Nations Development Programme (UNDP) and the Development Coordination Office regional office for Asia and the Pacific, ESCAP provides secretariat support to the fully established regional collaborative platform, and its substantive divisions collaborate in supporting issue-based coalitions. ESCAP is co-leading the issue-based coalition on climate change mitigation and air pollution with the United Nations Environment Programme (UNEP), where its expertise, geared to

support the achievement of Sustainable Development Goals 7 and 13 and the implementation of the Paris Agreement, is of specific relevance. Furthermore, the “Asia-Pacific knowledge management hub”, co-led by ESCAP and the Development Coordination Office, is the main platform for sharing policy expertise, showcasing analytical work and providing rapid response to the needs of countries and United Nations country teams relating to the implementation of the 2030 Agenda.

- 19.19 With regard to the external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) National Governments maintain and strengthen their commitment to the Commission as the principal intergovernmental platform in the region for leveraging regional cooperation to meet transboundary and common challenges, such as recovery from the effects of the COVID-19 pandemic;
 - (b) Governments and other stakeholders continue to collaborate with the Commission in undertaking the proposed programme activities with the necessary capacity and resources;
 - (c) Extrabudgetary funding for technical cooperation continues to be available.
- 19.20 Where feasible, the programme plan for 2023 continues to incorporate novel approaches to implement mandates that were put in place in response to the changed operational conditions associated with the COVID-19 pandemic. At the same time, the programme plan for 2023 assumes that those operational conditions have improved and will allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.
- 19.21 ESCAP integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, gender equality is a thematic area for subprogrammes 6 and 7. In the 2023 programme plan, subprogrammes 2 and 6, and component 5 of subprogramme 8, specifically contribute results to gender equality and women’s economic empowerment, while subprogrammes 4 and 9, and components 1 to 4 of subprogramme 8, address gender equality in their strategies. The delivery of results on gender-related Sustainable Development Goals and the mainstreaming of gender perspectives into the programme will be guided by the Commission’s gender equality policy and implementation plan (2019–2023).
- 19.22 In line with the United Nations Disability Inclusion Strategy and the Commission’s disability inclusion policy, subprogramme 6 incorporates disability-specific interventions to protect and empower persons with disabilities and, ultimately, to build disability-inclusive societies. ESCAP will also provide support to member States to charter a course of disability-inclusive development building, based on the outcome of the 2022 high-level intergovernmental meeting on the final review of the Asian and Pacific Decade of Persons with Disabilities, 2013–2022, in line with the Convention on the Rights of Persons with Disabilities.

Programme performance in 2021

Impact of the pandemic

- 19.23 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in spite of ESCAP adopting new work methods early in the pandemic to continue delivering knowledge products and services to and providing platforms for exchanges and consensus-building for its member States. The pandemic situation had an impact on achieving the planned targets for result 2 of subprogramme 5, and led to delays in the timely implementation of planned activities for result 1 of subprogramme 8, component 3, as well as result 1 of subprogramme 9. At the same time, the shift to virtual modes mitigated the impact of the pandemic on the implementation of mandates and offered additional opportunities for more frequent interactions with stakeholders, albeit in shortened formats, and led to an increase in capacity-building activities offered online. In addition, ESCAP supported member States on issues related to the COVID-19 pandemic, within the overall scope of the objectives

and in the context of its framework, to support the socioeconomic response to COVID-19, as described in the result narratives of subprogrammes 1 and 5 to 7.

Legislative mandates

19.24 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

61/16	Strengthening of the Economic and Social Council	74/3	Political declaration of the high-level meeting to review progress made in addressing the priorities of small island developing States through the implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway
66/288	The future we want		
67/10	Cooperation between the United Nations and the Eurasian Economic Community		
69/15	SIDS Accelerated Modalities of Action (SAMOA) Pathway	74/4	Political declaration of the high-level political forum on sustainable development convened under the auspices of the General Assembly
69/137	Programme of Action for Landlocked Developing Countries for the Decade 2014-2024	74/15	Political Declaration of the High-level Midterm Review on the Implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024
69/142	Realizing the Millennium Development Goals and other internationally agreed development goals for persons with disabilities towards 2015 and beyond		
69/277	Political declaration on strengthening cooperation between the United Nations and regional and subregional organizations	74/216	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development
69/283	Sendai Framework for Disaster Risk Reduction 2015–2030		
69/288	Comprehensive review of United Nations system support for small island developing States	74/228	Role of the United Nations in promoting development in the context of globalization and interdependence
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)	74/235 74/238	Women in development Operational activities for development of the United Nations system
70/1	Transforming our world: the 2030 Agenda for Sustainable Development	74/253	Enhancing accessibility for persons with disabilities to conferences and meetings of the United Nations system
70/170	Towards the full realization of an inclusive and accessible United Nations for persons with disabilities	74/270	Global solidarity to fight the coronavirus disease 2019 (COVID-19)
70/192	Follow-up to the International Conference on Financing for Development	74/297	Progress in the implementation of General Assembly resolution 71/243 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system
71/312	Our ocean, our future: call for action		
71/321	Enhancing the participation of indigenous peoples' representatives and institutions in meetings of relevant United Nations bodies on issues affecting them	74/306	Comprehensive and coordinated response to the coronavirus disease (COVID-19) pandemic
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system	74/307 75/15	United response against global health threats: combating COVID-19 Cooperation between the United Nations and the Association of Southeast Asian Nations
73/133	Graduation of countries from the least developed country category	75/16	Cooperation between the United Nations and the Organization of Islamic Cooperation
73/254	Towards global partnerships: a principle-based approach to enhanced cooperation between the United Nations and all relevant partners	75/90	The situation in Afghanistan

Section 19 Economic and social development in Asia and the Pacific

75/154	Inclusive development for and with persons with disabilities	76/154	Implementation of the Convention on the Rights of Persons with Disabilities and the Optional Protocol thereto: participation
75/175	Human rights and extreme poverty		
75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system	76/163	The right to development
		76/200	Agricultural technology for sustainable development
75/268	Cooperation between the United Nations and the Shanghai Cooperation Organization	76/202	Promoting sustainable consumption and production patterns for the implementation of the 2030 Agenda for Sustainable Development, building on Agenda 21
75/269	Cooperation between the United Nations and the Organisation for Economic Co-operation and Development (OECD)	76/203	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States
75/288	Cooperation between the United Nations and the Pacific Islands Forum		
75/290 A	Review of the implementation of General Assembly resolution 72/305 on the strengthening of the Economic and Social Council	76/211	Combating sand and dust storms
	Review of the implementation of General Assembly resolutions 67/290 on the format and organizational aspects of the high-level political forum on sustainable development and 70/299 on the follow-up and review of the 2030 Agenda for Sustainable Development at the global level	76/213	Science, technology and innovation for sustainable development
	Economic and Social Council	76/216	Follow-up to the Fourth United Nations Conference on the Least Developed Countries
		76/217	Follow-up to the second United Nations Conference on Landlocked Developing Countries
75/290 B	High-level political forum on sustainable development	76/218	Implementation of the Third United Nations Decade for the Eradication of Poverty (2018–2027)
75/324	Cooperation between the United Nations and the Economic Cooperation Organization	76/219	Eradicating rural poverty to implement the 2030 Agenda for Sustainable Development
76/72	Oceans and the law of the sea		
76/136	Promoting social integration through social inclusion	76/221	South-South Cooperation
		76/222	Agriculture development, food security and nutrition
76/148	Rights of indigenous peoples		

Economic and Social Council resolutions

37 (IV)	Economic Commission for Asia and the Far East	2018/5	Strategies for eradicating poverty to achieve sustainable development for all
1895 (LVII)	Change of name of the “Economic Commission for Asia and the Far East” to “Economic and Social Commission for Asia and the Pacific”	2019/6	Addressing inequalities and challenges to social inclusion through fiscal, wage and social protection policies
		2019/27	Support to Non-Self-Governing Territories by the specialized agencies and international institutions associated with the United Nations
1998/46	Further measures for the restructuring and revitalization of the United Nations in the economic, social and related fields	2020/5	Strengthening coordination of the statistical programmes in the United Nations system
2013/19	Conclusion of the work of the Commission on Sustainable Development	2020/23	Progress in the implementation of General Assembly resolution 71/243 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system
2014/11	Follow-up to the International Conference on Financing for Development		
2015/30	Restructuring the conference structure of the Economic and Social Commission for Asia and the Pacific to be fit for the evolving post-2015 development agenda	2021/7	Mainstreaming a gender perspective into all policies and programmes in the United Nations system
2016/11	Committing to the effective implementation of the 2030 Agenda for Sustainable Development in Asia and the Pacific	2021/11	Report of the Committee for Development Policy on its twenty-third session

Economic and Social Commission for Asia and the Pacific resolutions

66/1	Incheon Declaration	73/1	A conference structure of the Commission aligned with the 2030 Agenda for Sustainable Development
66/9	Full and effective implementation of the Beijing Platform for Action and its regional and global outcomes in the Asia-Pacific region	73/2	Strengthening the regional mechanism for the implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024
66/15	Strengthening of the evaluation function of the secretariat of the Commission		
67/14	Cooperation between the Economic and Social Commission for Asia and the Pacific and other United Nations and regional and subregional organizations serving Asia and the Pacific	73/3	Advancing integrated and seamless connectivity for sustainable development in Asia and the Pacific
68/8	Enhancing coordination within the United Nations system and cooperation with regional organizations for promoting regional development	73/5	Strengthening Asia-Pacific’s support for the United Nations Conference to Support the Implementation of Sustainable Development Goal 14
68/9	Terms of reference of the Advisory Committee of Permanent Representatives and Other Representatives Designated by Members of the Commission	73/9	Regional road map for implementing the 2030 Agenda for Sustainable Development in Asia and the Pacific
69/3	Achieving the Millennium Development Goals in Asia and the Pacific: Bangkok Declaration of the Asia-Pacific Least Developed Countries, Landlocked Developing Countries and Small Island Developing States on the Development Agenda beyond 2015	74/1	Supporting the smooth transition of the least developed countries in Asia and the Pacific towards a sustainable graduation
		74/6	Advancing disaster-related statistics in Asia and the Pacific
		74/10	Implementation of the Ministerial Declaration on Enhancing Regional Economic Cooperation and Integration to Support the Implementation of the 2030 Agenda in Asia and the Pacific
70/1	Implementation of the Bangkok Declaration on Regional Economic Cooperation and Integration in Asia and the Pacific	75/1	Implementation of the outcome of the Euro-Asian Regional Midterm Review of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024
70/10	Implementation of the Bangkok Declaration of the Asia-Pacific region on the United Nations Development Agenda beyond 2015		
71/2	Implementation of the Programme of Action for the Least Developed Countries for the Decade 2011–2020 in Asia and the Pacific	75/2	Committing to strengthening the links between national, regional and global follow-up to and review of the 2030 Agenda for Sustainable Development in Asia and the Pacific
71/3	Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024	75/3	Advancing partnerships within and across regions for the sustainable development of Asia and the Pacific
71/4	Implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway	75/4	Strengthening regional cooperation to tackle air pollution challenges in Asia and the Pacific
72/6	Committing to the effective implementation of the 2030 Agenda for Sustainable Development in Asia and the Pacific	76/1	Strengthening cooperation to promote the conservation and sustainable use of the oceans, seas and marine resources for sustainable development in Asia and the Pacific
72/8	Fostering regional cooperation and partnerships to respond to the climate change challenge in the Asia-Pacific region		
72/9	Regional cooperation to promote the conservation and sustainable use of the oceans, seas and marine resources for sustainable development in Asia and the Pacific	76/2	Regional cooperation to address the socioeconomic effects of pandemics and crises in Asia and the Pacific
		77/1	Building back better from crises through regional cooperation in Asia and the Pacific

**Subprogramme 1
Macroeconomic policy, poverty reduction and financing for development**

Deliverables

19.25 Table 19.1 lists all cross-cutting deliverables of the programme.

Table 19.1
 Cross-cutting deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	2	11	11	11
1. Reports for the Commission	1	5	5	5
2. Reports for the Asia-Pacific Forum on Sustainable Development	1	6	6	6
Substantive services for meetings (number of three-hour meetings)	34	35	35	35
Meetings of:				
3. The Commission	10	7	10	10
4. The Asia-Pacific Forum on Sustainable Development	6	8	6	8
5. The Advisory Committee of Permanent Representatives and Other Representatives Designated by Members of the Commission	6	6	6	6
6. The expert groups on least developed countries, landlocked developing countries and small island developing States	9	4	3	3
7. The Committee for Programme and Coordination	1	1	1	1
8. The Advisory Committee on Administrative and Budgetary Questions	1	2	2	2
9. The Fifth Committee	1	2	2	2
10. The regional collaborative platform	–	6	6	4
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	3	1	2
11. On selected issues pertinent to the sustainable development of least developed countries, landlocked developing countries and small island developing States	1	3	1	2
Seminars, workshops and training events (number of days)	7	–	6	5
12. Subregional workshops on priorities of the programmes of action for least developed countries, landlocked developing countries and small island developing States	4	–	3	3
13. Policy dialogues based on the <i>Asia-Pacific Countries with Special Needs Development Report</i>	3	–	3	2
Publications (number of publications)	3	3	5	5
14. ESCAP theme study	1	1	1	1
15. <i>Asia-Pacific Countries with Special Needs Development Report</i>	1	1	1	1
16. On the implementation of the 2030 Agenda	1	1	1	1
17. <i>Asia-Pacific Sustainable Development Journal</i>	–	–	2	2
Technical materials (number of materials)	4	6	4	4
18. On issues relevant to Asia-Pacific least developed countries, landlocked developing countries and small island developing States	4	6	4	4
C. Substantive deliverables				
Databases and substantive digital materials: Asia-Pacific Sustainable Development Goal partnership data portal; Sustainable Development Goal help desk for government officials and technical experts; knowledge platform to support least developed countries, landlocked developing countries and small island developing States in Asia and the Pacific in implementing their relevant programmes of action.				
D. Communication deliverables				
Outreach programmes, special events and information materials: observance of United Nations international days, including United Nations Day; outreach programmes upon demand for the general public, including for academic organizations, for approximately 300 participants.				
External and media relations: press releases and op-ed articles on the work and activities of ESCAP; press conferences/press briefings and press interviews for major publications and events.				
Digital platforms and multimedia content: multimedia promotional content, including videos and educational materials for major publications and events; blog posts for the ESCAP website and content for ESCAP social media accounts.				

Evaluation activities

- 19.26 The evaluation of the Regional Action Programme for Sustainable Transport Connectivity in Asia and the Pacific, phase I (2017–2021) has guided the proposed programme plan for 2023.
- 19.27 The results and lessons of the evaluation included recommended areas for improvement and priority activities, taking into consideration the needs of member States in line with the 2030 Agenda and in the context of the COVID-19 pandemic. The results were also used to formulate the scope and delivery modalities of the new Regional Action Programme for Sustainable Transport Development in Asia and the Pacific (2022–2026), which was adopted at the fourth session of the Ministerial Conference on Transport held in December 2021 and has been reflected in the strategy and deliverables of subprogramme 3.
- 19.28 The following evaluations are planned for 2023:
- Office of Internal Oversight Services report on the macroeconomic policy, poverty reduction and financing for development subprogramme;
 - Evaluation of the energy subprogramme;
 - Evaluation of the Asian and Pacific Centre for Transfer of Technology.

Programme of work

Subprogramme 1

Macroeconomic policy, poverty reduction and financing for development

Objective

- 19.29 The objective, to which this subprogramme contributes, is to strengthen the capacity of member States to achieve stable, inclusive and sustainable economic development in Asia and the Pacific.

Strategy

- 19.30 To contribute to the objective, the subprogramme will promote a more balanced and multidimensional development approach, beyond the primary focus on economic growth, and support member States in transforming their economies in a manner that is consistent with the aspirations of the 2030 Agenda, contributing in particular to the achievement of Sustainable Development Goals 1, 8 to 10, 12 and 17. Specifically the subprogramme will:
- Support member States in exploring, adopting and mainstreaming economic development strategies and policies and financing strategies through direct technical advisory and capacity-building efforts and the facilitation of knowledge exchange and consensus-building among member States;
 - Facilitate policy discussions, exchanges of ideas and experiences, and consensus-building among member States on economic policies and financing issues through the Committee on Macroeconomic Policy, Poverty Reduction and Financing for Development of the Commission, including the Consultative Group on Financing Strategies for the Sustainable Development Goals;
 - Strengthen the outreach of the subprogramme's research and knowledge products, including the *Economic and Social Survey of Asia and the Pacific*, the *Financing for Development in Asia and the Pacific* series and policy papers, through policy dialogues and closer cooperation with government bodies, policy think tanks and United Nations country teams to further integrate the subprogramme's research and capacity-building work;

- (d) Provide substantive inputs to global and United Nations system-wide processes, task teams and publications coordinated by the Department for Economic and Social Affairs, and to United Nations system-wide initiatives, in particular on financing for development issues and, as needed, the development of United Nations Sustainable Development Cooperation Frameworks.

19.31 The above-mentioned work is expected to result in:

- (a) Evidence-based development strategies and economic policies for strengthened economic resilience, inclusive development and environmental sustainability;
- (b) The strengthened ability of member States, in particular of the least developed countries, to mobilize and allocate financial resources for sustainable development by mainstreaming financing aspects into sustainable development efforts;
- (c) The improved ability of member States to employ economic and financial levers to promote the transformation of their economies towards resilient, inclusive and sustainable development pathways.

Programme performance in 2021

Leveraging capital markets and bond issuance for financing sustainable development

19.32 A well-functioning, deep and liquid capital and bond market is essential for broadening the fiscal space for and supporting investments in sustainable development. Although this option is used by developed countries and several developing countries, most least developed countries in Asia and the Pacific have rarely, if ever, leveraged this financing option.

19.33 The subprogramme has been supporting the development of domestic capital markets and the use of bond issuance to finance sustainable development through its research publications and capacity-building efforts. In particular, it provided extensive assistance to Bhutan in exploring options for better leveraging bond issuance, including by supporting the Government of Bhutan in the establishment of a cross-departmental task force to oversee the process, providing advice on the legal framework to guide sovereign bond issuance and providing capacity-building for officials and policymakers in Bhutan, including study tours to other member States to learn from their experiences through the South-South exchange.

19.34 Progress towards the objective is presented in the performance measure below (see table 19.2).

Table 19.2
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
–	Bhutan successfully completed its first-ever issuance of sovereign bonds to support the economic recovery from the COVID-19 pandemic	Bhutan successfully completed another issuance of sovereign bonds with a longer 10-year maturity and established the institutions and capacity for future sovereign bond issuances

Planned results for 2023

Result 1: Asia-Pacific countries take action to transform their economies for sustainable development

Programme performance in 2021 and target for 2023

- 19.35 The subprogramme's work contributed to five member States (Bangladesh, Kyrgyzstan, Mongolia, Pakistan and Samoa) taking policy actions, informed by knowledge products prepared under the subprogramme, intended to transform their economies by making them more resilient, inclusive and sustainable, which met the planned target.
- 19.36 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 19.3).

Table 19.3
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Enhanced understanding of financing needs and strategies by member States, as demonstrated by 94 per cent of participants expressing their ability to design and implement policies concerning the 2030 Agenda and financing for development	Five member States commenced the design of economic policies and the implementation of financing strategies for the implementation of the 2030 Agenda, informed by knowledge products prepared under the subprogramme	Five member States (Bangladesh, Kyrgyzstan, Mongolia, Pakistan, Samoa) took policy actions on transforming towards resilient, inclusive and sustainable economies	Three policy actions by member States aimed at transforming their economies according to the ambitions of the 2030 Agenda and informed by knowledge products prepared by the subprogramme	Three policy actions by member States aimed at transforming their economies according to the ambitions of the 2030 Agenda

Result 2: enhanced capacity of member States in designing policies and strategies for resilient economies

Programme performance in 2021 and target for 2023

- 19.37 The subprogramme's work contributed to member States deciding to establish the Consultative Group on Financing Strategies for the Sustainable Development Goals and requesting further support in areas such as pandemic economic recovery, poverty alleviation and the transformation towards resilient, inclusive and sustainable economies at the third session of the Committee on Macroeconomic Policy, Poverty Reduction and Financing for Development. This met the planned target of member States building consensus on strategies and policies towards more resilient economies.
- 19.38 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 19.4).

Table 19.4
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	Member States decided to establish the Consultative Group on Financing Strategies for the Sustainable Development Goals and requested further support in areas such as pandemic economic recovery, poverty alleviation and the transformation towards resilient, inclusive and sustainable economies	Three member States implement national strategies and policy initiatives towards more resilient economies, including but not limited to fiscal and financial measures	Three member States take policy actions to implement national strategies and policy initiatives to increase the resilience of their economies

Result 3: strengthening financing for sustainable development, with a focus on innovative and emerging financing options in the Asia-Pacific region

Proposed programme plan for 2023

19.39 Financing for sustainable development has been mainstreamed as one primary focus of the subprogramme since 2017. The subprogramme’s work has covered a series of sub-issues, including public finance and resource mobilization; financial market development and digital financing; financial inclusion and financing for micro-, small and medium-sized enterprises; climate finance and innovative financing options for sustainable development; and infrastructure financing, as well as regional and global cooperation on multilateral policy issues such as tax cooperation and debt relief.

Lessons learned and planned change

19.40 The lesson for the subprogramme was that the approach of providing close support to the Government of Bhutan in sovereign bond issuance, including through technical advice on legislation and guidance on policy design and implementation, could be leveraged in other contexts. In applying the lesson, the subprogramme will focus on fostering and maintaining close and direct working relationships with government departments, on innovative options for financing sustainable development, such as thematic bonds and debt for climate swaps instruments, as well as on new business models and modalities of financial services in the age of digitization. The subprogramme will also leverage its engagement in global financing for development processes, in collaboration with several United Nations entities, in particular resident coordinator offices and United Nations country teams, UNDP and the Department of Economic and Social Affairs, and in partnership with groups such as the Partnership for Action on Green Economy and the Green Fiscal Policy Network, to strengthen the synergy of its work with United Nations-wide initiatives and amplify the outreach of its policy work and knowledge products.

19.41 Expected progress towards the objective is presented in the performance measure below (see table 19.5).

Table 19.5
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Enhanced understanding of financing needs and strategies among policymakers in member States to effectively pursue the Sustainable Development Goals	New initiatives by seven member States (Bangladesh, Brunei Darussalam, China, Indonesia, Kazakhstan, Samoa and Sri Lanka) to design and implement financing strategies to bridge financing gaps for the implementation of the 2030 Agenda	New policy initiatives or reforms by three member States (Bangladesh, Cambodia and Vanuatu) to strengthen financing and resource mobilization and allocation for sustainable development	New policy initiatives or reforms by three member States to strengthen financing and resource mobilization and allocation for sustainable development	New policy initiatives or reforms by three member States to strengthen financing and resource mobilization and allocation for sustainable development

Deliverables

19.42 Table 19.6 lists all deliverables of the subprogramme.

Subprogramme 2 Trade, investment and innovation

Objective

- 19.43 The objective, to which this subprogramme contributes, is to strengthen the capacity of member States to implement policies and programmes that more effectively harness the potential of trade, investment, innovation, technology and enterprise development for sustainable development and regional integration in Asia and the Pacific.

Strategy

- 19.44 To contribute to the objective, the subprogramme will:
- (a) Support member States in formulating and implementing policies and measures to facilitate trade, investment and innovation and to reduce unnecessary barriers in these areas in support of sustainable development, with a specific focus on the needs of least developed and landlocked countries;
 - (b) Build the capacity of member States, in cooperation with global and regional partners such as the Asian Development Bank (ADB), the United Nations Conference on Trade and Development (UNCTAD) and the World Trade Organization, to negotiate and implement trade and investment agreements and to design and implement trade and investment facilitation policies and measures, including through the adoption of paperless trade systems;
 - (c) Provide capacity-building in close cooperation with the Asian and Pacific Centre for Transfer of Technology, including workshops, training activities and policy advice; develop knowledge products on sustainable foreign direct investment (FDI), innovation, technology cooperation and transfer, emerging and frontier technologies, responsible and inclusive business, social

enterprise, impact investment and innovative finance for women's entrepreneurship; and support member States in making progress towards the achievement of Sustainable Development Goals 3, 5 to 9, 13 and 17;

- (d) Support member States and micro-, small and medium-sized enterprises in the areas of trade facilitation and support and trade digitization, such as paperless and contactless trade, to maintain trade flows, in particular with regard to critical goods linked to COVID-19-related trade vulnerabilities;
- (e) Support member States in formulating policies for sustainable FDI, infrastructure financing and micro-, small and medium-sized enterprises, with a key focus on private sector engagement through the ESCAP Sustainable Business Network and on developing innovative financial and digital tools to support women entrepreneurs with regard to reducing vulnerabilities in times of crisis;
- (f) Support regional cooperation platforms and expand expert networks in the areas of trade, investment, technology and innovation and sustainable business, including through public-private partnerships, for effective knowledge dissemination and peer learning.

19.45 The above-mentioned work is expected to result in:

- (a) Reduced trade costs and increased participation and competitiveness of companies, especially micro-, small and medium-sized enterprises, in international trade;
- (b) The adoption of more effective rules and procedures governing trade, leading to more efficient trade outcomes aligned with the Sustainable Development Goals;
- (c) The adoption of policies and programmes aimed at achieving more inclusive and sustainable outcomes of business and investment activities, including sustainable infrastructure financing and public-private partnerships;
- (d) The integration of inclusivity and sustainability dimensions into technology and innovation policies in the region;
- (e) The increased resilience of supply chains by enabling continued trade activities and using technology and innovation to mitigate the impact of COVID-19 and future pandemics, as well as other disasters.

Programme performance in 2021

Increased sustainable and inclusive trade facilitation measures

19.46 Trade facilitation aims at reducing the red tape and unnecessary barriers associated with engaging in international trade and making it easier for all stakeholders to engage and benefit from trade. To make trade more sustainable and inclusive, trade facilitation measures can be targeted at groups and sectors with special needs, such as micro-, small and medium-sized enterprises, women traders and the agricultural sector. The environmental impact of trade facilitation also needs to be considered. The subprogramme has actively promoted sustainable and inclusive trade facilitation through research and capacity-building activities since 2017. In 2021, the subprogramme rolled out an e-learning course on enhancing the effectiveness of trade information portals and organized its third regional online course on trade facilitation and sustainable development, in cooperation with the International Institute for Trade and Development in Thailand, UNCTAD and the International Trade Centre. It also issued a primer on quantifying the environmental benefits of trade facilitation, as part of the *Asia-Pacific Trade and Investment Report 2021* on accelerating climate-smart trade and investment, a report produced in partnership with UNCTAD and UNEP. The subprogramme also led the 2021 United Nations Global Survey on Digital and Sustainable Trade Facilitation, in collaboration with other United Nations regional commissions, and delivered regional and subregional reports in collaboration with ADB, the Association of Southeast Asian Nations

(ASEAN) and other subregional organizations to support countries in understanding the remaining gaps in implementing sustainable trade facilitation measures.

19.47 Progress towards the objective is presented in the performance measure below (see figure 19.I).

Figure 19.I

Performance measure: implementation rate of sustainable trade facilitation measures in Asia and the Pacific (annual)

(Percentage)

^a As data from the United Nations Global Survey on Digital and Sustainable Trade Facilitation is available on a biennial basis, data for 2020 is estimated as the average of the data for 2019 and 2021.

Planned results for 2023

Result 1: harnessing innovative technologies to enhance women’s access to financial services

Programme performance in 2021 and target for 2023

19.48 The subprogramme’s work contributed to 8,275 women entrepreneurs accessing financial services with support from ESCAP, which exceeded the planned target of 5,940.

19.49 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 19.II).

Figure 19.II

Performance measure: number of women entrepreneurs accessing financial services with support from the Economic and Social Commission for Asia and the Pacific (cumulative)

Result 2: making trade processes more efficient, transparent and safer through paperless and contactless trade

Programme performance in 2021 and target for 2023

- 19.50 The subprogramme’s work contributed to five countries (Azerbaijan, Bangladesh, China, the Islamic Republic of Iran and the Philippines) ratifying the Framework Agreement on Facilitation of Cross-border Paperless Trade in Asia and the Pacific, which did not meet the planned target of six countries, as several countries experienced delays in completing the domestic procedures required for accession to the treaty.
- 19.51 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 19.III).

Figure 19.III
Performance measure: number of countries having acceded to or ratified the Framework Agreement on Facilitation of Cross-border Paperless Trade in Asia and the Pacific (cumulative)

Result 3: strengthened commitment of the private sector in support of the Sustainable Development Goals in Asia and the Pacific

Proposed programme plan for 2023

- 19.52 The active engagement and participation of the private sector is essential to achieving the Sustainable Development Goals. Private sector engagement is needed to mobilize financing for delivering the 2030 Agenda, to scale up investment and to drive innovation and technology. To this end, the subprogramme has been working with the private sector through the ESCAP Sustainable Business Network, which consists of representatives from businesses across a range of industries from the region. The Network actively promotes inclusive, resilient and sustainable development through its task forces, and works towards the achievement of the 2030 Agenda. The ESCAP Sustainable Business Network is also the co-organizer of the Asia-Pacific Business Forum, a regional dialogue and networking event that engages businesses committed to sustainable development across Asia and the Pacific. To drive investment towards projects aligned with the Sustainable Development Goals, the Network has also helped to leverage private sector finance for resilient and sustainable infrastructure development through the Infrastructure Financing and Public-Private Partnership Network of Asia and the Pacific.

Lessons learned and planned change

- 19.53 The lesson for the subprogramme was that it needed to better engage the private sector in sustainable development and climate action and enhance the capacities and knowledge of businesses in these areas, especially micro-, small and medium-sized enterprises and businesses led by women.

Part V Regional cooperation for development

Furthermore, there was an opportunity to rally businesses in support of the goal of net zero emissions. In applying the lesson, the subprogramme will collaborate with the ESCAP Sustainable Business Network in developing an Asia-Pacific “Green Deal” for businesses and facilitate the adoption of the declaration by the members of the Network at the Asia-Pacific Business Forum in 2022. Consultations on implementing the Green Deal will be undertaken at the meetings of the Network planned for the second and fourth quarters of 2023.

19.54 Expected progress towards the objective is presented in the performance measure below (see table 19.7).

Table 19.7
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
–	The private sector supported the idea for an Asia-Pacific Green Deal for businesses in the Asia-Pacific region	The private sector developed a draft of an Asia-Pacific Green Deal for businesses and gave its full support thereto	A number of private sector organizations adopt an Asia-Pacific Green Deal for businesses	An increased number of private sector organizations pledge their support to an Asia-Pacific Green Deal for businesses and sign a declaration to that effect

Deliverables

19.55 Table 19.8 lists all deliverables of the subprogramme.

Subprogramme 3

Transport

Objective

- 19.56 The objective, to which this subprogramme contributes, is to achieve sustainable transport connectivity, logistics and mobility in the Asia-Pacific region.

Strategy

- 19.57 To contribute to the objective, the subprogramme will:
- (a) Serve as the secretariat for the Intergovernmental Agreement on the Asian Highway Network, the Intergovernmental Agreement on the Trans-Asian Railway Network and the Intergovernmental Agreement on Dry Ports, and provide technical expertise to the intergovernmental deliberations of the relevant working groups, including on connectivity issues of particular relevance to landlocked developing countries;
 - (b) Provide technical assistance and conduct related research and analysis on land and maritime transport, with due consideration for the specific needs of landlocked developing countries and small island developing States, focusing on harmonized operational transport standards, regulations and practices, including efficient operational arrangements and harmonized legal frameworks for multimodal transport, and facilitate systematic regional and, as appropriate, interregional dialogue to foster regional and interregional connectivity;
 - (c) Facilitate the exchange of good practices on the utilization of new and emerging technologies, and support the wider deployment of smart transport systems through the development of a regional road map, by raising awareness developing capacity-building activities and knowledge products;
 - (d) Undertake policy advocacy and capacity-building in the areas of sustainable urban transport and low greenhouse gas emissions and logistics, including by promoting and facilitating an accelerated transition to electric mobility, clean and energy-efficient transport and environmentally friendly supply chains and applying the sustainable urban transport index developed by ESCAP;
 - (e) Provide technical assistance in the areas of road safety and inclusive transport and mobility, including through a regional plan of action for road safety and regional guidelines addressing accessibility, to support reductions in poverty and inequality and promote inclusive transport for those in vulnerable situations, including women, older persons and persons with disabilities;
 - (f) Collaborate on all of the above with relevant United Nations agencies, funds and programmes, including the International Maritime Organization, other United Nations regional commissions and agencies and regional development banks, including the Islamic Development Bank; international, regional and subregional organizations, including the Economic Cooperation Organization, the International Transport Workers' Federation, the Organization for Cooperation between Railways, the Shanghai Cooperation Organization and the Eurasian Economic Union; and research institutes, associations and other civil society organizations. These work streams will support member States in making progress towards the achievement of Sustainable Development Goals 3, 7, 9, 11 to 13 and 17.
- 19.58 The above-mentioned work is expected to result in:
- (a) Increased measures and initiatives to develop a more sustainable and resilient transport infrastructure along the regional transport networks (Asian highways, trans-Asian railways and dry ports) and maritime ports to support freight and passenger operations that are affordable, safe, accessible and environmentally friendly;

- (b) Increased measures and initiatives to enhance regional land, maritime and interregional transport connectivity to preserve regional transport linkages and foster regional cooperation to support interregional and intraregional trade and people connectivity, further supporting the realization of the 2030 Agenda;
- (c) The formulation and implementation of sustainable transport and mobility policy initiatives in member countries, including the planning and development of urban public transport systems, measures to promote the use of low-greenhouse-gas-emission transport and smart mobility approaches, and measures to improve transport safety and promote inclusive transport in the region.

Programme performance in 2021

Strengthened science-policy interface in the transport sector

19.59 The Asia-Pacific region is lagging in its progress towards achieving the transport-related Sustainable Development Goals. One of the constraints is the lack of a mechanism that supports evidence-based policy development in the transport sector, particularly with regard to comprehensive and integrated approaches towards the achievement of Goals 3, 7, 9 and 11 to 13. The subprogramme facilitated the establishment of a mechanism that allows for collaborative development and the exchange of knowledge products and innovative practices and facilitates the dissemination of information and data in the transport sector. The subprogramme analysed approximately 100 transport research institutions across the region, which were then classified according to the research and expertise they cover and the types of training (e.g. academic, professional, vocational) they offer. Based on this information, a draft recommendation was prepared on ways to set up, launch and operate the research network mechanism, which included references to examples and good practices. In addition, a comprehensive study on a sustainable transport development training programme for transport professionals was prepared. In September 2021, transport officials from 25 ESCAP member countries, in close consultation with transport research institutions across the region, discussed these findings at a regional conference organized by ESCAP. The officials confirmed the need for a transport research and education network, agreed on the proposed network design and further recognized that the recommended training programme would contribute to bridging the regional knowledge gap on sustainable transport.

19.60 Progress towards the objective is presented in the performance measure below (see table 19.9).

Table 19.9
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
Member States, through the evaluation of the implementation of the Regional Action Programme for Sustainable Transport Connectivity in Asia and the Pacific, reflected on the past and identified the need to forge effective partnerships with various sectors, including academic institutions, in implementing the Regional Action Programme to achieve transport-related Sustainable Development Goals	Member States and transport research institutions engaged in developing a proposal to close the science-policy gap in the transport sector	Transport ministers of the Asia-Pacific region endorsed the creation of the Transport Research and Education Network in the Ministerial Declaration adopted at the fourth Ministerial Conference on Transport

Planned results for 2023

Result 1: realigning the region’s priorities towards sustainable transport connectivity in Asia and the Pacific

Programme performance in 2021 and target for 2023

- 19.61 The subprogramme’s work contributed to the adoption of the Regional Action Programme for Sustainable Transport Development in Asia and the Pacific (2022–2026) by ESCAP member States at the fourth Ministerial Conference on Transport, which met the planned target.
- 19.62 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 19.10).

Table 19.10
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Countries further identified key activities to accelerate the implementation of the Regional Action Programme for Sustainable Transport Connectivity in Asia and the Pacific	Countries participated in the evaluation of the implementation of the first phase of the Regional Action Programme and initiated discussions on areas to be added or strengthened in the second phase	ESCAP member States adopted the Regional Action Programme for Sustainable Transport Development in Asia and the Pacific (2022–2026) at the fourth session of the Ministerial Conference on Transport	Countries initiate the implementation of the second phase of the Regional Action Programme and other policy frameworks and tools adopted at the fourth session of the Ministerial Conference on Transport	In line with the “Digitalization of transport” theme of the Regional Action Programme, countries reach consensus on the regional road map for smart transport systems in the Asia-Pacific region

Result 2: accelerating transformative action in transport for the delivery of the Sustainable Development Goals

Programme performance in 2021 and target for 2023

- 19.63 The subprogramme’s work contributed to the adoption of seven regional transport priority areas, including three new priority areas, that accelerate impactful change towards sustainability while recovering from the COVID-19 pandemic, which met the planned target.
- 19.64 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 19.11).

Table 19.11
Performance measure

2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)	2023 (planned)
ESCAP member States continued to formulate and implement transport policies and measures in priority areas, as indicated in the Regional Action Programme for Sustainable Transport Connectivity in Asia and the Pacific, phase I (2017–2021)	ESCAP member States advanced discussions on priority areas that would balance economic, social and environmental dimensions of transport and support the decade of action for the Sustainable Development Goals by 2030	ESCAP member States adopted seven regional transport priority areas, including three new priority areas, that accelerate impactful change towards sustainability while recovering from the COVID-19 pandemic	Eight new policies and measures by member States that intensify support for the efficiency and resilience of supply chains, the environmental dimensions of transport systems and improvements in transport safety to accelerate the progress towards achieving transport-related targets of the Sustainable Development Goals	Eight new policies and measures by member States that intensify support for the efficiency and resilience of supply chains, the environmental dimensions of transport systems and improvements in transport safety to accelerate the progress towards achieving transport-related targets of the Sustainable Development Goals

Result 3: leveraged regional transport network to address the environmental dimension of transport development and international supply chains

Proposed programme plan for 2023

- 19.65 Transport emits approximately 23 per cent of the energy-related CO₂ that feeds global warming. Transport emissions have grown faster than those of any other sector over the past 50 years, and demand for transport will continue to grow in the coming decades. CO₂ emissions from transport activity could increase by 60 per cent by 2050.
- 19.66 The subprogramme has been supporting the development of the regional land transport network of Asia and the Pacific through dedicated intergovernmental agreements and the three Working Groups on the Asian Highway, on the Trans-Asian Railway Network and on Dry Ports. It has introduced and facilitated the expansion of the discussion to include operational aspects of international transport. At its sixth session, the Committee on Transport recommended a more holistic approach to strengthen the environmental and social dimensions of transport development and operations.

Lessons learned and planned change

- 19.67 The lesson for the subprogramme was that the existing intergovernmental platforms, originally designed to discuss infrastructure connectivity, could also be used as the means to expand regional cooperation on connectivity to support national, subregional and regional initiatives that address the environmental dimension of transport development and operations. In applying the lesson, the subprogramme will use the regular meetings of the three Working Groups to advance the measures enhancing the environmental sustainability of freight transport. By promoting exchanges on relevant subregional initiatives and targeted capacity-building, the subprogramme intends to facilitate regional activities that address the environmental dimension of transport development and operations.
- 19.68 Expected progress towards the objective is presented in the performance measure below (see table 19.12).

Table 19.12
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Countries utilized the Working Groups on the Asian Highway, on the Trans-Asian Railway Network and on Dry Ports to discuss regional transport connectivity issues	ESCAP member States encouraged a holistic approach to strengthen the environmental and social dimensions of transport development and operations	Countries utilized the Working Groups to discuss a regional approach towards enhancing the sustainability of freight transport, listing the environmental dimension of transport development among its priorities	Countries have enhanced knowledge and capacity to carry out activities addressing the environmental dimension of transport development and operations along the regional land transport network and supply chains	Countries institutionalize an agenda to address the environmental dimension of transport development and operations, and implement projects and policy actions along the regional land transport network and supply chains

Deliverables

19.69 Table 19.13 lists all deliverables of the subprogramme.

Table 19.13
Subprogramme 3: deliverables for the period 2021–2023, by category and subcategory

C. Substantive deliverables

Databases and substantive digital materials: Asian Highway database, the Trans-Asian Railway Network and the network of dry ports.

D. Communication deliverables

Outreach programmes, special events and information materials: materials on road safety for regional and global access.

External and media relations: press releases, blogs and op-ed articles on the Asian Highway Network, environmentally sustainable transport, the Trans-Asian Railway Network, dry ports and intermodal transport, connecting to global supply chains, urban transport, and safe and inclusive transport; press interviews for major publications and events.

Digital platforms and multimedia content: web pages on the Asian Highway Network, environmentally sustainable transport, the Trans-Asian Railway Network, dry ports and intermodal transport, connecting to global supply chains and safe and inclusive transport.

Subprogramme 4 Environment and development

Objective

- 19.70 The objective, to which this subprogramme contributes, is to reduce the negative impacts of growth on the natural environment and to improve human well-being in urban and rural environments through building the capacity of member States to strengthen climate action and sustainable resource use, realize sustainable urban development and eliminate pollution and waste.

Strategy

- 19.71 To contribute to the objective, the subprogramme will:
- (a) Support member States in the development of ambitious climate action policies and plans aligned with the Paris Agreement and the decisions adopted at the twenty-sixth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, the sixteenth session of the Conference of the Parties serving as the Meeting of the Parties to the Kyoto Protocol and the third session of the Conference of the Parties serving as the Meeting of the Parties to the Paris Agreement, as well as other topical decisions of such sessions, and in the implementation of these policies and plans at the regional, national, subnational and local levels;
 - (b) Generate evidence on status and trends related to the common environment in Asia and the Pacific, including from an urban perspective, and provide technical support for integrated policies to protect the common environment, eliminate pollution and strengthen natural resource management, including through multi-stakeholder engagement and partnerships, while taking into account the participation of women in decision-making processes and the health impacts of environmental issues, with a focus on countries in special situations;

- (c) Build the capacity of city officials to strengthen urban planning processes, provide technical and policy support to facilitate the adoption of urban resilience strategies, the application of appropriate smart technologies and the financing of urban infrastructure, and increase awareness of sustainable urban solutions, including issues related to environmental protection, resource consumption, infrastructure needs, air pollution, climate change and disaster risk reduction;
- (d) Strengthen regional cooperation to eliminate pollution and waste, including by coordinating the regional implementation of the United Nations Decade of Ocean Science for Sustainable Development, by, inter alia, providing a participatory, multi-stakeholder dialogue platform for the Asia-Pacific Day for the Ocean, and by promoting the implementation of international conventions and region-wide initiatives, as appropriate.

19.72 The above-mentioned work is expected to result in:

- (a) Enhanced action to address climate change and accelerate the implementation of the Paris Agreement in Asia-Pacific countries;
- (b) More sustainable and resilient communities and reduced negative impacts of urbanization;
- (c) Scenarios, policies and plans to address the risk of air pollution in the region;
- (d) Enhanced action to protect the environment and strengthen conservation and the sustainable management of natural resources, biodiversity and ecosystems, including oceans;
- (e) The inclusion of environmental action as a core element of development policies by member States that lead to more sustainable and more resilient economies.

Programme performance in 2021

Strengthened sustainability of food systems through linking poverty reduction, agricultural development and climate-smart mechanization solutions

19.73 The food system is a major driver of environmental degradation. Food production generates vast quantities of greenhouse gases that warm the planet and is responsible for 37 per cent of emissions. The threat of climate change, biodiversity loss, water crises and natural disasters increases the vulnerability of rural communities and livelihoods and in turn increases food insecurity. The subprogramme, through the Centre for Sustainable Agricultural Mechanization, supported actions for the transformation of food systems, including by linking Sustainable Development Goals 1 and 2 to reduce poverty through sustainable agricultural development, climate-smart mechanization solutions, the reduction of food loss and waste and the strengthening of food systems amid the response to COVID-19.

19.74 In September 2021, the Secretary-General convened the first United Nations Food Systems Summit as a participatory platform to launch new actions to deliver progress on all 17 Sustainable Development Goals. During the consultative process leading to the Summit, the subprogramme convened a regional consultation to facilitate the discussion of stakeholders' perspectives from Asia and the Pacific and, together with the other regional commissions, produced a joint policy brief and video. It also coordinated the involvement of member States, United Nations entities, the scientific community and other stakeholders, and convened a regional-level dialogue to identify priority actions for food systems transformation in Asia and the Pacific. The subprogramme also co-convened four "independent dialogues": two at the national level; one at the subregional level for Central Asia; and one at the regional level as a side event of the seventy-seventh session of the Commission.

19.75 Progress towards the objective is presented in the performance measure below (see figure 19.IV).

Figure 19.IV

Performance measure: number of commitments of Asia-Pacific countries on the sustainability of food systems at the United Nations Food Systems Summit

Planned results for 2023

Result 1: more ambitious nationally determined contributions to meet commitments to the Paris Agreement

Programme performance in 2021 and target for 2023

- 19.76 The subprogramme's work contributed to 40 Asia-Pacific countries updating their nationally determined contributions. Six countries demonstrated greater ambitions, which exceeded the planned target of at least two countries making their contributions more ambitious with the Commission's support.
- 19.77 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 19.14).

Table 19.14

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
A set of pathways charted as the outcome of Asia-Pacific Climate Week 2019 and as a contribution to the 2019 Climate Action Summit, including energy transition; industry transition; resilience and adaptation; nature-based solutions; transport; infrastructure, cities and local action; enhancing ambition; low carbon and climate resilient development; and access to finance	Mongolia and Myanmar conducted an effective review of their nationally determined contributions processes and Mongolia updated its contribution	40 Asia-Pacific countries updated their nationally determined contributions, 6 of which demonstrated greater ambitions	Plans updated and revised by two additional countries to make their nationally determined contributions more ambitious	Five additional member countries accelerate their climate action activities, through the revision and implementation of nationally determined contributions

Result 2: member States strengthen regional cooperation on natural resource management, adopt sustainable urban development pathways and develop climate and air pollution mitigation actions

Programme performance in 2021 and target for 2023

- 19.78 The subprogramme's work contributed to member States deliberating the terms of reference for a technical expert group on environment and development, which did not meet the planned target of an operational technical expert group on environment and development, The target was not met, as the work modalities, including full membership and the workplan, were still being negotiated. They will be presented to the seventh session of the Committee on Environment and Development for approval in 2022.
- 19.79 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 19.15).

Table 19.15

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Asia-Pacific Climate Week 2019 identified pathways for climate action in the region, and its outcome contributed to the 2019 Climate Action Summit	The Committee on Environment and Development decided to establish the technical expert group on environment and development to enhance regional exchange and to mobilize technical expertise to accelerate environmental and sustainable development action	Member States deliberated the terms of reference for a technical expert group on environment and development	Member States have enhanced access to technical expertise and capacity-building activities under the substantive coordination of the technical expert group on environment and development to accelerate environmental and sustainable development action	Member States make voluntary commitments and adopt national and/or local policies to address air pollution

Result 3: accelerated implementation of climate action

Proposed programme plan for 2023

- 19.80 The subprogramme has worked with member States to revise their nationally determined contributions to increase the levels of ambition aligned with the Paris Agreement and to incorporate a gender perspective into policies, strategies and frameworks at the national and local levels, in both urban and rural areas.

Lessons learned and planned change

- 19.81 The lesson for the subprogramme was that it needed to change the modalities of support to member States from providing analysis and knowledge products that enhance the understanding of policymakers to delivering technical support aimed at strengthening the implementation of the climate goals set forth. In applying the lesson, the subprogramme will build the capacity of policymakers to accelerate climate and pollution action by providing access to tools and methodologies that support the means of implementation (e.g. instruments for the reduction and control of greenhouse gases, policy and institutional coherence, partnerships). In addition, it will provide a regular regional update on nationally determined contributions and ensure that they are operationalized through concrete actions in critical sectors of urban development, waste

management, oceans and agriculture. The subprogramme will strengthen regional collaboration on the common environment, including through regional coordination on actions to address air pollution. It plans to further expand and strengthen its partnership base to include relevant institutions, including the German Agency for International Cooperation and United Cities and Local Governments Asia Pacific to enhance its local reach. Complementing these efforts, the subprogramme will provide accessible knowledge and capacity-building products to aid in the development of strategies that use low greenhouse gas emissions and sustainable growth solutions.

19.82 Expected progress towards the objective is presented in the performance measure below (see figure 19.V).

Figure 19.V

Performance measure: number of Asia-Pacific countries that develop local climate and/or air pollution action plans and long-term, low-carbon and low-emissions development and recovery strategies (cumulative)

Deliverables

19.83 Table 19.16 lists all deliverables of the subprogramme.

Table 19.16

Subprogramme 4: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	2	1
1. Report for the Commission	1	1	1	1
2. Report for the Committee on Environment and Development	–	–	1	–
Substantive services for meetings (number of three-hour meetings)	21	13	24	25
3. Meetings of the Committee on Environment and Development	–	–	5	–
4. Meetings of the Governing Council of the Centre for Sustainable Agricultural Mechanization	2	2	2	2
5. Meetings of the Asian and Pacific Network for Testing of Agricultural Machinery	5	5	5	5
6. Expert group meetings for the implementation of internationally agreed agendas related to the environment and development	2	1	2	2
7. Expert group meetings on sustainable and resilient cities in the Asia-Pacific region	8	4	8	8
8. Meetings of the Seoul Initiative Network on Green Growth	4	1	2	2
9. Meetings of the Asia-Pacific Urban Forum	–	–	–	6
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	9	15	5	6
10. On the sustainable management of natural resources	1	5	1	1
11. On sustainable urban development	3	3	1	1

Part V Regional cooperation for development

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
12. On sustainable agricultural mechanization	1	2	1	2
13. On sustainable economic growth	1	2	1	1
14. To support countries in Asia-Pacific to meet commitments to the Paris Agreement	3	3	1	1
Seminars, workshops and training events (number of days)	11	5	13	11
15. On the integrated management of straw residue	1	1	1	1
16. On strengthening human resources for sustainable agricultural mechanization	2	1	1	1
17. Regional forum on sustainable agricultural mechanization in Asia and the Pacific	–	–	1	1
18. On promoting sustainable agricultural mechanization through South-South cooperation	2	1	1	1
19. Asia-Pacific Day for the Ocean	1	1	1	1
20. Asia-Pacific Climate Week	5	1	5	5
21. International Day of Clean Air for blue skies	–	–	1	1
22. Executive training for high-level policy and decision-makers on environment and development	–	–	2	–
Publications (number of publications)	2	2	1	2
23. On environment and development	1	1	1	1
24. On progress towards sustainable urbanization in Asia-Pacific	1	1	–	1
Technical materials (number of materials)	5	8	4	4
25. On the environment and development	3	6	1	1
26. On agricultural machinery	2	2	3	3

C. Substantive deliverables

Consultation, advice and advocacy: advisory services for working groups on environment and development, including the Issue-based Coalition on Climate Change Mitigation; for task forces and regional initiatives on UN-Water and sustainable urban development; for the task forces of ESCAP Sustainable Business Network; and for the United Nations Special Programme for the Economies of Central Asia Working Group on Water, Energy and Environment.

Databases and substantive digital materials: e-learning courses on environment and implementation of the 2030 Agenda for regional and global access.

D. Communication deliverables

Outreach programmes, special events and information materials: information material on agricultural mechanization; United Nations international days such as the International Day of Clean Air for blue skies, World Cities Day, World Environment Day and World Habitat Day, including special events on sustainable urban development and environment and development.

External and media relations: press releases and op-ed articles on reducing the negative impacts of growth on the natural environment and improving human well-being in urban and rural environments; press interviews for major publications and events.

Digital platforms and multimedia content: web pages of the subprogramme on safeguarding natural resources, sustainable agricultural mechanization, cities for a sustainable future and sustainable growth.

Subprogramme 5 Information and communications technology and disaster risk reduction and management

Objective

- 19.84 The objective, to which this subprogramme contributes, is to strengthen information and communications technology (ICT), space technology applications and disaster risk reduction and management for resilient and sustainable development in Asia and the Pacific through regional cooperation and the sharing of best practices.

Strategy

- 19.85 To contribute to the objective, the subprogramme will support member States in making progress towards the achievement of Sustainable Development Goals 1, 4, 5, 9–11, 13–15 and 17 by developing norms for inclusive digital connectivity, geospatial data-sharing and disaster resilience-building, supported by policy analysis and evidence-based research. Specifically, the subprogramme will:
- (a) Build capacity, especially of countries with special needs, in the above-mentioned areas, anchored in regional cooperation mechanisms that promote technical cooperation through the South-South and North-South modalities and are augmented by the programmes of the Asian and Pacific Training Centre for Information and Communication Technology for Development and the Asian and Pacific Centre for the Development of Disaster Information Management;
 - (b) Promote regional policy dialogue and cooperation through expert group meetings on transboundary challenges related to connectivity and disaster risks, including those related to major environmental challenges such as climate change;
 - (c) Promote building back better¹ with resilience, through the implementation of the Asia-Pacific Information Superhighway initiative. In this context, the subprogramme will carry out diagnostic studies on the digital divide, assess policy and regulatory frameworks and provide gap analysis and policy recommendations, supplemented by advocacy, networking and partnerships in support of the regionally agreed framework;
 - (d) Guided by the Ministerial Declaration on Space Applications for Sustainable Development in Asia and the Pacific and the Asia-Pacific Plan of Action on Space Applications for Sustainable Development (2018–2030), assist member States in harnessing the most recent advances in space technology applications and geospatial data, facilitate timely and expanded access to space-derived geospatial data, pool expertise and resources at the regional and subregional levels, promote the sharing of knowledge and good practices and create synergies with other existing regional initiatives;
 - (e) Augment and leverage regional cooperation through the implementation of the activities of the Asia-Pacific Disaster Resilience Network and the ESCAP Multi-Donor Trust Fund for Tsunami, Disaster and Climate Preparedness in Indian Ocean and Southeast Asian Countries, complemented by improved disaster information management through the services delivered by the Asian and Pacific Centre for the Development of Disaster Information Management;
 - (f) Strengthen the resilience of human and institutional capacity, in particular by providing assistance in the advancement of digital transformations, the use of innovative geospatial data applications and the provision of targeted solutions for the special needs of countries that face a high disaster risk.
- 19.86 The above-mentioned work is expected to result in:
- (a) Improved cross-border broadband Internet and infrastructure connectivity;
 - (b) Strengthened Internet traffic management in the most disconnected countries of the region;
 - (c) The improved e-resilience and the cross-border interoperability of ICT networks that support disaster risk reduction;
 - (d) More reliable, resilient and affordable broadband for all;
 - (e) The anticipation of disaster risks and the elaboration of disaster risk preparedness solutions benefiting all levels of society, through improved intercountry sharing and interoperability of geospatial data, and early warning systems, especially for slow-onset disasters in high-risk and low-capacity developing countries;

¹ In support of the Sendai Framework for Disaster Risk Reduction 2015–2030, priority 4: enhancing disaster preparedness for effective response and to “build back better” in recovery, rehabilitation and reconstruction.

- (f) Enhanced applications of geospatial information to accelerate Sustainable Development Goal monitoring and implementation by leveraging digital innovations.

Programme performance in 2021

Enhanced awareness of policy coherence to manage the cascading risks associated with natural and biological hazards

- 19.87 Millions of people around the Asia-Pacific region are exposed to a higher frequency and intensity of natural hazards, from locust swarms and earthquakes to cyclones. The COVID-19 pandemic has demonstrated how, in an increasingly globalized world, such hazards threaten to create a systemic global collapse, creating risks that often interconnect, with one triggering another in a cascade of devastating events. The pressure of climate change, coupled with the pandemic-induced socioeconomic crisis, has further transformed the “riscscape”, from the steppes of Central Asia to the small island developing States of the Pacific. Through a series of thematic sessions organized during the third ESCAP Disaster Resilience Week, which showcased various ways to build systemic resilience to address multi-hazard risks, the subprogramme invited a wide array of stakeholders to discuss the cascading risks associated with natural and biological hazards. It issued various working papers addressing the overlap of the COVID-19 pandemic with extreme climate events. The findings from these papers were highlighted in the *Asia-Pacific Disaster Report 2021*, which emphasized the importance of a systemic approach to disaster risk reduction and presented policy options for addressing these cascading risks. To discuss these multiple challenges, the subprogramme also organized a series of virtual meetings, including a special high-level event on disaster and climate resilience in South Asia at the fourth South Asia Forum on the Sustainable Development Goals.
- 19.88 Progress towards the objective is presented in the performance measure below (see table 19.17).

Table 19.17

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	Members and associate members gained knowledge of the linkages between natural and biological hazards, and requested that ESCAP develop regional cooperation on cascading hazards that included both natural and biological hazards	Members and associate members agreed at the seventh session of the Committee on Disaster Risk Reduction to address cascading hazard risks through the implementation of the health aspects of the Sendai Framework for Disaster Risk Reduction 2015–2030

Planned results for 2023

Result 1: accelerating regional policy coordination for risk-informed and climate-resilient development

Programme performance in 2021 and target for 2023

- 19.89 The subprogramme’s work contributed to one additional regional cooperation initiative for risk-informed and climate-resilience through the development and launch of the risk and resilience portal (<https://rrp.unescap.org/>) under the Asia-Pacific Disaster Resilience Network, which met the planned target of 11 initiatives for improving disaster resilience.
- 19.90 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 19.VI).

Figure 19.VI
Performance measure: number of initiatives for improving disaster resilience (cumulative)

Result 2: bridging development divides through accelerated access to affordable and resilient digital connectivity

Programme performance in 2021 and target for 2023

- 19.91 The subprogramme's work contributed to monthly expenditure in the Asia-Pacific region on fixed and mobile broadband subscriptions as a percentage of gross national income per capita in the amount of 3.28 per cent, which did not meet the planned target of 2.55 per cent. Owing to the prolonged pandemic and the exceptionally high use of the Internet, this trend is likely to continue in 2022 and 2023.
- 19.92 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 19.VII).

Figure 19.VII
Performance measure: monthly expenditure in the Asia-Pacific region on fixed and mobile broadband subscriptions as a percentage of gross national income per capita

^a The latest statistics issued by the International Telecommunication Union in its ICT Price Basket 2021 revised the projections for monthly expenditures on fixed and broadband subscriptions for the year 2022 from 2.55 per cent to 3.60 per cent of gross national income per capita (see www.itu.int/en/ITU-D/Statistics/Dashboards/Pages/IPB.aspx).

Result 3: augmented use of geospatial data for accelerating Sustainable Development Goal monitoring and implementation

Proposed programme plan for 2023

- 19.93 Space-derived data and information plays a key role in evidence-based decision-making for the efficient management of the environment, assets and communities. Some 40 per cent of the Sustainable Development Goal targets rely on the use of geolocation and Earth observations. Geospatial information can aid global stewardship, enabling faster and more accurate and

trustworthy support to inform decisions, monitor progress and assess the impact of interventions. The subprogramme has facilitated the exchange of regional expertise, knowledge, tools and space-derived data to support member States in monitoring the Goal targets.

Lessons learned and planned change

- 19.94 The lesson for the subprogramme was the need to effectively integrate the subprogramme’s data assets, including sectoral and geospatial data, to improve the utility of geospatial information for decision-making. In the absence of related policies and interoperable systems, many countries continue to lack the infrastructure and trusted data to make evidence-based decisions. In applying the lesson, the subprogramme plans to support members and associate members of ESCAP, in collaboration with the Statistics Division of the Department of Economic and Social Affairs, the Office for Outer Space Affairs and the United Nations Institute for Training and Research Operational Satellite Applications Programme, to develop an integrated geospatial data guideline that can convert geo-referenced big data about the Earth into Sustainable Development Goal-related information to support decision-making at the local and national levels. It will also provide technical support to beneficiaries by constructing a tailored geospatial information integration system for selected Goal indicators, according to their needs, and build the capacity of policymakers to effectively use integrated geospatial information.
- 19.95 Expected progress towards the objective is presented in the performance measure below (see table 19.18).

Table 19.18
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	Members and associate members requested support to enhance their capacity to produce a common data format and methodologies	Members and associate members gained access to training and tools to enhance the use of geospatial data	At least two countries initiate policy action(s) or project(s) on integrating geospatial and sectoral data for Sustainable Development Goal monitoring and implementation	Two additional countries initiate policy action(s) or project(s) on integrating geospatial and sectoral data for Sustainable Development Goal monitoring and implementation

Deliverables

- 19.96 Table 19.19 lists all deliverables of the subprogramme.

Table 19.19
Subprogramme 5: deliverables for the period 2021–2023, by category and subcategory

15. Expert groups on the Asia-Pacific Information Superhighway	–	–	4	–
16. Expert groups on disaster risk reduction	4	3	–	4
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	6	13	6	8
17. On disaster information management	1	1	1	1
18. On disaster risk reduction	2	2	2	1
19. On promoting ICT connectivity	2	3	2	2
20. On space technology applications	1	7	1	4
Seminars, workshops and training events (number of days)	14	22	10	14
21. On ICT	14	22	10	14
Publications (number of publications)	1	1	4	3
22. On disaster risk management	1	1	2	1
23. On geospatial practices for sustainable development in South-East Asia	–	–	1	1
24. On digital transformation for sustainable development	–	–	1	1
Technical materials (number of materials)	8	8	6	5
25. On disaster information management	–	–	2	2
26. On disaster risk reduction	–	–	1	–
27. On ICT	6	6	2	2
28. On infrastructure resilience	1	1	–	–
29. On geospatial information applications	1	1	1	1
C. Substantive deliverables				

Consultation, advice and advocacy: advisory services for working groups on disaster risk reduction and resilience, including the Issue-Based Coalition on Building Resilience; for the task forces of the ESCAP Sustainable Business Network; for committees and organizations on issues related to disaster risk reduction, space applications and ICT.

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

Databases and substantive digital materials: a regional disaster information portal; guidelines on space technology applications for regional and global access; guidelines for the development and management of disaster information databases and spatial data infrastructure.

D. Communication deliverables

Outreach programmes, special events and information materials: briefing notes on digital development for senior government officials from ICT-related ministries and agencies; brochures on disaster information management.

External and media relations: press releases and op-ed articles on ICT, space technology applications and disaster risk reduction and management for resilient and sustainable development in Asia and the Pacific; press interviews for major publications and events.

Digital platforms and multimedia content: content for the Asian and Pacific Training Centre for Information and Communication Technology for Development Virtual Academy and the online presence of the Asian and Pacific Centre for the Development of Disaster Information Management; web pages on the Asia-Pacific Information Superhighway, building resilience to disasters, e-resilience, regional cooperation in disaster risk reduction, monitoring drought from space, the integration of geospatial information for resilience-building, and space and geospatial information systems for disaster management; website of the Asian and Pacific Centre for the Development of Disaster Information Management.

Subprogramme 6 Social development

Objective

- 19.97 The objective, to which this subprogramme contributes, is to realize inclusive and equitable societies that protect, empower and leave no one behind in Asia and the Pacific, with a focus on population and development, social protection, disability, and gender equality and the empowerment of women.

Strategy

- 19.98 To contribute to the objective, the subprogramme will bring together Governments on critical issues related to social development in the region, and inform these intergovernmental processes through analysis and by drawing upon the complementary strengths of ESCAP through its regional convening power and the capacity of United Nations agencies, funds and programmes to support national implementation to advance the Sustainable Development Goals. Specifically, the subprogramme will:
- (a) Support Governments in the further implementation of the Programme of Action of the International Conference on Population and Development, the Madrid International Plan of Action on Ageing, 2002, and the Global Compact for Safe, Orderly and Regular Migration by strengthening the evidence base with regard to population and development issues, with a focus on ageing, migration and population dynamics, poverty reduction and leaving no one behind;
 - (b) Facilitate the monitoring of the implementation of the Asian and Pacific Ministerial Declaration on Population and Development through the framework that was endorsed at the sixth session of the Committee on Social Development;
 - (c) Provide support to member States in identifying the population groups that are at the highest risk of being left behind through its Leave No One Behind methodology, analytical reports and capacity-building;
 - (d) In line with the Action Plan to Strengthen Regional Cooperation on Social Protection in Asia and the Pacific, consolidate national progress and experiences related to extending social protection coverage in periodic progress reports; develop a regional platform for member States to share good practices; and provide new and innovative analytical tools and products and capacity development tools and training sessions to Governments, helping member States make progress towards the achievement of Goals 1, 3, 5, 8, 10 and 17;

- (e) Conduct research and analysis and provide capacity-building support to member States on building disability-inclusive societies, guided by the Convention on the Rights of Persons with Disabilities and the Incheon Strategy to “Make the Right Real” for Persons with Disabilities in Asia and the Pacific, and support other subprogrammes in mainstreaming disability inclusion. This work will help member States make progress towards the achievement of Goals 1, 4, 8, 10, 11 and 17;
- (f) Continue to follow up on the outcomes of the Asia-Pacific regional 25-year review of the implementation of the Beijing Declaration and Platform for Action by supporting Governments in accelerating the implementation of the Beijing Declaration and Platform for Action;
- (g) Provide technical assistance in developing policies in the context of economic empowerment and entrepreneurship for women and support other subprogrammes in mainstreaming a gender perspective;
- (h) Provide knowledge products, seminars and technical advice related to bridging gaps in the legal framework for micro-, small and medium-sized enterprises and designing strategies and policy provisions specific to women-led enterprises to help them recover from the shocks induced by COVID-19. All above-mentioned work areas will be undertaken in close collaboration with relevant partners, including the United Nations Population Fund, the International Labour Organization (ILO) and the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women).

19.99 The above-mentioned work is expected to result in:

- (a) The development of regional frameworks for social development;
- (b) The development of responsive policies and programmes in the domain of population dynamics and social development;
- (c) Enhanced skills and knowledge to enable countries to design and implement inclusive social protection policies;
- (d) Support for national policies and strategies to advance gender equality and women’s empowerment, including responsive business development and investment policies and programmes;
- (e) Improved national policies and programmes in support of disability-inclusive development;
- (f) The design and implementation by member States of COVID-19 recovery strategies that are inclusive of those who are most vulnerable.

Programme performance in 2021

Strengthened policy frameworks for addressing unpaid care and promoting the economic empowerment of women in the Asia-Pacific region

- 19.100 The COVID-19 pandemic has exacerbated the risks and vulnerabilities for women and girls across the region and reversed many of the hard-won gains of the past decades. Responding to the global care crisis that emerged as one of the key challenges hindering women’s empowerment, the subprogramme examined the socioeconomic, political, legislative and institutional conditions in each member country of ASEAN to highlight examples of promising policy measures undertaken as emergency measures to address women’s unpaid care and domestic work. In collaboration with the ASEAN Committee on Women, the subprogramme developed key recommendations to address the current deficit of gender- and care-sensitive policies and launched the corresponding report at the fourth ASEAN Ministerial Meeting on Women. The subprogramme also provided further technical assistance to Cambodia and the Philippines in developing national action plans to reduce the unpaid care burden for women.
- 19.101 The subprogramme, through its initiative entitled “Catalyzing Women’s Entrepreneurship”, collaborated with agencies working with micro-, small and medium-sized enterprises and women’s machineries to design and implement targeted interventions for women entrepreneurs and to tackle challenges in the context of the pandemic. In collaboration with the Ministry of Planning and Investment in Viet Nam, the subprogramme assessed the impacts of micro-, small and medium-sized

enterprise laws and decrees on women’s entrepreneurship and established one-stop online portals to address gender equality gaps in accessing information and services. The subprogramme, in collaboration with component 5 of subprogramme 8, also strengthened its partnership with the ASEAN Coordinating Committee on Micro, Small and Medium Enterprises to develop a comprehensive toolkit to guide ASEAN member States on policy support for such enterprises led by women.

19.102 Progress towards the objective is presented in the performance measure below (see table 19.20).

Table 19.20
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	No comprehensive regional framework to address unpaid care work; ad hoc measures taken by member States to address unpaid care work	<ul style="list-style-type: none"> • ASEAN adopted the ASEAN Comprehensive Framework on Care Economy • Two member States (Cambodia and the Philippines) have started working on national action plans to implement the Framework • Viet Nam revised its laws and decrees on micro-, small and medium-sized enterprises, which strengthened women’s entrepreneurship

Planned results for 2023

Result 1: developing and implementing a modality for strengthening regional cooperation on social protection in Asia and the Pacific

Programme performance in 2021 and target for 2023

19.103 The subprogramme’s work contributed to one member State (Mongolia) undertaking a national review of its social protection schemes, using the ESCAP modelling tool, which met the planned target.

19.104 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 19.21).

Table 19.21
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
19 Asia-Pacific countries officially nominate representatives to a group of experts to develop a draft regional modality on social protection	The Action Plan to Strengthen Regional Cooperation on Social Protection in Asia and the Pacific was adopted by Asia-Pacific countries at the sixth session of the Committee on Social Development	One member State (Mongolia) undertakes a national review of its social protection schemes using the ESCAP modelling tool	Through a regional platform, member States participate in peer learning and sharing of good practices to strengthen regional cooperation on social protection	Five ESCAP member States, including one country in special need, report their progress in implementing the Action Plan to Strengthen Regional Cooperation on Social Protection in Asia and the Pacific

Result 2: advancing data and guidance for evidence-based policy related to population ageing, in line with the Madrid International Plan of Action on Ageing and the 2030 Agenda for Sustainable Development

Programme performance in 2021 and target for 2023

- 19.105 The subprogramme’s work contributed to five ESCAP member States in special situations (Bhutan, Cambodia, Kyrgyzstan, Maldives and Mongolia) conducting national reviews on the availability of data and the implementation of policies through bottom-up approaches and interministerial meetings in preparation for the fourth review and appraisal of the Madrid International Plan of Action on Ageing in the context of the 2030 Agenda, which met the planned target.
- 19.106 Progress towards the objective and the target for 2023 are presented in the programme measure below (see table 19.22).

Table 19.22
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
ESCAP member States identify priority areas for country-specific policies on population ageing, with a focus on data and identifying good practices for population policies	ESCAP member States support the mapping of policies on population ageing and the collection of data to monitor population ageing	Five ESCAP member States in special situations (Bhutan, Cambodia, Kyrgyzstan, Maldives and Mongolia) conduct national reviews on data and policies through bottom-up approaches and interministerial meetings to prepare for the fourth review and appraisal of the Madrid International Plan of Action on Ageing in the context of the 2030 Agenda	ESCAP member States endorse recommendations for action at the regional and national levels, in accordance with the Madrid International Plan of Action on Ageing and the 2030 Agenda, to address the economic and social impacts of population ageing, especially on older women	Three additional ESCAP member States address population ageing and other population and development concerns in policy frameworks and action plans

Result 3: strengthened national policies and programmes to promote the rights of, and advance the empowerment of, persons with disabilities, including women with disabilities

Proposed programme plan for 2023

- 19.107 The Asia-Pacific region is home to an estimated 690 million persons with disabilities, who face numerous barriers to their full participation in society. To provide timely support to ESCAP member States in protecting and empowering persons with disabilities during COVID-19, the subprogramme developed policy guidance on formulating disability-inclusive responses to the pandemic. In 2021, the subprogramme further built the capacities of Asia-Pacific countries and organizations of persons with disabilities with regard to using accessibility audits and digital technology, developing disability-inclusive public procurement and employment strategies, and improving disability assessments to strengthen social protections for persons with disabilities.

Lessons learned and planned change

- 19.108 The lesson for the subprogramme was that persons with disabilities experienced increased levels of exclusion, discrimination and inequalities in the context of COVID-19, as evidenced by the research

and analysis conducted by the subprogramme. In applying the lesson, the subprogramme will strengthen the focus of its technical assistance to member States on the implementation of disability-inclusive programmes that reflect the various needs of persons with diverse disabilities, including in the areas of employment and ICT accessibility, while also addressing the particular needs of women with disabilities. The subprogramme will conduct a regional survey in 2022 to review the implementation of the Incheon Strategy to “Make the Right Real”. The findings will contribute to identifying further steps to empower persons with disabilities in the region.

19.109 Expected progress towards the objective is presented in the performance measure below (see table 19.23).

Table 19.23
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
ESCAP member States identify new priority areas for supporting and empowering persons with disabilities	Three ESCAP member States (China, India and the Lao People’s Democratic Republic) developed and implemented evidence-informed socially inclusive policies to ensure that no one was left behind, in particular in the context of the COVID-19 pandemic	Two ESCAP member States developed and implemented evidence-informed inclusive policies to support persons with disabilities	Three ESCAP member States adopt and implement policies and programmes to empower persons with disabilities	Three additional ESCAP member States adopt and implement policies and programmes to empower persons with disabilities

Deliverables

24. On population and development	–	–	1	1
Technical materials (number of materials)	11	11	11	11
25. On gender equality	1	1	1	1
26. On disability inclusion	1	1	1	1
27. On population	2	2	2	2
28. On inequality	2	2	2	2
29. Datasheets on population	1	1	1	1
30. On social development	4	4	4	4
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services for working groups on issues related to social development, including the Issue-Based Coalition on Inclusion and Empowerment; and for the task forces of the ESCAP Sustainable Business Network.				
Databases and substantive digital materials: online databases and resource facilities on social development for regional and global access.				
D. Communication deliverables				
Outreach programmes, special events and information materials: United Nations international days, including special events on gender equality, population and disability inclusion.				
External and media relations: press releases and op-ed articles on population and development, social protection, disability, and gender equality and the empowerment of women; press interviews and media outreach for major publications and special events.				
Digital platforms and multimedia content: web pages on ageing societies, disability-inclusive development, gender equality and women's empowerment, inequality and leaving no one behind, international migration, population and development, social inclusion, social protection and youth empowerment.				

Subprogramme 7 Statistics

Objective

- 19.111 The objective, to which this subprogramme contributes, is to improve the availability, accessibility and use of quality data and official statistics in support of sustainable development in Asia and the Pacific.

Strategy

- 19.112 To contribute to the objective, the subprogramme will:
- (a) Provide technical assistance, training and capacity-building support to strengthen national statistical capacities to produce, disseminate and communicate statistical products and services, including gender-sensitive and sex-disaggregated data and statistics, with an emphasis on those countries further left behind, such as the least developed countries and small island developing States. This support will focus on modernizing national statistical systems and empowering national statistical offices in the region to benefit from the data sources generated by the various components of national data ecosystems, including administrative data and big data produced and owned by other governmental agencies and the private sector. The work will be conducted jointly by the ESCAP Statistics Division and the Statistical Institute for Asia and the Pacific;
 - (b) Provide statistical products and services, such as the *Asia and the Pacific SDG Progress Report* and the Asia-Pacific Sustainable Development Goals Gateway, that make regional data and official statistics accessible in order to assess progress in the Asia-Pacific region towards achieving the Sustainable Development Goals;
 - (c) Develop and support the production of knowledge products in the form of research papers, working papers, statistics briefs and blogs to raise awareness of and share knowledge and experience relating to official statistics;
 - (d) Promote cooperation and facilitate consensus-building among member States, regional entities and other partners working in data and statistics through regional and country-specific initiatives. This includes, among other things, advancing the Declaration on Navigating Policy with Data to Leave No One Behind, in cooperation with member States and development partners, which will constitute the foundation for enhanced statistical capacity in Asia and the Pacific;
 - (e) Expand its work to transform national statistical systems so that they are resilient to future shocks similar to the COVID-19 pandemic, including through virtual platforms, which provide technical assistance, training and capacity-building support and promote cooperation and consensus-building.
- 19.113 The above-mentioned work is expected to result in:
- (a) The improved availability, accessibility and use of quality data and official statistics in support of sustainable development in Asia and the Pacific;
 - (b) The improved capacity of national statistical systems to review progress in the implementation of the 2030 Agenda.

Programme performance in 2021

Increased use of the latest knowledge and experience on official statistics by national statistical systems in order to operate effectively in a pandemic environment

- 19.114 As the COVID-19 pandemic limited face-to-face events on one hand and increased demand for timely, quality and disaggregated data and official statistics on the other, the subprogramme further developed its virtual platforms to improve access by the Asia-Pacific official statistics community to knowledge and experience. These platforms included the Asia-Pacific Stats Café event series, communities of practice and e-learning courses. The development and use of such platforms not only enabled continued training and exchanges of knowledge and experience despite the COVID-19 restrictions, but also reached a far broader audience.
- 19.115 The Stats Café series was launched in 2020 to provide a forum for discussing the urgent needs of national statistical systems arising from the unprecedented situation of the COVID-19 pandemic. The series has since evolved to cover other topics of interest to official statisticians, with 24 sessions organized in 2021. Moreover, the subprogramme began holding “Data Integration Communities of Practice” in 2020 to serve as a space for both virtual collaboration and the sharing of knowledge and experience. With encouragement from the Committee on Statistics, the subprogramme expanded the use of such communities to other areas of interest, including disaster-related statistics, environmental statistics and economic statistics, in 2021. Furthermore, while the subprogramme had previously started e-learning courses, the COVID-19 pandemic accelerated those efforts, resulting in a steep increase in the number of e-learning courses offered, from 4 in 2019 to 14 in 2020 and 31 in 2021.
- 19.116 Progress towards the objective is presented in the performance measure below (see figure 19.VIII).

Figure 19.VIII

Performance measure: number of users accessing virtual platforms (annual)

Planned results for 2023

Result 1: Asia-Pacific countries take steps to transform their statistical systems: the case of Bhutan

Programme performance in 2021 and target for 2023

- 19.117 The subprogramme's work contributed to further implementation by Bhutan of the national commitments contained in the Declaration on Navigating Policy with Data to Leave No One Behind through the development of the country's first vital statistics report and the Bhutan Standard Industrial Classification of All Economic Activities, which met the planned target.
- 19.118 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 19.25).

Table 19.25

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
The Government endorses the Declaration on Navigating Policy with Data to Leave No One Behind at the seventy-fifth session of ESCAP	Seven countries, including Bhutan, demonstrated strengthened statistical systems indicating progress on the implementation of the commitments contained in the Declaration prepared for the seventh session of the Committee on Statistics	Further implementation by Bhutan of the national commitments contained in the Declaration through the country's first vital statistics report and the Bhutan Standard Industrial Classification of All Economic Activities	The Committee on Statistics considers the baseline report on the status of the commitments contained in the Declaration and recommends priority actions for transforming national statistical systems	Increase in the regional average of the data infrastructure pillar for Asia-Pacific (World Bank Statistical Performance Indicators)

Result 2: Asia-Pacific national statistical systems are better equipped to review progress in the implementation of the 2030 Agenda for Sustainable Development

Programme performance in 2021 and target for 2023

- 19.119 The subprogramme's work contributed to 49 per cent of Sustainable Development Goal indicators having sufficient data for the Asia-Pacific region, which exceeded the planned target of 48 per cent of Goal indicators.
- 19.120 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 19.IX).

Figure 19.IX
Performance measure: Sustainable Development Goal indicators having sufficient data for the Asia-Pacific region

(Percentage)

Result 3: enhanced capacity of Asia-Pacific national statistical systems to measure development progress beyond economic growth

Proposed programme plan for 2023

- 19.121 The implementation of the 2030 Agenda and the need to improve responsiveness to the COVID-19 pandemic require a vast range of timely, quality data and statistics to plan for, monitor and analyse the three dimensions of sustainable development: economic, social and environmental. The subprogramme has supported national statistical systems in the region to measure development progress beyond economic growth indicators such as GDP. This included providing technical assistance as well as advancing normative work on environmental-economic accounts, ecosystem accounts, ocean accounts, national accounts and disaster- and climate change-related statistics.

Lessons learned and planned change

- 19.122 The lesson for the subprogramme was that the growing demand for environmental, disaster and climate change statistics requires the subprogramme to stay abreast of related developments across national statistical systems in the Asia-Pacific region, and globally, to facilitate the exchange of knowledge and experience among practitioners in the region and to inform the development of normative frameworks, tools and manuals at the global level. In applying the lesson, the subprogramme will further support countries in developing statistics that measure growth beyond economic growth, identify data gaps and expand the use of virtual modalities when providing capacity-building and technical assistance to the national statistical systems in the region in relevant areas, which include but are not limited to environmental-economic accounting. ESCAP will further extend its support to national statistical systems for ocean accounting and the ongoing revision of the System of National Accounts.
- 19.123 Expected progress towards the objective is presented in the performance measure below (see table 19.26).

Table 19.26
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
10 countries demonstrated enhanced capacity of national statistical systems to measure development progress beyond GDP	<ul style="list-style-type: none"> The Committee on Statistics noted with appreciation the increased efforts to compile environmental accounts in the region Eight countries demonstrated enhanced capacity of national statistical systems to measure development progress beyond GDP 	13 countries demonstrated enhanced capacity of national statistical systems to measure development progress beyond GDP	An increased number of national statistical systems have enhanced capacities to measure development progress beyond GDP	An increased number of national statistical systems have enhanced capacities to measure development progress beyond GDP

Deliverables

19.124 Table 19.27 lists all deliverables of the subprogramme.

Databases and substantive digital materials: ESCAP statistical database accessible at the regional and global levels; database on statistical training materials and resources.				
D. Communication deliverables				
External and media relations: press releases and op-ed articles on improving the availability, accessibility and use of quality data and official statistics in support of sustainable development in Asia and the Pacific; press interviews for major publications and events.				
Digital platforms and multimedia content: multimedia promotional content and web pages on investment and user engagement, skills development, quality assurance and trust in statistics, statistical business process modernization and integrated statistics and analysis.				

**Subprogramme 8
Subregional activities for development**

**Component 1
Subregional activities for development in the Pacific**

Objective

- 19.125 The objective, to which component 1 of the subprogramme contributes, is to strengthen regional cooperation and integration for sustainable development, in line with the subregional priorities of the Pacific, which include building resilience to climate change, sustainable ocean management and reducing inequalities.

Strategy

- 19.126 To contribute to the objective, the component will:
- (a) Facilitate subregional dialogues among member States on policy challenges to climate-related resilience-building, in cooperation with subprogrammes 4 and 6, other United Nations entities, civil society and subregional organizations such as the Pacific Islands Forum Secretariat and the Pacific Community;

- (b) Provide subregional and in-country capacity development support in the area of ocean accounts using the System of Environmental-Economic Accounting and data standards under the Global Ocean Accounts Partnership, in cooperation with subprogramme 7;
- (c) Provide technical assistance to member States and create knowledge-exchange opportunities between member States and civil society to develop nationally appropriate indicator frameworks and promote women's economic empowerment, social protection and disability policies, in cooperation with subprogramme 6;
- (d) Provide technical assistance with regard to addressing the socioeconomic impacts of the COVID-19 pandemic and devising appropriate recovery responses through national frameworks for Sustainable Development Goal financing and regional cooperation on transboundary issues, in line with the outcomes of relevant assessments;
- (e) Organize annual meetings and facilitate dialogues on sustainable development, including a subregional forum on sustainable development, among government officials, civil society, experts and other stakeholders, and on the sharing of information on subregional implementation efforts;
- (f) Strengthen coordination with and collaboration among subregional intergovernmental organizations and member States for an effective representation of subregional perspectives at regional and global consultations, and provide implementation support for the Commission's subprogrammes relating to the subregion's priorities;
- (g) Be guided by the SIDS Accelerated Modalities of Action (SAMOA) Pathway, the Doha Programme of Action for Least Developed Countries and the Pacific Road Map for Sustainable Development to strengthen partnerships and serve as the focal point for the Commission's engagement with the resident coordinator system and United Nations country teams, including through substantive assistance in preparing common country assessments and United Nations Sustainable Development Cooperation Frameworks, in particular with regard to the transboundary dimensions of sustainable development, and assist country-level programming by providing subregional perspectives and access to regional networks and facilitating South-South and triangular cooperation.

19.127 The above-mentioned work is expected to result in:

- (a) More effective subregional responses with regard to people-centred climate change resilience;
- (b) Improved data availability for evidence-based policymaking on ocean management;
- (c) Strengthened capacity to monitor the implementation of the 2030 Agenda while ensuring that no one is left behind and that development activities reduce inequalities and reach the people in vulnerable situations;
- (d) The strengthened capacity of member States to recover from the pandemic through national frameworks for social protection and sustainable development financing;
- (e) Stronger regional cooperation to address transboundary issues.

Programme performance in 2021

Strengthened capacity of Pacific small island developing States to prepare for and conduct voluntary national reviews

19.128 Voluntary national reviews are intended to review progress in implementing the 2030 Agenda for Sustainable Development and identify gaps and challenges in the implementation of the Sustainable Development Goals. Pacific member States face capacity constraints in undertaking the extensive work required for such reviews, and the related follow-up actions. Supported by the United Nations Development Account, the component facilitated experience-sharing among the member States in the subregion at the annual Pacific Forums on Sustainable Development, highlighting key challenges

and learning from countries that had submitted their voluntary national reviews to the high-level political forum on sustainable development in prior years. Since 2019, the component has also provided technical support in the form of workshops to those member States preparing for and conducting their voluntary national reviews, with a special emphasis on the areas of integrated planning and monitoring, including the development of indicators, as well as on follow-up actions and strengthening multi-stakeholder engagement. By 2022, all the Pacific island member States will have completed a voluntary national review at least once.

19.129 Progress towards the objective is presented in the performance measure below (see table 19.28).

Table 19.28
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
Two Pacific island states (Nauru and Tonga) conducted voluntary national reviews, which included ways to address integrated planning and monitoring with the engagement of stakeholders, and submitted them to the high-level political forum on sustainable development	Three Pacific island states (the Federated States of Micronesia, Solomon Islands and Samoa) conducted voluntary national reviews, which included ways to address integrated planning and monitoring with the engagement of stakeholders, and submitted them to the high-level political forum on sustainable development	<ul style="list-style-type: none"> • The Marshall Islands conducted a voluntary national review, which included ways to address integrated planning and monitoring with the engagement of stakeholders, and submitted it to the high-level political forum on sustainable development • Tuvalu undertook preparatory work and national consultations to complete and submit a voluntary national review in 2022

Planned results for 2023

Result 1: Pacific small island developing States advance cooperation for climate change-related displacement and migration

Programme performance in 2021 and target for 2023

19.130 The component’s work contributed to the establishment of a joint working group on climate change-related migration, displacement and relocation by nine member States, chaired by the Governments of Fiji and Tuvalu; and the development and approval of the joint working group’s terms of reference and its workplan to guide the compilation of a draft regional framework. This met the planned target of the Governments of Pacific island countries advancing cooperation on climate change-related migration, displacement and planned relocation and agreeing on guiding principles for national legal and policy responses.

19.131 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 19.29).

Table 19.29
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
In the Boe Declaration Action Plan, climate security and human security ^a are identified as priorities for Pacific island countries	Member States developed options for establishing a regional process and a framework on climate change-related migration, displacement and planned relocation that protects the rights and builds the resilience of Pacific peoples	Nine member States established a joint working group on climate change-related migration, displacement and relocation, chaired by the Governments of Fiji and Tuvalu, and approved its terms of reference and a workplan to guide the preparation of a draft regional framework for consideration	Governments of Pacific island countries endorse and implement a framework on climate change-related migration, displacement and planned relocation that protects the rights and builds the resilience of Pacific peoples	Governments of Pacific island countries review regional progress and seek improvements in the implementation of a framework on climate change-related migration, displacement and planned relocation that protects the rights and builds the resilience of Pacific peoples

^a The concept of “human security” is defined in accordance with General Assembly resolution 66/290.

Result 2: Pacific small island developing States strengthen their capacity for socioeconomic recovery from the impacts of the COVID-19 pandemic

Programme performance in 2021 and target for 2023

- 19.132 The component’s work contributed to two member States (Samoa and the Cook Islands) developing social protection measures to address socioeconomic challenges in the context of COVID-19 recovery, which met the planned target.
- 19.133 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 19.30).

Table 19.30
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	Pacific member States strengthen their commitment to expanding and strengthening social protection systems	Two member States (Samoa and the Cook Islands) developed social protection measures to address socioeconomic challenges in the context of COVID-19 recovery	New or improved national policies and frameworks for social protection and sustainable development financing by three member States	Implementation of the new and improved national policies, strategies, planning systems and frameworks by three member States

Result 3: Pacific small island developing States strengthen regional cooperation in addressing transboundary issues and building resilience

Proposed programme plan for 2023

- 19.134 Pacific island countries are highly vulnerable to climate and disaster risks, while the scale and geographic dispersion of their economies and the limited capacities within the countries constrain their ability to address these vulnerabilities. Member States recognized, through ESCAP resolutions, the growing need to enhance partnerships and collaboration at the regional and subregional levels in order to advance priorities towards building resilience in Pacific small island developing States. As COVID-19 has further highlighted the significance of adaptation to protect the planet and safeguard the livelihoods of people, the component's regional cooperation work programme in areas such as climate-smart trade and sustainable energy transition has been aligned with the processes of the Pacific Islands Forum and the Pacific Community as well as with several country-specific initiatives.

Lessons learned and planned change

- 19.135 The lesson for the component was that it needed to increase its focus on adaptation to match the growing attention on the socioeconomic impacts of climate change and COVID-19, as evidenced by recent assistance requests from member States and new partnership arrangements with relevant intergovernmental organizations. In applying the lesson, the component, in conjunction with its regional and subregional development partners, will support member States in strengthening subregional connectivity while addressing the interlinked risks of health, environment and disaster. The component plans to further enhance collaboration with regional and subregional organizations and, where applicable, with other United Nations agencies and programmes. Through focused research and analysis, multi-country activities, advisory services, regional workshops and dialogue, in cooperation with subprogrammes 1–3, 5 and 9, the component plans to intensify its support to build resilience and address vulnerabilities in transboundary areas such as climate-smart trade, sustainable energy transition, innovative finance and digital cooperation.
- 19.136 Expected progress towards the objective is presented in the performance measure below (see table 19.31).

Table 19.31

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	Pacific island countries considered the development of a regional strategy to address the regional priorities on climate- and disaster-related resilience and reduce vulnerabilities	At least one country formulates a national strategy to address climate- and disaster-related resilience and reduce vulnerabilities, which aligns with regional priorities	One additional country formulates a national strategy to address climate- and disaster-related resilience and reduce vulnerabilities, which aligns with regional priorities

Deliverables

- 19.137 Table 19.32 lists all deliverables of the component.

Table 19.32

Component 1: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies

C. Substantive deliverables				
Consultation, advice and advocacy: expert advice to member States of the subregion on national planning and policy coherence, social inclusion and equality, building resilience to climate change, sustainable ocean management and reducing inequalities.				
D. Communication deliverables				
Outreach programmes, special events and information materials: newsletter with updates related to the Sustainable Development Goals in the Pacific.				
External and media relations: press releases and op-ed articles on national planning and policy coherence, social inclusion and equality, building resilience to climate change, sustainable ocean management and reducing inequalities.				
Digital platforms and multimedia content: web pages on national planning and policy coherence, social inclusion and equality, climate action and resources management, and reducing inequalities, and on the final review of the Samoa Pathway and the 2030 Agenda.				

**Component 2
Subregional activities for development in East and North-East Asia**

Objective

- 19.138 The objective, to which component 2 of the subprogramme contributes, is to strengthen regional cooperation and integration for sustainable development, in line with the subregional priorities of East and North-East Asia, which includes sustainable connectivity, environmental sustainability and innovation for inclusive and resilient societies.

Strategy

19.139 To contribute to the objective, the component will:

- (a) Facilitate multisectoral dialogues among member States on trade, transport, energy and ICT connectivity through regional and subregional platforms, including the North-East Asia Regional Power Interconnection and Cooperation Forum;
- (b) Support the implementation of a road map for sustainable power connectivity to increase the utilization of renewable sources of energy in North-East Asia, in cooperation with subprogramme 9;
- (c) Promote knowledge-sharing by subregional platforms, such as the North-East Asian Subregional Programme for Environmental Cooperation and the North-East Asia Clean Air Partnership, on emerging technologies and their deployment in priority areas such as the transport, industry and residential sectors, in cooperation with subprogramme 4;
- (d) Develop knowledge products and foster peer-to-peer exchanges on inclusive science, technology and innovation policies and programmes with a focus on ageing societies, disaster resilience and gender equality in the technology industry;
- (e) Support and promote intergovernmental processes for sustainable connectivity, environmental sustainability and innovation in support of sustainable economic recovery from the pandemic and inclusive and resilient societies in East and North-East Asia;
- (f) Identify and promote innovative approaches to facilitate cross-border connectivity, including contactless cross-border trade and transport solutions, to minimize COVID-19 transmission risks and increase operational efficiency;
- (g) Build the capacity of member States on the above-mentioned focus areas to identify subregional challenges and opportunities and apply best practices, contributing mainly to the achievement of Sustainable Development Goals 3, 5, 7, 9–11, 13–15 and 17;
- (h) Organize annual meetings and facilitate dialogues on sustainable development, including a subregional forum on sustainable development, among government officials, civil society, experts and other stakeholders, and on the sharing of information on subregional implementation efforts;
- (i) Strengthen coordination with and collaboration among subregional intergovernmental organizations and member States for an effective representation of subregional perspectives at regional and global consultations, and provide implementation support for the Commission's subprogrammes relating to the subregion's priorities;
- (j) Serve as the focal point for the Commission's engagement with the resident coordinator system and United Nations country teams, including through substantive assistance with regard to preparing common country assessments and United Nations Sustainable Development Cooperation Frameworks, in particular with regard to the transboundary dimensions of sustainable development, and assist country-level programming by providing subregional perspectives and access to regional networks and facilitating South-South and triangular cooperation.

19.140 The above-mentioned work is expected to result in:

- (a) Policy coherence and the integration of connectivity initiatives among member States, for example, with regard to trade and transport facilitation;
- (b) Coordinated actions among stakeholders and Governments to counter common environmental challenges, including air pollution, and promote low greenhouse gas emissions during development;

- (c) Enhanced knowledge-sharing on and the use of science, technology and innovation in building inclusive and resilient societies in the subregion;
- (d) More effective formulation and implementation of policies and strategies consistent with the 2030 Agenda, including through the North-East Asia Multi-stakeholder Forums on the Sustainable Development Goals;
- (e) The application of innovative solutions by member States to build resilience to and recover from the COVID-19 pandemic and similar threats;
- (f) The addressing of development challenges in the subregion using a collaborative approach among Governments, the United Nations, subregional organizations and other international organizations, civil society, the private sector and international financial institutions.

Programme performance in 2021

Enhanced knowledge-sharing and peer learning for climate action at the city level

- 19.141 Cities account for 70 per cent of the global CO₂ emissions from energy use and thus play a defining role in global efforts to combat climate change. While national Governments have been gradually scaling up the level of commitments and policies through nationally determined contributions and low-carbon and low-emissions development strategies, many cities in North-East Asia have initiated policies and strategies to reduce greenhouse gas emissions. Peer learning from successful experiences can serve as a driving force to further promote more ambitious climate actions at the city level.
- 19.142 The component promoted knowledge-sharing and peer learning among member States through the North-East Asia Low Carbon City Platform under the North-East Asian Subregional Programme for Environmental Cooperation. Since the platform’s launch in 2014, the component has held expert meetings and consultation workshops in which governments, cities and stakeholders showcased good practice initiatives and exchanged views on advancement towards reducing urban greenhouse gas emissions. The component also produced a comparative study reviewing government policies and gained the support of member States to expand the platform to additional cities that could benefit from peer-exchange and capacity-building initiatives. At the request of member States, the component further organized training sessions and knowledge-sharing workshops on the use of science, technology and innovation to develop city action plans to lower greenhouse gas emissions, and launched the International Forum on Low Carbon Cities in 2021. The Forum brought together local governments, international organizations, regional city networks, experts and other stakeholders, including from academia and research institutions, to create synergies among the different initiatives that have emerged in the subregion for pursuing lower emissions objectives.
- 19.143 Progress towards the objective is presented in the performance measure below (see table 19.33).

Table 19.33
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
Member States exchanged knowledge on initiatives and developments on low greenhouse gas emissions in cities through the North-East Asia Low Carbon City Platform	Member States reinforced support on knowledge- and experience-sharing on low greenhouse gas emissions through the inclusion of cities from other member States in the Platform	Member States further enhanced peer learning through knowledge-sharing workshops and during the first International Forum on Low Carbon Cities

Planned results for 2023

Result 1: strengthened coordination between trade and transport facilitation in East and North-East Asia

Programme performance in 2021 and target for 2023

- 19.144 The component's work contributed to the agreement by the member countries of the Greater Tumen Initiative to implement a regular annual survey to evaluate behind-the-border and cross-border impacts of trade and transport policies and develop a database-supported information sharing system, which did not meet the planned target of member States implementing initiatives reflecting policy coordination on trade and transport facilitation. The COVID-19 pandemic delayed the approval of the survey, which will now be conducted in 2022.
- 19.145 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 19.34).

Table 19.34

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Member States strengthen awareness about the importance of an integrated approach to trade and transport facilitation initiatives, as evidenced by the discussion among Greater Tumen Initiative member countries on trade-transport facilitation linkages at the ESCAP-Greater Tumen Initiative International Seminar on Trade Facilitation	Member States strengthened their capacity in facilitating coordination between the trade and transport sectors	Agreement by Greater Tumen Initiative member countries to implement a regular annual survey to evaluate behind-the-border and cross-border impacts of trade and transport policies and develop a database-supported information-sharing system	Member States review and share with other Asia-Pacific subregions good practices from initiatives implemented to promote policy coordination between trade and transport facilitation	Member States increase their joint activities to operationalize trade and transport facilitation policy coordination along transport corridors in the subregion

Result 2: improved subregional power grid connectivity in East and North-East Asia

Programme performance in 2021 and target for 2023

- 19.146 The component's work contributed to strengthened awareness and understanding of the technical and regulatory requirements for power interconnections using renewable sources of energy through two workshops on sustainable power connectivity development in North-East Asia. This did not meet the planned target of member States enhancing their capacity with regard to technical requirements, such as interconnector development to promote the use of renewable sources of energy, as evidenced by a survey. The target was not met owing to inadvertent delays that entailed the rescheduling of planned technical capacity-building activities on interconnector development to early 2022.
- 19.147 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 19.35).

Table 19.35
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Consultations among member States continued on promoting regional electricity trade and investment in cross-border electricity interconnections in North-East Asia	Member States strengthened their awareness and understanding of potential strategies for improving connectivity	Member States strengthened their awareness and understanding of the technical and regulatory requirements for power interconnections using renewable sources of energy	Member States support the implementation of a North-East Asia road map on power system connectivity at a high-level subregional forum	One of six member States begins implementing the North-East Asia road map on power system connectivity

Result 3: enhanced multilateral and multi-stakeholder cooperation for climate action in East and North-East Asia

Proposed programme plan for 2023

19.148 Member States in East and North-East Asia jointly account for more than a third of global greenhouse gas emissions. The component has been working to mobilize subregional cooperation on climate action, including by providing support to cities that are part of the North-East Asian Subregional Programme for Environmental Cooperation to lower greenhouse gas emissions and increase power grid connectivity.

Lessons learned and planned change

19.149 While most of the major emitting countries aim at achieving greenhouse gas neutrality by mid-century, the lesson for the component was that moving towards lower greenhouse gas emissions could benefit from subregional multilateral and multi-stakeholder cooperation. In applying the lesson, the component will take a more integrated approach to supporting the North-East Asian Subregional Programme for Environmental Cooperation in achieving the objectives of its strategic plan. Building on the outcomes of the first International Forum on Low Carbon Cities held in 2021, the component will create a platform for sharing national policy practices for net zero emission pathways. The component plans to further organize policy dialogues with governments and stakeholders, conduct joint studies and provide capacity-building in key sectors of climate action, including by supporting relevant objectives and activities of the strategic plan of the Subregional Programme.

19.150 Expected progress towards the objective is presented in the performance measure below (see table 19.36).

Table 19.36
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Member States linked the work of the North-East Asian Subregional Programme for Environmental Cooperation on land degradation with climate change	Member States adopted the North-East Asian Subregional Programme for Environmental Cooperation Strategic Plan 2021–2025 for subregional collaboration containing five priority areas: air pollution; biodiversity and nature conservation; marine protected areas; low carbon cities; and desertification and land degradation	The first International Forum on Low Carbon Cities convened governments, international organizations, regional city networks, academia and research institutions to advance multi-stakeholder cooperation on climate action	Member States and other stakeholders collectively engage in subregional cooperation on climate action	Mid-term evaluation of the North-East Asian Subregional Programme for Environmental Cooperation Strategic Plan 2021–2025 demonstrates an increase in subregional collaboration on climate action

Deliverables

19.151 Table 19.37 lists all deliverables of the component.

Table 19.37
Component 2: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	1
1. Report for the Commission	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	11	6	11	9
2. Expert group meetings on policy and programme options to address emerging economic and social development issues in East and North-East Asia	4	4	4	2
3. Senior Officials Meetings of the North-East Asian Subregional Programme for Environmental Cooperation	3	–	3	3
4. North-East Asian Multi-stakeholder Forum on Sustainable Development Goals	4	2	4	4
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	7	4	4

6. North-East Asian Subregional Programme for Environmental Cooperation	1	1	1	1

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
Seminars, workshops and training events (number of days)	–	1	–	2
7. On transport and energy connectivity	–	1	–	1
8. On science, technology and innovation for low-carbon and low-emissions and resilient cities and on North-East Asian Subregional Programme for Environmental Cooperation-related events	–	–	–	1
Technical materials (number of materials)	–	2	–	2
9. On technology and social issues	–	2	–	2
C. Substantive deliverables				
Consultation, advice and advocacy: expert advice to member States of the subregion on sustainable connectivity, environmental sustainability and innovation for inclusive and resilient societies.				
D. Communication deliverables				
Outreach programmes, special events and information materials: thematic policy briefs, newsletters, infographics and side activities on major events on sustainable connectivity, environmental sustainability and innovation for inclusive and resilient societies.				
External and media relations: press releases and op-ed articles on sustainable connectivity, environmental sustainability and innovation for inclusive and resilient societies; press interviews for major publications and events.				
Digital platforms and multimedia content: web page of the North-East Asian Subregional Programme for Environmental Cooperation; web page of the Asia Carbon Footprint Network; web pages on environmental sustainability, strengthening intraregional connectivity and innovation for resilient and inclusive societies.				

Component 3 Subregional activities for development in North and Central Asia

Objective

- 19.152 The objective, to which component 3 of the subprogramme contributes, is to strengthen regional cooperation and integration for sustainable development, in line with the subregional priorities of North and Central Asia, including sustainable connectivity, economic transformation, and social inclusion and resilience, and through follow-up and review of the 2030 Agenda.

Strategy

- 19.153 To contribute to the objective, the component will:
- (a) Provide secretariat support to and coordinate the seven thematic working groups of the United Nations Special Programme for the Economies of Central Asia to ensure that priorities emanating from the Governing Council and the Economic Forum of the Special Programme regarding trade facilitation, innovation and technology, transport, energy and digital connectivity, innovative financing and investment tools and environmental sustainability are incorporated into their workplans, and that discussions held in the working groups contribute to the deliberations of the Governing Council and the Economic Forum;
 - (b) Conduct analytical studies and propose policy recommendations to promote a holistic approach to economic transformation in line with the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024 and the road map for its accelerated implementation, supporting member States in making progress towards achieving Sustainable Development Goal 8;
 - (c) Mainstream social and environmental dimensions into the Sustainable Development Goals acceleration framework for North and Central Asia, including on climate change mitigation and adaptation strategies, and provide policy advice and technical assistance to address gender

equality and women's economic empowerment, helping member States make progress towards achieving Goals 5, 10 and 13;

- (d) Organize annual meetings and facilitate dialogues on sustainable development, including a subregional forum on sustainable development, among government officials, civil society, experts and other stakeholders, and on the exchange of information on subregional implementation efforts. This work will help member States review progress towards achieving the Goals, in particular Goal 17;
- (e) Support voluntary national review processes at the request of member States, and strengthen human and institutional capacity for a sustainable and resilient recovery from the COVID-19 pandemic, in line with the 2030 Agenda;
- (f) Strengthen coordination with and collaboration among subregional organizations and member States for an effective representation of subregional perspectives at regional and global consultations, and provide implementation support for the Commission's subprogrammes relating to the subregion's priorities;
- (g) Serve as the focal point for the Commission's engagement with the resident coordinator system and United Nations country teams, in line with the management and accountability framework, and ensure that subregional priorities, including those emanating from the Economic Forum and the Governing Council of the Special Programme, are reflected in their strategic documents.

19.154 The above-mentioned work is expected to result in:

- (a) Enhanced application by member States of, evidence-based solutions for, and strengthened subregional cooperation on, programmes to improve trade and transport facilitation as well as energy and ICT connectivity;
- (b) The adoption of policy options for economic transformation in the subregion;
- (c) Improved knowledge-sharing and cooperation among member States in the preparation of their voluntary national reviews;
- (d) Increased digital connectivity and digital transformation in the subregion as a driver to achieve the 2030 Agenda;
- (e) The addressing of development challenges in the subregion using a collaborative approach among Governments, the United Nations, subregional organizations and other international organizations, civil society, the private sector and international financial institutions.

Programme performance in 2021

Increased ownership and initiatives by United Nations Special Programme for the Economies of Central Asia participating countries for subregional economic cooperation and integration

19.155 The United Nations Special Programme for the Economies of Central Asia, supported jointly by ESCAP and the Economic Commission for Europe (ECE), is a platform that brings participating countries together for regional cooperation in areas that include transport, trade, water management, energy, environmental protection, innovation and technology, gender equality and the Sustainable Development Goals. The component has been supporting the Special Programme since its inception, providing secretariat services and organizing its annual Economic Forums and sessions of the Governing Council jointly with ECE.

19.156 Special Programme countries have experienced the effects of climate change and the COVID-19 pandemic on key aspects of economic development and cooperation, with negative consequences for sustainable development. Pandemic-related restrictions and border closures caused serious disruptions to supply chains and citizen mobility, while increasing costs and inequalities.

Part V Regional cooperation for development

- 19.157 The 2021 Economic Forum and the sixteenth session of the Governing Council of the Special Programme reaffirmed the need to strengthen regional cooperation on climate change mitigation and the rational use of water and energy resources, align the rapid development of trade, transport and connectivity and promote the wider role of innovation to build a sustainable, circular and inclusive economy after the pandemic.
- 19.158 The Governing Council adopted the Tashkent Statement and agreed, among other things, to establish a secretariat for the Special Programme, create a new working group on investments and financial technical cooperation and considered a proposal to create a digital solutions centre in Kazakhstan to further advance subregional collaboration.
- 19.159 Progress towards the achievement of the objective is demonstrated by the performance measures below (see table 19.38).

Table 19.38
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
–	Member States discussed a draft concept note for the establishment and modalities of a secretariat for the United Nations Special Programme for the Economies of Central Asia under the auspices of the Special Programme’s participating countries	Member States decided to establish an expert group to draft the terms of reference and modalities of a secretariat for Special Programme under the auspices of the Special Programme’s participating countries

Planned results for 2023

Result 1: accelerate action and generate solutions to address gaps in implementing the 2030 Agenda for Sustainable Development in North and Central Asia

Programme performance in 2021 and target for 2023

- 19.160 The component’s work contributed to member States in the subregion agreeing on a set of key drivers to accelerate progress towards the achievement of the Sustainable Development Goals at the 2021 Economic Forum of the United Nations Special Programme for the Economies of Central Asia, which met the planned target.
- 19.161 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 19.39).

Table 19.39
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Strengthened regional cooperation and knowledge-sharing to follow up on and review progress towards the achievement of the Sustainable Development Goals, for example through the twinning programme	References to a more integrated approach to economic transformation are made in national strategic documents of Uzbekistan and Kazakhstan	Member States in the subregion agreed on a set of key drivers to accelerate progress towards the achievement of the Sustainable Development Goals at the 2021 Economic Forum of the United Nations Special Programme for the Economies of Central Asia	Two member States develop policies or measures towards a more integrated approach to the achievement of the Sustainable Development Goals	Policymakers from two member States have enhanced skills to use ESCAP tools and knowledge for integrated Sustainable Development Goal implementation

Result 2: strengthened sustainable subregional connectivity**Programme performance in 2021 and target for 2023**

- 19.162 The component's work contributed to two member States initiating measures to enhance subregional connectivity. Kazakhstan proposed the establishment of a digital solutions centre in Central Asia in Kazakhstan, and Uzbekistan requested cooperation with ESCAP to establish a regional centre for the development of transport and communication interconnection.
- 19.163 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 19.40).

Table 19.40
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	Two member States (Kazakhstan and Uzbekistan) initiated measures to enhance subregional connectivity	Two policies or measures that promote digital technologies to enhance the sustainability of connectivity are implemented	Policymakers from two member States enhance their skills and knowledge to advance digital technologies to advance the sustainability of connectivity

Result 3: enhanced subregional cooperation on the use of new technologies for improving railway operational performance**Proposed programme plan for 2023**

- 19.164 Rail transport is widely used to transport freight in North and Central Asia. The efficiency of cross-border railway freight traffic is dependent upon seamless customs clearance and documentation-related formalities. ESCAP has played a historical role in advancing regional cooperation in building

connectivity in the Asia-Pacific region and has built expertise to advise member States on intra- and interregional connectivity. As mandated by its resolution 71/8, ESCAP has been providing support for the harmonization of laws, regulations, standards and documents relating to connectivity.

Lessons learned and planned change

19.165 The lesson for the component was that it needed to keep pace with rapidly evolving information and communications technologies and their potential to facilitate railway transport in order to continue supporting border agencies in the advancement of policy development. In applying the lesson, the component will identify the most critical actors in the subregion that can contribute to and assist in the development of a subregional inventory of policies geared towards the use of new technologies and digital transformation. In support of subprogramme 3, the component will facilitate the organization of expert group meetings that aim at identifying human and institutional capacity gaps to inform the design of a tailored capacity-building programme. It will further provide a liaison function between subprogramme 3 and the resident coordinators and United Nations country teams, as well as with the regional organizations working on transport issues, and coordinate with all actors to identify synergies for strengthening regional cooperation on connectivity.

19.166 Expected progress towards the objective is presented in the performance measure below (see table 19.41).

Table 19.41
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	Border crossings were facilitated by paper-based documentation and customs clearance software with low interoperability	Available data on border crossings indicated 39 per cent of transit time in trans-Eurasian transportation was related to customs clearance and documentation formalities	Increased awareness of policymakers on new technologies to increase the efficiency of rail transport	Policymakers adopt policy recommendations on strengthening regional cooperation

Deliverables

19.167 Table 19.42 lists all deliverables of the component.

Table 19.42
Component 3: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	1

C. Substantive deliverables				
Consultation, advice and advocacy: advocacy with member States of the United Nations Special Programme for the Economies of Central Asia on regional and subregional priority issues; side events for member States and regional organizations at the annual sessions of the Commission.				
D. Communication deliverables				
External and media relations: press releases and op-ed articles on sustainable connectivity, economic transformation, social inclusion and resilience, and follow-up and review of the 2030 Agenda; press interviews for major publications and events.				
Digital platforms and multimedia content: web pages on sustainable connectivity, economic transformation, social inclusion and resilience, the United Nations Special Programme for the Economies of Central Asia and the review of the 2030 Agenda.				

Component 4 Subregional activities for development in South and South-West Asia

Objective

- 19.168 The objective, to which component 4 of the subprogramme contributes, is to strengthen regional cooperation and integration for sustainable development, in line with the subregional priorities of South and South-West Asia, including sustainable connectivity, women's economic empowerment and the sustainable graduation of the least developed countries.

Strategy

- 19.169 To contribute to the objective, the component will:
- (a) Prepare analytical papers with a focus on sustainable transport, energy connectivity and trade and investment facilitation and provide capacity-building support to advance transboundary connectivity among the countries in the subregion, including the landlocked developing countries, in alignment with the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024 and the road map for its accelerated implementation, and support graduating least developed countries with regard to the facilitation of trade and investment to prepare them for post-graduation challenges;
 - (b) Provide access to information and digital tools for women entrepreneurs through a dedicated portal and advanced training on e-commerce, including by delivering demand-driven assistance;
 - (c) Provide tailored capacity-building for member States and other stakeholders to ensure that challenges, such as the negative socioeconomic impacts of the COVID-19 pandemic and disruptions to market access, can be met in a coherent manner;

- (d) Deliver demand-driven assistance to member States, including by strengthening the analytical capacity of their think tanks to conduct integrated analyses of the Sustainable Development Goals through evidence-based policy analysis;
- (e) Convene subregional consultations on the Goals, including through the South Asia Network on the Sustainable Development Goals, to facilitate the sharing of good practices and bring out subregional perspectives that contribute to the relevant ESCAP knowledge products and forums, such as the Asia-Pacific Forum on Sustainable Development and the high-level political forum on sustainable development;
- (f) Provide analytical support, policy advice and technical assistance to member States on priorities identified during the South Asia Forum on the Sustainable Development Goals, including sustainable global, regional and subregional supply chains, the creation of business opportunities for women, and disaster risk reduction, including those induced by climate change. The component's work will help member States make progress towards achieving Goals 1, 5, 7–10, 12, 13 and 17;
- (g) Strengthen coordination with and collaboration among subregional intergovernmental organizations and member States for an effective representation of subregional perspectives at regional and global consultations, and provide implementation support for the Commission's subprogrammes relating to the subregion's priorities;
- (h) Serve as the focal point for the Commission's engagement with the resident coordinator system and United Nations country teams, including through substantive assistance in preparing common country assessments and United Nations Sustainable Development Cooperation Frameworks, in particular with regard to the transboundary dimensions of sustainable development, and assist country-level programming by providing subregional perspectives, access to regional networks and facilitating South-South and triangular cooperation.

19.170 The above-mentioned work is expected to result in:

- (a) Accelerated progress by the least developed countries in South and South-West Asia towards the transition to sustainable graduation;
- (b) The expansion of business opportunities for women entrepreneurs in South and South-West Asia and their participation in local, regional and global value chains;
- (c) Enhanced connectivity in the subregion, especially for landlocked developing countries and with the contiguous subregions of South-East Asia and North and Central Asia;
- (d) The strengthened capacity of member States on disaster risk reduction, including those induced by climate change;
- (e) Increased capacity by member States, especially least developed countries and landlocked developing countries, to mitigate the negative impacts of COVID-19;
- (f) The addressing of development challenges in the subregion using a collaborative approach among Governments, the United Nations, subregional organizations and other international organizations, civil society, the private sector and international financial institutions.

Programme performance in 2021

Advanced cooperation among South Asian countries on sustainable development

19.171 Subregional cooperation is essential for the achievement of the Sustainable Development Goals in South Asia. The component established a network of think tanks called the South Asia Network on the Sustainable Development Goals in 2020 and launched a web portal for the Network to facilitate the sharing of good practices and distil evidence-based research findings and recommendations towards the achievement of the 2030 Agenda. In 2021, the Network organized dialogues to facilitate the dissemination and cross-fertilization of knowledge on accelerating progress towards the

achievement of the Goals. During these dialogues, ESCAP and Network members also identified priorities for future subregional collaboration, including the further development of the web portal as a repository of good practices to enable knowledge-sharing among member States of South Asia. Suggestions were also made on disseminating these practices through regular newsletters and conducting collaborative research at the subregional level to address common issues and deliberate joint policy solutions. In response, ESCAP launched the first call for joint research between ESCAP and Network members on the COVID-19 response and the 2030 Agenda, namely, a review of national stimulus packages in the aftermath of COVID-19.

19.172 Progress towards the objective is presented in the performance measure below (see figure 19.X).

Figure 19.X

Performance measure: number of think tanks that are members of the South Asia Network on the Sustainable Development Goals (cumulative)

Planned results for 2023

Result 1: least developed countries in South Asia are well equipped to mitigate graduation challenges

Programme performance in 2021 and target for 2023

19.173 The component’s work contributed to Bangladesh meeting the criteria for graduation in the 2021 triennial review and, together with Bhutan and Nepal, being equipped to mitigate the challenges for smooth and sustainable graduation, which met the planned target.

19.174 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 19.43).

Table 19.43

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Bangladesh, Bhutan and Nepal have access to capacity-building to identify the key challenges that they will face in the aftermath of their graduation	Bangladesh, Bhutan and Nepal received tailored technical assistance and policy advice from ESCAP	Bangladesh met the criteria for graduation in the 2021 triennial review and, together with Bhutan and Nepal, is equipped to mitigate the challenges for smooth and sustainable graduation	The graduating least developed countries incorporate the impact of, and their response to, the COVID-19 pandemic into their smooth transition strategies	Bhutan successfully plans for its final graduation in 2023

Result 2: think tanks in South Asian least developed countries improve their capacity for evidence-based policy analysis to support policymaking to accelerate the achievement of the Sustainable Development Goals

- 19.175 The component's work contributed to the advanced use of analytical tools in research and analysis by the Biruni Institute in Afghanistan to take stock of the country's progress towards the achievement of the Sustainable Development Goals, which did not meet the planned target of think tanks in Afghanistan and Bhutan advancing their use of analytical tools in research and analysis to accelerate the achievement of the Goals. The target was not met, as the Bhutan think tank is still in the establishment phase.
- 19.176 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 19.44).

Table 19.44
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Assistance to Afghanistan and Bhutan in developing analytical capacity launched following the request made by their Governments	Engagement of emerging think tanks in Afghanistan and Bhutan with established counterparts in other South Asian countries in addressing the policy challenges arising from the COVID-19 pandemic to accelerating the achievement of the Sustainable Development Goals	The Biruni Institute in Afghanistan advanced the use of analytical tools in research and analysis to gauge progress towards the achievement of the Sustainable Development Goals	The think tanks in Afghanistan and Bhutan provide input to, and hold informed debates on, strategies for accelerating the achievement of the Sustainable Development Goals and building back better, and contribute to forums and debates of subregional think tanks	The think tank in Bhutan provides policy inputs in developing strategies for its achievement of the Sustainable Development Goals

Result 3: increased integration of disaster risk-related analysis in national and local planning in countries of South and South-West Asia

Proposed programme plan for 2023

- 19.177 Of the five ESCAP subregions, South and South-West Asia is the most affected by disasters. From 2011 to 2020, the subregion accounted for 44 per cent of all fatalities, and almost 50 per cent of the total population of the subregion was affected by natural disasters in Asia and the Pacific. The component has been working in collaboration with subprogramme 5 on disaster risk reduction and management for resilient and sustainable development in South and South-West Asia. Two publications were issued, and capacity-building programmes were organized in the subregion to address the challenges of disaster risk reduction.

Lessons learned and planned change

- 19.178 The lesson for the component was that it needed to strengthen the institutional capacities of national and local governments in conducting disaster risk-related analyses. In applying the lesson, the component will partner with UNDP, the Regional Integrated Multi-Hazard Early Warning System for Africa and Asia and national disaster mitigation authorities to develop planning tools, techniques

and guidelines for customized climate and weather risk reduction services. The component will develop customized tools and techniques, adapted to the subregional context, for land-use planning, natural resource mapping and land and marine spatial planning. This will be coupled with capacity development support to policymakers to facilitate the application of these products.

19.179 Expected progress towards the objective is presented in the performance measure below (see table 19.45).

Table 19.45
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	Evidence-based approaches to disaster risk reduction and climate change adaptation are not yet institutionalized and operationalized in a practical manner	One pilot country in South Asia benefits from the customization of planning tools, techniques and guidelines to facilitate disaster risk-related analyses for national and local planning purposes	Policymakers from two countries in South Asia use customized planning tools, techniques and guidelines to facilitate the undertaking of disaster risk-related analyses for national and local planning purposes

Deliverables

19.180 Table 19.46 lists all deliverables of the component.

Table 19.46
Component 4: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	1
1. Report for the Commission	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	6	6	6	6
2. Expert group meetings on policy and programme options to address emerging sustainable development issues in South and South-West Asia	2	2	2	2

B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	2	1	2
4. On institutional programmatic priorities of ESCAP in South and South-West Asia	1	2	1	2
Seminars, workshops and training events (number of days)	–	3	–	2
5. Virtual training on thematic areas related to sustainable development	–	3	–	2
Technical materials (number of materials)	4	4	5	5
6. Development paper series on economic and social development	4	4	5	5

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Consultation, advice and advocacy: expert advice to member States of the subregion in implementing the 2030 Agenda and promoting regional economic cooperation and integration.

D. Communication deliverables

Outreach programmes, special events and information materials: sessions at the South Asia Economic Summit; the sustainable development conference organized by the Sustainable Development Policy Institute, Pakistan; other subregional events; a newsletter with updates related to the Sustainable Development Goals in South Asia.

External and media relations: press releases and op-ed articles on sustainable connectivity, women’s economic empowerment and the sustainable graduation of the least developed countries; press interviews for major publications and events.

Digital platforms and multimedia content: web portal of the South Asia Network on the Sustainable Development Goals; web pages on regional cooperation for accelerating progress towards achieving the Sustainable Development Goals and building back better, sustainable connectivity, women’s economic empowerment and the sustainable graduation of the least developed countries.

Component 5 Subregional activities for development in South-East Asia

Objective

- 19.181 The objective, to which component 5 of the subprogramme contributes, is to strengthen regional cooperation and integration for sustainable development, in line with the subregional priorities of South-East Asia, including sustainable connectivity, inclusive and equitable societies, the efficient management of natural resources and resilient development.

Strategy

- 19.182 To contribute to the objective, the component will support member States in their progress towards the achievement of Sustainable Development Goals 3, 5, 9, 10, 13 and 17. Specifically, it will:
- (a) Coordinate high-level dialogues and working meetings to support the implementation of the Plan of Action to Implement the Joint Declaration on Comprehensive Partnership between the Association of Southeast Asian Nations and the United Nations (2021–2025), as well as the complementarities road map for the period 2020–2025;
 - (b) Enhance effective coordination among the various agencies and sectoral bodies with a focus on sustainable connectivity, inclusive and equitable societies, the efficient management of natural resources and resilient development, while ensuring synergy in the implementation of the processes;
 - (c) Deliver knowledge products, in collaboration with the relevant subprogrammes, on regional and subregional perspectives on global issues to member States in South-East Asia;
 - (d) Strengthen cooperation with ASEAN through increased engagement with the ASEAN secretariat and relevant sectoral bodies and committees, as appropriate, and on initiatives to achieve the Sustainable Development Goals and subregional goals;
 - (e) Coordinate joint substantive initiatives and dialogues between ESCAP and ASEAN in the areas of inclusive business, freight transport connectivity, digital connectivity, social protection and women’s economic empowerment;
 - (f) Contribute to the implementation of the ASEAN Comprehensive Recovery Framework to ensure that recovery efforts are in line with the 2030 Agenda and the Sustainable Development Goals;

- (g) Strengthen coordination with and collaboration among subregional intergovernmental organizations and member States for an effective representation of subregional perspectives at regional and global consultations, and provide implementation support for the Commission's subprogrammes relating to the subregion's priorities;
 - (h) Serve as the focal point for the Commission's engagement with the resident coordinator system and United Nations country teams, including through substantive assistance in preparing common country assessments and United Nations Sustainable Development Cooperation Frameworks, in particular with regard to the transboundary dimensions of sustainable development, and assist country-level programming by providing subregional perspectives and access to regional networks and facilitating South-South and triangular cooperation.
- 19.183 The above-mentioned work is expected to result in:
- (a) Enhanced innovation, infrastructure and competitiveness in the ICT sectors of member States to support an economic and social transition towards a truly digital subregion;
 - (b) Fairer and more equitable access to social protection, especially for those most vulnerable, such as women, older persons and persons with disabilities, and strengthened disability statistics, ageing and disability policies and social protection costing;
 - (c) The increased sustainable use and management of water and marine resources, the increased monitoring and prevention of land degradation and the increased monitoring of fine particulate matter in air pollution (PM2.5 and PM10) and air quality management;
 - (d) The improved coordination and coherence of technical assistance provided under the ASEAN Comprehensive Recovery Framework in the subregion;
 - (e) The addressing of development challenges in the subregion using a collaborative approach among Governments, the United Nations, subregional organizations and other international organizations, civil society, the private sector and international financial institutions.

Programme performance in 2021

Association of Southeast Asian Nations committed to enhancing disaster resilience in the region

- 19.184 The ASEAN Agreement on Disaster Management and Emergency Response is a legally binding regional agreement to address issues arising from the risk and impact of natural disasters in the ASEAN region and to guide regional cooperation in the field of disaster management and response. Its work programme is aligned with global agreements, including the Sendai Framework for Disaster Risk Reduction 2015–2030, the Paris Agreement and the 2030 Agenda for Sustainable Development.
- 19.185 To support the implementation of the ASEAN Agreement work programme, the component contributed to the development of the fourth iteration of the ASEAN-United Nations Joint Strategic Plan of Action on Disaster Management, which is a key deliverable of the Plan of Action to Implement the Joint Declaration on Comprehensive Partnership between the Association of Southeast Asian Nations and the United Nations (2021–2025). The component coordinated the activities and collection of information related to this topic. Activities such as preparatory workshops were held with the ASEAN secretariat and United Nations entities and focused on strengthening the alignment between the Joint Strategic Plan of Action and the ASEAN Agreement work programme for 2021–2025, reviewing the strategic approach and activities planned under the five priority programmes and discussing the preparation of a monitoring framework for the Joint Strategic Plan of Action.
- 19.186 Progress towards the objective is presented in the performance measure below (see table 19.47).

Table 19.47
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	Adoption of the Plan of Action to Implement the Joint Declaration on Comprehensive Partnership between the Association of Southeast Asian Nations and the United Nations (2021–2025)	Member countries endorsed the ASEAN-United Nations Joint Strategic Plan of Action on Disaster Management for 2021–2025

Planned results for 2023

Result 1: strengthened cooperation and relations between the Association of Southeast Asian Nations and the Economic and Social Commission for Asia and the Pacific

Programme performance in 2021 and target for 2023

- 19.187 The component’s work contributed to the implementation of two new ASEAN-United Nations initiatives in the areas of investment facilitation and sustainable FDI indicators, which exceeded the planned target of implementing the Plan of Action to Implement the Joint Declaration on Comprehensive Partnership between the Association of Southeast Asian Nations and the United Nations (2021–2025) with an increased number of joint ASEAN-United Nations initiatives.
- 19.188 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 19.48).

Table 19.48
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
<ul style="list-style-type: none"> Noting of the complementarities road map 2020–2025 by ASEAN leaders Formulation of the Plan of Action to Implement the Joint Declaration on Comprehensive Partnership between the Association of Southeast Asian Nations and the United Nations (2021–2025) begins in line with the road map 	<ul style="list-style-type: none"> Implementation of the road map, including the establishment of the ASEAN Resources Panel Enhanced cooperation between ASEAN and other subregions, e.g. ASEAN event at the regional South-South cooperation meeting Noting of the Plan of Action 	Two new ASEAN-United Nations initiatives implemented in the areas of investment facilitation and sustainable FDI indicators	Implementation of the Plan of Action with one additional joint ASEAN-United Nations initiative	Two ASEAN member States develop capacity-building activities for sustainable FDI indicators

Result 2: empowering women entrepreneurs in the subregion to overcome the socioeconomic impact of the COVID-19 pandemic

- 19.189 The component’s work contributed to the establishment by two member States (Cambodia and Viet Nam) of institutional mechanisms for collaboration across ministries and sectors to increase access to financing and business support services for women entrepreneurs, which exceeded the planned target of member States having increased access to tools such as guidelines for addressing the needs of women entrepreneurs in policies on micro-, small and medium-sized enterprises in the subregion.
- 19.190 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 19.49).

Table 19.49
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
–	Member States expressed interest in initiatives to address barriers faced by women entrepreneurs	Two member States (Cambodia and Viet Nam) established institutional mechanisms for collaboration across ministries and sectors to increase access to financing and business support services for women entrepreneurs	Two member States from the subregion implement projects with a focus on enhancing the financial access and inclusion of women entrepreneurs	Two additional member States from the subregion implement projects with a focus on enhancing the financial access and inclusion of women entrepreneurs

Result 3: increased use of innovative financing policies and instruments to achieve the Sustainable Development Goals

Proposed programme plan for 2023

- 19.191 The 2030 Agenda includes the need to address barriers that divert finance from sustainable development and to align policies and financial systems to leverage opportunities to increase investments in the Sustainable Development Goals. Securing adequate resources for the implementation of the 2030 Agenda remains a significant challenge for many countries in South-East Asia. The component has supported subregional dialogues to explore how countries in the region can take advantage of innovative financing policies and instruments to advance progress towards the Goals.

Lessons learned and planned change

- 19.192 The lesson for the component was that it needed to facilitate transparent information-sharing between the public and private sectors and ensure the active involvement of think tanks in the discussions to strengthen the social and environmental considerations of innovative financing tools. In addition, those exchanges would benefit from gaining an understanding of the perspectives and knowledge of other Asian subregions. In applying the lesson, the component will offer additional opportunities for peer-to-peer learning with the aim of identifying regulatory barriers and offering practical advice on innovative financing policies and instruments. Working with the resident coordinator offices, the component will also broaden the range of stakeholders in these exchanges

to include, for example, line agencies, and facilitate continuous information-sharing among all stakeholders to reconcile competing perspectives and improve national policy implementation. Coupled with capacity-building, the component will support member States in more effectively using sustainable financing instruments.

19.193 Expected progress towards the objective is presented in the performance measure below (see table 19.50).

Table 19.50
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	Member States expressed interest in discussing sustainable bonds in the ASEAN region and with other subregions	Member States agreed to further study the use of sustainable and Sustainable Development Goal-linked bonds as an instrument to address post-COVID-19 financing needs and achieve the 2030 Agenda	Member States co-organize subregional dialogues on the policy implications of issuing sustainable bonds	Member States implement initiatives that facilitate innovative financing mechanisms

Deliverables

19.194 Table 19.51 lists all deliverables of the component.

Table 19.51
Component 5: deliverables for the period 2021–2023, by category and subcategory

8. On the implementation of the Plan of Action to Implement the Joint Declaration on Comprehensive Partnership between the Association of Southeast Asian Nations and the United Nations (2021–2025)	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: consultations and advisory support to the subregional member States on sustainable connectivity, inclusive and equitable societies, the efficient management of natural resources and resilient development; advocacy with member States on the subregional findings of the Commission’s publications.				
D. Communication deliverables				
Outreach programmes, special events and information materials: subregional launch of ESCAP publications.				
External and media relations: press releases and op-ed articles on sustainable connectivity, inclusive and equitable societies, the efficient management of natural resources and resilient development; press interviews for major publications and events.				
Digital platforms and multimedia content: web pages on climate action, environment, social development, and trade and financial integration.				

Subprogramme 9

Energy

Objective

- 19.195 The objective, to which this subprogramme contributes, is to ensure access to affordable, reliable, sustainable and modern energy for all in Asia and the Pacific by enhancing member States’ capacity for energy access, renewable energy, energy efficiency and energy connectivity.

Strategy

- 19.196 To contribute to the objective, the subprogramme will help to enhance the evidence base for the achievement of Sustainable Development Goal 7 and Goals with interlinkages to it and their follow-up, and to review and support member States’ efforts to progress towards Goal 7 and the emissions reduction goals under the Paris Agreement. Specifically, the subprogramme will:
- (a) Improve the national expert Sustainable Development Goal tool for energy planning, an integrated modelling tool designed to assist policymakers in making informed decisions on their policy mix for energy access, energy efficiency and renewable sources of energy;
 - (b) Develop and disseminate evidence-based policy recommendations and guidance on global and regional trends and new developments related to increasing access to energy, increasing the share of renewable sources of energy in the energy mix and improving energy efficiency, in partnership with international development agencies and development banks;
 - (c) Focus its capacity-building efforts on small island developing States, least developed countries and landlocked developing countries to accelerate progress towards inclusive access to clean cooking and to produce policy guidelines at the national level to increase access for poor households to clean cooking fuels;

- (d) Offer up-to-date data and indicators, policy information and energy infrastructure mapping through the Asia Pacific Energy Portal, the knowledge platform focused on the measurement and review of progress towards Goal 7 in the Asia-Pacific region;
- (e) Facilitate peer-to-peer exchanges and partnerships with member States and subnational authorities on energy access, energy efficiency, renewable sources of energy and sustainable energy in urban areas through data collection and analysis, including methodology design and recommendations on policy and technology solutions tailored to the local context, and capacity-building for local authorities involved in decision-making and planning;
- (f) Produce and contribute to the development of knowledge products and capacity-building activities focused on broadening the understanding of the benefits and implications of energy connectivity for energy security and resilience, affordability and sustainability, with a view to encouraging increased power system integration, in particular;
- (g) Facilitate intergovernmental dialogue and provide recommendations on policies, legislation and mechanisms needed for energy connectivity to enable and enhance the transition to sustainable energy systems, such as the regional road map on power system connectivity: promoting cross-border electricity connectivity for sustainable development;
- (h) Offer policy options and analysis to strengthen the resilience of the energy sector to future crises on the basis of lessons learned from past crises, including the COVID-19 pandemic.

19.197 The above-mentioned work is expected to result in:

- (a) Improved capacity to implement energy transition policies, in particular the capacity to plan for and realize nationally appropriate targets to advance nationally determined contributions under the Paris Agreement;
- (b) Increased acceptance of evidence-based policies, strategies and investment plans to promote energy access, energy efficiency and renewable sources of energy at the city and national levels for a transition towards low-greenhouse-gas-emissions economies;
- (c) Greater energy connectivity and energy access among underserved populations in the region;
- (d) Incorporation of policy options and measures to enhance the disaster resilience of the energy sector into member States' national and local strategies;
- (e) Reduction in the adverse effects of cooking on the health of women and children in Asia and the Pacific.

Programme performance in 2021

Increased commitment to phasing out the use of coal to enable net zero emissions targets

19.198 The Asia-Pacific region relies heavily on fossil fuels to meet its energy needs. Achieving the targets of the 2030 Agenda and the Paris Agreement will require a rapid pivot away from fossil fuels towards a system based on renewable sources of energy and energy efficiency. The extent to which the region relies on coal for electricity generation represents a significant barrier to the transition to sustainable energy. The region is responsible for more than three quarters of global coal-fired power generation and almost all – 94 per cent – of the global total of proposed coal-fired power stations. This proposed capacity, if realized, will present a significant challenge in the form of high locked-in emissions and will exacerbate the already challenging efforts to meet the Paris Agreement targets.

19.199 To explore the constraints and opportunities with regard to the region's transition to a future less dependent on coal and to discuss issues related to coal-fired power generation and alternative development pathways, the subprogramme organized a multi-stakeholder policy dialogue on the margins of the third session of the Committee on Energy. The broader social and economic implications of efforts to achieve net zero emissions targets by mid-century and of the phasing out of the use of coal were also key issues discussed at the regional round table on extractive industries,

one of the five round tables organized by the regional commissions, jointly with the Office of the Secretary-General. The research products and technical support of the subprogramme also informed member States’ efforts, linked to Sustainable Development Goal 7, to phase out coal from their power systems in view of the energy transition and its broader implications for the extractive industries, including shifting demand from fossil fuels to critical minerals.

19.200 Progress towards the objective, as measured by the percentage of member States that announce mid-century net zero emissions targets, is presented in the performance measure below (see table 19.52).

Table 19.52
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
21 per cent of member States in the Asia-Pacific region committed to achieving net zero emissions targets by mid-century	Select member States in the region committed to accelerating actions to achieve net zero carbon dioxide emissions by mid-century	Of the total countries committed to net zero targets, member States in the region accounted for 25 per cent, including Bhutan, one of two countries in the world that announced the achievement of net zero targets in 2021

Planned results for 2023

Result 1: evidence-based and people-focused planning for sustainable energy

Programme performance in 2021 and target for 2023

19.201 The subprogramme’s work contributed to the development of five national road maps on Sustainable Development Goal 7, in Bangladesh, Bhutan, Fiji, Georgia and Tonga, that include strategies for attaining universal access to clean cooking fuel and technologies, which met the planned target. The subprogramme’s work further contributed to the development by nine member States of national Goal 7 road maps, which did not meet the planned target of 16, owing to COVID-19, which had an impact on the securing of agreements with partner countries.

19.202 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 19.XI).

Figure 19.XI

Performance measure: number of national road maps on Sustainable Development Goal 7 in the Asia-Pacific region that include strategies for attaining universal access to clean cooking fuels and technologies (cumulative)

Result 2: localization of Sustainable Development Goal 7: evidence-based energy efficiency and renewable strategies for urban areas

Programme performance in 2021 and target for 2023

- 19.203 The subprogramme’s work contributed to the development of six localized road maps on Sustainable Development Goal 7 taken up at the city level in Indonesia, Malaysia, the Philippines and Thailand, which exceeded the planned target of five.
- 19.204 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 19.XII).

Figure 19.XII
Performance measure: number of localized road maps on Sustainable Development Goal 7 taken up at the city level in the Asia-Pacific region (cumulative)

Result 3: evidence-based strategies for increasing sustainable power system connectivity

Proposed programme plan for 2023

- 19.205 In 2018, member States, facilitated by the ESCAP secretariat, made commitments to improving cross-border electricity connectivity in the Ministerial Declaration on Regional Cooperation for Energy Transition towards Sustainable and Resilient Societies in Asia and the Pacific. The subprogramme contributed to the finalization of the regional road map on power system connectivity by holding four meetings of the Expert Working Group on Energy Connectivity and the development of relevant publications, including reports on the potential for sustainable power system connectivity in North-East Asia, South Asia and South-East Asia. The regional road map, which was endorsed by the Commission at its seventy-seventh session, represents a direct response to the Ministerial Declaration and includes a vision, a set of principles and nine strategies to increase sustainable power system integration in the region. The road map is the first ESCAP-facilitated regional cooperation mechanism of its kind on Sustainable Development Goal 7.

Lessons learned and planned change

- 19.206 The lesson for the subprogramme was that there is a need to better articulate the linkage between power system connectivity and sustainability, including with regard to achieving Sustainable Development Goal 7 and the Paris Agreement targets, and the implementation of the decisions adopted at the twenty-sixth session of the Conference of the Parties. There is also a need to increase coordination and collaboration among the many existing subregional and regional power system connectivity initiatives. In applying the lesson, the subprogramme will collaborate more proactively with other subregional and regional organizations engaged in or supporting power system connectivity efforts and extend its partnerships to include other relevant initiatives. To fully address member States’ concerns on the implications of the decisions on power system connectivity adopted

at the twenty-sixth session of the Conference of the Parties, the subprogramme will better communicate the evidence-based analysis contained in its work products.

19.207 Expected progress towards the objective is presented in the performance measure below (see table 19.53).

Table 19.53
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
ESCAP member States emphasized the importance of a regional road map on power system connectivity	ESCAP member States agreed on draft text of a regional road map on power system connectivity through informal consultation	Committee on Energy endorsed the regional road map on power system connectivity at its third session, and the Commission endorsed it at its seventy-seventh session	ESCAP member States provide national and subregional updates on the status of power system connectivity and confirm the time frames for achieving the road map milestones	ESCAP member States analyse gaps in policies, regulations and standards in each subregion and agree on a set of principles for enabling sustainable power system connectivity

Deliverables

19.208 Table 19.54 lists all deliverables of the subprogramme.

Table 19.54

^a Includes four temporary posts (three P-4 and one P-3) that were approved pursuant to General Assembly resolution 71/272.

19.210 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 19.58 to 19.60 and figure 19.XIII.

19.211 As reflected in tables 19.58 (1) and 19.59 (1), the overall resources proposed for 2023 amount to \$54,312,300 before recosting, reflecting a decrease of \$940,900 (or 1.7 per cent) compared with the appropriation for 2022. Resource changes result from two factors, namely: (a) technical adjustments; and (b) other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Figure 19.XIII
Distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

19.212 As reflected in table 19.58 (1), resource changes reflect a decrease of \$940,900 under programme support related to the removal of non-recurrent requirements approved by the General Assembly for 2022 in its resolution 76/246 relating to the seismic mitigation retrofit and life-cycle replacements project at ESCAP. Resource requirements relating to the seismic mitigation project at ESCAP will be presented to the General Assembly in the report of the Secretary-General on the seismic mitigation

retrofit and life-cycle replacements project at the Economic and Social Commission for Asia and the Pacific premises in Bangkok during the main part of the seventy-seventh session of the Assembly.

Other changes

19.213 As reflected in table 19.58 (1), the net effect of the proposed changes is cost-neutral. The breakdown of changes is as follows:

- (a) **Executive direction and management.** The increase of \$59,900 in post resources relates to the inward redeployment of a Local level post from subprogramme 1 (see annex III);
- (b) **Subprogramme 1, Macroeconomic policy, poverty reduction and financing for development.** The net decrease of \$72,100 comprises: (i) a decrease under post resources (\$59,900), which relates to the outward redeployment of one Local level post to executive direction and management (see annex III); (ii) reduced requirements under consultants (\$7,800) and experts (\$12,000) owing to a decrease in the number of expert group meetings and associated consultant services; and (iii) a decrease in travel of staff (\$4,000) owing to a reduced volume of planned travel, offset in part by an increase in contractual services (\$11,600) owing to an increase in requirements for a publication for the *Financing for Development in Asia and the Pacific* series;
- (c) **Subprogramme 2, Trade, investment and innovation.** The increase of \$14,700 under non-post resources relates mainly to an increased requirement under contractual services (\$14,100) owing to an increase in the provision for the substantive editing of a flagship publication on trade and investment;
- (d) **Subprogramme 3, Transport.** The increase of \$1,100 under non-post resources relates mainly to an increased requirement under consultants (\$1,400) owing to an increase in the number of consultancy days required to support planned expert group meetings;
- (e) **Subprogramme 4, Environment and development.** The net increase of \$4,600 under non-post resources relates mainly to an increased requirement under contractual services (\$5,400) owing to the increase in the number of publications, offset in part by a decrease under consultants (\$1,300) owing to a reduction in the number of consultancy days required;
- (f) **Subprogramme 5, Information and communications technology and disaster risk reduction and management.** The net decrease of \$5,000 under non-post resources relates mainly to a decreased requirement under experts (\$12,000) and consultants (\$3,700) owing to a reduced number of expert group meetings and associated consultancy services, offset in part by an increase in contractual services (\$10,900) owing to the publication of one flagship report on disaster risk reduction;
- (g) **Subprogramme 6, Social development.** The net decrease of \$42,200 under non-post resources relates mainly to decreased requirements under consultants (\$20,400) and experts (\$17,600) owing to a reduced number of expert group meetings on the social outlook for Asia and the Pacific and associated consultancy services, as well as contractual services (\$12,600) owing to a reduced number of publications, offset in part by an increase in travel of staff (\$8,400) owing to an increase in planned travel for effective engagement with member States in the region in the implementation of the 2030 Agenda;
- (h) **Subprogramme 7, Statistics.** The increase of \$33,300 under non-post resources relates mainly to an increase in requirements under experts (\$24,500) and consultants (\$3,900) owing to an increased number of experts required for the expert group meetings and associated consultancy services, as well as travel of staff (\$3,700) owing to an increase in planned travel for effective engagement with member States in the region in the implementation of the 2030 Agenda;
- (i) **Subprogramme 8, component 1, Subregional activities for development in the Pacific.** The increase of \$7,900 under non-post resources relates mainly to increased requirements under general operating expenses (\$7,500) owing to an anticipated increase in communication costs owing to an upgrade of the Internet bandwidth;

- (j) **Subprogramme 8, component 2, Subregional activities for development in East and North-East Asia.** The net decrease of \$2,000 under non-post resources relates mainly to a decreased requirement under experts (\$2,600) owing to a reduced number of expert group meetings and general operating expenses (\$2,200) as a result of lower requirements for communication services and maintenance of equipment, offset in part by an increase under consultants (\$3,500) owing to consultancy requirements in the area of emerging economic and social development issues in East and North-East Asia;
- (k) **Subprogramme 8, component 3, Subregional activities for development in North and Central Asia.** The decrease of \$6,700 under non-post resources relates mainly to decreased requirements under contractual services (\$2,900) owing to a reduced requirement for logistical support for meetings and general operating expenses (\$2,900) as a result of a reduced requirement for maintenance of official vehicles and communication services;
- (l) **Subprogramme 8, component 4, Subregional activities for development in South and South-West Asia.** The decrease of \$3,900 in non-post resources relates mainly to a decrease in the provision for general operating expenses (\$6,500) as a result of reduced communications and utilities requirements, as well as an anticipated decrease in the requirement under experts (\$1,800) as a result of reduced costs associated with travel for expert group meetings, offset in part by increased requirements under contractual services (\$5,400) owing to an increase in data processing services;
- (m) **Subprogramme 8, component 5, Subregional activities for development in South-East Asia.** The increase of \$11,900 in non-post resources relates to increased requirements under consultants (\$4,800) and experts (\$7,100) owing to an increase in the number of expert group meetings and associated consultancy services;
- (n) **Subprogramme 9, Energy.** The decrease of \$1,500 in non-post resources relates mainly to reduced requirements under consultancy services (\$5,300) owing to a decrease in the provision for such services in the area of energy connectivity, offset in part by an increase in the provision for travel of staff (\$4,500) owing to the increased volume of travel planned for enhancing engagement with member States in support of the implementation of the 2030 Agenda.

Extrabudgetary resources

- 19.214 As reflected in tables 19.58 (2) and 19.59 (2), ESCAP expects to continue to receive both cash and in-kind contributions, which would complement regular budget resources. In 2023, extrabudgetary resources are estimated at \$23,704,500 and would provide for 116 posts, as presented in table 19.59 (2). Total in-kind contributions, valued at \$4.52 million, comprise donated right-to-use premises in Bangkok for ESCAP (valued at \$1.3 million) and premises at subregional offices and regional institutes (valued at \$1.8 million), as well as experts on non-reimbursable loans and United Nations Volunteers (valued at \$1.4 million). Extrabudgetary resources represent 30.4 per cent of the total resources for this section.
- 19.215 The extrabudgetary resources under this section are subject to the oversight of the secretariat of ESCAP, which has delegated authority from the Secretary-General.

Policymaking organs

- 19.216 The resources proposed under this component would cover the requirements for standing intergovernmental meetings serviced by the secretariat. The Commission, which consists of 53 members and 9 associate members, provides overall direction to the work of the secretariat and reports to the Economic and Social Council. It meets annually, with each session comprising a senior officials segment and a ministerial segment, to discuss and decide on important issues pertaining to inclusive and sustainable development in the region. The provisions proposed for 2023 are in accordance with Commission resolution 73/1, which set out the conference structure of the Commission, comprising

the Asia-Pacific Forum on Sustainable Development and nine committees. In addition to the annual session of the Commission and the Asia-Pacific Forum, the biennial sessions of the following three committees will be held: the Committee on Macroeconomic Policy, Poverty Reduction and Financing for Development; the Committee on Trade and Investment; and the Committee on Disaster Risk Reduction. In addition, no more than eight ad hoc ministerial conferences or other intergovernmental meetings should be held in addition to the regular calendar of intergovernmental meetings during each biennium. In accordance with Commission resolution 74/9, the third Asian and Pacific Energy Forum will be organized as an ad hoc meeting in place of the Committee on Energy, in accordance with the provisions of the conference structure of the Commission (E/2017/39-E/ESCAP/73/40, annex II). The seventh Asian and Pacific Population Conference, a statutory organ of the Commission, will also be convened, in accordance with Commission resolution 74 (XXIII).

19.217 Table 19.61 provides information on the standing intergovernmental organs and related resource requirements under the regular budget.

Table 19.61
Policymaking organs

(Thousands of United States dollars)

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2022 appropriation</i>	<i>2023 estimate (before recosting)</i>
Economic and Social Commission for Asia and the Pacific	The Commission provides overall direction to the work of the secretariat and reports to the Economic and Social Council. It holds regular annual sessions, with each session comprising a senior officials segment and a ministerial segment, to discuss and decide on important issues pertaining to inclusive and sustainable development in the region in the follow-up to the adoption of the 2030 Agenda.	Mandate: Economic and Social Council resolutions 37 (IV), 1895 (LVII) and 2015/30 Membership: 53 members and 9 associate members Number of sessions in 2023: 1 (seventy-ninth session)	213.3	255.2
Asia-Pacific Forum on Sustainable Development	The Forum is an inclusive intergovernmental platform that meets annually. It supports regional preparations for the high-level political forum on sustainable development under the auspices of both the Economic and Social Council and the General Assembly.	Mandate: Economic and Social Council resolution 2015/30 and Commission resolutions 71/1 and 73/1 Membership: 53 members and 9 associate members Number of sessions in 2023: 1 (tenth session)	24.6	22.3
Committee on Transport	A subsidiary organ of the Commission that addresses transport issues.	Mandate: Economic and Social Council resolution 2015/30 and decision 2017/269 and Commission resolution 71/1 Membership: 53 members and 9 associate members Number of sessions in 2023: none	24.6	–
Committee on Environment and Development	A subsidiary organ of the Commission that addresses environment and development issues.	Mandate: Economic and Social Council resolution 2015/30 and Commission resolution 71/1 Membership: 53 members and 9 associate members Number of sessions in 2023: none	24.6	–

Section 19 Economic and social development in Asia and the Pacific

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2022 appropriation</i>	<i>2023 estimate (before recosting)</i>
Committee on Information and Communications Technology, Science, Technology and Innovation	A subsidiary organ of the Commission that addresses information and communications technology and science, technology and innovation issues.	Mandate: Economic and Social Council resolution 2015/30 and Commission resolution 71/1 Membership: 53 members and 9 associate members Number of sessions in 2023: none	24.6	–
Committee on Social Development	A subsidiary organ of the Commission that addresses social development issues.	Mandate: Economic and Social Council resolution 2015/30 and Commission resolution 71/1 Membership: 53 members and 9 associate members Number of sessions in 2023: none	24.6	–
Committee on Statistics	A subsidiary organ of the Commission that addresses statistical issues.	Mandate: Economic and Social Council resolution 2015/30 and Commission resolution 71/1 Membership: 53 members and 9 associate members Number of sessions in 2023: none	24.6	–
Committee on Macroeconomic Policy, Poverty Reduction and Financing for Development	A subsidiary organ of the Commission that addresses macroeconomic policy, poverty reduction and financing for development issues.	Mandate: Economic and Social Council resolution 2015/30 and Commission resolution 71/1 Membership: 53 members and 9 associate members Number of sessions in 2023: 1 (fourth session)	–	15.1
Committee on Trade and Investment	A subsidiary organ of the Commission that addresses trade and investment issues.	Mandate: Economic and Social Council resolution 2015/30 and Commission resolution 71/1 Membership: 53 members and 9 associate members Number of sessions in 2023: 1 (eighth session)	–	15.1
Committee on Disaster Risk Reduction	A subsidiary organ of the Commission that addresses disaster risk reduction issues.	Mandate: Economic and Social Council resolution 2015/30 and Commission resolution 71/1 Membership: 53 members and 9 associate members Number of sessions in 2023: 6 (eighth session)	–	15.1
Committee on Energy	A subsidiary organ of the Commission that addresses energy issues.	Mandate: Economic and Social Council resolution 2015/30 and Commission resolution 71/1 Membership: 53 members and 9 associate members Number of sessions in 2023: none	–	–
Ministerial Conference on Transport	The Conference will evaluate the implementation of the Regional Action Programme for Sustainable Transport Connectivity in Asia and the Pacific, phase I (2017–2021) and consider a future programme of work.	Mandate: Economic and Social Council decision 2017/269 and Commission resolution 73/4 Membership: 53 members and 9 associate members Number of sessions in 2023: none	–	–

Part V Regional cooperation for development

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2022 appropriation</i>	<i>2023 estimate (before recosting)</i>
Ministerial Conference on Regional Economic Cooperation and Integration in Asia and the Pacific	The Conference will review progress made in the advancement of regional economic cooperation and integration.	Mandate: Economic and Social Council decision 2018/260 and Commission resolution 74/10 Membership: 53 members and 9 associate members Number of sessions in 2023: none	–	–
Asia-Pacific Review of the Madrid International Plan of Action on Ageing	The Conference will review progress made in the advancement of regional economic cooperation and integration.	Mandate: General Assembly resolution 75/152 and Economic and Social Council resolution 2020/8 Membership: 53 members and 9 associate members Number of sessions in 2023: none	31.2	–
Review of the Asian and Pacific Decade of Persons with Disabilities, 2013–2022	The conference will review the implementation of the Asian and Pacific Decade of Persons with Disabilities, 2013–2022, and consider a future programme of work.	Mandate: Commission resolutions 69/13 and 74/7 Membership: 53 members and 9 associate members Number of sessions in 2023: none	31.2	–
Ministerial Conference on Space Applications for Sustainable Development in Asia and the Pacific	The conference will review progress in implementation of Phase-I and the start of the Phase-II of the Asia-Pacific Plan of Action on Space Applications for Sustainable Development (2018–2030).	Mandate: Commission decision 75/4 and Commission resolution 75/6 Membership: 53 members and 9 associate members Number of sessions in 2023: none	24.6	–
Asian and Pacific Energy Forum		Mandate: Commission resolutions 67/2, 70/9, 73/8 and 74/9 Membership: 53 members and 9 associate members Number of sessions in 2023: 1 (third session)	–	15.1
Asian and Pacific Population Conference		Mandate: Commission resolution 74 (XXIII) Membership: 53 members and 9 associate members Number of sessions in 2023: 1 (seventh session)	–	110.0
Total			447.9	447.9

19.218 The proposed regular budget resources for 2023 amount to \$447,900 and reflect no change compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 19.62 and figure 19.XIV.

Executive direction and management

- 19.219 Executive direction and management is led by the Office of the Executive Secretary and supported by the Sustainable Development and Countries in Special Situations section. The Office provides overall policy direction and management to the secretariat to support member States through the provision of strategic analyses, policy options and capacity-building activities. The efforts are aimed at addressing key development challenges through the provision of innovative solutions for equitable and inclusive economic prosperity, social progress and environmental sustainability across Asia and the Pacific. Emerging issues in the regional development agenda will be identified, and regional concerns and priorities will be articulated at the global level.
- 19.220 The Office of the Executive Secretary provides guidance to divisions, subregional offices and regional institutions on the implementation of the ESCAP programme of work and on ensuring its accountability. It also provides direction on the mainstreaming of policies and strategies relating to gender equality and the empowerment of women, as well as on disability inclusion, across the programme of work.
- 19.221 The Office of the Executive Secretary provides overall direction and management with respect to the preparation of the annual theme study and the organization of the annual session of the Commission, an inclusive intergovernmental platform for regional cooperation. It also guides the implementation of

- reforms to the ESCAP conference structure pursuant to Commission resolution [73/1](#); the strengthening of organizational effectiveness and results-based management; and the implementation of United Nations system-wide change management and reform initiatives.
- 19.222 The Office of the Executive Secretary provides overall direction to programme support units in ensuring gender-sensitive and disability-inclusive programme planning and financial and human resources management, as well as accountability systems. Every effort will be made to advance gender parity.
- 19.223 The Sustainable Development and Countries in Special Situations section supports the accelerated implementation of the 2030 Agenda in the least developed countries, landlocked developing countries and small island developing States. The section takes a concerted approach to mainstreaming the issues faced by these groups of countries in the overall programme of work, monitors the implementation of the programmes of action for these countries and provides strategic analyses to address key development challenges. It also guides the organization of the Asia-Pacific Forum on Sustainable Development as the multi-stakeholder platform through which to discuss, review and follow up on regional priorities and needs for sustainable development.
- 19.224 In accordance with the 2030 Agenda, in particular target 12.6 of the Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycle, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), as well as with the environmental policy of the United Nations Secretariat ([ST/SGB/2019/7](#)), the Office is integrating environmental management practices into its operations. In 2021, ESCAP continued the energy efficiency efforts through its daily Earth Hour campaign, through which office lights were automatically switched off during the lunch break, and improvements and adjustments to facilities management systems. ESCAP achieved an energy efficiency improvement of 40 per cent compared with 2016 – its reference environmental baseline year – and 15 per cent compared with 2020. The energy efficiency improvements are equivalent to 7,171 tons of carbon dioxide over the five years since the launch of the ESCAP environmental management system. In the period 2020–2021, ESCAP expanded its on-site solar panels and purchased international renewable energy certificates to source 100 per cent of its energy consumption from solar energy produced locally in Thailand, thus achieving the United Nations Secretariat 2030 targets as early as in 2020. In the same year, ESCAP continued its waste prevention and management efforts and achieved a rate of 80 per cent for waste recycling (an increase of 56 per cent compared with 2016). Efforts included the continuation of the compound-wide ban on all main single-use catering items and the establishment of a new waste management system that boosted recycling (centralized recycling bins, a new waste sorting area and organic waste composting). In 2021, ESCAP meetings were organized online or in a format, which significantly reduced the organizational air travel footprint by more than 90 per cent. ESCAP will have achieved climate neutrality in its 2021 operations by procuring certified carbon emission reduction credits by June 2022. In 2022, the Office will continue to reduce its carbon footprint through the establishment of an environmental management system to ensure systematic and monitored environmental management. The system will serve to target energy, waste, water, sustainable meetings and travel and will address staff awareness as a cross-cutting issue for all the identified environmental issues. It should be noted that, although ESCAP reduction trends were already in place and yielding positive environmental results before the COVID-19 pandemic, the levels of progress reached to date in some of the targeted areas may not be sustainable at the same level in the long term if building occupancy rates and air travel were to increase.
- 19.225 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 19.63. Restrictions on international travel and increased entry requirements during the COVID-19 pandemic continued to have a negative impact on the timely planning and preparation of travel. The advance purchase compliance rate decreased, from 49 per cent in 2020 to 39 per cent in 2021. The number of travel requests continued to be extremely low, although a sharp increase, from 12 in the third quarter of 2021 to 61 in the fourth quarter – when some member States in the Asia-Pacific region relaxed their international travel and entry restrictions – was observed. While ESCAP continues to implement measures to improve the compliance rate,

Section 19 Economic and social development in Asia and the Pacific

which include regular monitoring of and reporting on the Organization's advance purchase compliance rate, as well as bilateral consultations with respective divisions/offices to improve their travel planning, the evolving pandemic situation, as well as ever-changing policies and restrictions related to travel, have affected the compliance rate.

Table 19.63
Compliance rate
(Percentage)

	<i>Actual 2019</i>	<i>Actual 2020</i>	<i>Actual 2021</i>	<i>Planned 2022</i>	<i>Planned 2023</i>
Timely submission of documentation	81	93	93	100	100
Air tickets purchased at least two weeks before the commencement of travel	61	49	39	100	100

19.226 The proposed regular budget resources for 2023 amount to \$4,014,700 and reflect a net increase of \$59,900 in the resource level compared with the appropriation for 2022. The proposed increase is explained in paragraph 19.213 (a). Additional details on the distribution of the proposed resources for 2023 are reflected in table 19.64 and figure 19.XV.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

19.227 Extrabudgetary resources are estimated at \$273,000 under executive direction and management and would provide for non-post resources. The resources would support: (a) a technical cooperation project with the Asian Development Bank and UNDP on the implementation of the 2030 Agenda; and (b) research and capacity-building activities for least developed countries. The estimated increase of \$68,750 compared with 2022 is attributable mainly to the anticipated recovery from COVID-19 pandemic disruptions, which would allow for normalization of travel activities.

Programme of work

Subprogramme 1

Macroeconomic policy, poverty reduction and financing for development

19.228 The proposed regular budget resources for 2023 amount to \$2,927,900 and reflect a decrease of \$72,100 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 19.213 (b). Additional details on the distribution of resources for 2023 are reflected in table 19.65 and figure 19.XVI.

Extrabudgetary resources

19.229 No extrabudgetary resources are estimated for this subprogramme in 2023. The estimated decrease of \$88,900 is attributable mainly to the completion of technical cooperation projects in 2022.

**Subprogramme 2
 Trade, investment and innovation**

19.230 The proposed regular budget resources for 2023 amount to \$3,292,700 and reflect an increase of \$14,700 in the resource level compared with the appropriation for 2022. The proposed increase is explained in paragraph 19.213 (c). Additional details on the distribution of the proposed resources for 2023 are reflected in table 19.66 and figure 19.XVII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

19.231 Extrabudgetary resources for the subprogramme are estimated at \$3,090,000 and would provide for 11 posts (1 P-5, 2 P-4, 2 P-3, 1 National Professional Officer and 5 Local level), as well as non-post resources. The resources would support technical cooperation projects on women’s entrepreneurship (innovative finance component), trade policy and facilitation, investment, enterprise and innovation, as well as technical cooperation activities and the operational costs of the Asian and Pacific Centre for Transfer of Technology. The estimated decrease of \$1,415,600 is attributable mainly to the completion of technical cooperation projects in 2022.

Subprogramme 3 Transport

19.232 The proposed regular budget resources for 2023 amount to \$3,371,600 and reflect an increase of \$1,100 compared with the appropriation for 2022. The proposed increase is explained in paragraph 19.213 (d). Additional details on the distribution of the proposed resources for 2023 are reflected in table 19.67 and figure 19.XVIII.

Extrabudgetary resources

19.233 Extrabudgetary resources for the subprogramme are estimated at \$982,800 and would provide for two posts (P-4), as well as non-post resources. The resources would contribute to the achievement of Goals 3, 9 and 11 by supporting technical cooperation projects focused on sustainable transport connectivity and logistics and sustainable transport mobility in the Asia-Pacific region. The estimated increase of \$85,000 is attributable mainly to projected contributions to support technical cooperation projects on sustainable transport development in the region.

**Subprogramme 4
Environment and development**

19.234 The proposed regular budget resources for 2023 amount to \$2,932,200 and reflect an increase of \$4,600 compared with the appropriation for 2022. The proposed increase is explained in paragraph 19.213 (e). Additional details on the distribution of the proposed resources for 2023 are reflected in table 19.68 and figure 19.XIX.

Extrabudgetary resources

- 19.235 Extrabudgetary resources for the subprogramme are estimated at \$2,727,300 and would provide for 10 posts (1 P-5, 2 P-4, 2 P-3, 1 National Professional Officer and 4 Local level), as well as non-post resources. The resources would support technical cooperation projects on the achievement of Goals 1, 2, 6, 11–15 and 17, in particular in the promotion of regional cooperation and networking, research and analysis and capacity-building, for sustainable urban development and sustainable agricultural mechanization in the Asia-Pacific region. The estimated decrease of \$887,400 compared with the appropriation for 2022 reflects the completion of technical cooperation projects in 2022.

**Subprogramme 5
Information and communications technology and disaster risk reduction
and management**

- 19.236 The proposed regular budget resources for 2023 amount to \$2,811,700 and reflect a decrease of \$5,000 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 19.213 (f). Additional details on the distribution of the proposed resources for 2023 are reflected in table 19.69 and figure 19.XX.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

19.237 Extrabudgetary resources for the subprogramme are estimated at \$4,726,900 and would provide for 23 posts (2 D-1, 1 P-5, 3 P-4, 5 P-3, 4 National Professional Officer and 8 Local level), as well as non-post resources. The resources would support technical cooperation projects on the achievement of all the Goals, in particular Goals 1, 4, 5, 9–11, 13–15 and 17, through efforts to bridge the digital divide and to advance the use of technologies and geospatial data for disaster resilience in particular and for the implementation of the 2030 Agenda in the region, considering social, economic and environmental aspects. The resources would also support the operational costs and technical cooperation activities of the Asian and Pacific Training Centre for Information and Communication Technology for Development and the Asian and Pacific Centre for the Development of Disaster Information Management. The estimated decrease of \$640,900 is attributable mainly to the completion of technical cooperation projects in 2022.

**Subprogramme 6
Social development**

19.238 The proposed regular budget resources for 2023 amount to \$3,962,900 and reflect a decrease of \$42,200 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 19.213 (g). Additional details on the distribution of the proposed resources for 2023 are reflected in table 19.70 and figure 19.XXI.

Subprogramme 6: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

19.239 Extrabudgetary resources for the subprogramme are estimated at \$1,418,100 and would provide for three posts (2 P-4 and 1 P-3), as well as non-post resources. The resources would support technical cooperation projects on achieving Goals 1, 3–5, 8, 10 and 17 and would support member States in addressing the needs of those left furthest behind; enhancing social protection, the promotion of the rights and inclusion of persons with disabilities, older persons and migrants; and promoting gender equality and the economic empowerment of women. The estimated decrease of \$333,000 compared with the appropriation for 2022 reflects the completion of technical cooperation projects in 2022.

Subprogramme 7 Statistics

19.240 The proposed regular budget resources for 2023 amount to \$3,089,300 and reflect an increase of \$33,300 compared with the appropriation for 2022. The proposed increase is explained in paragraph 19.213 (h). Additional details on the distribution of the proposed resources for 2023 are reflected in table 19.71 and figure 19.XXII.

Extrabudgetary resources

19.241 Extrabudgetary resources for the subprogramme are estimated at \$3,078,200 and would provide for 13 posts (1 D-1, 1 P-5, 1 P-4, 4 P-3, 1 P-2/1 and 5 Local level), as well as non-post resources. The resources would support statistical capacity-building activities to enhance data and statistics for the

2030 Agenda and would improve national monitoring systems by strengthening policy-data links. The resources would also support operational costs and technical cooperation activities of the Statistical Institute for Asia and the Pacific. The estimated decrease of \$926,300 is attributable mainly to the completion of technical cooperation projects in 2022.

Subprogramme 8 Subregional activities for development

19.242 The proposed regular budget resources for 2023 amount to \$4,405,100 and reflect an increase of \$7,200 compared with the appropriation for 2022. The proposed regular budget resources for 2023 of the various components of the subprogramme are presented below.

Component 1 Subregional activities for development in the Pacific

19.243 The proposed regular budget resources for 2023 amount to \$1,430,200 and reflect an increase of \$7,900 compared with the appropriation for 2022. The proposed increase is explained in paragraph 19.213 (i). Additional details on the distribution of the proposed resources for 2023 are reflected in table 19.72 and figure 19.XXIII.

Extrabudgetary resources

19.244 Extrabudgetary resources for the component are estimated at \$256,700 and would provide for non-post resources. The resources would support technical cooperation projects on the promotion of regional cooperation and networking for sustainable development. The estimated decrease of \$54,700 compared with the appropriation for 2022 reflects the completion of technical cooperation projects in 2022.

**Component 2
 Subregional activities for development in East and North-East Asia**

19.245 The proposed regular budget resources for 2023 amount to \$927,700 and reflect a decrease of \$2,000 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 19.213 (j). Additional details on the distribution of the proposed resources for 2023 are reflected in table 19.73 and figure 19.XXIV.

Subprogramme 8, component 2: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

19.246 Extrabudgetary resources for the component are estimated at \$1,886,800 and would provide for 12 posts (1 P-4, 2 P-3, 1 P-2/1 and 8 Local level), as well as non-post resources. The resources would support technical cooperation projects on promoting and strengthening policy coordination relating to sustainable connectivity, environmental sustainability and innovation for inclusive and resilient societies in East and North-East Asia, contributing mainly to the achievement of Goals 3, 5, 7, 9-11, 13-15 and 17. The estimated increase of \$94,900 compared with the appropriation for 2022 reflects the anticipated recovery from COVID-19 pandemic disruptions, which would allow for in-person meetings, as well as travel.

Component 3
Subregional activities for development in North and Central Asia

19.247 The proposed regular budget resources for 2023 amount to \$712,400 and reflect a decrease of \$6,700 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 19.213 (k). Additional details on the distribution of the proposed resources for 2023 are reflected in table 19.74 and figure 19.XXV.

Subprogramme 8, component 3: distribution of proposed resources for 2023 (before recosting)
 (Number of posts/thousands of United States dollars)

Extrabudgetary resources

19.248 Extrabudgetary resources for the component are estimated at \$319,800 and would provide for four Local level posts, as well as non-post resources. The resources would contribute to the achievement of Goal 17 by supporting technical cooperation projects for capacity-building and for research and analysis to support implementation of the United Nations Special Programme for the Economies of Central Asia, which facilitates economic cooperation and the integration of participating countries into the world economy and provides a platform for cross-border cooperation for the achievement of the Goals. The estimated increase of \$127,000 reflects projected contributions to capacity-building activities relating to digital transformation and the use of new technologies to enhance the resilience of rail and intermodal transport in North and Central Asia.

**Component 4
 Subregional activities for development in South and South-West Asia**

19.249 The proposed regular budget resources for 2023 amount to \$1,098,000 and reflect a decrease of \$3,900 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 19.213 (I). Additional details on the distribution of the proposed resources for 2023 are reflected in table 19.75 and figure 19.XXVI.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

19.250 Extrabudgetary resources for the component are estimated at \$113,400 and would provide for six posts (1 National Professional Officer and 5 Local level), as well as non-post resources. The resources would contribute to supporting the implementation of the 2030 Agenda in the subregion, as well as the operational costs of the Subregional Office for South and South-West Asia. The estimated decrease of \$301,200 is attributable mainly to the completion of technical cooperation projects in 2022.

Component 5 Subregional activities for development in South-East Asia

19.251 The proposed regular budget resources for 2023 amount to \$236,800 and reflect an increase of \$11,900 compared with the appropriation for 2022. The proposed increase is explained in paragraph 19.213 (m). Additional details on the distribution of the proposed resources for 2023 are reflected in table 19.76 and figure 19.XXVII.

Figure 19.XXVIII

Subprogramme 9: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

- 19.253 Extrabudgetary resources for the subprogramme are estimated at \$577,700 and would provide for non-post resources. The resources would support technical cooperation projects on the achievement of Goal 7 in the region by enhancing the capacity of member States for cleaner energy, as well as energy efficiency, energy access and energy connectivity. The estimated decrease of \$495,100 is attributable mainly to the completion of technical cooperation projects in 2022.

Programme support

- 19.254 Programme support comprises: (a) the Strategy and Programme Management Division, with functions related to strategic programme planning, management and budgeting, technical cooperation and resource mobilization, evaluation and partnerships; (b) the Division of Administration, with functions related to financial resources management, human resources management, information and communications technology management and commercial and general services; (c) the Communications and Knowledge Management Section, with functions related to providing communication, knowledge management and information services; and (d) the Conference and Documentation Services Section, with functions related to interpretation, translation and editorial services and document reproduction and printing.
- 19.255 The Strategy and Programme Management Division accords priority to improving the relevance and impact of the work of ESCAP through more strategic, results-based programme management; enhanced oversight, monitoring and evaluation of programme and project results; support for enhanced technical cooperation and capacity development; and strengthened resource mobilization and collaboration with development partners.
- 19.256 The Division of Administration will continue to focus on improving support for the work of the Commission in implementing its programmes through its operational arms. Since the beginning of the pandemic, in 2020, and continuing through 2022, the Division has swiftly adjusted and/or upgraded its support operations, notably in the areas of information technology and conference support, allowing staff to switch seamlessly from an in-person working modality to a virtual one, enabling virtual or hybrid meetings to be held with stakeholders, and has partnered with the World Health Organization in systematically and methodologically responding to COVID-19 risks in order to ensure the health and safety of all personnel based in the shared Bangkok premises. Many of the initiatives and measures will continue to be mainstreamed into the Division's operational support in 2023.
- 19.257 The Office of the Chief is responsible for: (a) spearheading the directives of the Secretary-General on data innovation and analytics through the broad implementation of business intelligence tools and dashboards; partnerships by leading the environmental management system, in partnership with UNEP, to implement efforts to reduce the carbon footprint of ESCAP, improve energy efficiency, reduce waste and change mindsets; actively championing, together with the resident coordinator offices in the region, the implementation of the business operations strategy in locations where ESCAP has a presence; bringing about continuous improvement through management reform and business operations reform under the United Nations development system; a bilateral agreement with ILO on improving occupational safety and health standards for the Bangkok shared premises; and working side by side with the World Health Organization on COVID-19 response and mitigation measures for Bangkok-based entities; (b) business transformation and accountability, including oversight and monitoring; (c) cost-effective and sustainable management and maintenance of all building facilities, with a focus on disability inclusion through the application of universal design principles, which are focused on reducing all obstacles for all people through accessibility measures; (d) procurement and supply chain services; and (e) ongoing management and execution of the seismic mitigation retrofit and life-cycle replacements project.
- 19.258 The Human Resources Management Section is responsible for: (a) providing support for the achievement of human resources indicators; (b) implementing the human resources management reform initiatives of the Secretary-General to create a more mobile, versatile, gender-balanced and

multi-skilled workforce through effective workforce planning, the skilful management of staff development resources and the efficient and streamlined administration of human capital; and (c) providing occupational health services, including leadership in promoting and maintaining organizational responses to potential pandemics.

- 19.259 The Financial Resources Management Section is responsible for: (a) providing strategic advice on the effective utilization of resources in accordance with financial rules and regulations; (b) the management of financial risk and organizational resilience; (c) strengthening the management of post and non-post resources by conducting thorough approval processes for all accounts and ensuring the accuracy of payments, payroll and financial reporting; (d) the management and monitoring of cost-recovery and programme support resources for administrative support services to clients; and (e) collaborating on the formulation and implementation of internal control frameworks and any other financial initiatives.
- 19.260 The Information Management, Communications and Technology Section is responsible for: (a) strengthening efficiency in the management of ICT resources and further upgrading technological tools and applications to support development and management reform initiatives; and (b) upgrading information technology infrastructure to support and facilitate the new working modalities adopted owing to COVID-19.
- 19.261 The Commercial and General Services Section is responsible for: (a) providing and coordinating integrated events management services, including the operation and management of the United Nations Conference Centre in Bangkok for meetings and events, whether in person, hybrid or virtual, under the ESCAP programme of work; and (b) integrated travel and transportation services, host country relation services and other general support services.
- 19.262 The Communications and Knowledge Management Section is responsible for providing communications, knowledge management and information/library services. This includes managing media relations, developing traditional and social media content, managing the ESCAP web presence, providing design and multimedia support, developing and managing ESCAP branding, organizing special advocacy events, exhibitions and group briefings, and developing promotional material to be disseminated across the region. In response to the ESCAP programme of work and in alignment with the 2030 Agenda, the Section will manage the publications programme and provide library and knowledge management services, including the purchase and management of subscriptions to electronic resources, databases and online publications. To preserve institutional memory and knowledge products, the Section maintains a digitization programme and is developing tools to make the official documents, publications and records of ESCAP more accessible and visible. These activities will promote the analytical, normative and capacity-building work of ESCAP and the visibility of the Commission as the most comprehensive platform for inclusive, equitable and sustainable development in the region.
- 19.263 The Conference and Documentation Services Section is responsible for providing editorial, interpretation, translation and text-processing services in the four working languages of ESCAP, including the processing of documentation, reproduction services and the leveraging of language-related information technology and computer-assisted translation tools, such as eLUNa, while ensuring multilingual communication in support of the delivery of the ESCAP mandate to promote and facilitate the achievement of the Goals in Asia and the Pacific.
- 19.264 The proposed regular budget resources for 2023 amount to \$21,258,300 and reflect a decrease of \$940,900 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 19.212. Additional details on the distribution of the proposed resources for 2023 are reflected in table 19.78 and figure 19.XXIX.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

19.265 Extrabudgetary resources for programme support are estimated at \$4,253,900 and would provide for 32 posts (4 P-4, 6 P-3, 2 National Professional Officer and 20 Local level), as well as non-post resources. The resources would support central administration and programme services provided to projects funded through voluntary contributions and cost recovery for administrative support services provided to non-ESCAP clients, such as conference hosting services, travel processing, payments processing and human resources administration for clients such as the United Nations Assistance to the Khmer Rouge Trials, the United Nations Office on Drugs and Crime, the Office of the United Nations High Commissioner for Refugees, the Office for the Coordination of Humanitarian Affairs, the Development Coordination Office and ILO. The expected decrease of \$17,600 compared with the appropriation for 2022 is attributable mainly to the expected completion of activities relating to a project to enhance the ESCAP publications repository in 2022.

Annex I

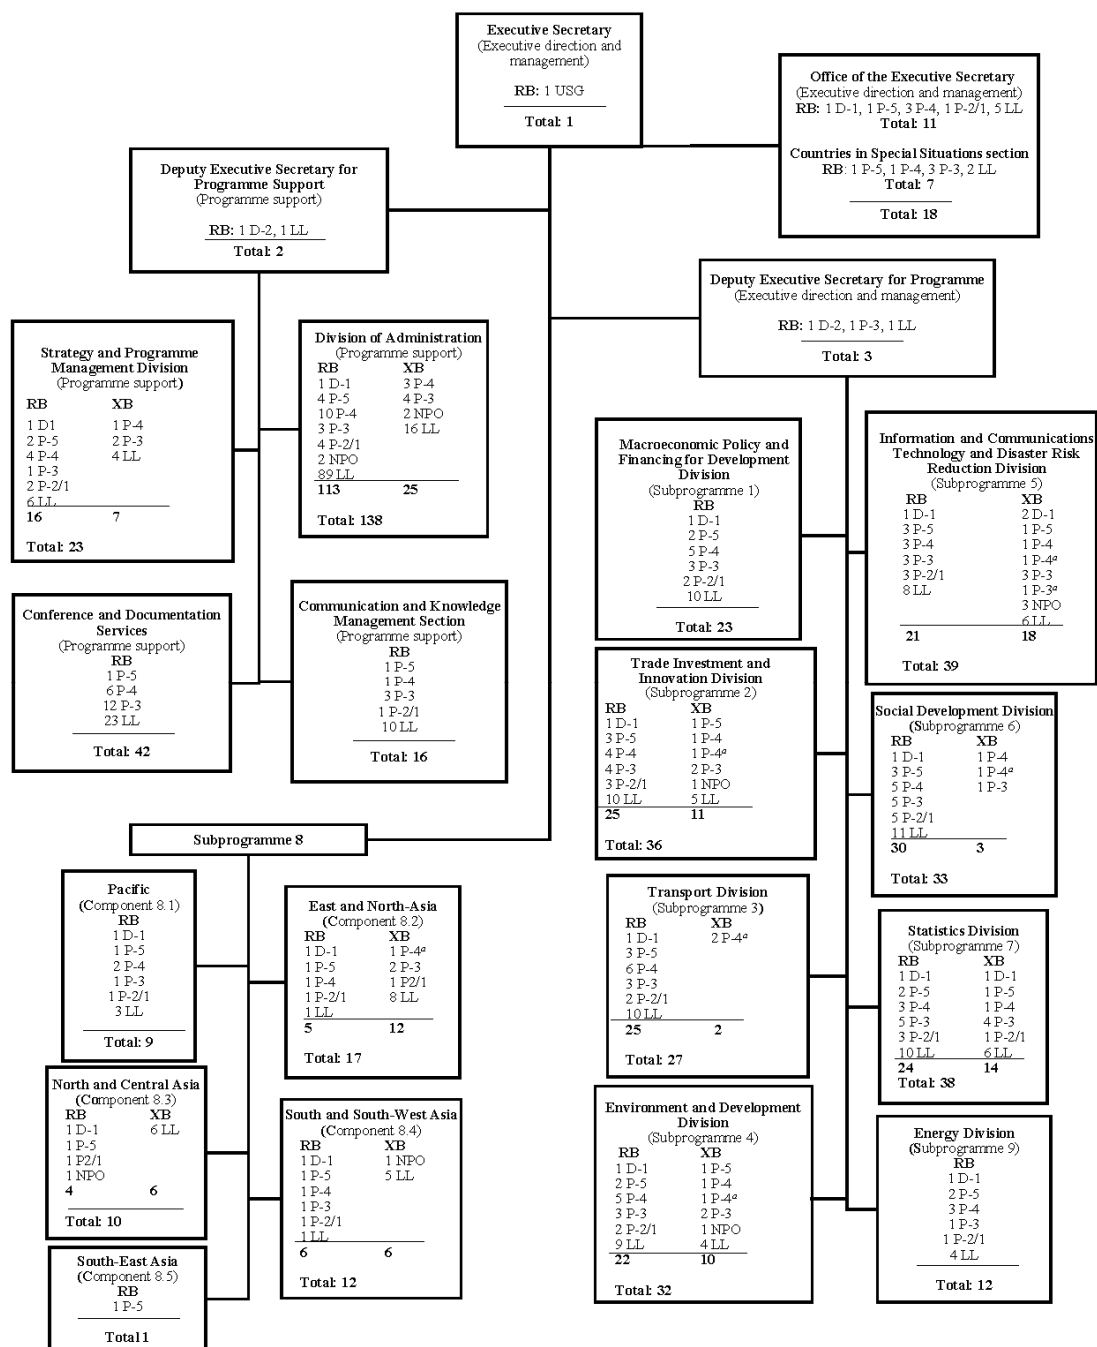

Organizational structure and post distribution for 2023

Two charts showing the organizational structure of the Economic and Social Commission for Asia and the Pacific (ESCAP) are presented below. Chart A reproduces the approved organizational structure for 2022, with updated estimates for extrabudgetary posts, as contained in document [A/76/6 \(Sect. 19\)](#). Chart B presents the proposed organizational structure for 2023.

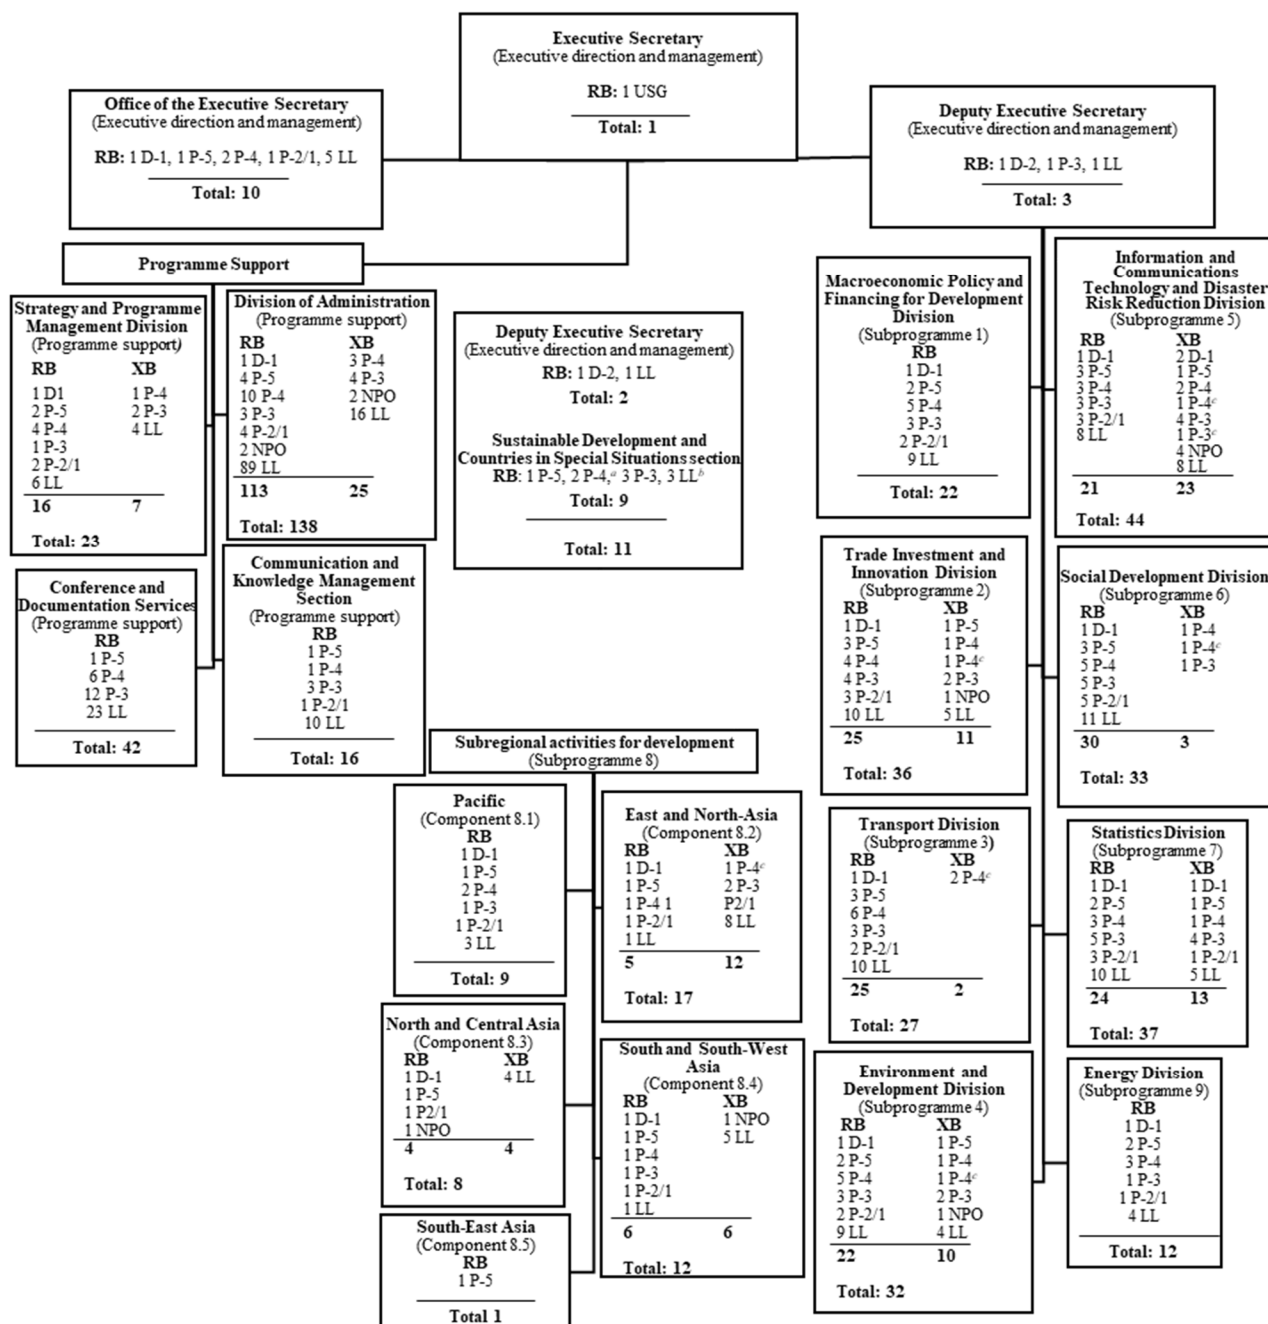

Justification for the proposed changes

The structure of ESCAP has been realigned to strengthen support to member States in achieving the 2030 Agenda for Sustainable Development through more effective implementation of the reform of the United Nations development system, which requires enhanced coordination within the United Nations system at the country, regional and global levels. Beginning in 2023, the Deputy Executive Secretary will oversee subregional activities for development (subprogramme 8) and the Sustainable Development and Countries in Special Situations section, which were previously under the Office of the Executive Secretary. The Office of the Deputy Executive Secretary will provide guidance and coordinate support to United Nations resident coordinators/United Nations country teams at the country level and to the United Nations regional collaborative platform at the regional level and will assist the Executive Secretary in her engagements with principals of the United Nations Sustainable Development Group at the global level. It will coordinate ESCAP engagement with subregional intergovernmental organizations in Asia and the Pacific. In addition, it will supervise ESCAP work regarding follow-up and review of the 2030 Agenda, including assisting member States in preparing their voluntary national reviews, organizing the Asia-Pacific Forum on Sustainable Development and participating in ESCAP engagement with the high-level political forum on sustainable development. The programme support areas will report directly to the Executive Secretary in supporting executive direction and management and the programme of work.

^a One P-4 redeployed from the Office of the Executive Secretary to the Sustainable Development and Countries in Special Situations section within executive direction and management.

^b One Local level redeployed from subprogramme 1 to the Sustainable Development and Countries in Special Situations section.

^c Non-reimbursable loan.

Annex II

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/76/7](#) and [A/76/7/Corr.1](#)

The Advisory Committee trusts that the Secretary-General will provide consolidated information on the status of upgrading of obsolete information and communications technology equipment in the context of the next proposed programme budget (para. V.33).

ESCAP has continued efforts to upgrade obsolete information and communications technology equipment. In 2021, ESCAP replaced all obsolete computers and distributed digital toolkits to staff, which facilitated remote working conditions; information and communications technology infrastructure was upgraded, and obsolete technology was replaced. In 2022 and 2023, ESCAP will continue to replace the laptops and distribute the digital toolkits to personnel and replace the remaining obsolete technology, such as firewalls and servers.

Annex III

Summary of proposed changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Executive direction and management	1	P-4	Redeployment of 1 Sustainable Development Officer from the Office of the Executive Secretary to the Sustainable Development and Countries in Special Situations section within executive direction and management	To prepare and coordinate studies on specific economic, environmental and social issues to be considered at the annual Asia-Pacific Forum on Sustainable Development following the outcomes of the subregional preparatory meetings, and to institutionalize the subregional preparatory meetings and Forum
Executive direction and management	1	LL	Redeployment of 1 Staff Assistant from subprogramme 1	To provide required administrative support in organizing the Asia-Pacific Forum on Sustainable Development, as well as to assist in organization-wide coordination of cross-cutting support from the Sustainable Development and Countries in Special Situations section
Subprogramme 1	(1)	LL	Redeployment of 1 Staff Assistant to executive direction and management	See reason for change given under executive direction and management

Foreword

The Economic Commission for Europe (ECE) serves as a regional intergovernmental platform promoting economic cooperation and integration among its member States and supporting their efforts to achieve sustainable development.

In 2023, ECE will continue making a meaningful impact on the lives of people in our region and beyond by supporting member States' work to implement the 2030 Agenda for Sustainable Development and relevant decisions of major United Nations conferences. The Commission will build on its integrated approach to sustainable development and actively contribute to accelerating progress towards the Sustainable Development Goals during the decade of action in the ECE region. Our work will be focused on areas of concern for member States at the country and regional levels, such as improving environmental governance, advancing sustainable transport and smart connectivity, strengthening capacity for measuring sustainable development, fostering innovation and accelerating trade, improving access to clean energy, facilitating the sustainable management of natural resources, supporting urban sustainability and advancing evidence-based population policies. An inseparable part of our work will be fostering circular approaches and policies in the ECE region, supporting our member States' longer-term recovery efforts and scaling up actions to improve road safety, and facilitating digital and green transformations for sustainable development in the ECE region, which member States have planned as the high-level cross-cutting theme of the seventieth session of the Commission, to be held in April 2023.

I am convinced that there is no alternative to international and regional cooperation and collective action if we wish to accelerate the achievement of the Sustainable Development Goals. The repositioned regional United Nations development system provides an enhanced framework for such action in 2023. Strengthened coordination with the United Nations system through the regional collaborative platform will facilitate the leveraging of available expertise and resources in support of member States' sustainable recovery and development efforts. ECE will continue working with and co-leading various issue-based coalitions in the region to better align with country needs and provide system-wide and high-quality policy advice and support in addressing regional and transboundary challenges. ECE will continue to increase its collaboration with resident coordinators and United Nations country teams in the region to ensure tailored responses to specific country contexts and challenges in the areas of policy analysis and technical cooperation. United Nations Sustainable Development Cooperation Frameworks will serve as the main vehicle for our engagement in the 17 programme countries. This work will benefit from the Commission's continued close and inclusive cooperation with international and regional organizations, as well as partnerships with the private sector and civil society organizations engaged in the work of the Commission.

The proposed programme budget for ECE for 2023 reflects its best assessment of resources needed to implement the programme of work. I am committed to ensuring that ECE will continue serving its member States by facilitating economic cooperation and sustainable development in the region and supporting progress towards the achievement of internationally agreed development goals.

(Signed) **Olga Algayerova**
Executive Secretary, Economic Commission for Europe

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 20.1 The Economic Commission for Europe (ECE) is responsible for facilitating economic integration and cooperation among its member States and promoting sustainable development and economic prosperity in the ECE region. The mandate derives from the priorities established in relevant Economic and Social Council resolutions, including on the workplan on reform of ECE and the outcome of the review of the 2005 reform of ECE (resolutions 2006/38 and 2013/1, respectively), and Council resolution 36 (IV). The ECE region continues to face economic and environmental challenges in addressing the complexity of achieving the Sustainable Development Goals, which remain a source of primary concern to member States. The Commission provides a regional intergovernmental platform from which to address these challenges, such as promoting sustained economic growth and the sustainable use of natural resources in the region, protecting the environment, advancing sustainable transport and mobility, strengthening the capacity for measuring sustainable development, fostering innovation and competitiveness and accelerating trade and economic integration, improving access to affordable and clean energy, building urban sustainability and addressing the implications of demographic trends. The work of the Commission is grounded in many of its conventions, norms and best practices that provide sustainable solutions to problems in areas critical to sustainable development, including those spanning national borders. Apart from serving as a platform for Governments and other stakeholders to collaborate in developing legal instruments and formulating policies for sustainable development, ECE provides specialized and demand-driven technical assistance to build the capacity of countries to implement these instruments, policies and best practices, and facilitates their uptake. ECE support aimed at developing the capacity of Governments to formulate and implement policies for sustainable development is also provided through the implementation of capacity-building activities and projects under the regular programme of technical cooperation and the United Nations Development Account.

Strategy and external factors for 2023

- 20.2 ECE works to promote regional cooperation and integration as a means of achieving sustainable development in the ECE region. Its intergovernmental bodies, which comprise the Commission and its sectoral committees, provide the foundation for ECE support for national Governments and other stakeholders in advancing the achievement of the Sustainable Development Goals. By convening the annual Regional Forum on Sustainable Development, ECE also provides a region-wide multi-stakeholder platform for the follow-up and review of the Goals, focusing on peer learning and the exchange of practical solutions for achieving sustainable development. The work of ECE is aligned with the Addis Ababa Action Agenda of the Third International Conference on Financing for Development, the Vienna Declaration and the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024 and the New Urban Agenda.
- 20.3 The strategy of the programme is based on the implementation of core interlinked functions that are consistent with the legislative mandates of ECE, namely, policy dialogue, normative work and technical cooperation. In line with the principles of the reform of the United Nations development system at the regional level, in implementing its strategy in 2023, ECE will provide a neutral platform for policy dialogue to address multi-country, transboundary and regional economic and environmental issues among its 56 member States. The normative work of the programme will focus on the development and implementation of international legal instruments, norms and standards in areas critical to sustainable development, and on the identification and dissemination of best practices within and outside the region. Through technical cooperation in its areas of expertise, the programme will provide integrated policy advice, normative support and capacity-building aimed at expanding the use

of its normative outputs, facilitating the achievement of the internationally agreed development goals at the country level and achieving multiplier effects by targeting cross-border issues.

- 20.4 The strategy of the programme is achieved through an integrated approach to sustainable development, which builds on synergies and the results-oriented work of its eight subprogrammes: environment; transport; statistics; economic cooperation and integration; sustainable energy; trade; forests and the forest industry; and housing, land management and population.
- 20.5 The work of the ECE subprogrammes is aligned with specific Sustainable Development Goals. Identifying and exploiting cross-sectoral synergies of the 2030 Agenda for Sustainable Development and engaging multiple actors for joint action has been critical to accelerating progress in achieving the Goals and will remain a key strategic focus in the future work of ECE. To that end, the Commission will continue to leverage its integrated approach by providing multisectoral policy advice and capacity-building through cross-sectoral collaboration among its eight subprogrammes in areas at which multiple Goals converge, namely:
- (a) Digital and green transformations for sustainable development in the ECE region (agreed by the 119th meeting of the ECE Executive Committee as a cross-cutting theme of the seventieth session of ECE in 2023);
 - (b) Circular economy and the sustainable use of natural resources (see decision B (69) in the biennial report of the Commission ([E/2021/37-E/ECE/1494](#)));
 - (c) Sustainable and smart cities for all ages;
 - (d) Sustainable mobility and smart connectivity;
 - (e) Measuring and monitoring progress towards achieving the Goals.
- 20.6 In 2023, the programme will continue to provide support to its member States in addressing the economic and environmental challenges of achieving the Sustainable Development Goals. Specific attention will be placed on promoting solutions that help to address environmental pressures while ensuring economic prosperity – an ongoing challenge for the ECE region that is central to advancing sustainable development. The Commission will actively contribute to the decade of action for the Goals in the ECE region by engaging its convening power, normative production and technical cooperation, by leveraging its partnerships and best expertise from its networks of experts and by serving as a knowledge hub to promote integrated and cross-sectoral solutions for achieving the Goals. Taking into account the significant environmental footprint of the economies in the ECE region, the Commission will also focus on facilitating progress towards a circular economy and the sustainable use of natural resources, as mandated by the sixty-ninth session of ECE in April 2021.
- 20.7 For 2023, the ECE planned deliverables and activities complement those of member States in their ongoing management of and recovery from the coronavirus disease (COVID-19) pandemic. Such planned deliverables and activities across all subprogrammes include: (a) broadening and adapting the ECE legally binding instruments, standards and sustainable resource management frameworks to the post-COVID-19 realities and needs of member States; (b) assessing lessons learned, implementing capacity-building activities and promoting exchanges of experiences and good practices, including by refocusing and/or adapting existing activities, to support member States in their efforts to build a more resilient, sustainable and productive economy; and (c) developing studies and publications and organizing webinars on ways different sectors of the economy can contribute to the sustainable recovery of economies and more resilient cities and communities.
- 20.8 Reflecting the importance of continuous improvement and responding to the needs and requests of member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme as a result of the COVID-19 pandemic. Examples of lessons learned and best practices include an increased emphasis across all subprogrammes on the customization of policy dialogues and the adaptation of legal instruments, standards and resource management frameworks to post-COVID needs; supporting the member States in the assessment of impacts of the pandemic; the development of policy packages and recommendations

on sustainable recovery and rebuilding issues; the expansion of capacity-building activities and exchanges of best practices in response to evolving needs of member States related to COVID-19 recovery; and the use of hybrid modalities for meetings as a business continuity measure, subject to available resources, including for the implementation of mandates that were put in place in response to the changed operational conditions associated with the COVID-19 pandemic. ECE has also expanded the use of information and communication technologies (ICT) in delivering intergovernmental meetings and capacity-building workshops. At the same time, it is assumed that those operational conditions have improved and will allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.

- 20.9 With regard to cooperation with other entities at the global, regional, national and local levels, ECE will build on its close cooperation with international and regional organizations and other regional actors, such as the Organisation for Economic Co-operation and Development (OECD), the Organization for Security and Cooperation in Europe, the European Union and the Eurasian Economic Union. ECE will also strengthen its partnerships with the private sector and civil society organizations, think tanks and the academic sector in order to facilitate the Commission's policy dialogue and normative work and to engage them in the implementation by member States of the 2030 Agenda.
- 20.10 With regard to inter-agency coordination and liaison, ECE will continue to play a key role in coordinating regional United Nations system entities. ECE will continue to co-lead the Regional Collaborative Platform for Europe and Central Asia and work as part of the secretariat servicing the platform, working to promote joint action and closer cooperation among United Nations regional entities and their partners in addressing regional, cross-cutting policy issues, offering integrated policy advice and providing regional perspectives at the global level. This work will benefit from continued strategic partnerships and joint initiatives, programmes and projects established by ECE with other United Nations entities and international financial institutions, for example, the Food and Agriculture Organization of the United Nations (FAO), the United Nations Conference on Trade and Development, the United Nations Environment Programme, the United Nations Development Programme, the International Trade Centre (ITC), the World Trade Organization and the World Bank. ECE will actively engage in issue-based coalitions aimed at facilitating concerted action between various United Nations entities and partners at the operational level. Cooperation with other regional commissions will be pursued through joint initiatives, programmes and projects so as to use institutional coordination and knowledge management for better results. The United Nations Special Programme for the Economies of Central Asia, implemented jointly by ECE and the Economic and Social Commission for Asia and the Pacific, will serve as the major framework for cooperation with other relevant stakeholders in Central Asia. At the country level, ECE will work closely with the resident coordinators and United Nations country teams in 17 United Nations programme countries in the ECE region to seek opportunities for joint programmes and projects in response to country demands, including on recovery from COVID-19, through social and economic response plans prepared by United Nations country teams. ECE will also continue its active engagement as part of the 17 United Nations country teams in the region through the United Nations Sustainable Development Cooperation Frameworks by contributing to their planning, monitoring and implementation through common country analyses and participation in joint workplans and results groups. The programme will also promote interregional, including South-South, and triangular cooperation.
- 20.11 With regard to the external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) Member States continue to guide ECE intergovernmental processes, support the work of ECE and give high priority to regional and subregional cooperation and integration, with a view to achieving sustainable development;
 - (b) All relevant stakeholders at the national level have the political will to cooperate in implementing ECE legal instruments, norms and standards;
 - (c) Voluntary resources continue to be available.

- 20.12 ECE supports member States in the achievement of Sustainable Development Goal 5 and the targets related to gender equality and women’s empowerment of other Goals. Guided by its policy on gender equality and the empowerment of women, all ECE subprogrammes will commit to concrete actions with measurable outputs in the 2023 ECE action plan on gender, mainstreaming a gender perspective into their normative work and further promoting the participation of women in all meetings and workshops. All ECE technical cooperation projects will be assessed against their impact on gender and the Commission will continue its work on gender perspectives and the economy, including capacity-building activities for women entrepreneurs from Central Asia.
- 20.13 With regard to disability inclusion, in line with the United Nations Disability Inclusion Strategy and General Assembly resolution 74/144, ECE integrates disability inclusion into its operational activities, deliverables and results, as appropriate. Through the work of its subprogrammes, ECE will continue to mainstream relevant inclusiveness aspects into its programmes and projects and will consider disability-related perspectives in the development of norms and standards.

Programme performance in 2021

Impact of the pandemic

- 20.14 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular the Commission’s convening capacity and the norm-setting work of all subprogrammes. The impact included a reduced number of ECE intergovernmental meetings with interpretation as a result of mitigating measures related to the COVID-19 pandemic and the reduced availability of conference servicing capacity at the United Nations Office at Geneva. The COVID-19 crisis also brought changes in working methods to cope with the force majeure circumstances. To ensure business continuity, physical meetings and workshops were replaced by hybrid and online meetings and were adapted to the new formats with regard to their content, preparation and duration, including through the adoption of special procedures during the COVID-19 period and the use of new technology to provide hybrid meetings with interpretation. The Commission’s action framework for responses to the COVID-19 pandemic guided the overall response to the crisis. The focus was on supporting member States’ efforts to advance sustainable mobility and smart connectivity in the region; addressing transboundary and other risks through the use of ECE multilateral agreements, standards and statistical frameworks; and supporting a sustainable recovery by promoting the circular economy and the sustainable use of natural resources, tackling multiple dimensions of inequality and facilitating collective actions with other United Nations entities and partners at the global, regional and national levels. Specific examples of support to member States on issues related to COVID-19 are provided under subprogrammes 1 to 4 and 6 to 8, within the overall scope of the objectives. The change in approach to and the postponement and cancellation of some planned deliverables and activities also had an impact on the expected results for 2021, as described in the programme performance under subprogrammes 1, 2, 5 and 7.

Legislative mandates

- 20.15 The list below provides all mandates entrusted to the programme

General Assembly resolutions

66/288	The future we want	69/283	Sendai Framework for Disaster Risk Reduction 2015–2030
67/10	Cooperation between the United Nations and the Eurasian Economic Community	69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)
67/290	Format and organizational aspects of the high-level political forum on sustainable development	70/1	Transforming our world: the 2030 Agenda for Sustainable Development
69/277	Political declaration on strengthening cooperation between the United Nations and regional and subregional organizations	71/16	Cooperation between the United Nations and the Economic Cooperation Organization

Part V Regional cooperation for development

71/256	New Urban Agenda		quadrennial comprehensive policy review of operational activities for development of the United Nations system
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system	74/306	Comprehensive and coordinated response to the coronavirus disease (COVID-19) pandemic
73/10	Cooperation between the United Nations and the Central European Initiative	75/8	Cooperation between the United Nations and the Organization for Democracy and Economic Development – GUAM
73/195	Global Compact for Safe, Orderly and Regular Migration	75/9	Cooperation between the United Nations and the Commonwealth of Independent States
74/122	Implementation of the outcome of the World Summit for Social Development and of the twenty-fourth special session of the General Assembly	75/12	Cooperation between the United Nations and the Black Sea Economic Cooperation Organization
74/128	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly	75/216; 76/204	Disaster risk reduction
74/144	Implementation of the Convention on the Rights of Persons with Disabilities and the Optional Protocol thereto: accessibility	75/221	Ensuring access to affordable, reliable, sustainable and modern energy for all
74/216	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development	75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
74/231, 76/215	Development cooperation with middle-income countries	75/290 B	Review of the implementation of General Assembly resolution 72/305 on the strengthening of the Economic and Social Council
74/235	Women in development		Review of the implementation of General Assembly resolutions 67/290 on the format and organizational aspects of the high-level political forum on sustainable development and 70/299 on the follow-up and review of the 2030 Agenda for Sustainable Development at the global level
74/271	Progress towards an accountability system in the United Nations Secretariat		High-level political forum on sustainable development
74/297	Progress in the implementation of General Assembly resolution 71/243 on the	75/324	Cooperation between the United Nations and the Economic Cooperation Organization
		76/221	South-South cooperation

Economic and Social Council resolutions

1998/46	Further measures for the restructuring and revitalization of the United Nations in the economic, social and related fields	2013/1	Outcome of the review of the 2005 reform of the Economic Commission for Europe
2006/38	Workplan on reform of the Economic Commission for Europe and revised terms of reference of the Commission		

Economic Commission for Europe decisions

A (64)	The work of the Economic Commission for Europe	A (69)	High-level statement
A (65)	Outcome of the review of the 2005 reform of ECE	B (69)	Circular economy and the sustainable use of natural resources
A (66)	Endorsement of the High-level statement on the post-2015 development agenda and expected sustainable development goals in the ECE region	C (69)	Extension of the mandate of the Regional Forum on Sustainable Development

**Subprogramme 1
Environment**

General Assembly resolutions

2994 (XXVII)	United Nations Conference on the Human Environment	71/222	International Decade for Action, “Water for Sustainable Development”, 2018–2028
47/193	Observance of World Day for Water	71/313	Work of the Statistical Commission pertaining to the 2030 Agenda for Sustainable Development
62/68	Consideration of prevention of transboundary harm from hazardous activities and allocation of loss in the case of such harm	72/222	Education for sustainable development in the framework of the 2030 Agenda for Sustainable Development
64/200	International Strategy for Disaster Reduction		
67/291	Sanitation for All	73/226	Midterm comprehensive review of the implementation of the International Decade for Action, “Water for Sustainable Development”, 2018–2028
69/172	Human rights in the administration of justice		
69/215	International Decade for Action, “Water for Life”, 2005–2015, and further efforts to achieve the sustainable development of water resources	73/238	The role of the international community in the prevention of the radiation threat in Central Asia
69/235	Industrial development cooperation		
70/169	The human right to safe drinking water and sanitation	75/212	United Nations Conference on the Midterm Comprehensive Review of the Implementation of the Objectives of the International Decade for Action, “Water for Sustainable Development”, 2018–2028
70/209	United Nations Decade of Education for Sustainable Development (2005–2014)		

Economic Commission for Europe decisions

CEP/AC.13/2005/2	Report of the high-level meeting of environment and education ministries (2005) adopting the ECE strategy for education for sustainable development	ECE/ASTANA. CONF/2011/2/ Add.1	Declaration: “Save water, grow green!” by ministers of the region of ECE, report of the seventh Ministerial Conference, entitled “Environment for Europe”, 2011
ECE/BELGRADE. CONF/2007/4/ Add.1	Statement on education for sustainable development by the ministers of education and of the environment of the ECE region adopted at the joint session on education for development of the sixth Ministerial Conference, entitled “Environment for Europe”, 2007	ECE/BATUMI. CONF/2016/2/ Add.1	Declaration: “Greener, cleaner, smarter!” by ministers of the region of ECE, report of the eighth Environment for Europe Ministerial Conference, 2016
ECE/AC.21/2021/2- EUCHP2018924/4. 3.2	Report of the High-level Meeting on Transport, Health and Environment and of the special session of the Steering Committee of the Transport, Health and Environment Pan-European Programme	ECE/BATUMI. CONF/2016/2/ Add.2	Batumi ministerial statement on education for sustainable development adopted by the high-level meeting of education and environment ministries of the region of ECE, report of the eighth Environment for Europe Ministerial Conference, 2016

Relevant decisions of the governing bodies of the multilateral environmental agreements of the Economic Commission for Europe

ECE/EB.AIR/148 and Add.1	Report of the Executive Body for the Convention on Long-range Transboundary Air Pollution on its forty-first session	ECE/MP.PP/ 2021/16-ECE/ MP.PRTR/2021/2 and Add.1	Report of the Joint High-level Segment of the seventh session of the Meeting of the Parties to the Convention on Access to Information, Public Participation in Decision-making and Access to Justice in Environmental Matters and of the fourth session of the Meeting of the Parties to the Protocol on Pollutant Release and Transfer Registers, and the Geneva Declaration on Environmental Democracy for Sustainable, Inclusive and Resilient Development, adopted by the two Meetings of the Parties
ECE/MP.PRTR/ 2021/6 and Add.1	Report of the Meeting of the Parties to the Protocol on Pollutant Release and Transfer Registers to the Convention on Access to Information, Public Participation in Decision-making and Access to Justice in Environmental Matters on its fourth session		
ECE/MP.PP/2021/2 and Add.1	Report of the Meeting of the Parties to the Convention on Access to Information, Public Participation in Decision-making and Access to Justice in Environmental Matters on its seventh session		

Part V Regional cooperation for development

ECE/MP.EIA/23- ECE/MP.EIA/ SEA/7 and Add.1, Add.2 and Add.3	Report of the Meeting of the Parties to the Convention on Environmental Impact Assessment in a Transboundary Context on its seventh session, and the Meeting of the Parties to the Convention on Environmental Impact Assessment in a Transboundary Context serving as the Meeting of the Parties to the Protocol on Strategic Environmental Assessment on its third session	ECE/CP.TEIA/42 and Add.1	Protocol on Strategic Environmental Assessment on their intermediary sessions Report of the Conference of the Parties to the Convention on the Transboundary Effects of Industrial Accidents on its eleventh meeting
ECE/MP.EIA/27- ECE/MP.EIA/ SEA/11 and Add.1	Report of the Meeting of the Parties to the Convention on Environmental Impact Assessment in a Transboundary Context and of the Meeting of the Parties to the Convention on Environmental Impact Assessment in a Transboundary Context serving as the Meeting of the Parties to the	ECE/MP.WAT/63 and Add.1 and Add.2	Report of the Meeting of the Parties to the Convention on the Protection and Use of Transboundary Watercourses and International Lakes on its ninth session
		ECE/MP.WH/19 and Add.1 and Add.2	Report of the Meeting of the Parties to the Protocol on Water and Health to the Convention on the Protection and Use of Transboundary Watercourses and International Lakes on its fifth session

**Subprogramme 2
Transport***General Assembly resolutions*

58/9	Global road safety crisis	70/217	Follow-up to the second United Nations Conference on Landlocked Developing Countries
68/269	Improving global road safety		
69/137	Programme of Action for Landlocked Developing Countries for the Decade 2014–2024	72/212	Strengthening the links between all modes of transport to achieve the Sustainable Development Goals
69/213	Role of transport and transit corridors in ensuring international cooperation for sustainable development	72/271 73/243	Improving global road safety
70/197	Towards comprehensive cooperation among all modes of transport for promoting sustainable multimodal transit corridors	74/299	Follow-up to the Second United Nations Conference on Landlocked Developing Countries Improving global road safety

Economic and Social Council resolutions

1999/65	Reconfiguration of the Committee of Experts on the Transport of Dangerous Goods into a Committee of Experts on the Transport of Dangerous Goods and on the Globally Harmonized System of Classification and Labelling of Chemicals	2021/13	Work of the Committee of Experts on the Transport of Dangerous Goods and on the Globally Harmonized System of Classification and Labelling of Chemicals
2013/7	Europe-Africa fixed link through the Strait of Gibraltar	2022/2	Revised terms of reference of the Inland Transport Committee of the Economic Commission for Europe

Economic Commission for Europe decisions

ECE/AC.21/2014/2	Report of the High-level Meeting on Transport, Health and Environment on its fourth session	ECE/TRANS/254	Report of the Inland Transport Committee on its seventy-eighth session
ECE/TRANS/224	Report of the Inland Transport Committee on its seventy-fourth session (UNECE Road Map for promoting ITS-20 global actions 2012–2020)	ECE/TRANS/270	Report of the Inland Transport Committee on its seventy-ninth session (adopting Ministerial Resolution on embracing the new era for sustainable inland transport and mobility)
ECE/TRANS/236	Report of the Inland Transport Committee on its seventy-fifth session (Joint Declaration on the promotion of Euro-Asian Rail Transport and Activities towards Unified Railway Law; and Joint Statement on Future Development of Euro-Asian Transport Links)	ECE/TRANS/274	Report of the Inland Transport Committee on its eightieth session

B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	28	24	20	20
12. Training courses on women’s entrepreneurship for government officials and women entrepreneurs	28	24	20	20
Publications (number of publications)	3	3	3	2
13. On the regional implementation of the 2030 Agenda for Sustainable Development	1	1	1	–
14. On gender equality and sustainable development	1	1	1	1
15. ECE annual report	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: advice to and consultations with member States and United Nations country teams to facilitate implementation of the United Nations Sustainable Development Framework process by 17 countries.				
D. Communication deliverables				
Outreach programmes, special events and information materials: promotional materials (brochures, banners, panels, posters and postcards) for regional access; films on ECE activities for global access.				
External and media relations: ECE weekly newsletter; press conferences on ECE activities; news and press releases on ECE activities, for regional and global access (around 200).				
Digital platforms and multimedia content: Executive Committee, the gender equality and the technical cooperation activities websites; website providing access to information and documents related to ECE as a whole; and news on ECE activities on 4 social media platforms.				

Evaluation activities

- 20.17 The programme-level review of ECE engagement with the private sector completed in 2021 has guided the proposed programme plan for 2023. The results and lessons of this evaluation have been taken into account for the programme plan for 2023.
- 20.18 The results and lessons of the evaluation referenced above have been taken into account for the programme plan for 2023. The evaluation concluded that while the relevance of the engagement with the private sector is broadly recognized in ECE strategic documents, the framework for engagement with the business sector, approved in 2017, does not fully correspond to the expectations of ECE member States and ECE intergovernmental bodies. The evaluation recommended that the framework be reviewed in the spirit of Sustainable Development Goal 17 and be complemented by an overarching ECE partnership strategy. In its management response, ECE committed to preparing a revised partnership strategy that clarified the benefits of engaging with the private sector, provided operational guidance for engagement and determined the types of partnerships and their roles in advancing the Commission’s mandate.

- 20.19 A programme-level review of the Commission's role in supporting the implementation of the 2030 Agenda for Sustainable Development, in the context of the United Nations development system reform (2017–2023), is planned for 2023.

Programme of work

Subprogramme 1 Environment

Objective

- 20.20 The objective, to which this subprogramme contributes, is to improve environmental governance and performance for safeguarding the environment and health.

Strategy

- 20.21 To contribute to the objective, the subprogramme will:
- (a) Support the implementation of outcomes of global and regional summits and conferences, and support and promote the implementation by countries of the ECE multilateral environmental agreements, contributing to achieving mainly Sustainable Development Goals 3, 6, 9, 11 to 13, 15 and 17, through the core interlinked functions of international policy dialogue, normative work, capacity-building and the dissemination of good practices and lessons learned in the areas of air quality, water, industrial safety, public participation, impact assessment, environmental monitoring and assessment, environmental performance, education for sustainable development and the mainstreaming of environmental concerns into other dimensions of sustainable development;
 - (b) Support and promote the implementation by countries of the ECE policy tools, including the ECE Environmental Performance Review Programme, contributing to achieving mainly Goals 6, 11 to 13 and 15; the ECE Environmental Monitoring and Assessment Programme, contributing to achieving mainly Goal 17; the ECE strategy for education for sustainable development, contributing to achieving Goals 4, 12 and 13; and the Transport, Health and Environment Pan-European Programme, contributing to achieving mainly Goals 3, 11, 13 and 17;
 - (c) Support and promote the sharing of information (e.g. through the Shared Environmental Information System), experiences and good practices in the ECE region;
 - (d) Continue to promote synergies between ECE multilateral environmental agreements, through joint activities;
 - (e) Conduct Environmental Performance Reviews, assisting countries in the implementation of the recommendations from those Reviews and monitoring the impact of the recommendations on national policies;
 - (f) Using a country needs-based approach, support countries, with a focus on those in the Caucasus, Central Asia and Eastern and South-Eastern Europe, in environmental policymaking, monitoring, assessment and management, including by providing an intergovernmental decision-making platform, organizing capacity-building activities and providing advisory services;
 - (g) Work with interested non-ECE countries, including those wishing to join the multilateral environmental agreements that are open to global accession;
 - (h) Support member States by developing policy packages and/or recommendations, such as those that address emerging issues related to the work of the subprogramme, including by ensuring effective access to information, public participation in decision-making and access to justice

in the case of a crisis that has been identified as being of concern during the economic recovery phase.

20.22 The above-mentioned work is expected to result in:

- (a) Improved environmental governance and performance by member States;
- (b) Strengthened integration of environmental concerns into sectoral policies, including during the subsequent post-pandemic economic recovery phase in the ECE member States;
- (c) More effective development and implementation of environmental legislation and policy by member States;
- (d) Improved response to environmental challenges by ECE member States;
- (e) Enhanced cross-border cooperation between countries and effective international and national cooperation;
- (f) Strengthened implementation of ECE multilateral environmental commitments and increased geographical coverage.

Programme performance in 2021

Adoption of the Vienna Declaration of the fifth High-level Meeting on Transport, Health and Environment

20.23 Mobility and transport are essential to societies, but are having a growing impact on the environment. However, despite technological progress, transport and mobility patterns remain unsustainable. The COVID-19 pandemic has also shown the importance of active mobility and the necessity of strengthening the resilience of mobility to crises. The Vienna Declaration, which was signed at the fifth High-level Meeting on Transport, Health and Environment, held online in Vienna on 17 and 18 May 2021,¹ calls for a strategy for transforming mobility towards zero emissions and building safe and efficient transport in the decade to come. Its commitments are to restart sustainable transport and investments in sustainable and healthy mobility and transport in the region. Ministers also agreed that post-pandemic recovery packages need to focus on innovative approaches to expanding clean, healthy and inclusive mobility and transport, including by reducing dependency on cars, improving rail traffic and increasing safe walking and cycling. The Environment and Transport subprogrammes serviced and actively contributed to the process, including the preparatory meeting, prepared various outcome documents of the High-level Meeting and, by serving as the co-secretariat of the Transport, Health and Environment Pan-European Programme, helped provide a forum for international cooperation.

20.24 Progress towards the objective is presented in the performance measure below (see table 20.2).

¹ More information on the fifth High-level Meeting on Transport, Health and Environment is available at <https://unece.org/environment/press/european-countries-adopt-vienna-declaration-clean-safe-and-healthy-transport>.

Table 20.2
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	–	<p>Adopted the Vienna Declaration and, through that:</p> <ul style="list-style-type: none"> • Adopted a master plan on cycling promotion, to increase cycling share, improve cycling and pedestrian safety and develop national cycling policies • Adopted recommendations to guide the evolution of member States’ transport systems on a more sustainable path, including based on experiences from the COVID-19 pandemic • Committed to adopting plans and policies that are conducive to active mobility and decarbonization and to tackling inequalities related to transport and urban sprawl

Planned results for 2023

Result 1: enhanced environmental performance in the Economic Commission for Europe region

Programme performance in 2021 and target for 2023

- 20.25 The subprogramme’s work contributed to enhancing the environmental performance of Romania through the country’s third Environmental Performance Review. This included addressing 54 Sustainable Development Goal targets relevant to that Review, which did not meet the planned target of 65 targets of Goals covered by Reviews. The target was not met as only one of the two Reviews planned was completed in 2021 owing to COVID-19 restrictions.
- 20.26 The progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 20.I).

Figure 20.I
Performance measure: number of targets of the 2030 Agenda for Sustainable Development covered by Environmental Performance Reviews in a year

Result 2: improved information for strengthening transboundary water cooperation

Programme performance in 2021 and target for 2023

- 20.27 The subprogramme’s work contributed to 115 countries providing accurate data on Sustainable Development Goal indicator 6.5.2 on transboundary river and lake basins, as validated by the subprogramme and communicated to the Statistical Commission in 2021, which exceeded the planned target of 95 countries. This achievement was the result of impressive participation by United Nations Member States in the second reporting exercise and improved the quality of reports, following extensive capacity development activities and other support provided by the subprogramme.
- 20.28 The progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 20.II).

Figure 20.II
Performance measure: number of countries for which data on transboundary river and lake component of indicator 6.5.2 are submitted to the Statistical Commission^a (cumulative)

^a The target for 2023 does not represent a significant increase from the result achieved in 2021 because the submission of reports takes place in three-year cycles and it is not possible to validate a larger number of reports before a new round of reporting begins. The third reporting exercise, including the data validation process, will be completed at the beginning of 2024.

Result 3: strengthened industrial safety governance in Eastern and South-Eastern Europe, the Caucasus and Central Asia

Proposed programme plan for 2023

- 20.29 The Convention on the Transboundary Effects of Industrial Accidents has 41 parties. Since 2004, countries in Eastern and South-Eastern Europe, the Caucasus and Central Asia² have benefited from activities under the Convention's Assistance and Cooperation Programme aimed at supporting national self-assessments and action plans, identifying implementation gaps and determining steps to address them. In 2010, the subprogramme developed benchmarks for the Convention's implementation, including indicators and criteria, and has been assisting countries in applying them through national workshops organized on a needs-driven basis.

Lessons learned and planned change

- 20.30 A key lesson learned for the subprogramme was that its support has not been sufficiently steady to sustain cooperation among national authorities and ensure the full implementation of the Convention, coherence with related policies and better alignment and interlinkages of laws, bylaws and policies. In applying the lesson, the subprogramme will build the capacity of selected beneficiary countries of the Assistance and Cooperation Programme to establish and implement national policy dialogues on industrial safety as sustainable inter-institutional cooperation mechanisms, which will serve as a governance framework among institutions that deal with industrial safety, including emergency situations, environmental protection, internal affairs, inspections and disaster risk reduction. Engaging relevant authorities through the dialogues by establishing national steering committees and holding consultations is essential in order to facilitate agreement on measures to mitigate technological disaster risks, as well as technological accidents triggered by natural hazards. Furthermore, the subprogramme will review national policies and legislation, in cooperation with national authorities, and develop recommendations for the implementation of the Convention and on related policy areas such as disaster risk reduction.
- 20.31 The expected progress towards the objective is presented in the performance measure below (see table 20.3).

Table 20.3

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Parties agreed to enhance governance through national policy dialogues on industrial safety through the Convention's Assistance and Cooperation Programme	Serbia initiated the development of terms of reference for a steering committee on national policy dialogues Central Asian countries began activities to launch national policy dialogues	Serbia established a national policy dialogue steering committee Central Asian countries reviewed industrial safety legislation to align with the Convention's requirements	Meetings of the Serbian national policy dialogue steering committee are held. Serbia reviews industrial safety legislation to align with the Convention's requirements and related policy areas National policy dialogues are launched in Central Asian countries	National policy dialogues are sustained and implemented by Serbia and five Central Asian countries

² Including six non-parties, namely Georgia, Kyrgyzstan, Tajikistan, Turkmenistan, Ukraine and Uzbekistan.

Deliverables

20.32 Table 20.4 lists all deliverables of the subprogramme.

C. Substantive deliverables				
Consultation, advice and advocacy: advisory services for some 100 government officials and other stakeholders of States participating in the United Nations Special Programme for the Economies of Central Asia on water, energy and other environmental issues.				
D. Communication deliverables				
Outreach programmes, special events and information materials: Environmental Performance Review (synopsis and highlights) to facilitate broad dissemination and user-friendly access to key messages and recommendations by representatives of at least 6 categories of stakeholders, such as Governments, local authorities, academia, business and intergovernmental and non-governmental organizations, as well as mass media in the reviewed countries; electronic newsletter of the Working Group on Environmental Monitoring and Assessment submitted to all member States in the region, including representatives of Government, academia and intergovernmental and non-governmental organizations.				
External and media relations: press releases on environmental issues, for global and regional access.				
Digital platforms and multimedia content: website of the subprogramme.				

Subprogramme 2 Transport

Objective

- 20.33 The objective, to which this subprogramme contributes, is to advance a regionally and globally sustainable inland transport (road, rail, inland waterway and intermodality) system by making it safer, cleaner, more efficient and more affordable, both for freight transport and people's mobility.

Strategy

- 20.34 To contribute to the objective, the subprogramme will:
- (a) Facilitate the addressing of regional and global needs in inland transport and promote regionally and globally sustainable transport systems through servicing the Inland Transport Committee and its 20 working parties and 11 administrative committees, as well as the Committee of Experts on the Transport of Dangerous Goods and on the Globally Harmonized System of Classification and Labelling of Chemicals and more than 50 formal and informal expert networks;
 - (b) Administer the international regulatory framework for inland transport, which includes 59 United Nations legal instruments on safety, pollution, efficiency and effectiveness (normative function), by developing new and updating existing legal instruments, as necessary, including maintaining the database of international regulatory frameworks for inland transport. This will

ensure that the Committee's regulatory functions are up to date with current technologies and transport innovations – such as intelligent transport systems, autonomous vehicles and digitization – and are open to all United Nations Member States, as appropriate;

- (c) Provide an intergovernmental policy dialogue platform at the annual sessions of the Inland Transport Committee to review emerging challenges and emergency situations; support consensus-building during the Committee's events in favour of regional and interregional connectivity, among other matters, including through the adoption of high-level statements or resolutions on harmonized actions by member States and contracting parties in order to enable the full implementation of the Committee's mandate;
- (d) Complement the regulatory and policy dialogue functions with analytical work, technical assistance and capacity-building on accession to and implementation of legal instruments, at the request of member States and contracting parties;
- (e) Contribute to the work of the Special Envoy of the Secretary-General for Road Safety and the operation of the United Nations Road Safety Fund to facilitate global improvements in road safety through policy dialogue at Committee meetings, and provide capacity-building and advisory assistance with regard to promoting legal instruments and participation in governing bodies, calls for proposals and other related activities, as appropriate;
- (f) Support the efforts of member States to respond to and recover from emergency situations, including pandemics, while minimizing disruptions to the functioning of national, regional and international transport systems and the implementation of the sustainable development agenda;
- (g) Promote knowledge-sharing and cooperation among Governments and key stakeholders, raise awareness of emerging issues and best responses, contribute to the improved monitoring and measuring of the Sustainable Development Goals, facilitate the adaptation of legally binding instruments and frameworks to new realities and prepare new guidance materials.

20.35 The above-mentioned work is expected to result in:

- (a) Improvements in sustainable mobility, and in monitoring and measuring the Sustainable Development Goals;
- (b) Improvements in inland transport, leading to safer, cleaner, more efficient and more affordable systems for contracting parties to the United Nations inland transport conventions;
- (c) More efficient and resilient cross-border flows of goods and people regionally and globally;
- (d) Enhanced intergovernmental cooperation in emergency situations and minimized disruptions to the continued implementation and updating of United Nations inland transport conventions.

Programme performance in 2021

Accelerated digitization of legal instruments in inland transport in response to COVID-19

20.36 COVID-19 constraints in 2020 and 2021 further highlighted the need to provide support to member States and contracting parties in the implementation of their obligations under legal instruments and in the provision of proper guidance on downstream legislation, as well as in the digitization of legal instruments on transport. The subprogramme developed enhanced response measures, including through: (a) the development and implementation of a new generation of legal instruments supporting the digitization/computerization of transport and border-crossing procedures; (b) the creation of specialized knowledge to facilitate and accelerate the operationalization of some of these instruments, for example, the Group of Experts on the operationalization of eCMR; and (c) the utilization of existing mechanisms and networks in order to accelerate the post-COVID-19 economic recovery of contracting parties to support the efforts of member States towards a sustainable recovery.

20.37 Progress towards the objective is presented in the performance measure below (see table 20.5).

Table 20.5
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	Increased accessions by United Nations Member States to eCMR that strengthened the need to operationalize it	Establishment of a Group of Experts to create specialized knowledge that will accelerate the operationalization of a key legal instrument of the eCMR procedure

Abbreviation: eCMR, Additional Protocol to the Convention on the Contract for the International Carriage of Goods by Road concerning the electronic consignment note.

Planned results for 2023

Result 1: increased number of new United Nations Member States becoming part of the regulatory framework for sustainable inland transport systems

Programme performance in 2021 and target for 2023

- 20.38 The subprogramme’s work contributed to one more Member State, Ethiopia, acceding in 2021 to one of the core United Nations road safety conventions, exceeding the planned target of 150 United Nations Member States that are contracting parties to United Nations inland transport conventions under the purview of the Commission.
- 20.39 The progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 20.III).

Figure 20.III

Performance measure: number of Economic Commission for Europe member States and total number of United Nations Member States that are contracting parties to United Nations inland transport conventions under the purview of the Commission (cumulative)

Result 2: strengthened regulatory support in road safety contributing to fewer worldwide road accident fatalities and injuries

Programme performance in 2021 and target for 2023

- 20.40 The subprogramme’s work contributed to two new accessions in 2021, which did not meet the planned target of 406 contracting parties. The target was not met because of the impact of the pandemic on capacity-building and outreach activities of the secretariat.
- 20.41 The progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 20.IV).

Figure 20.IV

Performance measure: number of contracting parties to core United Nations road safety conventions^a (cumulative)

^a For the 2023 target, there will be eight core United Nations road safety conventions, following the decision of the Inland Transport Committee’s Working Party on Road Transport to support the opening for global accession to a new agreement of the European Agreement concerning the Work of Crews of Vehicles Engaged in International Road Transport, concerning professional drivers.

Result 3: enhanced regulatory framework for sustainable inland transport systems

Proposed programme plan for 2023

- 20.42 Sustainable transport and mobility are critical elements in achieving the Sustainable Development Goals, yet performance has been uneven across regions and subregions, as in the case of target 6 of Goal 3, on halving the number of global deaths and injuries from road traffic accidents. Evidence indicates that countries with a greater number of accessions to conventions and agreements serviced by the subprogramme have better results in terms of improving the sustainability of their transport systems.
- 20.43 The subprogramme’s work on enhancing the regulatory framework in recent years resulted in critical updates to legal instruments. It also provided policy advice and recommendations supporting the efforts of member States and contracting parties to further develop sustainable inland transport systems.

Lessons learned and planned change

- 20.44 The lesson for the subprogramme was that the subprogramme should adjust its approach and focus to better support the growing needs of United Nations Member States in the development of sustainable inland transport systems. To achieve that, enhanced integrated regulatory support and the modernization of legal instruments, including through the digitization of documents and

procedures in transport and the facilitation of safe early deployment of automated vehicles, is of critical importance.

- 20.45 In applying the lesson, the subprogramme will scale up its efforts to support the development of sustainable inland transport systems internationally and ensure that its activities benefit the ECE region and provide best practices to other regions in their own efforts to curb the number of road traffic deaths and injuries; improve the environmental performance of inland transport systems, including the need to facilitate the circular economy and the sustainable use of natural resources, and reduce emissions; and enhance efficiency, connectivity and accessibility for all, including persons with disabilities, through the digitization of documents and procedures related to transport and the promotion of automated vehicles. The subprogramme plans to enhance its regulatory support for the implementation of the Inland Transport Committee Strategy until 2030 (see ECE/TRANS/288/Add.2) by, among other things, analysing trends and challenges in other regions to encourage greater participation of countries from outside the ECE region and women in the activities of the Committee and its subsidiary bodies. It will also scale up outreach and capacity-building activities, including in partnerships with the United Nations system and external stakeholders.
- 20.46 The expected progress towards the objective is presented in the performance measure below (see figure 20.V).

Figure 20.V

Performance measure: number of contracting parties to United Nations legal instruments on transport administered by the Economic Commission for Europe (cumulative)

Deliverables

- 20.47 Table 20.6 lists all deliverables of the subprogramme.

18. Transport statistics – country profiles	1	1	1	1

C. Substantive deliverables

Consultation, advice and advocacy: advisory services for contracting parties of United Nations transport conventions administered by ECE on legal instruments relating to inland transport; facilitation of transport; border crossing; road safety; vehicle construction; and transport of dangerous goods and other special cargo.

Databases and substantive digital materials: the International TIR Data Bank website providing access to users from more than 70 contracting parties of the TIR Convention, which includes the list of the more than 31,000 transport companies authorized to use the TIR system; TIR and eTIR websites; the eTIR international system allowing the exchange of data between the eTIR stakeholders in the course of TIR transports following the eTIR procedure; inventory of standards on inland water infrastructure; web-based inventory of existing European Agreement on Main International Railway Lines and European Agreement on Important International Combined Transport Lines and Related Installations standards and parameters; databases on transport statistics, road traffic accidents, transport of dangerous goods, transport of perishable foodstuffs, urban transport and transport and environment; web-based Rail Security Observatory; digitized signs and signals (E-CoRSS) under the Convention on Road Signs and Signals; and smart and sustainable connectivity e-learning platform.

D. Communication deliverables

Outreach programmes, special events and information materials: information materials on legal instruments and activities of the subprogramme for universal and regional access.

External and media relations: press releases for the subprogramme.

Digital platforms and multimedia content: digital platforms and multimedia content on sustainable transport and mobility; and website of the subprogramme for universal and regional access.

**Subprogramme 3
Statistics**

Objective

- 20.48 The objective, to which this subprogramme contributes, is to advance official statistics at the national and international levels for evidence-based policymaking and assessing progress towards achieving the Sustainable Development Goals and to ensure the coordination of statistical activities in the ECE region under the Conference of European Statisticians.

Strategy

- 20.49 The strategy of the subprogramme is guided by the priorities and needs of member States and is based on the core interlinked functions: the streamlining of international statistical work in the ECE region by promoting policy dialogue; methodological work to develop and promote guidelines and recommendations to enhance the quality of statistics; and the statistical capacity development of ECE member States with less developed statistical systems.
- 20.50 To contribute to the objective, the subprogramme will:
- (a) Promote in-depth statistical dialogue at the Conference of European Statisticians and expert meetings;
 - (b) Launch regional and country-specific initiatives related to methodological work to develop and disseminate statistical models, guidelines and recommendations to enhance the quality of statistics and to promote the use of official statistics;
 - (c) Maintain and develop the ECE statistical database;
 - (d) Establish and strengthen partnerships between geospatial experts and statisticians to support the integration of statistical and geospatial information, in cooperation with statistical departments of other regional entities such as Eurostat, OECD, the European Free Trade Association, the Interstate Statistical Committee of the Commonwealth of Independent States and the Eurasian Economic Commission, as well as international specialized agencies active in the region;
 - (e) Facilitate the exchange of experiences and good practices in the fields of population and housing censuses, price statistics and environment statistics, including adaptations owing to COVID-19 restrictions;
 - (f) Provide support to countries in planning and conducting their census and developing their statistical capacity, including cross-cutting topics such as statistics on the Sustainable Development Goals, statistical legislation, data collection, data integration, dissemination and human resource management.
- 20.51 The above-mentioned work is expected to result in:
- (a) Improved statistical methodology and capacity of member States to measure and monitor the Sustainable Development Goals;
 - (b) Conduct of censuses by member States using innovative and efficient approaches that result in improved cost-efficiency, coverage, accuracy, comparability and timeliness of dissemination of the census results;
 - (c) Improved capacity by member States to provide the statistics necessary to develop evidence-based policies to manage their post-pandemic recovery.

Programme performance in 2021

Improved information on poverty for decision-making in member States

- 20.52 To increase efficiency and cope with the pandemic-related restrictions, collecting survey data for measuring poverty increasingly needed to rely on remote data collection methods, using the telephone or the Internet. The usual pre-pandemic format in many countries was a personal face-to-face interview, which required direct visits to respondents. To continue providing quality data during the pandemic, national statistical offices needed to switch to a computer-assisted telephone or web-based interview quickly. In 2020 and 2021, the subprogramme organized exchanges of experience and developed member States' capacity to improve poverty measurement, including by supporting them in adapting the traditional household budget questionnaires to telephone and Internet surveys. In 2021, ECE updated its harmonized survey module for poverty measurement, taking into account

the lessons learned during the pandemic. While the adaptation of surveys in many countries occurred during 2020, when the pandemic began, further improvement in 2021 was achieved owing to the more frequent exchanges of experience, the updated survey module and related technical assistance provided by ECE.

20.53 Progress towards the objective is presented in the performance measure below (see figure 20.VI).

Figure 20.VI

Performance measure: percentage of countries that use remote data collection methods for measuring poverty

Planned results for 2023

Result 1: conducting a new population and housing census that provides cost-effective and better-quality results

Programme performance in 2021 and target for 2023

- 20.54 The subprogramme's work contributed to the completion of population and housing censuses in 77 per cent of ECE member States by 2021, which did not meet the planned target of 84 per cent. The target was not met because some countries in the region postponed their census as a result of the pandemic.
- 20.55 The progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 20.VII).

Figure 20.VII
Performance measure: Economic Commission for Europe countries having conducted a census in compliance with the Conference of European Statisticians recommendations

(Percentage)

Result 2: increasing the number of countries that report sex-disaggregated statistical indicators

Programme performance in 2021 and target for 2023

- 20.56 The subprogramme’s work contributed to an increase to 65 percent of ECE member States reporting sex-disaggregated indicators in the Sustainable Development Goals database, which met the planned target.
- 20.57 The progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 20.VIII).

Figure 20.VIII
Performance measure: sex-disaggregated indicators available for Economic Commission for Europe member States in the ECE Sustainable Development Goals database

(Percentage)

Result 3: increased number of countries collaborating on developing and using machine learning techniques for the production of official statistics

Proposed programme plan for 2023

- 20.58 Monitoring the Sustainable Development Goals and other internationally agreed development goals requires more indicators that are further disaggregated, for example, by gender statistics or disability status, and that are produced more frequently. Countries do not always have sufficient resources or

consistent data sources to produce the statistics needed to report adequately on progress on the Goals or to better respond to the COVID-19 pandemic and other crises. A large part of the data collected must be manually classified and coded. Machine learning can help automate this process, allowing the use of new data sources, when manual processing is not feasible. As the subprogramme promoted the use of advanced methodologies for modernizing the production of statistics, it piloted a global project to investigate how machine learning can be used in producing official statistics, leading to several national statistical offices starting to use machine learning techniques.

Lessons learned and planned change

- 20.59 The lesson for the subprogramme was that there was a strong need to further develop and implement machine learning techniques in producing official statistics in order to ensure that best practices on the use of machine learning can be scaled up. This will enable national statistical offices to produce higher volumes of more disaggregated statistics with greater frequency, allowing for better monitoring of progress towards the Sustainable Development Goals.
- 20.60 In response, the subprogramme will set up and support a community platform and environment where national statistical offices will share knowledge and experiences and collaborate on developing common solutions on the use of machine learning techniques. Pilot studies for different types of applications for machine learning will be set up and ways to transfer knowledge will be established. Results and experiences, as well as publicly developed algorithms and methodologies, will be shared through online platforms, online seminars and other events.
- 20.61 The expected progress towards the objective is presented in the performance measure below (see figure 20.IX).

Figure 20.IX

Performance measure: number of member States actively collaborating in developing and using machine learning techniques for the production of official statistics

Deliverables

- 20.62 Table 20.7 lists all deliverables of the subprogramme.

Table 20.7

Subprogramme 3: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	81	53	81	81
1. Documentation for the Conference of European Statisticians	43	40	43	43
2. Documentation for groups of experts on statistical issues	38	13	38	38
Substantive services for meetings (number of three-hour meetings)	85	85	85	85
3. Meetings of the Conference of European Statisticians and its Bureau	13	13	13	13
4. Meetings of groups of experts on statistical issues	72	72	72	72
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	1	1	1
5. On social and economic statistics	1	1	1	1
Seminars, workshops and training events (number of days)	6	6	6	6
6. Workshops on social and economic statistics	3	3	3	3
7. Workshops on innovating statistical production	3	3	3	3
Publications (number of publications)	7	7	7	7
8. On topics covering multiple statistical areas	1	1	1	1
9. On social, environmental and economic statistics	6	6	6	6
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services for more than 100 government officials (staff of national statistical systems) and other stakeholders of countries of Eastern Europe, the Caucasus and Central Asia and South-Eastern Europe on economic, social, demographic and environment statistics, statistics for the Sustainable Development Goals, geospatial statistics and institutional issues and modernization of official statistics (4 countries).				
Databases and substantive digital materials: ECE statistical databases (Sustainable Development Goal, population and gender statistics database; economic statistics database); hosting of the transport and the forestry databases, which are updated and maintained by subprogrammes 2 and 7, respectively.				
D. Communication deliverables				
Outreach programmes, special events and information materials: leaflets and other promotional materials.				
External and media relations: articles for the “UNECE Weekly” and “EnvStats” newsletters for regional access.				
Digital platforms and multimedia content: interactive digital workspaces (wikis, including the ECE census wiki); website of the subprogramme.				

Subprogramme 4

Economic cooperation and integration

Objective

- 20.63 The objective, to which this subprogramme contributes, is to strengthen policies on innovation, competitiveness and public-private partnerships in the ECE region.

Strategy

- 20.64 The strategy of the subprogramme is based on the implementation of three core interlinked functions in the subprogramme’s two areas of work (innovation and competitiveness policies; and public-

private partnerships): international policy dialogue; normative and analytical work; and capacity-building and the sharing of best practices and lessons learned.

- 20.65 To contribute to the objective, the subprogramme will:
- (a) Support member States in the creation of a conducive business environment by developing good practices to inform innovation policy reforms that drive sustainable development, including through advisory-based analyses of national innovation systems, policies and institutions, upon request; and through capacity-building workshops and seminars at the national and subregional levels;
 - (b) Build the capacity of member States with regard to creating regulatory frameworks and public-private partnership project pipelines that can help close the Sustainable Development Goal infrastructure financing gap, including through:
 - (i) The promotion of innovative modalities of financing and development and the management of critical infrastructure;
 - (ii) The development of international guidelines and standards to design public-private partnership projects and legal and regulatory frameworks;
 - (iii) The use, upon demand, of a methodology to evaluate and score public-private partnership projects on whether they support sustainable development (“people-first” public-private partnerships for the Goals);
 - (iv) Developing cooperation with multilateral platforms for sustainable infrastructure (including SOURCE, a multilateral platform for sustainable infrastructure);
 - (c) Focus some of its policy dialogues, analyses and recommendations, standards and capacity-building on addressing crisis mitigation through innovation policies and public-private partnership infrastructure projects that can facilitate innovation and develop infrastructure to make economies more resilient and sustainable.
- 20.66 This work will help member States make progress towards achieving Sustainable Development Goals 8, 9, 12 and 17 and contribute to promoting the transition to the circular economy and the sustainable use of natural resources.
- 20.67 The above-mentioned work is expected to result in:
- (a) The improved design of innovation-related policies and institutions in member States in order to harness the power of innovation for sustainable development and support national innovation policy reforms, including options for policies and regulatory frameworks to support innovation in areas critical for resilience and COVID-19 recovery;
 - (b) The improved design and operation of public-private partnerships by member States that contribute to sustainable development and lead to more “people-first” projects; and strengthened capacities of member States with regard to policy and project design and implementation, including better regulatory frameworks that support investment in resilient and sustainable infrastructure related to COVID-19 recovery.

Programme performance in 2021

Improved capacity of countries in the United Nations Special Programme for the Economies of Central Asia to support micro-, small and medium-sized enterprises in the use of innovation to achieve sustainable growth objectives

- 20.68 COVID-19 increased the challenges faced by micro-, small and medium-sized enterprises: inflated transport costs and regional coordination challenges created downward pressures on such enterprises, with negative consequences for their resilience and future development prospects. Innovation can help micro-, small and medium-sized enterprises respond to these challenges, and possible ways forward include tapping into the potential for a sustainable recovery and transitioning

to the circular economy and the sustainable use of natural resources, and supporting innovative high-growth enterprises.

20.69 The subprogramme supported the United Nations Special Programme for the Economies of Central Asia countries in stakeholder consultations to develop and adopt the Innovation Strategy for Sustainable Development, which will support delivery on the above objectives. National gap assessments were carried out, culminating in an Action Plan for the Innovation Strategy. For example, the Special Programme’s handbooks on business incubators and on support to innovative high-growth enterprises were developed and complemented with additional materials by a working group in order to support policymakers and the response of micro-, small and medium-sized enterprises to the economic challenges stemming from the COVID-19 pandemic.

20.70 Progress towards the objective is presented in the performance measure below (see table 20.8).

Table 20.8
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
Adoption of the Innovation Strategy for Sustainable Development of the United Nations Special Programme for the Economies of Central Asia at the 2019 session of the Special Programme’s Governing Council	National gap assessments carried out for each Special Programme country to identify shared challenges, validated at a subregional webinar	Action Plan of the Innovation Strategy for Sustainable Development approved by the Special Programme’s Governing Council in 2021

Planned results for 2023

Result 1: people-first public-private partnerships to finance sustainable development

Programme performance in 2021 and target for 2023

20.71 The subprogramme’s work contributed to an enhanced evaluation methodology for people-first public-private partnerships through testing and improvement, which met the planned target of at least 100 public-private partnership projects assessed using the evaluation methodology during its testing phase.

20.72 The progress towards the objective and the target for 2023 are presented in the performance measure below (see table 20.9).

Table 20.9
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Project team set up and work on the project impact assessment tool begun	Evaluation methodology endorsed by member States for piloting	100 public-private partnership projects assessed using the evaluation methodology	An additional 50 public-private partnership projects assessed using the evaluation methodology	An additional 75 public-private partnership projects assessed using the evaluation methodology

Result 2: improved capacity of member States to use innovation to achieve their sustainable development objectives

Programme performance in 2021 and target for 2023

- 20.73 The subprogramme’s work contributed to a cumulative total of 803 policymakers and other innovation stakeholders from requesting countries benefiting from ECE capacity-building on innovation policy. The result exceeded the planned target of an increase of 200.
- 20.74 The progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 20.X).

Figure 20.X

Performance measure: number of policymakers and other innovation stakeholders from requesting countries that have benefited from Economic Commission of Europe capacity-building on innovation policy (cumulative)

Result 3: improved capacity of member States in the development of infrastructure projects in support of the Sustainable Development Goals and the circular economy

Proposed programme plan for 2023

- 20.75 The subprogramme develops public-private partnership policy instruments in support of the Sustainable Development Goals and the transition to the circular economy and the sustainable use of natural resources. The subprogramme provides demand-driven capacity-building, assisting member States in improving their legal and regulatory frameworks and strengthening the pipelines of infrastructure projects. These activities respond to the challenges related to identifying and/or financing projects and mobilizing resources to unlock private-sector financing for infrastructure, in line with population needs, including persons with disabilities.
- 20.76 The subprogramme has responded to these challenges by creating policy instruments, including an evaluation methodology on people-first public-private partnerships for the Sustainable Development Goals, assisting member States in prioritizing investments in infrastructure projects, and developing guidelines on waste-to-energy projects for the circular economy and the sustainable use of natural resources.

Lessons learned and planned change

- 20.77 The lesson for the subprogramme was that the impact of its delivery could be improved through the provision of targeted and project-focused capacity-building support to member States on strengthening the impact and performance of their infrastructure projects. In applying the lesson, the subprogramme will support the requesting member States by delivering hands-on training on the application of ECE standards and guidelines on people-first public-private partnerships to assess the extent to which national infrastructure projects meet the Sustainable Development Goals.

20.78 The expected progress towards the objective is presented in the performance measure below (see figure 20.XI)

Figure 20.XI

Performance measure: number of policymakers from member States that have used the Economic Commission for Europe standards and guidelines on people-first public-private partnership for the Sustainable Development Goals to identify and prepare infrastructure projects aligned with the Goals and the circular economy and the sustainable use of natural resources (cumulative)

Deliverables

20.79 Table 20.10 lists all deliverables of the subprogramme.

Table 20.10

Subprogramme 4: deliverables for the period 2021–2023, by category and subcategory

C. Substantive deliverables				
Consultation, advice and advocacy: advisory services under the Working Party on Public-Private Partnership and the Team of Specialists on Innovation and Competitiveness Policies reaching 30 government ministries and agencies and stakeholder entities.				
Databases and substantive digital materials: database of people-first public-private partnership case studies from approximately 15 member States.				
D. Communication deliverables				
External and media relations: press releases and launch events for the above publications for regional, subregional and national access.				
Digital platforms and multimedia content: website for regional access.				

Subprogramme 5 Sustainable energy

Objective

- 20.80 The objective, to which this subprogramme contributes, is to ensure secure access to affordable, reliable, sustainable and modern energy for all and to reduce greenhouse gas emissions and the carbon footprint of the energy sector in the region.

Strategy

- 20.81 The strategy of the subprogramme is to support international policy dialogue and cooperation among Governments, energy industries and other stakeholders to foster sustainable energy development; develop and deploy ECE policy recommendations, norms, standards, guidelines and tools on energy-related issues; and provide capacity-building and assistance to member States, at their request, through training programmes, advisory services and technical cooperation projects. Through its work, the subprogramme will contribute to ECE work on cross-sectoral collaboration areas, as described in paragraph 20.5 (b)–(e) above, and to priorities related to the circular economy. To contribute to the objective, the subprogramme will:
- (a) Further develop normative instruments (such as best practices and principles), awareness-raising campaigns and the deployment of ECE tools through workshops, seminars and technical projects to help member States meet their commitments to the 2030 Agenda for Sustainable Development and the Paris Agreement with regard to reducing their environmental footprint related to energy, accelerating the deep transformation of the energy sector to meet future needs, ensuring the sustainable management of resources and assessing options to ensure energy for sustainable development;
 - (b) Promote policy dialogue and cooperation among member States, regional entities and other partners on sustainable energy issues;

- (c) Provide technical assistance and guidance on energy transitions in the context of sustainable development, disseminate best practices and improve information-sharing;
- (d) Promote collaboration among private and public stakeholders that are key to implementing national and regional policies, including with regard to normative instruments and their deployment and dissemination;
- (e) Support member States on issues related to recovery from the COVID-19 pandemic through its regular work on sustainable energy.

20.82 The above-mentioned work is expected to result in:

- (a) More effective integration of sustainable energy across national policies and normative frameworks in support of the 2030 Agenda and the Paris Agreement;
- (b) Enhanced dialogue and cooperation among all energy actors to boost transformational investment in the energy sector and, consequently, accelerate the modernization of the energy system to meet countries' sustainable development and climate commitments;
- (c) Improved access of Member States to frameworks and tools required for integrated and sustainable resource management that aid the progress towards a more circular economy and contribute to the food-water-energy nexus (see [ECE/ENERGY/30/2021/INF.1/Rev.1](#));
- (d) The implementation of requests from ECE to the Committee on Sustainable Energy;
- (e) Improvement in the performance of buildings from a health perspective (e.g. temperatures, comfort, effective air intake and recycling filters), which will improve the protection and resilience of populations.

Programme performance in 2021

Accelerating the uptake of renewable energy in the Economic Commission for Europe region

- 20.83 The ECE region accounts for nearly half of global renewable energy capacity. The potential for deploying renewable energy technology is growing, and renewable energy is being integrated progressively into the energy mix. The ECE energy subprogramme is assisting member States in enhancing the uptake of renewable energy. Activities in 2021 included: (a) tracking progress on the uptake of renewable energy; (b) the exchange of experience, best practices and effective approaches; and (c) cooperation with national and international partners to strengthen the integration of renewable energy.
- 20.84 With the Renewable Energy Policy Network for the 21st Century (REN21) and the International Energy Agency, ECE produces an annual publication entitled *Renewable Energy Status Report*. The report contains a comprehensive review of renewable energy infrastructure, industry, policy, regulations, market development and potential growth rates in 17 selected countries of the ECE region. Building on this report, ECE organizes renewable energy “Hard Talks” in those countries to discuss possibilities for developing sustainable energy and promoting renewable energy investments in the region, identify priorities and provide concrete recommendations for policies to overcome political, legal, regulatory and technical barriers and realize the potential of renewable energy. The ECE energy subprogramme organizes follow-up capacity-building workshops that assist ECE member States in policy development and implementation based on informed decisions about renewable energy uptake, integration and harmonization.
- 20.85 Progress towards the objective is presented in the performance measure below (see figure 20.XII).

Figure 20.XII
Performance measure: number of countries implementing Economic Commission for Europe recommendations on renewable energy uptake (cumulative)

Planned results for 2023

Result 1: reduced carbon footprint and improved quality of life with high performance buildings

Programme performance in 2021 and target for 2023

- 20.86 The subprogramme’s work contributed to the expansion of the network of international centres of excellence on high-performance buildings to a total of 7, which met the planned target.
- 20.87 The progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 20.XIII).

Figure 20.XIII
Performance measure: number of international centres of excellence disseminating the Framework Guidelines for Energy Efficiency Standards in Buildings (cumulative)

Result 2: managing gases to implement the 2030 Agenda

Programme performance in 2021 and target for 2023

- 20.88 The subprogramme’s work contributed to 13 United Nations Member States applying ECE guidance on the management of gases, which did not meet the target of 14 Member States. The target was not met owing to delays or cancellations of planned activities because of the COVID-19 pandemic.

20.89 The progress towards the objective and the target for 2023 are presented below (see figure 20.XIV).

Figure 20.XIV

Performance measure: number of Member States applying Economic Commission for Europe guidance to manage gases (CH₄, H₂ and CO₂)

Result 3: digitization of the energy sector as an enabler of a circular economy and the sustainable use of natural resources

Proposed programme plan for 2023

20.90 Digitization is a priority for the energy sector in areas that include energy efficiency, renewable energy, sustainable resource management, methane management and energy system coordination. Ongoing work by the subprogramme has identified digitization as a factor for transforming the energy system to sustainable outcomes. Digitization will enhance systems performance, improve the price elasticity of demand, track the use of materials for reuse, enable traceability and transparency and accelerate the transformation of energy to a service industry, all of which will enable the circular economy and the sustainable use of natural resources. Efficiency improvements are a priority for countries that have adopted plans to improve the performance of appliances, buildings and networks. Grid-interactive efficient buildings and equipment illustrate how the coordination of sensors, smart devices and grid signals can improve energy efficiency.

Lessons learned and planned change

- 20.91 The lesson learned for the subprogramme was that standards for the digitization of energy systems are needed to ensure the smooth interoperability and operation of an integrated energy system, the efficient coordination of renewable energy production and the improved delivery of energy services to end users. Digitization will impose key imperatives in access to data, data and systems security, big data management, cross-border flows and the development of interfaces among customers, service providers, regulators and policymakers. This in turn will have workforce implications, requiring policy responses related to industry, education, training and reskilling on issues of security in the use of information and communications technology, data protection and personal privacy, among other things.
- 20.92 In response, the subprogramme will develop recommendations on the application of digitization policies to ensure the coherent deployment of digital technologies to achieve tangible outcomes in resource development, use and recovery.
- 20.93 The expected progress towards the objective is presented in the performance measure below (see figure 20.XV)

Figure 20.XV

Performance measure: number of member States applying Economic Commission for Europe recommendations on digitization by developing national case studies

Deliverables

20.94 Table 20.11 lists all deliverables of the subprogramme.

D. Communication deliverables

Outreach programmes, special events and information materials: booklets on sustainable energy and related topics, for regional access.

External and media relations: press releases, keynote speeches and articles on the activities of the energy subprogramme.

Digital platforms and multimedia content: update and maintenance of the subprogramme’s website, providing access to information and documents for regional and global audiences.

Subprogramme 6 Trade

Objective

- 20.95 The objective, to which this subprogramme contributes, is to strengthen trade facilitation and electronic business, regulatory cooperation and standardization policies, agricultural quality standards and trade-related economic cooperation in the ECE region and beyond.

Strategy

- 20.96 The strategy of the subprogramme is based on the implementation of core interlinked functions: (a) international policy dialogue on reducing regulatory and procedural barriers to trade, including those caused by cumbersome trade procedures and paperwork; and on divergent regulatory approaches and product standards; (b) normative work to develop standards and recommendations in the areas of trade facilitation and e-business, agricultural quality standards and regulatory cooperation; and (c) capacity-building and the sharing of best practices and lessons learned in all areas of work.
- 20.97 To contribute to the objective, the subprogramme will:
- (a) Promote simple, transparent and effective processes for global trade through its normative work to develop standards and recommendations in the areas of trade facilitation and electronic business;
 - (b) Facilitate international policy dialogue on establishing digital trading environments and on compliance with the multilateral trading system requirements, including the dissemination of standards, recommendations and guidelines;
 - (c) Promote the circular economy and the sustainable use of natural resources, sustainable and resilient value chains and the enhanced traceability of supply chains through studies, policy dialogues and technology-based pilot initiatives such as blockchain-based traceability for textile value chains. This work will help member States make progress towards achieving Sustainable Development Goals 8 and 12;
 - (d) Strengthen regulatory cooperation and promote standards and best practices in regulatory frameworks, risk management, conformity assessment and market surveillance to facilitate a predictable and harmonized regulatory environment;
 - (e) Disseminate gender-sensitive standards aimed at guiding standards bodies in their development of those standards. The subprogramme will also disseminate standards in support of achieving the Goals in order to showcase information on voluntary standards and how they map to the Goals, through the ECE web portal on standards for the Goals (<https://standards4sdgs.unecce.org/>). This work will support member States in making progress towards achieving Goals 5 and 17;

- (f) Promote up-to-date agricultural quality standards and explanatory guidelines through its normative work and promote awareness of food loss reduction through policy dialogues, partnerships with international organizations and technology-based initiatives to address food loss and waste to support the progress of member States towards achieving Goal 12;
- (g) Identify regulatory and procedural barriers to trade and assist Governments in setting action-oriented recommendations for implementing the instruments developed by the subprogramme through analytical evidence-based studies, to support member States in making progress towards achieving Goal 12;
- (h) Deepen its international policy dialogue, normative, technical assistance and capacity-building activities on the digitization of trade processes in order to support a sustainable and resilient recovery to support member States in making progress towards achieving Goals 8 and 9.

20.98 The above-mentioned work is expected to result in:

- (a) Increased implementation of simplified trade processes, and the digitization of member States' trading environments, leading to greater productivity;
- (b) Increased transparency and traceability of the value chains and reduction of waste, promoting sustainable consumption and production patterns;
- (c) Increased uptake of international standards by countries to enable the implementation of internationally harmonized regulatory processes;
- (d) Improved gender equality in trade through the increased participation of women traders;
- (e) Increased adoption of trade-related digital services, such as single window, to minimize COVID-19 transmission risks in ECE member States.

Programme performance in 2021

Increased access to trade-related information for micro-, small and medium-sized enterprises in Kyrgyzstan

- 20.99 Globally, more than 90 per cent of businesses are micro-, small and medium enterprises, but their participation in international trade is generally very low. According to ITC, micro-, small and medium-sized enterprises suffered the most from the COVID-19 pandemic, with 60 per cent of microenterprises and 57 per cent of small enterprises strongly affected, compared with 43 per cent of large firms. However, the adoption of digital technologies helped to contain reductions in revenue for a number of micro-, small and medium-sized enterprises. One of the factors that affect the lower rate of participation of such enterprises in international trade is lack of access to trade-related information, including a lower level of digitization.
- 20.100 Before the COVID-19 pandemic, the subprogramme, through the United Nations Centre for Trade Facilitation and Electronic Business, developed a white paper on integrated services for micro-, small and medium-sized enterprises in international trade ("ISMIT") – an integrated, end-to-end e-commerce trade services platform for micro-, small and medium-sized enterprises that want to trade across borders. This was followed by the adoption of an ECE recommendation on trade information portals. These websites allow importers and exporters to easily find, understand and comply with any legal requirements and procedures for clearing goods at the border. Putting the recommendation into practice, the subprogramme supported Kyrgyzstan in establishing a national trade information portal in collaboration with ITC.
- 20.101 Progress towards the objective is presented in the performance measure below (see table 20.12).

Table 20.12
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
White paper on integrated services for micro-, small and medium-sized enterprises in international trade (ISMIT) was developed	Recommendation on trade information portals was adopted	Kyrgyzstan established a national trade information portal

Planned results for 2023

Result 1: improved traceability in the garment sector

Programme performance in 2021 and target for 2023

- 20.102 The subprogramme’s work contributed to the implementation of the transparency and traceability system in 15 countries with 50 industry actors, which exceeded the planned target of the implementation of the transparency and traceability system by 3 countries.
- 20.103 The progress towards the objective and the target for 2023 are presented in the performance measure below (see table 20.13).

Table 20.13
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Development of the transparency and traceability system by ECE/United Nations/United Nations Centre for Trade Facilitation and Electronic Business experts and partners	Piloting of the transparency and traceability system in 5 countries and in partnership with 8 businesses	Implementation of the transparency and traceability system in 15 countries with 50 industry actors	Implementation of the transparency and traceability system in 3 additional countries	Implementation of the transparency and traceability system in 3 additional countries with 10 additional industry actors

Result 2: enhanced digitization of trade in Economic Commission for Europe member States

Programme performance in 2021 and target for 2023

- 20.104 The subprogramme’s work contributed to an average implementation rate of 76 per cent of digital trade facilitation measures of ECE member States, which exceeded the planned target of 71 per cent.³
- 20.105 The progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 20.XVI).

³ The performance measure for 2021 has been calculated based on data from 44 member States that participated in the Global Survey on Digital and Sustainable Trade Facilitation for 2021.

Figure 20.XVI
Performance measure: average implementation rate of digital trade facilitation measures of Economic Commission for Europe member States

(Percentage)

Result 3: increased facilitation of agricultural trade through the adoption of agricultural quality and electronic business standards in Economic Commission for Europe member States

Proposed programme plan for 2023

20.106 The agricultural quality standards and electronic business standards are two long-standing and interrelated instruments developed by the subprogramme. The agricultural quality standards are used as market access tools for traders. Electronic business standards include, for example, the electronic certificate standard, which allows the electronic exchange of export certificates for transparent and efficient trade transactions for agricultural products. Such standards may boost the uptake of concepts such as the circular economy and the sustainable use of natural resources and prevent food loss and waste, as they prescribe a minimum product quality and ensure transparent and efficient transactions. In line with decision B (69) of the sixty-ninth session of the Economic Commission for Europe, held in April 2021, the subprogramme will further realign its approach to integrate the promotion of the principles of the circular economy and the sustainable use of natural resources into its activities and deliverables.

Lessons learned and planned change

20.107 The lesson for the subprogramme was the need to leverage synergies among the cross-cutting themes, as well as contribute to the transition to the circular economy and the sustainable use of natural resources. In applying the lesson, the subprogramme will enhance the impact of its existing instruments by integrating cross-cutting themes such as the circular economy and the sustainable use of natural resources. For example, normative work will be supported by technical assistance and capacity-building to facilitate the implementation of electronic sanitary and phytosanitary certificates. The ECE Working Parties on Regulatory Cooperation and Standardization Policies and on Agricultural Quality Standards, as well as the United Nations Centre for Trade Facilitation and Electronic Business, will address cross-cutting themes in their normative work and capacity-building for implementation support.

20.108 The expected progress towards the objective is presented in the performance measure below (see figure 20.XVII).

Figure 20.XVII

Performance measure: number of Economic Commission for Europe member States fully or partially implementing the Commission's standard for "electronic application and issuance of electronic sanitary and phytosanitary certificates"^a (cumulative)

^a The data shown in figure 20.XVII has been taken from a question about the electronic application and issuance of sanitary and phytosanitary certificates in the United Nations Global Survey on Digital and Sustainable Trade Facilitation, which is undertaken biennially by the five United Nations regional commissions. The subprogramme will conduct the next Global Survey in 2023.

Deliverables

20.109 Table 20.14 lists all deliverables of the subprogramme.

Table 20.14

Subprogramme 6: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>

Seminars, workshops and training events (number of days)	18	17	18	14
13. Seminars for standardization and inspection agencies and other stakeholders in transition economies and developing countries in the ECE region or beyond on ECE agricultural quality standards	6	2	6	6
14. Seminars for policymakers and experts in transition economies and developing countries in the ECE region or beyond on support for the implementation of trade-related standards, recommendations and guidelines	9	13	9	6
15. Workshops for policymakers and experts in low- and middle-income countries in the ECE region on trade procedures, supply chain management, conformity assessment and market surveillance, and women's entrepreneurship	3	2	3	2
Publications (number of publications)	10	9	10	10
16. On ECE trade facilitation best practice and recommendations	1	2	1	–
17. On trade standards in the following areas: traceability and risk management; e-business; education; and sustainable development	1	1	1	1
18. On trade facilitation recommendations, standards and strategies	5	5	5	5
19. On agricultural trade and supply chains	1	–	1	–
20. On regulatory and procedural barriers to trade in a country to be decided	1	1	1	1
21. On risk-based inspections and disaster and sustainable development	1	–	1	–
22. On gender responsive standards	–	–	–	3
Technical materials (number of materials)	8	9	8	8
23. Standards and guidelines on agricultural quality	4	4	4	4
24. Training material on trade facilitation and electronic business	1	1	1	1
25. Material on trade standards	2	2	2	2
26. Guidelines on cross-border trade	1	2	1	1
Fact-finding, monitoring and investigating missions (number of missions)	–	–	–	3
27. Fact-finding missions on trade facilitation and electronic business, agricultural quality standards, regulatory cooperation and standardization, and regulatory and procedural barriers to trade	–	–	–	3
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services to government officials and other stakeholders in at least 10 ECE member States on trade facilitation and electronic business, agricultural quality standards, regulatory cooperation and standardization, and regulatory and procedural barriers to trade. Databases for e-business standards and codes.				
D. Communication deliverables				
Outreach programmes, special events and information materials: booklets, fact sheets and information brochures reaching at least 17 ECE programme countries and more than 1,000 public and private sector experts.				
External and media relations: press releases for the subprogramme for regional access, publication launching events and articles in external newsletters intended for government officials and experts working on trade.				
Digital platforms and multimedia content: subprogramme's website containing knowledge resources and instruments.				

Subprogramme 7 Forests and the forest industry

Objective

- 20.110 The objective, to which this subprogramme contributes, is to strengthen the sustainable management of forests and enhance the contribution of forests and forest products to sustainable development in the ECE region.

Strategy

- 20.111 The strategy of the subprogramme is based on the implementation of the core interlinked functions, namely, analytical and normative work, international policy dialogue, capacity-building and communication.
- 20.112 To contribute to the objective, the subprogramme will:
- (a) Promote cooperation among member States, regional entities and other partners for sustainable forest management, forest landscape restoration, the sustainable use of forest products and services, linkages between sustainable food systems and forests, and urban and peri-urban forestry;
 - (b) Collect, validate and disseminate information, research and analysis related to sustainable forest management and the sustainable production and consumption of wood products;
 - (c) Facilitate the exchange of national experiences and best practices and monitor progress on achieving sustainable forest management using indicators for Sustainable Development Goals 12 and 15, which will help member States measure progress towards achieving the Sustainable Development Goals and provide an indirect indication of progress under the United Nations strategic plan for forests 2017–2030;
 - (d) Organize capacity-building seminars and webinars and prepare dedicated publications on the forest sector, including on crisis response and on solutions for more resilient economies.
- 20.113 The subprogramme will carry out its work in partnership with FAO and other relevant organizations and processes (e.g. the International Union for Conservation of Nature, the World Agroforestry Centre and Forest Europe).
- 20.114 The above-mentioned work is expected to result in:
- (a) The ability of ECE member States to sustainably manage healthy forest ecosystems in order to provide important ecosystem goods and services to benefit society, including climate mitigation and adaptation;
 - (b) Increased and more efficient use by ECE member States of sustainable forest products that contribute to the circular economy and the sustainable use of natural resources, with increased use of renewable raw materials to replace less-sustainable alternatives;
 - (c) The integration of forest resources and products into planning and recovery from economic, health and environmental shocks, including COVID-19 recovery, to increase the resilience of member States and their most vulnerable segments of population, such as women, people with disabilities and youth.

Programme performance in 2021

Improved sustainability of urban forestry in 33 cities

- 20.115 In the light of urbanization, climate change and public health and other challenges, global recognition has emerged that green public spaces (see General Assembly resolution [71/256](#)) are

important components of more liveable, healthier and more resilient cities and towns. Green public spaces and urban ecosystems are also one of the focus areas of the United Nations Decade on Ecosystem Restoration. Sustainable urban forestry comprises the active management of trees and forests within and/or around cities to improve living conditions and sustain critical ecosystem services and nature-based solutions through long-term planning and management. Benefits include protection from extreme events such as floods, a reduction in heat islands, improved air quality, space for exercise and well-being and sustainable jobs.

20.116 The subprogramme has engaged city mayors mainly in the ECE region to commit to implementing sustainable urban forestry practices and tree-planting targets.

20.117 Progress towards the objective is presented in the performance measure below (see figure 20.XVIII).

Figure 20.XVIII

Performance measure: number of cities that made sustainable urban forestry pledges to the Economic Commission for Europe (cumulative)

Planned results for 2023

Result 1: political commitment for ecosystem restoration in Eastern and South-Eastern Europe

Programme performance in 2021 and target for 2023

20.118 The subprogramme’s work contributed to a cumulative total of 7 million hectares of commitments to ECCA30, which did not meet the planned target of 10 million hectares committed in 2021 under the Bonn Challenge in the Europe, Caucasus and Central Asia region. The target was not met because the ministerial meeting, originally planned for 2020, was postponed to 2021 as a result of the COVID-19 pandemic. The entire process was thus delayed by a year.

20.119 The progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 20.XIX).

Figure 20.XIX
Performance measure: commitments to ECCA30 (cumulative)

(Millions of hectares)

Result 2: increased access to forest product information to support evidence-led policymaking for the sustainable production and consumption of forest products

Programme performance in 2021 and target for 2023

20.120 The subprogramme’s work contributed to updated information on a cumulative total of 33 key forest product commodities, which exceeded the planned target of 31 wood-based commodities that are assessed with regard to their production, trade and consumption.

20.121 The progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 20.XX).

Figure 20.XX
Performance measure: number of wood-based commodities assessments available to member States with specific information regarding their production, trade and consumption (cumulative)

Result 3: enhanced accessibility and timeliness of sustainable forest management information and improved monitoring of the impact of increased wood use in a circular economy

Proposed programme plan for 2023

20.122 In the ECE region today, forests are managed sustainably, and many wood products are used, reused and recycled before being utilized in heat and power production at the final stage of their life cycle. The subprogramme has been working with member States on monitoring the sustainable use of wood resources for decades and has collected a wealth of regionally comparable data. Sustainably produced wood is expected to significantly contribute to the circular economy and the sustainable use of natural resources by reducing the greenhouse gas and environmental footprint of various

industries and activities. A strong surge in the demand for wood in the coming decades will likely increase the pressure on forests.

Lessons learned and planned change

- 20.123 The lesson for the subprogramme was that it needed to improve access to the wealth of data that has been systematically collected, which remained difficult. Data was dispersed over various online platforms and publications, was difficult to access and interpret, was not available in national languages and was often available only after significant delays. In applying the lesson, the subprogramme will promote its new tool that consolidates the collected data in an online platform, “INForest”. The platform presents information on forests and the forest-based sector in the ECE region, allowing decision makers to monitor market trends and policy measures related to the circular economy and the sustainable use of natural resources as well as climate change and trade restrictions, among other things. Its dashboards improve the accessibility and timeliness of information on sustainable forest management. The subprogramme will support member States in adapting the platform to their national needs and expand its use and content.
- 20.124 The expected progress towards the objective is presented in the performance measure below (see figure 20.XXI).

Figure 20.XXI
Performance measure: number of public users and number of views of up-to-date data on sustainable forest management from the INForest platform that is accessible to persons with disabilities (cumulative)

Deliverables

- 20.125 Table 20.15 lists all deliverables of the subprogramme.

Table 20.15
Subprogramme 7: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	24	28	16	24
1. Documentation for the Committee on Forests and the Forest Industry/European Forestry Commission	18	21	10	18
2. Documentation for the Joint ECE/FAO Working Party on Forest Statistics, Economics and Management	6	7	6	6

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
Substantive services for meetings (number of three-hour meetings)	32	25	22	24
Meetings of:				
3. The Committee on Forests and the Forest Industry/European Forestry Commission	16	8	6	8
4. The Bureau of the Committee on Forests and the Forest Industry	2	3	2	2
5. The Joint ECE/FAO Working Party on Forest Statistics, Economics and Management and of Teams of Specialists	14	14	14	14
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	15	15	15	12
6. Training events for policymakers, experts and relevant stakeholders from countries in the ECE region on topics related to the ECE/FAO integrated programme	15	15	15	12
Publications (number of publications)	7	7	7	7
7. <i>Forest Products Annual Market Review</i>	1	1	1	1
8. On sustainable forest management and forest products	6	6	6	6
C. Substantive deliverables				
Consultation, advice and advocacy: forest policy dialogues at the request of countries and support for forest policy issues, for up to 3 member States.				
Databases and substantive digital materials: ECE region databases on forest policies and institutions; forest products; production, consumption and trade, including prices; and wood energy for global access. ECE region databases on forest resources and forest ownership (hosted by the ECE Statistical Division).				
D. Communication deliverables				
Outreach programmes, special events and information materials: events celebrating the International Day of Forests; brochures and information materials on various forest-related topics; presentations at round tables and international forest-related events.				
External and media relations: press releases for the subprogramme; Forest Information Billboard newsletter for approximately 4,000 subscribers.				
Digital platforms and multimedia content: website of the subprogramme; social media accounts; videos on forest-related topics.				

Subprogramme 8 Housing, land management and population

Objective

- 20.126 The objective, to which this subprogramme contributes, is to strengthen member State-owned and city-level programmes and policies promoting decent, adequate, affordable, energy-efficient and healthy housing for all, smart sustainable cities, sustainable urban development and land management, and to advance evidence-based population and social cohesion policies.

Strategy

- 20.127 The subprogramme comprises two components: (a) housing and land management; and (b) population.
- 20.128 The strategy of the subprogramme is based on the implementation of the core interlinked functions, namely, international policy dialogue, normative work and capacity-building and the sharing of best practices and lessons learned in all areas of the subprogramme's work.
- 20.129 To contribute to the objective, the housing and land management component of the subprogramme will:

- (a) Support the national, regional and local governments of member States and other key stakeholders in the review of progress in achieving Sustainable Development Goals 3, 5, 7, 9, 11 and 12, and build their capacities for the implementation of measures to accelerate achieving the Goals through technical assistance projects, thematic studies, training sessions, the exchange of experiences and best practices and policy advice on: affordable climate-neutral and decent housing for all; housing finance; smart sustainable cities, digitization in cities and innovative financial mechanisms for cities; land administration and management, including informal settlements; and urban strategies and programmes that integrate climate change measures and promote the climate neutrality of buildings;
 - (b) Support local governments in the development of evidence-based policies on sustainable housing and urban development through the application of the ECE/International Telecommunication Union (ITU) key performance indicators on smart sustainable cities, indicators on urban economic resilience and a United Nations system-wide urban monitoring framework; and in the preparation of smart sustainable cities profiles and voluntary local reviews of the implementation of the Goals, based on the assessments of achievement of the Goals;
 - (c) Provide assistance to national Governments with the development of evidence-based urban and housing policies through the preparation of country profiles on urban development, housing and land management;
 - (d) Support the strengthening of the capacities of governments to design, implement and monitor urban economic resilience and post-COVID-19 recovery and rebuilding plans, and innovative financing instruments for their implementation, including plans that provide support to the most vulnerable segments of the population, especially those in informal settlements;
 - (e) Subject to a positive outcome of an evaluation of the first and second Forums of Mayors, organize the third Forum of Mayors to discuss the challenges for sustainable housing and urban development.
- 20.130 To contribute to the objective, the population component of the subprogramme will:
- (a) Continue to facilitate cooperation between member States, regional agencies and other partners;
 - (b) Support national and regional review and follow-up activities to assess progress in implementing the Madrid International Plan of Action on Ageing and its Regional Implementation Strategy by providing a platform for intergovernmental policy debate on matters related to mainstreaming ageing, and facilitate communication with a wider network of experts and non-governmental organizations;
 - (c) Coordinate data collection on active ageing indicators and policy-oriented research on ageing and intergenerational and gender relations to support evidence-based policymaking and the monitoring of the implementation of the Madrid International Plan of Action on Ageing and its Regional Implementation Strategy;
 - (d) Support the development of national capacities for policy formulation through policy seminars, policy briefs and the showcasing of good practices from member States;
 - (e) Assess lessons learned and strengthen the capacity of member States in terms of preparedness and emergency response to mitigate the risks for older persons, in particular older persons in vulnerable situations, and uphold their rights and dignity beyond the COVID-19 pandemic.
- 20.131 The above-mentioned work in the area of housing and land management is expected to result in:
- (a) Improved national and local policies for housing affordability, adequacy and accessibility for all; the energy efficiency and climate neutrality of buildings; and sustainable and resilient urban development;
 - (b) Increased capacity of national and local governments for the development of housing and urban development policies and programmes, which integrate the concepts of the 2030 Agenda, the

Geneva Charter on Sustainable Housing and the action plan entitled “Place and Life in the ECE – A Regional Action Plan 2030: Tackling challenges from the COVID-19 pandemic, climate and housing emergencies in the region, city, neighbourhood and homes”;

- (c) Improved understanding by city authorities of their socioeconomic development priorities through the preparation of smart sustainable cities profiles and voluntary local reviews of the implementation of the Sustainable Development Goals, based on the use of ECE/ITU key performance indicators for smart sustainable cities, urban economic resilience indicators and a United Nations system-wide urban monitoring framework;
- (d) Increased capacity of land administration authorities to develop national land administration and management systems, based on thematic studies and capacity-building activities in land administration and management;
- (e) More effective local urban development and housing policies and economic recovery plans related to COVID-19, in particular for the most vulnerable segments of the population living in informal settlements.

20.132 The above-mentioned work in the thematic area of population is expected to result in:

- (a) Demonstrated progress by member States in mainstreaming ageing across all policy fields and governance levels;
- (b) Enhanced capacities of member States with regard to designing and implementing integrated policies for active and healthy ageing;
- (c) Policy approaches adopted by member States that advance the rights and dignity of older persons and their contribution to a sustainable and inclusive society for all ages;
- (d) The design and implementation by member States of national and regional emergency responses, including to the COVID-19 pandemic, that include more prominent considerations for older persons.

Programme performance in 2021

Digital inclusion of older persons: stronger capacities to respond to population ageing in the digital era

20.133 Population ageing is a key global trend that has particular pertinence to the ECE region, where roughly one in six persons are over the age of 65 – a proportion that is expected to increase to one in four by 2050. The twenty-first century is also characterized by increasing digitization, which holds great promise for ageing populations, but also risks the exclusion of older persons, who tend to be less digitally connected. Accelerated digitization during the COVID-19 pandemic, and a growing number of basic services moving online, has further emphasized these inequalities. The subprogramme dedicated its 2021 Policy Brief and Policy Seminar on Ageing to the issue of ageing in the digital era and, through these outputs, it facilitated knowledge-building and policy dialogue among member States on suggested strategies to address the ageing-related challenges of digitization. These strategies included promoting equal access to digital services, enhancing digital skills and literacy and leveraging the potential of digital technologies for active and healthy ageing, with full respect for the human rights of older persons in the digital era.

20.134 Progress towards the objective is presented in the performance measure below (see table 20.16).

Table 20.16
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
Member States decided to focus on ageing in the digital era in the 2021 ECE Policy Brief on Ageing	Member States dedicated the 2021 ECE Policy Seminar on Ageing to the topic of ageing in the digital era	Member States increased their sharing of knowledge and strengthened their engagement through discussions on challenges and good practices related to ageing in the digital era

Planned results for 2023

Result 1: countries launch new guidelines on how to mainstream ageing to achieve a society for all ages

Programme performance in 2021 and target for 2023

- 20.135 The subprogramme’s work contributed to member States launching the implementation of guidelines on mainstreaming ageing, supported by a pilot toolkit that was developed by the subprogramme, which met the planned target.
- 20.136 The progress towards the objective and the target for 2023 are presented in the performance measure below (see table 20.17).

Table 20.17
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
The task force commenced its work on developing guidelines and piloted a stocktaking exercise on mainstreaming practices in several countries	Member States reviewed and adopted guidelines on mainstreaming ageing to benefit policymakers across the region	Member States launched the implementation of guidelines on mainstreaming ageing and supported the development of a toolkit	The guidelines-based online training programme contributes to setting up strategic frameworks for mainstreaming ageing in a number of ECE countries	Member States further develop strategic frameworks for mainstreaming ageing and/or apply mainstreaming ageing principles in policies

Result 2: Madrid International Plan of Action on Ageing beyond 2022: reaching a consensus on the goals and actions for healthy and active ageing in a sustainable world

Programme performance in 2021 and target for 2023

- 20.137 The subprogramme’s work contributed to member States holding national review and appraisal exercises of the Madrid International Plan of Action on Ageing and its Regional Implementation Strategy and submitting their national reports to the ECE secretariat, and to the Bureau of the Standing Working Group on Ageing preparing the first draft of a ministerial declaration for consultation with member States, which met the planned target.
- 20.138 The progress towards the objective and the target for 2023 are presented in the performance measure below (see table 20.18).

Table 20.18
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Member States decided on a tentative timeline for the fourth review and appraisal of the Madrid International Plan of Action on Ageing/Regional Implementation Strategy. The ECE Standing Working Group on Ageing tasked its Bureau with the development of guidelines for national reports	The Bureau issued the guidelines for national reports and launched the fourth review and appraisal exercise in the region A concept note for the 2022 Ministerial Conference on Ageing was discussed at the annual meeting of the Working Group	Member States held national review and appraisal exercises and submitted their national reports to the ECE secretariat The Bureau prepared a first draft of the ministerial declaration for consultation with the member States	Member States hold intergovernmental consultations on a draft ministerial declaration, to be submitted at the 2022 Ministerial Conference The 2022 Ministerial Conference to adopt by acclamation its outcome document outlining the goals and main actions for healthy and active ageing in 2023–2027 that safeguard the dignity and rights of older persons	The programme of work of the Standing Working Group for Ageing for 2023–2027, based on the priorities outlined in a declaration of the 2022 Ministerial Conference and the outcome of the global review of the Madrid International Plan of Action on Ageing in 2023, is developed and adopted by member States

Result 3: acceleration of the city-level implementation of the Sustainable Development Goals

Proposed programme plan for 2023

20.139 While the Sustainable Development Goals are a global framework used at the national level, their implementation relies heavily on cities and regions. The preparation of smart sustainable cities profiles and voluntary local reviews of the implementation of the Goals enables the localization of the Goals, ensures a more detailed and nuanced assessment of progress towards implementing the 2030 Agenda at the city level and supports building local capacities for achieving the Goals. The subprogramme assessed the experience of cities in the ECE region in the development of profiles and voluntary local reviews and their impact on urban sustainability. Based on the assessment, it elaborated regional guidelines for the development of voluntary local reviews and online training to support their implementation. Implementation of the guidelines will assist local and regional governments in the ECE region in the development of their voluntary local reviews and, through that, in promoting urban sustainability and resilience.

Lessons learned and planned change

20.140 The lesson for the subprogramme was that it needed to ground its work in solid evidence, local contexts, multilevel governance and partnerships and holistic approaches to urban development to further promote the use of smart cities profiles and/or voluntary local reviews so they become a tool to create long-term strategies for sustainable development, support regions and cities in addressing the socioeconomic impacts of the COVID-19 pandemic, and promote value creation, measurable opportunities and ecosystem-based solutions for the community, in order to leave no one behind. In applying the lesson, the subprogramme will support city governments in the development of profiles and voluntary local reviews based on rigorous data analysis, in cooperation with national governments and in partnership with other international organizations and financial institutions.

20.141 The expected progress towards the objective is presented in the performance measure below (see table 20.19).

Table 20.19
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
One smart sustainable cities profile (for Voznesensk, Ukraine) using evidence-based approaches developed	One smart sustainable cities profile (for Nur-Sultan, Kazakhstan) using evidence-based approaches developed	Two smart sustainable cities profiles (for Hrodna, Belarus, and Bishkek, Kyrgyzstan) using evidence-based approaches developed	Three additional smart sustainable cities profiles and voluntary local reviews using evidence-based approaches developed	Four additional smart sustainable cities profiles and voluntary local reviews using evidence-based approaches developed

Deliverables

20.142 Table 20.20 lists all deliverables of the subprogramme.

Table 20.20
Subprogramme 8: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	24	24	16	25
Documentation for:				
1. The Committee on Urban Development, Housing and Land Management	12	12	10	11
2. The Working Party on Land Administration	7	7	–	7
3. The Standing Working Group on Ageing	5	5	4	5
4. The Ministerial Conference on Ageing	–	–	2	–
5. The regional conference on population and development issues	–	–	–	2
Substantive services for meetings (number of three-hour meetings)	29	38	31	37
Meetings of:				
6. The Committee on Urban Development, Housing and Land Management and its Bureau	12	17	14	14
7. The Working Party on Land Administration and its Bureau	10	10	6	10
8. The Standing Working Group on Ageing and its Bureau	7	11	7	9
9. The Ministerial Conference on Ageing	–	–	4	–
10. The regional conference on population and development issues	–	–	–	4
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	1	1	2
11. Country profiles on housing, land administration and spatial planning	1	–	1	1
12. Road map for mainstreaming ageing project for a specific country	1	1	–	1
Seminars, workshops and training events (number of days)	6	12	5	10
13. Workshops, seminars and training courses for policymakers and/or experts in the ECE region on housing and land administration (including real estate) and spatial planning	4	7	4	8
14. Workshops and policy seminars on population ageing issues for policymakers, experts, practitioners and other stakeholders in countries of the ECE region	2	5	1	2

Section 20 Economic development in Europe

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
Publications (number of publications)	7	6	6	6
15. On housing and land management	3	4	4	4
16. On population	4	2	2	2
Technical materials (number of materials)	3	5	1	4
17. Technical guidelines on housing and land management	2	2	1	2
18. Guidelines on mainstreaming ageing	1	1	–	–
19. Toolkit and training course material on mainstreaming ageing	–	2	–	2
Fact-finding, monitoring and investigation missions (number of missions)	–	1	–	2
20. Fact-finding missions for government officials and other stakeholders to develop national capacities in designing and implementing ageing-related policies and programmes	–	–	–	1
21. Fact-finding missions for policymakers in preparation for and follow-up to the country profiles on housing, land administration and spatial planning	–	1	–	1

C. Substantive deliverables

Consultation, advice and advocacy: Generations and Gender Programme advocacy for national survey coordinators; advisory services for policymakers in up to 4 member States in preparation for and follow-up to the country profiles on housing, land administration and spatial planning; advisory services for government officials and other stakeholders to develop national capacities in designing and implementing ageing-related policies and programmes.

Databases and substantive digital materials: active ageing indicators data set for global access.

D. Communication deliverables

Outreach programmes, special events and information materials: booklets/fact sheets of the Committee on Urban Development, Housing and Land Management and the Working Party on Land Administration; booklet of the Standing Working Group on Ageing and ageing-related side events for various stakeholders.

External and media relations: press releases related to housing, land management and population activities.

Digital platforms and multimedia content: websites related to housing, land management and population activities for global and regional access; Active Ageing Index wiki.

B. Proposed post and non-post resource requirements for 2023

Overview

20.143 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 20.21 to 20.23.

Table 20.21

Overall: evolution of financial resources by object of expenditure

20.144 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 20.24 to 20.26 and figure 20.XXII.

20.145 As reflected in tables 20.24 (1) and 20.25 (1), the overall resources proposed for 2023 amount to \$35,545,800 before recosting, reflecting a net increase of \$36,700 (or 0.1 per cent) compared with the appropriation for 2022. Resource changes result from new and expanded mandates related to the seventieth session of the Commission, to be held in 2023, as further detailed in paragraph 20.146. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

New and expanded mandates

20.146 As reflected in table 20.24 (1), resource changes reflect an increase of \$36,700, as follows:

Executive direction and management. An increase of \$36,700 in biennially recurrent requirements relates to the holding of the seventieth session of the Commission, in 2023, in accordance with General Assembly resolution [62/225](#) and paragraph 9 of annex I to Economic and Social Council resolution 2006/38. The sessions of the Commission are held on a biennial

basis. ECE has decided on the cross-cutting theme “Digital and green transformations for sustainable development in the ECE region” for the high-level segment of the session. In line with the expectations and resource requirements for previous sessions, additional amounts are proposed under experts (\$18,300), for the travel of subject matter experts, and consultants (\$18,400), to fund the related consultancy capacity to prepare analytical reference materials, including a review of relevant trends in the ECE region.

Other changes

- 20.147 As reflected in table 20.24 (1), the net effect of the proposed changes is cost-neutral. The breakdown of changes is as follows:
- (a) **Executive direction and management.** The net increase in requirements of \$205,500 under posts reflects the inward redeployment of one post of Management and Programme Analyst (P-4), as explained in annex III;
 - (b) **Programme support.** The net decrease in requirements of \$205,500 under posts reflects the outward redeployment of one post of Management and Programme Analyst (P-4), as explained in annex III.

Extrabudgetary resources

- 20.148 As reflected in tables 20.24 (2) and 20.25 (2), ECE expects to continue to receive cash contributions, which would complement regular budget resources. In 2023, extrabudgetary resources are estimated at \$24,455,200 and would provide for 55 posts, as presented in table 20.25 (2).
- 20.149 The resources will be used to deliver technical cooperation projects and activities approved by ECE governing bodies. Extrabudgetary resources represent 40.8 per cent of the total resources for ECE.
- 20.150 The extrabudgetary resources under this section are subject to the oversight of the Executive Committee of ECE and the governing bodies of the conventions.

Policymaking organs

- 20.151 The governance structure of ECE was revised in accordance with the workplan on ECE reform adopted by the General Assembly in its resolution [60/248](#) and the outcome of the review of the 2005 reform of ECE adopted by the Economic and Social Council in its resolution [2013/1](#). The Commission reports to the Council and provides strategic direction to the work of the ECE secretariat. It serves as a regional platform for high-level policy dialogue on sustainable development in the region. It meets biennially for up to three working days. In the intersessional period, the Executive Committee is entrusted with the implementation of the overall policy set by the Commission. It meets as often as necessary to perform its oversight role with regard to programme planning and administrative and budgetary issues, including extrabudgetary funding. It reviews and approves the programmes of work and subsidiary structures of the sectoral committees, thus ensuring coherence and coordination among subprogrammes.
- 20.152 The following eight sectoral committees act as subsidiary bodies of the Commission and as governing bodies for the eight subprogrammes: the Committee of Environmental Policy (subprogramme 1); the Inland Transport Committee (subprogramme 2); the Conference of European Statisticians (subprogramme 3); the Committee on Innovation, Competitiveness and Public-Private Partnerships (subprogramme 4); the Committee on Sustainable Energy (subprogramme 5); the Steering Committee on Trade Capacity and Standards (subprogramme 6); the Committee on Forests and the Forest Industry (subprogramme 7); and the Committee on Urban Development, Housing and Land Management (subprogramme 8). These bodies meet for two to three days annually to provide guidance to ECE on work relating to their sectors. No resources are proposed for 2023 under the regular budget for those bodies.

Executive direction and management

- 20.153 The executive direction and management component comprises the Office of the Executive Secretary, the Sustainable Development Unit and the Information Unit. It also includes the Programme Management Unit, which falls under the Programme Management and Support Services Division.
- 20.154 The overall responsibilities of the executive direction and management component include the following functions:
- (a) To contribute to and facilitate debate among member States on the strategic direction of ECE and to develop a forward-looking strategy for adjusting ECE activities to respond to emerging and foreseeable priorities of its member States;
 - (b) To foster relationships with member Governments and keep abreast of the needs of ECE member States;
 - (c) To coordinate the planning and ensure the implementation of the ECE programme of work, to provide guidance and direction for the work of the secretariat and to promote transparency and interdivisional cooperation;
 - (d) To service meetings of ECE and its Executive Committee, including the preparation of relevant documentation, to ensure follow-up to their decisions and to serve as an interface between the Committee and the bureaux of the sectoral committees;
 - (e) To ensure efficient and inclusive processes for the monitoring and evaluation of the work of the subprogrammes, including the biennial evaluations of subprogramme performance by sectoral committees, and to promote the application of evaluation findings to the work of the subprogrammes;
 - (f) To monitor and promote the evaluation of the technical cooperation activities carried out in the ECE divisions, and to coordinate multisectoral/intersectoral technical cooperation activities within the ECE mandate, including those developed within subregional frameworks;
 - (g) To undertake regional policy reviews relating to major cross-sectoral issues, in particular sustainable development, gender equality and the empowerment of women, the 2030 Agenda for Sustainable Development and the Sustainable Development Goals;
 - (h) To ensure the implementation of the resolutions and decisions of the General Assembly and the Economic and Social Council that are relevant to the work of ECE, including the regional follow-up to United Nations major outcomes and conferences, in accordance with the Commission's role as a regional outpost of the United Nations, pursuant to Economic and Social Council resolution 1998/46;
 - (i) To provide clearance for ECE publications and key documents prepared for the sectoral committees and other subsidiary bodies of the Commission;
 - (j) To contribute to increasing the visibility of ECE and to raising the awareness and use of ECE products through the dissemination of information about its activities;
 - (k) To contribute, in close cooperation with the other regional commissions, to the United Nations reform implementation, in particular in relation to improving system-wide coherence in United Nations development work;
 - (l) To cooperate and coordinate with other United Nations entities active in the ECE region, in particular within the framework of the Regional Collaborative Platform for Europe and Central Asia;
 - (m) To promote synergies between the ECE technical cooperation activities and the work of other United Nations system entities, in particular through the resident coordinator system at the country level and the United Nations Development Group for Europe and Central Asia at the regional level;

- (n) To contribute to relevant reports of the Secretary-General for the General Assembly, the Economic and Social Council and other bodies and to provide other input requested by Headquarters;
 - (o) To foster and mainstream a gender perspective and disability inclusion in ECE subprogrammes;
 - (p) To ensure effective financial, human, and information and communications technology resources management, as well as the implementation of recommendations of oversight bodies and internal controls.
- 20.155 The Office of the Executive Secretary, which includes the Executive Secretary, the Deputy Executive Secretary and the Secretary of the Commission, has the overall responsibility for providing policy guidance and leadership in the ECE secretariat, including the coordination of the work of the Commission; overseeing and developing relations with Governments; coordination with the United Nations Secretariat; reporting to the General Assembly and the Economic and Social Council; overseeing and developing relations with other United Nations entities and with non-United Nations organizations, civil society and NGOs; and mainstreaming a gender perspective across all subprogrammes through the development and implementation of the ECE gender policy and action plan and the gender parity strategy.
- 20.156 The Programme Management Unit, under the Programme Management and Support Services Division, provides guidance and ensures overall coordination of ECE programme management (planning, monitoring, reporting and evaluation). The Unit also promotes synergies between the normative and operational work of ECE, provides guidance and ensures overall coordination of technical cooperation, and serves as the secretariat of the Working Group on Technical Cooperation. The Unit coordinates with other regional commissions and United Nations entities on programmatic and technical cooperation issues in support of the resident coordinator system countries within the ECE region.
- 20.157 The Sustainable Development Unit provides policy advice, analysis and advocacy on cross-cutting issues relating to the implementation of, follow-up on and review of the 2030 Agenda for Sustainable Development, in partnership with other United Nations entities and stakeholders, as relevant. The Unit convenes the annual Regional Forum on Sustainable Development for the ECE region, in cooperation with the entities of the regional United Nations system, providing the regional contribution to the global follow-up on and review of the 2030 Agenda. It plays a leading role in carrying out the functions of the regional collaborative platform, which gathers the heads of the regional offices for Europe and Central Asia of the United Nations entities. It oversees cross-sectoral activities related to the Sustainable Development Goals that are in the focus of ECE work. It provides contributions to the preparation of and the follow-up on United Nations global conferences and summits and to various reports of the Secretary-General to the Economic and Social Council and the General Assembly on economic, social and environmental issues. The Unit leads the internal work on the alignment of ECE activities with the Sustainable Development Goals through a cross-cutting approach.
- 20.158 The Information Unit is responsible for implementing the ECE information strategy aimed at raising awareness and mobilizing support for the work of ECE. The Unit promotes the image of the Commission by managing the corporate sections of its website and ensuring its overall coherence, as well as by designing and producing promotional material on ECE activities. The Unit manages ECE relations with the media, ensures the Commission's presence on social media and provides related monitoring and analysis. It advises the Executive Secretary, senior managers and the staff of ECE on outreach and advocacy.
- 20.159 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), ECE is integrating environmental management practices into its operations. ECE takes into account lessons learned in the leveraging of communications technology, allowing for remote participation wherever possible.

Part V Regional cooperation for development

20.160 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 20.27. The compliance rate of 94 per cent relates to the timely submission of documentation related to ECE meetings organized through the United Nations Office at Geneva Division of Conference Management in 2021. The compliance rate of 51 per cent for air tickets purchased at least two weeks before the commencement of travel relates to all travel requests, including of staff, participants, experts and consultants, processed by ECE in 2021 through the United Nations Office at Geneva Travel and Logistics Unit. While the ECE compliance rate in 2021 increased compared with 2020, the compliance rate continues to be impacted by uncertainty around travel and related restrictions imposed as a result of the COVID-19 pandemic. ECE expects its compliance rate to improve with the easing of travel restrictions, which should bring about more predictable conditions, and will continue to work closely with the Travel and Logistics Unit to reinforce the need for early planning of meetings and conferences requiring air travel.

Air tickets purchased at least 2 weeks before the commencement of travel	73	44	51	100	100

20.161 The proposed regular budget resources for 2023 amount to \$4,683,300 and reflect an increase of \$242,200 compared with the appropriation for 2022. The proposed increase is explained in paragraphs 20.146 and 20.147 (a). Additional details on the distribution of the proposed resources for 2023 are reflected in table 20.28 and figure 20.XXIII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

20.162 Extrabudgetary resources for executive direction and management are estimated at \$2,498,700. These resources relate to the secretariats of the United Nations Road Safety Trust Fund and the Special Envoy for Road Safety and will provide for seven posts (1 P-5, 2 P-4, 2 P-3 and 2 General Service (Other level)), as well as non-post resources in support of the management of both secretariats. The resources would provide for resource mobilization activities for the Trust Fund, along with support for the implementation of high-impact projects to increase road safety. The expected increase of \$82,900 is attributable mainly to increased requirements and expected contributions for travel, meetings and technical assistance workshops for existing projects.

Programme of work

**Subprogramme 1
 Environment**

20.163 The proposed regular budget resources for 2023 amount to \$5,629,000 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 20.29 and figure 20.XXIV.

Extrabudgetary resources

20.164 Extrabudgetary resources for the subprogramme are estimated at \$13,200,100 and would provide for 29 posts (1 P-5, 1 P-4, 18 P-3, 2 P-2 and 7 General Service (Other level)), as well as non-post resources. The resources would be used mainly to support the implementation of the ECE multilateral environmental agreements and the ECE policy tools, which include the Environmental Performance Reviews Programme, the Environmental Monitoring and Assessment Programme, the Strategy for Education for Sustainable Development and technical assistance programmes under the ECE multilateral environmental agreements, through international policy dialogue, normative work, capacity-building and the dissemination of good practices and lessons learned. The expected increase of \$476,600 is attributable mainly to increased requirements and related contributions for travel,

meetings and technical assistance workshops for existing projects, as well as the addition of one P-5 post.

Subprogramme 2 Transport

20.165 The proposed regular budget resources for 2023 amount to \$6,727,200 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 20.30 and figure 20.XXV.

Extrabudgetary resources

20.166 Extrabudgetary resources for the subprogramme are estimated at \$2,508,700 and would provide for eight posts (3 P-4, 2 P-3, 1 P-2 and 2 General Service (Other level)), as well as non-post resources. The resources would be used mainly to support the implementation and computerization of the TIR Convention and the implementation of the Trans-European North-South Motorway and the Trans-European Railway projects and projects in the areas of sustainable transport and mobility solutions and the adaptation of transport systems to climate change. The expected increase of \$139,800 is attributable mainly to increased requirements and expected contributions for travel, meetings and technical assistance workshops for existing projects.

**Subprogramme 3
Statistics**

20.167 The proposed regular budget resources for 2023 amount to \$4,780,200 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 20.31 and figure 20.XXVI.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

20.168 Extrabudgetary resources for the subprogramme are estimated at \$350,000 and would provide for non-post resources. The resources will support projects in the areas of strengthening the statistical capacity of member States to provide high-quality statistics and indicators to monitor progress towards achieving the Sustainable Development Goals and enhancing the coherence and integration of economic and social statistics in support of the implementation of 2008 System of National Accounts. The expected increase of \$141,900 is attributable mainly to increased requirements and expected contributions for travel, meetings and technical assistance workshops for existing projects.

**Subprogramme 4
Economic cooperation and integration**

20.169 The proposed regular budget resources for 2023 amount to \$2,074,000 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 20.32 and figure 20.XXVII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

20.170 Extrabudgetary resources for the subprogramme are estimated at \$1,278,300 and would provide for one post (1 P-3), as well as non-post resources. The resources would be used mainly to provide support for technical cooperation projects on the implementation of ECE innovation policies, development innovation for sustainable development reviews and the implementation of the standards on people-first public-private partnerships for the Sustainable Development Goals. The expected increase of \$146,300 in 2023 is attributable mainly to increased requirements and expected contributions for travel, meetings and technical assistance workshops for existing projects.

**Subprogramme 5
Sustainable energy**

20.171 The proposed regular budget resources for 2023 amount to \$2,180,200 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 20.33 and figure 20.XXVIII.

Extrabudgetary resources

20.172 Extrabudgetary resources for the subprogramme are estimated at \$1,360,200 and would provide for two posts (1 P-4 and 1 P-3), as well as non-post resources. The resources would be used mainly to enable further development and implementation of the United Nations Framework Classification for Resources and the United Nations Resource Management System, which allow for dynamic resource management, in line with the 2030 Agenda for Sustainable Development, and will provide for technical cooperation projects on sustainable resource management, accelerating transformations of the energy sector, and carbon neutrality and sustainable hydrogen production in the ECE region. The expected increase of \$217,800 is attributable mainly to increased requirements and expected contributions for travel, meetings and technical assistance workshops for existing projects.

**Subprogramme 6
Trade**

20.173 The proposed regular budget resources for 2023 amount to \$3,588,100 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 20.34 and figure 20.XXVIX.

Extrabudgetary resources

20.174 Extrabudgetary resources for the subprogramme are estimated at \$794,300 and would provide for one post (1 P-4), as well as non-post resources. The resources would be used mainly to support

technical cooperation projects, advocacy, evidence-based studies to identify regulatory and procedural barriers to trade and technical cooperation projects in the areas of trade facilitation, sustainable value chains and promotion of the use of standards for sustainable development. The expected decrease of \$57,900 is attributable mainly to the abolishment of one General Service (Other level) post.

Subprogramme 7 Forests and the forest industry

20.175 The proposed regular budget resources for 2023 amount to \$1,498,300 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 20.35 and figure 20.XXX.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

20.176 Extrabudgetary resources for the subprogramme are estimated at \$181,600 and would provide for non-post resources. The resources would be used mainly to support research, analysis and the dissemination of information related to sustainable forest management, the sustainable production and consumption of forest products and technical cooperation projects on sustainable forest management. The expected decrease of \$137,100 is attributable mainly to projects reaching completion in 2022.

**Subprogramme 8
Housing, land management and populations**

20.177 The proposed regular budget resources for 2023 amount to \$1,174,700 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 20.36 and figure 20.XXXI.

Subprogramme 8: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

20.178 Extrabudgetary resources for the subprogramme are estimated at \$436,700 and would provide for non-post resources. The resources would be used mainly for supporting the projects on the development of smart sustainable city profiles and voluntary local reviews and supporting the implementation of the programme of work related to housing and land management, as well as population ageing. The expected decrease of \$141,400 is attributable mainly to projects reaching completion in 2022.

Programme support

20.179 The Programme Management and Support Services Division is comprised of the Office of the Director, the Programme Management Unit under executive direction and management, the General Administration Unit, the Budget and Finance Management Unit, the Human Resources Management Unit and the Information Systems Unit. All units liaise with Headquarters and the United Nations Office at Geneva, the designated service provider for ECE, in the delivery of their work.

20.180 The overall responsibilities of the Programme Management and Support Services Division include the following functions:

- (a) The Office of the Director, which manages all aspects of programme planning, oversight and administration;
- (b) The Programme Management Unit under executive direction and management is explained in paragraph 20.156 above;
- (c) The General Administration Unit, which is responsible for the coordination, management and provision of general administrative services, including the coordination, drafting and promulgation of all administrative policies; travel management; enterprise application coordination and management (including Umoja); office space management; property management oversight and control; and the organization of procurement activities;
- (d) The Budget and Finance Management Unit, which is responsible for all aspects of financial and budgetary management, including financial processing and reporting and the provision of guidance to programme managers; management of the ECE grants programme; preparation of the statement of internal control; and management of the financial delegation of authority under ECE;
- (e) The Human Resources Management Unit, which is responsible for human resources management, including staff recruitment, workforce planning and proactive talent management; staff performance management; management of the ECE intern programme; management of consultants and individual contractors; staff welfare; management of time and attendance and flexible working arrangements; and the implementation of the ECE gender parity and geographical representation policies. The Unit is also responsible for all matters related to the administration of justice system in the Secretariat;
- (f) The Information Systems Unit, which is responsible for the coordination, management and support of all ICT services in support of the effective delivery of the ECE programme of work. The Unit provides advisory services to the management of ICT projects and ensures that appropriate ICT solutions are delivered to the ECE subprogrammes. The Unit coordinates with the United Nations Office at Geneva, which is the service provider to ECE for all personal computing services, including desktop management, data hosting and storage, and videoconferencing. The Unit ensures compliance with the policies, governance and cybersecurity requirements of the Office of Information and Communications Technology across ECE.

20.181 The proposed regular budget resources for 2023 amount to \$3,210,800 and reflect a decrease of \$205,500 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 20.147 (b). Additional details on the distribution of the proposed resources for 2023 are reflected in table 20.37 and figure 20.XXXII.

Extrabudgetary resources

20.182 Extrabudgetary resources for programme support are estimated at \$1,846,600 and would provide for 7 posts (1 D-1, 2 P-4, 1 P-2 and 3 General Service (Other level)), as well as non-post resources. The resources would be used mainly to provide support in the areas of budget, finance, human resources, general administration and ICT. In addition, these resources would further strengthen the functions related to strategy, programme management, oversight, evaluation, enterprise risk management, coordination of ECE technical cooperation programmes and support for the resident coordinator countries. The expected resource level reflects no change compared with the estimates for 2022.

^a Redeployment.

Annex II

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

**Office of Internal Oversight Services
Audit of the management of trust funds at the
Economic Commission for Europe
Report No. 2018/084**

The Office of Internal Oversight Services (OIOS) recommended that ECE: (a) develop a catalogue of technical cooperation services based on available technical expertise; and (b) institute a project intake process to ensure that projects fall within the available expertise to further enhance the effectiveness of its technical cooperation activities (para. 6).

Status: Implemented, pending review by the Office of Internal Oversight Services

The ECE Technical Cooperation Strategy was revised and adopted by the Executive Committee on 17 May 2021.

In February 2022, the Executive Secretary approved a revised directive No. 22 clarifying the management of resources funded from section 23, Regular programme of technical cooperation, of the programme budget. The directive is applicable as from 1 March 2022.

ECE directive No. 18 clarifies the management of extrabudgetary funds. The directive, along with the ECE Technical Cooperation Strategy and directive will frame technical cooperation activities and project intake processes for future years. They are also complemented by the resource mobilization strategy adopted in 2020 and the resource mobilization plans for the period 2020–2022, presented to the Executive Committee in January 2021.

**Audit of mainstreaming of Sustainable Development Goals and COVID-19 response into the programme of work of the Economic Commission for Europe
Report No. 2021/048**

OIOS recommended that ECE prepare an action plan for the review and endorsement of nexus publications by relevant subprogrammes, sectoral committees and the Executive Committee to enable timely tracking and monitoring of the implementation of recommendations related to the achievement of the Sustainable Development Goals (para. 1).

Status: Implementation of this recommendation is in progress, with a target completion date of 31 December 2022

The relevant recommendations from the nexus publications have been put on the agendas and communicated to the following ECE expert groups discussing issues related to the Sustainable Development Goals: (a) the Joint Task Force on Environmental Statistics and Indicators; (b) the Expert Meeting on Statistics for Sustainable Development Goals; (c) the Working Party on Transport Statistics; and (d) the Joint FAO/ECE Working Party on Forest Statistics, Economics and Management.

The Joint Task Force on Environmental Statistics and Indicators, at its eighteenth session, on 18 and

Brief description of the recommendation

Action taken to implement the recommendation

19 October 2021, took note of the information and recommendations presented in the nexus report *Measuring and Monitoring Progress Towards the Sustainable Development Goals* and encouraged its members to review and possibly apply the recommendations of the report nationally (see ECE/CEP-CES/GE.1/2021/2, para. 27(h)).

The sixth Expert Meeting on Statistics for Sustainable Development Goals will be held on 5 and 6 May 2022.

The seventy-third session of the Working Party on Transport Statistics will be held from 15 to 17 June 2022.

The forty-third session of the Joint FAO/ECE Working Party on Forest Statistics, Economics and Management will be held from 1 to 3 June 2022.

Annex III

Summary of proposed changes in established and temporary posts, by component and subprogramme

	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Programme support	(1)	P-4	Redeployment of 1 post of Management and Programme Analyst (P-4) to executive direction and management	The redeployment is proposed to consolidate within the Programme Management Unit of the Programme Management and Support Services Division the overall coordination of ECE programme management, including planning, monitoring, reporting and evaluation, as approved by the General Assembly in its resolution 72/261
Executive direction and management	1	P-4	Redeployment of 1 post of Management and Programme Analyst (P-4) from programme support	See reason for change given under programme support
Executive direction and management	–	P-5	Redeployment of 1 post of Senior Social Affairs Officer and Gender Focal Point (P-5) from the Sustainable Development Unit to the Office of the Executive Secretary within executive direction and management	The incumbent will report directly to the Executive Secretary to enhance the coherence of mainstreaming a gender perspective across all subprogrammes and to accelerate the efforts of ECE to advance the agenda for achieving gender equality and the empowerment of women

*** In keeping with paragraph 11 of resolution [72/266 A](#), the part consisting of the post and non-post resource requirements is submitted through the Advisory Committee on Administrative and Budgetary Questions for the consideration of the General Assembly.

Foreword

As an organization fully committed to the development of the countries of Latin America and the Caribbean and using its capacity as a leading think tank of the United Nations Secretariat, the Economic Commission for Latin America and the Caribbean (ECLAC) will continue to support member States in the implementation of the 2030 Agenda for Sustainable Development and the attainment of the Sustainable Development Goals.

The Commission will continue to perform its convening role by providing intergovernmental platforms for policy dialogue, consensus-building, peer learning and normative discussions, combining face-to-face activities with virtual modalities. It will continue to provide policy advice, operational support and technical cooperation, responding to the demands of member States, to implement capacity development activities at the regional, subregional and national levels.

ECLAC will continue to perform its role as a universal and impartial forum to foster public policy debate, the exchange of best practices and the promotion of regional positions in global forums, as well as in regional and interregional high-level meetings and summits of heads of State and government.

The Caribbean region will continue to be a priority for the Commission. The “Caribbean first” strategy demonstrates the Commission’s commitment to support the agenda for the small island developing States within the context of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the overarching 2030 Agenda. Furthermore, ECLAC will continue to give a voice to the only least developed country as well as to the landlocked developing countries in the region.

Finally, I would like to express my deepest gratitude to ECLAC member States for their continuous support and trust in the work of the Commission.

(Signed) Alicia **Barcena**
Executive Secretary
Economic Commission for Latin America and the Caribbean

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 21.1 The Economic Commission for Latin America and the Caribbean (ECLAC) is responsible for promoting the economic, social and environmentally sustainable development of the Latin American and Caribbean countries through international cooperation and by undertaking applied research and evidence-based comparative analysis of development processes and providing normative as well as operational capacity development, technical cooperation and advisory services. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, as well as Economic and Social Council resolution 106 (VI), by which the Council established the Commission for the purpose of contributing to, and coordinating action towards, the economic and social development of the region and reinforcing economic relationships among the countries of Latin America and the Caribbean and with other regions of the world. In 1996, pursuant to its resolution 553 (XXVI), the Commission decided, inter alia, that it was to collaborate with member States in the comprehensive analysis of development processes geared towards the design, monitoring and evaluation of public policies and the resulting provision of operational services in the fields of specialized information, advisory services, training and support for regional and international cooperation and coordination. The Commission also supports the capacity development of Governments in formulating and implementing policies for sustainable development through the implementation of the regular programme for technical cooperation and Development Account projects.

Strategy and external factors for 2023

- 21.2 Latin America and the Caribbean is the developing region that has been hit the hardest by the coronavirus disease (COVID-19) pandemic.¹ The impact of this crisis is equivalent to losing a decade of progress in the region and has exposed the prevailing economic model's structural problems as well as the weakness of social protection systems and welfare schemes. Women have been affected the most, with a massive exit from the labour market owing to the loss of jobs in key service sectors and the relocation to the care economy.
- 21.3 The region must rethink its development model to leave no one behind and avoid a dramatic regression from achieving the 2030 Agenda for Sustainable Development and the Sustainable Development Goals. In that vein, ECLAC formulated a comprehensive proposal, which was endorsed by its constituency at the thirty-eighth session of the Commission. The proposal, contained in the document *Building a New Future: Transformative Recovery with Equality and Sustainability*, calls for a profound transformation of the production and consumption patterns through a big sustainability push aligned with the 2030 Agenda spearheaded by public and private investments in key industrial sectors to attain the energy transition, sustainable mobility, the circular economy, digital inclusion, and the conservation and restoration of nature and ecosystems in delivering climate adaptation and mitigation, among other viable business alternatives.
- 21.4 The current proposed programme budget for 2023 is structured around 13 interdependent and complementary subprogrammes to be implemented with a multidisciplinary and integrated approach while mainstreaming a gender perspective. The proposal is also aimed at being responsive to the priorities, policy needs and emerging challenges of member States against a backdrop characterized by distress and uncertainties.

¹ *Social Panorama of Latin America, 2021* (United Nations publication, 2022).

- 21.5 For 2023, the Commission's planned deliverables will support member States in their ongoing management of and recovery from the COVID-19 pandemic. Such planned deliverables and activities include publications and workshops to support member States in the identification of economic sectors that have the potential to foster the recovery from the pandemic (subprogramme 1), policy advice on innovative financing instruments and macroeconomic analysis and policies to achieve a sustainable and transformative socioeconomic recovery (subprogramme 3) and the provision of technical cooperation support to develop sustainable development strategies (subprogramme 8), as well as advisory services to foster productive diversification and economic restructuring in the wake of the pandemic (subprogramme 12).
- 21.6 Reflecting the importance of continuous improvement and responding to the needs and requests of member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.
- 21.7 The Commission will work closely with the Governments in the region and other stakeholders, such as the business community, civil society, academic circles and universities, to reinforce linkages between national experiences and regional perspectives, foster data comparability and the exchange of good practices and provide effective technical cooperation services on transboundary issues. It will emphasize analytical, normative, advocacy and capacity-building work to strengthen the design of sustainable development strategies and public policies and to facilitate the continuous follow-up and review of progress towards achieving the Sustainable Development Goals and the implementation of the 2030 Agenda. Operational services in the areas of specialized information, technical cooperation and training activities will strengthen networking and the sharing of good practices at the subregional, regional and interregional levels, including South-South cooperation modalities.
- 21.8 ECLAC will continue to offer its value proposition to member States by combining its three main functions: the think tank and thought leadership role in performing analytical, normative and knowledge management work; the convening capacity through its intergovernmental platforms and subsidiary bodies; and the operational role by providing technical cooperation, advisory and capacity development services and peer learning, anchored in rigorous data and evidence-based analysis and understanding of the realities of the region. The Commission will continue to foster a multisectoral and integrated approach to development and give a voice to countries in special situations, including the single least developed country in the region, the landlocked developing countries, the small island developing States of the Caribbean and the middle-income countries, which make up the majority of the region albeit with great heterogeneity. The Commission will continue to provide integrated and comprehensive follow-up to global summits from a regional perspective, coordinating the region's approach to the implementation of the 2030 Agenda. In 2023, the Commission will convene the sixth meeting of the Forum of the Countries of Latin America and the Caribbean on Sustainable Development, which will report directly to the high-level political forum on sustainable development convened under the auspices of the Economic and Social Council.
- 21.9 With regard to cooperation with other entities at the global, regional and national levels, ECLAC will continue to collaborate in particular with the Bretton Woods institutions, including the International Monetary Fund and the World Bank, and with other inter-American and Ibero-American organizations, such as the Organization of American States, the Inter-American Development Bank, the Ibero-American Secretariat and the Development Bank of Latin America. Furthermore, ECLAC will reinforce its close cooperation with all regional mechanisms, including the Community of Latin American and Caribbean States (CELAC), the Caribbean Community (CARICOM), the Latin American Integration Association, the Southern Common Market, the Central American Integration System, the Pacific Alliance and the Bolivarian Alliance for the Peoples of Our America. In addition, ECLAC will strengthen its collaboration with private sector

associations, non-governmental and civil society organizations, think tanks and academia to promote policy dialogue and active engagement in the implementation of the 2030 Agenda, which is ultimately driven by member States.

- 21.10 With regard to inter-agency coordination and liaison, ECLAC will collaborate actively with the United Nations resident coordinator system and the United Nations country teams in the region.
- 21.11 With regard to the external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) The international community continues to be committed to implementing the 2030 Agenda and achieving the Sustainable Development Goals and to sustain coordinated multilateral actions to overcome the health-related and socioeconomic impact of the COVID-19 pandemic;
 - (b) The countries of Latin America and the Caribbean continue to support and attach high priority to multilateralism, regional and subregional cooperation, integration and the gradual convergence of integration schemes with a view to broadening the opportunities for achieving economic, social and environmentally sustainable development;
 - (c) The regional and international communities support States members of ECLAC and respond to their specific needs and concerns in relation to: (i) international trade, integration and the provision of logistics infrastructure and trade facilitation; (ii) their productive development, innovation, digital policies and macroeconomic policies; (iii) social development, social protection and equality, with full respect for human rights, including the implementation of the Regional Agenda to promote inclusive social development; (iv) attaching priority to mainstreaming a gender perspective in public policies, gender equality and the empowerment of women, taking into consideration the Montevideo Strategy for Implementation of the Regional Gender Agenda within the Sustainable Development Framework by 2030 and the Santiago Commitment adopted by the States members of ECLAC at the fourteenth session of the Regional Conference on Women in Latin America and the Caribbean; (v) the implementation of the Programme of Action of the International Conference on Population and Development beyond 2014, the Montevideo Consensus on Population and Development and the Regional Strategy for the Implementation of the Madrid International Plan of Action on Ageing; (vi) good governance, sustainable exploitation of natural resources, food safety and the promotion of the bioeconomy and the circular economy; (vii) incorporating environmental and urban concerns into public policies; (viii) according priority to development planning and public management at both the national and the subnational levels; and (ix) supporting the work of the Statistical Conference of the Americas and the priorities set out for statistical development in the region.
- 21.12 The Commission integrates a gender perspective into its operational activities, deliverables and results, as appropriate. The Commission will continue to ensure that gender focal points (see General Assembly resolution [76/142](#)) are consulted in programme formulation and that gender analysis (see Assembly resolution [74/235](#)) is integrated into all areas under the Commission's mandate. For instance, result 3 of subprogramme 5 reflects the increased importance of the care economy owing to the impact of the COVID-19 pandemic, and the growing demands of the region's countries for technical assistance and capacity development aimed at formulating and developing care regulations and policies, to foster a transformative and sustainable recovery from the pandemic with equality at the centre and to promote comprehensive care systems, decent work and the full and effective participation of women in strategic sectors of the economy.
- 21.13 In line with the United Nations Disability Inclusion Strategy and guided by the Commission's Disability Inclusion Strategy 2021–2025, ECLAC will work to further advance the inclusion of persons with disabilities and ensure the full realization of their rights. This will include implementing inclusive and comprehensive measures regarding the accessibility of facilities, reasonable accommodations, including improvements in audiovisual technology in conference rooms, as well as the adaptation of office space and furniture to facilitate the full participation and inclusion of persons with disabilities in the daily work of the Commission.

Programme performance in 2021

Impact of the pandemic

- 21.14 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular the need to adapt the modalities of planned deliverables, with implementation shifting from face-to-face activities to virtual settings, under all subprogrammes. While virtual modalities enabled the participation of a greater number of beneficiaries in seminars, workshops and meetings, it also presented challenges, given the unequal access to Internet services within and among member States in the region. Tailor-made technical assistance and policy advice to senior national and sectoral authorities were affected as a result of the deprivation of the possibility of face-to-face meetings and exchanges. Furthermore, in 2021, the fourth meeting of the Forum of the Countries of Latin America and the Caribbean on Sustainable Development was held in a hybrid format, providing a space for peer learning and the exchange of experiences and best practices among Governments, civil society, academia and the business community, as well as the United Nations resident coordinators and regional directors of United Nations agencies, funds and programmes, to support the implementation of the 2030 Agenda, in line with regional priorities and specificities.
- 21.15 In response to the evolving needs of States members of ECLAC, the Commission elaborated and proposed the plan for self-sufficiency in health matters in Latin America and the Caribbean, upon request from the pro tempore Chair of CELAC. The plan is intended to advance lines of action for strengthening capacities to produce and distribute vaccines, medicines and other health-related inputs in CELAC countries and to reinforce regional coordination and collaboration in health-related regulatory matters. The plan was approved unanimously at the sixth Summit of Heads of State and Government of CELAC, held in Mexico City in September 2021.

Legislative mandates

- 21.16 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

55/2	United Nations Millennium Declaration	66/71	International cooperation in the peaceful uses of outer space
58/269	Strengthening of the United Nations: an agenda for further change	66/84	Implementation of the Declaration on the Granting of Independence to Colonial Countries and Peoples by the specialized agencies and the international institutions associated with the United Nations
59/57	A Fair Globalization: Creating Opportunities for All – report of the World Commission on the Social Dimension of Globalization		
60/1	2005 World Summit Outcome	66/125 ; 73/141 ; 75/151	Implementation of the outcome of the World Summit for Social Development and of the twenty-fourth special session of the General Assembly
63/199	International Labour Organization Declaration on Social Justice for a Fair Globalization	66/157	Strengthening United Nations action in the field of human rights through the promotion of international cooperation and the importance of non-selectivity, impartiality and objectivity
63/260	Development-related activities		
64/172 ; 66/155 ; 68/158 ; 71/192 ; 75/182	The right to development		
64/200 ; 70/204	International Strategy for Disaster Reduction	66/161 ; 70/159 ; 71/197	Globalization and its impact on the full enjoyment of all human rights
64/222	Nairobi outcome document of the High-level United Nations Conference on South-South Cooperation	66/165 ; 68/180	Protection of and assistance to internally displaced persons
64/289	System-wide coherence	66/166 ; 70/166	Effective promotion of the Declaration on the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities
65/1	Keeping the promise: united to achieve the Millennium Development Goals		

Part V Regional cooperation for development

66/172; 68/179; 70/147; 74/148	Protection of migrants	68/134; 69/146; 71/164; 74/125; 75/152; 76/138	Follow-up to the Second World Assembly on Ageing
66/200; 71/228; 75/217	Protection of global climate for present and future generations of humankind	68/160; 70/153	Enhancement of international cooperation in the field of human rights
66/210; 70/211	Role of the United Nations in promoting development in the context of globalization and interdependence	68/192; 70/179	Improving the coordination of efforts against trafficking in persons
66/213	Fourth United Nations Conference on the Least Developed Countries	68/198	Information and communications technologies for development
66/216; 70/219	Women in development	68/201; 73/220; 75/204	International financial system and development
66/217; 68/228; 72/235	Human resources development	68/202; 71/216; 72/204; 73/221; 75/205	External debt sustainability and development
66/288	The future we want	68/204	Follow-up to the International Conference on Financing for Development
67/12; 75/14	Cooperation between the United Nations and the Latin American and Caribbean Economic System	68/210; 71/223; 73/227; 74/216	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development
67/140	Realizing the Millennium Development Goals and other internationally agreed development goals for persons with disabilities towards 2015 and beyond	68/220	Science, technology and innovation for development
67/148; 69/151; 70/133; 74/128; 76/142	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly	68/222; 70/215; 72/230; 74/231	Development cooperation with middle-income countries
67/164; 69/183; 71/186; 73/163; 75/175	Human rights and extreme poverty	68/234; 73/254	Towards global partnerships: a principle-based approach to enhanced cooperation between the United Nations and all relevant partners
67/205; 75/214	Towards the sustainable development of the Caribbean Sea for present and future generations	69/177; 71/191; 73/171; 75/179	The right to food
67/207	Follow-up to and implementation of the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States	69/187 69/313	Migrant children and adolescents
67/215; 69/225	Promotion of new and renewable sources of energy	70/1	Addis Ababa Action Agenda of the Third International Conference on Finance for Development (Addis Ababa Action Agenda)
67/217; 73/240; 75/225	Towards a New International Economic Order	70/126; 72/142; 74/120; 76/136	Transforming our world: the 2030 Agenda for Sustainable Development

D. Communication deliverables

Outreach programmes, special events and information materials: booklets, fact sheets, wall charts and information kits; the *ECLAC Notes* electronic newsletter; and public information materials related to the United Nations, ECLAC events and special observances.

External and media relations: guided tours of ECLAC premises in Santiago; photographic coverage of ECLAC meetings and activities and audiovisual products on the work of ECLAC; press conferences and media stakes related to the launch of flagship publications and other relevant documents of ECLAC and of the United Nations; press releases in Spanish and English related to the work of ECLAC and of the United Nations; and interviews with United Nations/ECLAC spokespersons by national and international news media.

Digital platforms and multimedia content: Regional inter-agency knowledge and data platform on the implementation of the Sustainable Development Goals; ECLAC digital repository; and social media campaigns.

Evaluation activities

- 21.18 The following evaluations completed in 2021 have guided the proposed programme plan for 2023:
- (a) Office of Internal Oversight Services evaluation: Evaluation synthesis on strategic planning;
 - (b) Joint Inspection Unit evaluation: Review of United Nations system support for landlocked developing countries to implement the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024;
 - (c) Evaluations on socio-environmental challenges in Latin America and the Caribbean (subprogramme 7) and on the use of big data for measuring and fostering the digital economy in the region (subprogramme 2).
- 21.19 The results and lessons of the evaluations referenced above have been taken into account for the programme plan for 2023. For example, a recommendation to further the implementation of the Regional Agreement on Access to Information, Public Participation and Justice in Environmental Matters in Latin America and the Caribbean (Escazú Agreement) has been incorporated into the plan for subprogramme 7 through the addition of substantive services for meetings to strengthen regional cooperation and implementation on topics under the Escazú Agreement.
- 21.20 A midterm evaluation on the Commission’s approach to mainstreaming a gender perspective across all subprogrammes is planned for 2023.

Programme of work

Subprogramme 1

International trade, integration and infrastructure

Objective

- 21.21 The objective, to which this subprogramme contributes, is to advance sustainable development and strengthen the role of Latin America and the Caribbean in international trade and the global economy by deepening regional integration and enhancing logistics and infrastructure.

Strategy

- 21.22 To contribute to the objective, the subprogramme will:
- (a) Support the capacities of member States to cooperate and participate more effectively in global and regional trade, reduce their dependency on the export of primary products and strengthen regional supply chains, thus contributing to the attainment of Sustainable Development Goals 8 and 12;

- (b) Enhance the capacities of member States to face new challenges, such as digital trade and services, participation in global and regional value chains, internationalization of small and medium-sized enterprises, trade facilitation, new public and private standards, environmental sustainability and links with emerging issues in the area of trade infrastructure, by conducting analyses at the country and regional levels, thus contributing to the attainment of Goal 10;
- (c) Assist member States in the development and review of logistics policies at the national and subregional levels; and provide policy recommendations and technical assistance to monitor the economic infrastructure gap and investment in the region, disseminate new policy options and promote the exchange of good practices in logistics and transport infrastructure operation (with an emphasis on ports and main trade corridors);
- (d) Analyse logistics, trade facilitation and infrastructure development at the national and transboundary levels, with a particular focus on landlocked developing countries and other member States with special needs, thus contributing to the attainment of target 17.11;
- (e) Seek to mainstream the balance among efficiency, resilience and sustainability as a pillar for logistics infrastructure policies and support the implementation of policies that increase the share of industrialized goods in the exports of Latin American and Caribbean countries, thus contributing to the attainment of Goal 9;
- (f) Examine the impact of the COVID-19 pandemic in all its publications, capacity-building activities and technical assistance services, as relevant.

21.23 The above-mentioned work is expected to result in:

- (a) National policies that promote more sustained, inclusive and sustainable economic growth through sustainable consumption and production patterns;
- (b) Formulation and negotiation of trade policies by countries and implementation and administration of trade agreements at the bilateral, regional, plurilateral and multilateral levels while ensuring special and differentiated treatment for developing countries;
- (c) More effective participation by countries in the region in global and regional value chains, including through reduced logistics overcost and increased sustainable trade;
- (d) Policies for a more sustainable and resilient recovery from COVID-19.

Programme performance in 2021

Small and medium-sized enterprises incorporated into trade, logistics and regional integration strategies

21.24 The incorporation of small and medium-sized enterprises into international trade logistics and regional integration is important to recognize and to stimulate. The promotion of their inclusion and diversification is an essential component of public policies in this area. The subprogramme seeks to build capacities and undertake actions to include the perspective of small and medium-sized enterprises in public policies as a means of recognizing their significant role in the economy and identifying the obstacles these firms face in international trade, logistics and regional integration.

21.25 During 2021, the subprogramme organized virtual technical capacity-building activities and events oriented towards increasing the participation of small and medium-sized enterprises in international trade, logistics and regional integration. Activities were implemented in coordination with the Division of Production, Productivity and Management, the United Nations Conference on Trade and Development, the International Trade Centre, the Inter-American Development Bank, trade promotion organizations, chambers of commerce and small and medium-sized enterprise branch organizations. One high-level seminar was organized to analyse the importance of digital transformation for small and medium-sized enterprises in overcoming several barriers to participation in international trade, logistics and regional integration. Also, three virtual learning courses were organized for public institutions in the region: one on the same topic of the high-level seminar and two on the challenges and opportunities for small and medium-sized enterprises in cross-border e-commerce in Latin America and the Caribbean.

21.26 Progress towards the objective is presented in the performance measure below (see figure 21.I).

Figure 21.I

Performance measure: number of public officials with increased knowledge and capacity to promote increased participation of small and medium-sized enterprises in international trade, logistics and regional integration

Planned results for 2023

Result 1: fostering logistics competitiveness through the coordination of regional policies on trade facilitation and infrastructure

Programme performance in 2021 and target for 2023

21.27 The subprogramme’s work contributed to eight references being made in presidential or ministerial resolutions related to transport, logistics and trade facilitation, which met the planned target.

21.28 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 21.II).

Figure 21.II

Performance measure: number of references in presidential or ministerial resolutions related to transport, logistics or trade facilitation in Latin American and Caribbean countries (annual)

Result 2: improved coordination of policies on trade, logistics infrastructure and regional integration

Programme performance in 2021 and target for 2023

21.29 The subprogramme’s work contributed to 14 country institutions requesting support in implementing more coordinated trade and logistics strategies, which met the planned target. The institutions enhanced their abilities to analyse policies in the areas of production, trade, logistics infrastructure and digital innovations with the aim of reducing internal logistics costs and creating regional services with added value to achieve a better recovery from the impact of the COVID-19 pandemic.

21.30 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 21.III).

Figure 21.III

Performance measure: number of Latin American and Caribbean country institutions requesting technical support in implementing more coordinated trade and logistics strategies within a regional perspective (cumulative)

Result 3: improved capacity of member States to identify key economic sectors for sustainable recovery from the COVID-19 pandemic

Proposed programme plan for 2023

- 21.31 Regional integration strengthens trade and productive relations among trading partners and is essential in the recovery from the pandemic. Vulnerable sectors affected by the pandemic and sectors that have been resilient during the pandemic or show potential to foster trade integration must be identified. The subprogramme has enhanced the technical capacity of all regional integration schemes in the region in the use of input-output tables to diagnose the strengths and weaknesses of the regional value chains within each scheme and has to advance in the assembly of a biregional input-output table with the European Union.

Lessons learned and planned change

- 21.32 The lesson for the subprogramme was twofold. More reliable and detailed data are required to identify new strategic sectors and sex-disaggregated data are necessary to increase the employment of women in those sectors. Both elements are required to elaborate inclusive and innovative trade and integration policies for a robust, resilient and sustainable recovery. In applying the lesson, the subprogramme will work more closely with statistical and sectoral institutions in order to obtain more accurate and reliable sex-disaggregated data and reliable and detailed data on potential new strategic sectors, such as the pharmaceutical and electromobility sectors.
- 21.33 Expected progress towards the objective is presented in the performance measure below (see figure 21.IV).

Figure 21.IV

Performance measure: number of Latin American and Caribbean national or regional institutions with improved capacity to identify vulnerable, resilient and potential sectors in the recovery from the pandemic (cumulative)

Deliverables

21.34 Table 21.2 lists all deliverables of the subprogramme.

Table 21.2

Subprogramme 1: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	1	1	1
1. Provision of infrastructure and logistics services that promote economic efficiency, social equality and environmental sustainability, and increasing the integration of physical infrastructure in the region	1	1	1	1
Seminars, workshops and training events (number of days)	8	8	8	8
2. Workshops and seminars on the relation between regional trade policy and the attainment of the Sustainable Development Goals; comparative strategies for deepening regional value chains; new challenges in the region related to resilient and sustainable logistics, mobility and infrastructure policies; links between trade and other public policies in the light of development in the global economy and international trade; and cooperation and trade facilitation initiatives in the region	8	8	8	8
Publications (number of publications)	22	22	22	20

C. Substantive deliverables

Consultation, advice and advocacy: advice to member States, upon request, on value chains, trade policy, integration, sustainable logistics, mobility and infrastructure policies, and social and sustainability issues.

Databases and substantive digital materials: databases on trade data and disputes, bond issuance, spreads and credit ratings, sustainable logistics, the Maritime and Logistics Profile of Latin America and the Caribbean data tool, and other data on infrastructure services.

D. Communication deliverables

Outreach programmes, special events and information materials: *CEPAL News* newsletter.

**Subprogramme 2
Production and innovation**

Objective

- 21.35 The objective, to which this subprogramme contributes, is to enhance the diversification of productive structures through innovation and the diffusion of new technology and to strengthen linkages and networking between firms.

Strategy

- 21.36 To contribute to the objective, the subprogramme will:
- (a) Promote policy advocacy and the exchange of experiences and best practices with respect to the dynamics of productive development among stakeholders at the regional, national and local levels through meetings, seminars and electronic forums, including the provision of technical cooperation services, such as specific training courses and workshops;
 - (b) Focus on the integration of innovation and new, low-carbon and low-emission technologies in production processes with an emphasis on digital technologies convergence (that is, the integration of the Internet of things, 5G, big data, artificial intelligence, information technology and cognitive science) and new manufacturing processes (the Industrial Internet); and on capacity-building in digital technologies. Particular attention will be given to a gender perspective on structural change, for example, with regard to productivity, digital and employment gaps;
 - (c) Conduct economic analyses along with applied research on the basis of the generation, processing and analysis of information and indicators in various databases, disseminate the result of those studies and submit policy recommendations to Governments, regional bodies and other relevant stakeholders;
 - (d) Facilitate the connection of micro-, small and medium-sized enterprises with larger firms that use advanced technologies so as to integrate them into the process of learning and competition in dynamic foreign and domestic markets and increase the dissemination of technology;
 - (e) Analyse and measure the impact of foreign direct investment so as to devise industrial policies that will have positive effects on learning and the diversification of the production and export structures; and provide technical assistance, upon request by member States, on the assessment, development and implementation of industrial policies and strategies, thus contributing to the attainment of Sustainable Development Goal 9;
 - (f) Continue to provide its analysis of the ongoing impact of COVID-19 on firms and sectors in the region and further support member States in mitigating fragilities and imbalances in the productive structure of the region that have emerged or been exacerbated owing to COVID-19, with particular attention given to the digitalization of the productive sector.

21.37 The above-mentioned work is expected to result in:

- (a) The design and implementation of industrial and technology policies by Governments and regulators aimed at diversifying the productive structure and building capacities in Latin American and Caribbean countries;
- (b) Strengthened national capacities to incorporate innovation and new technologies into production processes;
- (c) The design and implementation of active policies by Governments and regulators that heighten local innovation and adaptation helping to leverage the potential of foreign direct investment;
- (d) Strengthened scientific and technological capacity of member States to move towards more sustainable patterns of consumption and production;
- (e) A diversification process associated with the creation of new opportunities for formal jobs and productivity growth;
- (f) Increased resilience of the productive sector through a significant increase in the digitalization of firms in the region, including micro-, small and medium-sized enterprises.

Programme performance in 2021

Expanded digital commerce opportunities through a regional digital market

21.38 The implementation of a regional digital market enables the expansion of regional trade opportunities and the greater insertion of small and medium-sized enterprises in international trade. Within the framework of technical assistance provided to the countries of the Pacific Alliance (Chile, Colombia, Mexico and Peru), the subprogramme prepared a strategy for the implementation of the regional digital market in that trade bloc. As a result, during the fifteenth Presidential Summit of the Pacific Alliance, the presidents of the bloc signed the presidential declaration of the Pacific Alliance on the development of the regional digital market and the drive towards digital transformation, with the purpose of advancing in the implementation of the strategy for a regional digital market to improve access to digital commerce, create an enabling environment to promote digital commerce and boost the digital economy to generate new sources of growth and productivity. On 20 October 2021, the Pacific Alliance regional digital market road map was published.

21.39 Progress towards the objective is presented in the performance measure below (see figure 21.V).

Figure 21.V

Performance measure: number of countries that have adopted concrete actions for the implementation of a regional digital market

Planned results for 2023

Result 1: development of new public policies to foster the use of new technologies in productive processes

Programme performance in 2021 and target for 2023

- 21.40 The subprogramme's work contributed to supporting the adoption of nine new public policies to foster the use of new technologies in productive processes, which exceeded the planned target of seven new public policies.
- 21.41 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 21.VI).

Figure 21.VI

Performance measure: number of new public policies to foster the use of new technologies in production processes (cumulative)

Result 2: improved connectivity to speed up firm digitalization

Programme performance in 2021 and target for 2023

- 21.42 The subprogramme's work contributed to 84 per cent of the countries in the region having fixed broadband speeds that enable intensive use of the Internet, which exceeded the planned target of 75 per cent.
- 21.43 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 21.VII).

Figure 21.VII

Performance measure: percentage of countries in the region with fixed broadband speeds that enable intensive use of the Internet

Result 3: strengthened capacities to develop public policies, strategies and digital transformation agendas

Proposed programme plan for 2023

21.44 The speed of technological changes, particularly regarding digital technologies and the growing need for their incorporation into both the productive and social spheres, requires normative and regulatory updates to encourage the adoption of such technologies. In that regard, continuous training of public officials is needed so that they are better equipped to support those processes. The subprogramme has been delivering capacity-building activities to countries of the region to strengthen the knowledge and capacity of public officials in the use of digital technologies.

Lessons learned and planned change

21.45 The lesson for the subprogramme was that in order for training activities to be effective, it is important to tailor them to the different national and subregional contexts and, in particular, to take into consideration the differences in the accessibility to Internet services between and within countries. In applying the lesson, the subprogramme will design more effective training programmes and courses that better meet the specific needs of the countries in the region, increasing the number of public officials with enhanced knowledge on the use of digital technologies and strengthened capacity to promote their adoption.

21.46 Expected progress towards the objective is presented in the performance measure below (see figure 21.VIII).

Figure 21.VIII

Performance measure: number of new policies to accelerate digital transformation (cumulative)

Deliverables

21.47 Table 21.3 lists all deliverables of the subprogramme.

Table 21.3

Subprogramme 2: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned

4. Workshops on new technologies and support for small and medium-sized enterprises in the region	6	6	–	–
5. Training and seminars on foreign direct investment and small and medium-sized enterprises and on productive structure diversification	6	6	6	7
6. Courses on innovation policy management and economies of the region	35	43	35	35
7. Meeting of experts to analyse recent structural changes, study the trends and progress of the digital economy and examine recent trends in the behaviour of economic agents in sectors and countries in the region	–	–	6	6
Publications (number of publications)	6	6	7	7
8. <i>Foreign Direct Investment in Latin America and the Caribbean</i>	1	1	1	1
9. On the production structure of the region, foreign investment, industrial policies and new technologies and innovation	5	5	5	5
10. On technological, productive or trade performance in Argentina	–	–	1	1
C. Substantive deliverables				
Consultation, advice, and advocacy: advice to member States, upon request, on policies and strategies for productive development and competitiveness, public-private partnerships, foreign direct investment, and innovation systems and new and emerging technologies.				
Databases and substantive digital materials: databases on economic activity in specific sectors, software for the analysis of the competitiveness of nations and statistical information on the main economic agents in the region.				

Subprogramme 3 Macroeconomic policies and growth

Objective

- 21.48 The objective, to which this subprogramme contributes, is to foster sustainable and inclusive growth in Latin America and the Caribbean by strengthening the capacity of policymakers and other stakeholders in the region to analyse current and emerging macroeconomic and development finance issues and to evaluate, design and implement development-centred macroeconomic and development financing policies that incorporate a gender perspective and are based on comparative policy analysis.

Strategy

- 21.49 To contribute to the objective, the subprogramme will:
- (a) Prepare the annual *Economic Survey of Latin America and the Caribbean*, the *Preliminary Overview of the Economies of Latin America and the Caribbean*, the *Fiscal Panorama of Latin America and the Caribbean* and other reports focusing on Latin America and the Caribbean to support member States in responding to current and emerging macroeconomic and financing for development trends;
 - (b) Conduct applied policy analysis to support member States in the analysis and formulation of macroeconomic and financing for development policies that promote sustainable development in line with the Sustainable Development Goals;

- (c) Facilitate dialogue through seminars and workshops on macroeconomic and financing for development policies, including through the regional fiscal policy seminar, which provides a forum for South-South interaction of policymakers and dialogue with regional and international organizations;
 - (d) Foster the establishment and operation of networks of key stakeholders, including policymakers, academics, private sector analysts, members of civil society organizations and the public at large, to enable regional discussion of key macroeconomic and financing for development issues;
 - (e) Provide technical cooperation and advisory services, upon request, in the areas of macroeconomic, labour and financing for development policies.
- 21.50 These workstreams will help member States to make progress towards achieving all of the Sustainable Development Goals, with a particular emphasis on Goals 8, 10, 16 and 17.
- 21.51 The above-mentioned work is expected to result in:
- (a) Enhanced analysis of current and emerging macroeconomic and development finance issues by policymakers and other stakeholders in the region;
 - (b) Evaluation, design and implementation by policymakers of macroeconomic and development financing policies that incorporate a gender perspective and are based on comparative policy analysis.

Programme performance in 2021

Strengthened regional discussions on the fiscal policy challenges posed by the COVID-19 pandemic

- 21.52 The regional fiscal policy seminar is the pre-eminent forum for the discussion of fiscal policy issues in Latin America and the Caribbean, facilitating the South-South sharing of experiences among policymakers of the region and other key stakeholders such as international organizations, academia and civil society. The subprogramme structured the 2021 edition of the seminar along key fiscal policy issues facing countries as the region deals with the ongoing impact of the COVID-19 pandemic, as well as establishing measures to achieve sustainable growth. The seminar, which was expanded to a four-day event, included a round-table discussion for policymakers and sessions for international organizations and covered a range of topics, including incorporating a gender perspective into fiscal policy in the region, financing for development challenges, tax evasion and illicit financial flows and climate finance. The value of the seminar as a forum to discuss COVID-19-related fiscal policy issues was reflected by the high level of engagement with policymakers and other stakeholders.
- 21.53 Progress towards the objective is presented in the performance measure below (see table 21.4).

Table 21.4
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
–	Finance ministers of 19 countries in the region exchange experience on the formulation of fiscal policies to respond to the impact of the COVID-19 pandemic, through the thirty-second regional fiscal policy seminar	380 policymakers and stakeholders (45 per cent women) from 15 countries discuss the continuing fiscal challenges posed by the pandemic and the need for policies to promote the achievement of sustainable growth

Planned results for 2023

Result 1: ramping up resource mobilization to finance the Sustainable Development Goals

Programme performance in 2021 and target for 2023

- 21.54 The subprogramme's work contributed to the implementation of strategies to support the mobilization of resources to promote sustainable development, including the establishment by the Plurinational State of Bolivia of a financial trust fund for the reactivation and development of national industry, entailing a total of 12 resource mobilization policies, measures and strategies adopted, which met the planned target.
- 21.55 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 21.IX).

Figure 21.IX

Performance measure: number of resource mobilization policies, measures and strategies (cumulative)

Result 2: macroeconomic and financing for development policies for sustainable and inclusive growth in a post-pandemic world

Programme performance in 2021 and target for 2023

- 21.56 The work of the subprogramme contributed to the adoption of 13 macroeconomic and financing for development policies, measures and strategies for sustainable recovery from the COVID-19 pandemic by Argentina, Bolivia (Plurinational State of), Brazil, Chile, Colombia, Jamaica, Peru and Uruguay, which exceeded the planned target of 12 policies.
- 21.57 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 21.X).

Figure 21.X

Performance measure: number of macroeconomic and financing for development policies, measures and strategies for sustainable recovery from the COVID-19 pandemic (cumulative)

Result 3: fiscal, financial and employment policies for a transformative recovery**Proposed programme plan for 2023**

21.58 Latin America and the Caribbean was the region most impacted by the COVID-19 pandemic, recording the greatest contraction in economic activity and employment worldwide. Existing structural gaps – high levels of poverty and inequality, productive structures based on commodities, elevated informality, weak social protection systems, among other things – limited the capacity of countries to respond to the crisis. However, the pandemic also underlined the full extent to which active fiscal, financial and employment policies can reshape economic and social conditions. Such measures must be accompanied by supporting macroeconomic policies and a robust financing for development framework to be sustainable in the medium term. The subprogramme supported policymaking by member States to respond to the immediate needs of the crisis through its timely analysis of current and emerging fiscal, financial and employment policy trends and the development of policy proposals, as well as its support for virtual meetings of finance ministers.

Lessons learned and planned change

21.59 The lesson for the subprogramme was the need to strengthen its focus on supporting the development of fiscal, financial and employment policies to build momentum for achieving a transformative recovery that closes structural development gaps. In applying the lesson, the subprogramme will provide additional applied policy analysis, macroeconomic monitoring and technical assistance on demand to support member States to formulate pro-growth and development-centred fiscal, financial and employment policies, measures and strategies.

21.60 Expected progress towards the objective is presented in the performance measure below (see figure 21.XI).

Figure 21.XI

Performance measure: number of references to the subprogramme analysis and policy recommendations in official documents (cumulative)**Deliverables**

21.61 Table 21.5 lists all deliverables of the subprogramme.

Subprogramme 3: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	10	10	6	6
1. Seminars, meetings of experts, workshops and training events on macroeconomic and financing policies in Latin America and the Caribbean	10	10	6	6
Publications (number of publications)	14	14	11	13
2. <i>Economic Survey of Latin America and the Caribbean</i>	1	1	1	1
3. <i>Fiscal Panorama of Latin America and the Caribbean</i>	1	1	1	1
4. <i>Preliminary Overview of the Economies of Latin America and the Caribbean</i>	1	1	1	1
5. On macroeconomic, sectoral and financing policies in Latin America and the Caribbean	10	10	7	7
6. On specific economic issues in Uruguay	1	1	1	1
7. On a high-priority issue concerning macroeconomic and development policies in Colombia	–	–	–	1
8. On current and emerging macroeconomic and development finance issues in Brazil to foster sustainable and inclusive growth	–	–	–	1
C. Substantive deliverables				
Consultation, advice and advocacy: advice to member States, upon request, on macroeconomic, fiscal and monetary policy analysis and formulation, macroeconomic analysis and systems for monitoring economic development and on the design and implementation of financing for development schemes and policies geared towards financial and productive development and/or social protection; advice to the Ministry of Economy and Finance of Uruguay on macroeconomic issues; and provision of technical cooperation services to Colombian public agencies on economic and fiscal issues.				
Databases and substantive digital materials: provision of statistical information to policymakers, academia, private sector analysts and the public at large on economic, monetary and financial variables for countries in the region; and statistical data sets covering government operations, public debt, tax revenue and revenue from non-renewable natural resources.				

Subprogramme 4 Social development and equality

Objective

- 21.62 The objective, to which this subprogramme contributes, is to improve the overall well-being of the people of the region and achieve greater social and economic equality in line with the 2030 Agenda and with full respect for human rights.

Strategy

- 21.63 To contribute to the objective, the subprogramme will:
- (a) Support countries in implementing a regional agenda for inclusive social development in line with the outcomes and agreements reached at the Regional Conference on Social Development of Latin America and the Caribbean by conducting applied research, generating analyses, disseminating results, providing training and advisory services and formulating policy recommendations, as well as promoting policy dialogue for inclusive social development among policymakers, academics, civil society organizations and other stakeholders and facilitating the exchange of experiences and good practices;

- (b) Provide the above-mentioned support with a focus on the following priority areas: addressing the multiple dimensions of poverty, inequality and well-being; bridging gaps in well-being and tackling inequalities, including those related to gender, race, ethnicity, age, disability and territory; ensuring access to universal, comprehensive and sustainable social protection; promoting social and labour inclusion policies; coordinating social, economic and environmental policies; and promoting health, pensions and educational policies as key elements of inclusive social development and improving the capacity of social policy to adapt to new and emerging challenges related to such topics as demographic transition, migration, changes in the world of employment, new technologies, pandemics and climate change;
- (c) Assist countries with capacity-building and technical cooperation on the design, implementation, monitoring and evaluation of strategies, policies and programmes. Research and advisory services will emphasize, in particular, social protection systems with full respect for human rights, taking an equality-oriented and sustainable approach; the protection and promotion of the rights of the sectors of the population that suffer discrimination and exclusion based on gender, race, ethnicity, age, disability and territory; social investment; and education and public health systems, thus contributing to the attainment of Sustainable Development Goals 1, 2, 3, 4, 8, 10 and 16;
- (d) Provide counterparts with up-to-date knowledge on COVID-19 through the Observatory on Social Development in Latin America and the Caribbean web tool and assist Governments in tackling the socioeconomic consequences of COVID-19 through advisory services and knowledge-sharing activities in social policy areas affected by the crisis.

21.64 The above-mentioned work is expected to result in:

- (a) Deeper understanding by policymakers of the structural social challenges and disparities that characterize the region;
- (b) Measures and public policies promoting greater social and economic equality and overall well-being of the people of the region;
- (c) Expanded and improved social protection systems that take into consideration the social impact of the pandemic, emerging challenges and other catastrophic events and the need to build greater resilience over time.

Programme performance in 2021

Improved identification of people in vulnerable situations and in need of social protection

21.65 During the COVID-19 crisis, social information systems and social registries emerged as essential tools to identify recipients in need of social protection measures and to deliver the required support quickly and efficiently. This motivated the introduction of several innovations in the region in order to expand their coverage and improve their operation. The subprogramme has worked in previous years to strengthen the capacities of government officials from the Ministry of Social Development of Paraguay, providing advisory services regarding the design and implementation of social policies. During 2021, the subprogramme supported the Ministry of Social Development of Paraguay in developing the social registry of households, including through a report outlining recommendations for its design and implementation. The strengthened social registry will enable the classification of the country's households and identifies households in situations of income and multidimensional poverty as potential recipients of social policies and programmes. This tool will also contribute to the implementation of the national poverty reduction plan *Jajapo Paraguay*. Further advisory services in respect of strategic guidelines for the strengthening and expansion of the registry's coverage will be provided upon request.

21.66 Progress towards the objective is presented in the performance measure below (see table 21.6).

Table 21.6
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
National poverty reduction plan <i>Jajapo Paraguay</i> developed	National poverty reduction plan <i>Jajapo Paraguay</i> launched	Areas for strengthening the social registry of households are identified as a management instrument of the national poverty reduction plan

Planned results for 2023

Result 1: improved and more effective, efficient, transparent and sustainable social policy institutions

- 21.67 The subprogramme’s work contributed to nine social policy institutions acknowledging improvements in their public action as a result of technical assistance provided by ECLAC, which met the planned target.
- 21.68 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 21.XII).

Figure 21.XII

Performance measure: number of social policy institutions acknowledging improvements in their public action as a result of technical assistance provided by ECLAC (annual)

Result 2: advancing innovative sectoral and intersectoral social policies to address inequalities affecting the most vulnerable

Programme performance in 2021 and target for 2023

- 21.69 The subprogramme’s work contributed to 121 national officers having increased capacity to develop innovative sectoral and intersectoral social policies, which exceeded the planned target of 102 national officers.
- 21.70 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 21.XIII).

Figure 21.XIII
Performance measure: number of national officers with increased capacity to develop innovative sectoral and intersectoral social policies (annual)

Result 3: more resilient social protection systems

Proposed programme plan for 2023

- 21.71 The Latin America and Caribbean region has experienced severe social and economic impacts owing to COVID-19. The studies carried out by ECLAC during the past two years reveal an increase in poverty and inequality and rising gaps in social protection in a context marked by structural disparities. Social protection systems have had to respond through the creation of new programmes and innovation in the delivery methods. The subprogramme's work contributed to increased capacities of member States to design, implement and enhance social protection, health systems and policies for increased resilience to face the impacts of crises.

Lessons learned and planned change

- 21.72 The lesson for the subprogramme was that technical assistance delivered to countries in the region should be enhanced to further strengthen their capacities to better respond to future crises and address emerging vulnerabilities. In applying the lesson, the subprogramme will leverage technology opportunities to advance its technical support to countries in the region. In addition, the subprogramme will support the development of innovative policies to advance strategies for responding to social protection in the face of disruptive events.
- 21.73 Expected progress towards the objective is presented in the performance measure below (see figure 21.XIV).

Figure 21.XIV

Performance measure: number of national institutions with improved capacities to ensure social protection during crisis periods (annual)

Deliverables

C. Substantive deliverables				
Consultation, advice and advocacy: advice to member States, upon request, on social policies for equality, decision-making in social policy, and social investment and policies; analytical and methodological proposals to enhance intersectoral and inter-institutional cooperation, aimed at improving effectiveness and efficiency; and design, implementation and evaluation of social policies.				
Databases and substantive digital materials: Observatory on Social Development in Latin America and the Caribbean, which includes databases on social development, young people, non-contributory social protection, social institutions and regional commitments.				
D. Communication deliverables				
Digital platforms and multimedia content: knowledge management tools, including on the strengthening of the Latin American and Caribbean Network on Social Development.				

Subprogramme 5 Gender equality and women's autonomy²

Objective³

21.75 The objective, to which this subprogramme contributes, is to strengthen gender equality and women's autonomy in sustainable development strategies of the Latin American and Caribbean countries.

Strategy

21.76 To contribute to the objective, the subprogramme will:

- (a) Continue to produce knowledge and develop gender statistics and indicators, expanding the scope and improving the quality of data and indicators available from the Gender Equality Observatory for Latin America and the Caribbean;
- (b) Continue to provide technical support to mainstream a gender perspective in the work of the Statistical Conference of the Americas and its working groups;
- (c) Provide technical assistance to the countries in the region in developing policies to promote gender equality, and strengthen the capacities of national mechanisms for the advancement of women as well as those of national statistical offices;
- (d) Foster increased dissemination of publications and research findings among policymakers and other relevant stakeholders. Particular attention will be devoted to the economic autonomy of women in an integrated framework, connected to physical autonomy and to decision-making autonomy;

² Revised in accordance with resolution 751(PLN.36) of the Committee of the Whole of the Economic Commission for Latin America and the Caribbean (ECLAC) dated 3 December 2021.

³ Ibid.

- (e) Focus its knowledge-generation and research activities and its technical assistance, where relevant, on various possible socioeconomic scenarios in the context of the recovery from the COVID-19 pandemic.

21.77 The above-mentioned work is expected to result in:

- (a) Enhanced production of gender statistics by national statistical offices;
- (b) Strengthened capacities of member States in building policies for gender equality along with the implementation of the 2030 Agenda;
- (c) Advancement of gender equality across the region;
- (d) Implementation of gender-sensitive policy recommendations aimed at reducing economic impacts by achieving rapid recovery from the COVID-19 pandemic while leaving no one behind.

Programme performance in 2021

Effective implementation of the care system for Bogotá through georeferenced maps

21.78 In 2020, the Council of Bogotá adopted the District Development Plan 2020–2024: A New Social and Environmental Contract for the Bogotá of the Twenty-first Century, which represents a framework for action and for policies, programmes, strategies and projects implemented by the District Administration, towards achieving a more equitable redistribution of the costs and benefits of living in Bogotá and promoting the recovery from the pandemic of socioeconomic and cultural activity. During 2020 and 2021, the subprogramme provided technical assistance through the mapping and design of financial sustainability strategies for the supply of care services of the District Care System of Bogotá, which enabled the strengthening of the social protection system by orienting it towards co-responsibility and represents a milestone in the inclusion of the care economy as a central component of economic policy. Technical support provided by the subprogramme contributed to the systematization of international experience and the development of socio-territorial criteria for the implementation of the District Care System and to the design of scenarios for its financial sustainability.

21.79 Progress towards the objective is presented in the performance measure below (see table 21.8).

Table 21.8
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
–	District Administration of Bogotá has strengthened capacity to design and implement the District Care System, identify regional and international good practices on the estimation of the demand for and supply of care in the city and identify appropriate financing strategies	District Administration of Bogotá implements the District Care System, supported by georeferenced maps with information on the supply and demand of care and indicators with a focus on issues related to gender equality

Planned results for 2023

Result 1: strengthening statistical capacities from a gender perspective

Programme performance in 2021 and target for 2023

- 21.80 The subprogramme's work contributed to 82 national officials being certified in the use of the indicators housed in the Gender Equality Observatory for Latin America and the Caribbean and 188 national officials being certified in mainstreaming a gender perspective in public policies, which met the planned target.
- 21.81 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 21.XV).

Figure 21.XV

Performance measure: number of national officials certified in the use of the indicators housed in the Gender Equality Observatory for Latin America and the Caribbean and number of national officials certified in mainstreaming a gender perspective in public policies (cumulative)

Result 2: increased capacity to formulate and develop gender equality policies

Programme performance in 2021 and target for 2023

- 21.82 The subprogramme's work contributed to 18 stakeholders in the region reporting an improvement in the formulation and development of gender equality policies, which met the planned target.
- 21.83 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 21.XVI).

Figure 21.XVI
Performance measure: number of stakeholders in the region reporting an improvement in the formulation and development of gender equality policies (cumulative)

Result 3: enhanced public policies related to the legal framework for care in the countries of the region

Proposed programme plan for 2023

- 21.84 Public care policies are understood as those that aim to guarantee the daily physical and emotional well-being of people with some level of dependency, intervening in the social organization of care and establishing care rights. They may include, among others, maternity leave for care and breastfeeding; paternal, parental and care leave for dependants of different ages; establishment and facilitation of access to out-of-home care services; anti-discrimination laws in employment for mothers and fathers; shared responsibility legislation for families and the community; care and social integration mechanisms for people with disabilities; cash transfers for caregivers; and constitutional regulations for unpaid caregivers. The subprogramme has been working on those matters and maintains a repository of care laws that contains information on more than 200 legislations from 36 countries within the Gender Equality Observatory for Latin America and the Caribbean.

Lessons learned and planned change

- 21.85 The lesson for the subprogramme was the need to address structural challenges to gender equality and the empowerment of women, especially given that the COVID-19 pandemic has exacerbated those challenges. The pandemic has generated a setback of more than a decade in terms of women's participation in the labour market,⁴ a deepening of the feminization of poverty and an increase in the burden of care work. In applying the lesson, the subprogramme will increase its focus on care systems in the context of sustainable recovery, in preparation for the fifteenth session of the Regional Conference on Women in Latin America and the Caribbean, to be held under the theme "The care society: a horizon for a sustainable recovery with gender equality", which will constitute a milestone in promoting comprehensive care systems, decent work and the full and effective participation of women in strategic sectors of the economy for a transformative and sustainable recovery with equality.
- 21.86 Expected progress towards the objective is presented in the performance measure below (see table 21.9).

⁴ See ECLAC, "Special Report COVID-19 No.9: The economic autonomy of women in a sustainable recovery with equality", February 2021.

Table 21.9
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
10 regulations related to care were approved in 8 countries of the region	At the fourteenth session of the Regional Conference on Women in Latin America and the Caribbean, and in accordance with paragraph 26 of the Santiago Commitment, Governments in the region agreed to take action towards the design of comprehensive care systems from a gender perspective to meet the different care needs of the population, as part of social protection systems	Peru approved a ministerial resolution that defines care work and establishes the bases for a national care system	At the fifteenth session of the Regional Conference on Women in Latin America and the Caribbean, progress is made regarding the public-private dialogue on the social organization of care, and national authorities agree on the need to move towards a development approach that places care at the centre	Countries in the region further strengthen and incorporate a gender perspective into the design of care-related normative frameworks

Deliverables

21.87 Table 21.10 lists all deliverables of the subprogramme.

Table 21.10
Subprogramme 5: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	12	12	14	6
1. Meetings of the Presiding Officers of the Regional Conference on Women in Latin America and the Caribbean	9	9	1	6
2. Subregional preparatory meetings in the Caribbean, South America and Central America	–	–	3	–
3. Session of the Regional Conference on Women in Latin America and the Caribbean	–	–	10	–
4. Meetings with agencies and organizations participating in the Gender Equality Observatory for Latin America and the Caribbean	3	3	–	–
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	1	1	1
5. On unpaid work and social protection of women; gender equality and sustainable development policies; and the economic and physical autonomy of women	1	1	1	1

Section 21 Economic and social development in Latin America and the Caribbean

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
Seminars, workshops and training events (number of days)	8	8	9	9
6. Training programme on public policies for gender equality for government agencies, the economic autonomy of women, planning for development with a gender perspective and gender statistics for government agencies	5	5	8	5
7. Meetings to consider priority issues emerging from the fourteenth and fifteenth sessions of the Regional Conference on Women in Latin America and the Caribbean on the evaluation of best practices and challenges in the implementation of gender mainstreaming policies, the promotion of an economic agenda for gender equality, the monitoring of the 2030 Agenda and the analysis of policies on gender equality and the autonomy of women	3	3	1	4
Publications (number of publications)	5	5	6	5
8. On gender analysis, including on gender mainstreaming policies, the economic and physical autonomy of women, poverty from a gender perspective, and the implementation of the Montevideo Strategy for Implementation of the Regional Gender Agenda within the Sustainable Development Framework by 2030	5	5	5	5
9. For the fifteenth session of the Regional Conference on Women in Latin America and the Caribbean	–	–	1	–
C. Substantive deliverables				
Consultation, advice and advocacy: advice to member States, upon request, on public policies for gender mainstreaming and institution-building, methodologies and tools for public policymaking, and on matters relating to the fulfilment of international agreements on gender equality.				
Databases and substantive digital materials: Gender Equality Observer for Latin America and the Caribbean website, and ECLAC website on gender statistics with data from household and time-use surveys and other sources.				

Subprogramme 6 Population and development

Objective

21.88 The objective, to which this subprogramme contributes, is to fully integrate population issues into development planning, policies and programmes of the countries of Latin America and the Caribbean.

Strategy

21.89 To contribute to the objective, the subprogramme will:

- (a) Provide national and local institutions with training on demographic analysis, population estimates and projections, generate knowledge on population and demographic trends in the region to underpin evidence-based policymaking and improve the use of census data, vital statistics and surveys through the generation of data and the development of procedures, computer programmes and information systems. In the context of the regional implementation of the 2030 Agenda, the main contributions will be related to Sustainable Development Goals 1, 3, 5, 7, 10 and 17;
- (b) Provide technical support in the follow-up to international agreements, including the Framework of Action for the follow-up to the Programme of Action of the International Conference on Population and Development beyond 2014, the Montevideo Consensus on Population and Development, the Madrid International Plan of Action on Ageing, 2002 and the Global Compact for Safe, Orderly and Regular Migration, with a gender-sensitive, disability and ethnic approach, and in the follow-up of the population-related targets of the 2030 Agenda;

- (c) Provide technical assistance in the planning, design, implementation and dissemination of population and housing censuses and in the inclusion of a sociodemographic perspective in public policies design and implementation at the national and local levels. Workshops and seminars will be held to facilitate South-South cooperation, networking and the sharing of successful experiences;
- (d) Conduct and disseminate applied research and analysis on key issues such as population ageing, adolescent fertility, persons with disabilities, international migration and the socioeconomic impact of demographic transition, including recommendations on how to reduce inequalities. Information and communication technologies will be used to reach the wider public;
- (e) Continue to play a leading role for the region in the United Nations Network on Migration and in other networks relevant to population issues such as the National Transfer Accounts network as well as work in close cooperation with other ECLAC subprogrammes and the subregional headquarters, and seek to foster synergies with other United Nations entities involved in the population cluster and other international and intergovernmental organizations;
- (f) Focus, where relevant, on the impact of the pandemic on different population groups and the need to consider those diverse situations in development planning as well as analyse and share evidence-based recommendations and national experiences through several formats, including virtual dialogues and training.

21.90 The above-mentioned work is expected to result in:

- (a) Enhanced monitoring of population trends by local and national authorities;
- (b) Increased use of demographic analysis, population estimates and other evidence for policymaking;
- (c) Timely information on the needs of various population groups experiencing disproportionate impacts from the COVID-19 pandemic and during recovery.

Programme performance in 2021

National statistical systems identified means to strengthen capacity to produce international migration data

- 21.91 The implementation of the 2030 Agenda and the Global Compact for Safe, Orderly and Regular Migration have raised the demand for the measurement of migration with accurate, granular and timely data. Increased migration and changes in migration patterns, as well as the many contributions migrants make to development in countries of origin and destination, require data disaggregated by migratory status. However, there are gaps in international migration data that hinder the implementation of follow-up international agreements and evidence-based decision-making. The subprogramme supported countries in the region in identifying gaps in statistical systems, provided technical assistance and facilitated the exchange of national experiences to inform public policymaking. It has also been promoting a coordinated integral perspective with a view to including all public data sources and the contribution of the academia. Furthermore, this work has considered a broad spectrum of stakeholders, including civil society organizations, to achieve a better understanding of the situation of regional migrants and their contributions to development.
- 21.92 Progress towards the objective is presented in the performance measure below (see figure 21.XVII).

Figure 21.XVII

Performance measure: number of countries in the region that have assessed the capacity of national statistical systems to produce international migration data required to implement and follow up international agreements

Planned results for 2023

Result 1: more countries have improved information to support policies to address migration in the region

Programme performance in 2021 and target for 2023

21.93 The subprogramme’s work contributed to the strengthened capacity of countries in the region to produce data and information to support the implementation and follow-up of the Global Compact for Safe, Orderly and Regular Migration (whose global review will be carried out in 2022) and the Montevideo Consensus on Population and Development (regional review also to be carried out in 2022), enabling 17 countries to present their first report on the implementation of the Global Compact and progress on chapter F of the Montevideo Consensus, which met the planned target.

21.94 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 21.11).

Table 21.11
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Countries prepare data and identify gaps for the first review of the implementation of the Global Compact for Safe, Orderly and Regular Migration	12 countries present their first report on the implementation of the Global Compact for Safe, Orderly and Regular Migration and progress on chapter F of the Montevideo Consensus	17 countries present their first report on the implementation of the Global Compact for Safe, Orderly and Regular Migration and progress on chapter F of the Montevideo Consensus	Countries in the region participate in the global review process with improved data	Countries of the region exchange experiences and lessons learned on migration data during the global follow-up of the Global Compact for Safe, Orderly and Regular Migration

Result 2: increased national capacities to prepare population estimates and projections at the subnational level

Programme performance in 2021 and target for 2023

- 21.95 The subprogramme’s work contributed to 11 countries updating their population estimates and projections at the national level and 9 countries at the subnational level, which met the planned target.
- 21.96 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 21.XVIII).

Figure 21.XVIII

Performance measure: number of countries that updated their population estimates and projections at the national and subnational levels, or other disaggregation (cumulative)

Result 3: innovative approaches to conducting censuses

Proposed programme plan for 2023

- 21.97 The COVID-19 pandemic affected many countries that had planned to conduct their censuses between 2020 and 2022, creating the need for innovative methodologies. The subprogramme identified innovations such as the use of the Computer-Assisted Personal Interviewing data collection method, self-registration on the web, and mobile data capture for field data collection and cartographic updates. Those innovations can increase the efficiency of the census process and improve the quality of data collected.

Lessons learned and planned change

- 21.98 The lesson for the subprogramme was the need to build capacity in critical aspects of the census process, including the adoption of technological innovations and their impact on future census phases, the definition of the questionnaire based on lessons learned, regional and international standards and recommendations, and the addition of emerging topics as a response to new demographic and social dynamics, including those related to the pandemic. In applying the lesson, the subprogramme will tailor its technical assistance towards strengthening national capacities related to censuses, facilitating the exchange of experiences and lessons learned among countries, promoting innovation in the various phases of the census (planning, cartographic update, data collection, data processing) and the operational and control management system, thereby improving technology and methodologies.

21.99 Expected progress towards the objective is presented in the performance measure below (see table 21.12).

Table 21.12
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Brazil, Costa Rica and Mexico incorporate innovations into the preparation of their 2020 censuses	Mexico carries out its census. Argentina, Brazil, Costa Rica, Chile, Ecuador, Panama and Venezuela (Bolivarian Republic of) postpone their census survey dates and begin to evaluate the adoption of innovations	Bolivia (Plurinational State of), Cuba, the Dominican Republic, Honduras and Paraguay evaluate the incorporation of innovations	Countries that carry out their census in 2022 incorporate innovations	Countries that carried out their censuses in 2022 incorporate innovations in the dissemination of the results Countries that carry out their census in 2023 incorporate innovations

Deliverables

21.100 Table 21.13 lists all deliverables of the subprogramme.

Table 21.13
Subprogramme 6: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	18	9	9	9
1. Session of the Regional Conference on Population and Development in Latin America and the Caribbean	9	–	9	–
2. Meetings of the Presiding Officers of the Conference	9	9	–	9
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	1	1	1
3. On migration; the socioeconomic impact of population dynamics; indigenous peoples and people of African descent; and ageing, including gender-sensitive analysis	1	1	1	1
Seminars, workshops and training events (number of days)	72	72	73	73
4. Meetings of experts on demographic change and its consequences for development, including issues related to indigenous people and people of African descent; ageing-related issues, persons with disabilities and migrants; the implementation of recommendations of the Regional Conference on Population and Development; and population censuses	8	8	5	5
5. Workshops on demographic analysis and projections; REDATAM ^a (information system on censuses); sociodemographic variables and emerging issues in development policies, programmes and projects; and population and development	16	16	20	20

7. Courses on quantitative analytical methods and techniques	4	4	4	4
Publications (number of publications)	9	9	8	8
8. On demography and on population and development	3	3	3	3
9. On demography and a gender perspective; demographic trends of indigenous people and people of African descent; sociodemographic trends of persons with disabilities; and population and development	5	5	5	5
10. On socioeconomic development in the provinces of Argentina	1	1	–	–
Technical materials (number of materials)	3	3	3	3
11. On population projection and censuses	1	1	1	1
12. On ageing and development and on REDATAM ^a	2	2	2	2

C. Substantive deliverables

Consultation, advice and advocacy: advice to member States, upon request, on population and development; data collection, demographic analysis and methodologies for population projections and estimates; consultation and advice on incorporation of sociodemographic variables into development policies, programmes and projects, including gender-sensitive analysis and considering different segments of the population; intergovernmental forums in the region on population and development issues; implementation of the Montevideo Consensus on Population and Development and the Regional Strategy for the Implementation in Latin America and the Caribbean of the Madrid International Plan of Action on Ageing, the 2030 Agenda for Sustainable Development and the Global Compact for Safe, Orderly and Regular Migration.

Databases and substantive digital materials: databases on demographic trends and population projections, spatial distribution and urbanization; indigenous peoples and peoples of African descent, maternity and migration; REDATAM software for the processing, analysis and dissemination of census data; and platform to follow up on the implementation of the Montevideo Consensus on Population and Development.

D. Communication deliverables

Digital platforms and multimedia content: subprogramme’s pages on the ECLAC website.

^a REDATAM is an acronym that stands for “retrieval of data for small areas by microcomputer”. REDATAM+SP (abbreviated R+SP) is the most recent version of the fourth generation of the software. It can be used in English, Portuguese or Spanish.

Subprogramme 7 Sustainable development and human settlements

Objective

- 21.101 The objective, to which this subprogramme contributes, is to ensure the integration and due consideration of environmental, climate and urban management concerns and opportunities in policymaking and policy implementation, with a rights-based approach and ensuring that no one is left behind.

Strategy

- 21.102 To contribute to the objective, the subprogramme will:
- (a) Enhance knowledge of the region’s economic, social and environmental profiles and continue to convene and involve national and subnational governments, academic institutions, civil society and other stakeholders to foster participatory decision-making;
 - (b) Assess the advances made by countries in integrating sustainability criteria into public policies, including monitoring the implementation of principle 10 of the Rio Declaration on Environment and Development, as stated in the Escazú Agreement, and providing support to the Forum of the Countries of Latin America and the Caribbean on Sustainable Development;

- (c) Strengthen national capacities to design and implement public policies for the sustainability of human settlements and the implementation of the 2030 Agenda, the New Urban Agenda, the nationally determined contributions under the Paris Agreement and the decisions taken within the framework of the Conference of the Parties to the United Nations Framework Convention on Climate Change;
- (d) Conduct the above-mentioned activities through research, resulting in the publication of studies, the organization of expert group meetings, seminars and workshops, and the provision of technical assistance to member States, upon request, towards the attainment of Sustainable Development Goals 11, 12, 13, 15 and 16;
- (e) Promote the creation of networks with a wide range of stakeholders in the environmental, economic and social sectors relevant to sustainable development, including government institutions, academia, civil society organizations, private sector representatives and relevant sectoral bodies;
- (f) Continue to hold consultations and undertake joint actions with the specialized agencies, funds and programmes of the United Nations system, including the resident coordinator system and the United Nations Human Settlements Programme (UN-Habitat), as well as with regional and subregional development banks;
- (g) Provide support on designing economic recovery plans, to support recovery from the COVID-19 pandemic, based on regional and national studies of specific economic sectors.

21.103 The above-mentioned work is expected to result in:

- (a) Well-designed policies that take into account the three pillars of sustainable development, including policies for sustainable development and environmental performance, policies to address the economics of climate change and policies that support sustainable and inclusive human settlements;
- (b) Sustainable development and climate change criteria effectively mainstreamed into all areas of government;
- (c) The design of guidelines for the implementation of economic plans towards a low-emission, more resilient economy that creates employment and stimulates economic well-being.

Programme performance in 2021

Strengthened climate action in Latin America and the Caribbean through support to the presidency of the twenty-fifth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change

21.104 During Chile's presidency of the twenty-fifth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, on behalf of the Latin America and Caribbean region, ECLAC provided support for 21 initiatives to strengthen regional climate action. In 2021, the subprogramme provided key technical assistance for the implementation of 9 initiatives, in addition to the 12 initiatives already developed in the preparatory year and in the first year of the presidency. The additional nine initiatives focused on issues related to the science-policy interface, subnational and private sector climate action, agriculture, gender equality and the empowerment of women, indigenous peoples and local communities, just transition, and hydrogen and the circular economy, all with regional reach. The initiatives showcased innovative aspects and advanced climate action, with renewed commitment by Latin American and Caribbean countries to continue enhancing their capacities in respect of those issues.

21.105 Progress towards the objective is presented in the performance measure below (see figure 21.XIX).

Figure 21.XIX
Performance measure: number of regional initiatives aimed at strengthening climate action implemented in Latin America and the Caribbean

Planned results for 2023

Result 1: improved information available for city planning in Latin American and Caribbean countries

Programme performance in 2021 and target for 2023

- 21.106 The subprogramme’s work contributed to full accessibility of the Urban and Cities Platform on the 33 countries of Latin America and the Caribbean⁵ and availability of additional content, such as national urban policies, existing financing instruments, and demographic data, which exceeded the planned target.
- 21.107 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 21.14).

Table 21.14
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Design of the Platform completed and content developed	Pre-launch of the Platform (World Urban Forum); launch of the Platform at the Regional Forum of the Latin American and Caribbean Countries on Sustainable Development	Urban and Cities Platform is fully accessible with substantive content on each of the 33 Latin American and Caribbean countries	Member States have access to additional content on the Platform, including for each of the 6 thematic areas addressed in the New Urban Agenda	Member States have access to additional content on the Platform, including policies for sustainability

⁵ <https://plataformaurbana.cepal.org/en>.

Result 2: big push for sustainability for a transformative and sustainable recovery in the context of the 2030 Agenda

Programme performance in 2021 and target for 2023

- 21.108 The subprogramme’s work contributed to two countries, Chile and Colombia, developing policy instruments for sustainable development, for example to estimate the social price of carbon in public investments, which met the planned target.
- 21.109 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 21.15).

Table 21.15
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Identification of selected sectors that drive sustainable development with low emissions	Member States have access to a comprehensive framework for a sustainable recovery	Chile and Colombia developed sustainable development policy instruments	2 additional countries in the region develop sustainable development strategies and/or policy instruments	2 additional countries in the region develop sustainable development strategies and/or policy instruments

Result 3: progress towards financial systems that address the challenge of climate change and support the implementation of the 2030 Agenda and the Sustainable Development Goals

Proposed programme plan for 2023

- 21.110 Well-developed and well-implemented policies towards making financial systems fit to deal with the challenges posed by climate change and to support the attainment of the Sustainable Development Goals in the aftermath of the COVID-19 pandemic are required. Such policies will provide the necessary jobs, economic growth and innovation while at the same time promoting a resilient, low-emission economy. The subprogramme has been tracking the evolution of climate finance in the region and disseminating that information in various forums such as in the thirty-third regional fiscal policy seminar.

Lessons learned and planned change

- 21.111 The lesson for the subprogramme was that there is growing demand for concrete case studies that illustrate how to mainstream environmentally sustainable parameters and criteria in financial practices, in particular for efforts to foster the recovery from the pandemic, that can support the national authorities in facing the current crisis and in developing adequate action plans. In applying the lesson, the subprogramme will support the design of public policy strategies and/or policy instruments towards the implementation of the 2030 Agenda and compliance with nationally determined contributions, at the national and subnational levels, and mainstream them into development and other action plans or regulatory instruments. The subprogramme will also generate evidence, facilitate discussion and provide technical assistance to support countries in their transition towards a financial system fit to address the challenges derived from climate change and support reaching a sustainable low-emission economy, overcoming the negative effects of the pandemic on the people and the economy in line with the 2030 Agenda and the Paris Agreement.
- 21.112 Expected progress towards the objective is presented in the performance measure below (see table 21.16).

Table 21.16
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	Countries in the region increased awareness of the need to incorporate climate change considerations into financial systems	Countries strengthen understanding on transitioning towards a financial system fit to address challenges derived from climate change	Two countries develop strategies/ policy instruments to incorporate climate change criteria and tools into the financial system

Deliverables

21.113 Table 21.17 lists all deliverables of the subprogramme.

Table 21.17
Subprogramme 7: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	12	12	21	21
1. Meetings of the General Assembly of Ministers and High-level Authorities of the Housing and Urban Development Sector in Latin America and the Caribbean	6	6	6	6
2. Meetings on the Regional Agreement on Access to Information, Public Participation and Justice in Environmental Matters in Latin America and the Caribbean	6	6	–	–
3. Meetings of the signatory countries to the Escazú Agreement	–	–	6	–
4. Meetings to strengthen regional cooperation and implementation on topics under the Escazú Agreement	–	–	–	6
5. Sessions of the Conference of the Parties to the Escazú Agreement	–	–	9	9

C. Substantive deliverables

Consultation, advice and advocacy: advice to member States, upon request, on environmental public policies related to sustainable development and urban sustainability, low-emission economies, risk reduction and adaptation to climate change, and strengthening national capacities; technical advice to national Governments and institutions, at their request, on assessing the progress made towards achieving sustainable development; consultation and advice to member States, upon request, on international commitments on access rights, including Conference of the Parties decisions and recommendations from the Committee to Support Implementation and Compliance of the Escazú Agreement.

Databases and substantive digital materials: databases on sustainable development, climate change and urban issues.

Subprogramme 8 Natural resources

Objective

- 21.114 The objective, to which this subprogramme contributes, is to improve the governance and enhance the sustainable use and exploitation of natural resources in Latin America and the Caribbean, focusing on water resources management, affordable, inclusive and clean energy, extractive resources efficiency, food security, sustainable agriculture and biodiversity.

Strategy

- 21.115 To contribute to the objective, the subprogramme will:
- (a) Continue to support countries of the region in the design of policies related to an increased participation of renewable sources of energy in the total supply of energy, water sustainability, sustainable energy transition and sustainable management of the water cycle;
 - (b) Provide technical assistance and disseminate best practices on the regulation, supply and sustainable use of water and renewable sources of energy, supporting member States in making progress towards the attainment of Sustainable Development Goals 6 and 7;
 - (c) Carry out studies on the governance of fossil and mineral resources (extractive resources), taking into consideration issues and challenges relating to the collection and use of resource rents, material efficiency and decoupling;
 - (d) Provide technical assistance and support multi-stakeholder dialogue, within the framework of more sustainable governance of the extractive industries, to foster clusters and value addition in those activities and their linkages to the rest of the economy;
 - (e) Promote the bioeconomy, agroecology and ecosystem-based solutions as new production development approaches for the sustainable utilization of biological resources (cultivated biomass and biodiversity and its components) and the full utilization of agricultural waste biomasses (including from primary production and processing of crops, livestock, forestry and aquaculture) as productive resources;
 - (f) Reinforce the coherence, integration and coordination of national and regional policies and institutions in agricultural development and biodiversity and provide technical assistance, upon request, to member States, on issues related to sustainable agriculture, bioeconomy development and sustainable use of biodiversity and genetic resources, supporting member States in making progress towards the achievement of Goals 2, 8, 9, 12, 13, 14 and 15;
 - (g) Provide technical support to member States on issues of food security and the role of sustainable and resilient food systems (in particular in the context of the United Nations Food Systems Summit process), and the role of the bioeconomy for sustainable recovery;

- (h) Create awareness of the impacts of COVID-19 on access to basic services as well as the role of extractive industries during the period after the pandemic.

21.116 The above-mentioned work is expected to result in:

- (a) Improved access to clean and affordable energy and water;
- (b) Industrial cluster, value addition and linkage initiatives in the mineral and hydrocarbon sectors;
- (c) Enhanced design and implementation of bioeconomy-related policies and strategies for sustainable agricultural and rural development, and the conservation, knowledge and sustainable use of biodiversity;
- (d) Strengthened analysis by member States of water and energy access indicators, food security and food systems data and contributions of the bioeconomy, enabling improved long-term planning and the development of evidence-based policies.

Programme performance in 2021

Enhanced capabilities of countries in the region to measure energy poverty

21.117 Following the development by the subprogramme of a methodological proposal to measure lack of adequate access to energy and water in 2020, and its subsequent presentation to national authorities, the subprogramme launched the first regional assessment to measure energy poverty. The subprogramme also provided technical support to Argentina, Panama and Uruguay on the measurement of adequate access to energy. As a result, countries in the region have enhanced their understanding of the multidimensional nature of the issue and strengthened their capabilities to initiate the process of measuring it at the national level.

21.118 Progress towards the objective is presented in the performance measure below (see figure 21.XX).

Figure 21.XX

Performance measure: number of countries that have initiated measurement of energy poverty (cumulative)

Planned results for 2023

Result 1: development of the regional potential for bioeconomy

Programme performance in 2021 and target for 2023

21.119 The subprogramme’s work contributed to the development of a national bioeconomy strategy by the National Secretariat of Science and Technology of Guatemala and the development of a novel bioeconomy satellite account pioneered by the Council of Environment Accounts of Costa Rica, which met the planned target of four Latin American and Caribbean countries having initiated the development of national bioeconomy strategies or initiatives.

21.120 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 21.XXI).

Figure 21.XXI

Performance measure: number of Latin American and Caribbean countries that have initiated the development of national bioeconomy strategies and bioeconomy-related initiatives (cumulative)

Result 2: enhanced regional capacities for value addition and linkages in the mining sector

Programme performance in 2021 and target for 2023

21.121 The subprogramme’s work contributed to the creation of a lithium technical forum among Argentina, Bolivia (Plurinational State of) and Chile to discuss the possibilities of technological exchange and industrialization related to lithium exploitation, explore a longer-term collaboration among these countries and develop a platform to generate capacities for value addition and trigger linkages in lithium mining, which met the planned target of one measure adopted to promote value addition and productive linkages in the mining sector.

21.122 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 21.XXII).

Figure 21.XXII

Performance measure: number of measures adopted by countries in the region to promote value addition and productive linkages in the mining sector (cumulative)

Result 3: enhanced regional capacities for adopting a water management transition

Proposed programme plan for 2023

21.123 The Latin America and the Caribbean region presents high levels of water stress, limited access to drinking water and sanitation, poor wastewater treatment, low levels of integrated water management, increasing water pollution, growing water disasters and conflicts over water distribution and usage. The subprogramme has been promoting a transition towards sustainable and inclusive water management that seeks to guarantee the realization of the human right to safe drinking water and sanitation, reverse the current inequalities of access and costs, eliminate the negative externalities and implement a sustainable management of water.

Lessons learned and planned change

21.124 The lesson for the subprogramme was the need to respond to an increasing demand for and interest in transitioning from current water governance and management systems to a more sustainable and integrated management of water resources through enhanced capacities, coordination, and participation mechanisms for formulating water policies. In applying the lesson, the subprogramme will promote multi-stakeholder dialogues and studies fostering a water management transition in the countries in the region. In addition, the subprogramme will support the strengthening of water governance systems through the provision of technical assistance, upon request, on water policies and fair tariffs, the elaboration of analyses of regional investment requirements to attain Sustainable Development Goal 6, the conduct of policy dialogues for integrated water management and the organization of seminars and training programmes on water management.

21.125 Expected progress towards the objective is presented in the performance measure (see figure 21.XXIII).

Figure 21.XXIII

Performance measure: number of initiatives developed by countries in the region to implement more sustainable and inclusive water governance and management systems (annual)

Deliverables

21.126 Table 21.18 lists all deliverables of the subprogramme.

Table 21.18

Subprogramme 8: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	2	2	3
1. On energy, natural resources governance, the water-energy-food nexus and non-renewable natural resources; social equality; environmental sustainability; agrifood systems; and bioeconomy, ecosystem-based solutions and biodiversity	2	2	2	3
Seminars, workshops and training events (number of days)	15	15	15	17
2. Meetings of experts on sustainable water and energy management; public policies linked to the governance of natural and extractive resources; environmental sustainability; agrifood systems; and bioeconomy, ecosystem-based solutions and biodiversity	6	6	6	8
3. Training and courses for public and private sector officials involved in agriculture, bioeconomy, ecosystem-based solutions and biodiversity, water, renewable sources of energy and the management of natural and non-renewable resources	9	9	9	9

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
Publications (number of publications)	10	10	8	9
4. <i>The Outlook for Agriculture and Rural Development in the Americas: A Perspective in Latin America and the Caribbean</i>	1	1	–	1
5. On issues relating to water resources and the nexus with other sectors; energy integration; governance of natural resources; natural resources and development; extractive industries; biophysical trade; environmental sustainability; agrifood systems; and bioeconomy, ecosystem-based solutions and biodiversity	9	9	8	8
Technical materials (number of materials)	1	1	2	1
6. Bulletin on natural resources for sustainable development in Latin America and the Caribbean	1	1	2	1

C. Substantive deliverables

Consultation, advice and advocacy: advice to member States, upon request, on natural resources and to business and trade promotion organizations and other key stakeholders on the design and implementation of policies and strategies for sustainable agricultural and rural development and bioeconomy, in areas related to water and energy public policies and non-renewable natural resources.

Subprogramme 9 Planning and public management for development

Objective

- 21.127 The objective, to which this subprogramme contributes, is to enhance planning and public management processes in the region for the advancement of equitable and sustainable development.

Strategy

- 21.128 To contribute to the objective, the subprogramme will:
- (a) Continue to promote the application of new methodologies, instruments and conceptual frameworks to strengthen capacities of government officials in the whole cycle of public management, including foresight, strategic and territorial planning, monitoring and evaluation of plans and public policies for participatory planning and public management by Governments while fostering high-quality public investment and strong linkages between development and sector-based plans and budgets;
 - (b) Encourage cooperation, peer-to-peer learning and the sharing of experiences and good practices in planning and public management through the provision of technical cooperation services and training and by conducting applied research, helping countries in the region to make progress towards the attainment of Sustainable Development Goals 5, 11, 13, 16 and 17;
 - (c) Enhance regional capacities for building institutional resilience to cope with challenges posed by internal and external crises produced by natural disasters and/or human activities, such as pandemics, climate change impacts, social and political disruption and economic shocks.
- 21.129 The above-mentioned work is expected to result in:
- (a) Effective, inclusive and strategic institutions and planning processes that prioritize comprehensive development through medium- and long-term visions;
 - (b) Reduced structural gaps by enhancing citizens' participation and accountability, and the strengthening of territorial governance, planning and management in public policy processes;
 - (c) Strengthened capacities in Latin American and Caribbean institutions to withstand deep disruption and ensure continuity of basic services while enhancing preparedness and

responsive, adaptive and transformational institutional capacities, at both the national and subnational levels.

Programme performance in 2021

National policy for regional development in Costa Rica designed and adopted

- 21.130 In the past three years, the Ministry of National Planning and Economic Policy of Costa Rica has consolidated the legal and institutional frameworks, as well as the capacity-building of its technical teams, to carry out subnational development processes to reduce territorial inequalities within regions of the country. The Ministry had the mandate to design a national regional development policy that would constitute a road map for public policies to be implemented in each of the country's regions. The policy would need to be aligned with the National Development Plan and take into consideration the current legal framework, convergent public policies and the instruments required to make the policy a reality. The subprogramme closely supported national authorities in that process through training on territorial planning for the Ministry's technical teams, both at the central level and from the different regions of the country, through technical support to conduct four baseline studies needed for the design of the regional development policy and through the provision of technical assistance to the Ministry in the development of the policy. The process concluded with the approval in October 2021 of the Law on Regional Development (No. 22.363).
- 21.131 Progress towards the objective is presented in the performance measure below (see table 21.19).

Table 21.19

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
35 national and regional officials with strengthened capacities in issues related to regional development	Costa Rica analysed territorial gaps and policies to promote regional development, including financing issues and the resources needed for the development of a national territorial information system	Law on Regional Development (No. 22.363) of Costa Rica approved

Planned results for 2023

Result 1: enhanced capacities for effective strategies for the achievement of national and subnational development goals in countries of the region within the framework of the 2030 Agenda

Programme performance in 2021 and target for 2023

- 21.132 The subprogramme's work contributed to the implementation of subnational development strategies and policies by two countries (Costa Rica and Paraguay) and strengthened the application of a results-based management methodology to implement sustainable development strategies by three countries (Dominican Republic, Panama and Paraguay), which met the planned target.
- 21.133 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 21.20).

Table 21.20
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)

Result 2: building institutional resilience to face internal and/or external shocks**Programme performance in 2021 and target for 2023**

- 21.134 The subprogramme's work contributed to planning authorities in the region identifying the main issues for building institutional resilience and strengthening their capacity in this area to link short-term emergency responses with long-term policies, which met the planned target.
- 21.135 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 21.21).

Table 21.21
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	Planning authorities in the region address the importance of building institutional resilience and request the subprogramme to develop an analytical framework that contributes to building institutional resilience	Planning authorities and technical teams identified main issues for building institutional resilience and started the discussion on how to strengthen capacities in that area	3 countries adopt approaches for building resilient institutions and strengthening capacities in their national planning and public management systems	2 countries improve the resilience of institutions participating in their planning systems by strengthening their foresight capacities and the collective and participatory appropriation of future scenarios

Result 3: strengthened foresight capacities in national planning systems**Proposed programme plan for 2023**

21.136 The impact of the pandemic has highlighted the importance of mainstreaming foresight capacities into national planning systems to anticipate and respond to new crises with public participation, openness and transparency. It also stressed the importance of taking into account the syndemic nature of many threats and adopting an integrated approach for planning for development. The subprogramme has been working in areas related to foresight and collective design and appropriation of future country scenarios and providing support to countries in the region in those matters.

Lessons learned and planned change

21.137 The lesson for the subprogramme was the need for its capacity-building activities to take into account the above-mentioned challenges posed by the pandemic. In applying the lesson, the subprogramme will increase its focus on providing capacity-building support to strengthen the foresight capacities of national planning systems and ensure integrated approaches to development planning. In doing so, the subprogramme will use a combination of modalities that reinforce each other, namely, technical support, capacity-building and training activities and applied research. Peer-to-peer learning will also be used in specific cases and upon request.

21.138 Expected progress towards the objective is presented in the performance measure below (see figure 21.XXIV).

Figure 21.XXIV

Performance measure: number of countries with strengthened foresight capacities (cumulative)**Deliverables**

21.139 Table 21.22 lists all deliverables of the subprogramme.

Databases and substantive digital materials: Regional Observatory of Planning for Development in Latin America and the Caribbean; technical manuals and software that support training (in situ and e-learning) and technical assistance activities; and databases on planning and public management for development in Latin America and the Caribbean.				

Subprogramme 10 Statistics

Objective

- 21.140 The objective, to which this subprogramme contributes, is to improve the production, dissemination and use of statistics for evidence-based decision-making in the region.

Strategy

- 21.141 To contribute to the objective, the subprogramme will:
- (a) Provide specialized advisory services and online and face-to-face training courses, expert meetings and seminars, as well as technical assistance related to the development of basic statistics and institutional coordination mechanisms in areas of national accounts, basic economic statistics and price statistics; environmental statistics, climate change and disaster risk reduction statistics; household survey design and implementation; poverty and inequality measurement; integration of statistical and geospatial information systems; and national coordination mechanisms for Sustainable Development Goal monitoring. Special emphasis will be placed on coordination with agencies and international organizations to avoid the duplication of efforts and maximize the complementarity of activities;

- (b) Continue to compile and harmonize a large number of economic, environmental and social statistics and indicators, as well as its regional household survey databank (BADEHOG), and disseminate them through CEPALSTAT, the Statistical Yearbook and the regional Sustainable Development Goal gateway;
- (c) Develop, adapt, translate and implement statistical methodologies, standards and recommendations;
- (d) Reinforce the strategic and decision-making role of the Statistical Conference of the Americas of ECLAC and continue to provide technical secretariat services to the Conference and its various working groups, ensuring that their work is consistent with regional priorities;
- (e) Emphasize the joint implementation of projects and initiatives and work in close cooperation with other ECLAC offices and divisions, as well as bilateral and multilateral partners;
- (f) In the light of COVID-19, encourage the development and adoption of more resilient methodologies for data collection and the production of statistics, such as strengthening the use of administrative records and non-traditional data sources, adopting new modes of data collection and integration of different data sources, and building capacity in nowcasting methods.

21.142 The above-mentioned work is expected to result in:

- (a) Production of reliable economic, social and environmental statistics and new indicators in emerging areas and the improvement of non-traditional sources of information;
- (b) Increased availability of regionally comparable data, which are required as a benchmark for regional statistical development;
- (c) Greater regional coordination, leading to increased use of statistics at the regional and national levels;
- (d) Increased capacities in member countries for the continued production of statistics in situations similar to the COVID-19 pandemic.

Programme performance in 2021

Strengthened integration of statistical and geospatial information in national statistical systems

21.143 In response to the Declaration on the Integration of Statistical and Geospatial Information between the Statistical Conference of the Americas of the Economic Commission for Latin America and the Caribbean and the Regional Committee of United Nations Global Geospatial Information Management for the Americas, during the past three years, the subprogramme assisted countries in strengthening the joint work between national statistics offices and national geospatial information agencies. The integration of statistical and geospatial data helped to provide relevant inputs to inform data-driven and evidence-based decision-making in support of local, subnational, national, regional and global development priorities and agendas, such as the 2020 round of population and housing censuses and the 2030 Agenda. The support delivered has been aligned with the guidance provided by the Committee of Experts on Global Geospatial Information Management through the Global Statistical Geospatial Framework. Along with providing technical assistance, the subprogramme has been monitoring the progress in the processes of collaboration between national statistics offices and national geospatial information agencies, noting relevant improvements during the period 2019–2021. The number of countries in which national statistics offices and national geospatial information agencies are working in a coordinated manner or under a formal agreement increased from seven countries in 2019 to 19 countries in 2021. Ongoing projects undertaken by ECLAC regarding the implementation of national statistical geoportals and the establishment of national geostatistical frameworks in selected countries in the region have contributed to that result.

21.144 Progress towards the objective is presented in the performance measure below (see figure 21.XXV).

Figure 21.XXV

Performance measure: number of countries in which national statistics offices and national geospatial information agencies work in a coordinated manner or under a formal agreement

Planned results for 2023

Result 1: revamped ECLAC regional statistical portal (CEPALSTAT)

Programme performance in 2021 and target for 2023

21.145 The subprogramme’s work contributed to an increase in the percentage of users who consider CEPALSTAT data useful for their work to 88 per cent, which exceeded the planned target of 86 per cent.

21.146 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 21.XXVI).

Figure 21.XXVI

Performance measure: percentage of users who consider CEPALSTAT data useful for their work

Result 2: strengthened capacities of Latin American and Caribbean countries to produce relevant environment, climate change and disaster indicators

Programme performance in 2021 and target for 2023

21.147 The subprogramme’s work contributed to 270 national trained practitioners acknowledging that they have strengthened their skills to produce relevant internationally agreed environment, climate

change and disaster statistics, which exceeded the planned target of 159 national trained practitioners.

21.148 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 21.XXVII).

Figure 21.XXVII

Performance measure: number of national trained practitioners that acknowledge that they have strengthened their skills to produce relevant internationally agreed environment, climate change and disaster statistics (cumulative)

Result 3: increased capacities to produce disaggregated Sustainable Development Goal indicators to leave no one behind

Proposed programme plan for 2023

21.149 As a central principle of the 2030 Agenda, leaving no one behind is crucial to the implementation of the Sustainable Development Goals and overcoming the inequalities that characterize the Latin America and the Caribbean region. Traditional data sources used by countries to produce Sustainable Development Goal social indicators face limitations with regard to disaggregation of information by relevant population groups. The subprogramme has developed learning materials and published knowledge products on “small area estimation” methodologies that allow the production of disaggregated Sustainable Development Goal poverty indicators by combining household surveys with other data sources.

Lessons learned and planned change

21.150 The lesson for the subprogramme was that it needed to meet the demand for capacity-building on small area estimation methodologies, which has been higher and more varied than originally expected, with requests for technical assistance to disaggregate not only poverty indicators but also other social indicators on several topics. In applying the lesson, the subprogramme will expand its technical assistance activities to include new Sustainable Development Goal indicators and additional beneficiaries, such as ministries overseeing social issues, in addition to the national statistics offices.

21.151 Expected progress towards the objective is presented in the performance measure below (see figure 21.XXVIII).

Figure 21.XXVIII

Performance measure: number of national trained practitioners with improved capacity to apply small area estimation techniques to produce disaggregated statistics (cumulative)

Deliverables

21.152 Table 21.23 lists all deliverables of the subprogramme.

Table 21.23

Subprogramme 10: deliverables for the period 2021–2023, by category and subcategory

C. Substantive deliverables

Consultation, advice and advocacy: advice to member States, upon request, on environment, climate change and disaster statistics and indicators; economic statistics; household surveys, poverty, inequality and other social statistics; geospatial information; and follow-up of the 2030 Agenda.

Databases and substantive digital materials: the statistical information system and databases (CEPALSTAT) (800,000 annual visits); and the household survey database (BADEHOG).

**Subprogramme 11
Subregional activities in Central America, Cuba, the Dominican Republic,
Haiti and Mexico**

Objective

- 21.153 The objective, to which this subprogramme contributes, is to improve the formulation of evidence-based public policies in the economic, social and environmental fields in the countries in the subregion.

Strategy

- 21.154 To contribute to the objective, the subprogramme will support the implementation of national development agendas and strategic reforms towards generating economic and social impacts, and social compacts for equality benefiting those in vulnerable situations in the countries of Central America, Cuba, the Dominican Republic, Haiti and Mexico. Special emphasis will be placed on economic and social development, international trade, industry and integration, agriculture, food security and rural development, energy and natural resources, and climate change, thus contributing to Sustainable Development Goals 1, 2, 7, 8, 10, 13 and 17. Specifically, the subprogramme will:
- (a) Undertake analytical work to foster the generation, dissemination and implementation of innovative and sound approaches to address the subregion’s development challenges and build national and subregional capacities to formulate more integrated and coherent policies, taking into full consideration the different national contexts in the subregion;
 - (b) Continue to strengthen its multisectoral and interdisciplinary approach by maintaining and updating relevant databases and developing quantitative and qualitative analytical models;
 - (c) Provide training activities, advisory services and fellowships as well as organize and promote forums in the areas of economic, social and environmental public policies;
 - (d) Actively collaborate with the United Nations resident coordinator system and United Nations country teams in the subregion, providing inputs for the formulation of the United Nations Sustainable Development Cooperation Frameworks;
 - (e) Conduct research and deliver technical advice oriented towards measuring the impact of the pandemic and towards designing and implementing public policy for socioeconomic recovery.
- 21.155 The above-mentioned work is expected to result in:
- (a) The design, implementation and evaluation of effective public policies, including those focused on fiscal matters, trade and integration, energy, agriculture, food security, social protection and climate change;
 - (b) Better measurement of the impacts of the pandemic, with public policies oriented towards the socioeconomic recovery from those impacts.

Programme performance in 2021

Non-discriminatory policy design to mitigate the effects of the pandemic on those in vulnerable situations

21.156 Since 2020, the subprogramme has been providing technical assistance to member States on the design of non-discriminatory public policies, as analyses have shown that such policies are crucial to mitigate the negative effects of the pandemic on those in vulnerable situations. These efforts have focused on four main areas, namely, health and care, social cohesion, education and financial inclusion. In the health and care sectors, the subprogramme provided technical assistance on the design of a national health policy to the National Council for the Prevention of Discrimination of Mexico; and within the framework of technical assistance to the Vice-Presidency of Costa Rica, training on the human rights of older persons was attended by policymakers and civil society representatives from 14 countries in the region. With regard to social cohesion, the subprogramme supported the design of local public policies for seven municipalities in the Mexico-Guatemala border region. Technical assistance was also provided to the Secretariat of Public Education of Mexico on the design of a policy concerning intercultural education in higher education. The subprogramme also launched several studies on financial inclusion.

21.157 Progress towards the objective is presented in the performance measure below (see figure 21.XXIX).

Figure 21.XXIX

Performance measure: number of public institutions with strengthened capacity to design non-discriminatory policy

Planned results for 2023

Result 1: strengthened technical dialogue for new development strategies in Central America

Programme performance in 2021 and target for 2023

21.158 The subprogramme's work contributed to seven countries (Costa Rica, Dominican Republic, El Salvador, Guatemala, Honduras, Nicaragua, and Panama) developing studies on growth, investment and productivity, which exceeded the planned target of six countries.

21.159 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 21.XXX).

Figure 21.XXX
Performance measure: number of countries with studies on growth, investment and productivity (annual)

Result 2: strengthened institutional capacities for designing public investments that incorporate disaster risk reduction and sustainable and inclusive adaptation to climate change

Programme performance in 2021 and target for 2023

- 21.160 The subprogramme’s work contributed to public investment systems in two countries (Nicaragua and Panama) having strengthened the design of projects, incorporating the criteria related to disaster risk reduction and sustainable and inclusive adaptation to climate change in the water, energy and agriculture sectors, which met the planned target.
- 21.161 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 21.XXXI).

Figure 21.XXXI
Performance measure: number of countries with public investment systems strengthening project design with disaster risk reduction and sustainable and inclusive adaptation to climate change in at least one sector (annual)

Result 3: strengthened technical capacities of national and regional institutions to design better public policies for development focused on the role of the State

Proposed programme plan for 2023

21.162 Despite the crisis and negative impacts that have emerged owing to COVID-19, recovery from the pandemic can be leveraged as an opportunity for aligning policies to fulfil the Sustainable Development Goals, leaving no one behind. The importance of the State, multilateralism, regional development, financing and debt relief will be crucial. The subprogramme has been conducting research on the lessons learned from States’ responses to the pandemic in the subregion.

Lessons learned and planned change

21.163 The lesson for the subprogramme was the need to have a greater analytical focus on the importance of the State in providing timely policy responses to economic and social issues. In applying the lesson, the subprogramme will undertake additional efforts to provide Governments in the subregion with more analysis on the crucial role of the State in addressing disruptive shocks, such as the pandemic, and mitigating their impact on the well-being of populations. It will work to disseminate policy proposals and recommendations on the importance of the engagement of the State through different national and regional institutions, strengthening their technical capacities for designing strong public policies and multi-country initiatives.

21.164 Expected progress towards the objective is presented in the performance measure below (see figure 21.XXXII).

Figure 21.XXXII

Performance measure: number of public institutions with strengthened technical capacity to design public policies for development focused on the role of the State (annual)

Deliverables

21.165 Table 21.24 lists all deliverables of the subprogramme.

Table 21.24

C. Substantive deliverables				
Consultation, advice and advocacy: advice to member States, upon request, on macroeconomic and macroprudential policies, the 2030 Agenda, social development issues, trade, sectoral policy, energy and climate change.				
Databases and substantive digital materials: databases on economic statistics and national accounts, social indicators, the agricultural sector and food security, trade integration, the hydrocarbon and electricity sectors and climate change in the subregion.				

Subprogramme 12

Subregional activities in the Caribbean

Objective

- 21.166 The objective, to which this subprogramme contributes, is to strengthen the sustainable development process in the Caribbean in the economic, social and environmental dimensions and to enhance the subregion's cooperation with Latin America.

Strategy

- 21.167 To contribute to the objective, the subprogramme will:
- (a) Continue to engage ECLAC member States, regional and extraregional entities and other partners in regional and country-specific initiatives and convene high-level intergovernmental and technical meetings related to the follow-up to global and regional initiatives and conferences, including the 2030 Agenda and the Sustainable Development Goals, as well as to explore and articulate strategies and approaches towards sustainable development based on practical research and empirical and conceptual frameworks of analysis;

- (b) Support Caribbean countries, through technical missions and advisory services, in the development of evidence-based policies that promote sustainable development, contributing to the attainment of Sustainable Development Goals 3, 4, 5, 8, 9, 13 and 14;
- (c) Undertake research and analysis on emerging issues and challenges facing the Caribbean;
- (d) Build the capacities of development practitioners and decision makers in designing and implementing resilience-building measures for durable development that are inclusive of the special situation of women and persons with disabilities, in close cooperation with United Nations entities and Caribbean development partners;
- (e) Orient its research, in the light of COVID-19, towards providing focused policy and technical advice to tourism-dependent economies.

21.168 The above-mentioned work is expected to result in:

- (a) Increased effective subregional and regional engagement and consensus, functional cooperation and enhanced political advocacy on issues critical to the development of the Caribbean;
- (b) Advancement of the implementation of national and subregional strategies and programmes;
- (c) Caribbean tourism-based economies better able to facilitate resilient recovery in specific tourism-related sectors following the COVID-19 pandemic.

Programme performance in 2021

Modernized Caribbean national statistical legislation

21.169 Deficiencies in national statistical legislation constitute a major obstacle to the timely production and dissemination of quality, disaggregated data to inform sustainable development planning and policies in the Caribbean. The subprogramme provided technical assistance to Trinidad and Tobago in the drafting of its new National Statistical Institute Bill. This activity prompted a review of the statistical legislation frameworks of Caribbean countries and resulted in the ECLAC study “A review of Caribbean national statistical legislation in relation to the United Nations Fundamental Principles of Official Statistics”, which called for Caribbean countries to review their statistical legislation with a view to bringing them up to date. This call resonated with CARICOM and a revised CARICOM Statistics Model Bill was adopted to serve as the template for the Statistics Act of most CARICOM member States. The revision is a positive development in setting a modern and up-to-date template for national statistical legislation that is designed to remove legal impediments to the timely production of quality, disaggregated data and statistics in the subregion.

21.170 Progress towards the objective is presented in the performance measure below (see table 21.25).

Table 21.25
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
Ministry of Planning and Development of Trinidad and Tobago drafted national statistical legislation designed to usher in a new National Statistical Institute of Trinidad and Tobago and replace the country’s outdated Statistics Act	Caribbean countries improved understanding of the strengths and weaknesses of Statistics Acts and Ordinances of Caribbean countries	The Standing Committee of Caribbean Statisticians, the decision-making body of national statistics offices of the Caribbean, adopted a revised Statistical Model Bill at its 46th meeting, held in October 2021, which provides an up-to-date template for national statistical legislation in the Caribbean

Planned results for 2023

Result 1: more countries with Sustainable Development Goal institutional frameworks to strengthen their sustainable development processes

Programme performance in 2021 and target for 2023

- 21.171 The subprogramme's work contributed to the establishment of an institutional framework for the Sustainable Development Goals by an additional country, resulting in 94 per cent of Caribbean countries with formalized Sustainable Development Goal institutional frameworks, which exceeded the planned target of 81 per cent.
- 21.172 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 21.XXXIII).

Figure 21.XXXIII

Performance measure: percentage of Caribbean countries with formalized Sustainable Development Goal institutional frameworks

Result 2: sustainable recovery from the COVID-19 pandemic through economic restructuring and diversification

Programme performance in 2021 and target for 2023

- 21.173 The subprogramme's work contributed to Caribbean member States having access to a road map to begin economic restructuring and diversification in selected priority sectors such as tourism, creative industries, information and communications technology (ICT) and knowledge-based services, which met the planned target.
- 21.174 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 21.26).

Table 21.26
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	Member States have access to research on the potential impact of the COVID-19 pandemic on Caribbean economies	Caribbean member States have access to a road map to begin economic restructuring and diversification in selected priority sectors	2 Caribbean countries develop proposals for investing in new or existing sector niches and segments	4 Caribbean countries develop proposals for diversification into key goods and services sectors

Result 3: sourcing and leveraging financing for development through innovative instruments and mechanisms

Proposed programme plan for 2023

- 21.175 As a group of mainly middle-income countries, the Caribbean has very limited access to international concessional financing to advance its development. Furthermore, high debt burdens and low credit ratings have limited access to international financial markets. Therefore, the subregion needs to source, leverage and scale innovative financing, including blended finance, public-private partnership arrangements, broad-based resilience funding mechanisms, debt for climate swaps and impact investing to achieve the step change in financing that is required to achieve the Sustainable Development Goals. The subprogramme took steps towards establishing the Caribbean Resilience Fund, a financing vehicle intended to leverage long-term low-cost development financing for the Caribbean. The steps included the production of a report that lays out the possible structure of the Resilience Fund and provides a road map for its establishment.

Lessons learned and planned change

- 21.176 The lesson for the subprogramme was that it was critical to get early buy-in from high-level government officials and key private sector partners in advancing concrete financing vehicles to increase the pool of innovative financing for development. In applying the lesson, the subprogramme will place greater focus on securing the support of high-level government officials in obtaining the baseline data in pilot countries. In addition, private sector partners, including development financing institutions, will be engaged as early as possible to obtain their practical perspectives on what institutional and operational arrangements might work best to deliver additional finance and to improve its efficiency and effectiveness for high-impact sectors and activities.
- 21.177 Expected progress towards the objective is presented in the performance measure below (see table 21.27).

Table 21.27

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	Draft of the structure, operation and governance of the Caribbean Resilience Fund available to Caribbean countries for review	Endorsement of the structure, operation and governance of the Caribbean Resilience Fund by key stakeholders	Road map for operationalizing the windows of the Caribbean Resilience Fund finalized for pilot country implementation	1 Caribbean country has initiated a debt swap/debt restructuring with creditors and/or private investors

Deliverables

21.178 Table 21.28 lists all deliverables of the subprogramme.

Table 21.28

Subprogramme 12: deliverables for the period 2021–2023, by category and subcategory

13. <i>FOCUS</i> magazine	4	4	4	4
C. Substantive deliverables				
Consultation, advice and advocacy: advice to member States, upon request, on ICT for development, economic policies and integration, gender equality and social and population development, environmental development, and disaster preparedness and risk reduction.				
Databases and substantive digital materials: knowledge repository, knowledge society toolkit, database on statistical indicators and database on natural disasters.				
D. Communication deliverables				
Outreach programmes, special events and information materials: community outreach events.				
External and media relations: news items, <i>The Hummingbird</i> newsletter, media events, and television and radio interviews with ECLAC Caribbean staff.				
Digital platforms and multimedia content: ECLAC Caribbean website, Facebook page and LinkedIn page.				
Library services: information requests, library catalogue, interlibrary loans and services, and book displays (virtual).				

**Subprogramme 13
Support for regional and subregional integration and cooperation processes
and organizations**

Objective

- 21.179 The objective, to which this subprogramme contributes, is to enhance regional and subregional integration processes in order to foster their convergence and the participation of the region through common positions in interregional and global political dialogues in support of the 2030 Agenda.

Strategy

- 21.180 To contribute to the objective, the subprogramme will:
- (a) Promote coordination and cooperation within and among member States and associate members, subregional and regional entities, the resident coordinator system, United Nations agencies, funds and programmes, the private sector, civil society organizations (including the business community), academic institutions, extraregional stakeholders and other third parties through technical, logistical and substantive contributions to subregional and regional initiatives;

- (b) Support the development of joint regional positions in multilateral forums and global conferences in connection with important events, such as the meetings of CELAC, the Central American Integration System, the Southern Common Market, the Pacific Alliance, CARICOM, the Association of Caribbean States, the Organization of Eastern Caribbean States and other integration mechanisms that will report to the Forum of the Countries of Latin America and the Caribbean on Sustainable Development;
 - (c) Provide technical cooperation and advisory services, upon request, and training activities;
 - (d) Promote the sharing of knowledge and experiences to support the achievement of sustainable development, as well as promote discussions on shared targets, mainstreaming a gender perspective and in line with the Caribbean First strategy of the Commission;
 - (e) Promote multilateral cooperation, in the context of integration schemes and organizations in the region, and help the region to move towards the attainment of the Sustainable Development Goals, in particular Goals 16 and 17.
- 21.181 The above-mentioned work is expected to result in:
- (a) Reduced regional asymmetries and increased South-South and triangular cooperation initiatives;
 - (b) Common positions in support of the implementation of the 2030 Agenda;
 - (c) Active engagement by member States in regional and subregional integration processes and their strategic positioning at the global level;
 - (d) International cooperation to overcome the challenges posed by the pandemic.

Programme performance in 2021

Strengthened institutionalization of South-South cooperation in Latin America and the Caribbean

- 21.182 The subprogramme has been working over the years to deepen South-South and triangular cooperation among ECLAC member states, aiming at the implementation of the 2030 Agenda, as well as promoting discussions on the outcomes of the second High-level United Nations Conference on South-South Cooperation, held in Buenos Aires in March 2019 to reinvigorate the United Nations development system. In that context, the subprogramme has been serving as the technical secretariat for the Committee on South-South Cooperation of ECLAC and, in response to requests by member States, has been producing substantive materials for the Committee, contributing to increased awareness of the importance of South-South cooperation and supporting the discussion in that regard with timely and accurate data and analysis.
- 21.183 In 2020, ECLAC member States outlined the need for institutional changes to strengthen South-South cooperation in the region. That led to the transformation of the Committee into the Regional Conference on South-South Cooperation in Latin America and the Caribbean, as a standing subsidiary body of ECLAC, providing a space to facilitate cooperation and peer-to-peer learning based on comparative experiences aimed at reaching broader agreements and substantively discuss issues pertaining to South-South cooperation.
- 21.184 Progress towards the objective is presented in the performance measure below (see table 21.29).

Table 21.29
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	ECLAC member states adopted resolution 749(XXXVIII), which outlined the need for institutional changes to strengthen South-South cooperation in the region	Regional Conference on South-South Cooperation in Latin America and the Caribbean established by resolution 752(PLEN.36) at the 36th session of the Committee of the Whole

Planned results for 2023

Result 1: reduced regional asymmetries and increased South-South and triangular cooperation

Programme performance in 2021 and target for 2023

- 21.185 The subprogramme’s work contributed to 13 Caribbean countries attending the Forum of the Countries of Latin America and the Caribbean on Sustainable Development and the enhancement of regional and subregional integration processes and global political dialogue, which met the planned target of 13 Caribbean countries.
- 21.186 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 21.XXXIV).

Figure 21.XXXIV

Performance measure: number of Caribbean countries attending the Forum of the Countries of Latin America and the Caribbean on Sustainable Development (annual)

Result 2: robust regional and subregional integration processes in support of post-pandemic recovery in line with the 2030 Agenda

Programme performance in 2021 and target for 2023

- 21.187 The subprogramme’s work contributed to 35 regional and subregional organizations and civil society organizations participating in the Forum of the Countries of Latin America and the Caribbean on Sustainable Development, which exceeded the planned target of 30 regional and subregional organizations and civil society organizations.
- 21.188 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 21.XXXV).

Figure 21.XXXV

Performance measure: number of regional and subregional organizations and civil society organizations participating in the Forum of the Countries of Latin America and the Caribbean on Sustainable Development (annual)

Result 3: strong regional and subregional participation of intergovernmental integration schemes and organizations in the region in support of the recovery from the pandemic in line with the 2030 Agenda

Proposed programme plan for 2023

21.189 The region's increasingly complex social, economic and political circumstances have put more pressure on multilateralism, as the effects of the pandemic exacerbated inequalities within and among countries. The recovery from the pandemic must be in line with the Sustainable Development Goals and the 2030 Agenda to ensure that it leaves no one behind. ECLAC member States demonstrated their commitment to those ideas at the various panels and discussions, including the annual Forum of the Countries of Latin America and the Caribbean on Sustainable Development. The subprogramme actively promoted the participation of all relevant stakeholders at the Forum, including regional and subregional integration and cooperation organizations. In the current context, those organizations, as well as other relevant stakeholders, have initiated a dialogue to find common positions on the recovery process to address the health, economic and social effects caused by the COVID-19 pandemic.

Lessons learned and planned change

21.190 The lesson for the subprogramme was the need to ensure the participation of representatives from regional and subregional intergovernmental integration schemes and organizations in the Forum, given their contribution to the development of regional strategies. In applying the lesson, the subprogramme will work to promote increased participation of those organizations and schemes at the Forum.

21.191 Expected progress towards the objective is presented in the performance measure below (see figure 21.XXXVI).

Figure 21.XXXVI

Performance measure: number of regional and subregional intergovernmental integration schemes and organizations participating in the Forum of the Countries of Latin America and the Caribbean on Sustainable Development (annual)

Deliverables

21.192 Table 21.30 lists all deliverables of the subprogramme.

Table 21.30

Subprogramme 13: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	6	6	6	6
1. Training courses and seminars, in cooperation with government entities and regional and subregional organizations, on strategies and processes for convergence and integration; on South-South and triangular cooperation and strategies relating to extraregional stakeholders and third parties; to assess progress in subregional and regional integration; and to assess progress in subregional and regional integration processes	6	6	6	6
Publications (number of publications)	4	4	3	3
2. On the integration of regional and subregional organizations and processes, including South-South cooperation	4	4	3	3
Technical materials (number of materials)	3	3	2	2
3. Input for the intergovernmental meeting on integration and cooperation and meetings with extraregional stakeholders and third parties	3	3	2	2
C. Substantive deliverables				
Consultation, advice and advocacy: advice to member States, upon request, on topics related to the Commission's mandate, including on integration and cooperation, and to regional and subregional organizations and processes, including on the 2030 Agenda; and provision to member States, upon request, of technical advice, in support of regional and subregional processes and organizations in areas relevant to the Commission's mandate and in their relationships with extraregional stakeholders and third parties in areas relating to the work of the subprogramme.				

B. Proposed post and non-post resource requirements for 2023

Overview

21.193 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 21.31 to 21.33.

Table 21.31

Overall: evolution of financial resources by objects of expenditure

(Thousands of United States dollars)

Object of expenditure	2021 expenditure	2022 appropriation	Changes				2023 estimate (before recosting)

^a Includes three temporary posts (1 P-4 and 2 P-3) that were approved pursuant to General Assembly resolution [71/272](#).

21.194 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 21.34 to 21.36 and figure 21.XXXVII.

21.195 As reflected in tables 21.34 (1) and 21.35 (1), the overall resources proposed for 2023 amount to \$59,354,500 before recosting, reflecting a net decrease of \$431,700 (or 0.7 per cent) compared with the appropriation for 2022. Resource changes result from two factors, namely: (a) technical adjustments; and (b) other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

- 21.196 As reflected in table 21.34 (1), resource changes reflect a net decrease of \$431,300 under programme support, related to the removal of non-recurrent requirements for grants and contributions for the renovation of the North Building at the Economic Commission for Latin America and the Caribbean in Santiago, approved by the General Assembly for 2022 in its resolution [76/246](#) (sect. XVI). Resource requirements for 2023 relating to the renovation of the North Building at ECLAC will be submitted to the Assembly in the report of the Secretary-General on progress on the renovation of the North Building at the Economic Commission for Latin America and the Caribbean in Santiago during the main part of its seventy-seventh session.

Other changes

- 21.197 As reflected in tables 21.34 (1) and 21.35 (1), resource changes reflect a net decrease of \$400, as follows:
- Subprogramme 1, International trade, integration and infrastructure.** The net decrease of \$400 relates to the redeployment (geographical) of one post of Senior Economic Affairs Officer (P-5) from the liaison office in Washington, D.C. to Santiago headquarters, as detailed in annex III (decrease of \$18,200); offset in part by the redeployment (geographical) of one post of Social Affairs Officer (P-4) from Santiago headquarters to the liaison office in Washington, D.C., as detailed in annex III (increase of \$17,800);
 - Subprogramme 11, Subregional activities in Central America, Cuba, the Dominican Republic, Haiti and Mexico.** The net increase of \$24,700 relates to the inward redeployment of one post of Administrative Officer (P-4) from programme support, as detailed in annex III (increase of \$179,400); offset in part by the outward redeployment of one post of Public Information Officer (P-3) to programme support, as detailed in annex III (decrease of \$154,700);

- (c) **Programme support.** The net decrease of \$24,700 relates to the outward redeployment of one post of Administrative Officer (P-4) to subprogramme 11, as detailed in annex III (decrease of \$179,400); offset in part by the inward redeployment of one post of Public Information Officer (P-3) from subprogramme 11, as detailed in annex III (increase of \$154,700).

Extrabudgetary resources

- 21.198 As reflected in tables 21.34 (2) and 21.35 (2), ECLAC expects to continue to receive both cash and in-kind contributions, which would complement regular budget resources. In 2023, extrabudgetary resources (cash contributions) are estimated at \$10,195,700 and would provide for 52 posts, as presented in table 21.35 (2). The resources would be used mainly to continue to support analytical studies and technical cooperation activities, including advisory services, assistance and support for the countries of the region, and to complement field projects and training courses aimed at strengthening the capacity of institutions and policymakers to address a broad range of development, economic, social and environmental issues with a regional perspective. During the past few years, ECLAC has been able to increase the level of extrabudgetary resources while at the same time increasing and diversifying the types of donors. This strategy has allowed it to reduce the impact of the downward global trend in development cooperation flows towards middle-income economies (as most Latin American and Caribbean countries are categorized), which allowed a rebound in extrabudgetary resources specifically aimed at further supporting member States' efforts to overcome the impact of the pandemic through a transformative reactivation in the context of the "Big Push for Sustainability" initiative. The year 2023 will be challenging from an extrabudgetary resource mobilization perspective, as several of the Commission's largest multi-year cooperation projects are scheduled to end. However, ECLAC will continue to deploy outreach efforts to maintain an extrabudgetary portfolio level that is adequate for supporting technical cooperation activities. The expected decrease of \$519,900 is attributed to the scheduled completion of several large multi-year projects. The full impact of that decrease will be reduced as a result of enhanced partnerships with entities of the United Nations system, international financial institutions and the private sector. Extrabudgetary resources represent 14.7 per cent of the total resources for this programme.
- 21.199 In-kind contributions are received by ECLAC under donated right-to-use arrangements. Anticipated in-kind contributions would provide for rent-free premises for the ECLAC national office in Brasilia, with an estimated value of \$75,700 for the year, and the donated right-to-use of land for ECLAC premises in Santiago, with an estimated value of \$568,400 for the year.
- 21.200 The extrabudgetary resources under this section are subject to the oversight of the secretariat of ECLAC, which has delegated authority from the Secretary-General.

Policymaking organs

- 21.201 The resources proposed under this component would provide for the servicing of meetings of ECLAC intergovernmental bodies. The sessions of the Commission provide overall guidance to the work of the secretariat. Table 21.37 provides information on the standing intergovernmental organs and related resource requirements under the regular budget.

Section 21 Economic and social development in Latin America and the Caribbean

Table 21.37

Policymaking organs

(Thousands of United States dollars)

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2022 appropriation</i>	<i>2023 estimate (before recosting)</i>
Session of the Economic Commission for Latin America and the Caribbean	The biennial session of the Commission considers development issues for the countries of the region and reviews the progress of the Commission's work. It also enables member States to examine the secretariat's report on the Commission's activities. Through the programme of work that they adopt and the calendar of conferences they approve, Governments also define the mandates that will guide the Commission's work in the future.	Mandate: Economic and Social Council resolution 106 (VI) Membership: 60 government officials Number of sessions in 2022: 1	194.1	–
Committee of the Whole	The Committee of the Whole normally meets at United Nations Headquarters with permanent representatives of ECLAC member States during the years in which the Commission does not hold a session.	Mandate: Economic and Social Council resolution 106 (VI), para. 3, and ECLAC resolutions 419(PLEN.14) and 489(PLEN.19) Membership: 60 government officials Number of sessions in 2023: 1	–	54.8
Regional Conference on Women in Latin America and the Caribbean	The Regional Conference reviews the regional and subregional situation with regard to women's autonomy and rights, puts forward recommendations on public policies on gender equality, undertakes periodic assessments of the activities carried out in fulfilment of regional and international agreements and serves as a forum for discussion on gender equality. It brings together high-level authorities with responsibility for issues relating to the situation of women and for policies to ensure gender equity in the countries of the region. The Regional Conference is held at least once every three years.	Mandate: Decision adopted on 21 November 1977 by the Committee of the Whole at its eleventh special session Membership: 60 government officials Number of sessions in 2022: 1	76.1	–
Presiding Officers of the Regional Conference on Women in Latin America and the Caribbean	The Presiding Officers provide overall direction on the work of the secretariat on issues related to the integration of women into development in the region in intersessional intervals of the Conference.	Mandate: Regional Plan of Action on the Integration of Women into Latin American Economic and Social Development, para. 88.2 Membership: 60 government officials Number of sessions in 2022: 2 Number of sessions in 2023: 2	28.0	38.9
Regional Council for Planning of the Latin American and Caribbean Institute for Economic and Social Planning	The Regional Council acts as the senior guiding body for the activities of the Latin American and Caribbean Institute for Economic and Social Planning and serves as an advisory body with respect to the implementation of the work programmes of the Institute and the evaluation of their results. The Council meets every two years or as required.	Mandate: ECLAC resolutions 351(XVI) and 553(XXVI) Membership: 33 government officials Number of sessions in 2023: 1	–	75.2

Part V Regional cooperation for development

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2022 appropriation</i>	<i>2023 estimate (before recosting)</i>
Presiding Officers of the Regional Council for Planning of the Latin American and Caribbean Institute for Economic and Social Planning	The Presiding Officers review the progress with respect to resolutions adopted by the Regional Council for Planning of the Latin American and Caribbean Institute for Economic and Social Planning and also review the activities of the Institute. The Presiding Officers meet every two years or as required.	Mandate: ECLAC resolution 340(AC.66), adopted by the Committee of the Whole at its eighth extraordinary session. ECLAC resolutions 351(XVI) and 553(XXVI) Membership: 33 government officials Number of sessions in 2022: 1	28.0	–
Caribbean Development and Cooperation Committee	The Committee coordinates economic and social development cooperation and addresses other development concerns of the Caribbean members of ECLAC. It also serves as an advisory and consultative body to the Executive Secretary of ECLAC on issues concerning the Caribbean. The Committee meets every two years or as required.	Mandate: ECLAC resolution 358(XVI) and constituent declaration, functions and rules of procedure of the Committee (E/CEPAL/1022) Membership: 29 government officials Number of sessions in 2022: 1	75.0	–
Monitoring Committee of the Caribbean Development and Cooperation Committee	The Monitoring Committee promotes and strengthens economic and social cooperation and integration among the countries of the Caribbean and also promotes cooperation between them and the countries and integration processes of Latin America and the Caribbean. The Committee meets every two years or as required.	Mandate: ECLAC resolutions 358(XVI), 419(PLEN.14), 489(PLEN.19) and 553(XXVI) Membership: 29 government officials Number of sessions in 2023: 1	–	47.0
Forum of the Countries of Latin America and the Caribbean on Sustainable Development	The Forum follows up and reviews the implementation of the 2030 Agenda for Sustainable Development, including the Sustainable Development Goals and targets, and the Addis Ababa Action Agenda of the Third International Conference on Financing for Development. The Forum meets annually.	Mandate: ECLAC resolution 700(XXX) Membership: 33 government officials Number of sessions in 2022: 1 Number of sessions in 2023: 1	97.1	97.1
Ministerial Conference on the Information Society in Latin America and the Caribbean	The Ministerial Conference designs and implements programmes for access to and use of information and communications technology (ICT) in the region. The Plan of Action for the Information Society in Latin America and the Caribbean (eLAC 2007) represents the region's vision for and political commitment to reducing the digital divide and promoting access to and use of ICT as a development tool. The Conference is held every two years or as required.	Mandate: ECLAC resolution 610(XXX) Membership: 33 government officials Number of sessions in 2022: 1	33.1	–
Preparatory meeting for the Ministerial Conference on the Information Society in Latin America and the Caribbean	The preparatory meeting evaluates the commitments made in the Digital Agenda for Latin America and the Caribbean (eLAC 2020) with a view to preparing for the Ministerial Conference. The preparatory meeting is held every two years or as required.	Mandate: ECLAC resolution 610(XXX) Membership: 33 government officials Number of sessions in 2023: 1	–	36.0

Section 21 Economic and social development in Latin America and the Caribbean

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2022 appropriation</i>	<i>2023 estimate (before recosting)</i>
Statistical Conference of the Americas	The Conference contributes to the progress of policies on statistics and statistical activities in the countries of the region and promotes international, regional and bilateral cooperation among national statistical offices and international and regional agencies. The Conference is held every two years.	Mandate: ECLAC resolution 580(XXVIII) and Economic and Social Council resolution 2000/7 Membership: 60 government officials Number of sessions in 2023: 1	–	79.2
Executive Committee of the Statistical Conference of the Americas	The Executive Committee supports the preparation of technical reports on the progress and results achieved under the programme of work defined by the Conference. The Committee meets annually.	Mandate: ECLAC resolution 580(XXVIII) and Economic and Social Council resolution 2000/7 Membership: 60 government officials Number of sessions in 2022: 1 Number of sessions in 2023: 1	28.0	38.9
Regional Conference on Social Development in Latin America and the Caribbean	The Regional Conference promotes the development of national policies on social development and international, regional and bilateral cooperation in the field of social development, in order to examine multidimensional poverty and make progress on poverty measurement and addressing inequality and structural gaps. The Regional Conference is held every two years.	Mandate: ECLAC resolution 682(XXXV) and Economic and Social Council resolution 2014/32 Membership: 60 government officials Number of sessions in 2023: 1	–	79.2
Presiding Officers of the Regional Conference on Social Development in Latin America and the Caribbean	The Presiding Officers meet at least once between regular sessions of the Conference and review the progress made in the implementation of resolutions adopted by the Conference and of the agreements of the previous Presiding Officers.	Mandate: ECLAC resolution 682(XXXV) and Economic and Social Council resolution 2014/32 Membership: 60 government officials Number of sessions in 2022: 1	28.0	–
Regional Conference on Population and Development in Latin America and the Caribbean	The Regional Conference focuses on monitoring and reviewing issues relating to population and development, international migration, indigenous peoples and Afrodescendent populations, and ageing. The Regional Conference is held every two years.	Mandate: ECLAC resolution 670(XXXIV), Agreement 1 of the ECLAC Ad Hoc Committee on Population and Development, Montevideo Consensus on Population and Development Membership: 60 government officials Number of sessions in 2022: 1	79.0	–
Presiding Officers of the Regional Conference on Population and Development in Latin America and the Caribbean	The Presiding Officers meet at least once between regular sessions of the Conference and serve as a link between member States and the ECLAC secretariat in order to provide regional follow-up on issues related to population and development adopted by the Conference.	Mandate: ECLAC resolution 670(XXXIV), Agreement 1 of the ECLAC Ad Hoc Committee on Population and Development, Montevideo Consensus on Population and Development Membership: 60 government officials Number of sessions in 2023: 1	–	38.9

Part V Regional cooperation for development

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2022 appropriation</i>	<i>2023 estimate (before recosting)</i>
Conference on Science, Innovation and Information and Communications Technologies	The Conference promotes the development and improvement of national policies on science, technology and innovation and those related to the progress of the information and knowledge society. The Conference meets annually or as required.	Mandate: ECLAC resolution 672(XXXIV) and Economic and Social Council resolution 2012/35 Membership: 60 government officials Number of sessions in 2023: 1	–	74.1
Executive Committee of the Conference on Science, Innovation and Information and Communications Technologies	The Executive Committee meets at least once between regular sessions of the Conference and it follows up on the implementation of the agreements adopted and tasks assigned by the Conference, particularly with respect to the biennial programme of activities.	Mandate: ECLAC resolution 672(XXXIV) and Economic and Social Council resolution 2012/35 Membership: 60 government officials Number of sessions in 2022: –	15.0	–
Regional Conference on South-South Cooperation in Latin America and the Caribbean	The Regional Conference prioritizes the implementation of the mandates conferred on United Nations regional commissions in the outcome document of the second High-level United Nations Conference on South-South Cooperation and carries out its activities within the framework of the 2030 Agenda for Sustainable Development and General Assembly resolution 76/221 on South-South cooperation.	Mandate: General Assembly resolution 58/220, ECLAC resolutions 611(XXX) and 752(PLEN.36) Membership: 60 government officials Number of sessions in 2023: 1	–	25.1
Presiding Officers of the Regional Conference on South-South Cooperation in Latin America and the Caribbean	The Presiding Officers meet at least once between regular sessions of the Conference and adopt a draft programme of activities for the Conference.	Mandate: General Assembly resolution 58/220, ECLAC resolution 611(XXX) and 752(PLEN.36) Membership: 60 government officials Number of sessions in 2022: 1	3.0	–
Conference of the Parties to the Regional Agreement on Access to Information, Public Participation and Justice in Environmental Matters in Latin America and the Caribbean	The Conference is held annually to review and promote the implementation and effectiveness of the Regional Agreement on Access to Information, Public Participation and Justice in Environmental Matters in Latin America and the Caribbean.	Mandate: ECOSOC resolution 2021/31 and the Regional Agreement on Access to Information, Public Participation and Justice in Environmental Matters in Latin America and the Caribbean Membership: 33 government officials Number of sessions in 2022: 1 Number of sessions in 2023: 1	66.3	66.3
Committee of High-level Government Experts	The Committee reviews the achievement of objectives of the International Development Strategy in Latin America. The Committee meets as and when required.	Mandate: ECLAC resolutions 310(XIV), 419(PLEN.14), 422(XIX), para. 204, 425(XIX), 489(PLEN.19) and 553(XXVI) Membership: 33 government officials Number of sessions in 2022: 1 Number of sessions in 2023: 1	3.0	3.0

Section 21 Economic and social development in Latin America and the Caribbean

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2022 appropriation</i>	<i>2023 estimate (before recosting)</i>
Central American Economic Cooperation Committee	The Committee serves as a consultative and advisory forum for Central American integration. The Committee meets as and when required.	Mandate: ECLAC resolutions 9(IV) and 553(XXVI) Membership: 7 government officials Number of sessions in 2022: 1 Number of sessions in 2023: 1	3.0	3.0
Total			756.7	756.7

21.202 The proposed regular budget resources for 2023 amount to \$756,700 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 21.38 and figure 21.XXXVIII.

(Thousands of United States dollars)

Executive direction and management

- 21.203 Executive direction and management, headed by the Executive Secretary at the Under-Secretary-General level, is responsible for the overall direction, supervision and management of ECLAC in the implementation of its mandates and its approved programme of work. The component is also responsible for the coordination of the preparation of the institutional document on the main substantive topics discussed at the biennial session of the Commission, as well as for the publication of the *CEPAL Review*. The Office of the Executive Secretary is responsible for the coordination of the preparation of the progress report on the implementation of the 2030 Agenda for Sustainable Development and the Sustainable Development Goals in Latin America and the Caribbean, and the report on the Forum of the Countries of Latin America and the Caribbean on Sustainable Development, which is convened annually under the auspices of ECLAC. The Executive Secretary is assisted by the Deputy Executive Secretary.
- 21.204 The Office of the Executive Secretary provides leadership and policy orientation and establishes the criteria to coordinate follow-up in the region on the implementation of the 2030 Agenda, including the Sustainable Development Goals, and the Addis Ababa Action Agenda, as well as the mainstreaming of cross-cutting issues, such as gender, disability inclusion and sustainability perspectives, throughout ECLAC subprogrammes. It is also responsible for coordinating its programme of work with other funds, programmes and specialized agencies of the United Nations system in the region. It includes the Office of the Secretary of the Commission, which is responsible for maintaining political relations with the Governments and authorities of ECLAC member States and for performing diplomatic and protocol functions and is entrusted with servicing intergovernmental meetings.
- 21.205 The Programme Planning and Operations Division provides overall coordination, guidance and advice to the ECLAC subprogramme managers with respect to the preparation of: (a) the draft programme of work and the report on the activities of the Commission for consideration and adoption at the biennial session of the Commission or at the Committee of the Whole; and (b) the annual proposed programme budget. The Division also monitors the implementation of the work programme and coordinates, organizes and reports on the implementation of the ECLAC evaluation plan.
- 21.206 The Public Information Unit is accountable to the Executive Secretary and works in close coordination with the Department of Global Communications of the Secretariat.
- 21.207 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, ECLAC integrates environmental management practices into its operations. In 2021, a highlighted result is the reduction in water consumption, which assumed greater relevance in light of the continuous drought affecting the host country. The upgrade in restrooms, including water automation and touchless sensor faucets across the compound and the development of a water management plan that aims to optimize water resources in the future contributed to this result.
- 21.208 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 21.39. The compliance rate at ECLAC reflects the impact of several events that occurred in countries of the region and that reduced the planning time frame significantly, particularly pandemic-related movement restrictions and lockdown measures in countries of the region.

Table 21.39

Compliance rate

(Percentage)

	Actual 2019	Actual 2020	Actual 2021	Planned 2022	Planned 2023
Timely submission of documentation	100	100	100	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	28	28	36	100	100

Section 21 Economic and social development in Latin America and the Caribbean

21.209 The proposed regular budget resources for 2023 amount to \$3,901,000 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 21.40 and figure 21.XXXIX.

Table 21.40

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

21.210 Extrabudgetary resources for the subprogramme are estimated at \$576,900 and would provide for five Local level posts, as well as non-post resources. The resources would be used mainly to facilitate resource mobilization and central management, including planning, monitoring and support for a number of operations, programmes and projects.

Programme of work

Subprogramme 1

International trade, integration and infrastructure

21.211 The proposed regular budget resources for 2023 amount to \$3,264,300 and reflect a decrease of \$400 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 21.197 (a). Additional details on the distribution of the proposed resources for 2023 are reflected in table 21.41 and figure 21.XL.

Subprogramme 1: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

21.212 Extrabudgetary resources for the subprogramme are estimated at \$708,000 and would provide for one Local level post, as well as non-post resources. The resources would be used mainly to support regional, subregional and national capacity development, through applied research, policy proposals, technical assistance and training, and the promotion of policy dialogues. The focus of the subprogramme will be to strengthen: (a) regional supply chains to enhance the region’s participation in global chains and reduce the dependency in strategic sectors such as manufacturing and retrofit of equipment for electromobility in public transportation, pharmaceutical products and medical equipment; and (b) countries’ capacities to address diverse challenges, such as digital trade and services, particularly for the internationalization of small and medium-sized enterprises and the linkages with emerging issues such as the circular economy and the linkages between trade infrastructure and the transition to renewable energies. The expected increase of \$11,900 is due to new projects planned in the context of the “Big Push for Sustainability” initiative and other projects related to the internationalization of small and medium-sized enterprises, e-trade and post-pandemic sustainable recovery.

**Subprogramme 2
Production and innovation**

21.213 The proposed regular budget resources for 2023 amount to \$2,653,200 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of proposed resources for 2023 are reflected in table 21.42 and figure 21.XLI.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

21.214 Extrabudgetary resources for the subprogramme are estimated at \$836,800 and would provide for three Local level posts, as well as non-post resources. The resources would be used mainly to promote industrial policy advocacy and the exchange of experiences and best practices, technical assistance and training with a focus on the role of the productive sectors in the transformative reactivation in the context of the “Big Push for Sustainability” initiative. The main focus of the subprogramme will be in supporting countries’ efforts to develop productive policies for a post-pandemic sustainable recovery, with emphasis on the regional digital markets and on emerging issues such as the circular economy and the transition to renewable energies in the productive sector. The expected increase of \$61,800 is due to new projects planned in the context of the “Big Push for Sustainability” initiative and others related to post-pandemic sustainable recovery.

Subprogramme 3 Macroeconomic policies and growth

21.215 The proposed regular budget resources for 2023 amount to \$4,601,400 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of proposed resources for 2023 are reflected in table 21.43 and figure 21.XLII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

21.216 Extrabudgetary resources for the subprogramme are estimated at \$730,100 and would provide for three Local level posts, as well as non-post resources. The resources would be used mainly to support national capacity development, through applied research, policy proposals, technical assistance and training, and promotion of policy dialogues, particularly regarding the challenges derived from the pandemic-induced crisis in the realm of fiscal policy. The work of the subprogramme will focus on: (a) assisting policymakers in formulating sustainable fiscal policy frameworks backstopped through the ramping up of domestic and international resource mobilization efforts through innovative financing schemes; and (b) promoting the role of development-centred macroeconomic and development financing policies to support efforts in the social and productive sectors for a

sustainable post-pandemic recovery. The expected decrease of \$28,300 is due mainly to the scheduled completion of projects in 2022.

Subprogramme 4 Social development and equality

21.217 The proposed regular budget resources for 2023 amount to \$1,994,600 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of proposed resources for 2023 are reflected in table 21.44 and figure 21.XLIII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

21.218 Extrabudgetary resources for the subprogramme are estimated at \$681,900 and would provide for three Local level posts, as well as non-post resources. The resources would be used mainly to conduct applied research, deliver trainings and advisory services, develop and disseminate policy recommendations and promote policy dialogue to strengthen the capacity of stakeholders to perform sound diagnostic assessments of social issues for application in policy design and implementation. The work of the subprogramme will focus on: the need to establish universal social protection, stratification and social mobility in middle-income countries; the linkages between social and labour inclusion policies; and the contribution of social policies to promote a transformative recovery with a view to overcoming the impact of the pandemic while making progress towards strengthened welfare states and universal, comprehensive and sustainable social protection systems. The expected increase of \$16,200 is due to new projects planned on post-pandemic sustainable recovery.

**Subprogramme 5
Gender equality and women’s autonomy**

21.219 The proposed regular budget resources for 2023 amount to \$1,250,800 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of proposed resources for 2023 are reflected in table 21.45 and figure 21.XLIV.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

21.220 Extrabudgetary resources for the subprogramme are estimated at \$929,200 and would provide for four Local level posts, as well as non-post resources. The resources would be used mainly to carry out activities aimed at moving towards fairer care economies and societies, contributing, with new evidence, analysis and policy dialogue, to a gender-responsive, transformative, sustainable and just economic recovery in Latin America and Caribbean countries. Knowledge creation would be fostered and gender-related data in statistics and indicators would be expanded, while the quality of technical assistance provision for gender equality policy promotion would be improved. Special attention will be given to gender equality in the design of care, trade, fiscal and financial policies, to the emerging challenges in the world of work for women’s economic autonomy and gender equality and to the challenge of addressing the critical question of how to promote women’s participation in economic recovery strategies that take into account climate change and sustainability challenges. The expected increase of \$54,500 is due to at least two new projects planned with private sector foundations.

**Subprogramme 6
Population and development**

21.221 The proposed regular budget resources for 2023 amount to \$1,820,200 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of proposed resources for 2023 are reflected in table 21.46 and figure 21.XLV.

Subprogramme 6: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

21.222 Extrabudgetary resources for the subprogramme are estimated at \$288,100 and would provide for one Local level post, as well as non-post resources. The resources would be used mainly to provide technical assistance and training: (a) to develop national capacities and tools to identify those further behind, through subnational mapping, small area estimations and disaggregation of socioeconomic indicators; and (b) to improve the use of census data, vital statistics and surveys through the generation of data and development of procedures, computer programs and information systems. The subprogramme will give special attention to enhancing the capacity of governments to integrate population dynamics into the design of evidence-based public policies and sustainable development, taking into account structural dynamics in the region such as migration and the challenges of

population ageing. The expected decrease of \$35,800 is due mainly to the scheduled completion of projects in 2021 and 2022.

Subprogramme 7 Sustainable development and human settlements

21.223 The proposed regular budget resources for 2023 amount to \$2,825,500 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of proposed resources for 2023 are reflected in table 21.47 and figure 21.XLVI.

Extrabudgetary resources

21.224 Extrabudgetary resources for the subprogramme are estimated at \$1,137,200 and would provide for three Local level posts, as well as non-post resources. The resources would be used mainly to support national capacity development, through applied research, policy proposals, technical assistance and training, and promotion of policy dialogues aimed at: (a) integrating sustainability criteria into public policies and making progress towards nationally determined contributions under the Paris Agreement; and (b) strengthening national capacities to design and implement public policies for the sustainability of human settlements and enhancing regional cooperation in adapting to and mitigating the impact of climate change. Additionally, in cooperation with other subprogrammes, special attention will be given to piloting the application of the “Big Push for Sustainability” initiative in sectors such as the circular economy for inclusive, sustainable and smart cities. The expected decrease of \$34,600 is due mainly to the scheduled completion of projects in 2021 and 2022.

**Subprogramme 8
Natural resources**

21.225 The proposed regular budget resources for 2023 amount to \$2,267,200 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of proposed resources for 2023 are reflected in table 21.48 and figure 21.XLVII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

21.226 Extrabudgetary resources for the subprogramme are estimated at \$708,000 and would provide for non-post resources. The resources would be used mainly to support national capacity development, through applied research, policy proposals, technical assistance and training, and the promotion of policy dialogues aimed at: (a) fostering the sustainable energy transition and the sustainable management of the water cycle; (b) enhancing the governance of extractive resources; (c) increasing value addition in those activities and developing further linkages to the rest of the economy; (d) promoting the bioeconomy and the circular economy; and (e) strengthening regional cooperation in agricultural development and biodiversity. The expected increase of \$23,000 is due to new projects planned in the context of the “Big Push for Sustainability” initiative and others on sustainable mining and post-pandemic sustainable recovery.

**Subprogramme 9
 Planning and public management for development**

21.227 The proposed regular budget resources for 2023 amount to \$1,248,400 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of proposed resources for 2023 are reflected in table 21.49 and figure 21.XLVIII.

Extrabudgetary resources

21.228 Extrabudgetary resources for the subprogramme are estimated at \$1,121,200 and would provide for 11 posts (1 D-1 and 10 Local level), as well as non-post resources. The resources would be used mainly to undertake applied research training and promotion of peer-to-peer learning and the sharing of experiences and good practices, in order to promote the application of new methodologies, instruments and conceptual frameworks for planning and public management by different levels of government. The subprogramme will give special attention to the application of prospective approaches, eGovernment policies and national digital strategies, not only to transform the way governments operate, but also how they plan, manage and provide information to citizens.

**Subprogramme 10
Statistics**

21.229 The proposed regular budget resources for 2023 amount to \$2,967,500 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of proposed resources for 2023 are reflected in table 21.50 and figure 21.XLIX.

Extrabudgetary resources

21.230 Extrabudgetary resources for the subprogramme are estimated at \$420,400 and would provide for non-post resources. The resources would be used mainly to provide specialized advisory services and online and on-site training, promote peer-to-peer learning and the sharing of experiences and good practices, and South-South cooperation for strengthening national capacities in the areas of basic economic statistics and price statistics, environmental statistics, climate change statistics and disaster risk reduction statistics. The subprogramme will give special attention to: (a) strengthening the capacities of national statistical offices for the design, formulation and implementation of statistical geoportals that are able to administrate, integrate and visualize geospatially enabled statistical data; and (b) using geospatial statistical instruments, including in emerging sectors such as the circular economy. The expected increase of \$54,500 is due to new projects planned in the context of the “Big Push for Sustainability” initiative.

**Subprogramme 11
Subregional activities in Central America, Cuba, the Dominican Republic, Haiti and Mexico**

21.231 The proposed regular budget resources for 2023 amount to \$5,255,300 and reflect an increase of \$24,700 compared with the appropriation for 2022. The proposed increase is explained in paragraph 21.197 (b). Additional details on the distribution of proposed resources for 2023 are reflected in table 21.51 and figure 21.L.

Extrabudgetary resources

21.232 Extrabudgetary resources for the subprogramme are estimated at \$744,300 and would provide for three Local level posts, as well as non-post resources. The resources would be used mainly to support applied research, training and advisory services, policy recommendations and the promotion of policy dialogue to strengthen national capacities, with special emphasis on supporting the efforts of countries from the subregion in addressing the structural causes of irregular migration from a development and subregional perspective and designing public policies for a sustainable post-pandemic recovery. The expected decrease of \$558,600 is due mainly to the scheduled completion of projects in 2021 and 2022.

**Subprogramme 12
Subregional activities in the Caribbean**

21.233 The proposed regular budget resources for 2023 amount to \$4,428,400 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of proposed resources for 2023 are reflected in table 21.52 and figure 21.LI.

Extrabudgetary resources

21.234 Extrabudgetary resources for the subprogramme are estimated at \$359,600 and would provide for one Local level post, as well as non-post resources. The resources would be used mainly to undertake applied research and advisory services to strengthen the capacity of development practitioners and decision makers in designing and implementing the debt for climate adaptation swap initiative and to promote resilience-building measures for durable development, sustainable tourism, and public investments to reduce the impact of natural disasters and climate change. The expected decrease of \$84,900 is due mainly to the scheduled completion of projects in 2021 and 2022.

**Subprogramme 13
 Support for regional and subregional integration and cooperation processes and organizations**

21.235 The proposed regular budget resources for 2023 amount to \$921,200 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of proposed resources for 2023 are reflected in table 21.53 and figure 21.LII.

Programme support

21.236 The programme support component carries out activities related to conference and documentation services, library services, technical cooperation support and administration and common services for the ECLAC headquarters in Santiago; the two ECLAC subregional headquarters, in Mexico City, serving the Central American subregion, and in Port of Spain, serving the Caribbean region; ECLAC national offices in Buenos Aires, Brasilia, Bogotá and Montevideo; and the ECLAC liaison office in Washington, D.C.

21.237 The proposed regular budget resources for 2023 amount to \$19,198,800 and reflect a decrease of \$456,000 compared with the appropriation for 2022. The proposed decrease is explained in

paragraphs 21.196 and 21.197 (c). Additional details on the distribution of proposed resources for 2023 are reflected in table 21.54 and figure 21.LIII.

Advisory Committee on Administrative and Budgetary Questions

[A/76/7](#) and [A/76/7/Corr.1](#)

The Advisory Committee acknowledges the importance of using local consultants by the Commission to ensure the uninterrupted delivery of mandated activities and trusts that the Secretary-General will include more detailed information on the hiring of local consultants, including the related resources, in the context of the next programme budget submission (para. V.64).

ECLAC engages consultants to take advantage of local expertise only for specific tasks and in cases where the activities require detailed expertise and technical knowledge that is either not available in-house nor is considered to be cost effective to build capacity.

Detailed information, including related resources, is being provided separately in the supplementary document to the proposed programme budget for 2023.

Review of management and administration in the Economic Commission for Latin America and the Caribbean

Recommendation 1

The Executive Secretary of ECLAC should monitor and report on the impact and specific results achieved by the Caribbean First strategy as part of regular reporting to the Commission.

The impact and results achieved by the Caribbean First strategy are being included in the regular reporting to the Commission. At the thirty-sixth session of the Committee of the Whole, held on 3 December 2021, ECLAC presented to its member States the report on the activities of the Commission, 2020, in which it reported on the advances under the Caribbean First strategy. The strategy encompasses several elements, including promoting options for cooperation for Caribbean small island developing States, supporting a strategic advocacy on de-risking and providing countries in the subregion with the necessary support to implement the 2030 Agenda for Sustainable Development and the Sustainable Development Goals, as well as the small island developing States agenda, including the SIDS Accelerated Modalities of Action (SAMOA) Pathway. As part of its Caribbean First strategy, ECLAC has launched a debt swap initiative for climate action and the establishment of the Caribbean Resilience Fund for climate change adaptation and mitigation to address the challenges the Caribbean region is facing in accessing external financing. This initiative, advocated by ECLAC in several high-level meetings, has been gaining momentum. Advances have been

Brief description of the recommendation

Action taken to implement the recommendation

made towards the creation of the Fund, with concrete proposals made for it to be established as a trust fund. Furthermore, during the fourth meeting of the Forum of the Countries of Latin America and the Caribbean on Sustainable Development, which was attended by 13 Caribbean member States, a dedicated session was organized to address key issues related to the progress in the implementation of the 2030 Agenda in the Caribbean in the post-pandemic recovery phase. In addition, and prior to the meeting of the Forum, a high-level meeting was held on the challenges faced by associate members of ECLAC in the implementation of the 2030 Agenda, with the participation of 14 associate members. In the context of the implementation of subprogramme 12, Subregional activities in the Caribbean, extensive support was delivered to countries of the subregion to address the socioeconomic impact of the pandemic and issues such as, statistics, climate change and disaster risk management, gender, social development, the preparation of voluntary national reviews and the implementation of the 2030 Agenda. A comprehensive assessment of the strategy has been requested by the Executive Secretary of ECLAC for 2022.

Foreword

In 2023, the Economic and Social Commission for Western Asia (ESCWA) will mark its fiftieth anniversary of continued service to its member States and the peoples of the Arab region. Much has been achieved over the past five decades thanks to the Commission's consistent commitment to enhancing national capacities, building consensus and leveraging partnerships for development.

Nonetheless, despite these efforts, the Arab region is still short of achieving its ambition for dignified life for all its peoples. Conflicts, occupation and serious social, economic and environmental challenges jeopardize its advancement towards the goals and targets of the 2030 Agenda for Sustainable Development. Building on the many accomplishments and lessons learned since its foundation in 1973, ESCWA plans to intensify its support to member States as they strive to attain the goals set out in their national development plans.

To this end, the Commission will continue to provide technical expertise and deploy innovative, technology-driven knowledge production and dissemination tools in support of the development and implementation of effective policies and legislation. It will disseminate interactive, dynamic policy tools and use its convening power to facilitate dialogue and foster consensus, promote the exchange of good practice and forge partnerships for development, and will also continue to actively advocate for the needs and priorities of the Arab region.

The Commission's ambitious programme of work for 2023, which I put forward with great confidence, is backed by the strong commitment to deliver on its mandate, guided by the core principle of "leaving no one behind" and the aspiration of the peoples of the Arab region for a dignified life, which can only be achieved through shared economic prosperity.

(Signed) Rola **Dashti**
Executive Secretary, Economic and Social Commission for Western Asia

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 22.1 The Economic and Social Commission for Western Asia (ESCWA) is responsible for promoting inclusive and sustainable development in the Arab region. The mandate derives from the priorities established in relevant General Assembly and Economic and Social Council resolutions and decisions, including Council resolutions 1818 (LV), establishing the Commission, and 1985/69, amending its terms of reference to emphasize its social functions.
- 22.2 The Arab region holds all the human capital and resources vital for achieving shared prosperity and a dignified life for all its peoples. However, it faces significant challenges, some of which were further compounded by the coronavirus disease (COVID-19) pandemic. As a result, its progress in implementing the ambitious 2030 Agenda for Sustainable Development remains uneven. The existing momentum and commitment to ensuring equitable post-pandemic socioeconomic recovery has broadened the window of opportunity to overcome setbacks and even accelerate progress towards the implementation of the 2030 Agenda within the Arab region and, where necessary, to protect the fragile development gains. It is vital that this opportunity be leveraged to support the member States of ESCWA and the peoples of the Arab region in realizing their ambition for a thriving future for all, including those most vulnerable. ESCWA remains committed and determined to contribute to these efforts.

Strategy and external factors for 2023

- 22.3 In line with its mandate and to deliver on its commitment to member States, the Commission will continue to leverage the expertise, experience and partnerships it has built progressively over the past five decades to deploy multidisciplinary approaches in support of efforts towards achieving shared prosperity, peaceful and inclusive societies and a sustainable future for the Arab region. To this end, concerted efforts in support of member States achieving the Sustainable Development Goals will remain at the core of the ESCWA strategy for 2023. The Commission will focus on ensuring that any development gains achieved are protected and built upon as a foundation for cumulative progress in implementing the 2030 Agenda. In doing so, it will also ensure that diverse and specific development needs of least developed and middle-income countries and countries in conflict are appropriately considered and addressed. ESCWA will contribute to the achievement of this overall objective by delivering on its three mandated functions.
- 22.4 Specifically, the Commission will provide advisory services and technical expertise to its member States in relation to key areas such as natural resource and transboundary water management and sustainability under changing climate conditions; equitable and inclusive social development, taking into account in particular the needs of the most vulnerable, with an emphasis in 2023 on women, youth, older persons, migrants and persons with disabilities as part of the commitment to “leave no one behind”; equitable economic growth and prosperity, supported by improved regional integration and opportunities for trade, small and medium-sized enterprises and innovative financing for development solutions; information technology and statistics; and governance, strengthening of public institutions and assessment and mitigation of transboundary risks.
- 22.5 The Commission will also continue to analyse trends and generate and disseminate knowledge and data on the topics listed in paragraph 22.4 and beyond. In particular, it will invest in the further development and refinement of tools and platforms, such as Manara and the Arab Trade Gateway, with the aim of enabling government representatives, policymakers, experts and practitioners, as well as members of civil society, to exchange good practices and solutions in support of evidence-based decision-making.

- 22.6 ESCWA will also leverage its convening power to serve as a regional forum for setting norms and building consensus at the subregional and regional levels, in particular to promote durable solutions for transboundary issues that impede member States' progress in implementing the 2030 Agenda. It will also promote South-South and triangular cooperation and act as an active advocate for the needs and priorities of the Arab region at the global level.
- 22.7 For 2023, the Commission's planned deliverables will support member States in their ongoing management of and recovery from the COVID-19 pandemic. Such planned deliverables and activities include exchanges on experiences and good practices in sustainable recovery from the pandemic in the agenda of the annual Arab Forum for Sustainable Development (under subprogramme 5); building the capacity of policymakers to utilize new data, statistics, technology and knowledge products, tools and techniques to inform policy decisions to deal with the medium- and long-term ramifications of the pandemic (under subprogramme 4); and integrating social justice principles into public policies and programmes post-pandemic (under subprogramme 2).
- 22.8 Reflecting the importance of continuous improvement and responding to the needs and requests of member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. Examples of lessons learned and best practices include maintaining the hybrid mode of programme delivery where such approaches have proven to be effective and cost-efficient and to have produced planned results. The Commission will continue to integrate pandemic-recovery perspectives into planned interventions in all areas of its work (outlined in paragraph 22.4) where relevant. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.
- 22.9 With regard to cooperation with other entities at the global, regional, national and local levels, the Commission will further consolidate its historic strategic partnerships with the League of Arab States (LAS), the Islamic Development Bank (IsDB) and the Organisation for Economic Co-operation and Development (OECD).
- 22.10 Furthermore, ESCWA will continue its engagement with academic institutions and think tanks to promote dialogue, collaboration and knowledge-sharing between the United Nations and academia in the Arab region and foster proactive and informed policymaking aligned with national ambitions for achieving the Sustainable Development Goals. ESCWA will continue to provide secretariat support to the Academic Network for Development Dialogue, established by ESCWA and Qatar University. It will also create further opportunities for partnerships and engagement to bridge the knowledge implementation gap and help member States to gain access to innovation and financing.
- 22.11 With regard to inter-agency coordination and liaison, ESCWA will continue to play a lead role in the Arab region in implementing the Secretary-General's reform agenda, as approved by the General Assembly in its resolution [72/279](#). The Commission will maintain its existing approach to multi-stakeholder engagement and will take the lead on a number of global initiatives to improve the work of institutions in the region and of the United Nations globally, including collaboration and coordination of interventions with the World Bank, the International Monetary Fund, the World Trade Organization, the United Nations Conference on Trade and Development (UNCTAD) and the United Nations Industrial Development Organization, among others. It will also contribute to the coordination and cooperation of operations, mechanisms and practices with other United Nations and non-United Nations bodies and networks as regards the 2030 Agenda for Sustainable Development. In particular, it will work closely with the Development Coordination Office and Resident Coordinator Offices of the United Nations and through the regional collaborative platform in the Arab region to support common country analyses and to ensure greater complementarity and synergy between its own projects and those implemented by the United Nations country teams as part of the United Nations Sustainable Development Cooperation Frameworks.

- 22.12 With regard to the external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) The national development and political landscapes remain conducive for ESCWA to provide integrated policy advice, normative support and technical capacity-building in accordance with regional and national priorities;
 - (b) ESCWA partners and interlocutors remain committed to collaborating with the Commission and advancing joint initiatives and projects.
- 22.13 ESCWA integrates a gender perspective in its operational activities, deliverables and results by supporting member States in improving the business environment to increase women's economic participation and developing policies and legislation that tackle issues related to gender equality and women's empowerment. It will also enhance the capacity of national actors in the Arab region in the areas of gender justice, population and inclusive development and implement the accountability framework for gender equality in line with Economic and Social Council resolution [2013/16](#).
- 22.14 In line with the United Nations Disability Inclusion Strategy, the Commission will continue to intensify its efforts to advance the inclusion of the needs of persons with disabilities in its programmes, working towards more inclusive social protection systems in the Arab region. It will continue to engage with government representatives through the established Intersessional Group of Experts on Disability and foster policy discussions, peer-to-peer learning and cooperation for greater inclusion and empowerment of young and older persons in the socioeconomic development of the region.

Programme performance in 2021

Impact of the pandemic

- 22.15 Although the continuation of the COVID-19 pandemic into 2021 did not have an impact on the implementation of mandates per se, the longer-than-expected effects of the pandemic did affect the planned results of the Commission. With respect to activities related to influencing policy, confidence- and consensus-building and multilateral collaboration, online modes of programme delivery have proven to be less effective or simply not viable. Nonetheless, the adaptive approach taken by the Commission resulted in the redeployment of resources towards knowledge production and dissemination, as demonstrated by the higher-than-planned number of technical materials and seminars, and towards capacity-building, as demonstrated by the higher-than-planned number of field and technical cooperation projects and workshops.
- 22.16 In addition, in order to support member States on issues related to the COVID-19 pandemic, within the overall scope of the objectives, ESCWA continued to integrate considerations of the recovery from the COVID-19 pandemic into planned interventions across all relevant areas of its work. For example, the agenda of the Arab Forum for Sustainable Development was adjusted to enable member States to discuss and agree on a set of policy recommendations aimed at mitigating the impact of the pandemic (subprogramme 5); the published policy briefs on multidimensional poverty considered the compounding effects of the pandemic (subprogramme 2); a policy brief on the impact of COVID-19 on older persons was issued (subprogramme 4); the developed technical materials on enhancing the measurement of human development incorporated approaches to assess direct consequences and root causes of shocks such as the COVID-19 pandemic (subprogramme 6); and a capacity-building workshop on undertaking censuses during the pandemic was held (subprogramme 4).

Legislative mandates

- 22.17 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

68/196	United Nations Guiding Principles on Alternative Development	74/216	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development

**Subprogramme 6
Governance and conflict prevention**

General Assembly resolutions

68/303	Strengthening the role of mediation in the peaceful settlement of disputes, conflict prevention and resolution	75/20	Committee on the Exercise of the Inalienable Rights of the Palestinian People
69/291	Implementation of the recommendations contained in the report of the Secretary-General on the causes of conflict and the promotion of durable peace and sustainable development in Africa	76/10	Peaceful settlement of the question of Palestine
69/327	Promoting inclusive and accountable public services for sustainable development	76/11	The Syrian Golan
73/170; 75/177	Promotion of peace as a vital requirement for the full enjoyment of all human rights by all	76/126	Assistance to the Palestinian people
		76/150	The right of the Palestinian people to self-determination
		76/225	Permanent sovereignty of the Palestinian people in the Occupied Palestinian Territory, including East Jerusalem, and of the Arab population in the occupied Syrian Golan over their natural resources

Security Council resolutions

- 1947 (2010)
- 2429 (2018)
- 2461 (2019)

Economic and Social Council resolutions

2019/29	Economic and social repercussions of the Israeli occupation on the living conditions of the Palestinian people in the Occupied Palestinian Territory, including East Jerusalem, and the Arab population in the occupied Syrian Golan
---------	--

Economic and Social Commission for Western Asia resolutions

271 (XXIV)	Strengthening the role of ESCWA in addressing the impact of conflict and instability within the context of social and economic development	292 (XXVI)	Upgrading the Section for Emerging and Conflict-Related Issues to the level of a division and establishing a governmental committee on emerging issues and development in conflict settings
282 (XXV)	Mitigating the impact on development of conflict, occupation and instability in ESCWA member countries	307 (XXVII); 316 (XXVIII); 330 (XXX)	Support for the Palestinian people
		326 (XXIX)	Justice for the Palestinian people: fifty years of Israeli occupation

Deliverables

22.18 Table 22.1 lists all cross-cutting deliverables of the programme.

Table 22.1
Cross-cutting deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	12	12	9	12
1. Reports for the ESCWA ministerial session	–	–	1	–
2. Reports for the Executive Committee	12	12	8	12
Substantive services for meetings (number of three-hour meetings)	17	15	16	17
Meetings of:				
3. The Executive Committee	8	6	6	8
4. The ESCWA Advisory Committee	2	2	3	2
5. The Committee for Programme and Coordination	1	1	1	1
6. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
7. The Fifth Committee	1	1	1	1
8. The regional collaborative platform	4	4	4	4
B. Generation and transfer of knowledge				
Publications (number of publications)	2	2	1	2
9. ESCWA annual report	1	1	1	1
10. Report on the performance of the United Nations development system in the Arab region	1	1	–	1
C. Substantive deliverables				
Databases and substantive digital materials: Manara (knowledge platform providing artificial intelligence-enabled public access to all United Nations knowledge resources, tools and analysis for improved decision-making).				
D. Communication deliverables				
Outreach programmes, special events and information materials: newsletters; celebration of special international days and weeks, such as International Women’s Day, International Day of Persons with Disabilities and World Environmental Day; brochures, leaflets, posters and other promotional material on ESCWA activities; briefings, lectures and awareness-raising activities with schools, universities and visitors on the work of the United Nations and ESCWA.				
External and media relations: press conferences, interviews and briefings by the Executive Secretary and other senior officials and for the launch of flagship publications and events; ESCWA live television broadcasting services; press releases and media coverage on ESCWA activities and meetings.				
Digital platforms and multimedia content: videos and other visual content on ESCWA activities and daily ESCWA news on the ESCWA website and social media accounts.				

Evaluation activities

- 22.19 The thematic evaluation of ESCWA approaches to support and influence policymaking at the national and regional levels, completed in 2021, has guided the proposed programme plan for 2023.
- 22.20 The results and lessons of the evaluation referenced above have been taken into account for the proposed programme plan for 2023. For example, the evaluation considered the sequencing of the various components of such interventions, the minimum success criteria and good practice in addressing policy bottlenecks within specific contexts (four distinct scenarios). A clear methodology to assess the policy influence of ESCWA projects going forward was also developed. At the same time, the evaluation contributed evidence to the system-wide effort, led by the United Nations Evaluation Group, to strengthen the policy influence function of the Organization. Specifically, recommendations on the design of projects, depending on the context, enabled ESCWA to better tailor and target its planned work in terms of the generation and dissemination of knowledge and the timing, frequency and means of engagement with stakeholders to achieve enhanced policy outcomes.

- 22.21 The following evaluations are planned for 2023:
- (a) Office of Internal Oversight Services evaluation of subprogramme 3, Shared economic prosperity;
 - (b) Thematic evaluation of one of the areas of work of ESCWA.

Programme of work

Subprogramme 1

Climate change and natural resource sustainability

Objective

- 22.22 The objective, to which this subprogramme contributes, is to advance climate action and integrated and sustainable policies in the areas of water, energy and food security.

Strategy

- 22.23 To contribute to the objective, the subprogramme will:
- (a) Strengthen the capacities of member States to build climate resilience by mainstreaming climate considerations in development planning and financing, and find ways to reduce climate vulnerability through diverse partnerships under the Arab Centre for Climate Change Policies (Sustainable Development Goals 13 and 17);
 - (b) Strengthen institutions and provide technical assistance to facilitate access to science-based knowledge resources and leverage existing partnerships with other United Nations entities, international financial institutions, regional organizations, other international bodies and Governments to help member States to make progress towards achieving various Sustainable Development Goals and their targets;
 - (c) Assess the impact of climate change on agricultural productivity, ecosystems and extreme climate events through regional climate modelling, agricultural models and science-based policy analysis (water-related impact and impact of sand and dust storms, for Goals 2 and 15);
 - (d) Support improved access to affordable, reliable and sustainable sources of energy through capacity-building, monitoring, reporting and evaluation, contributing to the achievement of Goal 7;
 - (e) Promote innovative sustainable consumption and production pathways in the Arab region for the more efficient use of natural resources (Goal 12);
 - (f) Strengthen resilience and adaptive capacity through integrated policy measures for pursuing adaptation and mitigation and informed human and institutional capacities (Goal 13);
 - (g) Provide a neutral platform for cross-sectoral dialogue and facilitate consensus-building processes to advance the identification and adoption of sustainable solutions in the promotion of new and renewable sources of energy (see General Assembly resolutions [72/224](#) and [75/221](#)), energy efficiency, water-use efficiency, food security, food systems, biodiversity and environmental sustainability (Goal 17);
 - (h) Provide secretarial and technical advisory support to the high-level joint technical committee for water and agriculture in the implementation of the action plan 2022–2025 for the 2019 Cairo declaration, and review and promote the use of non-conventional water resources for the agriculture sector in Arab countries, as well as convening intergovernmental platforms focused on water, electricity and the environment (Goal 17);

- (i) Promote appropriate solutions for ensuring food security and contribute to Goal 6 by fostering integrated water resources management at all levels, through transboundary water cooperation and greater focus on groundwater resources;
- (j) Support integrated regional reporting and monitoring of the progress towards Goals 2, 6 and 7.

22.24 The above-mentioned work is expected to result in:

- (a) Bolstered commitments of member States to climate action, designed to build the resilience of communities to achieve global and national development goals;
- (b) Adoption by member States of policies, plans, harmonized tools, techniques and/or guidelines related to groundwater resource management, resilient food systems to ensure food security, sustainable energy transitions, and strengthened regional networks, knowledge hubs and coordination mechanisms.

Programme performance in 2021

Increased access to small-scale renewable energy technologies and applications for rural livelihoods in Jordan, Lebanon and Tunisia

- 22.25 Access to electricity in Arab rural areas stood at only 79.5 per cent in 2020, and cleaner energy continues to account for the lowest share of the Arab region's energy mix. In this context, the Regional Initiative for Promoting Small-Scale Renewable Energy Applications in Rural Areas of the Arab Region (REGEND) aims to improve the livelihoods, economic benefits, social inclusion and gender equality of Arab rural communities, particularly marginalized groups, by addressing energy poverty (see United Nations Environment Assembly resolution 4/18), water scarcity, vulnerability to climate change and other natural resources challenges.
- 22.26 The subprogramme produced assessment reports that analysed the challenges and barriers to women's employment and entrepreneurship in energy sectors in rural areas in Jordan, Lebanon and Tunisia, among other issues, and presented opportunities to reduce them. The reports were developed into training materials to improve beneficiaries' skills for income-generating activities and enable the transfer of acquired knowledge to peers. The subprogramme also developed an integrated business model that strengthens the interconnection of technology, human capacity, women's empowerment, social inclusion, entrepreneurial development and policy and institutional frameworks, with the aim of supporting rural entrepreneurship in environmentally sound technologies, particularly targeting women and youth. Field projects providing small-scale renewable energy systems, such as solar photovoltaic pumping systems for farmers, and productive equipment to beneficiaries were then implemented. Finally, the subprogramme developed operational and policy toolkits on small-scale renewable energy technologies and applications to scale up the initiative at the regional level.
- 22.27 Progress towards the objective is presented in the performance measure below (see figure 22.I).

Figure 22.I
Performance measure: number of field projects and number of trainees on use of renewable energy in productive sectors, by gender of beneficiaries

Planned results for 2023

Result 1: cross-sectoral policies for improved water and food security under changing climate conditions in the Arab region

Programme performance in 2021 and target for 2023

- 22.28 The subprogramme’s work contributed to three ministerial resolutions enhancing cross-sectoral coordination for improved water and food security in the Arab region being adopted by all Arab ministers responsible for agriculture and water resources, which exceeded the planned target of two additional ministerial resolutions being adopted.
- 22.29 In addition, the subprogramme’s work contributed to six assessment reports to inform policy on water resources management for more water-efficient crop production being prepared by government officials in member States (Jordan, Lebanon and State of Palestine) using AquaCrop and regional climate data from the Regional Initiative for the Assessment of the Impact of Climate Change on Water Resources and Socio-Economic Vulnerability in the Arab Region (RICCAR), which exceeded the planned target of two additional assessment reports.
- 22.30 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 22.2).

Table 22.2
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
1 resolution on coordination between the agriculture and water sectors adopted at a joint meeting of Ministers of Agriculture and Water Resources on 4 April 2019 in Cairo, supported by LAS, the Food and Agriculture Organization of the	–	3 ministerial resolutions enhancing cross-sectoral coordination for improved water and food security in the Arab region adopted by all Arab ministers responsible for	–	3 additional ministerial resolutions on coordination between the agriculture and water sectors are adopted

Part V Regional cooperation for development

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
United Nations and ESCWA		agriculture and water resources		
9 assessment reports prepared by government officials using AquaCrop and RICCAR regional climate data to inform policy for improved management of water resources and water-efficient crop production	2 additional assessment reports prepared by government officials using AquaCrop and RICCAR regional climate data to inform policy on water resources management for more water-efficient crop production	6 additional assessment reports prepared by government officials in member States (Jordan, Lebanon and State of Palestine) using AquaCrop and RICCAR regional climate data	Participating member States benefit from technical guidance and exchange of best practices made available through the Arab regional network of AquaCrop practitioners	–

Result 2: improved groundwater management in transboundary settings under the changing climate

Programme performance in 2021 and target for 2023

- 22.31 The subprogramme’s work contributed to two member States (Iraq and Mauritania) joining transboundary water cooperation arrangements for securing their medium- to long-term freshwater needs, which met the planned target.
- 22.32 In addition, the subprogramme’s work contributed to four member States (Iraq, Jordan, Kuwait and State of Palestine) conducting assessments of climate change impact on their groundwater resources, which met the planned target.
- 22.33 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 22.3).

Table 22.3
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Pilot assessment of climate change impacts on a groundwater aquifer in Morocco	A diverse range of stakeholders benefited from webinars on groundwater-related topics, structured around shared priority concerns and addressing knowledge gaps	2 member States (Iraq and Mauritania) joined transboundary water cooperation arrangements	At least 5 member States recognize the importance of transboundary groundwater for securing their medium- to long-term freshwater needs	At least 2 member States develop arrangements to address transboundary groundwater challenges within the context of climate change
	Regional guidelines for improved groundwater abstraction and management vetted by at least 5 member States	4 member States (Iraq, Jordan, Kuwait and State of Palestine) conducted an assessment of climate change impact on their groundwater resources	At least 10 member States acknowledge and benefit from the launch of a regional digital database on groundwater resources	At least 5 member States contribute data for the regional digital database on groundwater resources

Result 3: increased use of regional knowledge platforms for informed climate action**Proposed programme plan for 2023**

- 22.34 In response to requests from regional stakeholders, the subprogramme generated climate-related scientific outputs, harmonized data sets, projections, and training materials and documents on successful practices to inform regional and national dialogues, strengthen regional cooperation and promote the development of climate initiatives that engage public institutions, policymakers, the private sector and civil society in support of climate action in the Arab region.

Lessons learned and planned change

- 22.35 The lesson for the subprogramme, on the basis of consultations with beneficiaries, was that user-friendly communication tools were needed to facilitate the understanding and use of scientific data and technical information. Developing accessible platforms that are easy to navigate and from which documents can be downloaded and regular updates of information and data with newly generated knowledge material can be accessed can support the wide dissemination of that material, as well as the development of energy, water and food security policies based on climate assessments. In applying the lesson, the subprogramme will improve visual aspects of the knowledge products in existing regional knowledge platforms (including the RICCAR regional knowledge hub, the REGEND website, the Arab Integrated Water Resources Management Network (AWARENET) website and groundwater data sets), continue to simplify navigation to access and download pertinent information and implement a set of activities to generate new data, such as the Mashreq domain at a scale of 10 km². Moreover, the subprogramme will develop training materials and document best practices to build technical capacities in the region and provide scientific tools to inform policy dialogue and enable national and regional priority setting and the reaching of agreements on cooperative interventions.
- 22.36 Expected progress towards the objective is presented in the performance measure below (see figure 22.II).

Figure 22.II

Performance measure: number of visits to and number of downloads from the regional knowledge platforms (annual)

^a Figures as at 31 July 2021.

^b Figures are rounded to the nearest 500.

Deliverables

22.37 Table 22.4 lists all deliverables of the subprogramme.

Table 22.4

Subprogramme 1: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	12	14	–	12

11. Regional Initiative for the Assessment of the Impact of Climate Change on Water Resources and Socio-Economic Vulnerability in the Arab Region (RICCAR)	–	1	1	1
12. Arab Integrated Water Resources Management Network (AWARENET)	–	1	1	1
13. Arab network of AquaCrop practitioners	–	–	1	–
14. Advancing water and food security under climate change	–	–	1	1
15. Arab Centre for Climate Change Policies	1	1	1	–
16. Increasing the resilience of both displaced persons and host communities to climate change-related water challenges in Jordan and Lebanon	–	1	–	1
17. Increasing watershed resilience to climate change	–	1	–	1
18. The Mashreq water knowledge series	–	1	–	1
Publications (number of publications)	2	1	2	2
19. Related to climate action and sustainable natural resource management	2	1	2	2
Technical materials (number of materials)	3	7	6	6
20. Related to climate action and sustainable natural resource management	3	7	6	6

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Consultation, advice and advocacy: substantive advice to global and regional meetings, including sessions of ministerial councils convened by LAS on the environment, water, electricity, meteorology and climate.

Databases and substantive digital materials: RICCAR regional knowledge hub on climate change and water available to approximately 10,000 users.

D. Communication deliverables

Outreach programmes, special events and information materials: briefs, fact sheets and booklets on climate change, digital and sustainable technologies, water security, resilient food systems, good agriculture practices and food security, sustainable energy and other related issues; joint ministerial meetings on agriculture and water, the International Forum on Energy for Sustainable Development, the Arab Forum for Renewable Energy and Energy Efficiency, side events during the twenty-eighth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, the Committee on World Food Security and Cairo Water Week, as well as global and regional events and webinars for at least 2,000 regional stakeholders.

Subprogramme 2 Gender justice, population and inclusive development

Objective

- 22.38 The objective, to which this subprogramme contributes, is to achieve equitable and inclusive social development and reduce inequality, poverty and unemployment in line with the principle of leaving no one behind.

Strategy

- 22.39 To contribute to the objective, the subprogramme will:
- (a) Facilitate policy dialogue by capitalizing on the Commission’s intergovernmental processes and technical working groups, such as the working groups on gender equality, social protection and disability inclusion, to reach consensus on social policy issues;
 - (b) Develop national strategies on social development priorities in cooperation with member States, with an emphasis on social protection, poverty reduction, gender equality, the rights of older persons and persons with disabilities, and mainstream the needs of those who are vulnerable in national policies through capacity-building and South-South cooperation in support of national legislative and policy reforms;
 - (c) Enable assessment and analysis of the effectiveness and efficiency of national registry systems and related practices to integrate those who are vulnerable into social protection systems, with the aim of underpinning Governments’ efforts to address inequalities;
 - (d) Promote greater integration by member States of a social justice perspective in policymaking, including through the development of national remedy plans, leading to a greater alignment of national practices with international norms and global and regional frameworks that address inclusiveness in social protection and urban development to counter poverty issues related to gender equality and women’s empowerment and to those who are vulnerable (Sustainable Development Goals 1, 5, 10, 11, 16 and 17);
 - (e) Monitor, analyse and support the reform of national legislation and policies related to the advancement of gender justice through an inter-agency project, as part of the fulfilment of the commitments made in the Muscat Declaration: Towards the Achievement of Gender Justice in the Arab Region;

- (f) Roll out the revised Arab Multidimensional Poverty Index, together with member States, LAS, the United Nations Children’s Fund and the Oxford Poverty and Human Development Initiative, to measure multidimensional poverty at the regional level and adapt the Index to the country level;
 - (g) Cooperate with member States to reform labour market policies on the basis of an analytical understanding of market demands and changes occurring as a result of the fourth industrial revolution;
 - (h) Assess the performance of select cities during the COVID-19 pandemic regarding their ability to mitigate its impact on those who are vulnerable and to develop urban recovery plans that enhance urban economic resilience to future shocks.
- 22.40 The above-mentioned work is expected to result in:
- (a) More effective and efficient poverty alleviation strategies, inclusive and effective social protection systems and an informed exchange among public and private actors to create equitable and innovative labour markets that offer decent and productive work for all;
 - (b) Increased capacity of member States to address structural inequality between vulnerable segments of the population and enhance avenues for the participation and inclusion of those who are vulnerable in order to leave no one behind.

Programme performance in 2021

Improved legal and policy frameworks on gender equality and the empowerment of women and girls in the Arab region

- 22.41 Since early 2020, the subprogramme, in partnership with regional offices of the United Nations Development Programme, the United Nations Population Fund and the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women), worked closely with member States to examine gaps in legislation and policies by applying a set of criteria based on Sustainable Development Goal indicator 5.1.1 and producing in-depth national analytical reports on policy gaps for 20 Arab countries. The reports were validated with government officials, including national women’s machineries and ministries of the interior, and representatives from the judiciary and civil society. Those consultations were followed by a series of training events to further build the capacity of member States to measure progress in laws and policies governing gender equality and to identify key elements to be incorporated in the reformulation of laws while applying international standards. In addition, best practices from the region were made available to member States to facilitate South-South cooperation. To that end, the subprogramme developed a virtual portal on gender justice and equality in law in the Arab region to showcase regional successes and legal amendments that are in line with international standards and highlight gaps that still require action. The portal also provides users with access to legislation of member States related to the various indicators of Sustainable Development Goal 5 to further facilitate the sharing of good practices.
- 22.42 Progress towards the objective is presented in the performance measure below (see figure 22.III).

Figure 22.III
Performance measure: number of policies and pieces of legislation that addressed gender equality and promoted the empowerment of women and girls in the Arab region (cumulative)

Planned results for 2023

Result 1: employment perspectives for people in vulnerable situations in the Arab region

Programme performance in 2021 and target for 2023

- 22.43 The subprogramme’s work contributed to 65 people from Jordan and Lebanon enhancing their knowledge of strengthening regulatory procedures and non-governmental programmes through community policy workshops, which met the planned target.
- 22.44 In addition, the subprogramme’s work contributed to 78 small and medium-sized enterprises across the Arab region utilizing the prototype of the digital enabling platform, the SMEs Toolbox, which exceeded the target of 50.
- 22.45 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 22.5).

Table 22.5
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Regional consultation on development of the digital enabling portal to create an inventory of the needs of and support programmes available to small and medium-sized enterprises	First regional centre for entrepreneurship to support digitization and promotion of innovative solutions for the resurgence of small and medium-sized enterprises established	65 people (32 men and 33 women) from Jordan and Lebanon enhanced their knowledge on strengthening regulatory procedures and non-governmental programmes through community policy workshops	3 national centres for entrepreneurship established Strengthened networks of small and medium-sized enterprises in 7 Arab States	Increase in the number of small and medium-sized enterprises operated/founded by women and youth in 2 member States

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
		78 small and medium-sized enterprises across the Arab region utilized the prototype of the digital enabling platform, the SMEs Toolbox	Member States adopt the science, technology and innovation road map for the Arab countries	A national policy-community dialogue initiated in 3 member States to strengthen the entrepreneurial enabling environment

Result 2: accelerated coherent ageing policies in the Arab region

Programme performance in 2021 and target for 2023

- 22.46 The subprogramme’s work contributed to an additional policy having been developed in the Arab region (National Strategy for Older Persons in Lebanon 2020–2030), which met the planned target.
- 22.47 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 22.IV).

Figure 22.IV

Performance measure: number of Arab countries with coherent ageing policies (cumulative)

Result 3: increased effectiveness and efficiency of social protection systems in the Arab region

Proposed programme plan for 2023

- 22.48 The COVID-19 pandemic proved to be a significant challenge for the existing social protection systems in the Arab region, testing their effectiveness and efficiency and requiring many member States to rapidly adapt them so as to expand their coverage. In support of these efforts, the subprogramme developed an analytical social protection programme rapid assessment framework that enhanced member States’ ability to provide effective and efficient social assistance, which was subsequently implemented in Jordan. It also worked on the development of registration procedures, the integration of social databases into one comprehensive social management information system and the establishment of coordination mechanisms for shock-responsive social protection in the Sudan. The subprogramme also conducted a ministerial forum to develop a joint vision for social protection post-COVID-19.

Lessons learned and planned change

- 22.49 The lesson for the subprogramme was that the types of bottlenecks to be tackled by member States and the national objectives set with respect to improving their systems’ responsiveness differed across the region. In this context, providing policymakers with contextualized evidence, best practices and hands-on advice and support on how to identify and implement enhancements to the

existing systems, while ensuring their inclusiveness, is key. In applying the lesson and building on the existing momentum, the subprogramme will support member States with analysing the efficiency and effectiveness of their social protection systems; identify best practices and adapt them to national circumstances; and promote peer learning and the exchange of national experiences at the regional level. It will expand its support for Jordan and focus on the roll-out of the social protection programme rapid assessment framework in partnership with additional member States, amplifying it with labour market analytics and prospects to tailor pathways for social assistance beneficiaries to successfully graduate from the social assistance programme. The subprogramme plans the development of comprehensive social protection country profiles with member States to jointly identify entry points to advance social protection reforms in Arab countries.

22.50 Expected progress towards the objective is presented in the performance measure below (see table 22.6).

Table 22.6
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Rapid expansion of non-contributory social protection programmes with a determined shift from general subsidies to poverty-targeted cash transfers in the Arab region and extended coverage for a larger section of the population through contributory social protection (social insurance) in 10 member States (Egypt, Iraq, Jordan, Lebanon, Mauritania, Morocco, Oman, State of Palestine, Syrian Arab Republic and Tunisia)	During the COVID-19 pandemic, at least 8 member States (Egypt, Jordan, Mauritania, Morocco, Oman, State of Palestine, Sudan and Tunisia) rapidly channelled additional assistance to households covered by social insurance and social assistance and set up temporary emergency programmes directed at informal workers who were covered neither by social assistance nor social insurance	179 people (66 men and 113 women) from 17 member States trained on tools to increase inclusiveness of social protection systems 1 member State (Jordan) analysed the inclusiveness of its social protection systems	Civil servants and social assistance professionals from 3 member States trained on the social protection programme rapid assessment framework tool to increase inclusiveness of social protection systems 2 member States identify enhancements required to improve the efficiency and effectiveness of their social protection systems	2 additional member States identify enhancements required to improve the efficiency and effectiveness of their social protection systems

Deliverables

22.51 Table 22.7 lists all deliverables of the subprogramme.

Table 22.7

Subprogramme 2: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	12	11	4	13
1. Documents for the Committee on Women	6	5	2	7
2. Documents for the Committee on Social Development	6	6	2	6
Substantive services for meetings (number of three-hour meetings)	40	13	36	23
3. Meetings of the Committee on Social Development	4	2	–	4
4. Meetings of the Committee on Women	4	2	–	4
5. Meetings on violence against women; women and peace and security; women’s economic empowerment; social protection; poverty; inequality; fiscal policy; informality and the labour market; the future of work; urban development; disability; migration; ageing; youth; and other social issues	32	9	36	15
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	2	3	2
6. Women refugees from the Syrian Arab Republic	1	1	–	–
7. Security Council resolution 1325 (2000) at 20: towards a renewed engagement with the women and peace and security agenda in the Arab region	1	1	–	–
8. Migration governance framework	–	–	1	–
9. Ageing policy framework	–	–	1	–
10. Assessing skills and skills matching techniques	–	–	1	–
11. Towards Beijing +30 review	–	–	–	1
12. Women and peace and security: moving from plans to actions	–	–	–	1
Seminars, workshops and training events (number of days)	1	8	3	26
13. Workshops on social justice, including integrating social justice principles into public policies and programmes, and social entrepreneurship	–	2	–	11
14. Workshops on gender justice and women’s empowerment	1	1	3	1
15. Workshops on population development and ageing	–	3	–	4
16. Workshops on multidimensional poverty and social protection	–	1	–	6
17. Workshops on migration	–	1	–	4
Publications (number of publications)	5	5	4	10
18. On the realization of human rights for women; social protection; poverty; inequality; the future of work; and migration	5	5	4	10
Technical materials (number of materials)	13	16	15	16
19. On the realization of human rights for women; social protection; poverty; inequality; the future of work; and migration	13	16	15	16
C. Substantive deliverables				
Consultation, advice and advocacy: advocacy campaigns on International Day of Older Persons, International Migrants Day and International Day of Persons with Disabilities.				
Databases and substantive digital materials: virtual portal on gender justice and equality in law in the Arab region.				
D. Communication deliverables				
Outreach programmes, special events and information materials: campaign, promotional material and closing ceremony for the 16 days of activism on gender-based violence event on gender justice (see General Assembly resolution 67/144) for at least 50 regional stakeholders; events, campaigns and promotional materials on International Women’s Day for at least 50 regional stakeholders; materials on violence against women; a youth art competition (in partnership with non-governmental organizations (NGOs)) on addressing violence against women; information graphs on key results of publications and expert group meetings.				
External and media relations: commentaries on violence against women; commentaries on women’s economic empowerment.				

Subprogramme 3

Shared economic prosperity

Objective

- 22.52 The objective, to which this subprogramme contributes, is to achieve equitable economic growth, amplify regional interconnectedness and integration, and advance the effective implementation of the Addis Ababa Action Agenda of the Third International Conference on Financing for Development in support of the 2030 Agenda.

Strategy

- 22.53 To contribute to the objective, the subprogramme will:
- (a) Provide assistance to member States with monitoring, analysis and forecasting of macroeconomic and social variables and the implications of national policies on economic growth and fiscal space for the achievement of the Sustainable Development Goals;
 - (b) Provide advisory services and capacity-building on best practices for allocating resources, mainstreaming the Goals and mitigating structural economic challenges;
 - (c) Further expand its support to member States on monitoring their social expenditures by providing user-friendly methodological tools to analyse fiscal policy choices and their linkages to social expenditure and fiscal sustainability;
 - (d) Provide advice and build capacity for greater compliance by member States with trade agreements to which they are parties and for negotiating new agreements, such as the Arab Customs Union and the Deep and Comprehensive Free Trade Agreement with the European Union. To that end, the subprogramme will develop a set of user-friendly tools – the Arab Trade Gateway – to simulate the socio- and macroeconomic impact of new trade agreements, accelerate trade negotiations and South-South exchange and engage the private sector in the negotiation processes of trade agreements;
 - (e) Improve its platform to monitor and evaluate Arab economic integration through key performance indicators and indices, and build on existing geographic information systems for transport networks and facilities in the Arab region to assess and compare transport performance and connectivity, including road safety and facilitated access to the United Nations Road Safety Fund;
 - (f) Develop nationally tailored costing calculators and financing simulators for the Goals, supported by methods to capture synergies between the Goals that serve as building blocks to advance integrated national financing frameworks. A dedicated dynamic online interface for this purpose will be established to serve as a tool to provide sustainable advisory support to member States in this regard.
- 22.54 The above-mentioned work is expected to result in:
- (a) Fiscal policies that are connected to economic diversification, debt sustainability, social development and the Sustainable Development Goals, while ensuring macroeconomic stability;
 - (b) Improved capacity of policymakers to understand debt sustainability risks and options for effective debt management that creates fiscal space for the Goals through sustainable debt finance and debt reduction mechanisms, including debt swaps;
 - (c) Greater human and institutional capacity among Arab Governments to design and implement sound trade, logistics and transport policies that increase connectivity and contribute to economic growth and prosperity;

- (d) Improved ability of Member States to monitor, analyse and simulate financing for development trajectories, estimate financing gaps with regard to the Goals and identify policies to enhance growth and financing to achieve national targets relating to the Goals.

Programme performance in 2021

Improved transport connectivity in the Arab region

- 22.55 To improve the cost-effectiveness of land transport connectivity among ESCWA member States, and between member States and the rest of the world, the subprogramme undertook several projects related to the transport, trade, commerce and customs arrangements of all member States in addition to the private sector, in collaboration with the Economic Commission for Europe, the Economic Commission for Africa and LAS, among others. The subprogramme organized an expert group meeting on the corridors for vital connectivity, which assessed the potential benefits of connecting regional transport networks to bolster the inclusive economic and social development of the Arab region. It also organized several capacity-building workshops, one of which trained representatives from national transport authorities of all member States on ways of executing smooth and efficient border crossing procedures, in addition to customized workshops for Kuwait, Lebanon, the State of Palestine and Tunisia on the implementation of the Customs Convention on the International Transport of Goods under Cover of TIR Carnets (TIR Convention), of 1975. The subprogramme subsequently produced a regional study assessing and addressing the availability of transport facilities and emphasizing the importance of the application of the TIR Convention, including a forward-looking analysis on the collective application of e-TIR on a land transport corridor connecting the Eastern Mediterranean and countries of the Cooperation Council for the Arab States of the Gulf.
- 22.56 Progress towards the objective is presented in the performance measure below (see table 22.8).

Table 22.8

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
Parties to the TIR Convention include 12 member States	Egypt became party to the TIR Convention	Iraq is in the final stages of accession to the TIR Convention

Planned results for 2023

Result 1: social expenditure priorities in coherence with macro fiscal policy

Programme performance in 2021 and target for 2023

- 22.57 The subprogramme's work contributed to two member States (Jordan and Tunisia) completing the analysis of their public expenditure data, establishing a social expenditure monitor and improving their capacity to use the tool, which met the planned target.
- 22.58 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 22.9).

Table 22.9
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Member States provided with a common social expenditure monitoring framework	2 member States (Jordan and Tunisia) began applying social expenditure monitoring methodology to monitor budget expenditure on social priorities	2 member States (Jordan and Tunisia) completed the analysis of their public expenditure data, established a social expenditure monitor and improved their capacity to use the tool	More than 2 member States revise budget allocations, using social expenditure monitoring, with the aim of rebalancing social expenditures across priorities	1 additional member State revises budget allocations, using social expenditure monitoring, with the aim of rebalancing social expenditures across priorities

Result 2: debt swap for improved resources for climate and development finance**Programme performance in 2021 and target for 2023**

- 22.59 The subprogramme's work contributed to one member State (Jordan) establishing a national task force to operationalize a debt swap, which met the planned target.
- 22.60 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 22.10).

Table 22.10
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Increased understanding among member States of debt vulnerabilities	3 member States (Egypt, Jordan and Tunisia) expressed interest in operationalizing the debt-swap mechanism	1 member State (Jordan) established a national task force to operationalize a debt swap for a climate or development finance initiative	1 or more additional member States agree to set aside an amount of debt to swap for a climate or development finance initiative	1 additional member State increases expenditure on climate or Sustainable Development Goal initiatives, utilizing funds from the debt swap

Result 3: improved effectiveness of economic policies from a gender perspective**Proposed programme plan for 2023**

- 22.61 The relatively low level of women's economic participation in various Arab economies is one of the central development challenges in the region. In response to requests from member States to understand the evaluation of their performance on a set of global indices,¹ the subprogramme developed a platform to explain the methodology and data sets used for the calculation of 11 indices and simulate the impact of a potential policy change on the scoring of individual indicators and the overall ranking. The subprogramme piloted the platform with data on 3 of the 11 indices, starting

¹ The Global Competitiveness Index, the Global Gender Gap Index, the Global Innovation Index, the Global Cybersecurity Index, the Information and Communications Technology Development Index, the Network Readiness Index, the e-Government Development Index, the Digital Accessibility Rights Evaluation Index, the e-Participation Index, the business-to-consumer electronic commerce index and the Government Artificial Intelligence Readiness Index.

with the Global Gender Gap Index and two other indices that include a gender perspective. A meeting for focal points from all member States was also convened to validate the methodology and set the way forward. The subprogramme developed a prototype interface, which was tested by the focal points, and completed the second phase of the development, including all 11 global indices.

Lessons learned and planned change

22.62 On the basis of the implementation of previous simulation platforms, the subprogramme learned that it was important to closely link the development of the platform with the user experience and to allow member States to discuss their experience using the platform. In applying the lesson, the subprogramme will establish a network of users to share experiences, transfer knowledge and promote the use of the platform to new users, and work with the network to adjust the functionalities of the platform to better cater to user needs. It will then organize national workshops to support two member States in the use of the platform, with the aim of developing new policies to improve women’s economic participation.

22.63 Expected progress towards the objective is presented in the performance measure below (see table 22.11).

Table 22.11
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	Global Gender Gap Index scoring by member States ranged between 0.494 and 0.655, compared with the global average score of 0.686	Global Gender Gap Index scoring by member States ranged between 0.492 and 0.716, compared with the global average score of 0.677	At least 2 member States develop new policies to improve female economic participation	Improved ranking on the Global Gender Gap Index scoring of at least 1 of the 2 member States that developed new policies to advance female economic participation

Deliverables

22.64 Table 22.12 lists all deliverables of the subprogramme.

Table 22.12
Subprogramme 3: deliverables for the period 2021–2023, by category and subcategory

11. Strengthening evidence-based interventions for road safety in the Arab region through effective and reliable data recording, processing and analysis	–	1	–	1
Seminars, workshops and training events (number of days)	–	5	–	–
12. Training event on international tax matters: base erosion and profit shifting for Jordan	–	3	–	–
13. Workshop on estimating the economic cost of gender equality	–	2	–	–
Publications (number of publications)	3	4	2	2
14. On issues relating to economic development	3	4	2	2
Technical materials (number of materials)	18	23	19	20
15. On the economy of the future; public finance and inclusive fiscal policy, including fiscal space challenges for low- and middle-income countries and climate finance; trade and industrial policy; trade negotiation and trade facilitation; transport connectivity and logistics; productive capacity of Arab least developed countries; illicit financial flows, financing for development and other issues related to economic development, many with the added component of addressing the negative longer-term impact of COVID-19	18	23	19	20
C. Substantive deliverables				
Consultation, advice and advocacy: strategic advice to the United Nations Road Safety Fund Steering Committee.				
Databases and substantive digital materials: the Arab Trade Gateway (comprising a trade agreement portal, a trade cost portal, a digital and sustainable trade facilitation measures portal, a logistics performance portal, a system for measuring, monitoring and evaluating Arab economic integration, an index simulator for policymakers in the Arab region and an Arab trade policy simulation interface); updated data sets for the Arab region on the International Transport Infrastructure Observatory; Sustainable Development Goals financing resources knowledge portal; financing for development gateway and data analytics; Sustainable Development Goals costing calculator for the Arab region; dynamic financing for development simulator; Sustainable Development Goals interlinkages tool; computable general equilibrium models for three member States; social expenditure monitor for three member States.				
D. Communication deliverables				
Outreach programmes, special events and information materials: high-level plenary on financing for development on the margins of the Arab Forum for Sustainable Development; side event at the high-level political forum on sustainable development in 2023.				

**Subprogramme 4
Statistics, the information society and technology**

Objective

- 22.65 The objective, to which this subprogramme contributes, is to strengthen the development of official statistical frameworks, improve the quality and availability of statistics and advance the information society by accelerating the integration of technology and innovation for sustainable development in the Arab region.

Strategy

- 22.66 To contribute to the objective, the subprogramme will:
- (a) Conduct normative work and capacity development on the use of big and open data and geospatial technology to modernize national statistical systems and monitor implementation of the 2030 Agenda;
 - (b) Provide technical assistance to Arab States on the use of new technologies for censuses and surveys, and register-based data to produce demographic, social, economic, environmental and multidomain statistics with required disaggregated levels to leave no one behind;
 - (c) Build the capacity of national statistical offices for greater compliance with international statistical standards to provide evidence that informs policies, acting as the regional custodian of the Fundamental Principles of Official Statistics (see General Assembly resolution 68/261);
 - (d) Mobilize intergovernmental networks of statistical experts to coordinate and develop statistical capacities for implementation of the Arab Regional Action Plan for Sustainable Development Data;
 - (e) Promote the use by member States of digital solutions to address social and economic challenges and improve the digital inclusion of citizens;
 - (f) Identify and share global and regional best practices and expertise related to innovation, technology and statistics, promote entrepreneurial technologies for sustainable development, including by building and maintaining networks of practitioners, and promote South-South cooperation;
 - (g) Promote the utilization of science, technology and innovation in inducing social and economic development, by supporting the design of improved national and regional policies in the areas of information and communications technology (ICT), financial technologies, artificial intelligence, big and open data technologies and other frontier technologies;
 - (h) Serve as a forum to reach regional consensus and provide policy advice in the areas of Arab Internet governance, digital government and electronic governance and to enhance the capacities of policymakers to harness technology, tools and techniques, while remaining mindful of the effects of technology on people.
- 22.67 The above-mentioned work is expected to result in:
- (a) Strengthened coherence and coordination of statistical activities by member States, based on national statistical frameworks and in cooperation with regional statistical agencies, to cover the data needs of the 2030 Agenda;
 - (b) Greater compliance of national statistical offices with international statistical standards and recommendations, leading to more consistent data about the region and more effective use of statistics in policymaking;
 - (c) Effective national and regional strategies with improved synergies between science, technology and innovation, supporting transformation to knowledge and digital economies, building science, technology and innovation ecosystems and promoting technology-based entrepreneurship and small and medium-sized enterprises;
 - (d) Improved capacity of policymakers in the region to utilize new data, statistics, technology and knowledge products, tools and techniques to inform policy decisions to deal with the medium- and long-term ramifications of the COVID-19 pandemic;
 - (e) Growth-based digital inclusion, in accordance with the principle of “leave no one behind”, and protection of the rights of people in the technology and information age.

Programme performance in 2021

Arab member States' socioeconomic statistical profiles informed common country analyses for their sustainable development

- 22.68 In line with the reform of the United Nations development system and to position the United Nations to deliver as one, the subprogramme deployed a free, full access data repository on social, economic, environmental and multidomain statistics to facilitate public access to data collected from primary sources, such as national statistical offices in member States, government institutions in the Arab region and specialized studies published by United Nations and other international entities. The searchable data repository, available to member States and development partners, comprises comprehensive visualizations and easy-to-use self-service visualization tools to create customized dashboards, including charts and geographic maps. The subprogramme also worked closely with United Nations country teams in the region to develop customized statistical profiles of member States to inform the development of common country analyses and United Nations Sustainable Development Cooperation Frameworks. Initially, the subprogramme piloted this approach with the United Nations country team in Lebanon, and has since expanded the offer to an additional eight country teams (Bahrain, Egypt, Iraq, Jordan, Morocco, Saudi Arabia, Tunisia and the United Arab Emirates).
- 22.69 Progress towards the objective is presented in the performance measure below (see figure 22.V).

Figure 22.V

Performance measure: number of member States benefiting from United Nations Sustainable Development Cooperation Frameworks formulated on the basis of common country analyses underpinned by custom statistical profiles (cumulative)

Planned results for 2023

Result 1: regional knowledge and data repository to strengthen government decision-making processes

Programme performance in 2021 and target for 2023

- 22.70 The subprogramme's work contributed to government staff from five member States (Egypt, Lebanon, Qatar, State of Palestine and Tunisia) registering with the knowledge repository, which met the planned target.
- 22.71 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 22.13).

Table 22.13
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
United Nations development system entities in the region request ESCWA to lead the knowledge management task force of the regional collaborative platform to conceptualize the Arab regional knowledge repository	Data hub, a publicly accessible knowledge and data repository (portal), available for the Arab region	Deployment of the knowledge repository as a publicly accessible regional good (achieved in 2020) Government staff from 5 member States (Egypt, Lebanon, Qatar, State of Palestine and Tunisia) registered with the knowledge repository	At least 50 per cent of member States in the region use the knowledge repository to inform the development of sectoral policies	At least 75 per cent of member States in the region use the knowledge repository to inform the development of sectoral policies

Result 2: improved production and communication of data on the Sustainable Development Goals to leave no one behind

Programme performance in 2021 and target for 2023

- 22.72 The subprogramme’s work contributed to improving the percentage of Arab States with country data available in the official global database on the Sustainable Development Goals, including disaggregation of data, to 41 per cent in 2021, which exceeded the planned target of 40 per cent of country data available for the Arab States.
- 22.73 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 22.VI).

Figure 22.VI

Performance measure: percentage of country data available for the Arab States in the official global database on the Sustainable Development Goals

Result 3: advancement of digital development assessments and strategies at the national and regional levels in the Arab region

Proposed programme plan for 2023

- 22.74 In the outcome document of the high-level meeting of the General Assembly on the overall review of the implementation of the outcomes of the World Summit on the Information Society (see Assembly resolution [70/125](#)), Member States were encouraged to conduct reviews of the implementation of the

Summit action lines to assess progress in leveraging the role of the information society to advance sustainable development. The subprogramme devised a conceptual model that showed intersections between the Summit action lines and the Sustainable Development Goals and supported member States in reviewing the five clusters of digital development. A self-assessment on the process was undertaken to inform the second round of reviews. In 2021, inter-agency partners joined efforts to support the reviews and advise on designing national digital development strategies.

Lessons learned and planned change

- 22.75 The lesson for the subprogramme was that there was an increased demand for regular national reviews to support the assessment of citizens’ benefits from digital development, and for the concomitant scaling up of capacity-building for national digital development focal points. In applying the lesson, the subprogramme will support an increased number of member States in their second review, increase the frequency of regional expert group meetings and provide technical advice to national and sectoral focal points. In addition, the subprogramme will promote the formalization of national intersectoral expert working groups in support of the annual review process. The subprogramme also plans to engage with its partners more closely in the thematic peer review, as one of the final steps of the process. Working with LAS towards a regional ICT strategy, the subprogramme will also complete a measurement model for national and regional digital development.
- 22.76 Expected progress towards the objective is presented in the performance measure below (see figure 22.VII).

Figure 22.VII
Performance measure: number of member States that undertook biannual national digital development reviews and designed digital development strategies (cumulative)

Deliverables

- 22.77 Table 22.14 lists all deliverables of the subprogramme.

Table 22.14

---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Databases and substantive digital materials: ESCWA Online Statistical Information System; ESCWA data portal (comprising databases and data visualization dashboards related to economics, social and demographic matters, environment and energy, population, gender statistics, education and employment); Sustainable Development Goals database; country profiles, each providing access to information, knowledge and capacity-building to all 20 member States and international stakeholders.

D. Communication deliverables

Outreach programmes, special events and information materials: semi-annual newsletter on price statistics; semi-annual newsletter on gender statistics; annual statistics newsletter; technology bulletin; Internet governance outcome material targeting a community of practice for at least 500 stakeholders (experts and representatives from member States) in the Arab region.

Subprogramme 5 2030 Agenda and SDG coordination

Objective

- 22.78 The objective, to which this subprogramme contributes, is to accelerate progress towards sustainable development in the Arab region in line with the 2030 Agenda and to advance intraregional collaboration and a multi-stakeholder approach to key regional and subregional sustainable development issues.

Strategy

- 22.79 To contribute to the objective, the subprogramme will:
- (a) Support the alignment of national development plans with the 2030 Agenda and advocate an integrated approach to the achievement of, follow-up to and review of the Sustainable Development Goals. The subprogramme will coordinate the Arab sustainable development report for 2024 and will continue to demonstrate the necessity and value added of a nationally owned, integrated approach to the 2030 Agenda;
 - (b) Improve and add platforms, such as the Arab Forum for Sustainable Development, to strengthen consensus-building, peer learning and knowledge transfer between Arab countries in support of the 2030 Agenda and sustainable recovery from the COVID-19 pandemic;
 - (c) Harness, through strengthened dialogue between stakeholders, the respective support of the Arab NGO Network for Development, the Arab Organization of Supreme Audit Institutions, LAS, IsDB, the United Nations Development Programme and the Inter-Parliamentary Union to continue providing an opportunity for regional platforms of civil society organizations and parliamentarians to feed into larger, multi-stakeholder discussions;
 - (d) Provide a review of progress in the implementation of the Goals at the regional level, and policy recommendations for regional action.
- 22.80 The above-mentioned work is expected to result in:
- (a) Improved institutional coordination and evidence-based national policies and processes that reflect an understanding of the key principles of leaving no one behind through a “people-centred” and multi-stakeholder approach to sustainable development and a more integrated formulation of strategies and targets across the Sustainable Development Goals;
 - (b) Increased ability of government and non-governmental stakeholders to partake in the implementation of, follow-up to and review of the 2030 Agenda in Arab countries; and increased opportunities for different groups to engage with each other across national, subregional, regional and global forums;

- (c) Formulation of recovery plans that, in addition to mitigating the socioeconomic impact of the pandemic itself, build on and integrate the principles and goals of the 2030 Agenda.

Programme performance in 2021

Policy solutions aimed at mitigating the impact of the pandemic

- 22.81 In an effort to offer solutions for sustainable recovery from the COVID-19 pandemic for member States, the subprogramme, in collaboration with 15 regional United Nations entities and LAS, developed a series of policy briefs that shed light on the direct impact of COVID-19 on at least 10 Sustainable Development Goals (Goals 1, 2, 3, 5, 8, 10, 12, 13, 16 and 17) in Arab countries. The policy briefs highlighted measures taken by different member States to counter the effects of the pandemic and offered a menu of response measures that contributed to leaving no one behind, including through technological innovations to ensure business continuity and the provision of essential services. Accordingly, at the 2021 Arab Forum on Sustainable Development, the number of plenaries was significantly increased to 13 and the plenaries were organized around the forward-looking recommendations of the policy briefs. The plenaries guided a targeted exchange among participants on the solutions developed at the national level to respond to the COVID-19 pandemic and informed the key messages resulting from the Forum on a more inclusive and sustainable recovery from COVID-19.
- 22.82 Progress towards the objective is presented in the performance measure below (see table 22.15).

Table 22.15
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
Arab Forum on Sustainable Development resulted in consolidated messages on dismantling the main barriers to the achievement of the Sustainable Development Goals in the region	15 regional United Nations entities consolidated analysis on the impact of COVID-19 on the Goals in Arab States	Member States endorsed key regional messages and policy recommendations on solutions to mitigate the impact of COVID-19 (E/HLPF/2021/3/Add.5)

Planned results for 2023

Result 1: peer-learning and capacity-building for the new generation of voluntary national reviews

Programme performance in 2021 and target for 2023

- 22.83 The subprogramme’s work contributed to enhanced and productive interaction between government stakeholders (Iraq and Jordan) coordinating the voluntary national review process and preparing national Sustainable Development Goal reports, which met the planned target.
- 22.84 In addition, the subprogramme’s work contributed to expanding the membership of the community of practice to include non-governmental experts on voluntary national reviews and the development of a workplan to fully activate the community of practice, which did not meet the planned target of positive feedback on the effectiveness of the community of practice. The target was not met because of the delay in the launch of the community of practice.
- 22.85 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 22.16).

Table 22.16
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Member States call for enhanced peer learning on voluntary national reviews during the Arab Forum for Sustainable Development, held in April 2019, and the ESCWA Executive Committee meeting held in June 2019	Launch of the community of practice on voluntary national reviews in the Arab region, with exchanges between government officials	Enhanced and productive interaction between government stakeholders (Iraq and Jordan) coordinating the voluntary national review process and preparing national Sustainable Development Goal reports	Sustained interactions and exchanges between government stakeholders coordinating the voluntary national review process and/or preparing national Sustainable Development Goal reports	Two countries in the Arab region produce evidence-based voluntary national reviews through coordination with ministries of planning and national statistical offices and/or supreme audit institutions
Regional capacity-building workshop on voluntary national reviews in October		Expanded membership of community of practice to include non-governmental experts		
Agreement among member States to establish a community of practice coordinated by ESCWA				

Result 2: recovery and post-pandemic development planning integrates the 2030 Agenda and the Sustainable Development Goals

Programme performance in 2021 and target for 2023

- 22.86 The subprogramme’s work contributed to one member State (Egypt) integrating the 2030 Agenda to accelerate progress on the Sustainable Development Goals in its COVID-19 recovery plan, which met the planned target.
- 22.87 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 22.17).

Table 22.17
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	One member State (Egypt) integrated the 2030 Agenda to accelerate progress on the Sustainable Development Goals into its COVID-19 recovery plan	Two COVID-19 recovery plans in the Arab region integrate the 2030 Agenda to accelerate progress on the Goals	Two additional national development plans aligned with the 2030 Agenda

Result 3: improved voluntary national review process through formalized intraregional and interregional peer learning

Proposed programme plan for 2023

- 22.88 The subprogramme supports member States in developing their voluntary national reviews, a key follow-up mechanism of the Sustainable Development Goals, by organizing annual regional workshops that provide them with space for dialogue and knowledge exchange on experiences and success stories during and after the voluntary national review process. The subprogramme organizes these workshops in collaboration with the Department of Economic and Social Affairs of the Secretariat and LAS to pave the way for more focused interregional and intraregional learning activities.

Lessons learned and planned change

- 22.89 The lesson for the subprogramme, having engaged with the Department of Economic and Social Affairs and observed activities conducted by other regional commissions to support the voluntary national review process, was that twinning exercises organized by the Economic and Social Commission for Asia and the Pacific (ESCAP) are an effective mechanism for peer learning. In applying the lesson, the subprogramme will build on the experience of ESCAP in conducting twinning exercises to bring together States that have completed a voluntary national review with those planning to conduct one for the subsequent cycle, from within and outside the Arab region, for discussions on solutions to challenges and the identification of best practices to assist in their endeavours before, during and after a voluntary national review. The subprogramme will also implement other peer learning approaches, including issue-based focus groups on data, evaluations, whole-of-government and whole-of-society approaches, partnerships and leaving no one behind.
- 22.90 Expected progress towards the objective is presented in the performance measure below (see table 22.18).

Table 22.18

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Informal interaction between member States in workshops focusing on regional issues of concern	Informal interaction between member States in workshops focusing on regional issues of concern	Member States benefit from the first peer-learning activity on methodological issues of reporting on the 2030 Agenda	Two member States engage in a twinning exercise (pilot voluntary national review peer-learning initiative)	Two additional member States benefit from peer-learning approaches to voluntary national reviews (twinning and issue-based focus groups)

Deliverables

- 22.91 Table 22.19 lists all deliverables of the subprogramme.

Table 22.19

Subprogramme 5: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	17	10	15	17
1. Meetings of the Arab Forum for Sustainable Development	9	9	8	9
2. Arab Regional Parliamentary Forum on the 2030 Agenda	4	1	4	4

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
3. Meetings of standing expert groups on the 2030 Agenda	4	–	3	4
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	–	4	–	4
4. Voluntary national review workshops	–	4	–	4
Technical materials (number of materials)	2	11	2	4
5. On sustainable development	2	11	2	4
C. Substantive deliverables				
Consultation, advice and advocacy: advice to the Arab Forum for Sustainable Development task force, for more than 1,000 participants; advice to global and regional events on the 2030 Agenda for approximately 2,000 participants, and the Arab Sustainable Development Week, attended by over 1,000 participants.				
Databases and substantive digital materials: SDG Knowledge and Learning platform, including training material in the form of self-paced online courses on the 2030 Agenda and the Sustainable Development Goals and guidelines on the implementation of the 2030 Agenda.				

Subprogramme 6 Governance and conflict prevention

Objective

- 22.92 The objective, to which this subprogramme contributes, is to advance just, peaceful and inclusive societies, especially for people living under occupation or in conflict or post-conflict settings; to improve governance and strengthen effective, efficient and accountable public institutions; and to enhance service delivery.

Strategy

- 22.93 To contribute to the objective, the subprogramme will:
- (a) Periodically assess the impact of conflict and occupation on the capacity of member States to achieve the Sustainable Development Goals and to define strategic options for inclusive human development in the Arab region;
 - (b) Develop an analytical tool to enable policymakers to identify vulnerabilities and design targeted policies for tackling human development based on global indices related to human development, governance, environmental sustainability, political instability and the impact of conflict on development in the region;
 - (c) Advance national governance and resilience capacities to mitigate specific shocks, assess and improve the effectiveness of crisis-response policies and lower risks associated with emerging socioeconomic, environmental and governance challenges;
 - (d) Enhance the capabilities of Palestinian institutions to mitigate the impact of the Israeli occupation on service delivery and social and economic development, including decreasing the asymmetric dependency of the Palestinian economy;
 - (e) Support knowledge-sharing on the interdependence between governance, institutional quality and development gains by providing technical assistance, capacity-building and policy advice to improve the effectiveness and accountability of institutions, advance knowledge and assist governments and regional institutions in developing capacities at the individual, organizational, institutional and societal levels to drive the transformational change to implement the 2030 Agenda;

- (f) Support Arab least developed countries within the framework of the programme of action for the least developed countries for the decade 2021–2030 to enhance their institutional capacities for achieving the 2030 Agenda and graduating from the least developed country category;
- (g) Facilitate cooperation among partners and member States on regulatory and institutional reforms in the field of competition and build their capacity through the annual Competition Forum for the Arab Region and knowledge-sharing platforms;
- (h) Provide member States with policy advice and capacity-building on open and digital government transformation and innovation, offer measurement tools to assess the progress achieved in digital transformation, guide the advancement of digital government services and open government strategies, disseminate knowledge on the impact of open government on socioeconomic development and promote best practices for achieving the Sustainable Development Goals, in particular Goals 16 and 17.

22.94 The above-mentioned work is expected to result in:

- (a) Bolstered conflict prevention through evidence-based risk management by policymakers;
- (b) Enhanced capacity of member States to assess the impacts of conflict on human development, including on the well-being of women and girls, as well as evidence-informed policymaking to ease transitions into the labour market;
- (c) Updated national competition law and new policy reform initiatives that contribute to promoting consumer welfare and competitive markets;
- (d) Improvement in the services provided by public institutions, with enhanced performance and accountability;
- (e) Enhanced capacity of member States to evaluate the effectiveness of their national development policies.

Programme performance in 2021

A common vision of the development challenges of Arab least developed countries

22.95 As part of the preparations for the Fifth United Nations Conference on the Least Developed Countries, which had been due to be held in Doha in 2022, the subprogramme initiated, in partnership with the Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States and several Arab funds and programmes, a consultative process to produce a common development vision for the coming decade for the four ESCWA member States in the least developed countries category, namely, Mauritania, Somalia, the Sudan and Yemen. The subprogramme issued a publication on the development opportunities and challenges for Arab least developed countries and organized bilateral meetings with the four member States, key Arab donor countries and major Arab funds and programmes. The subprogramme subsequently organized a regional meeting for the four Arab least developed countries and prepared a report on the development assistance provided during the past decade, with the aim of identifying common views among Arab countries to support the design and implementation of the future programme of action for the least developed countries. The subprogramme further convened a side event on the margins of the first session of the Preparatory Committee for the Fifth United Nations Conference on the Least Developed Countries to reach a common development vision. This process brought forth the challenges faced by Arab least developed countries, including that of protracted conflict, which had prevented them from meeting the criteria set forth in the Programme of Action for the Least Developed Countries for the Decade 2011–2020.

22.96 Progress towards the objective is presented in the performance measure below (see table 22.20).

Table 22.20

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
–	4 Arab least developed countries agree to work towards a common development vision for the next decade	4 Arab least developed countries present a common vision for 2021–2030, which is included in the zero draft of the outcome document of the Fifth United Nations Conference on the Least Developed Countries

Planned results for 2023**Result 1: public policy outcomes serve the Arab region through effective competition****Programme performance in 2021 and target for 2023**

- 22.97 The subprogramme's work contributed to the ratification by four member States (Algeria, Kuwait, Morocco and United Arab Emirates) of a set of recommendations on competition assessment that build on OECD and UNCTAD guidelines, which met the planned target.
- 22.98 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 22.21).

Table 22.21

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
No harmonized approach to competition assessments in the Arab region	1 member State initiated an assessment aimed at strengthening and harmonizing its national competition policy framework	Ratification by 4 member States (Algeria, Kuwait, Morocco and United Arab Emirates) of recommendations on competition assessment that build on OECD and UNCTAD guidelines	At least 4 member States ratify a set of recommendations on competition assessments and policy reforms based on international standards	1 member State introduces regulatory or institutional reforms targeted at improving competition

Result 2: enhanced integration of transboundary risk planning, management and prevention into national development plans and policies**Programme performance in 2021 and target for 2023**

- 22.99 The subprogramme's work contributed to one member State (Jordan) integrating a developed risk assessment tool that addresses transboundary conflict and non-conflict drivers of hazards and vulnerability into its national COVID-19 response strategy, which met the planned target.
- 22.100 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 22.22).

Table 22.22
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Expert group validated the approach on the transboundary risk assessment and management framework	Arab States gained access to contextualized (for the region) risk assessment tools and gained a better understanding of qualitative risk assessment approaches	1 member State (Jordan) integrated a developed risk assessment tool that addresses transboundary conflict and non-conflict drivers of hazards and vulnerability into its national COVID-19 response strategy	At least 1 additional member State integrates the developed risk assessment tools that address transboundary conflict and non-conflict drivers of hazards and vulnerability into its national development strategy Regional technical dialogue platform is launched and enables peer exchanges among member States on transboundary risk management	Policies developed in the 3 member States in which the initiative is piloted take into consideration the effects of transboundary conflict and non-conflict drivers of hazards and vulnerability

Result 3: enhanced capacity of policymakers to determine development challenges at the national level

Proposed programme plan for 2023

22.101 The subprogramme designed a global development challenges index, which measures shortfalls from desirable achievements in three areas: quality of basic human development, environmental sustainability and governance. The subprogramme organized an expert group meeting to discuss the conceptual framework and methodology for the index and the structure of the development challenges report, which will include the Arab region’s performance. The subprogramme then produced 10 technical materials on the measurement methodology for the index and on its three main areas. Subsequently, the subprogramme produced a report that presents the final conceptual framework for the index, as well as its main results for Arab countries and other regions, in addition to a study focused on the Arab region’s development challenges.

Lessons learned and planned change

22.102 The lesson for the subprogramme, building on the experience of developing the Arab Multidimensional Poverty Index, was that it is important to prioritize having consultations with stakeholders at the subregional level on the findings of the global development challenges index to discuss its relevance at the subregional level and hence generate interest from member States to produce national development challenges assessments. In applying the lesson, the subprogramme will organize three subregional meetings, which will include focal points from member States to discuss and endorse the index, and will also develop a toolkit to produce nationally tailored development challenges indices and assessment reports. The subprogramme will then work directly with three countries to apply the toolkit to develop national development challenges assessments.

22.103 Expected progress towards the objective is presented in the performance measure below (see table 22.23).

Table 22.23

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	Countries use global indices, such as the human development index, to evaluate the effectiveness of their national development plans	4 member States endorse the measurement framework for the global development challenges index	3 countries develop national assessments and national human development challenges reports on the basis of findings from the global development challenges index

Deliverables

22.104 Table 22.24 lists all deliverables of the subprogramme.

Table 22.24

Subprogramme 6: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	2	1
1. Note of the Secretary-General on the economic and social repercussions of the Israeli occupation on the living conditions of the Palestinian people in the Occupied Palestinian Territory, including East Jerusalem, and the Arab population in the occupied Syrian Golan to the General Assembly and the Economic and Social Council	1	1	1	1
2. Report to the ESCWA ministerial session on the social and economic impact of the Israeli occupation: thematic focus	–	–	1	–
Substantive services for meetings (number of three-hour meetings)	16	16	13	20
3. Meetings on post-conflict and durable peace; vulnerability assessments and risk mitigation; institution-building to strengthen resilience, performance and service provision; innovation in the public sector; public service delivery; open government; economic governance; and mitigating the impact of occupation, policy dialogue and issues concerning sustainable development of countries in situations of conflict and post-conflict countries	12	12	13	12
4. High-level meeting of LAS/the Arab Administrative Development Organization/ESCWA	4	4	–	4
5. Competition Forum for the Arab region	–	–	–	4
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	–	2	2	4
6. Country-specific and regional projects (Arab least developed countries, Libya, State of Palestine and Yemen)	–	2	2	4
Seminars, workshops and training events (number of days)	5	3	5	1
7. Training exchange platform on competition in the region	5	1	1	–
8. Competition Forum for the Arab Region	–	2	1	–
9. Workshop on competition	–	–	–	1
10. Workshops on governance and digital transformation; and major subindices (governance, human development index, conflict, environment)	–	–	2	–

Part V Regional cooperation for development

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
11. Workshop on the comprehensive risk assessment framework	–	–	1	–
Publications (number of publications)	2	4	1	2
12. On governance and conflict prevention	2	1	–	1
13. <i>Palestine under Occupation</i>	–	1	1	1
14. <i>World Development Challenges Report</i> (replacing publication on rethinking human development)	–	1	–	–
15. Assessment of competition and consumer protection legislation	–	1	–	–
Technical materials (number of materials)	8	22	8	8
16. On durable peace; vulnerability assessments and risk (associated with conflict, COVID-19, climate change, water scarcity, food security and forced displacement) mitigation; institution-building to strengthen resilience, performance and service provision; innovation in the public sector; open government; economic governance; mitigating the impact of occupation; sustainable development of countries in situations of conflict and post-conflict countries; impact of competition reforms on trade policy; human development and human security (see General Assembly resolution 66/290); and advancing the Sustainable Development Goals	8	22	8	8

C. Substantive deliverables

Consultation, advice and advocacy: consultative meeting with member States at the OECD Global Forum on Competition.

Databases and substantive digital materials: portal on open government and open data in the Arab region; portal on the Arab business environment legislative framework, including competition provisions and legislation; prototype platform for policymakers to help formulate responses and implement and monitor adopted policies (during a crisis) by leveraging new kinds of data and analytical approaches; ESCWA violence early warning system portal; regulatory reforms tracker.

D. Communication deliverables

Outreach programmes, special events and information materials: side event at the substantive session of the Economic and Social Council for experts and representatives from Governments and civil society organizations from the region; observance of the International Day of Solidarity with the Palestinian people; wallchart on the impact of conflict and occupation on the socioeconomic development of the Palestinian people; analysis and information material on governance, conflict prevention and the impact of occupation on development outcomes; periodic meetings on the regional technical dialogue platform for member States on the assessment of risks associated with transboundary conflict and non-conflict drivers of hazards and vulnerability.

B. Proposed post and non-post resource requirements for 2023

Overview

22.105 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 22.25 to 22.27.

Table 22.25

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2021 expenditure ^a	2022 appropriation	Changes					2023 estimate (before recosting)

Total	255	–	–	–	–	255

^a Includes four temporary posts (1 P-4, 2 P-3 and 1 Local level), which were approved pursuant to General Assembly resolution 71/272 A.

22.106 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 22.28 to 22.30 and figure 22.VIII.

22.107 As reflected in tables 22.28 (1) and 22.29 (1), the overall resources proposed for 2023 amount to \$44,105,900 before recosting, reflecting a net decrease of \$86,000 (or 0.2 per cent) compared with the appropriation for 2022. Resource changes result from other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Explanation of variances by factor, component and subprogramme

Overall resource changes

Other changes

22.108 As reflected in table 22.28 (1), resource changes reflect a net decrease of \$86,000, as follows:

- (a) **Subprogramme 2, Gender justice, population and inclusive development.** The increase of \$94,400 relates to increased requirements under experts to accommodate additional expert group meetings planned on issues related to equality;

- (b) **Subprogramme 3, Shared economic prosperity.** The increase of \$110,000 relates to increased requirements under experts to accommodate additional expert group meetings planned on issues related to financing for development;
- (c) **Subprogramme 4, Statistics, the information society and technology.** The net decrease of \$66,000 relates to the proposed reassignment of one post of Statistician (P-4) as Data Scientist (P-4) (\$86,000), as detailed in annex II, which is subject to a 50 per cent vacancy rate in accordance with the established practice, offset in part by increased requirements under experts to accommodate additional expert group meetings planned on issues related to digital policies and strategies and data ecosystems (\$20,000);
- (d) **Subprogramme 6, Governance and conflict prevention.** The increase of \$42,000 relates to increased requirements under experts to accommodate additional expert group meetings planned on issues related to institutional reforms and governance;
- (e) **Programme support.** The decrease of \$266,400 relates to reduced requirements under general operating expenses, specifically for the ad hoc maintenance of premises, as portions of United Nations House are undergoing refurbishment with funding under section 33, and therefore requirements for ad hoc maintenance are not expected in 2023. These resources are proposed for redeployment to the programme of work, as indicated above, to accommodate additional requirements under experts.

Extrabudgetary resources

- 22.109 As reflected in tables 22.28 (2) and 22.29 (2), ESCWA expects to continue to receive cash contributions, which would complement regular budget resources. In 2023, extrabudgetary resources are estimated at \$8,702,600 and would provide for 36 posts, as presented in table 22.29 (2). The resources would be used mainly to: (a) implement activities related to climate mainstreaming, sustainable energy systems and food security and activities related to enhancing waste management in Lebanon, under subprogramme 1; (b) support the implementation of the women and peace and security agenda among Arab States, under subprogramme 2; (c) to provide technical assistance to the Government of the Syrian Arab Republic and integrate analysis related to the Syrian Arab Republic in ESCWA regional work, under subprogramme 3; and (d) support activities related to humanitarian and development assistance in Yemen, under subprogramme 6. The expected increase of \$548,300 is attributed to an increase in the level of contributions for the above-mentioned projects as a result of the phasing out of pandemic-related priorities in donor countries in 2022. Extrabudgetary resources represent 16.5 per cent of the total resources for this section.
- 22.110 The authority to oversee the use of extrabudgetary resources rests with the secretariat of ESCWA, which has delegated authority from the Secretary-General.

Polymaking organs

- 22.111 The resources proposed under this component would provide for requirements relating to the servicing of standing intergovernmental organs and intergovernmental processes. The provisions for intergovernmental organs and intergovernmental processes are in accordance with the rules of procedure of ESCWA and related amendments. ESCWA reports to the Economic and Social Council and the sessions of the Commission provide overall direction to the work of the secretariat.
- 22.112 Table 22.31 provides information on the standing intergovernmental organs and expert bodies and related resource requirements under the regular budget.

Section 22 Economic and social development in Western Asia

**Table 22.31
Policymaking organs**

(Thousands of United States dollars)

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2022 appropriation</i>	<i>2023 estimate (before recosting)</i>
Executive Committee	The Committee develops interaction and consultation among members of ESCWA and the secretariat on substantive development issues. It facilitates direct and timely communication with member States and submits resolutions to the Economic and Social Council between ESCWA ministerial sessions.	Mandate: ESCWA resolution 320 (XXVIII) Membership: 20 government officials Number of sessions in 2022: 1 Number of sessions in 2023: 2	20.0	30.0
Statistical Committee	The Committee follows up on the progress of member States in the development of their statistical systems, provides technical advice, proposes training programmes and organizes workshops and seminars to strengthen their statistical capacity. It also assists member States in the standardization of national statistics for greater comparability at the regional and international levels and supports them in coordinating statistical data and information with the Statistical Commission and with other member countries, in particular, in surveys and censuses.	Mandate: ESCWA resolution 179 (XVI), as endorsed by the Economic and Social Council in its resolution 1993/2 Membership: 20 government officials Number of sessions in 2022: 1	22.0	–
Committee on Transport and Logistics	The Committee contributes to the establishment and formulation of priorities for the programmes of work and medium-term plans in the field of transport, monitors developments in the field of transport in ESCWA member States, monitors progress achieved in the activities of the ESCWA secretariat in the field of transport, ensures the participation of member States in international and regional conferences and coordinates efforts of member States relating to the implementation of resolutions and recommendations.	Mandate: ESCWA resolution 213 (XIX), as endorsed by the Economic and Social Council in its resolution 1997/11, and ESCWA resolution 229 (XXI) Membership: 20 government officials Number of sessions in 2022: 1 Number of sessions in 2023: 1	22.0	22.0
Committee on Technology for Development	The Committee follows up on regional priorities in the field of technology for development, including ICT, Internet governance, the digital economy and the information society, as well as areas related to scientific research and technology transfer. It also follows up on relevant regional and international processes, conferences and forums and coordinates regional efforts to implement the decisions and recommendations of those conferences, and supports cooperation with regional organizations, including LAS and other specialized organizations.	Mandate: ESCWA resolution 315 (XXVIII), as endorsed by the Economic and Social Council in its resolution 2014/35 Membership: 20 government officials Number of sessions in 2022: 1	22.0	–

Part V Regional cooperation for development

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2022 appropriation</i>	<i>2023 estimate (before recosting)</i>
Committee on Trade Policies in the States Members of the Economic and Social Commission for Western Asia	The Committee is mandated to discuss priorities under the programme of work and medium-term action plans of the Commission in the field of trade policies; to follow up on progress in trade policies in member States and make recommendations in that regard; and to monitor developments in regional and international forums, conferences and processes with regard to trade policies and coordinate regional efforts to implement related resolutions and recommendations emanating from such platforms.	Mandate: ESCWA resolution 332 (XXX), as endorsed by the Economic and Social Council in its resolution 2019/30 Membership: 20 government officials Number of sessions in 2022: 1	21.5	–
Committee on Energy	The Committee participates in the planning, development and monitoring of the ESCWA programme of work in the field of energy. It follows up on developments in the energy sector and their impact on socioeconomic development in member States. It also ensures close regional cooperation among member States to improve their capacity to manage energy sources in an efficient and effective manner and to use renewable energy in achieving sustainable development.	Mandate: ESCWA resolution 204 (XVIII), as endorsed by the Economic and Social Council in its resolution 1995/25 Membership: 20 government officials Number of sessions in 2023: 1	–	11.0
Committee on Water Resources	The Committee participates in the planning, development and monitoring of the ESCWA programme of work in the field of water resources. It follows up on regional and global developments in the water sector and their impact on socioeconomic development in member States. It also ensures close regional cooperation between member States to improve their capacity to manage water resources in an efficient and effective manner to achieve sustainable development.	Mandate: ESCWA resolution 205 (XVIII), as endorsed by the Economic and Social Council in its resolution 1995/26 Membership: 20 government officials Number of sessions in 2023: 1	–	12.0
Committee on Social Development	The Committee participates in defining priorities for social programmes and activities and in formulating and developing the ESCWA programme of work in the area of social development; monitoring progress in social programmes and activities in ESCWA member States; adopting recommendations to strengthen regional social development processes; and following up on international and regional conferences and coordinating regional efforts to implement resulting resolutions and recommendations.	Mandate: ESCWA resolution 198 (XVII), as endorsed by the Economic and Social Council in its resolution 1994/27 Membership: 20 government officials Number of sessions in 2023: 1	–	11.0

Section 22 Economic and social development in Western Asia

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2022 appropriation</i>	<i>2023 estimate (before recosting)</i>
Committee on Financing for Development in the States Members of the Economic and Social Commission for Western Asia	The Committee is mandated to discuss priorities under the programme of work and medium-term action plans of the Commission in the field of financing for development; to follow up on progress in financing for development policies in member States and make recommendations in that regard; and to monitor developments in regional and international forums, conferences and processes with regard to financing for development and coordinate regional efforts to implement related resolutions and recommendations emanating from such platforms.	Mandate: ESCWA resolution 332 (XXX), as endorsed by the Economic and Social Council in its resolution 2019/30 Membership: 20 government officials Number of sessions in 2023: 1	–	11.0
Committee on Women	The Committee is mandated to follow up on global and regional conferences addressing women’s advancement and facilitate the participation of member States in related global discussions. It is also tasked with the coordination of regional efforts to implement resolutions and recommendations.	Mandate: ESCWA resolution 240 (XXII), as endorsed by the Economic and Social Council in its resolution 2003/9 Membership: 20 government officials Number of sessions in 2023: 1	–	10.5
ESCWA session	The ESCWA session, composed of a senior officials segment and a ministerial segment, is the highest governing body of ESCWA and is responsible for broad direction-setting. It follows up on programmatic implementation and technical cooperation activities and addresses salient development issues in the region, such as financing for development, the 2030 Agenda for Sustainable Development, climate change, young people and labour, social policies and technology for development.	Mandate: Economic and Social Council resolution 1818 (LV) Membership: 18 government officials	–	–
Total			107.5	107.5

22.113 The proposed regular budget resources for 2023 amount to \$107,500 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 22.32 and figure 22.IX.

Executive direction and management

- 22.114 Executive direction and management is under the responsibility of the Executive Secretary, supported by the Deputy Executive Secretary for Programme, the Deputy Executive Secretary for Programme Support and the Secretary of the Commission. It comprises the Office of the Executive Secretary, the Strategy, Planning, Accountability, Results and Knowledge Section and the Resource Mobilization and Partnerships Section.
- 22.115 The Office of the Executive Secretary is responsible for coordinating and providing overall leadership, policy direction and management of the ESCWA secretariat to support member States, in collaboration with other entities of the United Nations system, with strategic analysis, policy guidelines and capacity-building activities to address key development challenges and issues and to implement innovative solutions for region-wide equitable and inclusive economic prosperity, social progress and environmental sustainability. The Office provides leadership and policy orientation and establishes criteria to coordinate follow-up in the region on implementing the 2030 Agenda for Sustainable Development and the Addis Ababa Action Agenda of the International Conference on Financing for Development, and the mainstreaming of cross-cutting issues, such as gender equality and the empowerment of women, and sustainability perspectives, throughout ESCWA substantive programmes.
- 22.116 The Office reinforces policy consistency and coherence, and promotes effective collaboration and coordination, both within the ESCWA secretariat and among United Nations entities and development partners involved in addressing regional development issues, inter alia, through the Regional Coordination Mechanism for Arab States. It also strengthens cooperation and coordination with international and regional intergovernmental and non-governmental organizations, especially LAS and its subsidiary bodies.
- 22.117 The Strategy, Planning, Accountability, Results and Knowledge Section will continue to promote dynamism and innovation in the ESCWA business model and medium-term strategy and to act as a focal point for the annual results framework and related applications in Umoja. The Section will continue to be the basis for organizational learning processes, focusing accountability on the attainment of results and ensuring the operational excellence of ESCWA through risk reduction and change management processes. The Section will continue to manage the broader knowledge and dissemination processes of ESCWA.

Section 22 Economic and social development in Western Asia

- 22.118 The Resource Mobilization and Partnerships Section will continue to strengthen relationships with funding agencies and donors; maintain up-to-date regional and global donor mapping; coordinate and support project development, budgeting and fundraising; support and track implementation of extrabudgetary projects; assist ESCWA cluster leaders in building and enhancing institutional partnerships (regional and global); support cluster leaders' relationships with civil society and non-State actors and partners; and develop and negotiate legally binding partnerships and donor agreements.
- 22.119 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), the Commission integrates environmental management practices into its operations. In 2023, the Commission expects to reduce its carbon footprint by 4 per cent of current carbon emissions.
- 22.120 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 22.33. ESCWA has made efforts to raise awareness among staff of the requirement to comply with the advance purchase guidance and, in this context, has put in place a procedure whereby travel requests not compliant with the advance booking policy have to be cleared by the Office of the Executive Secretary to hold project managers accountable for the late travel-related submissions. The Commission will continue to pursue efforts to achieve its targets in 2023.

Programme of work

Subprogramme 1

Climat change and natural resource sustainability

22.122 The proposed regular budget resources for 2023 amount to \$3,911,700 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 22.35 and figure 22.XI.

Extrabudgetary resources

22.123 Extrabudgetary resources for the subprogramme are estimated at \$2,669,600 and would provide for six posts (1 P-3, 2 National Professional Officer and 3 Local level), as well as non-post resources. The resources would be used mainly to continue to support activities related to climate mainstreaming, sustainable energy systems, food security and other activities related to enhancing waste management in Lebanon. The expected increase of \$478,200 is due mainly to increased requirements for projects related to climate mainstreaming and sustainable energy systems.

**Subprogramme 2
 Gender justice, population and inclusive development**

22.124 The proposed regular budget resources for 2023 amount to \$5,094,200 and reflect an increase of \$94,400 compared with the appropriation for 2022. The proposed increase is explained in paragraph 22.108. Additional details on the distribution of the proposed resources for 2023 are reflected in table 22.36 and figure 22.XII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

22.125 Extrabudgetary resources for the subprogramme are estimated at \$522,000 and would provide for non-post resources. The resources would be used mainly to support the implementation of the women and peace and security Agenda among Arab States. The expected decrease of \$112,500 is due mainly to the finalization of projects started in 2022.

**Subprogramme 3
Shared economic prosperity**

22.126 The proposed regular budget resources for 2023 amount to \$4,300,200 and reflect an increase of \$110,000 compared with the appropriation for 2022. The proposed increase is explained in paragraph 22.108. Additional details on the distribution of the proposed resources for 2023 are reflected in table 22.37 and figure 22.XIII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

22.127 Extrabudgetary resources for the subprogramme are estimated at \$3,327,300 and would provide for seven posts (3 P-4, 1 P-3 and 3 Local level), as well as non-post resources. The resources would be used mainly to continue to provide technical assistance to the Government of the Syrian Arab Republic and to integrate analysis related to the Syrian Arab Republic in ESCWA regional work. The expected increase of \$1,071,300 is due mainly to additional requirements to support the third phase of the National Agenda for the Future of Syria.

**Subprogramme 4
Statistics, the information society and technology**

22.128 The proposed regular budget resources for 2023 amount to \$4,312,800 and reflect a net decrease of \$66,000 compared with the appropriation for 2022. The proposed net decrease is explained in paragraph 22.108. Additional details on the distribution of the proposed resources for 2023 are reflected in table 22.38 and figure 22.XIV.

Subprogramme 6 Governance and conflict prevention

22.130 The proposed regular budget resources for 2023 amount to \$3,000,900 and reflect an increase of \$42,000 compared with the appropriation for 2022. The proposed increase is explained in paragraph 22.108. Additional details on the distribution of the proposed resources for 2023 are reflected in table 22.40 and figure 22.XVI.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

22.131 Extrabudgetary resources for the subprogramme are estimated at \$435,000 and would provide for non-post resources. The resources would be used mainly to support activities related to humanitarian and development assistance in Yemen. The expected decrease of \$79,000 is due mainly to the finalization of projects started in 2022.

Programme support

22.132 Programme support is comprised of the Resource Management and Service Development Division. The component will continue to provide timely, effective and efficient administrative and logistical support to implement the Commission’s programme of work.

22.133 The proposed regular budget resources for 2023 amount to \$15,914,000 and reflect a decrease of \$266,400 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 22.108. Additional details on the distribution of the proposed resources for 2023 are reflected in table 22.41 and figure 22.XVII.

Table 22.41

(Number of posts/thousands of United States dollars)

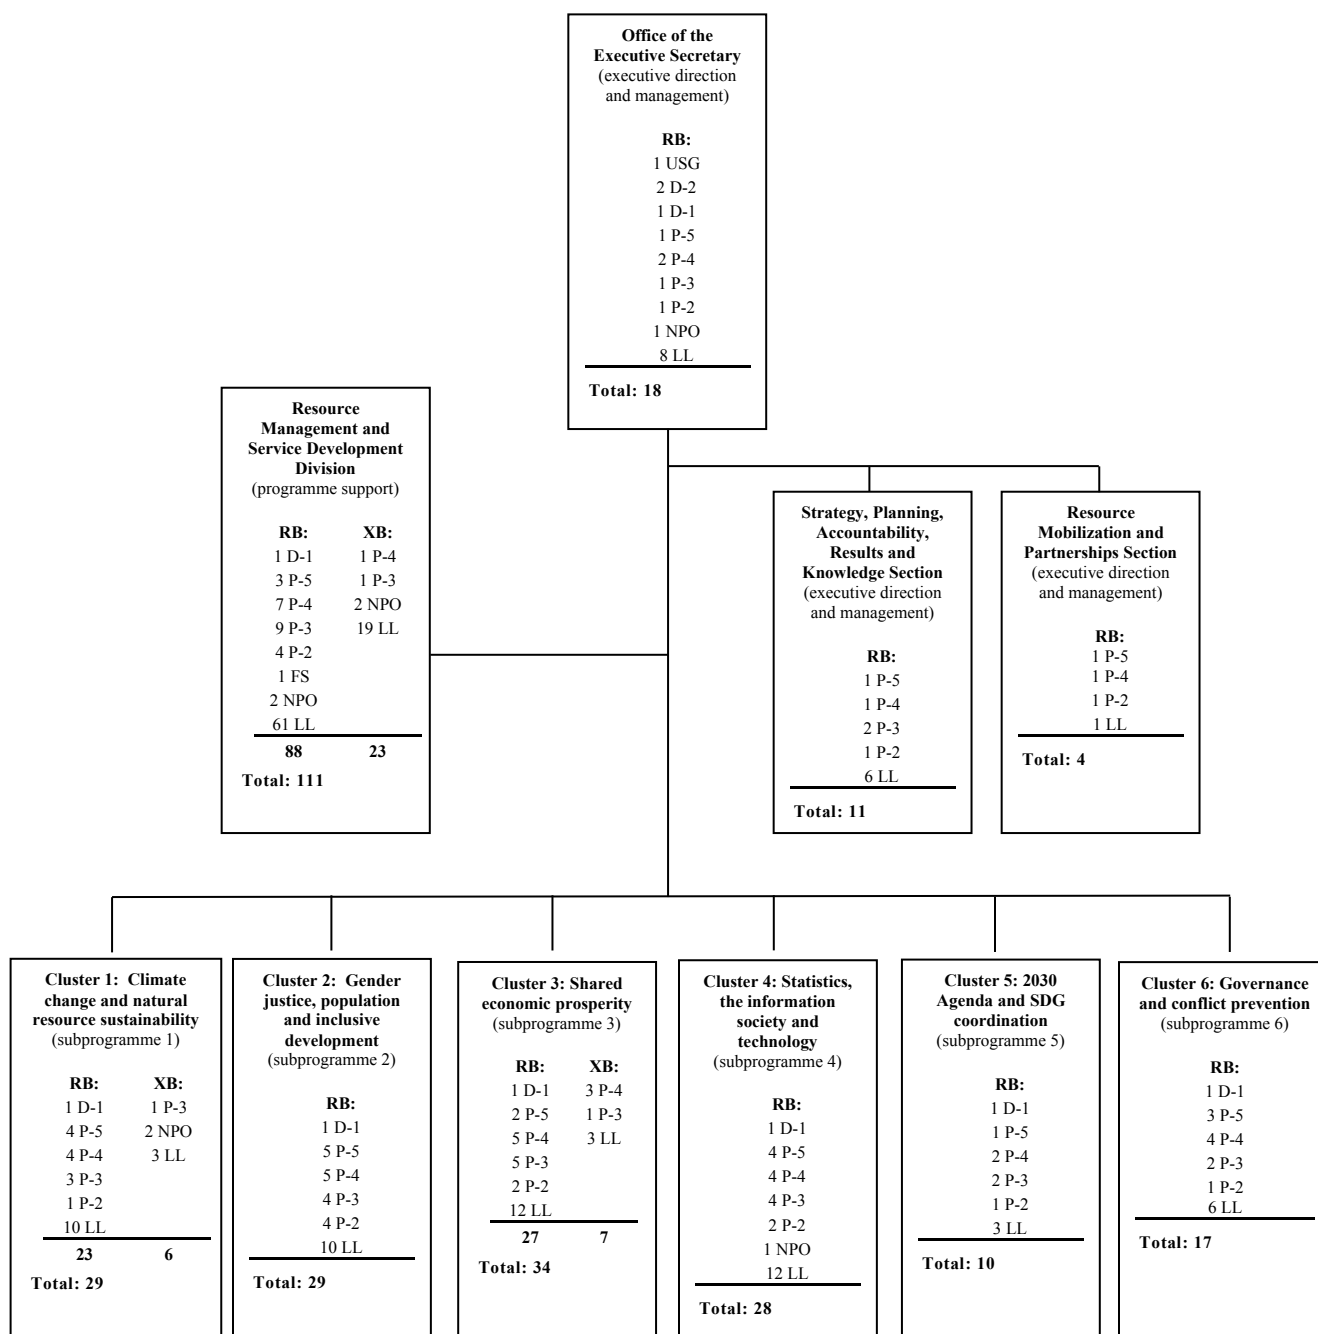

Extrabudgetary resources

22.134 Extrabudgetary resources for programme support are estimated at \$1,748,700 and would provide for 23 posts (1 P-4, 1 P-3, 2 National Professional Officer and 19 Local level) and non-post resources. The resources would be used mainly to continue to support the areas of budget, finance, human resources, general administration and ICT. In addition, these resources will further strengthen the functions related to strategy, programme management, oversight, evaluation, enterprise risk management and coordination of the ESCWA technical cooperation programme. The estimated resource level for 2023 reflects no change compared with the estimates for 2022.

Annex I

Annex II

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Post</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 4 Statistics, the information society and technology	1	P-4	Reassignment of 1 Statistician as Data Scientist	The proposed reassignment of one post of Statistician as Data Scientist is intended to support the transformation in the skill sets, competencies and culture in the Economic and Social Commission for Western Asia (ESCWA) towards a modern, data-driven organization in the context of the Data Strategy of the Secretary-General by Everyone, Everywhere, in which departments were requested to identify opportunities to reprioritize resources towards stronger data capabilities, and in line with the ESCWA data strategy. The proposed reassignment would also support the development, deployment and operation of the ESCWA data ecosystem. The incumbent of the reassigned post would be responsible for extracting deep insight from data, by using complex models and employing algorithms, artificial intelligence and visualization methods. Functions would also include harnessing large amounts of data from and about the Arab region. The proposed reassignment is expected to contribute to more effective and efficient programme delivery by the subprogramme.

Annex

Summary of follow-up action taken to implement relevant recommendations of
advisory and oversight bodies 62

Overview

Overall orientation

- 23.1 The regular programme of technical cooperation, established by the General Assembly in its resolution 58 (I) in 1946, serves to support developing countries, least developed countries, countries with economies in transition and countries emerging from conflict in their capacity development efforts. Currently, those efforts are geared towards the implementation of the 2030 Agenda for Sustainable Development, including the Sustainable Development Goals and other internationally agreed development goals, and the outcomes of United Nations conferences and summits. The programme's broad objective is to support and advance processes aimed at developing the capacity of Governments, through both individuals and institutions, to formulate and implement policies for sustainable economic and social development. The sharing of experiences across countries and regions, South-South cooperation, the use of national expertise from the beneficiary countries to the extent possible and the building of knowledge networks to facilitate continued exchange and assistance and promote sustainability are characteristic of the programme.
- 23.2 The programme enables the Secretariat to offer Member States access to the diverse global and regional specialized development expertise and knowledge readily available within the programme's implementing entities: the Department of Economic and Social Affairs, the five regional commissions (the Economic Commission for Africa (ECA), the Economic and Social Commission for Asia and the Pacific (ESCAP), the Economic Commission for Europe (ECE), the Economic Commission for Latin America and the Caribbean (ECLAC) and the Economic and Social Commission for Western Asia (ESCWA)), the United Nations Conference on Trade and Development (UNCTAD), the United Nations Office on Drugs and Crime (UNODC), the United Nations Human Settlements Programme (UN-Habitat), the Office for the Coordination of Humanitarian Affairs and the Office of the United Nations High Commissioner for Human Rights (OHCHR).
- 23.3 The capacity development activities of the implementing entities draw substantively from their normative and analytical work and respond to the policy guidance and programmes of action agreed by Member States through the intergovernmental mechanisms. This enables developing countries to benefit from both the knowledge acquired through that work and from the experiences of different geographic regions, allowing for the sharing and exchange of innovative and good practices. Of equal importance is the contribution that the capacity development work brings to the normative and analytical activities and, ultimately, to the support provided to the intergovernmental dialogue.
- 23.4 The defining feature of the programme is that it is demand-driven, responding to an expressed need by Member States for capacity development support. At the same time, in order to ensure that services complement and are aligned with the overall and mandated strategic priorities of the implementing entities, they cannot be delivered solely on an ad hoc basis, but rather must be part of more strategic programmatic approaches based on a thorough understanding and appreciation of national needs.
- 23.5 Member States have recognized that part of the implementation of the 2030 Agenda is the adoption of new, transformative and innovative approaches to integrate sustainability into national development planning, policies, budgets, law, institutions and monitoring and accountability frameworks. Doing so will require considerable individual, institutional, analytical and statistical capacities to address the complexity and cross-cutting nature of the sustainable development challenges in a coherent and integrated fashion. While countries have made important strides in some of these areas, the challenges remain enormous. For this reason, capacity development is a central requirement to advancing the implementation of the 2030 Agenda and the Addis Ababa Action Agenda of the Third International Conference on Financing for Development.
- 23.6 The devastating effect of the coronavirus disease (COVID-19) pandemic is a challenge to hard-won development gains and hamper progress towards achieving the Sustainable Development Goals. The agile modality of the programme allows the implementing entities, when applicable, to support Member States in designing response measures to mitigate the adverse effects of the COVID-19

crisis for a sustainable and inclusive recovery. The programme will, inter alia, provide policy advice, facilitate the exchange of information, scientific knowledge and best practices and provide capacity development while increasingly adopting new and innovative approaches, including virtual training sessions and meetings.

- 23.7 The programme will support countries in strengthening their resilience to external shocks and global economic developments such as higher inflation and commodity prices, pressure on fiscal positions and tightening financing conditions, owing to increases in interest rates and risk perceptions as well as disruption to trade and supply chains.
- 23.8 The strategic use of the programme's resources facilitates quick responses and initial support by implementing entities and is complementary to other development funds, including the United Nations Development Account and extrabudgetary resources, which optimizes the programme's impact through strengthened linkages and follow-through.
- 23.9 Global and regional entities of the Secretariat implementing activities under the programme coordinate those activities through established internal mechanisms. The Executive Committee on Economic and Social Affairs, the main focus of which is the harmonization of its members' programmes, helps to achieve a rational division of labour and complementarity between the global and regional entities by promoting programmatic coordination and identifying synergies for operational work. At another level, the engagement of implementing entities within the United Nations Sustainable Development Group brings about greater awareness by a larger group of entities of the specific expertise and operational strengths available in the United Nations system, thereby increasing potential cooperation to implement projects and undertake operational work at the country level, and improving system-wide coherence in the context of relevant country processes and cooperation frameworks.

Coordination with the resident coordinator system and other partners

- 23.10 The implementing entities of the programme are all non-resident agencies. As such, they engage with the Resident Coordinator and resident agencies to maximize the impact of country-level development work. Such cooperation enables access to up-to-date information on national development priorities and better positioning in the broader development cooperation environment. For resident agencies, it enables access to the knowledge and expertise of non-resident agencies. This cooperation can include joint programming, including through the common country assessment, the United Nations Sustainable Development Cooperation Framework and the poverty reduction strategy paper process, as well as joint needs assessments, joint work plans and, where appropriate, joint fundraising.
- 23.11 Many non-resident agencies have entered into institutional cooperation agreements with resident agencies, often in the form of memorandums of understanding. Some Resident Coordinators have a dedicated liaison officer to engage with non-resident agencies. There has been improvement in non-resident agency/resident agency cooperation in terms of better communication and coordination, including through increased awareness of each other's mandates, participation in knowledge networking and better advance planning by the non-resident agencies when undertaking country missions by directly engaging with the resident coordination offices and resident agencies on country-level work. The development and adoption of the standard operating procedures for countries wishing to adopt the "Delivering as one" approach is an important milestone in providing concrete, flexible solutions for United Nations country teams that are in line with the reform agenda, as formulated in the resolution on the quadrennial comprehensive policy review.
- 23.12 Cooperation with partners within the broader development assistance community, including the Bretton Woods institutions, the Organization for Economic Cooperation and Development (OECD), regional development banks and other regional organizations will continue to be pursued as partners work together to align with and improve coherence of development priorities among country clusters (least developed countries/landlocked developing countries/small island developing States), within

regional and subregional groupings, and at the country level for greater impact of the programme's activities in the field.

Objective and strategy

23.13 The overarching objective that guides the programming of the resources allocated to individual entities under the programme and the overall strategy and criteria followed for implementation are:

- (a) **Objective.** The objective to which each subprogramme of the entities of the regular programme of technical cooperation contributes can be found in the relevant fascicle of the proposed programme plan for 2023 (A/77/6), for each implementing entity;
- (b) **Strategy.** The strategy to promote the above objective consists of:
 - (i) Responding to the requests of Governments for urgent advice on policy-related issues;
 - (ii) Providing Governments with specific advice on sectoral matters relevant to their development strategies and programmes;
 - (iii) Assisting Governments in the formulation or evaluation of programmes and projects leading to the enhancement of national programmes;
 - (iv) Developing networks of experts and practitioners in the respective sectoral areas to facilitate information-sharing, synergies and potential collaboration, especially through information and communications technology (ICT), workshops and seminars;
- (c) **Criteria.** The following criteria are relevant to all implementing entities of the programme:
 - (i) Activities should be responsive primarily to the requests of developing countries and be of a short-term nature (i.e., conceived and implemented within less than two calendar years); longer-term initiatives that require a phased approach and that build on knowledge acquired through previous interventions may continue, pending the mobilization of external resources;
 - (ii) Activities should fall within one of the priority areas of the implementing entity as mandated by its governing body, and the entity should play a demonstrable leadership role in normative and analytical functions relating to the activities;
 - (iii) Activities should build capacity in developing countries, including for meeting treaty and related normative obligations and, through the sharing of experience gained at the country level, enrich the analytical functions of the implementing entity for the benefit of all Member States;
 - (iv) Activities that aid in the preparation of specialized components of a country's development strategy or that help to prepare requests for larger-scale funding from other sources are encouraged.

23.14 In line with General Assembly resolution 2514 (XXIV) and Economic and Social Council resolution 1434 (XLVII), activities financed under the present budget section will continue to focus on short-term advisory services, training and field projects, as outlined below. Activities will be based on needs expressed by Member States and by regional and subregional cooperation groups, either at the request of a State or as guided by the intergovernmental process, bearing in mind the criteria set forth for the purposes and uses of the programme.

Short-term advisory services

23.15 Advisory services ensure the provision of high-level technical expertise, the transfer of knowledge from global and regional entities to Governments on policy-related issues and development strategies and the formulation, assessment or evaluation of projects and programmes. The core of the programme is built around regional and interregional advisers who are specialists in both capacity development and in the substantive knowledge of the subprogramme. These advisers represent the

critical interface between the countries and the implementing entities, facilitating country-level access to the expertise of the Organization. The services are often provided through the modality of advisory missions, which are planned, implemented and followed up through mechanisms utilizing ICT. Advisory missions often lead to the formulation of technical cooperation projects, implemented either by a Government or in partnership with a United Nations entity. Advisory missions also lead to United Nations Development Account projects, providing a natural platform to pursue longer-term and sustainable support to the countries. This serves to enhance the multiplier effect and the longer-term impact of the mission. Advisory missions also provide technical support, including monitoring and evaluation, to nationally executed programmes, thereby ensuring that programme implementation is consistent with the outcomes of United Nations conferences.

- 23.16 To ensure that the pool of interregional/regional advisers represents the highest calibre of technical skills and knowledge, all implementing entities of the programme have committed to updating their advisory capacities so as to be able to replace advisers as needed to ensure that they have the best skills and knowledge to respond to the changing needs of Member States. Extensions are reviewed on an annual basis by senior-level departmental panels, and include a review of the advisory services provided during the past period and an examination of a results-based workplan, which is fully integrated within the subprogramme's technical cooperation programme, for the forthcoming period. While there is an annual review of the advisory skills needed during the next period, the positions are automatically redefined at the five-year mark to better respond to the changing needs of countries and to address new and emerging concerns. Doing so may result in a total change of competencies and skills or the redefinition of the positions' sectoral focus to address a specific technical area, for example, global geospatial information management.
- 23.17 In line with past intergovernmental guidance, the implementing entities have taken steps to utilize complementary mechanisms for the provision of advisory services, including the recruitment of short-term advisers who respond to very specific, distinct assignments of a limited duration, as well as consultancy assignments, in which national and regional expertise are drawn upon, in particular when addressing issues that are country-specific and for which expert knowledge of national or regional issues is fundamental in ensuring the most relevant and targeted support. The entities also rely on national or regional institutions, in particular in the context of national workshops, which ensures the transfer of local knowledge and expertise and promotes local follow-up actions.

Field projects

- 23.18 Field projects provide a link between research and analysis that is based on implementation experiences and provide opportunities to test-drive policy or other normative recommendations on a small scale in which the impact can be quickly and closely gauged. The projects are designed in response to demands by Member States regarding a clearly articulated need, while simultaneously reflecting programmatic and subprogramme priorities. They are longer-term initiatives and are often supplemented by extrabudgetary resources or the United Nations Development Account in order to scale up their activities. Such projects may be country-based but can also be interregional or subregional.

Training

- 23.19 Training is aimed at building knowledge and skills that will contribute to strengthening national capacity for policy development and the effective implementation of national policies. Training is often conducted through seminars and workshops, as well as through the provision of short-term fellowships, which foster more in-depth reviews and opportunities for learning. The exchange of good practices and South-South cooperation are consistently fostered. The main consideration guiding the training conducted under the programme is that the topics should play a catalytic role in the development process and should contribute to linking local needs and conditions with the follow up of major conferences. Even where the organizing entity is a global one, the participation of the relevant regional commissions is encouraged in the interest of sustainability and continued regional support after the event.
- 23.20 Training is undertaken in response to an identified capacity gap in one or more countries and at the request of Member States. Interregional advisers, staff and/or consultants may lead and participate

in seminars and workshops by developing training modules, facilitating discussions and providing hands-on training. Seminars and workshops are held at the subnational, national and regional levels.

Alignment and complementarity of the regular programme of technical cooperation and the United Nations Development Account

- 23.21 Implementing entities have used the complementarity of the activities of the regular programme of technical cooperation and the United Nations Development Account, as well as extrabudgetary resources, to create multiplier effects that contribute to longer-term sustained development results. Initial support funded by the regular programme is often followed through by developing and piloting methodologies in selected target countries. This strategic planning of the resources utilized in these capacity development programmes optimizes its impact through strengthened linkages and ensures that duplication of work is avoided by the implementing entities.
- 23.22 Entities may link pilot activities supported by the regular programme of technical cooperation with the United Nations Development Account and extrabudgetary resources. For example, advisory missions undertaken under the regular programme of technical cooperation may lead to the establishment of United Nations Development Account projects that provide a natural platform to pursue longer-term and sustainable support to countries. This serves to enhance the multiplier effects that contribute to longer-term, sustained impact.

Status of internal assessment

- 23.23 Considering the decentralized nature of the regular programme of technical cooperation, each implementing entity assesses the results of its regular programme activities and conducts periodic evaluations. The Department of Economic and Social Affairs, for example, had an independent evaluation of its activities, focusing on 2021. Other entities commissioned evaluations of specific topics, programmes or subprogrammes. In parallel, the Department engaged the support of an independent contractor for the preparation of the seventh progress report covering 2021. The report is expected to be finalized in June 2022 and will provide information on, inter alia: (a) results achieved; (b) linkages between the regular programme, the United Nations Development Account, extrabudgetary resources and the resident coordinator system; (c) the programme’s outreach; and (d) the programme’s delivery modalities in view of travel restrictions imposed by the COVID-19 pandemic.

Overview of resources for the regular budget

- 23.24 As reflected in tables 23.1 and 23.2, the overall resources proposed for 2023 amount to \$40,264,800 before recosting and reflect a net increase of \$1,500,000, or 3.9 per cent, compared with the appropriation for 2022. Resource changes result from other changes. The overall increase takes into account anticipated additional demand for support in specific areas, including in the context of recovery from the impact of the COVID-19 pandemic. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

I. Sectoral advisory services

1. Economic and social affairs

A. Programmatic activities delivered through the regular programme of technical cooperation

- 23.25 The activities under economic and social affairs are implemented by the Department of Economic and Social Affairs. The programmatic activities are implemented under the following subprogrammes of the Department: subprogramme 2, Inclusive social development; subprogramme 3, Sustainable development; subprogramme 4, Statistics; subprogramme 5, Population; subprogramme 6, Economic analysis and policy; subprogramme 7, Public institutions and digital government; subprogramme 8, Sustainable forest management; and subprogramme 9, Financing for sustainable development.
- 23.26 In implementing those activities, the regular programme of technical cooperation contributes to the objectives and expected results of the above subprogrammes and complements their respective strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2023 (A/77/6 (Sect. 9)).

Response provided to Member States' requests for support in 2021

Public servants equipped with the capacities to address COVID-19 and accelerate implementation of the Sustainable Development Goals to safeguard people's well-being (section on programme performance in 2021 under subprogramme 7 (A/77/6 (Sect. 9)))

- 23.27 In 2021, subprogramme 7, Public institutions and digital government, supported Member States in Africa, including small island developing States, least developed countries and landlocked developing countries, in developing the capacities of national Governments to promote sound policymaking, with a particular focus on policy coherence, strategic planning and foresight and risk management. Sound policymaking is one of the 11 principles of effective governance for sustainable development finalized by the Committee of Experts on Public Administration and endorsed in 2018 by the Economic and Social Council. Following a request from Ghana, Kenya, Madagascar, South Africa and Zambia to conduct a capacity development workshop on sound policymaking for promoting resilience and recovery from COVID-19, the subprogramme organized four workshops, three in Africa and one in Latin America. The first two focused on sound policymaking for sustainable development in Africa (first workshop) and Latin America (second workshop). The third focused on risk management in Africa in response to COVID-19 and highlighted how to build back better after the pandemic. The fourth focused on strategic planning and foresight in Africa in response to COVID-19. The activities were held virtually owing to the pandemic. A total of 988 participants took part in the interlinked activities, and approximately 85 per cent indicated that their level of understanding of sound policymaking and its application in the design of national policies was increased.
- 23.28 The subprogramme developed seven training-of-trainers toolkits, including modules on addressing COVID-19, as part of the curriculum on governance for the Sustainable Development Goals, supported a total of eight Member States on issues related to governance and public institutions, organized 10 workshops with a total of 1,712 participants and 1,261 viewers on social media, provided strategic support to the resident coordinator system by contributing to the common country analyses of 22 countries and produced eight strategy guidance notes to guide implementation of the principles of effective governance for sustainable development.
- 23.29 The above-mentioned work contributed to public servants being equipped with the capacities to address COVID-19 and accelerate implementation of the Sustainable Development Goals to safeguard people's well-being, which is a result reflected in the section on programme performance in 2021 under subprogramme 7, and the related performance measure of enhanced understanding of over 14,000 policymakers in over 100 Member States of the impacts of the COVID-19 pandemic on

national institutions and their implications for delivering on the 2030 Agenda, in the proposed programme budget for 2023 (A/77/6 (Sect. 9)) (see table 23.3).

Table 23.3
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
Member States have access to a competency framework for the Sustainable Development Goals, aimed at strengthening capacities of schools of public administration	To recover from COVID-19, more than 100 Member States gained access to relevant knowledge on how to promote effective public institutions and digital government in their everyday work	Enhanced understanding of over 14,000 policymakers in over 100 Member States of the impacts of the COVID-19 pandemic on national institutions and their implications for delivering on the 2030 Agenda

Expected responses to anticipated requests for support in 2023

Effective social protection systems through enhanced governance systems (result 1 of subprogramme 2 (A/77/6 (Sect. 9)))

- 23.30 In 2023, Subprogramme 2, Inclusive social development, will focus on assisting countries in providing: (a) technical advice on policy options and their implications, as well as opportunities for technical assistance in social policies; (b) training for government officials and policy practitioners on national strategies and plans of action that address the needs of vulnerable social and marginalized groups, with a view to increasing their capacity to build more effective and integrated policy responses in line with the Convention on the Rights of Persons with Disabilities, the Madrid International Plan of Action on Ageing, the United Nations Declaration on the Rights of Indigenous Peoples, the World Programme of Action for Youth to the Year 2000 and Beyond, the social dimension of sustainable development of the 2030 Agenda, and sport for development and peace; and (c) advisory services and policy advice, technical support, technical cooperation and assistance to the least developed, developing and middle-income countries in relation to social policies and programmes.
- 23.31 The subprogramme will pursue its capacity development goals and objectives by working closely with United Nations country teams and resident coordinators and United Nations regional economic commissions and other partners, building on complementarity and thereby boosting the capacity of developing countries and middle-income countries to develop national social policies and programmes for vulnerable social groups and to effectively implement the social dimension of the 2030 Agenda and the Sustainable Development Goals.
- 23.32 The expected responses in 2023 would contribute to effective social protection systems through enhanced governance systems, which is reflected in result 1 of subprogramme 2, and the related performance measure of increased usage of policy briefs and other products on social protection by government officials to deepen the knowledge base and awareness of good practices, in the proposed programme budget for 2023 (A/77/6 (Sect. 9)) (see table 23.4).

Table 23.4
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	Increased capacity of 185 officials in management and governance of social protection	Increased capacity of an additional 175 officials in management and governance of social protection	Increased usage of online platforms on governance and management of national social protection systems by government officials to expand knowledge exchange and sharing of good practices	Increased usage of policy briefs and other products on social protection by government officials to deepen knowledge base and awareness of good practices

Data for Now – timely data for the Sustainable Development Goals
(result 1 of subprogramme 4 (A/77/6 (Sect. 9)))

- 23.33 In 2023, subprogramme 4, Statistics, will continue to respond to requests by developing countries for support in strengthening their capacity to produce high-quality, timely, disaggregated national statistics and geospatial information and engage in capacity-building activities. These activities will span a wide array of statistical topics and domains and will take the form of capacity-building workshops, online training courses (including hybrid variants) and advisory services, including by interregional advisers.
- 23.34 The development and deployment of e-learning courses will be a key response to requests by Member States, as raised in the Statistical Commission. The United Nations Statistics Division will increase the availability and applicability of online courses by developing courses on new topics, such as the use of big data sources for official statistics, including automatic identification system data, earth observation data, scanner data and mobile phone data, as well as by developing courses on traditional topics, such as energy statistics, demographic statistics, environmental statistics and environmental-economic accounting, in a new format and by updating existing courses to meet new requirements and reflect updated methodologies and practices. Making these e-learning courses available will greatly increase the number of national statistical offices and the number of staff members in national statistical systems that can benefit and improve their technical and managerial capacity.
- 23.35 The expected responses in 2023, combined with specialized actions in their respective domains, would contribute to timely data for the Sustainable Development Goals as part of the Data for Now initiative, which is reflected in result 1 of subprogramme 4, and the related performance measure of five additional countries having access to the new data solutions validated during the first and second phases of the initiative and six more countries testing new solutions on additional Goal targets and topics, in the proposed programme budget for 2023 (A/77/6 (Sect. 9)) (see table 23.5).

Table 23.5
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Launch of the Data for Now initiative enabling 8 pilot countries to use new data sources, methods and technologies to fill critical data gaps and deliver timely data that accelerates progress on the Sustainable Development Goals	1 additional country has access to the new data solutions validated during the first phase of the initiative by the 8 initial countries and is testing new solutions on Sustainable Development Goal targets and topics Overall, 5 targets have new tested measurement solutions	No additional countries have access to the new data solutions validated during the first and second phases of the initiative and 6 more countries test new solutions on additional Sustainable Development Goal targets and topics Overall, 2 more targets have new tested measurement solutions	5 additional countries have access to the new data solutions validated during the first and second phases of the initiative and 5 more countries test new solutions on additional Sustainable Development Goal targets and topics Overall, 5 more targets have new tested measurement solutions	5 additional countries have access to the new data solutions validated during the first and second phases of the initiative and 6 more countries test new solutions on additional Sustainable Development Goal targets and topics Overall, 2 more targets have new tested measurement solutions

Integrated national financial frameworks

(result 1 of subprogramme 9 (A/77/6 (Sect. 9)))

- 23.36 In 2023, subprogramme 9, Financing for sustainable development, expects that there will be further requests for assistance for the development of investment project pipelines and climate-sensitive investment, as well as for support to prepare guidance materials with the active participation of Member States in the Sustainable Development Goals Investment Fair, among other activities. Similarly, the subprogramme foresees requests for additional technical guidance materials on integrated national financing frameworks specific to economic sectors, financing policy areas and/or Goal priorities, and to increase support for countries to operationalize such frameworks. In addition, following the forthcoming launch of the new joint integrated national finance framework facility of the Department of Economic and Social Affairs, the United Nations Development Programme and the Organisation for Economic Co-operation and Development, a significant increase in country requests for capacity development support is expected, in particular for small island developing States. The subprogramme has received requests for country-level support from Mauritius and Seychelles, and there are ongoing conversations to provide integrated national finance framework support in the Dominican Republic, Guinea-Bissau and Sao Tome and Principe.
- 23.37 In responding to the expected requests for support in 2023 in both the tax and infrastructure asset management areas, the subprogramme will focus on and contribute to building government capacity at the regional, national and local levels in the design and use of fiscal policies and practices to manage risk and build resilience for sustainable development. With respect to tax, government officials have expressed an interest in receiving further training in mutual agreement procedures, tax treaty negotiation, practical elements of treaty implementation and transfer pricing.
- 23.38 The expected response in 2023 would contribute to integrated national financial frameworks, which is reflected in result 1 of subprogramme 9, and the related performance measure of 95 countries developing such frameworks, in the proposed programme budget for 2023 (A/77/6 (Sect. 9)) (see figure 23.III).

Figure 23.III
Performance measure: number of countries developing integrated national financial frameworks (cumulative)

B. Deliverables

23.39 Table 23.6 lists all expected deliverables, by category and subcategory, for the period 2021–2023.

Table 23.6

Department of Economic and Social Affairs: expected deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	307	326	268	347

C. Proposed non-post resource requirements for 2022

Table 23.7

Financial resources by object of expenditure

(Thousands of United States dollars)

	2021 expenditure	2022 appropriation	Changes		2023 estimate (before recosting)
			Total	Percentage	
Other staff costs	5 959.2	6 774.8	(237.3)	(3.5)	6 537.5
Consultants	1 285.9	420.0	130.1	31.0	550.1
Experts	17.1	–	–	–	–

Section 23 Regular programme of technical cooperation

	2021 expenditure	2022 appropriation	Changes		2023 estimate (before recosting)
			Total	Percentage	
Grants and contributions	216.9	1 748.7	(346.5)	(19.8)	1 402.2
Total	8 090.5	9 432.4	(300.0)	(3.2)	9 132.4

23.40 The proposed regular budget resources for 2023 amount to \$9,132,400 and reflect a resource decrease of \$300,000, or 3.2 per cent, compared with the appropriation for 2022. The proposed decrease is attributable mainly to reductions under other staff costs (\$237,300) and grants and contributions (\$346,500), offset partially by increases under consultants (\$130,100) and travel of staff (\$164,300), in line with expected demands from Member States in 2023.

2. Trade and development

A. Programmatic activities delivered through the regular programme of technical cooperation

23.41 The activities under trade and development are implemented by UNCTAD. The programmatic activities are implemented under all subprogrammes of UNCTAD.

23.42 In implementing those activities, the regular programme of technical cooperation contributes to the objectives and expected results of the subprogrammes and complements their respective strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2023 ([A/77/6 \(Sect. 12\)](#)).

Expected additional requests for support from Member States for 2023

23.43 In response to an anticipated and an actual increase in the volume of requests for assistance from Member States, UNCTAD would provide additional training programmes for small island developing States and the least developed countries in the area of e-commerce and readiness assessments to support their post-pandemic recovery efforts and additional online “paragraph 166” training courses for developing countries focused on building resilience and responding to shocks. In addition, UNCTAD would support the least developed countries in their graduation process, including by undertaking vulnerability profiles and related advisory services and national workshops. In this sense, Cambodia, the Comoros, Djibouti, Senegal and Zambia, which are scheduled for graduation assessments and reviews in 2023, will be assisted in this area.

Response provided to Member States’ requests for support in 2021

23.44 Subprogramme 4, Technology and logistics, contributes to harnessing innovation and technology, including e-commerce and the digital economy, improving trade logistics and increasing human capacity for inclusive and sustainable trade and development in developing countries and economies in transition. The digitalization of economic activities is a reality in today’s global economy and has been accelerated owing to the COVID-19 pandemic. While the pandemic has boosted e-commerce, with more people shopping online all over the world, the least developed countries remain inadequately prepared to tap into the ensuing opportunities. The UNCTAD Rapid eTrade Readiness Assessments have demonstrated that the countries assessed would benefit from reforms to seize the benefits of online commerce. They provide useful policy recommendations for more inclusive e-commerce and help them to launch their national e-commerce development strategies in support of their e-commerce sector and digital economy, a critical lever for economic growth and recovery from the COVID-19 crisis. Moreover, the critical role and value of the digital economy in promoting development and structural transformation was reconfirmed by Member States in the Bridgetown Covenant, the outcome document of the fifteenth ministerial conference of UNCTAD, and Member States have asked UNCTAD to strengthen work to assist developing countries in systematically

assessing their state of play and readiness to engage and integrate into the digital economy, thus contributing to the closing of the digital divide.

- 23.45 In 2021, the subprogramme responded to a growing number of requests for capacity-building and technical assistance in the field of e-commerce and the digital economy from developing countries and contributed to the enhancement of their capacities to harness the evolving digital economy, taking into consideration different levels of preparedness across countries. With 2 new Rapid eTrade Readiness Assessments finalized in 2021 (in Jordan and Tunisia), the programme has now completed 29 such assessments. They provide up-to-date diagnostics of how developing countries can harness the potential of the digital revolution for e-commerce, trade and development. As an immediate follow-up to the assessments, Jordan and Tunisia began to develop action plans to serve as operational and planning tools to mobilize resources and fast-track the implementation of selected actions, based on countries' policy priorities. New assessments also commenced in Kenya and the Economic Community of West African States as a first step towards the development of e-commerce strategies. Moreover, the subprogramme provided support to countries in implementing Rapid eTrade Readiness Assessment recommendations through its implementation support mechanism, based on an implementation review of the recommendations provided in the assessments. The second such implementation review was conducted in 2021. Preliminary results suggest that countries have increasingly taken ownership of the implementation process and are making good progress, thanks also to e-trade for all partners that have provided valuable assistance to support countries' implementation efforts.
- 23.46 Support offered by the regular programme of technical cooperation complemented the work undertaken through the regular budget for section 12, which emphasizes the specific needs and critical weaknesses of developing countries, in particular the least developed countries, with regard to national e-commerce ecosystems with the aim of proposing concrete action for Governments to improve their e-commerce ecosystems.
- 23.47 The above-mentioned work contributed to women digital entrepreneurs being empowered to build a more inclusive digital economy, which is reflected in result 2 of subprogramme 4, and the related performance measure of improved business and leadership skills of a cumulative total of 200 women digital entrepreneurs participating in eTrade for Women activities and three new eTrade for Women communities established in South-East Asia, East Africa and the Balkans, in the proposed programme budget for 2023 ([A/77/6 \(Sect. 12\)](#)) (see table 23.8).

Table 23.8

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Increased awareness of Governments and the private sector regarding the role of eTrade for Women advocates in building a more inclusive digital economy	Improved business and leadership skills of 50 women digital entrepreneurs participating in eTrade for Women activities	Improved business and leadership skills of a cumulative total of 200 women digital entrepreneurs participating in eTrade for Women activities and 3 new communities established, in South-East Asia, East Africa and the Balkans	Improved business and leadership skills of a cumulative total of 200 women digital entrepreneurs participating in eTrade for Women activities. At least 4 eTrade for Women communities active across regions	Improved business and leadership skills of a cumulative total of 300 women digital entrepreneurs participating in eTrade for Women activities. At least 4 eTrade for Women communities active across regions

Expected response to anticipated requests for support in 2023**Holistic approach to effective and integrated policy responses in a changing global economy – the “paragraph 166” programme****Integrated climate change dimension into the implementation of the African Continental Free Trade Area agreement at the national level**

(result 3 of subprogramme 3 (A/77/6 (Sect. 12)))

- 23.48 In 2023, all subprogrammes are expected to support government officials and policy practitioners in developing countries on key issues on the international economic agenda, with a view to increasing their capacity to build more effective and integrated policy responses to a changing global economy, as mandated in paragraph 166 of the Bangkok Plan of Action and subsequently reconfirmed by the Sao Paulo Consensus, the Doha Programme of Action for the Least Developed Countries and the Nairobi Maafikiano of 2016. Most recently, the “paragraph 166” course was given special attention by Member States in the context of the technical cooperation work of UNCTAD, in the Bridgetown Covenant, the outcome document of its fifteenth ministerial conference, recognizing the activities under paragraph 166 of the Bangkok Plan of Action to be of great importance and utility.
- 23.49 Following positive feedback from Member States, UNCTAD is planning to continue to provide its flagship “paragraph 166” course on key issues on the international economic agenda, for policymakers, Geneva-based delegates and other stakeholders from developing and transition economies. The course would continue to be based on the development perspective of UNCTAD and focus on the linkages between trade, finance, investment, technology, logistics and macroeconomic policies in the context of major economic trends and debates in multilateral forums. It would also emphasize the various approaches that countries have taken to derive maximum development gains and would incorporate recovery and resilience, in response to and following the global pandemic, into its overall curricula, which continue to evolve to reflect the needs of policymakers in developing regions.
- 23.50 In response to the anticipated requests in 2023, the subprogrammes would:
- (a) Address in the curriculum the challenges that developing economies face, including coping with the economic consequences of the pandemic, multilateral contributions to loans with concessional components and debt relief and building resilience and recovery after the pandemic;
 - (b) Further develop the modules of the capacity-building programme focusing on development, development policies and the role of international trade and finance in a globalized world; harnessing benefits from trade and changing dynamics in the multilateral trading system, as well as trade logistics, regional trade agreements and the digital economy; and enhancing the productive capacity of developing countries through foreign direct investment, enterprise development and science, technology and innovation;
 - (c) Roll out two regional courses in two of the five developing regions, covering Eastern Europe and its economies in transition and the Middle East and Northern Africa (Arab region), and tailor those courses to the specific requirements of each region. In addition, an UNCTAD interregional “paragraph 166” platform for a select group of alumni would be developed to share cross-regional perspectives and lessons learned, in addition to follow-up training on the modules previously completed in regional courses;
 - (d) Further continue to implement capacity-building activities for developing countries in order to invest in human capital for sustainable development and achieve the Sustainable Development Goals and the 2030 Agenda.
- 23.51 The response would complement the planned work of all UNCTAD subprogrammes to be undertaken through the regular budget of section 12 to further enhance the capacity of policymakers to formulate policies and provide advisory services in the context of major economic trends and debates in multilateral forums, emphasizing various approaches that countries have taken to derive maximum development gains.
- 23.52 The expected response in 2023 would contribute to results under all five subprogrammes, including, integrating a climate change dimension into the implementation of the African Continental Free

Trade Area agreement at the national level, which is reflected in result 3 of subprogramme 3, and the related performance measure of 10 African countries developing sustainable implementation strategies for the agreement and at least two regional sustainable value chains through collaboration with other countries in their respective regions, in the proposed programme budget for 2023 (A/77/6 (Sect. 12)) (see table 23.9).

Table 23.9
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
5 African countries supported by the subprogramme in developing sustainable product export strategies through “national green export reviews”	12 African countries supported by the subprogramme in the implementation of the African Continental Free Trade Area annex on non-tariff barriers, and increase of regulatory transparency	The subprogramme identified several opportunities in the agreement establishing the African Continental Free Trade Area and relevant implementing protocols that have the potential to add the sustainability perspective of the African Continental Free Trade Area and boost BioTrade, and presented the African countries with options on how they can enhance the resilience of their trade to climate change through economic diversification and adaptation actions	Value chain analysis made available to Member States, with a specific focus on climate change and sustainable transition and on selected priority value chains	10 African countries develop sustainable African Continental Free Trade implementation strategies and at least 2 regional sustainable value chains through collaboration with other countries in their respective regions

B. Deliverables

23.53 Table 23.10 contains all expected deliverables, by category and subcategory, for the period 2021–2023.

Table 23.10
United Nations Conference on Trade and Development: expected deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	46	36	46	46

C. Proposed non-post resource requirements for 2023

Table 23.11

Financial resources by object of expenditure

(Thousands of United States dollars)

	2021 expenditure	2022 appropriation	Changes		2023 estimate (before recosting)
			Total	Percentage	
Other staff costs	1 227.8	1 027.1	200.0	19.5	1 227.1
Consultants	152.4	–	–	–	–
Travel of staff	52.3	156.6	50.0	31.9	206.6
Contractual services	32.5	–	–	–	–
General operating expenses	57.0	–	–	–	–
Furniture and equipment	181.9	–	–	–	–
Grants and contributions	128.6	427.7	–	–	427.7
Total	1 832.6	1 611.4	250.0	15.5	1 861.4

23.54 The proposed regular budget resources for 2023 amount to \$1,861,400 and reflect a resource increase of \$250,000, or 15.5 per cent, compared with the appropriation for 2022. The proposed increases under other staff costs (\$200,000) and travel of staff (\$50,000) are to provide additional resources to support the work of regional advisers in providing effective and timely technical advice on policy options and their implications, as well as technical assistance in trade, investment, e-commerce and other related areas, in response to the anticipated increase in the volume of requests for support in areas detailed in paragraph 23.43.

3. Human settlements

A. Programmatic activities delivered through the regular programme of technical cooperation

23.55 The activities under human settlements are implemented by UN-Habitat. The programmatic activities are implemented under all subprogrammes of UN-Habitat.

23.56 In implementing those activities, the regular programme of technical cooperation contributes to the objectives and expected results of the subprogrammes and complements their respective strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2023 (A/77/6 (Sect. 15)).

Expected additional requests for support from Member States for 2023

23.57 An increase in the volume of requests for assistance is anticipated from at least 12 cities in six Member States in Latin America and the Caribbean, Africa and Asia in support of localizing the Sustainable Development Goals and investing in the impact of the Goals. Moreover, requests are expected in support of urban recovery processes in Eastern Europe and the Southern Caucasus.

Response provided to Member States' requests for support in 2021**A people-centred approach to urban innovation, digital technologies, smart cities and urbanization processes adopted by cities**

(result 2 of subprogramme 2 (A/77/6 (Sect. 15)))

- 23.58 In 2021, UN-Habitat received requests for support to mobilize technical advisory services for sustainable urban development from a wide range of regions, countries and locations: Albania, Bosnia and Herzegovina, Kosovo, Montenegro, North Macedonia and Serbia (Eastern Europe); Botswana, Cameroon, Ghana, Rwanda and South Africa (Africa); Azerbaijan, China, Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan and Uzbekistan (Asia-Pacific); Brazil (Latin America and the Caribbean); and Spain and Turkey (Western Europe and other States). The subprogramme provided technical advisory services, facilitated collaboration and organized capacity-building and validation workshops, providing the evidence base for adequate policies and their implementation. In 2021, owing to the continuation of the COVID-19 pandemic, activities were mainly held virtually.
- 23.59 Despite COVID-19 restrictions, the regular programme of technical cooperation provided strong technical advisory assistance for the first session of the Sustainable Development Goals Cities global conference in Shanghai during the 2021 celebration of World Cities Day, widely engaging local governments and various stakeholders to promote the implementation of the Goals at the local level. The programme also supported the production of UN-Habitat publications and toolkits: (a) the *New Urban Agenda Illustrated* handbook; (b) the global urban monitoring framework, a guide for urban monitoring of the Goals and the New Urban Agenda; and (c) people-centred smart cities playbooks, which provide local, regional and national governments with pragmatic guidance on how to develop smart city strategies that are more inclusive, sustainable and focused on residents' needs. These activities enabled the continued dissemination of global best practices, innovation knowledge, successful experience and lessons learned on the implementation of the Goals in cities.
- 23.60 UN-Habitat used the resources of the regular programme of technical cooperation to complement United Nations Development Account projects on:
- (a) Smart sustainable cities for the New Urban Agenda in the ECE region;
 - (b) Interregional cooperation for the implementation of the New Urban Agenda;
 - (c) Urban economic and financial recovery and resilience-building in the time of COVID-19.
- 23.61 In 2021, UN-Habitat received requests for support to strengthen the capacity to bridge the digital divide in Brazil, Jordan, South Africa, Tunisia, Viet Nam and small island developing States in Africa. Accordingly, the subprogramme supported the development of training materials for local governments to assist digital transformation at the local level in favour of people-centred smart cities. The focus of the initial series of knowledge products was on the preparation of guidance on how to assess and address the digital divide, prepare smart city strategies at the local and national levels and outline necessary capacity development packages for multi-stakeholder partnerships, organizational development and e-government infrastructure, as well as public participation, digital public goods, digital human rights and digital inclusivity.
- 23.62 The above-mentioned work contributed to a people-centred approach to urban innovation, digital technologies, smart cities and urbanization processes being adopted by cities, which is reflected in result 2 of subprogramme 2, and the related performance measure of five local governments adopting people-centred digital transformation and smart city strategies that address the digital divide, in the proposed programme budget for 2023 (A/77/6 (Sect. 15)) (see table 23.12).

Table 23.12
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Member States at the UN-Habitat Assembly note the potential of frontier technologies and innovation for sustainable urban development	10 cities benefit from a flagship programme on people-centred smart cities	5 local governments adopt people-centred digital transformation and smart city strategies that address the digital divide 10 countries implement urban innovation challenges	20 local authorities implement digital transformation and smart city strategies and benefit from innovations addressing the digital divide	25 local authorities implement digital transformation and smart city strategies and benefit from innovations addressing the digital divide

Expected response to anticipated requests for support in 2023

Implementation of the outcomes of the urban dimensions of the 2030 Agenda for Sustainable Development and the Sustainable Development Goals as well as the New Urban Agenda, and strengthened capacity of cities to address inequalities and bridge social, spatial and digital divides

(two results in sections on strategy of A/77/6 (Sect. 15))

- 23.63 For 2023, Member States are expected to increase requests for technical advisory services, building on the strategic plan for the period 2020–2023, which calls for more integrated programming, aligned with the United Nations development system through common country analyses and the United Nations Sustainable Development Cooperation Frameworks. This should result in more transformative action that allows countries and cities to accelerate their implementation of the urban dimensions of the Sustainable Development Goals, the New Urban Agenda and other global agendas as set forth also in the decade of action and delivery for sustainable development. Particular focus will be on localizing the Goals in at least six selected countries in sub-Saharan Africa, the Middle East and North Africa, South-East Asia, Latin America and the Caribbean, Eastern Europe and Central Asia.
- 23.64 UN-Habitat will continue to support the implementation of the domains of change in the strategic plan for 2020–2025, in particular through the flagship initiatives on inclusive, vibrant neighbourhoods and communities as well as people-centred smart cities, by promoting the preparation of guidelines on a people-centred dimension of smart cities that will assist countries and cities in overcoming the digital divide and promote a circular economy and nature-based solutions for sustainable urban development. UN-Habitat will also continue to support the Sustainable Development Goals Cities flagship initiative by further developing and promoting the use of global urban monitoring framework data tools, local institutional capacity development tools and the Cities Investment Facility, which is implemented jointly with the United Nations capital investment fund. This will enhance sustainable urbanization practices and accelerate the implementation of the Goals in cities, with a focus on achieving more inclusive societies and cities and long-term recovery from the impact of the COVID-19 pandemic. UN-Habitat anticipates that by 2023 around 100 cities will be included in the Sustainable Development Goals Cities programme.
- 23.65 In response to the anticipated requests in 2023, UN-Habitat would:
 - (a) Broaden the scope of technical advisory services and capacity-building activities to cover digital transformation aimed at accelerating achievement of the Sustainable Development Goals in target countries;

- (b) Develop and digitalize all normative tools relevant to the implementation of the five UN-Habitat flagship programmes, which are designed to support Member States that are developing countries in achieving the urban-related Goals at scale;
 - (c) Further develop and refine the methodology and guidance material on integrated national and local urban development frameworks, based on lessons learned from pilot initiatives, and carry out additional capacity-building activities as required;
 - (d) Promote technical cooperation and knowledge exchange between regions, including through the roll-out of the Shanghai Global Award for Sustainable Development in Cities, the Shanghai Adapted Index and the Shanghai Manual.
- 23.66 These responses would complement the planned work of the UN-Habitat subprogrammes to be undertaken through the regular budget for section 15 in order to further develop and implement integrated national urban policies.
- 23.67 The expected response in 2023 would contribute to the implementation of the outcomes of the urban dimensions of the 2030 Agenda and the respective Goals as well as the New Urban Agenda, in addition to the strengthened capacity of cities to address inequalities and bridge social, spatial and digital divides, which is a result reflected in the section on strategy under subprogramme 2, in the proposed programme budget for 2023 (A/77/6 (Sect. 15)).

B. Deliverables

23.68 Table 23.13 lists all expected deliverables, by category and subcategory, for the period 2021–2023.

Section 23 Regular programme of technical cooperation

	2021 expenditure	2022 appropriation	Changes		2023 estimate (before recosting)
			Total	Percentage	
Grants and contributions	47.3	–	–	–	–
Total	1 044.4	1 152.3	100.0	8.7	1 252.3

23.69 The proposed regular budget resources for 2023 amount to \$1,252,300 and reflect a net resource increase of \$100,000, or 8.7 per cent, compared with the appropriation for 2022. The proposed net increase is attributable mainly to resources for consultants (\$50,000) to provide additional technical expertise for the urban recovery processes in Eastern Europe and the Southern Caucasus; increased requirements for travel (\$20,000) to enable additional trips to support anticipated demands; and contractual services (\$26,900) for the development of an urban recovery framework toolkit and its application to Eastern European urban crisis contexts, as detailed in paragraph 23.57.

4. International drug control, crime and terrorism prevention and criminal justice

A. Programmatic activities delivered through the regular programme of technical cooperation

23.70 The activities under international drug control, crime and terrorism prevention and criminal justice are implemented by UNODC. The programmatic activities are implemented under the following subprogrammes of UNODC: subprogramme 5, Justice; and subprogramme 8, Technical cooperation and field support.

23.71 In implementing those activities, the regular programme of technical cooperation contributes to the objectives and expected results of the above subprogrammes and complements their respective strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2023 ([A/77/6 \(Sect. 16\)](#)).

Response provided to Member States' requests for support in 2021

23.72 In response to requests from Member States for assistance in their identified key priority areas, subprogramme 5, Justice, and subprogramme 8, Technical cooperation and field support, supported the provision of technical assistance to enhance criminal justice responses to drugs, crime and terrorism, in particular in the least developed countries and countries undergoing transition. The subprogramme provided advisory services to strengthen criminal justice systems and promote the rule of law as an underlying basis for sustainable development. Particular focus was placed on strengthening field-based technical assistance and improving prison management in line with the United Nations Standard Minimum Rules for the Treatment of Prisoners (the Nelson Mandela Rules), especially in the context of the COVID-19 pandemic. In response to requests from Ghana and Nigeria, UNODC provided advisory services and capacity-building for their prison services, which supported the subsequent securing of funding for, and the successful initiation of, comprehensive and multi-year prison reform programmes. Substantive input, policy advice and infrastructure support were provided through a combination of remote support and on-site assessments, capacity-building and programming missions conducted by UNODC experts. Moreover, UNODC procured and handed over personal protective equipment and sanitary items in order to mitigate the risk of amplified transmissions in prisons – an environment that has proven particularly vulnerable to the pandemic. In response to a request from the Republic of Moldova, UNODC provided support with e-justice rooms in four prisons in order to ensure prisoners' continued access to justice through meetings with lawyers and virtual court hearings, as well as videoconferencing with relatives, thereby mitigating the impact of restrictions associated with the pandemic.

23.73 In response to requests from Member States to support their efforts to address the cultivation and production of drugs and in line with its mandates, subprogramme 8 provided assistance to countries

in reducing dependence on income from opium and coca cultivation. Alternative development guarantees direct ownership by the main stakeholders and involves a variety of products such as coffee, chocolate, tea, beans, palm hearts, honey, coconuts, dairy products and gourmet sauces. It is much more complex than simply switching from one crop to another, and UNODC offers assistance in creating products for which there is market demand, supporting entrepreneurship, involving civil society, empowering the disenfranchised and preserving the environment, thus contributing to peaceful, safe, prosperous and inclusive societies. Furthermore, the subprogramme supported countries and regions through strategic programme development and policy advice, specifically in Latin America and the Caribbean, Central Asia and the Southern Caucasus.

- 23.74 In response to requests from Member States, subprogramme 8 provided support to reduce violence against women and children, trafficking in humans and smuggling of migrants, money-laundering and cybercrime, as well as to address prison overcrowding and promote police reform, among other things. The assistance included capacity-building, equipment provision, policy and legislative advice, as well as multi-country and South-South cooperation initiatives. On the basis of lessons learned and best practices from Latin America and Africa, UNODC, in close collaboration with experts from the regions, developed a diagnostic toolkit to assess national challenges and needs with regard to illegal mining and trafficking in precious metals.
- 23.75 The above-mentioned work contributed to people in contact with the criminal justice system having increased access to justice services, which is reflected in result 2 of subprogramme 5, and the related performance measure of 20 Member States in which UNODC implemented one or more activities to increase equal access to justice for all in 2021, in the proposed programme budget for 2023 ([A/77/6 \(Sect. 16\)](#)) (see figure 23.IV).

Figure 23.IV

Performance measure: number of Member States in which the United Nations Office on Drugs and Crime implemented one or more activities to increase equal access to justice for all (cumulative)

Expected responses to anticipated requests for support in 2023

Strengthened rule of law and protection of those who are vulnerable in small island developing States in the Pacific

(result 3 of subprogramme 8 ([A/77/6 \(Sect. 16\)](#)))

- 23.76 Subprogramme 8, Technical cooperation and field support, plans to assist Member States in their efforts to counter and prevent drugs, crime, corruption and terrorism and achieve the Sustainable Development Goals. The subprogramme expects to provide practical and tailored assistance, including strengthening partnerships with multilateral financial institutions in their efforts to increase regional and cross-border cooperation. Special focus will be paid to small island developing States and South-South cooperation initiatives through cooperation with other United Nations entities and international financial institutions.

- 23.77 The subprogramme plans to support Member States in assisting rule of law institutions during their recovery from the COVID-19 pandemic through tailored crime prevention and criminal justice reform efforts in line with United Nations standards and norms in crime prevention and criminal justice, as well as a comprehensive socioeconomic framework. The effects of the pandemic have left Member States vulnerable, especially to threats such as increasing cybercrime, child sexual exploitation, corruption, wildlife trafficking and increasing risks for people who use drugs and people in closed settings. The COVID-19 recovery period provides an opportune opening for renewed efforts to address the root causes that render prison settings vulnerable to health and other emergencies. In line with the United Nations system common position on incarceration, these efforts will focus on reducing the scope of imprisonment by putting a stronger focus on prevention and non-custodial measures, strengthening prison management, improving prison conditions and improving the rehabilitation and social reintegration prospects of offenders.
- 23.78 The subprogramme plans to support field operations in order to repurpose programmatic and operational responses to the needs of Member States, in coordination with United Nations country teams. There is an envisaged increase in responses to requests to support Member States through field operations, with specific contributions within the United Nations Sustainable Development Cooperation Frameworks, United Nations Partnerships for Sustainable Development and common country analyses. Field operations would also support Member States so that they can continue hybrid and in-person technical assistance, including synchronous and asynchronous capacity development programmes.
- 23.79 The expected responses in 2023 would be aligned with Member States' priorities, notably progress in key reforms in the law enforcement sector and border management to strengthen the resilience of Member States and support the recovery process and fight against COVID-19. There would be an increasing focus on cross-border collaboration in response to the priority needs identified by Member States and regional organizations to combat the trafficking of people, narcotic drugs and precursor chemicals, wildlife, timber and counterfeit goods in a comprehensive manner.
- 23.80 In response to the anticipated requests of Member States, the subprogramme would support countries in Africa and the Middle East, South Asia, East Asia and the Pacific, Europe, West and Central Asia and Latin America and the Caribbean in increasing their capacity to address crime, drugs and terrorism threats through regional strategic dialogues, capacity-building workshops and the provision of specialized expertise to tailor national programmes. Another anticipated response is the development of activities to foster South-South cooperation among countries facing similar emerging threats caused or further exacerbated by the COVID-19 pandemic.
- 23.81 In particular, the least developed countries in the Southern Caucasus and the Caribbean and small island developing States in the Pacific will receive tailored programmes in their identified priority areas under UNODC mandates. Joint initiatives and programmes will be launched within multi-partner trust funds, with a particular focus on South Asia, Africa, Central Asia and Latin America and the Caribbean to achieve results and have an impact on the ground. In addition, a number of country-level activities will enhance equal access to justice for all people in contact with the criminal justice system.
- 23.82 The expected response in 2023 would contribute to improved UNODC support for Member States through a field offices network that is fit for purpose to achieve results and have an impact on the ground, which is a result reflected in the section on strategy under subprogramme 8, as well as strengthened rule of law and protection for those who are vulnerable in small island developing States in the Pacific, and the related performance measure of improved legal and policy frameworks to address corruption and organized crime for Pacific small island developing States, in the proposed programme budget (A/77/6 (Sect. 16)) (see table 23.15).

Table 23.15
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Data collection and evidence base on synthetic drugs strengthened in the Pacific	Partnerships established for anti-corruption and countering migrant smuggling in the Pacific	Common country analysis and cooperation frameworks of Fiji, Papua New Guinea and Samoa reflect UNODC mandates under Sustainable Development Goals 3, 16 and 17	Improved data collection systems on human trafficking Enhanced South-South cooperation through peer-to-peer learning and exchange platforms	Improved legal and policy frameworks to address corruption and organized crime for Pacific small island developing States Pacific small island developing States actively and effectively participate in the review mechanisms of the United Nations Convention against Transnational Organized Crime and the United Nations Convention against Corruption

B. Deliverables

23.84 The proposed regular budget resources for 2023 amount to \$1,043,800 and reflect no change compared with the appropriation for 2022.

5. Human rights

A. Programmatic activities delivered through the regular programme of technical cooperation

- 23.85 The activities under human rights are implemented by OHCHR. The programmatic activities are implemented under the following subprogrammes of OHCHR: subprogramme 1, Human rights mainstreaming, right to development, and research and analysis; and subprogramme 3, Advisory services, technical cooperation and field activities.
- 23.86 In implementing those activities, the regular programme of technical cooperation contributes to the objectives and expected results of the above subprogrammes and complements their respective strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2023 ([A/77/6 \(Sect. 24\)](#)).

Response provided to Member States' requests for support in 2021

Integration of the right to development in global development partnerships (result 1 of subprogramme 1 (b) ([A/77/6 \(Sect. 24\)](#)))

- 23.87 Subprogramme 1, Human rights mainstreaming, right to development, and research and analysis, contributed to the effective implementation of the 2030 Agenda, leaving no one behind, based on full respect for human rights, including the right to development, through the integration of a human rights-based approach into the different areas of work of the United Nations system. The subprogramme provided tools and approaches to integrate existing human rights information and analysis. These tools effectively guide national progress monitoring and identify relevant acceleration points. Human rights analyses enable reporting on the Sustainable Development Goals that have corresponding rights (e.g. water, health and housing). They can also assist in identifying groups at risk of being left behind, those furthest behind and ways of effectively addressing their situation. Systematically linking the 2030 Agenda and human rights follow-up processes also reduces reporting burdens. To reach as many policymakers as possible, OHCHR facilitated the sharing of good practices, discussions about lessons learned and the presentation of useful tools, methodologies and approaches at the global and regional levels, bringing together Member States and practitioners, with a focus on events and initiatives surrounding the annual high-level political forum on sustainable development, as well as its regional components. OHCHR supported United Nations country teams in the development of common country analyses, United Nations Sustainable Developing Cooperation Frameworks and the COVID-19 socioeconomic response plans and socioeconomic impact assessments.

- 23.88 In 2021, the subprogramme produced country-specific documents, engaging with Member States to assist them, upon request, in discharging their voluntary national review obligations, efficiently using the work of human rights mechanisms for the reviews and applying a rights-based approach to preparing them. The subprogramme supported capacity-building at the regional level for countries that will present their reviews in 2021 in the Asia-Pacific region (2021 ESCAP regional workshop on voluntary national reviews) and contributed to the global 2021 knowledge exchange on tools and approaches useful for the reviews. On the basis of requests from Member States or United Nations country teams, OHCHR provided guidance or supported the development of the 2021 and 2022 reviews of the Plurinational State of Bolivia, Botswana, Colombia, the Dominican Republic, Egypt, El Salvador, Equatorial Guinea, Eswatini, Guinea-Bissau, Indonesia, Jamaica, Jordan, the Lao People’s Democratic Republic, Lesotho, Malawi, Namibia, Nicaragua, Saudi Arabia, Uruguay and Zimbabwe and contributed to a regional workshop on Sustainable Development Goal 16 and voluntary national reviews for several Governments of the Asia-Pacific region.
- 23.89 The above-mentioned work contributed to the integration of the right to development in global development partnerships, which is reflected in result 1 of subprogramme 1 (b), and the related performance measure of the United Nations Conference on the Least Developed Countries considering the integration of the right to development in its outcome, in the proposed programme budget for 2023 (A/77/6 (Sect. 24)) (see table 23.18).

Table 23.18
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Enhanced coordination to support the least developed countries	Report of the Secretary-General and the United Nations High Commissioner for Human Rights on the right to development, available to the United Nations Conference on the Least Developed Countries	The United Nations Conference on the Least Developed Countries considered the integration of the right to development in its outcome	The United Nations Conference on the Least Developed Countries considers the integration of the right to development in the new programme of action for least developed countries	The least developed countries benefit from their implementation of the new programme of action for the least developed countries, which effectively promotes their right to development

Expected responses to anticipated requests for support in 2023

Strengthened effectiveness of national human rights institutions in line with the principles relating to the status of national institutions for the promotion and protection of human rights (the Paris Principles)

(result 1 of subprogramme 3 (A/77/6 (Sect. 24)))

- 23.90 In 2023, subprogramme 3, Advisory services, technical cooperation and field activities, plans to support countries in strengthening their national human rights institutions and civil society through two distinct but comprehensive fellowship programmes: (a) one for staff members of national human rights institutions worldwide; and (b) the other for indigenous representatives and representatives belonging to national or ethnic, religious and linguistic minorities. The subprogramme anticipates that there will be additional requests for OHCHR to host fellows at its headquarters in Geneva and virtually or at OHCHR country and regional offices to enhance their knowledge of the United Nations human rights machinery and reinforce their capacity to support Member States’ efforts to address human rights challenges, as well as their advocacy skills.

- 23.91 In response to the anticipated requests in 2023, the subprogramme would:
- (a) Broaden the scope of the two fellowship programmes to include deployment of former indigenous fellows and minority fellows as “senior fellows” to receive on-the-job training to OHCHR country or regional offices, United Nations country teams or United Nations peacekeeping missions;
 - (b) Further develop and refine methodology and guidance material on the two fellowship programmes to facilitate participation by an increased number of fellows in the programmes virtually and strengthen capacity to ensure the monitoring of human rights situations through online tools;
 - (c) Implement further capacity-building activities for indigenous, minority and national human rights institution fellows to constructively engage in United Nations meetings and human rights mechanisms and the implementation of the Sustainable Development Goals in the context of the response to the COVID-19 pandemic.
- 23.92 The responses would complement the planned work of the subprogramme on strengthening national human rights institutions, as outlined in the regular budget of section 24, facilitating the exchange of good practices and the implementation of target 16.a.1 of the Sustainable Development Goals on the existence of independent national human rights institutions for the promotion and protection of human rights (the Paris Principles).
- 23.93 The expected response in 2023 would contribute to the strengthened effectiveness of 80 national human rights institutions, which is reflected in result 1 of subprogramme 3, and the related performance measure in the proposed programme budget for 2023 (A/77/6 (Sect. 24)) (see figure 23.V).

Figure 23.V

Performance measure: number of national human rights institutions established or strengthened (annual)

B. Deliverables

23.94 Table 23.19 lists all expected deliverables, by category and subcategory, for the period 2021–2023.

Table 23.19

Office of the United Nations High Commissioner for Human Rights: expected deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	220	225	242	245

C. Proposed non-post resource requirements for 2023

Table 23.20
Financial resources by object of expenditure
 (Thousands of United States dollars)

	2021 expenditure	2022 appropriation	Changes		2023 estimate (before recosting)
			Total	Percentage

Furniture and equipment	1.5	–	–	–	–
Grants and contributions	443.9	1 014.6	–	–	1 014.6
Total	2 215.7	2 524.0	–	–	2 524.0

23.95 The proposed regular budget resources for 2023 amount to \$2,524,000 and reflect no change compared with the appropriation for 2022.

6. Humanitarian assistance

A. Programmatic activities delivered through the regular programme of technical cooperation

23.96 The activities under humanitarian assistance are implemented by the Office for the Coordination of Humanitarian Affairs. The programmatic activities are implemented under the following subprogrammes of the Office: subprogramme 1, Policy and analysis; subprogramme 2, Coordination of humanitarian action and emergency response; subprogramme 4, Emergency support services; and subprogramme 5, Humanitarian emergency information and advocacy.

23.97 In implementing those activities, the regular programme of technical cooperation contributes to the objectives and expected results of the above subprogrammes and complements their respective strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2023 ([A/77/6 \(Sect. 27\)](#)).

Response provided to Member States' requests for support in 2021

Strengthened rapid response capacities through standardized and improved response methodologies (result 1 of subprogramme 4 ([A/77/6 \(Sect. 27\)](#)))

23.98 In 2021, the Office for the Coordination of Humanitarian Affairs, through subprogrammes 2 and 4, supported Member States and other partners in Barbados, Equatorial Guinea, Haiti, Saint Vincent and the Grenadines and Sri Lanka, among other countries, to enhance humanitarian planning, capacity-building and responses to crises, with a particular focus on strengthening preparedness and the timeliness of emergency responses, as well as building the resilience of people and communities affected by natural disasters. This included support for Member States in collaboration with development and other humanitarian actors to strengthen information platforms, networks and

systems that enable such actors to better prepare for and scale up recovery and resilience in the aftermath of natural disasters.

- 23.99 Subprogramme 1 convened the annual Global Humanitarian Policy Forum virtually with members of the humanitarian community to anticipate future trends, consider policy issues and explore lessons learned for practical challenges and opportunities for humanitarian response coordination in the face of the climate crisis. In the lead-up to the Forum, the Office for the Coordination of Humanitarian Affairs convened an expert round-table meeting, with wide participation by partners in the global South, to consider humanitarian needs and action and community resilience in the context of the climate crisis. Diverse participants in the Forum engaged actively with each other to identify common experiences, examples of programmatic and organizational change and suggestions for systemic adjustments to further optimize the ways in which the humanitarian system works and collaborates. This enabled over 2,000 people from more than 110 countries to participate through web-based social media platforms. Participants included Member States, multilateral organizations, local and international non-governmental organizations, academic and research institutions, students and the private sector.
- 23.100 The above-mentioned work contributed to strengthened rapid response capacities through standardized and improved response methodologies, which is reflected in result 1 of subprogramme 4, and the related performance measure of 131 United Nations Disaster Assessment and Coordination Team members trained in the application of local and regional emergency preparedness and response approaches, in the proposed programme budget for 2023 ([A/77/6 \(Sect. 27\)](#)) (see figure 23.VI).

Figure 23.VI
Performance measure: total number of United Nations Disaster Assessment and Coordination Team members trained in the application of local and regional emergency preparedness and response approaches (cumulative)

Expected response to anticipated requests for support in 2023

Crisis-affected people received emergency humanitarian assistance in the immediate aftermath of a catastrophe
 (result 3 of subprogramme 4 ([A/77/6 \(Sect. 27\)](#)))

- 23.101 For 2023, the Office for the Coordination of Humanitarian Affairs plans to strengthen rapid response capacities through standardized and improved response methodologies and tools. United Nations Disaster Assessment and Coordination Team members will be trained in the application of local and regional emergency preparedness and response approaches. The COVID-19 pandemic and the related mitigation measures in particular reinforced the Office’s efforts to provide predictable emergency coordination services, enabled by rigorous, high-quality training and global, regional and national partnerships. Taking into account lessons learned from the pandemic and anticipating demand to standardize emergency response approaches, the Office plans to adequately prepare emergency response services members such as the United Nations Disaster Assessment and Coordination Team, humanitarian civil-military coordination experts and ICT first responders

through remote induction and refresher training courses, as well as incorporate remote expert support into emergency missions.

23.102 The Office would continue to develop methods and procedures to effectively prepare experts to physically deploy and assist with remote support to enhance emergency responses in support of crisis-affected people in an integrated manner. This would result in the enhanced response capacity of local, regional and international responders and the more efficient and timely mobilization and deployment of emergency response services to improve the effectiveness of humanitarian assistance. Training courses would be delivered remotely or in a hybrid form to meet the needs of Member States that work with disaster-prone communities to ensure the effectiveness of response capacities. As part of the regional strategic partnership, the Office works with the Association of Southeast Asian Nations to build the disaster preparedness and response capacity of the Association’s 10 member States. The Office would continue to convene forums and round tables to facilitate lessons learned and discussions on challenges, opportunities and trends in humanitarian and development transitions in support of community resilience.

23.103 The expected response in 2023 would contribute to crisis-affected people receiving emergency humanitarian assistance in the immediate aftermath of a disaster, which is reflected in result 3 of subprogramme 4, and the related performance measure of 472 beneficiaries trained in United Nations Disaster Assessment and Coordination Team and United Nations humanitarian civil-military coordination, in the proposed programme budget for 2023 (A/77/6 (Sect. 27)) (see figure 23.VII).

Figure 23.VII
Performance measure: number of emergency responders trained in United Nations Disaster Assessment and Coordination Team and United Nations humanitarian civil-military coordination, to deploy and respond to sudden-onset emergencies (cumulative)

B. Deliverables

23.104 Table 23.21 lists all expected deliverables, by category and subcategory, for the period 2021–2023.

Table 23.21
Office for the Coordination of Humanitarian Affairs: expected deliverables for the period 2021–2023, by category and subcategory

Grants and contributions	137.4	87.6	–	–	87.6
Total	619.9	714.6	–	–	714.6

23.105 The proposed regular budget resources for 2023 amount to \$714,600 and reflect no change compared with the appropriation for 2022.

II. Regional and subregional advisory services

7. Economic and social development in Africa

A. Programmatic activities delivered through the regular programme of technical cooperation

23.106 The activities under economic and social development in Africa are implemented by ECA and are used to support African countries in their capacity development efforts and technical advisory services. The programmatic activities are implemented under all subprogrammes of ECA. In that regard, the work of the nine subprogrammes of ECA are clustered along five thematic areas:

- (a) Macroeconomic policy and governance and economic development and planning;
- (b) Regional integration and trade and private sector development and finance;
- (c) Data and statistics;
- (d) Climate change, environment and natural resources management;
- (e) Gender equality and women's empowerment and poverty inequality and social policy.

23.107 In implementing those activities, the regular programme of technical cooperation contributes to the objectives and expected results of the subprogrammes and complements their respective strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2023 (A/77/6 (Sect. 18)).

Expected additional requests for support from member States for 2023

23.108 In response to an anticipated increase in the volume of requests for assistance from member States, ECA would provide additional support on digital transformation strategy projects focused on the implementation of key ongoing innovative initiatives such as support for the development of subscriber

identity module (SIM)-less mobile digital identification pilot projects and building centres of excellence for the development of small-stock industry, leveraging the latest smart agriculture technologies. ECA began to support Botswana with these projects in 2021 and, given its innovative concept, successful implementation and key outcomes, the opportunity has arisen for ECA to use it as a model to be replicated in several African countries to take advantage of the opportunities presented by the fourth industrial revolution and move the continent towards a knowledge-based economy.

Response provided to member States' requests for support in 2021

Enhanced tax revenues mobilization in the Sudan

(section on programme performance in 2021 under component 1 of subprogramme 7 ([A/77/6 \(Sect. 18\)](#)))

- 23.109 Since 2020, the COVID-19 pandemic has had a negative impact on the streams and amounts of revenue generated at the member State level as well as on external resources, with countries repurposing them to address the most pressing challenges through stimulus programmes and emergency socioeconomic measures. As a result, several requests for support from member States in 2021 were focused on mobilizing and securing additional resources at the national level. In response, ECA provided technical assistance on strengthening the capacity of member States to integrate national financing frameworks and optimize the use of existing associated resources. This work supported the first two thematic cluster areas, namely: (a) macroeconomic policy and governance and economic development and planning; and (b) regional integration and trade and private sector development and finance.
