- 23.110 For example, component 1 of subprogramme 7, Subregional activities in North Africa, provided support to the Sudan on the enhancement of tax revenue mobilization. The component provided technical assistance to the Sudan Taxation Chamber in reviewing the prevailing administrative tax practices and addressing key challenges in auditing several prominent economic sectors. The component also provided technical advice to enhance value added tax collection and develop new audit methodologies for monthly and annual tax returns aimed at improving the implementation of income tax law. This work was undertaken in close partnership with the Egyptian Tax Authority, which developed a new auditing procedure based on the best global audit practices and guidance provided by ECA and national tax experts. As a result, the share of large taxpayers in the Sudan increased from 50 to 70 per cent. The Sudan also requested further follow-up activities, including extended assistance to experts in the office for large taxpayers dealing with high-risk economic sectors (telecommunications, oil and mining, banking and industrial sectors), the updating of additional criteria for the characterization of large taxpayer classification, modernization and harmonization, and the provision of electronic services.
- 23.111 This intervention contributed to the mainstreaming of the work of the component, focusing on the enhanced employment creation environment in North Africa. The regular programme of technical cooperation complemented the work undertaken through the regular budget for section 18, which emphasizes the specific need for the development of evidence-based macroeconomic policies, strategies and structural reforms to support economic transformation for more diversified and resilient economies in North Africa, including adequate and tailor-made tax policies and instruments.
- 23.112 The above-mentioned work contributed to enhanced tax revenue mobilization in the Sudan, which is a result reflected in the section on programme performance in 2021 under component 1 of subprogramme 7, and the related performance measure of the ratio of tax revenue to gross domestic product (GDP) of 6 per cent for the Sudan, in the proposed programme budget for 2023 ([A/77/6 \(Sect. 18\)](#)) (see figure 23.VIII).

Figure 23.VIII
Performance measure: ratio of tax revenue to gross domestic product in the Sudan (annual)

Expected responses to anticipated requests for support in 2023

Enhanced capacity of member States to transform and modernize their statistical systems (result 3 of subprogramme 4 (A/77/6 (Sect. 18)))

- 23.113 Subprogramme 4, Data and statistics, expects to strengthen the production, dissemination and use of credible data, statistics and geospatial information at the national, regional and global levels for evidence-based policymaking and decision-making. Mandated by, among others, the General Assembly in its resolution 68/261 on the Fundamental Principles of Official Statistics and by ECA in its resolution 849 (XL) on statistics and statistical capacity-building in Africa and its resolution 882 (XLIV) on the implementation of the African Charter on Statistics and the Strategy for the Harmonization of Statistics in Africa, the subprogramme's aims include enhancing the capacity and efficiency of national statistical systems in the collection of comparable and harmonized statistics. One of the areas that ECA has been working on in this regard is the measuring and monitoring of price data, the consumer price index, as it is one of the most crucial economic indicators for signalling supply and demand, the functioning of market mechanisms and the stability of the economy and for providing confidence to market actors. In addition, the subprogramme, in collaboration with partners, provides technical assistance and capacity-building to member States on developing and improving their price statistics.
- 23.114 Lately, the COVID-19 pandemic has been a challenge for the collection of price data in Africa, which was mostly done through face-to-face surveys. At the same time, the pandemic brought about an increasing demand for timely and accurate statistics for suitable and effective policy responses. The subprogramme undertook a survey to assess how member States' national statistical offices have been affected by the pandemic, and the results showed a need for the exchange of experiences and practices on how to address the challenges faced as a result of the pandemic, as well as the need for training on alternative methods of data collection. The subprogramme, in collaboration with other pan-African institutions and development partners, has since organized an online series on alternative price data collection methods such as telephone surveys, computer-automated telephone interviews, web-scraping and scanner data. Based on the online series, several member States have indicated the need for support in applying these modern and innovative data collection techniques. ECA anticipates that in 2023 member States will request technical assistance in applying modern and innovative methods and techniques and the subprogramme would respond to such requests by providing expert technical assistance in telephone surveys and computer-automated telephone interviews and conducting training on the application of these methods.
- 23.115 The anticipated support will enhance the capacity of member States in the application of telephone surveys and computer-automated telephone interviews in the collection of price data to enable compilation of the consumer price index during the pandemic and beyond. In doing so, the support provided will also help to improve the uptake and use of modern methods, innovative tools and technologies for statistical operations in national statistical systems.
- 23.116 The expected response in 2023 would contribute to the enhanced capacity of member States to transform and modernize their statistical systems, which is reflected in result 3 of subprogramme 4,

and the related performance measure of five member States having implemented the road map on digital transformation and modernized official statistics, in the proposed programme budget for 2023 (A/77/6 (Sect. 18)) (see figure 23.IX).

Figure 23.IX

Performance measure: number of member States that implemented the road map on digital transformation and modernized official statistics

Enhanced capacity of member States to design and implement policies to improve the business environment

(result 3 of subprogramme 3 (A/77/6 (Sect. 18)))

23.117 Subprogramme 3, Private sector development and finance, supports Governments, regional economic communities and continental institutions in addressing issues and challenges that adversely affect the business environment with a view to enhancing private investment in food systems, agriculture and land. In particular, the subprogramme advances data and knowledge as a basis for evidence-based tools, advocacy and decision-making; increases capacity to improve skills to reform policies, legislation and institutions; and provides technical assistance to develop and implement programmes that remove barriers in the agriculture and land sectors to transform food systems. Taking note of the decisions of the United Nations Food Systems Summit of September 2021 and the subsequent commitment of States members of the African Union on those decisions in December 2021 and the endorsement of the African common position for the Summit in July 2021, the subprogramme plans to work closely with the African Union Commission, the African Union Development Agency, resident coordinators, United Nations country teams, technical partners and other stakeholders to support member States in developing and implementing national pathways for food system transformations. The subprogramme expects to receive requests for support from member States in the following areas:

- (a) Food security and nutrition;
- (b) Value addition, diversification and trade;
- (c) Land property rights and investments;
- (d) Resilient and inclusive food systems.

23.118 In response to these anticipated requests, the subprogramme would implement demand-driven interventions in the above areas and, in doing so, plans to work closely with universities and institutions of higher learning to strengthen the capacity of member States, regional organizations and institutions of higher learning in implementing the African Union Declaration on Land Issues and Challenges in Africa, through improved curricula and programmes on land governance to enhance skills and capacity for policy and institutional reforms. The subprogramme would also contribute to enhancing the business environment and opportunities for land-based investment in agriculture and agribusiness in selected countries through the provision of data, maps and knowledge to facilitate negotiations on land investment, as well as the strengthening of women's land tenure security and entrepreneurship, with key outputs being policy, legal and institutional reforms to adequately mainstream gender into land and agriculture policies. It would also seek to promote regional agricultural value chains and agro-industrial development in select regional economic communities to enhance policy and institutional reforms and

thereby increase value addition, diversification and trade, as well as promote land-based investment models and business partnerships and enhance insurance and finance programmes in the agriculture sector as a means of reducing the risk to shocks such as drought, flooding, locusts and the COVID-19 pandemic. The subprogramme would also generate knowledge through the regular joint publication by ECA, the African Union Commission and the Food and Agriculture Organization of the United Nations on the Africa regional overview of food security and nutrition and would continue to support the functioning of platforms that it helped to establish to facilitate knowledge dissemination and advocacy, including the fifth edition of conference on land policy in Africa and the *African Journal on Land Policy and Geospatial Sciences*.

- 23.119 These interventions would lead to an increase in the capacity of member States to formulate and implement policies and strategies that transform food systems in accordance with the commitments of the African Union Specialized Technical Committee on Agriculture, Rural Development, Water and Environment aimed at enhancing inclusiveness and resilience to shocks such as the COVID-19 pandemic and increase value addition and diversification to enhance intra-African trade.
- 23.120 The expected response in 2023 would contribute to the enhanced capacity of member States to design and implement policies to improve the business environment, which is reflected in result 3 of subprogramme 3, and its related performance measure of two additional member States implementing policies in line with the outcomes of the African Union Specialized Technical Committee on Agriculture, Rural Development, Water and Environment, in the proposed programme budget for 2023 (A/77/6 (Sect. 18)) (see table 23.23).

Table 23.23

Grants and contributions	1 121.2	2 632.2	353.3	13.4	2 985.5
Total	7 115.9	7 931.7	600.0	7.6	8 531.7

23.122 The proposed regular budget resources for 2023 amount to \$8,531,700 and reflect a resource increase of \$600,000, or 7.6 per cent, compared with the appropriation for 2022. The proposed increase under grants and contributions (\$353,300), consultants (\$155,300), contractual services (\$47,800) and travel of staff (\$43,600) is to provide for activities related to the building of capacity to create centres of excellence for the development of small-stock industry, leveraging the latest smart agriculture technologies, as outlined in paragraph 23.108.

8. Economic and social development in Asia and the Pacific

A. Programmatic activities delivered through the regular programme of technical cooperation

23.123 The activities under economic and social development in Asia and the Pacific are implemented by ESCAP. The programmatic activities are implemented under the following subprogrammes of ESCAP: subprogramme 1, Macroeconomic policy, poverty reduction and financing for development; subprogramme 2, Trade, investment and innovation; subprogramme 3, Transport; subprogramme 4, Environment and development; subprogramme 5, ICT and disaster risk reduction and management;

subprogramme 6, Social development; subprogramme 7, Statistics; subprogramme 8, Subregional activities for development (components 1 to 5); and subprogramme 9, Energy.

- 23.124 In providing this assistance, the regular programme of technical cooperation contributes to the objectives and expected results of the above subprogrammes and complements their respective strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2023 ([A/77/6 \(Sect. 19\)](#)).

Response provided to member States' requests for support in 2021

- 23.125 In 2021, subprogramme 2, Trade, investment and innovation, received requests for technical assistance from two landlocked developing countries, Bhutan and Mongolia – the former being also a least developed country – in designing, formulating and implementing strategies to attract and promote sustainable foreign direct investment and support the recovery from the COVID-19 pandemic.
- 23.126 A series of national consultations were held, organized jointly with the investment promotion agencies in each country and with stakeholders, including line ministries, nationals and foreign investors, to identify three priority sectors with the highest potential for attracting foreign direct investment. Additional partners for those consultations included the United Nations resident coordinators' offices in the target countries and the International Trade Centre. National foreign direct investment strategies and implementation plans were developed with the relevant investment authorities. The strategies identified sectors and potential investors and recommended channels for contacting investors – including specific marketing activities – and influencers and multipliers that could facilitate access. Implementation plans outlined specific government agencies that could support the implementation of each country's strategy; roles and responsibilities during implementation; significant barriers to be addressed; resources (financial and other) required; as well as a timeline for implementing the strategies, milestones and key performance indicators to assess progress.
- 23.127 To create these strategies and implementation plans, tools and methodologies developed as part of the second edition of the ESCAP *Handbook on Policies, Promotion and Facilitation of Foreign Direct Investment for Sustainable Development in Asia and the Pacific* were optimized, initially generated through the eleventh tranche project of the United Nations Development Account, on fostering inclusive and sustainable development through increased participation of small and medium-sized enterprises in global value chains.
- 23.128 The above-mentioned work contributed to the adoption of policies and programmes aimed at achieving more inclusive and sustainable outcomes of business and investment activities, including sustainable infrastructure financing and public-private partnerships, with a specific focus on countries in special situations, which is a result reflected in the section on strategy under subprogramme 2, in the proposed programme budget for 2023 ([A/77/6 \(Sect. 19\)](#)).

Expected responses to anticipated requests for support in 2023

Strengthening financing for sustainable development, with a focus on innovative and emerging financing options in the Asia-Pacific region (result 3 of subprogramme 1 ([A/77/6 \(Sect. 19\)](#)))

- 23.129 In 2023, subprogramme 1, Macroeconomic policy, poverty reduction and financing for development, will continue to prioritize support for member States on sustainable, innovative financing options and economic policies that can accelerate transformation towards sustainable, inclusive and resilient economies. Based on the subprogramme's experience with the regular programme of technical cooperation in 2022, requests are expected from Cambodia for continued support for the National Bank of Cambodia. Similarly, based on preliminary discussions with Sri Lanka, requests are anticipated regarding the building of system-wide capacity for sustainable financing to achieve the Sustainable Development Goals. The subprogramme also stands ready to respond to potential requests for capacity-building support on economic policies that can facilitate transformation towards a more inclusive and resilient future, following support extended to several countries in this area in 2022.

- 23.130 In response to the anticipated request from Cambodia in 2023, the subprogramme would provide technical support for the development of the National Bank of Cambodia green finance strategy and its issuance of sustainability/green bonds through research, advisory services and knowledge-sharing events. In response to the anticipated request from Sri Lanka, the subprogramme would produce a multi-year capacity development proposal to include capacity-building workshops for stakeholders on sustainable finance options, best practices and lessons learned, tailored training sessions on thematic bond issuance, as well as assistance in the development of frameworks for bond issuance.
- 23.131 The expected response in 2023 would contribute to member States strengthening financing for sustainable development, with a focus on innovative and emerging financing options in the Asia-Pacific region, which is reflected in result 3 of subprogramme 1, and the related performance measure on new policy initiatives or reforms by three member States to strengthen financing and resource mobilization and allocation for sustainable development, in the proposed programme budget for 2023 (A/77/6 (Sect. 19)) (see table 23.26).

Table 23.26
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Enhanced understanding of financing needs and strategies among policymakers in member States to effectively pursue the Sustainable Development Goals	New initiatives by 7 member States (Bangladesh, Brunei Darussalam, China, Indonesia, Kazakhstan, Samoa and Sri Lanka) to design and implement financing strategies to bridge financing gaps for the implementation of the 2030 Agenda	New policy initiatives or reforms by 3 member States (Bangladesh, Cambodia and Vanuatu) to strengthen financing and resource mobilization and allocation for sustainable development	New policy initiatives or reforms by 3 member States to strengthen financing and resource mobilization and allocation for sustainable development	New policy initiatives or reforms by 3 member States to strengthen financing and resource mobilization and allocation for sustainable development

Accelerating regional policy coordination for risk-informed and climate-resilient development
(result 1 of subprogramme 5 (A/77/6 (Sect. 19)))

- 23.132 In 2023, subprogramme 5, ICT and disaster risk reduction and management, will focus on supporting member States in strengthening ICT, space technology applications and disaster risk reduction and management for recovery from the COVID-19 pandemic and build resilience to disaster risks and climate change through regional cooperation mechanisms.
- 23.133 With the experience of the overlapping crises of the pandemic and natural hazards, member States, especially those vulnerable to extreme climate events such as floods, droughts, tropical cyclones, coastal erosion and heatwaves, are expected to request technical support to strengthen knowledge and build the capacity to assess, monitor and respond to complex and cascading risks.
- 23.134 In responding to the growing needs, ESCAP technical cooperation activities would utilize the products being developed under development account projects on operationalizing disaster risk reduction and resilience-building in Asia and the Pacific and digital and transport connectivity for the socioeconomic resilience of rural communities during the post-COVID-19 period in Asia-Pacific countries to build resilience to disaster risks and climate change and to promote digital and space technology applications in the region. Utilizing these products, including the risk and resilience portal, expected responses would deepen member States' understanding of cascading risks and strengthen the capacity for evidence-based analysis and support for moving towards a resilient and inclusive digital society.

- 23.135 Expected responses would include capacity-building workshops for government officials in high-risk, low-capacity developing countries for building resilience. Training materials would be prepared to enhance knowledge and to build capacity for policy development using the ICT and space technology applications of target countries.
- 23.136 The expected response in 2023 would contribute to accelerating regional policy coordination for risk-informed and climate-resilient development, which is reflected in result 1 of subprogramme 5, and the related performance measure of 13 initiatives for improving disaster resilience, in the proposed programme budget for 2023 (A/77/6 (Sect. 19)) (see figure 23.X).

Figure 23.X

Performance measure: number of initiatives for improving disaster resilience (cumulative)

Enhanced capacity of Asia-Pacific national statistical systems to measure development progress beyond economic growth

(result 3 of subprogramme 7 (A/77/6 (Sect. 19)))

Asia-Pacific national statistical systems are better equipped to review progress in the implementation of the 2030 Agenda for Sustainable Development

(result 2 of subprogramme 7 (A/77/6 (Sect. 19)))

- 23.137 In 2023, subprogramme 7, Statistics, will continue to strengthen national statistical systems in the Asia-Pacific region to improve the availability, accessibility and use of quality data and official statistics in support of sustainable development. Based on outreach efforts, the subprogramme anticipates requests, especially from Pacific island States, for country-level support to develop ecosystem accounts and thereby improve the availability of data and official statistics to monitor ecosystem-related Sustainable Development Goals.
- 23.138 In response to the anticipated requests in 2023, the subprogramme would support national statistical systems in target countries to advance their ecosystem accounting by providing tailored technical assistance, training sessions and other capacity-building activities and advisory services, including through virtual modalities, and may supplement remote support with the engagement of local consultants, if required. An ESCAP Regional Adviser on Environment Statistics would coordinate the support provided by ESCAP, oversee the work of the consultants and ensure that the demands on ecosystem accounts formulated earlier by member States are met.
- 23.139 The expected response in 2023 would contribute to the enhanced capacity of Asia-Pacific national statistical systems to measure development progress beyond economic growth, which is reflected in result 3 of subprogramme 7, and the related performance measure of an increased number of national statistical systems having enhanced capacities to measure development progress beyond GDP, in the proposed programme budget for 2023 (A/77/6 (Sect. 19) and table 23.27). The response would also contribute to better equipping Asia-Pacific national statistical systems to review progress in implementing the 2030 Agenda, which is reflected in result 2 of subprogramme 7, and the related performance measure of the percentage of Sustainable Development Goal indicators having sufficient data for the Asia-Pacific region, in the proposed programme budget for 2023 (A/77/6 (Sect. 19)) (see figure 23.XI).

Table 23.27
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
10 countries demonstrated enhanced capacity of national statistical systems to measure development progress beyond GDP	The Committee on Statistics noted with appreciation the increased efforts to compile environmental accounts in the region 8 countries demonstrated enhanced capacity of national statistical systems to measure development progress beyond GDP	13 countries demonstrated enhanced capacity of national statistical systems to measure development progress beyond GDP	An increased number of national statistical systems have enhanced capacities to measure development progress beyond GDP	An increased number of national statistical systems have enhanced capacities to measure development progress beyond GDP

Figure 23.XI
Performance measure: Sustainable Development Goal indicators having sufficient data for the Asia-Pacific region

(Percentage)

Pacific small island developing States strengthen regional cooperation in addressing transboundary issues and building resilience

(result 3 of component 1 of subprogramme 8 (A/77/6 (Sect. 19)))

Increased integration of disaster risk-related analysis in national and local planning in countries of South and South-West Asia

(result 3 of component 4 of subprogramme 8 (A/77/6 (Sect. 19)))

23.140 In 2023, several subprogrammes of ESCAP, in particular subprogramme 1, Macroeconomic policy, poverty reduction and financing for development, subprogramme 6, Social development, subprogramme 7, Statistics, and subprogramme 8, Subregional activities for development, are expecting to provide integrated capacity-building assistance in response to anticipated requests from member States that are planning to present their voluntary national reviews during that year. These subprogrammes also expect to provide follow-up support upon request to countries that have already presented their reviews. The member States concerned from the Asia-Pacific region are expected to include Brunei Darussalam, Fiji, Kazakhstan, Maldives, Mongolia and Singapore.

23.141 The expected responses and tailored technical cooperation assistance would draw on the expertise of ESCAP across different thematic areas and capitalize on recognized tools and methodologies as

well as tools that ESCAP champions, such as the Leave No One Behind methodology, the dissimilarity index, the National SDG Tracker, Sustainable Development Goal investment needs and voluntary national reviews guidance tools.

- 23.142 To this effect in 2023, ESCAP expects to support the formulation of voluntary national reviews in target member States by assessing progress towards the Sustainable Development Goals, examining the impact of the COVID-19 pandemic, calculating Goal investment needs, measuring inequality of opportunity and identifying those left behind. The activities would be delivered using diverse and flexible modalities, including capacity-building training sessions (both virtually and in-person), stakeholder engagement, twinning arrangements, peer review, study tours, online communities of practice and voluntary local reviews. Activities would also benefit from knowledge generated through projects funded from other sources, such as a project on strengthening follow-up and review for the 2030 Agenda in ESCAP member States that are submitting voluntary national reviews funded under the China-ESCAP Cooperation Programme.
- 23.143 The expected response in 2023 would contribute to Pacific small island developing States strengthening regional cooperation in addressing transboundary issues and building resilience, which is reflected in result 3 of component 1 of subprogramme 8, and the related performance measure of one additional country formulating a national strategy to address climate and disaster-related resilience and reducing vulnerabilities, which aligns with the regional priorities, in the proposed programme budget for 2023 (A/77/6 (Sect. 19) and table 23.28). The expected response in 2023 would also contribute to increased integration of disaster risk-related analysis into national and local planning in countries of South and South-west Asia, which is reflected in result 3 of component 4 of subprogramme 8, and the related performance measure of policymakers from two countries in South Asia using customized planning tools, techniques and guidelines to facilitate the undertaking of disaster risk-related analyses for national and local planning purposes, in the proposed programme budget for 2023 (A/77/6 (Sect. 19)) (see table 23.29).

Table 23.28
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
—	—	Pacific island countries considered the development of a regional strategy to address the regional priorities on climate- and disaster-related resilience and reduce vulnerabilities	At least 1 country formulates a national strategy to address climate- and disaster-related resilience and reduce vulnerabilities, which aligns with the regional priorities	One additional country formulates a national strategy to address climate- and disaster-related resilience and reduce vulnerabilities, which aligns with the regional priorities

Table 23.29
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	Evidence-based approaches to disaster risk reduction and climate change adaptation are not yet institutionalized and operationalized in a practical manner	1 pilot country in South Asia benefits from the customization of planning tools, techniques and guidelines to facilitate disaster risk-related analyses for national and local planning purposes	Policymakers from 2 countries in South Asia use customized planning tools, techniques and guidelines to facilitate the undertaking of disaster risk-related analyses for national and local planning purposes

B. Deliverables

23.144 Table 23.30 lists all expected deliverables, by category and subcategory, for the period 2021–2023.

Table 23.30
Economic and Social Commission for Asia and the Pacific: expected deliverables for the period 2021–2023, by category and subcategory

Grants and contributions	337.1	365.6	–	–	365.6
Total	3 079.3	3 443.0	–	–	3 443.0

- 23.145 The proposed regular budget resources for 2023 amount to \$3,443,000 and reflect no change compared with the appropriation for 2022. The proposed increase under other staff costs (\$425,400) and the proposed decrease under consultants (\$425,400) are to provide for the continuing assignments of Regional Adviser positions to provide advisory services and technical support to member States on important and emerging topics and to ensure the effective delivery of United Nations assistance on the ground, in line with requests and explicit demands from countries in the region.

9. Economic development in Europe

A. Programmatic activities delivered through the regular programme of technical cooperation

- 23.146 The activities under economic development in Europe are implemented by ECE. The programmatic activities are implemented under the following subprogrammes of ECE: subprogramme 1, Environment; subprogramme 2, Transport; subprogramme 3, Statistics; subprogramme 4, Economic cooperation and integration; subprogramme 5, Sustainable energy; subprogramme 6, Trade; subprogramme 7, Forests and the forest industry; and subprogramme 8, Housing, land management and population.
- 23.147 In implementing those activities, the regular programme of technical cooperation contributes to the objectives and expected results of the above subprogrammes and complements their respective strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2023 ([A/77/6 \(Sect. 20\)](#)).

Response provided to member States' requests for support in 2021

Enhanced environmental performance in the Economic Commission for Europe region (result 1 of subprogramme 1 ([A/76/6 \(Sect. 20\)](#)))

- 23.148 Subprogramme 1, Environment, supports and promotes the implementation of ECE policy tools, including the ECE Environmental Performance Reviews. In 2021, the subprogramme responded to a growing number of requests for capacity-building and technical cooperation in the field of environmental governance in selected United Nations programme countries and worked towards enhancing the capacities of those countries in implementing the recommendations of the Environmental Performance Reviews, in particular improving the capacity of the Western Balkans and Eastern Europe to respond to common challenges on biodiversity, climate change, green economy and waste management. Based on the thematic policy packages developed under the United Nations Development Account project on evidence-based environmental governance and sustainable environmental policies in support of the 2030 Agenda in South-East Europe 2018–2021, the subprogramme provided advisory support in implementation of the Environmental Performance Review recommendations, identified common challenges and good practices and developed a set of recommendations applicable to target countries and subregions.
- 23.149 Support from the regular programme of technical cooperation complemented the work undertaken through the regular budget for section 20 and was implemented in synergy with the United Nations Development Account.
- 23.150 The above-mentioned work contributed to improved environmental governance and performance, which is a result reflected in the section on strategy under subprogramme 1, and specifically enhanced environmental performance in the ECE region, which is reflected in result 1 of subprogramme 1, and the related performance measure of 54 targets of the 2030 Agenda being covered by Environmental Performance Reviews, in the proposed programme budget for 2023 ([A/77/6 \(Sect. 20\)](#)) (see figure 23.XII).

Figure 23.XII
Performance measure: number of targets of the 2030 Agenda for Sustainable Development covered by Environmental Performance Reviews in a year

Expected responses to anticipated requests for support in 2023

Enhanced environmental performance in the Economic Commission for Europe region
 (result 1 of subprogramme 1 ([A/77/6 \(Sect. 20\)](#)))

Enhanced digitalization of trade in Economic Commission for Europe member States
 (result 2 of subprogramme 6 ([A/77/6 \(Sect. 20\)](#)))

Strengthened industrial safety governance in Eastern and South-Eastern Europe, the Caucasus and Central Asia
 (result 3 of subprogramme 1 ([A/77/6 \(Sect. 20\)](#)))

Strengthened regulatory support in road safety contributing to fewer worldwide road accident fatalities and injuries
 (result 2 of subprogramme 2 ([A/77/6 \(Sect. 20\)](#)))

Conducting a new population and housing census that provides cost-effective and better-quality results
 (result 1 of subprogramme 3 ([A/77/6 \(Sect. 20\)](#)))

Reduced carbon footprint and improved quality of life with high performance buildings
 (result 1 of subprogramme 5 ([A/77/6 \(Sect. 20\)](#)))

23.151 In 2023, the subprogrammes providing assistance through the regular programme of technical cooperation will continue to support government officials and policy practitioners in United Nations programme countries and provide technical cooperation to strengthen national capacities to accede to and implement ECE and international legal instruments, norms and standards, address ongoing and emerging transboundary challenges, provide integrated policy responses to changing economic realities and support countries in achieving the 2030 Agenda. ECE is planning to continue to deliver its targeted and demand-driven sectoral capacity-building, including advisory services, training and field projects, in close collaboration with resident coordinators and United Nations country teams in programme countries. Moreover, to reflect the interconnectedness of the Sustainable Development Goals, and in line with anticipated requests from member States, capacity-building activities are expected to be carried out under cross-sectoral collaboration among its eight subprogrammes in areas with multiple Goal convergence (digital and sustainable transformations for sustainable development in the ECE region; circular economy and the sustainable use of natural resources; sustainable and smart cities for all ages; sustainable mobility and connectivity; and measuring and monitoring progress towards achieving the Goals). It would also integrate South-South cooperation and peer learning components to share experience on various capacity development approaches and policy options that countries have employed to build on available good practices that could be replicated across the region.

23.152 In response to the anticipated requests in 2023, the subprogrammes would aim to address the challenges that United Nations programme countries face, focusing on the economic and

environmental impact of the COVID-19 pandemic, by delivering technical cooperation to support the ratification and implementation of international norms, standards and agreements and address emerging transboundary cross-border challenges by improving connectivity and building economic and environmental resilience through the platform provided by the United Nations Special Programme for Economies of Central Asia.

- 23.153 The subprogrammes would deliver capacity-building programmes focusing on:
- (a) Support for the implementation of the Convention on the Transboundary Effects of Industrial Accidents and other multilateral environmental agreements in the Caucasus, Central Asia and Eastern and South-Eastern Europe, as well as multilateral environmental agreements with a particular focus on enhancing cooperation among national authorities;
 - (b) Preparation of two road safety performance reviews (Moldova and Uzbekistan) to assist South-Eastern Europe, the Caucasus and Central Asia in improving national road safety systems and strengthening capacities for efficient implementation of United Nations road safety-related legal instruments;
 - (c) Long-term capacity development cooperation and policy dialogue for national stakeholders and a series of targeted capacity development training sessions on road safety policy and safe vehicle regulations (Bosnia and Herzegovina and Georgia) in support of the implementation of the decade of action for road safety 2021–2030;
 - (d) Enhancement of national capacity to conduct housing and population censuses in the countries in Eastern and South-Eastern Europe, the Caucasus and Central Asia;
 - (e) Assistance for United Nations programme countries in enhanced trade facilitation, using global standards for trade facilitation, electronic business, sustainable trade and development and the implementation of regional and national road maps for trade facilitation;
 - (f) Assistance in building back better with regard to transport and trade connectivity through the implementation of seamless multimodal exchange of information along digital corridors in the ECE region;
 - (g) Application of science, technology and innovation for sustainable development in United Nations Special Programme for Economies of Central Asia countries;
 - (h) Strengthening of capacities in Eastern Europe, the Caucasus and Central Asia in the areas of energy efficiency, renewable energy, carbon neutrality and the transition to more sustainable energy systems;
 - (i) Technical cooperation on forest landscape restoration, including support for the development of national forest strategies for Kyrgyzstan and Uzbekistan, sustainable consumption and production of forest products, sustainable forest management and urban forestry, such as in Uzbekistan;
 - (j) Sustainable housing, urban development and population.
- 23.154 The expected responses would contribute to results under all eight subprogrammes, including enhanced environmental performance in the ECE region and strengthened industrial safety governance in Eastern and South-Eastern Europe, the Caucasus and Central Asia, which are reflected in results 1 and 3 of subprogramme 1, and the related performance measures (see figure 23.XIII and table 23.32); strengthened regulatory support on road safety contributing to fewer worldwide road accident fatalities and injuries, which is reflected in result 2 of subprogramme 2, and the related performance measure (see figure 23.XIV); conducting a new population and housing census that provides cost-effective and better-quality results, which is reflected in result 1 of subprogramme 3, and the related performance measure (see figure 23.XV); a reduced carbon footprint and improved quality of life with high-performance buildings, which is reflected in result 1 of subprogramme 5, and the related performance measure (see figure 23.XVI); enhanced digitalization of trade in ECE member States, which is reflected in result 2 of subprogramme 6, and the related performance measure (see figure 23.XVII); and other results and related performance measures in the proposed programme budget for 2023 (A/77/6 (Sect. 20)).

B. Deliverables

23.155 Table 23.33 lists all expected deliverables, by category and subcategory, for the period 2021–2023.

Table 23.33

Economic Commission for Europe: expected deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	75	75	75	75

C. Proposed non-post resource requirements for 2023

Table 23.34

Financial resources by object of expenditure

(Thousands of United States dollars)

	<i>2021 expenditure</i>	<i>2022 appropriation</i>	<i>Changes</i>		<i>2023 estimate (before recosting)</i>
			<i>Total</i>	<i>Percentage</i>	
Other staff costs	1 219.2	1 486.1	71.8	5.0	1 557.9
Consultants	643.1	378.3	(71.8)	(19.0)	306.5
Travel of staff	33.2	173.7	–	–	173.7
Contractual services	36.1	–	–	–	–
General operating expenses	10.9	–	–	–	–
Grants and contributions	76.1	296.9	–	–	296.9
Total	2 018.9	2 335.0	–	–	2 335.0

- 23.156 The proposed regular budget resources for 2023 amount to \$2,335,000 and reflect no change compared with the appropriation for 2022. The proposed increase under other staff costs (\$71,800) is to provide for an additional Regional Adviser position to respond to the demands of ECE member States in the areas of housing, urban development and sustainable forest management and is offset by a corresponding decrease under consultants (\$71,800).

10. Economic and social development in Latin America and the Caribbean**A. Programmatic activities delivered through the regular programme of technical cooperation**

- 23.157 The activities under economic and social development in Latin American and the Caribbean are implemented by ECLAC. The programmatic activities are implemented under the following subprogrammes of ECLAC: subprogramme 1, International trade, integration and infrastructure; subprogramme 2, Production and innovation; subprogramme 3, Macroeconomic policies and growth; subprogramme 4, Social development and equality; subprogramme 6, Population and development; subprogramme 7, Sustainable development and human settlements; subprogramme 8, Natural resources; subprogramme 10, Statistics; subprogramme 11, Subregional activities in Central America, Cuba, the Dominican Republic, Haiti and Mexico; and subprogramme 12, Subregional activities in the Caribbean.
- 23.158 In implementing those activities, the regular programme of technical cooperation contributes to the objectives and expected results of the above subprogrammes and complements their respective strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2023 ([A/77/6 \(Sect. 21\)](#)).

Expected additional requests for support from member States for 2023

- 23.159 In response to an anticipated surge in requests for technical assistance from member States owing to the transformative reconstruction from the COVID-19 pandemic, ECLAC plans to provide additional technical cooperation, advisory services and capacity-building support to the countries of Latin America and the Caribbean in their recovery in areas related to macroeconomic policies, in particular fiscal and monetary policies to foster economic growth and address increased debt levels and the increased costs of debt service; the strengthening of social security systems and social protection policies; delays to census and population estimations and forecasts; trade logistics, connectivity and supply chains, which have recently faced disruptions due to the pandemic and the structural trends of reshoring and near-shoring; the care economy; the sustainable management of water, land and mineral resources, including alternative and sustainable energy sources; the relation between economic incentives and biodiversity; low-carbon and low-emission business opportunities; the diversification and fostering of productive national capacities; and statistical and data production and use. ECLAC is anticipating an increase in requests for technical cooperation in areas related to food security and increases in food prices, financing for development and the impact on national prices of sustained increases in international food and fuel prices.

Response provided to member States' requests for support in 2021

- 23.160 Subprogramme 12, Subregional activities in the Caribbean, contributes to strengthening the sustainable development process in the Caribbean in the economic, social and environmental dimensions and enhances the subregion's cooperation with Latin America. Small island developing States of the Caribbean face significant challenges that constrain their ability to achieve sustainable development. These include high debt levels, weak economic growth, financing constraints, declining expert capacity, high unemployment levels (in particular among women and young people), high vulnerability to natural events and environmental degradation threats. The impact of the COVID-19 pandemic further exacerbated the vulnerability of these small States. Addressing the challenges requires the formulation of evidence-based public policies anchored in accurate data.
- 23.161 In 2021, the subprogramme continued to respond to a rapidly growing number of requests for capacity-building and technical assistance in the field for the generation and analysis of statistical data and worked towards enhancing the capacity of the countries of the subregion to strengthen statistical infrastructure and to expand capacity for data collection and analysis in areas such as environmental data, the informal economy and the production of sex-disaggregated data. In this regard, the subprogramme provided technical assistance and advisory services to Trinidad and Tobago in the drafting of its national statistical office bill, which prompted a review of the statistical legislation frameworks of Caribbean countries against the United Nations fundamental principles of official statistics. As a result of the review, the subprogramme recommended that Caribbean countries review their statistical legislation with a focus on bringing them up to date with best practices.
- 23.162 The regular programme of technical cooperation support complemented the work undertaken through the regular budget for section 21, which emphasizes the specific statistical needs and critical weaknesses of Caribbean countries, with the aim of proposing specific recommendations for countries of the subregion to take concrete measures and actions.
- 23.163 The above-mentioned work contributed to modernizing national statistical legislation in the Caribbean, which is a result reflected in the section on programme performance in 2021 under subprogramme 12, and the related performance measure of the Standing Committee of Caribbean Statisticians, the decision-making body of national statistical offices of the Caribbean, adopting a revised Statistical Model Bill at its 46th meeting held in October. The Bill addresses the weaknesses that were highlighted in the ECLAC review and provides an up-to-date template for national statistical legislation in the region, in the proposed programme budget for 2023 ([A/77/6 \(Sect. 21\)](#)) (see table 23.35).

Table 23.35
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
Ministry of Planning and Development of Trinidad and Tobago drafted national statistical legislation designed to usher in a new National Statistical Institute of Trinidad and Tobago and replace the country's outdated Statistics Act	Caribbean countries improved understanding of the strengths and weaknesses of Statistics Acts and Ordinances of Caribbean countries	The Standing Committee of Caribbean Statisticians, the decision-making body of national statistical offices of the Caribbean, adopted a revised Statistical Model Bill at its 46th meeting, held in October, which provides an up-to-date template for national statistical legislation in the Caribbean

Expected responses to anticipated requests for support in 2023

Improved capacity of member States to identify key economic sectors for sustainable recovery from the COVID-19 pandemic

(result 3 of subprogramme 1 ([A/77/6 \(Sect. 21\)](#)))

- 23.164 In 2023, subprogramme 1, International trade, integration and infrastructure, will continue to support government officials and policy practitioners in countries of Latin America and the Caribbean in advancing sustainable development and strengthening the role of the region in international trade and the global economy by deepening regional integration and enhancing logistics and infrastructure. The subprogramme has enhanced the technical capacity of all regional integration schemes in the region in the use of input-output tables to diagnose the strengths and weaknesses of regional value chains within each scheme. Following the advancements made in the region in that area, the subprogramme is planning to continue to support member States in the elaboration of inclusive and innovative trade and integration policies for a robust, resilient and sustainable recovery.
- 23.165 In response to the anticipated requests in 2023, the subprogramme would: (a) implement its capacity-building activities with a focus on cooperation and knowledge-sharing among countries; (b) take advantage of the positive opportunities of technologies to facilitate the provision of technical assistance through blended modalities, both virtual and face-to-face; and (c) work more closely with statistical and sectoral institutions in order to obtain more accurate and detailed data on potential new strategic sectors, as well as sex-disaggregated data, where possible, to foster the participation of women's employment in the identified sectors.
- 23.166 The expected response in 2023 would contribute to the improved capacity of member States to identify key economic sectors for a sustainable recovery from the COVID-19 pandemic, which is reflected in result 3 of subprogramme 1, and the related performance measure of the number of Latin American and Caribbean national or regional institutions with improved capacity to identify vulnerable, resilient and potential sectors in the recovery from the pandemic, in the proposed programme budget for 2023 ([A/77/6 \(Sect. 21\)](#)) (see figure 23.XVIII).

Figure 23.XVIII

Performance measure: number of Latin American and Caribbean national or regional institutions with improved capacity to identify vulnerable, resilient and potential sectors in the recovery from the pandemic (cumulative)

Innovative approaches to conducting censuses
(result 3 of subprogramme 6 (A/77/6 (Sect. 21)))

- 23.167 In 2023, subprogramme 6, Population and development, expects to continue to support government officials, policy practitioners and national technical officers in countries of Latin America and the Caribbean in fully integrating population issues into development planning, policies and programmes. The COVID-19 pandemic affected many countries of the region that had planned to conduct censuses between 2020 and 2023, creating the need for innovative technologies. The subprogramme identifies challenges faced in the implementation of some innovations, such as the use of computer-assisted personal interviewing data collection methods, online self-registration and mobile data capture for cartographic update field work. In this regard, the subprogramme is expecting to continue to provide technical support and capacity-building activities in those areas that are critical in the census process, such as defining key elements to be considered at the moment of applying technological innovations and their impact on future census phases, defining questionnaires based on lessons learned and international standards and recommendations, and due consideration for new demographic and social dynamics.
- 23.168 In response to the anticipated requests in 2023, the subprogramme would: (a) tailor its technical assistance towards strengthening national capacity related to censuses; (b) facilitate the exchange of experiences and lessons learned among countries through capacity-building training and workshops; and (c) promote innovation in the various phases of the census and the operational control systems, improving technology and methodologies through the provision of technical assistance and advisory services.
- 23.169 The expected response in 2023 would contribute to innovative approaches to conducting censuses, which is reflected in result 3 of subprogramme 6, and the related performance measure of countries that carried out their censuses in 2022 incorporating innovations in the dissemination of the results, in the proposed programme budget for 2023 (A/77/6 (Sect. 21)) (see table 23.36).

Table 23.36
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Brazil, Costa Rica and Mexico incorporate innovations into the preparation of their 2020 censuses	Mexico carries out its census. Argentina, Brazil, Costa Rica, Chile, Ecuador, Panama and Venezuela (Bolivarian Republic of) postpone their census survey dates and begin to evaluate the adoption of innovations	Bolivia (Plurinational State of), Cuba, the Dominican Republic, Honduras and Paraguay evaluate the incorporation of innovations	Countries that carry out their census in 2022 incorporate innovations	Countries that carried out their censuses in 2022 incorporate innovations in the dissemination of the results Countries that carry out their census in 2023 incorporate innovations

Increased capacities to produce disaggregated Sustainable Development Goal indicators to leave no one behind

(result 3 of subprogramme 10 ([A/77/6 \(Sect. 21\)](#)))

- 23.170 In 2023, subprogramme 10, Statistics, will continue to support national and regional statistical institutions in Latin America and the Caribbean to improve the production, dissemination and use of statistics for evidence-based decision-making in the region. The implementation of the 2030 Agenda and the Sustainable Development Goals requires leaving no one behind and overcoming the inequalities that characterize the region. Traditional data sources used by countries to produce social indicators for the Goals face limitations in disaggregating the information for relevant population groups. The subprogramme is planning to continue to develop learning materials and knowledge products on small area estimation methodologies to support the production of disaggregated poverty indicators for the Goals, combining household surveys with other data sources.
- 23.171 In response to the anticipated requests in 2023, the subprogramme would: (a) expand its technical assistance and capacity-building activities to include more social indicators of the Sustainable Development Goals; and (b) include other beneficiaries in its capacity-building activities, such as ministries, in addition to national statistical offices, overseeing social issues.
- 23.172 The expected response in 2023 would contribute to increased capacity to produce disaggregated indicators for the Sustainable Development Goals to leave no one behind, which is reflected in result 3 of subprogramme 10, and the related performance measure of the number of national trained practitioners with improved capacity to apply small area estimation techniques to produce disaggregated statistics, in the proposed programme budget for 2023 ([A/77/6 \(Sect. 21\)](#)) (see figure 23.XIX).

Figure 23.XIX

Performance measure: number of national trained practitioners with improved capacity to apply small area estimation techniques to produce disaggregated statistics (cumulative)

B. Deliverables

23.173 Table 23.37 lists all expected deliverables, by category and subcategory, for the period 2021–2023.

Table 23.37

Economic Commission for Latin America and the Caribbean: expected deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	70	60	65	60

C. Proposed non-post resource requirements for 2023

Table 23.38

Financial resources by object of expenditure

(Thousands of United States dollars)

	2021 expenditure	2022 appropriation	Changes		2023 estimate (before recosting)
			Total	Percentage	
Other staff costs	2 510.7	2 371.4	–	–	2 731.4
Consultants	1 210.7	467.4	150.0	32.1	617.4
Travel of staff	1.6	326.0	–	–	326.0
Contractual services	0.6	–	–	–	–
Grants and contributions	0.4	544.5	450.0	82.6	994.5
Total	3 724.0	4 069.3	600.0	14.7	4 669.3

23.174 The proposed regular budget resources for 2023 amount to \$4,669,300 and reflect a resource increase of \$600,000 compared with the appropriation for 2022. The proposed increase is attributable to increases in consultants (\$150,000) to support the provision of specialized technical assistance to Latin America and the Caribbean, and grants and contributions (\$450,000) to support the

participation of national officers in face-to-face capacity-building activities and training workshops, in areas detailed in paragraph 23.159 above.

11. Economic and social development in Western Asia

A. Programmatic activities delivered through the regular programme of technical cooperation

- 23.175 The activities under economic and social development in Western Asia are implemented by ESCWA, which is mandated to promote inclusive and sustainable socioeconomic development in the Arab region. The programmatic activities are implemented under the following subprogrammes of ESCWA: subprogramme 1, Climate change and natural resource sustainability; subprogramme 2, Gender justice, population and inclusive development; subprogramme 3, Shared economic prosperity; subprogramme 4, Statistics, the information society and technology; subprogramme 5, 2030 Agenda and Sustainable Development Goal coordination; and subprogramme 6, Governance and conflict prevention.
- 23.176 In implementing these activities, the regular programme of technical cooperation contributes to the objectives and expected results of the above subprogrammes and complements their respective strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2023 ([A/77/6 \(Sect. 22\)](#)).

Expected additional requests for support from member States for 2023

- 23.177 In response to an anticipated increase in the volume of requests for assistance from member States in 2023, ESCWA would provide additional capacity-building activities and advisory services, with a particular focus on the newest member States, such as Algeria and Somalia. Implementing the requests from those States would require new consultancies, as national experts would need to be identified and their capacity built. Moreover, with the resumption of travel following the lifting of COVID-19-related restrictions, requests for study tours have resumed, and ESCWA anticipates that more such requests will be received in 2023.

Response provided to member States' requests for support in 2021

Recovery and post-pandemic development planning integrated the 2030 Agenda and the Sustainable Development Goals (result 2 of subprogramme 5 ([A/77/6 \(Sect. 22\)](#)))

- 23.178 The COVID-19 pandemic revealed and, in some cases, exacerbated institutional fragilities in Arab countries, some of which were ill-equipped to plan and implement effective response and recovery plans. This was the case of Arab countries affected by conflict and crises, such as Iraq, Jordan, Lebanon, Libya, the State of Palestine and the Syrian Arab Republic, and Arab least developed countries that are members of ESCWA, namely Mauritania, Somalia, the Sudan and Yemen, the last three of which are also undergoing conflict or are affected by it. In response to their requests for assistance, and as an example of ESCWA interventions, its subprogramme 6, Governance and conflict prevention, developed a methodology for planning in contexts of fragility and introduced it to representatives from Iraq, Lebanon, Libya, the State of Palestine, the Sudan, the Syrian Arab Republic and Yemen through subregional and national capacity-building workshops during which policymakers discussed and applied the methodology. Another planning tool for assessing gaps in institutional capacity to strengthen public service delivery, which had been implemented in Yemen in 2020, was rolled out in Iraq through several national workshops to help civil servants from areas recovering from conflict to assess their capacity-building needs, and in the State of Palestine in 2021.
- 23.179 These capacity-building and advisory efforts for better planning complemented efforts geared towards the integration of the Sustainable Development Goals into national plans, which included: (a) a regional workshop on Goal costing and national financing frameworks held in December 2021,

and other work carried out in the framework of a United Nations Development Account project on integrated national financing frameworks; (b) four national webinars held under the regular programme of technical cooperation in cooperation with the Department of Economic and Social Affairs on integrated recovery policies for the Goals in Egypt, Iraq, Lebanon and the Sudan; and (c) a training course entitled “Changing mindsets and strengthening governance capacities for policy coherence for holistic implementation of the 2030 Agenda in the Arab region”, which was also facilitated in cooperation with the Department under the regular programme of technical cooperation in non-conflict countries, including Bahrain, Morocco and Oman.

- 23.180 The above mentioned work contributed to recovery and post-pandemic development planning integrating the 2030 Agenda and the Sustainable Development Goals, which is reflected in result 2 of subprogramme 5, and the related performance measure of one member State (Egypt) integrating the 2030 Agenda to accelerate progress on the Goals into its COVID-19 recovery plan, in the proposed programme budget for 2023 (A/77/6 (Sect. 22)) (see table 23.39).

Table 23.39
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	1 member State (Egypt) integrated the 2030 Agenda to accelerate progress on the Sustainable Development Goals into its COVID-19 recovery plan	2 COVID-19 recovery plans in the Arab region integrate the 2030 Agenda to accelerate progress on the Goals	Two additional national development plans aligned with the 2030 Agenda

Expected responses to anticipated requests for support in 2023

Increased effectiveness and efficiency of social protection systems in the Arab region
(result 3 of subprogramme 2 (A/77/6 (Sect. 22)))

Social expenditure priorities in coherence with macro fiscal policy
(result 1 of subprogramme 3 (A/77/6 (Sect. 22)))

- 23.181 The COVID-19 pandemic has challenged member States in their capacity to plan for recovery, as well as to leverage existing social protection systems to provide effective and timely responses to the socioeconomic impact of the pandemic and expand coverage to persons in vulnerable situations. These include women who were pushed out of work to care for their families and informal workers not covered by any social protection scheme. Since the onset of the pandemic, ESCWA has received requests for assistance from Egypt, Jordan, Saudi Arabia, Somalia and the Sudan on means for improving existing social protection mechanisms and expanding coverage to informal sector workers. In 2023, subprogramme 2 would respond through continued policy advice to member States and build their capacity to assess the effectiveness and efficiency of national registry systems to integrate those who are vulnerable into social protection systems. The subprogramme would use the rapid assessment framework for social protection programmes and other outputs of the ongoing United Nations Development Account project on strengthening social protection for the pandemic response to provide policymakers with contextualized evidence, best practices and hands-on advice on how to identify and implement enhancements to existing systems while ensuring their inclusiveness.
- 23.182 Moreover, based on requests from Jordan and Tunisia, ESCWA subprogramme 3 developed a tool to monitor public social expenditure and provide Governments with the information needed to balance public spending priorities in coherence with macro fiscal policy, with the aim of assisting in the reform of social protection systems and support in creating the fiscal space needed for addressing

poverty and inequalities, improving youth skills and promoting economic diversification, productivity and growth. In 2023, ESCWA would expand the deployment of this tool, the social expenditure monitor, in these and other countries such as Egypt, which has recently requested to join the project.

- 23.183 These efforts would contribute to the increased effectiveness and efficiency of social protection systems in the Arab region, which is reflected in result 3 of subprogramme 2, and the related performance measure of one member State (Jordan) analysing the inclusiveness of its social protection systems and social expenditure priorities in coherence with macro fiscal policy, which is reflected in result 1 of subprogramme 3, and the related performance measure of two member States (Jordan and Tunisia) completing the analysis of their public expenditure data, establishing a social expenditure monitor and improving their capacity to use the tool, in the proposed programme budget (A/77/6 (Sect. 22)) (see tables 23.40 and 23.41).

Table 23.40
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Rapid expansion of non-contributory social protection programmes with a determined shift from general subsidies to poverty-targeted cash transfers in the Arab region and extended coverage for a larger section of the population through contributory social protection (social insurance) in 10 member States (Egypt, Iraq, Jordan, Lebanon, Mauritania, Morocco, Oman, State of Palestine, Syrian Arab Republic and Tunisia)	During the COVID-19 pandemic, at least 8 member States (Egypt, Jordan, Mauritania, Morocco, Oman, State of Palestine, Sudan and Tunisia) rapidly channelled additional assistance to households covered by social insurance and social assistance and set up temporary emergency programmes directed at informal workers who were covered neither by social assistance nor social insurance	179 people (66 men and 113 women) from 17 member States trained on tools to increase inclusiveness of social protection systems 1 member State (Jordan) analysed the inclusiveness of its social protection systems	Civil servants and social assistance professionals from 3 member States trained on the social protection programme rapid assessment framework tool to increase inclusiveness of social protection systems 2 member States identify enhancements required to improve the efficiency and effectiveness of their social protection systems	2 additional member States identify enhancements required to improve the efficiency and effectiveness of their social protection systems

Table 23.41
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Member States provided with a common social expenditure monitoring framework	2 member States (Jordan and Tunisia) began applying social expenditure monitoring methodology to monitor budget expenditure on social priorities	2 member States (Jordan and Tunisia) completed the analysis of their public expenditure data, established a social expenditure monitor and improved their capacity to use the tool	More than 2 member States revise budget allocations, using social expenditure monitoring, with the aim of rebalancing social expenditures across priorities	1 additional member State revises budget allocations, using social expenditure monitoring, with the aim of rebalancing social expenditures across priorities

Employment perspectives for people in vulnerable situations in the Arab region
(result 1 of subprogramme 2 ([A/77/6 \(Sect. 22\)](#)))

Advancement of digital development assessments and strategies at the national and regional level in the Arab region
(result 3 of subprogramme 4 ([A/77/6 \(Sect. 22\)](#)))

- 23.184 In 2023, to complement the above-mentioned work on social protection and social expenditure, ESCWA expects to continue to receive an increasing number of requests for support for member States through policy advice and capacity-building on improving employment perspectives, as despite all efforts the region continues to register unemployment rates that are among the world's highest, in particular for persons in vulnerable situations such as women and young people. ESCWA would provide such support notably by advancing technology uptake and digital development. Indeed, in response to member State requests from Egypt, Jordan, Lebanon, Morocco, Qatar and Saudi Arabia relating to support measures for women and young entrepreneurs and to creating an enabling environment for them to thrive, ESCWA subprogrammes 2 and 3 and its technology centre would expand the development of the digital enabling platform, which includes interfaces such as "International business opportunities for small and medium-sized enterprises", the "Arab women's empowerment in technology and entrepreneurship" space, toolboxes for small and medium-sized enterprises in the Arab region and the ESCWA skills monitor, which helps Governments to assess gaps between the skills required by labour markets and those available in the labour force through formal and vocational education. With these tools addressed to both Governments and the private sector, ESCWA seeks to support the creation of decent job opportunities for all in its member States.
- 23.185 A key pillar of creating job opportunities in the era of the fourth industrial revolution is digital transformation and development. ESCWA, through its subprogramme 4, plans to support Governments in advancing this. In response to requests from member States, including Algeria, Iraq, Libya, Mauritania, Somalia, the State of Palestine and the Syrian Arab Republic, ESCWA has been undertaking assessments of national digital ecosystems and providing advice to enhance them through the formulation of development strategies. This work would continue throughout 2023 and would be complemented with support in the formulation of sectoral technology strategies, such as the artificial intelligence strategy for Algeria and the State of Palestine; the cybersecurity strategy for Algeria, Iraq and the Sudan; the Internet of Things strategy for Algeria and Iraq; and the cloud computing strategy for Algeria and the Syrian Arab Republic.
- 23.186 These efforts would contribute to employment perspectives for people in vulnerable situations in the Arab region, which is reflected in result 1 of subprogramme 2, and the related performance measure of an increase in the number of small and medium-sized enterprises operated or founded by women and youth in 2 member States, and the advancement of digital development assessments and

strategies at the national and regional levels in the Arab region, which is reflected in result 3 of subprogramme 4, and the related performance measure of 12 member States undertaking biannual national digital development reviews and 4 designing development strategies, in the proposed programme budget for 2023 (A/77/6 (Sect. 22)) (see table 23.42 and figure 23.XX).

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/76/7](#) and [A/76/7/Corr.1](#)

The Advisory Committee notes from the provided information that a number of high-level positions are concentrated at the duty stations of various entities, rather than in the field, and trusts that a further review will be conducted for more field orientation of the resources (para. V.87).

The Advisory Committee notes the need for high-level consultant expertise, the transfer of knowledge from global and regional entities, and the use by the programme of national consultants to address country-specific issues, and recommends that the General Assembly request the Secretary-General to provide more information, including detailed financial resources, on the use of consultants, both national and international, for each entity, in the context of his next budget submissions (para. V.90).

The Advisory Committee trusts that more efforts will be made to ensure the complementarity between the two mechanisms, including through the development of integrated work plans, as well as synergies with the resident coordinator system, in order to maximize the combined impact of the activities implemented, and that an update will be provided in the context of the next budget submission (para. V.96).

The Advisory Committee considers that the outreach activities of the programme may not respond effectively to actual realities of Member States, in particular the most vulnerable ones. The Committee recommends that the General Assembly request the Secretary-General to develop a consolidated outreach plan, in close coordination with the relevant entities, as well as the Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States, the Office of the Special Adviser on Africa and the resident coordinator system, among others, to provide Member States with comprehensive information on the guidelines of the regular programme of technical cooperation, including on the activities, the programme's performance and best practices, the resources available, and the selection criteria and process, to facilitate the formulation of demands by the

Information on the status of the high-level positions has been included in the supplementary information for the proposed programme budget for 2023 ([A/77/6 \(Sect. 23\)](#)).

Information on the engagement of consultants by each entity has been included in the supplementary information for the proposed programme budget for 2023 ([A/77/6 \(Sect. 23\)](#)).

Information on coordination between the implementing entities and the resident coordinator system has been included in the supplementary information for the proposed programme budget for 2023 ([A/77/6 \(Sect. 23\)](#)).

The implementing entities raise awareness and advocate their support services through various means, including through reporting to their respective governing bodies and providing comprehensive information on their websites. The Department of Economic and Social Affairs intends to include consolidated information on the outreach of the programme in the seventh progress report.

Member States. The Committee also trusts that the consolidated information on the outreach plan and its activities will be included in future budget submissions, as a matter of routine (para. V.100).

The Advisory Committee trusts that updated information on the internal assessment, in cooperation with the relevant entities, will be presented in the context of the next budget submission (para. V.103).

The Advisory Committee notes that, in the context of the coronavirus disease (COVID-19) pandemic, reduced costs for travel have allowed the entities to achieve more, as they can direct savings towards enhancing advisory capacity and virtual training, and trusts that updated information on the assessment of potential cost savings related to training resources, including through virtual settings, along with the efforts to address the related challenges, will be provided in the context of the next budget submission (para. V.105).

Information related to the current internal assessment has been included in the overview section of the proposed programme budget for 2023 ([A/77/6 \(Sect. 23\)](#)).

Information on the use of cost savings arising in 2021 as a result of COVID-19-related travel restrictions has been included in the supplementary information for the proposed programme budget for 2023 ([A/77/6 \(Sect. 23\)](#)).

**Office of Internal Oversight Services
audit of the management of trust funds at the
Economic Commission for Europe**

Report No. 2018/084

The Office of Internal Oversight Services recommended that the Economic Commission for Europe (ECE):
(a) develop a catalogue of technical cooperation services based on available technical expertise; and
(b) institute a project intake process to ensure that projects fall within the available expertise to further enhance the effectiveness of its technical cooperation activities (para. 6).

Status: Implemented, pending review by the Office of Internal Oversight Services

The ECE Technical Cooperation Strategy was revised and adopted by the Executive Committee on 17 May 2021.

In February 2022, the Executive Secretary approved a revised directive No. 22 clarifying the management of resources funded from section 23, Regular programme of technical cooperation, of the programme budget. The directive is applicable as from 1 March 2022.

ECE directive No. 18 clarifies the management of extrabudgetary funds. The directive, along with the ECE Technical Cooperation Strategy and directive will frame technical cooperation activities and project intake processes for future years. They are also complemented by the resource mobilization strategy adopted in 2020 and the resource mobilization plans for the period 2020–2022, presented to the Executive Committee in January 2021.

I. Office of the United Nations High Commissioner for Human rights

Foreword

The General Assembly created the post of United Nations High Commissioner for Human Rights to lead the efforts of the United Nations to promote and protect human rights for all. Today's global challenges bring new immediacy to the full realization of this mandate.

In 2023, the Office of the United Nations High Commissioner for Human Rights will remain committed to delivering its programme, in cooperation with Member States, partners of the United Nations and other actors. This commitment will be fulfilled by mainstreaming human rights across the United Nations system, advancing the right to development, supporting the human rights treaty bodies, providing advisory services, technical cooperation and field activities, and supporting the Human Rights Council, its subsidiary bodies and mechanisms. The combined effects of our efforts will amount not only to more effective promotion and protection of human rights, but also to advances in human dignity, justice, social progress and better standards of life, as promised in the Charter of the United Nations.

Much of this work will be targeted to provide solutions to today's most pressing challenges, including armed conflicts, which continue to have negative impacts on the enjoyment of human rights, and the global coronavirus disease (COVID-19) pandemic, which continues to expose the negative impacts of persistent and widespread inequalities and to imperil the determination of Member States and the United Nations to achieve the 2030 Agenda for Sustainable Development. My Office will reinforce its commitment to accelerating the realization of economic, social and cultural rights, especially by working with partners to fulfil the Sustainable Development Goals. In doing so, we will contribute strongly to ensuring that no one is left behind and that human rights are given increased attention in the face of climate change.

Ending racial discrimination will constitute another principal objective for our work in 2023. Beyond supporting the gamut of legislative mandates established towards this end, especially the International Decade for People of African Descent, my Office will lead global action to achieve transformative change for racial justice and equality. We will be guided by resolutions of intergovernmental bodies and the need to support Member States to implement the recommendations of the human rights mechanisms. As with all of our work, we will continue to place the highest priority on the protection of victims.

My Office will remain unequivocal in its determination to provide the leadership, expertise and commitment required to deliver on the full promise of human rights.

(Signed) Michelle **Bachelet**
United Nations High Commissioner for Human Rights

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 24.1 The United Nations human rights programme is responsible for the promotion, protection, enjoyment and full realization, by all people, of all human rights. The mandate derives from the priorities established in the Charter of the United Nations; the Universal Declaration of Human Rights and international human rights treaties; the Vienna Declaration and Programme of Action, including its principles and recommendations, adopted by the World Conference on Human Rights and subsequently endorsed by the General Assembly in its resolution [48/121](#); Assembly resolution [48/141](#) establishing the post of the United Nations High Commissioner for Human Rights; the outcomes of relevant United Nations conferences and summits, including, in particular, Assembly resolution [70/1](#), entitled “Transforming our world: the 2030 Agenda for Sustainable Development”; and other relevant General Assembly resolutions and decisions. In addition to international human rights law, the programme will also be guided by international humanitarian law, as applicable.
- 24.2 The programme, in all its subprogrammes, is guided by the principles of universality, objectivity, impartiality, indivisibility and non-selectivity in removing obstacles to the full realization of all human rights and in preventing the continuation of human rights violations, including with relevant parties. The programme has a role in supporting the implementation by Member States of the 2030 Agenda, making development equitable, sustainable and responsive to the needs of people, and in relation to conflict prevention and resolution.
- 24.3 The programme falls under the leadership of the High Commissioner, who is entrusted with the principal responsibility for the human rights activities of the Organization, under the direction and authority of the Secretary-General and within the framework of the overall competence, authority and decisions of the General Assembly and the Human Rights Council. The Office of the United Nations High Commissioner for Human Rights (OHCHR) acts as the central supportive structure for the programme.

Strategy and external factors for 2023

- 24.4 In a global context affected by the consequences of the coronavirus disease (COVID-19) pandemic and other threats to the enjoyment of human rights by all, the programme will continue to carry out an extensive work programme in support of the human rights mechanisms and to assist States in all regions in their efforts to comply with and implement their human rights obligations. Increased support for and collaboration in matters regarding human rights will continue to be provided to requesting Member States through mutually agreed bilateral frameworks. Emphasis will be placed on the importance of human rights in international and national agendas; combating poverty and countering discrimination on all grounds, including race, sex, language or religion; advancing the rights of children and women; raising awareness of human rights at all levels of education; responding to the needs of the vulnerable for protection; and addressing situations of international concern, in particular gross and systematic violations of human rights, as identified by the Human Rights Council and other relevant United Nations organs.
- 24.5 The programme will continue to engage with Member States and all relevant actors to assist them in their efforts to realize human rights, through the provision of technical assistance, support to mechanisms and, where possible, the establishment of country presences. In particular, the programme will continue to support and advise the United Nations human rights machinery (subprogrammes 2 and 4), integrate all human rights into areas of work of the United Nations system (subprogramme 1 (a)), contribute to the effective realization of the right to development (subprogramme 1 (b)), increase knowledge, awareness and understanding of human rights

- (subprogramme 1 (c)) and enhance capacities, including through assistance to requesting States (subprogramme 3).
- 24.6 With the 2030 Agenda, Member States have adopted a detailed plan to end poverty and achieve a more equitable international order. The Sustainable Development Goals are an opportunity for the programme to engage further, within its mandate, since “leaving no one behind” is at the heart of the programme’s work to combat discrimination and inequality, which are root causes of exclusion. The programme will support countries in the implementation of the Goals through multi-stakeholder partnerships, as fostered through the 2030 Agenda.
- 24.7 Strengthened and consolidated organizational support will be provided to the Human Rights Council and its subsidiary bodies and mechanisms, including the universal periodic review, the special procedures, the Human Rights Council Advisory Committee and the complaint procedure, as well as other relevant United Nations organs. The United Nations treaty bodies will continue to be provided with services, support and advice.
- 24.8 For 2023, the programme’s planned deliverables will support Member States in their ongoing management of and recovery from the COVID-19 pandemic. Such planned deliverables and activities include advice, technical cooperation and capacity-building to address the pandemic and recovery efforts. Specific examples of such planned deliverables and activities are provided under all subprogrammes.
- 24.9 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. Examples of lessons learned and best practices include, for all subprogrammes, shifting to virtual meetings, briefings, consultations and training events, or, when possible, hybrid formats involving both virtual and in-person meetings, as a common mitigating measure across all subprogrammes. These alternative and remote approaches have at times increased the reach of participants, and over time their limitations have become clearer. At the same time, it is assumed that those operational conditions will have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.
- 24.10 With regard to cooperation with other entities at the global, regional and national levels, OHCHR will continue to engage with a wide range of stakeholders as well as with civil society, including non-governmental organizations (NGOs). It will also continue to provide assistance to victims of human rights violations by managing the work of the humanitarian funds that provide financial assistance for support services, such as rehabilitation and redress for victims of torture and slavery.
- 24.11 With regard to inter-agency coordination and liaison, OHCHR will continue to engage both through the participation of its senior staff in inter-agency meetings and task forces and on the ground through cooperation with United Nations country teams. OHCHR will continue to cooperate with missions with a human rights component supported by the Department of Political and Peacebuilding Affairs and the Department of Peace Operations of the Secretariat, as well as with the Peacebuilding Support Office. It will also engage with the Office for the Coordination of Humanitarian Affairs and the Office of the United Nations High Commissioner for Refugees in crisis situations. To provide advice for the COVID-19 recovery processes drawing on United Nations inter-agency collaboration at the global and national levels, the programme will also continue its collaboration with the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women), the United Nations Environment Programme (UNEP), the World Bank and the World Health Organization (WHO).
- 24.12 With regard to the external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) There is political will on the part of States to work with the programme;
 - (b) Extrabudgetary resources will continue to be provided for the programme.

- 24.13 The programme integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, in subprogramme 1, deliverables include publications that incorporate a gender perspective and/or have a specific focus on issues related to gender equality and women's empowerment. Subprogramme 2 will deliver capacity-building activities in support of the Convention on the Elimination of All Forms of Discrimination against Women. Subprogramme 3 will provide substantive advice on issues related to gender equality and women's empowerment, and to human rights challenges in humanitarian operations. Under subprogramme 4, a gender perspective is reflected through the servicing of the Working Group on discrimination against women and girls.
- 24.14 In line with the United Nations Disability Inclusion Strategy, OHCHR will integrate disability inclusion in its operational activities, deliverables and results, as appropriate. For example, subprogramme 1 will provide expert advice on the development of standards on strengthening national human rights promotion and protection capacities as they relate to persons with disabilities. Subprogramme 2 will promote the Convention on the Rights of Persons with Disabilities as part of the international human rights system through briefings, capacity-building and legal analysis. Subprogramme 4 will continue to increase the accessibility of the Human Rights Council to persons with disabilities.

Programme performance in 2021

Impact of the pandemic

- 24.15 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular on activities related to parliamentary documentation and the substantive servicing of meetings. At the beginning of 2021, sessions of treaty bodies were held remotely. Committees resumed in-person sessions from September 2021, maintaining some sessions in hybrid mode, allowing for the remote participation of States parties and other stakeholders. The number of country reviews fell well short of the number prior to the pandemic. As a result, the backlog of State party reports continued to grow, with 443 reports pending consideration. The Office was able to conduct Human Rights Council sessions in a hybrid format. Far fewer consultations and events that are normally held in parallel with sessions of the Human Rights Council could take place virtually compared to in pre-pandemic years. The continued suspension of international travel affected planned missions and country visits by special rapporteurs, treaty bodies and fact-finding missions of commissions of inquiry. Finally, virtual activities of all subprogrammes with many partners, such as national human rights institutions, were affected owing to partners' lack of appropriate technologies, sufficient Internet bandwidth or uninterrupted electricity.
- 24.16 In addition, in order to support Member States on issues related to the COVID-19 pandemic, within the overall scope of the objectives, all subprogrammes provided policy advice, guidance and the collection and dissemination of data and information related to the COVID-19 pandemic and human rights. In particular, the programme made important contributions to promote human rights standards in States' responses towards an effective and inclusive recovery from the pandemic, including through thematic guidance notes, advocacy, technical cooperation and experience-sharing, in close cooperation with government entities, national human rights institutions, civil society organizations and United Nations actors, to strengthen the capacities of local partners.

Legislative mandates

- 24.17 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

47/135	Declaration on the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities	71/167; 75/158 71/189	Trafficking in women and girls Declaration on the Right to Peace
48/121	World Conference on Human Rights	72/140; 74/123; 76/130	Persons with albinism
48/141	High Commissioner for the promotion and protection of all human rights	72/149; 74/127; 76/141	Violence against women migrant workers
55/2	United Nations Millennium Declaration	72/170; 74/159; 76/162	Human rights and cultural diversity
56/266	Comprehensive implementation of and follow-up to the World Conference against Racism, Racial Discrimination, Xenophobia and Related Intolerance	72/171; 76/164	Strengthening United Nations action in the field of human rights through the promotion of international cooperation and the importance of non-selectivity, impartiality and objectivity
57/300; 58/269	Strengthening of the United Nations: an agenda for further change		
60/1	2005 World Summit Outcome	72/178; 74/141; 76/153	The human rights to safe drinking water and sanitation
61/159	Composition of the staff of the Office of the United Nations High Commissioner for Human Rights	72/182; 74/160; 76/167	Protection of and assistance to internally displaced persons
61/166	Promotion of equitable and mutually respectful dialogue on human rights	72/245; 73/155; 74/133; 76/147	Rights of the child
62/134	Eliminating rape and other forms of sexual violence in all their manifestations, including in conflict and related situations	73/156; 75/168; 76/148	Rights of indigenous peoples
65/1	Keeping the promise: united to achieve the Millennium Development Goals	73/157; 75/169; 76/149	Combating glorification of Nazism, neo-Nazism and other practices that contribute to fueling contemporary forms of racism, racial discrimination, xenophobia and related intolerance
65/312	Outcome document of the High-level Meeting of the General Assembly on Youth: Dialogue and Mutual Understanding	73/159; 75/171; 76/151	Use of mercenaries as a means of violating human rights and impeding the exercise of the right of peoples to self-determination
66/3	United against racism, racial discrimination, xenophobia and related intolerance		
66/288	The future we want	73/168; 75/180; 76/159	Enhancement of international cooperation in the field of human rights
67/1	Declaration of the high-level meeting of the General Assembly on the rule of law at the national and international levels	73/169; 75/178; 76/165	Promotion of a democratic and equitable international order
67/144	Intensification of efforts to eliminate all forms of violence against women	74/132	Report of the Human Rights Council
68/134	Follow-up to the Second World Assembly on Ageing	74/143	Torture and other cruel, inhuman or degrading treatment or punishment
68/165	Right to the truth	74/144	Implementation of the Convention on the Rights of Persons with Disabilities and the Optional Protocol thereto: accessibility
68/181	Promotion of the Declaration on the Right and Responsibility of Individuals, Groups and Organs of Society to Promote and Protect Universally Recognized Human Rights and Fundamental Freedoms: protecting women human rights defenders	74/147; 76/169 74/148; 76/172	Terrorism and human rights Protection of migrants
70/1	Transforming our world: the 2030 Agenda for Sustainable Development	74/149; 75/179; 76/166	The right to food
70/133; 76/142	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly	75/161 75/175 75/176	Intensification of efforts to prevent and eliminate all forms of violence against women and girls Human rights and extreme poverty
70/262	Review of the United Nations peacebuilding architecture	75/181; 76/161 75/182; 76/163	The right to privacy in the digital age Human rights and unilateral coercive measures The right to development

Part VI Human rights and humanitarian affairs

75/188; 76/156 75/189 75/237; 76/226	Freedom of religion or belief Extrajudicial, summary or arbitrary executions A global call for concrete action for the elimination of racism, racial discrimination, xenophobia and related intolerance and the comprehensive implementation of and follow-up to the Durban Declaration and Programme of Action	76/154 76/158	Implementation of the Convention on the Rights of Persons with Disabilities and the Optional Protocol thereto: participation International Convention for the Protection of All Persons from Enforced Disappearance

5/2	Code of Conduct for Special Procedures Mandate-holders of the Human Rights Council	33/12; 42/20	Human rights and indigenous peoples: mandate of the Special Rapporteur on the rights of indigenous peoples
6/17	Establishment of funds for the universal periodic review mechanism of the Human Rights Council	33/30; 42/22 34/2; 49/16	Arbitrary detention
Decision 6/102	Follow-up to Human Rights Council resolution 5/1		Promotion of the enjoyment of the cultural rights of everyone and respect for cultural diversity
11/11	System of special procedures	34/3; 43/10	Mandate of the Independent Expert on the effects of foreign debt and other related international financial obligations of States on the full enjoyment of all human rights, particularly economic, social and cultural rights
16/21	Review of the work and functioning of the Human Rights Council		
Decision 17/119	Follow-up to Human Rights Council resolution 16/21 with regard to the universal periodic review	34/40	Promoting the Voluntary Technical Assistance Trust Fund to Support the Participation of Least Developed Countries and Small Island Developing States in the Work of the Human Rights Council
19/26	Terms of reference for the Voluntary Technical Assistance Trust Fund to Support the Participation of Least Developed Countries and Small Island Developing States in the Work of the Human Rights Council	35/12	Independence and impartiality of the judiciary, jurors and assessors, and the independence of lawyers
Decision 19/119	Task force on secretariat services, accessibility for persons with disabilities and use of information technology	35/18	Elimination of discrimination against women and girls
22/16	Promotion and protection of human rights in post-disaster and post-conflict situations	35/23	The right of everyone to the enjoyment of the highest attainable standard of physical and mental health in the implementation of the 2030 Agenda for Sustainable Development
Decision 22/115	Human Rights Council webcast		
31/31	Torture and other cruel, inhuman or degrading treatment or punishment: safeguards to prevent torture during police custody and pre-trial detention	35/24	Human rights in cities and other human settlements
31/32	Protecting human rights defenders, whether individuals, groups or organs of society, addressing economic, social and cultural rights	35/29	Contribution of parliaments to the work of the Human Rights Council and its universal periodic review
32/2	Protection against violence and discrimination based on sexual orientation and gender identity	35/34	Protection of human rights and fundamental freedoms while countering terrorism
32/4	Elimination of discrimination against women	Decision 35/101	Panel discussion on the human rights of internally displaced persons in commemoration of the twentieth anniversary of the Guiding Principles on Internal Displacement
32/8; 49/13	Mandate of the Special Rapporteur on the right to food	36/7	Special Rapporteur on the promotion of truth, justice, reparation and guarantees of non-recurrence
32/11; 41/15	Mandate of the Special Rapporteur on the human rights of internally displaced persons	36/29	Promoting international cooperation to support national human rights follow-up systems, processes and related mechanisms, and their contribution to the implementation of the 2030 Agenda for Sustainable Development
32/19	Accelerating efforts to eliminate violence against women: preventing and responding to violence against women and girls, including indigenous women and girls		
32/32; 41/12	The rights to freedom of peaceful assembly and of association	37/21; 45/5	Human rights and unilateral coercive measures
33/1; 42/10	Special Rapporteur on contemporary forms of slavery, including its causes and consequences	38/1; 41/6	Elimination of all forms of discrimination against women and girls

Part VI Human rights and humanitarian affairs

38/9; 41/16	The right to education: follow-up to Human Rights Council resolution 8/4	43/36	Mandate of the Special Rapporteur on contemporary forms of racism, racial discrimination, xenophobia and related intolerance
38/13	Business and human rights: improving accountability and access to remedy		
39/4; 42/8	Promotion of a democratic and equitable international order	44/4	Trafficking in persons, especially women and children: strengthening human rights through enhanced protection, support and empowerment of victims of trafficking, especially women and children
40/16; 49/10	Mandate of the Special Rapporteur on the promotion and protection of human rights and fundamental freedoms while countering terrorism	44/5	Mandate of the Special Rapporteur on extrajudicial, summary or arbitrary executions
41/17	Accelerating efforts to eliminate all forms of violence against women and girls: preventing and responding to violence against women and girls in the world of work	44/6	Elimination of discrimination against persons affected by leprosy and their family members
41/18	Mandate of the Independent Expert on protection against violence and discrimination based on sexual orientation and gender identity	44/8	Mandate of the Special Rapporteur on the independence of judges and lawyers
42/12	The human rights of older persons	44/10	Special Rapporteur on the rights of persons with disabilities
43/4	Freedom of opinion and expression: mandate of the Special Rapporteur on the promotion and protection of the right to freedom of opinion and expression	44/11	Mandate of the Independent Expert on human rights and international solidarity
43/6	Human rights of migrants: mandate of the Special Rapporteur on the human rights of migrants	44/13	Extreme poverty and human rights
43/8	Rights of persons belonging to national or ethnic, religious and linguistic minorities: mandate of the Special Rapporteur on minority issues	44/15	Business and human rights: the Working Group on the issue of human rights and transnational corporations and other business enterprises, and improving accountability and access to remedy
43/14; 49/17	Adequate housing as a component of the right to an adequate standard of living, and the right to non-discrimination in this context	45/3	Enforced or involuntary disappearances
43/16	Mandate of the Special Rapporteur on the situation of human rights defenders	45/4	Mandate of the Independent Expert on the promotion of a democratic and equitable international order
43/20	Torture and other cruel, inhuman or degrading treatment or punishment: mandate of the Special Rapporteur	45/17	Mandate of the Special Rapporteur on the implications for human rights of the environmentally sound management and disposal of hazardous substances and wastes
43/22	Mandate of the Special Rapporteur on the sale and sexual exploitation of children, including child prostitution, child pornography and other child sexual abuse material	49/32	Strengthening the Voluntary Technical Assistance Trust Fund to Support the Participation of Least Developed Countries and Small Island Developing States in the Work of the Human Rights Council

President's statements agreed upon by the Human Rights Council

PRST/1/1	Entry into force of the Optional Protocol to the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment	PRST/15/2	President's statement
PRST/6/2	The twentieth anniversary of the entry into force of the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment	PRST/18/2; PRST/19/1 PRST/20/1	Statement by the President
PRST/8/1	Modalities and practices for the universal periodic review process	PRST/29/1	Reports of the Working Group on the Universal Periodic Review
PRST/9/2	Follow-up to President's statement 8/1	PRST/OS/12/1	Enhancing the efficiency of the Human Rights Council
			Enhancing the efficiency of the Human Rights Council, including by addressing financial and time constraints

Section 24 Human rights

PRST/OS/13/1	Efficiency of the Human Rights Council – addressing financial and time constraints	PRST/OS/14/2	Methods of work of the Consultative Group of the Human Rights Council
PRST/OS/14/1; PRST/OS/15/1	Efficiency of the Human Rights Council		

Deliverables

24.18 Table 24.1 lists all cross-cutting deliverables of the programme.

Table 24.1
Cross-cutting deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	2	2	2	2
1. Reports to the General Assembly	1	1	1	1
2. Reports to the Human Rights Council	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	34	34	34	34
Meetings of:				
3. The Committee for Programme and Coordination	1	1	1	1
4. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
5. The General Assembly (Third and Fifth Committees)	32	32	32	32
B. Generation and transfer of knowledge				
Fact-finding, monitoring and investigation missions (number of missions)	–	10	10	6
6. Commissions of inquiry	–	10	10	6
C. Substantive deliverables				
Good offices: engagement with government officials.				
D. Communication deliverables				
Outreach programmes, special events and information materials: booklets, pamphlets, fact sheets, wallcharts and information kits on various human rights issues, including for the commemoration of Human Rights Day and other outreach campaigns; programme’s website, including in the six official languages, and presence on social media.				

Evaluation activities

- 24.19 The following evaluations completed in 2021 have guided the proposed programme plan for 2023:
- (a) Evaluation of the United Nations Free & Equal campaign (global);
 - (b) Evaluation of the Indigenous Fellowship Programme and the Minorities Fellowship Programme (global);
 - (c) Evaluations of three country programmes.
- 24.20 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2023. For example, in follow-up to the country programme evaluations conducted, action plans for the implementation of the corresponding recommendations have been prepared. As a result, context assessments and prioritization exercises will be conducted and theories of change will be developed in preparation for the formulation of the upcoming country programmes.
- 24.21 The following evaluations are planned for 2023:
- (a) One thematic evaluation of a global cross-cutting issue or programme;
 - (b) Three country programme or project evaluations at the field level.

Programme of work

Subprogramme 1

Human rights mainstreaming, right to development, and research and analysis

(a) Human rights mainstreaming

Objective

- 24.22 The objective, to which this subprogramme contributes, is to advance the promotion and protection of all human rights through strengthened integration of all human rights into areas of work of the United Nations system.

Strategy

- 24.23 To contribute to the objective, the subprogramme will:
- (a) Lead cooperation within the United Nations system for the integration of all human rights into United Nations programmes and activities in the development, environmental, humanitarian, peace and security, governance, democracy and rule of law areas, including the implementation of the 2030 Agenda, helping further the promotion and protection of all human rights in the United Nations system;
 - (b) Promote the practical integration of all human rights into development programmes, ensuring consistency and mutual reinforcement between United Nations-supported development activities and country engagement strategies that are jointly agreed upon with the Member States;
 - (c) Contribute to developing the capability and knowledge of the United Nations system, including United Nations country teams, regarding relevant human rights issues through training and advice, taking into account disability and mainstreaming a gender perspective;
 - (d) Develop methodological tools to facilitate the practical integration of all human rights into United Nations policies, programmes and activities for development, peace and security, the rule of law, governance and humanitarian assistance and, where appropriate, the advancement of the practical application of approaches that take into account the integration of all human rights into these policies, programmes and activities.
- 24.24 The above-mentioned work is expected to result in:
- (a) Strengthened capacity of the United Nations system to further integrate all human rights into its respective programmes and activities;
 - (b) Member States, at their request, building and strengthening national human rights promotion and protection capacities.

Programme performance in 2021

Increased understanding of key stakeholders on the threat of environmental degradation and climate change to human rights

- 24.25 In its resolution [48/13](#), the Human Rights Council recognized the right to a clean, healthy and sustainable environment as a human right and called for the enhanced cooperation of States with OHCHR in this area. At the twenty-sixth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, OHCHR supported efforts to integrate human rights considerations into several outcomes, including the rules for implementation of article 6 of the Paris Agreement. OHCHR launched the *Frequently Asked Questions on Human Rights and Climate Change* fact sheet to promote better policies for people and the planet and to improve understanding of the

climate change threat to human rights and the resulting human rights obligations of States. With the secretariat of the Framework Convention and the Paris Committee on Capacity-building, UNEP and other partners, OHCHR developed an e-learning course on human rights and climate change for policymakers and civil society, and information materials on human rights, the environment and gender equality. This work resulted in increased understanding by Member States, civil society organizations and rights holders of human rights considerations, especially in connection with their environment and climate-related policy and standard-setting work.

24.26 Progress towards the objective is presented in the performance measure below (see table 24.2).

Table 24.2
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
High Commissioner signed a memorandum of understanding with UNEP, made an explicit call for global recognition of the human right to a healthy environment, and participated in climate negotiations at the twenty-fifth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change	United Nations Environment Management Group established a new Issue Management Group on human rights and the environment	In its resolution 48/13, the Human Rights Council recognized that a clean, healthy and sustainable environment is a human right
Passage of the first resolution on women’s rights and gender equality at the fourth session of the United Nations Environment Assembly ^a	Inter-agency efforts promoted respect for the rights of future generations and climate justice	In its resolution 48/14, the Human Rights Council established a new Special Rapporteur on the promotion and protection of human rights in the context of climate change
Human Rights Committee general comment on the right to life references a healthy environment	Strengthened OHCHR-UNEP partnership through the establishment of a joint community of practice and joint communications	The rules for implementation of article 6 of the Paris Agreement and several other outcomes of the twenty-sixth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change integrated human rights standards
		The draft text of the post-2020 global biodiversity framework called for a rights-based approach

^a United Nations Environment Assembly resolution 4/17 on promoting gender equality and the human rights and empowerment of women and girls in environmental governance.

Planned results for 2023

Result 1: United Nations country teams integrated human rights approaches into their work

Programme performance in 2021 and target for 2023

- 24.27 The subprogramme’s work contributed, through human rights content and analysis, to 53 common country assessments for 76 countries, which met the planned target.
- 24.28 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 24.I).

Figure 24.I
Performance measure: number of common country assessments that received support to integrate human rights (annual)

(Number of common country assessment documents)

Result 2: improved inter-agency collaboration for human rights mainstreaming

Programme performance in 2021 and target for 2023

- 24.29 The subprogramme’s work contributed to the continued implementation of the United Nations Guidance Note on the Protection and Promotion of Civic Space, with emphasis on country-level implementation, which met the planned target of human rights elements of the new common country analyses and cooperation frameworks implemented by the United Nations country teams.
- 24.30 The subprogramme’s work also contributed to a system-wide human rights review of over 80 new common country analyses and cooperation frameworks, which met the planned target.
- 24.31 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 24.3).

Table 24.3
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Joint workplan agreed with WHO, building on the WHO-OHCHR Framework of Cooperation	High-level Committee on Programmes task force on inequalities Agreed workplan of the United Nations Sustainable Development Group task team on “Leaving no one behind”, human rights and the normative agenda, co-chaired by OHCHR Four joint policy documents and guidance on the socioeconomic response to COVID-19 available to Member States	System-wide human rights review of over 80 new common country analyses and cooperation frameworks developed in collaboration with 11 other entities Continued implementation of the United Nations Guidance Note on the Protection and Promotion of Civic Space under the inter-agency task team, with special attention to country-level implementation	Ten joint policy documents and guidance on the promotion and protection of human rights adopted by the United Nations system	United Nations system-wide initiatives on “leaving no one behind” integrate human rights standards

Result 3: enhanced democratic governance for stronger human rights protection**Proposed programme plan for 2023**

- 24.32 The subprogramme builds on the interdependent and mutually reinforcing relationship between democracy and respect for all human rights and fundamental freedoms (see Human Rights Council resolution 46/4) to strengthen essential elements of democratic governance. As mandated by General Assembly resolution 76/176, the subprogramme provided advisory services to Member States, including on the right to participate in public affairs and on constitutional processes, and stimulated dialogue and interaction with intergovernmental regional, subregional and other organizations in promoting democratic values and principles, as called upon by the Assembly in its resolution 59/201. The subprogramme also supported parliaments in discharging their human rights responsibilities (see Assembly resolution 74/304), published *Human Rights and Elections: A Handbook on International Human Rights Standards on Elections*, and organized several training sessions and the third session of the Forum on Human Rights, Democracy and the Rule of Law, held in November 2021, on the theme “Equal access to justice: a necessary element of democracy, rule of law and human rights protection”.

Lessons learned and planned change

- 24.33 The lesson for the subprogramme was that technical assistance needs to be aligned with key national processes, such as elections, which improve democratic governance and the protection of human rights. In applying the lesson, the subprogramme will further diversify delivery methods for technical assistance and ensure alignment with national processes of Member States.
- 24.34 Expected progress towards the objective is presented in the performance measure below (see table 24.4).

Table 24.4

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Enhanced awareness on democratic governance and the protection of human rights, including through the guidelines for States on the effective implementation of the right to participate in public affairs (see A/HRC/39/28)	Increased capacities of national authorities to promote and protect the right to participate in public affairs, through technical guidance, training and briefing sessions	Enhanced awareness of Member States on democratic governance and the right to participate in public affairs, including through <i>Human Rights and Elections: A Handbook on International Human Rights Standards on Elections</i> and other publications	Parliamentarians have access to a self-assessment toolkit	Increased capacity of parliamentarians and national authorities with regard to the protection and promotion of human rights in electoral contexts and constitutional processes

Deliverables

- 24.35 Table 24.5 lists all deliverables of the subprogramme.

Table 24.5

Subprogramme 1 (a): deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>

4. On human rights and the sustainable development agenda; and on environmental perspectives and human rights	2	2	2	2
Technical materials (number of materials)	10	10	10	10
5. On strengthening national protection systems, areas of human rights protection, institution-building, education and compilation of best practices on the integration of human rights aspects into United Nations policies and programmes	10	10	10	10
C. Substantive deliverables				
Consultation, advice and advocacy: advice to United Nations entities and to Member States, at their request, on the development of standards on strengthening national human rights promotion and protection capacities; integration of human rights aspects into development, humanitarian, peace and security, governance and rule of law areas.				

(b) Right to development

Objective

24.36 The objective, to which this subprogramme contributes, is to advance the promotion and protection of the effective enjoyment by all of all human rights through the effective realization of the right to development.

Strategy

24.37 To contribute to the objective, the subprogramme will pursue a multidimensional strategy. The subprogramme will:

- (a) Enhance awareness, knowledge and understanding about the content and importance of the right to development and identify obstacles at the international, regional and national levels through increased engagement, research, advocacy and information and educational activities;
- (b) Continue to promote the realization of the right to development across the human rights programme and encourage relevant bodies of the United Nations system, as well as funds and specialized agencies, to integrate the right to development into their work and ensure an increased focus on its practical implementation;
- (c) Strengthen partnerships and collaboration, and promote cooperation at the national, regional and international levels, with Member States, development agencies and international development, financial and trade institutions, and civil society, including NGOs and the private sector;

- (d) Encourage the promotion of the right to development in global development partnerships for the implementation by Member States of the 2030 Agenda, and most specifically Sustainable Development Goal 17, through cooperation and collaboration, advocacy, networking and technical advice, and the establishment of partnerships, and in keeping with existing mandates;
 - (e) Continue to provide substantive support to the Human Rights Council and its subsidiary mechanisms related to the right to development, including the Working Group on the Right to Development, the Expert Mechanism on the Right to Development and the Human Rights Council biennial panel on the right to development;
 - (f) Promote the implementation of the right to development by providing requesting States with technical assistance to formulate national development strategies, such as poverty reduction strategy papers, Sustainable Development Goal strategies and the United Nations Sustainable Development Cooperation Frameworks, taking into account an approach of integrating all human rights.
- 24.38 The above-mentioned work is expected to result in the integration of the promotion and protection of the right to development in global partnerships for development and policies and operational activities of relevant actors at all levels.

Programme performance in 2021

Member States increased policy-level integration of the right to development in addressing inequalities among countries

- 24.39 To support Member States and other stakeholders to strengthen the socioeconomic response to and recovery from the COVID-19 pandemic, the subprogramme scaled up efforts to promote the right to development in addressing global inequalities and building an inclusive, sustainable, peaceful and resilient future for all. The subprogramme increased activities to advance an enabling environment, including by enhancing fiscal and policy space and policy coherence, and by advocating for a fairer multilateral system and global governance, especially in trade, investment and finance. Deliverables included events and substantive documents addressing inequalities in vaccine access, advocating for vaccine multilateralism, dose sharing and improved productive capacities to prevent uneven economic recoveries in high- and middle- to low-income countries, redressing digital divides and closing other gaps, including through inter-agency collaboration within the framework of the fifteenth session of the United Nations Conference on Trade and Development and the Fifth United Nations Conference on the Least Developed Countries and through South-South cooperation. This work resulted in Member States informing their policies and policymaking processes through the Office's advocacy products promoting the right to development.
- 24.40 Progress towards the objective is presented in the performance measure below (see figure 24.II).

Figure 24.II
Performance measure: increased knowledge on addressing inequalities among countries (cumulative)

Planned results for 2023

Result 1: integration of the right to development in global development partnerships

Programme performance in 2021 and target for 2023

- 24.41 The subprogramme’s work contributed to the integration of the right to development in the outcome of the Fifth United Nations Conference on the Least Developed Countries, which met the planned target.
- 24.42 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 24.6).

Table 24.6
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Enhanced coordination to support the least developed countries	Report of the Secretary-General and the United Nations High Commissioner for Human Rights on the right to development, available to the United Nations Conference on the Least Developed Countries	The United Nations Conference on the Least Developed Countries considered the integration of the right to development in its outcome	The United Nations Conference on the Least Developed Countries considers the integration of the right to development in the new programme of action for the least developed countries	The least developed countries benefit from their implementation of the new programme of action for the least developed countries, which effectively promotes their right to development

Result 2: increased awareness and capacity regarding the right to development

Programme performance in 2021 and target for 2023

- 24.43 The subprogramme’s work contributed to 317 participants completing the online training module on the right to development, which exceeded the planned target of 300 participants.
- 24.44 The subprogramme’s work also contributed to a total of 750 users of the online global platform, which met the planned target.

24.45 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 24.III).

Figure 24.III

Performance measure: number of participants completing the online training module (annual) and number of users of the online global platform (cumulative)

Result 3: Working Group on the Right to Development and Expert Mechanism on the Right to Development inform intergovernmental deliberations on the right to development

Proposed programme plan for 2023

24.46 The subprogramme has provided substantive support and organized the annual sessions of the Working Group on the Right to Development, which continued to advance the elaboration of the draft convention on the right to development. The subprogramme supported the Expert Mechanism on the Right to Development, including through the organization of consultations and dialogue with other human rights mechanisms and civil society, to inform the elaboration of thematic studies submitted by the Expert Mechanism to the Human Rights Council.

Lessons learned and planned change

24.47 The lesson for the subprogramme was that, to promote implementation of the mechanisms related to the right to development both at the national and international levels, it needed to ensure effective engagement of Member States and other stakeholders to further raise awareness on the subject. In applying the lesson, the subprogramme will support the mechanisms to more effectively engage with Member States and civil society organizations, including through learning and capacity-building activities. These actions are expected to increase the engagement of Member States and civil society with the mechanisms, to advance the right to development.

24.48 Expected progress towards the objective is presented in the performance measure below (see figure 24.IV).

Figure 24.IV

Performance measure: engagement with the Working Group on the Right to Development and the Expert Mechanism on the Right to Development (annual)

(Number of participants)

(c) Research and analysis

Objective

- 24.50 The objective, to which this subprogramme contributes, is to advance the promotion and protection of the effective enjoyment by all of all human rights through increased knowledge, awareness and understanding.

Strategy

- 24.51 To contribute to the objective, the subprogramme will:
- (a) Enhance the research and analysis of human rights issues, as well as the development and application of expertise in areas such as the elimination of all forms of discrimination, racism, including its contemporary forms, racial discrimination, xenophobia and related intolerance; the rule of law, democracy and good governance; the integration of human rights into counter-terrorism and anti-trafficking measures, as well as the implementation of the Sustainable Development Goals and poverty reduction strategies and programmes; and the protection of human rights in the context of the fight against terrorism and business activities;
 - (b) Advocate for the indivisibility, interdependence and interrelatedness of all human rights, through research, policy-oriented analysis, support to standard-setting, advocacy, the compilation of best practices and improved knowledge management; the provision of specialized human rights reference services; the development of methodologies, operational guidelines and tools; capacity-building and international cooperation, including in areas such as human rights protection, institution-building and education; and the development and delivery of human rights training and activities, for example within the framework of the World Programme for Human Rights Education;
 - (c) Further develop and strengthen substantive and methodological human rights expertise to support effective engagement with countries and with global and national-level partnerships, and lead efforts within the United Nations system to meet current human rights challenges;
 - (d) Provide advice and assistance to requesting States, the United Nations system, civil society, the media and national human rights institutions in their efforts to overcome human rights implementation gaps, promote inclusion and protect rights holders, through technical cooperation, advocacy, training, policy development, analysis, protection and advice to partners at all levels; follow up and implement the Durban Declaration and Programme of Action, the outcome document of the Durban Review Conference, the political declaration of the high-level meeting of the General Assembly to commemorate the tenth anniversary of the adoption of the Durban Declaration and Programme of Action, and the programme of activities for the implementation of the International Decade for People of African Descent (2015–2024).
- 24.52 The above-mentioned work is expected to result in enhanced knowledge, awareness and understanding of human rights issues.

Programme performance in 2021

Improved mainstreaming of human rights in Member States' COVID-19 response

- 24.53 The subprogramme contributed to increasing knowledge, awareness and understanding of the human rights implications of vaccine inequity, and increased advocacy to promote vaccine multilateralism and address obstacles to ensure affordable, timely, equitable and universal access to and distribution of COVID-19 vaccines. The subprogramme conducted research and advocacy and issued reports and statements by the United Nations High Commissioner for Human Rights. At the request of the Human Rights Council, the subprogramme issued reports that highlighted promising practices by States and other actors and presented recommendations to integrate human rights, including the right to

development, into their responses and recovery, moving towards universal health coverage and more comprehensive social protection systems. The subprogramme provided country- and context-specific analysis and policy advice to United Nations country teams and national partners in this area.

24.54 Progress towards the objective is presented in the performance measure below (see table 24.8).

Table 24.8
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	<p>Oral update by the United Nations High Commissioner for Human Rights to the Human Rights Council on the human rights impact of the COVID-19 pandemic at the forty-fourth and forty-fifth sessions of the Council, in accordance with the statement by the President of the Council (PRST/43/1)</p> <p>Report of the High Commissioner on economic, social and cultural rights (E/2020/63), in which the High Commissioner examined the impact of the COVID-19 crisis on those rights, focusing on the rights to health and social protection</p>	<p>Increased awareness of stakeholders/Member States on the impact of and response to COVID-19, as introduced in the report of the Secretary-General entitled “Question of the realization of economic, social and cultural rights in all countries: the impact of the coronavirus disease (COVID-19) on the realization of economic, social and cultural rights” (A/HRC/46/43) and three reports of the High Commissioner on the impact of COVID-19 and its consequences, including on the central role of States in responding to the pandemic (A/HRC/46/19, A/HRC/47/23 and E/2021/77)</p>

Planned results for 2023

Result 1: increased stakeholders’ engagement in the International Decade for People of African Descent

Programme performance in 2021 and target for 2023

- 24.55 The subprogramme’s work contributed to increased stakeholder engagement, with 2,474 individuals and organizations engaged in the International Decade for People of African Descent during 2021, which exceeded the planned target of 1,550 individuals and organizations.
- 24.56 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 24.V).

Figure 24.V

Performance measure: number of individuals and organizations engaged in the International Decade for People of African Descent, supported by the subprogramme (annual)

Result 2: indigenous and minority leaders empowered through the indigenous and minorities fellowship programmes

Programme performance in 2021 and target for 2023

- 24.57 The subprogramme’s work contributed to the empowerment of indigenous and minority leaders, with a total of 46 additional senior indigenous and minority fellows being reached in 2021 for a cumulative total of 87, which exceeded the planned target of 75.
- 24.58 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 24.VI).

Figure 24.VI

Performance measure: number of senior indigenous and minority fellows (cumulative)

Result 3: advance racial justice and equality, particularly for Africans and people of African descent¹

Proposed programme plan for 2023

- 24.59 In her report and conference room paper to the Human Rights Council ([A/HRC/47/53](#) and [A/HRC/47/CRP.1](#)), the High Commissioner presented a four-point agenda towards transformative change for racial justice and equality aimed at building more inclusive, equal and fairer societies, attaining racial equity and ensuring that Africans and people of African descent are not left behind.

¹ See Human Rights Council resolution [47/21](#).

The Council responded by establishing an international independent expert mechanism to advance racial justice and equality in the context of law enforcement in all parts of the world and requesting the subprogramme to enhance its work in this area (see Council resolutions [43/1](#) and [47/21](#)).

Lessons learned and planned change

24.60 A lesson for the subprogramme was that it needed to build interventions at the country and regional levels, based on evidence and data, in line with the Durban Declaration and Programme of Action. In applying the lesson, the subprogramme will enhance its monitoring, supporting and strengthening assistance to States and people of African descent and their organizations. The subprogramme will explore opportunities to increase visibility of and bring attention to the combat against racism and racial discrimination and to place racial justice and equality for people of African descent at the centre of international, regional and national processes.

24.61 Expected progress towards the objective is presented in the performance measure below (see table 24.9).

Table 24.9
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	Human Rights Council resolution 43/1 adopted by consensus in June 2020 following an urgent debate on current racially inspired human rights violations, systemic racism, police brutality and violence against peaceful protests	29 consultations on systemic racism held online with individuals from a range of sectors, mostly people of African descent Human Rights Council considered the report of the High Commissioner (A/HRC/47/53) and the annex thereto entitled “Four-Point Agenda towards Transformative Change for Racial Justice and Equality”, and adopted resolution 47/21	States, and people of African descent and their organizations, empowered by tools and guidance to eliminate racial discrimination Directly affected individuals and communities included in the joint enhanced interactive dialogue of the Human Rights Council with the High Commissioner and the international independent expert mechanism	Enhanced capacities of States and other stakeholders, in particular people of African descent and their organizations, to inform their actions towards transformative change for racial justice and equality

Deliverables

24.62 Table 24.10 lists all deliverables of the subprogramme.

6. Seminars on strengthening national human rights promotion and protection capacities for stakeholders, including governmental and non-governmental actors and United Nations entities	150	219	150	150
7. Training events on the United Nations, human rights law and skill development for indigenous people, minorities and people of African descent (for the fellowship programmes)	700	1 190	700	700
Publications (number of publications)	7	7	7	7
8. On women's rights, racial discrimination, indigenous peoples and the administration of justice, in particular transitional justice mechanisms	7	7	7	7
Technical materials (number of materials)	10	10	10	10
9. On women's rights, racial discrimination, indigenous peoples and the administration of justice, in particular transitional justice mechanisms	10	10	10	10
C. Substantive deliverables				
Consultation, advice and advocacy: expert advice to Member States, United Nations entities, special rapporteurs and independent experts of the Human Rights Council, and other stakeholders, including on the development of related standards.				
D. Communication deliverables				
Outreach programmes, special events and information materials: booklets, pamphlets, wallcharts, information kits on global and national advocacy and capacity-building in the field of women's rights, racial discrimination, indigenous peoples and the administration of justice, in particular transitional justice mechanisms.				
Library services: OHCHR publications, human rights training and education publications, books, reports, periodicals, videos, DVDs on human rights and translations of the Universal Declaration of Human Rights.				

Subprogramme 2

Supporting human rights treaty bodies

Objective

- 24.63 The objective, to which this subprogramme contributes, is to advance the promotion and protection of the effective enjoyment by all of all human rights, in particular through support and advice to the human rights treaty bodies and by increasing awareness among national and international actors of the international human rights treaties and the work of treaty bodies.

Strategy

- 24.64 To contribute to the objective, the subprogramme will:
- (a) Provide full support and advice, including analytical capacity, to the treaty bodies' work, for: the review of State reports; the conduct of inquiries and country visits, where provided for in the treaty or upon request of States; early warning and urgent action procedures and the processing of individual complaints, urgent actions and inter-State complaints; visits to places of deprivation of liberty, as well as assistance and advice to the national preventive mechanisms; and the preparation of general comments;
 - (b) Support the efforts of treaty bodies to improve and enhance their working methods, by sharing information and facilitating discussions, including the Chairperson's meeting;
 - (c) Engage with Member States, United Nations agencies, NGOs, national human rights institutions and the media to enhance awareness, knowledge and understanding of the treaty bodies' work and outputs and the international human rights treaties, and to promote ratification of those treaties;
 - (d) Enhance the use of videoconferencing and webcasting to improve the accessibility and visibility of the treaty bodies and deliver communications campaigns;
 - (e) Continue to support States parties, upon request, in building their capacity to implement their treaty obligations as well as in the preparation and timely submission of national reports to the treaty bodies;
 - (f) Continue to support States, upon request, in establishing or strengthening national mechanisms for reporting and follow-up, including on the Sustainable Development Goals, through the exchange of experiences and good practices;
 - (g) Continue to assist treaty bodies in their efforts to address reprisals when they occur, and in their responses to claims and acts of intimidation or reprisals against individuals and groups for their contribution to the work of the human rights treaty bodies.
- 24.65 The above-mentioned work is expected to result in:
- (a) Efficient and effective functioning of the treaty bodies;
 - (b) Enhanced cooperation of stakeholders at all levels with treaty bodies in accordance with their working methods and mandates.

Programme performance in 2021

Subcommittee on Prevention of Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment pursued its mandate online during global pandemic

- 24.66 The subprogramme supported the implementation of the mandate of the Subcommittee on Prevention of Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment to protect persons deprived of their liberty against torture or other cruel, inhuman or degrading treatment or punishment by visiting places of deprivation of liberty and advising and assisting States parties to the Optional Protocol to the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment to establish national preventive mechanisms. The visiting programme of the Subcommittee (7–10 visits per year) was largely put on hold during the pandemic, with only one actual in situ visit, so the Subcommittee engaged remotely with all 90 States parties and 70 national preventive mechanisms to help to minimize the impact of COVID-19 on persons deprived of liberty. To fill the protection gap, the Subcommittee issued advice to States parties and national preventive mechanisms on places of quarantine (see [CAT/OP/9](#)) and on the impact of COVID-19 (see [CAT/OP/10](#)). States parties and national preventive mechanisms needed to provide information on the measures taken to implement the Subcommittee's recommendations to evaluate the measures implemented and their impact on persons deprived of liberty (see [CAT/OP/12](#)). The advice reinforced

the universality of the measures taken to prevent torture and ill-treatment worldwide and to minimize the negative impact of the pandemic in places of deprivation of liberty.

24.67 Progress towards the objective is presented in the performance measure below (see table 24.11).

Table 24.11
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
Subcommittee visited seven countries	States parties and national preventive mechanisms benefited from advice provided by the Subcommittee on places of quarantine (see CAT/OP/9) and on the impact of COVID-19 (see CAT/OP/10)	49 of the 90 States parties to the Optional Protocol to the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment and 64 of 70 national preventive mechanisms or similar bodies submitted information regarding the national measures taken to implement Subcommittee recommendations States parties and national preventive mechanisms provided information on the evaluation of measures taken to implement Subcommittee recommendations

Planned results for 2023

Result 1: wider participation of delegates in the Committees’ review of States parties’ reports facilitated by videoconferencing

Programme performance in 2021 and target for 2023

24.68 The subprogramme’s work contributed to the Committees being enabled to discharge their mandates in an online or hybrid mode, with 159 remote connections to adopt concluding observations, lists of issues and lists of issues prior to reporting, which exceeded the planned target of 150.

24.69 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 24.VII).

Figure 24.VII
Performance measure: number of remote connections related to State party reviews (annual)

Result 2: enhanced support for individual complaints**Programme performance in 2021 and target for 2023**

- 24.70 The subprogramme's work contributed to the registration² of 458 urgent actions, which exceeded the planned target of 200.
- 24.71 The subprogramme's work also contributed to the registration of 399 individual communications in 2021, which did not meet the planned target of 450. The target was not met because of the continuing technological and methodological challenges related to working online and the fact that most of the procedures are still paper-based.
- 24.72 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 24.VIII).

Figure 24.VIII

Performance measure: number of individual communications and urgent actions registered annually**Result 3: capacity of States parties to engage with treaty bodies strengthened****Proposed programme plan for 2023**

- 24.73 The capacity-building programme of the subprogramme supported the setting up or strengthening of national mechanisms for reporting and follow-up so that they effectively enable States parties to meet their treaty obligations. In the fourth quarter of 2021, the subprogramme organized virtual regional consultations for national mechanisms for reporting and follow-up, during which representatives shared experiences and good practices.

Lessons learned and planned change

- 24.74 The lesson for the subprogramme was that the virtual format allows for a greater and wider participation and reach, to meet the needs of Member States and to learn from the exchange of experiences. In applying the lesson, the subprogramme will, in follow-up to the consultations, facilitate opportunities for additional exchanges, and will develop and expand tools and methodologies to facilitate States' engagement with treaty bodies, such as the Universal Human Rights Index, a searchable database containing the recommendations of human rights mechanisms. It will scale up the roll-out of the National Recommendations Tracking Database, which is designed to facilitate States' tracking of the implementation of the recommendations of the human rights mechanisms and the preparation of reports thereon.

² The number of registrations depends on the number of communications received that meet the registration criteria.

24.75 Expected progress towards the objective is presented in the performance measure below (see figure 24.IX).

Figure 24.IX

Performance measure: number of national mechanisms for reporting and follow-up with treaty bodies (cumulative)

Deliverables

24.76 Table 24.12 lists all deliverables of the subprogramme.

C. Substantive deliverables

Consultation, advice and advocacy: advocacy on legal instruments on the international human rights system (briefings, capacity-building, legal analysis, information materials, technical cooperation and assistance) with Member States, United Nations entities and other stakeholders; consultation and advice on the establishment and/or strengthening of national mechanisms for reporting and follow-up to the human rights treaty bodies; briefings with respect to newly elected mandates holders of the Committees and new members of the Boards of Trustees of the humanitarian trust funds.

Databases and substantive digital materials: the Universal Human Rights Index and treaty body jurisprudence databases.

D. Communication deliverables

Outreach programmes, special events and information materials: informational brochures on the activities of the treaty bodies and the humanitarian trust funds, as well as the Special Fund established by the Optional Protocol to the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment.

**Subprogramme 3
Advisory services, technical cooperation and field activities**

Objective

24.77 The objective, to which this subprogramme contributes, is to advance the promotion and protection of the effective enjoyment by all of all human rights, through enhanced capacity-building, including through assistance to requesting States.

Strategy

24.78 To contribute to the objective, the subprogramme will:

- (a) Provide States and stakeholders at the national level with human rights legal advice, education, awareness-raising and training through mutually agreed advisory services and technical cooperation programmes in countries from all regions, including assistance, upon request, in the implementation of the recommendations to which States have agreed in the universal periodic review process;
- (b) Improve cooperation within the United Nations system for the protection and promotion of human rights, through joint activities, the deployment of human rights officers and advisers, interaction with OHCHR programmes in the field and relevant United Nations human rights mechanisms, and the provision of expert advice;
- (c) Continue to deploy human rights observers and fact-finding missions in crisis situations, at the specific request of an affected country or as mandated by the Human Rights Council and other United Nations policymaking bodies;
- (d) Assist the Council and its mechanisms, as well as other policymaking bodies and the treaty bodies, in preparing for and following up on their dialogue with countries and will ensure the efficient and effective functioning of the thematic and country-specific special procedures by following human rights developments.

24.79 The above-mentioned work is expected to result in:

- (a) Enhanced national capacities, including institutional capacities, to translate international human rights obligations into effective laws, regulations and policies and meet the challenges to the full realization of human rights;
- (b) Enhanced capacity of United Nations country teams, peacekeeping operations and peacebuilding activities and other United Nations field presences to assist requesting countries

in their efforts to develop national human rights protection systems, guided, inter alia, by the recommendations of the international human rights mechanisms;

- (c) Prevention of the continuation of human rights violations, including in situations of large-scale human rights violations.

Programme performance in 2021

Human rights placed at the centre of the socioeconomic response to the pandemic

24.80 The subprogramme addressed the socioeconomic, humanitarian and human rights aspects of the COVID-19 pandemic, and worked with United Nations system partners to place human rights at the centre of the coordinated response that United Nations country teams provided to State institutions in all regions of the world. The subprogramme produced guidance and shed light on the differential impact of the crisis on groups in vulnerable situations, and urged States to adopt special measures to mitigate the disproportionate toll of the pandemic on specific segments of the population and to allow the meaningful participation of affected populations in COVID-19 responses. The subprogramme continued to enhance the capacity of States to provide greater protection for those at risk. In this specific context, the subprogramme has provided support and technical guidance to Governments to ensure that the recovery process builds a better future, in particular where inequalities are addressed.

24.81 Progress towards the objective is presented in the performance measure below (see table 24.13).

Table 24.13

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	Seeding change country projects and financial or technical assistance provided in 27 countries	Seeding change projects contributed to recovery from the pandemic in 8 countries
	Guidance and advice on addressing the socioeconomic impact of COVID-19 provided to OHCHR country presences and United Nations country teams in 38 countries, including in 30 country team COVID-19 socioeconomic impact assessments and socioeconomic response plans	24 countries integrated human rights into economic analysis and policy options United Nations country teams, civil society organizations and other stakeholders benefited from 42 capacity-building initiatives on placing human rights at the centre of the United Nations system response to COVID-19, as well as on the analysis on leaving no one behind in common country assessments, cooperation frameworks and other planning and analysis processes

Planned results for 2023

Result 1: strengthened effectiveness of national human rights institutions in line with the principles relating to the status of national institutions for the promotion and protection of human rights (the Paris Principles)

Programme performance in 2021 and target for 2023

- 24.82 The subprogramme’s work contributed to strengthened effectiveness of 76 national human rights institutions, which exceeded the planned target of 65.
- 24.83 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 24.X).

Figure 24.X
Performance measure: number of national human rights institutions established or strengthened (annual)

Result 2: timely data and analysis of human rights situations

Programme performance in 2021 and target for 2023

- 24.84 The subprogramme’s work contributed to strengthened existing partnerships with the European Commission Joint Research Centre and other service providers, leveraging support for partners such as the African Union Continental Early Warning System, which met the planned target.
- 24.85 The subprogramme’s work also contributed to the provision of timely data on and analysis of human rights situations, including through 135 infographics used by the United Nations principals and other partners, which met the planned target.
- 24.86 The subprogramme’s work further contributed to the establishment of emergency response teams in Panama (Central America), Santiago (South America) and Yaoundé (Central Africa), and to the production of situation reports and dashboards, with data and information being made available upon request to inform the timely, evidence-based, strategic and operational decisions made by the emergency response teams, the United Nations system and Member States, which met the planned target.
- 24.87 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 24.14).

Table 24.14
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
<p>Broadened partnership base with service providers by securing free and direct access to Maxar/DigitalGlobe enhanced-view web-hosting service</p> <p>More than 80 information products, including maps, infographics and multiple-page visual summaries, used to support the interventions of three emergency response teams, informing United Nations country teams and other stakeholders</p>	<p>Development of methodology and information management system/database for the pandemic: COVID-19 tracker</p> <p>53 snapshots produced, including more than 40 infographic snapshots available for the WHO crisis team</p> <p>34 mapping projects, 19 infographics and 16 satellite imaging projects used by United Nations country teams, United Nations principals and other partners</p>	<p>Strengthened existing partnerships with the European Commission Joint Research Centre and other key service providers to leverage support for partners such as the African Union Continental Early Warning System</p> <p>135 infographics used by the United Nations principals and other partners</p> <p>Delivery of information management support and coordination from headquarters to the six deployed emergency response teams to ensure good practices and coherence in their humanitarian work</p>	<p>Increased availability of timely human rights analysis provided to inform prevention activities of humanitarian partners, United Nations country teams, civil society organizations and national human rights institutions</p> <p>United Nations country-level planning mechanisms such as the common country analysis and United Nations Sustainable Development Cooperation Framework processes utilize human rights data and analysis provided by eight emergency response teams</p> <p>Establishment of new partnerships to meet new requirements and embrace data opportunities</p>	<p>New information products available to inform Member States on specific human rights and emerging situations</p> <p>Increased availability of timely human rights analysis provided to inform activities of humanitarian partners, United Nations country teams, civil society organizations and national human rights institutions</p>

Result 3: enhanced capacity of Member States to reduce inequalities

Proposed programme plan for 2023

24.88 To strengthen national policies, legislation and mechanisms for the promotion and protection of human rights, the subprogramme provided advisory services and technical cooperation programmes to Member States and other stakeholders in all regions. Chad and the Niger were two countries that recently requested and hosted country presences established by OHCHR. The subprogramme contributed to the holding of national inclusive dialogues in the context of the ongoing transition processes of these countries. The subprogramme also supported these countries with their reporting obligations to the monitoring bodies of the international human rights treaties to which they are States parties.

Lessons learned and planned change

24.89 The lesson for the subprogramme was that the direct in-country engagement of State partners with human rights experts from OHCHR increases the demand of Member States for additional, more specific technical support. In applying the lesson, the subprogramme will enhance its thematic capacity, in particular in the area of economic and social rights, by also using data analysis and enhanced evidence-based support. This work is expected to support Member States in their efforts to enhance their policies and take into account human rights in their legislation, where applicable, to combat inequalities.

24.90 Expected progress towards the objective is presented in the performance measure below (see figure 24.XI).

Figure 24.XI

Performance measure: number of Member States that took action to enhance legislation and policies that integrate economic, social and cultural rights (cumulative)

Deliverables

24.91 Table 24.15 lists all deliverables of the subprogramme.

C. Substantive deliverables

Consultation, advice and advocacy: consultations on human rights by the United Nations High Commissioner/Deputy High Commissioner for Human Rights with Member States; regional consultation on human rights issues for Governments, national human rights institutions and civil society by the United Nations Human Rights Training and Documentation Centre for South-West Asia and the Arab Region; assistance to special rapporteurs and independent experts of the Human Rights Council (country mandates); technical support and substantive and secretariat services for country-specific missions; monitoring, technical support and substantive services to human rights components in peace missions, including preparing inputs on the human rights situation mandated by the Security Council; support and substantive advice related to human rights challenges in humanitarian operations.

Databases and substantive digital materials: databases on geographic human rights information, including the human rights case database, a secure information exchange platform in support of the commissions of inquiry and fact-finding missions.

D. Communication deliverables

External and media relations: press releases and media briefings by country mandate holders and the High Commissioner.

Subprogramme 4 Supporting the Human Rights Council, its subsidiary bodies and mechanisms

Objective

- 24.92 The objective, to which this subprogramme contributes, is to advance the promotion and protection of the effective enjoyment by all of all human rights, by providing strengthened support and advice to the Human Rights Council and its subsidiary bodies and mechanisms, including the Human Rights Council Advisory Committee, the special procedures, the universal periodic review and the complaint procedure.

Strategy

- 24.93 To contribute to the objective, the subprogramme will:
- (a) Research and develop analytical information and knowledge in support of the thematic special procedures and the universal periodic review mechanism to enhance their effectiveness;
 - (b) Support and provide thematic expertise for fact-finding missions and special procedure mandate holders' country visits, including through enhanced cooperation within the programme, the analysis of gaps in the implementation of international human rights instruments, the promotion of observance for international human rights standards and the provision of timely advice for addressing gross and systematic violations of human rights;
 - (c) Support the international human rights mechanisms in their efforts to promote the implementation of the 2030 Agenda in accordance with States' human rights obligations;
 - (d) Disseminate knowledge of the conclusions, recommendations and other outcomes of the universal periodic review, as well as the findings and methodology of the thematic special

procedures, and improve coordination among mandate holders and other mechanisms of the human rights machinery;

- (e) Support partnerships and reinforce dialogue and cooperation with Governments, national human rights institutions, civil society organizations, victims, United Nations agencies and programmes and the United Nations human rights machinery and cooperating policymaking bodies, including to support follow-up to the findings and recommendations of the special procedure mandate holders and the outcomes of the universal periodic review;
- (f) Continue to provide assistance to States within the universal periodic review framework.

24.94 The above-mentioned work is expected to result in:

- (a) Enhanced and effective functioning of the Human Rights Council and its subsidiary bodies and mechanisms, including more effective deliberations and decision-making processes;
- (b) Enhanced cooperation at all levels with stakeholders that can benefit from and/or contribute to the work of the Human Rights Council and its subsidiary bodies and mechanisms.

Programme performance in 2021

Scaling up respect for human rights by businesses

24.95 To mark the 10-year anniversary of the issuance of the Guiding Principles on Business and Human Rights: Implementing the United Nations “Protect, Respect and Remedy” Framework in 2021, the subprogramme supported the Working Group on the issue of human rights and transnational corporations and other business enterprises, mandated by the Human Rights Council to promote the dissemination and implementation of the Guiding Principles, in taking stock of the first decade of implementation and setting a road map for the next decade. The road map was launched at the tenth United Nations annual Forum on Business and Human Rights, organized by OHCHR in 2021. The Forum addressed some of the critical issues, including the role of business in confronting climate change and environmental harm, and what businesses should do to help to confront racism and discrimination. Over 3,000 participants and 180 panellists, including 883 representatives of the business sector, Governments, civil society, national human rights institutions, unions and indigenous peoples, human rights defenders and academics, shared their experience and perspectives, with a particular focus on how to improve implementation of the Guiding Principles in the next decade and beyond.

24.96 Progress towards the objective is presented in the performance measure below (see figure 24.XII).

Figure 24.XII
Performance measure: engagement by the private sector in the Forum on Business and Human Rights (annual)

(Number of participants)

Planned results for 2023

Result 1: persons with disabilities have greater access to the Human Rights Council

Programme performance in 2021 and target for 2023

- 24.97 The subprogramme's work contributed to the servicing of 13 meetings of the Human Rights Council that were accessible to persons with disabilities, which exceeded the planned target of nine meetings.
- 24.98 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 24.XIII).

Figure 24.XIII

Performance measure: number of meetings of the Human Rights Council accessible to persons with disabilities (annual)

Result 2: enhanced participation in the universal periodic review

Programme performance in 2021 and target for 2023

- 24.99 The subprogramme's work contributed to a continued increase in the participation of delegates from the least developed countries and small island developing States in the Working Group on the Universal Periodic Review, with three Working Group sessions (thirty-seventh, thirty-eighth and thirty-ninth) held under hybrid modalities, enabling a wider participation, with 274 delegates from the least developed countries and small island developing States, which exceeded the planned target of 110 delegates.
- 24.100 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 24.XIV).

Figure 24.XIV

Performance measure: number of delegates from the least developed countries and small island developing States participating in sessions of the Working Group on the Universal Periodic Review (annual)

Result 3: enhanced engagement of parliamentarians in the universal periodic review

Proposed programme plan for 2023

24.101 The universal periodic review, under which all 193 States Members of the United Nations are reviewed, entered its fourth cycle. Parliamentarians have been participating as part of government delegations and have thereby been strengthened in their commitment to promote and protect human rights. The subprogramme increasingly focused on strengthening the engagement of parliaments and parliamentary human rights bodies with human rights mechanisms, including through the implementation of the recommendations of the report of OHCHR on the contribution of parliaments to the work of the Human Rights Council and its universal periodic review (A/HRC/38/25), which was prepared in close cooperation with the Inter-Parliamentary Union (IPU), pursuant to Council resolution 35/29.

Lessons learned and planned change

24.102 The lesson for the subprogramme was that the participation of parliamentarians in the universal periodic review better equips them to promote and protect human rights, through their oversight of the human rights action and policies of Governments, their implementation of recommendations and ratification of international treaties and their adoption of laws and public budgets. In applying the lesson, the subprogramme will continue its efforts to increasingly engage parliamentarians in the universal periodic review, including through regional events organized jointly with IPU and the International Organization of la Francophonie, and through support to national initiatives.

24.103 Expected progress towards the objective is presented in the performance measure below (see figure 24.XV).

Figure 24.XV
Performance measure: number of parliamentarians with increased knowledge on engagement with the Human Rights Council and its universal periodic review (annual)

Deliverables

24.104 Table 24.16 lists all deliverables of the subprogramme.

24.106 Additional details on the distribution of the proposed resources for 2023 are reflected in table 24.20 to table 24.22 and Figure 24.XVI.

24.107 As reflected in table 24.20 (1) and table 24.21 (1), the overall resources proposed for 2023 amount to \$144,268,900 before recosting, reflecting a net increase of \$10,316,200 (or 7.7 per cent) compared with the appropriation for 2022. Resource changes result from two factors, namely: (a) technical adjustments; and (b) new and expanded mandates. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

24.108 As reflected in table 24.20 (1), resource changes reflect a net decrease of \$21,446,200, as follows:

- (a) **Policymaking organs.** The decrease of \$27,000 relates to the removal of non-recurrent requirements emanating from Human Rights Council resolutions from its forty-second and

forty-fifth sessions, specifically under: (i) travel of representatives (\$10,900); and (ii) grants and contributions (\$16,100);

- (b) **Subprogramme 1, Human rights mainstreaming, right to development, and research and analysis.** The net decrease of \$3,478,700 reflects the removal of non-recurrent requirements emanating from Human Rights Council resolutions from its forty-third to its forty-eighth sessions, as well as Council resolution [28/14](#) and General Assembly resolutions [75/314](#) and [76/227](#), specifically under: (i) other staff costs (\$2,900,700); (ii) consultants (\$127,300); (iii) travel of representatives (\$371,000); (iv) travel of staff (\$52,800); (v) contractual services (\$68,000); (vi) general operating expenses (\$28,600); and (vii) grants and contributions (\$585,800); offset in part by an increase of \$655,500 related to the delayed impact of the establishment of nine posts in 2022, including one Human Rights Officer (P-4), two Human Rights Officers (P-3) and five Regional Advisors (P-3) established pursuant to Human Rights Council resolution [47/21](#), and one Human Rights Officer (P-3) established pursuant to General Assembly resolution [76/226](#), which were subject to a 50 per cent vacancy rate in accordance with the established practice for new posts;
- (c) **Subprogramme 3, Advisory services, technical cooperation and field activities.** The net decrease of \$17,595,200 reflects the removal of non-recurrent requirements emanating from Human Rights Council resolutions from its forty-fifth to its forty eighth sessions, specifically under: (i) other staff costs (\$13,223,200); (ii) consultants (\$224,100); (iii) travel of representatives (\$303,100); (iv) travel of staff (\$671,800); (v) contractual services (\$432,400); (vi) general operating expenses (\$1,046,900); (vii) supplies and materials (\$30,200); (viii) furniture and equipment (\$93,500); and (ix) grants and contributions (\$1,742,600); offset in part by an increase of \$172,600 related to the delayed impact of the establishment of two posts, one Human Rights Officer (P-4) and one Military Adviser (P-4), established pursuant to Human Rights Council resolution [S-30/1](#);
- (d) **Subprogramme 4, Supporting the Human Rights Council, its subsidiary bodies and mechanisms.** The net decrease of \$345,300 reflects the removal of non-recurrent requirements emanating from Human Rights Council resolutions from its forty-third, forty-fifth and forty sixth sessions, specifically under: (i) other staff costs (\$348,600); (ii) travel of representatives (\$43,800); and (iii) grants and contributions (\$26,400); offset in part by an increase of \$73,500, related to the delayed impact of the establishment of one Human Rights Officer (P-3) post pursuant to Human Rights Council resolution [48/14](#).

New and expanded mandates

24.109 Pursuant to paragraph 7 of General Assembly resolution [76/245](#), in which the Assembly endorsed the recommendations of the Advisory Committee on Administrative and Budgetary Questions contained in its report ([A/76/7](#)), in which the Committee, inter alia, stressed that there was a need for further clarity, review and potential consolidation of the totality of the resources for section 24, Human rights, the proposed programme budget for 2023 includes provisions to implement the mandates adopted or expected to be adopted during 2022. These requirements would otherwise be included in the report on revised estimates resulting from resolutions and decisions adopted by the Human Rights Council during 2022 (expected to be issued in November 2022). Accordingly, the proposed programme budget includes requirements to implement one-time mandates adopted by the Council during its forty-ninth session, and in addition full-year estimates to implement mandates of a renewable nature established by the Council at its forty-ninth session, or expected to be extended during its fifty-first session. As reflected in table 24.20 (1), resource changes reflect an increase of \$31,762,400, reflecting additional requirements pursuant to Human Rights Council and General Assembly resolutions, as follows:

- (a) **Subprogramme 1, Human rights mainstreaming, right to development, and research and analysis.** The increase of \$2,414,900 reflects requirements to implement recurrent biennial mandates from the Human Rights Council (\$118,800), mandates from resolutions adopted by the Council in 2021 (\$868,100), one-time mandates adopted by the Council at its forty-ninth

Section 24 Human rights

session and full-year estimates of renewable mandates adopted at its forty-ninth session, or anticipated to be adopted at its fifty-first session (\$1,282,700), and mandates from resolutions adopted by the General Assembly (\$145,300), as indicated in table 24.23 below;

Other changes

24.110 As reflected in table 24.20 (1), the net effect of the proposed changes is cost-neutral. The proposed changes reflect the travel plan for 2023 and expected expenditure of the Office, under travel of staff, as follows:

- (a) **Policymaking organs.** A decrease of \$900;
- (b) **Executive direction and management.** A decrease of \$500;
- (c) **Subprogramme 1, Human rights mainstreaming, right to development, and research and analysis.** A decrease of \$2,000;
- (d) **Subprogramme 2, Supporting human rights treaty bodies.** A decrease of \$1,100;
- (e) **Subprogramme 3, Advisory services, technical cooperation and field activities.** A decrease of \$800;
- (f) **Subprogramme 4, Supporting the Human Rights Council, its subsidiary bodies and mechanisms.** An increase of \$6,800;
- (g) **Programme support.** A decrease of \$1,500.

Other assessed resources

24.111 As reflected in table 24.20 (2) and table 24.21 (2), the Office receives other assessed resources under the support account for peacekeeping operations. For 2023, the projected resources amount to \$2,378,700, including eight posts and two positions. This represents a net increase of \$31,700, or 1.4 per cent, compared with the resource level of 2022. Other assessed resources represent 0.6 per cent of the total resources for the Office. The resources support the activities of the Peace Missions Support Section, the Methodology, Education and Training Section, and the Africa Branch of the Field Operations and Technical Cooperation Division in their contributions to a number of expected results, established by the General Assembly. Resources are also proposed for undertaking strategic and technical assessment missions to peacekeeping operations, in the context of planning exercises or operational support visits, to advise on the effective integration of human rights into peacekeeping operations, including for the further implementation of the human rights due diligence policy on United Nations support to non-United Nations forces.

Extrabudgetary resources

- 24.112 As reflected in table 24.20 (3) and table 24.21 (3), the Office receives both cash and in-kind contributions, which complement regular budget resources. In 2023, extrabudgetary resources (cash contributions) are estimated at \$256,955,100 and would provide for 1,193 posts, as presented in table 24.21 (3). Further details are provided under the respective components below. Anticipated in-kind contributions will provide for rent-free premises with an estimated value of \$528,700, and the provision of an armoured vehicle and running costs with an estimated value of \$60,400. Extrabudgetary resources represent 63.7 per cent of the total resources of the Office.
- 24.113 The authority to oversee the use of extrabudgetary resources rests with OHCHR, in accordance with the delegation of authority by the Secretary-General.

Policymaking organs

- 24.114 The resources proposed under this component would provide for requirements relating to standing intergovernmental organs and expert bodies, including the Human Rights Council and its Advisory Committee, and the expert committees established under the core international human rights treaties, the servicing of which is the responsibility of OHCHR. The Council and the treaty bodies meet throughout the year in formal sessions in Geneva and, in some cases, undertake follow-up missions to relevant countries. Table 24.25 provides information on the standing intergovernmental organs and related resource requirements under the regular budget.

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2022 appropriation</i>	<i>2023 estimate (before recosting)</i>
Committee on the Rights of the Child	The Committee on the Rights of the Child monitors the implementation of the Convention on the Rights of the Child by examining periodic reports submitted by the States parties (196 States). The Committee also monitors the implementation of the Optional Protocols to the Convention, on the sale of children, child prostitution and child pornography (176 States parties) and on the involvement of children in armed conflict (170 States parties) through the examination of reports. The Committee also monitors the implementation of the Optional Protocol to the Convention on an individual communications procedure, which gives the Committee competence to receive and consider communications submitted by or on behalf of individuals or groups of individuals in States parties (to date, 44 States) concerning alleged violations of the Convention. In accordance with article 13 of the Optional Protocol on a communications procedure, the Committee is empowered to conduct inquiries into grave or systematic violations of the Convention by a State party.	Mandate: In accordance with article 43 of the Convention on the Rights of the Child, adopted by the General Assembly in its resolution 44/25 , annex Membership: 18 experts Number of sessions in 2023: 3 (13.5 weeks of meetings)	1 145.2	1 145.1
Committee on Economic, Social and Cultural Rights	The Committee on Economic, Social and Cultural Rights monitors the implementation of the International Covenant on Economic, Social and Cultural Rights by examining periodic reports submitted by the 170 States parties and making general recommendations to the Economic and Social Council. The Committee also monitors the implementation of the Optional Protocol to the Covenant, which was adopted by the Council in its resolution 8/2 and the General Assembly in its resolution 63/117 and entered into force on 5 May 2013. The Optional Protocol gives the Committee competence to receive and consider communications submitted by or on behalf of individuals or groups of individuals in States parties that have made such a declaration (to date, 24 States) concerning alleged violations of the Covenant. In accordance with article 11 of the Optional Protocol, the Committee is empowered to conduct inquiries into grave or systematic violations of the Covenant by a State party.	Mandate: Economic and Social Council resolution 1985/17 Membership: 18 experts Number of sessions in 2023: 2 (11.6 weeks of meetings)	822.2	822.1
Committee on the Elimination of Discrimination against Women	The Committee on the Elimination of Discrimination against Women reviews reports of States parties to the Convention on the Elimination of All Forms of Discrimination against Women (to date, 189 States) submitted in accordance with article 18 of the Convention and formulates concerns and recommendations. The Committee is mandated under the Optional Protocol to the Convention to receive and consider communications from individuals or groups of individuals and adopt its views with respect to such communications. It is also empowered, in accordance with article 8 of the Optional Protocol, to conduct inquiries into grave or systematic violations of the Convention in States parties to	Mandate: In accordance with article 17 of the Convention on the Elimination of All Forms of Discrimination against Women, adopted by the General Assembly in its resolution 34/180 , annex Membership: 23 experts Number of sessions in 2023: 3 (14 weeks of meetings)	1 189.6	1 189.5

	(182 States) concerning their compliance with their obligations under the Convention and individual communications concerning violations of the Convention by States parties (58 States) that have accepted the optional procedure under article 14 of the Convention.	General Assembly in its resolution 2106 A (XX) Membership: 18 experts Number of sessions in 2023: 3 (10 weeks of meetings)		
Committee on the Rights of Persons with Disabilities	The Committee on the Rights of Persons with Disabilities reviews reports of States parties to the Convention on the Rights of Persons with Disabilities (to date, 181 States) submitted in accordance with article 35 of the Convention. States parties must report initially within two years after entry into force and thereafter every four years. The Committee examines each report and makes such suggestions and general recommendations as it may consider appropriate and forwards these to the State party concerned. The Optional Protocol to the Convention, which was also adopted by the General Assembly in its resolution 61/106, gives the Committee competence to receive and consider communications submitted by or on behalf of individuals or groups of individuals in States parties (to date, 95 States) concerning alleged violations of the Convention. In accordance with article 6 of the Optional Protocol, the Committee is empowered to conduct inquiries into grave or systematic violations of the Convention by a State party.	Mandate: In accordance with article 34 of the Convention on the Rights of Persons with Disabilities, adopted by the General Assembly in its resolution 61/106 Membership: 18 experts Number of sessions in 2023: 2 (8 weeks of meetings)	1 194.9	1 194.8
Committee on Enforced Disappearances	The Committee on Enforced Disappearances reviews reports of States parties to the International Convention for the Protection of All Persons from Enforced Disappearance (to date, 62 States) submitted in accordance with article 29 of the Convention. The Committee also receives individual communications under the procedure in article 31 of the Convention for those States parties that have accepted the competence of the Committee (22 States), as well as requests for urgent action from relatives or legal representatives of disappeared persons. It may also receive and consider communication in which a State party claims that another State party is not fulfilling its obligations under the Convention pursuant to article 32 of the Convention if both States parties have made such a declaration (23 States). In compliance with article 33, one or more members of the Committee may undertake country visits in cases in which the Committee receives reliable information that a State party is seriously violating the provisions of the Convention.	Mandate: General Assembly resolution 61/177 Membership: 10 experts Number of sessions in 2023: 2 (4 weeks of meetings)	447.2	447.1
Chairs of the human rights treaty bodies	An annual meeting of persons chairing the human rights treaty bodies has been convened since 1995 in order to discuss topics of mutual relevance and ensure coherence in their working methods and procedures. The meetings are attended by the Chairs, or their representatives, of the Human Rights Committee; the Committee on Economic, Social and Cultural Rights; the Committee on the Elimination of Racial Discrimination; the	Mandate: General Assembly resolution 49/178 Membership: 10 experts Number of sessions in 2023: 1	76.8	76.8

Special Committee to Investigate Israeli Practices Affecting the Human Rights of the Palestinian People and Other Arabs of the Occupied Territories	The Special Committee investigates Israeli practices affecting the human rights of the population of the occupied territories. The Committee undertakes a two-week field mission to the Middle East annually in order to hear witnesses with recent and first-hand information about the situation of human rights in the occupied territories. The Committee meets in Geneva during the Human Rights Council's consideration of the human rights situation in the State of Palestine and other occupied Arab territories. The members of the Special Committee also meet at Headquarters in New York to present their report and participate in the deliberations of the Special Political and Decolonization Committee (Fourth Committee) of the General Assembly.	Mandate: General Assembly resolution 2443 (XXIII) Membership: 3 government officials Number of sessions in 2023: 1	85.8	85.7
Human Rights Council	The Human Rights Council was established as a subsidiary organ of the General Assembly, replacing the Commission on Human Rights and assuming its role and responsibilities as the principal international organ for human rights. The Council is composed of 47 members, for staggered three-year terms. The Council meets regularly throughout the year in Geneva for a minimum of three sessions annually, for a total duration of no fewer than 10 weeks. The Council may also hold special sessions when needed. The Council also holds panel discussions during each of its three regular sessions. By its resolution 60/251 , the General Assembly also mandated the Council to undertake a universal periodic review of the fulfilment by each State of its human rights obligations and commitments. A number of working groups have also been established by the Council (and the Commission), which meet regularly throughout the year to consider specific human rights issues and report to the Council with legal opinions and recommendations.	Mandate: General Assembly resolution 60/251 Membership: 47 government officials Number of sessions in 2023: 3	262.1	235.1
Human Rights Council Advisory Committee	The Human Rights Council, in its resolution 5/1, established the Human Rights Council Advisory Committee as its subsidiary body to undertake research and prepare advisory reports on pertinent human rights topics, as requested, and implement a complaint procedure, with the mandate to examine the communications received under the complaint procedure and to bring to the attention of the Council consistent patterns of gross and reliably attested violations of human rights and fundamental freedoms occurring in any part of the world and under any circumstances. The Committee will hold two sessions annually.	Mandate: Paragraph 6 of General Assembly resolution 60/251 Membership: 18 experts Number of sessions in 2023: 2	338.6	338.6

Part VI Human rights and humanitarian affairs

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2022 appropriation</i>	<i>2023 estimate (before recosting)</i>
Office of the President of the Human Rights Council	The Office of the President of the Human Rights Council was established to formalize the ongoing procedural and organizational roles of the President, as described in the annex to Council resolution 5/1, to support the President in the fulfilment of his or her tasks and enhance efficiency and institutional memory in this regard.	Mandate: Human Rights Council decision 17/118	376.6	376.6
Total			10 396.9	10 369.0

24.115 The proposed regular budget resources for 2023 amount to \$10,369,000 and reflect a decrease of \$27,900 compared with the appropriation for 2022. The proposed decrease is explained in paragraphs 24.108 (a) and 24.110 (a). Additional details on the distribution of the proposed resources for 2023 are reflected in table 24.26 and figure 24.XVII.

Figure 24.XVII
Policymaking organs: distribution of proposed resources for 2023 (before recosting)
 (Thousands of United States dollars)

Extrabudgetary resources

24.116 Extrabudgetary resources for policymaking organs are estimated at \$828,800 and would provide for one post (1 General Service (Other level)), as well as non-post resources. The resources would be used mainly to provide support to the policymaking organs through the webcasting of sessions and an individual project established to provide support to the Subcommittee on Prevention of Torture. The increase of \$39,400 is due mainly to anticipated additional contributions and visits to be undertaken by the Subcommittee.

Executive direction and management

24.117 The executive direction and management of OHCHR comprises the Executive Office of the United Nations High Commissioner for Human Rights; the Policy, Planning, Monitoring and Evaluation Service; the External Outreach Service; the Safety and Security Section; and the New York Office.

24.118 The High Commissioner is the United Nations official with principal responsibility for United Nations human rights activities, in accordance with the mandate entrusted to the High Commissioner by the General Assembly in its resolution 48/141. The High Commissioner advises the Secretary-General on the policies of the United Nations in the area of human rights and is responsible for coordinating human rights activities throughout the United Nations system and for rationalizing, adapting, strengthening and streamlining the United Nations machinery in the area of human rights, with a view to improving its efficiency and effectiveness.

24.119 The High Commissioner provides overall executive direction, management, policy guidance and leadership for the implementation of the United Nations human rights programme.

24.120 The Deputy High Commissioner assists the High Commissioner in the overall direction and management of OHCHR. In addition, the executive management responsibilities of the Deputy High Commissioner include the direct supervision of all OHCHR divisions in support of the High Commissioner and the direct supervision of OHCHR-wide functions centralized in executive direction and management and programme support. The Assistant Secretary-General, who is the head of the New York Office, allows for participation at the appropriate level in executive decision-making processes and ensures principal-level representation and access to high-level policy discussions, improving the overall efficiency and effectiveness of OHCHR.

24.121 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, OHCHR is integrating environmental management practices into its operations. In 2019, OHCHR achieved full “carbon neutral” status by offsetting the carbon emissions from its operations, based on 2018 data. The Office continued to reduce its carbon footprint by digitizing existing work processes; encouraging “soft commuting” and the use of OHCHR-supplied bicycles, rather than private vehicles, between office locations; measuring annual electricity use at headquarters in order to monitor and encourage reduced consumption; and increased the use of desktop conferencing to reduce travel. OHCHR field presences have also been encouraged to calculate their own individual footprints and develop their own emission reduction plans.

24.122 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 24.27. OHCHR continues to use the available work processing data to monitor and manage compliance with the advance purchase of tickets for air travel policy.

Part VI Human rights and humanitarian affairs

24.123 The proposed regular budget resources for 2023 amount to \$7,995,300 and reflect a decrease of \$500 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 24.110 (b). Additional details on the distribution of the proposed resources for 2023 are reflected in table 24.28 and figure 24.XVIII.

Extrabudgetary resources

24.124 Extrabudgetary resources for executive direction and management are estimated at \$27,037,800 and would provide for 84 posts (2 D-1, 9 P-5, 25 P-4, 33 P-3, 1 P-2/1 and 14 General Service (Other level)),

as well as non-post resources. The resources would be used to assist in the overall executive direction and management of OHCHR, including planning, coordination, management, fundraising and communications, and the assessment of the programme of work/strategic plan of the Office. The expected increase of \$1,287,500 is due mainly to the need to provide coordination and management in line with the increased demand by Member States, as well as investments in outreach and communication.

Programme of work

Subprogramme 1

Human rights mainstreaming, right to development, and research and analysis

24.125 The proposed regular budget resources for 2023 amount to \$17,738,800 and reflect a net decrease of \$1,065,800 compared with the appropriation for 2022. The proposed decrease is explained in paragraphs 24.108 (b), 24.109 (a) and 24.110 (c). Additional details on the distribution of the proposed resources for 2023 are reflected in table 24.29 and figure 24.XIX.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

24.126 Extrabudgetary resources for the subprogramme are estimated at \$23,927,500 and would provide for 61 posts (4 P-5, 29 P-4, 16 P-3, 1 P-2/1 and 11 General Service (Other level)), as well as non-post resources. The resources would be used mainly to support research and analysis to develop linkages between human rights and development, develop tools to assist other United Nations agencies and programmes in integrating human rights into their activities and implement the right to development at the national level. The expected increase of \$1,139,500 is due mainly to the expansion in demand for tools and training in the area of human rights.

**Subprogramme 2
 Supporting human rights treaty bodies**

24.127 The proposed regular budget resources for 2023 amount to \$16,462,500 and reflect a decrease of \$1,100 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 24.110 (d). Additional details on the distribution of the proposed resources for 2023 are reflected in table 24.30 and figure 24.XX.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

24.128 Extrabudgetary resources for the subprogramme are estimated at \$15,505,500 and would provide for 16 posts (1 P-3, 9 P-2/1 and 6 General Service (Other level)), as well as non-post resources. The resources would be used mainly to support the work of the treaty bodies, including the servicing and organization of their meetings, and the preparation of missions and reports thereon, as well as providing grants to organizations to aid victims of torture and slavery. The expected increase of \$738,300 is due mainly to increased demand for human rights work in the area of victims of torture and slavery.

Subprogramme 3

Advisory services, technical cooperation and field activities

24.129 The proposed regular budget resources for 2023 amount to \$62 754,400 and reflect a net increase of \$11,751,500 compared with the appropriation for 2022. The proposed increase is explained in paragraphs 24.108 (c), 24.109 (b) and 24.109 (e). Additional details on the distribution of the proposed resources for 2023 are reflected in table 24.31 and figure 24.XXI.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

24.131 Extrabudgetary resources for the subprogramme are estimated at \$165,090,000 and would provide for 922 posts (3 D-1, 53 P-5, 96 P-4, 138 P-3, 18 P-2/1, 1 General Service (Principal level), 294 General Service (Other level) and 319 National Professional Officer), as well as non-post resources. The resources would be used mainly to support OHCHR work undertaken in the field at more than 80 locations worldwide, including through regional offices, country-specific offices established at the request of Governments, the placement of human rights advisers in United Nations country teams and complementary work undertaken by the human rights components of United Nations peacekeeping and special political missions. The expected increase of \$7,861,400 is due mainly to the increased demand from Member States to establish field presences, in accordance with agreements with host countries, and an increase in training activities and seminars.

**Subprogramme 4
 Supporting the Human Rights Council, its subsidiary bodies and mechanisms**

24.132 The proposed regular budget resources for 2023 amount to \$24,159,100 and reflect a net decrease of \$338,500 compared with the appropriation for 2022. The proposed decrease is explained in paragraphs 24.108 (d) and 24.110 (f). Additional details on the distribution of the proposed resources for 2023 are reflected in table 24.33 and figure 24.XXII.

Figure 24.XXII
Subprogramme 4: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

24.133 Extrabudgetary resources for the subprogramme are estimated at \$17,181,800 and would provide for 56 posts (7 P-4, 20 P-3, 14 P-2/1 and 15 General Service (Other level)), as well as non-post resources. The resources would be used mainly to complement the support of the work of the special procedure mandate holders, primarily the preparation of their missions. They would also provide for staffing under the Human Rights Council Branch and would be earmarked to three trust funds established by the Human Rights Council. The expected increase of \$818,100 is due mainly to anticipated demand for activities under the three earmarked trust funds.

Programme support

24.134 In order for OHCHR to fully implement its mandate at both headquarters and its more than 50 field presences, Programme Support and Management Services provides support in the form of budgeting and financial management; recruitment and human resources management; procurement, asset management and general logistical support for field activities; travel and information technology; and staff development and training. This includes budgeting and financial management; recruitment, staff administration and the coordination of staff development activities; general administrative services, including travel services for staff members and members of intergovernmental and expert bodies as well as for special rapporteurs, special representatives and independent experts, and the management of premises; and information management and technology support, including technical development and operational maintenance of the OHCHR websites, specialized databases and other systems.

24.135 The proposed regular budget resources for 2023 amount to \$4,789,800 and reflect a decrease of \$1,500 in the resource level compared with the appropriation for 2022. The proposed decrease is explained in paragraph 24.110 (g). Additional details on the distribution of the proposed resources for 2023 are reflected in table 24.34 and figure 24.XXIII.

Table 24.34

Figure 24.XXIII
Programme support: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

24.136 Extrabudgetary resources for the subprogramme are estimated at \$7,383,700 and would provide for 53 posts (6 P-4, 5 P-3, 3 General Service (Principal level) and 39 General Service (Other level)), as well as non-post resources. Extrabudgetary resources would provide for support activities, including human resources and financial and administrative services related to extrabudgetary activities in all OHCHR locations around the world. The expected increase of \$351,500 is due mainly to an increased need for support activities in line with the expected increase in activities by the subprogrammes.

II. Committee on Missing Persons in Cyprus

- 24.137 The Committee on Missing Persons in Cyprus was established in 1981 by agreement between the Greek Cypriot and Turkish Cypriot communities in Cyprus. The tripartite Committee is composed of one member appointed by the leader of each of the two Cypriot communities and a third member (United Nations member) selected by the International Committee of the Red Cross and appointed by the Secretary-General.
- 24.138 The overall objective of the Committee is to ascertain the fate of persons reported missing following intercommunal fighting (1963–1964) and the events of 1974. In addition, following the agreement of 31 July 1997 between the leaders of both Cypriot communities, the Committee has been entrusted with an additional role in 2006: the facilitation of exchanges of information on possible burial sites and the arrangement of the exhumation, identification and return of remains of Greek Cypriot and Turkish Cypriot missing persons. As time passes, the Committee has increased its efforts to locate more burial sites by hiring and training new investigators and investing in modern technologies.
- 24.139 The United Nations is responsible only for the expenses of the third member, his/her Special Assistant and Administrative Assistant and the miscellaneous operating expenses of the office of the third member. The provisions in the proposed programme budget for 2023 reflect continuity in the Committee's activities. Based on existing information regarding suspected burial sites, the Committee's work is expected to continue at the current level of activity for at least another four to five years. It is assumed that, even with a solution of the Cyprus problem, the involvement of the United Nations in the work of the Committee would likely need to continue for several years to come.
- 24.140 While the Committee's scientific and technical operations are financed primarily under a separate budget (fundraised by the Committee and managed by the United Nations Development Programme), the United Nations budget covers the traditional activities of the office in relation to mediation work, the management of operations, active research and the fundraising efforts of the Committee.
- 24.141 As the Committee secretariat, the office of the third member follows up on the implementation of all Committee decisions and leads the Committee project's operational coordination. The office of the third member is accountable to the Department of Political and Peacebuilding Affairs at United Nations Headquarters. The third member also works in close consultation with the Special Representative of the Secretary-General in Cyprus. The office ensures the smooth running of the bicomunal component of the project that employs more than 100 locally recruited Greek Cypriot and Turkish Cypriot scientists. An international forensic group and the International Committee of the Red Cross act as quality control mechanisms for the Committee laboratory staff members.
- 24.142 The proposed regular budget resources for 2023 amount to \$620,900 and reflect no change in the resource level compared with the appropriation for 2022. Additional details are reflected in table 24.35. The proposed resource level provides for the full, efficient and effective implementation of the mandate.

Annex II

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions (A/76/7)

The Advisory Committee trusts that a breakdown of the resources allocated to the three components of subprogramme 1, human rights mainstreaming, right to development, and research and analysis, will be included as a matter of routine in future budget proposals (paragraph VI.3).

The Advisory Committee stresses that, notwithstanding the recent streamlining of the report on revised estimates, there is a need for further clarity, review and potential consolidation of the totality of the resources for section 24, Human rights, as they pertain to one-time and to perennial and continuous mandates emanating from Human Rights Council decisions and resolutions, which arise multiple times during the budget year. The Committee trusts that the Secretary-General will present further clarifications on the potential consolidation and presentation of resources for section 24 to the General Assembly during the consideration of the present report and an update in the next programme budget submission (paragraph VI.19).

The Advisory Committee trusts that the Secretary-General will present a detailed update on the work of the Investigations Support Unit to the General Assembly at the time of its consideration of the present report, as well as in the next budget report (paragraph VI.22).

A breakdown of the resources is provided in the supplementary budgetary information.

The Secretariat provided clarifications on the potential consolidation and presentation of resources for section 24 to the General Assembly at its seventy-sixth session during its consideration of [A/76/6 \(Sect.24\)](#).

In the present report, the Secretary-General has included resource proposals to implement mandates emanating from the forty-ninth session of the Human Rights Council, in 2022, and full-year resource proposals to implement mandates of a renewable nature that have been established into 2023 in the forty-ninth session or are expected to be extended into 2023 during the fifty-first session of the Council.

An update on the work of the Investigations Support Unit is provided in the supplementary budgetary information.

Foreword

Some 84 million people around the world have been forcibly displaced, roughly twice the number of a decade ago. The landscape in the past few years has been characterized by protracted displacement, recurring conflict and new crises, while the coronavirus disease (COVID-19) pandemic has continued to exact a toll on the health and socioeconomic situation of refugees, internally displaced persons and stateless people. The pandemic not only had an impact on the ability of those fleeing conflict and persecution to access asylum, but also hindered efforts by aid organizations to ensure adequate health care, food security and livelihoods. Progress on improving access to education and gender equality suffered setbacks. Gender-based violence remained a serious risk, and conditions for women and girls often worsened during the pandemic. Climate change also contributed to the complex set of drivers of forced displacement.

With the upward trend in forced displacement expected to continue, the Office of the United Nations High Commissioner for Refugees (UNHCR) will strengthen its emergency response capacity to address the many challenges. The Office will not lose sight of solutions, which – together with protection – remain central to its mandate. While seeking to expand third-country solutions for refugees, including resettlement and complementary pathways, UNHCR will also deepen its engagement with development partners, the private sector and financial institutions to strengthen livelihoods and inclusion and to create conditions for return in countries of origin.

None of this will be easy, and it cannot be done alone. The global compact on refugees provides the blueprint for collective action, and UNHCR will endeavour, in cooperation with States and a broad range of stakeholders at the global, regional, national and local levels, to safeguard protection and drive forward solutions, including by seeking to address the root causes of displacement. Critical to this process will be more meaningful burden- and responsibility-sharing among States and stakeholders and even greater solidarity with displaced and stateless people until a durable solution to their plight is found.

(Signed) Filippo **Grandi**
United Nations High Commissioner for Refugees

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 25.1 The Office of the United Nations High Commissioner for Refugees (UNHCR) is responsible for leading and coordinating international action for the protection of refugees and the search for solutions to their plight. Its mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolution 319 A (IV), by which the Assembly established the Office, and resolution 428 (V), which sets out its statute. In addition, the international legal basis for the protection of refugees finds its principal expression in the Convention relating to the Status of Refugees, of 1951, and the Protocol relating to the Status of Refugees, of 1967. UNHCR also has responsibilities for stateless persons pursuant to paragraph 6 (A) (ii) of its statute and article I (A) (2) of the 1951 Convention with regard to refugees who are stateless, as well as to various General Assembly resolutions, including resolutions 3274 (XXIX) and 31/36 in relation to the Convention relating to the Status of Stateless Persons, of 1954, and the Convention on the Reduction of Statelessness, of 1961. Over the years, the mandate of UNHCR has been extended to other groups through various Assembly resolutions. UNHCR provides protection and assistance to internally displaced persons, working in cooperation with the Under-Secretary-General for Humanitarian Affairs and Emergency Relief Coordinator and in the context of the collaborative response of the United Nations system, as well as with the consent of the State concerned.

Programme of work

International protection, durable solutions and assistance to refugees

Objective

- 25.2 The objective, to which this programme contributes, is to ensure international protection for refugees and other persons of concern to UNHCR (A/AC.96/1213/Rev.1, para. 3), and to achieve durable solutions to their plight, in cooperation with States and other organizations, without discrimination.

Strategy and external factors for 2023

- 25.3 To contribute to the objective, UNHCR will:
- (a) Advocate adherence by States to relevant international instruments, including the refugee and statelessness conventions, and regional instruments;
 - (b) Collaborate with States and other partners to ensure that the attainment of durable solutions to displacement influences broader development agendas and is central to peacebuilding efforts, and advocate and support measures that foster inclusion, including with respect to educational opportunities, and access to formal economies and the labour market;
 - (c) Support implementation of the global compact on refugees,¹ in close cooperation with States and other relevant stakeholders, advocate greater financial support for refugee host countries and communities, follow up on pledges made at the first Global Refugee Forum,² held in 2019, and redouble efforts to expand international cooperation and burden- and responsibility-sharing;

¹ See www.unhcr.org/the-global-compact-on-refugees.html.

² See www.unhcr.org/global-refugee-forum.html.

- (d) Promote adequate and proper reception conditions for asylum seekers, alternatives to detention and the fair treatment of protection claims, including through collaboration with national and local authorities and civil society to strengthen and expand reception facilities, develop transitional accommodation and ensure effective assistance, focusing on women and children and the needs of the most vulnerable;
 - (e) Raise awareness of protection principles and refugee law, and provide training for government officials and partner staff;
 - (f) Enhance protection and assistance for internally displaced persons, in line with relevant General Assembly resolutions, including resolution [76/167](#), in close collaboration with partners in the United Nations system and non-governmental organizations (NGOs) and under the Inter-Agency Standing Committee coordination system;
 - (g) Swiftly react to new humanitarian crises, including in conflict-affected areas, by providing humanitarian assistance, distributing cash-based assistance and core relief items, providing shelter assistance, working with national and local authorities and other agencies, and monitoring and addressing protection risks and needs;
 - (h) Advocate the prevention and reduction of statelessness, as well as the protection of stateless persons, including by promoting accession to the relevant international instruments and working with States to facilitate the acquisition, reacquisition or confirmation of nationality by stateless persons.
- 25.4 By adopting inclusive and comprehensive approaches, UNHCR will contribute to relevant goals contained in the 2030 Agenda for Sustainable Development, ensuring that persons of concern are not left behind in development processes ([A/AC.96/1213/Rev.1](#), para. 61 and table I.17). This work will involve leveraging development partnerships, in the spirit of the global compact on refugees; collaborating with governments and partners to promote the inclusion of persons of concern in national emergency preparedness and response plans; and responding to emergency situations, in line with its strategy on accountability to affected populations. The work of UNHCR will be guided by its new global results framework, launched for 2022, which was utilized for the first time to guide the 2022 planning and budgeting process. UNHCR will continue to refine elements of its organizational transformation to enhance its effectiveness and predictability in responding to humanitarian crises.
- 25.5 For 2023, the Office's planned deliverables will support Member States in their ongoing management of and recovery from the coronavirus disease (COVID-19) pandemic. Such planned deliverables and activities include support to host countries in managing their response to and recovery from the COVID-19 pandemic, with an emphasis on the inclusion of persons of concern.
- 25.6 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. Examples of lessons learned and best practices include updating business continuity protocols and upgrading emergency preparedness and response measures. These special measures related to COVID-19 will continue in 2023 and include the award of increased budgetary flexibility to partners, more extensive use of digital technologies and a stronger risk-based approach to project monitoring. UNHCR will also leverage delegated authorities and emergency procurement provisions to bolster regional supplies of core relief items, and cash-based interventions will be implemented using contactless operating modalities more extensively. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objective, strategy and mandates and would be reported as part of the programme performance information.
- 25.7 The above-mentioned work is expected to result in:
- (a) Key advances in the response to refugee situations through more predictable and equitable burden- and responsibility-sharing, through a multi-stakeholder approach, consistent with the global compact on refugees;

- (b) Strengthened national asylum systems;
 - (c) Some 90,000 previously stateless individuals acquiring or confirming nationality;
 - (d) Improved access to protection and assistance for 24 million refugees and asylum seekers through registration in the Population Registration and Identity Management EcoSystem (PRIMES);
 - (e) Some 11 million persons of concern accessing protection services because of the Office's focus on mitigating the effects of COVID-19;
 - (f) Strategically-located global stockpiles being deployed to meet the needs of up to 600,000 people in any given emergency situation.
- 25.8 With regard to the external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) Security conditions in most countries will allow UNHCR to carry out its programmes, although vigilance will be required owing to the presence of armed groups and violence against humanitarian workers;
 - (b) Humanitarian access will be granted in most countries, enabling UNHCR to respond to urgent protection and assistance needs;
 - (c) States and the international community at large will remain committed to contributing to and supporting implementation of the global compact on refugees;
 - (d) Asylum space in some countries will be narrowed, with increasingly restrictive admission and asylum policies towards refugees and asylum seekers, requiring enhanced protection responses;
 - (e) Significant gaps in voluntary funding will hamper the operational scope of assistance provided by UNHCR, particularly if there is no increase in resources commensurate with the increased needs of persons of concern.
- 25.9 Partnerships will remain key to achieving the programme plan. UNHCR will work closely with an array of partners at the global, regional, national and local levels, including governments, regional organizations, international humanitarian and development organizations, financial institutions, NGOs, the private sector, academia and persons of concern. UNHCR will remain committed to the principle of participation, ensuring that persons of concern who benefit from the programme activities should be consulted over decisions that affect their lives. The engagement of partners beyond the traditional humanitarian sphere will be critical to mobilizing effective responses and pursuing solutions to forced displacement and statelessness. UNHCR reached its Grand Bargain commitment of providing 25 per cent of its programme expenditure through local and national responders in 2019. Preliminary data for 2021 reflect sustained commitment, with disbursements to national and local responders estimated at \$751 million, or 25 per cent of programme expenditure.
- 25.10 With regard to the United Nations system, UNHCR will cooperate closely with the resident coordinator system, Humanitarian Coordinators and United Nations country teams to ensure that overarching protection and solutions strategies are taken into account, including by supporting the implementation of the Secretary-General's action agenda on internal displacement. UNHCR will share its expertise and provide advice on protection matters to its partners within the United Nations, ensuring the centrality of protection throughout the humanitarian response. UNHCR will remain engaged in relevant United Nations forums, particularly the Inter-Agency Standing Committee and the United Nations System Chief Executives Board for Coordination. It will also contribute to the quadrennial comprehensive policy review in support of the 2030 Agenda for Sustainable Development.
- 25.11 UNHCR integrates a gender perspective in its operational activities, deliverables and results, as appropriate. It will remain committed to a non-discriminatory approach and to the needs of the vulnerable. UNHCR will pay particular attention to gender equality and redouble efforts to prevent gender-based violence, ensuring that victims have access to health care, psychosocial support, safe shelter and legal aid. Community engagement will be strengthened and awareness-raising initiatives prioritized in this regard.

- 25.12 In line with the United Nations Disability Inclusion Strategy,³ UNHCR will implement its 2020–2024 action plan for disability inclusion. It will seek to identify persons of concern with disabilities during registration exercises to better target their needs. UNHCR will leverage the International Disability Alliance to advance the plan. UNHCR will engage persons with disabilities and relevant organizations in its capacity-building activities on disability inclusion in displacement and statelessness situations, advocate disability inclusion in key humanitarian forums, including the Global Refugee Forum, and ensure policy implementation and monitoring.

Evaluation activities

- 25.13 UNHCR publishes its evaluation workplan, evaluation reports and management responses to recommendations stemming from evaluations on its public evaluation webpage.⁴ Since 2021, UNHCR has required country operations and regional bureaux to prepare multi-year monitoring and evaluation plans. The following evaluations completed in 2021 have guided the proposed programme plan for 2023:
- (a) Evaluations undertaken by the UNHCR Evaluation Service, covering:
 - (i) Strategic and centralized evaluations of UNHCR performance in several areas, including asylum capacity development, statelessness, UNHCR engagement on development cooperation and the response to internal displacement;
 - (ii) Decentralized evaluations and reviews of UNHCR performance in respect of a number of initiatives, including child protection programming and caring for refugees with non-communicable diseases;
 - (b) Joint evaluations on United Nations system-wide performance relating to the protection of the rights of refugees during the COVID-19 pandemic and the Blueprint for Joint Action for Refugee Children project with the United Nations Children’s Fund;
 - (c) Evaluations undertaken by the Office of Internal Oversight Services and the Joint Inspection Unit.
- 25.14 The organizational priorities of UNHCR will continue to be informed by evaluations and based on lessons learned. For example, key recommendations of the evaluation of initiatives to end statelessness will strengthen the organization’s responses and bolster efforts made by stakeholders in the final years of the #IBelong campaign and beyond. The Cyclone Idai evaluation is influencing a revision of the organization’s emergency preparedness and response policy aimed at strengthening the predictability of its response to future natural disasters.
- 25.15 Further efforts will be made to ensure that evaluation findings are more accessible and to promote their uptake and use, including through videos, interactive online briefs and presentations, and synthesis reports.
- 25.16 The following evaluations by UNHCR of its global strategies and policies are planned for 2023:
- (a) Evaluations of:
 - (i) The organization’s regionalization and decentralization process;
 - (ii) The development partnerships, solutions and disengagement strategies;
 - (iii) Multi-year country strategies;
 - (b) Joint Inspection Unit evaluations of UNHCR programmes and operations.

³ See www.un.org/en/content/disabilitystrategy/.

⁴ See www.unhcr.org/evaluation-service.html.

Programme performance in 2021

Impact of the pandemic mitigated for persons of concern

- 25.17 UNHCR focused on bolstering public health services, water, sanitation and hygiene activities, education programming and the provision of shelter and core relief items for persons of concern. UNHCR also addressed protection and socioeconomic needs arising from the situation. The activities were particularly targeted at individuals who were newly vulnerable as a result of loss of income and livelihoods or who were already vulnerable but whose situation had further deteriorated. Specific attention was paid to women and girls owing to heightened risks stemming from the pandemic.
- 25.18 UNHCR worked to address the challenges by swiftly identifying needs, reprioritizing and reallocating resources and introducing measures to increase flexibility in its working processes. It adjusted programmes to mitigate the impact of the virus and ensure the continuity of essential protection and assistance services. UNHCR advocated equal access to vaccines for persons of concern and carried out information campaigns about risks and mitigation measures associated with the pandemic. In the context of internal displacement, UNHCR ensured an effective COVID-19 response by leveraging its leadership and coordination accountabilities in relation to the Protection, Shelter, and Camp Coordination and Camp Management Clusters.
- 25.19 Progress towards the objective is presented in the performance measure below (see table 25.1).

Table 25.1

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
–	By December 2020, over 15.34 million persons of concern had accessed protection services, and 7.85 million had benefited from cash assistance. Nearly 9.38 million persons of concern had accessed health services, with some 605,000 individuals receiving mental health and psychosocial support and over 1.18 million women and girls receiving comprehensive care	As at 30 June 2021, ^a 11 million persons of concern had accessed protection services, and 4 million had benefited from cash assistance. Some 4.2 million had accessed health services, with more than 200,000 individuals receiving mental health and psychosocial support and over 600,000 women and girls accessing comprehensive health services. Almost 900,000 children were supported with home-based learning

^a Final data for 2021 will be made available in March 2022.

Planned results for 2023

Result 1: emergency deployments in support of persons of concern

Programme performance in 2021 and target for 2023

- 25.20 The work of UNHCR contributed to 198 emergency response deployments from the internal roster, enabling the provision of services in the areas of protection, shelter, water, sanitation and hygiene, cluster and sector coordination, and information management, among others, which exceeded the planned target of 170.
- 25.21 The work of UNHCR also contributed to 102 emergency response deployments from standby partners, which did not meet the planned target of 130. However, standby partner personnel were willing to be deployed for longer periods to adjust to mobility constraints during the travel

restrictions in response to the COVID-19 pandemic, which compensated for the lower number of deployments, so that ultimately UNHCR operations were not negatively affected.

25.22 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 25.I).

Figure 25.I

Performance measure: number of personnel deployed to respond to emergencies (annual)

Result 2: strengthened protection of and enabled durable solutions for refugees and asylum seekers through individual registration

Programme performance in 2021 and target for 2023

25.23 The work of UNHCR contributed to strengthened capacities for registration and documentation, including through digitalization, biometrics and the individual registration of refugees and asylum seekers in PRIMES, resulting in 21.5 million registered persons, which exceeded the planned target of 20 million.

25.24 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 25.II).

Figure 25.II

Performance measure: number of individually registered refugees and asylum seekers (cumulative)

(Millions of persons)

Result 3: solutions through resettlement provided for refugees at risk

Proposed programme plan for 2023

25.25 Resettlement plays a vital role in achieving the UNHCR mandate to provide international protection to refugees and seek durable solutions to their plight. It also represents an area for tangible burden- and responsibility-sharing. The number of refugees with resettlement needs has steadily increased,

reaching 1.47 million in 2022, and is expected to rise further in 2023. UNHCR will support Member States in establishing or expanding resettlement programmes. The Annual Tripartite Consultations on Resettlement⁵ will continue to be the primary vehicle for collaboration with governments, international organizations and NGOs to enhance the use of resettlement and identify and address challenges, while shaping joint strategies. The Office of the United Nations High Commissioner for Refugees will engage with and support new community sponsorship programmes through the Global Refugee Sponsorship Initiative.⁶ It will implement secure methods of transferring personal data in the context of resettlement and complementary pathways, through data-sharing agreements completed with States and partners.

Lessons learned and planned change

- 25.26 The lesson for the programme was that UNHCR and Member States had to adopt more flexible processing mechanisms to mitigate the impact of COVID-19 containment measures. These mechanisms included video interviews and virtual counselling and communications with refugees. The pandemic affected the programme's ability to refer refugees for resettlement. In particular, it affected face-to-face interviews for UNHCR referrals and resettlement country interviews, and also diminished the reception capacity of resettlement countries.
- 25.27 In applying the lesson, UNHCR will streamline flexible processing mechanisms and ensure that resettlement processes remain uninterrupted. Engagement with global stakeholders will continue so that the figure of 3 million refugees who can access third-country solutions by 2028 remains realistic.
- 25.28 Expected progress towards the objective is presented in the performance measure below (see figure 25.III).

Figure 25.III

Performance measure: number of resettled refugees⁷

Legislative mandates

- 25.29 The list below provides all mandates entrusted to the Office.

General Assembly resolutions

319 A (IV)	Refugees and stateless persons	538 B (VI)	Assistance and protection of refugees
428 (V)	Statute of the Office of the United Nations High Commissioner for Refugees	1166 (XII)	International assistance to refugees within the mandate of the United Nations High Commissioner for Refugees

18. Monitoring missions on the implementation of the programme	<i>a</i>	19	40	40
19. Investigations related to cases accepted by the Inspector General's Office	<i>a</i>	1	5	5
Humanitarian assistance missions (number of missions)	30	24	50	50
20. Humanitarian assistance missions undertaken by the UNHCR senior executive team	30	24	50	50
Publications (number of publications)	6	8	6	9
21. Midyear and year-end trends of global forced displacement (formerly the Statistical Yearbook)	1	2	1	2
22. Publications on a range of protection-related themes	5	6	5	7
Technical materials (number of materials)	20	23	20	20
23. Documents and conference room papers for the Executive Committee and the Standing Committee	20	23	20	20
C. Substantive deliverables				
Consultation, advice and advocacy: consultation and advice to Member States in all regions on the establishment of national legal and administrative frameworks in line with protection standards.				
Direct service delivery: biometric registration for some 24 million persons of concern; cash assistance to some 8 million persons of concern across operations; provision of shelter-related relief items to at least 400,000 persons of concern; access to protection services for approximately 14 million persons of concern; access to a sustainable source of electricity for some 2 million persons of concern; provision of legal aid to facilitate the process of acquiring nationality or having it confirmed; at least 85 per cent of UNHCR operations have functioning complaint and feedback mechanisms in place.				
D. Communication deliverables				
Outreach programmes, special events and information materials: special annual events: (a) international consultations with NGOs; (b) High Commissioner's dialogue on protection challenges with States, academics, NGOs and other stakeholders; (c) World Refugee Day, focusing on raising public awareness of refugee issues and increasing support for refugees; and (d) Nansen Refugee Award, which is a yearly event intended to acknowledge people, groups and organizations for their outstanding work on behalf of forcibly displaced people; outreach programmes with at least 80 goodwill ambassadors and other high-profile supporters, spanning all regions and including advocates who are former refugees themselves, to raise awareness and amplify voices of refugees and other persons of concern.				
External and media relations: media briefings and press conferences reaching a global and geographically diverse audience on the work of UNHCR and situations relating to refugees and other persons of concern; regular media engagements on protection and operation-related themes and issues.				
Digital platforms and multimedia content: multimedia content (text, photos and videos) at www.unhcr.org on the work of UNHCR and issues relating to refugees and other persons of concern; UNHCR global social media accounts; the reference website www.refworld.org , containing UNHCR policies and thematic guidelines on protection, information on countries of origin, news and statistics.				

^a Number of deliverables provided at the subcategory level only.

B. Proposed post and non-post resource requirements for 2023

Overview

25.31 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 25.3 to 25.5.

Table 25.3

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2021 expenditure ^a	2022 appropriation	Changes				2023 estimate (before recosting)
			Technical adjustments	New/expanded mandates	Other	Total Percentage	
Post	688.1	677.3	–	–	–	–	677.3
Grants and contributions ^b	42 444.0	41 535.0	–	–	–	–	41 535.0
Total	43 132.1	42 212.3	–	–	–	–	42 212.3

^a At the time of reporting, the expenditures presented in this table and subsequent tables are not final and may be subject to adjustments that could result in minor differences between the information contained in the present report and the financial statements to be published by 31 March 2022.

^b Provides for the full cost of 218 temporary posts (4 D-2, 13 D-1, 20 P-5, 36 P-4, 23 P-3, 12 P-2, 25 GS (PL) and 85 GS (OL)) and contributes to costs for contractual services, general operating expenses and contributions to joint United Nations activities.

25.32 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 25.6 and 25.7.

Note: The following abbreviations are used in tables and figures: ASG, Assistant Secretary-General; GS (OL), General Service (Other level); GS (PL), General Service (Principal level); USG, Under-Secretary-General.

Part VI Human rights and humanitarian affairs

25.33 As reflected in tables 25.6 (1) and 25.7 (1), the overall resources proposed for 2023 amount to \$42,212,300 before recosting, reflecting no change in the resource level compared with the appropriation for 2022. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Figure 25.IV
Distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

- 25.34 As reflected in tables 25.6 (2) and 25.7 (2), the overall extrabudgetary resources amounting to \$8,951,495,700, including for 15,443 posts, will be required to implement the programme of work for UNHCR in 2023. The resources are based on the UNHCR annual programme budget for 2022 (A/AC.96/1213/Rev.1), approved by the Executive Committee of UNHCR in October 2021. The 2022 amount has been used as the budget estimate for 2023 pending the annual planning exercise for 2023, which will be completed in the second quarter of 2022. Extrabudgetary resources represent 99.5 per cent of the total resources required to implement the overall programme of UNHCR.
- 25.35 Anticipated in-kind contributions with an estimated value of \$100,000,000, comprising goods to be distributed to beneficiaries, premises, utilities, transport and personnel provided free of charge, are anticipated for 2023.
- 25.36 The extrabudgetary resources under this section are subject to the oversight of the UNHCR Executive Committee, a subsidiary organ of the General Assembly.

Executive direction and management

- 25.37 The High Commissioner (Under-Secretary-General), who is elected by the General Assembly on the nomination of the Secretary-General, provides the overall direction, supervision and management of UNHCR activities. The functions of the High Commissioner are set out in the statute of UNHCR. In discharging these responsibilities, the High Commissioner is assisted by a Deputy High Commissioner (Assistant Secretary-General).
- 25.38 The executive direction and management component comprises the Executive Office, the Governance Service, the Evaluation Service, the Inspector General's Office, the Ethics Office, the UNHCR Liaison Office in New York and the Global Data Service. Reporting to the Deputy High Commissioner, and also part of executive direction and management, are Enterprise Risk Management, the Ombudsman's Office, the Legal Affairs Service, the Innovation Service and the Transformation and Change Service.
- 25.39 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with paragraph 19 of General Assembly resolution 72/219, UNHCR is increasing its efforts to promote the use of sustainable energy in its operations. The UNHCR Strategic Framework for Climate Action includes the priority placed on reducing the environmental footprint of UNHCR by at least 45 per cent by 2030.
- 25.40 Reporting on and management of carbon dioxide emissions is critical to the UNHCR goal of achieving greenhouse gas neutrality. Data collection systems have been deployed in 363 of the 540 offices worldwide to remotely monitor data on carbon dioxide. The aim for 2023 is to have all offices fitted with these systems. UNHCR also uses satellite data tracking information on its vehicles to monitor their emissions. For all other measurements, offices complete a small survey once a year. UNHCR is working on solarization for offices emitting the largest amounts of carbon dioxide. An innovative financing mechanism has been established to support the transition of UNHCR offices to clean energy. For 2023, the goal is to have five field offices transition to clean energy. Electric vehicles are already in use in UNHCR offices in Jordan and Nepal, and an electric vehicle has been purchased for the High Commissioner. From 2023, UNHCR will start adding electric vehicles to its global fleet management product list.
- 25.41 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 25.9.
- 25.42 In 2021, the compliance rate with the 16-day rule remained at 16 per cent. The nature of the organization's work, which requires rapid deployment of staff at short notice to respond to urgent humanitarian needs, makes early planning of travel difficult. COVID-19-related restrictions continued to negatively affect official travel, often forcing staff to confirm their mission plans at the

Section 25 International protection, durable solutions and assistance to refugees

very last minute. A solution to enable online initiation of travel is being deployed in 2022, which, coupled with changes to the approval workflow, will simplify the overall travel process.

25.43 The proposed regular budget resources for 2023 amount to \$677,300 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 25.10.

Programme of work

25.44 In accordance with article 20 of the UNHCR statute, the Office of the High Commissioner is financed under the budget of the United Nations. Unless the General Assembly subsequently decides otherwise, no expenditure other than administrative expenditures relating to the functioning of the Office of the High Commissioner shall be borne on the budget of the United Nations. All other expenditures relating to the activities of the High Commissioner shall be financed by voluntary contributions. Accordingly, no regular budget resources are estimated under the programme of work component.

25.45 Extrabudgetary resources estimated at \$7,805,278,200, as reflected in table 25.6 (2), would provide for 7,537 posts and non-post requirements. The resources would cover the cost of field operations, projects and programmes necessary to fulfil UNHCR mandates. Such work includes providing international protection for refugees and seeking permanent solutions to their plight.

Programme support

25.46 The programme support component includes the divisions at headquarters and part of the field operations, which develop, formulate, direct and administer programmes and provide programme

evaluation and oversight. They also discharge functions with regard to information technology, financial management, human resources management and administration.

- 25.47 The regular budget provides a grant to support the UNHCR programme support activities. The proposed regular budget resources for the programme support component amount to \$41,535,000 and reflect no change compared with the appropriation for 2022. The grant is intended to cover the cost of 218 temporary posts and part of the related non-post requirements at headquarters.
- 25.48 The provision of a grant for the administrative expenditures of the Office rather than as post and non-post resources was initiated in the biennium 2002–2003 (A/56/6 (Sect. 23), para. 23.20) to simplify the work of the Office by eliminating the need for separate administrative procedures in respect of a portion of the administrative posts, and was subject to review after three bienniums. The results of a review of the lump-sum arrangement and the lessons learned from the full three bienniums of 2002–2003, 2004–2005 and 2006–2007 were reported to the General Assembly at its sixty-third session, in 2008 (see A/63/537). The Assembly, in section VII of its resolution 63/263, endorsed the maintenance of the lump-sum arrangement for the funding of UNHCR in future budget presentations of the proposed programme budget, as recommended by the Advisory Committee on Administrative and Budgetary Questions (A/63/616, para. 10).
- 25.49 Extrabudgetary resources estimated at \$1,146,217,500, as reflected in table 25.6 (2), are budgeted to cover 7,906 posts and non-post costs in respect of programme support functions.

Annex I

Organizational structure and post distribution for 2023

Note: "RB post" indicates one of two posts funded under the regular budget; "RB*" indicates posts that are financed by the grant from the regular budget, shown under the regular budget heading for indicative purposes; the XB posts under headquarters divisions and some services and units include posts located in the Global Service Centres in Budapest and Copenhagen; all posts are calculated in person years.

Abbreviations: ASG, Assistant Secretary-General; GS (OL), General Service (Other level); GS (PL), General Service (Principal level); NPO, National Professional Officer; RB, regular budget; UNHCR, Office of the United Nations High Commissioner for Refugees; USG, Under-Secretary-General; XB, extrabudgetary.

Annex II

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Budgetary and Administrative questions

[A/76/7](#) and [A/76/7/Corr.1](#)

The Advisory Committee reiterates its recommendation that future programme budget proposals should contain a justification for the use of regular budget contributions, in particular for the portion intended for the lump-sum grant, including details of the composition and functions of the 218 posts, the incumbency status, as well as a breakdown of related non-post resources under general operating expenses (see also [A/75/7](#) and [A/75/7/Corr.1](#), para. VI.26). The Committee recalls its comments with respect to the recosting of grants and contributions ([A/74/7](#), para. VI.21), and notes that the lump-sum grant with respect to section 25 is subject to recosting (para. VI.34).

The 218 temporary posts perform management and administration functions and support the Executive Office, the Governance Service, the Division of Strategic Planning and Results, the Inspector General's Office, the Legal Affairs Service, the Ombudsman's Office, the Ethics Office, the Transformation and Change Service, the Division of External Relations, the Division of Information Systems and Telecommunications, the Division of Human Resources and the Division of Financial and Administrative Management. The lump-sum grant covers 218 posts, or 28.9 per cent of the management and administrative posts.

The non-post requirements relate to rental costs, security guard services and contributions to joint United Nations activities.

Details on the composition and functions of the 218 posts and the breakdown of related non-post requirements are provided in the supplementary information to the present report.

Foreword

The United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA) is mandated by the General Assembly to provide assistance and protection to 5.8 million registered Palestine refugees to help them to achieve their full human potential, pending a just and lasting solution to their plight.

The needs of Palestine refugees grow more acute each year, exacerbated by the health, protection and economic impacts of the coronavirus disease (COVID-19) pandemic and, in select fields of Agency operation, closure, protracted armed conflict, occupation and civil unrest. Against this backdrop, some 2.4 million refugees rely on UNRWA as the only steady source of support for their most basic needs, including food, shelter, primary health care and education. Unfortunately, the Agency's ability to deliver critically needed assistance has been eroded by repeated liquidity crises and chronic underfunding, resulting in degraded installations, including UNRWA schools and health centres, an increasingly insecure workforce and, most importantly, a more desperate Palestine refugee population.

Despite these profound challenges, on a daily basis, in classrooms, health centres and camps across the five fields of Agency operation, UNRWA witnesses the determination of refugees to rise above the adversity that surrounds them. Through the provision of adequate, predictable and sustained funding by Member States, the Agency will continue to support this ambition.

(Signed) Philippe **Lazzarini**
Commissioner-General, United Nations Relief and Works Agency
for Palestine Refugees in the Near East

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 26.1 The United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA) is responsible for providing assistance and protection to Palestine refugees. The mandate derives from the priorities established in relevant General Assembly resolutions, including resolution 302 (IV). Since starting operations, in 1950, the Agency has adapted its programmes to meet the increasingly complex needs of Palestine refugees and to provide them with a measure of protection and stability amid chronic uncertainty in the region.

Strategy and external factors for 2023

- 26.2 The mission of UNRWA is to help Palestine refugees to achieve their full potential in human development under the difficult circumstances in which they live. In line with that mission, the Agency works towards five outcomes within its medium-term strategy, which runs until the end of 2022: (a) Palestine refugee rights under international law are protected and promoted; (b) Palestine refugee health is protected and the disease burden is reduced; (c) school-aged children complete quality, equitable and inclusive basic education; (d) Palestine refugee capabilities are strengthened for increased livelihood opportunities; and (e) Palestine refugees are able to meet their basic human needs of food, shelter and environmental health. Under the Agency's next strategic plan, which is currently under development, UNRWA will work towards similar outcomes during 2023.
- 26.3 The Agency aims to achieve its goals by maintaining and improving the provision of education, health, relief and social services, microfinance assistance, infrastructure and camp improvement and protection for the benefit of 5.8 million registered Palestine refugees in Gaza, Jordan, Lebanon, the Syrian Arab Republic and the West Bank, including East Jerusalem. Innovation will continue to play a pivotal role across UNRWA programming, including, for example, in relation to education, where efforts to strengthen digital content will be leveraged in support of new ways of learning, as well as by improving on what is delivered (through digital resources) and how it is delivered (through new content delivery systems and processes). Through these means, students will be reached more efficiently and effectively through a variety of materials that can be self-directed, interactive and flexible, better preparing them for a digital world. In parallel, the Agency will ensure that the challenges associated with digital learning, including Internet access and the availability of devices, are addressed, ensuring that no one is left behind.
- 26.4 For 2023, UNRWA planned deliverables will support Member States in their ongoing management of and recovery from the coronavirus disease (COVID-19) pandemic. Such planned deliverables and activities include, in accordance with prevailing conditions: (a) the provision of education to approximately 550,000 students through in-person, remote or blended learning methods, under subprogramme 3; (b) the use of telemedicine and staggered health centre appointment and triage protocols, the home delivery of essential medicines and, in certain fields, partnering with host Government vaccination campaigns to minimize the spread of the disease, under subprogramme 2; (c) the expanded provision of mental health and psychosocial support to Palestine refugees, under subprogrammes 1, 2 and 3; and (d) the issuance of emergency cash and/or food assistance, under subprogramme 5.
- 26.5 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and the adaptation of the programme owing to the COVID-19 pandemic. Examples of lessons learned and best practices include: (a) the incorporation of telemedicine as part of core service delivery, keeping Palestine refugee communities safe through

reduced patient flow in UNRWA health centres while maintaining quality health care; and (b) the use of online tools, including the Agency's digital learning platform and self-learning materials, to ensure that students and teachers across all fields of UNRWA operation are equipped for times when they are unable to study at school. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of programme performance information.

- 26.6 With regard to inter-agency coordination and liaison, UNRWA will continue to both maintain and expand partnerships that reflect its commitment to Sustainable Development Goal 17. Many of these partnerships, such as those with host Governments, the United Nations Educational, Scientific and Cultural Organization (UNESCO) and the World Health Organization (WHO), date to the Agency's founding, in 1949. Inter-agency partners have helped to establish norms for UNRWA education and health programming and will continue to furnish strategic assistance. The Agency is also active with United Nations country teams and their member entities in its fields of operation to improve synergies, in particular in relation to front-line service delivery.
- 26.7 With regard to cooperation with other entities at the global, regional, national and local levels, the Agency will continue to maintain and strengthen a wide range of partnerships with host and donor Governments, international financial institutions, UNRWA national committees and the private sector that assist the Agency in delivering its mandate. In addition, enhanced and new partnerships with international and national non-governmental organizations and community-based organizations will maximize the UNRWA technical capacity to deliver more effective and efficient results in key service delivery areas, including protection, health and poverty alleviation for the most vulnerable.
- 26.8 With regard to the external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) Instability and, in some cases, unrest and armed conflict characterize the macroenvironment throughout the year;
 - (b) A continuation of the current cycle of complex emergencies;
 - (c) Demand for Agency emergency assistance increases, combined with increasing demand for core services;
 - (d) Hostility towards and prejudice against Palestine refugees in host communities do not increase;
 - (e) The closure of Gaza does not tighten;
 - (f) UNRWA can raise sufficient funds;
 - (g) Security-related movement restrictions in the occupied Palestinian territory do not increase;
 - (h) Enrolled populations in UNRWA schools do not increase beyond projections based on historical trends;
 - (i) Commodity and rental prices do not increase beyond projected levels;
 - (j) The infrastructure, installations and housing in the Agency's fields of operation do not sustain damage as a result of humanitarian crises.
- 26.9 UNRWA will continue to integrate a gender perspective in its operational activities, deliverables and results, as appropriate. For example, under subprogramme 1, recommendations from biennial protection audits will serve to identify practical measures to increase the involvement of women and girls in Agency programming, while, under subprogramme 2, women and men and girls and boys will have equal access to primary health care. In addition, under subprogramme 3, all Palestine refugee children and young people will enjoy, on a non-discriminatory basis, an equal opportunity to learn in Agency schools and will continue to be supported in developing their full potential, while, under subprogramme 4, women will be prioritized as recipients of microfinance loans. Under subprogramme 5, prioritization for shelter rehabilitation will be accorded to vulnerable segments of

the Palestine refugee population, including female-headed households. UNRWA will also continue to mainstream protection and a gender perspective into the totality of its operations, including with a view to meeting the needs of Palestine refugee children, persons with disabilities, young people and others in vulnerable situations.

- 26.10 In line with the United Nations Disability Inclusion Strategy, the Agency will further advance disability inclusion. UNRWA will: (a) reconstruct and rehabilitate Agency installations, especially health centres under subprogramme 2, schools under subprogramme 3 and vocational training centres under subprogramme 4, to make them accessible to persons with disabilities; (b) continue to support students with disabilities in order to support their inclusion in the education system, including through the use of accessible technology, in line with the UNRWA inclusive education approach under subprogramme 3; and (c) train front-line staff to ensure the provision of services to persons with disabilities under all subprogrammes.

Programme performance in 2021

Impact of the pandemic

- 26.11 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular: (a) the ad hoc closure of UNRWA schools and vocational training centres in Gaza, Jordan, Lebanon, the Syrian Arab Republic and the West Bank, which led to the reintroduction of remote and blended learning modalities; (b) reduced access to in-person health-care services, resulting in a continued reliance on telemedicine; and (c) the postponement of home visits by UNRWA social workers, requiring the continued application of telephone interviews with Palestine refugee clients. In addition, to support Member States on issues related to COVID-19, within the overall scope of the objectives, Agency health centres supported the roll-out of national vaccination campaigns in all fields of operation.

Legislative mandates

- 26.12 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

302 (IV), 74/83, 75/93	Assistance to Palestine refugees	70/1	Transforming our world: the 2030 Agenda for Sustainable Development
3331 B (XXIX)	United Nations Relief and Works Agency for Palestine Refugees in the Near East	74/84	Persons displaced as a result of the June 1967 and subsequent hostilities
65/272	Report of the Secretary-General on the strengthening of the management capacity of the United Nations Relief and Works Agency for Palestine Refugees in the Near East	76/78	Operations of the United Nations Relief and Works Agency for Palestine Refugees in the Near East

Deliverables

- 26.13 Table 26.1 lists all cross-cutting deliverables of the programme.

5. Report of the Commissioner-General of the United Nations Relief and Works Agency for Palestine Refugees in the Near East	1	1	1	1

Evaluation activities

- 26.14 The following evaluations completed in 2021 have guided the proposed programme plan for 2023:
- Evaluation on the UNRWA protection audit mechanism;
 - Evaluation on the UNRWA medium-term strategy 2016–2022;
 - Evaluation on the UNRWA family health team reform.
- 26.15 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2023. For example, in response to findings from the evaluation on the protection audit mechanism, one of the lessons for subprogramme 1 was that the planning process in support of protection audits should better reflect on the implementation experience from the previous audit cycles. In response, the subprogramme has amended the protection audit methodology to introduce an analysis of lessons learned from the implementation of recommendations agreed during the previous protection audit cycle.
- 26.16 The following evaluations are planned for 2023:
- Evaluation on UNRWA relief and social services;
 - Evaluation on the UNRWA Gender Equality Strategy 2016–2022.

Programme of work

Subprogramme 1

Palestine refugee rights under international law are protected and promoted

Objective

- 26.17 The objective, to which this subprogramme contributes, is to ensure that Palestine refugee rights under international law are protected and promoted.

Strategy

- 26.18 To contribute to the objective, the subprogramme will:
- (a) Strengthen the protection of vulnerable and at-risk groups by: (i) developing the capacity of front-line UNRWA personnel to identify and assist those in need; (ii) coordinating safe and meaningful access to life-saving services; (iii) leading in the engagement of community members in self-protection; and (iv) providing access to medical, legal and/or psychosocial counselling and services for survivors of protection violations either directly or through referral to external partners. Collectively, these interventions will help to make progress towards the realization of Goals 5 and 16;
 - (b) Document protection concerns affecting Palestine refugees, including non-admission, refoulement and legal status issues, and engage host Governments, specialized organizations and other United Nations entities on these issues to secure remedial action, which will help to make progress towards the realization of Goals 10 and 16;
 - (c) Mainstream protection principles across the spectrum of the Agency's service delivery, which will help to make progress towards the realization of Goals 5 and 10.
- 26.19 The above-mentioned work is expected to result in:
- (a) The increased identification of survivors of gender-based violence, abuse and neglect, as well as the safe and unhindered access of such survivors to remedial services;
 - (b) The equal and dignified access to services of all Palestine refugees, including persons with disabilities, older persons, undocumented married women and girls, and households headed by women, children and persons with disabilities;
 - (c) The further development of self-protection mechanisms within Palestine refugee communities, in particular for the most vulnerable and at-risk groups and individuals, as a further means to effectively address protection concerns.

Programme performance in 2021

Lives of Palestine refugees with disabilities improved

- 26.20 Palestine refugees with disabilities are often excluded, either directly or indirectly, from development processes and humanitarian action because of structural, attitudinal and institutional barriers, leading to increased inequality, marginalization and vulnerability. To address this, the subprogramme implements a twin-track approach towards disability inclusion. Guided by the UNRWA 2010 disability policy, this approach involves simultaneously: (a) ensuring that all Agency programmes, including education, health, relief and social services, and infrastructure and camp improvement, are inclusive and accessible to Palestine refugees with disabilities; and (b) providing targeted disability-specific support, including the facilitation of access rehabilitation, to address particular vulnerabilities and equalize opportunities and inclusion for persons with disabilities. In 2021, UNRWA continued to mainstream disability inclusion into its subprogrammes in all fields of operation through: (c) the training of front-line doctors, teachers and social workers on the identification of Palestine refugees with disabilities; (d) the implementation of Agency technical standards in the design, construction and upgrading of UNRWA installations to ensure accessibility for persons with disabilities; and (e) follow-up on protection audit recommendations that facilitate disability inclusion. Both directly and through partnerships with community-based rehabilitation centres and other non-governmental organizations, the subprogramme also extended support to Palestine refugees with disabilities, including through the provision of: (f) assistive devices; (g) education and occupational, speech and physical therapy; and (h) awareness-raising interventions to reduce stigma and foster inclusion at the household and community levels.
- 26.21 Progress towards the objective is presented in the performance measure below (see table 26.2).

Table 26.2
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	7,045 Palestine refugees received targeted support for their disability	7,829 Palestine refugees received targeted support for their disability
	Improved accessibility for persons with disabilities at 13 UNRWA schools and three UNRWA health centres	Enhanced capacity of doctors, teachers and social workers to identify Palestine refugees with disabilities
		Improved accessibility for persons with disabilities at four UNRWA schools and four UNRWA health centres

Planned results for 2023

Result 1: protection principles mainstreamed into the delivery of United Nations Relief and Works Agency for Palestine Refugees in the Near East services

Programme performance in 2021 and target for 2023

- 26.22 The subprogramme’s work contributed to the training of 4,344 UNRWA staff members on protection issues, which exceeded the planned target of 3,000.
- 26.23 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 26.3).

Table 26.3
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
6,544 UNRWA staff trained on combating gender-based violence, mainstreaming core protection standards, international protection standards and addressing violence against children	4,620 UNRWA staff trained on combating gender-based violence, promoting disability inclusion and addressing violence against children	4,344 UNRWA staff trained on combating gender-based violence, mainstreaming protection standards, promoting disability inclusion, the prevention of sexual harassment, exploitation and abuse, and addressing violence against children	2,650 UNRWA staff to be trained on combating gender-based violence, disability inclusion and mainstreaming protection standards	2,650 UNRWA staff to be trained on combating gender-based violence, disability inclusion and mainstreaming protection standards

Result 2: strengthened protection for Palestine refugees through compliance monitoring and continuous improvement

Programme performance in 2021 and target for 2023

- 26.24 The subprogramme's work contributed to 61 per cent of protection audit recommendations being implemented by UNRWA field offices, which exceeded the planned target of 46 per cent.
- 26.25 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 26.I).

Figure 26.I

Performance measure: percentage of protection audit recommendations implemented by field offices

Result 3: mental health and psychosocial issues among Palestine refugees addressed

Proposed programme plan for 2023

- 26.26 Violence, conflict, displacement, closure, occupation, poverty, unemployment, food insecurity, exclusion and COVID-19-related health and social pressures have resulted in a complex web of mental health issues for Palestine refugees. If not addressed, these issues can lead to low academic achievement, increased school dropout rates, illness, unhealthy and dangerous behaviour, and gender-based violence. In addition to mental health and psychosocial support services provided through UNRWA schools, social workers and dedicated hotlines, under the guidance of the WHO mental health gap action programme, the Agency extends further support to Palestine refugees through its 140 health centres. Since the subprogramme's introduction, in 2017, some 4,580 UNRWA health staff have been trained on the identification, treatment and referral of those in need of mental health and psychosocial support. In 2021, Agency health centres conducted targeted screening of 76,474 patients identified as at risk of mental health and psychosocial issues, including pregnant women, new mothers and patients with non-communicable diseases. Those found to be in need were able to gain access to such Agency support services or were referred to external service providers for specialist support.

Lessons learned and planned change

- 26.27 The lesson for the subprogramme was that further assistance needs to be extended to those suffering from more serious mental health issues, given that external specialists, in particular psychiatrists, are not readily available in all fields of Agency operation. In applying the lesson, the subprogramme will identify additional referral routes for patients requiring specialist assistance.
- 26.28 Expected progress towards the objective is presented in the performance measure below (see figure 26.II).

Figure 26.II
Performance measure: percentage of Palestine refugees identified as having mental health and psychosocial issues receiving assistance (annual)

Deliverables

26.29 Table 26.4 lists all deliverables of the subprogramme.

Table 26.4
Subprogramme 1: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory

C. Substantive deliverables

Direct service delivery: legal counselling, legal information and/or referrals to legal service providers for some 8,000 Palestine refugees; psychosocial support for some 80,000 Palestine refugees; counselling, medical services and social support for some 4,000 identified survivors of gender-based violence; multiple submissions to the international human rights system.

Subprogramme 2 Palestine refugee health is protected and the disease burden is reduced

Objective

26.30 The objective, to which this subprogramme contributes, is to ensure that Palestine refugee health is protected and the disease burden is reduced.

Strategy

26.31 To contribute to the objective, the subprogramme will:

- (a) Control the spread of communicable diseases through surveillance and awareness-raising among staff and Palestine refugees, provide free childhood immunization services and participate in host Governments’ mass immunization campaigns, which will help to make progress towards the realization of Goal 3;
- (b) Continue to provide people-centred primary health care using the family health team model in UNRWA health centres and through subsidized hospitalization services, which will help to make progress towards the realization of Goals 3 and 5;

- (c) Improve the accessibility of Agency health facilities, which will help to make progress towards the realization of Goals 3, 5 and 10.

26.32 The above-mentioned work is expected to result in:

- (a) Reduced incidence and prevalence of vaccine-preventable diseases among Palestine refugee communities;
- (b) Reduced maternal and infant mortality among Palestine refugees, effective treatment of patients suffering from non-communicable diseases and strengthened antenatal and postnatal care services;
- (c) Enhanced accessibility of UNRWA health facilities, benefiting in particular persons with disabilities.

Programme performance in 2021

Palestine refugee child health improved

26.33 In 2021, the subprogramme provided health services to 425,585 Palestine refugee children aged 5 years and under. These services included the assessment of newborn children, periodic physical examinations, immunization, preventive oral health and referrals to specialist care. Particular focus was placed on growth monitoring, nutritional surveillance and micronutrient supplementation through a range of measures, including: (a) the provision of advice to mothers on child nutrition; (b) the screening of all 12-month-old children for anaemia; and (c) the provision of iron and vitamin A supplements for all children from the ages of 6 months to 5 years. Revised WHO growth monitoring standards were rigorously applied.

26.34 Progress towards the objective is presented in the performance measure below (see figure 26.III).

Figure 26.III

Performance measure: percentage of 18-month-old children who received two doses of vitamin A

Planned results for 2023

Result 1: efficient and responsive health services

Programme performance in 2021 and target for 2023

- 26.35 The subprogramme's work contributed to 139 UNRWA health centres implementing the e-health system, which did not meet the planned target of 140 health centres. The target was not met owing to technical difficulties in connecting one health centre to the Internet.
- 26.36 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 26.IV).

Figure 26.IV

Performance measure: number of United Nations Relief and Works Agency for Palestine Refugees in the Near East health centres having implemented the e-health system (cumulative)

Result 2: vaccine-preventable disease outbreaks prevented within Palestine refugee communities

Proposed programme plan for 2021 and target for 2023

- 26.37 The subprogramme's work contributed to 99.3 per cent of Palestine refugee children registered with UNRWA health centres receiving all booster vaccines by the age of 18 months, which exceeded the planned target of 95 per cent.
- 26.38 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 26.V).

Figure 26.V
Performance measure: percentage of children aged 18 months who received all booster vaccines¹

Result 3: the health of expectant mothers safeguarded

Proposed programme plan for 2023

26.39 The UNRWA health subprogramme provides pregnant Palestine refugee women with an initial assessment, followed by at least four care consultations throughout their pregnancy. These consultations include comprehensive physical examinations and screening for pregnancy-related hypertension, diabetes mellitus, anaemia, oral health problems and other risk factors. Screening services function to tailor antenatal health care provided to expectant mothers to their pregnancy risk. All pregnant women are also provided with iron and folic acid supplements. Furthermore, in 2019, the subprogramme introduced the web-based Mother and Child Health application, through which expectant mothers can view their electronic health records, receive reminders of their medical appointments and obtain additional health guidance and advice, all on their smartphones.

Lessons learned and planned change

- 26.40 The lesson for the subprogramme was that antenatal care should be adapted to accommodate movement restrictions and the reluctance of expectant mothers to visit UNRWA health centres under COVID-19 conditions. In applying the lesson, the subprogramme will expand the use of the Mother and Child Health application to ensure that pregnant women are able to gain access to critical health information and advice, irrespective of the availability of in-person health services.
- 26.41 Expected progress towards the objective is presented in the performance measure below (see figure 26.VI).

¹ Targets for 2022 and 2023 correspond to the World Health Organization (WHO) performance benchmark for this indicator.

Figure 26.VI
Performance measure: maternal mortality rate of women under United Nations Relief and Works Agency for Palestine Refugees in the Near East care per 100,000 live births²
 (Percentage)

^a The 2021 actual rate excludes deaths attributed to COVID-19. In 2021, the cause of death for 27 pregnant Palestine refugee women was recorded as COVID-19.

Deliverables

26.42 Table 26.5 below lists all deliverables of the subprogramme.

Table 26.5
Subprogramme 2: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory

C. Substantive deliverables

Direct service delivery: approximately 9 million primary health-care consultations; some 90,000 mental health and psychosocial support consultations.

Subprogramme 3 School-aged children complete quality, equitable and inclusive basic education

Objective

26.43 The objective, to which this subprogramme contributes, is to ensure that school-aged children complete quality, equitable and inclusive basic education.

Strategy

26.44 To contribute to the objective, the subprogramme will:

- (a) Enhance the professionalization of teachers through continuous professional development and career progression opportunities, which will help to make progress towards the realization of Goal 4;

² Targets for 2022 and 2023 correspond to the WHO performance benchmark for this indicator.

- (b) Ensure that the textbooks used in UNRWA schools develop students' skills and competencies and higher-order thinking skills, which will help to make progress towards the realization of Goals 4, 5 and 10;
- (c) Monitor student performance, ensure safe and secure learning environments, facilitate parent engagement and promote inclusive recreational and extracurricular activities, which will help to make progress towards the realization of Goals 4 and 5;
- (d) Collectively ensure that students identified as having a disability receive support meeting their specific needs, assist individuals identified as experiencing a protection risk and progressively construct or upgrade existing schools to ensure that learning occurs within a healthy and accessible environment, which will help to make progress towards the realization of Goals 4, 5 and 10;
- (e) Implement a blended learning approach in all schools affected by local restrictions owing to COVID-19, including the use of self-study through the provision of printed, online and televised materials, which will help to make progress towards the realization of Goal 4.

26.45 The above-mentioned work is expected to result in:

- (a) UNRWA targets for the percentage of students performing at the "Achieved" or "Advanced" levels in the triannual monitoring of learning achievement tests³ met or surpassed;
- (b) Reduced inequalities in relation to access to education and student performance and retention for the vulnerable, including girls and students with disabilities;
- (c) Fewer children having to repeat a grade or drop out of school completely;
- (d) Continuation of basic education for all pupils enrolled in Agency schools despite the periodic physical closure of these facilities owing to the COVID-19 pandemic.

Programme performance in 2021

Social and emotional development of Palestine refugee children nurtured

26.46 The UNRWA education subprogramme not only fosters students' academic learning but also nurtures their social and emotional growth. The subprogramme, in 2021, through the implementation of psychosocial support and extracurricular and recreational activities, imbued Palestine refugee children with valuable life skills, including leadership, teamwork, self-esteem and interpersonal engagement. These skills contributed to their development as active and productive members of the societies in which they live and will work. Owing to COVID-19-related restrictions, extracurricular and recreational activities in some schools remained suspended, while other activities were moved online during periods of remote learning.

26.47 Progress towards the objective is presented in the performance measure below (see figure 26.VII).

³ Tests provided to grade 4 and grade 8 students across all fields of UNRWA operation to assess their performance levels and understanding of content and the level of their skills and competencies, including higher-order thinking skills.

Figure 26.VII

Performance measure: percentage of United Nations Relief and Works Agency for Palestine Refugees in the Near East students participating in at least one recreational or extracurricular activity

Planned results for 2023

Result 1: improved grades through school quality assurance

Programme performance in 2021 and target for 2023

- 26.48 The subprogramme's work contributed to the conduct of monitoring of learning achievement tests in Arabic and mathematics in all UNRWA schools for students at grade 4 and grade 8 during the first semester of the 2021/22 school year, as well as identification of significant associated factors of learning through a study conducted in all UNRWA schools, which exceeded the planned target.
- 26.49 The planned target of 64.7 per cent of students performing at the "Achieved" or "Advanced" levels in relation to the monitoring of learning achievement Arabic language tests in grade 8 was not met because student performance pertaining to the monitoring of learning achievement tests will be compiled during 2022.
- 26.50 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 26.6).

Table 26.6
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
<ul style="list-style-type: none"> • A guidance manual for the implementation of performance improvements was made available to all schools in Arabic and English • Teacher capacity on assessment skills strengthened and enrichment materials for mathematics and Arabic introduced as part of the implementation of school improvement plans 	<p>Modules on constructive learning approaches and classroom practices embedded into teacher and support cadre training programmes as part of the implementation of school improvement plans</p>	<ul style="list-style-type: none"> • Monitoring of learning achievement tests in Arabic and mathematics for grade 4 and grade 8 students was conducted in all UNRWA schools • Associated factors of learning were also identified 	<p>Analysis of monitoring of learning achievement test results available to inform education programme adjustments at Agency-wide, field-specific and school-specific levels</p>	<p>School improvement plans, based on the results of the monitoring of learning achievement tests and identified associated factors of learning, will be developed</p>

Result 2: increased education efficiency linked to reduced dropout rates

Programme performance in 2021 and target for 2023

- 26.51 The subprogramme’s work contributed to an increase in the coefficient of internal efficiency, which measures the ideal number of pupil-years required to produce a number of graduates from a given school cohort for a cycle of education, to 0.98, which exceeded the planned target of 0.92.
- 26.52 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 26.VIII).

Figure 26.VIII
Performance measure: coefficient of internal efficiency⁴

⁴ A coefficient of 1 implies that all students enrolled in grade 1 also graduate from grade 9/10 in the ideal number of years, without any of those students dropping out or repeating a school year.

Result 3: student dropout rates reduced

Proposed programme plan for 2023

26.53 The subprogramme monitors data on student attendance, health and academic performance, as well as other relevant information, to identify students at risk of dropping out. On this basis, the subprogramme takes preventative measures to retain students in school. The subprogramme has also placed an increased emphasis on student formative assessment⁵ to better ensure the immediate provision of learning support to prevent student demotivation and, consequentially, dropout. Furthermore, the subprogramme has developed teachers' professional ability to identify and support children with additional needs through the use of the Agency's inclusive education toolkit, which helps teachers to identify and address various types of student needs.

Lessons learned and planned change

26.54 The lesson for the subprogramme was that the implementation of remote learning in all fields of UNRWA operation led to some of the most vulnerable students being left behind in the learning process, increasing their risk of dropping out of education. In applying the lesson, the subprogramme will roll out new information and communications technologies for education strategy to address the digital divide. In this regard, the strategy will provide for: (a) access to devices and Internet connectivity for the most vulnerable students to facilitate remote learning; and (b) enhanced curriculum, learning resources and communication through the establishment of an interactive online learning platform.

26.55 Expected progress towards the objective is presented in the performance measure below (see figure 26.IX).

Figure 26.IX

Performance measure: annual dropout rates for United Nations Relief and Works Agency for Palestine Refugees in the Near East elementary and preparatory education⁶

Deliverables

26.56 Table 26.7 lists all deliverables of the subprogramme.

⁵ Formative assessment is a type of learning assessment, conducted on an informal and periodic basis, that emphasizes the use of feedback for guiding teaching and learning. For more information, see <https://learningportal.iiep.unesco.org/en/glossary/f>.

⁶ Targets for 2022 and 2023 correspond to an UNRWA performance benchmark established for this indicator in 2017.

Table 26.7

Subprogramme 3: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory

C. Substantive deliverables

Direct service delivery: education services to some 550,000 students.

**Subprogramme 4
Palestine refugee capabilities are strengthened for increased
livelihood opportunities**

Objective

- 26.57 The objective, to which this subprogramme contributes, is to ensure that Palestine refugee capabilities are strengthened for increased livelihood opportunities.

Strategy

- 26.58 To contribute to the objective, the subprogramme will:
- (a) Provide financial services, including diversified loan products covering businesses, consumption and housing needs, to low-income Palestine refugees, women and young people through a network of 23 microfinance branches in Gaza, Jordan, the Syrian Arab Republic and the West Bank, which will help to make progress towards the realization of Goal 8;
 - (b) Create employment opportunities for Palestine refugees through infrastructure and construction projects in camps, which will help to make progress towards the realization of Goal 8;
 - (c) Provide quality and relevant technical and vocational education and training at its vocational training centres and education science facilities for degree-level teacher education in the West Bank (Education Science Faculty) and Jordan (Faculty of Educational Sciences and Arts), focusing on vulnerable young people, including those whose families are recipients under the UNRWA social safety net programme, which will help to make progress towards the realization of Goals 4, 5 and 8;
 - (d) Continue its scholarship programme for young Palestine refugees, which will help to make progress towards the realization of Goals 4, 5 and 8.
- 26.59 The above-mentioned work is expected to result in:
- (a) Inclusive and sustainable livelihood opportunities;
 - (b) Increased employment and decent work opportunities;
 - (c) A sustained high rate of employment of all vocational training centre, Education Science Faculty and Faculty of Educational Sciences and Arts graduates.

Programme performance in 2021

Teacher professionalization increased

- 26.60 The subprogramme contributes to the development of highly qualified new teachers by providing undergraduate degrees in education for free or for nominal payment through the Agency's Education Science Faculty and Faculty of Educational Sciences and Arts. For the 2021/22 academic year, some

607 students were enrolled in the Education Science Faculty, and a further 1,402 students were enrolled in the Faculty of Educational Sciences and Arts. Approximately 34 per cent of these students come from the poorest and most vulnerable Palestine refugee families, and the course of study provided offers them professional development opportunities that would otherwise be financially out of reach. The courses place an emphasis on the development of independent and critical thinking skills, initiative in educational settings and team spirit in pre-service teachers through both training in pedagogy and practical teaching experience in the classroom. To enhance graduates' career progression, both faculties organize annual jobs fairs to connect final-year students with prospective private sector employers. Some graduates also go on to teach at UNRWA schools in Jordan and the West Bank.

26.61 Progress towards the objective is presented in the performance measure below (see figure 26.X).

Figure 26.X

Performance measure: percentage of Education Science Faculty graduates employed within one year of graduation⁷

Planned results for 2023

Result 1: expanded access to microfinance

Programme performance in 2021 and target for 2023

26.62 The subprogramme's work contributed to 29,111 clients receiving microfinance loans, which did not meet the planned target of 48,005 clients. The target was not met owing to the continuing economic impact of the COVID-19 pandemic and the adoption of a conservative lending approach to mitigate credit risk and preserve loan capital.

26.63 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 26.XI).

⁷ The listed years denote the years of measurement for the performance measure, not the student graduation year.

Figure 26.XI
Performance measure: total number of clients receiving financial services (microfinance loans) (annual)

Result 2: improved youth employment through vocational training

Programme performance in 2021 and target for 2023

- 26.64 The subprogramme’s work contributed to 74.4 per cent of vocational training centre graduates securing employment within one year of graduation, which did not meet the planned target of 75.5 per cent. The target was not met owing to the impact of the COVID-19 pandemic on employment opportunities, especially for young people, in all five fields of UNRWA operation.
- 26.65 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 26.XII).

Figure 26.XII
Performance measure: percentage of vocational training centre graduates employed within one year of graduation

Result 3: employability of Palestine refugees improved

Proposed programme plan for 2023

- 26.66 The subprogramme, through the development and implementation of camp improvement plans, fosters the employability skills of Palestine refugees and generates work opportunities. Projects implemented through camp improvement plans are delivered in partnership with camp residents, thereby increasing livelihood opportunities through both formal and informal training, job creation and other on-the-job activities, such as the implementation of surveys and camp greening initiatives.

Lessons learned and planned change

- 26.67 The lesson for the subprogramme was that a broader range of the camp populations need to participate in the implementation of camp improvement plans to: (a) reflect the diverse needs of camp populations in camp improvement plans; and (b) maximize the livelihood and capacity-building opportunities generated for camp populations by camp improvement plans. In applying the lesson, the subprogramme will increase engagement with the most vulnerable camp residents, including women and refugees with disabilities, to maximize their involvement in camp improvement projects and increase their livelihood and capacity-building opportunities, especially in the areas of project management, construction and landscaping.
- 26.68 Expected progress towards the objective is presented in the performance measure below (see figure 26.XIII).

Figure 26.XIII
Performance measure: number of refugees whose employability skills were enhanced by the camp improvement planning process (cumulative)

Deliverables

26.69 Table 26.8 lists all deliverables of the subprogramme.

Table 26.8
Subprogramme 4: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory

C. Substantive deliverables

Direct service delivery: issuance of microfinance loans valued at \$48,698,929; approximately 10,000 students enrolled in technical and vocational education and training; and some 2,000 job placements created as full-time equivalents.⁸

⁸ Full-time equivalents are the number of full-time equivalent jobs, defined as total hours worked divided by average actual hours worked in full-time jobs.

Subprogramme 5

Palestine refugees are able to meet their basic human needs of food, shelter and environmental health

Objective

- 26.70 The objective, to which this subprogramme contributes, is to ensure that Palestine refugees are able to meet their basic human needs of food, shelter and environmental health.

Strategy

- 26.71 To contribute to the objective, the subprogramme will:
- (a) Assist in the mitigation and reduction of abject poverty and food insecurity among Palestine refugees through the distribution of cash-based and in-kind social transfers to Palestine refugees in need, including those unable to meet their basic food needs and households headed by women, older persons and persons with disabilities, which will help to make progress towards the realization of Goals 1, 2, 5 and 10;
 - (b) Provide safe and habitable shelters for Palestine refugees through the rehabilitation of substandard shelters for the most vulnerable Palestine refugees affected by armed conflict, which will help to make progress towards the realization of Goals 1, 10 and 11;
 - (c) Provide Palestine refugees living in camps with effective environmental health services, including equitable and sufficient water for their basic needs, storm water drainage systems, solid waste collection and sewerage systems, which will help to make progress towards the realization of Goals 6 and 12.
- 26.72 The above-mentioned work is expected to result in:
- (a) Increased resilience among the target population in the face of economic hardship and restricted household income;
 - (b) Improved living conditions whereby Palestine refugees and their families can live with dignity in a healthy and safe built environment;
 - (c) Improved environmental health and infrastructure services, including access to safe drinking water, sanitation, drainage, electricity and waste disposal, for Palestine refugees living in camps.

Programme performance in 2021

Water quality for Palestine refugees residing in camps improved

- 26.73 In 2021, the subprogramme ensured that Palestine refugees residing in official camps had access to potable water. In cooperation with host authorities, the subprogramme also conducted hydrological studies to identify new sources of water and sink new wells. In addition, Palestine refugee shelters were connected to official water networks, while water loss and contamination were reduced through the maintenance and replacement of distribution pipes. These infrastructure enhancements were supplemented by awareness-raising campaigns in camps on responsible water consumption.
- 26.74 Progress towards the objective is presented in the performance measure below (see figure 26.XIV).

Figure 26.XIV

Performance measure: percentage of shelters in Palestine refugee camps connected to an adequate water supply

Planned results for 2023

Proposed programme plan for 2023

Result 1: targeting those most in need through the social safety net programme

Programme performance in 2021 and target for 2023

- 26.75 The subprogramme's work contributed to the introduction of universal food assistance in Gaza, which met the planned target. It also contributed to 398,044 Palestine refugees in Gaza, Jordan, Lebanon, the Syrian Arab Republic and the West Bank receiving social transfers, which did not meet the planned target of 479,420 Palestine refugees receiving social transfers. The target was not met owing to delays in completing the full roll-out of the vulnerability-based targeting criteria in Gaza, which will be completed in 2022.
- 26.76 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 26.9).

Table 26.9
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Social transfers through the social safety net programme received by 406,511 Palestine refugees in Gaza, Jordan, Lebanon and the West Bank, as determined through the application of poverty-based criteria. The social safety net programme was reintroduced in the Syrian Arab Republic for 16,071 Palestine refugees reached using a vulnerability-based targeting criteria	Social transfers through the social safety net programme received by 255,448 Palestine refugees in Jordan, Lebanon, Gaza and the West Bank through poverty-based criteria and by 134,995 Palestine refugees in the Syrian Arab Republic targeted through vulnerability-based criteria	Social transfers through the social safety net programme received by 156,530 Palestine refugees in Jordan, Lebanon and the West Bank through the application of poverty-based criteria and by 241,514 Palestine refugees in Gaza and the Syrian Arab Republic who were reached through the application of vulnerability criteria	Social transfers through the social safety net programme received by a total of 530,000 Palestine refugees in Jordan, Lebanon, the Syrian Arab Republic, Gaza and the West Bank Progress on the reform of the social safety net programme in Lebanon and progress on preparations for reform of the social safety net programme in Jordan and the West Bank	Social transfers through the social safety net programme received by a total of 530,000 Palestine refugees in Gaza, Jordan, Lebanon, the Syrian Arab Republic and the West Bank Reform of the social safety net programme in Lebanon completed to target social transfers through the application of vulnerability criteria Progress on the reform of the social safety net programme in Jordan and the West Bank

Result 2: safe and habitable shelters for vulnerable Palestine refugees

Programme performance in 2021 and target for 2023

- 26.77 The subprogramme’s work contributed to 3,294 Palestine refugee families benefiting from improved shelter conditions, which exceeded the planned target of 3,276 families.
- 26.78 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 26.XV).

Figure 26.XV

Performance measure: number of families benefiting from improved shelter conditions (cumulative)

Result 3: sanitation in Palestine refugee camps enhanced

Proposed programme plan for 2023

26.79 Camp infrastructure, including sewerage systems, has not kept pace with population growth, with residents in many camps using cesspits that are old, deteriorated or constructed informally. This can lead to the contamination of the groundwater, increasing the risk of waterborne disease outbreaks, such as giardiasis, hepatitis A, salmonella and shigella. The subprogramme works with host Governments in all five fields of Agency operation to ensure the connection of camp households to functioning sewerage network systems. While host Governments are responsible for the provision of public services to camps, the subprogramme conducts works to connect shelters to official sewerage networks, upgrade wastewater pipelines and construct wastewater treatment plants.

Lessons learned and planned change

26.80 The lesson for the subprogramme was that the negative environmental and social impacts of infrastructure works, including the development of sewerage networks, need to be fully assessed before these works are implemented to minimize the potentially negative impact on camp residents. In applying the lesson, the subprogramme will conduct structured impact assessments and, where necessary, determine measures to mitigate the environmental and social consequences of the infrastructure works that it conducts. Impact assessments and mitigation measures will be used to inform planning and construction practices, as well as advance warning and advice to affected residents.

26.81 Expected progress towards the objective is presented in the performance measure below (see figure 26.XVI).

Figure 26.XVI
Performance measure: percentage of shelters in camps connected to official sewerage networks

Deliverables

26.84 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 26.14 to 26.16 and figure 26.XVII.

26.85 As reflected in tables 26.14 (1) and 26.15 (1), the overall resources proposed for 2023 amount to \$44,039,700 before recosting, reflecting an increase of \$3,634,100 (or 9.0 per cent) compared with the appropriation for 2022. Resource changes result from three factors, namely: (a) technical adjustments; (b) new and expanded mandates; and (c) other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

26.86 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycle, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Agency is integrating environmental management practices into its operations. For example, in 2021, all field offices continued to replace fluorescent lighting with more energy-efficient light-emitting diode fittings, and installations in Gaza, Jordan, the Syrian Arab Republic and the West Bank were renovated to incorporate energy-saving measures. Paper waste was reduced through awareness-raising initiatives and the wider use of e-signatures for documents, recycling schemes were continued by all field offices and medical waste from all health centres continued to be collected and disposed of in accordance with host country and WHO guidance. Water usage was reduced by incorporating grey water harvesting systems in renovated schools and health centres and by upgrading water networks to reduce water loss caused by leaks. UNRWA also promoted environmental awareness and sustainability measures among Palestine refugee communities and participated through partnerships in tree-planting initiatives in refugee camps. It also conducted awareness-raising sessions and activities through its network of schools to promote recycling, organic agriculture and other greening initiatives, with the active involvement of students. The development of an UNRWA-wide policy on environmental sustainability, which enters into force in 2022, will further align the Agency's environmental

sustainability efforts with the goals of the 2030 Agenda, United Nations development system reform efforts and international agreements on climate change and environmental protection.

Figure 26.XVII
Distribution of proposed resources for 2023 (before recosting)
 (Number of posts/thousands of United States dollars)

Explanation of variances by factor

Overall resource changes

Technical adjustments

26.87 As reflected in table 26.14 (1), resource changes reflect an increase of \$1,684,200, reflecting the higher provision for 22 (of a total of 43) posts established in 2022 pursuant to General Assembly

resolution [76/245](#), which were subject to a 50 per cent vacancy rate in accordance with the established practice for the costing of new posts.

New and expanded mandates

- 26.88 As reflected in table 26.14 (1), resource changes reflect an increase of \$761,700, as explained below.
- 26.89 In its resolution [76/245](#), the General Assembly approved the resources that the Secretary-General had proposed for UNRWA for 2022, comprising 43 additional posts to be funded from the programme budget as well as revisions to the grade levels and functional titles of 36 posts. The proposal for the 43 additional posts was made in accordance with resolution [75/252](#), in which the Assembly endorsed the recommendation of the Advisory Committee on Administrative and Budgetary Questions contained in its first report on the proposed programme budget for 2021 ([A/75/7](#) and [A/75/7/Corr.1](#)) to request the Secretary-General to undertake a review of the functions currently funded from extrabudgetary resources, including of the functions of individual service providers that could be considered to be of a continuous nature, and identify those functions that should be funded from the regular budget, taking into consideration resolutions 3331 B (XXIX) and [65/272](#).
- 26.90 The Secretary-General indicated that his proposal for 2022 constituted the first of two steps in implementing resolution [75/252](#), with further functional reviews being carried out by UNRWA throughout 2021. Furthermore, the General Assembly, in its resolution [76/245](#), endorsed the recommendation of the Advisory Committee contained in its first report on the proposed programme budget for 2022 ([A/76/7](#) and [A/76/7/Corr.1](#)) expressing its expectation that the review process would examine the possible funding under the regular budget of those functions that are considered essential and of a continuous nature owing to their direct day-to-day impact on UNRWA operations on the ground, including the functions of the remaining 26 extrabudgetary posts and the 222 individual service providers employed by the Agency in 2022 such as they pertain to health, education, relief and social services, microfinance and infrastructure, and camp improvement.
- 26.91 UNRWA has thus further reviewed the functions of the posts currently funded from voluntary contributions and is proposing that four of the posts (1 P-5 and 3 P-4) in Amman, the functions of which are considered essential and of a continuous nature, be funded under the programme budget, as follows: one Ombudsman (P-5), one Donor Relations and Communications Officer (P-4), one Coordinator in the Sexual Misconduct Task Force (P-4) and one Health Management Information System Officer (P-4). Further details are provided in annex III.
- 26.92 Individual service providers are complementary personnel funded by voluntary contributions who are hired by the Agency to perform short-term, time-bound functions or tasks, with specific deliverables in accordance with the donor agreements. They are contracted in their individual capacity in an advisory or consultancy role under a task-oriented contract and do not have the status of staff members of the Agency. Upon further review, it was established that none of the individual service providers perform functions of a continuous nature.

Other changes

- 26.93 As reflected in table 26.14 (1), resource changes reflect an increase of \$1,188,200, as explained below.
- 26.94 UNRWA is continuing to develop its next strategic plan, covering the period 2023–2028, ahead of a planned launch in late 2022. The strategic plan will articulate the Agency's ambition to deliver services that address the evolving human development and protection needs of Palestine refugees, building on lessons learned during the implementation of the current medium-term strategy (2016–2021), including from the COVID-19 pandemic, formal evaluations and policy review and evaluation processes, as well as evolving United Nations system and donor priorities. A key focus of the strategic plan is the modernization of operations, governance and management practices through new ways of working and digital technologies.

- 26.95 In line with the overall approach of the next strategic plan for 2023–2028, the Commissioner-General has set forth the following priorities for the Agency:
- (a) To strengthen efficiency, accountability and transparency through the implementation of management reforms, which started in 2020 and will continue in 2023. In 2021, the Agency issued a new protection strategic framework reflecting a strengthened rights-based approach to programming and advocacy with Member States. Further strengthening of the prevention of sexual exploitation and abuse and the prevention of sexual harassment and abuse of authority was done by reviewing staff contracts and updating the Agency's policies in these areas. An environmental sustainability policy will soon be approved for the Agency, outlining its commitments to reducing the negative environmental impacts of its programmes and operations, including for its regular service delivery and construction projects. Evaluations are also under way of the Agency's emergency programmes and gender equality strategy, which will inform the next strategic plan. A Regional Ombudsman Office was established in 2021 to provide informal conflict resolution services, including mediation, to the Agency's personnel. The review of the Agency's administration of justice system was initiated, and an Executive Advisory Group was established to advise the Commissioner-General in decision-making and to ensure more inclusive and transparent decision-making processes within the Agency on issues of strategic significance to its operations. The review of UNRWA procurement regulations was also completed, as part of a broader, ongoing review of the Agency's regulatory framework. Finally, UNRWA revised its international personnel directive on the classification of posts in December 2021, stipulating that the number and grade level of regular budget posts approved by the General Assembly needed to be strictly adhered to and that the Assembly's approval was a prerequisite for changing the grade level of a post;
 - (b) To strengthen operational support for service delivery to ensure the fulfilment of the Agency's mandate to serve the needs of Palestine refugees;
 - (c) To secure the Agency's long-term financial stability and build relationships with Member States, hosts, donors and other interlocutors;
 - (d) To ensure the safety and security of staff in field offices, in particular in Gaza;
 - (e) To fast-track human resources reforms;
 - (f) To modernize and digitally transform the Agency across programmatic, management and operational workstreams, taking into account the 2030 Agenda and lessons learned from the COVID-19 response, in particular in the areas of education digitalization, e-health, registration digitalization and service eligibility. In 2021, UNRWA issued a digital transformation strategy, setting out its ambition to improve service delivery through further use of digital technologies, for example in relation to the use of telemedicine in health services and remote learning for schoolchildren, while also seeking to update internal business processes and expand digital fundraising;
 - (g) To continue to strengthen the Agency's protection and human rights functions in order to protect Palestine refugees (especially the most vulnerable), including through mainstreaming cross-cutting functions: environmental sustainability, neutrality, gender, prevention of gender-based violence, violence against children and disability.
- 26.96 UNRWA continued to conduct further functional reviews throughout 2021. Following these reviews, and on the basis of the above priorities, it is proposed that 15 additional posts (3 P-5, 4 P-4, 7 P-3 and 1 P-2/1) be established under the regular budget, whereas 3 posts (1 P-4 and 2 General Service (Other level)) would be abolished, 1 post reclassified from the P-5 to the D-1 level and 3 posts (1 P-5, 1 P-4 and 1 P-2) redeployed between locations. The proposed post changes would strengthen core functions of an ongoing nature that are essential to implementing Agency-wide management reforms and address critical gaps in achieving the Agency's strategic priorities. In particular, the additional posts would help to implement the Agency's management initiatives and further modernize and digitalize core services; help to address its precarious financial situation by identifying, cultivating,

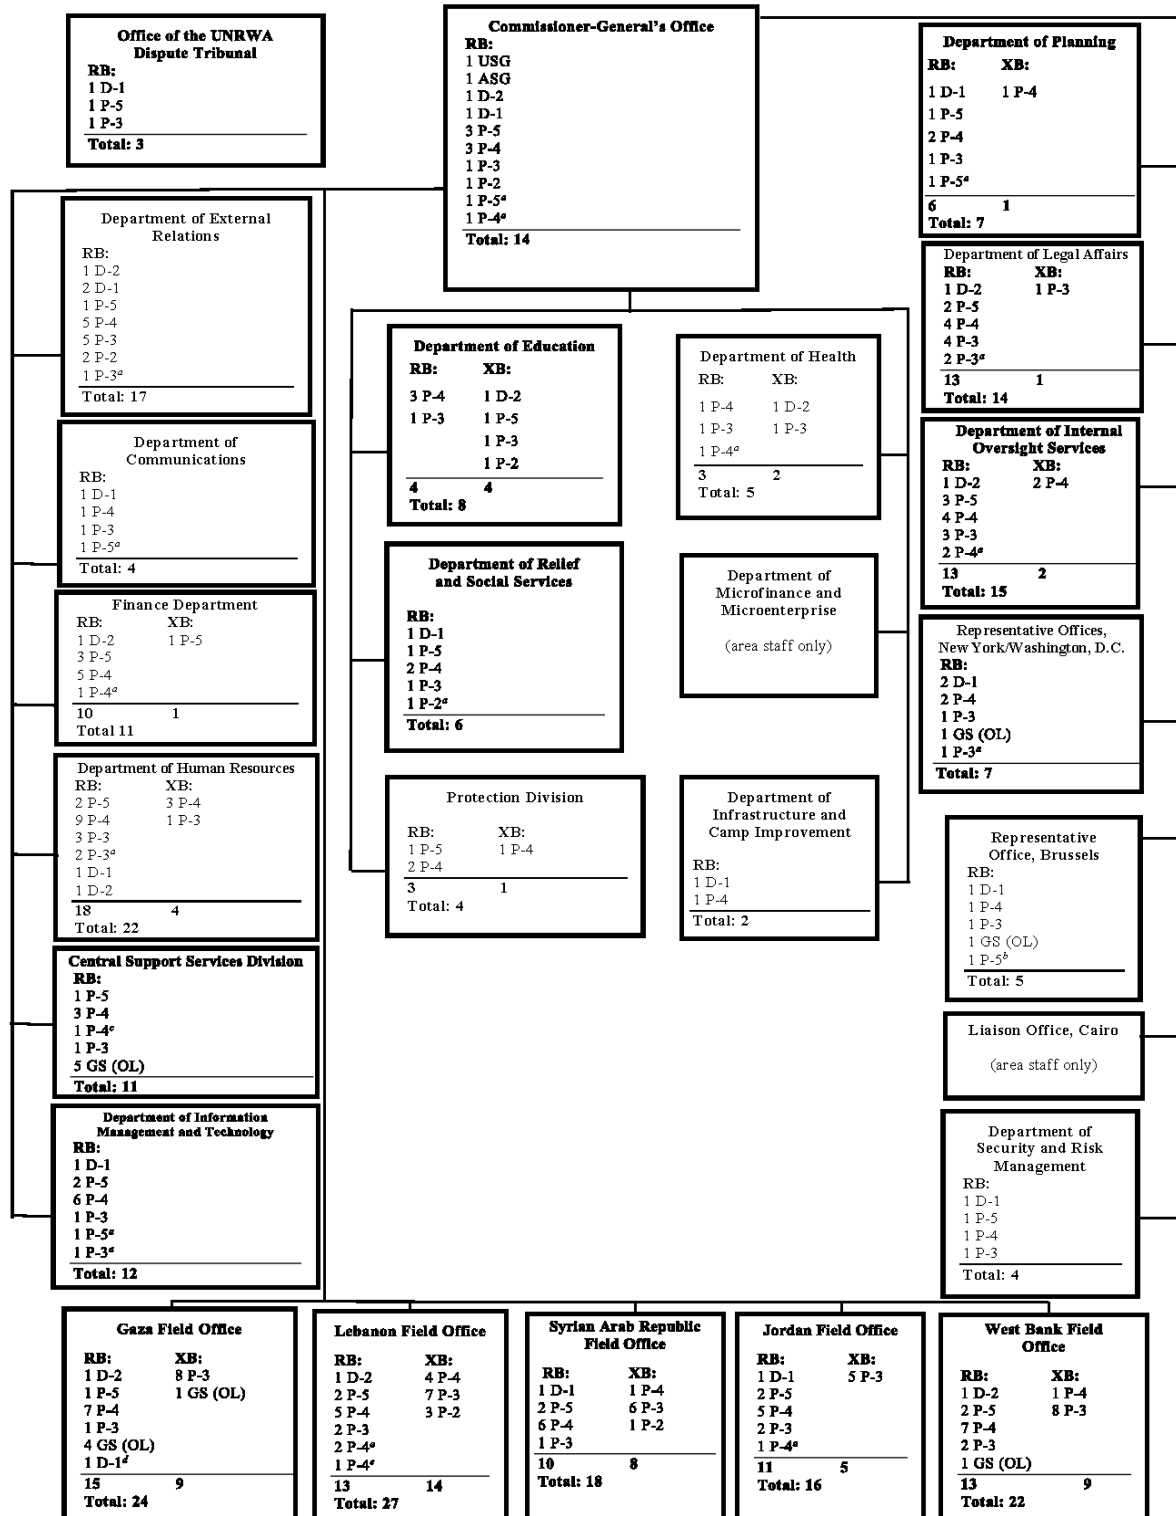

maintaining and strengthening relationships with partners as well as expanding private sector fundraising; assist in upholding humanitarian principles, including neutrality; and bolster compliance, oversight, discipline, legal matters, human resources and procurement capacity at Headquarters, enhance capacity in the fields of operation and strengthen the delivery of programming to Palestine refugees. Further details are provided in annex III.

Extrabudgetary resources

- 26.97 As reflected in tables 26.14 (2) and 26.15 (2), UNRWA expects to continue to receive cash contributions. In 2023, extrabudgetary resources are estimated at \$1,009,800,000 (including 61 international posts and 29,428 local area staff) and would provide for continued humanitarian support for and aid to Palestine refugees. The extrabudgetary resources represent 95.8 per cent of the total resources required to implement the Agency's overall programme. The expected increase in voluntary contributions is attributable to contributions towards temporary projects in the areas of protection and neutrality, disability and inclusion, and humanitarian principles, including gender.
- 26.98 The extrabudgetary resources under this section are subject to the oversight of the Commissioner-General of UNRWA, who is advised and assisted by an Advisory Commission and who has delegated authority from the Secretary-General.

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/76/7](#) and [A/76/7/Corr.1](#)

The Advisory Committee trusts that an update on the most recent donor pledges and payments will be provided (para. VI.57).

The Advisory Committee trusts that an update on the overall available resources and financial situation of UNRWA, as well as on the most recent operational developments, will be provided (para VI.58).

The Advisory Committee encourages the Agency to continue to strengthen those efforts and to broaden its donor base (para. VI.59).

The funding received in 2021 was not sufficient to cover all the cost of the operations under the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA) programme budget and to pay the liabilities carried forward from the previous year, and the Agency closed 2021 with liabilities amounting to \$62 million (including a Central Emergency Response Fund loan) carried over to 2022. The Agency benefited from exceptional end-of-year engagement from donors, a Central Emergency Response Fund loan and the advance payment in 2021 of voluntary contributions for 2022.

UNRWA is carrying over liabilities from 2021 amounting to \$62 million, which will likely have an impact on its financial situation in 2022. As it does not have a contingency fund to help to manage cash-flow shortages, it is seeking flexibility from donors to allow it to move between funding portals according to the most pressing needs, and covering them using a combination of programme budget and emergency appeal funds.

The Department of External Relations continues to:

- (a) exert efforts to increase the quality of funding to the Agency, in particular by seeking less earmarking and more flexibility across portals and increasing the number and volume of multi-year agreements;
- (b) devote substantial efforts to diversifying and broadening the Agency's donor base with a focus on regional donors, emerging donors and private and digital giving; and
- (c) explore opportunities from other funding sources, including international financial institutions, pooled funds and thematic funds (climate, gender and education). In 2021, the Department stepped up its outreach to emerging donors through a combination of approaches for public/government and private/individual/foundation fundraising, with a strong Muslim philanthropy component. Furthermore, UNRWA has seen an upward trend in private fundraising, including through digital means. In 2021 the Department raised nearly \$26 million, including \$5 million through digital contributions (an increase of 66 per cent compared with 2020), \$9 million from

Part VI Human rights and humanitarian affairs

Brief description of the recommendation

Action taken to implement the recommendation

foundations and non-governmental organizations and \$1 million from the corporate sector. UNRWA aims to invest heavily in private fundraising as a largely untapped potential source of revenue and to relaunch a private fundraising strategy in the next strategic period (2023–2028).

Annex III

Summary of proposed post changes

<i>Action</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Conversion	1	P-5	Ombudsman	The Ombudsman makes informal conflict resolution services available to staff members of the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA) and identifies, analyses and reports to the Commissioner-General on broad systemic issues, making recommendations to improve the policies, procedures, systems and structures of UNRWA. The Agency's capacity to help Palestine refugees to achieve their full potential in human development depends, among other things, on the ability of its staff to uphold and promote the highest standards of ethical and professional conduct
	1	P-4	Donor Relations and Communications Officer	Based at the Jordan Field Office, the post is key to maintaining the Field Office's capacity to implement local resource mobilization activities
	1	P-4	Coordinator, Sexual Misconduct Task Force	The incumbent leads the coordination of protection against sexual exploitation and abuse and sexual harassment response and prevention activities across the Agency, which is a priority area for the Agency
	1	P-4	Health Management Information System Officer	In the Department of Information Management and Technology, the incumbent leads the digital transformation of health-related services in UNRWA. Digital health and health management information systems are considered the future of UNRWA primary health-care services
Establishment	1	P-5	Chief Digital Officer	In the Department of Information Management and Technology, the incumbent would lead the cross-Agency digital transformation strategy, which is expected to significantly modernize the way in which the Agency provides services to Palestine refugees
	1	P-3	Information Security Officer	The post is required to strengthen cybersecurity in view of the cyberattack to which the Agency was subjected in 2021, which was the most advanced such attack since the creation of the Agency
	2	P-3	Legal Officer	In the Department of Legal Affairs, one Legal Officer, Administrative Law, to address the increased caseload processed through the UNRWA formal system of administration of justice (Dispute Tribunal and United Nations Appeals Tribunal), which has increased from 52 cases in 2016 to 154 in 2020; and one Legal Officer, General/International Law, to address the legal aspects of the Agency's initiative of modernization and digital transformation, its environmental policy and procurement reform
	1	P-3	Liaison Officer	In the New York Representative Office, the incumbent would contribute to building relationships with Member States and interlocutors within the United Nations system and would, among other things, contribute to the organization of special events in New York that promote UNRWA interests, such as ministerial meetings, the yearly pledging conference and other events held for the United Nations membership
	1	P-4	Investigator	In the Department of Internal Oversight Services, the incumbent would provide technical advice, guidance and training to Field Office investigators and would administer a process of quality assurance by reviewing field investigations, in the context of an increased caseload of 100 cases per year and an increased demand for investigations, including in relation to sexual abuse and violence against children

Part VI Human rights and humanitarian affairs

<i>Action</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
	1	P-4	Auditor, Information Technology	In the Department of Internal Oversight Services, the incumbent would assist in ensuring coverage of key information technology systems in order to address identified high-risk areas, in the context of the widespread use of enterprise resource planning and other information technology systems and the significant quantity of data with which UNRWA operations deal on a daily basis
	1	P-5	Senior Communications Officer	In the Department of Communications, which is currently being restructured as various sections covering public information, advocacy, digital engagement, media relations and multimedia production, the incumbent would ensure that these functions are aligned with the Agency's communications strategy so that its public communication reaches a wide spectrum of stakeholders (donors, media, Palestine refugees and hosts)
	1	P-4	Donor Relations and Communications Officer	Based at the Lebanon Field Office, the incumbent would strengthen the Field Office's capacity to implement local resource mobilization activities
	1	P-3	Donor Engagement Officer	In the Department of External Relations, the incumbent would assist in acquiring, engaging and retaining individual donors through a multichannel and donor-centric approach, and in enhancing engagement with the private sector as one of the drivers of future growth for the Agency, especially in the context of its digital transformation
	2	P-3	Human Resources Officer	In the Department of Human Resources, one Human Resources Officer for policy is needed to take forward human resources policies already at different stages of drafting, including for the reform of all contractual modalities, and a memorandum of understanding with the Office of the United Nations Ombudsman and Mediation Services; and one Human Resources Officer for the recruitment and onboarding of international staff is needed to contribute to further streamlining the recruitment processes as part of a comprehensive strategy for the effective onboarding of new staff members
	1	P-5	Senior Environmental Officer	As UNRWA is in the process of developing an environmental policy and associated implementation plan, this post is proposed in order to align the Agency's operations with United Nations system-wide environmental sustainability targets and commitments, to monitor and reduce the UNRWA environmental footprint and the negative impact of its operations on the environment and to respond to increasing compliance requirements from donors and other stakeholders in relation to environmental and social sustainability
	1	P-2	Refugee Registration and Verification Officer	In the Department of Relief and Social Services, the incumbent would assist in processing a growing number of over 1,000 requests for refugee documentation from foreign migration services, refugees and other third parties, which is key to ensuring a successful asylum-seeking process
	1	P-4	Finance Officer	In the Finance Department, the incumbent would strengthen efficiency, accountability and transparency in terms of the financial management of grants and provide financial services to a growing portfolio of projects and to emergency appeal managers in the five fields of operations and Headquarters departments
Abolishment	1	P-4	Engineer	The post would be abolished in the Department of Infrastructure and Camp Improvement as functions will be redistributed to other staff members
	2	GS (OL)	Administrative Assistant	These two posts are proposed for abolishment in the Gaza Field Office as functions will be redistributed to other staff members

Section 26 **Palestine refugees**

<i>Action</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Reclassification	-1 +1	P-5 D-1	Deputy Director of UNRWA Affairs, Gaza Field Office, from P-5 to D-1	In the Gaza Field Office, which is the largest field of operations at UNRWA, with 290,000 children in UNRWA schools, over 1 million medical consultations at 22 health centres per quarter and food assistance for over 1 million Palestine refugees, it is proposed that the post of Deputy Director of UNRWA Affairs would be reclassified to the D-1 level, in order to align it with the level of responsibilities operationally, strategically and representationally
Redeployment (geographical)		P-5	1 post of Secretary of Committee, Political, from Amman to 1 post of Senior Outreach Officer for Europe in Brussels	The incumbent would nurture existing relationships with multiple strategic partners in Europe, such as government officials, parliamentarians, civil society organizations and donors, and foster new cooperation opportunities, as the European Union and its member States provide over 60 per cent of the Agency's total funds
		P-4	1 post of Head, Field Legal Office, from Damascus to Beirut	The Lebanon Field Office is the only field office without such a function. The incumbent would ensure the consistent interpretation and application of the Agency's regulatory framework and international law and provide legal advice on matters related to the Agency's operations
		P-2	1 post of Associate External Relations and Projects Officer from Jerusalem to Amman	It is proposed that one post of Associate External Relations and Projects Officer be redeployed from Jerusalem to Amman, where the rest of the Private Partnerships Division posts are located, in order to ensure closer coordination on private sector fundraising and better engagement with non-institutional donors

Abbreviation: GS (OL), General Service (Other level).

Foreword

In 2022, a projected 274 million people worldwide will need humanitarian assistance, a significant increase in the number of people in need, up from 235 million in 2021. This trend is likely to continue in 2023. The increase in people in need of humanitarian assistance is driven mostly by three factors: the impacts of the coronavirus disease (COVID-19) pandemic; armed conflicts; and the climate crisis.

The socioeconomic impact of COVID-19 will likely continue in 2023, resulting in higher levels of humanitarian need and putting decades of development progress at risk. Prolonged – and new – armed conflicts will trigger further displacement, hunger, livelihood losses and protection concerns. Moreover, the climate crisis will continue to cause extreme weather shocks, jeopardizing the lives and livelihoods of vulnerable people all over the world. These factors have led to an unprecedented loss of lives and the destruction of civilian infrastructure, increased displacement of people, disrupted supply chains and increased prices of basic necessities that include food, water, sanitation and hygiene, shelter, health care, cash, education and protection, among other essentials. We are continuously adapting humanitarian preparedness and response to face increased needs across all humanitarian sectors.

The current United Nations coordinated humanitarian response plan for 2022 is intended to reach 183 million of the most vulnerable people across 63 countries, at a cost of \$41 billion. The plan incorporates both humanitarian and COVID-19 response needs, prioritizes the prevention of famine and extreme hunger; maintains routine vaccination programmes for children; addresses protection needs, in particular those of women and children; provides much-needed education in emergencies to children; and lessens the blow of mounting poverty. This is not enough, with the situation likely to worsen in 2023 owing to the unprecedented increase in people in need of humanitarian assistance. We have a duty to act, and act fast, to reduce the number of people in need of humanitarian assistance.

(Signed) Martin **Griffiths**
Under-Secretary-General for Humanitarian Affairs
and Emergency Relief Coordinator

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 27.1 The mandate is derived from the priorities established in relevant General Assembly resolutions and decisions, including resolution [46/182](#), in which the Assembly set out the guiding principles of humanitarian response and affirmed the leadership role of the Secretary-General to ensure better preparation and effective response to natural disasters and complex emergencies. This mandate has been confirmed and consolidated through the normative developments of various resolutions over the past 30 years. The Office for the Coordination of Humanitarian Affairs is responsible for ensuring the timely, coherent, coordinated and principled response of the international community to natural disasters and complex emergencies and for facilitating the transition from emergency relief to rehabilitation and sustainable development. With 274 million people in need of humanitarian assistance in 2022 and extreme poverty and hunger on the rise, owing to the compounded effects of emerging and prolonged armed conflicts, the intensifying effects of climate change and the direct and indirect impact of the coronavirus disease (COVID-19) pandemic, ensuring well-coordinated and principled humanitarian assistance by the international community remains as important as ever.
- 27.2 The United Nations Office for Disaster Risk Reduction is responsible for leading and ensuring synergies among the disaster reduction activities of the United Nations system and regional organizations and activities in socioeconomic and humanitarian fields. It provides a data-driven, people-oriented approach to supporting governments and stakeholders in the identification and reporting of relevant ongoing and emerging disaster risks. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolution [56/195](#), as well as the Sendai Declaration and the Sendai Framework for Disaster Risk Reduction 2015–2030. To implement its mandate, in line with its strategic framework for the period 2022–2025, the Office intends to support national and local implementation of the Sendai Framework, strengthening global monitoring and analysis of disaster risk, catalysing action through countries and partners and promoting effective risk communication, advocacy and knowledge management.

Strategy and external factors for 2023

- 27.3 In 2021, the COVID-19 pandemic compounded the intensifying effects of armed conflicts, climate change and consequences of natural disasters. Recent upward trends of armed conflicts and natural disasters reflect the worsening vulnerability of people at risk. This is exacerbated by a rise in extreme poverty rates for the first time in 23 years, a rise in hunger and food insecurity worldwide and an increase in the number of internally displaced persons.
- 27.4 In the face of these challenges, the Office for the Coordination of Humanitarian Affairs will continue to enhance the coordination and effective and efficient delivery of humanitarian assistance, together with humanitarian organizations. The Office will continue to develop and promote a common policy on humanitarian issues for the United Nations system and its partners; coordinate response to humanitarian emergencies; mobilize United Nations capacity to expedite the provision of humanitarian assistance; strengthen early action and anticipatory approaches; advocate and contribute to better preparedness for more timely humanitarian assistance in emergencies; advocate on humanitarian issues; and strengthen the analysis and availability of timely information on emergencies and natural disasters, in accordance with its mandate. The Office will also support the mobilization of resources to enable early action and a prompt response to new or rapidly deteriorating humanitarian emergencies.
- 27.5 The United Nations Office for Disaster Risk Reduction will work to substantially reduce disaster risk and losses through the prevention of new and the reduction in existing disaster risks. In support

of the implementation of the Sendai Framework for Disaster Risk Reduction 2015–2030, the Office will aim to strengthen the foundation for the resilience of people, communities and governments to promote better understanding of risk and strengthened risk governance, and advocate increased investment and better preparedness, in accordance with its mandate. Support for governments and stakeholders in using high-quality risk information and analysis will enable a reduction in risk and inform development decisions. In line with the second priority action of the Sendai Framework, the Office will support Member States and all other stakeholders in establishing and implementing integrated, multi-stakeholder and gender-sensitive disaster risk governance at the national, regional and global levels. The Office will catalyse investment and action in disaster risk reduction through partnerships and engagement with stakeholders through an all-of-society approach that leaves no one behind and reduces vulnerability of the most at risk. The Office will deliver evidence-based advocacy initiatives with clear calls to action to invest in prevention, highlighting the evidence-based payoffs and benefits that accrue through disaster risk reduction measures within and across sectors, and mobilizing citizens to demand change. In 2023, the Office will organize the seventh session of the Global Platform for Disaster Risk Reduction. The Global Platform, which will be hosted by Indonesia, will assess progress and take stock of achievements, lessons learned and best practices in terms of disaster risk reduction. To better reflect its work, the title for subprogramme 3, “Natural disaster risk reduction”, has been revised to “Disaster risk reduction” in the proposed programme plan for 2023.

- 27.6 For 2023, the planned deliverables and activities of the Coordination of Humanitarian Affairs are intended to strengthen the coordination of effective, coherent and principled humanitarian assistance, to support Member States, and to effectively respond to humanitarian needs. Planned deliverables and activities include: (a) strengthening analytical capacities to support decision makers in identifying the emerging humanitarian risks and needs caused by climate change, armed conflict and disease; and (b) scaling up humanitarian pooled funds to provide timely and effective funding for humanitarian activities.
- 27.7 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. Examples of lessons learned and best practices include the use of hybrid formats for training, which combines virtual and in person attendance, leading to more participants who may not be able to travel in person owing to other logistical challenges, increased opportunities for partnership with other organizations involved in humanitarian assistance such as the private sector for United Nations Disaster Assessment and Coordination Team assessment training, and information-sharing. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.
- 27.8 With regard to cooperation with other entities at the global, regional, national and local levels, the Office for the Coordination of Humanitarian Affairs will continue to work with national and local governments, affected communities, the Inter-Agency Standing Committee and other stakeholders, including regional disaster management and response organizations, other regional and subregional organizations, private sector organizations and first responders, to promote principled, timely and effective humanitarian responses.
- 27.9 The United Nations Office for Disaster Risk Reduction will likewise advance further cooperation with global and regional organizations and with national counterparts to promote risk-informed decision-making. Cooperation with academia, the private sector and civil society will support an all-of-society approach to disaster risk reduction. The Office will also stress cooperation at the local level by promoting disaster resilience-building in cities.
- 27.10 With regard to inter-agency coordination and liaison, the Office for the Coordination of Humanitarian Affairs will continue, through the Inter-Agency Standing Committee and its subsidiary bodies, to coordinate the development of guidance for the humanitarian system, including on

operations policy development and advocacy and supporting implementation of the Secretary-General's action agenda on internal displacement. The Office will provide and manage global platforms, such as the United Nations Disaster Assessment and Coordination Team mechanism and the International Search and Rescue Advisory Group, to pool resources and facilitate a coordinated response to humanitarian crises. The Office will also collaborate closely with the Development Coordination Office and other United Nations agencies. At the country level, the Office will continue to coordinate with and support United Nations agencies, such as the World Food Programme, the United Nations Development Programme, the United Nations Children's Fund, the Food and Agriculture Organization of the United Nations, the World Health Organization, United Nations Environmental Programme, the Office of the United Nations High Commissioner for Refugees and the United Nations Population Fund, throughout the humanitarian programme cycle to ensure effective and consistent system-wide response strategies that meet the humanitarian needs of vulnerable people and that minimize the duplication and gaps in response efforts.

- 27.11 As Chair of the Senior Leadership Group on Disaster Risk Reduction for Resilience, the United Nations Office for Disaster Risk Reduction will continue to play a coordinating role in disaster risk reduction within the United Nations system. At the technical level, the Office will also strengthen coordination within the United Nations system by convening the United Nations Disaster Risk Reduction Focal Points' Group. The Office will continue to support United Nations country teams and resident coordinators in integrating disaster risk reduction and resilience into common country analyses and the United Nations Sustainable Development Cooperation Framework, promoting the development of national and local capacities and the delivery of technical expertise in various field environments. The Office will develop and operate the newly launched Centre of Excellence for Climate and Disaster Resilience in cooperation with the World Meteorological Organization.
- 27.12 With regard to the external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) The impact of the global economic contraction triggered by the COVID-19 pandemic will continue to be felt and will threaten to increase vulnerability, and is likely to be compounded by other disasters;
 - (b) Natural disasters will continue to increase in frequency and magnitude, owing, among others, to the adverse effects of climate change;
 - (c) The impact of other disasters, including armed conflicts, will continue to be felt and will increase the vulnerability of people;
 - (d) Humanitarian needs and funding requirements will remain high.
- 27.13 The Office for the Coordination of Humanitarian Affairs integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, the Office promotes gender equality and the empowerment of women and girls through its action plans, inter-agency policies and tools, including the Inter-Agency Standing Committee policies and standby capacities, its Gender Handbook in Humanitarian Action and its Gender Standby Capacity Project, and its associated senior advisers deployed in support of humanitarian coordinators and humanitarian country teams. In 2023, the Office will strive to address protection issues, including violence affecting women and girls, through its advocacy, resource mobilization and programming. Women's participation and leadership in humanitarian decision-making will also be a key priority.
- 27.14 The Office for the Coordination of Humanitarian Affairs advances United Nations system-wide commitments on protection from sexual exploitation and abuse and sexual harassment. The Under-Secretary-General for Humanitarian Affairs and Emergency Relief Coordinator, as Chair of the Inter-Agency Standing Committee, leads and promotes Committee efforts that are aimed at ensuring a humanitarian context in which people caught up in crises feel safe and respected and can gain access to the protection and assistance that they need and in which people affected by crisis are protected from exploitation or abuse. The Office promotes system-wide commitments to support and empower beneficiaries and aid workers, as well as the delivery of humanitarian assistance free from sexual

harassment. In their coordination role, the Office's field offices will support humanitarian coordinators and humanitarian country teams in the implementation of inter-agency efforts to prevent sexual exploitation and abuse.

- 27.15 In line with the United Nations Disability Inclusion Strategy, the Office for the Coordination of Humanitarian Affairs will work to achieve the commitments made by the Under-Secretary-General for Humanitarian Affairs and Emergency Relief Coordinator at the 2018 Global Disability Summit in London to make humanitarian action inclusive of persons with disabilities. The Office is committed to making humanitarian action inclusive of persons with disabilities, in line with the Charter on Inclusion of Persons with Disabilities in Humanitarian Action. The inclusion of issues of persons with disabilities will also be assured through the visibility of persons with disabilities in humanitarian data.

Programme performance in 2021

Impact of the pandemic

- 27.16 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates under all the subprogrammes. In 2021, the Office for the Coordination of Humanitarian Affairs supported and coordinated the review and monitoring of regional action plans by convening five regional platforms spanning the entire world, relying on hybrid meeting formats to mitigate the impact of COVID-related restrictions. Training and workshops on natural disaster response preparedness, the Global Humanitarian Policy Forum and Humanitarian Networks and Partnerships Week were delivered virtually under all subprogrammes instead of through in-person attendance, which resulted in more participants, in particular from the global South, for example, to attend the Forum and Humanitarian Networks and Partnerships Week. Under subprogramme 2, humanitarian programme cycle support to country offices was delivered virtually and the 2022 Global Humanitarian Overview was launched in hybrid mode. In anticipation of pandemic-related disruptions to travel, subprogramme 4 ensured that a range of training sessions and conferences could move quickly from in-person to online formats. For example, the United Nations Disaster Assessment and Coordination Team held all seven of its 2021 online refresher courses in time zones catering to different regions and in English and Spanish. During the Haiti earthquake response, subprogramme 4 managed to mobilize operational partners such as MapAction, which provided virtual assistance to the United Nations Disaster Assessment and Coordination Team on the ground.

Legislative mandates

- 27.17 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

46/182 ; 75/127 ; 76/124	Strengthening of the coordination of humanitarian emergency assistance of the United Nations	67/226 ; 75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
47/120 A and B	An Agenda for Peace: preventive diplomacy and related matters	68/1	Review of the implementation of General Assembly resolution 61/16 on the strengthening of the Economic and Social Council
52/12	Renewing the United Nations: a programme for reform		
52/167	Safety and security of humanitarian personnel	69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)
60/1	2005 World Summit Outcome		
62/208	Triennial comprehensive policy review of operational activities for development of the United Nations system	70/1	Transforming our world: the 2030 Agenda for Sustainable Development

Part VI Humanitarian assistance

72/305	Review of the implementation of General Assembly resolution 68/1 on the strengthening of the Economic and Social Council	76/127	Safety and security of humanitarian personnel and protection of United Nations personnel
74/306	Comprehensive and coordinated response to the coronavirus disease (COVID-19) pandemic	76/128	International cooperation on humanitarian assistance in the field of natural disasters, from relief to development
75/290 A; 75/290 B	Review of the implementation of General Assembly resolution 72/305 on the strengthening of the Economic and Social Council	76/144	Assistance to refugees, returnees and displaced persons in Africa
		76/167	Protection of and assistance to internally displaced persons

Economic and Social Council resolutions

2021/17	Strengthening of the coordination of emergency humanitarian assistance of the United Nations

Deliverables

27.18 Table 27.1 lists all cross-cutting deliverables of the programme.

Table 27.1

Cross-cutting deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	3	3	3	3
Meetings of:				
1. The Fifth Committee	1	1	1	1
2. The Committee for Programme and Coordination	1	1	1	1
3. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1

Evaluation activities

27.19 The following evaluations completed in 2021 have guided the proposed programme plan for 2023:

- (a) Evaluation, Oversight and Special Projects Section report on the review of progress on mainstreaming gender equality and the empowerment of women and girls related to collaboration across humanitarian, development and peacebuilding efforts;
- (b) Evaluation of prevention, response and victim support efforts against sexual exploitation and abuse by United Nations Secretariat staff and related personnel ([A/75/820](#)); and strengthening the role of evaluation and the application of evaluation findings on programme design, delivery and policy directives ([A/76/69](#)).

27.20 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2023, for example, ensuring that data collected on sex, age and disability are taken into account in all aspects of the response efforts and support humanitarian coordinators and humanitarian country teams in the implementation of inter-agency efforts to prevent sexual exploitation, as highlighted by subprogramme 2.

27.21 The following evaluations are planned for 2023:

- (a) Evaluation, Oversight and Special Projects Section report: two thematic evaluations;
- (b) Inter-agency humanitarian evaluation of the northern Ethiopia response;
- (c) Inter-agency humanitarian evaluation of the Afghanistan response.

Programme of work

Subprogramme 1 Policy and analysis

Objective

27.22 The objective, to which this subprogramme contributes, is to improve the strategic and operational coherence of humanitarian response.

Strategy

- 27.23 To contribute to the objective, the subprogramme will:
- (a) Identify emerging humanitarian trends to support the comprehensive, authoritative and evidence-based assessment of global humanitarian needs and analyse challenges and opportunities for humanitarian policy and programme development;
 - (b) Identify policy and programmatic solutions and best practices, innovative concepts such as the use of new and emerging technologies in the humanitarian field, and steps to increase preparedness and organizational readiness, which will be disseminated widely to inform and guide policy, operational decisions and crisis management by national disaster managers and humanitarian organizations;
 - (c) Contribute to the improved delivery of humanitarian assistance.
- 27.24 The above-mentioned work is expected to result in:
- (a) Humanitarian assistance that addresses evolving challenges and reduces the gap between humanitarian needs and capacity;
 - (b) A humanitarian system that remains relevant and adapts to the ever-changing operational environment;
 - (c) Humanitarian actors' increased knowledge and application of innovative solutions for humanitarian operations.

Programme performance in 2021

Increased awareness of the impact of climate change on humanitarian needs

- 27.25 The subprogramme, as part of its role as coordinator of global humanitarian action, used the twenty-sixth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, held in Glasgow, United Kingdom of Great Britain and Northern Ireland, to help the humanitarian community and Inter-Agency Standing Committee members to position themselves as part of global efforts to act early on and contribute to community resilience to climate disasters. Following the twenty-sixth session, the subprogramme conducted extensive research and consultations on climate change and shared its preliminary findings in its forthcoming report, *No Return to Normal: The Growing Humanitarian Climate Crises*, which will be published in 2022. The findings covered, among others, humanitarian impacts of climate change and recommendations for addressing those challenges. The subprogramme advocated resources for the needs of the most vulnerable to adapt to climate change and support community resilience by showcasing the long-term projections of ways in which humanitarian action could help affected communities. This resulted in 1,200 participants having increased understanding of the risks and impacts of climate change in humanitarian contexts.
- 27.26 Progress towards the objective is presented in the performance measure below (see table 27.2).

Table 27.2
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	–	Increased understanding of risks and impacts of climate change in humanitarian contexts by 1,200 participants

Planned results for 2023

Result 1: how technology may shape the humanitarian operating environment

Programme performance in 2021 and target for 2023

- 27.27 The subprogramme's work contributed to increased availability of information and understanding of the use of technologies for more effective humanitarian assistance, including through the launch of a report and related advocacy on new and emerging technologies, which met the planned target.
- 27.28 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 27.3).

Table 27.3

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
United Nations Secretariat-wide initiatives on technology and innovation	Increased awareness on how technology can be used to improve the effectiveness of humanitarian assistance	Increased availability of information and use of strategic technologies by humanitarian actors	Sustainable and systematic use of technologies by humanitarians and their partners to facilitate humanitarian response	Mitigated risk of the use of system-wide technologies in humanitarian response

Result 2: consolidated analysis for more focused evidence-based policy discussions and analysis

Programme performance in 2021 and target for 2023

- 27.29 The subprogramme's work contributed to the identification of policy priorities to mitigate the longer-term challenges aggravated by the COVID-19 pandemic and concurrent crises, in line with trends and policy priorities identified at the Global Humanitarian Policy Forum, which met the planned target.
- 27.30 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 27.4).

Table 27.4

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Annual world humanitarian data and trends incorporated into the Global Humanitarian Overview	Thematic alignment of the Global Humanitarian Overview with the Global Humanitarian Policy Forum	Trends in the Global Humanitarian Overview supported by policy priorities identified at the Global Humanitarian Policy Forum	Increased uptake of Global Humanitarian Policy Forum research findings and recommendations in the policy agenda for the humanitarian community	Global Humanitarian Policy Forum informs policy agenda of the humanitarian community to strengthen humanitarian assistance

Result 3: strengthened humanitarian assistance to address the growing impacts of the climate change crisis

Proposed programme plan for 2023

- 27.31 In 2021, the Global Humanitarian Policy Forum included a panel discussion, “No return to normal: realities and opportunities of the growing humanitarian climate crisis”, which focused on the urgent shifts in mindsets and approaches in humanitarian assistance that are needed, given the ever-worsening effects of climate change on communities.
- 27.32 The subprogramme’s work, summarized in its 2022 report on climate change and humanitarian assistance, considered the growing humanitarian consequences of climate change. It investigated the action that the humanitarian system could take to be more effective and efficient, and plans to convene the humanitarian community through focused round tables, forums and events, including the twenty-seventh session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, concerning the recommendations for changes to better respond to and prepare communities against the threats and risks posed by the climate crisis.

Lessons learned and planned change

- 27.33 The lesson for the subprogramme was that better data are required for the analyses of climate change trends and impact, to improve anticipatory action, strengthen resilience and enhance collaboration in response to the climate crisis. In applying the lesson, the subprogramme will work more with partners across sectors to procure the data required for future analyses, present such recommendations in future focused round tables, forums and events, including the twenty-eighth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, and mainstream the lessons learned into future humanitarian policies and the new publication, the *Global Humanitarian Outlook*. This will contribute to the development and implementation of policies and strategies on mitigating the humanitarian impacts of climate change.
- 27.34 Expected progress towards the objective is presented in the performance measure below (see table 27.5).

Table 27.5

Performance measure

Subprogramme 2

Coordination of humanitarian action and emergency response

Objective

27.36 The objective, to which this subprogramme contributes, is to ensure a coherent, effective and timely humanitarian response to reduce and alleviate human suffering in natural disasters and complex emergencies.

Strategy

- 27.37 To contribute to the objective, the subprogramme will:
- (a) Maintain an effective coordination system to convene humanitarian actors and support senior humanitarian leadership at the global level and in countries affected by natural disasters and complex emergencies, by coordinating timely and objective multisectoral assessments and analysis of humanitarian needs and supporting response planning and programming to provide life-saving assistance to people in need during and in the aftermath of emergencies;
 - (b) Promote delivery of principled humanitarian assistance and coordinate resource mobilization efforts to reduce funding gaps that hamper humanitarian operations, including through effective partnerships with humanitarian actors, Member States and civil society, and the effective management and disbursement of funding from humanitarian pooled funds;
 - (c) Increase the use of early action and anticipatory approaches to prevent and reduce human suffering, especially to climate-related disasters;
 - (d) Strengthen linkages between humanitarian assistance and efforts to support resilience, early recovery and development to reduce the needs and vulnerabilities of affected people, ensuring that data collected on sex, age, and disability are taken into account in all aspects of the response.
- 27.38 The above-mentioned work is expected to result in:
- (a) Improved prioritization of humanitarian needs, based on informed and timely decision-making by humanitarian actors;
 - (b) Reduced duplication of response interventions and reduced gaps in humanitarian response;
 - (c) Adequately funded international humanitarian system, to respond to increasingly frequent natural disasters and complex emergencies.

Programme performance in 2021

Integrated Global Humanitarian Response Plan for COVID-19 into the 2021 Global Humanitarian Overview enabled strengthened and coordinated humanitarian response planning

- 27.39 Humanitarian programming has been adjusted to treat the COVID-19 pandemic in a more integrated manner, as its health and non-health effects merge with the impacts of other shocks and stresses. In 2020, the subprogramme launched the first-ever Global Humanitarian Response Plan for COVID-19, which focused on the immediate humanitarian needs caused by the pandemic. As the crisis evolved, the Plan underwent two revisions, reaching a total of \$9.5 billion in humanitarian requirements so that it reflected the most up-to-date information and the specific needs and response priorities at the field level.
- 27.40 In 2021, the subprogramme integrated the Global Humanitarian Response Plan for COVID-19 with the “regular” humanitarian needs overviews, humanitarian response plans and inter-agency response plans. The plans were integrated into the 2021 Global Humanitarian Overview, which provided a single overview of humanitarian action trends. The Overview is the world’s most comprehensive, authoritative and evidence-based overview of the current state and future trends in humanitarian action. The Under-Secretary-General for Humanitarian Affairs and Emergency Relief Coordinator and the Inter-Agency Standing Committee Emergency Directors subsequently endorsed the transition of three countries and one regional plan from the Global Humanitarian Response Plan for COVID-19 to the 2021 Overview. COVID-19 humanitarian plans in other countries without humanitarian response plans were either concluded or integrated into other relevant country development plans or frameworks, such as United Nations Sustainable Development Cooperation Frameworks. The integration supported strengthened and coordinated humanitarian response

planning by ensuring that a cross-component analysis of impact and response was integrated into one framework/plan for the country team to refer and report to.

27.41 Progress towards the objective is presented in the performance measure below (see table 27.7).

Table 27.7
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	Humanitarian response planning through the separate Global Humanitarian Response Plan for COVID-19 and Global Humanitarian Overview	Member States benefited from strengthened, coordinated humanitarian response planning, with 100 per cent of 2021 humanitarian needs overviews and humanitarian response plans mainstreaming COVID-19 response planning

Planned results for 2023

Result 1: an enhanced Global Humanitarian Overview

Programme performance in 2021 and target for 2023

27.42 The subprogramme’s work contributed to 13 per cent of the humanitarian response plans that are 75 per cent funded, which did not meet the planned target of 50 per cent of humanitarian response plans that are 75 per cent funded. The target was not met because, while the total amount disbursed by donors had increased, the overall coverage rate decreased owing to the rising humanitarian needs (from \$28 billion to \$30 billion within two years (2019–2021)), discounting the 2020 COVID-related spike.

27.43 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 27.I).

Figure 27.I
Performance measure: share of humanitarian response plans that are 75 per cent funded
(Percentage)

Result 2: strengthened humanitarian response planning

Programme performance in 2021 and target for 2023

- 27.44 The subprogramme’s work contributed to the application and use of new frameworks such as the Joint Intersectoral Analysis Framework by humanitarian programme cycle country operations, which improved the quality of humanitarian response plans, including through enhanced intersectoral analysis of vulnerabilities and needs, which enables the engagement of humanitarian organizations in crisis countries through a replicable, simple and transparent implementation process, which met the planned target.
- 27.45 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 27.8).

Table 27.8
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Provisional conceptual elements of a joint intersectoral analysis framework	Framework endorsed by the Inter-Agency Standing Committee	Application of new framework for selected humanitarian needs overviews and humanitarian response plans	More humanitarian response plans reflect priorities based on intersectoral needs analysis	100 per cent of humanitarian response plans prioritized based on a joint analysis of needs

Result 3: increased use of early action anticipatory approaches

Proposed programme plan for 2023

- 27.46 The climate crisis leads to an increase in the frequency and intensity of natural disasters. With advances in the ability to forecast specific climatic shocks, there is an opportunity to anticipate and provide humanitarian assistance to vulnerable people ahead of predictable humanitarian emergencies, to mitigate the humanitarian impacts of disastrous events.
- 27.47 The subprogramme developed contingency funding mechanisms to prioritize risk management and a shift towards an anticipatory approach to humanitarian crises to prevent and reduce human suffering and economic losses. Those mechanisms enabled timely response at the early stages of an emergency based on forecasts and risk assessments. The subprogramme also worked with donors, other funds, implementing organizations, governments and experts to prioritize risk management and pilot anticipatory approaches to humanitarian emergencies in Bangladesh, Ethiopia and Somalia in order to prevent and reduce human suffering and economic losses. This included action by the Central Emergency Response Fund to allocate resources for collective early action and anticipatory approaches for different climatic shocks across the regions.

Lessons learned and planned change

- 27.48 The lesson for the subprogramme was that, in order for anticipatory action to fulfil its potential, it needs to be enabled by more flexible funding, especially through the pooled funds, along with investment in early warning systems and strengthened data analysis. This would contribute to fast, efficient, effective and dignified humanitarian assistance. In applying the lesson, the subprogramme will build on achievements from its pilot projects, including in areas of fundraising and partnership mobilization in joint response plans, and activate frameworks that allow for early prediction of and response to the humanitarian impact of predictable hazards such as drought, flood and disease.
- 27.49 Expected progress towards the objective is presented in the performance measure below (see table 27.9).

Table 27.9
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Expansion of the pilot projects and development of a methodology for a Central Emergency Response Fund early action approach	Central Emergency Response Fund early action approach is formalized with frameworks for food security in Somalia (\$15 million), for floods in Bangladesh (\$2.8 million) and for drought in Ethiopia (\$13.2 million)	Central Emergency Response Fund-supported early action is reviewed, and lessons learned for anticipatory approaches	Further development of early action and anticipatory approaches, including through the Central Emergency Response Fund, based on documented learning of activated frameworks	Continue piloting of early action and anticipatory approaches, especially to climate-related natural disasters, considering lessons learned

Deliverables

27.50 Table 27.10 lists all deliverables of the subprogramme.

Table 27.10
Subprogramme 2: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	4	4	4	4
1. Report to the General Assembly on the Central Emergency Response Fund	1	1	1	1
2. High-level pledging events on the provision of international assistance to countries affected by humanitarian emergencies	3	3	3	3
Substantive services for meetings (number of three-hour meetings)	2	2	2	2
3. High-level meetings and side events of the General Assembly on the provision of international assistance to countries affected by humanitarian emergencies	2	2	2	2
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	2	2	2	2
4. Workshops on international humanitarian law and other emerging issues for resident coordinators/humanitarian coordinators	2	2	2	2
C. Substantive deliverables				
Consultation, advice and advocacy: briefings to the Security Council on specific complex emergency situations; meetings with donors, and informal briefings and consultations with more than 50 Member States on specific emergency situations and the financing of humanitarian requirements; consolidated inter-agency appeals for more than 60 countries and regions affected by humanitarian emergencies; consultations with humanitarian organizations in more than 60 countries on operations, policies and coordination arrangements; and consultations with Member States, regional organizations and the private sector on common humanitarian action.				
Databases and substantive digital materials: monitoring mechanisms in support of operational partners (e.g., financial tracking systems).				

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

D. Communication deliverables

Outreach programmes, special events and information materials: meetings and special events on specific complex emergency situations; quarterly donor briefings on humanitarian financing; the Central Emergency Response Fund annual report; consolidated annual report on country-based pooled funds; and Global Humanitarian Overview.

Digital platforms and multimedia content: Central Emergency Response Fund data hub.

E. Enabling deliverables

Administration: grant delivery allocations to United Nations humanitarian agencies and the International Organization for Migration from the Central Emergency Response Fund for new and protracted emergencies; and allocation of grants from the country-based pool funds.

Subprogramme 3 Disaster risk reduction

Objective

- 27.51 The objective, to which this subprogramme contributes, is to substantially reduce disaster risk and losses in lives, livelihoods and health and in the economic, physical, social, cultural and environmental assets of persons, businesses, communities and countries.

Strategy

- 27.52 To contribute to the objective, the subprogramme will:
- (a) Provide guidance to countries and stakeholders in the implementation of the Sendai Framework for Disaster Risk Reduction 2015–2030 and accelerate the implementation of disaster risk reduction action through the production and dissemination of knowledge resources and best practices, the provision of technical assistance at the regional, national and local levels, advocacy and capacity development;
 - (b) Work closely with Member States and non-State stakeholders to hold a midterm review of the implementation of the Sendai Framework, in line with General Assembly resolution [75/216](#) to assess progress on integrating disaster risk reduction into policies, programmes and investment at all levels, identify good practice, gaps and challenges, and accelerate the path to achieving the goal of the Framework and its seven global targets by 2030;
 - (c) Provide support to the preparation of the high-level meeting of the General Assembly to conclude the midterm review of the implementation of the Sendai Framework and other intergovernmental meetings on disaster risk reduction;
 - (d) Deliver evidence-based advocacy initiatives with clear calls to action to invest in prevention and more resilient infrastructure in countries, and raise public awareness on the importance of such initiatives;
 - (e) Work with practitioners, experts and innovators around the world to generate risk knowledge and analysis on risk trends, patterns, progress and challenges, including through the Global Risk Assessment Framework initiative, the United Nations Office for Disaster Risk Reduction's flagship *Global Assessment Report on Disaster Risk Reduction*, and assist local and national governments, and regional organizations in applying new risk information and analysis in their decision-making;
 - (f) Support the mainstreaming of disaster and climate risk into public and private investment, focusing on financial and investment policy and regulatory reforms and guidance for the market regulators, advise national Governments on developing risk-informed investment strategies

that leverage public and private financing through the establishment of observatories at the national, regional or global level to help to quantify and track investment in prevention, and work with financial institutions to integrate disaster risk reduction considerations into public and private investment and financial instruments;

- (g) Build on the global momentum around the climate emergency as a way of fast-tracking action to achieve the Sendai Framework by strengthening integrated disaster risk reduction and climate risk-informed development and humanitarian planning;
- (h) Continue to provide technical support to enable Member States to report on the global targets of the Sendai Framework and on the related 11 indicators of Sustainable Development Goals 1, 11 and 13 using the Framework's monitoring system;
- (i) Promote inclusion by engaging with a wide range of stakeholders and facilitating their participation in the relevant processes at all levels, through the promotion of accessibility and mainstreaming a gender perspective, as well as by using online platforms to widen the reach of knowledge products.

27.53 The above-mentioned work is expected to result in:

- (a) Improved management by local and national governments of current and future risks through an enhanced understanding of disaster risk reduction, enabling risk-informed policies, plans, regulatory frameworks and investment grounded in an evidence-based understanding of multi-hazard systemic risk;
- (b) Increased accountability for and commitment to implementing the Sendai Framework for Disaster Risk Reduction 2015–2030;
- (c) More effective disaster risk reduction planning and decision-making at the regional, national and local levels that align with the 2030 Agenda for Sustainable Development;
- (d) Multisector and inclusive disaster risk reduction interventions that address the needs of the most vulnerable, thereby contributing to leaving no one behind.

Programme performance in 2021

Regional road maps to accelerate disaster risk reduction action developed and monitored across the world

27.54 Regional platforms for disaster risk reduction bring together Member States, regional organizations, development partners and all other stakeholders to review progress, share experiences, good practices and lessons learned, and build a consensus on core strategic priorities and the way forward. In 2021, the subprogramme supported and coordinated the review and monitoring of regional disaster risk reduction action plans by convening four regional multilateral conferences (“regional platforms”) covering Africa, the Americas and the Caribbean, the Arab States and Europe and Central Asia. The status of implementation of regional disaster risk reduction action plans and outcomes from the reviews enabled the further development of the road maps. It will also inform the agenda of the Global Platform for Disaster Risk Reduction in 2022 and the upcoming midterm review of the Sendai Framework for Disaster Risk Reduction 2015–2030 scheduled for 2023.

27.55 Progress towards the objective is presented in the performance measure below (see table 27.11).

Table 27.11
World regions covered by a regional platform on disaster risk reduction

2019 (actual)	2020 (actual)	2021 (actual)
The sixth session of the Global Platform for Disaster Risk Reduction led to the first stocktaking of the progress made in the implementation of the Sendai Framework for Disaster Risk Reduction 2015–2030	Regional platforms planned in 2020 were postponed owing to the outbreak of COVID-19	Four regional platforms took stock of implementation at the regional level, enabled the development of the regional action plans and provided insights for global multilateral consultations planned in 2022

Planned results for 2023

Result 1: accelerating the achievement of Sendai Framework target (e) by increasing the number and quality of national and local disaster risk reduction strategies

Programme performance in 2021 and target for 2023

- 27.56 The subprogramme’s work contributed to the development and updating of the disaster risk reduction strategies of countries to enhance their quality and effectiveness and to promote compliance with Sendai Framework for Disaster Risk Reduction 2015–2030 principles, contributing to increasing the average index measuring the alignment of national strategies with the Framework to 0.71, which did not meet the planned target of an average score of 0.75. The index measures the alignment of national strategies against a set of 10 requirements stemming from the Framework based on self-assessments by national authorities. The target was not met because policymakers had to shift resources to mitigate the COVID-19 pandemic.
- 27.57 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 27.II).

Figure 27.II
Performance measure: average score of alignment of national strategies with the Sendai Framework

Result 2: scale up resilience at the local level through global partnership

Programme performance in 2021 and target for 2023

- 27.58 The subprogramme’s work contributed to the launch of the “Making Cities Resilient 2030” initiative and increased outreach to local governments, resulting in the development of disaster risk reduction plans by 309 cities, which exceeded the planned target of 56 cities.
- 27.59 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 27.III).

Figure 27.III

Performance measure: total number of cities that develop local disaster risk reduction plans (cumulative)

Result 3: national policymakers integrated innovation, good practices and evidence-based risk reduction into their decision-making processes

Proposed programme plan for 2023

- 27.60 The acceleration of climate change and the impacts of the COVID-19 pandemic have demonstrated an urgent need to strengthen risk knowledge, data and analysis to enable countries to better manage today’s complex and interconnected risks. The subprogramme has been providing governments and stakeholders with technical assistance and support to strengthen their understanding of disaster risk and its differentiated impacts on men, women and vulnerable segments of the population.

Lessons learned and planned change

- 27.61 The lesson for the subprogramme was that, in order to better account for systemic risks, cascading impacts and the medium- to long-term effects of climate scenarios, it needed to better integrate climate change and disaster risk, through innovative analytical and planning tools. In applying the lesson, the subprogramme will focus on facilitating the development of risk-informed national adaptation plans based on risk metrics and analysis. This will strengthen the capacities of governments and stakeholders to conduct evidence-based climate-sensitive and risk-informed planning and decision-making to reduce disaster risk and losses and to ensure a safer and sustainable future.
- 27.62 Expected progress towards the objective is presented in the performance measure below (see figure 27.IV).

Figure 27.IV

Performance measure: number of countries integrating climate change data and analysis to develop and/or implement disaster risk reduction strategies and plans (cumulative)

Deliverables

27.63 Table 27.12 lists all deliverables of the subprogramme.

Table 27.12

Subprogramme 3: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned

10. On the monitoring and implementation of the Sendai Framework	10	13	10	15
11. On the application of risk knowledge	1	7	4	6
12. Outcome documents of the regional and global platforms	3	5	1	1

C. Substantive deliverables

Consultation, advice and advocacy: advocacy of the Special Representative of the Secretary-General for Disaster Risk Reduction through high-level engagement of key audiences and decision makers; advice on the formulation of and improvement in 50 regional, national and local disaster risk reduction strategies and plans, as well as on the development of 8 country-level systematic multi-hazard risk profiles; technical advice on disaster loss databases for 120 countries and territories; advisory services for risk governance capacities of 20 regional and subregional intergovernmental organizations; support for private sector in risk analytics for risk-informed decision-making and risk reduction through partnership with the Insurance Development Forum and engagement in the InsuResilience Global Partnership; and advocacy for policy coherence on disaster risk reduction across sectors, including through the Conference of States Parties to the Convention on the Rights of Persons with Disabilities, the multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals and the Economic and Social Council integration segment.

Databases and substantive digital materials: the Sendai Framework monitor for monitoring and reporting on progress against Framework targets and related Sustainable Development Goals targets/indicators; and disaster loss databases complying with the Framework requirements, covering 120 countries and territories.

D. Communication deliverables

Outreach programmes, special events and informative materials: high-level global and regional meetings on disaster risk reduction, increasing the visibility of the political importance of disaster risk reduction; World Tsunami Awareness Day events; Sendai Seven Campaign: Seven Targets, Seven Years/International Day for Disaster Reduction events; and newsletters and notes verbales on Sendai Framework monitoring.

External and media relations: press releases, op-eds, web stories, social media posts, videos and press coverage.

Digital platforms and multimedia content: PreventionWeb, the online knowledge platform for disaster risk reduction; and the Sendai Framework voluntary commitments online platform with more than 75 voluntary commitments.

**Subprogramme 4
Emergency support services**

Objective

- 27.64 The objective, to which this subprogramme contributes, is to expedite international humanitarian assistance to victims of emergencies and natural disasters.

Strategy

- 27.65 To contribute to the objective, the subprogramme will:
 - (a) Provide effective and well-coordinated operational response support to disaster-affected States and continue to coordinate and support humanitarian actors to prepare for, plan, deliver and monitor the humanitarian response through the humanitarian programme cycle;
 - (b) Strengthen and build the capacities of Member State mechanisms for emergency response through the management of various technical response services, including the United Nations Disaster Assessment and Coordination Team mechanism, the International Search and Rescue Advisory Group system, the environmental emergency response mechanism of the Joint Environment Unit of the United Nations Environment Programme and the Office for the

Coordination of Humanitarian Affairs, and United Nations humanitarian civil-military coordination services;

- (c) Promote the membership of developing and disaster-prone countries in various emergency response networks and promote collaboration with various operational partners, through initiatives such as the International Search and Rescue Advisory Group recognized national accreditation process and external classifications/reclassifications, which ensure that national urban search and rescue teams meet globally accepted standards for urban search and rescue operations following sudden-onset disasters, primarily earthquakes. Another means by which developing and disaster-prone countries are being included in emergency response networks is through United Nations Disaster Assessment and Coordination Team induction courses, which consist of emergency response simulation exercises done in collaboration with regional offices;
- (d) Standardize and improve operational procedures for international urban search and rescue teams through the International Search and Rescue Advisory Group and activate and coordinate rapid response coordination platforms, such as the virtual On-Site Operations Coordination Centre and the Global Disaster Alert and Response Coordination System, as well as provide near real-time alerts on natural disasters around the world and tools to facilitate response coordination;
- (e) Further strengthen the coordination capacity of international responders through the provision of training, guidance and technical support, including through a continued focus on the effective facilitation and functioning of inter-cluster coordination groups and their associated subgroups, and on the role and capacity of local responders.

27.66 The above-mentioned work is expected to result in:

- (a) Enhanced response capacity of local, regional and international responders for sudden-onset disasters;
- (b) More efficient and timely mobilization and deployment of emergency response services;
- (c) Improved effectiveness and prioritization of preparedness and response of the national emergency management authorities in disaster-prone countries.

Programme performance in 2021

Increased participation of humanitarian networks and partnerships

27.67 Humanitarian Networks and Partnerships Week provides a unique forum for humanitarian networks and partnerships to meet and address key humanitarian issues. It gathers participants from the United Nations, non-governmental organizations, Member States, the private sector, the military, academia and beyond to discuss and solve common challenges in humanitarian events. Owing to COVID-19-related constraints, the subprogramme held the annual Humanitarian Networks and Partnerships Week remotely over a period of three weeks instead of the usual one-week event. The remote nature of the event enabled the organization of sessions in different time zones and engaged humanitarian actors from more regions. As a result, the remote Humanitarian Networks and Partnerships Week in 2021 hosted 300 sessions organized by 45 humanitarian networks and partnerships, with 7,000 registered participants. Moreover, owing to the extended duration of the event, the number of “priority topics” for cross-network collaboration in areas of common interests increased from five to nine. The setting allowed networks and partnerships of humanitarian organizations, in particular from the global South, to actively engage in discussions on common challenges to improve future humanitarian operations. The remote participation allowed national disaster managers and authorities to engage and benefit from mechanisms developed to strengthen national capacities in emergency response.

27.68 Progress towards the objective is presented in the performance measure below (see figure 27.V).

Figure 27.V
Performance measure: number of participants in Humanitarian Networks and Partnerships Week as an indicator of strengthened national capacities in emergency response

Planned results for 2023

Result 1: strengthened rapid response capacities through standardized and improved response methodologies

Programme performance in 2021 and target for 2023

27.69 The subprogramme’s work contributed to a cumulative 131 United Nations Disaster Assessment and Coordination Team members trained in the application of local and regional emergency preparedness and response approaches, which did not meet the planned target of 150. The target was not met because 33 new United Nations Disaster Assessment and Coordination Team members from 12 member countries and international organizations participated in the first United Nations Disaster Assessment and Coordination Team induction course, in Nairobi, while the second planned course was postponed until COVID-19 restrictions were removed.

27.70 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 27.VI).

Figure 27.VI
Performance measure: total number of United Nations Disaster Assessment and Coordination Team members trained in the application of local and regional emergency preparedness and response approaches (cumulative)

Result 2: enhanced partnership with the private sector in collective humanitarian assistance

Programme performance in 2021 and target for 2023

- 27.71 The subprogramme's work contributed to 13 Connecting Business initiatives supported by the private sector networks that responded to crises, which did not meet the planned target of 16. The target was not met owing to the COVID-19 pandemic, given that travel and activity restrictions limited the ability of the Connecting Business initiative to identify and partner with new private sector networks.
- 27.72 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 27.VII).

Figure 27.VII

Performance measure: number of Connecting Business initiative-supported local private sector networks that respond to crises (cumulative)

Result 3: crisis-affected people received emergency humanitarian assistance in the immediate aftermath of a catastrophe

Proposed programme plan for 2023

- 27.73 The United Nations Disaster Assessment and Coordination Team is part of the international emergency response system for sudden-onset emergencies. It is designed to help the United Nations and governments of disaster-affected countries during the first phase of a sudden-onset emergency. Teams from the United Nations Disaster Assessment and Coordination Team can deploy at short notice (from 12 to 48 hours) anywhere in the world to help to coordinate the international humanitarian response, including the initial rapid assessments, and support the operational delivery of humanitarian assistance to crisis-affected populations.
- 27.74 During the COVID-19 pandemic, there was a continued need for United Nations Disaster Assessment and Coordination Team deployment to support affected populations and to overcome new challenges in reaching them. For example, during the Haiti earthquake response in 2021, the United Nations Disaster Assessment and Coordination Team made it possible for partners involved in the response to join its assessment and analysis cell virtually. These cells bring together partners with complementary expertise and capacities in remote sensing, secondary data collation, primary data collection, Geographical Information System and humanitarian needs analysis to agree on a common strategy to provide timely support to decision makers during the first phase of a sudden-onset emergency response. The Team enabled partners that were unable to take part in the Haiti response on the ground (e.g., MapAction, the Assessment Capacities Project, the Operational Satellite Application Programme, the Pacific Disaster Centre and the Information Management and Mine Action Program) to provide support remotely.

Lessons learned and planned change

27.75 The lesson for the subprogramme was the need to adapt its deployment plan to allow virtual support in response to sudden-onset emergencies. In 2021, the United Nations Disaster Assessment and Coordination Team met with various partners to discuss the specific methodology to be used in a virtual assessment and analysis cell, building on lessons learned from Haiti. Being able to join assessment and analysis cells virtually will continue to be essential in the context of the COVID-19 pandemic and will be the format applied in 2023 and beyond. In applying the lesson, the subprogramme will develop methods and procedures that facilitate remote training and support to prepare experts, enhance emergency response efforts and help crisis-affected people in an integrated manner. Specialized training in United Nations Disaster Assessment and Coordination Team and United Nations humanitarian civil-military coordination would strengthen the capacity of local, regional and international responders to deploy emergency response services quickly.

27.76 Expected progress towards the objective is presented in the performance measure below (see figure 27.VIII).

Figure 27.VIII

Performance measure: number of emergency responders trained in United Nations Disaster Assessment and Coordination Team and United Nations humanitarian civil-military coordination, to deploy and respond to sudden-onset emergencies (cumulative)

Deliverables

27.77 Table 27.13 lists all deliverables of the subprogramme.

Table 27.13

Subprogramme 4: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	5	5	5	5
1. On the interoperability of response tools and procedures	1	1	1	1
2. On response capacity-building	4	4	4	4
Seminars, workshops and training events (number of days)	50	65	50	55
3. Training events on various response services and field coordination (e.g., United Nations Disaster Assessment and Coordination Team; United Nations humanitarian civil-military coordination; environmental emergency response; International Search and Rescue Advisory Group; humanitarian programme cycle), at regional and international levels	50	65	50	55

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
Humanitarian assistance missions (number of missions)	10	10	12	13
4. United Nations humanitarian civil-military coordination support missions	5	6	6	6
5. United Nations Disaster Assessment and Coordination Team missions (subject to occurrence of disasters and at the request of disaster-affected governments or humanitarian country teams)	5	4	6	7

C. Substantive deliverables

Consultation, advice and advocacy: advisory services to 70 key stakeholders and Member States on rapid response coordination, including United Nations humanitarian civil-military coordination and integrating environmental considerations into humanitarian response.

Databases and substantive digital materials: guidance, tools and handbooks on humanitarian coordination response services; electronic tools related to rapid response and humanitarian coordination; and roster for humanitarian coordinators and operational partners.

D. Communication deliverables

Outreach programmes, special events and information materials: annual partnership and outreach event to facilitate collaboration and interoperability among 2,000 stakeholders, including humanitarian responders; and guidance materials on emergency response services annually.

Digital platforms and multimedia content: websites for technical humanitarian response services.

Subprogramme 5 Humanitarian emergency information and advocacy

Objective

27.78 The objective, to which this subprogramme contributes, is to ensure effective advocacy of humanitarian principles and knowledge-sharing in serving populations affected by disasters and emergencies.

Strategy

27.79 To contribute to the objective, the subprogramme will:

- (a) Intensify its efforts to raise public awareness of international humanitarian law through targeted communications, clear and accessible messages, proactive media engagement and more field-oriented messaging;
- (b) Continue to produce and improve its analytical information products, including the digital humanitarian situation report;
- (c) Strengthen its analytical work to identify and inform humanitarian actors of emerging needs stemming from the direct and indirect impacts of the COVID-19 pandemic.

27.80 The above-mentioned work is expected to result in:

- (a) Increased respect for international humanitarian law to enhance the protection of affected people and improved unimpeded and unhindered access to humanitarian assistance;
- (b) Improved humanitarian decisions based on more timely and accurate information on humanitarian crises, including intersectoral analysis of the humanitarian situation and its severity and needs;
- (c) Humanitarian planning informed by models developed to support COVID-19 response.

Programme performance in 2021

Global access to the COVID-19 data model

- 27.81 The COVID-19 pandemic has increased the need for data and the value of models to inform response strategies. The subprogramme partnered with the Johns Hopkins University Applied Physics Laboratory and developed the Office for the Coordination of Humanitarian Affairs-Bucky model, which forecasts the number of cases, hospitalizations and deaths over two or four weeks, at the subnational and national levels. The guiding principle for developing the model was to provide decision makers with the capability to plan and manage resources during a pandemic, including short-term operational decision-making to protect and save more lives in humanitarian crises. The subprogramme provided critical data and analysis support to a number of workstreams to inform the response of partners and Member States to the pandemic. Data shared through its Humanitarian Data Exchange was used to develop and maintain the Office's COVID-19 data explorer, bringing together data related to underlying vulnerability and socioeconomic risk and level of financing for the COVID-19 response.
- 27.82 Progress towards the objective is presented in the performance measure below (see table 27.14).

Table 27.14

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
–	Model projections on COVID-19 cases, hospitalizations and deaths made available for six countries: Afghanistan, Democratic Republic of the Congo, Iraq, Somalia, South Sudan and the Sudan	Data on underlying vulnerability and socioeconomic risk and level of financing for the response to the COVID-19 pandemic collected and made globally available

Planned results for 2023

Result 1: increased availability of humanitarian information for humanitarian response planning

Programme performance in 2021 and target for 2023

- 27.83 The subprogramme's work contributed to 15.1 million users of the ReliefWeb service from Member States, humanitarian agencies and local partners having access to humanitarian information for humanitarian response planning, which exceeded the planned target of 13 million users.
- 27.84 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 27.IX).

Figure 27.IX
Performance measure: increased use of ReliefWeb by global audience

(Millions of users)

Result 2: improved humanitarian response planning for secondary impacts of COVID-19 on other infectious diseases

Programme performance in 2021 and target for 2023

- 27.85 The subprogramme’s work contributed to developing mitigation strategies on the prevalence of and capacity to treat other infectious diseases and to improved understanding of the secondary impact of COVID-19 on the spread and treatment of other infectious diseases such as measles and malaria in humanitarian contexts, which met the planned target.
- 27.86 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 27.15).

Table 27.15
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	COVID-19 model for humanitarian contexts, forecasting the number of cases, hospitalizations and deaths over two or four weeks	Secondary impacts of COVID-19 on spread and treatment of other infectious diseases defined by use of the model, for example, the spread of measles and malaria in Somalia	Humanitarian response planning is improved by the use of the expanded model	Member States use the expanded model for strengthening humanitarian response planning, upon request

Result 3: strengthened disaster risk analysis for humanitarian response

Proposed programme plan for 2023

- 27.87 In the context of humanitarian response, predictive analytics and modelling methodologies can be utilized in risk analysis to anticipate humanitarian needs arising from natural hazards. The Office for the Coordination of Humanitarian Affairs facilitates the development of early action and anticipatory approach frameworks to enable humanitarian organizations to predict shocks and mitigate their

impact. This work relies on technical support for the development of triggers, engaging with experts and scientists, and by bridging the gap between forecast producers and humanitarian decision makers. Another application of predictive analytics is performing risk analyses in line with the humanitarian response plan guidance, which looks at scenario-based risk and the potential scale of needs on the basis of historical data.

Lessons learned and planned change

27.88 The lesson for the subprogramme was that, in order to improve support for early action, it needed to understand the challenges in developing and running the COVID-19 model to project the impact of COVID-19 on other medical diseases, such as measles and malaria in Somalia. Humanitarian partners will increasingly request technical advice with scenario planning and apply modelling methodologies to response planning. In applying the lesson, the subprogramme will provide technical support for early action on the basis of anticipatory approach frameworks, enabling countries to use advanced risk analysis for humanitarian response planning.

27.89 Expected progress towards the objective is presented in the performance measure below (see figure 27.X).

Figure 27.X
Performance measure: number of countries with strengthened risk analysis capacities for humanitarian response

Deliverables

27.90 Table 27.16 lists all deliverables of the subprogramme.

Table 27.16
Subprogramme 5: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory

C. Substantive deliverables

Consultation, advice, and advocacy: advocacy and advice to humanitarian partners, including a humanitarian communications group that includes both United Nations and non-governmental organization members to strengthen consistency in messaging and the planning and sequencing of communications content.

Databases and substantive digital materials: field guides, maps and other reference information for more than 1,000 humanitarian operational partners; and information management, shared data standards for information exchange in the humanitarian community, databases and electronic tools, including the International Search and Rescue Advisory Group urban search and rescue directory and common risk and vulnerability assessment methodologies and tools.

D. Communication deliverables

Outreach programmes, special events and information materials: information materials on coordination of humanitarian action; World Humanitarian Day and other campaigns in person or virtual events on humanitarian issues and concerns, including exhibitions and seminars; and social media platforms.

External and media relations: daily media updates to United Nations correspondents and twice-weekly Palais des Nations briefings in Geneva; global informal and formal media briefings, and interviews to advocate assistance for people caught in humanitarian crises; comprehensive communications strategy for the launch of the Global Humanitarian Overview (annual consolidated appeals) in support of the Central Emergency Response Fund and of pledging conferences for large humanitarian crises.

Digital platforms and multimedia content: humanitarian community digital platforms, such as ReliefWeb, humanitarianresponse.info and Humanitarian Data Exchange; guidance and templates on various reporting products for humanitarian organizations and Member States, including situation report and humanitarian snapshot; and video, social media and other multimedia content on humanitarian issues, international humanitarian law, international human rights law, humanitarian principles, protection of civilians, specific emergency situations and resource mobilization.

E. Enabling deliverables

Information and communications technology: product support for and global information and communications technology on the Office for the Coordination of Humanitarian Affairs collaboration services, information and communications technology emergency response and business continuity services, business intelligence and data analysis services.

B. Proposed post and non-post resource requirements for 2023

Overview

27.91 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 27.17 to 27.19.

Table 27.17

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

27.92 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 27.20 to 27.22 and figure 27.XI.

27.93 As reflected in tables 27.20 (1) and 27.21 (1), the overall resources proposed for 2023 amount to \$18,544,100 before recosting, reflecting cost-neutral changes in resource level compared with the appropriation for 2022. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Table 27.20

Figure 27.XI

Distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Other changes

- 27.94 As reflected in table 27.20 (1), the proposed cost-neutral resource changes are as follows:
- (a) **Subprogramme 4, Emergency support services.** The decrease of \$27,900 under posts relates to the proposed redeployment (geographical) of two Humanitarian Affairs Officers (one P-4 and one P-3) from Geneva to Istanbul (see annex II);
 - (b) **Programme support.** The increase of \$27,900 under general operating expenses would provide for security communication equipment to support the increased network activity and security needs for offices of the Office for the Coordination of Humanitarian Affairs.

Extrabudgetary resources

- 27.95 As reflected in tables 27.20 (2) and 27.21 (2), the Office for the Coordination of Humanitarian Affairs expects to continue to receive both cash and in-kind contributions. In 2023, extrabudgetary resources (cash contributions) are estimated at \$387,739,700 and would provide for 2,185 posts, as presented in table 27.21 (2). The resources would support humanitarian assistance and disaster risk reduction activities, as detailed in the individual components and subprogrammes. Anticipated in-kind contributions would provide for rent-free premises with an estimated value of \$158,300 and technical assistance and expert services with an estimated value of \$345,400. Extrabudgetary resources represent 95.4 per cent of the total resources for this section.
- 27.96 The extrabudgetary resources under this section are subject to the oversight of the Office for the Coordination of Humanitarian Affairs, which has delegated authority from the Secretary-General.

Executive direction and management

1. Executive direction and management

- 27.97 The executive direction and management component of the Office for the Coordination of Humanitarian Affairs comprises the Office of the Under-Secretary-General for Humanitarian Affairs and Emergency Relief Coordinator, the Office of the Assistant Secretary-General and Deputy Emergency Relief Coordinator and the United Nations Monitoring Mechanism for the Syrian Arab Republic. The Office of the Under-Secretary-General oversees the Internally Displaced Persons Unit. The Office of the Assistant Secretary-General oversees the evaluation activities of the Evaluation and Oversight Section, the Gender Unit, the Policy Branch, the Operations and Advocacy Branch, the Coordination Branch, the Information Management Branch, the Executive Office, the Regional, Field and Disaster Response Adviser offices and the Humanitarian Financing and Resource Mobilization Division.
- 27.98 The overall responsibilities of the executive direction and management component include the following functions:
- (a) Provide overall direction, management and policy guidance to the offices in New York and Geneva and in the field, including leadership in the coordination of the overall response of the international community to disasters and humanitarian emergencies;
 - (b) Undertake humanitarian diplomacy with Governments of affected countries, including the facilitation of access to emergency areas for the rapid delivery of humanitarian assistance;
 - (c) Provide oversight of the humanitarian coordination leadership in the field, as well as management of the field operations;

- (d) Lead on the humanitarian finances and resource mobilization functions, manage the emergency services on behalf of the United Nations system and coordinate with Member States, donors and partners;
- (e) Facilitate the work of the Inter-Agency Standing Committee in relation to policy development and advocacy in the humanitarian sector;
- (f) Act as the main adviser to the Secretary-General on humanitarian issues and cooperate closely with other United Nations offices in the planning and coordination of United Nations humanitarian assistance activities in crisis situations;
- (g) Monitor, with the consent of the relevant neighbouring country of the Syrian Arab Republic, the loading of all humanitarian relief consignments of the United Nations humanitarian agencies and their implementing partners;
- (h) Assist the Coordinator of the Executive Committee on Humanitarian Affairs in providing the overall direction, management and supervision of the offices in New York and Geneva, as well as in supporting Office for the Coordination of Humanitarian Affairs coordination in the field;
- (i) Interact with Member States, intergovernmental organizations, NGOs and operational humanitarian agencies, as well as departments of the Secretariat whose responsibilities encompass peacekeeping, political and economic activities, to facilitate joint responses where applicable;
- (j) Serve as Chair of the Inter-Agency Standing Committee Working Group and act on behalf of the Emergency Relief Coordinator in his/her absence;
- (k) Provide strategic advice on issues relating to internally displaced persons and engage with relevant partners to drive the implementation of the Secretary General's action agenda on internal displacement, including through membership in the Steering Group on Internal Displacement Solutions and co-chairing of the GP2.0 multi-stakeholder global platform on internal displacement;
- (l) Manage and coordinate internal evaluations of the Office for the Coordination of Humanitarian Affairs and inter-agency evaluations, provide secretariat services and chair the Inter-agency Humanitarian Evaluation steering group and coordinate external oversight to ensure organization compliance with audits and evaluation recommendations;
- (m) Coordinate and lead the work of the Office for the Coordination of Humanitarian Affairs on gender equality in humanitarian action and the response to gender-based violence in emergencies, strengthen capacities and provide technical guidance, support and training on gender, including through the gender community of practice, influence better gender analysis and support the Office's work on integrating a gender perspective into every stage of the humanitarian programme cycle.

27.99 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycle, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), the Office for the Coordination of Humanitarian Affairs is integrating environmental management practices into its operations. It is developing an environmental management system to support environmental and climate protection. As part of that system, the Office is developing an environment and climate action strategy, a policy and an information and analysis dashboard. Country-level initiatives include waste management processes that promote recycling, reduction in the use of single-use plastics and continuous guidance to countries on conducting environmental impact assessments in humanitarian action and integrating environmental and climate considerations into programming.

27.100 In 2023, the Office for the Coordination of Humanitarian Affairs will systematically measure and report on environmental performance through the implementation of its environmental management system. The Office will map its programmatic and operational environmental impacts; work to

Section 27 Humanitarian assistance

reduce adverse environmental impacts and maintain climate neutrality through a variety of initiatives. Such initiatives include increasing its use of videoconference and remote meeting options, consistently reviewing its vehicle fleet to ensure that replacements are made only if required and moving to shared facilities when safe, practical and in line with the humanitarian principles, in order to reduce its environmental footprint.

- 27.101 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 27.23. Managers are asked to implement preventive and corrective measures. Notwithstanding, the impact of the COVID-19 pandemic and related restrictions on travel in 2021 limited the ability to comply with advance booking for air travel, which resulted in a lower compliance rate. Compliance rates are monitored, and statistics and trends are distributed to managers on a quarterly basis. In 2023, the Office for the Coordination of Humanitarian Affairs will continue to implement measures to improve the compliance rate for air tickets, including: (a) advance planning and nomination of travellers; (b) on-boarding of staff planned in advance with contingencies in place (e.g. advance request for visas); and (c) undertaking communications to staff and managers to raise awareness of the requirement.

Table 27.23
Compliance rate
(Percentage)

	<i>Actual 2019</i>	<i>Actual 2020</i>	<i>Actual 2021</i>	<i>Planned 2022</i>	<i>Planned 2023</i>
Timely submission of documentation	100	100	100	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	68	22	16	100	100

- 27.102 The proposed regular budget resources for 2023 amount to \$1,901,700 and reflect no change compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 27.24 and figure 27.XII.

Figure 27.XII
Executive direction and management: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

27.103 Extrabudgetary resources for the component are estimated at \$7,895,800 and would provide for 12 posts (2 P-5, 3 P-4, 3 P-3, 1 P-2 and 3 General Service (Other level)), as well as non-post resources. The resources would support the Under-Secretary-General and the Assistant Secretary-General in fulfilling their roles in providing overall direction and policy guidance, and facilitation of access to emergency areas for the rapid delivery of humanitarian assistance; and consulting with the donor community and other interested States on issues related to the provision of emergency humanitarian assistance. The resources would also support the coordination of the international community’s response to disasters and emergencies and support the Emergency Relief Coordinator in undertaking humanitarian diplomacy with Governments of affected countries. The resources would also be used for servicing inter-agency meetings, meetings of the Inter-Agency Standing Committee and its working groups and meetings of the Executive Committee on Humanitarian Affairs. The decrease of \$203,300 is attributable to the redeployment of one Humanitarian Affairs Officer (P-4) to subprogramme 2 owing to the abolishment of the Organizational Development Unit.

2. United Nations Monitoring Mechanism for the Syrian Arab Republic

27.104 The role and functions of the United Nations Monitoring Mechanism for the Syrian Arab Republic were defined by the Security Council in resolution 2165 (2014), in which the Council authorized the United Nations humanitarian agencies and their implementing partners to use the Syrian border crossings of Bab al-Salam and Bab al-Hawa with Turkey, Ya’rubiyah with Iraq and Ramtha with Jordan in order to ensure that humanitarian assistance reaches people in need throughout the Syrian Arab Republic through the most direct routes, with notification to the Syrian authorities.

27.105 The Mechanism monitors, with the consent of the relevant neighbouring country of the Syrian Arab Republic, the loading of all humanitarian relief consignments of the United Nations humanitarian agencies and their implementing partners at the relevant United Nations facilities and any subsequent opening of the consignments by the customs authorities of the relevant neighbouring country, for passage into the Syrian Arab Republic, in order to confirm the humanitarian nature of the relief consignments. Following the decision of the Security Council to exclude the border crossings of Ramtha, Ya’rubiyah and Bab al-Salam from the list of authorized crossings, in its resolutions 2504 (2020) and 2533 (2020) and reaffirmed most recently in resolution 2585 (2021), the United Nations agencies and their implementing partners rely on the border crossing of Bab al-Hawa to send humanitarian assistance into the Syrian Arab Republic until 10 July 2022. Accordingly, the

Mechanism monitors the loading of the United Nations relief consignments and their passage into the Syrian Arab Republic through that crossing exclusively, provides monthly briefings to the Council and reports on a regular basis, at least every 60 days, on the implementation of the resolutions. The latest report (S/2021/1029) is dated 15 December 2021. The Mechanism is comprised of the Office of the Chief, the Monitoring Team and the Support and Security Unit, which are based in Gaziantep, Turkey, and is supported by a Liaison Officer in New York.

- 27.106 The proposed regular budget resources for the United Nations Monitoring Mechanism for the Syrian Arab Republic for 2023 under this component amount to \$2,116,900 and include 16 general temporary assistance positions (1 D-1, 2 P-4, 3 P-3, 3 P-2, 1 National Professional Officer and 6 Local level) and 3 United Nations Volunteers. The proposal reflects no change compared with the appropriation for 2022. Additional details on the distribution of the proposed resources are reflected in table 27.25 and figure 27.XIII.

 (Number of posts)

Extrabudgetary resources

27.108 Extrabudgetary resources for the subprogramme are estimated at \$1,034,900 and would provide for four posts (two P-4, one P-3 and one General Service (Other level)), as well as non-post resources. The resources would provide for the servicing of meetings, seminars, workshops and training events tailored to improve the strategic and operational coherence of the humanitarian response. They would also provide for technical materials, such as strategy papers, policy tools and guidance notes for humanitarian agencies, to support the strengthening and further development of a humanitarian policy agenda; and advance the protection of civilians agenda in the Security Council. The resources would further provide for the production of access assessments in times of humanitarian crisis and the organization of events with academic institutions and NGOs to promote humanitarian assistance and establish and sustain humanitarian access.

Subprogramme 2
Coordination of humanitarian action and emergency response

27.109 The proposed regular budget resources for 2023 amount to \$5,722,000 and reflect no change compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 27.27 and figure 27.XV.

Figure 27.XV
Subprogramme 2: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

27.110 Extrabudgetary resources for the subprogramme are estimated at \$257,647,200 and would provide for 1,788 posts (30 D-1, 74 P-5, 212 P-4, 229 P-3, 24 P-2, 529 National Professional Officer, 26 General Service (Other level) and 664 Local level), as well as non-post resources. The resources would provide for the servicing of meetings, seminars, workshops and training events to ensure a coherent, effective and timely humanitarian response to alleviate human suffering in natural disasters and complex emergencies. The resources would also provide for consultations, advice and advocacy to support effective planning of future emergencies and natural disasters and strengthen contingency funding arrangements. The resources would continue to support the Emergency Relief Coordinator in coordinating the international community’s response to complex emergencies and natural disasters. This includes creating more predictable funding to enable a prompt response to new or rapidly deteriorating crises, including through the further strengthening of the Central Emergency

Response Fund and other pooled fund mechanisms; strengthening humanitarian coordination on the ground; and enhancing preparedness activities, including by looking at the humanitarian implications of climate change. Extrabudgetary resources would also be used to fund donor meetings, including informal briefings and consultations with Member States on specific emergency situations and the financing of humanitarian requirements, process grants for new and protracted emergencies by the Central Emergency Response Fund, manage the roster of potential resident and humanitarian coordinators, conduct humanitarian assessment and strategy-building missions to review humanitarian needs and design appropriate response strategies, support inter-agency assessment and strategy-building missions to review field coordination arrangements, provide training on the humanitarian programme cycle for humanitarian partners and prepare technical materials on the consolidated appeals process. The increase of \$203,300 is attributable to the redeployment of one Humanitarian Affairs Officer (P-4) from executive direction and management owing to the abolishment of the Organizational Development Unit.

Subprogramme 3 Disaster risk reduction

- 27.111 The proposed regular budget resources for 2023 amount to \$1,341,400 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources in 2023 are reflected in table 27.28 and figure 27.XVI.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

27.112 The United Nations Office for Disaster Risk Reduction receives extrabudgetary contributions, which complement regular budget resources for the delivery of its mandate. In 2023, projected extrabudgetary resources in the amount of \$50,073,000 will be focused on providing technical assistance, capacity development and policy guidance to support the implementation of the Sendai Framework for Disaster Risk Reduction 2015–2030 and would provide for 116 posts (1 Assistant Secretary-General, 1 D-2, 3 D-1, 11 P-5, 27 P-4, 33 P-3, 2 P-2, 1 General Service (Principal level), 13 General Service (Other level), 17 (Local level) and 7 National Professional Officer), as well as non-post requirements. The estimated level of resources for 2023 reflects the level of anticipated voluntary contributions for the continuation of extrabudgetary activities, in line with the United Nations Office for Disaster Risk Reduction work programme for 2022–2023. The decrease of \$9,254,000 relates mainly to the removal of resources to support the seventh session of the Global Platform for Disaster Risk Reduction scheduled to be held in Indonesia in May 2022. The Global Platform takes place once every three years.

**Subprogramme 4
 Emergency support services**

27.113 The proposed regular budget resources for 2023 amount to \$3,286,800 and reflect a decrease of \$27,900 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 27.94 (a). Additional details on the distribution of the proposed resources for 2023 are reflected in table 27.29 and figure 27.XVII.

Table 27.29

Extrabudgetary resources

27.114 Extrabudgetary resources for the subprogramme are estimated at \$26,153,200 and would provide for 106 posts (2 D-1, 11 P-5, 35 P-4, 26 P-3, 2 P-2, 10 National Professional Officer, 17 General Service (Other level) and 3 Local level), as well as non-post resources. The resources would provide for seminars, workshops and training events in order to expedite international humanitarian assistance to victims of emergencies and natural disasters. They would cover capacity-building activities, including on search and rescue methodology, to promote the membership of developing and disaster-prone countries in emergency response networks. The resources would also be used to strengthen interoperability initiatives among national, regional and international response mechanisms for more integrated international assistance in support of a Member State affected by a natural disaster.

Subprogramme 5 Humanitarian emergency information and advocacy

27.115 The proposed regular budget resources for 2023 amount to \$1,782,400 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 27.30 and figure 27.XVIII.

Extrabudgetary resources

27.116 Extrabudgetary resources for the subprogramme are estimated at \$17,961,100 and would provide for 67 posts (1 D-1, 5 P-5, 20 P-4, 20 P-3, 1 P-2, 4 National Professional Officer, 8 General Service (Other level) and 8 Local level), as well as non-post resources. The resources would enable advocacy of humanitarian principles and international humanitarian law and provide timely and reliable information on unfolding emergencies and natural disasters, including through expanded networks, coverage and reach.

Programme support

27.117 The Executive Office is comprised of the Human Resources Section, the Supply Chain and Procurement Section, the Duty of Care, Learning and Development and Staff Welfare Unit and the Strategic Planning, Budget and Finance Section.

27.118 The Executive Office oversees the financial, human resources, procurement of goods and services and general administrative aspects. It supports senior management in formulating policies and instructions, including on financial management, workforce planning, staff rostering, duty of care, learning, development and staff welfare, organization risk management, business continuity planning and risk registry and internal controls. It coordinates departmental programme budgets and presentations to legislative bodies. It will continue to improve financial monitoring and projections of funding requirements for future budgets, managing and effectively utilizing resources, capturing and sharing field information and ensuring the accurate and timely reporting of financial transactions. As part of those efforts, the Executive Office will continuously focus on enhancing the service orientation and client focus of its administrative support.

27.119 The proposed regular budget resources for 2023 amount to \$1,739,400 and reflect an increase of \$27,900 compared with the appropriation for 2022. The proposed increase is explained in paragraph 27.94 (b). Additional details on the distribution of the proposed resources for 2023 are reflected in table 27.31 and figure 27.XIX.

 (Number of posts/thousands of United States dollars)

Extrabudgetary resources

27.120 Extrabudgetary resources for the component are estimated at \$26,974,500 and would provide for 92 posts (1 D-1, 2 P-5, 18 P-4, 32 P-3, 2 National Professional Officer, 1 General Service (Principal level), 31 General Service (Other level) and 5 Local level), as well as non-post resources. The resources would allow the component to oversee financial, human resources and general administration of the Office for the Coordination of Humanitarian Affairs.

Annex I

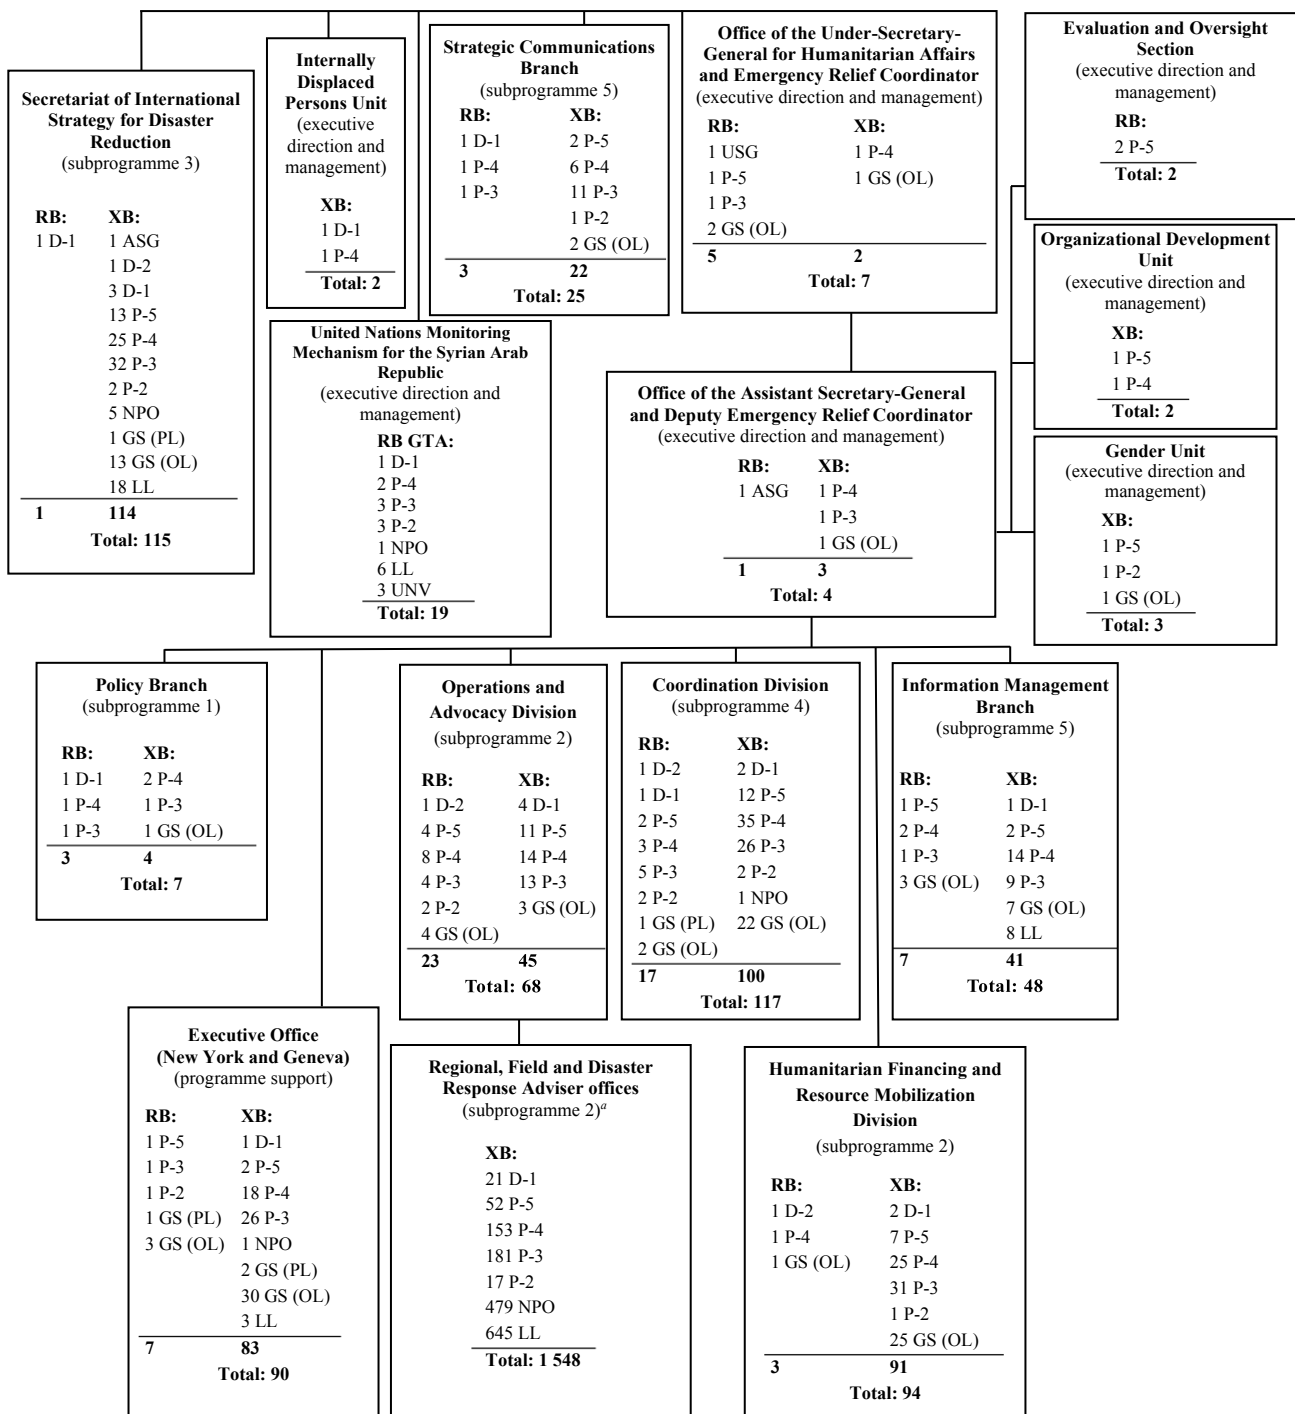

Organizational structure and post distribution for 2023

Two charts showing the organizational structure of the Office for the Coordination of Humanitarian Affairs are presented below. Chart A reproduces the approved organizational structure for 2022, as contained in document [A/76/6 \(Sect. 27\)](#). Chart B presents the proposed organizational structure for 2023.

Justification for the proposed changes

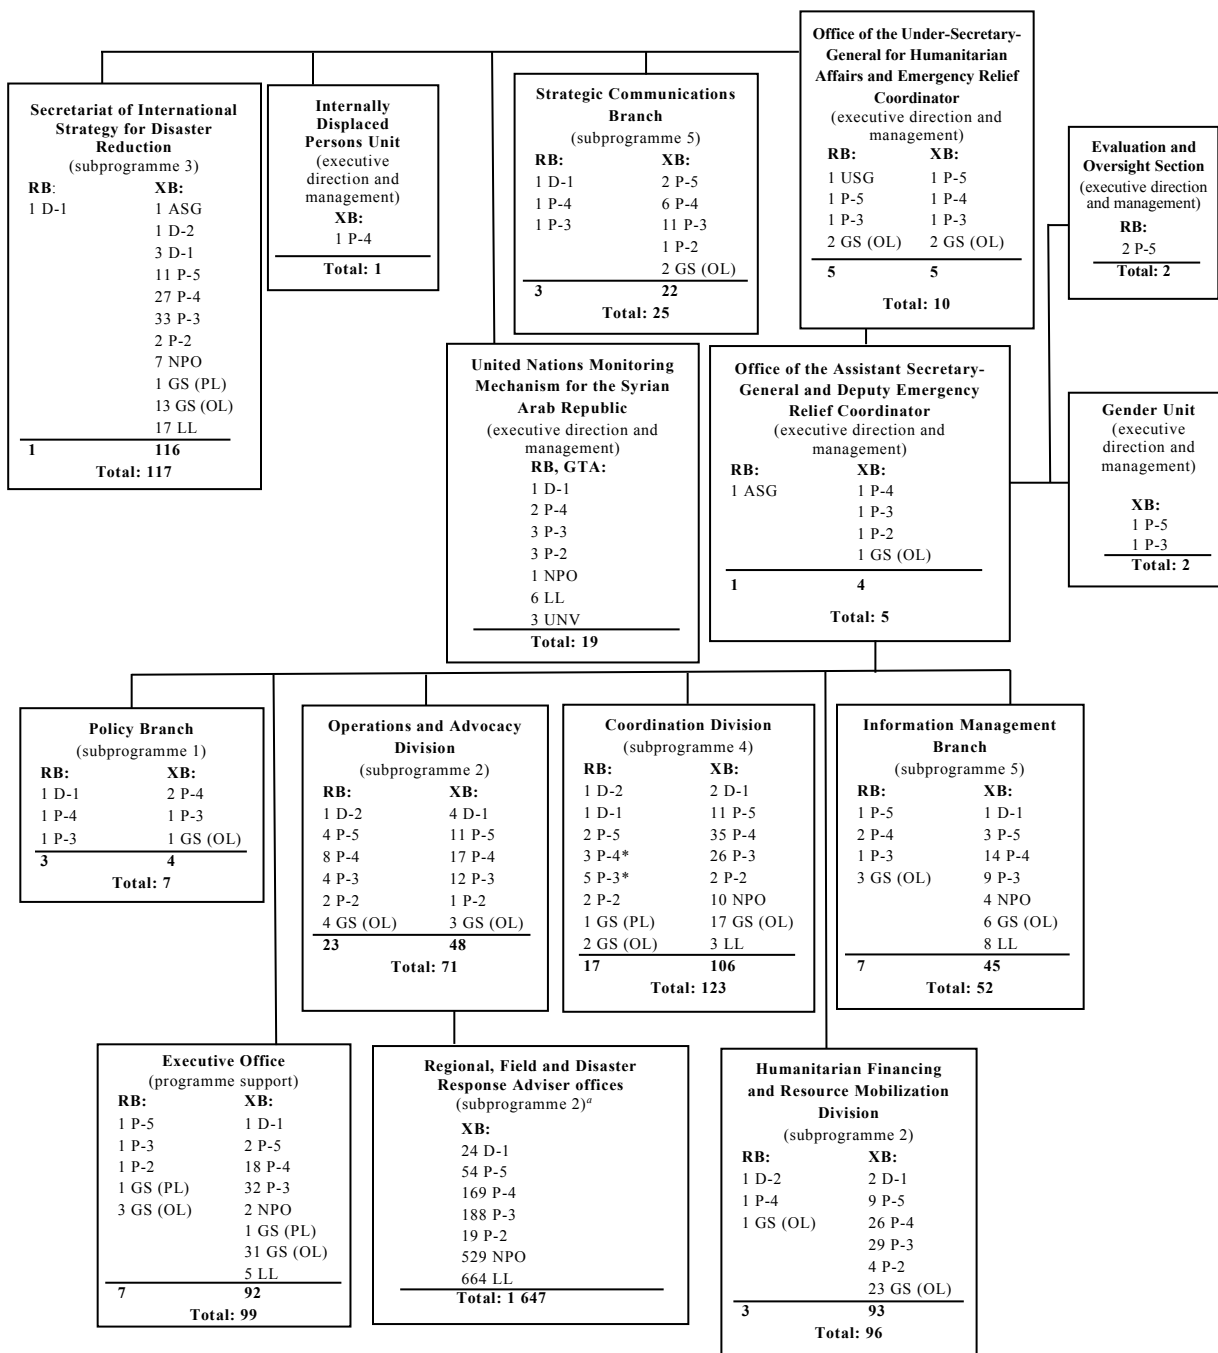

The Organizational Development Unit, which comprised two extrabudgetary funded posts (one P-5 and one P-4), was abolished in November 2021 as a result of the reprioritization of operational needs. A Humanitarian Affairs Officer (P-5) was redeployed to the Office of the Under-Secretary-General for Humanitarian Affairs and Emergency Relief Coordinator under executive direction and management to continue to support the Under-Secretary-General and the Assistant Secretary-General on various humanitarian matters, including the functions of organizational development and structural reviews. Another Humanitarian Affairs Officer (P-4) was redeployed to the Operations and Advocacy Division under subprogramme 2 to support the additional capacity requirements of the subprogramme.

A. Approved organizational structure and post distribution for 2022

^a Includes field office local positions (National Professional Officer and Local level) administered by the United Nations Development Programme on behalf of the Office for the Coordination of Humanitarian Affairs.

B. Proposed organizational structure and post distribution for 2023

Abbreviations: ASG, Assistant Secretary-General; GS (OL), General Service (Other level); GS (PL), General Service (Principal level); GTA, general temporary assistance; LL, Local level; NPO, National Professional Officer; RB, regular budget; USG, Under-Secretary-General; UNV, United Nations Volunteers; XB, extrabudgetary.

^a The proposed redeployments (geographical), explained in paragraph 27.94 above, are presented entirely within the Regional Offices organizational unit of the organization chart and do not entail a change in the organizational structure.

^b Includes field office local positions (National Professional Officer and Local level) administered by the United Nations Development Programme on behalf of the Office for the Coordination of Humanitarian Affairs.

Annex II

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 4	–	P-4	Redeployment (geographical) of 2 posts of Humanitarian Affairs Officer (1 P-4 and 1 P-5) from Geneva to Istanbul	To support the increasing demand for support from the Office for the Coordination of Humanitarian Affairs in the field, and its plan to become a more effective, decentralized and field-focused office. The redeployment of the two posts would strengthen policy and strategic planning and training capabilities in Istanbul and would allow the Civil Military Coordination Service to support its clients more effectively by being able to plan and respond better owing to its closer proximity to the field. The proposed redeployments (geographical) are presented entirely within the Regional Offices organizational unit of the organization chart (see annex I) and do not entail a change in the placement of the posts within the organizational structure.

Foreword

Over the course of 2023, the work of the Department of Global Communications of the Secretariat will continue to be shaped by the global communications strategy for the United Nations. The Department is responsible for informing people around the world about the state of our world and how the United Nations works to make it better. The bigger challenge is getting people to care and feel motivated to take action. The strategy serves as a blueprint, taking a data-driven and audience-focused approach to communications to build awareness, generate empathy and drive support for the work, principles and purposes of the United Nations.

The Department's communications results are informed by a systematic and strategic approach that prioritizes advance planning to ensure that it finds the best moments and opportunities to make an impact with audiences. This effort requires coordination across multiple platforms and partners to ensure that, in times of crises, the United Nations system shares common key messages and speaks with one impactful voice.

Whether it is the response to the coronavirus disease (COVID-19) pandemic, the climate crisis or conflicts or the race to achieve the Sustainable Development Goals, the Department aims to position the United Nations as a source of authoritative, engaging, attractive, accurate and accessible content, using storytelling that is people-centred but also solutions-oriented. In 2023, our communications will portray the work of the United Nations as global and rooted in the values of peace, justice, respect, equality, tolerance and solidarity. We will demonstrate that we serve everyone, everywhere.

(Signed) Melissa **Fleming**
Under-Secretary-General for Global Communications

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 28.1 The Department of Global Communications is responsible for communicating to the world the ideals and work of the United Nations; interacting and partnering with diverse audiences; and building support for the purposes and principles enshrined in the Charter of the United Nations. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolutions 13 (I), 73/346 on multilingualism and, most recently, 76/84 A and B on questions relating to information. The world faces grave, complex and evolving challenges. The Department will leverage the power of communications to tell the United Nations story to global audiences in many languages and across multiple platforms in order to mobilize concerted action in support of the United Nations agenda.

Strategy and external factors for 2023

- 28.2 The overall programme plan for 2023 reflects the Department's strategy to strengthen support for the work and purposes of the United Nations by engaging with audiences and encouraging them to act, through impactful storytelling and a focus on solutions. To fulfil its responsibilities, the Department takes the following core approaches in its work: strategic planning by identifying communications goals and target audiences; close working relationships with stakeholders, the substantive departments and offices of the Secretariat and entities of the United Nations system and other key partners; enhanced audience reach through multilingualism and the parity of all six official languages in the preparation of news and communications products where feasible; targeted use of the latest information and communications technologies in traditional, social and digital media to deliver information directly and instantaneously worldwide to key audiences; and rigorous evaluation tools and processes to measure the impact of campaigns in order to learn and to adjust the Department's work.
- 28.3 The Department, through its subprogrammes, delivers strategic communications campaigns to engage and inspire target audiences. It works through a global network of United Nations information centres, integrated with United Nations resident coordinator offices, to reach local audiences and provide content for global platforms. It produces accurate, objective and balanced multilingual news and communications products that convey authoritative information and solutions-based stories. It advocates on priority issues with the help of a wide array of partners, including Member States, civil society, academia, the media and, in particular, young people, to expand programmatic impact. The Department also provides information and services to delegates and staff, including through the Dag Hammarskjöld Library, and promotes knowledge-sharing and internal communication by way of iSeek, the United Nations intranet. To better reflect its work, the title for subprogramme 1, "Strategic communications services", has been adjusted to "Campaigns and country operations services" in the proposed programme plan for 2023.
- 28.4 The Department continues to put accuracy, timeliness and trustworthiness at the centre of its work. In an age when misinformation and hatred are disseminated to sow bigotry, promote discrimination and undermine civil discourse, United Nations communications, including crisis communications, strive to serve as a source of reliable, fact-based information that advances the work, principles and purposes of the United Nations.
- 28.5 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the coronavirus disease (COVID-19) pandemic. Examples of lessons learned and best practices include the use of

modern technologies for virtual events, or a hybrid format, to deliver programmes. In 2021, these events included the 2021 International Media Seminar on Peace in the Middle East, the 2021 training programme for Palestinian journalists, the Sustainable Development Goals media zone during the opening of the seventy-sixth session of the General Assembly, the “COP26 Dialogues” in the Sustainable Development Goals Studio, and the sixth iteration of the training on communicating on sexual exploitation and abuse for senior staff from United Nations agencies, funds and programmes and peace operations. In the absence of in-person service volunteer and educational activities traditionally carried out to mark Nelson Mandela International Day, the Department created a “Nelson Mandela International Day” challenge as part of the ActNow campaign. Another example is the discontinuation of the *Yearbook of the United Nations*. On the basis of an ongoing review of communications products, the *Yearbook*, a publication that was produced in English only with limited outreach, will be discontinued and replaced with a legacy online site that connects directly with relevant resources in the Dag Hammarskjöld Library. At the same time, it is assumed that where operational conditions have improved and allow for mandate implementation through formerly established approaches, there will be more opportunities for direct engagement with key stakeholders and partners, which in turn yields better impact. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.

- 28.6 With regard to cooperation with other entities at the global, regional, national and local levels, the Department will work collaboratively with an array of partners, including civil society, Member States, non-governmental organizations, academia, the media and the private sector. The Department will apply its strategic and streamlined approach to partnerships to enhance its ability to target and deliver its message to an even wider community, including young people around the world, in a variety of ways.
- 28.7 With regard to inter-agency coordination and liaison, as the secretariat for the United Nations Communications Group and its various task forces on subject matters, the Department will continue to strengthen the coordination of communications, including crisis communications, across the United Nations system, including through United Nations communications groups at the country and regional levels, in order to harmonize communications on specific issues for greater impact. Coordination will also be strengthened through the integration of United Nations information centres with resident coordinator offices, in line with the implementation of the United Nations development system reform. The Department’s field staff serve as communications officers and advisers to resident coordinators and work under their direct supervision. As part of the integration process, the Information Centres Service will continue its work with the Development Coordination Office to provide strategic communications support to resident coordinators in countries without an information centre presence, to ensure the Department’s reach.
- 28.8 With regard to the external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) All stakeholders and partners fulfil their responsibilities and obligations under service agreements and partnerships;
 - (b) Access by target audiences to programmes, products and services is not limited by communications technology, security or infrastructure conditions.
- 28.9 The Department integrates a gender perspective in its operational activities, deliverables and results, as appropriate. The strategic communications guidance of the Department mainstreams a gender perspective into the work of the Department as a matter of practice. For example, the Department will promote the balanced presence of women and men, as well as a multidimensional representation and portrayal of women and men, in all of its products, campaigns, events and activities. It will offer alternative perspectives, including the representation and participation of women as a key communications focus area, helping to ensure that all media products, campaigns and outreach efforts are gender-inclusive and promote gender equality and women’s empowerment.

- 28.10 In line with the United Nations Disability Inclusion Strategy, the Department will use its network of focal points to help to develop a common and coordinated approach to the implementation of relevant General Assembly mandates and to making United Nations services and activities accessible for persons with disabilities. The focal points will continue to provide communications support to the Strategy, including by setting accessibility standards for United Nations websites and providing internal communications support through iSeek, the United Nations intranet.

Programme performance in 2021

Impact of the pandemic

- 28.11 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular for the United Nations information centres, where there was a reduction or cancellation of in-person events. While the involvement of the information centres in Model United Nations conferences, for example, increased slightly compared with in 2020, it was limited to 35 events compared with pre-pandemic levels of more than 120. Broader educational outreach was also affected, with the number of briefings, workshops and panel discussions halved since 2019. This situation was countered by predominantly switching to virtual alternatives, where around 700 activities were undertaken by information centres during 2021. Under subprogramme 2, a limited number of media representatives were allowed access to accompany Heads of State and Government during the high-level week of the General Assembly. Several video and news producers were allowed to travel to gather original content and cover the twenty-sixth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change and the high-level meeting held on the twentieth anniversary of the Durban Declaration. In addition, in order to support Member States on issues related to the COVID-19 pandemic, within the overall scope of the objectives, communications messaging across issues continued to focus on the need for a just transition and sustainable recovery from COVID-19, to restore balance with nature, tackle the climate emergency, reduce inequalities and ensure that no one is left behind. Access to vaccines featured prominently in United Nations communications, including through the Verified campaign, designed to combat misinformation. United Nations information centres continued to support resident coordinator offices, the World Health Organization and other agencies in United Nations country teams by localizing messaging relating to COVID-19.

Legislative mandates

- 28.12 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

13 (I)	Organization of the Secretariat	57/129	International Day of United Nations Peacekeepers
168 (II)	United Nations Day		
423 (V)	Human Rights Day	60/7	Holocaust remembrance
32/40 B	Question of Palestine	60/225	Assistance to survivors of the 1994 genocide in Rwanda, particularly orphans, widows and victims of sexual violence
35/201	Annual Reham Al-Farra Memorial Journalists' Fellowship Programme	62/122	Permanent memorial to and remembrance of the victims of slavery and the transatlantic slave trade
36/67	International Year of Peace and International Day of Peace		
54/134	International Day for the Elimination of Violence against Women	64/13	Nelson Mandela International Day
57/7	Final review and appraisal of the United Nations New Agenda for the Development of Africa in the 1990s and support for the New Partnership for Africa's Development	75/23	Special information programme on the question of Palestine of the Department of Global Communications of the Secretariat
		75/80	United Nations Disarmament Information Programme

Section 28 Global communications

76/68	Follow-up to the Declaration and Programme of Action on a Culture of Peace	76/142	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly
76/84 A	Questions relating to information: information in the service of humanity		
76/84 B	Questions relating to information: United Nations global communications policies and activities	76/226	A global call for concrete action for the elimination of racism, racial discrimination, xenophobia and related intolerance and the comprehensive implementation of and follow-up to the Durban Declaration and Programme of Action
76/104	Dissemination of information on decolonization		

Deliverables

28.13 Table 28.1 lists all cross-cutting deliverables of the programme.

Table 28.1

Cross-cutting deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	3	3	3	3
Meetings of:				
1. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
2. The Committee for Programme and Coordination	1	1	1	1
3. The Fifth Committee	1	1	1	1

Evaluation activities

- 28.14 The evaluation of the global communications strategy was ongoing in 2021 and its preliminary findings have guided the proposed programme plan for 2023.
- 28.15 The results and lessons of the evaluation referenced above have been taken into account for the proposed programme plan for 2023. For example, in response to insights on the impact of referrals from Google, YouTube and Instagram on the ActNow campaign, as guided by the global communications strategy, ambitious growth targets for individual actions logged were included in the proposed programme plan for 2023.
- 28.16 An evaluation on the implementation of multilingualism in the Department of Global Communications is planned for 2023.

Programme of work

Subprogramme 1

Campaigns and country operations services

Objective

- 28.17 The objective, to which this subprogramme contributes, is to mobilize audiences and strengthen support for the work, principles and purposes of the United Nations.

Strategy

- 28.18 To contribute to the objective, the subprogramme will:
- (a) Deliver communications campaigns related to United Nations priorities, including sustainable development, climate change, peace and security and human rights, directed by the global communications strategy for the United Nations and facilitated through a variety of communications tools, including audience-targeted messaging, issue-focused content and inspiring stories, drawing attention to solutions and successes and creating momentum for further action. The impact and progress of the Organization's work will be demonstrated and amplified through the United Nations Communications Group, which will coordinate communications activities across the United Nations system;
 - (b) Promote strategic communications priorities of the United Nations through its information centres by developing multimedia content that supports targeted and localized messages and communications campaigns;
 - (c) Provide strategic and crisis communications guidance to resident coordinator offices and United Nations country teams in their respective regions;
 - (d) Provide information on issues related to COVID-19 by developing and promoting content that addresses misinformation, builds confidence in health messaging and vaccination, and promotes the ongoing process of recovery towards a more equal, inclusive, sustainable, safe and healthy planet.
- 28.19 The above-mentioned work is expected to result in:
- (a) Increased knowledge and engagement of target audiences around the globe, and further action in support of United Nations priorities;
 - (b) Global reach of communications campaigns available in the languages and on the platforms used by audiences, thus ensuring greater impact.

Programme performance in 2021

Sustainable Development Goals Moment reinforced the relevance of the 2030 Agenda for Sustainable Development

- 28.20 The subprogramme produced a dedicated multilingual platform and social media assets for the "Sustainable Development Goals Moment" event that marked the start of the high-level segment of the seventy-sixth session of the General Assembly and resulted in high audience engagement. The subprogramme also launched the "Keeping the Promise" campaign, which was designed to invite people from all over the globe to make a commitment to help to achieve a better world for all. Participants were invited to choose from 11 promises – inspired by the Sustainable Development Goals – and to share their promise on their social media accounts, inspiring others to do the same.
- 28.21 In coordination with the Office of the Deputy Secretary-General, the subprogramme leveraged the presence of the K-pop band BTS at the Sustainable Development Goals Moment at the start of the seventy-sixth session of the General Assembly in their capacity as special envoys of the President of the Republic of Korea. BTS participated in the "Keeping the Promise" campaign and shared their promise on social media platforms, boosting the overall visibility of the campaign, with more than 115,000 promises shared. The Sustainable Development Goals Moment reached new audiences across the world and achieved the highest numbers seen on United Nations social media platforms in the past two years. Nearly 3.9 million engagements resulted from over 100 posts published across platforms and languages. This outcome demonstrated the power of integrating social media elements into the early planning stages of campaigns, as well as the effectiveness of providing high-profile collaborators with opportunities to engage with United Nations-led social media activations.
- 28.22 Progress towards the objective is presented in the performance measure below (see figure 28.I).

Figure 28.I
Performance measure: “Sustainable Development Goals Moment” user engagements
 (Millions)

Planned results for 2023

Result 1: mobilizing the media for implementation of the Sustainable Development Goals

Programme performance in 2021 and target for 2023

- 28.23 The subprogramme’s work contributed to targeted outreach approaches on the Sustainable Development Goals with various media companies, resulting in 100 new members of the Sustainable Development Goals Media Compact in 2021 for a cumulative total of 230 members, which exceeded the planned target of 150 members.
- 28.24 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 28.II).

Figure 28.II
Performance measure: total number of members of the Sustainable Development Goals Media Compact (cumulative)

Result 2: strengthened action on climate change

Programme performance in 2021 and target for 2023

- 28.25 The subprogramme’s work contributed to the informed understanding and strengthened engagement of audiences on climate action, including through its ActNow campaign, resulting in 3.4 million individual actions logged in 2021 for a cumulative total of 4.5 million actions logged by the end of the year, which exceeded the planned target of 1.5 million climate actions logged.
- 28.26 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 28.III).

Figure 28.III
Performance measure: total number of climate actions logged on the website or in the ActNow application (cumulative)

Result 3: increased engagement with global audience on United Nations priority themes

Proposed programme plan for 2023

- 28.27 Social media platforms have increasingly served as major channels to increase knowledge and engagement of global audiences on United Nations priority themes and to maximize reach and impact. To that end, the subprogramme is developing targeted digital assets to reach global audiences.

Lessons learned and planned change

- 28.28 The lesson for the subprogramme was that it needed to develop targeted digital assets and fully integrate social media as a core element of all campaign strategies from the planning stage onwards, to increase both the impact and reach of the Department’s campaigns on priority themes, including the Sustainable Development Goals; climate action; the Durban Declaration and Programme of Action on countering racism, intolerance and discrimination; peace and security; sexual exploitation and abuse; and human rights.
- 28.29 In applying the lesson, the subprogramme will strengthen its campaigns with target countries, and its social media team’s respective language unit will advise on messaging, platforms and influencers that would expand the reach to global audiences. Campaign partners and supporters will be identified with a view to amplifying United Nations campaigns on social media platforms, and will be included at the campaign planning stage. Social insights and monitoring of conversations and activism around key United Nations topics, including user comments, will inform the direction of campaigns on an ongoing basis, changing course as needed. By taking an agile, strategic and data-driven approach, the subprogramme aims to maximize impact and reach, resulting in an increase in followers across United Nations accounts.

28.30 Expected progress towards the objective is presented in the performance measure below (see figure 28.IV).

Figure 28.IV

Performance measure: number of social media followers across platforms

(Millions)

Deliverables

28.31 Table 28.2 lists all deliverables of the subprogramme.

Table 28.2

Subprogramme 1: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	1
1. Report for the General Assembly on the dissemination of information on decolonization	1	1	1	1
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	26	23	26	26
2. Training programme for Palestinian broadcasters and journalists	24	21	24	24
3. International Media Seminar on Peace in the Middle East	2	2	2	2
D. Communication deliverables				
Outreach programmes, special events and information materials: communications campaigns and strategic outreach events and programmes through the Department’s field offices reaching local audiences through lectures, exhibits and the organization of more than 100 Model United Nations conferences on priority issues or special observances of the United Nations, with specific target audiences (e.g. civil society, youth, academia, governments and the private sector) and working in some 120 languages.				
External and media relations: press conferences, briefings and panel discussions on United Nations priorities, activities, events, publications, reports and outcomes of negotiations or other United Nations activities; media outreach, including media interviews and/or placement of opinion articles; strategic partnerships with education institutions, the media, civil society, the private sector, the creative community and other partners; and radio and television programmes.				
Digital platforms and multimedia content: flagship and other social media accounts, campaigns and multilingual websites managed by United Nations information centres.				

Subprogramme 2

News services

Objective

- 28.32 The objective, to which this subprogramme contributes, is to mobilize audiences and strengthen support for the work, principles and purposes of the United Nations.

Strategy

- 28.33 To contribute to the objective, the subprogramme will:
- (a) Provide the timely delivery of accurate, objective and balanced news and information;
 - (b) Produce customized news and information materials (textual, audiovisual and photographic);
 - (c) Provide services to the media and other consumers, including through the use of the newest web-based and mobile distribution platforms, with an overall emphasis on multilingualism from the planning stage.
- 28.34 The above-mentioned work is expected to result in:
- (a) An increase in the number of users of the subprogramme's products and services;
 - (b) Increased public awareness of and engagement with the United Nations through access to more user-friendly and diversified content and a broader range of options available to audiences, from traditional to social media.

Programme performance in 2021

Increased audience through the United Nations YouTube channel

- 28.35 In 2021, the subprogramme continued to expand its audience base through the official live-streaming United Nations channel on YouTube, which grew from 901,900 subscribers in 2020 to 2.1 million in 2021. The subprogramme sent notifications to a larger base of viewers and there was a clear indication that people were aware of the channel and interested in the content. From 2019 to date, the channel has generated more than 205.4 million video views and over 11.5 million hours of watch time. The international audience includes nationalities from all Member States. During the high-level segment, which included the general debate, of the seventy-sixth session of the General Assembly and other events, the majority of the audience – some 60 per cent – was composed of people between 18 and 35 years of age.
- 28.36 Progress towards the objective is presented in the performance measure below (see figure 28.V).

Figure 28.V
Performance measure: subscribers to the global United Nations YouTube channel (cumulative)

Planned results for 2023

Result 1: multimedia content at a glimpse

Programme performance in 2021 and target for 2023

28.37 The subprogramme’s work contributed to the roll-out of a new website for United Nations Web TV and the creation of a unified platform that enabled visitors to access audiovisual material (audio, video and photo) from one website, resulting in 58 million minutes of watch time of on-demand videos, which did not meet the planned target of 70 million minutes of on-demand videos watched. The target was not met as fewer meetings and events were held at United Nations Headquarters in 2021 owing to COVID-19, and less video content was produced.

28.38 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 28.VI).

Figure 28.VI
Performance measure: watch time of on-demand videos per year
 (Millions of minutes)

Result 2: increased focus on climate change**Programme performance in 2021 and target for 2023**

- 28.39 The subprogramme's work contributed to the creation of audience-centred and dedicated multimedia content on climate change, including explainers, listicles, a climate newsletter and a podcast series called "No Denying It", resulting in 1.2 million page views (a 65 per cent increase during the twenty-sixth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change), with a tagging system used to collect baseline metrics to measure engagement by thematic issue, which met the planned target.
- 28.40 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 28.3).

Table 28.3

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Access to breaking news related to climate change	Access to breaking news related to climate change including feature stories, explainers and advocacy-oriented content in response to audience interest	Dedicated multimedia content on climate change increasingly viewed, with a tagging system used to collect baseline metrics to measure engagement by thematic issue	25 per cent increase in users of news related to climate action	30 per cent increase in traffic related to news products and platforms related to climate action

Result 3: increased access to United Nations News**Proposed programme plan for 2023**

- 28.41 The subprogramme has witnessed a marked shift in how visitors to its website are consuming content: away from desktops and with a preference for mobile devices. While in 2020, some of this could be attributed to the COVID-19 pandemic, the move has been sustained and has continued, with new users and visitors and returning visitors showing a marked preference for mobile viewing. This development led to the redesign in 2021 of the United Nations News home page and the creation of content, including for the mobile version of the website.

Lessons learned and planned change

- 28.42 The lesson for the subprogramme was that the growth in the number of visitors accessing United Nations News, including on mobile devices, would require additional investment in enhancing and upgrading the existing UN News Reader mobile app to offer additional functionalities and preferences to users and to draw more global and regional users.
- 28.43 In applying the lesson, the subprogramme will respond to best practices, for example, in mobile consumption of United Nations News and distribution methods, by revising story formats to cater to changing regional audience preferences and tailoring content to appeal to younger demographics who use mobile devices. In addition, it could strengthen its search engine optimization to facilitate user access to United Nations News on various platforms. This approach is expected to result in a higher engagement rate, with an increasing number of users accessing the United Nations News website.

28.44 Expected progress towards the objective is presented in the performance measure below (see figure 28.VII).

Figure 28.VII
Performance measure: increased access to the redesigned United Nations News website
 (Millions of users)

Deliverables

28.45 Table 28.4 lists all deliverables of the subprogramme.

Table 28.4
Subprogramme 2: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory

D. Communication deliverables

External and media relations: accreditation of and services to 1,100 members of the media, covering the United Nations meetings; coverage of intergovernmental meetings; online publication and distribution of speeches and statements of the Secretary-General and the Deputy Secretary-General and transcripts of press encounters of the Secretary-General; and photo coverage of meetings of key intergovernmental bodies and activities of the Secretary-General, the Deputy Secretary-General and the President of the General Assembly.

Digital platforms and multimedia content: daily multimedia content – audio, video and text – in the six official languages and three non-official languages (Hindi, Kiswahili and Portuguese) disseminated through multiple platforms and channels, including online and on social media, and through partnerships with external media organizations; the core United Nations website (including the home page), 206 United Nations observances and major global campaigns in the six official languages; assistance to United Nations entities on the multilingual aspects of their websites (some 42 websites); live television coverage, including live streams, and the posting of on-demand webcasts of intergovernmental meetings and other newsworthy events taking place at Headquarters, including the Sustainable Development Goals Studio; and provision of audiovisual library services to delegates, media outlets and others.

Subprogramme 3 Outreach and knowledge services

Objective

28.46 The objective, to which this subprogramme contributes, is to mobilize audiences and strengthen support for the work, principles and purposes of the United Nations.

Strategy

- 28.47 To contribute to the objective, the subprogramme will:
- (a) Engage in advocacy with a broad and international range of academic institutions, students and educators, the creative community and civil society;
 - (b) Organize briefing programmes, special events, guided tours and interactive workshops, and engage with organizers of Model United Nations conferences;
 - (c) Organize outreach and education programmes on the Holocaust and the transatlantic slave trade and create publications, research guides and exhibits on the same priorities, with a special focus on youth;
 - (d) Develop communications materials, visual identities and branding in support of United Nations priorities;
 - (e) Develop and maintain strategic partnerships with the entertainment, advertising and publishing industries, major sports and international events and institutions of higher education and research, targeting youth in particular;
 - (f) Work with partners to develop multilingual, effective educational resources and programmes, campaigns, projects and events to inspire and encourage action for the 2030 Agenda for Sustainable Development;
 - (g) Facilitate knowledge-sharing and the preservation of United Nations information resources for internal and external audiences.
- 28.48 The above-mentioned work is expected to result in:
- (a) A better understanding of the principles and purposes of the United Nations and the mobilization of youth and student participation in local, regional or national political, non-governmental and intergovernmental processes;
 - (b) Increased mobilization of youth and student activity to advance the achievement of the Sustainable Development Goals and foster a new generation of leaders committed to the principles and values of the United Nations;
 - (c) Increased access to United Nations documentation and information by Member States, United Nations staff around the world, research institutions, youth, schools and the general public for improved engagement, awareness and decision-making.

Programme performance in 2021

Increased awareness of Sustainable Development Goal 2 (End hunger, achieve food security and improved nutrition and promote sustainable agriculture)

- 28.49 The subprogramme developed partnerships with the film and television industries to determine how they could work with the Organization to raise awareness of nutrition, reduce food waste and promote other sustainable food practices that contribute to personal health and a healthy planet. Global campaigns were created in collaboration with prominent film and television studios, including video public service announcements and other digital assets featuring the studios' popular fictional characters, to deliver messaging on Sustainable Development Goal 2. The Food and Agriculture Organization of the United Nations (FAO) and the United Nations Foundation were also campaign partners.
- 28.50 One campaign featured the animated character Peter Rabbit and raised awareness of and inspired action on Goal 2, with 185,000 social media engagements (likes, comments, etc.) and nearly 1 million views of the campaign's video public service announcement, which was produced in 14 languages. To encourage people to take action on Goal 2, campaign content also featured prominently on the

United Nations ActNow website and mobile app for a seven-week period. This ActNow “takeover” generated nearly 60,000 page views and the mobile app was used some 6,000 times, resulting in around 400,000 habits logged or individual actions taken to promote healthy eating and zero waste. One partner also aired the public service announcement on its global television networks, with a potential viewership of 5.6 million people, delivering messaging and driving thousands to ActNow to record sustainability actions. To reach students directly, messaging was also distributed on a dedicated web page for teachers on the website of a Member State’s Ministry of Education, was included in an FAO children’s activity book in 17 languages and was promoted to 55,000 teachers, with content incorporated in classrooms and curricula worldwide. The campaign was also promoted to tens of thousands of staff of the campaign’s studio partners worldwide, with their sustainability departments incorporating “sustainable” actions in worksites globally.

28.51 Progress towards the objective is presented in the performance measure below (see figure 28.VIII).

Figure 28.VIII

Performance measure: views of video public service announcement that delivered messaging on Sustainable Development Goal 2

Planned results for 2023

Result 1: mobilizing strategic and sustained partnerships to accelerate the implementation of the Sustainable Development Goals

Programme performance in 2021 and target for 2023

28.52 The subprogramme’s work contributed to increased engagement with global and diverse partners to accelerate the implementation of the Sustainable Development Goals, resulting in 296 partners focused on disseminating content and campaigns on the Goals, which exceeded the planned target of 94 partners.

28.53 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 28.IX).

Figure 28.IX

Performance measure: number of partners focused on disseminating content and campaigns (cumulative)

Result 2: increased access to United Nations knowledge and parliamentary documentation

Programme performance in 2021 and target for 2023

28.54 The subprogramme’s work contributed to the provision of immediate and diverse formats of United Nations parliamentary documents and publications to members of permanent missions, researchers and citizens worldwide, resulting in 3.5 million unique downloads of United Nations content on its platforms, which exceeded the planned target of 2.9 million unique downloads.

28.55 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 28.X).

Figure 28.X

Performance measure: number of unique downloads of United Nations content on subprogramme platforms (cumulative)

(Millions)

Result 3: increased awareness of and action for the Sustainable Development Goals through the global football community

Proposed programme plan for 2023

28.56 The implementation of the 2030 Agenda and the Sustainable Development Goals by 2030 is falling behind in some areas, with the COVID-19 pandemic having a significant negative impact. If the world is to accelerate towards achievement of the Goals, the United Nations needs to bring broad groups of stakeholders into its outreach efforts, particularly those with large global audiences. The subprogramme conceptualized an initiative aimed at driving meaningful commitment from actors in, and supporters of, one of the world’s most popular sports.

Lessons learned and planned change

28.57 The lesson for the subprogramme, on the basis of previous high-profile campaigns, is that consistent engagement with key stakeholders in a global initiative, in this case the global football community, is essential for success. The subprogramme, having had continuous engagement with major football leaders, including from the Fédération Internationale de Football Association and the Union of European Football Associations, will launch the “United Nations football for the Goals” initiative, which provides opportunities for football communities to commit to and take action on the Goals. The subprogramme similarly recognizes that support from and discussion with Member States on such a high-profile initiative will be key to its success. In applying the lesson, the subprogramme will work with all stakeholders to identify key events and other opportunities to showcase actions driving success with regard to the Goals in the football world and to demonstrate how other entities and the general public can become an effective part of implementation of the Goals. To become members of the “United Nations football for the Goals” initiative, the football organizations and individual stakeholders would commit to raise awareness of, and take specific actions on, the Goals.

28.58 Expected progress towards the objective is presented in the performance measure below (see figure 28.XI).

Figure 28.XI

Performance measure: number of partner entities engaged in the “United Nations football for the Goals” initiative (cumulative)

Deliverables

28.59 Table 28.5 lists all deliverables of the subprogramme.

Table 28.5

D. Communication deliverables				
Outreach programmes, special events and information materials: partnerships with civil society, academic institutions and other entities; educational and promotional materials on United Nations activities, such as UN Chronicle and Basic Facts about the United Nations, and briefing programmes on a broad range of United Nations topics; responses to public enquiries and special kits for teachers; exhibits at United Nations Headquarters and online; multilingual guided tours to more than half a million visitors in 20 languages; outreach programme with prominent personalities, including Messengers of Peace and other celebrities, as advocates; special events and observances of selected commemorative days and years; Creative Community Outreach Initiative to feature the United Nations or a United Nations issue in a film, television or theatre product; graphic design products in support of branding, communication campaigns and information materials; student events, such as global videoconferences; guidance and expert advice to Model United Nations; and conferences on subjects such as slavery and the transatlantic slave trade and Holocaust remembrance.				
External and media relations: press conferences and press releases to announce new outreach partnerships and special events; and exhibit openings.				
Digital platforms and multimedia content: iSeek (including articles), the primary internal communications platform of the Secretariat for all users across the world; e-deleGATE; and United Nations Development Business.				
Library services: United Nations digital commons: a secure digital United Nations central repository (the United Nations Digital Library); information and knowledge services: online Library products for the Library's global public, loan and related services and the provision of direct and targeted research to representatives of Member States; wider community engagement: web and social media presence, events and lectures and management of the United Nations System Electronic Information Acquisition Consortium and the United Nations Depository Library Programme; and curation of diverse library content.				

B. Proposed post and non-post resource requirements for 2023

Overview

28.60 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 28.6 to 28.8.

Table 28.6

28.61 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 28.9 to 28.11 and figure 28.XII.

28.62 As reflected in tables 28.9 (1) and 28.10 (1), the overall resources proposed for 2023 amount to \$100,999,600 before recosting, reflecting a net increase of \$984,900 (or 1.0 per cent) compared with the appropriation for 2022. Resource changes result from three factors, namely: (a) technical adjustments; (b) new and expanded mandates; and (c) other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

28.63 As reflected in table 28.9 (1), resource changes reflect a net increase of \$28,500, as follows:

- (a) **Subprogramme 1, Campaigns and country operations services.** The increase of \$34,800 relates to the delayed impact of the conversion of one post from Public Information Officer (P-4) to Associate Public Information Officer (National Professional Officer), approved pursuant to General Assembly resolution [76/245](#), which was subject to a 50 per cent vacancy rate in accordance with the established practice;

- (b) **Subprogramme 2, News services.** The decrease of \$6,300 reflects the removal of non-recurrent provisions under contractual services to cover webcasting services pursuant to General Assembly decision 75/570 on the intergovernmental conference on an international legally binding instrument under the United Nations Convention on the Law of the Sea on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction.

New and expanded mandates

- 28.64 As reflected in table 28.9 (1), resource changes reflect an increase of \$13,700, under subprogramme 2, News services. The increase of \$13,700, under contractual services, reflects additional requirements for webcasting services in support of a high-level meeting and multi-stakeholder hearing on universal health coverage, pursuant to General Assembly resolution [75/315](#).

Other changes

- 28.65 As reflected in table 28.9 (1), resource changes reflect a net increase of \$942,700, comprising increases under executive direction and management (\$125,400), subprogramme 2, News services (\$771,600), and subprogramme 3, Outreach and knowledge services (\$45,700), and cost-neutral changes under subprogramme 1, Campaigns and country operations services. The breakdown of changes is as follows:

- (a) **Executive direction and management.** The increase of \$125,400, under posts, relates to the proposed establishment of one post (P-5) in the Office of the Under-Secretary-General for Global Communications (see annex III);
- (b) **Subprogramme 1, Campaigns and country operations services.** The cost-neutral changes mainly reflect:
- (i) A net increase of \$14,800, under posts, relating to the proposed geographical redeployment of one post (P-3) from Dar es Salaam, United Republic of Tanzania, to Nairobi, and one post (P-3) from New York to Geneva (see annex III);
- (ii) The proposed geographical redeployment of five posts (1 P-5, 1 National Professional Officer and 3 Local level) from Lagos, Nigeria, to Abuja, with no budget implications (see annex III);
- (iii) A decrease of \$14,800, under supplies and materials, taking into account expenditure experience, the increased use of online tools in lieu of office supplies such as printing paper, and the reduced consumption of supplies owing to increased remote working arrangements;
- (c) **Subprogramme 2, News services.** The net increase of \$771,600 reflects the net effect of:
- (i) A decrease of \$65,100, under posts, relating to the proposed reassignment of one post (P-2) at a vacancy rate of 50 per cent (see annex III);
- (ii) An increase of \$836,700 in support of the Sustainable Development Goals Studio. The need for high-quality digital interactions has spurred the Department to increase the sophistication of its production of virtual and hybrid events, and to take advantage of the potential for digital storytelling that can create a more immersive experience. In recent years, and especially given the uptick in the number of virtual events, stakeholder demand for virtual special events and complex meetings involving participants from multiple locations has increased exponentially. In the initial phases, it was necessary to connect to parties via Webex, Zoom and Teams. As a result of the COVID-19 pandemic, demand for improving the production of virtual events, especially for those that could be distributed via broadcast channels, grew. To effectively engage audiences and connect participants from multiple locations, the United Nations needs to achieve the kind of high-resolution production of events and use of digital innovations, such as data visualizations and motion graphics, that was demonstrated by external media partners in the live-streaming of meetings during the

high-level week of the General Assembly. The Sustainable Development Goal Studio will enable such activities and the production of various communications materials on United Nations priority themes, with a focus on the Goals. The Goals are the blueprint for a better and more sustainable future for all. They address the global challenges that the world faces, including poverty, inequality, climate change, environmental degradation, peace and justice. The Studio facilitates a series of dynamic discussions, cross-generational dialogues, webcast interviews and inspiring talks, showcasing change-making initiatives and revolutionary solutions to key global challenges. This interactive space will serve as a platform to engage participants in constructive conversations to promote the achievement of the Goals. The proposed increase of \$836,700 includes:

- a. An increase of \$146,000, under other staff costs, would cover the costs of two temporary positions: 1 TV/Video Producer (P-3) and 1 Public Information Assistant (General Service (Other level)), at a vacancy rate of 50 per cent, to support the activities of the Studio. The TV/Video Producer would direct live television coverage of meetings, press conferences, briefings and other newsworthy events at Headquarters; coordinate and produce multi-camera complex events and studio shoots; provide television direction or advisory functions in the production of special shows; coordinate production needs with the United Nations contractual television engineers in their use of video, sound and lighting equipment; and undertake activities to promote media coverage. The Public Information Assistant (General Service (Other level)) would provide technical support, recording and editing of television and multimedia production and post-production; set up and operate state-of-the-art computer-controlled video editing systems and other equipment; edit audiovisual systems, using hardware and software to produce short- and long-format video features and news programmes for major broadcasters; and work with high-definition and 4K television programmes, Television editing software and high-end digital effects to provide high-quality video and audio services for offline and online broadcasting;
 - b. An increase of \$690,700, under contractual services, would cover the costs of the actual operations of the Studio (camera, audio, controls, etc.) when it is actively used. The current staff do not have the full range of skills and technical knowledge to create or operate the virtual interactive environment and the sophisticated programming of broadcasting media that would be required. Technical skills in the media world are evolving rapidly and the Department needs to engage a highly skilled team to be able to produce the cutting-edge programming that the Studio can offer.
- (d) **Subprogramme 3, Outreach and knowledge services.** The net increase of \$45,700 relates to:
- (i) A decrease of \$130,200 resulting from the proposed reassignment of two posts (2 P-2) at a vacancy rate of 50 per cent (see annex III);
 - (ii) An increase of \$173,800 for one post of Public Information Officer (P-3) whose establishment in 2022 was proposed in the report on addressing racism and promoting dignity for all in the United Nations Secretariat ([A/76/771](#)) for consideration by the General Assembly during the second resumed part of its seventy-sixth session (see annex III);
 - (iii) Increased non-post requirements of \$2,100, under contractual services (\$1,600), general operating expenses (\$200) and supplies and materials (\$300), for associated recurrent common services costs for the Public Information Officer post.

Other assessed and extrabudgetary resources

- 28.66 As reflected in tables 28.9 (2) and 28.10 (2), the Department receives other assessed resources to support public information activities in peacekeeping missions. Projected other assessed resources for 2023 are estimated at \$860,000 and would provide for four posts and non-post resources. This reflects a decrease of \$16,300 compared with the estimate for 2022, which is attributable mainly to

the reduced requirements for general temporary assistance resources for 2023 reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2022 to 30 June 2023 (A/76/725). Other assessed resources represent 0.8 per cent of the total resources for this section.

- 28.67 As reflected in tables 28.9 (3) and 28.10 (3), the Department expects to continue to receive both cash and in-kind contributions, which would complement regular budget resources. In 2023, extrabudgetary resources are estimated at \$11,817,700 and would provide for 11 posts, as presented in table 28.10 (3). The resources would be used mainly to carry out the Department's capacity development work, to support multimedia and operational activities in Hindi, and to conduct activities in support of the United Nations Development Business, the Office of the Envoy of the Secretary-General on Youth and the United Nations System Electronic Information Acquisition Consortium. Extrabudgetary resources represent 10.4 per cent of the total resources for this section. Anticipated in-kind contributions would provide for rent-free premises for United Nations information centre offices, with an estimated value of \$1,412,600.
- 28.68 The extrabudgetary resources under this section are subject to the oversight of the Department, which has delegated authority from the Secretary-General.

Executive direction and management

- 28.69 The executive direction and management component comprises the Office of the Under-Secretary-General.
- 28.70 The component is responsible for:
- (a) The overall direction and strategic management of United Nations communications in the implementation of the Department's mandates and its approved programme of work, both at Headquarters and in the field;
 - (b) The establishment of departmental strategy, policies and guidelines, while dealing with specific policy and management issues and problems;
 - (c) The administrative, financial and personnel management of the Department;
 - (d) The direction of liaison functions performed by the Department with regard to intergovernmental bodies, such as the Committee on Information, and with the United Nations Communications Group;
 - (e) Oversight of crisis communications and reputation management, convening relevant United Nations entities and partners within crisis cells to align approaches and messaging, and providing crisis communications policy, guidance and training;
 - (f) The establishment of United Nations communications priorities, identifying opportunities to communicate about these within a congested media landscape, and providing coordination across the United Nations system by strengthening the United Nations Communications Group, including at the country level through United Nations information centres and the resident coordinator system.
- 28.71 In accordance with the 2030 Agenda for Sustainable Development, in particular Goal 12 on sustainable consumption and production, and Goal 13 on climate action, the Department will, where feasible and effective, continue to make all official documentation, publications, brochures, and communications and advocacy materials available online, rather than in print, in order to reduce its carbon footprint and save energy. It will also continue to adopt a range of sustainability practices, including reducing the photocopying and printing of internal documents, and will promote videoconferencing, in order to reduce the amount of travel, where possible. In addition, the Department will continue to support internal and external communications on United Nations system sustainability efforts at Headquarters and in duty stations and field missions, and will encourage staff to join the ActNow campaign and other Secretariat initiatives focused on individual actions related to climate change and sustainability.

Section 28 Global communications

28.72 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 28.12. With regard to the advance booking for air travel, the Department has implemented the requirement for the traveller to request approval from the Under-Secretary-General for cases that are non-compliant with the policy and to provide a reason for the delayed request and justification for travel. In addition, the Department closely reviews the exceptions sought and regularly sends communications to staff and managers to raise awareness of the policy requirement and the importance of minimizing the instances of exceptions.

Table 28.12

Air tickets purchased at least 2 weeks before the commencement of travel	56	48	56	100	100

28.73 The proposed regular budget resources for 2023 amount to \$2,735,900 and reflect an increase of \$125,400 compared with the appropriation for 2022. The proposed increase is explained in paragraph 28.65 (a). Additional details on the distribution of the proposed resources for 2023 are reflected in table 28.13 and figure 28.XIII.

Subprogramme 1

Campaigns and country operations services

28.74 The proposed regular budget resources for 2023 amount to \$40,043,400 and reflect an increase of \$34,800 compared with the appropriation for 2022. The proposed increase is explained in paragraphs 28.63 (a) and 28.65 (b). Additional details on the distribution of the proposed resources for 2023 are reflected in table 28.14 and figure 28.XIV.

Figure 28.XIV
Subprogramme 1: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed and extrabudgetary resources

- 28.75 Other assessed resources for the subprogramme are estimated at \$532,600 and would provide for two posts (2 P-4), as well as non-post resources. The resources would be used mainly to support peacekeeping missions through guidance, backstopping and advice on their communications strategies, workplans and communications campaigns; the organization of training; the maintenance of digital and web platforms; and the provision of assistance to missions during start-up or downsizing. The expected decrease of \$28,000 is attributable mainly to reduced requirements for general temporary assistance, as reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2022 to 30 June 2023.
- 28.76 Extrabudgetary resources for the subprogramme are estimated at \$496,700 and would provide for non-post requirements. The resources would be used mainly to support activities such as in relation to communications campaigns specific to donor countries. The expected increase of \$82,700 is attributable mainly to additional resources for operating expenses apportioned to the offices of United Nations information centres.

**Subprogramme 2
 News services**

- 28.77 The proposed regular budget resources for 2023 amount to \$33,776,500 and reflect a net increase of \$779,000 compared with the appropriation for 2022. The proposed increase is explained in paragraphs 28.63 (b), 28.64 and 28.65 (c). Additional details on the distribution of the proposed resources for 2023 are reflected in table 28.15 and figure 28.XV.

Figure 28.XV
Subprogramme 2: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed and extrabudgetary resources

28.78 Other assessed resources for the subprogramme are estimated at \$327,400 and would provide for two posts (1 P-2/1 and 1 General Service (Other level)), as well as non-post resources. The resources would be used mainly to support activities, such as in relation to the broadcasting of stories and the hosting of peacekeeping-related videos online. The increase of \$11,700 relates to the updated standard salary costs, as reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2022 to 30 June 2023.

28.79 Extrabudgetary resources for the subprogramme are estimated at \$2,450,400 and would provide for non-post resources. The resources would be used mainly to support substantive multimedia activities in Hindi. The expected increase of \$388,500 is attributable mainly to additional non-post requirements relating to multimedia activities in Hindi, in line with anticipated contributions.

Subprogramme 3 Outreach and knowledge services

28.80 The proposed regular budget resources for 2023 amount to \$20,649,400 and reflect a net increase of \$45,700, compared with the appropriation for 2022. The proposed increase is explained in paragraph 28.65 (d). Additional details on the distribution of the proposed resources for 2023 are reflected in table 28.16 and figure 28.XVI.

Total		134	–	–	–	1	0.7	135

Figure 28.XVI
Subprogramme 3: distribution of proposed resources for 2023 (before recosting)
(Number of posts/thousands of United States dollars)

Extrabudgetary resources

28.81 Extrabudgetary resources for the subprogramme are estimated at \$8,324,300 and would provide for 10 posts (1 P-3 and 9 General Service (Other level)), as well as non-post resources. The resources would be used mainly to support the substantive and operational activities of the United Nations Development Business, the Office of the Envoy of the Secretary-General on Youth and the United Nations System Electronic Information Acquisition Consortium. The expected decrease of \$278,100 is attributable mainly to a reduction in the number of extrabudgetary activities in line with anticipated income.

Programme support

28.82 The proposed regular budget resources for 2023 amount to \$3,794,400 and reflect no change compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 28.17 and figure 28.XVII.

Table 28.17

Figure 28.XVII
Programme support: distribution of proposed resources for 2023 (before recosting)
 (Number of posts/thousands of United States dollars)

Extrabudgetary resources

28.83 Extrabudgetary resources for programme support are estimated at \$546,300 and would provide for one post (General Service (Other level)) and non-post resources. The resources would be used to support the implementation of extrabudgetary activities through the provision of administrative services to all subprogrammes. The expected decrease of \$173,500 is attributable mainly to decreased non-post requirements in line with actual expenditure experience in prior periods and anticipated extrabudgetary resources for 2023.

Annex I

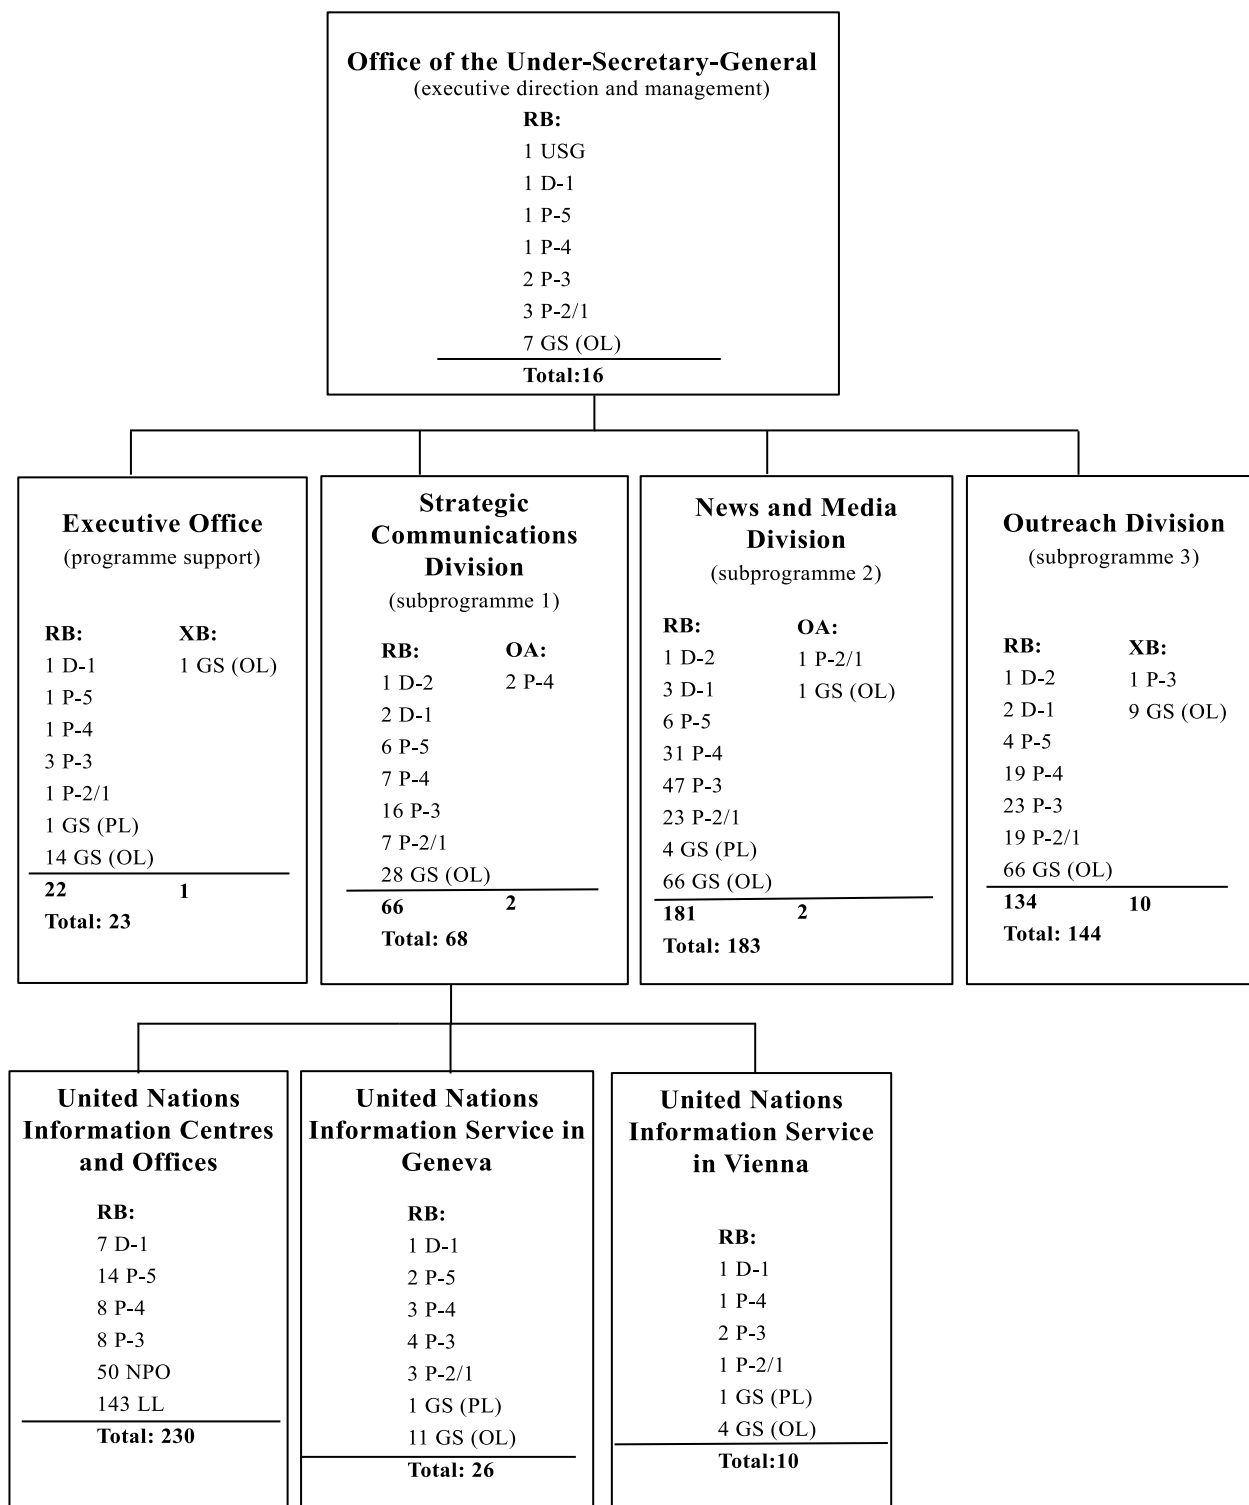

Organizational structure and post distribution for 2023

Two charts showing the organizational structure of the Department of Global Communications are presented below. Chart A reproduces the approved organizational structure for 2022. Chart B presents the proposed organizational structure for 2023.

Justification for the proposed changes

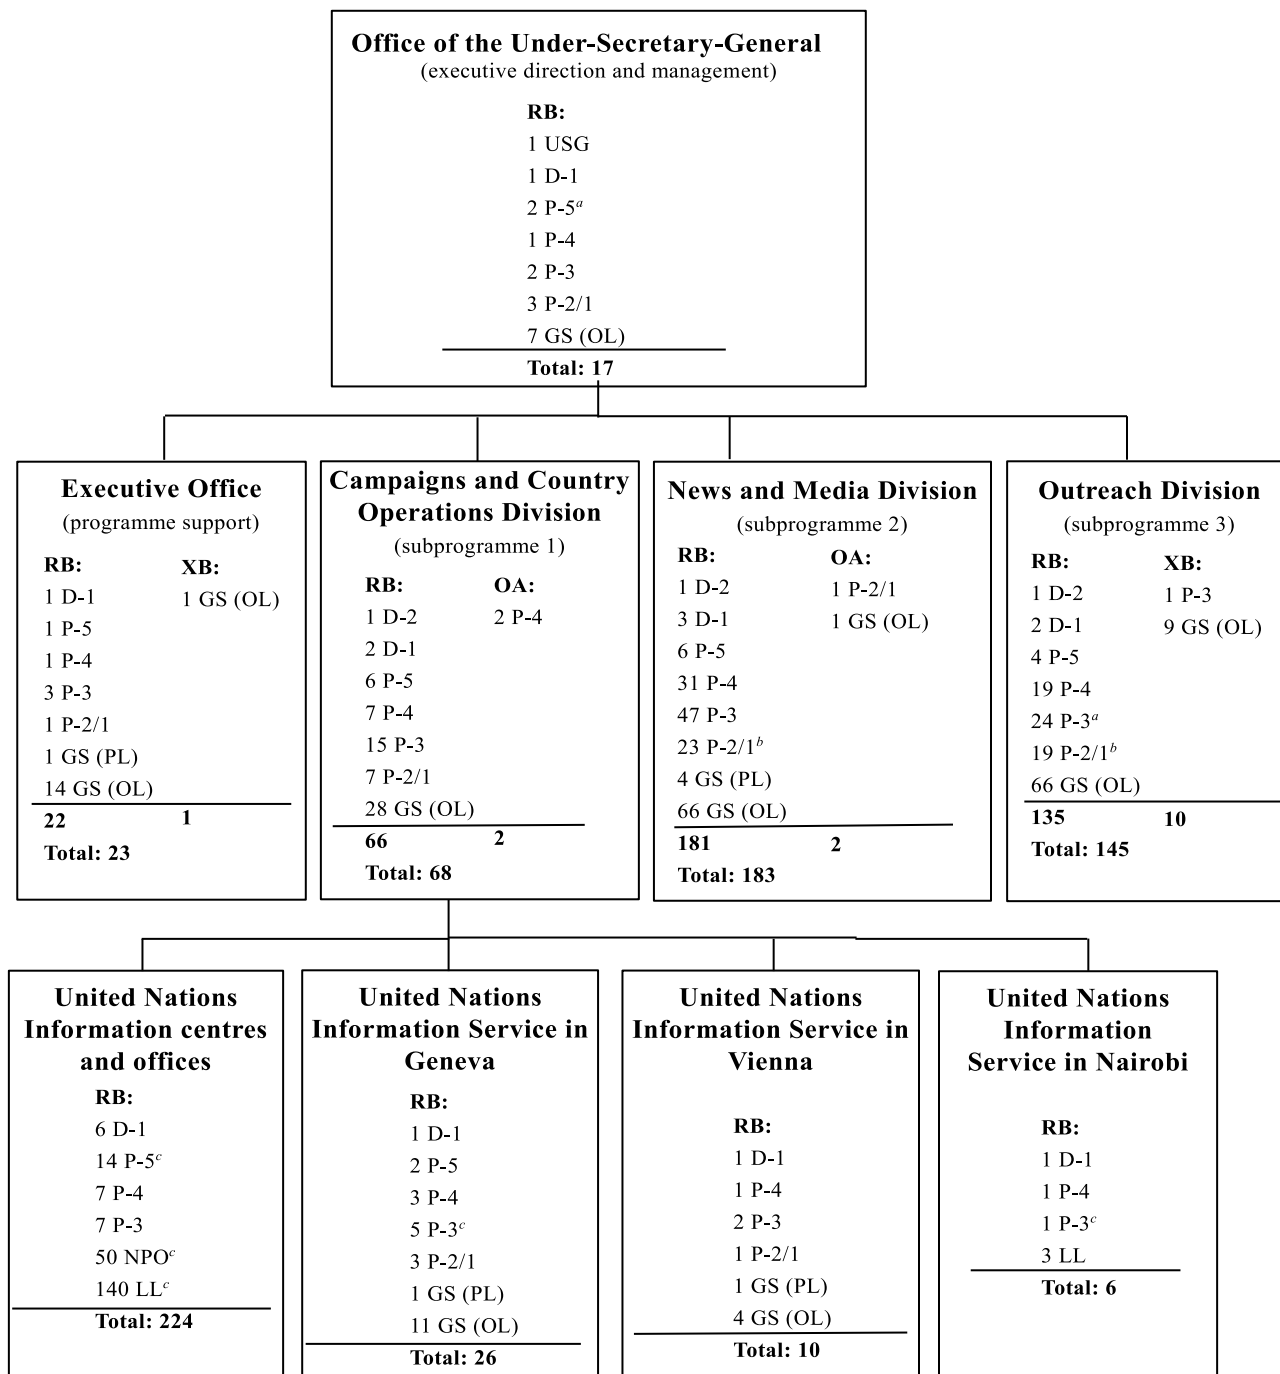

Pursuant to the request contained in General Assembly resolution [76/84 A](#) (para. 53) and as part of the ongoing rationalization and harmonization of its field operations, the Department plans to categorize its information centre in Nairobi as a United Nations information service, in order to align the information support system of that headquarters duty station with that of Geneva and Vienna, so that all three offices have dual reporting lines to the Director-General of the respective headquarters duty station and the Under-Secretary-General for Global Communications.

A. Approved organizational structure and post distribution for 2022

Abbreviations: GS (OL), General Service (Other level); GS (PL), General Service (Principal level); LL, Local level; OA, other assessed; NPO, National Professional Officer; RB, regular budget; USG, Under-Secretary-General; XB, extrabudgetary.

B. Proposed organizational structure and post distribution for 2023

^a Establishment of one Senior Public Information Officer (P-5) under executive direction and management and one Public Information Officer (P-3) under subprogramme 3.

^b Reassignment of one Associate Public Information Officer (P-2) as Associate Information Management Officer (P-2) under subprogramme 2; and one Associate Librarian (P-2) as Associate Information Systems Officer (P-2) and one Associate Graphic Designer (P-2) as Associate Information Management Officer (P-2) under subprogramme 3.

^c Redeployment of five posts (1 P-5, 1 NPO, 3 LL) from Lagos, Nigeria, to Abuja, 1 P-3 post from Dar es Salaam, United Republic of Tanzania, to Nairobi and 1 P-3 post from New York to Geneva, under subprogramme 1.

Annex II

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/76/7](#) and [A/76/7/Corr.1](#)

The Committee also welcomes the opportunities available to the Department of Global Communications for: greater unification of messaging; increased multilingual output, including through the taking of prompt action to fill its high number of vacant posts and, in so doing, to build a more geographically and linguistically diverse workforce; more effective and coordinated application of technology and media channels, in particular through social media; structural rationalization; and cost efficiencies. The Committee recommends that the General Assembly request the Secretary-General to report on these ongoing efforts in the context of the next budget submission (para. VII.4).

The Committee recommends that the General Assembly request the Secretary-General to strengthen multilingualism and provide the consolidated resource requirements for the production of press releases in the six official languages in the context of his next budget submission (see also paras. VII.22 and VII.28) (para. VII.6).

The Advisory Committee is concerned by and stresses the need to address the Department's geographical imbalance and lack of linguistic diversity and trusts that the Department's global staffing requirements, both at Headquarters and in the United Nations information centres, will be urgently reviewed and that the outcome of these efforts will be provided in the context of the next budget submission (para. VII.17).

The Advisory Committee trusts that improvements in the quality of meeting records and press releases will continue to be achieved and that efforts will be made to identify resources for improved multilingual production (see paras. VII.5, VII.6 and VII.22). The Committee recommends that the General Assembly request the Secretary-General to present a cost-effective proposal to expand the multilingual production of meeting records and press releases within existing resources (para. VII.28).

The Department has prioritized the recruitment of staff since the lifting of the hiring freeze. Information in respect of the effective use of technology and media channels, in particular social media, has been reflected in part A of the present report.

The Department always strives, within its existing resources, to do more with regard to multilingualism, and it has been able to provide more multilingual services when Member States have provided it with additional resources, such as in their support for multilingual United Nations webcasting.

The Department has diverse and multilingual staff members, including language-specific teams in United Nations News (for the six official languages and three other languages, Hindi, Kiswahili and Portuguese), the Web Services Section (for the six official languages) and the Social Media Section (for the six official languages, and three other languages, Hindi, Kiswahili and Portuguese). In 2021, supplementary language capacity was provided for webcasting in the six official languages.

The Department continues to explore various technical options with the Department for General Assembly and Conference Management regarding the possibility of the automated translation of the press releases into four languages (Arabic, Chinese, Russian and Spanish). However, additional staff would still be required with such solutions to ensure that the translations are accurate.

Annex III

Summary of proposed post changes by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Executive direction and management	1	P-5	Establishment of 1 Senior Public Information Officer	The proposed establishment of one post at the P-5 level would strengthen the strategic communications planning and coordination function within the Office of the Under-Secretary-General for Global Communications by building capacity in the areas of crisis communication and reputation management, strategic planning and system coordination. The incumbent would lead the delivery of the global communications strategy for the United Nations in a continuously evolving media landscape in which public engagement and action are sought for a growing number of crises. The incumbent would strengthen the operational response and coordination role by convening relevant United Nations entities and partners within crisis cells to align approaches and messaging, including through the identification of emerging issues. The incumbent would also take the lead on crisis communications policy, guidance and training, to help mitigate risk and ensure that United Nations staff are better prepared to respond. This additional capacity would ensure the provision of strategic guidance on United Nations communications and the identification of opportunities for effective delivery within a congested media landscape.
Subprogramme 1 Campaigns and country operations services	1	P-3	Redeployment (geographical) of 1 Public Information Officer from Dar es Salaam, United Republic of Tanzania, to Nairobi	As part of the ongoing rationalization and harmonization of its field operations, the Department will categorize its information centre in Nairobi as a United Nations Information Service in order to align the information support system of that headquarters duty station with that of Geneva and Vienna, due to the fact that all three offices both have dual reporting lines to the Director-General of the respective headquarters duty station and the Under-Secretary-General for Global Communications. Following this alignment, the United Nations Information Service in Nairobi will be the single service provider on all public information services at that duty station. The proposed redeployment would strengthen the communications team in the information service in Nairobi, which comprises one Head of Office (D-1), one Public Information Officer (P-4) and three General Service (Other level) support staff. The incumbent would help the United Nations Information Service in Nairobi with the timely and full delivery of its core functions, including by: (a) providing information and communications support to the Director-General of the United Nations Office at Nairobi, the Secretary-General and other high-level officials during their visits to Kenya, as well as to the United Nations country teams in Kenya, Seychelles and Uganda; (b) serving as the information centre for Kenya, Seychelles and Uganda, and as the focal point for public information and media relations for the United Nations in those countries; (c) providing radio, video, photography and social media coverage and facilitating media coverage of the activities and meetings of United Nations entities; (d) chairing the United Nations Communications Group to facilitate the coordination of communications activities between the Nairobi-based United Nations entities and other international organizations; (e) organizing outreach events and activities to promote the work and priorities of the United Nations; and (f) administering the visitors' service, which conducts guided tours of the United Nations Office at Nairobi in order to inform the public about the activities of the United Nations in Nairobi and beyond.

Section 28 Global communications

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
	1	P-3	Redeployment (geographical) of 1 Public Information Officer from New York to Geneva	The redeployment of the one post (P-3) would allow the Department to provide 24-hour social media coverage by having a member of the social media team located in a different time zone. This would allow the Department to manage reputational risk by overseeing content posted during the night hours in New York and to respond to global events in real time.
	1	P-5	Redeployment (geographical) of 1 Director, Information Centre, from Lagos, Nigeria, to Abuja	In line with the report of the Secretary-General entitled “Repositioning the United Nations development system to deliver on the 2030 Agenda: our promise for dignity, prosperity and peace on a healthy planet” (A/72/684-E/2018/7) and General Assembly resolution 72/279, in which the Assembly called for the increased core capacity of resident coordinators and country teams, and for the formation of an integrated communications structure in each country through the co-location and merging of the country offices of the United Nations information centres and the resident coordinator offices, the Department is proposing to move its information centre in Lagos, Nigeria, including its staff, to the office of the resident coordinator in Abuja. This co-location and post redeployment would help to strengthen the communications capacity of the country team.
	1	NPO	Redeployment (geographical) of 1 Associate Public Information Officer from Lagos, Nigeria, to Abuja	
	3	LL	Redeployment (geographical) of 3 posts (1 Public Information Assistant, 1 Team Assistant and 1 Library Assistant) from Lagos to Abuja	
Subprogramme 2 News services	1	P-2	Reassignment of 1 Associate Public Information Officer as Associate Information Management Officer	The reassignment of one post (P-2) would support the increase in the complexity and technical scope of the work of the Multimedia Resources Unit. The information technology work in that Unit, which oversees the development and management of the global integrated multimedia platform system (GLIMPS), has increased. That system includes the websites of the webcasting services, the audiovisual library, the photo library and UNifeed, some of which are available in the six official languages. The Unit also manages several information technology platforms (e.g. Orange Logic and Contegix), the Department’s asset management system and its integration with workflows for several teams in the Audiovisual Services Section. The reassignment would support the evolving needs and demand for information technology skills.
Subprogramme 3 Outreach and knowledge services	1	P-3	Establishment of 1 Public Information Officer	The establishment of one post (P-3) was proposed in the context of the Secretary-General’s report on addressing racism and promoting dignity for all in the United Nations Secretariat (A/76/771).
	1	P-2	Reassignment of 1 Associate Librarian as Associate Information System Officer	The reassignment of two posts at the P-2 level reflects the evolving operational requirements of the work, which entails more advanced information technology skills, in particular within the Dag Hammarskjöld Library. The reassignment is intended to reinforce the Department’s capacity for digital information management, digital communications skills and graphic design functions.
	1	P-2	Reassignment of 1 Associate Graphic Designer as Associate Information Management Officer	

Abbreviations: LL, local level; NPO, National Professional Officer.

Foreword

In the face of the ongoing coronavirus disease (COVID-19) pandemic, the Department of Management Strategy, Policy and Compliance continued to make progress in the operationalization of management reform, in line with the vision of the Secretary-General.

More continues to be done to mainstream the initiatives and address the remaining reform commitments. We are seeing the fruits of reform, which will continue to be realized in 2023, through a process of continuous improvement. In this regard, the final approval by the General Assembly, later in 2022, of the annual budget process would be instrumental in ensuring an agile and results-focused response to the aspirations of the reform process and evolving mandates.

The new UN Values and Behaviours Framework and the anti-racism strategic action plan reflect the management and human resources goals of the Organization for the coming decade and will inform human resources processes, such as workforce planning, geographical diversity, recruitment, learning, performance management, and enforcing standards of conduct.

We will continue to build on the good practices and lessons learned during the pandemic to transform our working methods and behaviours. As we work to better support Member States and our clients and use our resources more efficiently and effectively, we must create a working environment that enables our personnel to innovate and thrive. We must also foster an organizational culture in which programme delivery is agile and results are achieved and accountability is strengthened at all levels.

Our work in 2023 will continue towards these goals, as we drive results through transparent, people-focused global management strategies, policies and compliance systems that enable the Organization to deliver on its mandates.

(Signed) Catherine **Pollard**
Under-Secretary-General
Management Strategy, Policy and Compliance

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 29A.1 The Department of Management Strategy, Policy and Compliance is responsible for policy leadership in all management areas through the provision of a clear, integrated global management strategy and policy framework and through strengthened monitoring, evaluation and accountability mechanisms. The Department is also responsible, jointly with the Department of Operational Support, for managing the activities of the Office of Information and Communications Technology. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolutions [72/266 A](#), [72/266 B](#), [72/254](#) and [73/281](#). The Department plays an integral role in realizing the Secretary-General's new management paradigm, with an emphasis on transparency, accountability and decision-making that is closer to points of delivery.

Strategy and external factors for 2023

- 29A.2 The strategy for 2023 includes continuing to advance the new management paradigm through an integrated approach, with three interlinked pillars: programme planning, finance and budget; human resources; and business transformation and accountability. The Department will:
- (a) Commit to new internal ways of working, including through the formulation of holistic policies and approaches that foster the achievement of tangible results, including through renewed investment in technology and a commitment to continuous improvement;
 - (b) Strengthen the Organization's resilience, including its preparedness to maintain business continuity in emergencies, by guiding, monitoring and adjusting the post-coronavirus disease (COVID-19) new internal working practices at United Nations Headquarters to continually adapt to changing environments, risks and opportunities;
 - (c) Drive results-based management policies and practices into the daily functioning and culture of the Organization, together with an integrated cycle of planning, risk and performance management, and evaluation;
 - (d) Foster greater transparency and accountability envisaged to engender greater credibility and trust in the capabilities of the United Nations as an organization, both by Member States and the people that it serves;
 - (e) Enhance data analysis and reporting capabilities that enable real-time, user-friendly access to data to support informed decision-making and improved management of risks to achieve the objectives of the United Nations;
 - (f) Create a collaborative and inclusive environment through integrated solutions and strategic partnerships throughout the United Nations system;
 - (g) Work towards the implementation of a dynamic human resources strategy that fosters greater diversity, supports managers in finding the right people, provides a strengthened learning framework, supports the development of new competencies, talents and strengthened multilingualism, ensures a civil and safe work environment and promotes a culture of continuous learning, innovation and improvement to actively build a better United Nations;
 - (h) Address racism and racial discrimination more directly and effectively in the Secretariat by encouraging reporting, enhancing accountability, monitoring and transparency, and periodically reporting on progress in addressing the issue and on efforts towards racial diversity, equity and inclusion.
- 29A.3 The Department will continue to provide leadership in the development and delivery of integrated organizational management strategies, policies and models supporting a decentralized, field-focused

paradigm in which managers are empowered through the enhanced delegation of authority framework. It will liaise with Member States and other external entities on management-related issues and foster coordination within the Secretariat, as well as with the funds, programmes and specialized agencies of the United Nations system, to build partnerships and promote best practices.

- 29A.4 Having laid the foundation for greater decentralization, the main challenge will continue to be to accelerate the culture shift required to fully implement the new management paradigm of increased delegation of authority, transparency and accountability and a culture of continuous learning.
- 29A.5 The Department will continue to enable business transformation that leverages current and future trends in enterprise resource planning solutions. The Umoja solution and its accompanying business intelligence framework will allow the Department to respond to organizational requirements for better and more timely decision-making, enhanced accountability systems and the rapid adoption of newly identified best practices, as well as strengthened support for real-time data access, augmented and predictive analytics and planning and monitoring capabilities.
- 29A.6 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. Examples of lessons learned and best practices include drawing on experiences while serving as the secretariat for the Senior Emergency Policy Team in providing guidance to Headquarters on the COVID-19 response since 2020. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.
- 29A.7 With regard to cooperation with other entities, the Department will continue to support and work closely with all entities of the Secretariat and build partnerships, internally within the Secretariat and externally with the United Nations system, to find inclusive responses to challenges and develop innovative business models that cater to the evolving and specific requirements of each entity, with an emphasis on the field.
- 29A.8 With regard to inter-agency coordination and liaison, the Department will represent the Secretary-General in inter-agency coordination mechanisms, including the High-level Committee on Management of the United Nations System Chief Executives Board for Coordination (CEB) and its networks.
- 29A.9 With regard to the external factors, the overall plan for 2023 is based on the planning assumption that all stakeholders will extend their full cooperation and support to the Department in implementing its mandates.
- 29A.10 The Department integrates a gender perspective in its operational activities, deliverables and results, as appropriate. The Department will play a leadership role in driving the Secretary-General's system-wide strategy on the future of work and continues to support efforts to achieve gender parity and address sexual harassment in the workplace. Furthermore, the Department will work towards the equitable geographical representation of Member States in the Secretariat workforce and prioritize the integration of environmental sustainability and resilience management into the strategies, policies and compliance and reporting frameworks of the Organization. Through its policy leadership in these interconnected fields, the Department will foster a change in culture at all levels of the Secretariat.
- 29A.11 In line with the United Nations Disability Inclusion Strategy, the Department continue to elevate awareness of disability inclusion within it and support entities by mainstreaming disability inclusion in human resources strategy and policy, in particular in the areas of leadership, inclusiveness and organizational culture, which are core areas of the strategy.

Programme performance in 2021

Impact of the pandemic

- 29A.12 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular because the pandemic response required the reprioritization of resources

towards the health and well-being of personnel, both at the Secretariat and departmental level. As alternate Chair of the Senior Emergency Policy Team, the Under-Secretary-General for Management Strategy, Policy and Compliance had to shift the focus from planned activities to address the pandemic, including through extensive coordination and consultation activities, concentrating on the coordination and dissemination of COVID-19-specific policies, guidance and communications. Across all subprogrammes, meetings and events had to be reconfigured to a virtual environment or were cancelled or postponed, and official travel plans could not be carried out. For example, in-person capacity-building to missions related to budget preparation were replaced by online meetings.

Legislative mandates

29A.13 The list below provides all mandates entrusted to the programme.

General Assembly resolutions and report of the Secretary-General

52/12 A and B	Renewing the United Nations: a programme for reform	72/266 A and B	Shifting the management paradigm in the United Nations
58/269	Strengthening of the United Nations: an agenda for further change	73/281	Shifting the management paradigm in the United Nations
58/280	Review of duplication, complexity and bureaucracy in United Nations administrative processes and procedures	76/236 76/245	Programme planning Questions relating to the proposed programme budget for 2022
60/1	2005 World Summit Outcome	76/246 A and B	Special subjects relating to the proposed programme budget for 2022
61/245	Comprehensive review of governance and oversight within the United Nations and its funds, programmes and specialized agencies	76/644	Eleventh progress report on accountability: strengthening accountability in the United Nations Secretariat
72/254	Human resources management

Subprogramme 3, Human resources

General Assembly resolutions

52/252	Revisions to article I of the Staff Regulations and chapter I of the 100 series of the Staff Rules of the United Nations	61/274	Comprehensive proposal on appropriate incentives to retain staff of the International Criminal Tribunal for Rwanda and the International Tribunal for the Former Yugoslavia
58/144	Improvement of the status of women in the United Nations system		
61/262	Conditions of service and compensation for officials other than Secretariat officials: members of the International Court of Justice and judges and ad litem judges of the International Tribunal for the Former Yugoslavia and the International Criminal Tribunal for Rwanda	63/271 68/265 72/254 74/254 75/245 A	Amendments to the Staff Regulations Mobility framework Human resources management Seconded active-duty military and police personnel United Nations common system

**Subprogramme 4
Business transformation and accountability**

General Assembly resolutions

59/272	Review of the implementation of General Assembly resolutions 48/218 B and 54/244	61/245	Comprehensive review of governance and oversight within the United Nations and its funds, programmes and specialized agencies
--------	--	--------	---

63/276	Accountability framework, enterprise risk management and internal control framework and results-based management framework	64/259	Towards an accountability system in the United Nations Secretariat
--------	--	--------	--

Deliverables

29A.14 Table 29A.1 lists all cross-cutting deliverables of the programme.

Table 29A.1

Cross-cutting deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	8	14	8	10
Meetings of:				
1. The Fifth Committee of the General Assembly	3	6	3	4
2. The Special Committee on Peacekeeping Operations	1	1	1	1
3. The Advisory Committee on Administrative and Budgetary Questions	3	6	3	4
4. The Committee for Programme and Coordination	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: consultation with Member States on matters relating to the work of the Department.				
D. Communication deliverables				
Outreach programmes, special events and information materials: information and engagement events; articles and videos; and newsletters.				
Digital platforms and multimedia content: websites and social media accounts of the Department.				
E. Enabling deliverables				
Administration: six meetings of the Management Client Board and two meetings of the Arts Committee.				

Evaluation activities

29A.15 An evaluation by the Department of Management Strategy, Policy and Compliance and the Department of Operational Support on the efficacy of the Management Client Board evaluation is planned for 2023.

Programme of work

Subprogramme 1

Enterprise resource planning solution, services to the Fifth Committee of the General Assembly and to the Committee for Programme and Coordination, and management advisory services

Component 1

Enterprise resource planning solution

Objective

29A.16 The objective, to which this component contributes, is to improve the management of the Organization's resources for its work in line with mandates.

Strategy

- 29A.17 To contribute to the objective, the component will:
- (a) Support business transformation in the areas of programme planning, programme management, monitoring of programme delivery, and data and business analytics by harmonizing processes and practices and using modern technology;
 - (b) Support the Organization by building upon its business intelligence platforms to support access to real-time data, augmented and predictive analytics, including machine learning and natural language processing, and planning capabilities;
 - (c) Support, monitor and upgrade the Umoja system, to meet evolving business needs through continuous improvements directed by the business and work with business areas to translate requirements into integrated functional solutions that are built, whenever possible, through out-of-the-box solutions that have sustainable road maps and meet Umoja architectural standards.
- 29A.18 The above-mentioned work is expected to result in:
- (a) A more efficient and transparent management of the Organization's financial, human and physical resources;
 - (b) Effective and timely decision-making by management informed by advanced analytics;
 - (c) Rapid adoption and application of newly identified best practices by the Organization;
 - (d) The continued effective operation of the Organization and of flexible working arrangements, given that Umoja functionality will underpin the Organization's work beyond the pandemic.

Programme performance in 2021

Business continuity during COVID-19 and resident coordinator staff migration to Umoja

- 29A.19 Business continuity during the COVID-19 pandemic was a key area of the component's work. In addition to multiple changes implemented in 2020, several additional changes and refinements were implemented in a timely manner in 2021, including adjustments to staff entitlements affected by COVID-19. In the same period, as part of the development reform, national staff members in resident coordinator offices, previously within the United Nations Development Programme, were transitioned to the United Nations Secretariat. In total, more than 450 staff members in more than 130 countries were added to the Umoja system, further expanding its reach. That deployment was undertaken in close collaboration with the functional subgroups from finance, human resources and supply chain management. During those changes, the component continued to optimize the system uptime, and the transition did not affect Umoja availability to all its users.
- 29A.20 Progress towards the objective is presented in the performance measure below (see figure 29A.I).

Figure 29A.1
Performance measure: uptime of the Umoja system

(Percentage)

Planned results for 2023

Result 1: business transformation and process improvements

Programme performance in 2021 and target for 2023

- 29A.21 The component’s work contributed to the implementation of a programme of work for continuous improvement in close collaboration with the business and in line with the Secretary-General’s reform agenda, with the Umoja Change Board having reviewed 22 change requests across all functional areas that had been raised through the change governance framework, in addition to 157 approved by the Umoja Change Control Board, which met the planned target of dashboards being available to all users, including Member States.
- 29A.22 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29A.2).

Table 29A.2
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Reporting capabilities and dashboards are available to selected entities	Results-driven resource planning, implementation and monitoring modules supported by richer data analytics are available for timely decision-making by programme managers	The Umoja Change Board reviewed 19 change requests across all functional areas that had been raised through the change governance framework, in addition to 142 approved by the Umoja Change Control Board	End users, including programme managers, interact with data through self-service analytics and are provided with the ability to rapidly develop reports with real-time access to their data, empowering timely, informed decision-making	Delivery of innovations driven by business needs and based on most recent technology road maps to contribute to the efficient functioning of processes and utilization of the Organization’s resources through the Umoja governance structure

Result 2: advanced analytics for staff and Member States

Programme performance in 2021 and target for 2023

- 29A.23 The component’s work contributed to improvement in the management of the Organization’s human resources and uniformed capabilities management for its work, in line with mandates, which is demonstrated by the availability of results-driven resource planning, implementation and monitoring, and supported by richer data analytics, which met the planned target.
- 29A.24 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29A.3).

Table 29A.3
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Umoja Extension 2 functionalities deployed and stabilized and Umoja, as a reform enabler, adapted to the evolving needs of the reform pillars, and the new delegation of authority framework enabled	Increased access to data for managers and Member States in alignment with the Secretary-General’s data strategy, along with deployed Umoja Extension 2 functionality	Better-informed decision-making by programme managers, based on feedback received, on human resources and uniformed capabilities management that was enabled by the introduction of Umoja analytics	Member States access a robust suite of dashboards and analytic capabilities providing a broad range of data models and customized visualization for human resources and uniformed capabilities management, among other areas	Internal and external stakeholders, as well as Member States, have access to additional data models and dashboards/portals

Result 3: improved stability, security and user experience in Umoja

Proposed programme plan for 2023

- 29A.25 Umoja, as the main organizational enterprise resource planning system, continuously builds on available technological upgrades to meet the evolving needs of users and the environment in which it operates. The component ensures that the software upgrades are based on a regular maintenance plan. Particular attention in terms of system maintenance and development is given to disaster recovery, cybersecurity and improved user experience.

Lessons learned and planned change

- 29A.26 The lesson for the component was that it needed to further enhance user experience in Umoja, especially with the increased needs of remote access to the system. In applying the lesson, the component will ensure that Umoja system users will experience richer functionality with upgraded software to provide for enhanced security, compatibility with other software products and secure uninterrupted support from vendors. Umoja cybersecurity will continue to be strengthened, wherever possible, disaster recovery mechanisms will be reinforced as a result of periodic exercises, and user experience will be improved through the implementation of enhancement package 8.
- 29A.27 Expected progress towards the objective is presented in the performance measure below (see table 29A.4).

Table 29A.4
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Upgrade to reporting solutions, including access to real-time data and set-up of training environment for Umoja Extension 2, and additional software upgrades	Upgrade of all Umoja servers and databases, integration with cloud solutions, additional software upgrades and Umoja disaster recovery exercise	Document management upgrade, reporting solutions upgrades, increased security through Azure authentication, reinforced disaster recovery mechanisms and additional software upgrades	Planning for the implementation of package 8 and related software dependencies	All users benefit through implemented upgrades, including enhancement package 8 and related software dependencies

Deliverables

29A.28 Table 29A.5 lists all deliverables of the component.

Table 29A.5
Subprogramme 1, component 1: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	–	1	–	1
1. Progress report on the status of the functioning and development of the enterprise resource planning system	–	1	–	1
Substantive services for meetings (number of three-hour meetings)	–	3	–	3
2. Meetings of the Fifth Committee of the General Assembly	–	2	–	2
3. Meetings of the Advisory Committee on Administrative and Budgetary Questions	–	1	–	1
C. Substantive deliverables				
Consultation, advice and advocacy: consultations with client groups, through the governance mechanisms and informally, on the sustainability of and continuous improvements in the system to meet their business needs.				
D. Communication deliverables				
Digital platforms and multimedia content: the Umoja/Enterprise Resource Planning Solution Division website and content for social media accounts.				
E. Enabling deliverables				
Information and communications technology: the Umoja system, including its upgrades and improvements; and service desk tier 3 support.				

Component 2 Services to the Fifth Committee of the General Assembly and to the Committee for Programme and Coordination

Objective

29A.29 The objective, to which this component contributes, is to facilitate effective and efficient deliberations and decision-making by the Fifth Committee of the General Assembly and the Committee for Programme and Coordination.

Strategy

- 29A.30 To contribute to the objective, the component will:
 - (a) Improve communication on organizational and procedural aspects of meetings;
 - (b) Enhance substantive, technical and secretariat support to the Member States and other participants in the meetings.
- 29A.31 The above-mentioned work is expected to result in the smooth conduct of meetings of the intergovernmental bodies serviced.

Programme performance in 2021

Technology leveraged to facilitate the work of the committees

- 29A.32 In 2021, owing to the ongoing COVID-19 pandemic, the component leveraged the technical capabilities of available tools in Fifth Committee Place and in CPC Place in the e-deleGATE platform, to improve communication with members of both Committees. Most of the work of the Committees was held in an online format, with only a limited number of in-person formal meetings. Given that limitation, the component rolled out the e-speakers and the e-announcements modules in e-deleGATE to facilitate the work of the two Committees. The use of e-announcements complemented the communication of the Bureaux of the Committees towards Member States. In the Fifth Committee, the e-speakers module automated inscription by delegations in the list of speakers, streamlining the process and ensuring transparency of the speakers list.
- 29A.33 The surveys conducted at the end of the seventy-fifth session of the Fifth Committee and the sixty-first session of the Committee for Programme and Coordination showed that the above-mentioned work contributed to the continuation of positive results, the limitations due to COVID-19 notwithstanding, with 95 per cent of Fifth Committee members and 92 per cent of members of the Committee for Programme and Coordination surveyed indicating they were either “very satisfied” or “satisfied” with Fifth Committee Place and CPC Place in e-deleGATE.
- 29A.34 Progress towards the objective is presented in the performance measure below (see figure 29A.II).

Figure 29A.II
Performance measure: Member States’ delegates who were either “very satisfied” or “satisfied” regarding the content of Fifth Committee Place and CPC Place

(Percentage)

Planned results for 2023

Result 1: increased awareness of sources of information available for delegates

Programme performance in 2021 and target for 2023

- 29A.35 The component's work contributed to 97.7 per cent of Fifth Committee members and 97.4 per cent of members of the Committee for Programme and Coordination surveyed indicating that they were either "very satisfied" or "satisfied" with the comprehensive amount of information made available, which met the planned target of positive survey results that are maintained or improved.
- 29A.36 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29A.6).

Table 29A.6

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned) ^a	2023 (planned)
Positive survey results	Positive survey results	Positive survey results	Maintained or improved positive survey results	Maintained or improved positive survey results
<ul style="list-style-type: none"> • Fifth Committee of the General Assembly: 95.7 per cent • Committee for Programme and Coordination: 97.3 per cent 	<ul style="list-style-type: none"> • Fifth Committee of the General Assembly: 97.9 per cent • Committee for Programme and Coordination: 97.3 per cent 	<ul style="list-style-type: none"> • Fifth Committee of the General Assembly: 97.7 per cent • Committee for Programme and Coordination: 97.4 per cent 		

Result 2: improved information available to delegates

Programme performance in 2021 and target for 2023

- 29A.37 The component's work contributed to the continued high satisfaction of Member States with information that would facilitate their effective participation in the intergovernmental process prior to and during the sessions of the two Committees, with 100 per cent of Fifth Committee members and 96 per cent of members of the Committee for Programme and Coordination surveyed indicating they were either "very satisfied" or "satisfied" with the organizational and procedural information, which met the planned target.
- 29A.38 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29A.7).

Table 29A.7

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned) ^a	2023 (planned)
Positive survey results on the availability of organizational and procedural information	Positive survey results on the availability of organizational and procedural information	High satisfaction of Member States regarding the availability of organizational and procedural information	Maintained positive survey results on the availability of organizational and procedural information	Maintained positive survey results on the availability of organizational and procedural information

Section 29A Department of Management Strategy, Policy and Compliance

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned) ^a	2023 (planned)
<ul style="list-style-type: none"> • Fifth Committee of the General Assembly: 94.6 per cent • Committee for Programme and Coordination: 100 per cent 	<ul style="list-style-type: none"> • Fifth Committee of the General Assembly: 100 per cent • Committee for Programme and Coordination: 100 per cent 	<ul style="list-style-type: none"> • Fifth Committee of the General Assembly: 100 per cent • Committee for Programme and Coordination: 96 per cent 		

Result 3: enhanced accessibility of election- and appointment-related information to Member States

Proposed programme plan for 2023

29A.39 The component prepares the relevant parliamentary documentation and maintains the Fifth Committee “Candiweb” on e-deleGATE, which is the online module for planning and holding the appointments and elections under the purview of the Committee. Candiweb contains information on upcoming elections, founding mandates, related procedures and official nominations and endorsements of candidatures received by the Secretariat. The component also provides, upon request, direct procedural advice to Member States, including on formal requirements for the submission of candidatures or on the established working practices of the Committee with regard to appointments and elections.

Lessons learned and planned change

29A.40 The lesson for the component was that the information on Candiweb could be more action-oriented and practical. In applying the lesson and building on feedback from Member States, the component will seek to expand the availability of information, including through providing background documents and historical information. To ensure a more comprehensive coverage of election- and appointment-related matters, the component also intends to introduce briefings and question-and-answer sessions, thus increasing engagement with and the satisfaction of Member States with the information available.

29A.41 Expected progress towards the objective is presented in the performance measure below (see table 29A.8)

Table 29A.8
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	Informal feedback and observations received from Member States	Member States’ delegates highly satisfied with the availability of election- and appointment-related information	Maintained positive feedback on the availability of election- and appointment-related information

Deliverables

29A.42 Table 29A.9 lists all deliverables of the component.

Table 29A.9
Subprogramme 1, component 2: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies

7. Meetings of the Fifth Committee of the General Assembly	160	164	160	160
8. Meetings of the Committee for Programme and Coordination	40	38	40	40
C. Substantive deliverables				
Consultation, advice and advocacy: advice to 10 Bureau members; consultation and advice to approximately 100 coordinators; and response to queries from and provision of advice to individual delegations on historical proceedings of the Committees.				
D. Communication deliverables				
Digital platforms and multimedia content: websites of the Fifth Committee of the General Assembly and the Committee for Programme and Coordination; and update of information on e-deleGATE.				

Component 3 Management advisory services

Objective

29A.43 The objective, to which this component contributes, is to advance transparency of administrative decision-making, fairness, integrity and the resilience of the Organization to deliver on its mandates.

Strategy

29A.44 To contribute to the objective, the component will:

- (a) Strengthen the Organization's resilience, including its preparedness to maintain business continuity in emergencies, by guiding, monitoring and adjusting the post-COVID-19 ways of working at United Nations Headquarters to continually adapt to changing environments, risks and opportunities;
- (b) Continue to improve the overall quality of the acquisition process and reflect those improvements in substantive policy and guidance-related recommendations, including through the use of data analytics;
- (c) Continue to objectively analyse the facts presented in requests for a management evaluation vis-à-vis the legal framework of the Staff Regulations and Rules of the United Nations and provide the requesting staff member with a reasoned, comprehensive evaluation conveying the basis for the recommendation of the Management Evaluation Unit on the case.

- 29A.45 The above-mentioned work is expected to result in:
- (a) A more resilient, agile and sustainable Organization and an innovative and thriving workforce that delivers results;
 - (b) An Organization better prepared for complex and long-term emergencies;
 - (c) A strengthened acquisition and asset disposal process;
 - (d) The early resolution of disputes that arise from decisions taken in the Administration on a staff member’s employment;
 - (e) Greater staff awareness of the internal justice system.

Programme performance in 2021

Senior Emergency Policy Team effectively guided the Headquarters COVID-19 response

29A.46 The United Nations Secretariat, much like the world at large, was facing uncertainties related to the impact of the COVID-19 pandemic in 2021. To maintain organizational preparedness, the Senior Emergency Policy Team effectively guided the Headquarters COVID-19 response. As the secretariat for the Team, the subprogramme supported the Team in overseeing the COVID-19 response for a second year by coordinating meetings of the Team and its sub-working groups. Within the response, the Team resolved a variety of complex issues related to supporting in-person intergovernmental meetings and the phased return of personnel to the premises.

29A.47 Progress towards the objective is presented in the performance measure below (see table 29A.10).

Table 29A.10
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
–	Coordinated and nimble COVID-19-related policies and organizational preparedness with 13 Senior Emergency Policy Team meetings, ensuring a safe working environment for personnel and delegates, and business continuity and delivery of mandated programmes	Improved coherence, coordination and streamlining of COVID-19-related policies and organizational preparedness through 6 Senior Emergency Policy Team meetings, ensuring a safe working environment for personnel and delegates, and business continuity and delivery of mandated programmes

Planned results for 2023

Result 1: improved access to internal justice recourse

Programme performance in 2021 and target for 2023

- 29A.48 The component’s work contributed to a broader awareness of staff in field offices and at Headquarters of the internal justice system and issues arising therein, which met the planned target.
- 29A.49 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29A.11).

Table 29A.11
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Limited knowledge of the internal system of justice and the role of the Management Evaluation Unit among staff members, especially those serving at more remote duty stations	The early resolution of staff-related disputes and prevention of unnecessary litigation through staff awareness of the internal system of justice	Broader awareness of staff in terms of number of staff with understanding of the issues in the internal system of justice	Increased understanding by staff of management evaluation issues in the internal system of justice	Greater engagement with local staff unions to establish ongoing channels to discuss staff concerns with the internal system of justice

Result 2: post-COVID-19 new internal working practices: a more resilient, agile and sustainable Organization

Programme performance in 2021 and target for 2023

- 29A.50 The component’s work contributed to the development of a proposal for the post-COVID-19 new internal working practices/methods framework for United Nations Headquarters for the consideration of the Secretary-General, which met the planned target.
- 29A.51 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29A.12).

Table 29A.12
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	United Nations Headquarters transitions to business continuity mode as a result of COVID-19	Secretary-General considered proposal for post-COVID-19 new internal working practices framework for United Nations Headquarters	Percentage of recommendations of the new internal working practices framework implemented for United Nations Headquarters	Increased percentage of recommendations of the new internal working practices framework implemented for United Nations Headquarters

Result 3: recommendations of the Headquarters Committee on Contracts accepted by the delegated officials

Proposed programme plan for 2023

- 29A.52 The Headquarters Committee on Contracts provides written advice to the delegated officials on procurement action leading to the awarding or amendment of high-value contracts and ensures, among others, that the procurement process adheres to general procurement principles of the United Nations, namely, fairness, integrity and transparency, effective international competition, best value for money and the interest of the Organization. The component, on average, reviews more than 450 instances of procurement action annually in the amount of more than \$4 billion. More than 90 per cent of recommendations made by the Committee are accepted by the delegated officials.

Lessons learned and planned change

29A.53 The lesson for the component was to ensure the high rate of acceptance of recommendations on the awarding or modification of major contracts. In applying the lesson, the component will ensure the full and detailed elaboration of substantive recommendations in the body of the minutes of the Committee meetings to enable the delegated officials to make fully informed decisions and implement any appropriate changes in work processes of their procurement services.

29A.54 Expected progress towards the objective is presented in the performance measure below (see figure 29A.III).

Figure 29A.III
Performance measure: number of recommendations accepted by the delegated officials

(Percentage)

Deliverables

29A.55 Table 29A.13 lists all deliverables of the component.

Table 29A.13
Subprogramme 1, component 3: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	–	–	1	–
1. Progress report on the implementation of the organizational resilience management system for consideration by the General Assembly	–	–	1	–
Substantive services for meetings (number of three-hour meetings)	–	–	2	–
2. Meetings of the Fifth Committee of the General Assembly	–	–	1	–
3. Meetings of the Advisory Committee on Administrative and Budgetary Questions	–	–	1	–
E. Enabling deliverables				
Administration: administration of and support for the new case management system; training and guidance for members of the 34 local committees on contracts and 43 local property survey boards; advice on procurement and property policy documents; and administration and maintenance of online learning tools for local committees on contracts and local property survey boards, and provision of related training and guidance.				
Internal justice and oversight: recommendations on requests for management evaluation of contested administrative decisions; responses to requests for suspension of action submitted to the Secretary-General in cases involving separation from service of staff members; substantive and technical servicing of the Headquarters Committee on Contracts and the provision of recommendations on proposed procurement awards to the delegated officials; substantive and technical servicing of the Headquarters Property Survey Board; reports on the functioning of the local committees on contracts and local property survey boards and procurement functions in entities; and annual reporting to the United Nations Environment Programme on Secretariat-wide environmental sustainability performance.				

Subprogramme 2

Programme planning, finance and budget

Component 1

Finance

Objective

- 29A.56 The objective, to which this component contributes, is to secure the financing of the Organization's expenses, pursuant to Article 17 of the Charter of the United Nations, and to ensure sound, effective and efficient integrated financial management of and reporting on United Nations resources, supported by a strong internal control environment.

Strategy

- 29A.57 To contribute to the objective, the component will:
- (a) Continue to ensure the proper application of the Financial Regulations and Rules of the United Nations, adapt policies and procedures relating to financial matters in response to emerging issues and continue to strengthen the system of internal controls in support of the prudent management of resources in the context of the decentralized delegation of authority framework;
 - (b) Provide effective support to the Committee on Contributions, ensure the timely issuance of assessments, continue to provide up-to-date information on the status of assessed contributions and closely monitor and forecast the collection of assessments and manage cash outflows based on liquidity forecasts;
 - (c) Prepare International Public Sector Accounting Standards (IPSAS)-compliant financial statements for the Organization and focus on increased transparency with an improved financial discussion and analysis statement, as recommended by the IPSAS Board, and provide support for the establishment, management and reporting of the extrabudgetary funds of the Organization;
 - (d) Continue to manage financial risks through sound investment management, global cash management and global banking management;
 - (e) Continue to coordinate and manage the group health and life insurance programmes and provide services to the Advisory Board on Compensation Claims and the United Nations Claims Board, and administer the related compensation payments;
 - (f) Provide governance of master data to ensure the integrity, standardization and harmonization of data across the enterprise resource planning system and the other enterprise systems of the Organization.
- 29A.58 The above-mentioned work is expected to result in:
- (a) Prudent financial management of the resources entrusted to the Secretariat;
 - (b) A strengthened system of internal controls that supports better programme performance management and compliance with the regulatory framework;
 - (c) Increased transparency of financial reporting;
 - (d) Better positioning of the Organization to respond to external shocks.

Programme performance in 2021

United Nations Assistance Mission in Afghanistan and United Nations humanitarian operations in Afghanistan maintained

- 29A.59 Following developments in Afghanistan in August 2021, the Security Council, in its resolution [2596 \(2021\)](#), stressed the critical importance of a continued presence of the United Nations Assistance Mission in Afghanistan (UNAMA) and other United Nations agencies, funds and programmes across Afghanistan and called upon all Afghan and international parties to coordinate with UNAMA in the implementation of its mandate. In this context, the restrictions that had been imposed by the Central Bank of Afghanistan on the withdrawal of United States dollars and constraints on the inflow of hard currencies, including dollars, resulted in the sharp deterioration of liquidity in local currency and dollars. Consequently, the humanitarian operations of the United Nations and its agencies were interrupted, including disruption to payments to suppliers and staff.
- 29A.60 The United Nations strived to continue humanitarian operations in the country to avoid potentially disastrous consequences for the population of Afghanistan. At first, staff were paid using local money service providers, but transfers through those providers were inadequate as a long-term solution for the scale of United Nations country operations and to provide life-saving cash transfers to the Afghan people.
- 29A.61 It was critical for UNAMA operations and for the urgent humanitarian needs to be supported by adequate liquidity and banking operations. In this context, the component enabled the importation of dollar bank notes to support the transfer of funds to the United Nations in Afghanistan, as well as United Nations system partners.
- 29A.62 By the end of 2021, the component had developed and deployed a plan that enabled requisite volumes of dollar bank notes to be delivered on a regular and reliable basis to the United Nations Secretariat account in Afghanistan and for the subsequent allocation to the accounts of humanitarian agencies. The goal was to take action before the end of the year and the onset of the winter season to enable the provision of speedy humanitarian assistance to the more than 39 million people of Afghanistan. The component ensured the proper processing of the transactions, proactively addressed potential problems and streamlined operational requirements. The efforts were successful in restarting humanitarian operations and supporting the economy of the country.
- 29A.63 Progress towards the objective is presented in the performance measure below (see table 29A.14).

Table 29A.14

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	–	Availability of liquidity to cover humanitarian requirements for Afghani population is maintained

Planned results for 2023

Result 1: financial management systems integration for better decision-making

Programme performance in 2021 and target for 2023

- 29A.64 The component’s work contributed to the availability to Member States of integrated information on liquidity and monthly expenditure by budget section, which met the planned target.
- 29A.65 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29A.15).

Table 29A.15
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	Improved transparency and accountability as Member States and intergovernmental bodies access financial information	Integrated information on liquidity and monthly expenditure by budget section, in platform available for Member States	Improved information for management decision-making and external reporting resulting from the global roll-out of the integrated performance dashboard, combining substantive information and resource data, across all funding sources	Further enrichment of the United Nations Secretariat-wide integrated performance dashboard, combining substantive information and resource data across all funding sources, to improve decision-making and external reporting

Result 2: enhanced transparency, comparability and usefulness of financial statements across the United Nations system

Programme performance in 2021 and target for 2023

- 29A.66 The component’s work contributed to the Task Force on Accounting Standards adopting a comprehensive, harmonized approach for the financial statement discussion and analysis that complies with the IPSAS Board’s recommended practice guidelines, which met the planned target.
- 29A.67 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29A.16).

Table 29A.16
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	Decision by the Task Force on Accounting Standards to align the financial report with the IPSAS Board’s recommended practice guideline 2	Task Force on Accounting Standards adopted a harmonized and comprehensive approach to financial statement analysis, compliant with the recommended practice guideline 2, enabling compliant analysis of the financial report	Increased comparability and enhanced consistency of the financial statement discussion and analysis across United Nations system entities	Realization of comparable and consistent financial statement analysis across United Nations system entities benefiting Member States and internal stakeholders

Result 3: strengthened regulatory framework to improve accountability across United Nations operations

Proposed programme plan for 2023

29A.68 Since the management reform, as part of the ongoing efforts, the component has been conducting a review of a compendium of financial policy and guideline instruments in alignment with the enhanced delegation of authority framework and the strengthened accountability system. Feedback from clients across the Secretariat, results from the exercise in preparing the statement on internal control and recommendations from oversight bodies were taken into account in identifying priority areas for streamlining and updating the financial policy and guidance.

Lessons learned and planned change

29A.69 The lesson for the component was that a shift in the management paradigm, where decision-making authorities are decentralized and are made closer to the point of delivery, must be underpinned by a financial policy framework that is simple and up to date in order to hold managers to account. In applying the lesson, the component will streamline and update the policy framework in the area of financial management. By integrating feedback received from clients throughout the Secretariat, the component will provide managers with the tools necessary to exercise such authorities and to account for the decisions made that are essential for effective delivery of mandated activities.

29A.70 Expected progress towards the objective is presented in the performance measure below (see table 29A.17).

Table 29A.17
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	Identification and prioritization for streamlining and updating financial policy instruments	<ul style="list-style-type: none"> • Positive feedback on the impact of the revised policy on the effective management of financial resources • Positive feedback on the functioning of the internal control framework 	<ul style="list-style-type: none"> • Positive feedback on the impact of the revised policy on the effective management of financial resources • Positive feedback on the functioning of the internal control framework and the impact on the effective and efficient delivery of mandates

Deliverables

29A.71 Table 29A.18 lists all deliverables of the component.

Table 29A.18
Subprogramme 2, component 1: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	12	12	12	11
1. Annual financial reports to the General Assembly	2	2	2	2
2. Reports on multi-year payment plans and the financial situation of the United Nations to the General Assembly	3	3	3	3
3. Financial statements on United Nations peacekeeping and non-peacekeeping operations to the General Assembly	7	7	7	6
Substantive services for meetings (number of three-hour meetings)	22	23	22	22
4. Meetings of the Fifth Committee of the General Assembly	18	19	18	18
5. Meetings of the Investment Committee	4	4	4	4
Conference and secretariat services for meetings (number of three-hour meetings)	31	29	20	20
6. Meetings of the Committee on Contributions	31	29	20	20
B. Generation and transfer of knowledge				
Seminars, workshops, fellowships and training events (number of days)	–	19	24	20
7. Medical insurance plan training events, information sessions and workshops	–	19	24	20
Technical materials (number of materials)	776	826	776	825
8. Monthly reports on the status of contributions	12	12	12	12
9. Documents on the assessment of the contributions of Member States to the United Nations	14	14	14	13
10. Donor financial reports	750	800	750	800
C. Substantive deliverables				
Consultation, advice and advocacy: advice to approximately 40 donors on voluntary contribution financial agreements; and ad hoc information on the scale of assessments, peacekeeping financing and the status of contributions.				
E. Enabling deliverables				
Administration:				
Financial reporting: advice to departments/offices on the application of the Financial Regulations and Rules of the United Nations, accounting and financial matters and related systems; advice on sustaining IPSAS compliance to the United Nations finance community in peacekeeping and non-peacekeeping missions; approximately 18,000 United Nations Development Programme service clearing accounts; financial management support for the Development Coordination Office and the United Nations Office for Partnerships; and International Aid Transparency Initiative and United Nations System Chief Executives Board for Coordination reporting frameworks for consistent reporting to stakeholders.				
Contributions: assessment calculations for contributions of Member States for the regular budget.				
Financial policy, internal controls, master data management: three technical documents relating to the statement of internal control; consultations with the Internal Control Advisory Group on the statement of internal control framework; advocacy on internal controls; advice to Member States and United Nations offices on the management of extrabudgetary resources; accounting policies and associated corporate guidance, practices and procedures; 5 workshops on financial matters for chief finance officers and 68 chief administrative officers; Umoja finance process documents; financial help desk for the Umoja enterprise resource planning system; and 2,900 user access provisioning requests for finance roles in Umoja, with delegation of authority for the roles.				
Financial risk management: report on cases of fraud and presumptive fraud to the Board of Auditors (twice a year); 267 bank accounts worldwide, including bank account signatory panels; banking arrangements and contracts; payments for the house bank accounts managed by United Nations Headquarters; records of incoming funds; assessment of and support for 65 global cashiers and 15 regional cashiers; cash requirements in different currencies; database on banking details of vendors, staff and Member States; management of pooled investments; monthly United Nations operational rates of exchange for 222 currencies; Umoja finance processes; financial applications; SWIFT and global payment data and Umoja master data maintained; substantive support for departments on business analysis; payments; health and life insurance policies; health and life insurance activities; approximately 600 investment settlements; and approximately 4,600 foreign exchange transactions.				

Component 2

Field operations finance

Objective

- 29A.72 The objective, to which this component contributes, is to ensure the effective and efficient deliberations by Member States on the results to which the field and other Secretariat entities contribute, and on the resources required for the work of those entities in line with their mandates, and to ensure the effective and efficient management of resources.

Strategy

- 29A.73 To contribute to the objective, the component will provide strategic guidance on budgeting and financial stewardship and develop policies, methodologies and tools in that regard, in particular:
- (a) Provide strategic guidance on financial management and financing issues, especially on cross-cutting initiatives affecting field operations, including guidance on formulating human resources requirements, corporate initiatives, financial strength and liquidity and strengthening of internal controls, and timely, high-quality, simplified and action-oriented responses to managers in the field, monitor the liquidity of individual special accounts and oversee cash-flow and operating reserves for field operations;
 - (b) Provide strategic guidance on global property management and real estate services, including oversight of major construction projects and long-term capital planning, as reflected in the strategic capital review;
 - (c) Provide expert advice and guidance on property management and review financial data for accurate recording and for compliance with IPSAS and the established property management performance framework for field and other Secretariat entities, and ensure central supervision of projects, including by incorporating risk management principles and lessons learned to decision-making.
- 29A.74 The above-mentioned work is expected to result in client entities effectively and efficiently managing their resources within the approved levels, with improved accuracy in forecasts and proposals.

Programme performance in 2021

Special political missions responded nimbly to evolving needs

- 29A.75 In 2021, the mandates of the United Nations Verification Mission in Colombia and the United Nations Integrated Transition Assistance Mission in the Sudan expanded to new areas of work. The component extended its services to both missions in operationalizing their expanded mandates, supporting also the Department of Political and Peacebuilding Affairs to quickly identify the modality of implementation and formulate resource proposals, which enabled effective and timely consideration and approval by legislative bodies. Similarly, and in response to unforeseen adverse developments in the UNAMA operating environment, the component provided advice to UNAMA, addressing unanticipated needs related to the temporary relocation of mission staff.
- 29A.76 Progress towards the objective is presented in the performance measure below (see table 29A.19).

Table 29A.19
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	Establishment and the resourcing of a new special political mission (United Nations Integrated Transition Assistance Mission in the Sudan) in the Sudan authorized by the Security Council in 2020	<ul style="list-style-type: none"> • Resourcing of two missions (United Nations Verification Mission in Colombia and United Nations Integrated Transition Assistance Mission in the Sudan) to address the expansion in their mandated activities • United Nations Assistance Mission in Afghanistan managed unanticipated resource needs in response to the evolution in its operating environment

Planned results for 2023

Result 1: enhanced property management performance framework

Programme performance in 2021 and target for 2023

- 29A.77 The component’s work contributed to the mainstreaming of property management performance monitoring and reporting into the standard business processes of all entities of the global Secretariat in 2021, which met the planned target.
- 29A.78 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29A.20).

Table 29A.20
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Business intelligence tools applied to enable self-service and reporting capability for end users in Umoja; quality assurance measures for the preparation of IPSAS financial reports extended to the offices away from Headquarters, regional commissions and tribunals	Improved stewardship and accountability for property management and reporting through the successful extension of the framework to offices away from Headquarters, regional commissions and tribunals during the reporting period	Property management performance monitoring and reporting mainstreamed in the standard business processes of all entities	More efficient use of assets through improved utilization of serialized equipment	Offices away from Headquarters, regional commissions and tribunals achieve improved stewardship and accountability by streamlining disposal process

**Result 2: enhanced data analysis to support resource management in special political missions
Programme performance in 2021 and target for 2023**

- 29A.79 The component’s work contributed to all special political missions using new Umoja modules for the monitoring and analysis of programmatic and financial performance, with the special political missions using the system to manage their resources, especially with respect to recruitment in 2021, in due consideration of the budgeted vacancy rates for 2021 and proposed vacancy rates for 2023, and in full support of the delivery of mandated activities, which met the planned target.
- 29A.80 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29A.21).

Table 29A.21
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Special political missions analyse their financial performance (especially with regard to the liquidity situation)	Special political missions analyse their financial performance (especially to articulate the impact of COVID-19 on mandate implementation)	Special political missions manage staffing needs and tailor their resource formulation to integrate new internal working methods adapted in the past two years	Increased ability of special political missions to monitor and analyse their programmatic and financial performance	Missions adapt and apply new internal working methods and modality of mandate delivery and are better able to articulate such improvements in their budget proposals

**Result 3: independent risk management for global United Nations capital construction projects¹
Proposed programme plan for 2023**

- 29A.81 The early introduction of risk considerations and structured risk management practices are essential in the life cycle of capital construction projects. These projects usually involve a large number of risks, which need to be proactively managed through an iterative process. The component provides independent risk management services to entities implementing global capital construction projects, including the provision of independent assessments of budgetary performance and recommendations on risk mitigation measures.

Lessons learned and planned change

- 29A.82 The lesson for the component was that the involvement of a larger number of project staff likely increases awareness of the main project risks, fostering risk dialogues and assisting senior decision makers in risk mitigation. For example, having senior stakeholders such as the project owner and the chiefs of key operational services (e.g., facility management, information and communications technology or security) involved from the onset of capital construction projects helps to ensure that the project scope is well defined throughout the design development and that costly scope adjustments are avoided once the project is under implementation. In applying the lesson, the component will scale up its support for clients, enabling more informed risk mitigation that will help the Organization to deliver projects within approved budgets and timelines.
- 29A.83 Expected progress towards the objective is presented in the performance measure below (see figure 29A.IV).

¹ As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 29A)).

Figure 29A.IV
Performance measure: budget confidence levels for ongoing global United Nations construction projects, 2019–2023
 (Percentage)

Deliverables

29A.84 Table 29A.22 lists all deliverables of the component.

Table 29A.22
Subprogramme 2, component 2: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned

C. Substantive deliverables

Consultation, advice and advocacy: consultations with all Member States on financial matters with regard to field operations; specific consultations with all troop- and police-contributing countries on liabilities of missions; and advice to substantive committees of the General Assembly on potential budgetary implications.

E. Enabling deliverables

Administration: expert advice and guidance on budgeting and financial stewardship for 53 active field operations, as well as 2 closing field operations; quarterly payments to troop- and police-contributing countries; formulation of resource requirements to support the assessment and planning for new, expanding, transitioning and liquidating field operations; publication of the Property Management Manual and its dissemination to all entities, including resident coordinator offices; strategic guidance on property management performance monitoring and reporting; supplemental instructions for preparation of IPSAS financial reports on property, plant and equipment; training on property management; expert advice and support on Umoja relating to property management; and oversight and technical guidance on major capital projects, ongoing maintenance and alteration projects.

Component 3 Programme planning and budgeting

Objective

- 29A.85 The objective, to which this component contributes, is to ensure the effective and efficient deliberations by Member States on the results to which the Secretariat contributes, on the translation of mandates into workplans, on the resources required for the work of the Secretariat in line with its mandates and to ensure the effective and efficient management of resources.

Strategy

- 29A.86 To contribute to the objective, the component will:
- (a) Continue to issue strategic guidance for the preparation of the programme budget and engage with Member States from the early stages of the budget preparation process;
 - (b) Finalize and present to the legislative bodies the Secretary-General's annual programme budgets and the budget of the International Residual Mechanism for Criminal Tribunals, the budget performance reports and other reports on budgetary matters, including statements of programme budget implications and revised programme budget proposals, in accordance with the Financial Regulations and Rules of the United Nations and the Regulations and Rules Governing Programme Planning, the Programme Aspects of the Budget, the Monitoring of Implementation and the Methods of Evaluation;
 - (c) Provide substantive services on budgetary matters to the Fifth Committee of the General Assembly, the Committee for Programme and Coordination and the Advisory Committee on Administrative and Budgetary Questions and provide online tools accessible to Member States in order to facilitate deliberations on budgetary matters;
 - (d) Provide strategic guidance on budgeting and financial stewardship, including on managing the spending authorities; develop policies, methodologies and tools in that regard; and provide advice on all budgetary matters.
- 29A.87 The above-mentioned work is expected to result in:
- (a) Increased transparency and strengthened dialogue between the Secretariat and Member States;
 - (b) The prudent use of resources, while maximizing programme delivery.

Programme performance in 2021

Improved accuracy of common staff costs forecasts

- 29A.88 The component, in response to a recommendation from the Advisory Committee on Administrative and Budgetary Questions that was further reaffirmed by the General Assembly in its resolution [76/245](#), reassessed the approach to forecasting common staff costs. Under the previous approach, common staff costs were forecasted by applying a single percentage to the remuneration (net base salary and post adjustment multiplier). The increased volatility of remunerations in some locations, triggered, for example, by higher inflation and more pronounced currency fluctuations, resulted in higher variances between initial forecasts and actual expenditure. For example, while the remuneration in Beirut increased substantially owing to the high inflation recently experienced, some common staff cost expenditure such as home leave and rental subsidy did not increase to the same extent.
- 29A.89 The Secretariat conducted a deeper analysis of common staff costs, including all staff entitlements, and concluded that only one of the entitlements (pension contribution) had a strong correlation with the salary. Therefore, to forecast the resource requirements for the pension contribution, the Secretariat will continue to apply a percentage of remuneration to estimate its amount. However, given the weaker correlation between the remuneration and the other common staff cost entitlements, the Secretariat analysed 36 months of actual expenditure for each of the entitlements and used that information to produce individual forecasts for each common staff entitlement, including the education grant, rental subsidy and home leave. The estimate of these common staff costs entitlements is now based on per-person costs, which is expected to contribute to the increased accuracy of the common staff costs forecasts.
- 29A.90 Progress towards the objective is presented in the performance measure below (see table 29A.23).

Table 29A.23

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	–	The General Assembly, in its resolution 76/245 , requested the Secretary-General to continue to improve the accuracy of common staff cost forecasts

Planned results for 2023

Result 1: enhanced accessibility of budgetary information through use of an information portal

Programme performance in 2021 and target for 2023

- 29A.91 The component's work contributed to meaningful, timely and easy-to-understand budgetary information for Member States, which met the planned target.
- 29A.92 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29A.24).

Table 29A.24
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Understanding by Member States of budget proposals through reports of the Secretary-General, supplementary information and responses to written questions	Access by Member States to meaningful, timely and easy-to-understand budgetary information through the financial dashboard	Access to expanded budget information in the portal, including temporary positions and details of travel	Real-time access, through the financial portal, to at least five information elements, including monthly expenditure, that would otherwise require written questions by the Advisory Committee on Administrative and Budgetary Questions and the Fifth Committee of the General Assembly	Improved access to expanded information in the information portal, including, for example, compliance with advance booking of air travel, extrabudgetary resources and vacancy information

Result 2: improved budget presentation format**Programme performance in 2021 and target for 2023**

- 29A.93 The component's work, including early engagement with Member States, contributed to a single request by the General Assembly to improve the quality, clarity and usability of the proposed programme budget presentation format while maintaining the level of information, which met the planned target of Member States deciding on no more than five further improvements.
- 29A.94 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29A.25).

Table 29A.25
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Decision by Member States to improve the budget presentation format for 2021 by reducing the use of photographs, incorporating the list of mandates and deliverables into the official published document, adding strategy at the subprogramme level, providing more years of performance measures and presenting consolidated financial information at the section level	Decision by Member States to improve the budget presentation format for 2022 by adding more results narratives, improving the structure and consistency of strategies and providing additional information on posts and positions, preliminary estimates for major construction projects and consolidated information on communications technology spending	Decision by Member States to improve the budget presentation format for 2023 by improving the quality, clarity and usability of the proposed programme budget while maintaining the level of information	Final decision by Member States on the change to an annual budget period	Process and presentation format of the budget stabilized

Result 3: additional opportunity for early engagement by Member States**Proposed programme plan for 2023**

29A.95 Following General Assembly resolution [72/266 A](#), by which the Assembly approved the change to an annual budget period on a trial basis, a number of changes have been introduced to align the budget presentation format with the guidance received from the Assembly. Examples of such changes include the addition of consistently structured strategies at the subprogramme level, the increased number of results and performance measures, the longer time period covered by performance measures, the continuity of results, which enables a better link between actual performance and future plans, and the expanded information on extrabudgetary resources.

Lessons learned and planned change

29A.96 The lesson for the component was that Member States appeared to appreciate the opportunity to informally engage in the budget process. In applying the lesson, the component will offer an additional opportunity during the second half of September to informally share with Member States a summary of the items to be discussed in the main session, including the recent outcome of the Committee for Programme and Coordination and Advisory Committee on Administrative and Budgetary Committee sessions, and resource proposals expected in the fall.

29A.97 Expected progress towards the objective is presented in the performance measure below (see table 29A.26).

Table 29A.26

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Enhanced deliberation of Member States	Early engagement sessions with Member States on the implementation of General Assembly resolutions regarding the budget presentation format (February)	Two rounds of early engagement sessions with Member States on the implementation of General Assembly resolutions regarding the budget presentation format (February and September)	Early engagement sessions with Member States on the implementation of General Assembly resolutions regarding the budget presentation format (February)	Two rounds of early engagement sessions with Member States on the implementation of General Assembly resolutions (February) and items to be discussed in the main session (September)

Deliverables

29A.98 Table 29A.27 lists all deliverables of the component.

Table 29A.27

Subprogramme 2, component 3: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>

9. Letters to the Advisory Committee on Administrative and Budgetary Questions on extrabudgetary posts or positions at the level of D-1 and higher	6	10	10	10
C. Substantive deliverables				
Consultation, advice and advocacy: briefings for Member States on programme planning and budgetary matters; and advice on the potential budgetary implications of approximately 500 draft resolutions of the Main Committees of the General Assembly.				
E. Enabling deliverables				
Administration: expert advice and guidance on budgetary issues and policies relating to programme planning and budgeting for 28 programmes and 41 budget sections.				

Subprogramme 3 Human resources

Component 1 Global strategy and policy

Objective

- 29A.99 The objective, to which this component contributes, is to ensure a decentralized, agile, field-focused management paradigm, for the effective and transparent management of human resources and a high-performing, diverse and engaged workforce.

Strategy

- 29A.100 To contribute to the objective, the component will:
- (a) Promote an agile, geographically equitable, inclusive and gender-balanced workforce that represents the peoples of the world. By ensuring that the workforce demonstrates the

organizational values and behaviours and enhances the Organization's ability to perform, the component will simplify and streamline policies that will underpin a modern management framework, to enable the effective delivery of mandates;

- (b) Provide efficient strategic guidance on human resources supported by an enabling policy framework to fulfil clients' mandates, in which team, individual and organizational performance are aligned and human resources risks are transparently and effectively managed, as characterized by an accountable Organization, and foster innovation as a means of improving programmatic delivery of human resources in support of cultural change across the Organization;
- (c) Establish strategic policy imperatives anchored on guidance and feedback from entities, in particular from the field, continue to provide authoritative policy interpretation to ensure consistency, fairness and the equitable treatment of staff in the global Secretariat, and oversee the setting of salaries and benefits for locally recruited staff members by applying International Civil Service Commission methodologies;
- (d) Actively engage with management on all aspects of relations between staff and management and work with other organizations of the United Nations common system of salaries and allowances to advance the work of the High-level Committee on Management and the Human Resources Network of CEB, and through the International Civil Service Commission, including by leading the implementation of the United Nations workplace mental health and well-being strategy across the United Nations system;
- (e) Advance efforts towards mutual recognition over time, which calls for entities within the United Nations common system to operate according to the principle of mutual recognition of best practices in terms of policies and procedures, and lead efforts to enhance harmonization and improve efficiency in the United Nations system;
- (f) Continue to improve talent management in the Organization and, in particular, work towards implementing new approaches to mobility and organizational learning, adopting new values and behaviours in talent management, ensuring the universality of candidate assessment methods and strengthening the performance management framework;
- (g) Also ensure that future workforce needs are based on entities' strategic direction, assuring that strategic workforce planning remains aligned to the evolving priorities of entities and influences future workforce analysis to inform talent management actions, such as the upskilling of staff or the creation of new functions. The aim will be to attract the best talent through strategic outreach, in particular with regard to geographical diversity and gender parity.

29A.101 The above-mentioned work is expected to result in:

- (a) The use of human resources policies by managers to exercise their delegated authority effectively and in full compliance with the Organization's legislative mandates and internal policies;
- (b) Talent acquisition focusing on current workforce gaps and future needs, and enhancement of existing talent through learning and development, mobility and effective performance management and career satisfaction support;
- (c) A geographically equitable workforce that reflects the peoples the Organization serves and demonstrates the organizational values and behaviours.

Programme performance in 2021

COVID-19-related policy guidance

29A.102 In 2021, the component's work continued to support the needs of entities by providing policy advice and developing guidance related to COVID-19, which requires extensive coordination among the United Nations Secretariat entities and the United Nations system. The component updated and developed policy guidance on a number of topics, including on the return to the workplace, both for

Headquarters in New York and for entities away from Headquarters. Information on vaccine mandates, vaccine reporting and measures for non-compliance were provided to staff through the guidance materials. In addition, the subprogramme revised and coordinated the inter-agency administrative guidelines on COVID-19.

29A.103 Progress towards the objective is presented in the performance measure below (see table 29A.28).

Table 29A.28
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	COVID-19 policy advice and guidance made available to staff to ensure business continuity, staff safety and well-being	Staff has access to policy advice and guidance, including on issues related to working environment and COVID-19, ensuring a safe return to the workplace

Planned results for 2023

Result 1: more diverse and inclusive workforce

Programme performance in 2021 and target for 2023

29A.104 The component’s work contributed to changing the representation status of two unrepresented Member States to underrepresented and of three underrepresented Member States to within range, which did not meet the planned target of 50 unrepresented and underrepresented Member States. The target was not met because progress was offset by the change in status of five Member States from within range to underrepresented during the same period owing to retirements and the transfer of staff members.

29A.105 The component’s work also contributed to non-field entities achieving the representation of women at 49 per cent, which was within the gender parity range established between 47 and 53 per cent, while it stood at 32 per cent at field entities. Thus, at the overall organizational level, the representation of women was 42 per cent of total staff at the organizational level, which met the planned target.

29A.106 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 29A.V).

Figure 29A.V
Performance measure: number of unrepresented and underrepresented Member States and representation of women as a percentage of total staff

Result 2: enhanced access to human resources information for Member States**Programme performance in 2021 and target for 2023**

- 29A.107 The component's work contributed to ensuring that HR Insight remained available to Member States around the clock, building the foundation for the new common data warehouse, developing a new data model that is used to extract staff data with human resources information and that is accessible through a portal, and enabling Member States to have access to Secretariat staff composition data through HR Insight, which met the planned target.
- 29A.108 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29A.29).

Table 29A.29

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Member States have access to Secretariat staff composition data through HR Insight	Member States have access to Secretariat staff composition data through HR Insight	<ul style="list-style-type: none"> Member States have access to Secretariat staff composition data through HR Insight Foundation for the new common data warehouse, with human resources information, is built 	<ul style="list-style-type: none"> Member States have access to Secretariat staff composition data through the enhanced online portal, which takes readings from the new common data warehouse Increased timeliness of data availability and increased data transparency, contributing to efficient monitoring of the Secretariat workforce composition by Member States, which will better inform decision-making 	<ul style="list-style-type: none"> Member States have access to additional Secretariat staff composition data through the enhanced online portal Increased scope of data available for Member States in the new portal, for increased data transparency

Result 3: strategic workforce planning approach to identify future workforce needs**Proposed programme plan for 2023**

- 29A.109 The component has established a new and comprehensive approach to identifying future workforce needs, using strategic foresight, to inform talent management action. The component informed entities of the workforce skills and capabilities needed for the period 2021–2023 in order to enable entities to reflect the workforce needs in their planning for resources for the period.

Lessons learned and planned change

- 29A.110 The lesson for the component was the need to move from a static to an agile planning approach, one that can continually reshape the workforce to incorporate changes in the operating environment,

technological advances and skill needs. During 2023, the component will identify workforce skills and capabilities to be prioritized for the period 2024–2025 that are closely aligned with the People Strategy 2021–2025: our road map for the future and with a view towards achieving the objectives by 2030. Such skills and capabilities will inform strategies for talent acquisition, development and management in the coming years. In applying the lesson, this strategic workforce planning analysis will be refreshed to discern how workforce needs shift and talent management actions will be adjusted accordingly. Going forward, the component will continuously identify and communicate workforce priorities and capabilities in the coming years, enabling entities to plan for and take action on building needed capabilities in their workforce, either through recruitment, reassignment or staff development, for example, new job profiles or learning initiatives.

29A.111 Expected progress towards the objective is presented in the performance measure below (see table 29A.30).

Table 29A.30
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	Entities benefit by having increased knowledge/ awareness of priority workforce capabilities for 2022 for recruitment and learning action	Entities benefit by having increased knowledge/ awareness of priority workforce capabilities for 2023	Entities benefit by having increased knowledge/ awareness of priority workforce capabilities for 2024–2025

Deliverables

29A.112 Table 29A.31 lists all deliverables of the component.

Table 29A.31
Subprogramme 3, component 1: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	5	3	6	3
1. Reports to the General Assembly	5	3	6	3
Substantive services for meetings (number of three-hour meetings)	115	123	119	129
Meetings of:				
2. The Advisory Committee on Administrative and Budgetary Questions	7	10	6	6
3. The Fifth Committee of the General Assembly	20	37	35	35
4. The International Civil Service Commission	88	76	78	88

E. Enabling deliverables

Administration:

Strategy and policies: policy documents and tools on human resources policies and procedures, including on conditions of service and the enhanced delegation of authority; expert advice and authoritative guidance to Secretariat entities on human resources-related rules and policies; salary surveys; and provision of classification advice and related appeals.

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
<p>Talent management: talent management strategies, policies, processes and tools pertaining to diversity, inclusion, mobility and outreach, leveraging innovation, creativity and best practices, including a new diversity toolkit, a full set of 60 profiles of unrepresented and underrepresented Member States to enable targeted outreach and new technology for establishing a diverse talent pool; outreach with a focus on online channels and platforms, including participation in 27 career events organized with academia and other professional networks; servicing of staff management bodies, including the Staff-Management Committee; strategic workforce planning deliverables and human resources analytics; and online and ad hoc reports for Member States on human resources information, including support for more than 180 users in permanent missions.</p> <p>Organizational learning: organizational learning, performance management and staff development strategies, programmes and tools to build leadership and management capacity, including continuation of the e-management certificate programme for at least 500 staff members with first reporting officer responsibilities; continuation of the United Nations System Executive Management Programme for approximately 235 staff members with second reporting officer functions; management and leadership development programmes, including the United Nations Leaders Programme for approximately 85 D-1 and D-2 staff members; support for the participation of approximately 40 female staff members in the “Leadership, women and the United Nations” programme; building and strengthening coaching capacity for staff with first reporting officer functions; assessment of the leadership culture in the Secretariat; leadership programmes and senior leadership support programme for Assistant Secretaries-General and Under-Secretaries-General; strategic advice, tools and guidance on organizational development, including diversity and inclusion; development of and support for professional and substantive skills development programmes, including 6 mandated corporate learning programmes, as well as substantive skills programmes; strategies and tools for career enhancement and growth; frameworks, strategies, tools and guidance on performance management, including managerial effectiveness; launch of a new learning management system that will meet the evolving needs for learning and building staff capacity throughout the Secretariat; and conduct of the 2022 learning needs analysis to identify high-priority and emerging staff capacities to deliver on mandates.</p> <p>Internal justice and oversight: serving as expert witness for testimonies to the United Nations Dispute Tribunal and the United Nations Appeals Tribunal on matters of policy, compensation and conditions of service.</p>				

Component 2 Administrative law

Objective

- 29A.113 The objective, to which this component contributes, is to strengthen accountability in line with the standards of conduct by all categories of personnel.

Strategy

- 29A.114 To contribute to the objective, the component will:
- (a) Develop, deploy and use a global case management system and identify lessons learned, including in relation to critical incidents affecting the well-being and safety of staff, and develop tools and guidance material for senior leaders;
 - (b) Engage in capacity-building, including through the online information-sharing platform ALD Connect, direct outreach to senior managers and the ongoing development of tools and guidance materials to support senior managers in carrying out their responsibilities and exercising their authority;
 - (c) Review disciplinary matters for sanctioning purposes, represent the Secretary-General before the United Nations Dispute Tribunal with regard to appeals against administrative decisions, continue to expand screening for integrity for the Secretariat, and continue to review and update policies relating to the conduct of personnel.
- 29A.115 The above-mentioned work is expected to result in:
- (a) Enhanced oversight across the Secretariat and monitoring of matters that affect the reputation of the Organization, and the timely review and handling of misconduct matters;
 - (b) Well-informed decision-making by senior managers in relation to management of personnel;
 - (c) An enhanced culture of individual accountability.

Programme performance in 2021

Enhanced collaboration through technological tools

29A.116 The component aims to strengthen accountability. An opportunity arising out of the organizational response to the COVID-19 pandemic allowed for a quick adjustment to new internal working practices. This required leveraging existing digital business communication and collaborative tools to ensure client support. While not a substitute for in-person collaboration, the tools allowed for quick access to clients, efficient discussions on pending matters and bringing together all relevant stakeholders in one online setting to allow for comprehensive decision-making in real time. It resulted in efficiencies in the experience with benefits for the Organization moving forward in handling sensitive matters.

29A.117 Progress towards the objective is presented in the performance measure below (see table 29A.32).

Table 29A.32

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
Approximately 80 per cent of internal and external stakeholders collaborated electronically with the Administrative Law Division	Approximately 95 per cent of internal and external stakeholders collaborated electronically with the Administrative Law Division	95 percent of internal and external stakeholders collaborated electronically with the Administrative Law Division

Planned results for 2023

Result 1: deployment of a Secretariat-wide case management tracking system

Programme performance in 2021 and target for 2023

29A.118 The component's work contributed to the full utilization of the global case management system to record, monitor and track cases, which met the planned target.

29A.119 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29A.33).

Table 29A.33

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Informal knowledge-sharing among conduct and discipline practitioners from all Secretariat entities	Conduct and discipline focal points across the entire Secretariat have access to the global case management system	Full utilization of the global case management system to record, monitor and track cases	Increased expertise of end users on the use of reporting dashboards for informed decision-making	Increased expertise of end users on recording and tracking matters, reporting dashboards to support oversight and improvements in the case handling process and informed decision-making

Result 2: strengthened individual accountabilities**Programme performance in 2021 and target for 2023**

- 29A.120 The component's work contributed to strengthened individual accountabilities, with the network of conduct and discipline practitioners fully utilizing the system to record, monitor and track matters, which met the planned target.
- 29A.121 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29A.34).

Table 29A.34

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Informal knowledge-sharing among conduct and discipline practitioners from all Secretariat entities	Structured knowledge-sharing among conduct and discipline practitioners from all Secretariat entities through ALD Connect	Following development of the global case management system, the network of conduct and discipline practitioners utilized the system fully to record, monitor and track matters	Strengthened capacity of all Secretariat entities to manage misconduct cases, increase reporting capacity and facilitate the identification of trends that strengthen decision-making and policy development	Strengthened capacity of all Secretariat entities to manage misconduct cases through increased reporting capacity, knowledge-sharing and identification of trends, for consistent and coherent decision-making and policy development

Result 3: risk management for well-informed decision-making in relation to personnel management**Proposed programme plan for 2023**

- 29A.122 Since 2019, the component has intensified engagement with stakeholders to inform them of administrative processes surrounding the system of administration of justice, including, in particular, the impact of decisions taken. Senior managers are made aware of their significant decision-making authority and their accountability through various outreach modalities, including induction training programmes on the system of administration of justice and the disciplinary process, information sessions on risk management and direct advisory services offered to senior managers when faced with difficult or risky decisions, as needed. They are, in particular, advised to understand the risks of taking decisions that may have an effect on the reputation of the Organization.

Lessons learned and planned change

- 29A.123 The lesson for the component was that, upon taking up their appointment, senior managers must have a clear understanding of the system of administration of justice, including the administrative framework in place and conduct and discipline matters, through the completion of mandatory induction programmes and information sessions that also address risks associated with proposed courses of action and decisions. In applying the lesson, the component will engage in additional consultations prior to decision-making in instances in which decisions might have a significant risk for the Organization, to encourage consideration of preventive risk controls. The component, in its advisory role, will have the benefit of the experience in handling highly sensitive matters and will apply lessons learned from those matters, including best practices, and more importantly, application of effective preventive measures to mitigate risk. This can be measured by monitoring follow-up with Administrative Law Division prior to taking decisions of a serious nature that could have an impact on the reputation of the Organization (e.g., decisions on staffing at higher levels).

29A.124 Expected progress towards the objective is presented in the performance measure below (see table 29A.35).

Table 29A.35
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Training module on the system of administration of justice developed and delivered	Upon taking up their appointment, senior managers were provided induction training/information sessions on the administration of justice framework and conduct and discipline matters	Delivered training to 100 per cent of newly appointed senior managers	Building on lessons learned and as a preventive measure, senior managers reach out to the Administrative Law Division prior to taking decisions of a serious nature that could have an impact on the reputation of the organization (e.g., decisions on staffing at higher levels)	Senior managers have a clear understanding of the justice administration system and framework to ascertain risks for sensitive decisions

Deliverables

29A.125 Table 29A.36 lists all deliverables of the component.

Table 29A.36
Subprogramme 3, component 2: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	1
1. Report for the General Assembly	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	20	24	23	23
Meetings of:				
2. The Advisory Committee on Administrative and Budgetary Questions	5	5	5	5
3. The Fifth Committee of the General Assembly	7	11	10	10
4. The Special Committee on Peacekeeping Operations	2	2	2	2
5. The Fourth Committee of the General Assembly	2	2	2	2
6. The Sixth Committee of the General Assembly	3	3	3	3
7. The Committee for Programme and Coordination	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: advice on conduct issues to other international organizations (such as the African Union, the North Atlantic Treaty Organization and CEB entities); and advocacy with Member States on conduct and discipline issues.				
Databases and substantive digital materials: public database and United Nations standards of conduct website.				
D. Communication deliverables				
Digital platforms and multimedia content: website relating to conduct and discipline.				

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

E. Enabling deliverables

Administration: implementation and oversight, including updating, of the Organization’s conduct and discipline policies; development and maintenance of the strategic framework for response to critical incidents in order to support business continuity and meet the Organization’s duty of care obligations, including staff safety and security; and training of the global network of approximately 80 conduct and discipline focal points.

Internal justice and oversight: representation of the Secretary-General before the United Nations Dispute Tribunal in cases challenging administrative decisions, including challenges to disciplinary sanctions (approximately 250 cases); facilitation of informal dispute resolution in partnership with relevant Secretariat entities; advice to all Secretariat entities on conduct and discipline and administration of justice matters; advice to all Secretariat entities on critical incidents; ALD Connect network; and databases on conduct issues, victim assistance, administrative appeals and disciplinary matters referred, including integrated data analysis.

**Subprogramme 4
Business transformation and accountability**

Objective

29A.126 The objective, to which this subprogramme contributes, is to ensure a results-oriented, data-driven, agile Organization that is efficient, accountable, transparent, compliant and driven by lessons learned and continuous improvements.

Strategy

29A.127 To contribute to the objective, the subprogramme will:

- (a) Reinforce the Organization’s systems of accountability by evaluating overall organizational performance trends; assessing the alignment of roles and responsibilities and monitoring the exercise of delegated authority; monitoring the senior managers’ compacts; mainstreaming the use of evaluation as part of the programme planning cycle; and coordinating the Secretariat’s interaction with oversight bodies and identifying trends in their recommendations;
- (b) Carry out capacity-building activities to support all United Nations entities in identifying, assessing, evaluating and controlling risk, using an enterprise risk management approach, and support the achievement of mandated programmatic results by training all entities in results-based management;
- (c) Support the implementation of the data strategy of the Secretariat, enable entities to access management data from Secretariat systems and analytical tools supporting data-driven decision-making, and lead and coordinate the Secretariat’s portfolio of business transformation projects, such as with regard to the availability of a comprehensive business intelligence platform.

29A.128 The above-mentioned work is expected to result in:

- (a) A reinforced accountability culture in the Organization in the areas of risk awareness and monitoring performance;
- (b) Greater use of enterprise data and data analytics in decision-making and programme delivery;
- (c) Teams across the Secretariat strengthening new collaboration practices using online platforms.

Programme performance in 2021

Strengthened evaluation in the Secretariat

- 29A.129 In paragraph 61 of the report of the Secretary-General, titled “Shifting the management paradigm in the United Nations: ensuring a better future for all” (A/72/492), he shared his vision of strengthening evaluation in the Secretariat. To help to implement this vision, the subprogramme, in collaboration with the Inspection and Evaluation Division of the Office of Internal Oversight Services (OIOS), developed an administrative instruction on evaluation (ST/AI/2021/3) following extensive Secretariat-wide consultations. It sets out the operational guidelines for article VII of the Regulations and Rules Governing Programme Planning, the Programme Aspects of the Budget, the Monitoring of Implementation and the Methods of Evaluation.
- 29A.130 The administrative instruction and accompanying guidelines were promulgated in August 2021. The documents set out: (a) the requirements and procedures for the management, conduct and use of evaluations; (b) governance arrangements, accountabilities and performance standards for Secretariat evaluation functions; and (c) the roles and responsibilities of Secretariat entities to increase the use and usefulness of evaluation as a management tool. The Department of Management Strategy, Policy and Compliance and OIOS provide support, and the new Evaluation Management Committee provides guidance and assurance over the successful implementation of the administrative instruction. The promulgation of the administrative instruction and accompanying guidelines is a crucial step towards the Secretary-General’s goal of instilling a culture of learning and evaluation in the Secretariat, through an increase in the utility of evaluations as a source of independent insight in its decision-making.
- 29A.131 Progress towards the objective is presented in the performance measure below (see table 29A.37).

Table 29A.37
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
Secretariat entities have limited guidance on evaluation, covered under article VII of the Regulations and Rules Governing Programme Planning, the Programme Aspects of the Budget, the Monitoring of Implementation and the Methods of Evaluation	Secretariat entities have limited guidance on evaluation, covered under article VII of the Regulations and Rules Governing Programme Planning, the Programme Aspects of the Budget, the Monitoring of Implementation and the Methods of Evaluation	<ul style="list-style-type: none"> • Guidance to Secretariat entities available through the administrative instruction on evaluation and accompanying guidelines promulgated in August 2021 • Available support from the Department of Management Strategy, Policy and Compliance and OIOS, including through iSeek articles, workshops, and the Global Evaluation Community of Practice

Planned results for 2023

Result 1: Business Intelligence took off

Programme performance in 2021 and target for 2023

- 29A.132 The subprogramme’s work contributed to the development of additional corporate data models, in close collaboration with subject matter experts in the various functional areas and from diverse enterprise systems, with enhancements to the integrated management dashboard that led to the

increase in active users, to 933 in 2021, which did not meet the planned target of 1,200 active users. The target was not met owing to the lack of possible in-person training and support sessions that, in general, have a higher response rate. A slower adoption of the tool was compensated in part through regular briefings and demonstrations provided to entities, with more than 1,200 users granted access to the dashboard.

29A.133 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 29A.VI).

Figure 29A.VI

Performance measure: active users of the integrated management dashboard

Result 2: towards organizational transformation and innovation

Programme performance in 2021 and target for 2023

29A.134 The subprogramme’s work contributed to increasing opportunities in business transformation and innovation activities and networks throughout the Secretariat, including through the “Agile approaches” pilot programme and staff-focused dialogues for solutions to “Reimagine the UN Together” and other initiatives fostering organizational culture change, which met the planned target.

29A.135 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29A.38).

Table 29A.38

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Limited avenues or platforms for business transformation and innovation	More opportunities in business transformation and innovation activities throughout the Secretariat	More opportunities for business transformation and innovation activities throughout the Secretariat	Further increase in and expansion of opportunities for business transformation and innovation activities and networks across the United Nations system	Further increase in and expansion of opportunities for business transformation and innovation activities and networks across the United Nations system

Result 3: capacity-building in data science and visualization through the in-house Kamino training programme

Proposed programme plan for 2023

29A.136 With the launch of the Data Strategy of the Secretary-General for Action by Everyone, Everywhere, several initiatives have helped to translate the Strategy into action. The subprogramme developed and launched Kamino, an in-house advanced data science and visualization training programme. The programme is intended to foster a community of data scientists, data analysts and data engineers in the Organization who will be committed to making a difference in their field of work using data, equipping them to take on the toughest analytical challenges. The pilot programmes conducted in 2021 consisted of biweekly instructor-led sessions spanning over three months and covering the full life cycle of data science, with a focus on projects of special interest and application to work programmes.

Lessons learned and planned change

29A.137 The lesson for the subprogramme was formed from evaluating the impact of the training towards developing the knowledge, skills and abilities of participants, which revealed a high demand for the training material and data to support work programmes directly. In applying the lesson, the subprogramme will use learning metrics to measure and monitor the effectiveness of training delivery and content. The subprogramme will expand the training programme with tailored variations and increase the opportunities for participation by providing multiple forms of delivery, including independent study and instructor-led sessions.

29A.138 Expected progress towards the objective is presented in the performance measure below (see figure 29A.VII).

Figure 29A.VII
Performance measure: number of participants trained in data science and visualization having completed the Kamino programme

Deliverables

29A.139 Table 29A.39 lists all deliverables of the subprogramme.

Table 29A.39

Subprogramme 4: deliverables for the period 2021-2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	3	3	3	3
1. Report to the General Assembly on accountability	1	1	1	1
2. Reports of the Secretary-General on the implementation of the recommendations of the Board of Auditors	2	2	2	2
Substantive services for meetings (number of three-hour meetings)	26	11	13	11
3. Hearings of the Advisory Committee on Administrative and Budgetary Questions	8	3	5	3
4. Meetings of the General Assembly	15	4	4	4
5. Meetings of the Independent Audit Advisory Committee	3	4	4	4
E. Enabling deliverables				
<p>Administration: online training on evaluation targeting all entity evaluation focal points; quarterly key performance indicators report covering more than 230 entities with a delegation of authority; senior managers' compacts performance assessment for 65 entity heads; workshops, briefings and guidance to approximately 180 compact focal points; enterprise-wide outreach, advocacy campaigns, network and training opportunities to raise awareness of change management, business innovation and new internal ways of working; continuous improvements in analytics and corporate dashboards; online, instructor-led and train-the-trainer skills development programme for advanced data analytics and visualization benefiting knowledge workers and staff with analytical roles; training and guidance on results-based management to entities; 2 workshops with managers and enterprise risk management focal points; 1 enterprise risk management application made available to all entities, with effective customer support; and workshop for some 120 oversight focal points.</p>				

B. Proposed post and non-post resource requirements for 2023

Overview

29A.140 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 29A.40 to 29A.42.

Table 29A.40

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2021 expenditure	2022 appropriation	Changes				2023 estimate (before recosting)	
			Technical adjustments	New/expanded mandates	Other	Total		Percentage
Post	40 458.2	39 832.1	302.0	293.5	1 233.7	1 829.2	4.6	41 661.3

29A.141 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 29A.43 to 29A.45 and figure 29A.VIII.

29A.142 As reflected in tables 29A.43 (1) and 29A.44 (1), the overall resources proposed for 2023 amount to \$58,250,000 before recosting, reflecting a net increase of \$2,825,700 (or 5.1 per cent) compared with the appropriation for 2022. Resource changes result from three factors, namely: (a) technical adjustments; (b) new and expanded mandates; and (c) other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

29A.143 As reflected in table 29A.43 (1), resource changes reflect a net decrease of \$230,400, as follows:

- (a) **Executive direction and management.** The decrease of \$443,900 reflects the reduction under other staff costs (\$435,500) and travel of staff (\$8,400) attributable to the removal of non-recurrent provisions for 2022 for two temporary positions relating to the jurisdictional review pursuant to General Assembly resolution [75/245 B](#);

- (b) **Subprogramme 2, component 1, Finance.** The increase of \$60,000 under posts relates to the annual provision for two posts of Finance and Budget Assistant (General Service (Other level)) reassigned in 2022 pursuant to General Assembly resolution 76/245, which were subject to a 50 per cent vacancy rate in accordance with the established practice for the costing of reassigned posts;
- (c) **Subprogramme 3, component 1, Global strategy and policy.** The net increase of \$126,700 is related to the increase of \$128,800 under posts attributable to the annual provision for the posts of Human Resources Officer (P-3) and Associate Human Resources Officer (P-2) established in 2022 pursuant to General Assembly resolution 76/245, which were subject to a 50 per cent vacancy rate in accordance with the established practice for the costing of new posts. This increase is offset in part by the reduction of \$1,400 under furniture and equipment and \$700 under contractual services, owing to the removal of the non-recurrent portion of the associated common services costs;
- (d) **Subprogramme 3, component 2, Administrative law.** The decrease of \$86,400 reflects the reduction under other staff costs (\$84,400) relating to the removal of non-recurrent provisions for the temporary position of Legal Officer (P-4), which was approved for 2022 for a period of nine months subject to a 50 per cent vacancy rate, as well as the associated common services costs under furniture and equipment (\$1,400) and contractual services (\$600);
- (e) **Subprogramme 4, Business transformation and accountability.** The increase of \$113,200 under posts relates to the annual provision for the posts of Senior Data Scientist (P-5), Data Scientist (P-3) and Data Science Assistant (General Service (Other level)) reassigned in 2022 pursuant to General Assembly resolution 76/245, which were subject to a 50 per cent vacancy rate in accordance with the established practice for the costing of reassigned posts.

New and expanded mandates

- 29A.144 As reflected in table 29A.43 (1), resource changes reflect an increase of \$303,700 in subprogramme 1, component 2, Services to the Fifth Committee of the General Assembly and to the Committee for Programme and Coordination. The increase of \$293,500 under posts, \$4,800 under contractual services, \$3,600 under furniture and equipment, \$900 under general operating expenses and \$900 under supplies and materials relate to the establishment of three posts (as explained in annex II to the present report) and associated common services costs. In its resolution 76/236, the General Assembly requested the Secretary-General to identify possible measures to enhance and support more effective work of the Committee for Programme and Coordination, including in terms of the duration of its sessions and the capacity of the secretariat of the Fifth Committee and the Committee for Programme and Coordination.

Other changes

- 29A.145 As reflected in table 29A.43 (1), resource changes reflect a net increase of \$2,752,400, as follows:

Addressing racism and promoting dignity for all in the United Nations Secretariat, as reflected in the revised estimates report (A/76/771), for consideration by the General Assembly during the second-resumed part of its seventy-sixth session (increase of \$3,273,100 for 2023)

- (a) **Executive direction and management.** The increase of \$1,770,800, comprising \$1,267,800 under posts that would provide for seven posts (see annex II) that were proposed for establishment in 2022 and \$503,000 for non-post requirements, including associated common services costs (\$11,000 under contractual services, \$1,600 under general operating expenses and \$2,100 under supplies and materials) and operational requirements for the proposed Office of Diversity, Equity and Inclusion (\$457,500 under consultants, \$24,100 under official travel of staff and \$6,700 under general operating expenses);
- (b) **Subprogramme 3, component 1, Global strategy and policy.** The increase of \$1,306,700 comprises \$552,600 under posts that would provide for three posts (see annex II) that were

proposed for establishment in 2022 and \$754,100 for non-post requirements, including two temporary positions of Human Resources Officer (P-4) and Human Resources Officer (P-3) (\$359,100 under other staff costs), associated common services costs for these posts and temporary positions (\$7,800 under contractual services, \$1,200 under general operating expenses and \$1,500 under supplies and materials) and related operational requirements (\$384,500 under contractual services);

- (c) **Subprogramme 3, component 2, Administrative law.** The increase of \$195,600 comprises \$193,500 under other staff costs, which would provide for one temporary position of Legal Officer (P-4) that was proposed in 2022, and associated common services costs (\$1,600 under contractual services, \$200 under general operating expenses, and \$300 under supplies and materials);

Redeployment of financial operational functions to Section 29B, Department of Operational Support (decrease of \$1,261,000)

- (d) **Subprogramme 2, component 1, Finance.** A decrease of \$1,216,000 under posts relates to the redeployment of 14 posts to section 29B, Department of Operational Support (see annex II) and the decrease of \$45,000 in related non-post requirements, including associated common services costs (\$22,400 under contractual services, \$4,200 under general operating expenses, \$4,200 under supplies and materials and \$4,200 under furniture and equipment) and other operational requirements (\$10,000 under other staff costs);

Additional capacity to address increased demands (increase of \$629,200)

- (e) **Subprogramme 2, component 2, Field operations finance.** The increase of \$95,100 under posts relates to the establishment of one post, subject to a 50 per cent vacancy rate in accordance with the established practice for the costing of new posts (see annex II);
- (f) **Subprogramme 2, component 3, Programme planning and budgeting.** The increase of \$423,100 under posts relates to the establishment of five posts, subject to a 50 per cent vacancy rate in accordance with the established practice for the costing of new posts (see annex II);
- (g) **Subprogramme 3, component 2, Administrative law.** The net increase of \$222,100 relates to the non-recurrent provision for the temporary position of Legal Officer (P-4) approved in 2022 for an additional six months in 2023 (\$111,000 under other staff costs) and the establishment of one post of Legal Officer (P-4), subject to a 50 per cent vacancy rate in accordance with the established practice for the costing of new posts (see annex II);

Other cost-neutral changes

- (h) **Subprogramme 1, component 3, Management advisory services.** A net increase of \$23,300 reflects additional requirements of \$23,500 under contractual services for information and communications technology services, offset in part by reduced requirements of \$200 under travel of staff;
- (i) **Programme support.** A decrease of \$23,300 under other staff costs based on post-management reform expenditure patterns.

Other assessed resources

29A.146 As reflected in tables 29A.43 (2) and 29A.44 (2), the Department receives other assessed resources to backstop peacekeeping operations. For 2023, other assessed resources are estimated at \$58,812,300 and would provide for 208 posts, as well as non-post resources. The increase of \$3,259,600 compared with the estimate for 2022 is attributable primarily to: (a) the transfer of 15 posts previously funded by peacekeeping operations through a cost-recovery mechanism; and (b) an adjustment in standard salary and common staff costs, including vacancy rates. Other assessed resources represent 38.8 per cent of the total resources for this section.

Extrabudgetary resources

- 29A.147 As reflected in tables 29A.43 (3) and 29A.44 (3), the Department receives extrabudgetary resources from several sources. For 2023, extrabudgetary resources are estimated at \$34,350,200 and would provide for 105 posts, as well as non-post resources. The Department receives voluntary contributions to the trust fund in support of victims of sexual exploitation and abuse, established by the Secretary-General in 2016, as well as management- and reform-related voluntary contributions through another trust fund. Other extrabudgetary resources include: (a) central programme support costs to fund the extrabudgetary resource share of Organization-wide costs, such as the Umoja enterprise resource planning solution (including business support resources) and the development of an efficiency model for management services provision, and to backstop operations funded from voluntary contributions; (b) a system-wide jointly-financed resource to fund local salary surveys; and (c) a fund to backstop operations funded from cost recoveries. The decrease of \$2,909,700 compared with the estimate for 2022 is attributable primarily to the transfer of extrabudgetary resources relating to financial operational functions in section 29A to section 29B, Department of Operational Support. Extrabudgetary resources represent 22.7 per cent of the total resources for this section.
- 29A.148 The extrabudgetary resources under this section are subject to the oversight of the Department of Management Strategy, Policy and Compliance, which has delegated authority from the Secretary-General.

Executive direction and management

- 29A.149 The executive direction and management component comprises the Office of the Under-Secretary-General, including the Inter-Agency and Intergovernmental Service, the Office of the Controller and the Office of the Assistant Secretary-General for Human Resources.
- 29A.150 The Under-Secretary-General for Management Strategy, Policy and Compliance is responsible for the overall direction and management of the Department and for providing the Secretary-General with strategic advice on management issues. The Under-Secretary-General represents the Secretary-General on management issues before relevant expert and intergovernmental bodies, such as the Advisory Committee on Administrative and Budgetary Questions and the Fifth Committee, the International Civil Service Commission and inter-agency coordination mechanisms, including the High-level Committee on Management of CEB, and in the conduct of staff-management consultations. The Under-Secretary-General oversees and provides direction to the Assistant Secretary-General for Programme Planning, Finance and Budget, Controller, the Assistant Secretary-General for Human Resources and the Director of the Business Transformation and Accountability Division. The Under-Secretary-General will also, jointly with the Under-Secretary-General for Operational Support, provide direction and strategic guidance to the Assistant Secretary-General/Chief Information Technology Officer.
- 29A.151 The Office of the Under-Secretary-General provides leadership in the development and delivery of integrated organizational management strategies, policies and models that support a decentralized, field-focused paradigm in which managers are empowered through the new enhanced delegation of authority framework. It provides direction to take advantage of lessons learned and innovative methods to ensure continuous management improvements to meet evolving requirements throughout the Secretariat. It liaises with Member States and other external entities on management-related issues and fosters coordination internally within the Secretariat, as well as externally with the funds, programmes and specialized agencies of the United Nations system, to build partnerships and promote best practices.
- 29A.152 In his report on addressing racism and promoting dignity for all in the United Nations Secretariat (A/76/771), the Secretary-General recommended the establishment of an Office of Diversity, Equity and Inclusion within the Office of the Under-Secretary-General for Management Strategy, Policy and Compliance, to coordinate, monitor, advocate, mainstream and ensure the long-term sustainability of efforts to attain diversity, equity and inclusion at all categories and levels of personnel and in addressing discrimination, including racism and racial discrimination. If approved by the General Assembly, the proposed posts and non-posts resources will be established as from 1 July 2022. The additional resource requirements needed for the Department in 2023 are listed in detail in the tables below and in the overall resource changes section above.

- 29A.153 The Under-Secretary-General is assisted by the Controller, who provides strategic and policy leadership on all planning, programming, budgetary and financial matters and on the administration of the Financial Regulations and Rules of the United Nations, and by the Assistant Secretary-General for Human Resources, who provides strategic leadership for the simplified and streamlined human resources policy framework and for mainstreaming the gender perspective, equitable geographical representation and accessibility into all facets of the work of the Organization through integrated strategies and policies. Working together closely under the guidance of the Under-Secretary-General, the Controller and the Assistant Secretary-General for Human Resources set priorities in adapting strategies and policies to support new and innovative business models and enable managers to be more effective and agile in the delivery of their programmes.
- 29A.154 The Controller represents the Secretary-General in the committees of the General Assembly, the Advisory Committee on Administrative and Budgetary Questions, the Committee for Programme and Coordination and the Independent Audit Advisory Committee in the presentation of all programme and budget documents, including those related to the regular budget, the peacekeeping budgets and the international tribunals, as well as the financial statements of the Organization. The Controller advises the Secretary-General and the Under-Secretary-General for Management Strategy, Policy and Compliance on policy relating to the budgets and finances of the United Nations and the related plans and work programmes. Through the Office of Programme Planning, Finance and Budget, the Controller ensures that the financial framework enables efficient mandate delivery.
- 29A.155 The Assistant Secretary-General for Human Resources leverages technologies and pursues innovative and holistic approaches to transform the organizational culture, strengthen duty of care, promote inclusion, accessibility and diversity, and drive the creation of a supportive and healthy workplace. The Office of Human Resources responds proactively to issues arising in the formal and informal system of administration of justice to ensure the efficient, effective and fair implementation of the Organization’s policies, core values and norms. It builds on the integration of the conduct and discipline function for the entire Secretariat and for all categories of personnel to increase consistency, transparency and accountability in the application of the standards of conduct.
- 29A.156 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Department is integrating environmental management practices into its operations. In line with its functional responsibilities, the Department will continue, in 2023, to mainstream environmental sustainability management into the Secretariat policy framework and enterprise management and accountability system. Operationally, the Department will prioritize reducing its travel-related greenhouse gas emissions by optimizing the use of online collaborative and conferencing platforms, streamlining and combining travel requirements, systematically using tools developed by the International Civil Aviation Organization in organizing meetings and training and opting to travel by train whenever possible.
- 29A.157 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 29A.46. The Department will continue to implement measures to improve compliance rate with regard to the advance purchase of air tickets through forward planning of events and nominations of travellers, raising the awareness of programme managers and travellers and minimizing exceptions. The majority of non-compliant cases are due to exigencies of service and/or other reasons beyond the Department’s control.

Table 29A.46
Compliance rate
 (Percentage)

	<i>Actual 2019</i>	<i>Actual 2020</i>	<i>Actual 2021</i>	<i>Planned 2022</i>	<i>Planned 2023</i>
Timely submission of documentation	91	88	92	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	63	52	75	100	100

29A.158 The proposed regular budget resources for 2023 amount to \$6,289,800 and reflect an increase of \$1,326,900 compared with the appropriation for 2022. This proposed net increase is explained in paragraphs 29A.143 (a) and 29A.145 (a). Additional details on the distribution of the proposed resources for 2023 are reflected in table 29A.47 and figure 29A.IX.

Table 29A.47

Figure 29A.IX

Executive direction and management: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed resources

29A.159 Other assessed resources are estimated at \$1,499,700 and would provide for three posts (1 P-4, 1 P-3 and 1 General Service (Other level)), as well as non-post resources. Additional details are reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2022 to 30 June 2023 ([A/76/725](#)).

Extrabudgetary resources

29A.160 Extrabudgetary resources are estimated at \$2,386,300 and would provide for three posts (1 D-1, 1 P-5 and 1 General Service (Other level)) in the Office of the Under-Secretary-General and two posts (1 P-5 and 1 P-4) in the Office of the Controller, as well as non-post resources. In the Office of the Under-Secretary-General, the resources would be used mainly to monitor the implementation and mainstreaming of the Department's management reform initiatives, as well as for inter-agency coordination. In the Office of the Controller, the resources would be used to support the Controller with respect to budgetary and financial matters, including presentations to all intergovernmental and oversight bodies. No change in the resource level is expected, compared with the estimate for 2022.

Programme of work**Subprogramme 1****Enterprise resource planning solution, services to the Fifth Committee of the General Assembly and to the Committee for Programme and Coordination, and management advisory services****Component 1****Enterprise resource planning solution****Regular budget resources**

29A.161 The proposed regular budget resources for 2023 amount to \$3,902,000 and reflect no change, compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 29A.48.

Table 29A.48

Total	3 822.5	3 902.0	–	–	–	–	–	–	3 902.0

Other assessed resources

29A.162 Other assessed resources are estimated at \$15,201,000 and would provide for the peacekeeping budget share of the enterprise resources planning solution. Additional details are reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2022 to 30 June 2023 ([A/76/725](#)).

Extrabudgetary resources

29A.163 Extrabudgetary resources for the component are estimated at \$5,639,100 and would provide for the extrabudgetary resources share of the enterprise resource planning solution for 2023. No change in the resource level is expected compared with the estimate for 2022.

Gross budget resource requirements

29A.164 Compared with the approved budget for 2022, there are no changes in the proposed gross budget resources for 2023, which amount to \$24,571,800. Additional details on the distribution of the proposed resources for 2023 are reflected in table 29A.49 and figure 29A.X.

Table 29A.49

Other assessed resources

29A.168 Other assessed resources are estimated at \$1,843,800 and would provide for seven posts (1 D-1, 2 P-4, 2 P-3 and 2 General Service (Other level)), as well as non-post resources. Additional details are reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2022 to 30 June 2023 ([A/76/725](#)).

**Subprogramme 2
Programme planning, finance and budget**

**Component 1
Finance**

29A.169 The proposed regular budget resources for 2023 amount to \$5,843,700 and reflect a net decrease of \$1,201,000 compared with the appropriation for 2022. The proposed net decrease is explained in paragraphs 29A.143 (b) and 29A.145 (d). Additional details on the distribution of the proposed resources for 2023 are reflected in table 29A.52 and figure 29A.XIII.

Figure 29A.XIII
Subprogramme 2, component 1: distribution of proposed resources for 2023 (before recosting)
(Number of posts/thousands of United States dollars)

Other assessed resources

29A.170 Other assessed resources are estimated at \$12,242,500 and would provide for 62 posts (2 P-5, 17 P-4, 9 P-3, 1 P-2/1, 3 General Service (Principal level) and 30 General Service (Other level)), as well as non-post resources. Additional details are reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2022 to 30 June 2023 (A/76/725).

Extrabudgetary resources

29A.171 Extrabudgetary resources for the component are estimated at \$19,413,500 and would provide for 70 posts (5 P-5, 11 P-4, 10 P-3, 2 P-2/1, 7 General Service (Principal level), 25 General Service (Other level) and 10 Local level), as well as non-post resources. The resources would be used to provide programme support for substantive and technical cooperation activities and for administrative structures, as well as support for the Special Account for Travel Services. The resources would also provide assistance for substantive activities related to the Tax Equalization Fund and the United Nations Fund for International Partnerships. The decrease of \$2,909,700 in the resource level compared with the estimate for 2022 is attributable to the redeployment of the remaining 15 extrabudgetary posts with financial operational functions, and related non-post resources, to section 29B.

**Component 2
Field operations finance**

29A.172 The proposed regular budget resources for 2023 amount to \$1,547,300 and reflect an increase of \$95,100 compared with the appropriation for 2022. The proposed increase is explained in paragraph 29A.145 (e). Additional details on the distribution of the proposed resources for 2023 are reflected in table 29A.53 and figure 29A.XIV.

Other assessed resources

29A.173 Other assessed resources are estimated at \$9,601,500 and would provide for 48 posts (1 D-2, 1 D-1, 4 P-5, 15 P-3, 15 P-2/1, 1 General Service (Principal level) and 11 General Service (Other level)), as well as non-post resources. Additional details are reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2022 to 30 June 2023 ([A/76/725](#)).

Extrabudgetary resources

29A.174 Extrabudgetary resources for the component are estimated at \$496,200 and would provide for one post (P-5), as well as non-post resources. The resources would be used to support the provision of policy guidance to field operations on budget preparation, implementation, monitoring and reporting, as well as the provision of such guidance on property management and large-scale capital constructions and renovation projects. No change in the resource level is expected, compared with the estimate for 2022.

**Component 3
 Programme planning and budgeting**

29A.175 The proposed regular budget resources for 2023 amount to \$6,713,100 and reflect an increase of \$423,100 compared with the appropriation for 2022. The proposed increase is explained in paragraph 29A.145 (f). Additional details on the distribution of the proposed resources for 2023 are reflected in table 29A.54 and figure 29A.XV.

Extrabudgetary resources

29A.176 Extrabudgetary resources for the component are estimated at \$259,800 and would provide for one post (P-5), as well as non-post resources. The resources would be used to support Secretariat entities in budget preparation and presentation under the development and human rights pillars. No change in the resource level is expected, compared with the estimate for 2022.

**Subprogramme 3
Human resources**

**Component 1
Global strategy and policy**

29A.177 The proposed regular budget resources for 2023 amount to \$18,439,800 and reflect an increase of \$1,433,400 compared with the appropriation for 2022. The proposed increase is explained in paragraphs 29A.143 (c) and 29A.145 (b). Additional details on the distribution of the proposed resources for 2023 are reflected in table 29A.55 and figure 29A.XVI.

Other assessed resources

29A.178 Other assessed resources are estimated at \$3,990,400 and would provide for 16 posts (1 P-5, 9 P-4, 1 P-3 and 5 General Service (Other level)), as well as non-post resources. Additional details are reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2022 to 30 June 2023 ([A/76/725](#)).

Extrabudgetary resources

29A.179 Extrabudgetary resources for the component are estimated at \$1,699,300 and would provide for eight posts (2 P-4, 1 P-3, 2 P-2/1 and 3 Local level), as well as non-post resources. The resources would be used primarily to enable the conduct of the jointly financed local salary survey activities. No change in the resource level is expected, compared with the estimate for 2022.

**Component 2
Administrative law**

29A.180 The proposed regular budget resources for 2023 amount to \$3,745,000 and reflect a net increase of \$331,300 compared with the appropriation for 2022. The proposed net increase is explained in paragraphs 29A.143 (d), 29A.145 (c) and 29A.145 (g). Additional details on the distribution of the proposed resources for 2023 are reflected in table 29A.56 and figure 29A.XVII.

Other assessed resources

29A.181 Other assessed resources are estimated at \$6,015,600 and would provide for 27 posts (1 D-1, 3 P-5, 8 P-4, 7 P-3, 3 P-2/1 and 5 General Service (Other level)), as well as non-post resources. Additional details are reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2022 to 30 June 2023 ([A/76/725](#)).

Extrabudgetary resources

29A.182 Extrabudgetary resources for the component are estimated at \$894,000 and would provide for three posts (2 P-3 and 1 General Service (Other level)), as well as non-post resources. The resources would be used to provide assistance to victims of sexual exploitation and abuse, as well as to provide support in the area of personnel conduct and discipline. No change in the resource level is expected, compared with the estimate for 2022.

**Subprogramme 4
 Business transformation and accountability**

29A.183 The proposed regular budget resources for 2023 amount to \$5,785,100 and reflect an increase of \$113,200 compared with the appropriation for 2022. The proposed increase is explained in paragraph 29A.143 (e). Additional details on the distribution of the proposed resources for 2023 are reflected in table 29A.57 and figure 29A.XVIII.

(Number of posts/thousands of United States dollars)

Other assessed resources

29A.184 Other assessed resources are estimated at \$7,835,700 and would provide for 43 posts (3 P-5, 10 P-4, 9 P-3, 3 P-2/1, 1 General Service (Principal level) and 17 General Service (Other level)), as well as non-post resources. Additional details are reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2022 to 30 June 2023 (A/76/725).

Extrabudgetary resources

29A.185 Extrabudgetary resources for the subprogramme are estimated at \$3,286,900 and would provide for 16 posts (4 P-4, 8 P-3, 1 P-2/1, 1 General Service (Principal level) and 2 General Service (Other level)), as well as non-post resources. The resources would be used mainly to continue to carry out

support and coordination activities related to all voluntary contributions to trust funds, including Secretariat entities funded primarily through voluntary contributions, such as the United Nations resident coordinator system, the Office for the Coordination of Humanitarian Affairs, the United Nations Environment Programme, the United Nations Office on Drugs and Crime, the United Nations Human Settlements Programme (UN-Habitat) and those funded through a combination of assessed and voluntary contributions, covering areas of work such as delegation of authority, business transformation and project management, analytics, oversight coordination, enterprise risk management, results-based management, evaluation and organizational performance measurement. No change in the resource level is expected, compared with the estimate for 2022.

Programme support

- 29A.186 The Business Partner Service assists the Under-Secretary-General in the discharge of the Department’s responsibilities in the areas of human resources management, finance and general administration.
- 29A.187 The Business Partner Service serves as a business partner for the secretariats of the Advisory Committee on Administrative and Budgetary Questions, the Board of Auditors and the Independent Audit Advisory Committee in carrying out their financial, personnel and administrative responsibilities and administers the official travel of the members of the Committee for Programme and Coordination and the Committee on Contributions.
- 29A.188 The proposed regular budget resources for 2023 amount to \$1,855,900 and reflect a decrease of \$23,300 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 29A.145 (i). Additional details on the distribution of the proposed resources for 2023 are reflected in table 29A.58 and figure 29A.XIX.

Table 29A.58

Programme support: evolution of financial and post resources

(Thousands of United States dollars/number of posts)

	2021 expenditure	2022 appropriation	Changes					2023 estimate (before recosting)
			Technical adjustments	New/expanded mandates	Other	Total	Percentage	
Financial resources by main category of expenditure

Post resources by category								
Professional and higher		4	–	–	–	–	–	4
General Service and related		8	–	–	–	–	–	8
Total		12	–	–	–	–	–	12

Figure 29A.XIX
Programme support: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed resources

29A.189 Other assessed resources are estimated at \$147,600 and would provide for non-post resources. Additional details are reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2022 to 30 June 2023 ([A/76/725](#)).

Extrabudgetary resources

29A.190 Extrabudgetary resources for programme support are estimated at \$275,100 and would provide for one post (P-4), as well as non-post resources. The resources would be used to provide administrative support to departmental resources funded from programme support costs. No change in the resource level is expected, compared with the estimate for 2022.

Annex I

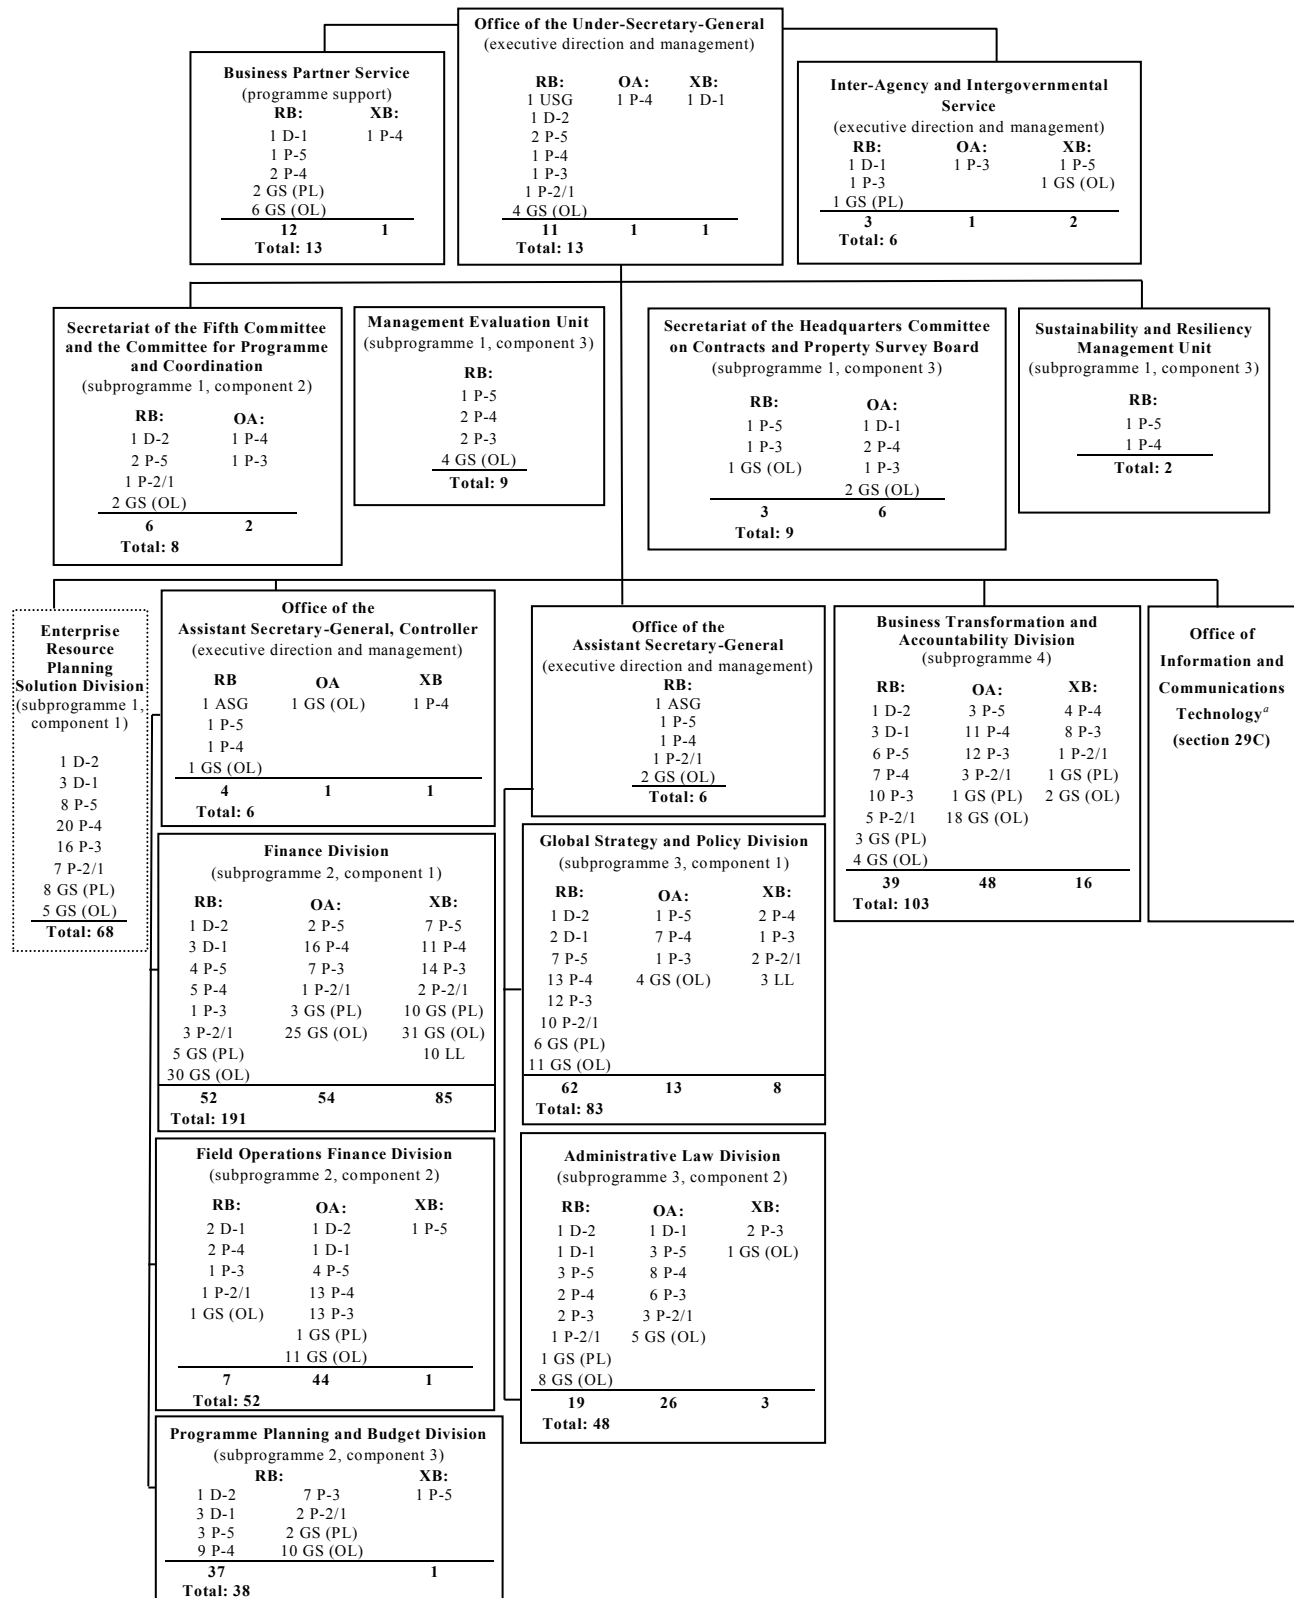

Organizational structure and post distribution for 2023

Two charts showing the organizational structure of the Department of Management Strategy, Policy and Compliance are presented below. Chart A reproduces the approved organizational structure for 2022. Chart B presents the proposed organizational structure for 2023.

Justification for the proposed changes

The proposed changes include the establishment of an Office of Diversity, Equity and Inclusion in the Office of the Under-Secretary-General for Management Strategy, Policy and Compliance. The change is proposed to ensure the long-term sustainability of efforts to attain diversity, equity and inclusion at all categories and levels of personnel and in addressing discrimination, including racism and racial discrimination. (See the revised estimates report on addressing racism and promoting dignity for all in the United Nations Secretariat ([A/76/771](#)).)

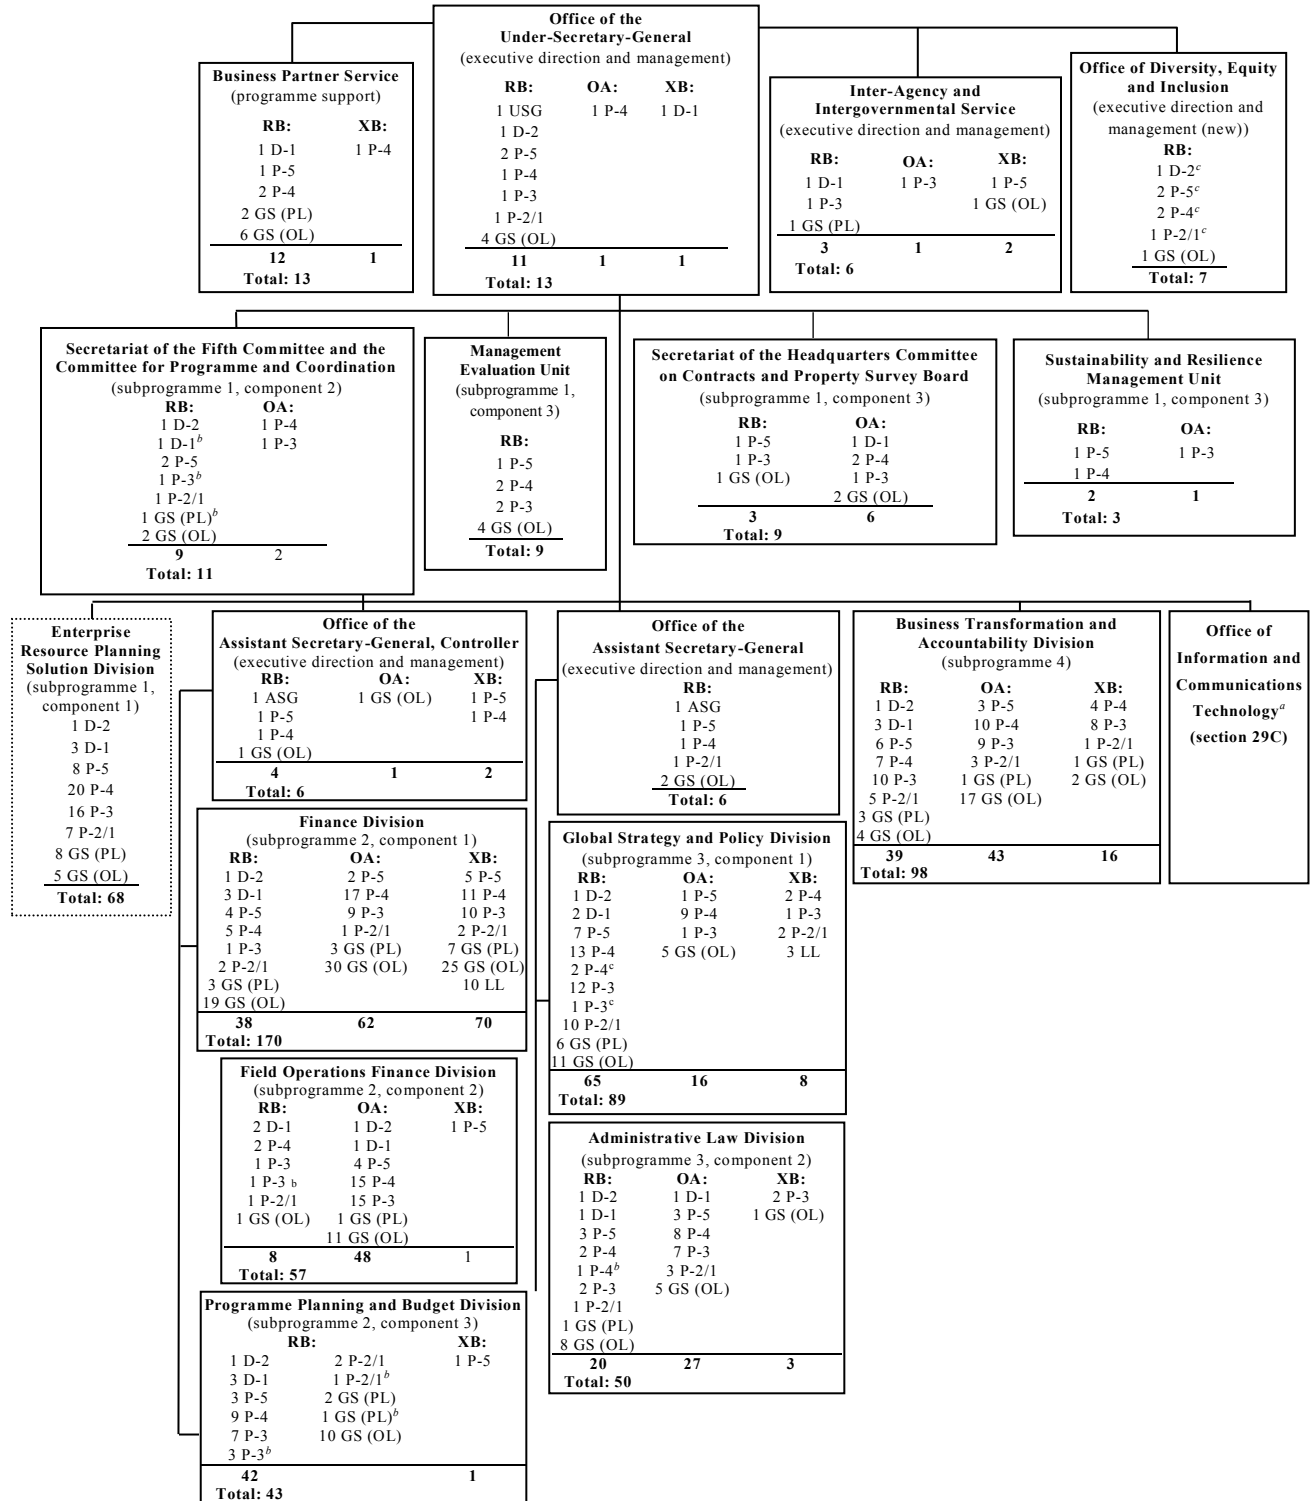

A. Approved organizational structure and post distribution for 2022

Abbreviations: ASG, Assistant-Secretary-General; GS (OL), General Service (Other level); GS (PL), General Service (Principal level); LL, local level; OA, other assessed; RB, regular budget; USG, Under-Secretary-General; XB, extrabudgetary.

^a Dual reporting to the Department of Management Strategy, Policy and Compliance and the Department of Operational Support.

B. Proposed organizational structure and post distribution for 2023

Abbreviations: ASG, Assistant-Secretary-General; GS (OL), General Service (Other level); GS (PL), General Service (Principal level); LL, Local level; OA, other assessed; RB, regular budget; USG, Under-Secretary-General; XB, extrabudgetary.

^a Dual reporting to the Department of Management Strategy, Policy and Compliance and the Department of Operational Support.

^b New post.

^c New post in 2022 as proposed in the revised estimates report (A/76/771), for consideration by the General Assembly during the second resumed part of its seventy-sixth session.

Annex II

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Executive direction and management	1	D-2	Establishment of 1 Director (D-2), 1 Senior Programme Management Officer (P-5), 1 Senior Human Resources Officer (P-5), 1 Programme Management Officer (P-4), 1 Communications Officer (P-4), 1 Associate Programme Management Officer (P-2) and 1 Management and Programme Analysis Assistant (GS (OL))	Refer to the revised estimates report on addressing racism and promoting dignity for all in the United Nations Secretariat (A/76/771).
	2	P-5		
	2	P-4		
	1	P-2		
	1	GS (OL)		
Subprogramme 3, component 1, Global strategy and policy	2	P-4	Establishment of 2 posts of Human Resources Officer (P-4) and 1 Human Resources Officer (P-3)	Refer to the revised estimates report on addressing racism and promoting dignity for all in the United Nations Secretariat (A/76/771).
Subprogramme 1, component 2, Services to the Fifth Committee of the General Assembly and to the Committee for Programme and Coordination	1	D-1	Establishment of 1 Deputy Secretary (D-1), 1 Programme Management Officer (P-3) and 1 Senior Programme Management Assistant (General Service (Principal level))	With the Fifth Committee meeting in three sessions annually, and the second part of its resumed session de facto running from May through the end of June, it is concurrent with the work of the Committee for Programme and Coordination, which has been mandated to run for five weeks in 2022, thus increasing the overlap between the two Committees and compounding the need for adequate capacity to effectively service both. Therefore, there is a need for additional capacity to service these Committees, given the workload, which includes critical pre- and post-session work. Furthermore, the Secretariat is led by a Secretary at the D-2 level, but the intensive and complex workload is such that it is no longer possible for the Secretary to effectively cover both Committees, and an officer at an appropriately senior level is required. It is therefore proposed that a new post of Deputy Secretary (D-1) be established and that the capacity of the Secretariat be increased with two posts.
	1	P-3		
	1	GS (PL)		
Subprogramme 2, component 1, Finance	(1)	P-2	Redeployment of 1 Associate Finance and Budget Officer (P-2), 2 posts of Senior Finance and Budget Assistant (General Service (Principal level)), 7 posts of Accounting Assistant (General Service (Other level)), 2 posts of Team Assistant (General Service (Other level)), 1 Administrative Assistant (General Service (Other level)) and 1 Finance Assistant (General Service (Other level))	In accordance with General Assembly resolution 72/266 B , by which the Assembly established the Department of Management Strategy, Policy and Compliance with a clear policy, strategy and compliance role and the Department of Operational Support, focused on operations, services, transactions and surge support, a review was undertaken to identify operational and transactional support functions that remained in the Department of Management Strategy, Policy and Compliance. Accordingly, it is proposed that the financial operation functions related to payroll, accounts payable and commercial insurance, along with the associated resources, be transferred from the Department of Management Strategy, Policy and Compliance to the Department of Operational Support.
(2)	GS (PL)			
(11)	GS (OL)			

Section 29A Department of Management Strategy, Policy and Compliance

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 2, component 2, Field operations finance	1	P-3	Establishment of 1 Finance and Budget Officer (P-3)	To ensure the capacity of the Field Operations Finance Division to meet the continually increasing demands by the intergovernmental and expert bodies for special political missions, as well as demands received from special political missions. Since 2020, the volume of the Division's services to the Advisory Committee on Administrative and Budgetary Questions and the Fifth Committee in support of their consideration of the budgets of special political missions has increased significantly. For example, from 2020 to 2021, the total number of written responses for the Advisory Committee increased by 64 per cent and the total number of written responses for the Fifth Committee increased by 97 per cent. This happened in tandem with a noticeably higher demand for the Division to provide fast-action and high-intensity support to field missions that face changes in their mandates or a challenging operating environment. For example, the Division supported the establishment of one new mission, the drawdown of two missions and the expansion of mandates in five missions, which required heightened capacities to deliver support with precision and good timing, to ensure that the affected missions can respond effectively to their mandates and operating contexts. The measures planned by the Division include increasing the efficiency of the budget review process through an increase in the data management capacity of the Division for special political missions. The Division aims to reduce the time needed to respond to questions received from legislative bodies on special political missions and to provide members of the legislative bodies with additional tools for easier navigation through the high number of responses provided. The additional capacity would also increase the Division's capacity to engage with members of the Fifth Committee in a more proactive way and more efficiently facilitate their decision-making process for special political missions' budgets.
Subprogramme 2, component 3, Programme planning and budget	3 1 1	P-3 P-2 GS (PL)	Establishment of 3 posts of Programme Budget Officer (P-3), 1 Associate Finance and Budget Officer (P-2) and 1 Senior Budget Assistant (General Service (Principal level))	To enhance the capacity of the Programme Planning and Budget Division to meet additional demands by the intergovernmental and expert bodies, as well as by client departments. The volume of the Division's services to the Advisory Committee on Administrative and Budgetary Questions across all services and the Policy Coordination Unit has significantly increased. For example, the total number of written responses to the Advisory Committee increased from 2,027 in 2019 to 3,470 in 2021. Those increased services to the Advisory Committee go hand in hand with an increase in requested support by client departments, on whose behalf the services are provided. Furthermore, the General Assembly, in paragraph 19 of its resolution 76/236 , requested measures to enhance and support more effective work of the Committee for Programme and

Part VIII Common support services

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 3, component 2, Administrative law	1	P-4	Establishment of 1 Legal Officer (P-4)	<p>Coordination. The measures planned by the Division include the creation of additional opportunities for early engagement of Member States in the budget preparation process, and further enhanced quality, clarity and usability of programme plans. The additional capacity would also restore full compliance with the timely issuance of budget reports to ensure the availability of the reports in all official languages, and a faster turnaround of the Committee's discussion summaries. At the same time, the cross-cutting Policy Coordination Unit has faced the need to meet additional demands of the Advisory Committee and the Fifth Committee for earlier availability of cross-cutting budgetary reports towards the end of the main session, in particular on the contingency fund and recosting, and for a faster turnaround of the figures in financing resolutions. Lastly, client departments have demanded simplified cross-cutting budget tools and improved guidance to ensure the efficiency of the budget preparation process, both for programme plans and resource requirements.</p> <p>To enhance the capacity of the Administrative Law Division to meet the increased demand of handling referrals for disciplinary action from the Office of Internal Oversight Services and heads of entities in a timely and thorough manner and to provide sound representation of the Secretary-General before the United Nations Dispute Tribunal in challenges to disciplinary-related decisions.</p>

Foreword

A year ago, I took the opportunity to highlight our efforts to successfully navigate the unprecedented challenges of the pandemic response while continuing to deliver on our commitment to operational excellence in a rapidly evolving environment.

While I remain mindful that the challenges of the coronavirus disease (COVID-19) pandemic are not fully behind us, the Department of Operational Support will, over the course of 2023, continue to focus on its transition from emergency operations to supporting our clients' evolving operational support needs. This will be marked by continuous review of the Organization's areas of focus and capacities, enabling us to effectively deliver on our mandates and prepare for future risks. This approach will be continuously underpinned by the leveraging of data analytics to measure performance and identify solutions, fostering a culture of innovation for continuous improvement.

The Department will redouble its efforts towards simplifying Secretariat-wide processes, including through improvements in recruitment, onboarding and separation processes; supply chain demand planning; cataloguing available goods and services to help clients to discover them and compare their effective costs; and enhancements to procurement and uniformed deployment and reimbursement processes; as well as client administrative support, automation of travel clearances and the phased deployment of a user-centric client relationship management platform. In addition, the Department will enhance partnership and collaboration with regional organizations and agencies, funds and programmes, as well as between various Secretariat entities, to maximize comparative advantages, seek opportunities for capacity-building and promote knowledge exchange.

The Department will continue to emphasize an inclusive working environment that considers gender equality, equitable geographic representation, disability and the inclusion of women-owned businesses, businesses from developing countries and countries with economies in transition within the Organization's supply chain. Furthermore, the Department will strive to make further progress towards environmental mainstreaming throughout its work.

(Signed) Atul **Khare**
Under-Secretary-General for Operational Support

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 29B.1 The Department of Operational Support is the operational arm of the Secretariat and the client-facing interface for operational support matters in the Secretariat's management structure, which exists to support the objective of effective mandate delivery, in partnership with Secretariat entities and other clients. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolutions [72/266 B](#) and [73/281](#). The Department delivers rapid, effective, efficient, responsible and, where required, customized enabling solutions that help partners to meet their mandates, including in the most challenging operating environments.

Strategy and external factors for 2023

- 29B.2 For 2023, the Department will support effective mandate delivery through the provision of operational support. Operational support includes advisory services, process simplification, data analytics, support for partnerships and capacity development. It will, in exceptional cases, exercise delegated authority on behalf of clients across the Secretariat.
- 29B.3 To implement the programme, the Department will work with client entities to define requirements together and co-create solutions in the areas of end-to-end supply chain management, uniformed personnel support, human resources, delivery of diverse training services, business process improvement, and medical and occupational health and safety support, as well as information and communications technology solutions through the Office of Information and Communications Technology.
- 29B.4 In addition, it will support entities within the Secretariat, such as small offices at Headquarters or in the field, that lack a dedicated executive office, an administrative unit or the capacity to meet the demands of surge requirements or other unusual circumstances. Surge requirements or other unusual circumstances include, in extremis, operational crisis response and support for other special situations, including field entity start-up or closure or other significant operational changes.
- 29B.5 Internally, the Department will continue its shift from providing direct transactional support to a stronger focus on enabling its clients through advisory and guidance functions, which will be underpinned by an improvement of tools and processes for decision-making, collaboration and reporting. The Department will proactively harness technology for better data analytics and visualization to enable faster and better support, in line with the vision of the Secretary-General's data strategy.
- 29B.6 For 2023, the Department's planned deliverables will support Member States in their ongoing management of and recovery from the coronavirus disease (COVID-19) pandemic. Such planned deliverables and activities include continued expert advice provided by the Health-Care Management and Occupational Safety and Health Division on all aspects of United Nations operations in the context of a global pandemic, including circumstances in which COVID-19 affects personnel, such as troop rotations, as well as on the use of protective equipment, diagnosis, isolation, quarantine and contact tracing and virus testing. The Division will continue to support workplace and meeting risk assessments in order to support the in-person components of the General Assembly and its committees, as well as other bodies, such as the Security Council. It will also continue to provide COVID-19 testing capability to support contact tracing for Member State delegations to the United Nations in New York.
- 29B.7 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and

best practices related to the adjustments to and adaptation of its programme owing to the COVID-19 pandemic. Examples of lessons learned and best practices include enhanced medical preparations and surveillance for pandemic risks and other foreseeable, high-impact eventualities. In this regard, subprogramme 1, component 3, of the Department will continue to collect, monitor and analyse COVID-19 statistics on United Nations civilian and uniformed personnel globally through its COVID-19 surveillance system, as well as for other infectious diseases, including Ebola, plague, meningococcal disease, cholera, yellow fever and Lassa fever. More broadly, subprogramme 4 will continue to assess the impact of post-COVID-19 changes on long-term accommodation requirements and will use the experience of the flexible workplace project to further optimize the use of office space and reduce the United Nations Headquarters lease portfolio. In addition, the Department will continuously review its tools to foster digital collaboration in the hybrid, remote and in-person environments. At the same time, the programme plan for 2023 assumes that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.

- 29B.8 With regard to cooperation with other entities at the global, regional, national and local levels, the Department will continue to coordinate, foster and strengthen mutually beneficial partnerships, including with Member States and regional organizations, such as the African Union and the European Union, including through capacity-building activities, such as the flagship triangular partnership project, knowledge exchange and functional arrangements in diverse areas of operational support, in order to achieve the scale and effectiveness needed to address complex challenges.
- 29B.9 With regard to inter-agency coordination and liaison, the Department will continue to strengthen the Secretariat-wide service delivery architecture, including country-level partnerships with United Nations agencies, funds and programmes, enhancing operational integration where feasible and providing the same services, of the same quality, to the same standards and at the same cost to the client, throughout different locations. The Department will continue to address the mutual recognition agenda and to seek collaboration opportunities and synergies in the spirit of One United Nations.
- 29B.10 With regard to the external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) Operations increasingly stabilize as pandemic risks recede, allowing the Department to focus on its strategy while applying the lessons learned from the COVID-19 response;
 - (b) Relevant United Nations and non-United Nations partners continue to cooperate, amplifying the Department's impact in supporting client needs and discharging its mandates to ensure timely and sustained delivery of operational support;
 - (c) Supply chain disruptions do not prevent vendors from being able to provide timely and high-quality responses at the right cost;
 - (d) Special situations are not greater in number or complexity than planned for and, consequently, do not draw from resources dedicated to implementation of the broader overall plan.
- 29B.11 The Department integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, activities will include camp design methodologies, improvements in the area of women's health, staffing initiatives such as the senior women talent pipeline, and advice to field entities, upon request, to enable them to meet targets related to gender equality. In order to encourage a more equitable approach to the Organization's supply chain, the Department will strengthen outreach and training for vendors, notably women-owned businesses and suppliers from developing countries and countries with economies in transition, on how to do business with the United Nations.
- 29B.12 In line with the United Nations Disability Inclusion Strategy, the Department plans to continue to upgrade the physical and digital infrastructure at Headquarters to promote inclusiveness. This will involve completing the complex-wide accessibility improvements programme for persons with

disabilities, as well as leveraging the use of digital tools and platforms that allow greater access, such as enhancements to the Knowledge Gateway.

Programme performance in 2021

Impact of the pandemic

- 29B.13 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular human resources operations. As the pandemic evolved and mitigation measures shifted, so did the Department's response. For example, the Facilities and Commercial Activities Service constantly adapted its operational plans to support the work of the Organization at United Nations Headquarters. In-person services that had previously been curtailed, such as travel, loading dock, catering and mail, were restored or rescaled to demand levels.
- 29B.14 While human resources operations and the Income Tax Unit were affected by COVID-19, both were able to adjust to the circumstances. Human resources operations adapted to accepting digital copies of documents, as well as to witnessing the signature of staff in Microsoft Teams. In the area of tax reimbursement, United States of America taxpayers were allowed to submit tax claims electronically, while claims submitted in paper format were digitalized and processed by staff members of the Unit remotely.
- 29B.15 The Human Resources Services Division provided advisory support regarding 1,578 COVID-19-related queries from client entities, including guidance on human resources issues pertaining to a return to work at United Nations premises, vaccination and managing the staffing footprint.
- 29B.16 The Archives and Records Management Section increased its capacity to provide digital access to United Nations records and archives. Given the success of the new service, as evidenced by appreciation from Member States and other clients, the Section has now mainstreamed such access and will continue to provide on-demand digitization and remote archival reference.

Legislative mandates

- 29B.17 The list below provides all mandates entrusted to the programme.

1. Fifth Committee	1	1	1	1
2. Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
3. Committee for Programme and Coordination	1	1	1	1
4. Special Committee on Peacekeeping Operations	1	1	1	1

Evaluation activities

29B.19 The following evaluations completed in 2021 have guided the proposed programme plan for 2023:

- (a) Evaluation on the amount and causes of sick leave and on the amount and causes of work-related illness and injury;
- (b) Evaluation on the number and type of contracts issued as an exception to formal methods of solicitation, with a view to identifying and implementing measures to reduce such cases;
- (c) Evaluation on the number and types of contracts that need to be extended beyond their foreseen maximum period, with a view to better planning and monitoring relevant subcategories;
- (d) Review of the archive and records management function of the Facilities and Commercial Activities Service in support of all Secretariat entities globally;

- (e) In-depth review of and evaluation on the advisory service model introduced after the establishment of the Department, in 2019, including available customer relationship management tools.
- 29B.20 The results and lessons of the evaluations and reviews referenced above have been taken into account for the proposed programme plan for 2023. For example, annual evaluation surveys conducted by the Health-Care Management and Occupational Safety and Health Division for medical personnel in field duty stations, covering a range of services that the Division provides to them, contributed to improvements to business processes and training for the upgrading of knowledge and skills required by field medical personnel. The results of the evaluation of the number and types of contracts have been used to project forward and expand the horizons of the 2023 supply chain plan. Lastly, a tiered support model for human resources advisory support, utilizing an interim client relations management platform, was introduced and continuously improved following the evaluation, which resulted in increased consistency, greater client satisfaction and improved knowledge management capabilities for clients seeking assistance. Owing to the COVID-19 pandemic, the 2021 evaluations were, for the most part, conducted as reviews rather than formal evaluations and did not cover the full scope of the initial plan because the Department was focusing on its urgent emergency response.
- 29B.21 An evaluation on the generic job opening forecasting methodology based on the analysis of roster and staffing table data is planned for 2023.

Programme of work

Subprogramme 1 Support operations

Component 1 Human resources support

Objective

- 29B.22 The objective, to which this component contributes, is to strengthen the human resources capacity of all Secretariat entities, enable improved, simplified human resources processes and offer the Organization talented and diverse staffing pools.

Strategy

- 29B.23 To contribute to the objective, the component will:
- (a) Support entities in the proper exercise of delegated authority in the area of human resources, and support dispute prevention and resolution and other entity-specific operational human resources needs by providing timely and consistent specialized advisory support and guidance to human resources business partners across the Secretariat;
 - (b) Support entities in the effective exercise of delegated authorities in human resources management through the improvement and simplification of human resources processes, tools and procedures, such as recruitment, onboarding, testing and examination services, non-staff capacities and workforce planning, through simplification, innovation, digitization and streamlining in cooperation with the Office of Human Resources and the Office of Information and Communications Technology, in line with the Organization's human resources commitments;
 - (c) Offer high-quality and diverse pools of candidates by managing rosters across all job families;
 - (d) Administer the young professionals programme.

- 29B.24 The above-mentioned work is expected to result in:
- (a) The improved capability of entities to accountably and efficiently exercise their delegated human resources authority in support of their mandates;
 - (b) Increased efficiencies and measurable reductions in delays and redundancies in operational human resources processes;
 - (c) Strengthened capacity for timely identification and recruitment of candidates and talent that are the best fit.

Programme performance in 2021

Improved workforce planning capacities across the Secretariat

- 29B.25 Operational workforce planning allows an entity to anticipate change, including emerging developments in the labour market and future workforce capabilities, and aligns human resources to maximize capacities. It identifies staffing gaps with a view to better enabling entities to have the right human capital in place to achieve their mandates.
- 29B.26 The component developed a suite of products, guidance and training to support entities in workforce planning and mainstream such planning across the Secretariat. Operational advisory support is provided directly to client entities upon request, including for the Secretary-General’s data strategy. The operational workforce planning and organizational design network was established as a forum for knowledge-sharing, capacity-building and adoption of best practices among members.
- 29B.27 Progress towards the objective is presented in the performance measure below (see table 29B.2).

Table 29B.2
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
Clients can request specialized advice on the development of their workforce plans to better position them to have the right staff to carry out tasks and activities for the delivery of their mandates	Clients benefited from improved workforce planning tools and resources, such as the staffing review toolkit, the workforce planning guide and the organizational design inventory, that enabled the realignment of resources with priorities and to anticipate future requirements	Clients optimized workforce planning by using new tools, training resources and knowledge management platforms, such as the online “Workforce planning” course, the revised workforce planning nationalization guide and the newly established operational workforce planning and organizational design network

Planned results for 2023

Result 1: reduced recruitment timelines of Secretariat entities

Programme performance in 2021 and target for 2023

- 29B.28 The component’s work contributed to the development of new recruitment tools in the online talent management platform to reduce manual workloads, with an average recruitment timeline in 2021 for the global United Nations Secretariat of 185 days, which did not meet the planned target of 125 days. The target was not met because the 2021 liquidity crisis, which affected the regular budget, caused most recruitments to be paused.
- 29B.29 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 29B.I).

Figure 29B.1
Performance measure: recruitment timelines, by selection year

(Number of days)

Result 2: improved recruitment and administration of non-staff personnel

Programme performance in 2021 and target for 2023

- 29B.30 The component’s work contributed to improved management of non-staff personnel across entities through the issuance of nine process guides, job aids and answers to frequently asked questions, which met the planned target.
- 29B.31 The component’s work also contributed to improved management of non-staff personnel through the delivery of training and capacity-building activities, including the development of a community programme and a community of practice that currently has 172 members across all entities, which met the planned target.
- 29B.32 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29B.3).

Table 29B.3
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Secretariat-wide client entities manage non-staff personnel with dedicated advisory support by one centralized focal point	<p>Clients have access to a dedicated compendium for the recruitment and administration of non-staff personnel</p> <p>Clients benefit from a dedicated focal point for the recruitment and administration of non-staff personnel and set the priorities</p>	<p>Clients that manage non-staff personnel have access to needs-based guidance packages</p> <p>Clients benefit from a dedicated community of practice that prioritizes their needs and leverages best practice</p>	<p>Clients manage non-staff personnel responsibly and efficiently with the help of specialized operational advisory support and guidance</p> <p>Client entities experience improved and simplified non-staff processes for</p>	<p>Client entities experience improved and simplified processes and systems for the recruitment and administration of non-staff personnel recruited as type II gratis personnel</p> <p>Client entities benefit from improved reporting</p>

Section 29B Department of Operational Support

	for the work programme based on their needs		consultants, contractors and interns	and statistics on the use of non-staff personnel

Result 3: improved young professionals programme

Proposed programme plan for 2023

29B.33 The component has improved the young professionals programme by modernizing the examination technology, which reduces scoring burdens and enhances controls to avoid fraudulent behaviour. Member States have benefited from access to various informational materials enabling them to conduct their own outreach and education sessions.

Lessons learned and planned change

29B.34 The lesson for the component was that the young professionals programme could benefit from a review to analyse its impact and potential areas of improvement. In applying the lesson, the component will develop a plan for enhanced communications for all stakeholders, including a focus on client-oriented process guidance and a dedicated channel through which to share information. Further enhancements in the areas of the examination process, placements, managed reassignments and career support are expected to be identified through the study in 2022.

29B.35 Expected progress towards the objective is presented in the performance measure below (see table 29B.4).

Table 29B.4
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Improved young professionals programme exams incorporated an online proctoring element to reduce the potential for fraudulent behaviour	Member States have access to a dedicated young professionals programme information session/information package	At least 50 per cent of appointed young professionals programme candidates are from unrepresented/ underrepresented countries Positive results obtained in relation to gender parity in the newly established rosters	Member States and staff benefit from the opportunity to provide input on the young professionals programme study	Member States and candidates benefit from the implementation of improvements suggested in the study in areas such as talent outreach, the examination process, placements, reassignments and career support Stakeholders to benefit from improved communications and guidance

Deliverables

29B.36 Table 29B.5 lists all deliverables of the component.

Table 29B.5

Subprogramme 1, component 1: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory

E. Enabling deliverables

Administration: advice and guidance in response to service requests emanating from entities across the Secretariat on all human resources issues, including escalation to the Department of Management Strategy, Policy and Compliance regarding authoritative policy interpretation, when necessary; advice, upon request, on entities attaining targets related to gender equality; examinations and tests, including the competitive examination for language positions, the young professionals programme, the Global General Service Test and the language proficiency examination for approximately 6,000 candidates; placement of approximately 60 young professionals programme roster candidates and the reassignment of young professional staff members after their initial two years of service; up to 40 centralized generic job openings across 23 job families to populate rosters; workforce planning and organizational design sessions; guidance packages on workforce planning, organizational design and roster management to facilitate the human resources planning process for all Secretariat entities; tools in the Inspira talent management platform in support of Secretariat entities; change management initiatives to support ongoing implementation and adoption of business process functionalities in the recruitment module of the Inspira talent management system; official status files in digital format for the efficient administration of peacekeeping personnel and in support of the initiative to establish a Secretariat-wide personnel records management system; a new client relationship management system for human resources; enhanced Umoja functionalities in support of human resources processes globally.

**Component 2
Capacity development and operational training**

Objective

29B.37 The objective, to which this component contributes, is to ensure that all Secretariat entities have the operational capacities necessary to effectively deliver on the mandates entrusted to them.

Strategy

29B.38 To contribute to the objective, the component will:

- (a) Develop and deliver diverse training and capacity development services in partnership with various offices of the Secretariat focused on operational needs, as well as enhance knowledge management and strengthen the effectiveness of operational capacities through support for standardization and process improvement initiatives, incorporating linguistically diverse delivery modalities, where possible;
- (b) Develop and deliver training programmes on various operational areas, systems and processes, including governance improvement, administration, support areas and Umoja, with an emphasis on the eLearning mode of delivery and change management techniques, where deemed appropriate;
- (c) Expand the range and content of training programmes and learning resources to improve multilingualism;
- (d) Develop new online learning initiatives, with various eLearning, remote delivery and blended course design possibilities to gradually replace instructor-led classroom delivery, where suitable.

29B.39 The above-mentioned work is expected to result in:

- (a) Stronger organizational governance by senior leadership teams, as well as better trained and empowered staff to support operational decision-making, resource management and improvement of operational processes;

- (b) Knowledge management and learning management platforms reaching the widest possible spectrum of day-to-day practitioners across the Secretariat, as well as the strengthening of awareness and competence with regard to resource stewardship and other operational responsibilities;
- (c) Greater linguistic proficiency and diversity and improved communication capacities across the Secretariat in support of multilingualism.

Programme performance in 2021

“Think and act like a project manager” course

- 29B.40 The component developed a new self-paced course, entitled “Think and act like a project manager”, available to all United Nations staff. The need for the training arose from discussions, in the context of the process improvement advisory group and the newly formed business process improvement focal point network, to develop a customized programme and reduce reliance on costly external courses. The course is aimed at assisting staff in delivering business improvement and other projects with relevant stakeholders in multiple components or steps and within defined budget and timelines. It is useful to staff looking to refresh or update their knowledge of how to manage United Nations projects more effectively. The course may be taken in full or in part, given that some staff may be interested in specific components that are relevant to their area of work.
- 29B.41 Progress towards the objective is presented in the performance measure below (see figure 29B.II).

Figure 29B.II
Performance measure: staff enrolled in and certified through the United Nations project management course

Planned results for 2023

Result 1: further trend towards eLearning courses

Programme performance in 2021 and target for 2023

- 29B.42 The component’s work contributed to the implementation of the decentralized delegation of authority implemented under the management reform, with a particular focus on officials delegated with certifying authority, with a cumulative 1,831 staff enrolled and 872 staff passing the “Resource management for certifying officers” course, which met the planned target of 1,200 staff enrolled and 870 staff passing.

29B.43 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 29B.III).

Figure 29B.III
Performance measure: number of United Nations staff enrolled and number of staff passing the “Resource management for certifying officers” course (cumulative)

Result 2: integration of Umoja training

Programme performance in 2021 and target for 2023

29B.44 The component’s work contributed to improved staff knowledge and expertise in performing Umoja operations thanks to the establishment of a network of business process experts and mentors for the human resources area and the design of a new, 11-module eCertification programme for human resources partners that led to the reduction of the overall number of user support requests in the human resources functional area to 2,288, which exceeded the planned target of 2,300.

29B.45 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 29B.IV).

Figure 29B.IV
Performance measure: number of human resources service requests in Umoja (annual)

Result 3: enhanced language and communication skills of United Nations personnel

Proposed programme plan for 2023

29B.46 The component undertook significant work to ensure consistency in language acquisition by establishing learning targets aligned with the United Nations Language Framework. The language proficiency examination is aligned with the Framework and delivered fully online. Training formats have been updated for more agility, and United Nations-specific texts and communicative contexts have been integrated.

Lessons learned and planned change

29B.47 The lesson for the component was that aligning language courses with United Nations Language Framework benchmarks allows for the planning and structuring of language learning skills development that is specific to the United Nations need to utilize multiple languages to build trust and achieve an impact. Content and structural improvements made to the language proficiency examination situate it as a rigorous, high-profile, internal certification. In applying the lesson, the component will ensure that learning and evaluating languages are planned against stages of proficiency – the United Nations levels – so that any target language becomes a new tool through which to communicate, from the early stages of the learning path.

29B.48 Expected progress towards the objective is presented in the performance measure below (see table 29B.6).

Table 29B.6
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	New hybrid and online learning formats available Alignment of pre-existing courses on the six official United Nations languages with the United Nations Language Framework initiated	Variety of hybrid and online learning formats available to users Partial alignment of pre-existing courses with the United Nations Language Framework	Further United Nations Language Framework coverage, including new topics, such as cross-cultural communication and the use of gender-inclusive language, available to users Self-paced train-the-trainer learning content to support learning focal points leading United Nations language programmes	Additional self-study and self-assessment tools available to all United Nations Secretariat staff, permanent mission personnel and eligible participants in language courses

Deliverables

29B.49 Table 29B.7 lists all deliverables of the component.

Table 29B.7

Subprogramme 1, component 2: deliverables for the period 2021–2023, by category and subcategory*Category and subcategory***E. Enabling deliverables**

Administration: in-person, online and blended capacity development programmes and initiatives; in-person and virtual governance improvement programme for approximately 50 senior leadership staff annually from eight United Nations Secretariat entities; instructor-led and self-paced language and communication training on all six official United Nations languages, including direct provision at United Nations Headquarters and other duty stations, with approximately 4,600 registrations in about 370 initiatives and additional promotion of comparable online language learning licences in 14 Secretariat entities for 1,000 staff members; training on the use of updated and simplified enterprise system workflows (such as Inspira and Umoja) and business process improvement; best practices to simplify and harmonize operational processes, including through expanded guidance through the Knowledge Gateway; enhancements for the access of persons with disabilities.

Component 3

Health-care management and occupational safety and health

Objective

- 29B.50 The objective, to which this component contributes, is to ensure the health and well-being of the United Nations workforce.

Strategy

- 29B.51 To contribute to the objective, the component will:
- (a) Undertake detailed credentialing of United Nations health-care personnel and implement systems that ensure the appropriate qualifications and skills of health-care personnel who deploy to the field;
 - (b) Provide leadership, policy advice and technical support to the medical workforce of the United Nations system, including field missions (Secretariat and troop- and police-contributing country facilities) and United Nations clinics administered by the United Nations Development Programme (UNDP);
 - (c) Implement health-care quality and patient safety standards at all United Nations health-care facilities above level 1+ by assessing such facilities, training medical officers in assessment methodologies and reviewing data from the hospital evaluation tool;
 - (d) Further implement a clinical adverse event reporting system to support data collection for surveillance and the reporting of risks, adverse events and other indicators of harm at various levels of health services in order to provide safer health care and promote a culture of safety at all level 1+ and above health-care facilities prior to the implementation of such a system;
 - (e) Review, develop and promote programmes and policies resulting from a disease surveillance system to reduce the burden of infectious disease among United Nations personnel worldwide, as well as develop evidence-based chronic disease prevention and health promotion programmes for implementation by United Nations medical services globally;
 - (f) Implement an occupational safety and health management system for United Nations Secretariat entities, including support for an oversight body, development of policy and standards, creation of an incident reporting system and a monitoring and evaluation system, and capacity-building and training;
 - (g) Undertake medical administrative services to directly supported entities, including for onboarding-related medical clearances, travel-related medical clearances, sick leave, medical

evacuation, disability assessments, workers' compensation, special dependency and special education grants, workplace accommodations and other related medical entitlements;

- (h) Implement modernized business processes, including for the collection of medical entitlements through direct entry into the electronic medical record system, the improved capture of the cause of the first 20 days of sickness absences and the integration of systems covering incidents, sickness absences, work-related medical evacuations and service-incurred compensation;
- (i) Maintain awareness of developments in public health and the clinical management of COVID-19 and provide expert advice on all aspects of United Nations operations in the context of a global pandemic. This includes circumstances in which COVID-19 affects Member State programmes or personnel (such as troop rotations), the use of protective equipment, diagnosis, isolation, quarantine and contact tracing and virus testing. The activities include written guidance, virtual reviews of relevant sites and the provision of new services and equipment. To keep abreast of worldwide threats to public health, options for simplified surveillance and collection of health data will be explored;
- (j) Undertake a COVID-19-specific assessment of the capabilities of the medical workforce, its training and the clinics and hospitals that support United Nations personnel;
- (k) Undertake workplace and meeting risk assessments at United Nations Headquarters in New York, where necessary, to support the in-person components of the General Assembly and its committees, as well as other bodies, such as the Security Council, including through a developed risk self-assessment methodology and related guidance for Member States to simplify parallel requests for risk assessments for multiple meetings. The component will also provide COVID-19 testing capability to support contact tracing for Member State delegations to the United Nations in New York and United Nations staff, where necessary.

29B.52 The above-mentioned work is expected to result in:

- (a) A reduced number of adverse events and preventable harm through an improvement in the quality of health-care services delivered at United Nations operations worldwide in the areas of women's health, mental health (in support of the United Nations System Mental Health and Well-being Strategy) and emergency response;
- (b) A reduction in adverse events and preventable harm by enhancing the health and well-being of personnel, thereby contributing to reduced absenteeism and improved productivity in the workplace and resulting reduced financial impact on the Organization;
- (c) The mitigation of occupational health and safety risks;
- (d) The improved compliance of field and referral hospitals with United Nations health-care quality and patient safety standards that meet the needs of United Nations health-care professionals and staff and established indicators and systems for evaluation, as well as the monitoring of health-care quality and patient safety within the governance and accountability framework and a reduction in preventable harm;
- (e) The improved clinical management of COVID-19 cases in United Nations health-care facilities, improved compliance with public health and occupational health measures to reduce the risk of COVID-19 among United Nations personnel and improved responsiveness to COVID-19-related health-care workforce and policy needs.

Programme performance in 2021

Reduction in COVID-19 case fatality rates among United Nations personnel

29B.53 In 2021, the component allocated resources to reduce morbidity and mortality resulting from the COVID-19 pandemic. In 2021, there was a significant decrease in the number of deaths among the total number of COVID-19 cases (i.e. the case fatality rate) in all United Nations personnel globally.

29B.54 The COVID-19 fatality rate decreased, from 1.07 per cent in 2020 to 0.54 per cent in 2021, among all United Nations personnel, including United Nations agencies, funds and programmes. While the reduction was influenced by a number of factors, it was also attributable to the implementation of enhanced public health prevention measures, including improved hygiene and mask-wearing. The component changed the focus of its programme of work to COVID-19 response while maintaining critical business processes, such as entitlement administration, and COVID-19 medical evacuations organized in the context of the first line of defence mechanism. The efforts were supported by ad hoc surge capacity measures, which contributed to the improvement of clinical care standards for COVID-19 patients, and the timely collection of COVID-19-related data from the field, which allowed for early interventions, such as frequent outbreak management meetings with field duty stations, where needed. At Headquarters, management support allowed the component to engage regularly and on an ad hoc basis with Organization senior leadership on COVID-19 response issues and data updates which enabled the Organization to take policy decisions.

29B.55 Progress towards the objective is presented in the performance measure below (see figure 29B.V).

Figure 29B.V

Performance measure: COVID-19 case fatality rate among United Nations personnel

(Percentage)

Planned results for 2023

Result 1: high-quality health care through ensuring a competent medical workforce

Programme performance in 2021 and target for 2023

29B.56 The component's work contributed to the process of credentialing the medical workforce deployed to field duty stations, including United Nations staff members, United Nations Volunteers, private providers and United Nations examining physicians, with a total of 2,558 technical clearances and credentials undertaken for health-care workers, which did not meet the planned target of 3,345. The target was not met owing mainly to the closing of the African Union-United Nations Hybrid Operation in Darfur.

29B.57 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 29B.VI).

Figure 29B.VI
Performance measure: number of health-care workers credentialed (cumulative)

Result 2: occupational safety and health incident-reporting system linking workplace incidents with related health data

Programme performance in 2021 and target for 2023

29B.58 The component’s work contributed to the verification and completion of mitigation measures for 75 workplace incidents, which did not meet the planned target of 100. The target was not met owing mainly to the reprioritization of personnel resources to respond to the COVID-19 pandemic.

29B.59 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 29B.VII).

Figure 29B.VII
Performance measure: number of actionable mitigation measures completed and verified per year (annual)

Result 3: health-care quality and patient safety standards implemented in health-care facilities above level 1 in field missions for enhanced patient safety

Proposed programme plan for 2023

29B.60 The component continues to contribute to the objective by further developing the eLearning platform for training health-care personnel on the implementation of health-care quality and patient safety standards. In addition, the component develops evidence-based clinical pathways on medical conditions as tools used to guide evidence-based health care, translating clinical practice guidelines into clinical care processes within the unique environment of a health-care institution.

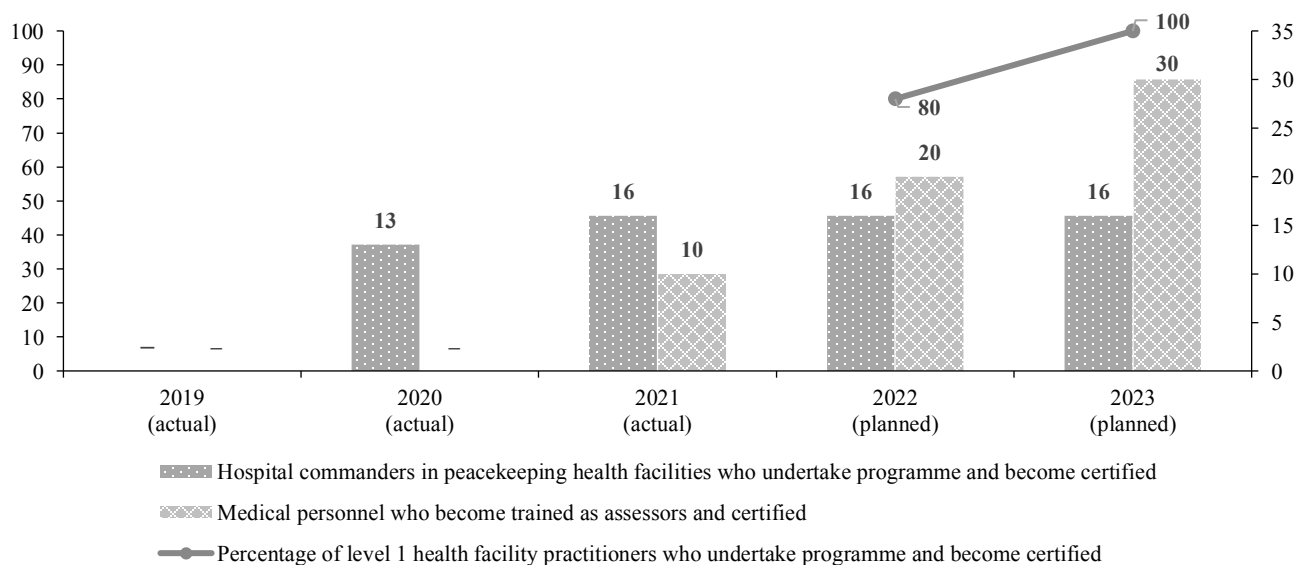

Lessons learned and planned change

29B.61 The lesson for the component was that, prior to the implementation of a clinical adverse event reporting system, a culture of safety must be established at all level 1+ and above health-care facilities. In applying the lesson, the component will conduct safety surveys at level 1+ and above facilities to measure the attitudes and behaviours of personnel towards patient safety. The purpose will be to identify areas of improvement of quality and areas adversely affecting patient safety, as well as to bridge gaps through training and certification. Furthermore, the component will undertake clinical audits of the health facilities of the United Nations and troop-contributing countries and will conduct root cause analysis of clinical errors. The activities are expected to result in: (a) the certification of 100 per cent of the 16 hospital commanders in peacekeeping health facilities; (b) the certification of 100 per cent of level 1 health facility practitioners; and (c) 30 medical personnel becoming certified assessors in the areas of health-care quality and patient safety standards. A culture of safety will contribute to a decrease in hospital mortality and patient harm.

29B.62 Expected progress towards the objective is presented in the performance measure below (see figure 29B.VIII).

Figure 29B.VIII

Performance measure: increased knowledge of medical personnel, hospital commanders and level 1 health facility practitioners of health-care quality and patient safety

Deliverables

29B.63 Table 29B.8 lists all deliverables of the component.

Table 29B.8

Subprogramme 1, component 3: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory

E. Enabling deliverables

Occupational safety, health and well-being: credentialing process for health-care personnel in compliance with the standard operating procedures and the technical skills framework; delegation of authority to chief medical officers and UNDP health managers for the credentialing of health-care personnel; on-line learning platform on women’s health to upgrade the knowledge and skills of the United Nations medical workforce; psychosocial services, including mental health services; medical clearance of 3,200 personnel for recruitment and travel, and immunization of about 3,300 personnel annually; guidance on global occupational health and safety services; audit reports on incident investigations performed by duty stations within the field safety programme; occupational health and safety policy and standards; audit reports on 20 field medical evacuations; audit reports on 20 long-term sick leave cases in 20 field duty stations; health support plans for field duty stations and field missions, on request; assessment of three field hospitals for compliance with health-care quality and patient safety standards; training of 30 medical personnel in those standards; clinical governance of field health-care facilities; patient experience surveys to improve the quality of care in health-care facilities; monthly educational webinar sessions for medical personnel; training of 60 persons on occupational health and safety issues; organization of field occupational safety training course; comprehensive guidance for public health emergencies; assessment recommendations of emergency preparedness, including for mass casualty events, to identify capability gaps.

Administration: initiatives emerging from the requests of supported entities.

**Subprogramme 2
Supply chain management**

**Component 1
Integrated supply chain management**

Objective

29B.64 The objective, to which this component contributes, is to ensure the availability of the right goods and services at the right place, the right time and the right costs for effective and efficient mandate implementation by United Nations Secretariat client entities.

Strategy

29B.65 To contribute to the objective, the component will:

- (a) Develop a longer-term strategy that better aligns the Secretariat’s end-to-end supply chain with the 2030 Agenda for Sustainable Development and expand the supply chain planning horizon to cover five years in support of the strategy;
- (b) Identify and ensure the availability of appropriate sourcing options and solutions, integrating practices that are client-centric, effective, innovative, responsible, efficient and gender-sensitive;
- (c) Intensify outreach efforts, including through targeted outreach to Member States and by further strengthening the use of business seminars, in particular for women-owned businesses, persons with disabilities and vendors from developing countries and countries with economies in transition;
- (d) Continue to implement category management strategies, an industry standard practice with a strategic approach to sourcing solutions by organizing the acquisition of related goods and services into discrete groups by area of spending, supply markets and fulfilment of client needs;

- (e) Maintain the list of strategic goods and services sourced through Headquarters to improve risk management in procurement, economies of scale and standardization;
 - (f) Continue to support all entities with timely and effective sourcing and delivery of goods and services to enable these entities to deliver on their mandates, including in the context of the COVID-19 pandemic.
- 29B.66 The above-mentioned work is expected to result in:
- (a) Improved alignment of the capability of suppliers with the needs of clients and the availability of the right goods and services at the right time, while taking into consideration their whole-life cost;
 - (b) Improved visibility of global requirements and improved guidance for client entities on cost-effective and efficient sourcing and delivery solutions, such as global/regional systems contracts, local procurement, letters of assist or memorandums of understanding, or the leveraging of existing stock maintained in strategic deployment stocks or United Nations reserves or surplus from other entities, thereby avoiding the cost and time of additional procurement;
 - (c) Optimal sourcing solutions for client entities to satisfy client demand in the most efficient and effective manner, including the avoidance of risk to the Organization's reputation in sensitive areas, such as arms and ammunition and life-saving drugs, including blood and blood-related products, and the standardization of goods and services on the basis of multiple clients' requirements;
 - (d) A more diversified vendor roster for various categories of goods and services, facilitating more inclusive and effective international competition;
 - (e) The availability of an adequate supply of vaccines, medical equipment and supplies, and transportation services to support the activities of clients.

Programme performance in 2021

United Nations personnel safe to stay and deliver during the COVID-19 pandemic through access to vaccines

- 29B.67 The component established a COVID-19 vaccination programme that has brought together 32 United Nations system entities to support their staff, dependants and partners. At the beginning of 2021, the first vaccines received emergency use listing by the World Health Organization for protection against severe illness and death from COVID-19. The organization required a similar mechanism by the United Nations System-Wide Task Force on Medical Evacuations in Response to COVID-19 to coordinate the sourcing, distribution and administration of vaccines to United Nations personnel in locations where national vaccination programmes were unable to assist. The component leveraged the resident coordinator network, the component's procurement and logistics expertise and the United Nations Medical Directors' Network to source, transport and administer vaccines to United Nations country teams throughout the world. The component established standby contracts for the provision of vaccination teams where needed to support the efforts of the United Nations country teams. By December 2021, the component had distributed more than 350,000 vaccine doses to uniformed and civilian United Nations personnel in 69 countries, together with the associated consumables.
- 29B.68 Progress towards the objective is presented in the performance measure below (see table 29B.9).

Table 29B.9
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	–	Distribution of 350,000 vaccine doses to 69 countries Administration of 153,453 doses of vaccine to United Nations personnel (including uniformed personnel, troops and police)

Planned results for 2023

Result 1: improved planning with long-term forecasting enabled by Umoja and a systematic approach to enhance outreach efforts for United Nations procurement in developing countries and countries with economies in transition

Programme performance in 2021 and target for 2023

- 29B.69 The component’s work contributed to the analysis of clients’ requirements through the supply chain plan (formerly the global demand and acquisition plan), which is based on consumption and demand forecasting, determining options for optimum sourcing from existing reserve/stock and determining the requirements of new contracts, which met the planned target.
- 29B.70 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29B.10).

Table 29B.10
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Refinement of the global demand and acquisition plan with potential improvement in organizational efficiencies through possible shifting from new procurement to existing sourcing	Global demand and acquisition plan enabled by Umoja Extension 2 to provide improved data visibility and sourcing options for the timely delivery of goods and services at a competitive cost	Global demand and acquisition plan, which is now called the “yearly global supply chain plan”, has been issued with forecasted demand of client entities with optimum sourcing solution	Better forecasting capability, allowing for the utilization of cost-effective sources by client entities for the timely availability of the right goods and services required by clients	Improved demand forecasting of client entities and expanded supply chain planning to cover a five-year horizon

Result 2: automation and modernization of the supply chain

Programme performance in 2021 and target for 2023

- 29B.71 The component’s work contributed to a reduction in the posting period for requests for quotation and expedited actions in processing requirements during the COVID-19 pandemic, resulting in average solicitation timelines of 39 days, which exceeded the planned target of 53 days.
- 29B.72 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 29B.IX).

Figure 29B.IX
Performance measure: solicitation timelines for requests for quotations

(Number of days)

Result 3: enhanced competition in United Nations procurement through a focus on vendors from developing countries and countries with economies in transition

Proposed programme plan for 2023

- 29B.73 To diversify its vendor base, the component focused on encouraging the participation of vendors from developing countries and countries with economies in transition in procurement activities through business seminars and virtual tender openings, promoting multilingualism by allowing vendors to submit documents in all six United Nations official languages. All chief procurement officers were required to invite into tenders vendors that had attended trainings organized by the Office of Supply Chain Management and had registered at the basic level. Lastly, the component partnered with a global non-governmental organization and the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) to encourage the participation of women-owned businesses.

Lessons learned and planned change

- 29B.74 The lesson for the component was that, while the supply chain may be subject to unplanned challenges, they can be mitigated efficiently by planning at an early stage, conducting impact analyses and ensuring the concerted efforts of all concerned entities through the centralization of certain functions. In applying the lesson, the component will strengthen its planning framework, including through scenario planning, to improve its qualitative forecasting capability, which will enhance the agility of response to unforeseen events. The component will reinstate the programme board to ensure a well-coordinated response, invest in information technology enablers, such as smart warehousing and data analytics, for performance management and continue to explore innovative solutions, such as logistics drones. It will also conceptualize new trainings to further build vendors' capacity to do business with the United Nations.

- 29B.75 Expected progress towards the objective is presented in the performance measure below (see table 29B.11).

Table 29B.11
Performance measure

–	–	The awareness of vendors from developing countries and countries with economies in transition is increased regarding options for collaboration on procurement with the United Nations	The awareness of vendors from developing countries and countries with economies in transition is increased regarding options for collaboration on procurement with the United Nations, including through multilingual vendor registration	The awareness of vendors from developing countries and countries with economies in transition is increased regarding options for collaboration on procurement with the United Nations, including through multilingual vendor registration and training on how to do business with the Organization

Deliverables

29B.76 Table 29B.12 lists all deliverables of the component.

Table 29B.12
Subprogramme 2, component 1: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	–	1
1. Report of the Secretary-General on supply chain activities, submitted to the General Assembly (biennial report) ^{a,b}	1	1	–	1
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	46	33	46	33
2. Seminars on how to do business with the United Nations for suppliers from developing countries and countries with economies in transition	46	33	46	33
C. Substantive deliverables				
Consultation, advice and advocacy: advice on about 100 local procurement authority requests annually from client entities.				
D. Communication deliverables				
Outreach programmes, special events and information materials: briefings for six international partners annually, including Member States, on functional arrangements within areas of logistical cooperation in all field missions, system-wide cooperation on business operation projects and procurement cases with the United Nations entities procurement network.				
Digital platforms and multimedia content: e-catalogue for all goods and services; supply chain performance management framework; business intelligence reports for all functions in the Secretariat-wide supply chain, including on supply chain performance; dedicated virtual space to encourage innovation and excellence in supply chain management; annual update of Secretariat procurement statistics on the Procurement Division website.				

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

E. Enabling deliverables

Administration: advisory services on procurement matters for staff and 44 client entities, including on optimal acquisition plans, sourcing solutions, systems contracts, procurement modalities and other supply chain matters; category management and planning approach for the end-to-end supply chain, including through the issuance of standard operating procedures and the yearly supply chain planning guidance, online sourcing support service community of practice and category-specific communities of practice, such as fuel and rations; system contracts; annual supply chain plan and strategic sourcing; operationalized mutual recognition, in line with the promulgated supply chain operational guidance on cooperation with United Nations organizations; collaborative contracts, such as for a fleet management vehicle-tracking system; 100 global systems contracts, 30 turnkey contracts, air transportation service contracts (95 commercial and 30 military) and other contracts; vendors registered in the six official United Nations languages; deployment and rotation cycles and solutions sourced for uniformed personnel and associated cargo by air, naval and ground transport modalities; strategic-level support within the logistics specialist areas; United Nations-wide aviation regulatory framework; aviation safety assessments, including of air service vendors; operational guidance, manuals and best practices on supply chain management; e-tendering platform; online contracts catalogue for global, regional and local system and turnkey contracts; Umoja master data management and data quality measures; electronic fuel management system data quality; new contracts for energy-efficient solutions.

^a Formerly the report of the Secretary-General on procurement activities.

^b The table contained in [A/76/6 \(Sect. 29B\)](#) contained a typographical error, which has been rectified here.

Component 2

Uniformed capabilities support

Objective

29B.77 The objective, to which this component contributes, is to ensure the efficient and effective functioning of the peace and security pillar of the United Nations.

Strategy

29B.78 To contribute to the objective, the component will:

- (a) Serve as the single point of contact for troop- and police-contributing countries for all administrative and logistical issues related to force generation, memorandums of understanding, contingent-owned equipment and reimbursement;
- (b) Support the periodic review by the General Assembly of the reimbursement framework associated with uniformed capabilities deployed in formed units, support the negotiation and finalization of memorandums of understanding with troop- and police-contributing countries, expeditiously process applicable reimbursements in line with the decisions of the Assembly and facilitate the strategic integration of relevant performance data related to deployed contingent-owned equipment;
- (c) Provide a streamlined reimbursement process involving enhanced memorandum of understanding and payment processes, which is expected to result in increased transparency and accountability and the real-time availability of data to Member States, Headquarters and field missions;
- (d) Provide strategic and operational support and foster enhanced partnerships with troop- and police-contributing countries.

29B.79 The above-mentioned work is expected to result in:

- (a) Servicing of the General Assembly during the periodic review of the reimbursement framework for formed units and the implementation of all derivative guidance;

- (b) Streamlined and timely payments to troop- and police-contributing countries for uniformed personnel and contingent-owned equipment deployed in formed units, letter-of-assist reimbursements, death and disability claims and ad hoc claims.

Programme performance in 2021

Periodic review of the reimbursement framework for formed units

- 29B.80 The General Assembly periodically reviews the standards and rates of reimbursement to uniformed personnel. As established in previous Assembly resolutions, the quadrennial survey informs the rate of reimbursement to uniformed personnel deployed in formed units (resolution [67/261](#)).
- 29B.81 The component has completed the 2021/22 quadrennial survey to inform the rate of reimbursement to uniformed personnel deployed in formed units. The survey was conducted in 2021, and the associated report of the Secretary-General is expected to be taken up by the General Assembly in 2022.
- 29B.82 Progress towards the objective is presented in the performance measure below (see table 29B.13).

Table 29B.13

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
–	The General Assembly adopted the standards and rates of reimbursement for contingent-owned equipment on the basis of the 48 recommendations of the 2020 Working Group on Contingent-Owned Equipment	Survey on standard rate of reimbursement to uniformed personnel deployed in formed units received by the General Assembly

Planned results for 2023

Result 1: single point of contact in the areas of administrative, logistical and financial support for troop- and police-contributing countries for faster reimbursement

Programme performance in 2021 and target for 2023

- 29B.83 The component's work contributed to troop- and police-contributing countries having a single contact point within the Secretariat for administrative and logistical aspects related to formed units, with 5,278 contingent-owned equipment reimbursement claims certified within the mandated three months following the end of the preceding quarter, which exceeded the planned target of 5,000.
- 29B.84 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 29B.X).

Figure 29B.X
Performance measure: number of contingent-owned equipment reimbursement claims certified within the mandated three months following the end of the preceding quarter (annual)

Result 2: a sustainable and appropriate approach to post-traumatic stress disorder claims within the death and disability framework for uniformed personnel

Programme performance in 2021 and target for 2023

29B.85 The component’s work contributed to a study that provided a holistic analysis of the policy, legal, administrative and financial aspects of post-traumatic stress disorder, as mandated by the General Assembly in its resolution [74/280](#), which met the planned target of reimbursement of post-traumatic stress disorder claims for closed field missions examined by the advisory board.

29B.86 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29B.14).

Table 29B.14
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
304 claims related to cases of post-traumatic stress disorder pending from closed missions	In its resolution 74/280 , the General Assembly called for a comprehensive study on post-traumatic stress disorder Advisory board on post-traumatic stress disorder claims established with Member States and subject matter experts	Post-traumatic stress disorder study and report of the Secretary-General based on data collection, interviews and a scientific literature review prepared by advisory board and submitted to General Assembly	The General Assembly considers the comprehensive study on the reimbursement of post-traumatic stress disorder claims for closed field missions Reduction of pending post-traumatic stress disorder claims submitted for closed field missions	The General Assembly decides on the post-traumatic stress disorder framework

Result 3: contingent-owned equipment policies, procedures, standards and definitions considered**Proposed programme plan for 2023**

- 29B.87 In accordance with General Assembly resolution [67/261](#), the quadrennial survey informs the periodic consideration of the standard rate of reimbursement.
- 29B.88 In line with General Assembly resolutions [50/222](#) and [74/279](#), the component initiated preparations for the 2023 meeting of the Working Group on Contingent-Owned Equipment, including providing guidance and briefings to Member States and Secretariat focal points.

Lessons learned and planned change

- 29B.89 The lesson for the component was that, in order to address issues related to force generation, memorandums of understanding, contingent-owned equipment and reimbursement, it needed to strengthen a single point of contact for troop- and police-contributing countries on all administrative and logistical matters. In applying the lesson, the component will streamline the payment process regarding troop- and police-contributing countries to ensure that payments are issued in a timely manner and will ensure that updated standards and reimbursement rates for contingency-owned equipment are easily accessible to all users through a single point of contact.
- 29B.90 Expected progress towards the objective is presented in the performance measure below (see table 29B.15).

Table 29B.15
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Pre-sessional meeting of the 2020 Working Group on Contingent-Owned Equipment elected its bureau and agreed on the agenda	Standards and rates of reimbursement for contingent-owned equipment were updated through 48 recommendations of the 2020 Working Group on Contingent-Owned Equipment	Member States provided instructions on preparing issue papers and national cost data submissions	Pre-sessional bureau of the 2023 meeting of the Working Group on Contingent-Owned Equipment is held	Standards and rates of reimbursement for contingent-owned equipment updated on the basis of the recommendations of the 2023 Working Group on Contingent-Owned Equipment

Deliverables

- 29B.91 Table 29B.16 lists all deliverables of the component.

Table 29B.16
Subprogramme 2, component 2: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	–	–	1	2
Reports of the:				
1. 2023 Working Group on Contingent-Owned Equipment	–	–	–	1
2. Secretary-General on the 2023 Working Group on Contingent-Owned Equipment	–	–	–	1

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
3. Secretary-General on the results of the survey to support the review of the standard rate of reimbursement to troop- and police-contributing countries	–	–	1	–
Substantive services for meetings (number of three-hour meetings)	4	4	5	5
4. Meeting of intergovernmental bodies, including the Fifth Committee and the Working Group on Contingent-Owned Equipment ^a	4	4	5	5
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	10	12	20	10
5. Training events on the various aspects of memorandums of understanding and contingent-owned equipment policies and procedures, as well as death and disability compensation claims (for Member States)	10	12	20	10
E. Enabling deliverables				
Administration: reimbursement framework for formed units, triennial meetings of the Working Group on Contingent-Owned Equipment and other decisions of the General Assembly; training sessions for Secretariat entities and all field missions with formed units on the reimbursement framework; new and amended Statements of Unit Requirements, memorandums of understanding, letters of assist and agreements for military and police contingents deployed to field missions or pledged to the rapid deployment level of the Peacekeeping Capability Readiness System, and participation in assessment and advisory, predeployment, rapid deployment-level, contingent-owned equipment verification and other visits to troop- and police-contributing countries; reimbursements to military and police personnel and for contingent-owned equipment deployed to field missions on memorandums of understanding or letters of assist, including through the calculation of premiums, deductions and death and disability and post-traumatic stress disorder compensation; servicing of the Contingent-Owned Equipment/Memorandum of Understanding Management Review Board; comparative performance analysis and management decision reports.				

^a Includes quarterly briefings to the Fifth Committee on the status of reimbursements, legislative review of the report of the Secretary-General on the quadrennial survey, and the legislative review of the report of the 2023 Working Group on Contingent-Owned Equipment and the report of the Secretary-General on the 2023 Working Group on Contingent-Owned Equipment.

Subprogramme 3 Special activities

Objective

29B.92 The objective, to which this subprogramme contributes, is to ensure that clients can respond to special situations.

Strategy

29B.93 To contribute to the objective, the subprogramme will:

- (a) Facilitate the Secretariat’s operational response to unique and surge-level requirements, including through planning support and monitoring, as well as shared situational awareness (early warning and escalated reporting) and facilitation of coordinated efforts;
- (b) Facilitate a robust value-for-money and resource stewardship agenda to inform efficient, effective and responsive operational support functions across the Secretariat;
- (c) Coordinate and maintain bilateral and other multiparty relationships with key partners, including through the development of a partnership framework and directly through operations with partners, as well as through the development of the triangular partnership project;
- (d) Coordinate or provide specialized advice, development of service delivery relationships or formation of temporary teams, as required.

29B.94 The above-mentioned work is expected to result in:

- (a) Optimized operational response to emerging situations and other unique and surge-level requirements;

- (b) The mutually beneficial collaboration of non-Secretariat entities and regional organizations, and a strengthened support relationship with the United Nations in benefit of Secretariat entities;
- (c) An optimized and enhanced Secretariat operational support architecture based on deepened cooperation with United Nations agencies, funds and programmes;
- (d) The promulgation of operational support resourcing priorities and standards shared between the Secretariat and client entities.

Programme performance in 2021

United Nations resident coordinator system achieved economies of scale, interoperability and programmatic integration

29B.95 A key result of the subprogramme has been the successful transition of the 131 offices in the resident coordinator system from global support arrangements provided by UNDP to the Secretariat’s operational support architecture. This has resulted in efficiencies for the system, as well as its moving it closer to its mandate of being empowered, independent and impartial, and has established a clear platform of providers of location-independent support services within the Secretariat’s existing architecture.

29B.96 Progress towards the objective is presented in the performance measure below (see table 29B.17).

Table 29B.17

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
–	Transition of global human resources services for international staff through the United Nations Office at Nairobi	131 resident coordinator offices benefited from full-service global support arrangements (including in situ), available in 16 countries where there is an integrated Secretariat presence, with procurement, travel and non-staff services delivered on a regional basis and global property management services delivered through the United Nations Global Service Centre

Planned results for 2023

Result 1: enabling comprehensive support solutions for partners

Programme performance in 2021 and target for 2023

29B.97 The subprogramme’s work contributed to enabling support solutions for partners through bilateral and multiparty relationships, with 60 per cent of plans for start-up, surge support and crisis considering partnership options, which met the planned target.

29B.98 The subprogramme’s work also contributed to better enabling the Secretariat’s response to emergencies and other surge-level requirements, with 35 per cent of approved positions encumbered by the entity start date of new missions, which met the planned target.

29B.99 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29B.18).

Table 29B.18
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Entities promulgate rapid deployment rosters	The start-up of the United Nations Integrated Transition Assistance Mission in the Sudan utilized the standing surge capacity pool for deployments 65 per cent of identified surge positions for the United Nations Integrated Transition Assistance Mission in the Sudan were deployed in the first month	35 per cent of approved positions encumbered by entity start date of new missions 60 per cent of plans for start-up, surge support and crisis have considered partnership options	40 per cent of approved positions encumbered by entity start date of new missions 65 per cent of plans for start-up, surge support and crisis have considered partnership options	United Nations entities empowered to better respond to special situations through partnership arrangements with specialized agencies, funds and programmes United Nations entities respond more effectively and efficiently to special situations, including transition or emergency responses, through specialized or surge-level support capacities

Result 2: new and expanded field operations guided by mission support concepts

Programme performance in 2021 and target for 2023

- 29B.100 The subprogramme’s work contributed to the Secretariat’s support in the operational response to emerging situations and other unique and surge-level requirements, with a systematic application of mission support concepts in all special situations, which met the planned target.
- 29B.101 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29B.19).

Table 29B.19
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Mission support concepts applied in an ad hoc fashion	Mission support concepts applied in the establishment of special political missions in Haiti, the Sudan and Yemen	Systematic application of mission support concepts in all special situations	100 per cent of mission concepts fully meet the minimum standards	Secretariat entities receive 50 weekly situational awareness reports on escalated situations affecting them to support the response for the restoration of disrupted operations Improved management of financial resources

Section 29B Department of Operational Support

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
				and risk mitigation by completing post-closure administrative liquidation for 80 per cent of field missions within 12 months of assumption of responsibility

Result 3: robust value-for-money and resource stewardship agenda to inform operational support functions across the Secretariat

Proposed programme plan for 2023

29B.102 During 2021, the subprogramme focused on the development of the Secretariat’s operational support architecture, shifting support for the resident coordinator system from UNDP to the Secretariat, where possible, and collaborating with United Nations agencies, funds and programmes.

Lessons learned and planned change

29B.103 The lesson for the subprogramme was that the focus on collaboration in support/business arrangements across the United Nations system was a key enabler of programmatic integration through economies of scale and interoperability. In applying the lesson, the subprogramme will seek further collaboration opportunities between Secretariat entities and with United Nations agencies, funds and programmes to gain efficiencies, including elimination (or avoidance) of duplicated capacities, as well as performance improvement among key Secretariat global and regional service providers.

29B.104 Expected progress towards the objective is presented in the performance measure below (see table 29B.20).

Table 29B.20
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	Secretariat entities receive some administrative support services in an ad hoc fashion from various global and regional service providers	75 per cent of Secretariat entities receive enhanced, consistent and improved administrative support services through formal service provision agreements that include standard cost recovery and improved client service from regional and global service providers	90 per cent of Secretariat entities receive enhanced, consistent and improved administrative support services through formal service provision agreements that include standard cost recovery and improved client service from regional and global service providers

Deliverables

29B.105 Table 29B.21 lists all deliverables of the subprogramme.

Table 29B.21

Subprogramme 3: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory

E. Enabling deliverables

Administration: situational response and awareness, including multidimensional support response and support planning tools, monitoring and issue escalation; deployment of surge and specialized support capacities within 10 days; input on strategic mandate and/or entity reviews; post-field administrative liquidation; support partnerships, including arrangements that address client priority needs; support efficiency, including at least two new collaboration initiatives between the Secretariat and United Nations agencies, funds and programmes; three trainings on performance improvement among key Secretariat global and regional service providers; guidance on operational support, resourcing priorities and standards across the Secretariat.

Subprogramme 4 Administration, New York

Objective

29B.106 The objective, to which this subprogramme contributes, is to ensure a safe and fit-for-purpose physical environment at Headquarters and responsive facilities, as well as administrative, logistical, information and other services in support of the efficient functioning of the Organization and a public informed of the work of the United Nations.

Strategy

29B.107 To contribute to the objective, the subprogramme will:

- (a) Proactively maintain and operate the Headquarters buildings while leveraging technology and integrating good practices into facilities management to achieve efficiencies, promote a modern workplace and support Member States in the implementation of the Sustainable Development Goals. The long-term planning of office accommodation and building alterations will be adjusted regularly to support the needs of entities in New York and maintain the property value of the campus with a strategic focus on incorporating the impact of post-COVID-19 changes and facilitating hybrid ways of working, completing the accessibility improvement project for persons with disabilities and supporting management environmental sustainability efforts;
- (b) Provide efficient, timely and cost-effective services to clients in New York in the areas of building management, office space, asset and official gift management, inventory and warehouse management, travel and transportation, mail and pouch services, event management, postal administration, catering and other commercial operations. Effective archives and records management services will also be provided to Secretariat entities globally. In addition to continued striving for a high level of client satisfaction, the strategic focus will be on strengthening property management support at United Nations Headquarters and streamlining archives storage and management, as well as implementing applications for improved content management and preservation of digital data;
- (c) Provide specialized human resources support in the areas of onboarding, separations and the processing of complex entitlements (including education grants, dependency allowances and rental subsidies) for the staff of all Headquarters-based United Nations entities and respective field locations;

- (d) Coordinate and manage the property and liability insurance activities of the Organization;
- (e) Ensure the accurate and timely disbursement of salaries and related allowances and benefits to United Nations staff and other personnel, as well as disbursements to vendors and other contractors;
- (f) Process other disbursements in respect of the financial obligations of the Organization and process the tax reimbursement claims of United States taxpayers;
- (g) Provide postal, gift, archival and information services to the public in New York and globally to raise awareness of the past and current work of the United Nations.

29B.108 The above-mentioned work is expected to result in:

- (a) A highly functional, more inclusive and sustainable campus that symbolizes the ideals of the United Nations;
- (b) High client satisfaction and cost efficiency in the provision of services;
- (c) Increased public awareness of the past and current work of the Organization.

Programme performance in 2021

Safe return of personnel and activities at United Nations Headquarters

29B.109 Throughout the phases of the United Nations Headquarters reopening plan, the subprogramme played a major role in adapting the Organization’s response to the shifting reality of the pandemic, ensuring the safe return of personnel to the office, adapting operations to facilitate hybrid ways of working and enabling activities to resume within the complex. During 2021, operational plans were constantly adapted to support the work of the Organization. When United Nations personnel began to return to the office, in summer 2021, they found safe working conditions, cafeteria services scaled up to the level of occupancy in the building, and travel, mail and other in-person services ready to support them. Under significant uncertainty and short time frames, the subprogramme facilitated the high-level meeting of the General Assembly, ensuring through increased cleaning protocols and other measures to reduce transmission of the virus that Member States could successfully carry out their work.

29B.110 Progress towards the objective is presented in the performance measure below (see table 29B.22).

Table 29B.22
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
–	Safe phase 2 reopening of the United Nations Headquarters complex with reduced capacity, facilitating the implementation of mandates and meetings of the intergovernmental bodies with no major incidents reported	Safe phase 3 reopening of the United Nations Headquarters complex and return of personnel to the office accomplished, facilitating the successful proceedings of the high-level meeting of the General Assembly

Planned results for 2023

Result 1: an inclusive Secretariat through accessibility improvements

Programme performance in 2021 and planned target for 2023

- 29B.111 The subprogramme's work contributed to the improved accessibility of the Headquarters campus to persons with disabilities and increased building compliance with relevant standards, with a 44 per cent total implementation rate of the accessibility programme in 2021, which did not meet the planned target of 66 per cent. The target was not met because the project experienced delays in 2020 as a result of the pandemic that could not be fully made up for in 2021, postponing the completion of improvements to 2023.
- 29B.112 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 29B.XI).

Figure 29B.XI

Performance measure: total implementation rate of the accessibility programme by year

(Percentage)

Result 2: streamlined United Nations Secretariat archives management

Programme performance in 2021 and target for 2023

- 29B.113 The subprogramme's work contributed to maintaining the volume of physical records in the Falchi Building repository at 50,000 linear feet, which met the planned target.
- 29B.114 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 29B.XII).

Figure 29B.XII
Performance measure: volume of records at the Falchi Building

(Linear feet)

Result 3: office space aligned with the needs of the Organization

Proposed programme plan for 2023

29B.115 The capital master plan created more open floor plans, and the flexible workplace project transformed the office environment in the Secretariat Building, encouraging new internal ways of working and facilitating flexible working arrangements, which proved fortuitous in the face of the COVID-19 pandemic. The increased capacity resulting from the projects also allowed the Organization to vacate several leases and realize significant savings.

Lessons learned and planned change

29B.116 The lesson for the subprogramme was that, while the flexible workplace approach was well adapted to fluctuating office space needs, the pandemic conditions had the potential to further transform the workplace. In applying the lesson, the subprogramme will continue to assess the impact of post-COVID-19 changes and further adjust the office space accordingly to effectively support operational needs and long-term accommodation requirements.

29B.117 Expected progress towards the objective is presented in the performance measure below (see table 29B.23).

Table 29B.23
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Flexible workplace project: six floors converted in the Secretariat Building. One floor in FF Building vacated	Flexible workplace project: two floors converted in the Secretariat Building. One floor in FF Building vacated	The General Assembly approved the Secretary-General's recommendation to close out the flexible workplace project and re-evaluate future needs	The Organization adjusts the real estate portfolio to accommodate current needs	The General Assembly considers a strategic assessment of the real estate portfolio that would ensure the optimal alignment of the office space with the Organization's evolving needs

Deliverables

29B.118 Table 29B.24 lists all deliverables of the subprogramme.

Table 29B.24

Subprogramme 4: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory

D. Communication deliverables

External and media relations: information and reception services to visitors, delegates and the general public, including responses to approximately 30,000 inquiries on the current and past work of the United Nations.

Library services: archives, records and information management services to all entities at United Nations Headquarters and field missions; recordkeeping assessments for Secretariat entities globally; security-screened, catalogued, stored and preserved paper and digital records; digitized legacy paper archives.

E. Enabling deliverables

Correspondence and documentation services: mail services, including approximately 800,000 postal, courier and diplomatic pouch shipment and messenger services.

Logistics: 1,825,000 square feet of owned and leased premises, facilities and assets, including gifts, managed and maintained; office accommodations provided for about 8,000 personnel; completion of service requests for facilities and commercial services; conferences and special events logistics; warehousing and transportation services; approximately 30,000 travel requests and travel documents, lump-sum calculations and host country registrations processed; airline agreements.

Administration: administrative support services, including specialized human resources support in the areas of onboarding and the processing of complex entitlements, dependency benefits and rental subsidies for approximately 8,250 staff of all Headquarters-based United Nations entities and respective field locations; transactions and claims for 7,000 staff members in the area of tax reimbursement, in line with relevant rules, regulations and standards; property and liability insurance activities; salary and vendor payments; insurance policies management.

B. Proposed post and non-post resource requirements for 2023

Overview

29B.119 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 29B.25 to 29B.27.

Table 29B.25

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2021 expenditure	2022 appropriation	Changes				2023 estimate (before recosting)	
			Technical adjustments	New/expanded mandates	Other	Total		Percentage
Post	37 364.2	37 224.4	162.4	–	2 174.1	2 336.5	6.3	39 560.9

29B.120 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 29B.28 to 29B.30 and figure 29B.XIII.

29B.121 As reflected in tables 29B.28 (1) and 29B.29 (1), the overall resources proposed for 2023 amount to \$91,351,300 before recosting, reflecting a net increase of \$3,702,900 (or 4.2 per cent) compared with the appropriation for 2022. Resource changes result from three factors, namely: (a) technical adjustments; (b) new mandates; and (c) other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

29B.122 As reflected in table 29B.28 (1), resource changes reflect an increase of \$162,400 relating to the annual provision for: (a) the establishment of one Staff Development Officer (P-3) post under subprogramme 1, component 2; (b) the reassignment of one Administrative Assistant GS (OL) post

under subprogramme 1, component 3; and (c) the establishment of one Finance and Budget Officer (P-3) post under programme support. The three posts were established in 2022 pursuant to General Assembly resolution [76/245](#) and were subject to a 50 per cent vacancy rate in accordance with the established practice for the costing of new and reassigned posts.

New and expanded mandate

29B.123 As reflected in table 29B.28 (1), resource changes reflect an increase of \$300,000 in subprogramme 1, component 2, Capacity development and operational training, in accordance with General Assembly resolution [76/245](#), whereby the Secretary-General was requested to propose concrete measures to improve multilingualism in the next programme budget submission. The additional resources are intended to:

- (a) Enhance the professionalization of existing language programmes at the United Nations Secretariat through initiatives to build local capacity for more effective operational practices and training offered in the six languages in accordance with the language standards established in the United Nations Language Framework. In this respect, operational support for new, sustainable language training structures would be offered at duty stations that have identified the necessary resources and the expected impact;
- (b) Advance understanding of and provide clarity on and transparency for the required calibre of written and oral production at various proficiency levels across the official languages by furthering the 2022 innovative pilot project to create illustrative examples that correspond to levels I, II and III of the United Nations Language Framework;
- (c) Conduct a feasibility study to determine the most effective approach, methodology, content and software for a self-assessment tool to enable the verification of language skills against United Nations Language Framework levels for assessment and to plan and evaluate language learning. The Capacity Development and Operational Training Service would pilot a prototype in the two working languages of the United Nations Secretariat.

29B.124 The increase in the amount of \$300,000 relates mainly to:

- (a) Travel of staff (\$15,400) to provide strategic guidance and operationalize language training structures at duty stations that have identified sustainable resources for a language programme and its expected impact;
- (b) Contractual services (\$234,600) to build and develop local capacity to deliver language programmes, develop tools and resources through which participants can apply their language skills in respect of the United Nations Language Framework, and conduct a feasibility study and develop a pilot related to self-assessment tools;
- (c) General operating expenses (\$50,000) with which to acquire and customize special adaptive tools for language assessment.

Other changes

29B.125 As reflected in table 29B.28 (1), resource changes reflect a net increase in the amount of \$3,240,500, as follows:

- (a) **Subprogramme 1, component 1, Human resources support.** The net increase of \$1,167,000 relates to:
 - (i) In the context of the revised estimates included in the report of the Secretary-General on addressing racism and promoting dignity for all in the United Nations Secretariat ([A/76/771](#)), for consideration by the General Assembly during the second resumed part of its seventy-sixth session, additional requirements in the amount of \$1,207,100 include:
 - a. Three posts that have been proposed for establishment in 2022 (\$530,600) (see annex III);

- b. Other staff costs for two general temporary assistance positions (\$318,000);
 - c. Consultants (\$36,000);
 - d. Travel of staff (\$40,000);
 - e. Contractual services (\$279,800);
 - f. General operating expenses (\$1,200);
 - g. Supplies and materials (\$1,500);
- (ii) The above-mentioned additional requirements are offset in part by reduced requirements under post (\$40,100) relating to the proposed reassignment of one post of Senior Telecommunications Assistant (General Service (Principal level)) to a post of Data Engineering Assistant (General Service (Principal level)) in the Human Resources Services Division, which would be subject to a 50 per cent vacancy rate. The incumbent would assist the Human Resources Services Division in implementing its mandate for analysing client performance, described in annex III;
- (b) **Subprogramme 1, component 2, Capacity development and operational training.** In the context of the revised estimates included in the report of the Secretary-General on addressing racism and promoting dignity for all in the United Nations Secretariat, additional requirements in the amount of \$261,100 include:
- (i) One post that has been proposed for establishment in 2022 (\$159,000) (see annex III);
 - (ii) Contractual services (\$101,600);
 - (iii) General operating expenses (\$200);
 - (iv) Supplies and materials (\$300);
- (c) **Subprogramme 1, component 3, Health-care management and occupational safety and health.** In the context of the revised estimates included in the report of the Secretary-General on addressing racism and promoting dignity for all in the United Nations Secretariat, additional requirements in the amount of \$161,100 include:
- (i) One post that has been proposed for establishment in 2022 (\$159,000) (see annex III);
 - (ii) Contractual services (\$1,600);
 - (iii) General operating expenses (\$200);
 - (iv) Supplies and materials (\$300);
- (d) **Subprogramme 4, Administration, New York.** The increase of \$1,651,300 relates to:
- (i) The proposed establishment of a Property Management Officer (P-3) post to meet expanding requirements to support New York-based entities in exercising their delegation of authority, as well as to perform asset accountant functions and improve property management at Headquarters. Posts were abolished in 2022 to offset this new requirement from within existing resources (\$95,100) (see annex III);
 - (ii) The proposed inward redeployment of 14 posts (1 P-2, 2 General Service (Principal level) and 11 General Service (Other level)) from the Department of Management, Strategy, Policy and Compliance to the Department of Operational Support owing to the transfer of operational and transactional functions related to payroll, accounts payable and commercial insurance functions, including the associated common services costs (\$1,315,300);
 - (iii) The proposal for the establishment of two general temporary assistance positions (one position of Senior Human Resources Officer (P-5) and one position of Human Resources Officer (P-4)) (\$240,900). The positions would provide professional support to and supervision to the human resources operations team, consisting of 19 General Service staff. Human resources operations is responsible for providing specialized human

resources services in the processing of separations, onboarding and complex entitlements, such as the education grant, the dependency allowance, the rental subsidy and other entitlements for all Headquarters-based entities and respective field offices. During the past three years, professional support and supervision, including the approval of staff entitlements and transactions and the coordination of monitoring and self-monitoring activities, were provided on an interim basis by temporarily redeploying resources within the department pending consideration by the General Assembly of the report of the Secretary-General on the global service delivery model for the United Nations Secretariat. At its seventy-sixth session, the Assembly decided not to take action on the report and thus completed its consideration thereof. Because no further report or action has been requested by the Assembly, the Department of Operational Support requires a longer-term and more dedicated solution to staffing needs for managing the human resources operations team. In this context, the Department is proposing to establish two temporary general temporary assistance positions to ensure professional support for and supervision of the human resources operations team and the continuity of operations in the processing of separations, onboarding and complex human resources entitlements for all staff of New York-based departments and offices and their duty stations.

Other assessed resources

- 29B.126 As reflected in tables 29B.28 (2) and 29B.29 (2), the Department receives other assessed resources under the support account for peacekeeping operations, including posts and positions, and operational resources for the delivery of reliable, consistent and sustainable field support results globally. For 2023, the projected other assessed resources amount to \$113,347,300, including 437 posts. The net increase of \$5,425,100 compared with the estimates for 2022 is attributable mainly to the net increase of six posts, updated salary costs, lower vacancy rates applied to posts reassigned in the previous period and an increase for the triennial Working Group on Continent-Owned Equipment, to be held in 2023, as reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2022 to 30 June 2023 (A/76/725). Other assessed resources represent 41.9 per cent of the total estimated resources for the Department.

Extrabudgetary resources

- 29B.127 As reflected in tables 29B.28 (3) and 29B.29 (3), the Department receives extrabudgetary resources, including contributions that support the delivery of its mandates. For 2023, extrabudgetary resources are estimated at \$65,936,000 and would provide for 73 posts. The resources would be used as follows:
- (a) To provide support and services to agencies, funds and programmes in human resources, capacity development and health-care management in the following areas: language proficiency exams, language and communications programmes and the administration of special exams; and the facilitation of rostering and medical consultations, travel health advisories, immunizations and other medical administrative matters, such as medical clearances, sick leave certification and recommendations for medical evacuations/repatriations. Extrabudgetary resources support the client offices funded from extrabudgetary sources in the areas of facilities management and office space, travel and transportation and pouch and mail services, human resources services for processing separations, onboarding and complex entitlements, operational and transactional functions consisting of payroll, accounts payable and commercial insurance, and supporting the processing of tax advances and settlements of federal and state taxes for United States citizens and residents employed by the United Nations and its agencies, funds and programmes;
 - (b) To support procurement actions in the areas of corporate support services for field and Headquarters operations and continuation of the project to implement gender-sensitive designs for infrastructure;

- (c) To support the triangular partnership project, a capacity-building model aimed at training uniformed personnel in the peacekeeping-enabling capacity through collaboration among Member States with expertise and resources, troop-contributing countries and the Secretariat.
- 29B.128 Extrabudgetary resources represent 24.4 per cent of the total estimated resources for the Department. The decrease of \$27,145,300 compared with the estimate for 2022 reflects:
- (a) Under executive direction and management, the activities and funding mechanism of the United Nations System-Wide Task Force on Medical Evacuations in Response to COVID-19, which are planned through the end of 2022, with no further activities planned for 2023;
- (b) Under subprogramme 1, component 1, a reduction in estimated resources, attributable mainly to the shift in donor priorities and the anticipated closure of projects in 2022;
- (c) Under subprogramme 1, component 2, the scheduled completion of projects related to health care, with no COVID-19 surge support activities planned for 2023;
- (d) Under subprogramme 2, component 1, the scheduled completion of the project to implement gender-sensitive designs for infrastructure and accommodations in United Nations peacekeeping operations.
- 29B.129 The above-mentioned decreases are offset in part by additional resources resulting from the inward redeployment from the Department of Management Strategy, Policy and Compliance of functions related to payroll, accounts payable and commercial insurance, comprising 15 extrabudgetary posts and respective non-post resources.
- 29B.130 The extrabudgetary resources under this section are subject to the oversight of the Department, which has delegated authority from the Secretary-General.

Executive direction and management

- 29B.131 The Office of the Under-Secretary-General consists of the Strategic Support Team, the Performance and Analytics Section, the Audit Response and Boards of Inquiry Section and the Environment Section.
- 29B.132 The Under-Secretary-General for Operational Support is responsible for the overall direction, supervision and management of the Department in the implementation of its mandates and its approved programme of work. She or he co-chairs the Management Client Board jointly with the Under-Secretary-General for Management Strategy, Policy and Compliance and is assisted by the Assistant Secretary-General for Support Operations and the Assistant Secretary-General for Supply Chain Management.
- 29B.133 The Assistant Secretary-General for Support Operations provides leadership and direction to support clients across the Secretariat through the provision of guidance and advisory services in their exercise of authorities for the successful implementation of mandates relating to human resources, health-care management and occupational health and safety, as well as capacity development and operational training.
- 29B.134 The Assistant Secretary-General for Supply Chain Management is responsible for all the activities of the Office of Supply Chain Management and its administration and management. The Assistant Secretary-General provides leadership and direction relating to the implementation and coordination of the organizational entities, which together form the Organization's integrated supply chain and uniformed capabilities support.
- 29B.135 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, organizations are encouraged to integrate sustainability information into their reporting cycles. In compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), the Department is mainstreaming environmental management practices into its operations through a variety of Secretariat-wide and facility management projects. The Department's long-term strategy includes providing guidance and advisory support to peacekeeping operations to facilitate and implement the environment strategy for peace operations (2017–2023), environmental

Part VIII Common support services

management of the United Nations campus and facilities, and environmental initiatives in the area of supply chain management.

29B.136 In 2023, the activities and continuous efforts of the Department will be based on feedback from clients and on data. The Department will continually improve its effectiveness by using performance data analytics to inform decision-making and reporting. It will embrace both innovative and proven technologies with regard to the effective service of staff and clients.

29B.137 Information on compliance with the timely submission of documentation and advanced booking for air travel is reflected in table 29B.31.

29B.138 The Department has taken measures to improve its compliance rate by encouraging early engagement with relevant stakeholders. A significant proportion of non-compliant travel in 2021 stemmed from external travellers. The Department has emphasized the travel policy requirement to relevant external participants, such as meeting participants and trainers, and set deadlines for external participants to ensure that necessary personnel data are provided in a timely manner. For Department staff-related travel, non-compliance was affected for reasons beyond Department control and lingering complexities owing to the COVID-19 pandemic.

Table 29B.31
Compliance rate
(Percentage)

	<i>Actual 2019</i>	<i>Actual 2020</i>	<i>Actual 2021</i>	<i>Planned 2022</i>	<i>Planned 2023</i>
Timely submission of documentation	100	100	100	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	41	44	57	100	100

29B.139 The proposed regular budget resources for 2023 amount to \$1,715,700 and reflect no change in the resource level compared with the appropriation for 2022. Additional details are reflected in table 29B.32 and figure 29B.XIV.

Figure 29B.XIV
Executive direction and management: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed resources

29B.140 Executive direction and management is supported by other assessed resources in the amount of \$6,756,200 under the support account for peacekeeping operations, including 36 posts (4 P-5, 9 P-4, 11 P-3 and 12 General Service (Other level)) and operational resources. The Office of the Under-Secretary-General will provide executive management support to the Under-Secretary-General, including with regard to strategic direction and through analytics and management governance, to help to drive continuous improvement of operational business processes within the Department and throughout the Secretariat; engage on audit response and boards of inquiry, performance and analytics, and environmental issues; and ensure that the Department is adequately configured to respond to operational support needs and priorities. The increase from 2022 is attributable mainly to increased staff costs.

Extrabudgetary resources

29B.141 For 2022, extrabudgetary resources in the amount of \$24,519,400 are for the activities of the United Nations System-Wide Task Force on Medical Evacuations in Response to COVID-19. The medical evacuation mechanism was established to enable the United Nations system and its partners to stay and deliver on the ground. As in 2020 and 2021, costs incurred by the Secretariat on behalf of the United Nations system continue to be funded through the agreed cost-sharing arrangement with the largest United Nations system entities and donor funding. As a key implementing entity for the medical evacuation mechanism, the Secretariat is responsible for the contractual agreements for the provision of treatment within medical facilities, air ambulance service providers and administrative tasks, including translating documents and managing the invoice payment process with the third-party service provider. The current mandate of the Task Force expires on 31 December 2022, and there are no activities planned for 2023.

Programme of work

Subprogramme 1 Support operations

Component 1 Human resources support

29B.142 The proposed regular budget resources for 2023 amount to \$4,003,100 and reflect a net increase of \$1,167,000 compared with the appropriation for 2022. The proposed net increase is explained in paragraph 29B.124 (a). Additional details on the distribution of the proposed resources for 2023 are reflected in table 29B.33 and figure 29B.XV.

Table 29B.33

Figure 29B.XV

Subprogramme 1, component 1: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed resources

- 29B.143 The component is supported by other assessed resources in the amount of \$15,070,200 under the support account for peacekeeping operations, including 76 posts (1 D-2, 2 D-1, 6 P-5, 11 P-4, 18 P-3, 2 P-2, 7 General Service (Principal level) and 29 General Service (Other level)) posts and operational resources, which will continue to contribute to the strengthened human resources management capacity of all Secretariat entities and provide consistent high-quality, timely advice on properly exercising human resources-delegated authority to business partners across the Secretariat in support of the entity's mandate; improve and facilitate efficiencies in various human resources processes through streamlining and simplification and the effective use of technology, as well as offer diverse and high-quality pools of candidates by managing rosters across all job families.
- 29B.144 The component is also supported by other assessed resources in the amount of \$567,000 for the 2023 support account share of the business support resources, as proposed in the context of the twelfth and final progress report of the Secretary-General on the enterprise resource planning project (A/75/386, table 8), which was approved by the General Assembly in its resolution 75/253.
- 29B.145 The net increase of \$955,800 compared with the 2022 estimate is attributable mainly to the transfer of two P-4 temporary positions from central costs, a cross-cutting initiative for peacekeeping operations as posts and non-post items to support the global Umoja human resources activities and coordinate process changes, improvements in the system, the implementation and roll-out of changes, production support and change management/communications for all Secretariat entities.

Extrabudgetary resources

- 29B.146 Extrabudgetary resources for the component are estimated at \$1,559,900 and will contribute to:
- (a) Administering the language proficiency examination to staff members from the United Nations system, as well as support to United Nations departments and offices with various assessment services, including development and delivery of pre-employment assessment tests for regular and temporary job openings in the Professional and higher categories and the General Service and related categories, training of subject matter experts in exam development and administration (\$278,500);
 - (b) Facilitating the rostering process to fill international vacancies through generic job openings as approved by the General Assembly. Resources are based on a proposed cost-sharing model between each peacekeeping mission and each special political mission that supports the expert panels, which are an integral part of the roster-based recruitment system. The expert panel assesses and recommends candidates who have applied against generic job openings for posts in field missions in order to reduce the administrative timeline on individual hiring managers and to enhance the quality and integrity of the recruitment process by centralizing the assessments (\$1,071,000);
 - (c) Resource requirements amounting to \$210,400 would provide for the estimated 2023 extrabudgetary share of the business support resources, as reflected in the twelfth and final progress report of the Secretary-General on the enterprise resource planning project.
- 29B.147 The decrease in the 2023 estimate is attributable mainly to the shift in donor priorities and anticipated closure of projects in 2022.

Component 2

Capacity development and operational training

- 29B.148 The proposed regular budget resources for 2023 amount to \$6,322,200 and reflect a net increase of \$625,000 compared with the appropriation for 2022. The proposed increase is explained in paragraphs 29B.121, 29B.122, 29B.123 and 29B.124 (b). Additional details on the distribution of the proposed resources for 2023 are reflected in table 29B.34 and figure 29B.XVI.

Table 29B.34

Figure 29B.XVI
Subprogramme 1, component 2: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed resources

29B.149 The component is supported by other assessed resources in the amount of \$4,518,500 under the support account for peacekeeping operations, including 30 posts (1 D-1, 1 P-5, 5 P-4, 7 P-3, 1 P-2, 3 General Service (Principal level) and 12 General Service (Other level)) and operational resources. The Capacity Development and Operational Training Service will continue to prioritize the expansion of cost-effective access to critical operational skills programmes, support executive governance and the exercise of delegated authorities and support continuous operational business process improvements, including through the process improvement advisory group. The Service will continue to work in partnership with the Department of Peace Operations through posts embedded

in the Policy, Evaluation and Training Division. Upon assuming responsibility for Umoja training, the Service developed a five-year Umoja learning strategy in close coordination with the Enterprise Resource Planning Solution Division, the Umoja functional subgroups and training partners with the goal of supporting Umoja-related learning plans at all Secretariat entities, and in particular at peacekeeping missions, to continuously strengthen the Organization's field operations. In the area of knowledge management, the Service will further develop the Knowledge Gateway for internal guidance related to administrative and operational support. It will also continue to broaden the linguistic diversity of United Nations personnel and is committed to expanding the range and content of training programmes by leveraging existing in-house expertise.

- 29B.150 The component is also supported by other assessed resources in the amount of \$686,800 for the 2023 support account share of the business support resources, as reflected in the twelfth and final progress report of the Secretary-General on the enterprise resource planning project.

Extrabudgetary resources

- 29B.151 The extrabudgetary resources for the component are estimated at \$1,058,100 and would be used as follows:

- (a) The coordination and delivery of programmes aimed at the improvement of the organizational governance and stewardship of senior leaders charged with delegated authorities, further supported by a series of follow-up individualized advisory engagements to support the implementation of agreed action plans by the respective entity. Delivery of the training programme is open to all Secretariat entities, whether at Headquarters locations, regional offices, peacekeeping missions or special political missions. The estimated amount of \$233,300 for 2023 pertains to the delivery of 13 sessions to approximately seven entities for governance programme sessions, with an additional six entities benefiting from follow-up individualized advisory engagements to strengthen agreed action plans to improve governance and the subdelegation of authority structures. The programme is delivered in conjunction with the Chartered Institute of Public Finance and Accountancy, an organization in the United Kingdom of Great Britain and Northern Ireland with leading-edge expertise in international good governance frameworks for public sector entities. The variance between the 2022 and 2023 estimates is attributable to more advisory sessions with entities that were already exposed to the programme in 2022 and earlier years to support the implementation of the action plans;
- (b) Support for language training needs in the six official languages of the United Nations, as well as communication training services for the Secretariat. The component plans to supplement the continuous development and facilitation of the types and scope of language courses in the six official languages of the United Nations. The estimate for 2023 amounts to \$570,100. The variance between 2022 and 2023 is attributable mainly to the anticipation of an increase in requests for targeted, customized training on French and Spanish language communication skills, added to consistent demand for English language training;
- (c) Resource requirements amounting to \$254,700 would provide for the estimated 2023 extrabudgetary share of the business support resources, as reflected in the twelfth and final progress report of the Secretary-General on the enterprise resource planning project.

Component 3

Health-care management and occupational safety and health

- 29B.152 The proposed regular budget resources for 2023 amount to \$3,356,200 and reflect an increase of \$161,100 compared with the appropriation for 2022. The proposed increase is explained in paragraphs 29B.121 and 29B.124 (c). Additional details on the distribution of the proposed resources for 2023 are reflected in table 29B.35 and figure 29B.XVII.

Table 29B.35

Subprogramme 1, component 3: evolution of financial and post resources

(Thousands of United States dollars/number of posts)

Figure 29B.XVII

Subprogramme 1, component 3: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed resources

29B.153 The component is supported by other assessed resources of \$3,492,900 under the support account for peacekeeping operations, including 18 posts (1 P-5, 7 P-4, 2 P-3 and 8 General Service (Other level)), as well as non-post resources, which will continue to contribute to increasing the safety and health protection of United Nations personnel in peacekeeping operations. Using the incident reporting system developed by the component, missions have begun to collect information on uniformed personnel, and efforts are being undertaken to introduce a trial of a simplified version of the system at certain troop-contributing countries. The component will continue to fully implement the medical performance framework, which includes standards for the quality of health care and for the qualifications of United Nations practitioners, as well as for hospital performance and medical evacuation capabilities. With the delegation of medical entitlement administration (e.g. sick leave and

clearances), the component will implement an auditing and review process to ensure the high-quality implementation of those local services. The component will support medical workforce planning, including the development of specialized skills of medical personnel in the peacekeeping operations. The increase compared with the appropriation for 2022 is attributable mainly to increased staff costs.

Extrabudgetary resources

- 29B.154 Extrabudgetary resources for the component are estimated at \$4,958,700 and would be used as follows:
- (a) Extrabudgetary resources in the amount of \$2,746,200 would provide for 12 posts (1 P-5, 2 P-4, 1 P-3, 2 P-2, 3 General Service (Principal level) and 3 General Service (Other level)), as well as non-post resources. The resources provide all clinical and medico-administrative services for the Headquarters staff of the specialized agencies and programmes, including travel advisory consultations, immunizations, ergonomic assessments, medical clearances, certifications of sick leave claims, recommendations for medical evacuations and repatriations, advice on medical entitlements and support for workplace safety and health. The component provides technical oversight to over 49 United Nations clinics administered by the specialized agencies, including the organization of annual meetings of medical doctors and nurses, as well as group and online training courses and webinars for health-care personnel, and provides support for the recruitment of health-care personnel through the credentialing of those deployed to field duty stations. In addition, the component provides recommendations on staff disability claims cases presented to the United Nations Joint Staff Pension Fund;
 - (b) Extrabudgetary resources in the amount of \$1,294,300 would contribute to the annual maintenance and support of the EarthMed electronic medical database system for all users at all duty stations;
 - (c) Extrabudgetary resources in the amount of \$918,200 would provide support to peacekeeping operations in the implementation of the following projects: (i) health-care quality and patient safety standards at all United Nations level 1+, 2 and 3 health-care facilities in peacekeeping operations; (ii) a new policy on the use of blood and blood products and to increase the availability of blood at high-risk missions; (iii) the conduct of a comprehensive medical mapping exercise at all peacekeeping and special political missions; (iv) implementation of an electronic clinical adverse event reporting system; (v) a mental health strategy for uniformed personnel; and (vi) implementation of a casualty tracking system. The medical mapping exercise for United Nations field missions will provide insights into the medical capability and capacity context (including workforce strength, major equipment, self-sustainment capability and health-care quality governance);
 - (d) The United Nations System Mental Health and Well-being Strategy project is aimed at optimizing the health of all United Nations personnel and will address the need for more information and consideration of personnel mental health needs in peace operations. The electronic clinical adverse event reporting system will address the deficiencies of the current paper-based systems, adhere to World Health Assembly resolution 72.6, entitled “Global action on patient safety”, and improve patient safety at all peacekeeping medical facilities. The casualty tracking system project is aimed at improving the safety and security of peacekeepers and creating a real-time tracking system for casualty management, which will enable health-care workers to gain access to many data sets simultaneously and in real time. It is planned that all the new projects will begin in 2022 and be completed in 2023. A reduction of \$588,900 compared with the 2022 estimate is a result of the completion of projects to support field medical hospitals and medical personnel, namely the health-care quality and patient safety standards, the new policy on the use of blood and blood products and the increase in the availability of blood at high-risk missions, as well as the substantial work of the new health-care projects that are expected to be completed in 2022, explained above.
- 29B.155 A decrease in extrabudgetary resources in the amount of \$884,000 is attributable to the suspension of COVID-19 surge support activities, with the expectation that the pandemic will not continue in 2023. During 2022, COVID-19 surge funds will support an increase in medical evacuations and in staff counselling, including with regard to mental health, owing to the current improving pandemic situation.

Subprogramme 2 Supply chain management

Component 1 Integrated supply chain management

29B.156 The proposed regular budget resources for 2023 amount to \$4,362,200, reflecting no change compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 29B.36 and figure 29B.XVIII.

Table 29B.36

Figure 29B.XVIII

Subprogramme 2, component 1: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed resources

29B.157 The component is supported by other assessed resources of \$34,519,300 under the support account for peacekeeping operations, including 169 posts (4 D-1, 9 P-5, 47 P-4, 57 P-3, 4 P-2, 3 General Service (Principal level) and 45 General Service (Other level)), as well as non-post resources, which will continue to contribute to the coordination and execution of key supply chain areas, such as planning and performance management, sourcing and procurement, logistical support, vendor management and supplier diversity and aviation safety. The net increase of \$1,746,600 compared with the estimate for 2022 is attributable mainly to increased staff costs and support to the triennial Working Group on Contingent-Owned Equipment, to be held in New York in 2023.

Extrabudgetary resources

- 29B.158 Extrabudgetary resources for the component are estimated at \$9,794,000.
- 29B.159 Resources in the amount of \$1,652,600 would provide for three posts (2 P-4 and 1 General Service (Other level)), as well as non-post resources in support of procurement actions in the areas of corporate support services for field and Headquarters operations (\$370,000); the continued funding of the Elsie Initiative for Women in Peace Operations, which is aimed at implementing gender-sensitive designs for infrastructure and accommodations in United Nations peace operations (\$702,700); and the continuation of support to the procurement activities of the United Nations Joint Staff Pension Fund (\$579,900).
- 29B.160 Resources in the amount of \$8,141,400 will support the ongoing operationalization, continuous improvement and operational sustainment of Umoja supply chain management modules, which will be a critical step in the mainstreaming agenda for Umoja towards a dedicated business-led capacity for sustained steady-state functional and operational support to supply chain management modules.
- 29B.161 A decrease of \$2,758,000 is attributable to the expected closure of the Elsie Initiative for Women in Peace Operations by 31 March 2023 (\$2,108,000) and lower requirements related to the Umoja supply chain management modules (\$650,000).

**Component 2
Uniformed capabilities support**

29B.162 The proposed regular budget resources for 2023 amount to \$312,100, reflecting no change compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 29B.37 and figure 29B.XIX.

Table 29B.37

Figure 29B.XIX
Subprogramme 2, component 2: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed resources

29B.163 The component is supported by other assessed resources of \$12,068,400 under the support account for peacekeeping operations, including 37 posts (1 D-2, 2 P-5, 6 P-4, 11 P-3, 3 General Service (Principal level) and 14 General Service (Other level)) and operational resources, and will continue to contribute to serving as a single point of contact for all administrative and logistical issues pertaining to the deployment of troops and related reimbursement to Member States. It includes continuation of general temporary assistance positions to support the continuation of the process of reviewing existing post-traumatic stress disorder claims. The net increase of \$1,174,200 compared with the estimate for 2022 is attributable to requirements of the 2023 Working Group on Contingent-Owned Equipment, including travel and other services.

Extrabudgetary resources

29B.164 Extrabudgetary resources for the component are estimated at \$28,800 and would be used for consultancy and other operational costs related to the post-traumatic stress disorder project. Phase II of the project would support implementation of a post-traumatic stress disorder framework for uniformed personnel. The project plan for phase II includes the development of written United Nations post-traumatic stress disorder guidelines, training materials for the prevention of the disorder, gender-sensitive methods for screening before and after deployments, and education campaigns to raise awareness of stigma.

**Subprogramme 3
 Special activities**

29B.165 The proposed regular budget resources for 2023 amount to \$1,060,500, reflecting no change in resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 29B.38 and figure 29B.XX.

Subprogramme 3: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed resources

29B.166 The subprogramme is supported by other assessed resources of \$8,890,800 under the support account for peacekeeping operations, including 47 posts (2 D-1, 9 P-5, 10 P-4, 7 P-2, 3 General Service (Principal level) and 16 General Service (Other level)) and operational resources. It will be positioned to serve as a dedicated capacity to facilitate Secretariat support in the operational response to unique and surge-level requirements, increase engagement in support partnerships and focus on continuous enhancement in the efficiency and responsiveness of operational support across the Organization. Specific requirements will be met through coordination of input and other efforts, provision of specialized advice, development of service delivery relationships and formation of temporary teams, as required, or deployment of surge-level or specialized capacities.

Extrabudgetary resources

- 29B.167 Extrabudgetary resources for the triangular partnership project are estimated at \$11,332,000 and would provide for 11 posts (2 P-5, 4 P-4, 1 P-3, 1 P-2 and 3 General Service (Other level)), as well as non-post resources. The resources would be used mainly for the following: (a) the development and roll-out of remote and mixed training products; (b) the establishment of systems and business processes to improve programme deliverables to better target the requirements of peacekeeping missions and measure the outcome and impact of training; (c) the resumption of on-site engineering and medical courses; (d) coordination with Secretariat and other partners on the enhanced targeting and alignment of triangular partnership project activities; (e) the development of training materials in the French language to increase multilingual training options; (f) outreach to Member States to increase the number of women trainees and women peacekeepers; and (g) outreach to Member States for the expansion of the base of countries as donors and hosts of training, as well as for content development.
- 29B.168 The increase in the project cost estimate to \$11 million between 2022 and 2023 is attributable to the projected increase of in situ training courses in the Africa and Asia regions. The projected increase of in situ courses will result in additional travel, rental of premises and engineering equipment in various training locations, as well as an increase in the procurement of medical supplies.

Subprogramme 4 Administration, New York

- 29B.169 The proposed regular budget resources for 2023 amount to \$68,533,200 and reflect a net increase of \$1,651,300 compared with the appropriation for 2022. The proposed increase is explained in paragraph 29B.123 (d). Additional details on the distribution of the proposed resources for 2023 are reflected in table 29B.39 and figure 29B.XXI.

Table 29B.39

Figure 29B.XXI
Subprogramme 4: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed resources

29B.170 The subprogramme is supported by other assessed resources of \$24,579,200 under the support account for peacekeeping operations, including 11 posts (1 P-4, 1 P-3, 2 P-2 and 7 General Service (Other level)) and operational resources, which will continue to be used mainly to provide office accommodations and other common services for support account-funded posts at Headquarters. Other assessed resources are also used for travel, mail and pouch services and archiving and records management services for peacekeeping missions. The net increase of \$696,900, compared with the estimate for 2022, is attributable to updated salary costs, the transfer of one General Service (Other level) position previously funded from peacekeeping operations through a cost-recovery mechanism, updated number of staff and contractors, for whom rental costs are budgeted in the Division of Administration, and standard acquisition of furniture, alteration, renovation and maintenance.

Extrabudgetary resources

29B.171 Extrabudgetary resources for the subprogramme are estimated at \$36,665,000 and would provide for 43 posts (2 P-5, 1 P-4, 6 P-3, 1 P-2, 5 General Service (Principal level), 25 General Service (Other level) and 3 Trades and Crafts), as well as non-post resources.

29B.172 The resources support client offices funded from extrabudgetary sources primarily in the areas of human resources management; operational and transactional support functions relating to payroll, accounts payable and commercial insurance; the processing of federal and state income taxes for all staff who are United States taxpayers; facilities management and office accommodations; and funds and programmes in the areas of travel, transportation and mail and pouch services, which are provided on a cost-recovery basis. Extrabudgetary resources are also received for the provision of special events and the coordination of cost-recovery activities for all non-calendar events at Headquarters, as well as for the installation and maintenance of gifts to the Organization.

29B.173 The increase of \$1,374,700 is attributable to an expected increase of \$3,881,300 for the posts and non-posts, including general temporary assistance in support of the operational and transactional functions transferred from the Department of Management Strategy, Policy and Compliance, consisting of payroll, accounts payable and commercial insurance. The increase is offset in part by an expected decrease of \$2,506,600 in projected expenditures for 2023 that is attributable mainly to reduced requirements for pass-through lease costs. With the expiration of United Nations Development Corporation leases in March 2023, which will be negotiated separately by UNDP and

the Secretariat, the Organization will no longer receive income or pay for the UNDP portion of the lease. In addition, one General Service (Other level) position funded from peacekeeping on a cost-recovery basis will be converted to other assessed resources.

Programme support

29B.174 The proposed regular budget resources for 2023 amount to \$1,686,100 and reflect an increase of \$63,900 compared with the appropriation for 2022. The increase is explained in paragraph 29B.121. Additional details on the distribution of the proposed resources for 2023 are reflected in table 29B.40 and figure 29B.XXII.

Table 29B.40

Figure 29B.XXII
Programme support: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed resources

- 29B.175 Programme support is supported by other assessed resources of \$2,198,000 under the support account for peacekeeping operations, including 13 (1 P-5, 1 P-4, 3 P-3, 1 General Service (Principal level) and 7 General Service (Other level)) posts and operational resources, and will continue to provide administrative support services in the areas of human resources, budget and finance and general administration to the Department of Operational Support, the Office of Information and Communications Technology and other entities in New York that do not have a dedicated executive office. The increase from 2022 is attributable mainly to increased staff costs.

Extrabudgetary resources

- 29B.176 Extrabudgetary resources under programme support are estimated at \$539,500 and would provide for four (1 P-2, 1 General Service (Principal level) and 2 General Service (Other level)) posts, as well as non-post resources to support client offices funded from extrabudgetary sources primarily in the areas management of voluntary contributions, including review and approval of memorandum of agreements, provides overall management of the contributions to ensure available funding for projects and assistance in the financial reporting to donors.

Annex I

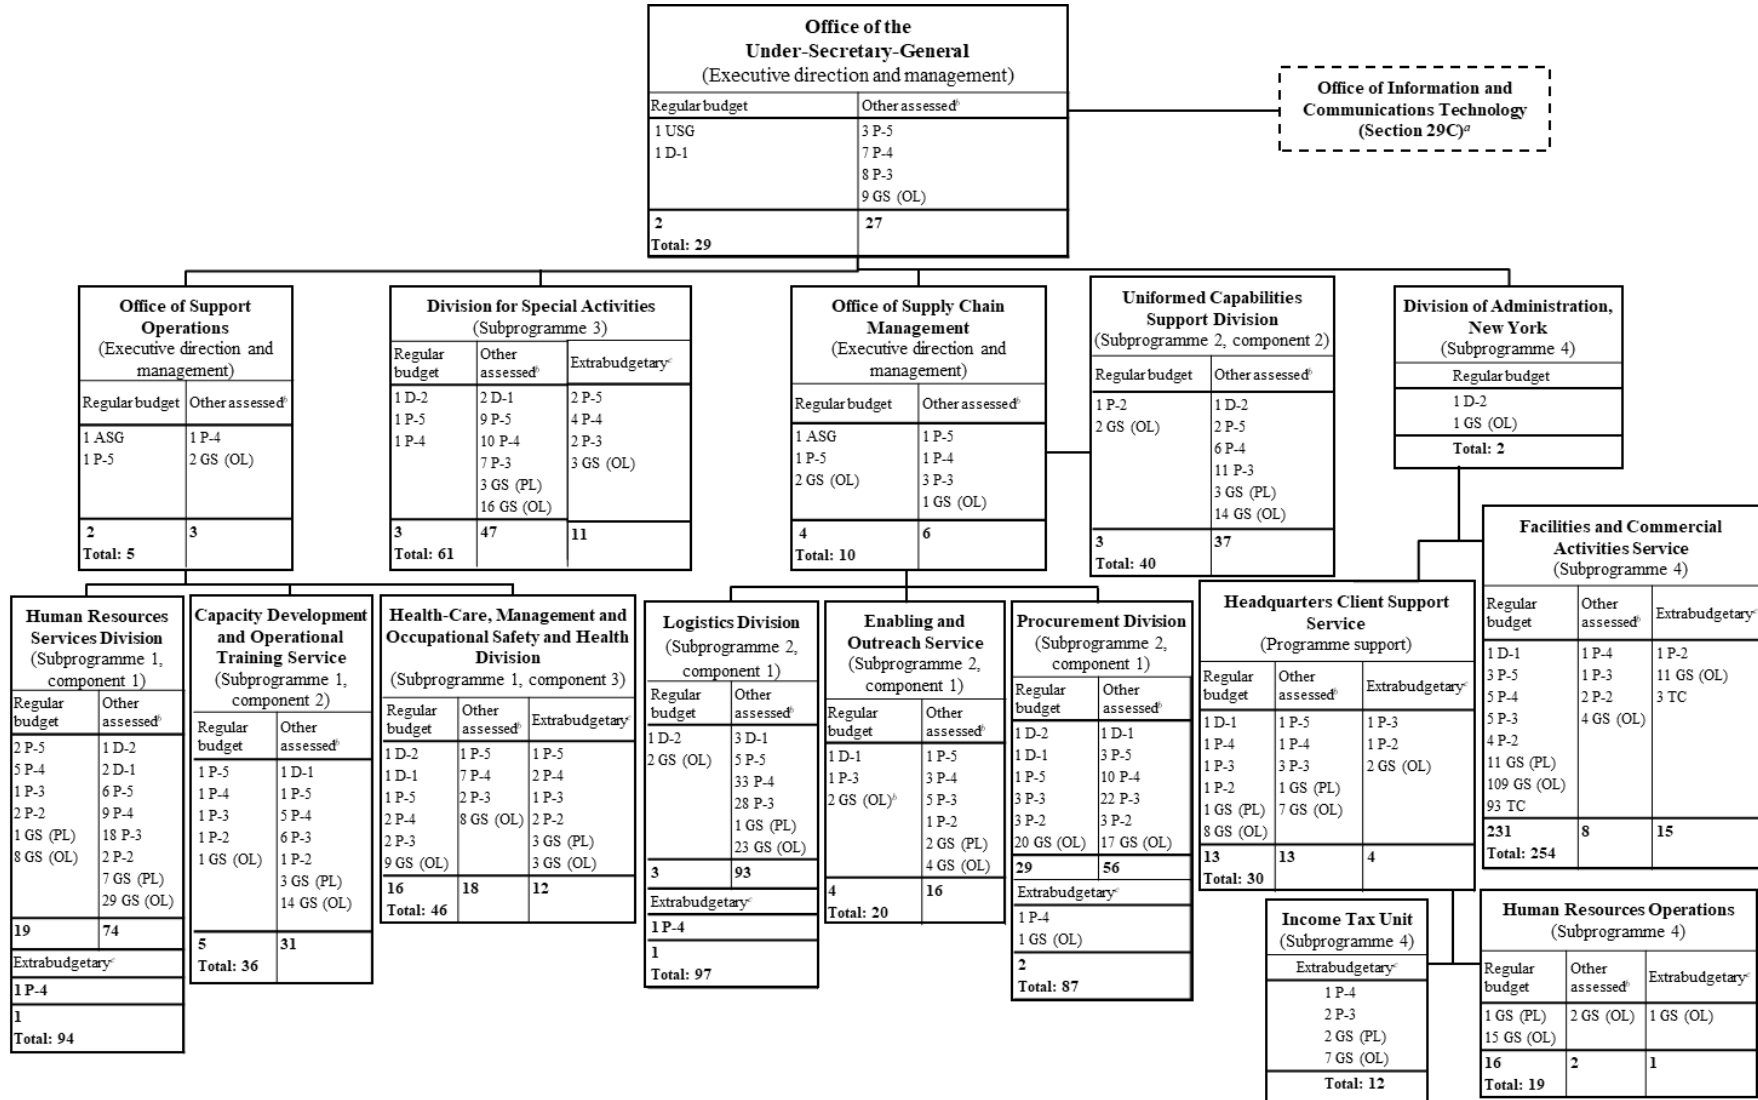

Organizational structure and post distribution for 2023

Two charts showing the organizational structure of the Department of Operational Support are presented below. Chart A reproduces the approved organizational structure for 2022, as contained in document [A/76/6 \(Sect. 29B\)](#). Chart B presents the proposed organizational structure for 2023.

Justification for the proposed changes

The structure of the Department of Operational Support has changed as a result of the transfer of operational and transactional functions related to payroll, accounts payable and commercial insurance functions from the Department of Management, Strategy, Policy and Compliance to subprogramme 4 of the Department of Operational Support, as detailed in paragraph 29B.124 (d) (ii).

A. Approved organizational structure and post distribution for 2022

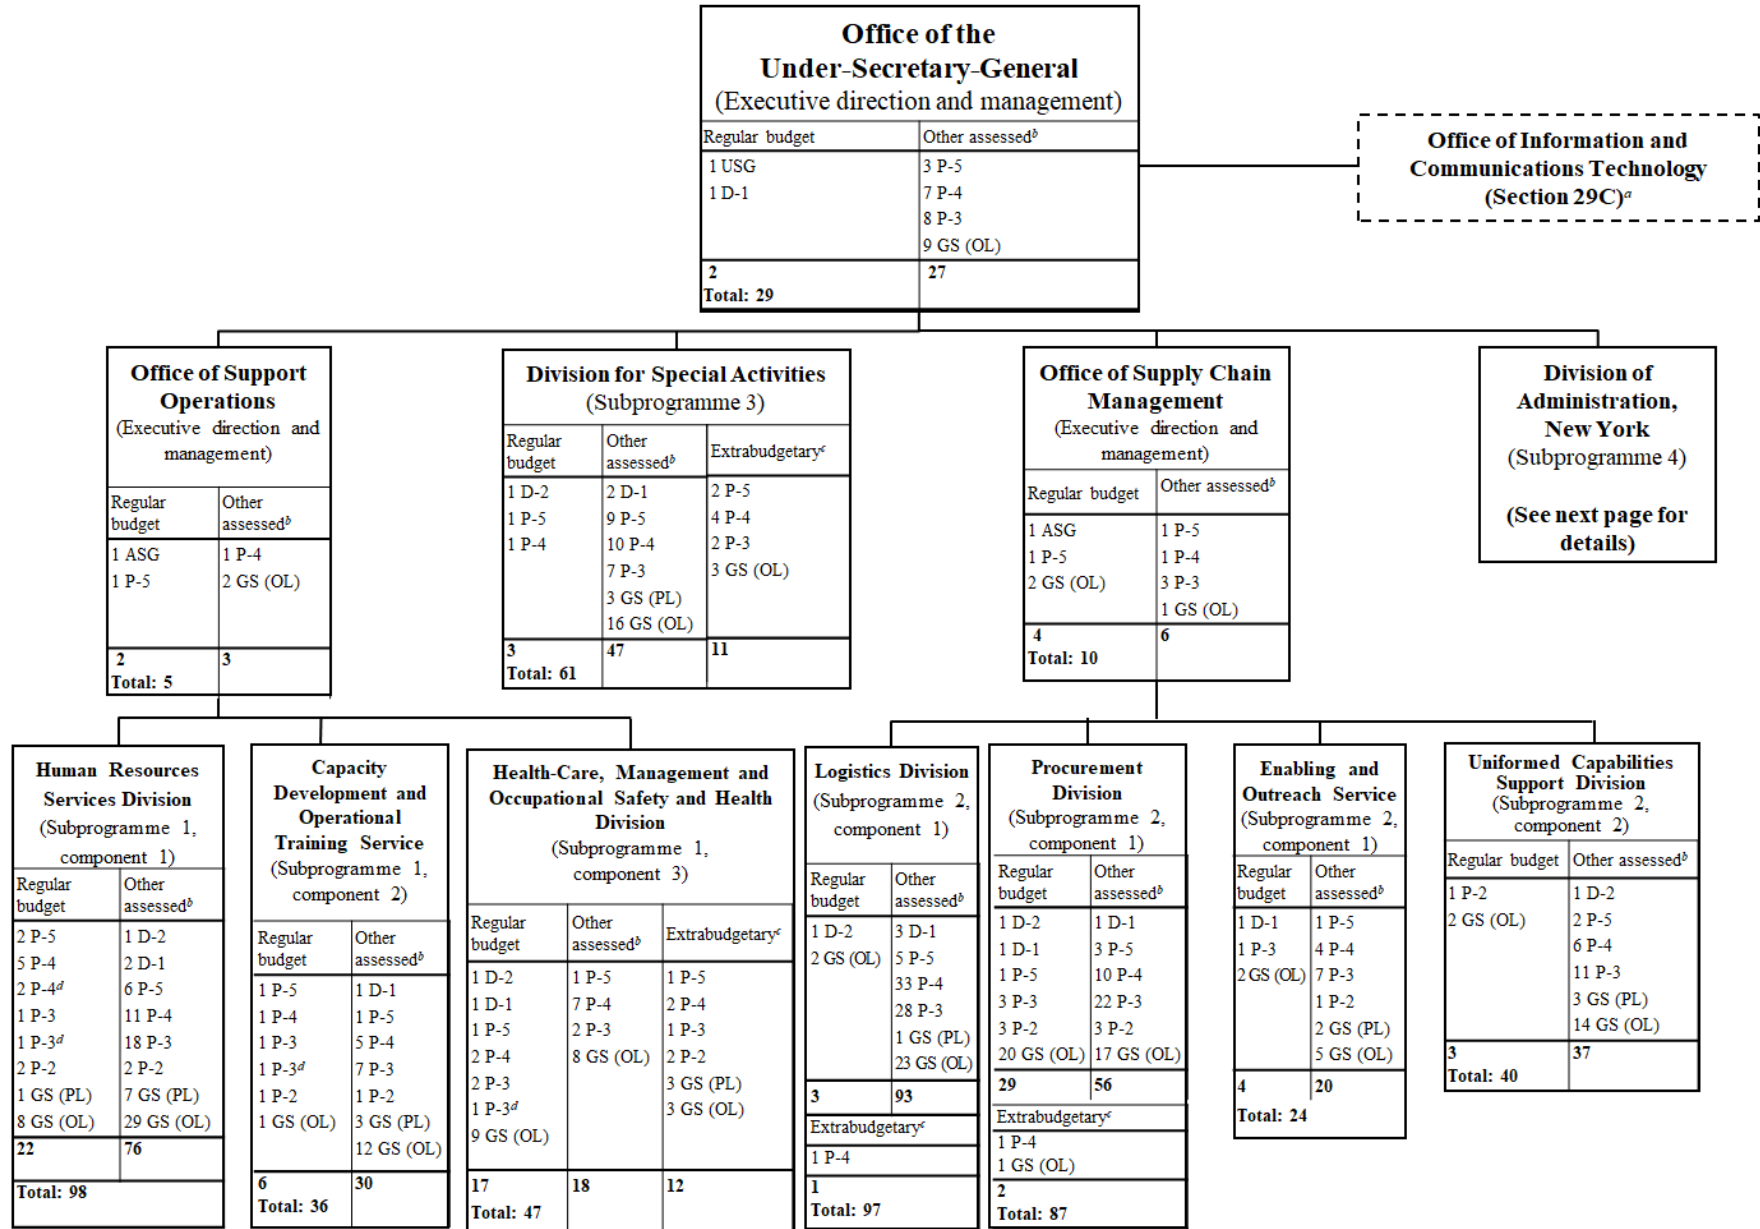

^a Dual reporting to both the Under-Secretary-General for Management Strategy, Policy and Compliance and the Under-Secretary-General for Operational Support.

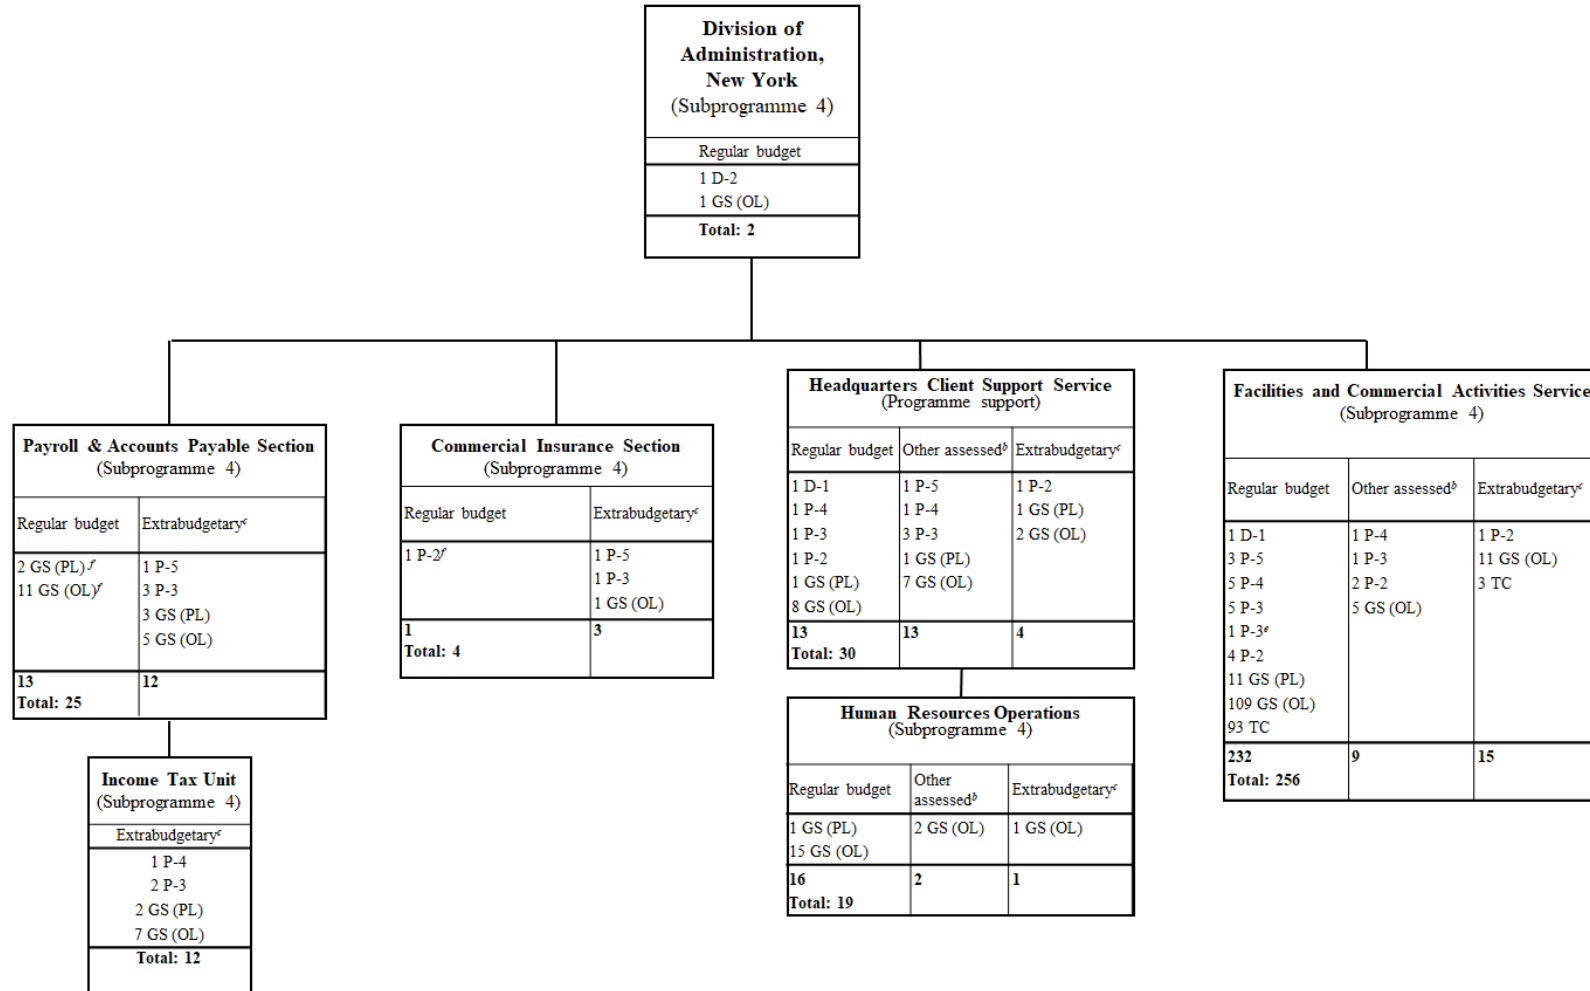

^b Other assessed based on the approved 2021/2022.

^c Extrabudgetary based on the approved 2022.

B. Proposed organizational structure and post distribution for 2023

B. Proposed organizational structure and post distribution for 2023 (continued)

Abbreviations: ASG, Assistant Secretary-General; DMSPC, Department of Management Strategy, Policy and Compliance; DOS, Department of Operational Support; GS (OL), General Service (Other level); GS (PL), General Service (Principal level); OA, other assessed; TC, Trades and Crafts; USG, Under-Secretary-General.

^a Dual reporting to both the Under-Secretary-General for Management Strategy, Policy and Compliance and the Under-Secretary-General for Operational Support.

^b Other assessed resources are based on those proposed for the period 2022/23 (see [A/76/725](#)).

^c Extrabudgetary resources are based on the estimate for 2022.

^d New post in 2022, as proposed in the revised estimates included in the report of the Secretary-General on addressing racism and promoting dignity for all in the United Nations Secretariat ([A/76/771](#)), for consideration by the General Assembly during the second resumed part of its seventy-sixth session.

^e New post.

^f Redeployment of 14 posts from the Department of Management Strategy, Policy and Compliance to subprogramme 4 of the Department of Operational Support.

Annex II

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/76/7](#) and [A/76/7/Corr.1](#)

The Advisory Committee recommends that the General Assembly request the Secretary-General to identify a safe, secure, accessible and weatherproof location within the Headquarters for the parking of bicycles, e-bikes and electric scooters, and to provide a proposal for consideration in the next programme budget submission (para. VIII.46).

The current bicycle park, located at the interior of the perimeter fence of the North Lawn, at 48th Street, continues to be in use. The security screening infrastructure installed for access control purposes during the capital master plan cannot be applied to bicycles, and any upgrade that could potentially mitigate the security considerations would require extensive planning and resources.

Annex III

Summary of proposed post changes, by component and subprogramme

<i>Component or subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 1, component 1 Human resources support	1	P-4	Establishment of 1 Human Resources Officer	The five posts have been proposed in the context of the report of the Secretary-General on addressing racism and promoting dignity for all in the United Nations Secretariat (A/76/771).
	1	P-4	Establishment of 1 Data Scientist	
	1	P-3	Establishment of 1 Business Analyst	
Subprogramme 1, component 2 Capacity development and operational training	1	P-3	Establishment of 1 Staff Development Officer	
Subprogramme 1, component 3 Health-care management and occupational safety and health	1	P-3	Establishment of 1 Staff Counsellor	
Subprogramme 1, component 1 Human resources support	1	GS (PL)	Reassignment of 1 Senior Telecommunications Assistant as Data Engineering Assistant	<p>The proposed reassignment of one senior Telecommunications Assistant (General Service (Principal level)) to Data Engineering Assistant (General Service (Principal level)) post in the Human Resources Services Division would assist the Division in implementing its mandate for analysing client performance in order to identify requirements for human resources capacity-building, continuous process improvements and changes to policies and processes on the basis of operational requirements and trends. The specialist team within the Division provides data, reports, dashboards and analytical support to guide human resources operations, business process improvement projects, facilitate policy discussions, and responds to requests from oversight and legislative bodies.</p> <p>In addition, the reassignment would augment the Division's capacity to implement its mandate and achievement of the target to increase the share of data-specialized positions across the Organization from 5 per cent to 10 per cent over the next five years as part of the Secretary-General's Data Strategy for Action by Everyone, Everywhere, which calls upon all parts of the Organization to make better use of data as a strategic asset for insight.</p>
Subprogramme 4 Administration	1	P-3	Establishment of 1 Property Management Officer	The property management function has grown significantly both in scope and complexity in line with the revised delegation of authority, trends identified through performance reports, International Public Sector Accounting Standards (IPSAS) financial reporting requirements, and the recommendations made by the Board of Auditors and oversight bodies. As set forth by the Global Asset Management Policy Service Strategic Guidance and its roll-out of the Property Management Performance Framework, the management of property at United Nations Headquarters requires the monitoring of key performance indicators on the basis of Umoja transactional data for asset accounting and financial reporting on Property Plant and Equipment and Inventory under IPSAS. The Property Management and Inventory Control Unit in the Facilities and Commercial Activities Service, Division of Administration, whose primary function has been the annual physical verification and the disposal of equipment, is now responsible for providing operational support to Headquarters entities on all matters related to property management and fixed-asset

Part VIII Common support services

<i>Component or subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
				<p>accounting. Property management is central to the provision of IPSAS-compliant financial statements and as the function has become more complex and as reporting requirements continue to expand, the capacity for this work at Headquarters has remained unchanged from prior to the implementation of IPSAS. It has become apparent that the subprogramme lacks the specialized skills in asset accounting and data analytics, supervisory continuity and capacity to adequately coordinate, support, monitor and report on the management of assets, equipment and inventory at Headquarters. Adjustments are needed to address the deficiencies and improve property management at Headquarters. The incumbent of the post would assume the fixed-asset accountant role for Headquarters, provide operational and data analytics support on property management and fixed-asset accounting to Headquarters entities and manage the Unit.</p> <p>More specifically, the incumbent would: provide advice, guidance and operational support on property management and fixed-asset accounting to Headquarters entities; analyse the health of each entity's asset holdings, provide operational and technical assistance, including development of business intelligence reports and training of technical staff, as necessary; implement processes for the accounting and management of fixed assets and inventory in all stages of the item life cycle, from classification of items to physical inspection and de-recognition process, in consultation with all stakeholders and in cooperation with Umoja; coordinate and liaise with various departments for equipment and inventory matters; ensure that data on equipment and inventory are collected in accordance with IPSAS requirements and in line with Umoja; mainstream best practices for enhanced asset/inventory management and improved quality of property records; ensure compliance with IPSAS financial reporting requirements and the Property Management Framework; monitor the performance of key performance indicators for efficient management of assets and inventories, and any other key performance indicators introduced for operational support to entities; derecognize assets that have been disposed in coordination with the responsible Headquarters entities; and act as focal point for coordinating responses to audit findings and comments as they pertain to the management of equipment and inventory.</p>
Subprogramme 4 Administration	1	P-2	Redeployment of 1 Associate Finance and Budget Officer	<p>In accordance with General Assembly resolution 72/266 B, which established the Department of Operational Support with a mandate to provide global oversight and stewardship of the Secretariat's operational support arrangements focused on operations, services, transactions and surge support, a review was undertaken to identify operational and transactional support functions that remained in the Department of Management Strategy, Policy and Compliance. Accordingly, the financial operation functions related to payroll, accounts payable and commercial insurance, along with the associated resources, are being proposed to be transferred from the Department of Management Strategy, Policy and Compliance to the Department of Operational Support.</p>
	2	GS (PL)	Redeployment of 2 Senior Finance and Budget Assistants	
	7	GS (OL)	Redeployment of 7 Accounting Assistants	
	2	GS (OL)	Redeployment of 2 Team Assistants	
	1	GS (OL)	Redeployment of 1 Finance Assistant	
	1	GS (OL)	Redeployment of 1 Administrative Assistant	

Abbreviations: GS (OL), General Service (Other level); GS (PL), General Service (Principal level).

Foreword

Over the past two years, the way in which the United Nations operates has changed significantly, with a growing reliance on information and communications technology (ICT) solutions. The global workforce has needed to adapt swiftly to the changes brought about by the coronavirus disease (COVID-19) pandemic. Such changes have in many cases continued to be made in 2022 and to have an effect as we look forward to 2023.

Following management reforms, the Office of Information and Communications Technology has benefited from integrated organization and has been working to refine processes and internal operating modalities in order to continue the process of improvement catalysed and enabled by the reforms.

In 2023, to reap the benefits of wider reform efforts, the Office will continue to implement programmes to strengthen adherence to the Data Strategy of the Secretary-General for Action by Everyone, Everywhere, including by advancing digital transformation and enhancing interoperability, with the aim to allow for the effective flow of information throughout the Organization. The Office will also work to achieve a balance in the use of ICT, fostering agility while increasing coherence, and will continue its efforts to align ICT solutions and services with the Organization's needs and to support mandate implementation.

More efforts will be made in the area of cybersecurity in 2023, with the advancement of key Secretariat-wide projects to address shortcomings and mitigate risks in an environment in which cybersecurity threats continue to evolve and grow. Work will continue on network segmentation, which is critical to safeguarding data and key ICT solutions and services. In addition, the overall cybersecurity stance of the United Nations will be strengthened through the transition to an enterprise approach to cybersecurity that is tightly integrated into the ICT solutions in use, thereby increasing functionality and protection while decreasing complexity.

Effective, resilient, secure and efficient ICT solutions and services are built on effective governance, policy and accountability frameworks and informed by the business needs of entities and field operations globally. In 2023, the work to strengthen these foundational areas will continue, with an emphasis on monitoring and compliance, to increase coherence in the use of ICT through support for the Secretariat's compliance with policies, standards and reference architectures.

As the Organization continues its efforts to fully leverage the potential of information and communications technology, it is essential that we continue to engage constructively and collaborate efficiently to achieve the means to sustain and advance ICT in a manner that is commensurate with its growth and evolution globally.

(Signed) Bernardo **Mariano, Junior**
Assistant Secretary-General
Office of Information and Communications Technology

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 29C.1 The Office of Information and Communications Technology is responsible for the delivery of information and communications technology (ICT) in the United Nations. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolutions [63/262](#) and [72/266](#) B. The impact of the coronavirus disease (COVID-19) pandemic has demonstrated the importance of ICT in supporting business continuity and mandate delivery across the Secretariat and in intergovernmental bodies.

Strategy and external factors for 2023

- 29C.2 In 2023, the Office will continue to implement programmes that support the strategic goals of ensuring an environment where interoperability allows information to flow effectively throughout the Organization, facilitating coherent and integrated mandate implementation, where ICT is leveraged as a critical operational and strategic enabler for the work of the United Nations and where the Organization is protected from rapidly escalating cybersecurity threats.
- 29C.3 Almost every aspect of the work undertaken in the United Nations relies on technology. The Office continues to provide resilient and secure global network and ICT systems, platforms and applications that enable collaboration and communication across the Secretariat and throughout the wider United Nations common system. As a principle of management reform, an effective balance between centrally provided enterprise services and solutions and those provided closest to the point of delivery is critical. In 2023, the Office will ensure that ICT operational capabilities are preserved, secured and resilient. The Office will also support mandate delivery by Secretariat entities through the development and deployment of innovative technologies and data services and solutions that facilitate their programmatic delivery.
- 29C.4 As demonstrated during the move to extended remote working arrangements during the COVID-19 pandemic, the adoption of enterprise platforms that are cloud-based, where United Nations personnel can collaborate and connect regardless of their location, proved critical for the Organization as it adapted to new internal ways of working. The shift to enterprise platforms from legacy applications will continue, leading to a more cohesive, coherent, and resilient ICT ecosystem, as will the shift to cloud-based services. As these services evolve and become ubiquitous, they will be combined with innovative and frontier technologies to provide a more effective user experience and increased interoperability. It should be noted, however, that the increased use of technology exposes the United Nations to additional risks and threats. The Office will therefore continue to adopt a balanced approach, taking into account policy, people, cybersecurity and operational delivery.
- 29C.5 In the specific context of cybersecurity, which forms one of the core areas of the Office's work, challenges continue to grow in scale, pervasiveness and complexity. In response, the Office has adopted a more effective and efficient approach to intruder detection and has initiated plans to implement proactive threat-hunting capabilities that will replace the reactive intrusion detection systems that were used previously. This transition is designed to reduce reliance on outsourced services and strengthen internal capacity, while a clear focus is kept on United Nations operations. Other key programmes of work requiring significant effort, including network segmentation, which is instrumental in containing threats and limiting the impact of successful attacks, are also under way.
- 29C.6 The Office will support efforts to transform the Organization into one that more effectively uses data and information to support decision-making and inform strategic direction. This work will be aligned with the Data Strategy of the Secretary-General for Action by Everyone, Everywhere as one

component of the Secretary-General's "quintet of change". The effective use of data across the Secretariat requires cross-cutting efforts, with the Office leading any such efforts relating to technology and the establishment of services and capacities that support the use of data in advancing the programmes of the Organization. While contributing to many of the related work streams, the Office will take the lead in the creation of technology enablers that support the exchange, reconciliation, storage and governance of data. Analytics and data solutions will also continue to be implemented, and associated standards and architecture will be formulated to achieve a consistent approach to data. Efforts will be made to improve the use of data at both the strategic and tactical level of the United Nations, with enterprise reporting as a complement to self-service reporting at the point of delivery. The Office will also support areas such as policy formulation and the governance of information management. The continued shift to cloud-based services will also be instrumental to the implementation of the Data Strategy, because such services reduce barriers to combining and sharing data, and enable multiple entities within the Secretariat, as well as Member States and partners, to contribute to and improve data sets in all areas of United Nations work.

- 29C.7 Innovation is one of the Office's core areas of work, and the Office will continue to provide access to technologies that can support a wide range of needs across the United Nations. Frontier technologies, such as artificial intelligence, blockchain and computer vision, will support the work of the Organization and mandate delivery globally, such as through the use of machine-learning computer systems to reduce manual work. Conversational artificial intelligence has already been applied to ensure more intuitive and efficient access to information. These solutions are designed to be foundational, to ensure that they can be integrated into the various systems in use across the Organization.
- 29C.8 The Office will advance its work in digital transformation, strengthening project and programme management to ensure that all ICT- and data-related projects are implemented in accordance with prevailing industry project and programme management methodologies. The Office will also systematize the management of relationships with partners both within the Secretariat and externally.
- 29C.9 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.
- 29C.10 With regard to inter-agency coordination and liaison, the Office will continue to collaborate with agencies, funds and programmes, in accordance with General Assembly resolution [69/262](#). This will be done through the United Nations System Chief Executives Board for Coordination Digital and Technology Network, which is co-chaired by the Assistant Secretary-General/Chief Information Technology Officer and serves as a structured mechanism to collaborate, harmonize and explore possibilities for shared ICT services. The Office will also continue to ensure access to Secretariat platforms for personnel from United Nations agencies, funds and programmes, in order to facilitate collaboration across the larger United Nations common system and support coherence in mandate delivery.
- 29C.11 With regard to the external factors, the overall plan for 2023 is based on the planning assumption that adequate and sustainable funding is required for the Office to support mandate delivery by the global Secretariat.
- 29C.12 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate. The Office will continue to work with the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) and the Office of Human Resources on efforts to improve outreach to increase the participation of women in ICT throughout the Secretariat.
- 29C.13 In line with the United Nations Disability Inclusion Strategy, the Office will continue to improve the accessibility of enterprise applications and public information websites for persons with disabilities,

including by adding functionality to, remediating or configuring existing websites and applications in accordance with the established Accessibility Guidelines for United Nations Websites.

Programme performance in 2021

Impact of the pandemic

- 29C.14 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular owing to travel restrictions, which led to delays in the conduct of cybersecurity assessments in field missions, for which strengthened cybersecurity protection may be needed, and in the support for the development of the peacekeeping technology strategy under subprogramme 1. It also affected the deployment of fuel and rations management scanners to field missions under subprogramme 3 and the deployment of the Unite Aware platform to two additional peace operations under subprogramme 2. Furthermore, the data symposium was cancelled, which resulted in subprogramme 1 stepping up its efforts to coordinate data awareness and outreach activities across the Secretariat.
- 29C.15 In order to support Member States on issues related to the COVID-19 pandemic, within the overall scope of the objectives, the Office also addressed a number of complex issues related to interoperability, information security and information management, which proved instrumental in ensuring that the work of the Organization and its support to Member States could continue uninterrupted.

Legislative mandates

- 29C.16 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

63/262	Information and communications technology, enterprise resource planning, and security, disaster recovery and business continuity	71/272 B, sect. III	Special subjects relating to the programme budget for the biennium 2016–2017: status of implementation of the information and communications technology strategy for the United Nations
69/262 , sect. II	Questions relating to the programme budget for the biennium 2014–2015: information and communications technology in the United Nations	72/262 C, sect. I	Special subjects relating to the programme budget for the biennium 2018–2019: status of implementation of the information and communications technology strategy for the United Nations
70/248 A, sect. V	Special subjects relating to the proposed programme budget for the biennium 2016–2017: information and communications technology in the United Nations		

Deliverables

- 29C.17 Table 29C.1 lists all cross-cutting deliverable of the programme.

Evaluation activities

- 29C.18 The evaluations of the accountability system of the United Nations Secretariat with regard to its enterprise information systems and the review of the management of data classification and data privacy in the Secretariat, completed by the Office of Internal Oversight Services (OIOS) in 2021, have guided the proposed programme plan for 2023.
- 29C.19 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2023.
- 29C.20 As part of the review of the management of data classification and data privacy in the Secretariat, recommendations were made for a number of actions to strengthen data classification and privacy arrangements for the Secretariat. In the area of data classification, a technical procedure has been established for classifying data managed in ICT applications throughout the different stages of an application's life cycle. A technical procedure was also established to identify the roles and responsibilities in the process. The procedure refers to and provides support for the planned results under subprogramme 1 in the area of seamless data access for all personnel and the management of master data. With regard to privacy, the Office is working closely with United Nations entities in an effort led by the Office of Legal Affairs to develop a data protection and privacy policy for the Organization that would serve as a basis for guiding the implementation of the recommendations listed in the OIOS report.
- 29C.21 An evaluation of compliance with established standards and procedures for ICT efficiency, interoperability and cybersecurity is planned for 2023.

Programme of work

Subprogramme 1 Strategy and technology innovation

Objective

- 29C.22 The objective, to which this subprogramme contributes, is to enhance an innovative, secure, unified digital space for the United Nations.

Strategy

29C.23 To contribute to the objective, the subprogramme will continue to focus on the establishment of strategies, policies and governance, including the development of a new information and communications technology strategic framework, the establishment of technical procedures and guidelines, and a review of standards and architecture. Specifically, the subprogramme will:

- (a) Provide advisory services covering information technology, innovation and information management, including cybersecurity management services;
- (b) Develop technology road maps to envisage and define how United Nations technologies should be implemented, taking into account organizational needs, as well as strategic direction and innovation;
- (c) Work closely with United Nations clients to identify their key data, information and technology requirements or challenges and, in close collaboration with internal and external partners, provide innovative, integrated and secure technology solutions, such as artificial intelligence, machine learning and distributed ledger technology, and an enabling environment to meet clients' needs;
- (d) Support United Nations entities in reducing the level of risk to the image, resources, data, operations and safety of the personnel and assets of the United Nations and ensure that information security risks do not hamper efforts to implement United Nations mandates or adversely affect support to Member States, through the provision of specific security guidance, the performance of system security reviews and the conduct of information security awareness training;
- (e) Promote information security campaigns and the use of advanced security features, support and implement security measures, and strengthen proactive threat management capabilities;
- (f) Establish the open source programme, which is primarily aimed at advancing the adoption and use of open source technology, establishing effective and efficient processes for leveraging incoming and outgoing community contributions and connecting with the ever-growing networks of the open source community operating in the public and private sectors;
- (g) Promote the effective use of data, facilitate access to data across the Organization by leveraging modern technology, strengthen data literacy by co-leading the implementation of the Data Strategy of the Secretary-General and govern information and data management.

29C.24 The above-mentioned work is expected to result in:

- (a) Better awareness of innovation techniques and new technologies, and increased capacity for Secretariat entities to deliver on mandates;
- (b) The strengthened resilience of the Organization, better awareness of threats by end users and the reduced vulnerability of the digital data and infrastructure of the United Nations;
- (c) Integrated, secure and innovative use of information and data by departments and offices;
- (d) A coherent ICT landscape in the Secretariat through compliance with policies, procedures and guidelines as well as common standards, strategies and architecture.

Programme performance in 2021

Enhanced data sharing and reduced risk of security breaches

29C.25 In 2020 and 2021, the subprogramme worked on data policies and technical procedures to support consistent data practices and data sharing, and started development on a unified data architecture for the Organization. This work was undertaken under the technology environment pillar of the Data Strategy of the Secretary-General, with a view to achieving the Secretary-General's vision of a whole-of-United Nations ecosystem for the better discovery, use and protection of the Organization's data assets. In the area of information security, to reduce the level of risk of security breaches, the subprogramme developed a global incident response capability and performed information security

assessments. This has created opportunities for using new technologies to support innovation and data sharing, while also ensuring that the appropriate level of security is applied to reduce the risk to data and assets across the Organization.

29C.26 Progress towards the objective is presented in the performance measure below (see table 29C.2).

Table 29C.2
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
Reduction of the Organization’s exposure to security risks through the establishment of the global incident response capability and the conduct of information security assessments	<ul style="list-style-type: none"> Adoption by departments of new data policies and procedures, such as the data classification technical procedure, which streamlines the data-sharing process to improve decision-making Improved access to and sharing of information across the Organization through the information management framework 	Reduction of the Organization’s exposure to security risks through the conduct of information security assessments

Planned results for 2023

Result 1: mainstream the use of artificial intelligence

Programme performance in 2021 and target for 2023

29C.27 The subprogramme’s work contributed to United Nations offices and departments having access to seven additional artificial intelligence capabilities and to conversational artificial intelligence capabilities allowing them to obtain information from multiple sources more easily, more precisely and with better context, which met the planned target.

29C.28 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29C.3).

Table 29C.3
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
<ul style="list-style-type: none"> Building of United Nations context-aware language understanding capabilities Development of artificial intelligence-based chatbot prototype, Alba 	<ul style="list-style-type: none"> Users have access to conversational artificial intelligence to find information Availability of 9 artificial intelligence capabilities for offices and departments 	<ul style="list-style-type: none"> Availability of 7 additional artificial intelligence capabilities (COVID-19 acronyms in the United Nations Terminology Database, the Knowledge Gateway platform, information sensitivity, 	<ul style="list-style-type: none"> Availability of conversational artificial intelligence in 3 official languages of the United Nations 	<ul style="list-style-type: none"> Adoption and use by client departments of new conversational artificial intelligence interfaces, including short message service (SMS) texting and Amazon Alexa, in their operations

Part VIII Common support services

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
		personal preparedness, document search in Microsoft Teams and events at United Nations duty stations) for offices and departments • Inclusion of conversational artificial intelligence capabilities in applications (e.g. the website of the United Nations Information System on the Question of Palestine)		

Result 2: seamless access to United Nations data for all personnel

Programme performance in 2021 and target for 2023

29C.29 The subprogramme’s work contributed to providing entities, including the Office for Disarmament Affairs, the Economic and Social Commission for Asia and the Pacific (ESCAP) and the Travel Section of the Department of Operational Support, with access to authoritative data sets supporting decision-making processes, which met the planned target.

29C.30 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29C.4).

Table 29C.4
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
–	–	Users in 3 entities (the Office for Disarmament Affairs, ESCAP and the Travel Section of the Department of Operational Support) have access to authoritative data sets supporting decision-making processes	An additional 6 entities have access to authoritative data sets which help users in a wide array of decision-making processes	Data catalogue becomes an integral component of the enterprise data architecture and is accessible to 10 entities for decision-making

Result 3: enhanced management of the Organization’s master data

Proposed programme plan for 2023

29C.31 In the Data Strategy of the Secretary-General, emphasis is placed on the important role of master data in achieving higher quality data and better interoperability. Master data is the core data used in multiple applications and processes across the Organization. The management of master data involves the application of best practices and methods to define and establish a single, trusted view of data throughout the Organization. The subprogramme conducted an analysis of the current state of master data management in the Organization, identified key stakeholders and completed a proposal for a master data management framework.

Lessons learned and planned change

29C.32 The lesson for the subprogramme was that the lack of centralized management of master data resources reduced the ability to utilize and repurpose the full scope of data assets in the Organization. In applying the lesson, the subprogramme will strengthen the data ecosystem by providing a master data management platform that is both aligned with the Data Strategy of the Secretary-General and integrated with the data exchange platform, in order to reinforce the data collection and consolidation, data stewardship and data quality processes. A central platform for managing master data will improve data consistency and accuracy, minimize the duplication of master data sets and, most importantly, promote a common understanding on the use of the data.

29C.33 Expected progress towards the objective is presented in the performance measure below (see table 29C.5).

Table 29C.5
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	Assessment of the current status of master data in the Organization to identify departments’ master data sets	Initial master data registry available for users to access	Departments and offices have access to improved master data that have been assessed to ensure consistency and accuracy, minimizing duplication and enabling a common understanding of the use of data

Deliverables

29C.34 Table 29C.6 lists all deliverables of the subprogramme.

Table 29C.6

Subprogramme 1: deliverables for the period 2021–2023, by category and subcategory*Category and subcategory***E. Enabling deliverables**

Information and communications technology: ICT and information management policies and standards; enterprise architecture framework and compliance oversight mechanism; analytics and innovation guidelines for oversight and accountability; analytics and frontier technology solutions accessible to Secretariat entities; repeatable technology solutions and conversational artificial intelligence solutions; expert advice to Secretariat entities on information management; policies and procedures for data privacy and mechanisms for oversight of adherence to data privacy principles; disaster recovery plan for critical systems; and information security framework across Secretariat entities, comprising a framework document on information security and security assessment of systems and entities.

Subprogramme 2

Operations support

Objective

- 29C.35 The objective, to which this subprogramme contributes, is to achieve an optimized ICT infrastructure and technology environment for all United Nations entities, within which the Organization's global technology solutions, systems and applications are used securely and in an intuitive manner.

Strategy

- 29C.36 To contribute to the objective, the subprogramme will continue to implement and upgrade enterprise systems and infrastructure to enable the Secretariat and Member States to effectively deliver on the Organization's work. Specifically, the subprogramme will:
- (a) Enable broader collaboration and the sharing of information by implementing global enterprise solutions that give users a single place to meet, communicate, share files and collaborate within the larger United Nations common system;
 - (b) Enable enterprise systems and infrastructure to operationalize the Data Strategy of the Secretary-General by implementing self-service analytics and other advanced analytics tools;
 - (c) Implement and support other data-driven initiatives, such as the Unite Aware situational awareness technology platform, which will continue to be rolled out globally and will support data-driven decision-making by senior management in peace operations;
 - (d) Continue to implement hybrid cloud hosting, which is transforming how the Organization hosts its data and applications, and consolidate the Organization's data, primarily in a United Nations-managed cloud environment;
 - (e) Create a cross-cutting client service desk approach to carry out the Secretariat's customer relationship management activities and to provide around-the-clock support for enterprise applications such as Umoja, Inspira and Unite Mail;
 - (f) As requested by Member States, support intergovernmental meetings through a hybrid model that caters to both in-person and remote participants.
- 29C.37 The above-mentioned work is expected to result in:
- (a) The facilitation of mandate delivery by Secretariat entities by a modern, resilient and secure global ICT infrastructure;
 - (b) Greater collaboration across the United Nations common system that supports the Secretariat in the execution of its mandates with greater agility;

- (c) A modern and secure technology environment that provides simplified access to the Organization’s data and serves as the foundation for the Data Strategy of the Secretary-General;
- (d) An expanded and highly capable cadre and user base that is familiar with the systems and processes to create data-driven insights and present data-driven information for decision makers in an optimal way;
- (e) Timely resolution of incidents and service requests, with end users expressing increased satisfaction with ICT enterprise services, which serves to increase engagement and communication with clients;
- (f) Improvements in the access to complex intergovernmental meetings, such as in respect of remote participation, the access of secretariat services to verbatim report-writing and translation, and the access of other audiences to interpretation, broadcasting and webcasting capabilities.

Programme performance in 2021

Technology towards a connected United Nations

29C.38 The rapid move to remote working in many duty stations due to the COVID-19 pandemic highlighted the criticality of ICT to support the business continuity and mandate delivery of the United Nations. The subprogramme delivered fit-for-purpose ICT infrastructure and platforms that allowed the Organization to connect, collaborate and communicate, utilizing a suite of collaboration and communication tools such as Unite Mail and Unite Workspace. Specifically, the subprogramme enhanced its client service desk approach, including by providing around-the-clock support for enterprise applications such as Umoja, Inspira and Unite Mail, enabling the Secretariat to thrive as a digital workforce, while contributing to an increase in customer satisfaction with Unite Service Desk services.

29C.39 Progress towards the objective is presented in the performance measure below (see figure 29C.I).

Figure 29C.I

Performance measure: percentage of customers satisfied with services delivered (annual)

(Percentage)

Planned results for 2023

Result 1: improved collaboration

Programme performance in 2021 and target for 2023

29C.40 The subprogramme’s work contributed to the enhanced ability of clients to communicate, collaborate and perform self-service analytics in a timely manner through the deployment of Microsoft Teams, SharePoint, cloud services and related technologies, which met the planned target.

29C.41 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29C.7).

Table 29C.7
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Unite Service Desk consolidated further tier 1 service desks; resolution time decreased by more than 50 per cent; and Unite Service Desk achieved an all-time high average customer satisfaction rate of 93 per cent	Clients have access to real time solutions, including the new collaborative tools, to resolve issues quickly	Enhanced ability of clients to communicate, collaborate and perform self-service analytics	Clients have improved access to real-time solutions and collaboration tools, including use of artificial intelligence and machine-learning methods	Clients repurpose artificial intelligence and machine-learning tools to serve bespoke use cases and needs, to enable data-driven decision-making

Result 2: enhanced situational awareness for decision makers

Programme performance in 2021 and target for 2023

29C.42 The subprogramme’s work contributed to continued situational awareness in the United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic (MINUSCA) by providing a secure and centralized solution to capture critical information related to incidents, events and activities in field missions, which decision makers could use to manage crisis situations, which did not meet the planned target regarding the availability of the Unite Aware platform to two additional peace operations. The target was not met because of continuing challenges pertaining to COVID-19, such as the inability to travel to locations to support implementation and missions’ realignment of resources to address more urgent needs.

29C.43 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29C.8).

Table 29C.8
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
MINUSCA pilot of Unite Aware platform	Availability of Unite Aware platform in MINUSCA	Continued situational awareness in MINUSCA, including new modules for medical situational awareness and further online training modules made available on the platform	Availability of Unite Aware platform to 4 additional peace operations	Availability of Unite Aware platform to 3 additional peace operations

Result 3: modernization of voice communications

Proposed programme plan for 2023

29C.44 The United Nations has a voice communications network consisting of many Private Automatic Branch Exchange and IP telephony systems that provide desktop extensions and voice services to United Nations staff. These telephony systems are costly and became underutilized during the COVID-19 pandemic as staff moved to digital platforms and worked remotely.

Lessons learned and planned change

29C.45 The lesson for the subprogramme was that ICT services need to be moved online, in order to provide users with a similar and intuitive digital experience that supports mobility and a hybrid working environment and enable the greater inclusion of people with disabilities. In applying the lesson, the subprogramme will migrate the existing legacy telephony system from United Nations Headquarters in New York to the online Microsoft Teams Phone System. This system will be cost-effective and will be integrated into the Microsoft Teams platform currently used by staff for collaboration and meetings, and will provide all the features required to replace the legacy telephony system, including with regard to placing local and international calls.

29C.46 Expected progress towards the objective is presented in the performance measure below (see figure 29C.II).

Figure 29C.II
Performance measure: number of users with access to desktop telephone services using Microsoft Teams

Deliverables

29C.47 Table 29C.9 lists all deliverables of the subprogramme.

Table 29C.9
Subprogramme 2: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Conference and secretariat services for meetings (number of three-hour meetings)	33 434	33 230	33 251	33 500
Meetings of intergovernmental and expert bodies globally	33 434	33 230	33 251	33 500
E. Enabling deliverables				
Information and communications technology: hardware and infrastructure, and software and applications.				

Subprogramme 3 Enterprise solutions

Objective

- 29C.48 The objective, to which this subprogramme contributes, is to ensure effective and efficient implementation of the mandates of Secretariat entities.

Strategy

- 29C.49 To contribute to the objective, the subprogramme will:
- (a) Continue to develop bespoke applications and software solutions that support mandate delivery and the Sustainable Development Goals by partnering with Secretariat entities, including online platforms designed for the Sendai Framework for Disaster Risk Reduction 2015–2030 and used by the United Nations Office for Disaster Risk Reduction, and solutions used by the United Nations Environment Programme (UNEP) to combat plastic pollution in rivers;
 - (b) Enhance identity management by leveraging cloud technology, implement application integration through electronic data exchanges, upgrade service management solutions, enhance talent management, manage the United Nations safety and security information systems, and support enterprise web content management and knowledge management solutions;
 - (c) Continue to work with Umoja on uniformed capabilities management and fundraising solutions.
- 29C.50 The above-mentioned work is expected to result in:
- (a) Users enabled to operate applications and equipment with one single identity;
 - (b) Further automation of administrative support processes;
 - (c) Faster recruitment and onboarding of personnel;
 - (d) Increased availability of information for professional security officers to perform their duties of protecting United Nations personnel across the United Nations system;
 - (e) More timely reimbursements to troop- and police-contributing countries;
 - (f) Facilitation of contributions to the Sustainable Development Goals through technology solutions, as articulated by programmatic mandates;
 - (g) Improved information-sharing between and among the Organization's stakeholders, including enhanced coordination and cooperation within and across the Secretariat and the broader United Nations system.

Programme performance in 2021

Database of acts of violence against United Nations personnel serving in peacekeeping operations

- 29C.51 In response to serious concerns and challenges with regard to bringing perpetrators of violence against United Nations personnel to justice, the Security Council, in its resolution [2589 \(2021\)](#), called for the establishment of a comprehensive online database of cases related to the killing of and all acts of violence against United Nations personnel serving in peacekeeping operations. In the same year that the resolution was adopted, the subprogramme partnered with the Department of Peace Operations and completed information-gathering and analysis of requirements, conducted scoping, determined feasibility and assessed ways to ensure the protection of sensitive information. This enabled the identification of an appropriate information management solution to implement resolution [2589 \(2021\)](#) effectively.

29C.52 Progress towards the objective is presented in the performance measure below (see table 29C.10).

Table 29C.10
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	–	Information management solution identified to establish an online database of cases related to the killing of and all acts of violence against United Nations personnel serving in peacekeeping operations

Planned results for 2023

Result 1: United Nations external partners to collaborate with the Organization on any device from any location

Programme performance in 2021 and target for 2023

29C.53 The subprogramme’s work facilitated access for 10,250 external accounts of United Nations partners, which exceeded the planned target of a total of 5,676 accounts.

29C.54 Progress towards the objective and target for 2023 is presented in the performance measure below (see figure 29C.III).

Figure 29C.III

Performance measure: number of external accounts of authorized United Nations partners (cumulative)

Result 2: timely custom information technology solutions for mandate delivery

Programme performance in 2021 and target for 2023

29C.55 The subprogramme’s work contributed to providing three additional ICT solutions to support the mandate delivery of the United Nations Office for Disaster Risk Reduction, UNEP and the United Nations Office on Drugs and Crime (UNODC), which met the planned target.

29C.56 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29C.11).

Table 29C.11
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	<ul style="list-style-type: none"> • Technology Facilitation Mechanism in use by the Department of Economic and Social Affairs • FeedUP@UN in use by the Economic Commission for Europe • Fourth edition of Sendai Framework monitoring solution in use by the United Nations Office for Disaster Risk Reduction 	<ul style="list-style-type: none"> • Making Cities Resilient campaign in use by the United Nations Office for Disaster Risk Reduction • Global Partnership on Marine Litter in use by UNEP • Data collection and analysis platform in use by UNODC 	Three additional information technology solutions available to support mandate delivery by Secretariat entities	Three additional information technology solutions available to support mandate delivery by Secretariat entities

Result 3: enhanced standards, security, multilingualism and accessibility of United Nations public information websites

Proposed programme plan for 2023

29C.57 ICT standards and compliance requirements for public websites constantly evolve to meet the needs of the Organization, the public website authors and diverse audiences. The enterprise web content management platform provides public website authoring entities in the Organization with the ability to more easily deploy new websites that are compliant in the areas of information security, usability, United Nations branding, multilingualism and accessibility for persons with disabilities. Use of the platform allows authoring entities to manage the content of their public websites without the need for specialized technical skills, while leveraging economies of scale for platform support and operations. The subprogramme has onboarded seven public websites on the Enterprise Content Management platform in 2021 for: the Security Council Committee established pursuant to resolution [1373 \(2001\)](#) concerning counter-terrorism; the Office of the United Nations Ombudsman and Mediation Services; the Office of the Special Adviser on Africa; the Department of Economic and Social Affairs, on forest financing; the Office for Disarmament Affairs, on the United Nations Platform for Nuclear-Weapon-Free Zones; the Office for Outer Space Affairs, on space sustainability; and the Office of Legal Affairs, on ocean affairs and the law of the sea.

Lessons learned and planned change

29C.58 The lesson for the subprogramme was to identify opportunities for improving the user experience of the enterprise platform for managing public websites and to shift the paradigm of delivering enhancements to a more iterative and agile approach in which continuous improvements are made to security, branding, accessibility and multilingualism compliance. In applying the lesson, the subprogramme will migrate public websites from legacy platforms to the enterprise platform, which is continually evolving to address new standards, compliance requirements and projects, to onboard seven additional websites per year.

29C.59 Expected progress towards the objective is presented in the performance measure below (see figure 29C.IV).

Figure 29C.IV
Performance measure: number of websites hosted on the Enterprise Content Management platform

Deliverables

29C.60 Table 29C.12 lists all deliverables of the subprogramme.

Table 29C.12
Subprogramme 3: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory

E. Enabling deliverables

Information and communications technology: content management, communications and collaboration solutions to all Secretariat personnel and external partners; ongoing development and support for the enterprise web management platform, including security, standards and multilingualism compliance, used by Secretariat entities, field missions and permanent missions; enterprise talent and performance management solutions for around 55,000 users; Umoja support, including uniformed capabilities management and fundraising functionality; support of service management solutions for approximately 25,500 users; safety and security solutions for 60,000 users; solutions to implement Security Council resolution [2589 \(2021\)](#) in tracking crimes committed against United Nations peacekeepers; solution for the recruitment of local police by the United Nations police in peacekeeping operations; integration of the misconduct case tracking system with the Inspira recruitment system to strengthen the Organization’s efforts in combating all types of misconduct; business intelligence capabilities to enable field missions to enhance their operational efficiency and strategic planning; solutions to support the mandate delivery of programmatic entities such as the United Nations Office for Disaster Risk Reduction, UNEP and UNODC; application integration mechanism used by 52 applications.

B. Proposed post and non-post resource requirements for 2023

Overview

29C.61 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 29C.13 to 29C.15.

Table 29C.13

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2021 expenditure	2022 appropriation	Changes					2023 estimate (before recosting)
			Technical adjustments	New/ expanded mandates	Other	Total	Percentage

Total	182	–	–	–	–	182

^a Includes two temporary posts (1 P-4 and 1 P-2).

29C.62 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 29C.16 to 29C.18 and figure 29C.V.

29C.63 As reflected in tables 29C.16 (1) and 29C.17 (1), the overall resources proposed for 2023 amount to \$52,728,900 before recosting, reflecting a net increase of \$38,400 (or 0.1 per cent) compared with the appropriation for 2022. Resource changes result from two factors, namely: (a) technical adjustments; and (b) other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Table 29C.16

Overall: evolution of financial resources by source of funding, component and subprogramme

(Thousands of United States dollars)

(1) *Regular budget*

 (Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

29C.64 As reflected in table 29C.16 (1), resource changes reflect a net increase of \$38,400, as follows:

- (a) **Executive direction and management:** an increase of \$41,500 related to the higher provision for one post of Procurement Assistant (General Service (Other level), reassigned in 2022

pursuant to General Assembly resolution 76/245, which was subject to a 50 per cent vacancy rate in accordance with the established practice for the costing of reassigned posts;

- (b) **Subprogramme 2, Operations support:** a decrease of \$3,100 under contractual services related to the removal of non-recurrent requirements for the intergovernmental conference on an international legally binding instrument under the United Nations Convention on the Law of the Sea on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction, pursuant to General Assembly decision 75/570.

Other changes

29C.65 As reflected in table 29C.18 (1), the net effect of the proposed resource changes is cost-neutral. The breakdown of changes is as follows:

- (a) Subprogramme 1, Strategy and technology innovation:
 - (i) Under post resources, an increase of \$11,700, due to the proposed redeployment of one post of Chief of Section (P-5) from Vienna to Valencia, Spain (see annex III);
 - (ii) Under non-post resources, a net decrease of \$11,700, resulting from reduced requirements under furniture and equipment (\$11,700) and travel of staff (\$1,100), partly offset by an increase under contractual services (\$1,100);
- (b) Subprogramme 3, Enterprise solutions:
 - (i) Under post resources, an increase of \$2,000, due to the proposed redeployment of one post of Associate Information Systems Officer (P-2) from Bangkok to Valencia (see annex III);
 - (ii) Under non-post resources, a net decrease of \$2,000, resulting from reduced requirements under contractual services (\$2,100), partly offset by an increase under travel of staff (\$100).

Other assessed resources

29C.66 As reflected in tables 29C.16 (2) and 29C.17 (2), the Office of Information and Communications Technology is supported by other assessed resources, estimated at \$35,827,000, including 52 posts, as well as non-post resources. The projected level of ongoing ICT support services reflects the streamlining of services provided to peacekeeping operations, combining services where global solutions are available. Other assessed resources represent 23.3 per cent of the total resources for the Office.

Extrabudgetary resources

29C.67 As reflected in tables 29C.16 (3) and 29C.17 (3), the Office of Information and Communications Technology expects to receive extrabudgetary contributions, estimated at \$65,443,900, including through cost recovery from United Nations Headquarters client entities, peacekeeping operations and special political missions, to provide for 12 posts, as well as non-post resources. The resources, which include central costs recovered from departments and offices, would provide for ICT services offering users a personal computing core package that includes email, collaboration and communication tools, network access, a telephone system, service desk support for computers and desktop and enterprise applications. This would include the development and deployment of tailored technology solutions to support mandate delivery by substantive departments and offices, such as solutions that help to ensure the safety and security of United Nations system personnel, the training of uniformed personnel, rapid deployment, public broadcasting and data analysis capabilities. Extrabudgetary resources represent 42.5 per cent of the total resources for the Office.

29C.68 The extrabudgetary resources under this section are subject to the oversight of the Office of Information and Communications Technology, which has delegated authority from the Secretary-General.

Executive direction and management

29C.69 The executive direction and management component comprises the Office of the Assistant Secretary-General for Information and Communications Technology and the Enterprise Programme Management section. Under General Assembly resolutions 69/262, 70/248 and 71/272 B, the central authority of the Chief Information Technology Officer was reaffirmed and strengthened with regard to information security and the overall direction and performance of ICT activities within the Organization.

29C.70 The overall responsibilities of the executive direction and management component include the following functions:

- (a) To provide overall strategic direction and central leadership for the establishment and implementation of Organization-wide ICT;
- (b) To plan and coordinate ICT activities Secretariat-wide, including infrastructure and enterprise systems, with a view to achieving coherence and coordination in the area of ICT within the work of the United Nations and between the Secretariat and funds, programmes and specialized agencies of the Organization;
- (c) To provide overall strategic planning and management and coordinate the work of the internal organizational units.

29C.71 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Office of Information and Communications Technology is integrating environmental management practices into its operations. For 2023, the Office will continue to provide departments and offices with solutions to support the achievement of the Goals and will continue to reduce its infrastructure footprint in data centres by moving to the cloud, thus reducing its environmental impact.

29C.72 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 29C.19. In 2021, despite significant improvement, the travel compliance rate was influenced by travel restrictions related to the COVID-19 pandemic, resulting in short-notice changes in travel.

Table 29C.19
Compliance rate
(Percentage)

	<i>Actual 2019</i>	<i>Actual 2020</i>	<i>Actual 2021</i>	<i>Planned 2022</i>	<i>Planned 2023</i>
Timely submission of documentation	100	n/a	n/a	n/a	100
Air tickets purchased at least 2 weeks before the commencement of travel	44	33	63	100	100

Abbreviation: n/a, not applicable.

29C.73 The proposed regular budget resources for 2023 amount to \$3,207,000 and reflect an increase of \$41,500 compared with the appropriation for 2022. The proposed increase is explained in paragraph 29C.63 (a) above. Additional details on the distribution of the proposed resources for 2023 are reflected in table 29C.20 and figure 29C.VI.

Table 29C.20

Figure 29C.VI
Executive direction and management: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed resources

29C.74 Other assessed resources for executive direction and management are estimated at \$15,798,700 and would provide for the Umoja maintenance and support provided under the support account for peacekeeping operations. The budget level proposed for the 2022/23 period reflects an increase of \$307,500, due mainly to the growth of equipment requirements and hosting services to store additional data and services.

Extrabudgetary resources

29C.75 Extrabudgetary resources for 2023 are estimated at \$1,018,100 and would provide for general temporary assistance and other non-post costs to support the Enterprise Programme Management Section in the overall management of the programme.

Programme of work

**Subprogramme 1
Strategy and technology innovation**

29C.76 The proposed regular budget resources for 2023 amount to \$10,304,100 and reflect no change to the overall resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 29C.21 and figure 29C.VII.

Table 29C.21

Subprogramme 1: evolution of financial and post resources

(Thousands of United States dollars/number of posts)

	2021 expenditure	2022 appropriation	Changes			Total	Percentage	2023 estimate (before recosting)
			Technical adjustments	New/ expanded mandates	Other

General Service and related		11	–	–	–	–	–	11
Total		36	–	–	–	–	–	36

Figure 29C.VII

Subprogramme 1: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed resources

29C.77 Other assessed resources for the subprogramme, under the support account for peacekeeping operations, are estimated at \$1,794,800 and would provide for four posts (1 P-4, 2 P-3 and 1 P-2), as well as non-post resources. The resources would support the protection of ICT assets from cyberthreats through the strengthening of ICT security.

Extrabudgetary resources

29C.78 Extrabudgetary resources for the subprogramme are estimated at \$3,855,500. The non-post resources would enable the provision of integrated services to allow data to be transferred effectively and securely between systems in alignment with data governance processes that are being instituted as part of the Secretary-General’s data strategy. In addition, the existing technology implementation will be expanded to support the core work of the Secretariat by integrating emerging technology solutions with systems that make the greatest use of structured and unstructured data and information. Cybersecurity, policy and innovation technology are foundational to the broader work being undertaken by the Office of Information and Communications Technology to implement systems and solutions through extrabudgetary resources and, as part of subprogramme 1, resources would be used to ensure compliance with standards, architecture and cybersecurity. The United Nations conversational artificial intelligence platform is being implemented, and its integration with a wide variety of systems and data sources, as well as its expansion to address requirements related to multilingualism and accessibility, will be addressed. The resources would enable the Office to meet the growing demand for conversational artificial intelligence and related innovation technology (Alba chatbot). They would also be used to support peacekeeping-specific systems with: (a) monitoring and compliance; and (b) disaster recovery planning activities. Furthermore, the resources would be used to develop an integrated data architecture framework that supports the activities of field missions through technology and data.

**Subprogramme 2
Operations support**

29C.79 The proposed regular budget resources for 2023 amount to \$23,879,300 and reflect a decrease of \$3,100 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 29C.63 (b) above. Additional details on the distribution of the proposed resources for 2023 are reflected in table 29C.22 and figure 29C.VIII.

Table 29C.22
Subprogramme 2: evolution of financial and post resources

(Thousands of United States dollars/number of posts)

Total		73	–	–	–	–	–	73

Figure 29C.VIII
Subprogramme 2: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed resources

29C.80 Other assessed resources for the subprogramme are estimated at \$9,133,600 and would provide for 27 posts (1 D-2, 1 D-1, 2 P-5, 7 P-4, 6 P-3, 4 General Service (Principal level) and 6 General Service (Other level)), as well as non-post resources. The resources would be used to continue to facilitate and coordinate the provision of infrastructure and operations services for peacekeeping operations and the Department of Peace Operations, provide support for videoconferencing and virtual meetings by leveraging cloud-based technologies and provide support to peacekeeping operations applications.

Extrabudgetary resources

29C.81 Extrabudgetary resources for the subprogramme are estimated at \$43,524,100 and would provide for 12 posts (1 P-4, 2 General Service (Principal level) and 9 General Service (Other level)), as well as non-post resources. Central costs recovered from departments and offices would provide for ICT services offering users a personal computing core package that includes email, collaboration and communication tools, network access, a telephone system, service desk support for computers and desktop and enterprise applications. These funds also include hosting charges for departmental systems hosted at the United Nations Headquarters data centre in New York. The extrabudgetary resources would also: (a) support the rapid deployment of communications during crises; (b) support the substantive data analysis of open public broadcasting by a peace operation; (c) assist in the creation of a United Nations-owned secure data network; and (d) serve to optimize the core ICT infrastructure hosting critical systems in Brindisi, Italy, in Valencia and in New York, in order to provide efficient support to field operations. The rapid deployment capability will be focused mainly on the design of a highly mobile communications system for field operations support to be integrated into a vehicle by the Global Service Centre. The data analysis creates a platform to store and analyse public broadcasting sources used for the transcription and analysis of segments of interest to a mission. The secure data network implementation in the United Nations Organization Stabilization Mission in the Democratic Republic of the Congo of a highly secure data network for use by substantive components is ongoing. Following the results of this implementation, the capability will be mainstreamed into all peacekeeping operations, as needed. The decrease of \$307,400 is attributable mainly to a projected reduction in the use of tele-health services in 2023.

Subprogramme 3 Enterprise solutions

29C.82 The proposed regular budget resources for 2023 amount to \$15,338,500 and reflect no change in the overall level of resources compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 29C.23 and figure 29C.IX.

Table 29C.23
Subprogramme 3: evolution of financial and post resources

Figure 29C.IX
Subprogramme 3: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed resources

- 29C.83 Other assessed resources for the subprogramme are estimated at \$9,099,800 and would provide for 21 posts (5 P-4, 3 P-3, 2 P-2/1, 1 General Service (Principal level) and 10 General Service (Other level)), as well as non-post resources. The resources would enable the development and support of information technology applications to support peacekeeping operations from Headquarters.

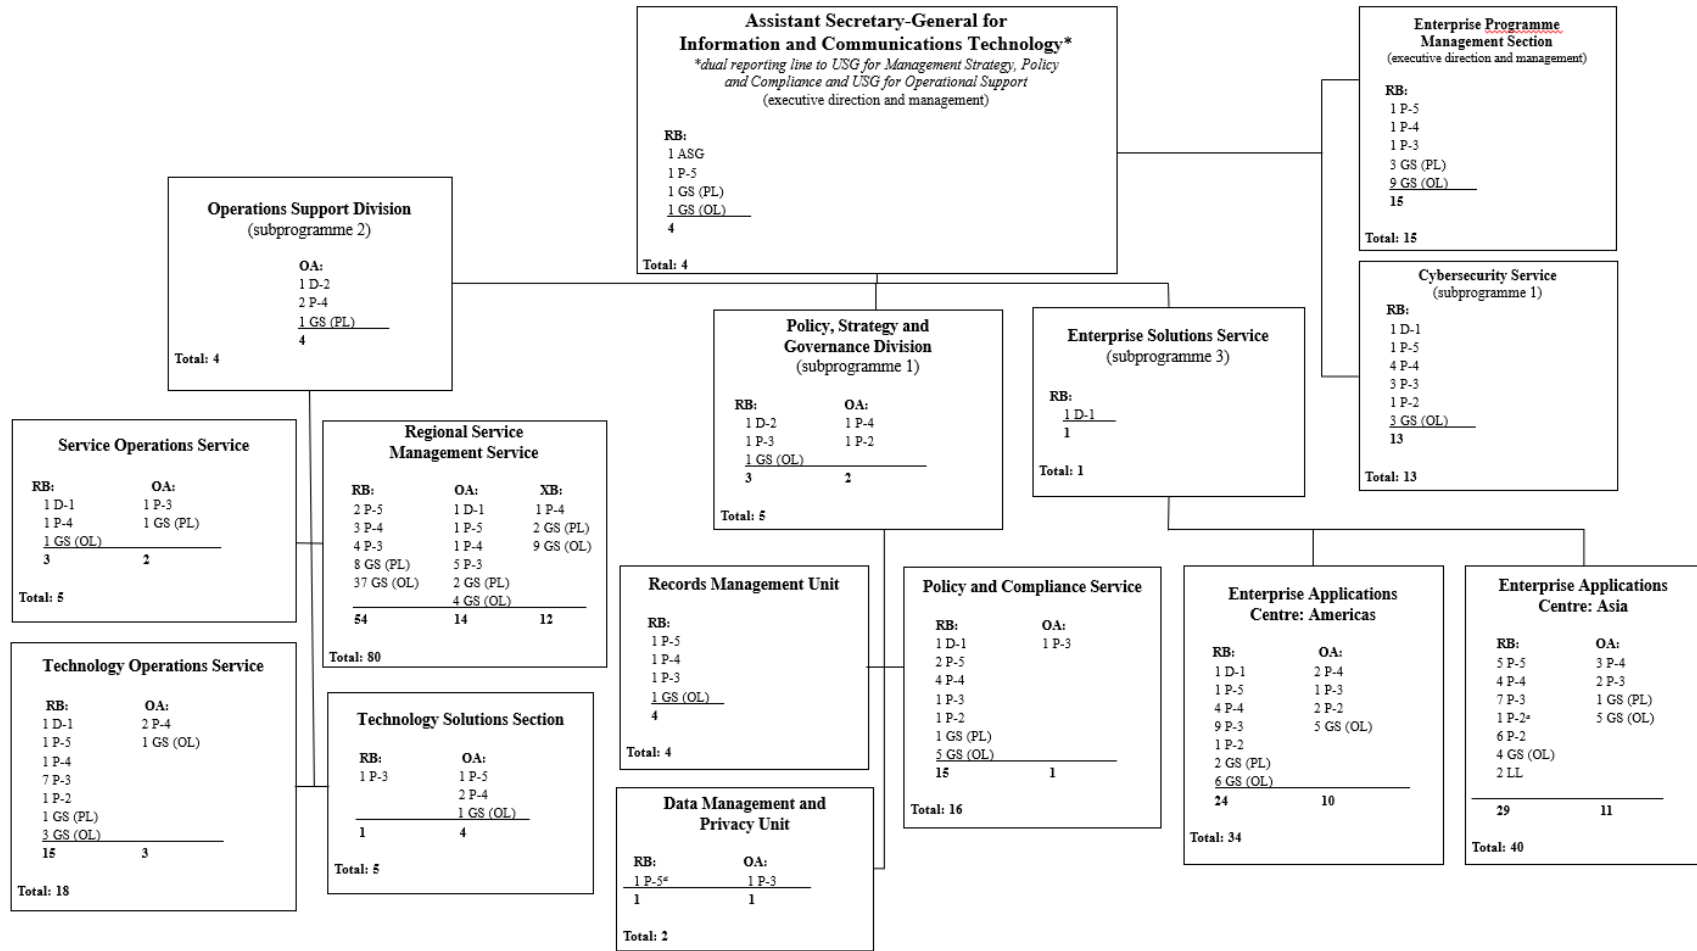

Extrabudgetary resources

- 29C.84 Extrabudgetary resources for the subprogramme are estimated at \$17,046,300. The non-post resources would enable the development and support of information technology solutions for peacekeeping in the field, for the safety and security of United Nations system personnel and for the substantive departments in the delivery of their mandates.

Annex I

Organizational structure and post distribution for 2023

Office of Information and Communications Technology

^a Geographical redeployment.

Annex II

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Board of Auditors

A/76/5 (Vol. I)

The Board reiterates its recommendation that the Administration enhance cross-department coordination to ensure strict compliance with the requirement of General Assembly resolution [69/262](#) and Secretary-General's bulletin [ST/SGB/2016/11](#) relating to the information and communications technology (ICT) budget submission, and hold entities accountable for the submission of budgets and projects from all funding sources for all ICT initiatives and operations to the Office of Information and Communications Technology (para. 737).

The budget guidance issued by the United Nations Controller for the preparation of the 2022 proposed programme budget included instructions indicating that the Office of Information and Communication Technology was responsible for reviewing ICT budget proposals and for advising programme managers on the appropriateness of their ICT budget proposals with respect to the ICT strategy, priorities, project policies, procedures and established governance, which include technical clearance from that Office prior to the submission of their budget proposals to the Office of Programme Planning, Finance and Budget.

In accordance with the governance frameworks, the Project Review Committee considers new ICT projects of a total cost above \$500,000 and below the threshold of the ICT Steering Committee, to ensure that ICT projects are aligned with the organizational and ICT priorities, that duplication is avoided and that policy, standards and enterprise architecture are uniformly applied at the onset of new initiatives by recommending whether such initiatives should proceed.

Annex III

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 1 Strategy and technology innovation	1	P-5	Redeployment (geographical) of 1 post of Chief of Information Management, from Vienna to Valencia, Spain.	The P-5 post would be moved to Valencia, in the context of the internal consolidation of the presence of the Office of Information and Communication Technology in Europe and, in particular, through centralized ICT services undertaken at the Global Service Centre in Valencia. The role would continue to involve engaging with internal and external partners in Europe, Asia and field missions in the areas of innovation and frontier technology, with a view to supporting the Secretariat in advancing the implementation of mandates through the use of technology and data. The proposed geographical redeployment is within the Data Management and Privacy Unit (see annex I) and does not entail a change in the location of the post within the organizational structure.
Subprogramme 3 Enterprise solutions	1	P-2	Redeployment (geographical) of 1 post of Associate Information Systems Officer from Bangkok to Valencia	The P-2 post would be relocated to a European time zone for more effective coordination between the business owner team in New York and the technical project team in Bangkok. By locating the post in a time zone between the United States of America and Asia, the Officer can collaborate online on business requirements with the business stakeholders in the United States and translate those requirements into technical solutions with the technical teams in the later time zone in Bangkok. The proposed geographical redeployment is within the Enterprise Applications Centre: Asia organizational unit (see annex I) and does not entail a change in the location of the post within the organizational structure.

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 29E.1 The United Nations Office at Geneva was established in 1947 pursuant to General Assembly resolution 24 (I) and successive resolutions of the Assembly. The Office is responsible for providing administrative and support services to entities in Geneva and their field offices, and to other organizations of the United Nations common system, in accordance with policies, procedures and practices established by the Under-Secretary-General for Management Strategy, Policy and Compliance, the Under-Secretary-General for Operational Support, and the Assistant Secretary-General/Chief Information Technology Officer. The Office is also responsible for providing support services to the intergovernmental processes of the Organization in line with its role as a major conference centre for international diplomacy. This includes providing technical conference support services to enable the work of Member States and client entities.

Strategy and external factors for 2023

- 29E.2 The Office will continue to provide administrative and support services, including direction, management and coordination in the areas of human resources, financial and budgetary resources, information and communications technology (ICT), central support services and library services at the United Nations Office at Geneva, including the management and utilization of United Nations premises and the coordination of human resources, finance and administrative policies with other Geneva-based organizations. The Office will carry out and monitor the implementation of policy and other functions related to the above-mentioned areas, as determined by the Under-Secretaries-General referred to in paragraph 29E.1. It will provide financial, budgetary and accounting services, as well as guidance and advice, in accordance with the Financial Regulations and Rules of the United Nations and relevant standards. In addition, the Office will provide staff development and learning services, career support and counselling, staff welfare activities, medico-administrative services and human resources legal advisory services.
- 29E.3 The Office provides administrative and support services for United Nations meetings held in Geneva and for specialized agencies and provides procurement, commercial activities, transportation, travel and other central support services. It also provides regional ICT services and library, records and archives, and knowledge management services in support of the implementation of the mandated programmes and activities of the Secretariat. The Office further ensures proper coordination and implementation of the recommendations of oversight bodies at the Office as well as the business continuity of administrative support for other entities in Geneva in emergency cases.
- 29E.4 The Office implements activities across all subprogrammes to support the Secretary-General's reform initiatives. Examples of initiatives supported include: streamlining operations and digitization; incorporating innovation into programme activities; implementing statements of internal control; mainstreaming risk management; harmonizing global operational processes; developing and mainstreaming new, modern and agile working practices; providing training and support to foster a work environment of civility and respect; supporting digital transformation, the Secretary-General's strategy on new technologies and the Data Strategy of the Secretary-General for Action by Everyone, Everywhere; and providing training to help support the resident coordinator system. Further details are included under each subprogramme.
- 29E.5 Physical renovation works at the historic buildings of the Palais des Nations began in January 2021 and are projected to continue until 2024. These works will be continued, in order to strive for the highest standards with regard to accessibility and the elimination of barriers, while preserving the principles of the original design and the historical features of the existing buildings.

- 29E.6 In 2023, staff will continue to adjust to the flexible workspace. In addition, the Office will focus on lessons learned in relation to the more rational use of space following the movement of staff to building H, as well as the limited availability of seating due to the coronavirus disease (COVID-19) pandemic occupancy restrictions. The Office will be proactive in its efforts for the best possible utilization of space, which will create opportunities for it to expand the number of entities that could be accommodated at the Palais des Nations, while supporting a larger number of client entities and staff, but with a number of those staff working remotely. Such an endeavour will require the Office to rethink its client servicing operating model in 2023 in order to achieve the optimal balance between remote working and remote servicing. To that end, the Office will continue to contribute to the global efforts to adapt the existing customer relationship management system to meet the evolving needs of the Organization. Implementation of the lessons learned and recommendations from the 2022 self-evaluation of its Client Support Centre will begin in 2023 while the customer relationship management system is being adapted. At the same time, the Office will continue to operate in an agile manner, enabling technologically advanced e-services and enhanced audiovisual technology capabilities, and supporting high-level negotiations organized by special political missions, fact-finding panels and other mandated activities and ad hoc requests. Client board meetings will also continue to be held regularly in 2023 to promote an open, transparent and collaborative approach to service delivery, while adherence to evolving key performance indicators will continue to be monitored closely. In 2023, towards the end of the strategic heritage plan renovations, the Office will also focus on preparations for the move of the Office of the United Nations High Commissioner for Human Rights into the facilities of the Palais. Lastly, the Office will move forward with the process of introducing modern preventive and regular building maintenance regimes to ensure that the significant investments being made by Member States in the context of the strategic heritage plan are properly safeguarded for the future.
- 29E.7 For 2023, the Office's planned deliverables will continue to support client entities and Member States in their ongoing management of and recovery from the COVID-19 pandemic. The planned deliverables and activities include: continued leadership in the coordination with the host country, the French authorities, Member States and international organizations in Geneva with regard to the management and response to the pandemic; continued support, including through human resources and medical and mental health support, to staff and clients via the staff counsellor and online client services; the implementation of protective measures to ensure a safe environment for personnel and clients; a focus on keeping all staff in Geneva informed about the latest developments; dedication to the safe servicing of meetings and conferences; and the provision of online service offerings, where feasible.
- 29E.8 The proposed programme plan for 2023, which reflects the importance of continuous improvement and responds to the needs and requests of client entities and Member States, continues to incorporate lessons learned and best practices related to adjustments made to the programme and its adaptation in response to the COVID-19 pandemic. Examples of lessons learned and best practices include the continuous incorporation of online training and servicing modalities into all service offerings, where feasible. In addition, the Office will continue to respond to the requests of Member States for support for virtual and hybrid modalities of meetings with interpretation, subject to available resources. Regarding future planning of intergovernmental meetings after the pandemic, a hybrid meeting format with remote interpretation could be accommodated, subject to receipt of a clear mandate from Member States and associated funding. This would allow for business continuity during times of uncertainty and wider participation by representatives of Member States unable to travel. At the same time, it is thought that those operational conditions have improved, enabling the implementation of mandates on the basis of previously established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.
- 29E.9 To further inter-agency coordination and liaison, the Office will continue to collaborate with other Geneva-based United Nations system organizations and international governmental organizations, coordinating the Common Procurement Activities Group and the work related to the common system. In its role in providing secretariat services to the Group for greater economies of scale, the

Office will coordinate and expand the activities of the Group, combining the major procurement activities of its 20 Geneva-based members. The Office is collaborating with other United Nations libraries to digitize the official documents of the United Nations and is implementing a common library management system which will be used by the libraries at the United Nations Office at Geneva, the United Nations Headquarters, the Economic Commission for Latin America and the Caribbean (ECLAC) and the Economic and Social Commission for Asia and the Pacific.

- 29E.10 With regard to external factors, the overall plan for 2023 is based on the planning assumption that client offices will have sufficient extrabudgetary resources for services provided by the United Nations Office at Geneva.
- 29E.11 The Office continues to integrate a gender perspective into its operational activities, deliverables and results, as appropriate. It will contribute to improving gender equality in 2023, in line with the Secretary-General’s system-wide strategy on gender parity (see General Assembly resolution [76/142](#)), by keeping hiring managers and human resources focal points in client entities informed of the impact of selection decisions through consultations and briefings, including advice on targeted outreach on job openings through established human resources networks and targeted promotion of career opportunities in the United Nations, with a view to improving equitable geographical representation and gender equality in the Organization.
- 29E.12 In line with the United Nations Disability Inclusion Strategy, in 2023 the Office will continue its signage and disability access works throughout the grounds and buildings of the Palais des Nations to eliminate physical, communication and technical barriers and to enable reasonable accommodation of persons with disabilities. The Office will also carry out an initiative to assess the level of disability inclusion for ICT solutions available to Geneva client entities.

Programme performance in 2021

Impact of the pandemic

- 29E.13 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular: under subprogramme 1, the phase 2 roll-out of the payroll verification tool was postponed from August to November 2021; under subprogrammes 2 and 5, all in-person training sessions were cancelled, many activities were delivered virtually or in a hybrid format, and the Client Support Centre operated virtually; and supply chain disruptions had an impact on both subprogramme 3, delaying deliveries for construction projects, and subprogramme 4, delaying the delivery of equipment for regular work. In addition, in order to support clients and Member States on issues related to the COVID-19 pandemic, within the overall scope of the objectives, the programme provided staff and clients with human resources, medical and mental health support, as well as servicing for safe meetings and conferences, as described in paragraph 29E.6.

Legislative mandates

- 29E.14 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

24 (I)	Transfer of certain functions, activities and assets of the League of Nations	73/281	Shifting the management paradigm in the United Nations
72/303	Progress towards an accountability system in the United Nations Secretariat	76/246	Special subjects relating to the proposed programme budget for 2022

**Subprogramme 1
Programme planning, finance and budget**

General Assembly resolutions

41/213	Review of the efficiency of the administrative and financial functioning of the United Nations	76/235	Financial reports and audited financial statements, and reports of the Board of Auditors
42/211	Implementation of General Assembly resolution 41/213	76/236 76/245	Programme planning Questions relating to the proposed programme budget for 2022

**Subprogramme 2
Human resources management**

General Assembly resolutions

58/144	Improvement of the status of women in the United Nations system	72/254 76/240	Human resources management United Nations common system
66/237	Administration of justice at the United Nations		

**Subprogramme 3
Support services**

General Assembly resolutions

58/263	Report of the Joint Inspection Unit on the revenue-producing activities of the United Nations system	58/277 69/273	Report of the Joint Inspection Unit on the management audit review of outsourcing in the United Nations and the United Nations funds and programmes Procurement
--------	--	------------------	--

**Subprogramme 4
Information and communications technology operations**

General Assembly resolutions

57/304	Information and communication technology strategy	63/269	Information and communications technology, disaster recovery and business continuity for the United Nations: arrangements for the secondary data centre at Headquarters
63/262	Information and communications technology, enterprise resource planning, and security, disaster recovery and business continuity	69/262	Questions relating to the programme budget for the biennium 2014–2015 (Section II, Information and communications technology in the United Nations)

**Subprogramme 5
Library services**

General Assembly resolution

356 (IV)	Budget appropriations for the financial year 1950		
----------	---	--	--

Deliverables

29E.15 Table 29E.1 lists all cross-cutting deliverables of the programme.

Table 29E.1

Cross-cutting deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	3	5	3	5
Meetings of:				
1. The Advisory Committee on Administrative and Budgetary Questions	1	2	1	2
2. The Committee for Programme and Coordination	1	1	1	1
3. The Fifth Committee	1	2	1	2

Evaluation activities

29E.16 The evaluation of new internal working practices, completed in 2021, has guided the proposed programme plan for 2023.

29E.17 The results and lessons of the evaluation referenced above have been taken into account for the proposed programme plan for 2023. For example, it was highlighted in the evaluation that the huddle technique was well received and considered useful. Consequently, that technique will be introduced as part of the new Agile Training Programme of subprogramme 2, to address the need expressed by managers and teams to adapt the way in which they interact and work to a broader context.

29E.18 An evaluation of the Total Digital Access to the League of Nations Archives Project system and platform is planned for 2023.

Programme of work

Subprogramme 1

Programme planning, finance and budget

Objective

29E.19 The objective, to which this subprogramme contributes, is to ensure sound, effective and efficient financial management by client offices.

Strategy

29E.20 To contribute to the objective, the subprogramme will:

- (a) Strengthen the monitoring of budget implementation, reporting, financial management and accounts control by coordinating with Headquarters and providing timely advice to client entities with regard to a broad range of financial services, spanning from payments and disbursements services to payroll, accounting, medical insurance, as well as trust funds and budget management;
- (b) Provide assistance, guidance and training to programme managers and administrative units of client organizations on financial management and budgetary matters;

- (c) Ensure efficient financial and administrative procedures and effective budget implementation; strengthen internal financial controls and streamline financial procedures and guidelines; identify ways to achieve a faster and more efficient client response, including through digital transformation and innovative tools aligned to the Secretary-General's strategy on new technologies; monitor the implementation of oversight bodies' recommendations; and ensure strict compliance with the Financial Regulations and Rules of the United Nations and the financial policies of the United Nations.

29E.21 The above-mentioned work is expected to result in improved integrity of financial data and enhanced overall management of programme budget and extrabudgetary resources.

Programme performance in 2021

Simplified submission of medical insurance claims

29E.22 Supporting the Secretary-General's strategy on new technologies, the subprogramme has been reviewing ways to streamline and digitize the medical insurance claims process and improve client experience. In 2021, the subprogramme modernized its paper-based insurance claims process to include a digital solution incorporating two components: (a) an online portal, e-Claims, where clients can submit claims, generate attestations and monitor reimbursements; and (b) the e-Claims mobile app, which offers the same functionalities but on a smartphone. Clients have expressed their appreciation for the new time-saving tools. All claims can now be submitted electronically. To date, 90 per cent of all insurance claims have been submitted through the new e-tools.

29E.23 Progress towards the objective is presented in the performance measure below (see table 29E.2).

Table 29E.2

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
Clients submit medical insurance claims as hard copies	Clients submit medical insurance claims as hard copies or via an online portal (testing phase)	Launch of the e-Claims portal and the e-Claims mobile app
Initiation of the digitized insurance claims process for clients		Clients are able to submit medical insurance claims electronically

Planned results for 2023

Result 1: improving staff payroll

Programme performance in 2021 and target for 2023

29E.24 The subprogramme's work contributed to fully operationalizing the payroll verification tool and reducing the yearly average of payroll exclusions to 127 per month, which did not meet the planned target of 120 monthly payroll exclusions. The target was not met because phase 2 of the roll-out was postponed slightly, from August to November 2021, because of unforeseen security challenges relating to remote data access that arose while staff were telecommuting during the COVID-19 pandemic. These challenges were subsequently resolved.

29E.25 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 29E.I).

Figure 29E.I

Performance measure: average number of monthly payroll exclusions

Result 2: improved oversight and visibility of risk management practices through monitoring of the implementation of the statement of internal controls and risk treatments

Programme performance in 2021 and target for 2023

29E.26 The subprogramme’s work contributed to strengthening the Organization-wide risk management system and upgrading the current dashboard to include the statement of internal controls and enterprise risk management categories, which met the planned target.

29E.27 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29E.3).

Table 29E.3

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Managers have access to a bespoke risk management dashboard to monitor the Office of Internal Oversight Services and Board of Auditors recommendations	Risk control matrices inform a uniform approach to treating risks	Strengthening of the Organization-wide risk management system and updating of the risk management dashboard to capture a wider array of risks and treatments	<ul style="list-style-type: none"> Improved oversight and visibility of risk management through unified monitoring of risks and treatments Managers have a more Organization-centric risk management perspective 	<ul style="list-style-type: none"> Enhancements are available on a new risk management tool and dashboard, based on management feedback Managers use a corporate enterprise risk management system to manage risks

Result 3: tailored and targeted operational monitoring through customized financial dashboards

Proposed programme plan for 2023

29E.28 Following the implementation of Umoja, clients needed analytical reports to monitor their accounts and operate smoothly. The subprogramme developed accounting reports and financial indicators to address its clients’ needs. An example was a report of the daily levels of available cash by client project in which the projects with negative balances were highlighted to prompt clients to take timely action, as required.

Lessons learned and planned change

- 29E.29 The lesson for the subprogramme was that, while clients initially appreciated these reports, over time their needs changed and they expressed an interest in having a more customized tool. In applying the lesson, the subprogramme will develop customized client dashboards that better meet each client’s operational needs, provide more data in the reports and more effectively monitor each client’s individual financial indicators. The dashboards will utilize the same platform as the original accounting reports platform to simplify the user experience.
- 29E.30 Expected progress towards the objective is presented in the performance measure below (see table 29E.4).

Table 29E.4
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Clients access standardized financial reports, in line with reporting needs	Clients access additional standardized financial reports	Clients access additional standardized financial reports	Four clients access customized dashboards to facilitate their ability to monitor accounts and operations through specific financial indicators	Five additional clients access customized dashboards to facilitate their ability to monitor accounts and operations through specific financial indicators

Deliverables

- 29E.31 Table 29E.5 lists all deliverables of the subprogramme.

Table 29E.5
Subprogramme 1: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory

E. Enabling deliverables

Administration: financial management, risk management and internal control, preparation and implementation of resource proposals; management of over 700 posts across all funding sources (creation, extension, abolition and funding); financial reporting and accounting; cash and revenue management; management of service arrangements with almost 50 client entities, including quarterly cost recovery billing across more than 120 service lines; processing of payroll for about 7,500 staff members across the globe per month and over 280,000 payments and disbursements annually; provision of guidance and advice on all financial matters; provision of medical insurance to over 33,000 staff, retirees and dependants; processing of over 450,000 medical invoices annually; administration of compensation claims; organization of quarterly client board meetings.

Subprogramme 2 Human resources management

Objective

- 29E.32 The objective, to which this subprogramme contributes, is to ensure a competent, diverse, adaptable and healthy workforce, to advance the highest standards of efficiency, competence and integrity and to ensure resilient organizational change.

Strategy

- 29E.33 To contribute to the objective, the subprogramme will:
- (a) Support the acquisition and development of talent, reinforce an enabling work environment, strengthen its advisory role, develop internal human resources analytics capabilities and tools aligned to the Data Strategy of the Secretary-General for Action by Everyone, Everywhere, and pay special attention to staff welfare and mental health;
 - (b) Continue to promote multilingualism and to provide learning and development activities such as training sessions and briefings on performance management, innovation and flexibility, navigation of workplace changes and the creation of a harmonious workplace;
 - (c) Generate new opportunities for learning and knowledge exchange through the Knowledge and Learning Commons by partnering with the Library at the United Nations Office at Geneva;
 - (d) Continue to work with the human resources subnetwork of the Security Management Team to ensure a coherent approach to common human resources issues and challenges.
- 29E.34 The above-mentioned work is expected to result in:
- (a) Empowered decision-making based on enhanced business insight;
 - (b) Improved capacity of staff to successfully navigate workplace changes, embrace innovation and adopt new ways of working;
 - (c) Improved capacity of teams to work in a more agile and flexible manner;
 - (d) Increased awareness of the existing mechanisms to address improper conduct and of the individual responsibility of staff to foster a harmonious work environment.

Programme performance in 2021

Training of managers for the post-pandemic workplace

- 29E.35 At the onset of the pandemic, remote work became a necessity and staff and managers found a rhythm for performing their functions under new circumstances. As staff transitioned from fully remote work to hybrid work, surveys showed that managers needed support to better manage hybrid teams. To that end, the subprogramme designed and delivered a training programme to help managers to adapt and transition to the post-pandemic workplace, to share ideas with them about the workplace of the future and the new managerial skills and behaviours required, and to empower them to work with their teams to co-create the hybrid model that will work best for them. Managers attending the training provided positive feedback and indicated their readiness to share the new ideas learned with their teams.
- 29E.36 Progress towards the objective is presented in the performance measure below (see table 29E.6).

Table 29E.6
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
22 per cent of staff telecommuted at least one day per week	85 per cent of staff telecommuted up to five days a week; 67 per cent of managers felt more favourably about the idea of staff telecommuting and working in hybrid mode but expressed a need for additional management training to help them	Staff members continued to telecommute for up to five days a week depending on the nature of the work under the supervision of their managers, and 75 managers were trained in effective management of hybrid teams

Planned results for 2023

Result 1: innovative approaches to support staff during a changing work environment

Programme performance in 2021 and target for 2023

- 29E.37 The subprogramme’s work contributed to a more collaborative and flexible work environment based on positive feedback from managers on the expanded use of huddles, which met the planned target.
- 29E.38 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29E.7).

Table 29E.7
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Initial pilot teams implement huddle technique as a result of feedback from clients that identify a need to strengthen capacity-building, client focus and support for a more collaborative and flexible work environment and management by results	<ul style="list-style-type: none"> • Positive feedback from managers and staff of pilot huddle teams led to the creation of a training-of-trainers session on use of the huddle technique • Increase in the number of teams implementing huddles from 15 to 17 	Positive feedback from managers and staff on how the use of huddles has supported management by results, leading to a more collaborative and flexible work environment	Positive feedback on training sessions to promote an agile mindset, which are deemed useful for teams in adapting to the new work reality and contribute to improving results	Positive feedback from managers and staff on adjustments to training programmes, such as the inclusion of huddles in agile training sessions, and on how the programme better addresses the evolving needs of staff and managers in the post-pandemic workplace

Result 2: increased civility and respect in the workplace

Programme performance in 2021 and target for 2023

- 29E.39 The subprogramme’s work contributed to 229 staff members attending the “United to respect” training session and increased their awareness of resources available to find support, which met the planned target.

29E.40 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29E.8).

Table 29E.8
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
<ul style="list-style-type: none"> Establishment of a stakeholders' group to prevent and tackle harassment at the United Nations Office at Geneva Increased staff awareness of existing mechanisms and promotion of informal dispute resolution 	<ul style="list-style-type: none"> Launch of "United to respect" dialogues Designation of two conduct and discipline focal points Implementation of the misconduct tracking system 	<p>229 staff attended the "United to respect" training session and increased their awareness of resources available to find support</p>	<ul style="list-style-type: none"> Establishment of an informal network for conflict resolution on a pilot basis Increased staff awareness of the number of reported cases and measures taken to fight harassment and other prohibited conduct 	<p>Reduction in conflict escalation and in the risk of dysfunctional relationships</p>

Result 3: better service and support for clients through new human resources capacity and tools for data analytics

Proposed programme plan for 2023

29E.41 In order to reap the full benefits of the human resources data available, it is essential to build and maintain the certified core in-house human resources analytical capacity. To better serve its clients, and in line with the Data Strategy of the Secretary-General for Action by Everyone, Everywhere, the subprogramme took steps to build and strengthen its human resources analytical capabilities. In the 2020–2021 period, the subprogramme selected a pilot group of human resources staff to participate in a new training programme and certification.

Lessons learned and planned change

29E.42 The lesson for the subprogramme was that the newly created human resources analytical capacity could be further leveraged to pioneer client service offerings through analytical data insights. The subprogramme recognized that to move forward, it needed to conduct a data audit to take stock of the human resources data available and develop a strategy for analysing the raw data and transforming them into useful data visualization graphics.

29E.43 In applying the lesson, the subprogramme will draft a human resources analytics strategy on the use of human resources data, with a view to creating tools to be used by clients and internally to support data-driven strategic decision-making. Human resources data and areas to be covered include recruitment timelines, gender equality, workforce planning, absenteeism, well-being, monitoring of entitlements, performance management, managerial effectiveness and the development of an optimal human resources client support structure. The resulting web-based tools are expected to improve clients' ability to monitor various components of human resources operations and consequently to enable better decision-making.

29E.44 Expected progress towards the objective is presented in the performance measure below (see table 29E.9).

Table 29E.9
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	Human rights staff received training in human resources data analytics	18 staff members increased their knowledge of and received certification in human resources data analytics	Finalization of a data analytics strategy focused on improving client service and that includes: <ul style="list-style-type: none"> • Data audit, data quality assessments and data improvement • Reports automation for data analysis • Review of recruitment timelines, gender equality and workforce planning 	Clients have access to: <ul style="list-style-type: none"> • Tools to simulate the effect of gender equality on recruitment • Tools to evaluate team well-being and performance

Deliverables

29E.45 Table 29E.10 lists all deliverables of the subprogramme.

Table 29E.10
Subprogramme 2: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory

D. Communication deliverables

Outreach programmes, special events and information materials: job fairs and career presentations to identify prospective candidates, including female candidates, from unrepresented and underrepresented Member States; knowledge-sharing in the area of human resources and staff health and well-being.

E. Enabling deliverables

Administration: talent management and job classification; administration of approximately 2,500 staff contracts; advice and guidance on human resources policies, including on the Staff Regulations and Staff Rules of the United Nations and the staff selection system; training on organizational and managerial competencies, substantive and technical skills, language and communications, and career development for more than 9,000 staff members and other participants per year; administration of tests; staff counselling services and psychological support; conduct of staff surveys, including on cost of living and daily subsistence allowance; obtention of 8,400 host country residence permits in liaison with local authorities; occupational health and medico-administrative services for 12,000 client staff in Geneva and field offices, medical consultations and advice, medical emergency preparedness, health and well-being campaigns; learning, career development and performance management.

Internal justice and oversight: legal advice in relation to cases of alleged misconduct; act as legal counsel for the Organization before the United Nations Dispute Tribunal; act as respondent on behalf of the Organization in cases brought by staff to the Management Evaluation Unit and the Office of the United Nations Ombudsman and Mediation Services; legal and policy advisory services to more than 20 client entities, including through briefings and ad hoc information sessions for managers on best practices and lessons learned with regard to administration of justice.

Subprogramme 3 Support services

Objective

- 29E.46 The objective, to which this subprogramme contributes, is to ensure the efficient, environmentally responsible and effective functioning of the United Nations Office at Geneva with regard to premises, office and conference facilities management; asset management; travel and transportation; mail and pouch services; procurement; and commercial activities.

Strategy

- 29E.47 To contribute to the objective, the subprogramme will:
- (a) Provide services in the areas of facilities management, assistance with conference activities, special events, project management, and property and space management. Essential technical conferencing support services will be provided for conferences, meetings and events, taking full advantage of new advanced technologies for supporting conferences;
 - (b) Continue to implement local and World Health Organization regulations and guidelines; equip meeting and conference rooms with the necessary infrastructure and equipment to support virtual and hybrid meetings, in accordance with available funding; and provide other assistance, as required, to ensure a safe and secure Palais des Nations for staff, clients and delegates;
 - (c) Provide procurement services, including by continuing to upgrade processes to increase efficiency and strengthen joint procurement services with other United Nations organizations and agencies based in Geneva through the Common Procurement Activities Group;
 - (d) Provide services in the areas of contract management, travel, administration of diplomatic privileges, visas, United Nations travel documents, transportation, mail and pouch services, warehousing and sustainable environmental management;
 - (e) Continue to support the implementation of the strategic heritage plan, ensuring that solutions are in place to minimize the impact of any potential disruptions during the renovation of the historic buildings of the Palais des Nations and the operation of the new building H.
- 29E.48 The above-mentioned work is expected to result in:
- (a) An optimized use of space and the provision of high-quality logistical services and support to client entities;
 - (b) Modern, high-quality conference support services, including the availability of conference rooms equipped for multilingualism;
 - (c) A coordinated response with other United Nations entities to meet clients' procurement needs;
 - (d) Improved workplace safety and conditions in the Palais des Nations and its annexes.

Programme performance in 2021

Transition of the procurement and travel services of resident coordinator offices to the Secretariat

- 29E.49 In support of the transition of resident coordinator offices to the Secretariat, the subprogramme developed and conducted a virtual procurement and travel training programme in June 2021 for 28 staff members from 13 resident coordinator offices in Europe. This was followed by a travel training programme in July 2021 for 26 participants in Latin America and Africa from resident coordinator offices served by the United Nations Office at Nairobi and ECLAC. The training programme helped

resident coordinator office staff to gain knowledge in areas such as high-value procurement, low-value acquisitioning, the end-to-end process of raising requisitions and receiving goods and services, the procurement of individual contractors and consultants, and the raising and certification of travel requests. Participants gained knowledge of United Nations procurement and travel rules, regulations and principles, and of the execution of procurement and travel-related actions in Umoja. Having completed the training programme, the staff were able to use Umoja to submit procurement and travel requests.

29E.50 Progress towards the objective is presented in the performance measure below (see table 29E.11).

Table 29E.11
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
Resident coordinator offices use the United Nations Development Programme (UNDP) for procurement and travel services	Resident coordinator offices use UNDP for procurement and travel services	Resident coordinator offices use the United Nations Office at Geneva, the United Nations Office at Nairobi and ECLAC for procurement and travel services, and 54 resident coordinator office staff increased their knowledge of service provision and were able to perform travel and procurement processes in Umoja

Planned results for 2023

Result 1: reduced waste generation by clients, visitors and staff at the Palais des Nations

Programme performance in 2021 and target for 2023

29E.51 The subprogramme’s work contributed to 70 per cent of waste by clients, visitors and staff at the Palais des Nations being recycled, which represented a reduction from 2020 and did not meet the planned target of 78 per cent. The target was not met because a shift away from the use of paper lowered the recycling rate and there was a simultaneous increase in the disposal of several types of non-recyclable waste, such as waste from renovation works of the strategic heritage plan, food waste packaging on account of more staff bringing meals from home and COVID-19-related non-recyclable products.

29E.52 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 29E.II).

Figure 29E.II
Performance measure: percentage of waste recycled

Result 2: a sustainable infrastructure to support and moderate hybrid meetings

Programme performance in 2021 and target for 2023

29E.53 The subprogramme’s work contributed to 11 conference rooms being available to service hybrid meetings with remote simultaneous interpretation, which exceeded the planned target of 10.

29E.54 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 29E.III).

Figure 29E.III
Performance measure: number of conference rooms available to service hybrid meetings with remote simultaneous interpretation (cumulative)

Result 3: optimized warehouse storage space for clients

Proposed programme plan for 2023

29E.55 In 2020, clients’ need for storage space increased and new environmentally friendly initiatives freed up warehouse capacity. Renovations included the refurbishment of the warehouse floor, the donation, recycling or disposal of superfluous goods, and the implementation of a new just-in-time delivery system for paper, that freed up significant additional space. The subprogramme leveraged the opportunity and initiated a project to manage warehouse storage space more efficiently so that newly freed-up storage space could be made available to clients.

Lessons learned and planned change

- 29E.56 The lesson for the subprogramme was that, so long as the space continued to be managed manually, better utilization and optimization of the space would not improve the efficiency of storage capacity utilization or ensure equal storage accessibility (and visibility) for all clients. The subprogramme therefore developed an in-house application to manage space flexibly and dynamically. The application maps out a detailed visual grid of the warehouse floor plan and logs which grid box is assigned to a client, which items are allocated to that space, and how much storage space the client has occupied over a specific period of time.
- 29E.57 In applying the lesson, the subprogramme will launch and pilot the new application in 2022 with a large client that has significant storage needs. Following an end-of-year assessment, the subprogramme will use the application in 2023 to make excess warehouse storage space available to all clients.
- 29E.58 Expected progress towards the objective is presented in the performance measure below (see table 29E.12).

Table 29E.12
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Manual management of warehouse storage space with limited space available for clients	Significant warehouse storage space available but managed manually with limited client access	<ul style="list-style-type: none"> • Development and launch of warehouse space management application • Identification of pilot client 	Piloting of space management application with selected client	Access to efficiently managed warehouse storage made available to all clients via the space management application

Deliverables

- 29E.59 Table 29E.13 lists all deliverables of the subprogramme.

Table 29E.13
Subprogramme 3: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory

E. Enabling deliverables

Administration: management and maintenance of United Nations premises, including 49 conference rooms, 85 meeting rooms, annexes and parks; briefing of Member States on strategic heritage plan implementation.

Logistics: travel arrangements for staff and meeting participants.

Procurement: planning and sourcing support, and conduct of competitive tendering processes for United Nations requirements; establishment of contracts and issuance of purchase orders; procurement for Geneva-based Secretariat entities; administration of the Common Procurement Activities Group.

Asset management: physical verification, disposal administration and management of the records of approximately 36,000 serialized equipment items and fixed assets for the United Nations Office at Geneva, other Secretariat departments and offices and other entities based in the United Nations Office at Geneva.

Facilities management: management of buildings consisting of 215,381 m² containing 2,871 offices and providing redesigns and office furniture to serve the needs of client entities.

Transportation: shipment of official property, bulk consignments for conferences and removal of personal effects, and related insurance requirements.

Mail services: receipt and inspection, and onward distribution, of goods; provision of mail, pouch and distribution services for United Nations offices and other United Nations entities.

Travel, visas and diplomatic services: travel arrangements for staff and meeting participants and issuance of laissez-passer and other travel documents to various United Nations entities and staff in locations worldwide.

Subprogramme 4 Information and communications technology operations

Objective

- 29E.60 The objective, to which this subprogramme contributes, is to advance the efficient and effective implementation of client entities' substantive programmes through technologies, including a coherent enterprise information and communications technology system and enterprise architecture; access to ICT-related technological innovations; and a secure, coherent and resilient technology application hosting and infrastructure landscape.

Strategy

- 29E.61 To contribute to the objective, the subprogramme will:
- (a) Manage a portfolio of end-to-end hardware and software solutions and implement new technologies for clients on the basis of their business objectives;
 - (b) Align and build resilient capacity to meet client objectives by acquiring knowledge and expertise on relevant solutions by migrating to the most cost-effective sourcing options, exploiting economies of scale, adopting innovative technologies and discontinuing legacy systems;
 - (c) Ensure the effective and efficient use of ICT resources by engaging and leading the ICT community at entities of the United Nations system in Geneva and elsewhere in Europe in the definition, adoption and deployment of ICT governance policies and procedures, as well as oversee and support ICT strategy implementation and provide security in the use of ICT services.
- 29E.62 The above-mentioned work is expected to result in:
- (a) Clients who are empowered during the decision-making process and whose administrative and management tasks are facilitated by appropriate information technology tools;
 - (b) Client entities agilely implementing new and innovative technologies, aligned to the Data Strategy of the Secretary-General for Action by Everyone, Everywhere, to fulfil their business needs;
 - (c) Client entities accessing cost-effective services and solutions that optimize the use of resources to achieve business goals;
 - (d) A safe and reliable ICT environment for all United Nations Secretariat entities in Geneva.

Programme performance in 2021

Improved security in the use of ICT for staff and clients through the Infrastructure Upgrade Programme

- 29E.63 The United Nations Office at Geneva has continued to make significant improvements to its position in relation to ICT security. In 2021, the subprogramme focused on safeguarding the infrastructure of

corporate resources, including networking infrastructure, through the Infrastructure Upgrade Programme. Improvements implemented included: (a) the deployment of threat management coupled with active monitoring and escalation; (b) the deployment of multi-factor authentication for server and network equipment; (c) automatic patching of servers; (d) expanded recording of server log information to facilitate investigation into unusual activity; (e) restricted access for all administrator accounts; (f) the removal of legacy electronic communication protocols; and (g) the deployment of a more secure password management system. In addition, two industry-standard security and vulnerability assessments were carried out with the support of the service provider and the recommended security baseline was applied. Automatic patching was also implemented for applications on all users' desktops. As a result of these efforts, the United Nations Office at Geneva and client data are better protected against data breaches, theft and damage.

29E.64 Progress towards the objective is presented in the performance measure below (see figure 29E.IV).

Figure 29E.IV

Performance measure: number of Infrastructure Upgrade Programme solutions to better protect clients (cumulative)

Planned results for 2023

Result 1: drive strategic business innovation

Programme performance in 2021 and target for 2023

29E.65 The subprogramme's work contributed to the implementation of 15 innovative ICT solutions by substantive offices, which met the planned target.

29E.66 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 29E.V).

Figure 29E.V

Performance measure: number of innovative information and communications technology solutions implemented by client substantive offices (annual)

Result 2: standardized, cost-effective information and communications technology services on the Geneva campus

Programme performance in 2021 and target for 2023

29E.67 The subprogramme’s work contributed to improved service offerings through the creation of a complete and easy-to-understand service package option available to clients, which met the planned target.

29E.68 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29E.14).

Table 29E.14

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
<ul style="list-style-type: none"> • 43 à la carte ICT service offerings available • No bundled service offerings 	<ul style="list-style-type: none"> • 48 à la carte ICT service offerings available • No bundled service offerings 	Complete and easy-to-understand service package option available to clients	At least one bundled service package offering a fast, cost-effective out-of-the-box solution for the immediate needs of clients joining the Geneva community	Two bundled service packages offering a fast, cost-effective out-of-the-box solution for the immediate needs of clients

Result 3: incorporation of the needs of persons with disabilities into information and communications technology solution offerings

Proposed programme plan for 2023

29E.69 The subprogramme has been evaluating the actions associated with the implementation of the United Nations Disability Inclusion Strategy. In implementing the Strategy, the subprogramme noticed that gaps regarding disability inclusion currently exist in several of its ICT systems.

Lessons learned and planned change

- 29E.70 The lesson for the subprogramme was that actions related to disability inclusion for ICT systems have been taken on an ad hoc basis. As a result, support and systems offerings were fragmented and lacked a comprehensive approach to disability inclusion for ICT systems. The subprogramme recognized that it needed to undergo a systematic assessment of the levels of disability inclusion in ICT solutions.
- 29E.71 In applying the lesson, the subprogramme will develop a methodology to assess the level of disability inclusion in systems currently deployed, including by developing the processes, tools and procedures necessary. The initiative will also contribute to ensuring that all new systems deployed take disability inclusion levels into account. The subprogramme will seek client feedback on the systematic assessment process and establish positive feedback loops to strengthen guidelines and assessments, in order to further embed an operational environment in which persons with disabilities are able to participate on an equal basis with others.
- 29E.72 Expected progress towards the objective is presented in the performance measure below (see table 29E.15).

Table 29E.15
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	ICT systems disability inclusion requirements are addressed on an ad hoc or on-demand basis	Processes, tools and procedures to assess the level of disability inclusion in ICT solutions available to clients	Integration of the systematic assessment of the level of disability inclusion into the approval process for new ICT solutions

Deliverables

- 29E.73 Table 29E.16 lists all deliverables of the subprogramme.

Table 29E.16
Subprogramme 4: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory

E. Enabling deliverables

Information and communications technology: provision of security for information technology systems and data; connectivity services; hosting services; voice, video and data communications services; operation and maintenance of application systems in a secure environment; technical support for approximately 5,000 end users; advisory services on business solutions.

**Subprogramme 5
Library services**

Objective

- 29E.74 The objective, to which this subprogramme contributes, is to ensure the preservation of and enhanced access to past, present and future knowledge of the United Nations, to mobilize this knowledge, and

to increase knowledge-sharing, education and dialogue among Member States and between Member States and the international community.

Strategy

29E.75 To contribute to the objective, the subprogramme will:

- (a) Continue to provide access to United Nations documents and publications as well as to external knowledge resources that provide information about the Organization's areas of work; to guarantee access to paper-based resources stored in the building; and to focus on online and virtual client services, owing to the planned closure of the Library building and other records storage areas in the Palais des Nations during the strategic heritage plan renovation works throughout 2023;
- (b) Provide knowledge tools that bring together key information resources on United Nations issues and global agendas, and continue to digitize and preserve archives and official documents, in collaboration with other United Nations libraries;
- (c) Continue to implement records management standards and best practices across the United Nations Office at Geneva and at other Secretariat entities in Geneva through the provision of staff training and advisory services on records management. The subprogramme will also continue to enable designated records management focal points within United Nations services at the Palais des Nations to identify and transfer official records of the United Nations to the Records Management Unit;
- (d) Continue to provide support for cultural diplomacy, to connect diplomats with United Nations staff, experts and global citizens through discussion and learning events, and to organize learning events and cultural activities as online and hybrid events.

29E.76 The above-mentioned work is expected to result in:

- (a) More informed participation and subsequent decision-making by diplomats and staff;
- (b) Improved transparency and accountability for the Organization;
- (c) Preservation of institutional and historical memory;
- (d) A vibrant online and on-site cultural activities programme that enables Member States to showcase their arts and culture through exhibitions, film screenings and other events;
- (e) Alternative learning opportunities for United Nations staff and diplomats on topics that support career development and the implementation of United Nations policies and agendas.

Programme performance in 2021

Historical research for future generations preserved by enriching the institutional memory of the United Nations Office at Geneva

29E.77 The records that staff members file in accordance with United Nations rules and regulations serve to ensure the Organization's transparency and accountability and contribute to the institutional memory. They include records transferred from the Office of the Director-General, the Economic Commission for Europe, the Office for the Coordination of Humanitarian Affairs, as well as from the United Nations Office at Geneva. The renovation works of the strategic heritage plan have generated a risk with regard to the retention and archiving of these records, since paper documents can easily get lost or destroyed during office moves or while trying to manage new shelving space constraints. The situation was exacerbated in 2020 by COVID-19 measures that prevented staff from continuing regular tasks such as filing and transferring records.

29E.78 To address these risks, in 2021, the subprogramme offered training and information sessions to staff members on the importance of records retention rules and assisted them in record transfers to designated storage areas. Records management staff also prepared storage spaces for bulk transfers and continuously maintained them, even while telecommuting. As a result, the subprogramme received and stored an increased number of records in 2021, which can now be maintained in accordance with United Nations rules and regulations and preserved for historical research by future generations.

29E.79 Progress towards the objective is presented in the performance measure below (see figure 29E.VI).

Figure 29E.VI
Performance measure: number of additional linear metres of United Nations records available for historical research by future generations

Planned results for 2023

Result 1: the Knowledge and Learning Commons, physical and virtual spaces for knowledge-sharing, education and dialogue

Programme performance in 2021 and target for 2023

29E.80 The subprogramme’s work contributed to the provision of 69 events and 11 additional learning opportunities, resulting in a total of 80 learning opportunities and events offered to clients at the Knowledge and Learning Commons, which exceeded the planned target of 70.

29E.81 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 29E.VII).

Figure 29E.VII
Performance measure: number of learning opportunities and events offered to clients at the Knowledge and Learning Commons (annual)

Result 2: increased access to knowledge on multilateralism**Programme performance in 2021 and target for 2023**

- 29E.82 The subprogramme's work contributed to more targeted and impactful opportunities to share knowledge on multilateralism, including larger-scale activities and events for clients, advanced through the development of a partnership strategy, which met the planned target.
- 29E.83 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29E.17).

Table 29E.17

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Work with individual partners on subprogramme events and activities for clients	Recognition of need to more formally manage and coordinate partnerships to create larger events and activities for clients with more impact	More targeted and impactful opportunities to share knowledge on multilateralism, as advanced in the partnership strategy	Improved access to information, activities and events that increase knowledge of multilateralism	Increase in the number of clients with knowledge of multilateralism through a network of institutions, including the United Nations Office at Geneva

Result 3: increased accessibility by clients to a wealth of digital information

- 29E.84 In recent years, the subprogramme has met the needs of diplomats, delegates, United Nations staff and academics researching multilateralism, by providing high-quality information resources. The subprogramme has accumulated millions of digital records through subscriptions and the digitization of paper-based materials, such as the League of Nations archives and United Nations official documents. These records are accessible on web pages that feature online catalogues and other tools.

Lessons learned and planned change

- 29E.85 The lesson for the subprogramme was that, with a large number of digital information resources available, users were struggling to navigate the volume of material to find the data that they were looking for and increasingly sought help from an expert librarian, archivist or records manager. In applying the lesson, the subprogramme will build on its work with the secretariat of the International Law Commission to design new products and services similar to those that substantially facilitated the access of the Commission's members to the information resources needed for their sessions, such as: the Conference Primers service, which brings together links to websites, social media, documents and publications for the use of members; a dedicated chat service with information managers, available during meetings; and the pre-registration of online accounts, which enables remote access to information resources. The subprogramme will create additional innovative information products and services, with a focus on improving navigation for easier access to information resources.
- 29E.86 Expected progress towards the objective is presented in the performance measure below (see figure 29E.VIII).

Figure 29E.VIII

Performance measure: number of new products and services developed that facilitate client information access and navigation (annual)

Deliverables

29E.87 Table 29E.18 lists all deliverables of the subprogramme.

Table 29E.18

Subprogramme 5: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	40	50	40	40
Events for diplomats and United Nations staff and interns on the processes, working mechanisms and rules of the Secretariat and for career development.	40	50	40	40
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services on records management for 400 clients.				
Databases and substantive digital materials: Total Digital Access to the League of Nations Archives Project system and platform for free online access to digitized archives and their preservation (15 million digitized and uploaded pages).				
D. Communication deliverables				
Outreach programmes, special events and information materials: cultural activities, including exhibitions, concerts and films; guided tours of the Library, archives and exhibitions of the United Nations Museum Geneva; discussion panels and conferences for cultural exchange, education and dialogue on key United Nations issues; exhibitions in the Library and at the United Nations Museum Geneva.				
Library services: knowledge services, such as virtual and on-site reference services, search platform design and selected information packages, to enable evidence-based policymaking and research for 12,000 diplomats, delegates, United Nations staff and academics worldwide; web pages of official records and documents; unified resource management system for the United Nations Office at Geneva and three United Nations Secretariat libraries; print and electronic information resources; 15,000 linear metres of United Nations and League of Nations archives and records in paper form; access to on-site and online archives and records.				

B. Proposed post and non-post resource requirements for 2023

Overview

29E.88 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 29E.19 to 29E.21.

Table 29E.19

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2021 expenditure ^a	2022 appropriation	Changes					2023 estimate (before recosting)

Total	298	–	–	–	–	–	298

29E.89 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 29E.22 to 29E.24 and figure 29E.IX.

29E.90 As reflected in tables 29E.22 (1) and 29E.24, the overall resources proposed for 2023 amount to \$75,231,600 before recosting, reflecting a net increase of \$71,800 (or 0.1 per cent) compared with the appropriation for 2022. Resource changes result from three factors, namely: (a) technical adjustments; (b) new and expanded mandates; and (c) other resource changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

29E.91 As reflected in table 29E.24, resource changes reflect a net increase of \$59,700, as follows:

- (a) **Subprogramme 3, Support services (increase of \$64,000).** This increase is related to the delayed impact of one Electrical Engineer (P-3) post approved pursuant to General Assembly resolution [76/245](#), which was subject to a 50 per cent vacancy rate in accordance with the established practice for the costing of new posts (\$83,300), offset in part by the removal of non-recurrent requirements under other staff costs and contractual services appropriated in 2022 pursuant to Human Rights Council resolutions [28/14](#), [43/17](#), [43/19](#), [46/7](#), [46/11](#), [46/22](#), [47/7](#), [47/8](#), [47/12](#), [47/21](#), [47/23](#), [48/3](#), [48/6](#) and [48/11](#), and General Assembly resolutions [75/314](#) and [76/231](#) (\$19,300);
- (b) **Subprogramme 4, Information and communications technology operations (decrease of \$4,300).** This decrease is related to the removal of non-recurrent requirements under other staff costs appropriated in 2022 pursuant to Human Rights Council resolutions [46/7](#), [46/11](#), [46/14](#) and [48/7](#), and Human Rights Council decision [46/115](#).

New and expanded mandates

29E.92 As reflected in table 29E.24, resource changes reflect an increase of \$67,700 as follows:

- (a) **Subprogramme 3, Support services (increase of \$53,600).** This relates to:
 - (i) Additional requirements under other staff costs (\$32,500), pursuant to Human Rights Council resolutions [47/21](#), [47/23](#) and [48/2](#), and General Assembly resolutions [76/231](#) and [76/233](#) and decision [76/515](#) (\$20,100); and anticipated Human Rights Council resolutions in 2022 (\$12,400);
 - (ii) Additional requirements under general operating expenses (\$21,100) pursuant to Human Rights Council resolutions [47/21](#) and [48/2](#);
- (b) **Subprogramme 4, Information and communications technology operations (increase of \$14,100).** This increase relates to additional requirements under contractual services pursuant to Human Rights Council resolutions [47/21](#) and [48/2](#).

Other changes

29E.93 As reflected in table 29E.24, resource changes reflect a net decrease of \$55,600 as follows:

Subprogramme 3, Support services:

- (i) An increase of \$93,600 resulting from the proposed establishment of one post (see annex III);
- (ii) A decrease of \$167,200 resulting from the proposed abolishment of one post (see annex III);
- (iii) Increased requirements under contractual services (\$18,000) for professional facilities management services related to building information modelling in connection with the increasing complexity of managing mechanical installations.

Extrabudgetary resources

29E.94 As reflected in tables 29E.22 (2) and 29E.23 (2), the Office receives both cash and in-kind contributions, which complement regular budget resources for the delivery of its mandates. In 2023, cash contributions estimated at \$37,656,400, including 152 posts, would provide for various activities to support extrabudgetary entities on a reimbursable basis. These cash contributions represent 33.4 per cent of the total resources for this programme. Activities include the provision of: (a) executive direction and management assistance; (b) budget, finance and treasury services;

(c) human resources, including staff development and learning, medico-administrative and human resources legal advisory services; (d) central support services (i.e. mail, pouch, buildings, purchasing and transportation); (e) information and communications technology services; and (f) record-keeping and library advisory services. Compared with 2022, the overall level of extrabudgetary resources is expected to remain unchanged in 2023.

- 29E.95 The extrabudgetary resources under this section are subject to the oversight of the United Nations Office at Geneva, which has delegated authority from the Secretary-General.
- 29E.96 In-kind contributions would provide for government-provided rent-free premises with an estimated value of \$4,188,900.

Executive direction and management

- 29E.97 The United Nations Office at Geneva, in particular the Division of Administration, is responsible for the implementation of the programme of work under section 29E. The core functions of the Division include providing direction and coordination in human resources management, financial resources management, information and communications technology, central support services and library services at the United Nations Office at Geneva, including the management and utilization of United Nations premises and the coordination of human resources, finance and administrative policies with other Geneva-based organizations.
- 29E.98 The Division of Administration continues to provide administrative and other support services to Secretariat departments and offices and other entities of the United Nations system. Such services are provided to the United Nations funds and programmes, specialized agencies and other organizations of the United Nations system on a reimbursable basis, and a number of Geneva-based operations rely on the aforementioned services, in particular in the context of expanding humanitarian and human rights activities.
- 29E.99 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), the Office established an environmental sustainability steering group, consisting of representatives from each department of the Office, to promote collaboration and drive environmental sustainability efforts at all levels. The Office is also implementing an environmental management system in line with the guidelines and best practices of the United Nations system. The Office currently has 99 shared waste-recycling stations throughout the Palais des Nations and its annexes, 41 of which were installed in 2021. At the same time, the Office removed individual waste bins from selected areas, resulting in a higher rate of waste sorting. Building users are able to recycle paper and/or cardboard, glass, polyethylene terephthalate (PET), aluminium and general waste. The Office is currently recycling 70 per cent of its waste and has fully eliminated single-use petroleum-based plastics at the Palais des Nations. Waste recycling is also now integrated directly into the primary cleaning contract. In addition, with the help of an energy recovery system that was installed and has been in use since the beginning of 2020, the Office is using the recuperated energy from the cafeteria refrigeration system to produce domestic hot water. This system reduces water consumption and reduces the consumption of gas and electricity required for the production of domestic hot water at the Palais des Nations. The reduction in annual carbon dioxide emissions as a result is estimated at around 34 tons. Furthermore, first steps were taken in 2021 to enable the Office to heat the Palais des Nations using heat pumps, which will be installed in accordance with the strategic heritage plan in the coming years. In 2023, the Office will continue strengthening its environmental sustainability efforts.
- 29E.100 Information on compliance with regard to advance booking for air travel is reflected in table 29E.25. The Office continues to make every effort to fully comply with the advance purchase policy directive and has undertaken a number of steps to ensure the implementation rate for the advance booking of air travel is improved. These include issuing memorandums reminding staff members and certifying officers of their responsibilities and requiring certifying officers to record a reason for the late certification and/or late submission by the traveller. Travel requests that do not meet the 16-day deadline are routed to the Director of Administration for validation of mitigating circumstances before final review and approval.

 (Number of posts/thousands of United States dollars)

Extrabudgetary resources

29E.102 Extrabudgetary resources for the subprogramme are estimated at \$1,455,400 and would provide for two posts (1 P-3 and 1 General Service (Other level)), as well as non-post resources. The resources would enable executive direction and management in respect of extrabudgetary activities provided on a reimbursable basis. The level of extrabudgetary resources is expected to remain unchanged.

Programme of work

**Subprogramme 1
Programme planning, finance and budget**

29E.103 The proposed regular budget resources for 2023 amount to \$5,131,900 and reflect no change compared with the appropriation for 2022. Additional details on the distribution of resources in 2023 are reflected in table 29E.27 and figure 29E.XI.

Table 29E.27

Extrabudgetary resources

29E.104 Extrabudgetary resources for the subprogramme are estimated at \$11,399,700 and would provide for 65 posts (1 P-5, 3 P-4, 8 P-3, 1 General Service (Principal level) and 52 General Service (Other level)), as well as non-post resources. The resources for 31 of the 65 posts (2 P-4, 6 P-3 and 23 General Service (Other level)) would enable the provision of finance and budget services (i.e. accounting services, grant support, payroll processing and disbursement) to extrabudgetary substantive activities on a reimbursable basis. The resources for 34 posts (1 P-5, 1 P-4, 2 P-3, 1 General Service (Principal level) and 29 General Service (Other level)) would support the Medical Insurance Section. The Medical Insurance Section is funded exclusively from extrabudgetary resources and provides services to the United Nations Office at Geneva, other Secretariat departments and offices and other United Nations common system entities. The Section is principally responsible for providing advice and managing the claims submission process. The overall level of extrabudgetary resources is expected to remain unchanged.

Subprogramme 2

Human resources management

29E.105 The proposed regular budget resources for 2023 amount to \$9,303,300 and reflect no change compared with the appropriation for 2022. Additional details on the distribution of resources in 2023 are reflected in table 29E.28 and figure 29E.XII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

29E.106 Extrabudgetary resources for the subprogramme are estimated at \$7,920,800 and would provide for 39 posts (1 P-5, 6 P-4, 1 P-3, 2 General Service (Principal level) and 29 General Service (Other level)), as well as non-post resources. The resources would support service delivery to extrabudgetary entities on a reimbursable basis across the various service streams (i.e. staff and recruitment administration, staff development and learning, medico-administrative services and human resources legal and policy advisory services).

Subprogramme 3 Support services

29E.107 The proposed regular budget resources for 2023 amount to \$40,410,900 and reflect a net increase of \$62,000 compared with the appropriation for 2022. The proposed increase of \$62,000 is explained in paragraphs 29E.91 (a), 29E.92 (a) and 29E.93. Additional details on the distribution of resources in 2023 are reflected in table 29E.29 and figure 29E.XIII.

Extrabudgetary resources

29E.108 Extrabudgetary resources for the subprogramme are estimated at \$7,529,700 and would provide for 24 posts (6 P-3 and 18 General Service (Other level)), as well as non-post resources. The resources would be used to provide support services to extrabudgetary entities on a reimbursable basis, in areas such as travel processing, mail and pouch handling, procurement, ground transportation and facilities management. The level of extrabudgetary resources is expected to remain unchanged.

**Subprogramme 4
Information and communications technology operations**

29E.109 The proposed regular budget resources for 2023 amount to \$11,457,800 and reflect a net increase of \$9,800 compared with the appropriation for 2022. The proposed increase of \$9,800 is explained in paragraphs 29E.91 (b) and 29E.92 (b). Additional details on the distribution of resources in 2023 are reflected in table 29E.30 and figure 29E.XIV.

Extrabudgetary resources

29E.110 Extrabudgetary resources for the subprogramme are estimated at \$9,136,500 and would provide for 20 posts (1 P-5, 3 P-4, 12 P-3 and 4 General Service (Other level)), as well as non-post resources. The resources would be used to support client entities' extrabudgetary activities on a reimbursable basis, in areas including personal computing, communications, hosting and storage. The level of extrabudgetary resources is expected to remain unchanged.

Subprogramme 5 Library services

29E.111 The proposed regular budget resources for 2023 amount to \$7,948,300 and reflect no change compared with the appropriation for 2022. Additional details on the distribution of resources in 2023 are reflected in table 29E.31 and figure 29E.XV.

Extrabudgetary resources

29E.112 Extrabudgetary resources for the subprogramme are estimated at \$214,300 and would provide for two posts (1 P-4 and 1 General Service (Other level)), as well as non-post resources. The resources would support service delivery in the areas of record-keeping and library advisory services to extrabudgetary entities on a reimbursable basis. The level of extrabudgetary resources is expected to remain unchanged.

Annex II

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/76/7](#)

The Advisory Committee recalls its related recommendation that the General Assembly should receive comprehensive and more transparent information on the services to different entities, the resources required for delivering those services and the different financing and cost recovery arrangements, as well as on the recording of related income and expenditures by funding source (see also [A/75/7](#) and [A/75/7/Corr.1](#), para. VIII.85). The Committee trusts that the Secretary-General will provide further information in the next budget submission (para. VIII.90).

The Advisory Committee again reiterates its view that cost recovery should be applied in a harmonized manner and trusts that the Secretary-General will provide an update on the progress made in the development of a common costing methodology in the next budget submission (see also [A/75/7](#) and [A/75/7/Corr.1](#), para. VIII.86, and [A/74/7](#), para. VIII.78) (para. VIII.91).

Additional information on the source and use of extrabudgetary funds is provided throughout the present document. Further details are provided as supplementary information.

Since the start of the harmonization effort in September 2019, the United Nations Office at Geneva has actively supported the Office of the Controller in the development of a comprehensive policy and guidance document, which was published in December 2021. Information on cost recovery is provided in the foreword and introduction ([A/77/6 \(Introduction\)](#)).

Annex III

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 3	1	P-3	Establishment of 1 Mechanical Engineer	To manage the increasing complexity involved in the operation and maintenance of the mechanical installations (new technology for the H Building cooling slab system as well as for the new heating system foreseen for the Palais des Nations). The operation and maintenance of modern and complex installations require professional management and advanced technical and trouble-shooting skills to ensure business continuity and the safety of staff and delegates.
Support services	(1)	GS (PL)	Abolishment of 1 Senior Engineering Assistant	Made possible by the establishment of a post of Mechanical Engineer (P-3) mentioned above.

Abbreviation: GS (PL), General Service (Principal level).

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 29F.1 The United Nations Office at Vienna was established in 1979 pursuant to General Assembly resolution [31/194](#) with the objective of providing administrative support to the United Nations Secretariat units located in Vienna. Under the terms of the tripartite memorandum of understanding of 1977 and subsequent amendments to it, the Office also provides administrative support on a common services basis to other international organizations based in the Vienna International Centre, namely, the International Atomic Energy Agency (IAEA), the United Nations Industrial Development Organization (UNIDO) and the Preparatory Commission for the Comprehensive Nuclear-Test-Ban Treaty Organization.

Strategy and external factors for 2023

- 29F.2 The Office will leverage the various enterprise systems in the delivery of efficient and effective administrative services, supported by an enabling policy framework and enhanced decision-making through monitoring, data analysis and reporting. The strategy for 2023 will continue to include: (a) coordinating with Headquarters and providing timely advice to the entities serviced on all administrative matters; (b) strengthening internal financial controls and streamlining financial procedures and guidelines to ensure effective financial management; (c) playing a central support role in shaping an enabling organizational culture through targeted enhancement of leadership, learning and career support activities and a more robust performance management system that supports increased accountability, staff engagement, workplace flexibility and empowerment while ensuring a diverse and inclusive workplace; (d) maintaining efficient and cost-effective travel and transportation services through best practices, as well as through close cooperation and benchmarking with other United Nations system organizations; (e) continuing to promote environmental sustainability in coordination with all departments and offices; (f) strengthening the capacity of procurement staff through the management and delivery of online procurement training courses and certification programmes to ensure the consistent application of and full compliance with established policy, procedures and best practices across the Organization; (g) improving the management of assets by continuing to implement the Organization-wide framework in compliance with the International Public Sector Accounting Standards; (h) improving outreach to clients, especially through the use of electronic resources; (i) supporting enterprise application deployments and integrating new technologies into the organizational business toolkit; and (j) increasing compliance with technology standards, guidelines and methodologies, as well as with information and communications technology policies and enterprise architecture.
- 29F.3 The United Nations Secretariat units located in Vienna to which the Office provides administrative support are the United Nations Office on Drugs and Crime (UNODC), the Office for Outer Space Affairs, the International Trade Law Division of the Office of Legal Affairs, the secretariat of the United Nations Scientific Committee on the Effects of Atomic Radiation, the United Nations Information Service, the Office of Internal Oversight Services, the Office for Disarmament Affairs, the regional office of the Office of the United Nations Ombudsman and Mediation Services and the United Nations Register of Damage Caused by the Construction of the Wall in the Occupied Palestinian Territory. The Office provides support services, garage operations, language training and communication services on a common services basis to IAEA, UNIDO and the Preparatory Commission for the Comprehensive Nuclear-Test-Ban Treaty Organization.
- 29F.4 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the coronavirus disease (COVID-19) pandemic. Examples of lessons learned include ensuring more resilient and sustainable network connectivity for the efficient and effective daily operation of remote working

and the importance of integrating more potential future scenarios into the business continuity plan. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.

- 29F.5 With regard to the external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) Other organizations of the United Nations common system in Vienna are willing to collaborate with the United Nations Secretariat on ongoing activities;
 - (b) The extrabudgetary funding available to client offices and the support requirements for services provided by the Office remain stable.
- 29F.6 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, the Office supports the implementation of the United Nations Office at Vienna/UNODC strategy for gender equality and the empowerment of women (2022–2026). It will also contribute to maintaining the gender equality targets, in line with the Secretary-General's system-wide strategy on gender parity, with women representing 49 per cent of staff at UNODC and 53 per cent at UNOV in the Professional and higher categories. The Office will support reporting on the implementation of the strategy and action plan of the Office and UNODC for gender equality and the empowerment of women, including on gender-sensitive performance management.
- 29F.7 In line with the United Nations Disability Inclusion Strategy, the Office and the other Vienna-based organizations, as members of the joint committee to administer the Common Fund for Financing Major Repairs and Replacements at the Vienna International Centre, will ensure that the necessary renovations, updates and repairs identified in the accessibility report commissioned by the host country are prioritized within the Common Fund. The Vienna-based organizations will continue to replace elevators to comply with accessibility regulations for persons with disabilities. Moreover, the Office will be strengthening an inclusive organizational culture supportive of staff members with disabilities and staff with dependants with disabilities. Regular training opportunities on disability inclusion will be offered and clearer communication of available benefits and entitlements with regard to disabilities will be provided. Furthermore, disability inclusion awareness-raising events will be organized in the context of promoting an inclusive organizational culture. Those activities will be pursued in close consultation with and with the active involvement of persons with disabilities and their representative organizations.

Programme performance in 2021

Impact of the pandemic

- 29F.8 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular the need for enhanced support for telecommuting, adapting the learning and organizational development curricula, delivering virtual training, supporting remote and hybrid meetings and providing increased client support in all administrative processes under all subprogrammes.

Legislative mandates

- 29F.9 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

31/194	Utilization of office accommodation and conference facilities at the Donaupark Centre in Vienna	58/278	Report of the Joint Inspection Unit on common and joint services of United Nations system organizations at Vienna
		70/255; 72/303	Progress towards an accountability system in the United Nations Secretariat

**Subprogramme 1
Programme planning, finance and budget**

General Assembly resolutions

41/213	Review of the efficiency of the administrative and financial functioning of the United Nations	76/235	Financial reports and audited financial statements, and reports of the Board of Auditors
42/211	Implementation of General Assembly resolution 41/213	76/236 76/245	Programme planning Questions relating to the proposed programme budget for 2022

**Subprogramme 2
Human resources management**

General Assembly resolutions

58/144	Improvement of the status of women in the United Nations system	73/281	Shifting the management paradigm in the United Nations
63/271	Amendments to the Staff Regulations	75/248	Administration of justice at the United Nations
72/254	Human resources management		

**Subprogramme 3
Support services**

General Assembly resolutions

58/276; 58/277	Report of the Joint Inspection Unit on the management audit review of outsourcing in the United Nations	58/278 69/273	Report of the Joint Inspection Unit on common and joint services of United Nations system organizations at Vienna Procurement
----------------	---	----------------------	--

**Subprogramme 4
Information and communications technology operations**

General Assembly resolutions

57/304	Information and communication technology strategy		arrangements for the secondary data centre at Headquarters
63/262	Information and communications technology, enterprise resource planning, and security, disaster recovery and business continuity	69/262	Questions relating to the programme budget for the biennium 2014–2015 (sect. II, Information and communications technology in the United Nations)
63/269	Information and communications technology, disaster recovery and business continuity for the United Nations:		

Deliverables

29F.10 Table 29F.1 lists all cross-cutting deliverables of the programme.

Table 29F.1

Cross-cutting deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	3	3	3	3
Meetings of:				
1. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
2. The Committee for Programme and Coordination	1	1	1	1
3. The Fifth Committee	1	1	1	1

Evaluation activities

- 29F.11 The following evaluations are pending finalization in 2022 and the preliminary results have guided the proposed programme plan for 2023:
- (a) Evaluation of implementation of infrastructure and technical improvements;
 - (b) Evaluation of activities in employment and capacity development to meet the requirements of the United Nations Disability Inclusion Strategy.
- 29F.12 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2023. For example, the client support portal was identified as a service with opportunities for improvement in a satisfaction survey carried out in January 2021. To address this, subprogramme 4 delivered significant additional functionalities to better meet client requirements. With regard to employment and capacity development to meet the United Nations Disability Inclusion Strategy, subprogramme 2 is expanding its targeted outreach activities to widen the pool of candidates with disabilities and is strengthening the employment homepage of the United Nations Office at Vienna/UNODC by improving accessibility, including a dedicated point of contact for persons with disabilities.
- 29F.13 An evaluation on cybersecurity is planned for 2023.

Programme of work

Subprogramme 1

Programme planning, finance and budget

Objective

- 29F.14 The objective, to which this subprogramme contributes, is to ensure sound, effective and efficient financial management by client offices.

Strategy

- 29F.15 To contribute to the objective, the subprogramme will:
- (a) Continue to strengthen the monitoring of budget performance, financial management and control, and improve reporting;
 - (b) Provide advice, assistance, guidance and training to programme managers and administrative units of client offices on financial management and budgetary matters;
 - (c) Coordinate with the Office of Programme Planning, Finance and Budget at Headquarters, as required;
 - (d) Streamline financial processes and guidelines and regularly review workflow procedures to identify ways to achieve a more efficient and faster client response;
 - (e) Strengthen internal financial controls, monitor financial performance and risks and ensure integrity of organizational financial data;
 - (f) Monitor the implementation of recommendations from oversight bodies and ensure strict compliance with the Financial Regulations and Rules of the United Nations and the financial policies of the United Nations.
- 29F.16 The above-mentioned work is expected to result in:
- (a) Improved accessibility and understanding of financial information by client offices;

- (b) Increased accountability by client offices;
- (c) Improved integrity of financial data;
- (d) Enhanced overall management of programme budget and extrabudgetary financial resources.

Programme performance in 2021

Strengthened accountability of client offices on financial information and controls

- 29F.17 The subprogramme’s review of internal controls is an integral part of the United Nations Office at Vienna/UNODC assurance process on achieving reliable financial reporting, effective and efficient operations, and compliance with regulations, rules and policies. The 2021 review consisted of 16 self-assessment surveys on key performance indicators and the analysis and enhancement of key internal control tools. The review confirmed solid internal controls with no significant issues. Two of the six Secretariat-wide areas had identified opportunities for improvement: sub-processes related to travel and to learning and skills development. For those areas, the subprogramme developed, documented and implemented action plans and measures to improve these internal controls, thus offering increased assurance on the soundness of its internal controls to clients and stakeholders.
- 29F.18 Progress towards the objective is presented in the performance measure below (see table 29F.2).

Table 29F.2
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
Progress towards increased assurance for clients and stakeholders through development, documentation and implementation of internal control tools	Clients and stakeholders have increased assurance on sound internal controls, as confirmed through the new assurance process, the review and enhancement of risk and control matrices and the development of remediation measures to close identified control gaps	Clients and stakeholders have increased assurance on sound internal controls, as confirmed through results of the self-assessment exercise and its comprehensive analysis, followed by development and implementation of remediation measures to address identified deficiencies

Planned results for 2023

Result 1: empowered ownership and management of resources

Programme performance in 2021 and target for 2023

- 29F.19 The subprogramme’s work contributed to regular financial analysis of UNODC performance and increased use of reports and dashboards for better decision-making by client offices, and to continuous guidance on financial and budgetary matters, with an increased implementation rate of 97 per cent by UNODC field offices, which exceeded the planned target of 95 per cent of total budget utilization.
- 29F.20 Progress towards the objective and target for 2023 are presented in the performance measure below (see figure 29F.I).

Figure 29F.I
Performance measure: United Nations Office on Drugs and Crime field offices annual budget implementation rate

(Percentage)

Result 2: timely closure and reporting of grants

Programme performance in 2021 and target for 2023

29F.21 The subprogramme has issued periodic reports on the status of grants to inform substantive offices of potential systemic issues and has built client capacity to monitor grant life cycles, including through self-paced training, guidance on the client support portal and targeted training sessions, contributing to 50 per cent of final financial reports of its clients issued in their due year, which met the planned target.

29F.22 Progress towards the objective and target for 2023 are presented in the performance measure below (see figure 29F.II).

Figure 29F.II
Performance measure: percentage of final financial reports issued in the year they are due

(Percentage)

Result 3: improved asset management through re-engineered business processes

Proposed programme plan for 2023

29F.23 The subprogramme tracks and records project assets in accordance with the International Public Sector Accounting Standards (IPSAS) for client offices, such as UNODC, which has a significant number of project assets in the field that are to be handed over to end beneficiaries. The current

process starts tracking project assets from the point of acquisition or construction until the point of handover to end beneficiaries. The process requires close collaboration with field offices throughout the asset’s life cycle. Deviation from the standard Umoja processes in any part of the asset’s life cycle often results in errors in accounting and asset records. The detection and correction of errors consume a lot of client offices’ time and involve many complex steps.

Lessons learned and planned change

29F.24 The lesson for the subprogramme was that ongoing monitoring and training efforts in accounting for project assets were not sufficient owing to the inherent complexity of the issue and high turnover of staff in the field. The added complexity of the IPSAS accounting requirements with regard to asset management will require analysis and potential process revisions to clarify whether the project assets fall under the control of the United Nations. In applying the lesson, the subprogramme will help to review the scope of project assets, subject to IPSAS accounting, while ensuring full compliance with IPSAS requirements. As a result, the client field offices will be able to focus more on asset management and their custodian responsibilities.

29F.25 Expected progress towards the objective is presented in the performance measure below (see table 29F.3).

Table 29F.3
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	Client field offices benefit from joint review of asset register, and correction of errors in accounting and in asset records, with parallel delivery of training and ongoing guidance	Client field offices have increased visibility on the status of assets under their control, achieved through the review of relevant grant agreements in line with IPSAS requirements	Client field offices become increasingly compliant with IPSAS requirement on project asset accounting, through implementation of the change in scope of assets under their control

Deliverables

29F.26 Table 29F.4 lists all deliverables of the subprogramme.

Table 29F.4
Subprogramme 1: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	2	2	2	2
1. Consolidated budget for UNODC for the biennium	1	1	–	1
2. Performance report for UNODC for the biennium	–	–	1	–
3. Annual financial report and audited financial statements for UNODC	1	1	1	1

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

E. Enabling deliverables

Administration: financial management, including risk management and internal control, preparation and implementation of budgets and other resource proposals; management of 2,470 posts (creation, extension, abolishment and funding); financial reporting and accounting; cash and revenue management; accounting services, including processing for cost recovery; issuance of 23,500 United Nations Development Programme-related financial authorizations, payments, disbursements and payroll for 1,450 staff members; guidance and advice on all financial matters; and management of after-service health insurance claims for 680 beneficiaries.

Subprogramme 2 Human resources management

Objective

- 29F.27 The objective, to which this subprogramme contributes, is to ensure the attraction, development and retention of a competent, diverse, adaptable and healthy workforce with the highest standards of efficiency, competence and integrity, giving due regard to geographical representation, inclusivity and gender balance.

Strategy

- 29F.28 To contribute to the objective, the subprogramme will:
- (a) Foster and reinforce an enabling working environment for its clients with regard to service delivery, talent management and organizational culture, which will encompass the delivery of a broad spectrum of human resources services to clients in Vienna and in UNODC field offices;
 - (b) Implement talent outreach and attraction initiatives to enhance gender equality and geographical representation and inclusiveness of persons with disabilities, building on the Enabling Environment Guidelines for the United Nations System published by the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women);
 - (c) Support personnel through talent development initiatives and promoting workplace flexibility;
 - (d) Reinforce a culture of zero-tolerance against prohibited conduct, which includes the implementation of multiple initiatives of the United Nations System Chief Executives Board for Coordination.
- 29F.29 The above-mentioned work is expected to result in an overall improvement of staff engagement, motivation, productivity and well-being, thereby contributing positively to the delivery of the Organization's mandates.

Programme performance in 2021

United Nations-branded, flexible and secure online testing platform for administering exams

- 29F.30 The provision of an online platform for written assessments minimizes the risk of bias and provides flexibility to accommodate a high number of candidates. The platform helps to ensure a fair, valid and efficient hiring process. Owing to the COVID-19 pandemic, the use of the online testing platforms increased significantly to ensure business continuity. The method used for the administration of written assessments proved to be rigid and inflexible for the digital recruitment process for both candidates and hiring offices and difficult to scale up. In 2021, the United Nations online examinations and tests system (UNOETS) platform provided a reduced administrative burden

for both support and substantive offices and allowed for an improved hiring process, benefiting prospective candidates.

29F.31 Progress towards the objective is presented in the performance measure below (see figure 29F.III).

Figure 29F.III
Performance measure: increased usage of the United Nations online examinations and tests system platform
 (Number of assessments held)

Planned results for 2023

Result 1: enhanced geographical representation

Programme performance in 2021 and target for 2023

29F.32 The subprogramme’s work on targeted outreach activities, rigorous application monitoring, internal awareness-raising campaigns and regular statistical updates contributed to enhanced geographical diversity, given that 54 per cent of new candidates for UNODC and the United Nations Office at Vienna were selected from underrepresented countries, which exceeded the planned target of 43 per cent of candidates selected from underrepresented countries.

29F.33 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 29F.IV).

Figure 29F.IV
Performance measure: number of candidates selected from underrepresented countries
 (Percentage)

Result 2: a respectful and civil workplace fostered**Programme performance in 2021 and target for 2023**

- 29F.34 The subprogramme's work contributed to various outreach activities in 2021, including the integration of a performance management goal into individual workplans, which contributed to fostering a respectful and civil workplace, with 92 per cent of the United Nations Office at Vienna/UNODC staff having completed the mandatory online training on the prevention of sexual harassment in the work environment in 2021, which exceeded the planned target of 90 per cent of staff who completed the training.
- 29F.35 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 29F.V).

Figure 29F.V

Performance measure: number of staff who completed the mandatory online training on the prevention of sexual harassment in the work environment (cumulative)

(Percentage)

**Result 3: career and professional development supported by increased number of certified coaches****Proposed programme plan for 2023**

- 29F.36 The voluntary coaching programme is an efficient, high-impact process in which the coach and the staff member work together to determine the staff's own answers and action, in order to solve immediate professional issues and to develop the capacity to continue to improve in sustainable ways. This process has been expanded by the subprogramme, given that, owing especially to the COVID-19 pandemic, the need for staff members to receive coaching increased. The expanded voluntary coaching programme allows more staff members and managers to become coaches themselves. In the advanced module of the certified leadership coaching programme, managers and supervisors are trained on how to use the coaching approach, foster career development and the well-being of their staff and use coaching in their daily work.

Lessons learned and planned change

- 29F.37 The lesson for the subprogramme was that it should use the certified leadership coaching programme to address the need for more staff, especially managers, to become certified coaches. The subprogramme will use coaching as an essential tool in performance management, given that the Organization needs more colleagues utilizing this approach in their daily work. These certified coaches will possess the knowledge necessary to be agents of change to establish a coaching organizational culture. In applying the lesson, the subprogramme will invest in increasing the number of certified coaches.
- 29F.38 Expected progress towards the objective is presented in the performance measure below (see figure 29F.VI).

Figure 29F.VI

Performance measure: increased number of certified coaches to ensure sustainability of the organizational culture change (cumulative)

Deliverables

29F.39 Table 29F.5 lists all deliverables of the subprogramme.

Table 29F.5

Subprogramme 2: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory

D. Communication deliverables

Outreach programmes, special events and information materials: more than 15 outreach programmes, including special events, information and broadcast materials, job fairs and career presentations for more than 1,500 potential candidates; health- and wellness-promotion programmes and awareness-raising programmes on prohibited conduct and the Enabling Environment Guidelines for the United Nations System for all staff members.

E. Enabling deliverables

Administration: human resources services provided to 3,500 personnel; succession planning, organizational design, classification and reclassification of posts, outreach and full recruitment process, expert advice on the conduct of staff selection processes to all hiring managers, human resources policies and legal advice; counselling of staff on personal, family and work-related concerns; talent management; issuance and renewal of appointments, administration of staff movements and separation/terminations; provision of training on organizational and managerial competencies on a biannual basis, substantive and technical skills, and career development; orientation programmes for new personnel; and provision of medical services in collaboration with other Vienna-based entities.

Internal justice and oversight: legal and policy advisory services provided to line managers, senior officials and colleagues in the discharge of their official functions; legal positions for administrative reviews and cases brought by staff to the Management Evaluation Unit and the Office of the United Nations Ombudsman and Mediation Services; assistance to the responsible official in receiving and assessing complaints and reports of alleged misconduct and processing such complaints in accordance with established policies and procedures, including liaising with the Office of Internal Oversight Services and other investigative bodies, and the Administrative Law Division once the disciplinary process is invoked; and discharging the role of Conduct and Discipline Focal Point and awareness-raising on matters related to the administration of justice at the United Nations.

Subprogramme 3 Support services

Objective

- 29F.40 The objective, to which this subprogramme contributes, is to ensure the efficient, environmentally sound and effective functioning of client offices with regard to conference and facilities management, asset management, travel and transportation, mail and pouch services, procurement, commercial activities, records management and library services.

Strategy

- 29F.41 To contribute to the objective, the subprogramme will:
- (a) Provide regular support to clients with regard to changing workspace needs within the constraints of limited office space and in line with upcoming revised office space standards;
 - (b) Assist, advise and provide regular virtual and instructor-led training on travel policies and related Umoja processes;
 - (c) Implement an environmental management system in line with the United Nations Secretariat environmental policy;
 - (d) Implement and manage an effective supply chain by building on the related Umoja functionality;
 - (e) Continue to focus on improving outreach services to ensure better utilization of library resources.
- 29F.42 The above-mentioned work is expected to result in:
- (a) Effective and sustainable use of United Nations workspace and property (furniture and equipment);
 - (b) Effective management of clients' travel resources;
 - (c) Coordinated approach with other Vienna-based organizations for an effective environmental management system;
 - (d) Enabling clients, including Member States, to continue to make informed decisions and develop policies by providing access to information resources through the library.

Programme performance in 2021

Successful collaboration with Secretariat libraries for a cost-efficient solution for remote access to library resources for United Nations Office at Vienna/United Nations Office on Drugs and Crime clients

- 29F.43 During the second year of the COVID-19 pandemic, the need to gain access to key information sources to fulfil mandated activities by United Nations Office at Vienna/UNODC staff while working from home or from field offices continued. While subprogramme worked to expand remote access to library resources, access to several resources could not be realized offsite in 2021. The subprogramme worked with other Secretariat libraries to find an easier, less labour-intensive and more affordable solution for clients to gain access to all necessary library resources online. The Secretariat libraries were able to jointly procure a more affordable solution to ensure access to all library electronic resources. The new solution was launched in November 2021 and enabled all United Nations Office at Vienna/UNODC staff to log in to all library electronic resources. The client entities benefited from fully functional remote access to key information required, which enabled the more efficient execution of client mandate delivery.

29F.44 Progress towards the objective is presented in the performance measure below (see figure 29F.VII).

Figure 29F.VII

Performance measure: average number of remote monthly searches across library resources

Planned results for 2023

Result 1: improved mail and pouch tracking system for clients

Programme performance in 2021 and target for 2023

29F.45 The subprogramme’s work contributed to the development of a global digital mail and pouch tracking system at United Nations Headquarters, which did not meet the planned target of client offices using the digital mail and pouch tracker and providing positive feedback. The target was not met because the pilot system tested and evaluated did not meet business requirements in 2021.

29F.46 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29F.6).

Table 29F.6

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Mail operations proposed a digital mail and pouch system that provides real-time information about shipments	Pilot system tested and evaluated did not meet business requirements	New global solution that meets business requirements is under development	New solution will be implemented	Clients provide positive feedback on the new mail and pouch tracking system

Result 2: improved Organization business continuity response

Programme performance in 2021 and target for 2023

29F.47 The subprogramme’s work contributed to a better understanding of an individual office’s business continuity requirements and its alignment with the overall business continuity plan for the United Nations Office at Vienna/UNODC, which did not meet the target of having an evaluation of the business continuity plan and response to the 2020/2021 crisis. The planned target was not met because the process is ongoing, with a view to embedding business continuity into a wider organizational resilience management system.

29F.48 Progress towards the objective and target for 2023 are presented in the performance measure below (see table 29F.7).

Table 29F.7
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Business continuity plan in place	Gaps in business continuity plan identified during COVID-19 crisis	Analysed the business continuity plan vis-à-vis the other components of the organizational resilience management system	Increased preparedness of the Organization for future crises	Improved linkage of business continuity with other components of the organizational resilience management system

Result 3: reduced environmental risks through establishment of an environmental management system

Proposed programme plan for 2023

29F.49 The environmental management system is a set of management procedures to identify, evaluate and reduce the environmental impact of an entity’s business activities and continuously improve its environmental performance. In line with the Secretariat-wide environmental policy, the United Nations Office at Vienna will establish an environmental management system.

Lessons learned and planned change

29F.50 The lesson for the subprogramme was that a more structured and comprehensive approach would be needed to maximize the positive environmental impact of the United Nations Office at Vienna and its client entities’ operations. This was concluded during the review of 2021 environmental management system survey results by which the United Nations Office at Vienna environmental management system status was assessed. In applying the lesson, the subprogramme will further assess the most significant environmental aspects of its operations. An action plan to improve the areas of focus and identify possible risks to the environmental performance and resource efficiencies will be developed. Through the introduction of the environmental management system, the clients will have increased assurance regarding the environmental soundness of their programme’s operations.

29F.51 Expected progress towards the objective is presented in the performance measure below (see table 29F.8).

Table 29F.8
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	–	Baseline assessment of entity operations’ environmental impact and development of action plan	Reduction in environmental risks, through the development of an initial version of the local environmental management system

Deliverables

29F.52 Table 29F.9 lists all deliverables of the subprogramme.

Table 29F.9

Subprogramme 3: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory

D. Communication deliverables

Library services: knowledge services to enable evidence-based policymaking and facilitate research for 3,000 library clients; digitize pages of official documents to make them available online; print and electronic information resources; and on-site and online access.

E. Enabling deliverables

Administration: management and maintenance of United Nations-leased premises.

Logistics: travel management: arrangement of tickets, visas and laissez-passer for staff and meeting participants for Vienna-based United Nations Secretariat entities and more than 115 UNODC field office locations.

Procurement: provision of full procurement services.

Property management: physical verification of assets and monitoring of United Nations property records at the Vienna International Centre and at the more than 115 UNODC field office locations.

Facilities management: management of office space and office furniture.

Transportation: shipment of official property, bulk consignments for conferences, and removal of personal effects and related insurance requirement.

Mail services: mail, pouch and distribution services for more than 200 United Nations offices and 15 other United Nations entities in Vienna.

Subprogramme 4 Information and communications technology operations

Objective

29F.53 The objective, to which this subprogramme contributes, is to advance the efficient and effective implementation of client entities' substantive programmes through technologies, including a coherent enterprise information and communications technology system and enterprise architecture, access to information and communications technology (ICT)-related technological innovations and a secure, coherent and resilient technology application hosting and infrastructure landscape.

Strategy

29F.54 To contribute to the objective, the subprogramme will:

- (a) Place client offices' programme objectives and business needs at the centre of decisions involving ICT service offerings and the implementation of new technologies;
- (b) Support enterprise application deployments and integrate local service delivery mechanisms to avoid replication of globally available services;
- (c) Strengthen security in the use of ICT and data protection through the implementation of vulnerability management, continuous monitoring, the protection of classified information and related policies and procedures;
- (d) Promote cloud computing through using Secretariat-wide systems contracts and increase compliance with technology standards, guidelines and methodologies by cooperating with the regional technology centres and the Office of Information and Communications Technology.

29F.55 The above-mentioned work is expected to result in:

- (a) Improved service delivery;
- (b) Conformance with global United Nations Secretariat standards and technical procedures;
- (c) Clients who are empowered during the decision-making process and whose administrative and management tasks are facilitated through access to appropriate information technology tools;
- (d) Reduced fragmentation, with staff incorporating tools and services seamlessly into their daily business workflows to achieve their goals with effectiveness, efficiency and satisfaction;
- (e) Greater scalability, with systems that are more adaptable to changing needs through the use of cloud-based security for enterprise applications.

Programme performance in 2021

Enhanced user experience and automation of services through client support portal

29F.56 The subprogramme implemented and enhanced the client support portal to serve as the central entry point for all client service needs, providing essential information for administrative and support areas, while also allowing clients to request services and link up with the correct application or counterpart. The portal enables virtual access to services for clients anytime, anywhere, which proved vital to business continuity during the COVID-19 pandemic and the resulting remote working posture. The portal development and expansion brought enhanced automated processes and addressed client needs online in 2021. The subprogramme enabled clients to gain access to 80 applications and forms related to services across multiple platforms and devices, allowing staff to visit and use the portal remotely. The new system enabled responsiveness to client needs, given that the overall number of service requests was increasing during the pandemic-related remote working posture.

29F.57 Progress towards the objective is presented in the performance measure below (see figure 29F.VIII).

Figure 29F.VIII

Performance measure: number of client service requests raised through the client support portal

Planned results for 2023

Result 1: technology enabled field staff to perform with less disruption

Programme performance in 2021 and target for 2023

29F.58 The subprogramme's work contributed to the implementation of new productive tools and technologies, and several new applications moved to cloud services, with the use of 42 cloud-based services by staff members, which exceeded the planned target of 24 cloud-based services being in use in 2021.

29F.59 Progress towards the objective and target for 2023 are presented in the performance measure below (see figure 29F.IX).

Figure 29F.IX
Performance measure: number of cloud-based services in use (cumulative)

Result 2: strengthened connectivity resiliency

Programme performance in 2021 and target for 2023

29F.60 The subprogramme’s work contributed to the implementation of cost-effective network infrastructure solutions in all UNODC field offices to create a resilient and sustainable office network with wired and wireless networking, as demonstrated by eight UNODC field offices using the network solution, which met the planned target.

29F.61 Progress towards the objective and target for 2023 are presented in the performance measure below (see figure 29F.X).

Figure 29F.X
Performance measure: number of UNODC field offices using the network solution

Result 3: integration of needs of persons with disabilities in information and communications technology solutions

29F.62 The United Nations Disability Inclusion Strategy provides the foundation for sustainable and transformative progress on disability inclusion through all pillars of the work of the United Nations. In line with this strategy, the action plan on disability inclusion for the United Nations Office at Vienna/UNODC was launched in December 2020.

29F.63 To support and implement the action plan, the subprogramme has made efforts to mainstream disability inclusion into its work, starting with making the United Nations Office at Vienna/UNODC websites compatible with industry standards for accessibility by following accessibility guidelines for all United Nations websites. Access to information and services remotely through websites, social media platforms and online collaboration tools became an indispensable part of the daily routine while staff worked remotely during the COVID-19 pandemic.

Lessons learned and planned change

29F.64 The lesson for the subprogramme was that, in the past, websites had been developed and maintained that were not always fully compatible with the standards and guidelines for producing accessible web content for people with disabilities. In addition, disability inclusion regarding ICT systems was handled on an ad hoc or on-demand basis without having a systematic and comprehensive approach. In applying the lesson, the subprogramme will continue its efforts to improve the accessibility of websites and will undertake an assessment of disability inclusion levels of ICT solutions. The initiative will develop processes, tools and procedures so that new websites and systems are deployed, taking their disability inclusion levels into account.

29F.65 Expected progress towards the objective is presented in the performance measure below (see table 29F.10).

Table 29F.10
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Disability inclusion actions regarding ICT systems taken on an ad hoc or on-demand basis	Disability inclusion actions regarding ICT systems taken on an ad hoc or on-demand basis	Disability inclusion actions regarding ICT systems taken on an ad hoc or on-demand basis and websites improved through accessibility guidelines	Develop processes, tools and procedures to assess the levels of disability inclusion in ICT solutions and assessment of the websites for their accessibility levels	Persons with disabilities benefit from integration of the systematic assessment of the levels of disability inclusion in the approval process for ICT solutions and websites

Deliverables

29F.66 Table 29F.11 lists all deliverables of the subprogramme.

Table 29F.11
Subprogramme 4: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory

E. Enabling deliverables

Information and communications technology: provision of security for information technology systems and data; connectivity services for remote devices; hosting services; voice, video and data communications services; operation and maintenance of existing and new application systems in a secure environment; technical support to 3,000 end users; and advisory services on business solutions.

B. Proposed post and non-post resource requirements for 2023

Overview

29F.67 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 29F.12 to 29F.14.

Table 29F.12

29F.68 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 29F.15 to 29F.17 and figure 29F.XI.

29F.69 As reflected in tables 29F.15 (1) and 29F.16 (1), the overall resources proposed for 2023 amount to \$18,502,600 before recosting, reflecting no change compared with the appropriation for 2022. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

29F.70 As reflected in tables 29F.15 (2) and 29F.16 (2), the Office expects to receive extrabudgetary contributions that complement regular budget resources and support the delivery of its mandates. The resources will be used mainly for delivering administrative services. In 2023, extrabudgetary resources are estimated at \$17,846,300 and would provide for 84 posts, as presented in table 29F.16 (2). Extrabudgetary resources represent 49.1 per cent of the total resources for this section.

29F.71 The extrabudgetary resources for this section are subject to the oversight of the United Nations Office at Vienna, which has delegated authority from the Secretary-General.

Executive direction and management

- 29F.72 The executive direction and management component is headed by the Director of the Division for Management, who is responsible for providing leadership and direction regarding the management of administrative, conference and related support services for United Nations entities located in Vienna.
- 29F.73 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Office and UNODC are integrating environmental management practices into their operations. The Vienna headquarters is a climate-neutral facility, running 100 per cent on renewable energy. Since 2020, the Vienna-based organizations of the common systems have begun to renew entrances, replace existing air curtains and upgrade/refurbish all elevator cabins, and continued to upgrade air conditioning units and replace pipes and insulation throughout the Vienna International Centre from the 1978 standards. These measures result in a further reduction in the environmental impact of Centre. These projects will continue through 2023, to further reduce the Centre's carbon footprint.
- 29F.74 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 29F.18. In 2021, the low travel compliance rate was influenced by the COVID-19 pandemic, resulting in changes in travel options made on short notice, as well as imposed and lifted travel restrictions.

Table 29F.18

Compliance rate

(Percentage)

	Actual 2019	Actual 2020	Actual 2021	Planned 2022	Planned 2023
Timely submission of documentation	100	100	100	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	79	–	43	100	100

- 29F.75 The proposed regular budget resources for 2023 amount to \$383,700 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 29F.19 and figure 29F.XII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

29F.76 Extrabudgetary resources for the subprogramme are estimated at \$609,900 and would provide for two posts (1 P-4 and 1 P-2), as well as non-post resources. The resources would be used in implementing activities related to business transformation. The expected increase of \$9,200 is attributable mainly to anticipated higher staff costs in 2023 compared with 2022.

Programme of work

Subprogramme 1

Programme planning, finance and budget

29F.77 The proposed regular budget resources for 2023 amount to \$2,276,200 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of resources in 2023 are reflected in table 29F.20 and figure 29F.XIII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

29F.78 Extrabudgetary resources for the subprogramme are estimated at \$4,923,600 and would provide for 37 posts (1 D-1, 2 P-4, 7 P-3, 1 P-2, 3 General Service (Principal level) and 23 General Service (Other level)), as well as non-post resources. The resources would be used mainly to support financial policy development and financial management reform initiatives, audit liaison and coordination and the capacity of the Financial Resources Management Service to support client offices’ activities, including financial accounting operations for UNODC and its field offices and donor financial reporting. The expected increase of \$84,500 is attributable mainly to anticipated higher staff costs in 2023 compared with 2022.

**Subprogramme 2
Human resources management**

29F.79 The proposed regular budget resources for 2023 amount to \$2,936,000 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of resources in 2023 are reflected in table 29F.21 and figure 29F.XIV.

Table 29F.21

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

29F.80 Extrabudgetary resources for the subprogramme are estimated at \$2,736,000 and would provide for 19 posts (2 P-4, 2 P-3 and 15 General Service (Other level)), as well as non-post resources. The resources would be used mainly to support learning and development and the design and implementation of training programmes and provide the Human Resources Management Service with the capacity to support client offices’ activities, including recruitment and management of staff for UNODC and its field offices. The expected decrease of \$79,300 is attributable mainly to an anticipated slightly lower average number of staff onboarded in 2023.

Subprogramme 3 Support services

29F.81 The proposed regular budget resources for 2023 amount to \$9,871,600 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of resources in 2023 are reflected in table 29F.22 and figure 29F.XV.

Table 29F.22

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

29F.82 Extrabudgetary resources for the subprogramme are estimated at \$3,060,200 and would provide for the continuation of 15 posts (1 P-4, 5 P-3 and 9 General Service (Other level)), as well as non-post resources. The resources would support property management, including for UNODC and its field

offices, shipment and registry services, as well as the garage operations at the Vienna International Centre. The expected increase of \$33,400 is attributable mainly to anticipated higher staff costs in 2023 compared with 2022.

Subprogramme 4 Information and communications technology operations

29F.83 The proposed regular budget resources for 2023 amount to \$3,035,100 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of resources in 2022 are reflected in table 29F.23 and figure 29F.XVI.

(Number of posts/thousands of United States dollars)

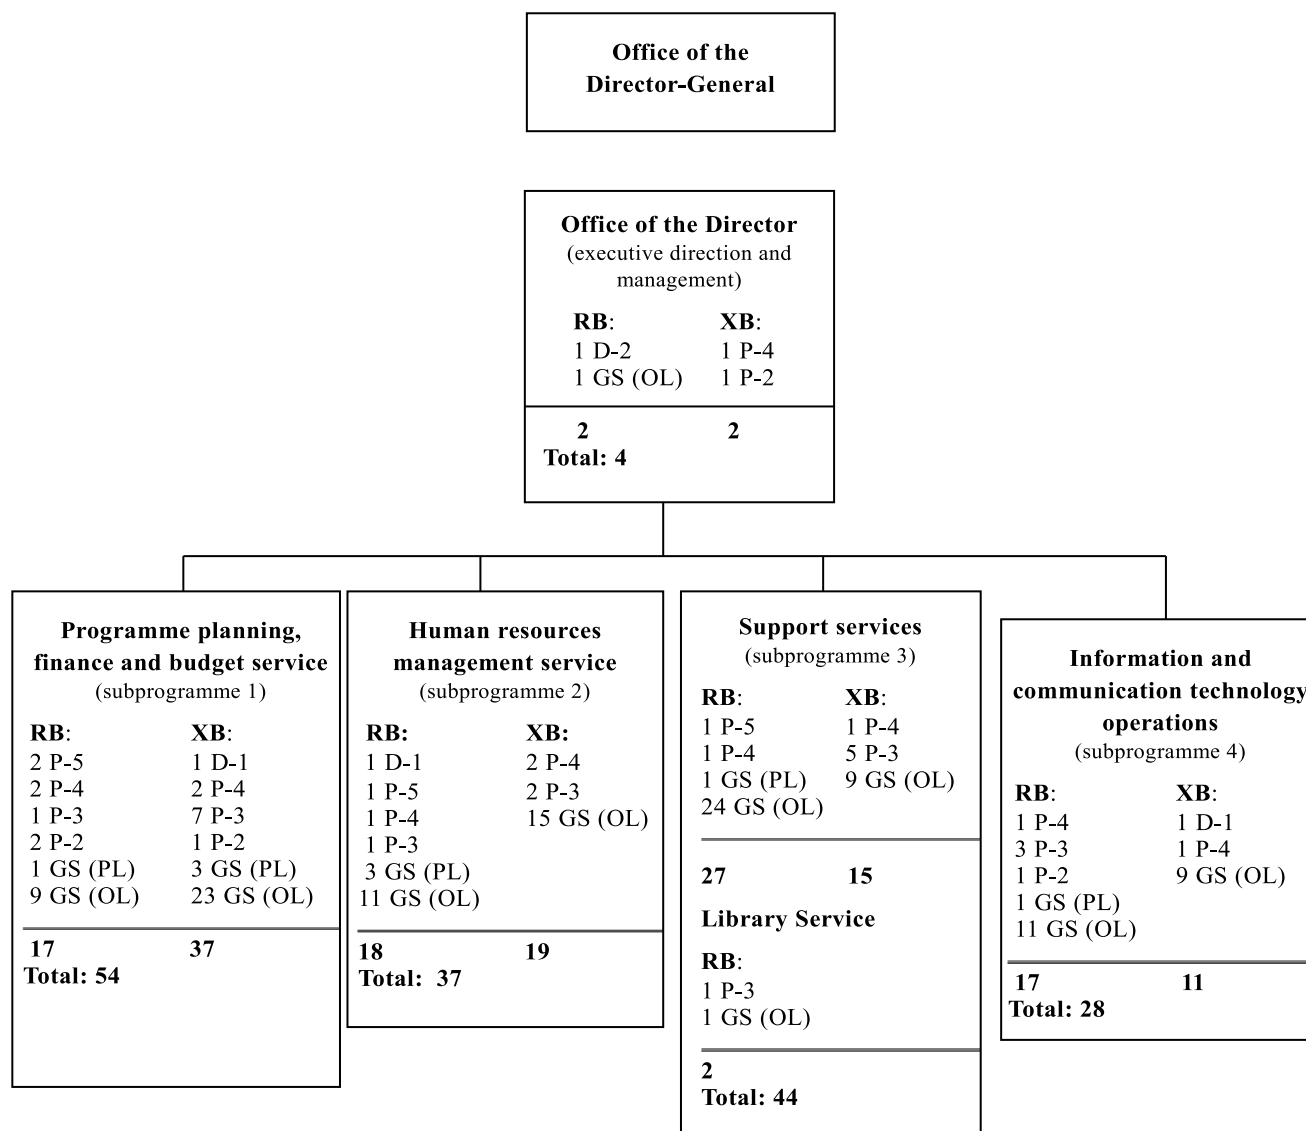

Extrabudgetary resources

- 29F.84 Extrabudgetary resources for the subprogramme are estimated at \$6,516,600 and would provide for the continuation of 11 posts (1 D-1, 1 P-4 and 9 General Service (Other level)), as well as non-post resources. The resources would be used mainly to support the ICT infrastructure, applications development and information management, and provide the Information Technology Service with the capacity to support client offices' activities, including UNODC and its field offices. The expected increase of \$88,100 is attributable mainly to anticipated higher staff costs in 2023 compared with 2022.

Annex II

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/76/7](#)

The Committee is of the view that the Office should rely, as much as possible, on internal expertise and skills in the area of business continuity, considering that it is a recurrent activity (para. VIII.118).

The Committee recommends that the General Assembly request the Secretary-General to undertake a review of the current general temporary assistance positions, with a view to determining the need for their continuation (para. VIII.119).

The Committee trusts that comprehensive information on all aspects of the cost-sharing arrangements will be provided (para. VIII.131).

The current proposal includes all resources requested for business continuity under subprogramme 3 and relies fully on in-house capacity for recurring needs.

A review of the positions was conducted. Owing to the current and anticipated workload combined with significant fluctuations in workload, the current proposal retains the number and temporary nature of these positions.

The present document outlines cost-sharing arrangements for administrative support on a common services basis to and from other international organizations based in the Vienna International Centre. The Office provides support services as described under paragraph 29F.3 above. UNIDO provides buildings management services and IAEA provides medical services.

Overall orientation

Mandates and background

29G.1 The United Nations Office at Nairobi was established by the Secretary-General on 1 January 1996 as a successor to the United Nations Common Services Unit at Nairobi and the two separate divisions of administration of the United Nations Environment Programme (UNEP) and the United Nations Human Settlements Programme (UN-Habitat). In its resolution [53/242](#), the General Assembly requested the Secretary-General to strengthen the Office and encouraged the Director-General of the United Nations Office at Nairobi to take steps to increase the level of utilization of the Office. The Office was established to strengthen the United Nations presence in Nairobi and to achieve economies of scale. Under a memorandum of understanding and specific service arrangements with UNEP and UN-Habitat, the Office provides them with a full range of administrative and other support services. The Office also administers the provision of common services to more than 60 offices of United Nations agencies, funds and programmes operating in or from Kenya and a range of services to the global resident coordinator system. In Kenya, the Office serves as the designated Secretariat service provider.

Strategy and external factors for 2023

29G.2 The United Nations Office at Nairobi is the primary common services provider to more than 60 offices of United Nations agencies, funds and programmes operating in or from Kenya that constitute the Common Services Management Team. These United Nations system entities include special political missions and peacekeeping support operations operating from Kenya.

29G.3 The Office provides human resources administration, payroll and finance services to international staff in 131 resident coordinator offices around the world as well as to the globally dispersed offices of UNEP and UN-Habitat. In addition, the Office, as a designated regional service provider, supports international travel, the recruitment of consultants and procurement services for resident coordinator offices in Africa. In 2023, the Office will continue to work closely with the Department of Operational Support and the resident coordinator system to further extend the support services that it provides.

29G.4 For 2023, the Office remains committed to maintaining optimal levels of service delivery. Its support for the United Nations development system reform will continue. This includes the provision of administrative services to the global resident coordinator system, implementation of the business operations strategy 2.0 and common back office and common premises initiatives. The major infrastructure projects will also remain high on the agenda of the programme.

29G.5 In 2023, the Office will continue to increase its level of utilization through partnerships with other United Nations entities, including the Office of the United Nations High Commissioner for Refugees. It will demonstrate operational agility and adapt to the environment following the coronavirus disease (COVID-19) pandemic and encourage and support its clients to do the same. The Office will make more use of the 142 acres that comprise the Gigiri complex, including through greater use of outdoor spaces and meeting pods. To increase the efficiency and effectiveness of its services, the Office will continue to strengthen its financial management and internal control systems and its risk framework, and it will leverage best practices, eliminate overlaps and generate synergies and coherence with a view to expanding the service base. The Office will continue to support its clients within the existing inter-agency governance framework, strive to increase its client portfolio and forge stronger partnerships in the region. It will also continue to provide medical and logistical support to United Nations system entities in the region. This is reflective of the fact that Nairobi will remain the main destination in the region for medical evacuations, and the United Nations treatment facility will continue to serve United Nations personnel and other patients.

- 29G.6 The Office will also continue to deepen its engagement with the host country Government in support of its mandate and the clients that it serves. A communications strategy will also be implemented, facilitating feedback from current and potential clients, in order to refine the services provided.
- 29G.7 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. Examples of lessons learned and best practices include providing effective business continuity and processes in place to ensure that all client services can be provided remotely, supporting hybrid and virtual meetings with remote simultaneous interpretation, at Member States' request, maintaining protocols to manage campus meetings, pandemic evolution monitoring systems and decision-making protocols, as well as psychosocial support mechanisms in the context of the pandemic to assist staff facing isolation and personal difficulties. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.
- 29G.8 With regard to cooperation with other entities, the Office will continue to work with the United Nations system organizations based in Nairobi, including through the common services governance framework. It will do so in support of United Nations common business operations, common premises and back offices.
- 29G.9 With regard to external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) Nairobi-based organizations of the United Nations common system maintain a commitment to collaborate with the United Nations Secretariat on ongoing activities;
 - (b) The extrabudgetary funding situation of client offices continues to allow for planning and implementation of the Office's activities.
- 29G.10 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate. It will strive to maintain gender parity within the Office and further support the Secretary-General's system-wide strategy on gender parity by keeping hiring managers and human resources focal points in client entities informed of the impact of selection decisions. The Office will continue to raise awareness of the gender parity strategy with client offices through guidance on how to integrate gender parity throughout the recruitment process.
- 29G.11 In line with the United Nations Disability Inclusion Strategy, the Office will ensure that all major repairs and replacements at the United Nations complex in Nairobi consider and address accessibility concerns. Moreover, the Office will strengthen an inclusive organizational culture that is supportive of staff members with disabilities and staff who have dependants with disabilities. The Office will offer regular training opportunities on disability inclusion, organize awareness-raising events and provide clear communication of available benefits and entitlements with regard to disabilities for all staff. These activities will strengthen an inclusive culture that supports the voluntary disclosure of and advocacy for staff and their dependants with disabilities. The mentioned activities will be pursued in close consultation with and the active involvement of persons with disabilities and their representative organizations through the common services governance framework.

Programme performance in 2021

Impact of the pandemic

- 29G.12 The continuation of the COVID-19 pandemic in 2021 had an impact on the implementation of mandates, in particular ensuring business continuity through the provision of remote services to clients and support for virtual and hybrid meetings under all subprogrammes, as well as further expansion of the portfolio of online learning under subprogramme 3. In addition, in order to support clients and Member States on issues related to the COVID-19 pandemic, the Office, under subprogramme 2, managed and supported the vaccination programme for United Nations personnel

and provided psychosocial support to address the impacts of isolation and other personal difficulties arising from the pandemic.

Legislative mandates

29G.13 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

52/12 A and B	Renewing the United Nations: a programme for reform	75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
53/242	Report of the Secretary-General on environment and human settlements	76/245	

Questions relating to the proposed programme budget for 2022

Subprogramme 1 Programme planning, finance and budget

General Assembly resolutions

41/213	Review of the efficiency of the administrative and financial functioning of the United Nations	76/236 76/246	Programme planning Special subjects relating to the proposed programme budget for 2022
42/211	Implementation of General Assembly resolution 41/213		

Subprogramme 2 Human resources management

General Assembly resolutions

58/144	Improvement of the status of women in the United Nations system	72/255 73/276	United Nations Common System Administration of justice at the United Nations Shifting the management paradigm in the United Nations
63/271	Amendments to the Staff Regulations	73/281	
72/254	Human resources management		

Subprogramme 3 Support services

General Assembly resolutions

58/263	Report of the Joint Inspection Unit on the revenue-producing activities of the United Nations system	58/277	Report of the Joint Inspection Unit on the management audit review of outsourcing in the United Nations and the United Nations funds and programmes Procurement reform Procurement
58/272	Special subjects relating to the proposed programme budget for the biennium 2004–2005, section I, information and communication technology strategy	62/269 69/273	
58/276	Outsourcing practices		

Subprogramme 4 Information and communications technology operations

General Assembly resolutions

57/304	Information and communication technology strategy	63/269	Information and communications technology, disaster recovery and business continuity for the United Nations: arrangements for the secondary data centre at Headquarters
63/262	Information and communications technology, enterprise resource planning, and security, disaster recovery and business continuity		

Deliverables

29G.14 Table 29G.1 lists all cross-cutting deliverables of the programme.

Table 29G.1

Cross-cutting deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	3	8	3	7
Meetings of:				
1. The Advisory Committee on Administrative and Budgetary Questions	1	4	1	3
2. The Committee for Programme and Coordination	1	1	1	1
3. The Fifth Committee	1	3	1	3

Evaluation activities

29G.15 The evaluation of the Joint Inspection Unit on business continuity management in United Nations system organizations, completed in 2021, has guided the proposed programme plan for 2023.

29G.16 The results and lessons of the evaluation referenced above have been taken into account for the proposed programme plan for 2023. For example, the Office will further enhance its support to client services and processes through remote and online client service desks.

Programme of work

Subprogramme 1

Programme planning, finance and budget

Objective

29G.17 The objective, to which this subprogramme contributes, is to ensure the sound, effective and efficient financial management and reporting by client offices.

Strategy

29G.18 To contribute to the objective, the subprogramme will:

- (a) Oversee the financial management and internal control of the regular budget and extrabudgetary funds of the programme and that of its clients;
- (b) Streamline the financial procedures and workflows of client offices and ensure strict adherence to the Financial Regulations and Rules of the United Nations, including through assurance and visibility of United Nations resources management, monitored by improved financial dashboards for client entities;
- (c) Maintain the financial accounts of its clients, improve the financial integrity of data, prepare the financial statements in compliance with International Public Sector Accounting Standards, support the internal and external audit processes, produce accurate and timely financial reports for donors and manage funding arrangements with implementing partners;
- (d) Assist client offices to implement the enhanced delegation of authority framework;

- (e) Support client offices in embedding results-based management principles into their operations.
- 29G.19 The above-mentioned work is expected to result in:
- (a) Operational efficiency and improved stewardship of donor funds, through increased transparency and accountability, in accordance with the enhanced delegation of authority framework;
 - (b) An unqualified audit opinion of the Board of Auditors for UNEP and UN-Habitat;
 - (c) Enhanced visibility for Member States on the impact of their contributions to the programme and the project implementation of client entities.

Programme performance in 2021

Improved reporting and transparency through dashboards for clients and management

- 29G.20 Since 2019, the Office has used management dashboards to support clients and monitor performance for services rendered in relation to internal controls, to keep management apprised of issues arising and track progress on the work received. In order to meet the expectations of a growing client base, there was a need to ensure that the subprogramme service portfolio offerings remained relevant to the needs of clients and that the subprogramme was able to provide innovative solutions necessary to meet growing expectations. The subprogramme enhanced and extended the use of the dashboards to meet client needs with regard to monitoring and to updating them on progress in grants management and grants closure. Building on these efforts, the use of dashboards was extended to monitor performance (including resolution time and workflow status) of work received, including easily accessible information for clients, allowing them to hold the subprogramme accountable for all service offerings.
- 29G.21 Progress towards the objective is presented in the performance measure below (see table 29G.2).

Table 29G.2
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
Grant management dashboards used by subprogramme for internal control purposes	Grant management dashboards used by clients for monitoring progress	Management dashboards for clients to monitor service performance, including key performance indicators and overall status of all service offerings

Planned results for 2023

Result 1: increasing monitoring and accountability in implementing partner arrangements for improved programme delivery

Programme performance in 2021 and target for 2023

- 29G.22 The subprogramme’s work contributed to 2,172 implementing partner agreements closed in 2021, improving the percentage of closed agreements to 63 per cent, which exceeded the planned target of 44 per cent.
- 29G.23 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 29G.I).

Figure 29G.I
Performance measure: expired agreements with implementing partners that are financially closed
 (Percentage)

Result 2: improved client relationship management and services to clients

Programme performance in 2021 and target for 2023

29G.24 The subprogramme’s work contributed to the processing and resolving of 18,709 iNeed ticket requests with 97 per cent client satisfaction, which exceeded the planned target of 95 per cent client satisfaction, as measured through a survey for completed requests.

29G.25 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 29G.II).

Figure 29G.II
Performance measure: number of iNeed tickets and percentage of client satisfaction

Result 3: improved client experience with fewer payroll corrections

Proposed programme plan for 2023

29G.26 The subprogramme is one of the primary payroll locations of the United Nations Secretariat, which manages the payroll of over 3,800 staff for 15 different United Nations entities at 171 duty stations and in 158 countries. The number of payroll clients continues to increase with additional programmes (e.g. resident coordinator system, Office of the Special Coordinator for Development in the Sahel) being supported by the Office. In order to ensure efficient service, it is critical to reduce the number of payroll corrections. The subprogramme ensures that all staff with valid contracts are included in the payroll run, addresses any corrections with supplementary payroll actions to ensure that staff receive their salaries and seeks to reduce the number of payroll corrections to below 1 per cent.

Lessons learned and planned change

29G.27 The lesson for the subprogramme was to strengthen the internal control mechanism and collaboration with human resources management to ensure that corrective action is taken before the payroll schedule. In applying the lesson, the subprogramme will also implement the iNeed ticket system for payroll inquiries to further improve its response time to clients, track and monitor payroll-related actions and provide data on the support provided to clients.

29G.28 Expected progress towards the objective is presented in the performance measure below (see figure 29G.III).

Figure 29G.III
Performance measure: percentage of payroll corrections

Deliverables

29G.29 Table 29G.3 lists all deliverables of the subprogramme.

Table 29G.3
Subprogramme 1: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	20	34	20	30
1. Training events on financial topics	20	34	20	30
Publications (number of publications)	2	2	2	2
2. Publications on financial statement volumes for UNEP and UN-Habitat	2	2	2	2
D. Communication deliverables				
Digital platforms and multimedia content: Quarterly Programme Planning, Finance and Budget Section newsletter.				
E. Enabling deliverables				
Administration: financial management, including risk management and internal control, preparation and implementation of budgets and other resource proposals; management of posts (creation, extension, abolishment and funding); financial reporting and accounting, including 1,400 donor reports; cash and revenue management; accounting services, including processing for cost recovery; payment and payroll services, disbursements; guidance and advice on all financial matters; management of after-service health insurance claims for 443 staff and dependant beneficiaries, management of 20,000 grants.				

Subprogramme 2

Human resources management

Objective

- 29G.30 The objective, to which this subprogramme contributes, is to ensure the acquisition, development and retention of a competent, diverse, adaptable and healthy workforce with the highest standards of efficiency and integrity.

Strategy

- 29G.31 To contribute to the objective, the subprogramme will:
- (a) Facilitate the recruitment process of personnel for its clients, ensuring fair and competitive recruitment processes;
 - (b) Develop and refine tools aimed at streamlining the recruitment process and assisting hiring managers in their evaluation of candidates, in collaboration with United Nations Headquarters and other offices away from Headquarters;
 - (c) Communicate strategically to foster greater interest from women and applicants from underrepresented countries, including through guidance to hiring managers and entities to promote the selection of qualified candidates from these categories;
 - (d) Develop and implement diverse training programmes for staff skills and competencies (i.e. language programmes, leadership development, coaching, mentoring and skill- and/or career-specific training), including through a diverse training offer to its clients by collaborating with other United Nations entities as well as external partners in jointly held training sessions;
 - (e) Develop internal knowledge platforms as a service for human resources and administrative focal points in Nairobi and in client entities at outposted duty stations to ensure consistent staff administration;
 - (f) Implement outreach programmes for all staff members, through briefings and intranet platforms, to ensure that staff have knowledge about benefits and entitlements and the related authorization processes;
 - (g) Deliver a comprehensive health and well-being programme, including through promotion and awareness-raising on staff mental health and physical well-being, health assessments and advice, and leveraging available knowledge resources at other duty stations, including New York, Vienna and Geneva;
 - (h) Provide support to staff from its dedicated United Nations COVID-19 medical facility, both within and outside the duty station, through the provision of medical surge capacity to support medical evacuations.
- 29G.32 The above-mentioned work is expected to result in:
- (a) Increased knowledge and skills of staff members;
 - (b) Client entities receiving standardized services across geographically dispersed locations;
 - (c) Improved ability of client entities to respond to their shifting operational requirements;
 - (d) Increased staff productivity.

Programme performance in 2021

Keeping staff safe: COVID-19 vaccination programme

- 29G.33 In response to the global COVID-19 pandemic, the subprogramme started a rigorous vaccination campaign for all of its local United Nations clients in March 2021 upon receiving vaccines authorized by the World Health Organization. The subprogramme has demonstrated its efficient

service provisioning as Joint Medical Service personnel in Nairobi vaccinated about 175 personnel per day at the beginning of the exercise, with a high of 384 and a low of 60 in that early phase. Cumulatively to date, the daily average vaccination rate stands at 75 persons per day. With the expansion of the programme to include dependants, flexibility was applied to open the vaccination site on Saturdays to achieve maximum vaccination coverage. A total of 21,500 COVID-19 vaccine doses were administered by the Service between March and December 2021.

29G.34 Progress towards the objective is presented in the performance measure below (see figure 29G.IV).

Figure 29G.IV

Performance measure: personnel and dependants vaccinated in Nairobi in 2021

(Number of doses)

Planned results for 2023

Result 1: enhanced organizational effectiveness through improved onboarding process

Programme performance in 2021 and target for 2023

29G.35 The subprogramme’s work contributed to enhancing organizational effectiveness through the review and redesign of the standard operating procedures for the onboarding process, which did not meet the planned target of an 85 per cent client satisfaction rate with the onboarding process. The target was not met as the planned client satisfaction surveys were not executed in 2020 owing to a shift in focus during the COVID-19 pandemic, including remodelling service delivery to be executed remotely, monitoring flexible work arrangements and organizing staff travel while airspace was largely closed.

29G.36 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29G.4).

Table 29G.4

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Need identified to enhance the onboarding experience of new staff and improve the effectiveness of the onboarding process. A communications innovation working group was set up to review the process, identify challenges and make recommendations	Recommendations of the communications innovations working group implemented; key performance indicators for the onboarding process established for 2021	Enhanced organizational effectiveness through the review and redesign of the standard operating procedures for the onboarding process	87 per cent client satisfaction rate with the onboarding process	90 per cent client satisfaction rate with the onboarding process

Result 2: portfolio of online learning expanded to global clients**Programme performance in 2021 and target for 2023**

29G.37 The subprogramme's work contributed to 5,812 participants in self-paced online learning and 4,138 virtual classroom activities, which exceeded the planned target of 4,500 participants and 900 virtual classroom activities.

29G.38 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 29G.V).

Figure 29G.V

Performance measure: annual number of participants in self-paced online learning and virtual classroom activities**Result 3: improved human resources services for a global client base****Proposed programme plan for 2023**

29G.39 The subprogramme has transitioned from being a local service provider to successfully servicing a growing client base within the United Nations Secretariat as well as the common system. With 13 entities on its client list, including the Office of the Special Coordinator for Development in the Sahel and the resident coordinator system, the subprogramme had 1,400 new individual clients in 2021 alone. Through its expertise and knowledge, the subprogramme has continued service provision to clients and adapted new tailored solutions for their specific needs.

Lessons learned and planned change

29G.40 The lesson for the subprogramme was the need to review and ameliorate its work processes to adapt to this growth with efficiency and agility. In applying the lesson, the subprogramme will focus on optimizing internal effectiveness, including by providing remote and individualized interaction with clients according to their specific needs. This will contribute to ensuring the continuing trust of current clients and attracting additional growth.

29G.41 Expected progress towards the objective is presented in the performance measure below (see figure 29G.VI).

Figure 29G.VI
Performance measure: annual number of staff members receiving comprehensive human resources services and locations at which services are delivered

(Number of staff and countries)

Deliverables

29G.42 Table 29G.5 lists all deliverables of the subprogramme.

Table 29G.5

Subprogramme 2: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory

E. Enabling deliverables

Administration: first-level review in administration of justice process (formal and informal); newsletters on various human resources matters, training on competencies, substantive and technical skills, languages and communications programmes and career development for 5,300 participants; performance management; inter-agency coordination on learning in support of Nairobi-based United Nations entities; administration of tests; health campaigns, including in relation to the mental health strategy; talent acquisition (approximately 300 recruitment actions for staff and 2,000 recruitment actions for consultants annually); classification of close to 300 positions within client programmes and advertisement of job openings; expert advice and guidance on staff selection processes, staff and non-staff hiring; offer management, including when-actually-employed staff; annual staff survey on cost of living, maximum rent levels and local salary surveys; staff pay and benefit services; expert advice and guidance on human resources policies to all clients, including on the administration and implementation of the Staff Rules and Regulations, entitlements and benefits, including payroll-related services; administration of workforce, from onboarding to separation of appointment, contracts, benefits and entitlements; medical consultations, advice and awareness programmes, including on travel, emergency and preparedness, mental health, HIV/AIDS and support for pregnancy and breastfeeding; staff counselling services.

Subprogramme 3 Support services

Objective

29G.43 The objective, to which this subprogramme contributes, is to ensure the efficient, environmentally sound and effective functioning of client offices with regard to conference and facilities management, host country services, asset management, travel and transportation, mail and pouch services, commercial activities and procurement services, as well as archives and records management.

Strategy

29G.44 To contribute to the objective, the subprogramme will:

- (a) Incrementally provide sustainable and efficient solutions with a specific focus on the management of waste, energy, water and wastewater, including through implementation, monitoring and audit of the environmental management system and through training on environmental sustainability and best practices to improve staff awareness;
- (b) Manage clients' changing workspace needs by maximizing usage and optimizing working conditions in the available office space, including through redesign, in consultation with client entities, and through revisions of office space standards, to support the operational requirements of each tenant as the Office continues to roll out flexible workplace strategies;
- (c) Assist clients with the migration from traditional archiving to more efficient filing and technology-based solutions;
- (d) Expand digital transport solutions through an integrated platform for better transport resources utilization and an efficient distribution between internal and external transport service providers, and assist, advise and provide regular training to end users and client approvers of these transport services;
- (e) Ensure immediate and effective travel services, especially leading up to major scheduled meetings, by relocating travel personnel to the client offices to establish on-site travel hubs;
- (f) Provide client-centric and solution-oriented procurement services to client entities and continuously strive to maximize value for money with due consideration to whole-life costs and effective international competition, enhanced through extensive geographical outreach and minimized transactional costs;
- (g) Continue to maintain the Office's environmental management system, including requisite International Organization for Standardization (ISO) 14001:2015 pre-certification external audit and post-certification annual surveillance activities, training and awareness.

29G.45 The above-mentioned work is expected to result in:

- (a) Improved physical infrastructure, optimized use of space and enhanced environmental management to support a sustainable, safe and flexible working environment;
- (b) Efficient and convenient host country services for all clients, including remote service options to keep clients and staff safe;
- (c) Efficient and convenient digitally enabled transport solutions in use by all clients;
- (d) Efficient and convenient procurement services available virtually to all global clients.

Programme performance in 2021

Increased procurement services to client offices across six continents

29G.46 The subprogramme undertook over 150 solicitations to acquire wide-ranging goods and services to support client offices located in six continents. Compared with 2019 and 2020, the number of solicitations undertaken by the Office trended upward, attributing to an incremental shift by client offices to insource procurement services from the Office rather than outsourcing to non-Secretariat entities such as the United Nations Development Programme and the United Nations Office for Project Support. The subprogramme was able to address the increased demand for procurement services through its client-centric and solution-oriented approach, which contributed to reduced processing times for procurement actions.

29G.47 Progress towards the objective is presented in the performance measure below (see figure 29G.VII).

Figure 29G.VII
Performance measure: average processing time of tenders

(Number of business days)

Planned results for 2023

Result 1: efficient management of e-waste and construction waste

Programme performance in 2021 and target for 2023

29G.48 The subprogramme’s work contributed to the recycling of 66,783 kg of construction waste and 36,739 kg of e-waste, which exceeded the planned target of 50,000 kg of construction waste and 5,000 kg of e-waste recycled.

29G.49 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 29G.VIII).

Figure 29G.VIII
Performance measure: annual quantity of recycled construction waste and e-waste

(Kilograms)

^a Reduced construction waste in 2023 reflects the reduced construction work at the United Nations facility.

Result 2: integrated digital transport solution

Programme performance in 2021 and target for 2023

29G.50 The subprogramme’s work contributed to continued access to safe and economical means of transportation to and from the complex during the pandemic, which did not meet the target of having more accessible and convenient taxi and shuttle services available in various ways, including through mobile applications. The target was not met owing to the reduced footprint of staff present at the complex during 2021, which necessitated a delay in the roll-out of the one-stop-shop digital transport solution to 2022.

29G.51 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 29G.6).

Table 29G.6
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Multiple fragmented third-party transport providers for staff bus, taxi, hire car and out-of-hours shuttle	Significantly reduced need for staff or official transportation owing to the COVID-19 pandemic in 2020	Clients received continued access to digital taxi services during the COVID-19 pandemic	Increased accessibility of transportation services available to clients, who are able to request such services through a single and intuitive platform	Sustained client satisfaction and engagement through the operation of an efficient platform of digital transport services
Pilot for digital taxi and shuttle services trialled in 2019	Roll-out of digital taxi and shuttle services delayed to 2021			

Result 3: improved stewardship of physical assets and equipment

Proposed programme plan for 2023

29G.52 The subprogramme provides the property management service and maintains the responsibility for conducting annual physical verification of equipment and updating data in Umoja (enterprise resource planning system) for offices in Nairobi, while the responsibility for the physical verification of equipment for offices away from Headquarters remains with clients. The subprogramme provides clients with guidance and quality assurance on the verification process for physical assets and equipment situated in over 100 locations around the world.

Lessons learned and planned change

29G.53 The lesson for the subprogramme was that there was an opportunity to support clients’ understanding and application of the systematic framework to undertake periodic verification of physical assets, in particular high-value and attractive assets. In applying the lesson, the subprogramme will undertake targeted capacity-building and outreach to support clients on the basis of their adherence to and application of the verification process. The subprogramme will monitor physical verification results for each client, analyse the results using detailed data sets and identify areas in which further management attention is required. The subprogramme will also engage with geographically dispersed clients by organizing virtual training to increase capacity development and enhance communication to clients.

29G.54 Expected progress towards the objective is presented in the performance measure below (see figure 29G.IX).

Figure 29G.IX
Performance measure: annual percentage of serialized items physically verified

Deliverables

29G.55 Table 29G.7 lists all deliverables of the subprogramme.

Table 29G.7

Subprogramme 3: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory

E. Enabling deliverables

Administration: management and maintenance of United Nations-owned land/premises/buildings (140 acres), including its 8 office blocks A–J, 11 office blocks M–X, 8 office blocks for new facilities, for a total of 73 office floors, 14 conference rooms, grounds and other buildings and infrastructure; management of office space, redesign of office layouts and configurations to serve the needs of the United Nations offices, other Secretariat departments and offices of other United Nations entities in Nairobi.

Logistics: receipt and inspection; issuance on average of over 400 laissez-passer and over 16,000 travel requests and other travel documents, travel arrangements for staff and meeting participants; handling of all privileges and immunities for approximately 2,000 entitled staff for 53 United Nations entities subscribed to the host country services provided by the United Nations Office at Nairobi on behalf of the Government of Kenya.

Procurement: sourcing support for the acquisition of goods and services; issuance of over 5,000 purchase orders per year for goods and services.

Asset management: advice on verification of financial and non-financial inventories, warehousing and disposal.

Facilities management: management of office space and office furniture.

Transportation: shipment of official property, bulk consignments for conferences, and the removal of personal effects and related insurance requirements.

Mail services: mail, pouch, distribution, registry and archiving services.

Subprogramme 4 Information and communications technology operations

Objective

29G.56 The objective, to which this subprogramme contributes, is to advance the efficient and effective implementation of client entities' substantive programmes through innovative technology solutions, while maintaining secure, coherent and resilient technology services and infrastructure backbone.

Strategy

29G.57 To contribute to the objective, the subprogramme will:

- (a) Develop proposals for end-to-end software and hardware solutions in consultation with client entities to ensure that their programme objectives and business needs are at the centre of the decisions on information and communications technology (ICT) service offerings and on the implementation of new technologies;
- (b) Establish and maintain business relationships with clients with a focus on the management of clients' needs and requests;
- (c) Develop and enhance existing innovative processes to enable testing and adoption of new technologies and solutions while supporting the accessibility, reliability, consistency and sustainability of those solutions.

29G.58 The above-mentioned work is expected to result in:

- (a) Fulfillment of client entities' business needs fulfilled through the agile implementation of new and innovative technologies;

- (b) Empowerment of client entities to make effective decisions through access to more timely and responsive services;
- (c) Effective and efficient implementation of client entities’ substantive programmes.

Programme performance in 2021

Business solutions optimized for a new way of working

- 29G.59 The subprogramme, in line with the Secretary-General’s reform agenda, worked on improving the speed and responsiveness of service delivery by advising clients and automating processes to support back-office requirements and a new way of working during the COVID-19 pandemic. In 2020, the subprogramme moved all files from a local drive to the cloud-based Unite Workspace, enabling a hybrid working arrangement for staff to work from anywhere at any time.
- 29G.60 Some of the new solutions developed for clients in 2021 include remote simultaneous interpretation for conference management, cloud-based workflow applications, website migration and a pilot of an enterprise directory structure that helps in seamlessly integrating all information technology services and software distribution. The subprogramme also improved Internet protocol telephony services, implemented remote desktop management to support new clients and migrated 95 per cent of legacy application data to the cloud, hosted by the Global Service Centre in Valencia, Spain, which reduced on-premises application footprints.
- 29G.61 Progress towards the objective is presented in the performance measure below (see table 29G.8).

Table 29G.8
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
<p>Clients have access to a cloud-based productivity and collaboration platform, enabling them to migrate 50 per cent of their corporate data to a cloud platform</p>	<p>UNEP and UN-Habitat have access to 100 per cent of their corporate data through a cloud-based solution. Other clients have 75 per cent of their corporate data available through a cloud-based solution</p> <p>Clients have access to support through remote desktop management, enabling them to work from anywhere at any time</p>	<p>Clients have access to all corporate data (100 per cent) and 95 per cent of legacy data through a cloud-based solution</p> <p>Clients utilize remote simultaneous interpretation services for conference management</p> <p>Improved client experience through the seamless integration of all information technology services by piloting corporate directory structures, information processes and technology services and migrating to cloud-based solutions for applications and websites</p>

Planned results for 2023

Result 1: increased number of innovative solutions

Programme performance in 2021 and target for 2023

- 29G.62 The subprogramme’s work contributed to eight innovative solutions available to clients, which exceeded the planned target of seven.

29G.63 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 29G.X).

Figure 29G.X

Performance measure: cumulative number of innovative solutions available to client offices

Result 2: access to information and communications technology services by a larger client base

Programme performance in 2021 and target for 2023

29G.64 The subprogramme’s work contributed to 50 United Nations entities with access to ICT services provided by the subprogramme, which exceeded the planned target of 49.

29G.65 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 29G.XI).

Figure 29G.XI

Performance measure: cumulative number of United Nations entities with access to information and communications technology services provided by the subprogramme

Result 3: intuitive service experience and assured service availability for clients

Proposed programme plan for 2023

29G.66 The subprogramme utilizes the client relationship management platform shared by the Office of Information and Communications Technology, which was configured with local forms, increasing fragmentation and resulting in a tiered service model, with predefined escalation paths hindering operational efficiency and effectiveness.

Lessons learned and planned change

29G.67 The lesson for the programme was that there was increased demand for the provision of remote office support by default, enabling clients to access support and services to the same standards regardless of location.

29G.68 In applying the lesson, the subprogramme will, in collaboration with the Office of Information and Communications Technology at United Nations Headquarters, re-engineer the provision of client relationship management solutions to offer a portfolio of essential ICT services, including a comprehensive, standardized and financially advantageous service package for all conference management requirements.

29G.69 Expected progress towards the objective is presented in the performance measure below (see table 29G.9).

Table 29G.9
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Clients have access to client relationship management software that helps in raising and tracking tickets and creating reports	Clients used digital forms in the client relationship management software to capture data and create reports in a fragmented manner	Clients have access to digital forms and added workflow applications, with basic reporting on data captured A client survey on the effectiveness of the catalogue informs the selection of a new client relationship management software	Clients' needs are fully integrated into a Secretariat-wide catalogue ready for migration to new client relationship management software	Business agility, better innovation and increased security for clients through a unified client relationship management platform

Deliverables

29G.70 Table 29G.10 lists all deliverables of the subprogramme.

Table 29G.10
Subprogramme 4: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory

E. Enabling deliverables

Information and communications technology: provision of security for information technology systems and data for 2,600 end users; information security policies, procedures and training; connectivity services; hosting services; voice, video and data communications services; operation and maintenance of existing and new application systems in a secure environment; technical support to end users; maintenance of 3,000 information technology equipment items; outreach campaigns on services provided by the Information and Communications Technology Services.

B. Proposed post and non-post resource requirements for 2023

Overview

29G.71 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 29G.11 to 29G.13.

Table 29G.11

29G.72 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 29G.14 and 29G.16 and figure 29G.XII.

29G.73 As reflected in tables 29G.14 (1) and 29G.15 (1), the overall resources proposed for 2023 amount to \$16,657,200 before recosting, reflecting a net decrease of \$2,088,500 (or 11.1 per cent) compared with the appropriation for 2022. Resource changes result from technical adjustments. The proposed level of resources provides for full, efficient and effective implementation of the mandates.

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

29G.74 As reflected in table 29G.14 (1), resource changes reflect a decrease of \$2,088,500, as follows:

Subprogramme 3, Support services. The decrease under non-post resources is due to the removal of non-recurrent requirements approved in 2022 by the General Assembly in its resolution [76/246](#) relating to the provision for project management costs of the major construction projects for: (a) the replacement of office blocks A to J at the Office (\$1,163,300); and (b) addressing the deteriorating conditions and limited capacity of the conference services facilities at the Office (\$925,200). Continuation of the related resource requirements in 2023 will be presented later in the year as part of the progress reports of the respective construction projects.

Extrabudgetary resources

29G.75 As reflected in tables 29G.14 (2) and 29G.15 (2), the Office receives both cash and in-kind contributions that complement regular budget resources for the delivery of its mandates. In 2023, extrabudgetary resources are projected to be \$23,252,100 and would provide for 248 posts, as presented in table 29G.15 (2). The resources would be used mainly to support various activities in relation to administrative support, common services and commercial operations provided to UNEP, UN-Habitat and the resident coordinator system, as well as to all United Nations agencies, funds and programmes located in Nairobi. Extrabudgetary resources represent 58.3 per cent of the total resources for this programme.

29G.76 In-kind contributions relating to 56.73 hectares of land provided by the Government have an estimated value of \$11,375,200.

29G.77 The extrabudgetary resources under this section are subject to the oversight of the Director-General of the Office, who has delegated authority from the Secretary-General.

Executive direction and management

29G.78 The Director of Administration is responsible for the overall direction, supervision and management of administrative and related support services provided by the Office to its client organizations.

29G.79 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), the Office continues to integrate environmental management practices into its operations and has broadened its waste management and recycling initiatives.

29G.80 Information on compliance with the advance booking policy for air travel is reflected in table 29G.17. In 2021, the low travel compliance rate was influenced by imposed and lifted travel restrictions due to the COVID-19 pandemic, resulting in changes in travel at short notice. The Office will strive to continue to improve the planning of its travel to comply with the advance booking policy for air travel.

Table 29G.17

Compliance rate

(Percentage)

	<i>Actual 2019</i>	<i>Actual 2020</i>	<i>Actual 2021</i>	<i>Planned 2022</i>	<i>Planned 2023</i>
Air tickets purchased at least 2 weeks before the commencement of travel	33	47	61	100	100

29G.81 The proposed regular budget resources for 2023 amount to \$918,500 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 29G.18 and figure 29G.XIII.

Figure 29G.XIII

Executive direction and management: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

29G.82 Extrabudgetary resources for executive direction and management are estimated at \$202,700 and would provide for three posts (Local level), as well as non-post resources. The resources would enable cross-cutting coordination activities related to the administrative, common services and commercial operations support provided to UNEP, UN-Habitat and the resident coordinator system, as well as common services administration to all United Nations agencies, funds and programmes located in Nairobi.

Programme of work

Subprogramme 1

Programme planning, finance and budget

29G.83 The proposed regular budget resources for 2023 amount to \$3,151,200 and reflect no changes compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 29G.19 and figure 29G.XIV.

Table 29G.19

Subprogramme 1: evolution of financial and post resources

Subprogramme 1: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

29G.84 Extrabudgetary resources for the subprogramme are estimated at \$5,499,100 and would provide for 80 posts (2 P-4, 3 P-3 and 75 Local level), as well as non-post resources. The resources would support financial management and internal control of the financial resources of the Office and that

of its clients, as well as budgetary and financial administration of the common services provided to all United Nations agencies, funds and programmes located in Nairobi.

Subprogramme 2 Human resources management

29G.85 The proposed regular budget resources for 2023 amount to \$2,805,600 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 29G.20 and figure 29G.XV.

Figure 29G.XV

Subprogramme 2: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

29G.86 Extrabudgetary resources for the subprogramme are estimated at \$5,091,700 and would provide for 61 posts (1 P-4, 1 P-3, 52 Local level and 7 National Professional Officer), as well as non-post

resources. The resources would support human resources management (recruitment, personnel and benefits administration) for the Office’s core clients and provide other common services (medical services, staff training and language programmes) to all United Nations agencies, funds and programmes located in Nairobi.

Subprogramme 3 Support services

29G.87 The proposed regular budget resources for 2023 amount to \$8,046,100 and reflect a decrease in the resource level of \$2,088,500 compared with the appropriation for 2022, owing to the removal of non-recurrent requirements approved in 2022 by the General Assembly in its resolution 76/246 relating to the provision for project management costs of the major construction projects, as explained in paragraph 29G.74. Additional details on the distribution of the proposed resources for 2023 are reflected in table 29G.21 and figure 29G.XVI.

(Thousands of United States dollars/number of posts)

Extrabudgetary resources

29G.88 Extrabudgetary resources for the subprogramme are estimated at \$8,435,800 and would provide for 75 posts (3 P-3, 71 Local level and 1 National Professional Officer), as well as non-post resources. The resources would provide support services (supply chain, procurement and property management) for the Office’s core clients and various common services (including facility management, transportation and host country services) to all United Nations agencies, funds and programmes located in Nairobi.

**Subprogramme 4
Information and communications technology operations**

29G.89 The proposed regular budget resources for 2023 amount to \$1,735,800 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 29G.22 and figure 29G.XVII.

(Thousands of United States dollars/number of posts)

Extrabudgetary resources

- 29G.90 Extrabudgetary resources for the subprogramme are estimated at \$4,022,800 and would provide for 29 posts (1 P-4, 1 P-3, 26 Local level and 1 National Professional Officer), as well as non-post resources. The resources would support various ICT activities (technology and information technology infrastructure solutions) to all United Nations agencies, funds and programmes located in Nairobi.

Annex I

Organizational structure and post distribution for 2023

Abbreviations: LL, Local level; NPO, National Professional Officer; RB, regular budget; XB, extrabudgetary.

Annex II

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/76/7](#)

The Advisory Committee recalls its related recommendation that the General Assembly should receive comprehensive and more transparent information on the services to different entities, the resources required for delivering those services and the different financing/cost recovery arrangements, as well as the recording of related income and expenditures by funding source (para. VIII.147).

Information on the source and use of extrabudgetary funds is provided throughout the present document.

The Advisory Committee again reiterates its view that cost recovery should be applied in a harmonized manner and trusts that the Secretary-General will provide an update on the progress made in the development of a common costing methodology in the next budget submission (para. VIII.148).

Details are provided in the foreword and introduction to the proposed programme budget for 2023.

Foreword

The purpose of the Office of Internal Oversight Services is to assist the Secretary-General in fulfilling his internal oversight responsibilities in respect of the resources and staff of the Organization through the exercise of internal audit, inspection and evaluation, and investigation functions.

The programme plan for 2023 is aimed at further improving accountability and transparency in the achievement of mandated results and impacts by the Organization and will continue to provide, for use by Member States, the Secretary-General and senior management in decision-making, assurance and advice to strengthen results-based management of the Organization.

(Signed) Fatoumata **Ndiaye**
Under-Secretary-General for Internal Oversight Services

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 30.1 The Office of Internal Oversight Services (OIOS) is responsible for assisting the Secretary-General in fulfilling his internal oversight responsibilities in respect of the resources and staff of the Organization through the provision of internal audit, inspection and evaluation, and investigation services. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolutions [48/218 B](#), [54/244](#), [59/272](#), [64/263](#), [69/253](#) and [74/257](#). The Office will continue to maintain its operational independence in carrying out its objectives.
- 30.2 Through internal audit, the Office examines, reviews and appraises the use of the financial resources of the United Nations in order to guarantee the implementation of programmes and legislative mandates and ascertain compliance of programme managers with the financial and administrative regulations and rules, as well as with the approved recommendations of external oversight bodies; and undertakes performance audits to assess responsiveness to the requirements of programmes and legislative mandates and the effectiveness of the system of internal control of the Organization.
- 30.3 Through programme evaluations and inspections, the Office evaluates the efficiency and effectiveness of the implementation of the programmes and legislative mandates of the Organization.
- 30.4 Through investigations, the Office investigates reports of violations of United Nations regulations, rules and pertinent administrative issuances and transmits to the Secretary-General the results of such investigations, together with appropriate recommendations to guide the Secretary-General in deciding on jurisdictional or disciplinary action to be taken.
- 30.5 The Office may also provide support and advice to management on the effective discharge of their responsibilities and on the implementation of recommendations and facilitate self-evaluation by programme managers through appropriate methodological support.
- 30.6 The Independent Audit Advisory Committee provides the Office with advice to strengthen the programme's risk-based planning and budgeting.

Strategy and external factors for 2023

- 30.7 In support of the Secretary-General's focus on building a more sustainable and inclusive future and on reforming the Organization to better deliver against this vision, the strategy for 2023 prioritizes internal oversight coverage of the work of the Organization in the following management areas: (a) implementation of the reforms of the management, peace and security, and development pillars; (b) strengthening of organizational culture; (c) procurement and supply chain management, including management of fraud and corruption risks; (d) management of mission drawdown or transition; and (e) strengthening of the whistle-blower protection system. The Office will also continue to cover the programmes and strategies of the Organization, including cross-cutting areas such as the provision of support to Member States on the implementation of the Sustainable Development Goals and the implementation of the Secretary-General's strategies on gender equality, racial equality, environmental sustainability and data.
- 30.8 Effective engagement with the senior leadership of the Organization will help the programme to identify risks to the Organization and provide timely assurance and advice on issues related to the efficient, economical, effective and ethical management of the Organization's resources.
- 30.9 The Office will strive to maintain a working environment that emphasizes responsibility for results and fosters harmony and learning. The Office will focus on ensuring that staff are equipped with the knowledge and skills necessary to deliver expected results. This will translate into: (a) strengthening

of the use of enterprise risk management in planning internal audit and evaluation and inspection activities (subprogrammes 1 and 2); (b) enhanced guidance on detecting and addressing fraud indicators and on using data analytics (subprogramme 1); (c) enhanced guidance for thematic and outcome evaluations of programmes (including for peacekeeping components) and for incorporating the coronavirus disease (COVID-19) response and lessons learned into evaluation designs (subprogramme 2); and (d) guidance on using data analytics to improve investigation planning and therefore the timeliness of investigations (subprogramme 3). In addition, the programme will strengthen its communication and reporting capacity regarding following up on recommendations.

- 30.10 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. Examples of lessons learned and best practices include: (a) furthering knowledge of and the access of OIOS staff to the information and communications systems and data that the Office relies on to perform its functions; and (b) in a few instances, engaging or partnering with national and international experts to facilitate data collection in areas difficult to access. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.
- 30.11 With regard to cooperation with other entities at the global, regional, national and local levels, the Office will coordinate its work with the Board of Auditors and the Joint Inspection Unit and liaise as appropriate with relevant offices involved in the internal justice system of the Organization.
- 30.12 With regard to inter-agency coordination and liaison, the Office will participate as a member of the Representatives of Internal Audit Services of the United Nations Organizations, the United Nations Representatives of Investigative Services and the United Nations Evaluation Group. The programme will cooperate closely with academic institutions through the United Nations System Staff College and the “evaluation practitioners exchange” seminars of the United Nations Evaluation Group, which also involve members of the international and national evaluation communities.
- 30.13 With regard to the external factors, the overall plan for 2023 is based on the planning assumption that the Office will have unimpeded access to the staff and records of the Organization and other required information.
- 30.14 The Office integrates a gender perspective in its operational activities, deliverables and results. Subprogrammes 1 and 2 will cover the management of risks related to gender equality and mainstreaming a gender perspective. Subprogramme 3 will continue to implement a gender perspective in its victim-centred methodology for investigations of sexual exploitation and abuse and workplace sexual harassment.
- 30.15 In line with the United Nations Disability Inclusion Strategy, the Office will integrate a perspective on the inclusion and empowerment of persons with disabilities in its work. In 2023, subprogrammes 1 and 2 will cover the Organization’s activities to implement the Strategy.

Programme performance in 2021

Impact of the pandemic

- 30.16 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, with longer timelines and reduced quality in some activities owing to limitations in: (a) access to people; (b) direct observation of operations; and (c) access to physical assets and software. Access to staff through videoconferencing is not of the same quality as in-person interaction, and remote assessment of conditions of assets, soft controls or information and communications technology (ICT) infrastructure is difficult to implement. For subprogramme 3, the continuation of the pandemic precluded the delivery of planned training to National Investigations

Officers, members of investigative fact-finding panels and Special Investigation Unit staff. However, there was an overall improvement compared with 2020 following the resumption of travel. For example, some audit teams were able to travel to conduct audits of unmanned aerial vehicle systems at the United Nations Organization Stabilization Mission in the Democratic Republic of the Congo, network access management and security in the United Nations Secretariat and Umoja employee self-service/manager self-service and related processes for uniformed personnel and national staff at the United Nations Interim Force in Lebanon, as well as audits of Office of the United Nations High Commissioner for Refugees country operations in Jordan, South Sudan and Ukraine and Office for the Coordination of Humanitarian Affairs country operations in the Bolivarian Republic of Venezuela under subprogramme 1.

Legislative mandates

30.17 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

48/218 B ; 60/254	Review of the efficiency of the administrative and financial functioning of the United Nations	72/266 A and B	Shifting the management paradigm in the United Nations
60/1	2005 World Summit Outcome	74/257	Review of the implementation of General Assembly resolutions 48/218 B , 54/244 , 59/272 , 64/263 and 69/253
61/245	Comprehensive review of governance and oversight within the United Nations and its funds, programmes and specialized agencies	76/241	Report on the activities of the Office of Internal Oversight Services
61/275	Terms of reference for the Independent Audit Advisory Committee and strengthening the Office of Internal Oversight Services		

Subprogramme 1 Internal audit

Deliverables

30.18 Table 30.1 lists all cross-cutting deliverables of the programme.

Table 30.1
Cross-cutting deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	2	2	2	2
1. Report on the activities of the Office of Internal Oversight Services (Parts I and II)	2	2	2	2
Substantive services for meetings (number of three-hour meetings)	19	38	31	28
Meetings of:				
2. The Fifth Committee	8	14	8	8
3. The Committee for Programme and Coordination	3	18	17	14
4. The Advisory Committee on Administrative and Budgetary Questions	4	2	2	2
5. The Independent Audit Advisory Committee	4	4	4	4
C. Substantive deliverables				
Databases and substantive digital materials: comprehensive database and dashboard for monitoring the status of implementation of the approximately 1,000 open recommendations of the Office.				
E. Enabling deliverables				
Content on communications platforms, briefings and presentations on oversight activities; refresher training to programme managers on the Office's recommendation monitoring system.				

Evaluation activities

- 30.19 The Joint Inspection Unit review of the state of the investigation function on progress made in the United Nations system organizations in strengthening the investigation function (JIU/REP/2020/1), completed in 2021, has guided the proposed programme plan for 2023.
- 30.20 The results and lessons of the evaluation referenced above, for example on reviewing and streamlining procedures and enhancing key performance indicators, have been taken into account for the proposed programme plan for 2023.
- 30.21 The following evaluations are planned for 2023:
- External quality assessment of the Internal Audit Division;
 - Comprehensive evaluation of OIOS.

Programme of work

Subprogramme 1 Internal audit

Objective

- 30.22 The objective, to which this subprogramme contributes, is to improve the efficiency, economy, effectiveness and impact of the Organization's programmes, in keeping with best management practices.

Strategy

- 30.23 To contribute to the objective, the subprogramme will:
- (a) Conduct internal audit activities to recommend improvements to key controls and processes and identify accountability issues. In 2023, particular attention will continue to be given to how COVID-19 has influenced changes in key controls and processes;
 - (b) Continue to work with the Department of Management Strategy, Policy and Compliance to continuously provide assurance and advice on strengthening the United Nations Secretariat accountability system;
 - (c) Continue to focus on data governance and data security in the use of ICT in the Organization and strengthen its own capacity to use ICT systems and data, including through an enhanced web-based audit management system;
 - (d) Strengthen annual work planning processes by identifying and monitoring audit assignments that systematically cover United Nations cross-cutting priorities in the management, programme and strategy areas (including reforms, organization culture, procurement and supply chain, mission drawdown or transition, Sustainable Development Goal support and the inclusion of gender, disability, racial, human rights and environmental perspectives);
 - (e) Undergo an external quality assessment of the internal audit function according to International Standards for the Professional Practice of Internal Auditing and continue to further improve the efficiency, economy, effectiveness and impact of the internal audit function.
- 30.24 The above-mentioned work is expected to result in:
- (a) Strengthened accountability and transparency in the use of resources by United Nations organizations and entities;
 - (b) Improved risk identification and remediation and increased management, strategic and programme results by United Nations organizations and entities;
 - (c) High quality of internal audit assurance provided to the Secretary-General, heads of organizations and entities and Member States on the adequacy and effectiveness of risk management and internal control systems.

Programme performance in 2021

Strengthened internal controls over supply chain management in the Secretariat

- 30.25 Supply chain management is an area of very high risk for the Secretariat owing to the high value of procurement and assets, the decentralization of procurement and assets management to the field and the high level of inherent fraud risk.
- 30.26 The subprogramme conducted 18 audits, which covered: demand and source planning for peace operations; procurement activities in the United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic; the close-out of procurement contracts in the African Union-United Nations Hybrid Operation in Darfur; and centralized warehouse operations at the United Nations Interim Force in Lebanon and the United Nations Mission in South Sudan. Procurement and inventory management were also covered in advisory engagements related to performance of delegation of authority in five missions and the United Nations Support Office in Somalia. An audit of the strategic heritage plan of the United Nations Office at Geneva reviewed the management of project risks in the areas of schedule, budget, scope and the impact of COVID-19. Audits of Economic Commission for Africa and Economic and Social Commission for Asia and the Pacific construction projects reviewed the progress of procurement activities and plans for value engineering activities to reduce costs.
- 30.27 These audits resulted in the acceptance of 76 recommendations to improve supply chain management, the ongoing implementation of which has resulted in improvements, notably: (a) better categorization of strategic goods resulting in procurement decisions closer to the point of operations (increased accountability/transparency and effectiveness); (b) implementation of a procurement

fraud risk management programme (increased accountability and economy); and (c) raising the threshold for issuing requests for proposals from \$40,000 to \$150,000, thus reducing by 77 per cent the resources used when issuing such requests, which represent just 2 per cent of the total procurement value (increased efficiency).

30.28 Progress towards the objective is presented in the performance measure below (see figure 30.I).

Figure 30.I

Performance measure: annual number of audit recommendations under implementation by the Secretariat to improve supply chain management

Planned results for 2023

Result 1: increased impact through more relevant and timely action by programme managers to implement audit recommendations

Programme performance in 2021 and target for 2023

30.29 The subprogramme’s work contributed to 71 per cent of recommendations implemented within 24 months, which did not meet the planned target of 85 per cent. The subprogramme will continue to work with management to remedy causes for slow implementation so that accepted recommendations are implemented without delay.

30.30 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 30.II).

Figure 30.II

Performance measure: percentage of recommendations implemented (closed) within 24 months

(Percentage)

Result 2: strengthened data governance for enhanced performance and accountability of the Secretariat

Programme performance in 2021 and target for 2023

- 30.31 The subprogramme’s work contributed to the acceptance of 53 audit recommendations related to strengthening data governance in the Organization, which represents 11 per cent of the total recommendations accepted in 2021. In response to recent developments, the performance measure has been adjusted to reflect the management efforts to strengthen data governance and data security frameworks within the Secretariat.
- 30.32 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 30.III).

Figure 30.III
Performance measure: audit recommendations accepted that strengthen data governance in the Organization

Result 3: strengthened accountability system in the United Nations Secretariat

Proposed programme plan for 2023

- 30.33 At the request of the Department of Management Strategy, Policy and Compliance, the subprogramme evaluated the Secretariat accountability system and issued the first 8 of 10 planned advisory memorandums to the Department.

Lessons learned and planned change

- 30.34 The lesson for the subprogramme was that such thematic assessments can provide deep insights into the functioning of the accountability system. In applying the lesson, the subprogramme will strengthen the provision of assurance and advisory services in this area in close consultation and collaboration with the Department of Management Strategy, Policy and Compliance.
- 30.35 Expected progress towards the objective is presented in the performance measure below (see table 30.2).

Table 30.2
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	Departments institute internal controls, in alignment with the advisory on the statement of internal control	Strengthened organizational accountability through advice on the extent to which the accountability system is relevant, efficient and effective, as informed by eight thematic assessments in the evaluation of the accountability system: enterprise resource management; planning and budgeting; delegation of authority; budget implementation and financial management; internal control system; information systems; ethics and integrity; human resources management, learning and development strategies MINUSMA, MINUSCA, UNMISS, UNIFIL, and UNSOM/ UNSOS receive advisories on the performance of delegation of authority for human resources, financial, procurement and property	Strengthened organizational accountability informed by two thematic assessments included in the evaluation of the accountability system: programme delivery and organizational performance; Department of Management Strategy, Policy and Compliance/ Business Transformation and Accountability Division as enabler of the accountability system Availability of recommendations and a plan of action to strengthen the accountability system	Strengthened organizational accountability informed by three thematic assignments on aspects of the accountability system, including the flexible workspace project (mandated by the General Assembly)

Abbreviations: MINUSCA, United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic; MINUSMA, United Nations Multidimensional Integrated Stabilization Mission in Mali; UNIFIL, United Nations Interim Force in Lebanon; UNMISS, United Nations Mission in South Sudan; UNSOM, United Nations Assistance Mission in Somalia; UNSOS, United Nations Support Office in Somalia.

Deliverables

30.36 Table 30.3 lists all deliverables of the subprogramme.

Table 30.3

Subprogramme 2 Inspection and evaluation

Objective

30.37 The objective, to which this subprogramme contributes, is to strengthen relevance, efficiency, effectiveness and impact in the implementation of programmes and legislative mandates of the Organization and improve decision-making, accountability and learning.

Strategy

30.38 To contribute to the objective, the subprogramme will:

- (a) Focus, in conducting evaluations, on subprogramme-level outcomes achieved by Secretariat entities under the peace and security, sustainable development, human rights and humanitarian work pillars;
- (b) Integrate the Secretary-General’s cross-cutting strategies in evaluation design and take into consideration the impact of COVID-19 on programme performance;
- (c) Refine its inspection and evaluation methodology and develop appropriate evaluation design and data collection techniques for enhanced programme evaluation;
- (d) Strengthen Secretariat evaluation, including through collaboration with the Department of Management Strategy, Policy and Compliance, to develop and implement a Secretariat evaluation training programme in partnership with the United Nations System Staff College and other capacity-building measures;
- (e) Provide evaluation methodological guidance to Secretariat entities and to the wider Organization;
- (f) Support system-wide evaluation through collaboration with the Executive Office of the Secretary-General.

- 30.39 The above-mentioned work is expected to result in:
- (a) Increased learning and accountability of Secretariat entities towards achieving the planned outcomes of subprogrammes and drawing upon lessons learned;
 - (b) Strengthened evaluation capacity and performance and greater use of evaluation results to inform programme planning within the Organization.

Programme performance in 2021

Strengthened evaluation capacity in the Organization

- 30.40 The subprogramme supported the Department of Management Strategy, Policy and Compliance in the drafting, finalization and issuance of the new administrative instruction on evaluation in the Secretariat (ST/AI/2021/3), held four workshops with 46 entities on implementation of the administrative instruction and conducted 20 consultations with 16 entities on evaluation policies, plans and terms of reference. The subprogramme also created a Secretariat-wide evaluation knowledge management platform housing key guidance and reports and an online help function. It is also working with the United Nations System Staff College to develop a training module for roll-out in early 2022. The subprogramme will continue to work with the Department of Management Strategy, Policy and Compliance to strengthen the evaluation culture, function and capacity in the Secretariat.
- 30.41 Progress towards the objective is presented in the performance measure below (see table 30.4).

Table 30.4
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	–	Enhanced capacity of 46 Secretariat entities to implement the administrative instruction on evaluation in the Secretariat (ST/AI/2021/3) All Secretariat entities have access to the evaluation knowledge management platform

Planned results for 2023

Result 1: enhanced contribution to strengthened relevance, efficiency, effectiveness and impact of Secretariat evaluations

Programme performance in 2021 and target for 2023

- 30.42 The subprogramme’s work contributed to 84 per cent of recommendations implemented within 24 months, which did not meet the planned target of 85 per cent. The target was not met owing to fewer than anticipated closures of long overdue recommendations despite targeted support to programme managers by the subprogramme.
- 30.43 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 30.IV).

Figure 30.IV
Performance measure: percentage of recommendations implemented (closed) within 24 months

Result 2: strengthened evaluation function in the Secretariat for a more relevant, efficient and effective United Nations

Programme performance in 2021 and target for 2023

- 30.44 The subprogramme’s work contributed to 20 per cent of 74 entities meeting at least 80 per cent of the 15 performance criteria related to the evaluation framework, monitoring and evaluation resources and report expenditure, coverage and quality, which did not meet the planned target of 50 per cent. The target was not met owing to operational challenges to systematically embed the application of evaluation across the Secretariat, with evaluation practice remaining uneven across the Secretariat.
- 30.45 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 30.V).

Figure 30.V
Performance measure: percentage of entities meeting at least 80 per cent of the performance criteria assessed in the biennial report on strengthening the role of evaluation and the application of evaluation findings on programme design, delivery and policy directives^a

^a Secretariat evaluation performance is assessed biennially.

Result 3: more specific and results-oriented evidence of the outcomes of United Nations support to Member States for the 2030 Agenda for Sustainable Development

Proposed programme plan for 2023

30.46 The subprogramme has been providing detailed and results-oriented evaluative evidence on the programmes and strategies of the Organization, including on cross-cutting areas such as the outcomes of United Nations support to Member States for the 2030 Agenda for Sustainable Development.

Lessons learned and planned change

30.47 The lesson for the subprogramme was that a focus on evaluating the specific outcomes planned at the subprogramme level of entities implementing the 2030 Agenda would allow for a more meaningful assessment of the results and impact and facilitate more informed decision-making at the strategic and operational levels towards greater performance. In applying the lesson, the subprogramme will provide more detailed and results-oriented evaluative evidence on the outcomes of United Nations initiatives and efforts to support Member States across all pillars of the 2030 Agenda.

30.48 Expected progress towards the objective is presented in the performance measure below (see table 30.5).

Table 30.5
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	A new structured approach to evaluating outcomes at the subprogramme level is adopted	Strengthened programme coherence at the country level through an evaluation of the resident coordinator system Strengthened political affairs components in peacekeeping missions through an evaluation covering five missions: MINUSCA, MINUSMA, MONUSCO, UNMIK and UNMISS	Improved efficiency and effectiveness of mandate delivery through eight subprogramme outcome evaluations: ECA, macroeconomic policy and governance; ECLAC, macroeconomic policies and growth; ESCWA, shared economic prosperity; ESCAP, environment and development; ECE, economic cooperation and integration; DCO, regional offices; MINUSMA, rule of law; and MONUSCO, rule of law	Improved efficiency and effectiveness of mandate delivery through eight subprogramme outcome evaluations: UN-Habitat, shared prosperity; OCHA, coordination of humanitarian action and emergency response; OHCHR, human rights mainstreaming; DPPA, cluster 3 special political missions; UNMISS, rule of law; MINUSCA, rule of law; UNMIK, rule of law; and DCO, resident coordinator system

Abbreviations: DCO, Development Coordination Office; DPPA, Department of Political and Peacebuilding Affairs; ECA, Economic Commission for Africa; ECE, Economic Commission for Europe; ECLAC, Economic Commission for Latin America and the Caribbean; ESCAP, Economic and Social Commission for Asia and the Pacific; ESCWA, Economic and Social Commission for Western Asia; MINUSCA, United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic; MINUSMA, United Nations Multidimensional Integrated Stabilization Mission in Mali; MONUSCO, United Nations Organization Stabilization Mission in the Democratic Republic of the Congo; OCHA, Office for the Coordination of Humanitarian Affairs; OHCHR, Office of the United Nations High Commissioner for Human Rights; UN-Habitat, United Nations Human Settlements Programme; UNIFIL, United Nations Interim Force in Lebanon; UNMIK, United Nations Interim Administration Mission in Kosovo; UNMISS, United Nations Mission in South Sudan.

Deliverables

Subprogramme 3 Investigations

Objective

30.50 The objective, to which this subprogramme contributes, is to enhance accountability and ethical behaviour within the Organization.

Strategy

30.51 To contribute to the objective, the subprogramme will:

- (a) Investigate reports of possible violations of United Nations regulations, rules and pertinent administrative policies;
- (b) Enable prevention of and response to sexual misconduct, including sexual exploitation and abuse, as well as sexual harassment;
- (c) Develop the investigative capacity and capability of members of troop contingents who are responsible for undertaking investigations into misconduct;
- (d) Engage in capacity-building related to combating fraud and corruption, especially medical insurance fraud.

30.52 The above-mentioned work is expected to result in:

- (a) Improved ability of the Secretary-General and his delegates to make appropriate decisions on jurisdictional or disciplinary actions or corrective measures;

- (b) Improved ability of United Nations entities to identify and address misconduct;
- (c) Improved detection of issues and better control of risks resulting in zero tolerance by the Organization, especially related to sexual exploitation and abuse, sexual harassment, racial discrimination, fraud and corruption.

Programme performance in 2021

Increased ability of the Organization to address fraud

30.53 In 2021, the subprogramme received and investigated a large number of allegations of medical and dental insurance fraud. In responding to allegations, the subprogramme initiates an investigation, which includes a fact-finding exercise to collect evidence to either support or refute the reported violations. The work is focused on possible misconduct by individuals and prohibited practices by vendors or third parties. The results of the subprogramme’s investigations guide the Secretary-General in deciding on appropriate disciplinary action to be taken, including corrective action to minimize the risk of fraud and other violations.

30.54 Progress towards the objective is presented in the performance measure below (see figure 30.VI).

Figure 30.VI

Performance measure: number of allegations, investigations opened and investigation reports involving insurance fraud available to support decision-making on the appropriate action to be taken

Planned results for 2023

Result 1: improved investigation of sexual exploitation and abuse, sexual harassment and fraud and corruption, with a renewed focus on procurement fraud

Programme performance in 2021 and target for 2023

30.55 The subprogramme’s work contributed to 408 reports being issued in 2021, leaving an end-of-year caseload of 279 open investigations (the lowest level for three years) and 52 per cent of investigation reports meeting the timeline targets, which did not meet the planned target of 100 per cent. The target was not met owing to a combination of factors, including restrictions on travel that had an impact on securing evidence and additional time needed to complete investigations as a result of remote working arrangements.

30.56 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 30.VII).

Figure 30.VII
Performance measure: percentage of investigation reports that meet timeline targets, by type

Result 2: increased trust in investigation outcomes

Programme performance in 2021 and target for 2023

30.57 The subprogramme’s work contributed to strengthened policies and communication to improve trust in investigation outcomes, which did not meet the planned target of 85 per cent of survey respondents that are confident that the investigation reports enabled relevant decisions. The target was not met because surveys of stakeholders’ confidence in the subprogramme’s investigation reports were postponed pending the completion in 2022 of the ongoing external quality assessment of the subprogramme.

30.58 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 30.VIII).

Figure 30.VIII
Performance measure: percentage of survey respondents that are confident that the investigation reports enabled relevant decisions

Result 3: strengthened accountability and transparency in addressing reports of retaliation

Proposed programme plan for 2023

30.59 The United Nations protection against retaliation policy ensures that the Organization functions in an open, transparent and fair manner and enhances protection for those who report misconduct or wrongdoing or cooperate with duly authorized audits or investigations. The methodology used by

the subprogramme in protection against retaliation investigations reflects an understanding that the investigation has a protection focus; it enables the Ethics Office to determine whether to recommend that a complainant be granted protective measures against retaliation because of a protected act. Although no such investigations were closed in 2021, one that was closed in early 2022 took 9.8 months to complete. As of January 2022, OIOS had two active protection against retaliation investigations that had been open for 7.2 months, on average. The average completion time for such investigations closed in 2020 (10 cases) and 2019 (6 cases) was 10.5 months.

Lessons learned and planned change

30.60 The lesson for the subprogramme was that, in many cases, the target timeline of four months was insufficient to complete protection against retaliation investigations. As a first step, such investigations require OIOS to ask the Administration to account for the alleged retaliatory action. The response guides the next investigatory steps. If the Administration’s response shows that the burden of proof cannot be discharged, i.e. there is no evidentiary basis upon which an investigation could exclude a retaliatory motive for the detrimental act, the investigation can be concluded rapidly. However, when the Administration’s response requires corroboration with evidence and/or the matter is interlinked with a separate fact-finding investigation, this complicates the investigation and often prevents timeline targets from being met. In applying the lesson, the subprogramme will enhance the methodology that it uses in protection against retaliation investigations with the aim of completing 80 per cent of such investigations within nine months.

30.61 Expected progress towards the objective is presented in the performance measure below (see figure 30.IX).

Figure 30.IX
Performance measure: protection against retaliation investigations available to enhance protection for those who report misconduct or wrongdoing
 (Average completion time, in months)

^a No PaR investigations were closed in 2021.

Deliverables

30.62 Table 30.7 lists all deliverables of the subprogramme.

Table 30.7

Internal justice and oversight: capacity-building related to combating fraud and corruption, especially medical insurance fraud, focusing on peace operations.				

B. Proposed post and non-post resource requirements for 2023

Overview

30.63 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 30.8 to 30.10.

Table 30.8

30.64 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 30.11 to 30.13 and figure 30.X.

30.65 As reflected in tables 30.11 (1) and 30.12 (1), the overall resources proposed for 2023 amount to \$21,356,100 before recosting, reflecting a net increase of \$168,700 (or 0.8 per cent) compared with the appropriation for 2022. Resource changes result from two factors, namely: (a) technical adjustments; and (b) other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Figure 30.X
Distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

30.66 As reflected in table 30.11 (1), resource changes reflect an increase of \$168,700, as follows:

Subprogramme 2, Inspection and evaluation. These increases are related to the annual provision for two new posts (Deputy Director (D-1) and Evaluation Officer (P-4)) established in 2022 pursuant to General Assembly resolution 76/245, which were subject to a 50 per cent vacancy rate in accordance with the established practice for the costing of new posts.

Other changes

30.67 As reflected in table 30.11 (1), resource changes reflect the cost-neutral redeployment of resources between subprogrammes as follows:

- (a) **Subprogramme 1, Internal audit.** The net decrease of \$20,300 reflects the redeployment of the resources for contractual services for the external quality assessment of the Internal Audit Division, which is to be completed in 2022, to subprogramme 2, Inspection and evaluation;
- (b) **Subprogramme 2, Inspection and evaluation.** The net increase of \$20,300 reflects the redeployment from subprogramme 1, Internal audit, of the resources for contractual services for the external quality assessment of the Division planned for 2023, in order to determine whether the Division is delivering efficiently, effectively and in accordance with its mandate, the United Nations regulatory framework and applicable professional standards.

Other assessed and extrabudgetary resources

30.68 As reflected in tables 30.11 (2) and 30.12 (2), other assessed resources are estimated at \$34,298,500 and would provide for 146 posts, as well as non-post resources. The resources would be used for audit, inspection and evaluation, and investigation activities related to peacekeeping operations and to the International Residual Mechanism for Criminal Tribunals. The estimated increase of \$2,200,900 is attributable to the application of the updated standard salary scale for field locations

and the financial implication of the conversion of 13 general temporary assistance positions to posts in field locations, costed at lower vacancy rates. Other assessed resources represent 49.4 per cent of the total resources for OIOS.

- 30.69 As reflected in tables 30.11 (3) and 30.12 (3), the Office receives extrabudgetary contributions, which complement regular budget resources for the delivery of its mandates. In 2023, extrabudgetary resources of \$13,747,000 are estimated, as described under the respective subprogrammes. Extrabudgetary resources represent 19.8 per cent of the total resources for OIOS.
- 30.70 The authority to oversee the use of extrabudgetary resources rests with OIOS, in accordance with the delegation of authority by the Secretary-General.

Executive direction and management

- 30.71 The Office of the Under-Secretary-General provides overall strategic planning and monitoring and ensures effective coordination of the workplan for OIOS. The Office of the Under-Secretary-General coordinates the work of the three subprogrammes, undertakes liaison with the Board of Auditors and the Joint Inspection Unit and maintains a close working relationship with the oversight functions of the other United Nations system organizations. Furthermore, it provides quality control for the reports of OIOS to the General Assembly, oversees resource utilization and serves as the focal point on performance management and for compliance monitoring of recommendations of the Office.
- 30.72 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), the Office will take steps to implement the environmental policy of the United Nations Secretariat, including by continuing to reduce its carbon footprint through the use of videoconference facilities for interviews and meetings, ensuring that all printers are set to double-sided printing and encouraging staff to turn off computers and monitors at the end of the workday.
- 30.73 Information on compliance with regard to the timely submission of documentation and advance booking for air travel is reflected in table 30.14.
- 30.74 In order to comply with the advance purchase policy directive, the Office continues its efforts by implementing an internal standard operating procedure to ensure that staff schedule flights at least two weeks in advance of planned audits, inspections and investigations. OIOS continues to ensure that videoconferencing or teleconferencing facilities are utilized, if possible, for oversight assignments. The low compliance rate in 2021 was influenced by the COVID-19 pandemic owing to travel restrictions and changes in travel options at short notice.

Table 30.14
Compliance rate
 (Percentage)

	<i>Actual 2020</i>	<i>Actual 2021</i>	<i>Planned 2022</i>	<i>Planned 2023</i>
Timely submission of documentation	100	100	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	88	62	90	100

- 30.75 The proposed regular budget resources for 2023 amount to \$1,485,400 and reflect no change compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 30.15 and figure 30.XI.

Programme of work

**Subprogramme 1
 Internal audit**

30.76 The proposed regular budget resources for 2023 amount to \$8,413,200 and reflect a net decrease of \$20,300 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 30.67 (a). Additional details on the distribution of the proposed resources for 2023 are reflected in table 30.16 and figure 30.XII.

Table 30.16
Subprogramme 1: evolution of financial and post resources

(Thousands of United States dollars/number of posts)

	2021 expenditure	2022 appropriation	Technical adjustments	New/ expanded mandates	Changes		2023 estimate (before recosting)	
					Other	Total Percentage

Figure 30.XII
Subprogramme 1: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed and extrabudgetary resources

30.77 Other assessed resources for the subprogramme are estimated at \$18,162,500 and would provide for 77 posts (1 D-1, 9 P-5, 35 P-4, 18 P-3, 6 General Service (Other level) and 8 Field Service), as well as non-post resources. The resources would provide support to audit activities related to peacekeeping operations and to the International Residual Mechanism for Criminal Tribunals. The estimated increase of \$1,375,300 is attributable mainly to the application of the updated standard salary scale and the financial implication of the conversion of five general temporary assistance positions to posts in field locations, costed at lower vacancy rates.

30.78 Extrabudgetary resources for the subprogramme are estimated at \$11,050,100 and would provide for 45 posts (1 D-1, 6 P-5, 15 P-4, 13 P-3, 1 P-2 and 9 General Service (Other level)), as well as non-post resources. The resources would provide audit coverage in support of the Office of the United Nations High Commissioner for Refugees, the Development Coordination Office, the International Trade

Centre, the United Nations Joint Staff Pension Fund, the United Nations Office on Drugs and Crime, the Office of the United Nations High Commissioner for Human Rights, the United Nations Framework Convention on Climate Change, the United Nations University, the World Tourism Organization, the United Nations Convention to Combat Desertification in Those Countries Experiencing Serious Drought and/or Desertification, Particularly in Africa, the United Nations Environment Programme and the United Nations Human Settlements Programme (UN-Habitat).

Subprogramme 2 Inspection and evaluation

30.79 The proposed regular budget resources for 2023 amount to \$4,223,700 and reflect a net increase of \$189,000 compared with the appropriation for 2022. The proposed increase is explained in paragraphs 30.66 and 30.67 (b). Additional details on the distribution of the proposed resources for 2023 are reflected in table 30.17 and figure 30.XIII.

Table 30.17

Figure 30.XIII
Subprogramme 2: distribution of proposed resources for 2023 (before recosting)
(Number of posts/thousands of United States dollars)

Other assessed resources and extrabudgetary resources

- 30.80 Other assessed resources for the subprogramme are estimated at \$2,632,600 and would provide for 11 posts (1 P-5, 5 P-4, 4 P-3 and 1 General Service (Other level)), as well as non-post resources. The resources would provide support to evaluation activities related to peacekeeping operations and to the International Residual Mechanism for Criminal Tribunals. The estimated increase of \$353,300 is attributable mainly to the application of the updated standard salary scale in field locations.
- 30.81 Extrabudgetary resources for the subprogramme are estimated at \$489,500 and would provide for non-post resources to support evaluation activities relating to the Development Coordination Office.

**Subprogramme 3
Investigations**

- 30.82 The proposed regular budget resources for 2023 amount to \$5,866,200 and reflect no change compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 30.18 and figure 30.XIV.

Table 30.18

Figure 30.XIV
Subprogramme 3: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed resources and extrabudgetary resources

- 30.83 Other assessed resources for the subprogramme are estimated at \$12,785,400 and would provide for 54 posts (2 D-1, 6 P-5, 11 P-4, 23 P-3, 2 General Service (Principal level), 9 General Service (Other level) and 1 Field Service), as well as non-post resources. The resources would provide support to investigation activities related to peacekeeping operations. The estimated increase of \$465,000 is attributable mainly to the application of the updated standard salary scale and the financial implication of the conversion of eight general temporary assistance positions to posts in field locations, costed at lower vacancy rates.
- 30.84 Extrabudgetary resources for the subprogramme are estimated at \$2,207,400 and would provide for non-post resources. The resources would support investigation activities relating to the Development Coordination Office, the United Nations Joint Staff Pension Fund, the Office for the Coordination of Humanitarian Affairs, the International Civil Aviation Organization, the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women), the International Trade Centre and the United Nations Office on Drugs and Crime, as well as funding for specific investigation projects that are implemented under the OIOS trust fund for enhancing professional capacity in internal oversight functions.

Programme support

- 30.85 The Executive Office provides central administrative services to the Office in the areas of human resources management and financial and general administration, including the provision of advice to senior managers of the Office on administrative, financial, personnel and budgetary matters. In addition, it administers the staff, as well as the financial resources of the Office, at Headquarters, Geneva, Vienna, Nairobi and other duty stations, including the various peacekeeping missions and the International Residual Mechanism for Criminal Tribunals, under the delegation of authority granted by the Secretary-General and in accordance with the regulations and rules of the United Nations.
- 30.86 The proposed regular budget resources for 2023 amount to \$1,367,600 and reflect no change compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 30.19 and figure 30.XV.

Table 30.19

Figure 30.XV
Programme support: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

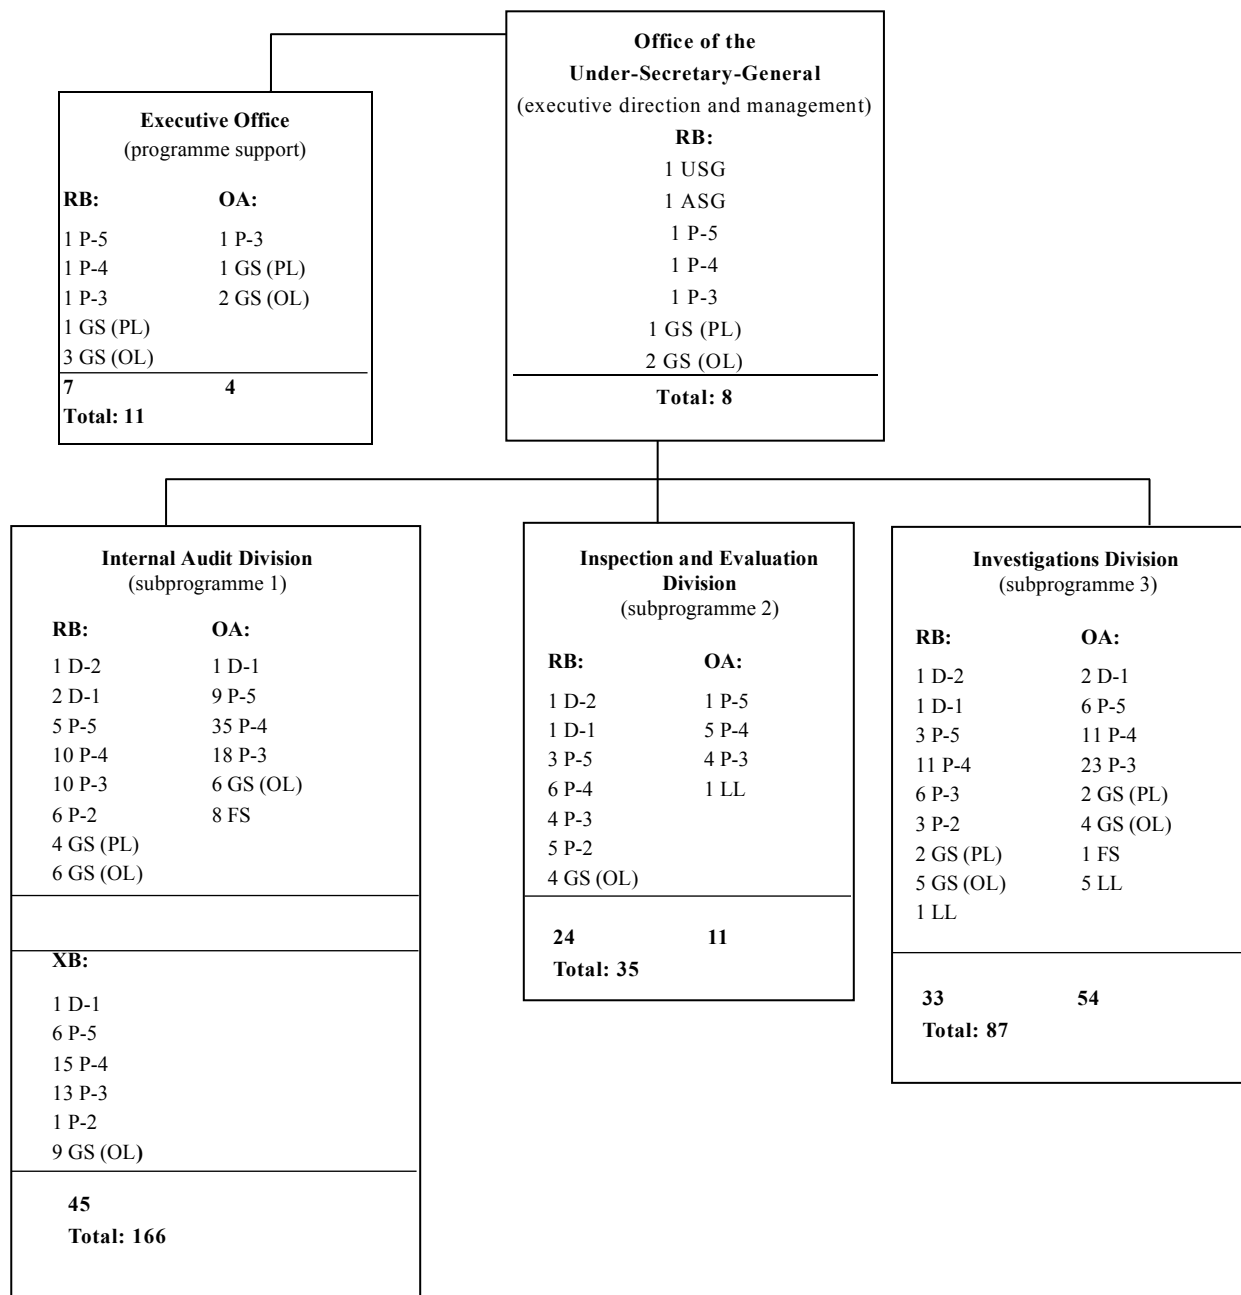

Other assessed resources

30.87 Other assessed resources for programme support are estimated at \$718,000 and would provide for four posts (1 P-3, 1 General Service (Principal level) and 2 General Service (Other level)), as well as non-post resources. The resources would provide support to activities related to peacekeeping operations. The estimated increase is attributable mainly to the application of the updated standard salary scale in field locations.

Advisory Committee on Administrative and Budgetary Questions

[A/76/7](#) and [A/76/7/Corr.1](#)

IX.21 The Advisory Committee recommends that the General Assembly request the Office of Internal Oversight Services not to delay the external assessment of the Investigations Division any further and to present the detailed results no later than in the next proposed programme budget.

The external assessment of the Division commenced in January 2022 and the Office expects to be able to present its results in the next proposed programme budget.

I. International Civil Service Commission

Foreword

The Mandate of the International Civil Service Commission (ICSC) covers all facets of the conditions of service of staff throughout the United Nations common system. Its purpose is centred on regulating and harmonizing the conditions of service of staff and on making the improvements necessary to ensure that staff keep pace with the changing world.

Following the implementation of a new compensation package, five years prior, the Commission conducted a comprehensive assessment of the changes to determine whether the reform objectives had been achieved. Overwhelmingly, the organizations found that the new compensation system was more equitable, simpler and more transparent. Many improvements were noted. According to them, the new salary structure was better aligned with the principle of equal pay for work of equal value. The education grant scheme became simpler and more streamlined. The revised field-related compensation components were found to be fit for purpose, incentivizing geographical mobility and service in hardship locations. Overall, the new package was perceived as more effective and sustainable.

Since the implementation of the package, there have been dramatic changes in the work environment, owing mostly to the global coronavirus disease (COVID-19) pandemic. Employees have been forced to work outside the workplace and have had to adapt their knowledge and skills in record time. In the context of this rapidly changing environment and the Sustainable Development Goals, it is imperative that a new paradigm that fits today's reality be adopted concurrently.

As in the past, the Commission will continue its flexible approach to ensure that the United Nations common system stays on track and keeps pace with tomorrow's world. ICSC remains poised to support the common system organizations in delivering their mandates and the 2030 Agenda for Sustainable Development, taking into consideration that there may be changes in operational conditions associated with the pandemic and that may necessitate agile responses.

(Signed) Larbi **Djacta**
Chair of the International Civil Service Commission

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 31.1 The International Civil Service Commission (ICSC) was established pursuant to General Assembly resolution 3357 (XXIX) and is responsible for the regulation and coordination of the conditions of service for the United Nations common system. Under its statute, the Commission is a subsidiary organ of the Assembly. In the exercise of its functions, the Commission is guided by the principles set out in the agreements between the United Nations and other organizations aimed at the development of a single unified international civil service through the application of common personnel standards, methods and arrangements.

Programme of work

Objective

- 31.2 The objective, to which ICSC contributes, is to ensure fair and harmonized conditions of service for staff in the United Nations common system.

Strategy and external factors for 2023

- 31.3 To contribute to the objective, the Commission will:
- (a) Continue to develop and strengthen a common system of salaries, allowances and benefits under the Noblemaire and Flemming principles;
 - (b) Apply the methodologies for determining salaries and post adjustment classifications;
 - (c) Provide guidance and advice on the administration of human resources management policies and systems, including job evaluation standards and tools, and substantive support for all stakeholders;
 - (d) Lend its expertise to stakeholders and work closely with the Human Resources Network of the United Nations System Chief Executives Board for Coordination (CEB);
 - (e) Seek feedback from organizations on the conditions of service of staff;
 - (f) Conduct workshops to educate staff on the work of the Commission and on the benefits and entitlements available to staff of the United Nations common system;
 - (g) Carry out periodic global surveys to solicit information from the staff at large, all in an effort to determine the most appropriate conditions of service;
 - (h) Analyse the conditions of service of staff in difficult duty stations.
- 31.4 The Commission has developed standards of conduct, the intent of which is to reflect the overarching ideals of behaviour and conduct for an international civil service. Thus, the standards inspire and provide explanations to staff in the organizations of the common system by articulating some basic standards that form the ethical underpinnings of an international civil service. Following recent developments in the organizations of the common system to address current ethical challenges, including racism, the Commission will review its standards of conduct as scheduled in its programme of work for 2023. The Commission will collect information from common system organizations in order to conduct its review and propose relevant updates to the standards of conduct to be used as a guide within the common system.

- 31.5 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of its programme owing to the coronavirus disease (COVID-19) pandemic. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objective, strategy and mandates and would be reported as part of the programme performance information.
- 31.6 The above-mentioned work is expected to result in:
- (a) Equitable conditions of service in each duty station;
 - (b) A coherent and effective human resources management system that is aligned closely with the achievement of organizational goals and objectives.
- 31.7 With regard to the external factors, the overall plan for 2023 is based on the planning assumption that organizations of the United Nations common system provide timely information, as requested by ICSC, and that they fully implement the Commission's decisions and recommendations.
- 31.8 The Commission integrates a gender perspective in its operational activities, deliverables and results, as appropriate. In 2023, the Commission will update the General Assembly on the implementation of existing gender policies in the United Nations common system and report on the implementation of the Commission's recommendations.

Programme performance in 2021

A simplified, transparent, unified and cost-effective education grant scheme

- 31.9 The General Assembly, in its resolution [74/255 B](#), requested a detailed review on the education grant reimbursement scale and the level of the boarding lump sum, taking into consideration a maximum amount per household. The Commission conducted the detailed review requested by the Assembly on the basis of relevant education-related data collected from the common system organizations. These data reviewed by the Commission included a database of education grant claims covering the 2018/19 academic year, which were analysed in terms of their distribution by staff location, by education level and by relative share of tuition and enrolment-related fees between headquarters and field locations. The distribution of schools was also examined by bracket of the sliding scale. In addition, the breakdown of boarding assistance claims by staff location and by education level was reviewed. The education grant claims data were also used to analyse the financial support per household provided by the organizations in order to assess the feasibility of establishing a limit on such support. Practices of other external entities, such as other intergovernmental organizations whose provision of the education-related benefits appeared to be comparable to the common system's education grant scheme, were also examined.
- 31.10 The work of ICSC contributed to a general agreement among Commission members that the revised education grant scheme worked well and was more cost-effective, streamlined and transparent than the previous education grant scheme and that there was no compelling conceptual or financial reason to limit the maximum amount per household. Furthermore, it was noted that incentives had been established to send children to less expensive schools by having a sliding scale and that the grant was much easier to administer. Given that roughly half of the education grant claims fell in the lowest bracket, the Commission members saw this as a demonstration of the intended incentive towards less costly choices. Furthermore, the General Assembly, in its resolution [76/240](#), decided to maintain the reimbursement rates of the seven brackets and adjust the revised sliding reimbursement scale upward on the basis of the scale approved by the Assembly in its resolution [70/244](#).
- 31.11 Progress towards the objective is presented in the performance measure below (see figure 31.I).

Figure 31.I
Performance measure: average education grant claim costs and survey results

(Percentage/United States dollars)

Impact of the pandemic

31.12 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates. In particular, some activities that had been postponed in 2020 owing to the pandemic had to be completed in 2021. In addition, the spring session of the Commission was postponed and subsequently adjusted to a shortened one-week fully virtual session in May 2021. Furthermore, the summer session of the Commission was delivered in a hybrid format with additional agenda items that were carried over from the spring session. A planned working group relating to parental leave was also rescheduled from the spring to the fall of 2021. In order to accomplish its planned objectives for that year, other planned activities such as data collection also had to be modified during 2021. For example, where possible, the Commission made use of online tools to collect some of the data needed in completing its price surveys.

Planned results for 2023

Result 1: focusing more on the needs of stakeholders

Programme performance in 2021 and target for 2023

- 31.13 The subprogramme’s work contributed to the absence of litigation from staff, which met the planned target.
- 31.14 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 31.1).

Table 31.1
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Staff litigation against a decision by the Commission	Improved understanding by staff of the methodology used to determine post adjustments and the role of the Commission, manifested through increased awareness of and expressed understanding by stakeholders during the review meeting and subsequent presentation and endorsement at the meeting of the Advisory Committee on Post Adjustment Questions	Absence of litigation from staff	General Assembly reiterating the role of the Commission, continued absence of litigation from staff and strong acceptance of new survey methodology by all stakeholders	Approval by the Commission of the results of the cost-of-living surveys and timely and consistent implementation of the results by all headquarters duty stations

Result 2: improved conditions of service, retention and attraction of staff in duty stations with extreme hardship

Programme performance in 2021 and target for 2023

- 31.15 The programme’s work contributed to positive indications from interim data of staff satisfaction with the option to decide on whether to install their families or not at extreme hardship duty stations, which met the planned target.
- 31.16 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 31.2).

Table 31.2
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Staff given choices in deciding whether or not to install their families in duty stations with extreme hardship conditions	Staff given choices in deciding whether or not to install their families in duty stations with extreme hardship conditions	Positive indications from interim data of staff satisfaction with the option to decide on whether to install their families at extreme hardship duty stations, as shown by a positive upward increase in staff opting to accept a grant in the amount of \$15,000 annually at category E hardship duty stations in lieu of installation of eligible dependants	Attraction and retention of staff, especially women, in duty stations classified as undergoing extreme hardship	Positive indications and preliminary data suggest improvements in the attraction and retention of staff, especially women, in duty stations classified as undergoing extreme hardship

Result 3: strengthened incentives to promote multilingualism of the workforce in the common system

Proposed programme plan for 2023

- 31.17 The General Assembly, in its resolution [76/240](#), invited the Commission to include the issue of multilingualism of the workforce in its programme of work for 2022–2023. The common system has several incentives to promote multilingualism, including organizations providing free language training to their Professional and General Service staff, and the provision of a pensionable language allowance. The Commission, in its 2021 report, discussed observations on the issue of multilingualism, including the limited language incentives that exist across the common system and language requirements for posts.

Lessons learned and planned change

- 31.18 The lesson for the Commission was that the assessment and monitoring of multilingualism in the common system was fragmented. In applying the lesson, the subprogramme will explore ways to monitor and assess multilingualism in the workforce within the Commission's programme of work. The Commission will discuss the issue in 2022 and 2023 and draw on diverse perspectives from across its network to formulate ways of capturing the challenges and opportunities of multilingualism in the workforce with a view to considering policy options, including incentives to promote multilingualism.
- 31.19 Expected progress towards the objective is presented in the performance measure below (see table 31.3).

Table 31.3

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	–	Commission members provide perspectives and recommendations on multilingualism in the workforce in their relevant contexts	The General Assembly considers policy options to support the adoption of more coherent and focused incentives to promote multilingualism

Legislative mandates

- 31.20 The list below provides all mandates entrusted to the Commission.

General Assembly resolutions

3357 (XXIX)	Statute of the International Civil Service Commission	76/240	United Nations common system

8. Workshops on the common system compensation package	17	–	18	17
Publications (number of publications)	23	24	24	24
9. Monthly (or bimonthly) revisions and promulgations of post adjustment and rental subsidy thresholds	9	9	9	9
10. Monthly (or bimonthly) revisions and promulgations of approximately 400 daily subsistence allowance rates	8	9	9	9
11. Salaries and allowances booklet	1	1	1	1
12. Post adjustment booklet	2	2	2	2
13. Guide to mobility and hardship scheme and related arrangements	1	1	1	1
14. Information on danger pay locations	1	1	1	1
15. Rest and recuperation framework	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: advice to the United Nations Appeals Tribunal and the International Labour Organization Administrative Tribunal on specific areas relating to human resources management; research papers on specific issues raised by Member States, organizations and staff representatives (restricted documents of the Commission); and information meetings with Member States and organizations outside the United Nations common system.				
E. Enabling deliverables				
Administration: International Civil Service Commission website; substantive documents for the Commission and the Advisory Committee on Post Adjustment Questions reports; and salary surveys and cost-of-living surveys for more than 60 field duty stations.				

B. Proposed post and non-post resource requirements for 2023

International Civil Service Commission

Overview

31.22 The proposed jointly financed resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 31.5 to 31.7.

Table 31.5

- 31.23 Additional details on the distribution of the proposed resources for 2023 are reflected in table 31.9 and figure 31.II.
- 31.24 As reflected in table 31.9 and figure 31.II, the overall resources proposed for 2023 amount to \$11,631,800 before recosting, reflecting no change compared with the amount approved for 2022. The proposed level of resources provides for the full, efficient and effective implementation of mandates.
- 31.25 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), ICSC is integrating environmental management practices into its operations. For 2023, the Commission will continue its online repository where more of its survey materials are deposited, thus reducing the amount of survey data received by regular email. In addition, the Secretariat has encouraged meeting participants to gain access to documents online, and in cases in which this is not possible, documents have been emailed to meeting participants. This has significantly reduced the number of documents printed and mailed.
- 31.26 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 31.8. In an effort to be fully compliant with the advance purchase policy for air travel, ICSC monitors all necessary planned travel, ensuring that such travel is cleared and approved well in advance of the two weeks. However, in most cases, the Commission is faced with difficulty when staff and members of the Commission are invited to meetings on very short notice to discuss issues affecting staff on the United Nations common system. In 2021, the lower travel compliance rate was influenced by the COVID-19 pandemic, resulting in short notice changes in travel options, as well as imposed and lifted travel restrictions.

Part X Jointly financed administrative activities and special expenses

Total	4 106.8	4 327.0	34.9	–	–	34.9	0.8	4 361.9	

31.27 The proposed regular budget requirements for 2023, in the amount of \$4,361,900, reflect an increase of \$34,900 compared with the appropriation for 2022.

31.28 As reflected in table 31.10, resource changes result from technical adjustments, as follows:

Technical adjustments: An increase of \$34,900 based on the United Nations Secretariat share of the budget of ICSC of 37.5 per cent for 2023, as compared to 37.2 per cent for 2022, as determined by CEB in accordance with the established methodology.

II. Joint Inspection Unit

Foreword

The Joint Inspection Unit is the only independent and external oversight body mandated to conduct reviews across the United Nations system. The Unit works to enhance management and administrative efficiency and to promote greater coordination, both among United Nations entities and with other internal and external oversight bodies, and to strengthen transparency, accountability and learning across the United Nations system.

The effectiveness of the Unit system-wide is a shared responsibility of the Unit, the Member States and the secretariats of the participating organizations, as recognized and reiterated by the General Assembly. Within this context, the Unit acknowledges that, for its part, producing high-quality reports on important, relevant and high-priority issues is an essential element in driving the interest of organizations in the reports of the Unit. The acceptance and implementation of the recommendations made by the Unit, which is a key result of its work, has shown improvement when the executive heads of organizations and their legislative organs and governing bodies give due attention to the findings and recommendations contained in the Unit's reports.

The Unit continually strives to improve the quality, effectiveness and efficiency in the execution of its programme of work, as evidenced by the self-assessment completed in 2022.

(Signed) Gopinathan **Achamkulangare**
Chair of the Joint Inspection Unit

Overall orientation

Mandates and background

- 31.29 The Joint Inspection Unit is mandated, through its statute, as contained in General Assembly resolution 31/192, to review matters bearing on the efficiency of services and the proper use of funds and to provide an independent view aimed at improving management and methods and at achieving greater coordination among the organizations of the United Nations system. The Unit performs inspections and evaluations and issues reports, notes and management letters in which it identifies best practices, proposes benchmarks and facilitates information-sharing among all the organizations of the United Nations system that have adopted its statute.

Programme of work

Objective

- 31.30 The objective, to which the Joint Inspection Unit contributes, is to improve the efficiency, effectiveness and coordination of the United Nations system.

Strategy and external factors for 2023

- 31.31 To contribute to the objective, the Joint Inspection Unit will:
- (a) Ensure that its programme of work includes system-wide reviews in the identified main thematic areas: accountability and oversight functions and systems; management and administration practices; the implementation of policies, strategies and programmes, as well as coordination and collaboration on the realization of internationally agreed development goals, such as the Sustainable Development Goals; and governance arrangements and mechanisms, as well as inter-agency coordination;
 - (b) Undertake system-wide reviews of the management and administration practices and methods of the organizations of the United Nations system in the areas of human and financial resources, administration, results-based management, strategic planning and management, change management, risk management, security and safety, and information technology;
 - (c) Focus on system-wide issues that can be assessed across all or multiple organizations in conducting its reviews;
 - (d) Develop and implement effective platforms for the sharing of good practices and knowledge in the various thematic areas of the work of the Unit, including the innovative practices and institutional knowledge originating from the COVID-19 pandemic.
- 31.32 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established procedures and methods. Any modifications to planned deliverables would be in pursuance of the objective, strategy and mandates and would be reported as part of the programme performance information.

- 31.33 The above-mentioned work is expected to result in:
- (a) Better information for legislative body decision-making;
 - (b) Improved efficiency and effectiveness of the organizations of the United Nations system;
 - (c) Improved coordination and collaboration of the organizations of the United Nations system.
- 31.34 With regard to the external factors, the overall plan for 2023 is based on the planning assumption that participating organizations fully cooperate with the reviews of the Joint Inspection Unit and that recommendations are accepted and implemented.
- 31.35 With regard to coordination and cooperation within the United Nations system, the Unit will continue its engagement in various forums, including the Board of Auditors and the Office of Internal Oversight Services. The engagement of a broad range of actors, including those beyond the traditional inspection sphere, is critical to mobilizing effective responses and pursuing solutions to improve business processes. This means strengthening existing partnerships with independent internal oversight entities and oversight committees in participating organizations, but also pursuing new ones that can help to foster innovative approaches. The Unit will pursue measures to continue to promote an integrated approach to support the implementation of the recommendations included in its reports.
- 31.36 The Joint Inspection Unit integrates a gender perspective in its operational activities, deliverables and results, as appropriate. The Unit will continue to examine and report on the gender policies and practices of organizations that it has identified for its management and administration reviews.
- 31.37 In line with the United Nations Disability Inclusion Strategy, the Joint Inspection Unit will also continue to accelerate the effective mainstreaming of disability inclusion, including mitigating measures to overcome any challenges while operationalizing disability inclusion.

Programme performance in 2021

Enhanced understanding of the impact of COVID-19 on the effectiveness and efficiency of the relevant subject areas reviewed by the Joint Inspection Unit

- 31.38 Given the risk that the COVID-19 pandemic posed to the effectiveness and efficiency of operations of the organizations in the United Nations system, the inspectors leading the reviews that were started in 2020 and 2021, after the onset of the pandemic, incorporated that aspect into the scope of their work, where relevant. Those reports included any impact of the pandemic on the subject area that the inspectors had observed. With the range of subject areas under review, some impacts were prevalent to a greater extent than in other subject areas at that time of the reviews.
- 31.39 The reports provided organizations and their legislative organs and governing bodies an indication of the impact that the COVID-19 pandemic might have had on the operations in United Nations system organizations, as well as highlighted good practices observed in some organizations that could be applied in other organizations in the United Nations system (see table 31.11).

Table 31.11
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	Enhanced United Nations system knowledge related to the impact of the COVID-19 pandemic on operational efficiency and effectiveness for 50 per cent of subject areas and organizations for which Joint Inspection Unit reports were issued (4 of 8 reports)	• Enhanced United Nations system knowledge related to the impact of the COVID-19 pandemic on operational efficiency and effectiveness for 100 per cent of subject areas and organizations for which Joint Inspection Unit reports were issued (6 of 6 reports)

2019 (actual)

2020 (actual)

2021 (actual)

- United Nations system organizations are equipped with good practices related to addressing the impact of the COVID-19 pandemic for ensuring effective and efficient operations

Planned results for 2023

Result 1: aligning the programme of work with priorities of the United Nations system for more effective contribution to legislative bodies and organizations

Programme performance in 2021 and target for 2023

- 31.40 The subprogramme’s work contributed to the acceptance of 62 per cent of recommendations pertaining to United Nations system-wide coordination, coherence and harmonization, which did not meet the planned target of 63 per cent. The shortfall in the planned target (1 per cent) is likely attributed to a lag in the consideration of reports by organizations in the United Nations system. The subprogramme’s work also contributed to 5 of 7 reviews adopted in the Unit’s programme of work being proposed by participating organizations and oversight bodies, which met the planned target.
- 31.41 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 31.12).

Table 31.12
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
<ul style="list-style-type: none"> • 65 per cent of recommendations pertaining to United Nations system-wide coordination, coherence and harmonization accepted 	<ul style="list-style-type: none"> • 61 per cent of recommendations pertaining to United Nations system-wide coordination, coherence and harmonization accepted 	<ul style="list-style-type: none"> • 62 per cent of recommendations pertaining to United Nations system-wide coordination, coherence and harmonization accepted 	<ul style="list-style-type: none"> • 66 per cent of recommendations pertaining to United Nations system-wide coordination, coherence and harmonization accepted 	<ul style="list-style-type: none"> • 68 per cent of recommendations pertaining to United Nations system-wide coordination, coherence and harmonization accepted
<ul style="list-style-type: none"> • Participating organizations as well as oversight bodies provided proposals for 5 of 8 reviews adopted in the Unit’s programme of work 	<ul style="list-style-type: none"> • Participating organizations as well as oversight bodies provided proposals for 6 reviews adopted in the Unit’s programme of work 	<ul style="list-style-type: none"> • Participating organizations as well as oversight bodies provided proposals for 7 reviews adopted in the Unit’s programme of work 	<ul style="list-style-type: none"> • Participating organizations as well as oversight bodies provide proposals for 6 of 8 reviews adopted in the Unit’s programme of work 	<ul style="list-style-type: none"> • Participating organizations as well as oversight bodies provide proposals for 6 of 8 reviews adopted in the Unit’s programme of work

Result 2: governing bodies regularize their consideration of Joint Inspection Unit reports

Programme performance in 2021 and target for 2023

31.42 The subprogramme’s work contributed to 13 Joint Inspection Unit participating organizations confirming that their legislative organs and/or governing bodies have regularized the consideration of the report of the Unit, which exceeded the planned target of 10 governing bodies. Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 31.III).

Figure 31.III
Performance measure: total number of governing bodies that regularize their consideration of Joint Inspection Unit reports (cumulative)

Result 3: increased acceptance of Joint Inspection Unit recommendations

Proposed programme plan for 2023

31.43 The value and impact of the work of the Joint Inspection Unit are realized only when the recommendations that the Unit makes are accepted and implemented by its participating organizations. Acceptance of the recommendations is therefore a key result for the Unit and provides the basis for implementation for which the Unit and oversight mechanisms act to hold the organizations accountable for implementation. To support the acceptance and implementation of recommendations, the subprogramme has made concerted efforts to ensure that reviews are on subjects that are relevant, important and a high priority for its participating organizations.

31.44 The lesson for the Joint Inspection Unit was that enhanced engagement with the executive heads and the legislative organs and governing bodies of its participating organizations has a direct impact on the rate of acceptance and, in turn, implementation of recommendations. In applying the lesson, the Unit will, within the remit of its statute, target outreach efforts on the basis of an analysis of the implementation of recommendations and organizational challenges identified in previous engagements, with a view to providing targeted support, including practical examples and the translation of recommendations. Furthermore, in line with the Unit’s programme of work for 2022, the Unit will examine the process of handling its reports by the Unit’s participating organizations and their consideration by their legislative/governing bodies. In the follow-up to this report, the Unit will implement its findings with a view to systematically improving the implementation of recommendations. Expected progress towards the objective is presented in the performance measure below (see figure 31.IV).

Figure 31.IV

Performance measure: rate of acceptance of Joint Inspection Unit recommendations by participating organizations

Contractual services	37.0	41.4	–	–	–	–	–	41.4
General operating expenses	42.2	65.8	–	–	–	–	–	65.8
Supplies and materials	1.3	10.8	–	–	–	–	–	10.8
Furniture and equipment	24.3	27.7	–	–	–	–	–	27.7
Total	7 618.0	8 145.3	–	–	–	–	–	8 145.3

Table 31.15

Overall: proposed posts and post changes for 2023

(Number of posts)

	Number	Details
Approved for 2022	31	12 D-2, 2 P-5, 3 P-4, 4 P-3, 1 P-2/1, 1 GS (PL), 8 GS (OL)
Proposed for 2023	31	12 D-2, 2 P-5, 3 P-4, 4 P-3, 1 P-2/1, 1 GS (PL), 8 GS (OL)

Note: The following abbreviations are used in tables and figures: GS (OL), General Service (Other level); GS (PL), General Service (Principal level).

Table 31.16
Overall: proposed posts by category and grade (jointly financed)

(Number of posts)

Category and grade	Changes					2023 proposed
	2022 approved	Technical adjustments	New/expanded mandates	Other	Total	
Professional and higher						
D-2	12 ^a	–	–	–	–	12 ^a
P-5	2	–	–	–	–	2
P-4	3	–	–	–	–	3
P-3	4	–	–	–	–	4
P-2/1	1	–	–	–	–	1
Subtotal	22	–	–	–	–	22
General Service and related						
GS (PL)	1	–	–	–	–	1
GS (OL)	8	–	–	–	–	8
Subtotal	9	–	–	–	–	9
Total	31	–	–	–	–	31

^a Includes 11 temporary posts for inspectors at the D-2 level.

- 31.48 Additional details on the distribution of the proposed resources for 2023 are reflected in table 31.18 and figure 31.V.
- 31.49 As reflected in table 31.18 and figure 31.V, the overall resources proposed for 2023 amount to \$8,145,300 before recosting, reflecting no change compared with the amount approved for 2022. The proposed level of resources provides for the full, efficient and effective implementation of mandates.
- 31.50 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Joint Inspection Unit will continue to reduce its carbon footprint by reducing the amount of photocopy paper used and the quantity of documentation printed, as well as by limiting travel and utilizing alternatives to face-to-face meetings, where possible.
- 31.51 Information on compliance with regard to the timely submission of documentation and advance booking for air travel is reflected in table 31.17. The Joint Inspection Unit requires that, for each of its review projects, a travel plan be submitted to facilitate the advance purchase of the related air tickets. However, the advance purchase compliance rate was affected during 2021 by the COVID-19 pandemic and its impact on international travel.

Table 31.17
Compliance rate

(Percentage)

	Actual 2019	Actual 2020	Actual 2021	Planned 2022	Planned 2023
Timely submission of documentation	100	100	100	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	93	52	55	100	100

	2021 expenditure	2022 appropriation	Changes				2023 estimate (before recosting)	
			Technical adjustments	New/ expanded mandates	Other	Total		Percentage
Financial resources by main category of expenditure								
Non-post	–	–	–	–	–	–	–	–
Grants and contributions	2 413.0	2 394.7	(81.4)	–	–	(81.4)	(3.4)	2 313.3
Total	2 413.0	2 394.7	(81.4)	–	–	(81.4)	(3.4)	2 313.3

31.52 The proposed regular budget requirements for 2023, in the amount of \$2,313,300, reflect a decrease of \$81,400 compared with the appropriation for 2022. As reflected in table 31.19, resource changes result from technical adjustments, as follows:

Technical adjustments: A decrease of \$81,400 based on the United Nations Secretariat share of the budget of the Joint Inspection Unit of 28.4 per cent for 2023, compared with 29.4 per cent for 2022, as determined by CEB in accordance with the established methodology.

III. United Nations System Chief Executives Board for Coordination

Foreword

Over the course of 2023, the United Nations System Chief Executives Board for Coordination (CEB) and its High-level Committee on Programmes and High-level Committee on Management will continue to provide strategic policy spaces for United Nations system leadership and to drive integration and coherence from the highest organizational levels.

As Chair, I will ensure that the Board maintains its collective commitment to curtailing the climate crisis, ecological degradation, inequalities, social unrest and threats to peace and security; safeguard human rights and fundamental freedoms; and rally the full range of resources at the disposal of the United Nations system in support of efforts by the international community to rebound from the adverse impacts of the COVID-19 pandemic.

The High-level Committee on Programmes will work to bring impetus to the decade of action and delivery of the Sustainable Development Goals in the aftermath of the pandemic. The Committee will leverage the COVID-19 recovery as an opportunity to push forward needed structural transformation; promote the concept of a new social contract; and champion investment in solidarity, trust, networks and global public goods in support of sustainable development.

The High-level Committee on Management will continue to use its position as a forum for cooperation between executive management and technical experts, embracing innovation, sharing knowledge, leveraging new technologies, simplifying policies and scaling up collaborative approaches to support the United Nations system in transforming itself to meet current and emerging challenges.

Through CEB and its subsidiary machinery, the entire United Nations system will remain steadfast in its pursuit of a more equitable, peaceful and sustainable world.

(Signed) António **Guterres**
Secretary-General of the United Nations

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 31.53 CEB, composed of the Secretary-General and the executive heads of the organizations of the United Nations system, is responsible for promoting coherence, cooperation and coordination in the policies, programmes and activities of the organizations of the United Nations system in accordance with their mandates and in response to the decisions of intergovernmental bodies. The mandate of CEB derives from the priorities established in relevant General Assembly and Economic and Social Council resolutions and decisions, including Council resolution 13 (III) and decision 2001/321. At a time when the international community is confronted by increasingly complex and interrelated global challenges, coordinated and coherent action in support of the implementation of the 2030 Agenda and the full range of mandates entrusted to the entities of the United Nations system is more important than ever.

Programme of work

Objective

- 31.54 The objective, to which CEB contributes, is to leverage the collective capacity of the organizations of the United Nations system for the effective delivery of mandates.

Strategy and external factors for 2023

- 31.55 To contribute to the objective, CEB and its two high-level committees will:
- (a) Continue to provide the means for senior leaders of the United Nations system to establish a shared vision, agree on strategic action, pursue policy coherence in both programmatic and administrative areas, and coordinate the use of resources, capacities and knowledge;
 - (b) Provide vision and leadership to guide the effective and coherent implementation of mandates by United Nations system organizations;
 - (c) Through its High-level Committee on Programmes, continue to foster system-wide policy coherence and programme coordination in response to intergovernmental mandates and in support of internationally agreed development goals;
 - (d) Develop shared strategies, approaches and frameworks to address emerging policy and programme issues requiring system-wide action;
 - (e) Through its High-level Committee on Management, continue to foster the development of innovative approaches to improve efficiency and simplify business practices, and accelerate the harmonization, mutual recognition and integration of business operations;
 - (f) Utilize its functional networks on finance and budget, human resources, digitization and technology, procurement, and safety and security to disseminate and, where applicable, mutually recognize best practices, innovative management approaches and partnerships in all areas of management.
- 31.56 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the CEB secretariat has mainstreamed lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. Examples of lessons learned and best practices include ensuring business continuity and fostering a safe work

environment across the United Nations system, as well as improving the access to reliable and timely information and data through continuous improvements to the CEB website. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objective, strategy and mandates and would be reported as part of the programme performance information.

- 31.57 The above-mentioned work is expected to result in:
- (a) Accelerated progress towards the broad and integrated implementation of the 2030 Agenda by Member States and the full range of mandates entrusted to United Nations system entities;
 - (b) A more coherent and coordinated United Nations system response to global challenges, including recovery from the COVID-19 pandemic;
 - (c) Greater capacity of United Nations system organizations to provide effective management responses that support the delivery of mandates.
- 31.58 With regard to the external factors, the overall plan for 2023 is based on the planning assumption that member organizations commit themselves and make timely contributions to the issues addressed by CEB.
- 31.59 CEB integrates a gender perspective in its activities, deliverables and results, as appropriate, including in the products of its high-level committees, such as system-wide strategies, shared approaches and frameworks that maximize leadership and coordination opportunities across the United Nations system. For example, the High-level Committee on Programmes will continue its focus on inequalities, including gender equality and women's empowerment, and efforts to strengthen the United Nations system's impact and visibility on Sustainable Development Goals 5 and 10 in a coordinated, coherent and complementary manner. The CEB annual human resources statistics, under the purview of the High-level Committee on Management, present data on personnel of the United Nations system by category, grade and gender, which assists in tracking gender representation across the United Nations system. In addition, the periodic collection by the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) of system-wide data on recruitment and vacancies has been integrated into the data management platform of the CEB secretariat. This data collection is now administered jointly by the CEB secretariat and UN-Women, thus fostering greater efficiency and collaboration among the United Nations system and enhancing coherence of the data reported to Member States.

Programme performance in 2021

Strengthened preparedness and enhanced data coordination in the Sahel region through predictive modelling

- 31.60 The Sahel region is grappling with the consequences of an interplay of diverse risks, including displacement, climate risks, food insecurity, increased violence and threats to livelihoods. Anticipating trends and predicting their subsequent effects are increasingly important for designing strategies that successfully address the most pressing issues. Traditional risk assessments can neither detect advance warnings of crises nor identify emerging opportunities.
- 31.61 In 2019, the High-level Committee on Programmes supported the initiation of a pilot cross-pillar inter-agency predictive analytics exercise under the leadership of the Office of the United Nations High Commissioner for Refugees, to develop tools to anticipate and understand trends to inform humanitarian responses, sustainable development and international protection. As the first whole-of-United-Nations-system approach of its kind, the High-level Committee on Programmes-incubated project has created an expert consortium consisting of leading academics from around the world and has deepened the understanding of data availability and accessibility in the region. Food security forecasts, climate change impacts and risks projections, and climate-related migration and forced displacement predictions are among the models developed to support proactive policy development

and evidence-based decision-making. In 2021, the project made the transition from a pilot exercise to directly support the United Nations integrated strategy for the Sahel, the United Nations Support Plan for the Sahel and the United Nations Special Coordinator for Development in the Sahel, to instil a more anticipatory, data-driven culture within United Nations system entities and coordination structures operating in the region.

31.62 Progress towards the objective is presented in the performance measure below (see figure 31.VI).

Figure 31.VI

Performance measure: number of United Nations system entities and other partners and number of predictive models and scenario exercises used by the United Nations Integrated Strategy for the Sahel for decision-making

Planned results for 2023

Result 1: adoption of policies by member organizations to realize the future of the United Nations system workforce

Programme performance in 2021 and target for 2023

31.63 The CEB secretariat’s work contributed to improved agility and cohesion across the United Nations system, in particular through the adoption of a United Nations system model policy on flexible work by the High-level Committee on Management member organizations, enabling United Nations leaders to steer the transition of their workforce towards the future of work through senior leadership commitments, which exceeded the planned target of the adoption by individual United Nations system organizations of administrative guidance and policies to facilitate a more agile and responsive workforce.

31.64 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 31.20).

Table 31.20
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Endorsement by CEB of a United Nations system strategy on the future of work; establishment of a cross-functional Committee task force on the future of the United Nations system workforce	Progress towards the definition of elements of a draft policy for flexible working modalities	<ul style="list-style-type: none"> Adoption by High-level Committee on Management member organizations of a United Nations system model policy on flexible work United Nations leaders equipped to steer the transition of their organizations and workforce towards the future of work through senior leadership commitments 	Implementation by individual organizations of related administrative guidance and policies towards a more agile and modern United Nations system workforce	Further implementation by individual organizations of related administrative guidance and policies towards a more agile and modern United Nations system workforce

Result 2: United Nations system-wide financial statistics for better decision-making, greater transparency and enhanced accountability

Programme performance in 2021 and target for 2023

- 31.65 The CEB secretariat’s work contributed to the improved availability of United Nations system-wide financial data disaggregated by function, donor, country and Sustainable Development Goal; enhanced data-driven coordination through the integration of the United Nations inter-agency pooled funds into the CEB financial statistics; and streamlined reporting requirements through development of the CEB minimum data set for reporting to CEB, the International Aid Transparency Initiative and the Organisation for Economic Co-operation and Development, which met the planned target.
- 31.66 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 31.21).

Table 31.21
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Successful first data collection available under the new standards and finalization of road map for implementation	Greater harmonization of reporting; availability of an updated road map and improved guidance for reporting entities	<ul style="list-style-type: none"> Improved availability of system-wide financial data disaggregated by function, donor, country and Sustainable Development Goal Enhanced data-driven coordination through the integration of the inter-agency pooled funds into the CEB financial statistics Streamlined reporting requirements through the CEB minimum data set for reporting to CEB, the International Aid Transparency Initiative and the Organisation for Economic Co-operation and Development 	United Nations system-wide comprehensive, comparable financial data with analytical quality, enhanced transparency and accountability on system-wide financial flows and data aligned with international standards that is easily accessible	Continuous improvements, enhancements and data analytics enabling access to United Nations system-wide financial data for better-informed decisions in support of the 2030 Agenda

Result 3: a more coherent and modern United Nations system approach for timely, relevant and open data

Proposed programme plan for 2023

31.67 Today’s information age is cluttered and overwhelming and can be confusing to understand, with a multitude of sources publishing a wide range of data and statistics, all claiming to be authoritative. In such a context, United Nations system entities, in compiling and publishing high-quality data and statistics, play a vital role as stewards of impartial, timely, accurate and authoritative information. With the intent to strengthen these strategic assets and promote coherence across the United Nations system, the CEB secretariat supported the High-level Committee on Programmes in developing the System-wide Road Map for Innovating United Nations Data and Statistics (CEB/2020/1/Add.1), endorsed by CEB in May 2020.

Lessons learned and planned change

- 31.68 The lesson for the CEB secretariat was that United Nations entities needed to modernize the way in which data are collected, processed, integrated, disseminated and communicated in order to meet the three goals of the System-wide Road Map: (a) create new and timely data solutions; (b) address emerging policy needs; and (c) provide coordinated and innovative support to Member States. In applying the lesson, the CEB secretariat will work with the Committee of the Chief Statisticians of the United Nations System to change the way in which United Nations system entities produce and disseminate relevant and timely global and regional information to better meet policy needs. This will be achieved by drawing on a broader range of data sources and analytical tools; opening United Nations data to promote their use as a global public good; utilizing platforms to facilitate communication to a broader audience; rethinking the ways in which the United Nations promotes and delivers capacity development on data and statistics; and connecting United Nations system statisticians and United Nations system policymakers to enable the production of data and statistics that respond to policy and operational needs in an integrated and coordinated manner.
- 31.69 Expected progress towards the objective is presented in the performance measure below (see figure 31.22).

Table 31.22
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
United Nations statistical community is isolated from policymaking in the rest of the system	CEB endorsed the System-wide Road Map for Innovating United Nations Data and Statistics	A few significant United Nations system policy initiatives, such as the predictive analytics pilot in the Sahel and the United Nations system contribution on “Beyond GDP”, leverage United Nations statistical community expertise	Expanded number of United Nations system policy initiatives leveraging United Nations statistical community expertise	Strengthened coherence and integration in the production of data and statistics that respond to United Nations system policy and operational needs

Legislative mandates

- 31.70 The list below provides all mandates entrusted to CEB.

General Assembly resolutions

64/289	System-wide coherence	75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)	76/236	

Economic and Social Council resolutions and decisions

13 (III)	Coordination Committee	2001/321	Further consideration of the annual overview review report of the Administrative Committee on Coordination
--------------------------	------------------------	----------	--

Deliverables

31.71 Table 31.23 lists all deliverables of CEB.

- 31.73 Additional details on the distribution of the proposed resources for 2023 are reflected in table 31.28 and figure 31.VII.
- 31.74 As reflected in table 31.28 and figure 31.VII, the overall resources proposed for 2023 amount to \$4,106,100 before recosting, reflecting a net increase of \$141,800 (or 3.6 per cent) compared with the amount approved for 2022. Resource changes result from other changes. The proposal includes the requirements for the International Standard Public Sector Accounting Standards project for 2023 in the amount of \$273,200. The proposed level of resources provides for the full, efficient and effective implementation of mandates.
- 31.75 As reflected in table 31.28, resource changes reflect a net increase of \$141,800, resulting from:
- The planned reclassification of one post from the P-4 to the P-5 level (\$28,900) (see annex III);
 - The planned establishment of one post at the P-3 level (\$112,900) (see annex III).
- 31.76 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), CEB is integrating environmental management practices into its operations. In 2023, in line with the 2020–2030 environmental sustainability strategy, the office will continue to ensure that all meetings that it supports are single-use-plastic-free and paper-free to reduce waste and cut carbon emissions, as well as continue to promote an eco-friendly culture.
- 31.77 Information on compliance with regard to the timely submission of documentation and advance booking for air travel is reflected in table 31.27. The CEB secretariat will continue to track compliance, including through the use of the management dashboard. The CEB secretariat has made efforts to raise awareness of the staff and managers of the requirement and has encouraged advance planning and the nomination of travelling staff to meetings and conferences, whenever possible.

Total	1 222.0	1 233.2	(15.6)	–	43.5	27.9	2.3	1 261.1	

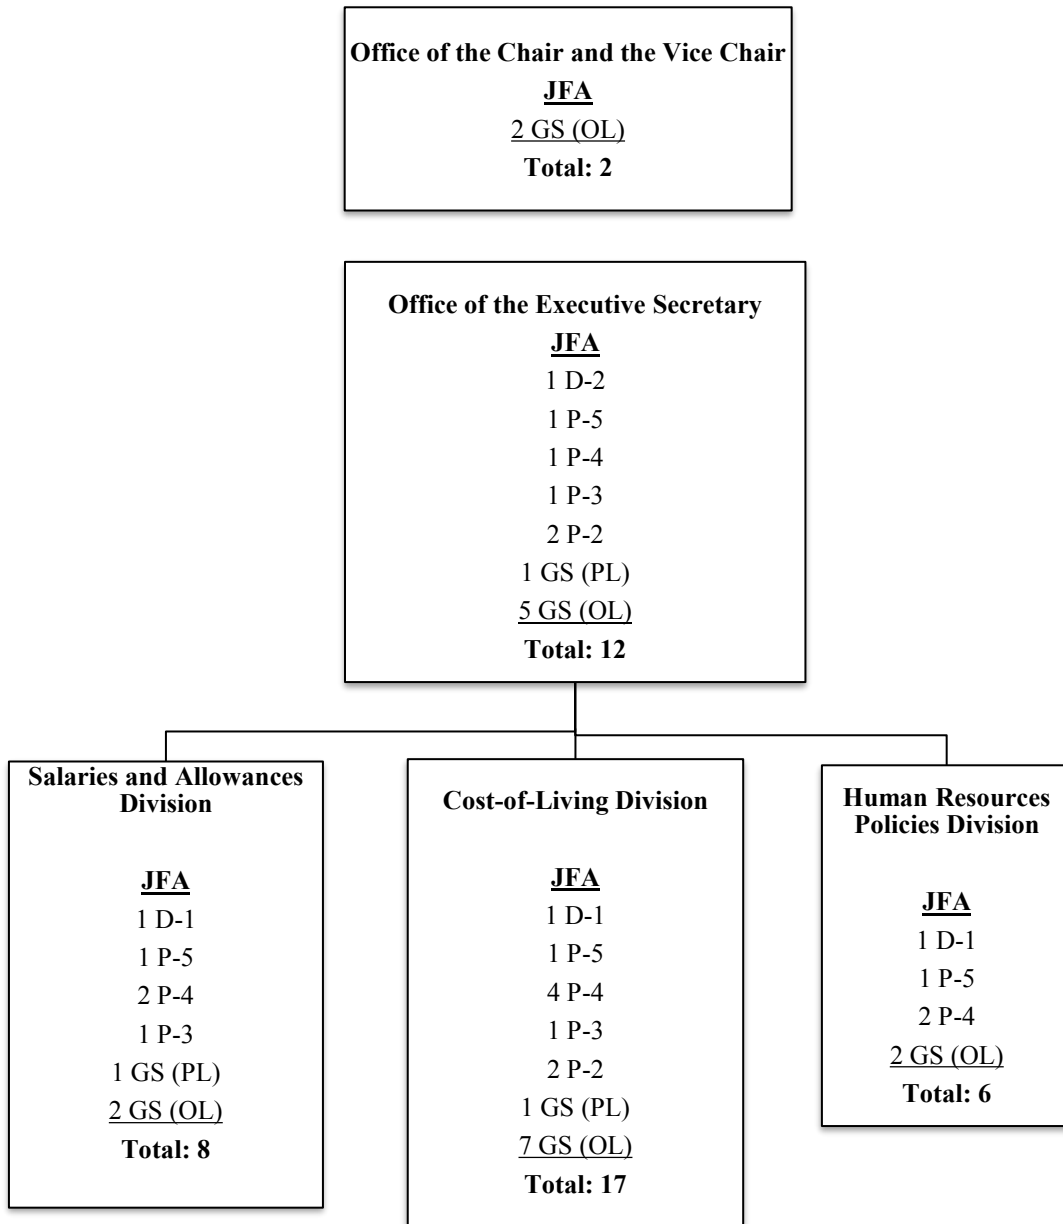

31.78 The proposed regular budget resources for 2023, in the amount of \$1,261,100, reflect a net increase of \$27,900 compared with the appropriation for 2022. As reflected in table 31.29, resource changes result from technical adjustments and other changes, as follows:

- (a) **Technical adjustments:** A decrease of \$15,600 based on the United Nations Secretariat share of the budget of CEB of 30.7 per cent for 2023, compared with 31.1 per cent for 2022, as determined by CEB in accordance with the established methodology;
- (b) **Other changes:** An increase of \$43,500, reflecting the United Nations Secretariat share for 2023 of the proposed increase in jointly funded resources of \$141,800 resulting from the planned reclassification of one post from P-4 to P-5 and the establishment of one P-3 post (see para. 31.75 above).

Annex II

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions (A/76/7)

International Civil Service Commission

The Advisory Committee recalls that the General Assembly requested ICSC to carry out a needs assessment for its communication and legal expertise functions within its secretariat and trusts that an update will be presented (para. X.10).

The International Civil Service Commission (ICSC) submitted to the Finance and Budget Network for its consideration, in accordance with its statute, a proposal for an additional post of Legal Officer (P-4) in the secretariat. However, taking into consideration the feedback from the Human Resources Network, the Finance and Budget Network did not support the additional post.

Joint Inspection Unit

The Committee was informed that the Unit was working on extracting more details on the reasons for participating organizations not accepting recommendations and was taking action to increase the rate of acceptance. The Advisory Committee looks forward to an update on the matter (para. X.19).

Please see paragraphs 31.39, 31.41 and 31.42.

United Nations System Chief Executives Board for Coordination

The Advisory Committee trusts that further clarification regarding staff funded from extrabudgetary sources and the potential use of in-kind contributions to determine the cost sharing, together with information on actual contributions from all entities, will be provided (para. X.35).

The cost-sharing methodology does consider staff funded through extrabudgetary resources.^a In addition, parameters of the cost-sharing formula include expenses funded from extrabudgetary resources and in-kind contributions.

The cost-sharing methodology allows for the deduction of expenses in kind only when separately reported in the financial statements of the participating entity. A comprehensive assessment of alternative methodologies to account for in-kind contributions would require a full review of the cost-sharing formula because the cost-sharing methodology is based on expenses reported in the audited financial statements of the organizations and not on contributions.

Annex III

Summary of proposed post changes, by component

<i>Component</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
United Nations System Chief Executives Board for Coordination	(1) 1	P-4 P-5	Reclassification of 1 post from Inter-Agency Adviser, Finance and Budget Network (P-4) to Senior Inter-Agency Adviser, Finance and Budget Network (P-5) in the CEB secretariat (Geneva)	The upward reclassification is to align the post with the increased breadth and scope of responsibilities in supporting the Finance and Budget Network, to strengthen the analytical quality of system-wide financial data and statistics, and support coordinated and informed action to integrate technological and digital solutions into the financial management of the United Nations system.
	1	P-3	Establishment of 1 Coordination Officer in the CEB secretariat (Geneva)	The establishment of one new post is to support the High-level Committee on Management secretariat in responding to growing demands placed on the Committee for cross-functional, integrated and innovative action by providing secretariat and coordination support to the various CEB-mandated active tasks forces, forums and working groups of the Committee.

Annex IV

Summary of information on the cost-sharing methodology applied in establishing the United Nations share of jointly financed activities

1. The methodology applied since 1974 in respect of the cost-sharing of the International Civil Service Commission (ICSC) budget is based on the “Consultative Committee on Administrative Questions formula”, which apportions the ICSC costs on the basis of the number of staff, as contained in the personnel statistics published by the United Nations System Chief Executives Board for Coordination (CEB) secretariat. The United Nations share of the costs also includes the shares for the United Nations Relief and Works Agency for Palestine Refugees in the Near East and the Office of the United Nations High Commissioner for Refugees, on the basis of the decision by the General Assembly that the costs relating to these two entities are funded from the regular budget of the United Nations.
2. The methodology applied since 1996–1997 for the cost-sharing of the Joint Inspection Unit budget is derived from the expenditure reported in the audited accounts of the participating organizations, excluding:
 - (a) Expenditure relating to peacekeeping;
 - (b) Expenditure in kind, including the value of donated commodities;
 - (c) A total of 50 per cent of the expenditure of the International Trade Centre corresponding to the share of the World Trade Organization, on the principle that the regular budget of the Centre is funded in equal parts by the United Nations and the World Trade Organization, which does not participate in the work of the Joint Inspection Unit.
3. The methodology applied since 2006 for the cost-sharing of the CEB secretariat’s budget is based on 50 per cent of staff, in accordance with the most recently available personnel statistics, and 50 per cent of total expenditure, in accordance with the most recently available audited financial statements, minus expenditure in kind, excluding expenditure relating to peacekeeping operations.
4. The methodology applied for the cost-sharing of the system-wide International Public Sector Accounting Standards budget is based on the same cost-sharing formula used to apportion the budget of the CEB secretariat, with the exclusion of the International Fund for Agricultural Development, which is not an active member in the International Public Sector Accounting Standards project.

Annex V

Overview of financial and post resources

The full budgets of the International Civil Service Commission and the Joint Inspection Unit are presented to the General Assembly for its consideration and approval. The full budget of United Nations System Chief Executives Board for Coordination is presented for information purposes, while its United Nations share is presented for approval. In accordance with article 21 of the Commission's statute and article 20 of the Unit's statute, the budget estimates have been established after consultation with Board member organizations.

Proposed post and non-post resource requirements for 2023

Overview

- 32.1 Under section 32, Special expenses, resources are provided to cover specific expenditure requirements for: (a) contributions to after-service health insurance; (b) compensatory payments; (c) general insurance charges; (d) bank charges; and (e) pension payments to former Secretaries-General. The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in table 32.1.

Table 32.1

Explanation of variances by component

Overall resource changes

Other changes

- 32.4 As reflected in table 32.2 (1), the cost-neutral changes between components are explained as follows:
- (a) **Compensatory payments.** The increase of \$138,100 falls under Headquarters and reflects actual expenditure experience;
 - (b) **General insurance.** The decrease of \$217,500 under general operating expenses reflects actual expenditure experience;
 - (c) **Bank charges.** The increase of \$79,400 under general operating expenses reflects expenditure experience.

Other assessed and extrabudgetary resources

- 32.5 As reflected in table 32.2 (2), the estimated other assessed resources for contributions to after-service health insurance for 2023 amount to \$11,830,000, reflecting an increase of \$740,000 compared with the estimate for 2022. The expected increase reflects payment trends and medical inflation adjustments, as reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2022 to 30 June 2023 ([A/76/725](#)).
- 32.6 As reflected in table 32.2 (3), the estimated extrabudgetary resources for contributions to after-service health insurance amount to \$6,512,500, reflecting an increase of \$64,300 compared with the estimate for 2022.

A. Contributions to after-service health insurance

- 32.7 The after-service health insurance programme extends health-care benefits under the United Nations insurance schemes to eligible retirees and their eligible dependants. Coverage is provided on a shared-contribution basis in accordance with a decision taken by the General Assembly at its twenty-first session. Coverage is also provided to staff members whose appointments are terminated as a result of disability. In all cases, coverage is available only to those who are eligible to receive a periodic benefit from the United Nations Joint Staff Pension Fund or under the rules governing compensation for service-incurred death, injury or illness. In accordance with Assembly resolution [38/235](#), the maximum cost-sharing ratio is 2 to 1 between the Organization and the participant.
- 32.8 By its resolution [40/258 A](#), the General Assembly decided to extend after-service health insurance coverage to former locally recruited staff who had participated in the medical expense assistance plan under appendix E to the Staff Rules of the United Nations.
- 32.9 By its resolution [61/264](#), the General Assembly approved changes to the after-service health insurance provisions for new staff members recruited on or after 1 July 2007. Under the terms of that resolution, following retirement, staff members are eligible for cost-sharing of after-service coverage if they have participated in a United Nations-system contributory health insurance plan for a minimum of 10 years at the time of retirement. Staff members recruited before 1 July 2007 who have participated in a United Nations contributory plan for at least five years are also eligible, provided that they pay the full premium for the period for which their participation falls short of the 10-year requirement for cost-shared participation.
- 32.10 The General Assembly, in its resolution [64/241](#), requested the Secretary-General to submit to it at its sixty-seventh session a report on managing after-service health insurance liabilities, bearing in mind that the pay-as-you-go principle was one of the viable options. The Assembly also requested the Secretary-General to continue to validate the accrued liabilities with the figures audited by the

Board of Auditors and to include that information and the outcome of the validation in the requested report. The report of the Secretary-General on managing after-service health insurance liabilities (A/68/353) was submitted to the Assembly at its sixty-eighth session. The Assembly, in its resolution 68/244, endorsed the recommendation of the Advisory Committee on Administrative and Budgetary Questions on the continuation of the pay-as-you-go approach to the funding of the after-service health insurance liabilities. It also requested the Secretary-General to examine the option of broadening the mandate of the United Nations Joint Staff Pension Fund, to include the cost-effective, efficient and sustainable administration of after-service health insurance benefits, taking into account the advantages and disadvantages of that option, including its financial and legal implications, and to report thereon at the seventieth session of the Assembly, as well as to undertake a survey of current health-care plans for active and retired staff within the United Nations system, to explore options to increase efficiency and contain costs and to report thereon at its seventieth session. In his report on managing after-service health insurance (A/73/662), largely informed by the work of the inter-agency Working Group on After-Service Health Insurance, the Secretary-General continued to apprise the Assembly of the work undertaken in response to its request. In its resolution on managing after-service health insurance (resolution 73/279 B), the Assembly endorsed the recommendations contained in the report of the Advisory Committee (A/73/792), including that the Secretary-General further explore options for the improvement of efficiency and the containment of costs, including liabilities associated with current and future staff, with a view to reducing the Organization's expenditure on health insurance plans and its after-service health insurance obligations.

- 32.11 The report of the Secretary-General on managing after-service health insurance liabilities (A/76/373) was submitted to the General Assembly at its seventy-sixth session. In the report, the Secretary-General responded to the Assembly's request and set out a comprehensive proposal on after-service health insurance funding. Furthermore, in response to the request made by the Assembly in its resolution 73/279 B to incorporate into the proposal a mechanism that would associate the after-service health insurance premiums paid and the staff member's period of service, the Secretary-General shall implement, effective 1 January 2023, a provision already included in the health insurance programme, which is to base retiree contributions on a minimum of 25 years of service in the United Nations system.
- 32.12 The proposed regular budget resources for 2023 amount to \$79,104,500 and reflect no change compared with the appropriation for 2022. Additional details on the distribution of proposed resources for 2023 are reflected in table 32.4 and figure 32.II.

B. Compensatory payments

- 32.13 The requirements under compensatory payments provide for compensation to members of commissions, committees or similar United Nations bodies in the event of death, injury or illness attributable to service with the United Nations. The responsibilities of the United Nations in this area, as well as the rules governing compensatory payments, are detailed in Secretary-General’s bulletin [ST/SGB/103/Rev.1](#).
- 32.14 Compensation is also provided to staff members or their dependants in the event of death, injury or illness attributable to the performance by the staff member of official duties on behalf of the United Nations. The compensation is governed by the specific rules under appendix D to the Staff Regulations and Rules of the United Nations ([ST/SGB/2018/1](#)).
- 32.15 The costs incurred on both those accounts may include monthly survivor benefits for life, monthly disability benefits for life, lump-sum indemnities for permanent disabilities, funeral expenses, sick leave credit and medical expenses.
- 32.16 The proposed regular budget resources for 2023 amount to \$1,685,500, reflecting an increase of \$138,100 compared with the appropriation for 2022. The proposed increase is explained in paragraph 32.4 (a). Additional details on the distribution of proposed resources for 2023 are reflected in table 32.5 and figure 32.III.

C. General insurance

32.17 The provisions under general insurance relate mainly to insurance on the buildings and property at Headquarters, as well as in Addis Ababa (the Economic Commission for Africa), Santiago (the Economic Commission for Latin America and the Caribbean) and Beirut (the Economic and Social Commission for Western Asia). The United Nations Offices at Geneva, Vienna and Nairobi, as well as the Economic and Social Commission for Asia and the Pacific in Bangkok, separately maintain property and liability coverage for their offices locally. General insurance also covers automobile liability insurance at Headquarters, liability insurance for aircraft used for travel by the Secretary-General but not owned by the United Nations, and insurance for other air travel of staff. In addition, in accordance with General Assembly resolution 41/210, the United Nations has established a self-insurance plan for general liability risk in respect of acts occurring in the Headquarters district in New York. The provisions also cover a stand-alone insurance policy for acts of terrorism, which, following the events of 11 September 2001, was established effective 2003 as a result of limitations in the scope of insurance coverage for risks, such as acts of terrorism that would normally have been covered under the general policies.

- 32.18 The outreach initiatives continued to encourage additional markets to bid for coverage of risks to the United Nations. Some limitations in the scope of insurance coverage, however, continue to be prevalent. Two such examples are the flood coverage restrictions introduced in the wake of storm Sandy in New York and the continued requirement for specific insurance for acts of terrorism that were covered under the general policies before the events of 11 September 2001. Actual premiums will also be driven by the United Nations claims experience of 2021 and 2022, and by the general state of insurance markets at the time of the renewal of the policy. It should be noted that the Economic and Social Commission for Western Asia sustained significant damages (currently estimated at \$6 million) to its building and the contents thereof as a result of the explosion in Beirut on 4 August 2020. That loss, in addition to other property losses, may have an impact on the 2023 property insurance premium. In addition to loss history, insurance premiums are also affected by market conditions and capacity, that is, the number of underwriters in the marketplace willing to insure the risk at the time of renewal. The insurance marketplace is constantly evolving on the basis of global economic conditions and natural and human-made disasters or regulatory requirements, and insurers' perception of specific risks related to the United Nations.
- 32.19 The proposed regular budget resources for 2023 amount to \$3,384,100 and reflect a decrease of \$217,500 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 32.4 (b). Additional details on the distribution of proposed resources for 2023 are reflected in table 32.6 and figure 32.IV.

(Thousands of United States dollars)

D. Bank charges

32.20 The bank charges include fees for account maintenance, electronic fund transfers and other banking services used by the United Nations.

32.21 The proposed regular budget resources under general operating expenses for 2023 amount to \$228,000 and reflect an increase of \$79,400 compared with the appropriation for 2022, as reflected in table 32.7. The proposed increase is explained in paragraph 32.4 (c).

E. Pension payments to former Secretaries-General

32.22 This component covers the retirement allowances for a former Secretary-General and for the widows of two former Secretaries-General at the half rate on the basis of the maximum retirement benefit payable as from 1 February 2022.

32.23 The proposed regular budget resources for 2023 amount to \$409,300 and reflect no change in the resource level compared with the appropriation for 2022, as reflected in table 32.8.

Annex I

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/76/7](#) and [A/76/7/Corr.1](#)

General insurance

The Advisory Committee notes the premium savings achieved in 2020 and trusts that an update on the impact of premiums, as well as the mandatory communicable disease exclusion and efforts to secure the most beneficial insurance policies, will be provided in the next regular budget submission (para. X.48).

The Department of Management Strategy, Policy and Compliance continues to seek the most beneficial insurance policies at the best value for the money for the Organization while also seeking cost efficiencies amid ongoing volatility in the global insurance markets. In the light of ongoing concerns regarding the coronavirus disease (COVID-19) pandemic, communicable disease coverage remains an exclusion in the insurance industry.

* A/77/50.

** In keeping with paragraph 11 of resolution 72/266 A, the part consisting of the post and non-post resource requirements is submitted through the Advisory Committee on Administrative and Budgetary Questions for the consideration of the General Assembly.

Overview

- 33.1 The present section covers the resources proposed for the capital investments required in 2023 in connection with the construction, alteration, periodic maintenance and improvement of, and upgrades to, facilities, buildings and general infrastructure of the United Nations worldwide, including for safety and security and information and communications technology (ICT). To ensure a coherent and systematic approach to capital expenditure requirements across the Organization, such resources continue to be requested under the present section. Section 33 does not cover requirements for post-related costs for the administration and management of the activities proposed in the present section; those costs are included under the respective sections of the proposed programme budget for 2023 for United Nations Headquarters, the United Nations Office at Geneva, the United Nations Office at Vienna, the United Nations Office at Nairobi, the Economic Commission for Latin America and the Caribbean (ECLAC), the Economic and Social Commission for Asia and the Pacific (ESCAP), the Economic Commission for Africa (ECA) and the Economic and Social Commission for Western Asia (ESCWA).
- 33.2 The resources proposed are in line with the International Public Sector Accounting Standards and encompass requirements for projects that result in an increase of the value of the asset and/or extend its useful life, including: (a) projects of a capital-intensive and of a structural nature that would substantially improve facilities or infrastructure; and (b) projects to repair or replace existing installations (e.g., heating, ventilation and air conditioning) and related systems (e.g., electrical, information technology and security). The proposed projects comprise both one-time projects and new and continuing multi-year projects. In addition, pursuant to the decision of the General Assembly in its resolution [76/246 A](#) and previous resolutions, the proposals under the present section include a provision for the annual repayments to the host country (Switzerland) for the loans related to the strategic heritage plan of the United Nations Office at Geneva until it decides otherwise.
- 33.3 In accordance with General Assembly resolution [76/246 A](#) and previous resolutions, the Global Asset Management Policy Service (in the Field Operations Finance Division of the Office of Programme Planning, Finance and Budget in the Department of Management Strategy, Policy and Compliance) is responsible for the provision of guidance, support and technical advice to offices away from Headquarters and the regional commissions with regard to the planning, management and monitoring of capital investment projects, including those in the proposed programme budget for 2023.
- 33.4 At Headquarters, the projects proposed to be funded under section 33 fall under the responsibility of the Division of Administration, New York, of the Department of Operational Support in respect of facilities, the Department of Safety and Security in respect of safety and security, and the Office of Information and Communications Technology in respect of enterprise networks. The administrative services in Geneva, Vienna and Nairobi and the regional commissions are responsible for the implementation of the projects at their respective duty stations.
- 33.5 With regard to safety and security, projects to enhance capabilities for the protection of United Nations staff and premises globally are evaluated by, and subsequently implemented in close coordination with, the Department of Safety and Security to ensure standardization, such as the ongoing implementation of the multi-year standardized access control project across the Secretariat.
- 33.6 With regard to information and telecommunications technology, the Office of Information and Communications Technology provides central leadership in the establishment and implementation of Organization-wide ICT strategy and standards and ensures the efficient use of resources in the modernization of information systems and the improvement of information and communications services. The Office directs and oversees the operation and upgrade of the global infrastructure at Headquarters, offices away from Headquarters and the regional commissions. Upgrades are implemented through annual projects to upgrade the enterprise networks. Such projects also serve to standardize the related infrastructure and equipment to ensure comparable standards of functionality, quality and reliability of the related services across the Organization, including in respect of telecommunications. Equipment for enterprise networks, such as standardized switches and routers, is procured centrally, to the extent possible, in order to qualify for bulk discounts, while installation is handled at each duty station to bring the local network up to the standard at Headquarters.

- 33.7 The Secretariat is currently working on a comprehensive plan for major capital investments that will be required across the Organization in the years beyond 2023, with a focus on safety and security, conferencing, facilities and related requirements for both physical and ICT infrastructure, including enterprise systems and applications. A comprehensive report on the outcome will be submitted to the General Assembly at the main part of its seventy-seventh session. The resources proposed under this section, as detailed below, are required for urgent projects to be implemented in 2023 and will not be covered in the forthcoming capital investments report.
- 33.8 In line with the request from the General Assembly, in its resolution 75/252, to include indicative estimates for the major construction projects¹ in the proposed programme budget under section 33 for information purposes only, a table with the requested information related to those capital projects is provided in the annex. Such estimates may be revised in the progress reports for each project to reflect the evolving situations. As the estimates are provided for information purposes only, the resources for those projects, including for the corresponding project management teams under the respective budget sections other than section 33, are not proposed as part of the resources submitted herewith for section 33; in continuation of past practice, these resources will be requested in the context of the forthcoming annual progress reports of the Secretary-General to be submitted at the main part of the seventy-seventh session of the Assembly.

Proposed resource requirements for 2023

Overview of resources

- 33.9 The overall resources proposed for 2023 amount to \$29,727,000 before recosting, reflecting a net decrease of \$83,015,800 (or 73.6 per cent) compared with the appropriation for 2022. Resource changes result from two factors, namely: (a) technical adjustments; and (b) other changes, as explained below. The distribution of proposed resources is reflected in table 33.1.

Table 33.1

Evolution of financial resources by category of projects and location

Abbreviations: DSS, Department of Safety and Security; United Nations Office at Geneva, UNOG; United Nations Office at Nairobi, UNON; United Nations Office at Vienna, UNOV.

^a Includes an amount of \$2,709,300 for the annual repayment in 2023 of the loan related to the strategic heritage plan.

^b Indicative estimates for 2023 for the major construction projects are provided in the annex for information purposes only.

Technical adjustments

- 33.10 Resource changes reflecting a decrease of \$89,138,800 are due to the removal of non-recurrent requirements relating to the projects approved for 2022 by the General Assembly in its resolution [76/246](#) A, namely: (a) the strategic heritage plan of the United Nations Office at Geneva (\$66,971,800); (b) the replacement of office blocks A to J at the United Nations Office at Nairobi (\$10,069,300); (c) the renovation of the conference service facilities at the United Nations Office at Nairobi (\$914,600); (d) the seismic mitigation retrofit and life-cycle replacements project at ESCAP premises, in Bangkok (\$6,024,300); and (e) the renovation of the North Building at ECLAC, in Santiago (\$5,158,800). The resources for those projects for 2023 will be requested in the forthcoming related progress reports of the Secretary-General, which will be submitted for consideration during the main part of the seventy-seventh session of the Assembly.

Other changes

- 33.11 Resource changes reflect an increase of \$6,123,000 compared with the appropriation for 2022, as follows: an increase under alteration, upgrades and major maintenance programmes (\$1,466,900) and an increase under the standardized access control project and other related security system upgrades (\$4,781,800), offset in part by a decrease under the United Nations enterprise networks (\$125,700).
- 33.12 With regard to alteration, upgrades and major maintenance programmes, the resources under section 33 undergo reprogramming, including redistribution for each budget period, because they cover a portfolio of activities of which only a portion is a recurrent requirement, the remainder being one-time or multi-year projects. Each proposed programme budget for a new budget period reflects the completion of non-recurrent activities and the introduction of newly programmed, non-recurrent activities. The projects proposed to be funded under the present section are based on needs identified for the budget period, which would require additional resources amounting to \$1,466,900.
- 33.13 With regard to the United Nations enterprise networks, resource changes reflect a decrease of \$125,700, resulting mainly from reduced requirements for network security components at the United Nations Office at Geneva and Headquarters, offset in part by increased requirements for firewalls, upgrades to ICT infrastructure and business continuity in offices away from Headquarters and regional commissions.
- 33.14 With regard to capital requirements for safety and security, the standardized access control project, which began in 2005 and the second phase of which was implemented in 2009–2010, was designed to upgrade the physical security architecture and systems at headquarters and ensure compliance with the headquarters minimum operating security standards. Since then, the Secretariat has not invested resources in its physical security infrastructure beyond regular maintenance of the systems introduced by the project. These systems have now become obsolete and require modernization, which is being implemented under a third phase, another aim of which is to standardize the security architecture and systems across duty stations. In addition, new threats and threats that have emerged in recent years, such as vehicle ramming, fire (as a weapon), active shooters, complex attacks and violent demonstrations, require the urgent replacement and upgrading of the physical security systems across the Secretariat. Furthermore, the convergence of cyber and physical security risks requires further upgrades to ensure adequate protection of critical security systems. To address the above requirements, work began in 2021 and continued in 2022 to replace obsolete equipment and upgrade critical security systems across the Secretariat. To continue to fund additional critical upgrades identified under the standardized access control project in 2023, as well as related requirements for infrastructure, hardware and systems at the various offices of the Secretariat, additional requirements in the amount of \$4,781,800 are proposed for 2023. Project implementation is being planned, vetted and monitored by the Department of Safety and Security.

Nature of proposed activities

- 33.15 Table 33.2 breaks down the resource requirements into: (a) one-time projects; and (b) new and continuing multi-year phased projects. The breakdown by subcategory allows the aggregate portfolio of activities proposed under section 33 to be viewed in terms of nature and duration by location.

Table 33.2

Nature of projects proposed for 2023 by location (before recosting)

(Thousands of United States dollars)

A. Resource requirements by duty station

1. Headquarters (including global projects)

Resource requirements (before recosting): \$10,854,100

- 33.16 As summarized in table 33.3, the total provision of \$10,854,100 would provide for: (a) one-time projects (\$1,842,000); and (b) new and continuing multi-year projects (\$9,012,100).
- 33.17 The provision of \$1,842,000 would be required to fund: (a) the design for the replacement of female security officers' locker rooms (\$150,000); (b) chemical and biological detection systems and ballistic protection for entrances (\$192,000); and (c) the replacement of the booth at the delegates entrance (\$1,500,000).
- 33.18 The provision of \$9,012,100 would be required to fund the continuation of multi-year projects, including: (a) global upgrades and standardization for the modernization and interoperability of access control systems (\$1,000,000); (b) complex-wide accessibility improvements (\$450,000); (c) the repair of the General Assembly east exit ramps (\$2,000,000); (d) the upgrade and maintenance of the enterprise network infrastructure at United Nations Headquarters technology rooms supporting the Secretariat, General Assembly and Conference buildings (\$2,451,500); (e) the maintenance and renewal of the Check Point firewall software at Headquarters (\$513,700); and (f) the consolidated maintenance contract at Headquarters, offices away from Headquarters and the regional commissions for network and telephone equipment to guarantee the same level of service at each duty station, which has become increasingly important owing to the growing requirements of central enterprise applications (\$1,766,900). In addition, the provision would cover new projects to replace turnstiles and an X-ray machine, and to upgrade the video surveillance system at Headquarters (\$830,000).

2. United Nations Office at Geneva***Resource requirements (before recosting): \$5,164,300***

- 33.19 The total provision of \$5,164,300 for the United Nations Office at Geneva includes two main components, namely: (a) one-time projects (\$625,000); and (b) new and continuing multi-year projects (\$4,539,300).
- 33.20 The provision of \$625,000 would be required to fund the upgrade of the heating and cooling networks (\$500,000) and the related replacement of water pipelines at the Palais des Nations (\$125,000). The provision of \$4,539,300 would be required to fund continuing multi-year activities (\$4,259,300) and new activities (\$280,000).
- 33.21 The provision of \$4,259,300 under continuing multi-year projects would provide for the continuation of: (a) the removal and disposal of hazardous materials (\$100,000); (b) upgrades to improve accessibility and reasonable accommodation for persons with disabilities at the Palais des Nations (\$500,000); (c) the replacement of protective shatter-resistant film in windows across campus (\$150,000); and (d) compartmentalization and lockdown mechanisms at strategic locations to mitigate active shooter or coordinated attacks against the complex. The provision also includes an amount of \$2,709,300 (2,502,000 Swiss francs) for the annual repayments to the host country of the loan related to the strategic heritage plan, in line with General Assembly resolutions [74/263](#) and [75/253](#).
- 33.22 The provision of (\$280,000) under new multi-year projects would provide for the upgrade of critical network security components at the United Nations Office at Geneva, as follows: (a) the integrated system for ICT vulnerability and threat management (\$180,000); and (b) disability inclusion features in the Office's ICT systems (\$100,000)
- 33.23 The proposed projects have been selected in close consultation with the strategic heritage plan project team to ensure that the works would not need to be redone in the future and that only essential needs and urgent repairs, in particular at the Palais des Nations, are considered while the overall renovation project is under way. The resource requirements are summarized in table 33.4.

Table 33.4

3. United Nations Office at Vienna***Resource requirements (before recosting): \$2,217,800***

- 33.24 The total provision of \$2,217,800 would continue to cover both the share of the United Nations Office at Vienna of the cost of improving and maintaining the Vienna International Centre, which is managed by the United Nations Industrial Development Organization on a cost-shared basis through an agreement among the organizations based at the Centre and the host Government (with regard to major maintenance projects), and the share of the Office of the cost of requirements in respect of the safety and security installations at the Centre, together with the associated ICT components. The requested amount is calculated on the basis of the current share of the Office, which is 23 per cent of the total alteration and improvement requirement and 11.5 per cent of the total major maintenance requirements. This share is based on a composite of the space, staff and workload of the four organizations in determining the respective share of costs.
- 33.25 The contribution of the United Nations Office at Vienna to the Common Buildings Management Fund for the periodic repairs, upgrades and maintenance at the Vienna International Centre planned for 2023 amounts to \$1,236,800. In addition, a provision of \$861,000 will cover the estimated costs of the planned upgrades of various hardware and infrastructure components for the standardized access control project at the Vienna International Centre. A provision of \$120,000 is also included to cover the requirements to fund the Check Point firewall software for information security and protection against cyberattacks. The resource requirements are summarized in table 33.5.

4. United Nations Office at Nairobi***Resource requirements (before recosting): \$3,162,300***

- 33.26 The total provision of \$3,162,300 would fund: (a) one-time projects (\$2,278,000); and (b) the continuation of multi-year projects (\$884,300).
- 33.27 The provision of \$2,278,000 would cover various infrastructure upgrades to the facilities and buildings in the Gigiri complex, including: (a) the acquisition of hardware and equipment components to upgrade the capabilities of the safety and security operation in Nairobi, including ballistic protection, vehicle screening systems, additional security elements for the new accessibility facilities and gates, additional protective shatter-resistant film for windows in buildings in the Gigiri complex and a new fire truck for the Fire Safety Unit in the Nairobi complex (\$1,828,000); and (b) the upgrade of external lighting (\$450,000).
- 33.28 The provision of \$884,300 would cover: (a) the ongoing comprehensive external accessibility project (\$400,000); (b) roof waterproofing (\$440,000); and (c) the annual renewal of the Check Point firewall software for information security and protection against cyberattacks. The resource requirements are summarized in table 33.6.

5. Economic and Social Commission for Asia and the Pacific

Resource requirements (before recosting): \$1,949,500

- 33.29 The total provision of \$1,949,500 would provide for: (a) one-time projects (\$1,065,000); and (b) the continuation of multi-year projects (\$884,500).
- 33.30 The provision of \$1,065,000 would cover: (a) new equipment and specialized systems to upgrade and standardize the capabilities for security and safety in ESCAP, including access control, video surveillance, the guard tour patrol system and ballistic protection, as well as the related hardware upgrades (\$930,000); and (b) the replacement of the chilled water supply and return header due to ageing (\$135,000).
- 33.31 The provision of \$884,500 would cover the ongoing asbestos abatement project, the completion of the new visitors' entrance project and the renewal of the audiovisual facilities at the ESCAP Conference Centre. The resource requirements are summarized in table 33.7.

6. Economic Commission for Latin America and the Caribbean

Resource requirements (before recosting): \$1,497,000

- 33.32 The total provision of \$1,497,000 would provide for: (a) one-time projects (\$589,700); and (b) new and continuing multi-year projects (\$907,300).
- 33.33 The provision of \$589,700 would cover: (a) the repair of the façade of the Latin American Centre for Economic and Social Documentation building (\$113,200); (b) the renovation of the heating, ventilation and air conditioning (HVAC) system in the south building (\$100,000); (c) the

replacement of the restrooms in the library of the main building and in the printing building (\$81,500); (d) the replacement of the female security officers' locker rooms (\$115,000); and (e) separate entryways for staff and visitors as part of the standardized access control project (\$180,000).

- 33.34 The provision of \$907,300 would cover: (a) ongoing projects to improve water management and water sustainability (\$442,700); (b) the ongoing improvement of accessibility for persons with disabilities (\$104,600); (c) the annual requirement for the Check Point firewall software for information security and protection against cyberattacks; (d) upgrades to physical security and safety, including perimeter protection, accessibility, access control and fire safety (\$130,000); and (e) improvements to access control facilities in the South Pavilion (\$65,000). The resource requirements are summarized in table 33.8.

Table 33.8

Foreword

The Department of Safety and Security exists to enable the United Nations and its partners to deliver programmes in areas affected by violence, unrest and insecurity. Protracted and emerging conflicts and crises mean that the environment in which the United Nations operates will remain deeply challenging in 2023. As the United Nations system responds to ever-growing needs, there are increasing expectations for security management support to anticipate and respond to that increasingly complex environment. The Department will adapt, change and innovate to deliver effective and agile security risk management support to United Nations personnel and operations.

In 2023, the focus of the Department will be on delivery, translating our plans into concrete action. Our success will be measured by the impact that United Nations entities have on beneficiaries on the ground, in spite of insecurity: this is the Department's *raison d'être*. In particular, we will be relentless in our efforts to acquire more speed and agility in our response to crises and in our support to the field, to better use data to underpin analysis and decision-making, to improve knowledge and information management, to further diversify our workforce, to upgrade our skill set and to provide enhanced training for security management professionals and United Nations staff.

In this proposed programme budget, the Department articulates its approach to implement those initiatives, in line with its mission statement: providing trusted security leadership and solutions.

(Signed) Gilles **Michaud**
Under-Secretary-General for Safety and Security

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 34.1 The Department of Safety and Security is responsible for providing leadership, operational support and oversight of the United Nations security management system. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolution [59/276](#), by which the Department was established. The Department enables the United Nations to carry out its operations and programmes globally and provides support to approximately 180,000 personnel and 400,000 of their dependants in more than 125 countries.
- 34.2 The coronavirus disease (COVID-19) pandemic, which began in 2020, continued to exacerbate the underlying causes of insecurity and social and economic inequality. Disparities in vaccine access and in recovery prospects, combined with recurring economic effects, have further exacerbated political and social grievances. Full-scale armed conflict has extended to new areas of the world, while prolonged armed conflicts continue to prevail. Political instability and uncertainty have extended to new territories, with an unparalleled frequency of coups, and disputed territories continue to generate displacement and migrations. Non-State armed groups and organized criminal groups are exploiting existing challenges in attempts to make territorial gains. All indications are that the global security environment will remain in a state of high volatility.
- 34.3 Across the globe, the United Nations is called upon to deliver mandates in complex and dangerous environments. The security environment in which the United Nations operates continues to change, in part because non-State armed groups are expanding their scope and capabilities and in part because a growing number of countries around the world continue to experience severe economic and social stress, with growing inequality fuelling instability and threats of civil unrest. These global security challenges require multifaceted peace, humanitarian, human rights and development responses. As the United Nations system responds to those growing challenges, there are increasing demands on security management support. These trends suggest that security needs will continue to remain high in 2023.

Strategy and external factors for 2023

- 34.4 The Department will continue to enable entities of the United Nations system to carry out their programmes while keeping their personnel safe in increasingly complex and challenging operating environments. In line with its overall strategy and with its commitment to remaining fit for purpose, the Department will maintain a constant focus on enhancing and upgrading the security risk management tools and the security advice available to decision makers; update security risk management strategies; heighten operational excellence through improved business processes, effective resource mobilization and a geographically equitable and well-trained workforce; and build an inclusive and enabling environment for mandate delivery through inter-agency partnerships and collaboration with host Governments.
- 34.5 The Department will dedicate increased attention to improving its information and knowledge management systems, processes and capabilities, so as to enable high-quality, relevant and timely production and dissemination of information that the United Nations entities and their partners can use to evaluate threats and make informed decisions for their programmes and personnel. The Department will continue to invest in staff and tools to better analyse data and render the information valuable and will continue to provide such analysis in the most effective and efficient manner. To further advance its agility and the relevance of its service to operations on the ground, and building on the review of the effectiveness of the security risk management process and the Safety and Security Incident Recording System, the Department will intensify its efforts to develop an effective

and adequate surge capacity. It will also further consider the feasibility of potential options for increased decentralization and the realignment of its services. Those efforts will be supported by continuous investments in proactive and tailored internal and external strategic communications, in order to sustain buy-in and effective collaboration from the Department's stakeholders. The Department will also continue to implement the recommendations from the completed evaluation of the Division of Specialized Operational Support and to implement the multi-year capital investment project of upgrading the United Nations security infrastructure.

- 34.6 The Department will continue to enhance its training programme in support of integrated security workforce performance and the cultivation of a diverse and professional workforce with effective and relevant competencies, skills and expertise. Effective governance and updated performance measures will play a vital role in monitoring, reporting and improving on both the Department's adherence to operational standards and its contribution to positive change in people's lives on the ground.
- 34.7 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 will incorporate lessons learned and best practices related to the adjustments to and the adaptation of the programme owing to the COVID-19 pandemic. That includes continued digitization efforts, where feasible, building on more adaptive approaches to inter-agency coordination and security training; the provision of counselling sessions to personnel with heightened psychological stress, as well as capacity-development initiatives and responsive advisory support; and ensuring that preventive, risk mitigation and policy measures are in place to support operations and are responsive to COVID-related challenges. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.
- 34.8 The Department will continue to strengthen cooperation with other entities at the global, regional, national and local levels. Continuous exchanges of information and sharing of knowledge on security policy guidance will result in enhanced personnel protection and enable the United Nations to deliver its programmes in both high-risk locations and at headquarters duty stations. The Department will continue to strengthen its collaboration with implementing partners of the United Nations, including non-governmental organizations, through the Saving Lives Together framework. Those partners are essential to United Nations operations and contribute to a shared understanding of security issues and effective security cooperation.
- 34.9 With regard to inter-agency coordination and liaison, the Department will continue to play a leadership role in the planning and implementation of system-wide policies and measures aimed at improving personnel security training and awareness. It will do so through the Inter-Agency Security Management Network, its steering group and its working groups, thus ensuring effective cooperation and collaboration among United Nations departments, organizations, funds, programmes and affiliated international organizations that are part of the United Nations security management system. The Department will actively support the Network's Working Group on Strategic Communications in launching a security awareness campaign on safety and security for all United Nations personnel. Moreover, to ensure system-wide policy coherence, the Department will maintain its engagement in the development of policy by Secretariat entities and provide guidance on strategic issues that have security implications. Furthermore, the Department will represent the Secretary-General in inter-agency coordination mechanisms, including the High-level Committee on Management of the United Nations System Chief Executives Board for Coordination and its networks.
- 34.10 With regard to the external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) Security needs in environments experiencing war, armed conflict, civil unrest, crime and natural hazards will grow, including an expansion in the number of high-threat areas requiring United Nations assistance;

- (b) Crises and security environments will evolve quickly, leading to large-scale and complex emergencies, necessitating agility, flexibility and rapid security responses to support the scale-up and reorientation of the United Nations presence and humanitarian programmes;
 - (c) The ability of the United Nations to gain safe access to areas and communities for programme delivery will continue to be challenged, and new COVID-19 variants will require adaptability in operational modalities;
 - (d) Personnel of the United Nations and its premises will continue to face direct and indirect threats;
 - (e) Threat actors will continue to develop innovative and advanced techniques that will require new and specialized responses from the United Nations security management system;
 - (f) Host Governments will continue to provide security support to the United Nations; in some cases, this support may need to be supplemented depending on the security context and capacities;
 - (g) Demand for enhanced levels of security training, advice, responses and solutions to support the security needs and obligations of United Nations Designated Security Officials and of members of the Security Management Team will continue.
- 34.11 The Department integrates a gender perspective in its operational activities, deliverables and results, as appropriate, in support of a gender-sensitive security management system that indirectly contributes to the achievement of Sustainable Development Goal 5. Gender-sensitive security operations, gender equality and the creation of an inclusive and enabling culture are essential components of the Department's success. The Department will continue to promote an inclusive and enabling culture by raising awareness about sexual harassment and advocating for a victim-centred approach in its response. By 2023, the Department will have evaluated and updated its gender strategy. Together with the Inter-Agency Security Management Network, the Department will work to strengthen the integration of a gender perspective in security policies.
- 34.12 In line with the United Nations Disability Inclusion Strategy, the Department will continue to build a supportive environment for persons with disabilities. It will incorporate disability inclusion into its risk management process and will continue to engage with organizations of persons with disabilities when developing plans and strategies related to disability inclusion, such as accessibility of premises. The Department will consider ways to reach its staff with disabilities in order to understand their level of satisfaction with the support provided. The Department will continue to operationalize the disability-related guidelines that have been developed and will implement any additional guidance provided for Secretariat entities on related matters, such as reasonable accommodations, accessibility and procurement.

Programme performance in 2021

Impact of the pandemic

- 34.13 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular with regard to field missions, many of which had to be cancelled. The Department had to adapt its working methods to support clients and continuity of operations, and utilized virtual approaches, where possible. For instance, trainers across the Department and the United Nations security management system received support in implementing the guidance on managing the risks associated with COVID-19 that affect security training, which enabled operations to safely resume training for security management system personnel. The Department also supported trainers in the transition to online and blended learning for knowledge-based elements of training and developed a blended learning programme for peer helpers, while also responding to the increased demand for psychosocial well-being and resilience learning through in-person and online learning, under subprogramme 3. The Department was able to safely deliver the revised course for close protection officers, while also improving the online pre-learning elements so that in-person elements

of the course might be delivered more quickly. In all operations, the Department also participated actively in United Nations COVID-19 task forces and maintained personnel databases, and communication systems were used in support of United Nations staff vaccination efforts and the dissemination of COVID-19 information to staff.

Legislative mandates

34.14 The list below provides all mandates entrusted to the programme.

General Assembly resolutions and decisions

54/192 , 55/175 , 76/127	Safety and security of humanitarian personnel and protection of United Nations personnel	Decision 57/567	Inter-organizational security measures: framework for accountability for the United Nations field security management system
56/255 , sect. VIII	Special subjects relating to the proposed programme budget for the biennium 2002–2003: safety and security of United Nations personnel	59/276 , sect. XI	Questions relating to the programme budget for the biennium 2004–2005: strengthened and unified security management system for the United Nations
56/286	Strengthening the security and safety of United Nations premises	61/263	Strengthened and unified security management system

Security Council resolutions

Safety and security: United Nations security management system policies, procedures and guidelines, including the Security Policy Manual and the Designated Official and Security Management Team Handbook; technical support briefings on security policies, procedures and guidelines of the United Nations security management system for more than 150 designated officials for security and security decision makers and for 4,000 security professionals and United Nations personnel in the field and at Headquarters; and security-related platforms, including the United Nations Security Managers Information Network and the programme criticality database.				

Evaluation activities

- 34.16 The evaluation of the Division of Specialized Operational Support completed in 2021 has guided the proposed programme plan for 2023.
- 34.17 The results and lessons of the evaluation referenced above have been taken into account for the proposed programme plan for 2023, with a focus on: (a) strengthening information and knowledge management, in order to enhance further data collection, analysis, advice and security decision-making and the effectiveness and efficiency of security support; (b) promoting agility and innovation in all areas of security operations, in particular in strengthening surge capacity, supporting security management in the field and further advancing the decentralization of security operations; and (c) supporting United Nations system-wide efforts on safety-related issues, which are under the purview of the Department, in order to ensure both adequate capacity and expertise and effective coordination within the Organization.
- 34.18 Two evaluations are planned for 2023, the subjects of which are to be determined.

Programme of work

Subprogramme 1 Security and safety services

Objective

- 34.19 The objective, to which this subprogramme contributes, is to ensure a safe and secure environment for all United Nations personnel, delegates, dignitaries and other visitors while conducting activities at United Nations Headquarters, offices away from Headquarters and regional commissions and while attending special events hosted by the United Nations at external locations.

Strategy

- 34.20 To contribute to the objective, the subprogramme will:
- (a) Continue to provide strategic coordination and management of the security and safety services at eight duty stations, as well as operational guidance and technical supervision with regard to security risk management, physical security, close protection, crisis management, fire safety, recruitment, training and oversight of security and safety projects at those locations;
 - (b) Focus on adapting to pandemic and post-pandemic conditions, including through registration, security screening and access control procedures that limit contact between security officers and clients and among clients, to ensure that social distancing and required sanitary measures are upheld.
- 34.21 The above-mentioned work is expected to result in:
- (a) Safe and secure access of delegates, staff and visitors to United Nations premises and special events, as required;
 - (b) The smooth delivery of United Nations mandates and programmes at United Nations premises and external special events.

Programme performance in 2021

Seamless and secure access to United Nations premises during the COVID-19 pandemic

- 34.22 Faced with the pandemic for yet another year, the security and safety services at United Nations Headquarters, offices away from Headquarters and regional commissions continued to maintain a physical presence in the offices and provide a safe and secure environment in which staff and delegates could perform their duties. The subprogramme has adjusted its practices and procedures to include hygiene and health measures and new access patterns to enable the work of the Organization and of Member States while ensuring the protection of security officers against COVID-19 and seamless access by staff and delegates.
- 34.23 Progress towards the objective is presented in the performance measure below (see table 34.2).

Table 34.2
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
Delegates, staff and visitors safely and securely access the eight United Nations premises	Critical staff and delegates safely and securely access the eight United Nations premises during the COVID-19 pandemic	United Nations staff and delegates were able to safely and securely access the eight United Nations premises during the COVID-19 pandemic; in-person events were resumed, as required

Planned results for 2023

Result 1: continuous improvement in security and safety services despite increasing risks

Programme performance in 2021 and target for 2023

- 34.24 The subprogramme's work contributed to increased compliance with the implementation of headquarters minimum operating security standards through the deployment of additional physical security measures and improved access control procedures; streamlined coordination with host countries and the United Nations security management system through the conduct of drills and joint trainings; and uninterrupted availability of support at all Security and Safety Service-supported locations, which met the planned target.
- 34.25 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 34.3).

Table 34.3
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Intense social activism and demonstrations pose additional threats to United Nations events and conferences, requiring an enhanced security posture	Level of compliance with headquarters minimum operating security standards maintained and ascertained through internal oversight mechanism	Increased compliance with headquarters minimum operating security standards Streamlined coordination with host countries and	Level of compliance with headquarters minimum operating security standards is increased by enhancing physical, technological, and procedural access	Increased compliance with headquarters minimum operating security standards through the upgrade of physical security and access control systems to mitigate

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
		the United Nations security management system Uninterrupted availability of support at all Security and Safety Service-supported locations	control elements of physical security to mitigate the risks of new and evolving threats with due regard for sanitary requirements	the risks of new and evolving threats

Result 2: improved security and safety support to persons with disabilities attending United Nations events

Programme performance in 2021 and target for 2023

- 34.26 The subprogramme, in consultation with organizations of persons with disabilities, conducted an assessment of baseline conditions and reviewed standard operating procedures, contributing to improved access control arrangements and reasonable accommodations for persons with disabilities for conferences and events at all duty stations, which met the planned target.
- 34.27 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 34.4).

Table 34.4
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Limited special procedures and access points for persons with disabilities in place	Limited special procedures and access points for persons with disabilities in place	Improved access control arrangements and reasonable accommodations for persons with disabilities for conferences at all duty stations	Improvement of access conditions for persons with disabilities, in coordination with other stakeholders and host countries	Access and accommodation of persons with disabilities are improved through the implementation of new access control design, technologies and procedures

Result 3: safety and security of United Nations staff, delegates and premises during critical incidents

Proposed programme plan for 2023

- 34.28 In 2021, social unrest and active shooter incidents affected United Nations staff and operations and posed challenges to the security response already affected by the COVID-19 pandemic. The subprogramme has been developing, delivering and evaluating security training, with a focus on ensuring that officers are trained to the highest degree to provide an adequate and effective response to critical incidents.

Lessons learned and planned change

- 34.29 The lesson for the subprogramme was that a sound first response to violent incidents is essential to ensure the containment of a critical event and its impact on the staff, delegates and premises. In applying the lesson, the subprogramme will redouble its efforts to train security staff, conduct a review of response capabilities with regard to new and evolving threats and enhance coordination with host countries to ensure an adequate and timely response to critical incidents.
- 34.30 Expected progress towards the objective is presented in the performance measure below (see table 34.5)

Table 34.5
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	United Nations first responders have access to improved and updated training, with practical exercises and a victim-centred approach	Review of response capabilities with regard to new and evolving threats conducted	Enhanced knowledge and skills of security staff and improved coordination with host countries in the response to critical incidents

Deliverables

- 34.31 Table 34.6 lists all deliverables of the subprogramme.

Table 34.6
Subprogramme 1: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory
<p>E. Enabling deliverables</p> <p>Safety and security</p> <p>Security of United Nations premises: security and access control for approximately 3 million people per year at United Nations Headquarters, offices away from Headquarters and regional economic and social commissions.</p> <p>Security of United Nations special events: security for approximately 200 United Nations special events and conferences held away from United Nations premises.</p> <p>Specialized security services: approximately 3,800 close protection operations for senior United Nations officials and visiting dignitaries; 2,000 security incidents investigations; and 2,800 fire safety checks.</p>

Subprogramme 2
Regional field operations

Objective

- 34.32 The objective, to which this subprogramme contributes, is to ensure the safety and security of personnel and the security of United Nations premises and assets in the United Nations field duty stations to enable the implementation of United Nations mandates, programmes, and activities worldwide.

Strategy

- 34.33 To contribute to the objective, the subprogramme will:
- (a) Strengthen its operational security support for United Nations field programme delivery and field programme personnel through effective and timely security coordination and advice;
 - (b) Provide consistent operational guidance for field operations in the preparation for and management of security crises;
 - (c) Deploy security professionals, in a rapid and timely fashion, to countries, missions and areas affected by crisis situations and security contingencies;
 - (d) Conduct security assessment missions to field locations for the purpose of reviewing and assessing local security management processes and procedures;
 - (e) Conduct regional workshops and global conferences for all the Department's senior field security professionals for the purpose of sharing operational best practices and lessons learned and ensuring consistent security management practices and procedures;
 - (f) Strengthen its capacity to capture and analyse data and deliver analytical products that are useful for security decision makers when evaluating courses of action.
- 34.34 The above-mentioned work is expected to result in:
- (a) Improved effectiveness and relevance of security risk management processes;
 - (b) Enhanced capacity to enable humanitarian programmes to be carried out in high-risk environments, in line with United Nations objectives to "stay and deliver";
 - (c) Enhanced security risk management capacity of security decision makers;
 - (d) Enhanced and streamlined security management measures in the field.

Programme performance in 2021

United Nations response and programme delivery enabled during a crisis

- 34.35 The subprogramme ensured the continued delivery of United Nations services and programmes despite the COVID-19 pandemic and the degradation of the security environment. Drawing on its crisis management expertise for major security events and casualty evacuations, together with its planning capabilities and established contacts with host nations, the subprogramme was well prepared to deliver advice and assistance. For example, the subprogramme enabled the delivery of vaccines and COVID-19 responses in Jordan and the Philippines. As a result of the subprogramme's contribution, there were no significant security events constraining the delivery of COVID-19 vaccinations to the largest possible number of beneficiaries. Concurrently, the subprogramme responded to ongoing crises in such countries as Afghanistan, Burkina Faso, Ethiopia, Libya, Mozambique, Myanmar, the Niger, the Sudan, Ukraine and Yemen, deploying personnel on surge to support continued United Nations programme delivery. As an example of continued delivery despite the COVID-19 pandemic, in Lebanon, the subprogramme continued to support operations in the region through approximately 30 missions per day, with 70 per cent of those missions in support of humanitarian programmes.
- 34.36 Progress towards the objective is presented in the performance measure below (see table 34.7).

Table 34.7
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
Continued United Nations programme delivery through timely support in crisis situations, with 106 surge deployments to 27 countries	Continued United Nations programme delivery through timely support during crisis situations, with 47 surge deployments to 18 countries	Safe and secure delivery of COVID-19 vaccinations to United Nations personnel worldwide and to Member States Continued United Nations programme delivery through timely support during crisis situations, with 55 surge deployments to 15 countries

Result 1: strengthening risk-based and solutions-oriented security services in the field

Programme performance in 2021 and target for 2023

- 34.37 The subprogramme’s work contributed to a review of the security risk management tool and the Safety and Security Incident Recording System, resulting in a confirmation of the continued validity of its methodology for strengthening risk-based and solution-oriented security advice, verified through security risk management processes conducted in Yemen, Israel and the Occupied Palestinian Territory, which met the planned target.
- 34.38 The subprogramme’s work also contributed to positive client feedback on the Department’s strategic objectives, which met the planned target. Clients were surveyed in 2021 on the Department’s strategic objectives, most of which reflect, mainly or in part, on the subprogramme’s and the Department’s objective to enable the delivery of the client’s programmes while ensuring the safety and security of staff. The resultant feedback was overwhelmingly positive.
- 34.39 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 34.8).

Table 34.8
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Security risk management manual revised to reflect how to incorporate acceptance in the security risk management process and tools	Review of security risk management process and Safety and Security Incident Recording System initiated	Confirmation of the continued validity of security risk management tool and Safety and Security Incident Recording System	Assessment of the impact of improved security risk management tool and Safety and Security Incident Recording System	Improved efficiency and ease of use of security risk management tool for security professionals and decision makers
A total of 83 per cent of clients responded that the Department of Safety and Security enables delivery of their organization’s programme while		Positive client feedback on the Department’s strategic objectives	Consistent application of the process and tools by users More agile planning possibilities	Increased knowledge-sharing among security professionals through the security risk management tool, the process and its use and

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
ensuring the safety and security of staff			through an operationally oriented tool	strengthened compliance through timely and appropriate updates to security risk management reviews

Result 2: a more responsive security risk management for the United Nations

Programme performance in 2021 and target for 2023

34.40 The subprogramme’s work contributed to enhanced security risk management, with 87 per cent approved security risk management reviews, which did not meet the planned target of 90 per cent, owing primarily to the significant efforts needed to put in place a more agile and improved security management process, together with an increased number of security areas, which entailed separate security risk management reviews. With the proliferation of non-State armed groups, security threats have expanded in localized areas, which require specific attention through ad hoc security risk management processes.

34.41 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 34.I).

Figure 34.I
Performance measure: approved security risk management reviews (annual)

(Percentage)

Result 3: enhanced security decision-making through timely and relevant data and analytical information

Proposed programme plan for 2023

34.42 Given the increasingly complex and unpredictable nature of contemporary operating environments, situational awareness is key to appropriate risk mitigation and timely and effective advice in support of programme delivery. The subprogramme has been working to further develop its situational awareness capacities to assess security threat information and analytical requirements and embed them into the security management cycle. In 2021, the subprogramme developed a new security threat information course to address the understanding and use of security threat information in the field and subsequent analytical requirements.

Lessons learned and planned change

- 34.43 The lesson for the subprogramme was the need to address the demand from across the United Nations security management system for further information and advice to enhance confidence in programme-related decision-making. In applying the lesson, the subprogramme will review the Department’s analytical processes and products with a view to improving linkages with the planned outcomes of the security management system. It will build its capability to understand security threat information and analytical requirements and embed that capability into its security management cycle. Staff will undergo security threat information training to better equip them to leverage information from partners that can be used in the planning cycle.
- 34.44 Expected progress towards the objective is presented in the performance measure below (see table 34.9).

Table 34.9
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	A total of 317 security personnel (120 from the Department of Safety and Security and 197 from the United Nations security management system) enhance their knowledge and skills in the use of security threat information	Improved analytical concepts, framework and structure support security decisions and programme planning	Decision makers have timely and relevant security data and analytical information

Deliverables

- 34.45 Table 34.10 lists all deliverables of the subprogramme.

Table 34.10
Subprogramme 2: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory

E. Enabling deliverables

Safety and security

Security assessments: security assessment visits, security services and approximately 50 surge deployments in response to emergencies.

Compliance, monitoring and evaluation: 610 security risk management reviews created, revised, processed and endorsed; approximately 360 records per month entered into Safety and Security Incident Recording System; and approximately 7,237 records in the premises database.

Training and capacity-building: workshops and training on crisis management/preparedness, analysis, security management, leadership and best practices for key security personnel of United Nations security management systems.

Subprogramme 3

Specialized operational support

Objective

- 34.46 The objective, to which this subprogramme contributes, is to ensure the safety and security of United Nations operations, premises and personnel and to improve the efficiency and effectiveness of the security operations and security management system of the United Nations.

Strategy

- 34.47 To contribute to the objective, the subprogramme will:
- (a) Develop and implement an information management strategy to provide the United Nations security management system with the operational backbone required for efficient, data-driven approaches and to build and manage business processes and technology, including such solutions as the electronic travel advisory, the learning management system, the critical incident stress data management system and the road safety management system;
 - (b) Provide leadership, coordination and oversight for safety and security training, including analysis, design, development, implementation, monitoring, evaluation and validation, on physical security, close protection, resilience-building, policies and procedures of the United Nations security management system, among other topics;
 - (c) Provide coordination of strategic close protection and management of personal protection worldwide;
 - (d) Provide leadership and coordination to United Nations security management system organizations for rapid psychosocial support response in the aftermath of critical incidents and collaborate with United Nations system and external partners to build the psychological resilience of United Nations security management system personnel;
 - (e) Develop physical security standards and technical specifications for and undertake physical security assessments of United Nations system premises worldwide, in order to identify vulnerabilities and recommend solutions.
- 34.48 The above-mentioned work is expected to result in:
- (a) Effective, efficient and data-driven approaches to security management, training, critical incident stress management, road safety and the prevention of and response to security incidents by United Nations security management system actors;
 - (b) The prevention and mitigation of risks for the movement of senior United Nations officials and other United Nations security management system personnel;
 - (c) The mitigation of the short- and long-term psychological impact of exposure to critical incidents on United Nations security management system personnel;
 - (d) The mitigation of vulnerability to threats that could have an impact on United Nations premises and personnel;
 - (e) The reduction of the risk of road crash fatalities for United Nations security management system personnel.

Programme performance in 2021

Improved access to psychosocial support and resilience training

34.49 In response to increased system-wide demand for psychosocial support owing to the COVID-19 pandemic and multiple complex emergencies, the subprogramme enhanced its service delivery to provide increased psychosocial support. In 2021, the subprogramme provided emotional first aid and stress counselling to 21,312 United Nations security management system personnel following reported critical incidents; it also strengthened staff preparedness by delivering stress management and resilience training to 28,041 personnel in 70 high-risk locations. The resilience of security managers was enhanced by providing training to 179 security managers on stress prevention and management. In addition, the subprogramme supported the capacity development of 110 United Nations Secretariat field counsellors through 2,100 technical supervision sessions.

34.50 Progress towards the objective is presented in the performance measure below (see figure 34.II).

Figure 34.II

Performance measure: number of United Nations security management system personnel receiving psychosocial support

Result 1: keeping staff safe and secure through enhanced governance of security training

Programme performance in 2021 and target for 2023

34.51 The subprogramme's work contributed to enhanced governance and prioritization of training resources, enabling the delivery of 81 per cent of the planned learning events in the 2021 calendar, while also implementing an unprecedented five new or revised training standards, which met the planned target.

34.52 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 34.11).

Table 34.11
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Delivery of specialized security training to meet the demands of all entities within the United Nations security management system	Improved prioritization of training updates for United Nations personnel and newly recruited security personnel through decentralized and online approaches	Enhanced governance and prioritization of training, enabling the delivery of 81 per cent of the planned learning events in the 2021 calendar, while also implementing an unprecedented five new or revised training standards	<p>100 per cent of training priorities approved by the security training and governance prioritization mechanism are adequately resourced and delivered within agreed timelines</p> <p>100 per cent of newly recruited staff in the integrated security workforce complete the orientation pathway and are engaged in the learning path for security personnel</p> <p>100 per cent of duty stations and Inter-Agency Security Management Network entities that deliver the Safe and Secure Approaches in Field Environments training programme have updated their programmes in line with the new core modules</p>	<p>100 per cent of training priorities approved by the governance prioritization mechanism are adequately resourced and delivered within agreed timelines</p> <p>100 per cent of duty stations and Inter-Agency Security Management Network entities that deliver first responder training have implemented the new training standards</p>

Result 2: improved physical security awareness through the United Nations security management system

Programme performance in 2021 and target for 2023

- 34.53 The subprogramme’s work contributed to physical security awareness by reaching 3,206 staff through 15 physical security webinars on specific security topics, which exceeded the planned target of 120 staff and four physical security training courses. The delivery of the physical security training programme was not possible owing to COVID-19, but will resume in 2022.
- 34.54 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 34.III).

Figure 34.III
Performance measure: number of physical security training courses and trainees completing the course (annual)

Result 3: improved management and strategic use of information and data to inform security services across the United Nations security management system

Proposed programme plan for 2023

34.55 The subprogramme will develop and implement an information management strategy, in order to improve the efficiency and effectiveness of security services, increase data-driven decision-making and improve data accessibility and sharing.

Lessons learned and planned change

34.56 The lesson for the subprogramme was that those providing security services faced challenges in providing time-critical or appropriate support owing to the fragmentation of data and information, thus inhibiting an understanding of the full picture. In applying the lesson, the subprogramme will develop and implement a digital transformation strategy for optimized investments in technology solutions, provide training to security personnel on data and digital literacy, increase the strategic use of data and enhance data governance in security.

34.57 Expected progress towards the objective is presented in the performance measure below (see table 34.12).

Table 34.12
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	–	Improved data accessibility and enhanced information-sharing across the United Nations security management system through technology solutions	Security professionals have access to relevant data and information for decision-making

Deliverables

34.58 Table 34.13 lists all deliverables of the subprogramme.

Table 34.13

Subprogramme 3: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory

E. Enabling deliverables

Safety and security

Critical incident stress management: emotional first aid and psychosocial support for United Nations security management system personnel; stress management training for personnel in high-risk duty stations; technical supervision sessions for United Nations field counsellors; expert advice and consultations on psychosocial well-being for managers in the field and at Headquarters; and briefings on the management of stress and critical incident stress for security managers.

Physical security: dedicated assessments of the physical security of United Nations premises globally; and topical guidance, physical security training and analysis of data provided by the physical security assessment app.

Training and capacity-building: security training throughout the United Nations security management system.

Protection coordination: travel tracking and coordination of the movement of senior United Nations officials; planning and coordination with respective Missions; and mandatory certification training for close protection officers.

B. Proposed post and non-post resource requirements for 2023

Overview

- 34.59 Given the dual responsibility of the Department of Safety and Security to provide for both the safety and security of staff, delegates and visitors at the main locations of the United Nations, as well as at their premises, and the safety and security of the United Nations system field operations, the activities of the Department are financed both from the regular budget and on a cost-sharing basis with other organizations covered by the security management system in the field.
- 34.60 The functions and activities of the Department that are jointly financed with other organizations of the security management system are those under:
- (a) Security and safety services (subprogramme 1);
 - (b) Regional field operations (subprogramme 2);
 - (c) Specialized operational support (subprogramme 3).
- 34.61 With regard to the jointly financed activities of the United Nations security management system, the financial responsibility of each participating organization is based on its proportional share of the personnel operating in the field. The principles of the cost-sharing arrangement were adopted by the General Assembly in its resolution [56/255](#). Following the recommendation of the Assembly, in its resolution [61/263](#), on achieving a workable cost-sharing arrangement, the High-level Committee on Management of the United Nations System Chief Executives Board for Coordination (CEB) agreed that field-related security costs would be apportioned on the basis of actual percentages of staff according to data provided by CEB. Subsequently, the Secretary-General outlined revised cost-sharing arrangements for the cost of the United Nations security management system (see [A/62/641](#)). In June 2017, the Finance and Budget Network established a working group for reviewing the funding methodology to ensure continued adherence to the established principles.
- 34.62 The outcome of the review by the working group was to revise the cost-sharing arrangement, while preserving the principles adopted by the General Assembly in its resolution [56/255](#), which was endorsed by the Network in March 2021, and subsequently at the High-level Committee on Management in October 2021 (see [CEB/2021/HLCM/FB/5](#)). This revision, effective from 2023, updates the membership fee, which had not been changed since its establishment; addresses the principle of equitability by having all organizations pay a membership fee and reinforces the notion of shared ownership for the system; and ensures that organizations in countries of the Organisation for Economic Co-operation and Development pay their fair share of the security costs.
- 34.63 Pursuant to this revised cost-sharing arrangement, the share of the Secretariat for security and safety services is 16.8 per cent for 2023, which is based on the CEB field staff census as of 31 December 2021, compared with 18.3 per cent for 2022, which was based on the census as of 31 December 2019.
- 34.64 In addition to the jointly financed field activities described above, separate local cost-sharing arrangements govern the provision of security and safety services at the United Nations Office at Vienna, as well as other duty stations. The cost-sharing arrangements in Vienna are based on a formula agreed upon by the four organizations located at the Vienna International Centre; similarly, the cost-sharing arrangements at the other duty stations are agreed upon locally by the participating organizations. The share of the Secretariat for security and safety services at the United Nations Office at Vienna remains unchanged at 23.0 per cent for 2023. Those security and safety services relate to subprogramme 1.
- 34.65 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 34.14 to 34.16. Similarly, the proposed gross budget for jointly financed activities is reflected in tables 34.17 to 34.19. The gross jointly financed budget of the Department is also presented to the General Assembly for its consideration and approval in accordance with established practice.

Note: The following abbreviations are used in tables and figures: ASG, Assistant Secretary-General; GS (OL), General Service (Other level); GS (PL), General Service (Principal level); LL, Local level; SS, Security Service; USG, Under-Secretary-General.

Resource requirements for regular budget activities

- 34.66 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 34.20 to 34.22 and figure 34.IV.
- 34.67 As reflected in tables 34.20 (1) and 34.21 (1), the overall resources proposed for 2023 amount to \$124,540,400 before recosting, reflecting a net decrease of \$1,113,400 (or 0.9 per cent) compared with the appropriation for 2022. Resource changes result from two factors, namely: (a) technical adjustments; and (b) other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes (regular budget)

Technical adjustments

34.68 As reflected in table 34.20 (1), resource changes reflect a net decrease of \$2,212,000, as follows:

- (a) **Subprogramme 1, Security and safety services.** This decrease reflects the removal of the non-recurrent provision in 2022, under grants and contributions, related to security personnel for the replacement of blocks A to J at the United Nations Office at Nairobi, pursuant to General Assembly resolution 76/246 (\$83,700), which would be partially offset by the United Nations share of the delayed impact from the establishment in 2022, under jointly funded activities, of a Security Coordination Officer (P-3) at the United Nations Office at Vienna (\$15,400);
- (b) **Subprogramme 2, Regional field operations.** The decrease of \$2,049,200 relates to the reduction of the Secretariat share of jointly financed activities from 18.3 per cent for 2022 to 16.8 per cent for 2023, based on the CEB field staff census as of 31 December 2021;
- (c) **Subprogramme 3, Specialized operational support.** The decrease of \$94,500 relates to the reduction of the Secretariat share of jointly financed activities from 18.3 per cent for 2022 to 16.8 per cent for 2023, based on the CEB field staff census as of 31 December 2021.

Other changes

34.69 As reflected in table 34.20 (1), resource changes reflect an increase of \$1,098,600, as follows:

- (a) **Executive direction and management.** The increase of \$111,100, under posts, reflects the proposed establishment of one Programme Management Officer (P-4) post, as explained in annex III;

- (b) **Subprogramme 1, Security and safety services.** The increase of \$649,300, relating to the proposed establishment of five general temporary assistance positions (1 P-5, 2 P-4, 1 P-3 and 1 General Service (Principal level)) at the United Nations Headquarters to lead the multi-year standardized access control project proposed under section 33, Construction, alteration, improvement and major maintenance;
- (c) **Subprogramme 3, Specialized operational support.** The increase of \$338,200, under posts, reflects the proposed establishment of three posts: one Director (D-2), one Programme Management Officer (P-4) and one Associate Information Management Officer (P-2). These posts are proposed following the completion in 2021 of the evaluation of the Division of Specialized Operational Support and the resulting focus of that Division for 2023, as explained in paragraphs 34.16 and 34.17. Additional details are provided in annex III.

Overall resource changes (jointly financed activities)

Technical adjustments

- 34.70 As reflected in table 34.25, resource changes reflect a net increase of \$66,800, relating to the delayed impact of the establishment in 2022, under subprogramme 1, of a post of Security Coordination Officer (P-3) at the United Nations Office at Vienna.

Other assessed and extrabudgetary resources

- 34.71 As reflected in tables 34.20 (2) and 34.21 (2), the Department is also supported by other assessed resources under the support account for peacekeeping operations, estimated at \$4,029,100, including 16 posts (1 P-5, 5 P-4, 5 P-3, 2 General Service (Other level) and 3 Security Service) and two general temporary assistance positions (1 P-3 and 1 General Service (Other level)), as well as non-post resources. The resources would enable the Department to provide backstopping security support to peacekeeping missions. The expected increase is attributable primarily to updated salary costs. Other assessed resources represent 2.8 per cent of the total resources for this section.
- 34.72 As reflected in tables 34.20 (3) and 34.21 (3), the Department receives extrabudgetary contributions, which complement regular budget resources and continue to be vital for the delivery of its mandates. In 2023, projected extrabudgetary resources of \$13,065,700, including 54 posts (9 Security Service, 39 General Service (Other level) and 6 Local level), as well as non-post resources, are expected to support the programme of work, mainly to provide security services to other agencies and organizations in various locations and special events within and surrounding the premises. Extrabudgetary resources represent 9.2 per cent of the total resources for this section.
- 34.73 The extrabudgetary resources under this section are subject to the oversight of the Department, which has delegated authority from the Secretary-General.

Executive direction and management

- 34.74 The Under-Secretary-General for Safety and Security is responsible for the overall direction, supervision and management of the Department in the implementation of its mandates and its approved programme of work. The Under-Secretary-General is the Chair of the United Nations security management system and is assisted in the internal functioning and day-to-day management of the Department by the Assistant Secretary-General.
- 34.75 In managing the Department, the Under-Secretary-General is supported by the Strategic Planning and Policy Service, which is responsible for developing, promulgating and advising on common policies and standards in all parts of the security management system, drafting and updating the United Nations Security Management System Security Policy Manual and the United Nations Security Management Operations Manual, drafting reports for legislative bodies and acting as the

secretariat for the Inter-Agency Security Management Network. The Service also analyses security management system policy requirements on the basis of lessons learned and best practices.

- 34.76 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Department is integrating environmental management practices into its operations. In 2023, the Department will continue to enhance the electronic security risk management tools to facilitate the paperless review and approval of security plans and documents electronically.
- 34.77 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 34.23.
- 34.78 The Department will continue to make efforts to implement advance travel planning and the early nomination of travellers. In the event of rapid security surge redeployment and close protection-related travel, the Department will work more closely with the travel unit and the agent to reserve tickets in advance on the basis of preliminary itinerary. The low compliance rate in 2021 was primarily attributable to rapid security surges and the impact of the COVID-19 pandemic, which made advance planning challenging.

Table 34.23
Compliance rate
(Percentage)

	<i>Actual 2019</i>	<i>Actual 2020</i>	<i>Actual 2021</i>	<i>Planned 2022</i>	<i>Planned 2023</i>

Air tickets purchased at least 2 weeks before the commencement of travel	48	36	31	100	100

- 34.79 The proposed regular budget resources for 2023 amount to \$3,068,400 and reflect an increase of \$111,100 compared with the appropriation for 2022. The proposed increase is explained in paragraph 34.69 (a). Additional details on the distribution of the proposed resources for 2023 are reflected in table 34.24 and figure 34.V.

Resource requirements for jointly financed activities

34.80 The resources proposed for jointly financed activities for 2023 amount to \$163,324,000 and reflect an increase of \$66,800 compared with the appropriation for 2022. These resources are required for: (a) the Security and Safety Service in Vienna (\$15,693,700); (b) regional field security operations (\$144,135,100); and (c) the malicious acts insurance policy (\$3,495,200). The proposed increase is explained in paragraph 34.70. Additional details on the distribution of the proposed resources for 2023 are reflected in table 34.25.

Regular budget resource requirements

34.81 The proposed regular budget resources for 2023 amount to \$91,827,600 and reflect a net increase of \$581,000 compared with the appropriation for 2022. The proposed increase is explained in paragraphs 34.68 (a) and 34.69 (b). Additional details on the distribution of the proposed resources for 2023 are reflected in table 34.26 and figure 34.VI.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

- 34.83 Extrabudgetary resources for the subprogramme are estimated at \$12,424,900 and would provide for 54 posts (9 Security Service, 39 General Service (Other level) and 6 Local level), as well as non-post resources. The resources are expected to support the programme of work, mainly to provide security services to other agencies and organizations in various locations and special events within and surrounding the premises.
- 34.84 The expected decrease of \$3,715,600 is attributable mainly to a one-time expenditure in 2022 for security installations at the United Nations Office at Geneva.

**Subprogramme 2
Regional field operations**

Regular budget resource requirements

- 34.85 The proposed regular budget resources for 2023 amount to \$23,246,000 and reflect a net decrease of \$2,049,200 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 34.68 (b). Additional details on the distribution of the proposed resources for 2023 are reflected in table 34.28.

Note: Non-post resources include a provision for the malicious acts insurance policy in the amount of \$3,495,200 for 2023. The Secretariat share of jointly financed activities and the malicious acts insurance policy amounts to \$23,246,000 for 2023.

Figure 34.VIII
Subprogramme 2: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed resources

34.87 Other assessed resources for the subprogramme are estimated at \$4,029,100 and would provide for 16 posts (1 P-5, 5 P-4, 5 P-3, 2 General Service (Other level) and 3 Security Service) and two general temporary assistance positions (1 P-3 and 1 General Service (Other level)), as well as non-post resources. The resources would enable the Department to provide backstopping security support to peacekeeping missions. The expected increase of \$331,800 is attributable mainly to updated salary costs.

**Subprogramme 3
 Specialized operational support**

Regular budget resource requirements

34.88 The proposed regular budget resources for 2023 amount to \$3,318,500 and reflect a net increase of \$243,700 compared with the appropriation for 2022. The proposed net increase is explained in paragraphs 34.68 (c) and 34.69 (c). Additional details on the distribution of the proposed resources for 2023 are reflected in table 34.30 and figure 34.IX.

Extrabudgetary resources

34.90 Extrabudgetary resources for the subprogramme are estimated at \$640,800 and would provide for non-post resources. The resources are expected to support the programme of work, mainly to enable the security and safety services in various locations to provide security services to other agencies and organizations and special events within and surrounding the premises.

Programme support

34.91 The Executive Office of the Department provides central administrative services to the Department in the areas of human resources, financial management and general administration.

34.92 The proposed regular budget resources for 2023 amount to \$3,079,900 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 34.32 and figure 34.XI.

Annex II

Summary of follow-up actions taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions (A/76/7 and A/76/7/Corr.1)

The Committee trusts that an update regarding gender and geographical representation and the related recruitment efforts will be provided (para. XII.9).

The Committee trusts that the Secretary-General will provide greater clarification regarding the expenditures and cost of the malicious acts insurance policy (para. XII.24).

The Committee notes the new approach regarding professional backgrounds as well as the recruitment and outreach strategy, and trusts that further information will be included in the context of the next budget submission (para. XII.26).

The Committee trusts that further information on the system-wide security framework and initiatives will be provided (para. XII.29).

The Department of Safety and Security launched a roster recruitment campaign for positions at the P-3 to P-5 levels in February 2022. Extensive outreach, with a focus on gender and geographical diversity, has been ongoing, including global webinars, the sharing of job openings with the permanent missions to the United Nations and advertisements in numerous media targeting unrepresented and underrepresented countries and circulated to various women's organizations. Statistics on gender and geographical representation in the Secretariat are contained in the report of the Secretary-General entitled "Composition of the Secretariat: staff demographics" (A/76/570).

The cost of the malicious acts insurance policy is allocated to policy participants on the basis of the census of personnel provided by each organization. The census used for a given year is based on the personnel count as of 30 September of the previous year. The census used for the 2021 malicious acts insurance policy cost allocation is based on total personnel count as of 30 September 2020 and was compiled at the beginning of 2021.

The Department has completed its revision of the requirements for security officer/adviser positions at the P-3 to P-5 levels. The revised job openings include a broader set of requirements with regard to experience, skills and academic background, in order to move away from predominantly seeking candidates with military and police experience. The changes have been reflected in the recruitment campaign launched in February 2022.

The Inter-Agency Security Management Network agreed that the Telecommunications Security Standards initiative will continue to guide and provide standard operating procedures on security communications for the United Nations system security personnel. A common United Nations security communications applications platform and new technologies optimizing the operations of radio communications systems in the field will be implemented in 2022. Training sessions and online webinars for United Nations system personnel will

Section 34 **Safety and security**

Brief description of the recommendation

Action taken to implement the recommendation

The Committee notes that certain similarities prevail between the roles of the Critical Incident Stress Management Unit and the Staff Counsellor's Office. The Committee therefore recommends that the General Assembly request the Secretary-General to review the functions of the Unit and the Office for a better harmonization of activities or consolidation in a single structure and present options for its consideration in the next programme budget submission (para. XII.34).

continue to be provided, as well as continued field assessments, technical support and extensive remote support to over 100 countries. The focus is on hands-on field support and the adoption of new technologies and procedures for security communications to further optimize operations in the field.

The Department continued to work closely with the Department of Operational Support to find synergies and efficiencies at the operational level, including through the implementation of the audit recommendation to formalize the involvement of the Critical Incident Stress Management Unit in the recruitment and technical supervision of counsellors for the field.

Annex III

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Regular budget				
Executive direction and management	1	P-4	Establishment of 1 Programme Management Officer in the Office of the Under-Secretary-General for Safety and Security	<p>With the increasing demand for security management support to address growing security challenges, it is critical to strengthen the Office of the Under-Secretary-General with relevant expertise, which is currently lacking, in the provision of assessments and analysis on operational, political and security trends.</p> <p>The incumbent would provide the Under-Secretary-General with information and analysis on broader political developments facing the United Nations beyond the security realm, and associated advice on the political and organizational dimensions of security policy and action for the United Nations in implementing its mandates.</p>
Subprogramme 3 Specialized operational support	1	D-2	Establishment of 1 post of Director in the Division of Specialized Operational Support	<p>The Division of Specialized Operational Support was established in January 2020 and the position of Director (D-2) has been funded as general temporary assistance, under jointly funded activities, as indicated in <i>A/76/6 (Sect. 34)</i>. The establishment of the Division has yielded efficiencies in how the support provided to Headquarters, offices away from Headquarters, field missions and organizations of the United Nations security management system is coordinated, designed and delivered. It is now proposed to establish a post, because the responsibilities and activities are core services.</p> <p>The incumbent would provide leadership and oversight by centrally promoting relevant aspects of the strategic plan of the Department of Safety and Security, taking the lead in the development of revitalized training programmes to ensure that the Department workforce has the skills and competencies to meet what the United Nations needs from the Department going forward.</p> <p>The incumbent would also lead ongoing collaboration with the organizations of the United Nations security management system to strengthen road safety management and direct the development and implementation of the information management strategy.</p>
	1	P-4	Establishment of 1 Programme Officer for Road Safety	<p>The incumbent would lead the implementation of the United Nations road safety strategy, organize related surveys and data collection, and provide analysis and guidance to the integrated security workforce.</p>
	1	P-2	Establishment of 1 Associate Information Management Officer	<p>The incumbent would assist in developing information management solutions that are aligned with the overall strategic objectives; demonstrate business/operational value and techniques that are consistent with business/operational success metrics; and ensure information management interoperability with host countries, the United Nations Secretariat, agencies, funds and programmes.</p>

B. Proposed resource requirements for 2023**	9
Annexes	
I. Projects proposed for funding from the Development Account (for the period 2023–2026)	12
II. Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies	34
III. Mandates of the Development Account	36

* [A/77/50](#).

** In keeping with paragraph 11 of resolution [72/266 A](#), the part consisting of the post and non-post resource requirements is submitted through the Advisory Committee on Administrative and Budgetary Questions for the consideration of the General Assembly.

Foreword

The 22 Development Account projects proposed in the present budget fascicle are guided by the overall theme of the fifteenth tranche of the Account, on the theme “Supporting Member States to address the risk of widening inequality in the post-pandemic recovery through inclusive and resilient policy support that leaves no one behind”.

Partnerships between the Account’s 10 implementing entities and with other partners within and outside the United Nations system are critical to the implementation of the proposed projects. All projects will work together with resident coordinator offices and United Nations country teams and build on clear requests for assistance from project beneficiary countries and demands channelled through intergovernmental processes.

The Account and its implementing entities have continued to deliver assistance throughout the coronavirus disease (COVID-19) pandemic, both by adapting ongoing projects and by launching five short-term, joint projects to support Member States in addressing the economic and social consequences of the pandemic. The Account and its implementing entities are also applying lessons learned and tools developed during the pandemic, such as e-learning modalities and virtual and hybrid means of delivery, integrating them into the proposed projects to maximize efficiencies where possible.

Both project- and programme-level evaluations continue to be an important part of the Account’s approach. They are essential for ensuring that lessons learned from past projects are captured and incorporated in future projects.

The present fascicle of the proposed programme budget for 2023 reflects the mandates entrusted to the Secretariat and recommendations received from intergovernmental processes.

(Signed) **Liu Zhenmin**
Under-Secretary-General for Economic and Social Affairs

A. Overall orientation

Mandates and background

- 35.1 The Development Account was established in 1997 by the General Assembly in its resolution 52/12 B as a mechanism to fund capacity development projects of the economic and social entities of the United Nations, namely, the Department of Economic and Social Affairs of the Secretariat, the Economic Commission for Africa (ECA), the Economic Commission for Europe (ECE), the Economic and Social Commission for Asia and the Pacific (ESCAP), the Economic and Social Commission for Western Asia (ESCWA), the Economic Commission for Latin America and the Caribbean (ECLAC), the United Nations Conference on Trade and Development (UNCTAD), the United Nations Environment Programme (UNEP), the United Nations Human Settlements Programme (UN-Habitat) and the United Nations Office on Drugs and Crime (UNODC). All projects funded through the Account build on the mandates and the comparative advantages of the 10 implementing entities.
- 35.2 The Development Account supports developing countries in their implementation of the 2030 Agenda for Sustainable Development in response to expressed needs and demands from Member States, as well as recommendations and decisions made in the intergovernmental processes and relevant governing bodies of the implementing entities.

Strategy

- 35.3 The Development Account provides its 10 mostly non-resident implementing entities with the ability to operationalize their vast knowledge and expertise to deliver capacity development support to selected beneficiary countries and stakeholders. Projects supported through the Account provide a bridge between the normative and analytical expertise of Headquarters and the development of sustainable capacities in the field. With the support of the Account, the implementing entities can follow up on intergovernmental processes and their analytical work with concrete projects at the country, subregional, regional and global levels. Most of the proposed fifteenth tranche projects support countries with special needs, i.e. least developed countries, landlocked developing countries and small island developing States. Figure 35.I shows the number of projects supporting countries with special needs. These numbers are likely to increase as implementing entities finalize the beneficiary countries of their projects. Some projects have already indicated their focus as being solely on this group of countries, such as project B, focusing on small island developing States, and projects E and I, focusing on least developed countries.

Figure 35.I
Projects supporting countries with special needs^a

^a Projects can have beneficiary countries from multiple groups, and some countries with special needs can belong to two groups.

35.4 Figure 35.II illustrates how the proposed fifteenth tranche projects are spread across different regions. While projects are proposed for all regions of the world, Africa, as has been the case in the past, continues to have the highest number of proposed projects.

Figure 35.II
Number of projects by geographical area^a

^a One project can contribute to more than one region.

35.5 A number of focus areas are prominent among the proposed fifteenth tranche projects, such as the focus on protection of the environment and recovery from the coronavirus disease (COVID-19) pandemic (projects C, H, I, K and N), on strengthening systems to be better prepared to respond to crises such as COVID-19 (projects F and P) and on equitable and inclusive access to health care (projects Q and R). Additionally, the proposed projects focus both on recovery from the COVID-19 pandemic (projects B, G and L) and on enhancing frameworks, policies and practices for greater resilience and equity after the pandemic (projects A, J, O and S).

35.6 The Development Account serves as an operational facility for piloting development approaches that test new ideas, with an emphasis on integration of national expertise in the projects to ensure national ownership and sustainability of project outcomes. The Account further provides a mechanism for promoting the exchange and transfer of skills, knowledge and good practices among beneficiary countries, including through South-South cooperation. Projects incorporate innovative approaches to achieving the Sustainable Development Goals and leaving no one behind in the aftermath of the COVID-19 pandemic, including projects on the innovative management of relief consignments and trade facilitation during disasters (project F), innovative biodiversity monitoring and impact assessment in the Amazon rainforest (project K), circular forest product value chains (project N) and the use of forecasting and analysis of megatrends to support decision-making for the Goals (project V). Projects contribute to all of the Goals, as outlined in figure 35.III, with a notable number of projects contributing to Goal 17, on partnerships for the Goals, as well as Goal 3, on good health and well-being, Goal 13, on climate action, and Goal 15, on life on land.

Figure 35.III
Contribution of fifteenth tranche projects to the Sustainable Development Goals

- 35.7 Development Account projects integrate gender perspectives to support Member States in the achievement of Goal 5, on gender equality. Disability aspects are also integrated into the design of projects when relevant and appropriate. The Development Account guidelines for the development of project documents specify that a gender-sensitive and people-centred approach should be used. Such an approach includes considering how issues to be addressed by projects affect women, men, girls and boys and whether there are groups of people, such as youth, persons with disabilities, older persons, refugees and migrants, who may be more vulnerable, disproportionately affected or considered to have been left behind. Implementing entities are asked to elaborate on how and why these groups are affected differently and to integrate this explanation into the project's results framework, where possible. For example, the proposed ECE project on equitable access to water and sanitation services for all (project O) acknowledges that integrating a gender perspective is indispensable to ensure that water and sanitation services are adequate and acceptable for all users and do not contribute to the perpetration of discriminatory practices, particularly in educational institutions. Likewise, the proposed ECLAC project on resilient health systems with universal health coverage (project Q) highlights the critical synergy between addressing inequality and discrimination endured by specific population groups (persons with disabilities, women, children, older persons, indigenous groups and migrants) and ensuring their access to health care, taking into consideration their specific needs.
- 35.8 Partnerships are an essential part of the implementation of Development Account projects. All proposed projects will be implemented together with partners from the United Nations Secretariat and the wider United Nations system, including resident coordinator offices and United Nations country teams, as well as governments and national, regional and international organizations, to ensure that projects are needs-based and provide global and regional capacities and resources to countries in a coordinated manner.
- 35.9 The Development Account fully supports coordination and complementarity with the resident coordinator offices, and all proposed projects will work closely with them. Many of the implementing entities also have internal coordination mechanisms in place with the resident coordinator offices. The United Nations Sustainable Development Group – chaired by the Deputy Secretary-General, co-led by the United Nations Development Programme (UNDP) and the Department of Economic and Social Affairs and with the participation of all senior officials of the Secretariat, resident coordinator offices and United Nations funds and programmes – provides system-wide strategic guidance, including capacity development activities covering resident coordinator offices, the Secretariat and other United Nations entities, to ensure coherence. Moreover,

the Capacity Development Programme Management Office of the Department of Economic and Social Affairs, in which the programme management team of the Development Account is situated, is routinely in contact with resident coordinator offices to coordinate efforts, including through the United Nations Sustainable Development Cooperation Frameworks, which incorporate complementary capacity development activities undertaken through the Development Account and the regular programme of technical cooperation into the work of United Nations country teams at the country level. This collaboration is important for country-level coordination arrangements and the implementation of Development Account projects, and also ensures that projects cater to local needs and build on the capacities of the United Nations system on the ground in project beneficiary countries. These collaborative arrangements also support the sustainability of project interventions after project closure.

35.10 As illustrated in figure 35.IV, all fifteenth tranche projects will be implemented in partnership with resident coordinator offices and United Nations country teams, and approximately 90 per cent of projects will be implemented in collaboration with other entities within the United Nations system. The number of partnerships is likely to further increase as projects are finalized following the General Assembly’s consideration and approval of the present budget fascicle and the projects proposed therein.

Figure 35.IV
Partnerships in Development Account projects^a

(Number of projects including these categories of partnerships)

^a One project can partner with multiple partners.

35.11 In addition to the partnership arrangements described above, five of the fifteenth tranche projects will be led jointly by multiple Development Account entities. These projects are: (a) Inclusive and sustainable economic growth in a society for all ages in the post-COVID-19 era in Asia and Latin America and the Caribbean (project A), which will be implemented jointly by the Department of Economic and Social Affairs, ECLAC and ESCAP; (b) Supporting structural economic progress towards and beyond graduation from least developed country status by the pre-qualified African and Asian countries (project E), which will be implemented jointly by UNCTAD and ECA; (c) Building back safe, sustainable and resilient transport and urban mobility systems in Western Balkan and Central Asian landlocked developing regions (project J), which will be implemented jointly by UN-Habitat, UNEP and ECE; (d) Expanded and resilient urban fiscal space for an inclusive and resilient COVID-19 recovery in Africa (project L), which will be implemented jointly by ECA and UN-Habitat; and (e) Measuring and curbing illicit financial flows (project M), which will be implemented jointly by ECA, ECLAC, ESCAP and ESCWA.

Impact of the pandemic

- 35.12 The COVID-19 pandemic had an impact on the planned delivery of Development Account projects in 2021 by reducing opportunities for traditional, in-person delivery modalities, such as training sessions, physical workshops, seminars, field visits, advisory missions, policy dialogues and consultations, necessitating adaptation from face-to-face to virtual or hybrid delivery of capacity development activities.
- 35.13 Where feasible, the projects proposed for 2023 will continue to incorporate novel implementation approaches that were put in place in response to the changed operational conditions associated with the COVID-19 pandemic, specifically, through the continuation of e-learning modalities, combining them with in-person workshops. Lessons learned from virtual and hybrid means of delivery during the COVID-19 response are being taken forward into new projects, maximizing efficiencies through the rationalization of resources for travel and the use of online tools and local expertise where possible. At the same time, it is assumed that those operational conditions have improved and allow for implementation of the projects proposed for 2023 through formerly established approaches as well. Any modifications to planned deliverables necessitated by conditions on the ground would, however, be in pursuance of the project's objectives and strategies and the mandates of the implementing entities and would be reported as part of the Development Account progress report information.

Evaluation activities

- 35.14 Evaluation continues to be a crucial part of the programming of the Development Account. The temporary position of Evaluation Officer (P-4) under this section has been essential to plan the programme-level evaluation of the Account's response to COVID-19, provide guidance and support to project evaluations and distil lessons learned.
- 35.15 Since the eleventh tranche, projects have been selected for evaluation on the basis of the strategic importance and relevance to the entities' mandates, pressing knowledge gaps and/or approaches with the potential for replication or scaling up. A total of 32 of the 56 eleventh tranche projects were selected, including at least half of the projects for each implementing entity, in line with the Development Account evaluation framework. In addition, a supplementary guidance note was circulated to implementing entities in September 2021 to promote the application of the project evaluation guidelines, along with the new administrative instruction on evaluation in the United Nations Secretariat ([ST/AI/2021/3](#)), issued in August 2021.
- 35.16 The Development Account evaluation focal points network, consisting of the evaluation units of the 10 implementing entities, held four virtual meetings in 2021 to exchange lessons learned and good practices. A standard template for project evaluation reports was developed in consultation with the network in order to enhance the quality of the project evaluation reports in line with the requirements outlined in the project evaluation guidelines and the guidelines on the administrative instruction. The template is being piloted with eleventh tranche project evaluations with a view to making necessary refinements to reflect the experiences in using it.
- 35.17 The evaluation of the tenth tranche Programme on Statistics and Data, implemented jointly by all 10 Development Account implementing entities, is currently under way, based on the terms of reference endorsed by the Development Account Steering Committee in May 2021. The three assessments that make up the evaluation are nearing completion, and a final report synthesizing their findings and presenting programme-level recommendations is expected to be finalized in the middle of 2022. The planning of the evaluations of the five short-term joint COVID-19 projects is also currently ongoing. These project evaluations will feed into the programme-level evaluation of the response of the Development Account to COVID-19, scheduled for 2023, and will be guided by the overall evaluation criteria and questions developed in consultation with the implementing entities.
- 35.18 For 2022 and 2023, the Development Account will focus on the evaluations of the five joint COVID-19 projects that will be completed by mid-2022. Approximately 4 per cent of the resources are used for project- and programme-level evaluations.

B. Proposed resource requirements for 2023

35.19 As reflected in table 35.1, the overall resources proposed for 2023 amount to \$15,199,400 before recosting, reflecting a decrease of \$1,000,000 (or 6.2 per cent) compared with the appropriation for 2022. Resource changes result from technical adjustments. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Table 35.1
Evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Regular budget

Object of expenditure	2021 expenditure	2022 appropriation	Changes				2023 estimate (before recosting)	
			Technical adjustments	New/ expanded mandates	Other	Total		Percentage
Grants and contributions	15 199.4	16 199.4	(1 000.0)	–	–	(1 000.0)	(6.2)	15 199.4

Explanation of variances by factor

Technical adjustments

35.20 As reflected in table 35.1, resource changes reflect a decrease of \$1,000,000 owing to the removal of the non-recurrent increase for 2022 of \$1,000,000 decided by the General Assembly in its resolution [76/245](#).

Multi-year account

35.21 The General Assembly, in its resolution [54/15](#), decided to establish a multi-year account for the Development Account. The resources proposed for the Account for 2023 are for implementation of the projects over a four-year period (2023–2026). Within the multi-year account, the breakdown of resource requirements by object of expenditure for the fifteenth tranche of projects is presented in table 35.2.

Table 35.2
Summary of resource requirements by object of expenditure (before recosting)

(Thousands of United States dollars)

Object of expenditure	Amount
Other staff costs	784.7
Consultants	6 911.0
Travel of staff	1 677.4
Contractual services	1 846.5
General operating expenses	866.1
Grants and contributions	3 113.7
Total	15 199.4

- 35.22 Development Account projects are designed to provide efficient and effective use of resources. The resource requirements are based on concept notes, which provide project descriptions and initial plans for project implementation. After the General Assembly’s review of the proposed budget by the end of 2022, the implementing entities will launch projects based on project documents that include detailed analyses, outputs, timelines and budgets, and will complete the identification of beneficiary countries.
- 35.23 Other staff costs (general temporary assistance) represent approximately 5 per cent of the total budget and are used for short-term needs to carry out the activities of the projects, such as organizing workshops and data collection. Resources for a temporary position of Evaluation Officer (P-4) in the Department of Economic and Social Affairs continue to be included for evaluation support at the programme level.
- 35.24 Given that the implementing entities are mostly non-resident in the project beneficiary countries and all projects have country-level activities, travel of staff is required for projects, representing an average of 11 per cent of the total resources. As noted in paragraphs 35.12 and 35.13, alternative methods of project delivery have been developed, and virtual and blended learning methodologies have been included in the delivery of projects. However, while incorporating such elements is useful for maximizing efficiencies and helpful for broadening outreach, these tools cannot replace all face-to-face delivery modalities in their effectiveness. The projects typically utilize national consultants to support project implementation at the national level, as well as for collating and exchanging national and regional best practices. International consultants are often required for projects involved in new subject areas, which require expertise that may not be available within the country or the implementing entity. As shown in table 35.3, the proposed resources for the fifteenth tranche include 111 international consultants for a total of 497 work-months, at an estimated cost of \$3.8 million, and 131 national consultants for a total of 678 work-months, at an estimated cost of \$3.1 million.

Table 35.3
Summary of consultancy requirements

<i>Type of consultant</i>	<i>Number of consultants</i>	<i>Number of work-months</i>	<i>Cost (thousands of United States dollars)</i>
International	111	497	3 825.0
National	131	678	3 086.0
Total	242	1 175	6 911.0

- 35.25 Contractual services are used to engage national and local institutions or organizations to assist with the implementation of national components of the projects, including studies, local pilots, consultations and workshops. They also often include elements of capacity development for the institutions and organizations themselves. Venue rentals, conference service costs and communications costs associated with workshops, training events, seminars or expert group meetings typically fall under the general operating expenses category.
- 35.26 The costs of workshop participants (travel and allowances) represent, on average, 22 per cent of the project budgets. Projects typically use national workshops for training, coordination and consensus-building. Most projects also include a smaller number of regional workshops, which are typically used for South-South cooperation and sharing of lessons learned between the project beneficiary countries. Regional and interregional workshops are often used to share the findings with larger audiences and are often organized in connection with other intergovernmental meetings or events to reduce costs.
- 35.27 Project deliverables fall under four general categories, as detailed in table 35.4. These deliverables are expected to have a strong focus on the national level, to help to ensure national ownership and prioritization of national processes and institutions. They are also expected to focus on different capacity development aspects (e.g. skills, institutions and an enabling environment) for increased and sustainable impact.

Table 35.4
Summary of deliverables (2023–2026 plan)

<i>Quantified deliverables: B. Generation and transfer of knowledge</i>		<i>Non-quantified deliverables: C. Substantive deliverables</i>	
<i>Seminars, workshops and training events (number of days for all projects)</i>	<i>Technical materials (number of materials for all projects)</i>	<i>Consultation, advice and advocacy (number of projects including these deliverables)</i>	<i>Databases and substantive digital materials (number of projects including these deliverables)</i>
718	221	21	17

Annex I

Projects proposed for funding from the Development Account (for the period 2023–2026)

A. Inclusive and sustainable economic growth in a society for all ages in the post-COVID-19 era in Asia and Latin America and the Caribbean

Implemented by the Department of Economic and Social Affairs jointly with ECLAC and ESCAP and in collaboration with resident coordinator offices (\$880,000)	Relationship to the Sustainable Development Goals: targets 1.3, 3.8, 4.1, 5.1, 10.1, 10.2, 17.18 and 17.19
--	--

Objective

To enhance the capacity of Governments in the Asia-Pacific and Latin America and Caribbean regions to develop evidence-based, intergenerational policies for inclusive and sustainable economic growth in the context of population ageing.

Project plan

In his report entitled “Our Common Agenda” (A/75/982), the Secretary-General highlighted the importance of strengthening capacities to understand and assess the future, building long-term, intergenerational thinking into important policies and decision-making. One of the defining characteristics of the future is the rising proportion of older persons in the population. There are long-standing calls for integrating population into development planning expressed by the General Assembly and other intergovernmental bodies.

This project directly responds to those calls by transforming national accounts into a policy instrument that addresses the twin goals of inclusion and sustainability in the context of population ageing. National inclusion accounts disaggregate national economic statistics by age and socioeconomic status and help to identify and observe how economic resources are shared between population groups. This type of accounting is needed for long-term forecasts of the costs of and funding sources for social protection, education and health-care programmes to ensure their fiscal sustainability and evaluate their success in achieving inclusive sustainable development.

This project will support eight developing countries in Latin America and the Caribbean and Asia and the Pacific to strengthen capacity to produce national inclusion accounts, analyse the impacts of population ageing on inclusive and sustainable development and formulate public policies and plans to take account of future demographic change while promoting inclusive and sustainable economic growth.

Expected progress towards the attainment of the objective and performance measures

This work is expected to contribute to strengthening the capacities of the beneficiary countries to design and adopt policies that foster sustainable and inclusive development while adapting to their new demographic realities, which would be demonstrated by the estimation of national accounts disaggregated by age and socioeconomic status and the use of these disaggregated data in long-term evaluations of investments in social protection, education and/or health care. At the end of the project, it is expected that the target countries will be better prepared to adapt to population ageing with social protection, education and health-care systems that are fiscally sustainable and inclusive.

Budget summary (thousands of United States dollars)

Other staff costs	18.0
Consultants	433.0
Travel of staff	102.0
Contractual services	132.0
General operating expenses	35.5
Grants and contributions	159.5
Total	880.0

B. Integrated and coherent national recovery strategies promoting social inclusion, macroeconomic stability, effective governance and protection of the environment for selected small island developing States

Implemented by the Department of Economic and Social Affairs in collaboration with ECA, UNDP and resident coordinator offices (\$700,000)	Relationship to the Sustainable Development Goals: targets 2.4, 3.8, 6.4, 7.2, 8.2, 9.1, 13.1, 13.2, 14.2, 14.7, 15.2, 16.6 and 17.14
---	---

Objective

To strengthen the capacity of selected small island developing States to develop integrated and coherent national strategies to recover and rebuild better from the COVID-19 pandemic.

Project plan

The disruptions to the world economy caused by the COVID-19 pandemic have hit small island developing States particularly hard owing to their small size, remoteness, high dependence on trading partners and reliance on a few key sectors. Gross domestic product dropped by 9 per cent in small island developing States in 2020, compared to a 3.3 per cent decline in other developing countries, according to estimates by the International Monetary Fund. Fiscal measures put in place to keep economies afloat during the pandemic and to alleviate its economic consequences have resulted in rising debt burdens, making the need for appropriate recovery strategies even more pressing. Long-standing problems are also heightened by climate change, which has meant escalating costs from the impacts of natural disasters and a greater emphasis on disaster risk management.

There is an urgent need to support these countries, which are already vulnerable and at risk of further impacts from external economic shocks, natural disasters and climate change, in their recovery strategies while aligning the immediate crisis response with long-term planning towards resilient, inclusive and sustainable development. This project aims to strengthen the capacity of four selected small island developing States in Africa and the Caribbean to respond to this crisis and to recover and build back better from the COVID-19 pandemic. It will focus on the formulation and implementation of integrated and coherent national recovery strategies that promote social inclusion, macroeconomic stability and protection of the environment and that mobilize stakeholders' engagement in participatory planning processes.

Expected progress towards the attainment of the objective and performance measures

This work is expected to contribute to the beneficiary small island developing States in their recovery from the COVID-19 pandemic, which would be demonstrated by project beneficiary countries incorporating tools, methods and approaches for integrated and coherent policy formulation into national pandemic recovery strategies and development planning processes. Those countries will be supported by knowledge products and capacity development activities offered in this project.

Budget summary (thousands of United States dollars)

Consultants	292.0
Travel of staff	168.0
Contractual services	115.0
General operating expenses	5.0
Grants and contributions	120.0
Total	700.0

C. Turning the tide on deforestation: building partnerships to combat intensifying impacts of climate change, forest fires and zoonotic diseases

Implemented by the Department of Economic and Social Affairs in collaboration with the Food and Agriculture Organization of the United Nations (FAO), UNEP, UNDP, the secretariat of the United Nations Framework Convention on Climate Change and resident coordinator offices (\$600,000)	Relationship to the Sustainable Development Goals: targets 6.6, 13.2, 15.1, 15.2, 15.3 and 15.b
---	---

Objective

To strengthen the sustainable forest management capacity of selected developing countries to halt deforestation and tackle its drivers and intensifying factors to make progress towards the forest-related Sustainable Development Goals.

Project plan

Forests cover close to a third of the earth's land area and provide multiple benefits to humankind. For millions of people living in poverty, forests and trees provide food and fuel for cooking and heating. Forests contribute substantially to climate change mitigation and adaptation and to the conservation of biodiversity. Ending and reversing tropical deforestation alone could avoid up to 30 per cent of total gross greenhouse gas emissions.

Halting deforestation is an essential lever to achieve the Sustainable Development Goals and the global forest goals by 2030, and for confronting the planetary crises of climate change, loss of biodiversity and ecosystem services, inequality and zoonotic pandemics, and emerging issues of concern such as forest fires. This project will therefore support six countries in three regions to build capacity and partnerships for tackling deforestation and its drivers, and for increasing forest cover.

Expected progress towards the attainment of the objective and performance measures

This work is expected to contribute to building the capacity of national experts and participating countries to develop and implement integrated forest landscape management and restoration plans that are focused on addressing deforestation and its drivers and intensifying factors and to enhance the livelihoods of people, especially women, girls and youth, by promoting collaborative and peer-to-peer learning and the sharing of experiences and best practices between countries, which would be demonstrated by the development of national action plans to combat deforestation.

<i>Budget summary (thousands of United States dollars)</i>	
Consultants	150.0
Travel of staff	50.0
Contractual services	171.0
General operating expenses	18.0
Grants and contributions	211.0
Total	600.0

D. Quantifying South-South cooperation to mobilize funds for the Sustainable Development Goals

Implemented by UNCTAD in collaboration with the Department of Economic and Social Affairs, ECA, ECLAC, ESCAP, ESCWA and resident coordinator offices (\$800,000)	Relationship to the Sustainable Development Goals: targets 9.1, 17.3, 17.4, 17.6, 17.9, 17.16 and 17.19
--	---

Objective

To strengthen the capacity of developing countries in Africa, Asia and Latin America to measure and report South-South cooperation to manage and mobilize resources for the 2030 Agenda and enable a more inclusive, resilient and green recovery from the pandemic.

Project plan

In paragraph 25 of the Buenos Aires outcome document of the second High-level United Nations Conference on South-South Cooperation, endorsed by the General Assembly in its resolution [73/291](#), all actors were encouraged to support initiatives for information and data collection, coordination, dissemination and evaluation of South-South cooperation, upon the request of developing countries. In April 2020, the Inter-Agency and Expert Group on Sustainable Development Goal Indicators established the Working Group on Measurement of Development Support, which resulted in an agreed, voluntary framework for the measurement of South-South cooperation and a proposal for Sustainable Development Goal indicator 17.3.1, reflecting elements of South-South cooperation, triggering strong country demand for capacity-building support.

The lack of information on target 17.3 of the Goals, to mobilize additional financial resources for developing countries from multiple sources, hampers progress in mobilizing resources for achieving the 2030 Agenda. This situation was magnified by the COVID-19 pandemic and the resulting need to mobilize resources for inclusive recovery. This project will support eight developing countries in Africa, Asia and Latin America to measure and report financial and non-financial modalities of South-South cooperation to inform and target policy action.

Expected progress towards the attainment of the objective and performance measures

This work is expected to contribute to strengthening the capacity of developing countries to measure and report South-South cooperation to manage and mobilize resources for efforts to achieve the 2030 Agenda, including to enable a more inclusive, resilient and sustainable recovery from the pandemic, which would be demonstrated by the provision of early estimates of South-South cooperation by at least four beneficiary countries for use by development experts and policymakers. In the longer term, the sharing of resources and tools developed in the project will enable more global reporting on Sustainable Development Goal indicator 17.3.1.

Budget summary (thousands of United States dollars)

Other staff costs	40.0
Consultants	392.3
Travel of staff	111.5
Contractual services	24.0
General operating expenses	46.0
Grants and contributions	186.2
Total	800.0

E. Supporting structural economic progress towards and beyond graduation from least developed country status by the pre-qualified African and Asian countries

Implemented by UNCTAD jointly with ECA and in collaboration with the Department of Economic and Social Affairs, ESCAP, the United Nations Industrial Development Organization (UNIDO) and resident coordinator offices (\$900,000)	Relationship to the Sustainable Development Goals: targets 8.1, 8.2, 8.3, 10.2, 10.a, 10.b, 17.2, 17.9, 17.11 and 17.12
--	---

Objective

To enhance the ability of the four African least developed countries and one Asian least developed country that are pre-qualified for graduation from least developed country status to achieve structural economic and social progress, and to use the milestone of graduation from least developed country status as an opportunity to find new avenues for gaining international support for their further development efforts.

Project plan

The economies of graduating least developed countries are often dependent on a small number of products or commodities for export and employment, even though they demonstrate forms of structural economic progress. The broad agenda of these States is to make the most of benefits specific to least developed countries while they are still available, then achieve a smooth transition to post-least developed country status with some alternative support measures and through their domestic efforts at structural transformations. This project will help to bring this agenda to fruition through a practical framework.

The project aims to help four African least developed countries and one Asian least developed country that were declared pre-eligible for graduation from least developed country status during the latest triennial review of the list of least developed countries, undertaken by the Committee for Development Policy in 2021, to increase their chances of achieving structural economic and social progress towards and beyond graduation from least developed country status. This aim will be achieved through: (a) the provision of country-specific analytical material on the implications of graduation from least developed country status, vulnerability and resilience-building and inputs into smooth transition strategies; (b) relevant advisory services for policymakers; and (c) action to help project recipients to use industrial policy more effectively to accelerate structural transformation and thereby graduate with momentum.

Expected progress towards the attainment of the objective and performance measures

This work is expected to contribute to improving the capacities of policymakers and the private sector in beneficiary countries to better understand and prepare for the implications of graduation from least developed country status by means of the development of economically feasible strategies, which would be demonstrated by policy options for building productive capacities being endorsed by high-level policymakers in four of the five recipient countries and one priority action derived from the national road map for graduation with momentum being implemented in at least two of the five recipient countries.

F. Automated System for Relief Emergency Consignments for innovative coordination and facilitation of relief consignments in times of disaster in the Pacific region

Implemented by UNCTAD in collaboration with the Office for the Coordination of Humanitarian Affairs and resident coordinator offices (\$650,000)	Relationship to the Sustainable Development Goals: targets 3.d, 9.a, 11.5, 13.1, 16.7 and 17.7
--	--

Objective

To strengthen the capacity of countries in the Pacific region to facilitate and expedite the processing of international relief consignments to address humanitarian crises, natural disasters, or complex emergencies such as the COVID-19 pandemic.

Project plan

UNCTAD partnered with the Office for the Coordination of Humanitarian Affairs to develop the Automated System for Relief Emergency Consignments (ASYREC), a dedicated solution compatible with international standards and compliant with automated customs systems for the processing of international relief consignments in humanitarian crises, natural disasters, or complex emergencies such as the COVID-19 pandemic. The tool is of utmost importance for humanitarian aid coordination and the global Logistics Cluster to ensure the swift processing of humanitarian aid in crisis situations.

Thirteen countries in the Pacific already use the UNCTAD Automated System for Customs Data (ASYCUDA). This system provides the potential for humanitarian assistance through ASYREC and thus an opportunity to create a template for other regions to use in the future. The project will ultimately help to contain and mitigate the negative economic impact of disasters as far as the logistics of international trade are concerned. The project will support 12 developing countries in the Pacific to use ASYREC to facilitate and expedite the processing of international relief consignments and improve coordination by Governments for disaster response.

Expected progress towards the attainment of the objective and performance measures

This work is expected to contribute to strengthening the capacity of countries in the Pacific region to facilitate and expedite the processing of international relief consignments to rapidly address humanitarian crises, natural disasters, and complex emergencies such as the COVID-19 pandemic, which would be demonstrated by the implementation of an online ASYCUDA-ASYREC e-learning platform in beneficiary countries and the formulation of a national framework on the supply of humanitarian goods in times of crisis based on national, regional and international regulations.

G. Financing nature-based solutions for a green and inclusive recovery in Latin America

Implemented by UNEP in collaboration with FAO, UNDP and resident coordinator offices (\$500,000)	Relationship to the Sustainable Development Goals: targets 2.3, 2.4, 2.b, 13.2, 14.6, 15.2, 15.3, 15.5, 15.9 and 15.b
--	---

Objective

To strengthen the capacity of selected countries to develop and implement policies and strategies to scale up public and private investment and finance for nature to support sustainable, inclusive and resilient food systems in support of a green recovery from COVID-19 in Latin America.

Project plan

As countries build back their economies from COVID-19, Governments have a unique opportunity to scale up and channel public and private finance towards protecting and restoring nature. Investing in nature-based solutions – for which a specific resolution was adopted by the United Nations Environment Assembly during its resumed fifth session, in March 2022 – can help to reduce the likelihood of future pandemics and build society’s resilience to wider-ranging climate and environmental risks, while at the same time delivering significant economic benefits and job opportunities.

To that end, this project will provide technical assistance, analytical guidance and support to three beneficiary countries in Latin America on how to create an enabling policy environment to scale up public and private finance and investments for nature-based solutions to support more sustainable, inclusive and resilient food, forest and land-use systems that include conservation, restoration and production, contributing to the delivery of the Paris Agreement and the Sustainable Development Goals.

This support will cover both public and private investment and financing for nature, with a focus on social equity and environmental integrity. For public finance, the focus is on how to realign and direct public finance by removing perverse incentives and to create fiscal space to deal with debt and finance the recovery plans, providing incentives that reward good land management practices and other mechanisms such as ecological fiscal transfers. For private finance, the focus is on how to unlock or leverage private finance, for example, through smart design of the enabling fiscal policy environment to create incentives to help to scale up, leverage and redirect private-sector lending, project finance and equity investments from commercial banks and lead investors towards nature-positive and climate-positive activities across the food system.

Expected progress towards the attainment of the objective and performance measures

This work is expected to contribute to improving the capacities of policymakers, banks and private investors in three beneficiary countries in Latin America to develop and implement policies and strategies to shift investments and financing towards nature-based and climate-neutral strategies for sustainable food systems, which would be demonstrated by the beneficiary countries implementing at least one of the following two actions: (a) reduction in potentially environmentally harmful elements of government support to agriculture; and (b) increase in finance from public and private sources invested in protecting and restoring nature.

H. Environmentally sounder and safer waste management frameworks in Africa

Implemented by UNEP in collaboration with UN-Habitat, the Department of Economic and Social Affairs and resident coordinator offices (\$500,000)	Relationship to the Sustainable Development Goals: targets 3.9, 5.1, 6.3, 6.a, 8.8, 11.6, 12.4, 12.5, 14.1 and 16.b
--	---

Objective

To strengthen waste management frameworks of selected countries in Africa, with the aim of promoting the environmentally sound and safe management of waste and the better inclusion of informal structures and workers, thus ensuring protection of the health and rights of informal waste pickers.

Project plan

In the aftermath of the COVID-19 pandemic, there is an opportunity for African countries to start longer-term planning for pandemic waste management by strengthening their waste management capacities in general and implementing best practice and integrating legislative responses in their waste management frameworks. In 2021, UNEP prepared guidance on policy and legislation for integrated waste management during a pandemic, which showed that the safe, inclusive and environmentally sound disposal of waste during and following the COVID-19 pandemic was a challenge. A key gap was the lack of modern waste disposal facilities, for example, sanitary landfill sites.

Gaps arise when the “essential service” designations do not cover all waste workers, for example, in countries with a large informal sector, and when access to personal protective equipment is limited or there are not sufficient resources for training all relevant workers. Owing to the informal nature of their work, waste pickers are often more exposed to occupational hazards than their formally employed counterparts in the waste management sector. The stockpiling or dumping of health-care waste in general dump sites may lead to the exposure of workers and informal waste pickers, with the overrepresentation of women and children in some countries. In most countries, there is a lack of waste management frameworks and guidance at the national level, and waste management may be entirely within the competence of local authorities (municipalities).

The project will support four beneficiary countries in Africa to improve the alignment of their waste management regulatory frameworks with integrated waste management approaches, in order to ensure preparedness in times of a pandemic while including a general duty of care for waste sector personnel in both the formal and informal sectors, including safety procedures for the collection, storage, handling, treatment and safe disposal of waste. The four beneficiary countries have indicated that the reform of their legal frameworks is a much-needed priority, including with a view to creating jobs and improving the situation of the informal sector.

Expected progress towards the attainment of the objective and performance measures

This work is expected to contribute to strengthened waste management frameworks with the inclusion of informal work structures and protection of the health and rights of informal waste pickers, which would be demonstrated by beneficiary countries having adopted evidence-based waste management frameworks that promote the environmentally sound and safe management of waste.

I. Harnessing urbanization for a more resilient, inclusive and green recovery in francophone least developed countries

Implemented by UN-Habitat in collaboration with ECA, ECLAC and resident coordinator offices (\$500,000)	Relationship to the Sustainable Development Goals: targets 10.3, 11.1, 11.3, 11.7, 11.a, 11.b, 11.c, 12.8, 17.6 and 17.9
---	--

Objective

To strengthen the capacity of francophone least developed countries to apply the New Urban Agenda for a green, resilient post-COVID-19 recovery and inclusive urban areas.

Project plan

Francophone least developed countries, all but one of which are in Africa, are facing unprecedented urbanization rates. Most of the practical knowledge, tools and online information platforms supporting knowledge exchange and capacity-building for urban sustainability that are produced by international organizations, including United Nations entities, are not available in French. Consequently, there is a gap between francophone countries and others when it comes to accessing practical methods and learning tools developed by international partners. Additionally, the COVID-19 pandemic has had devastating economic and social costs for most of the least developed countries.

This project will respond to the need of urban professionals in francophone least developed countries to access capacity-building services and tools that are effective, innovative and digitally accessible. It will support the preparation and implementation of cooperation frameworks at three levels: (a) the use of digital innovations and existing platforms to make knowledge and tools accessible to francophone least developed countries; (b) the provision of capacity-building support through digital education and blended learning; and (c) the provision of technical assistance to strengthen the urban dimension of cooperation frameworks, particularly approaches supporting urban recovery and resilience and promoting South-South cooperation and learning between countries.

Expected progress towards the attainment of the objective and performance measures

This work is expected to contribute to enhancing the capacity of three francophone least developed countries to apply the New Urban Agenda for greener, resilient and inclusive urban areas, which would be demonstrated by the integration of inclusive, resilient and green principles into urban development policies, strategies and plans in support of a green and resilient post-COVID-19 recovery.

J. Building back safe, sustainable and resilient transport and urban mobility systems in Western Balkan and Central Asian landlocked developing regions

Implemented by UN-Habitat jointly with UNEP and ECE and in collaboration with UNDP and resident coordinator offices (\$940,000)	Relationship to the Sustainable Development Goals: targets 3.6, 3.9, 11.2, 11.7 and 13.1
---	--

Objective

To strengthen local and national capacity in the Balkan and Central Asia regions on long-term, sustainable urban mobility planning and robust investment decisions towards public transport, walking and cycling.

Project plan

The rapid and often uncoordinated growth of cities in the Western Balkan and Central Asia regions has affected the existing transport networks, thus creating major problems with congestion, air pollution, climate emissions and road safety. Investments in road infrastructure have been numerous in the past few years, but their purpose to connect the urban areas within and between the wider regions has been overshadowed by a car-focused planning approach, resulting in urban sprawl and negative environmental and social impacts directly related to the quality of life. Only a combination of land-use policy, public transport policy and the promotion of walking and cycling can prevent future urban dispersion and liberate metropolitan regions from their increasing dependence on private vehicles.

This project will strengthen local capacities in the Balkan and Central Asia regions on long-term sustainable urban mobility planning and robust investment decisions towards public transport, walking and cycling. This objective will be achieved through capacity-building and training on sustainable urban mobility transition and the creation of sustainable urban mobility plans in each of the six target cities located in five project beneficiary countries, which will provide these cities with a long-term strategy with clear goals to effectively contribute to the Sustainable Development Goal-related targets of reducing emissions, decarbonization and enhancing accessibility and road safety within the context of COVID-19 recovery, as well as relevant national policies and legislation. Target cities will be able to improve accessibility and proximity, while lowering road fatalities, climate emissions and air pollution, hence contributing to the achievement of multiple Goals and an inclusive, bottom-up COVID-19 recovery. Cities that have approved sustainable urban mobility plans will be eligible to access designated European Union and other donor funds concerning green transition, decarbonization, sustainable transport and urban mobility.

Expected progress towards the attainment of the objective and performance measures

This work is expected to contribute to strengthening the capacities of the local governments in the project beneficiary countries, through technical assistance, on the development of sustainable urban mobility plans, which would be demonstrated by the endorsement of such plans in six cities, and ringfenced investments for sustainable mobility, including green public transport and non-motorized transport.

K. Innovative biodiversity monitoring and impact assessment to support payments for ecosystem services with better economic deals for indigenous communities in the Amazon rainforest

Implemented by UNODC in collaboration with resident coordinator offices (\$300,000)	Relationship to the Sustainable Development Goals: targets 1.4, 5.5, 10.3, 13.3, 15.5, 15.a, 16.a, 17.6, 17.7 and 17.18
---	---

Objective

To improve the capacity of selected countries in the Andean Community to effectively use payments for ecosystem services to benefit indigenous communities, especially those affected by illegal forest activities and illicit drug crop cultivation and trafficking.

Project plan

In Latin America, as in other regions of the world, the COVID-19 pandemic has disproportionately affected those who are poorest and most vulnerable, including indigenous communities. While moving from short-term responses to longer-term planning of the post-pandemic recovery, putting biodiversity at the heart of resilient societies needs to be a top priority. The urgency of a “green recovery” is accentuated by the limited time available, as projected by the Intergovernmental Panel on Climate Change, to forestall catastrophic climate change. Particularly important is the conservation of biodiversity. The *Global Risks Report 2020*, published by the World Economic Forum, rated biodiversity loss as the third most important global risk in terms of impact and fourth in terms of likelihood. In the *Living Planet Report 2018: Aiming Higher*, it was pointed out that South and Central America had suffered an 89 per cent loss of species population compared to 1970.

This project will support indigenous communities in the Amazon rainforest in three countries affected by illicit drug crop cultivation, to monitor biodiversity for the early detection of illegal forest activities and to obtain better economic deals through payments for ecosystem services.

Expected progress towards the attainment of the objective and performance measures

This work is expected to contribute to tackling the loss of biodiversity and building capacity in developing countries to combat crime in the context of a “green recovery” from the COVID-19 pandemic, which would be demonstrated by the use of acoustic devices for biodiversity monitoring in three countries, as well as robust impact assessments, and real-time detection of illegal activities to assist indigenous communities, especially those affected by illegal forest activities and illicit drug crop cultivation and trafficking, to obtain better economic deals through payments for ecosystem services.

L. Expanded and resilient urban fiscal space for an inclusive and resilient COVID-19 recovery in Africa

Implemented by ECA jointly with UN-Habitat and in collaboration with the United Nations Capital Development Fund and resident coordinator offices (\$940,000)	Relationship to the Sustainable Development Goals: targets 1.1, 1.a, 8.1, 8.2, 8.10, 10.4, 11.1, 11.a, 11.b and 17.1
---	--

Objective

To strengthen the capacities of select city governments in Africa to develop and implement policy reforms and strategies to expand and build resilient fiscal space as part of national priorities for building forward.

Project plan

The COVID-19 pandemic has had a considerable impact on public finances within Africa. Deficits and debt have been on the rise because of falls in revenues and increases in public expenditure during lockdowns, posing difficult challenges for countries and cities in Africa.

This project will establish conditions that enable local governments to enhance their resilient fiscal space in six cities in Africa, by analysing the fiscal space from the perspective of the capacity of local governments to create budgetary room that allows them to provide resources for a desired purpose without endangering their financial position. The project will also fine-tune fiscal decentralization frameworks at the national level to help to strengthen local government incentives to spend and earn revenues effectively. A system that incentivizes spending and earning effectively is imperative to aid the relationship between local and central governments. There is a need for greater harmonization on the impact of fiscal decentralization on income redistribution and service delivery in relation to the quantity, breadth of coverage and level of sophistication. The project will prioritize the ability of local governments to raise local revenues and implement effective spending with an emphasis on providing local government authorities with the extra capacity to carry out these functions while ensuring accountability.

Expected progress towards the attainment of the objective and performance measures

This work is expected to contribute to improving the capacities of six target cities in Africa for the development and application of strategies for creating adequate city fiscal space for recovery and rebuilding and allowing target cities to advance the financing of the Sustainable Development Goals, which would be demonstrated by the implementation of the following two actions: (a) city strategies to boost fiscal space; and (b) regional partnerships on innovative city fiscal performance.

<i>Budget summary (thousands of United States dollars)</i>	
Other staff costs	45.0
Consultants	464.0

M. Measuring and curbing illicit financial flows

Implemented by ECA jointly with ECLAC, ESCAP and ESCWA and in collaboration with ECE, UNCTAD, UNODC and resident coordinator offices (\$1,500,000)	Relationship to the Sustainable Development Goals: targets 15.7, 15.c, 16.4, 16.5 and 16.6
--	--

Objective

To strengthen the capacity of developing countries across regions to produce standardized estimates of illicit financial flows and enhance investigative and analytical capacities to develop evidence-based policy responses to monitor and curb illicit financial flows.

Project plan

In July 2017, the General Assembly, in its resolution [71/313](#), adopted the global indicator framework for the Sustainable Development Goals, assigning UNCTAD and UNODC as custodians of indicator 16.4.1 on the “total value of inward and outward illicit financial flows”, and established a statistical task force to help to develop concepts and methods for its measurement with the participation of regional commissions. Methodologies to measure selected types of illicit financial flows have been tested in pilots across Africa, Asia and the Pacific and Latin America, and while agreed concepts and methods exist, countries do not yet report data on that indicator.

This project aims to strengthen the capacity of selected countries across regions to measure, report on and address illicit financial flows, while enhancing knowledge and awareness of the globally agreed concepts, methods and tools in all regions. The project will consolidate the methodological guidelines with the aim of producing estimates on illicit financial flows, which can also be produced by gathering and aggregating existing early estimates, where possible, from different flow types (tax, commercial and crime-related flows) to allow for the reporting of data on Sustainable Development Goal indicator 16.4.1. Finally, the project will also strengthen the capacity of beneficiary countries to develop evidence-based policy responses to curb illicit financial flows and strengthen domestic resource mobilization.

Expected progress towards the attainment of the objective and performance measures

This work is expected to assist beneficiary countries in curbing illicit financial flows and mobilizing resources for a more inclusive and resilient recovery from the pandemic and progress towards the 2030 Agenda, which would be demonstrated by the capacities to produce estimates of illicit financial flows and the development of evidence-based policy responses (using early estimates; evidence from the methods, tools and toolkits; local capacity; and social dialogue) to work towards an agreed global policy response to illicit financial flows that provides support to these selected countries to curb such flows. In the long term, the resources and tools shared and developed within the project will enable the reporting of data on Sustainable Development Goal indicator 16.4.1.

Budget summary (thousands of United States dollars)

N. Circular forest product value chains and nature-based solutions in Central Asia and the Caucasus

Implemented by ECE in collaboration with FAO, UNDP, the International Trade Centre, ESCAP and resident coordinator offices (\$500,000)	Relationship to the Sustainable Development Goals: targets 2.3, 2.4, 12.2, 13.2, 15.1, 15.2, 15.9 and 15.b
--	--

Objective

To improve knowledge and capacity to advance inclusive and resilient post-pandemic rural development and forest landscape restoration through circular forest product value chains and nature-based solutions in selected countries in Central Asia and the Caucasus.

Project plan

Rural communities in the Caucasus and Central Asia face high levels of poverty and limited livelihood prospects, triggering high levels of migration and driving families, entire communities and generations of youth to leave home. Furthermore, forest landscapes in the region are degraded, depleted and under continued threat from unsustainable resource use and unmitigated natural threats, despite the vital role they can play as a source of livelihoods, shelter, water, food, medicine and fuel.

This project will support four countries in Central Asia and the Caucasus to advance inclusive and resilient post-pandemic rural development and forest landscape restoration. It will adopt a dual approach, first developing knowledge products based on in-depth assessments to explore and demonstrate the benefits of circular forest product value chains for advancing inclusive rural development and forest landscape restoration, followed by building capacity for stakeholders, including policymakers, the private sector and civil society, to implement circular forest product value chains.

Expected progress towards the attainment of the objective and performance measures

This work is expected to contribute to strengthened capacity to implement circular value chains for forest products and integrate forest landscape restoration into national and sectoral development policy and planning, which would be demonstrated by the adoption of strategies to integrate circular forest product value chains and forest landscape restoration into national and sectoral planning processes.

Budget summary (thousands of United States dollars)

O. Equitable access to water and sanitation services for all and in all settings and strengthened climate resilience in the water and sanitation sector

Implemented by ECE in collaboration with the World Health Organization (WHO) and resident coordinator offices (\$500,000)	Relationship to the Sustainable Development Goals: targets 3.9, 3.d, 6.1, 6.2, 6.3, 6.6, 6.b, 13.1 and 13.2
---	---

Objective

To strengthen the capacity of policymakers and water and wastewater operators in target countries in the ECE region to develop and implement policies and measures aimed at ensuring equitable access to climate-resilient water, sanitation and hygiene services for inclusive recovery from the COVID-19 pandemic and enhanced resilience in the water and sanitation sector.

Project plan

Ensuring equitable access to water and sanitation services is an important priority for the pan-European region, which, despite significant progress, is still home to 16 million people lacking access to essential drinking water and more than 31 million people without basic sanitation. Despite widely available evidence of the impacts of climate change on water, sanitation and hygiene services and on water resources, climate action in the areas of water and sanitation has remained slow. This situation has the potential to heighten health and environmental risks, including damage to water-related ecosystems.

This project combines a lens on equity and water, sanitation and hygiene in institutions with a focus on climate change resilience. In the area of equity, it will use innovative approaches and methodologies aligned with human rights standards and gender considerations that can strengthen the capacity of policymakers to assess equitable access to water and sanitation. On the basis of these assessments and the data gathered, decision makers can develop informed policies and measures to improve equity in the context of COVID-19 and other emergency situations. In the area of climate resilience, the project is aimed at the integration of a climate change perspective into the water and sanitation sector, including by setting concrete targets on water and climate, developing strategies for their implementation and identifying indicators to track progress. Activities will also be aimed at collecting evidence, preparing guidance and strengthening capacities in addressing climate change impacts on water resources and water supply and sanitation services, as well as promoting linkages with global climate change processes and related national planning documents.

Expected progress towards the attainment of the objective and performance measures

This work is expected to contribute to strengthening the capacity of policymakers and water and wastewater operators in selected countries in the ECE region to ensure equitable access to climate-resilient water, sanitation and hygiene services, for all and in all settings, and thus help to ensure inclusive recovery from the COVID-19 pandemic and enhanced resilience, which would be demonstrated by the identification of equity gaps, the mapping out of the policy landscape with respect to water, sanitation and hygiene in institutions and, on that basis, progress in developing or amending policies and measures to enhance equitable access to water, sanitation and hygiene for all and in all settings and progress by policymakers, as well as water and wastewater operators, in the development and/or implementation of strategies, policies and measures on climate resilience in the water and sanitation sector.

P. Regional network and observatory for inclusive and sustainable water management

Implemented by ECLAC in collaboration with UNEP, WHO, the United Nations Children’s Fund, the United Nations Educational, Scientific and Cultural Organization, FAO, ECE, UN-Water and resident coordinator offices (\$730,000)	Relationship to the Sustainable Development Goals: targets 1.5, 2.4, 3.3, 6.1, 6.2, 6.3, 6.4, 6.5, 6.6 and 15.1
---	---

Objective

To strengthen the institutional and technical capacities of countries in Latin America and the Caribbean for implementing a sustainable and inclusive water management transition.

Project plan

The water and sanitation crisis demands a holistic, systemic and multilateral response. However, most countries in Latin America and the Caribbean are lagging in terms of the various clean water and sanitation targets of Sustainable Development Goal 6, as well as an understanding of the polyfunctionality and multiple effects of water.

This project will strengthen the capacity of selected countries to design, implement, monitor and evaluate enhanced water policies that tackle the multidimensional problems relating to water, public and ecosystem health, resource efficiency and decoupling, as well as climate-resilient infrastructure. As a result, the project is expected to provide a space for active discussion, interaction and promotion of region-specific solutions to water management challenges. Through a regional network and observatory, targeted and non-targeted countries will find a platform to strengthen their capacities for formulating and using relevant indicators for evidence-based water policies.

Expected progress towards the attainment of the objective and performance measures

This work is expected to contribute to improving the capacities of target countries in Latin America and the Caribbean with the development and/or revision of programmes, plans or policies for implementing a water management transition based on reliable indicators and to support target countries in achieving the targets of Sustainable Development Goal 6, which would be demonstrated by the implementation of at least one of the following two actions: (a) countries adopt initiatives to develop or update water indicators and/or water policies; and (b) countries engage in capacity-building processes and exchange best practices and cost-effective solutions to address water challenges through a regional water network and observatory.

Q. Resilient health systems with universal health coverage in Latin America and the Caribbean

Implemented by ECLAC in collaboration with the Pan American Health Organization/WHO and resident coordinator offices (\$567,600)	Relationship to the Sustainable Development Goals: targets 1.3, 3.8, 3.d, 5.6 and 10.4
--	--

Objective

To improve the capacity of selected countries in Latin America and the Caribbean to design, adapt and implement institutional and policy frameworks for comprehensive, sustainable and resilient health systems.

Project plan

The COVID-19 pandemic has made it evident that social protection systems, and health systems in particular, are crucial instruments for societies to cope with the immediate negative social and economic effects of such a crisis, while at the same time being essential to engage in sustainable recoveries with more systemic resilience. In this challenging context, countries in Latin America and the Caribbean have only partially built social protection systems able to reach universal health coverage.

Marked by a difficult post-pandemic recovery and other permanent risks and vulnerabilities, several institutional gaps and needs must be addressed to improve the coverage, efficiency and quality of health systems in Latin America and the Caribbean. The project will, therefore, focus on building capacities of selected countries in three areas: (a) implementing effective strategies and policies to achieve universal health coverage in specific institutional and critical areas sensitive to differences (such as gender and disabilities); (b) strengthening the political commitment to gradually achieve universal health coverage through sustainable financing; and (c) improving institutional coordination within health systems and with social protection systems, especially to address catastrophic events.

Expected progress towards the attainment of the objective and performance measures

This work is expected to contribute to improving the coverage, efficiency and quality of health systems in five countries in Latin America and the Caribbean to deal more effectively with catastrophic events, which would be demonstrated by the inclusion of provisions in health reform strategies and programmes to improve coordination with social protection systems to deal with such events.

R. Regional integration and cooperation to promote affordable and equitable access to vaccines, diagnostics and therapeutics in Asia and the Pacific

Implemented by ESCAP in collaboration with the United Nations Population Fund, UNDP, WHO, the World Trade Organization, the World Intellectual Property Organization and resident coordinator offices (\$650,000)	Relationship to the Sustainable Development Goals: targets 3.4, 3.5, 3.8, 3.b, 3.d, 5.4, 5.5, 9.1, 17.10 and 17.11
---	--

Objective

To enhance the capacity of selected countries in Asia and the Pacific to develop policies and strategies to reduce inequality in access to essential medical products and strengthen health system resilience.

Project plan

The COVID-19 pandemic has exposed the inequalities between and within countries in Asia and the Pacific in providing access to universal health care, including access to quality, safe, efficacious and affordable vaccines, diagnostics and therapeutics. The pandemic has also accentuated existing weaknesses and deficiencies in health systems within countries in terms of financing, human resources and technologies. There is thus an urgent need to diversify production capacity for essential medical products (vaccines, diagnostics and therapeutics) and to facilitate their import into Asia and the Pacific, including by securing essential technologies for manufacturing and utilizing regional integration and trade mechanisms.

This project will strengthen the capacity of selected countries in Asia and the Pacific to develop coherent policies and practical strategies on trade, investment, technology transfer and regional cooperation to address inequities in supply and capacity. The broader objective is to enable greater inclusivity and resilience in national health systems.

Expected progress towards the attainment of the objective and performance measures

This work is expected to contribute to improving the capacities of five countries in Asia and the Pacific to develop policies and strategies on trade, investment, technology transfer and regional cooperation to address inequities in the availability of and access to essential medical products, which would be demonstrated by the implementation of national action plans in selected countries for more inclusive access to essential medical products and the overall strengthening of health-care services, with a focus on persons in vulnerable situations.

S. Enhancing investments for equitable and accelerated climate action in the post-COVID-19 recovery

Implemented by ESCAP in collaboration with ECLAC, ECA, UNDP and resident coordinator offices (\$650,000)	Relationship to the Sustainable Development Goals: targets 2.4, 13.2, 14.2, 14.5, 15.1, 15.3, 15.9, 17.3, 17.9 and 17.16
--	--

Objective

To enhance the capacity of selected countries to design policies to accelerate climate action and nature-based solutions in support of green post-COVID-19 recovery strategies.

Project plan

The challenge of mitigating the dangerous impacts of climate change and the need for climate adaptation has never been more urgent, yet the Asia-Pacific region is currently not on track to achieve any of the Sustainable Development Goals by 2030. Climate change and extreme weather events fundamentally threaten development in Asia and the Pacific, often undermining the enjoyment of human rights and exacerbating societal inequalities by disproportionately burdening the poor and the most vulnerable groups. Countries in Asia and the Pacific must accelerate ambitious climate mitigation and adaptation actions to safeguard hard-fought development gains made, and to rapidly transition towards an equitable low-carbon and climate- and disaster-resilient development pathway post-COVID-19.

The scale of the investment needed means that the transition to a low-carbon, climate-resilient economy will require a shift from business as usual in the finance ecosystem. Innovative financing instruments, mechanisms and associated policies have a critical role to play in mobilizing the investment capital needed to address climate change and recover from the impacts of the COVID-19 pandemic. The project will support five Member States in Asia and the Pacific in three areas: (a) understanding the role of nature-based solutions in addressing climate change; (b) increasing investment in nature-based solutions using innovative climate financing mechanisms; and (c) implementing trade practices in support of such nature-based solutions.

Expected progress towards the attainment of the objective and performance measures

This work is expected to contribute to enhancing investment to promote equitable development and accelerate climate action in the post-COVID-19 recovery, which would be demonstrated by the project beneficiary countries not returning to business as usual, but rather evolving towards more resilient and ecosystem-friendly policymaking that capitalizes on smart trading and green investment practices. This new approach will be supported by the knowledge products and capacity development activities offered in this project.

T. Expanding the potential of small and medium-sized enterprises in the Arab region

Implemented by ESCWA in collaboration with UNCTAD, UNIDO and resident coordinator offices (\$350,000)	Relationship to the Sustainable Development Goals: targets 8.2, 8.3, 9.3, 9.b and 17.17
---	---

Objective

To enhance the capacity of Arab small and medium-sized enterprises, Governments and business enablers to build regional and international partnerships to improve production processes and access new markets.

Project plan

Policymakers must take action to build forward better and accelerate the creation of more inclusive, resilient and sustainable economies as the road to recovery is expected to be long and demanding. Business enablers must also improve the adoption of technology and innovative and digital skills for small and medium-sized enterprises to recover and maintain business operations, and entrepreneurs themselves must seek out strategic partnerships and tap into regional and global networks to jump-start the growth of their businesses.

This project aims to enhance partnerships and expand the potential of small and medium-sized enterprises in the Arab region through the provision of targeted capacity-building to both government entities and Arab small and medium-sized enterprises, and to provide networking opportunities and strategic alliances, with a special focus on women's empowerment and inclusive entrepreneurship. Furthermore, the project will create a regional platform that would gather regional and international leaders from the public and private sectors to advocate inclusive policies and strategies required to support Arab small and medium-sized enterprises. The project will engage Member States to develop improved policy frameworks on small and medium-sized enterprises that promote inclusive and sustainable economic growth and build resilient infrastructure to nurture the small and medium-sized enterprises of the region.

Expected progress towards the attainment of the objective and performance measures

This work is expected to improve the capacity of policymakers in the Arab region to develop targeted policy frameworks on small and medium-sized enterprises and develop the capacity of business enablers and small and medium-sized enterprises through a training-of-trainers entrepreneurship programme, which would be demonstrated by the organization of regional entrepreneurship competitions and regional summits of small and medium-sized enterprises, and the development of guidelines for Governments on building networks and partnerships to boost the competitiveness and growth of small and medium-sized enterprises.

U. Dynamic simulators to address ranking deficiencies of international indices platforms in the Arab region

Implemented by ESCWA in collaboration with resident coordinator offices (\$350,000)	Relationship to the Sustainable Development Goals: targets 5.a, 5.b, 5.c, 8.3, 16.6, 16.7, 16.10, 17.13, 17.16 and 17.17
---	--

Objective

To enhance the capacity of policymakers to identify and analyse national strengths and weaknesses in international indicators to inform the design of effective policies for the achievement of the Sustainable Development Goals.

Project plan

Arab Governments are facing a set of unprecedented challenges in ensuring a broad recovery in the aftermath of the COVID-19 pandemic, which affected all sectors and put under pressure development gains in the areas of economic growth, inequality, the labour market and political participation. Addressing these challenges will depend on the capacity of Arab Governments to support innovation, productivity and regional economic growth and to harness new technologies.

To this end, ESCWA has been developing tools to enhance Member States' capacities to design scenarios for policy changes and reforms, assess their likely economic and social impacts and develop national policies in digital technology and innovation. A platform has been developed to simulate the impact of policies on a set of international indices that measure countries' economic and human development outcomes. Through this project, the platform's user experience will be enhanced to broaden public servants' access and strengthen Member States' capacities to assess performance, design scenarios, identify bottlenecks and priorities and learn from international best practices. The project will also contribute to improved transparency and accountability by facilitating monitoring and helping policymakers to simulate the impact of policies on national performance as measured by these indicators.

Expected progress towards the attainment of the objective and performance measures

This work is expected to strengthen the capacity of selected Member States to improve their performance on international indices, which would be demonstrated by project beneficiary countries designing relevant action plans in this regard.

V. Use of forecasting and analysis of megatrends to support decision-making for the Sustainable Development Goals in the ESCWA region

Implemented by ESCWA in collaboration with the United Nations Economists' Network and resident coordinator offices (\$350,000)	Relationship to the Sustainable Development Goals: targets 1.b, 5.c, 7.1, 8.3, 10.4, 11.2, 11.3, 15.3, 16.6 and 16.7
--	--

Objective

To strengthen the capacity of policymakers to identify and analyse megatrends to design effective policies for the achievement of the Sustainable Development Goals.

Project plan

Megatrends are macroeconomic and geostrategic forces that are shaping the world. Successfully identifying, analysing and acting on megatrends is essential for Governments to serve their citizens. It can be difficult for countries to understand why their economies and societies are evolving in the way they are today, much less predict how they will evolve into the future. Megatrend analysis and forecasting allow countries to build a long-term strategy that is proactive rather than reactive, making sense of where they stand today, but also ensuring that they have a plan to remain effective and resilient moving forward. Governments need to have the ability to choose the most suitable policies that could lead to dealing with these megatrends in a way for them to have a positive impact on countries.

Owing to the challenges facing Arab countries, there is an urgent need to think ahead and understand the benefits of megatrends facing the region in order to explore different scenarios and paths that will guide Member States in policymaking towards achieving the Sustainable Development Goals. This project will support three developing countries in Western Asia to use megatrends analysis to produce forecasts that will improve their ability to develop policies targeting the Goals.

Expected progress towards the attainment of the objective and performance measures

This work is expected to contribute to strengthening understanding of the benefits of megatrends analysis and the design of more effective policies for the achievement of national development priorities and the Sustainable Development Goals, which would be demonstrated by the adoption of national guides on the use of megatrends analysis and forecasting for policymaking and the production of forecasts that will improve the ability of Member States to develop policies for the achievement of the Goals.

Annex II

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/76/7](#) and [A/76/7/Corr.1](#)

The Advisory Committee reiterates its recommendation that the General Assembly again request the Secretary-General to further track and identify savings resulting from efficiency measures to be transferred to the baseline of the Development Account, in accordance with the provisions of its resolutions related to the funding of the Account. ... The Committee further recommends that the Assembly request the Secretary-General to develop a clear methodology to track and identify savings to be transferred to the Account and to submit the proposed methodology in the context of his next budget submission (para. XIII.11).

The Advisory Committee, once again, expresses concern that the Development Account is not subject to recosting, unlike other sections of the programme budget, and, in view of the current challenges to achieve savings consistently, recommends that the General Assembly request the Secretary-General to recost the Account, for its consideration, in his next budget submission (para. XIII.13).

The Advisory Committee trusts that consultants and experts will be reported as two different budget lines and recommends that the General Assembly request the Secretary-General to provide information on the use of consultancies, including a breakdown of the number of consultants per project and the associated costs, as well as the difference between national experts and international consultants, in the context of his next budget submission (para. XIII.18).

The Advisory Committee considers that there is a need to rationalize the resource requirements for travel through efficiencies and more reliance on online tools and local experts, with a view to dedicating more of these resources to the funding of the Development Account's sustainable projects (para. XIII.20).

As indicated in the proposed programme budget for 2022 ([A/76/6 \(Sect. 35\)](#)), realized savings, or underexpenditure, are tracked and reported in the context of the performance reports for a decision by the General Assembly. However, the Secretariat is not in a position to attribute such savings to "efficiency measures", since multiple factors play a role when final expenditures are below the appropriation level. Each performance report justifies such variances by referring to the respective factors. The full analysis of the underexpenditure for 2021 will be provided in the upcoming financial performance report on the programme budget for 2021, to be considered by the Assembly at the main part of its seventy-seventh session.

The recosted amount of the Development Account will be included in the report of the Secretary-General entitled "Revised estimates: effect of changes in rates of exchange and inflation", to be considered by the General Assembly at its seventy-seventh session.

The Development Account does not use experts in its execution; only consultants are used, since experts are used mainly for intergovernmental processes. An overview of consultancies, including a breakdown of the number of consultants and the associated costs, as well as the difference between national and international consultants, has been provided in paragraph 35.24 and table 35.3 of the present report. It should be noted, however, that project proposals are still tentative and final numbers may vary.

Please refer to paragraphs 35.13 and 35.24 of the present report.

The Advisory Committee reiterates that the complementarity between the regular programme of technical cooperation and the Development Account should be ensured and further developed in order to maximize the combined impact of the activities implemented through the two mechanisms. The Committee recommends that the General Assembly request the Secretary-General to conduct an assessment of the Account to identify complementarity with the resident coordinator system, through the establishment of a coordination mechanism, with a view to ensuring efficient use of resources (para. XIII.25).

The Advisory Committee trusts that the resources for section 35 will be shared more equitably between the different entities (para. XIII.28).

The Advisory Committee continues to share the concern of the Board of Auditors with respect to the management of implementing entities and the monitoring and oversight mechanisms across different entities and trusts that the projects will be fit for purpose and implemented in full and in a timely manner (para. XIII.29).

There is strong complementarity between the Development Account and the regular programme of technical cooperation. Both sections of the proposed programme budget have similar implementing entities and objectives. The Development Account, however, funds demand-driven projects executed over a four-year period in multi-country settings. The regular programme of technical cooperation, on the other hand, funds short-term, small-scale, demand-driven, specific national interventions responding in a flexible manner to urgent and unforeseen development needs. The programme draws on regional and interregional advisers that are assigned to various economic and social entities of the United Nations for its implementation, using general temporary assistance. The programme is often used to initiate and test capacity development activities that are then replicated more broadly through multi-year, multi-country Development Account projects. These projects are often managed by advisers funded through the programme.

Paragraph 35.9 of the present report contains information on existing coordination mechanisms with the resident coordinator offices to ensure complementarity and the efficient use of resources.

The relative share of each lead entity in the fifteenth tranche is similar to their share in past tranches and is based on their implementation capacity. However, as indicated in para 35.10 of the present report, most projects are implemented by several entities, and while the allocation of funds is generally reported by lead entity only, the project funds are shared between all implementing entities.

As indicated in annex III to section 35 of the proposed programme budget for 2022 (*A/76/6 (Sect. 35)*), the recommendation refers to the management of implementing partners, rather than implementing entities. Implementing partner arrangements are used only with a limited number of projects. This concern will be relayed to the implementing entities in the guidelines on preparing project documents.

Annex III

Mandates of the Development Account

The programme of work will continue to be guided by all mandates entrusted to it as detailed in the list below.

List of mandates

Proposed programme budget for 2023

Part XIV

Staff assessment

Section 36

Staff assessment

* A/77/50.

Proposed post and non-post resource requirements for 2023

Overview

- 36.1 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in the table below.

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2021 expenditure	2022 appropriation	Changes				2023 estimate (before recosting)	
			Technical adjustments	New/expanded mandates	Other	Total		Percentage
Other	269 359.1	277 053.7	(2 427.5)	4 768.6	4 228.1	6 569.2	2.4	283 622.9

- 36.2 In accordance with established budgetary practice, provisions for staff assessment are made by applying the rates contained in regulation 3.3 of the Staff Regulations and Rules of the United Nations to the assessable emoluments of staff, which exclude post adjustment payments. The gross amount for salaries is split, and the amount of salaries net of staff assessment is budgeted under the expenditure sections, while the staff assessment is budgeted under the present section.
- 36.3 Amounts withheld in the form of staff assessment are revenue to the Organization, and are credited to the Tax Equalization Fund for the purposes envisaged in General Assembly resolution [973 \(X\) A](#). Accordingly, the amount proposed under the section is also reflected in income section 1, Income from staff assessment.
- 36.4 The overall resources proposed for 2023 amount to \$283,622,900 before recosting, reflecting a net increase of \$6,569,200 (or 2.4 per cent) compared with the appropriation for 2022. Resource changes result from three factors, namely: (a) technical adjustments; (b) new and expanded mandates; and (c) other changes.

Explanation of variances by factor

Technical adjustments

- 36.5 As reflected in the table above, resource changes reflect a net decrease of \$2,427,500, resulting from a decrease of \$2,989,100 related to staff assessment for one-time general temporary assistance resources for 2022, offset in part by an increase of \$561,600 related to the higher provision of staff assessment for new and reassigned posts and positions approved pursuant to General Assembly resolutions [76/245](#) and [76/246 A and B](#), which were subject to a 50 per cent vacancy rate in 2022, and are now budgeted at continuing rates in accordance with the established practice for the costing of these posts.

New and expanded mandates

- 36.6 As reflected in the table above, resource changes reflect an increase of \$4,768,600, which is attributable mainly to staff assessments related to: (a) general temporary assistance positions to implement mandates adopted by the Human Rights Council; (b) the proposed conversion of 25 posts that are currently funded from voluntary contributions to the regular budget in the Office of Counter-Terrorism under section 3, Political affairs; and (c) other new posts and general temporary assistance positions proposed under various sections of the proposed programme budget for 2023.

Other changes

- 36.7 As reflected in the table above, resource changes reflect an increase of \$4,228,100, attributable mainly to the staff assessment related to: (a) the proposed new posts and general temporary assistance positions proposed under various sections of the proposed programme budget for 2023; and (b) new positions for special political missions, as explained in the respective reports.

H. Miscellaneous income	6 708.4	6 103.1	(605.3)
Total	19 580.6	22 352.2	2 771.6

A. Income from rental of premises

- IS2.1 The expected income under this heading, in the amount of \$11,549,400, the details of which are shown in table IS2.2, relate to the payment of rent by a number of specialized agencies and other entities connected with the activities of the Organization for the occupancy of United Nations premises in New York, Geneva, Nairobi, Addis Ababa, Bangkok and Santiago. Under the terms of agreement with the Government of Austria, the United Nations does not charge rent for the space provided for other tenants on its premises in Vienna, and rental income generated in Vienna would devolve to the Government of Austria.
- IS2.2 The estimated net increase of \$957,100 in rental income is due mainly to an increase in rental rates for the extrabudgetary funded operations of United Nations offices and departments at the Palais des Nations in Geneva (\$913,800) and at the Economic Commission for Africa (\$149,800), offset in part by reduced income resulting mainly from lower occupancy at United Nations Headquarters in New York (\$43,800) and at the United Nations Office at Nairobi (\$169,100).

Table IS2.2
Income from rental of premises

(Thousands of United States dollars)

<i>Source</i>	<i>2022 approved estimates</i>	<i>2023 estimates</i>	<i>Increase (decrease)</i>
Headquarters, New York	1 619.8	1 576.0	(43.8)
United Nations Office at Geneva	1 340.0	2 253.8	913.8
United Nations Office at Nairobi	4 390.0	4 220.9	(169.1)
Economic Commission for Africa, Addis Ababa	2 573.6	2 723.4	149.8
Economic Commission for Latin America and the Caribbean, Santiago	23.9	77.4	53.5
Economic and Social Commission for Asia and the Pacific, Bangkok	645.0	698.0	53.0
Total	10 592.3	11 549.4	957.1

B. Reimbursement for services provided to specialized agencies and others

IS2.3 The expected income under this heading is set out in table IS2.3. The total estimated income of \$339,800 reflects a decrease of \$2,100, which is attributable to a decrease at the Economic Commission for Africa related to printing, pouch, catering and language services provided to other agencies, funds and programmes.

Table IS2.3

Reimbursement for services provided to specialized agencies and others

(Thousands of United States dollars)

<i>Source</i>	<i>2022 approved estimates</i>	<i>2023 estimates</i>	<i>Increase (decrease)</i>
United Nations Office at Vienna	217.0	217.0	–
Economic Commission for Africa	124.9	122.8	(2.1)
Total	341.9	339.8	(2.1)

C. Bank interest

IS2.4 It is projected that interest income of \$2,699,400 will be earned on United Nations bank account balances in respect of the general fund during 2023, based on an average positive cash balance of \$360 million and a higher interest rate environment for 2023.

D. Sale of used equipment

IS2.5 The expected income under this heading is set out in table IS2.4. The estimate of \$155,700, reflecting an increase of \$42,200, is due mainly to: (a) higher estimated proceeds from the sale of six used vehicles in 2023 at Headquarters, whereby economic factors such as higher inflation, the low inventory of used vehicles and global logistics issues are projected to affect sales and lead to higher bid prices (\$14,500); and (b) the planned sales of two cars and equipment and furniture at the Economic and Social Commission for Asia and the Pacific (\$24,200). The estimates under this heading vary from year to year on the basis of the equipment that has been identified for sale at the time of preparation of the present report.

Table IS2.4

Sale of used equipment

(Thousands of United States dollars)

<i>Source</i>	<i>2022 approved estimates</i>	<i>2023 estimates</i>	<i>Increase (decrease)</i>
Headquarters, New York	27.7	42.2	14.5
Economic Commission for Africa, Addis Ababa	23.0	26.5	3.5
Economic and Social Commission for Asia and the Pacific, Bangkok	62.8	87.0	24.2
Total	113.5	155.7	42.2

E. Refund of previous years' expenditures

- IS2.6 An estimated amount of \$1,252,500 in 2023, reflecting a decrease of \$382,000, is anticipated to be refunded from prior years' expenditures and is based on the average amounts realized in 2020 and 2021, adjusted for one-off transactions. The level of refunds is influenced by external factors and is therefore difficult to predict with accuracy.

F. Contributions of non-member States

- IS2.7 Under the terms of rule 160 of the rules of procedure of the General Assembly and regulation 3.9 of the Financial Regulations and Rules of the United Nations, States that are not members of the United Nations but participate in certain activities of the Organization contribute towards the expenses of such activities at rates to be determined by the Assembly. By its resolution [44/197 B](#), the Assembly endorsed the revised assessment procedures for non-member States contained in paragraphs 50 to 52 of the report of the Committee on Contributions ([A/44/11](#), [A/44/11/Add.1](#) and [A/44/11/Add.1/Corr.1](#)). These procedures provide for assessment of contributions on the basis of a flat annual fee at the beginning of each year. That fee was calculated for each non-member State on the basis of a varying proportion of the applicable rate of assessment, which was applied to the applicable assessment base. The assessment base equals the total net assessment for the United Nations regular budget for the year, adjusted for tax refunds. By its resolution [58/1 B](#), the Assembly endorsed the recommendation of the Committee that the flat annual fee percentage of the Holy See should be fixed at 50 per cent of the notional rate of assessment and that further periodic review of the percentage should be suspended. By its decision [68/548](#), the Assembly decided that the State of Palestine was to be called upon to contribute towards the expenses of the Organization on the basis of the same procedure. The total contribution from these non-member States is projected to be \$172,300 for 2023, representing an increase of \$42,200 compared with the estimates for 2022, owing to the increase for one non-member State.

G. Television and similar services

- IS2.8 Income from television and similar services, such as publication fees charged when the images within the United Nations Photo Library are used in commercially published print monographs and service fees and royalty fees charged for the research, screening and duplication of the United Nations video and film collection, is estimated at \$80,000 for 2023, representing an increase of \$20,000, based on the higher projected number of requests and licences for photographs and audiovisual footage for 2023.

H. Miscellaneous income

- IS2.9 Various receipts that cannot properly be classified under any of the preceding subheadings, such as contributions from agencies, funds and programmes for their prorated share of the costs of the administration of justice, are included under this heading. The expected income under this heading is set out in table IS2.5. Given its nature, miscellaneous income is, for the most part, difficult to predict with accuracy. The estimate of \$6,103,100 for 2023 reflects a conservative amount that is lower, by \$605,300, than the approved estimate of \$6,708,400 for 2022, owing mainly to: (a) a lower share of peacekeeping operations for the costs of the administration of justice, to be funded from the support account, based on headcount statistics (\$288,300); and (b) the discontinuation of the annuities received from the Fondation pour la Cité de la musique de Genève related to the 90-year lease with development rights for the Villa and Parc des Feuillantines land, which was outlined in paragraph 112 of the sixth annual progress report of the Secretary-General on the strategic heritage plan of the United Nations Office at Geneva ([A/74/452](#)). Following the negative results of a referendum by the voters of the city of Geneva on the project in late 2021, the foundation has discontinued the project and advance lease payments will no longer be made to the Organization.

Table IS2.5

Annex

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/76/7](#) and [A/76/7/Corr.1](#)

The Advisory Committee notes the estimated decrease under income from rental of premises and trusts that the available office space will be put to optimal use by the Organization and that an update will be provided in the next report of the Secretary-General on income section 2 (para. IS2.1).

The Committee again trusts that updated information on the new memorandum of understanding with UNOPS and its financial implications will be provided to the General Assembly at the time of its consideration of the present report and included in the next report of the Secretary-General on income section 2 (see also [A/75/7](#), para. IS2.3 and [A/74/7](#), para. IS2.4) (para. IS2.2).

The Economic Commission for Latin America and the Caribbean, Santiago, and the Economic Commission for Africa, Addis Ababa, are projecting increases in rented spaces in 2023, while the United Nations Office at Geneva and the Economic and Social Commission for Asia and the Pacific, Bangkok, are projecting higher rental rates based on market conditions. However, at Headquarters, New York, one tenant, whose lease with the Secretariat is not expected to be extended in 2023 and beyond, will be terminating its lease in the DC1 Building, and the United Nations Office at Nairobi is projecting a change in occupancy of tenants for 2023.

At the time of issuance of the present report, the United Nations Office for Project Services (UNOPS) has not shared with the United Nations Secretariat its new fee proposal. However, as was projected for 2022, it is projected for 2023 that the refund mechanism, whereby the Secretariat would receive a refund if the cumulative indirect costs paid to UNOPS exceed specified threshold(s) in a calendar year, would be eliminated from the fee structure, as it has been deemed administratively burdensome, and so no related miscellaneous income is estimated for 2023.

General Assembly

	Number	Details
<i>Regular budget</i>		
Proposed for 2023	64	2 P-5, 4 P-4, 4 P-3, 3 P-2/1, 7 GS (PL), 42 GS (OL), 2 SS
Approved for 2022	64	2 P-5, 4 P-4, 4 P-3, 3 P-2/1, 7 GS (PL), 42 GS (OL), 2 SS

- IS3.1 The activities and operations under this section, which are carried out at Headquarters, Geneva, Vienna, Nairobi, Addis Ababa and Bangkok, are coordinated and managed by the following organizational units: (a) the Department of Global Communications; (b) the Department of Economic and Social Affairs; (c) the Department of Management Strategy, Policy and Compliance; (d) the Department of Operational Support; (e) the United Nations Office at Geneva; (f) the United Nations Office at Vienna; (g) the United Nations Office at Nairobi; (h) the Economic Commission for Africa (ECA); and (i) the Economic and Social Commission for Asia and the Pacific (ESCAP).
- IS3.2 The projected aggregate net deficit in respect of all services to the public for 2023 (\$3,177,000) reflects a decrease in the net deficit by \$42,000, compared with the estimated net deficit of \$3,219,000 for 2022, as shown in table IS3.4.
- IS3.3 The percentage distribution of the total gross revenue and expenditure for services to the public during 2023 is shown in table IS3.3.

Note: The following abbreviations are used in the tables: GS, General Service; OL, Other level; PL, Principal level; SS, Security Service.

- IS3.4 The Facilities and Commercial Activities Service in the Department of Operational Support will provide the management and coordination of the activities of the United Nations Postal Administration, which will continue to publicize the work and achievements of the United Nations and its specialized agencies through philatelic sales.
- IS3.5 Operations are consolidated into two entities: (a) the United Nations Postal Administration, New York office; and (b) the United Nations Postal Administration, European office, in Vienna. Each entity reports to the Chief of the United Nations Postal Administration and the Chief of the Facilities and Commercial Activities Service of the Division of Administration, in New York. In addition, the United Nations Postal Administration maintains a retail counter at the Palais des Nations in Geneva and a sales office in Beijing.
- IS3.6 In 2023, the United Nations Postal Administration will continue to innovate and improve upon the new types of postage stamps introduced in recent years, including stamps for charity and United Nations crypto stamps, and intends to introduce specialized “made to order” stamp sheets. In addition, the popular “Lunar New Year”, “Sport for Peace”, “Endangered Species” and “World Heritage” stamps series will continue to be featured in the annual programme of issuances.
- IS3.7 The United Nations Postal Administration will also continue its efforts to contain operating costs and improve customer services and delivery times, including through the implementation of its new sales platform. It will further enhance its multilingual website to attract more customers from all corners of the world and increase its social media presence by developing and promoting its stamps through multimedia channels. Based on the recommendations of an assessment to be conducted in 2022, new marketing initiatives will be launched with the aim of reaching new groups of customers.
- IS3.8 The United Nations Postal Administration works closely with other postal administrations, dealers and philatelic agents to promote and distribute United Nations stamps around the world. It regularly works with governmental organizations and permanent missions to the United Nations to issue stamps to commemorate world events, prominent people, international days and anniversaries. It also proposes and jointly issues stamps with other postal administrations yearly and will continue to do so in 2023.
- IS3.9 The United Nations Postal Administration has and will continue to represent the Organization at international stamp shows throughout the world to increase public awareness of United Nations philatelic products and contribute to the outreach objectives of the Organization. It is an active member of the Universal Postal Union and participates in its conferences and meetings frequently.
- IS3.10 The United Nations Postal Administration plans to further reduce its operating loss in 2023 as it strives towards profitability despite increased requirements for maintenance of the new sales platform and for product development, and the continued challenge of a declining philatelic market and the ageing of its core stamp-collecting base of subscription customers.
- IS3.11 Overall revenue for 2023 is projected to be \$3,812,100. The slight upward projection is based on the popularity of recent stamp issuances, in particular in the Chinese market, and the assumptions that: (a) all retail shops at Headquarters will operate normally, with similar numbers of visitors to the United Nations as before the outbreak of the coronavirus disease (COVID-19) pandemic; (b) stamp rates in the United States of America and Europe will increase in 2023; and (c) global stamp shows and exhibitions in the United States, Europe and Asia will resume and be well attended.
- IS3.12 Table IS3.11 lists all deliverables, by category and subcategory, for 2023.

Table IS3.11
Deliverables for 2023, by category and subcategory

Category and subcategory

D. Communication deliverables

Outreach programmes, special events and information materials: philatelic bulletins and materials in English, French, German and Italian; and United Nations postage stamps and postal stationery, including the subject, design and quantity, for an average of 7 stamp issues per year.

Resource requirements (before recosting)

- IS3.13 The amount of \$3,910,200, reflecting a decrease of \$61,300, would provide for the financing of 18 posts, as shown in table IS3.10, of which 11 posts, including 1 P-5, 3 General Service (Principal level) and 7 General Service (Other level), would be located in New York, and 7 posts, including 1 General Service (Principal level) and 6 General Service (Other level), would be located in Vienna, as well as non-post requirements to support the implementation of mandates. United Nations Postal Administration operations retain a core of General Service staff to fulfil key operational functions, such as graphic design, marketing, sales, order processing, invoicing, customer service, inventory control and accounting, and rely on a team of contracted personnel to meet the Administration's production and order fulfilment workloads.
- IS3.14 Non-post resources in the amount of \$1,437,700, reflecting a decrease of \$61,300, would provide for other staff costs, hospitality, travel of staff, contractual services, general operating expenses, supplies and materials, and furniture and equipment. The decrease is attributable to reduced requirements under: (a) travel of staff resulting from a reduced number of staff travelling to stamp exhibitions; (b) contractual services for outsourced stamp artists owing to higher reliance on internal capacity; and (c) general operating expenses for miscellaneous services based on the current expenditure pattern.

2. Sale of United Nations publications

IS3.15 The activities programmed under this heading for 2023 are aimed at enhancing understanding of the role, work and concerns of the United Nations and to encourage the exchange of ideas, information and knowledge in support of the goals of the Organization. The objective is to improve the visibility of United Nations publications and increase their readership in all formats through the targeted acquisition, marketing, sale, distribution, licensing and publishing of reports, books, periodicals, selected documents, databases, e-books, mobile applications and other electronic products. These activities, including the operation of the United Nations Bookshop at Headquarters, are carried out by the Sales and Marketing Section in the Outreach Division of the Department of Global Communications at Headquarters. A related aim is to generate revenue for the Organization while supporting the widest possible dissemination of United Nations information to the public. The Publications Board, chaired by the Director of the Outreach Division in the Department, has overall oversight of the publications programme.

IS3.16 The proposed plan for 2023 builds upon the consolidated electronic publishing programme, accompanied by the creation and sale of a wider selection of publications for the general public:

- (a) The electronic publishing programme is based on adding value to publications through aggregation and services. Two main platforms constitute the foundation of the programme and

will continue to be developed and adapted in order to respond to the evolving needs of the public in accessing United Nations information and publications since the pandemic:

- (i) The United Nations iLibrary, which continues to increase in scope and functionality and constitutes the main platform for easily accessing United Nations publications in one place. This subscription-based platform provides access to more than 10,000 United Nations publications and other substantial digital content such as data and working papers, allowing for the publication of more multilingual content and searches by Sustainable Development Goal;
- (ii) The e-commerce website, shop.un.org, which promotes the work of the Organization and provides direct access to United Nations publications in print and digital formats for purchase by the general public around the world. Continued development of the functionality and content, and an increased scope of products offered, will contribute to constant growth of usage and sales;
- (b) Wider distribution of electronic products, such as e-books and data products through new channels, will continue to be a priority;
- (c) The extensive geographically diverse network of print-on-demand and distribution capability will continue to support the print programme and e-commerce sales, reducing the time needed for production, in an environmentally sustainable manner;
- (d) The development of attractive print publications for the general public, focusing on youth and school markets, is a key component of the programme;
- (e) In addition, the plan includes the strengthening of the rights and licensing activities relating to the commercial use of the Sustainable Development Goals logo and icons and to digital content for institutional customers worldwide, including data aggregators, for further redistribution.

IS3.17 The publishing industry continues to change significantly, with electronic publications and aggregated platforms progressively becoming mainstream reading and research choices. At the same time, global book sales across all publishers are stagnating. United Nations publications are no exception to this global trend. In the light of the dramatic scaling back of physical book acquisitions by academic libraries and other principal institutional customers, electronic publishing continues to play an increasing role, not only in delivering multilingual content to the customer, but also, most importantly, in reaching audiences and stimulating thought-provoking discussions and debate on the most critical issues of world affairs. The faster, mobile-responsive United Nations iLibrary platform improves usability and discoverability, which are necessary for the future success of United Nations publications in this market environment.

IS3.18 In this context, electronic publishing becomes essential, as a way not only to deliver content, but also to enhance the visibility of United Nations knowledge. The Sales and Marketing Section will continue to leverage existing and new opportunities. These include:

- (a) Business and revenue opportunities related primarily to new distribution channels in print and digital content, including licensing digital and other content, to third parties and aggregators for further redistribution that the Section will diligently pursue;
- (b) Visibility opportunities that require the continued development of back-office systems, specifically with regard to the way in which the Section assigns metadata, bibliographic information, keywords and other tags to the content published by the Organization, so that it can be found on the Internet more easily by researchers, scholars and students.

IS3.19 The Sales and Marketing Section will continue to focus on important supporting and auxiliary activities, such as title management for the cataloguing of bibliographic and marketing metadata, and on the continuing management of the e-commerce website for the execution of orders for publications and merchandise. Other activities would include the optimization and expanded use of third-party digital asset management and distribution systems and the management of file processing for print, web and accessible e-book products and wider integration into print-on-demand facilities

at various geographic locations. In the promotional sphere, the Section will continue to effectively deploy new technologies, including social media tools, to execute cutting-edge marketing campaigns to expand the reach of United Nations publications.

IS3.20 Table IS3.15 lists all deliverables, by category and subcategory, for 2023.

Table IS3.15

Deliverables for 2023, by category and subcategory

Category and subcategory

D. Communication deliverables

Outreach programmes, special events and information materials: United Nations publications, periodicals, data and subscription products, and other print and digital published materials in all official languages, for sale and dissemination; United Nations Bookshops in New York and Geneva; and organization of “meet the author” events.

External and media relations: advertising, publicity, social media campaigns, newsletters and participation in the principal international publishing industry events, directly or through authorized representatives; and collaboration with the publishing industry on the promotion of the Sustainable Development Goals and other United Nations priorities.

Digital platforms and multimedia content: management of the United Nations iLibrary and the e-commerce platform, shop.un.org, to efficiently aggregate and disseminate United Nations publications in all six official languages.

Resource requirements (before recosting)

IS3.21 The amount of \$5,514,700, reflecting a net decrease of \$386,900, would provide for the financing of 21 posts, as shown in table IS3.14, as well as non-post requirements to support the implementation of mandates.

IS3.22 Non-post resources in the amount of \$2,492,700, reflecting a net decrease of \$386,900, would provide for other staff costs, hospitality, travel of staff, contractual services, general operating expenses, supplies and materials, and furniture and equipment. The net decrease is attributable mainly to reduced requirements under: (a) contractual services for fulfilment services and advertising for the sale of publications; and (b) general operating expenses for the cost of publications sold at the United Nations Bookshops.

3. Services to visitors

- IS3.23 The activities related to services for visitors, including guided tour operations and briefing programmes, are the responsibility of the Department of Global Communications, which maintains Visitors' Sections at Headquarters and the United Nations Offices at Geneva, Vienna and Nairobi. The objective is to promote an informed understanding of the purpose, role and work of the United Nations to the widest audience possible and to highlight United Nations premises as an attraction for the general public and for specialized groups, including school groups and university students from all Member States. In line with the Department's global communications strategy, there is a strong emphasis on inspiring action and emphasizing personal engagement in pursuing and promoting the aims of the Organization, and, in particular, the Sustainable Development Goals.
- IS3.24 All four Visitors' Sections (New York, Geneva, Vienna and Nairobi) continued to be heavily affected by the COVID-19 pandemic, and United Nations premises remained closed across the globe for most of 2021 and the beginning of 2022. While in-person operations in Geneva and Vienna resumed on a limited scale in August and September 2021, respectively, Headquarters reopened briefly and under strict COVID-19 safety measures only from 1 to 21 December, with Nairobi remaining closed to the public in 2021. With the surge of the Omicron variant, New York had to close again to the public from 22 December 2021 until 7 April 2022, when guided tours resumed at a limited capacity, with fewer tours per day and fewer visitors per tour compared with pre-pandemic levels. Efforts to fulfil the Sections' outreach mandate and generate revenue have continued throughout the pandemic, with virtual tours and online briefings being offered along with other initiatives to continue delivering on their mandate. For 2022, all four duty stations are prioritizing safe reopening efforts, proactive marketing, updates and improvements to the tour route and further expansion of partnerships with civil society, academic partners, municipalities and the tourism industry. The Department also plans to continue offering both in-person and online tours and briefings to the general public in all four duty stations.
- IS3.25 Projecting visitor numbers is complex, even more so amid the uncertainty of the ongoing pandemic. Plans for reopening in 2021 and corresponding income projections were heavily affected by COVID-19 variants and rising infection numbers around the globe. Visitor numbers in 2023 could be affected by any lingering restrictions affecting travel and tourism activities.
- IS3.26 With a gradual return to an in-person operation, estimated visitor numbers for all duty stations for 2023 have been based on a percentage of the total number recorded in the last full year of operations (from 2019 to early in 2020), combined with a projected demand for virtual tours and online briefings based on historical sales data from 2020 and 2021.

^a In-person visitors and online visitors.

^b As reflected in the 2022 proposed budget.

^c Reduced estimates versus 2022 budget due to the impact of COVID-19.

Headquarters

- IS3.27 The Visitors' Section at Headquarters organizes guided tours, as well as briefing programmes and outside speaking engagements, in which United Nations officials address groups of students, representatives of non-governmental organizations (NGOs) and other audiences on a range of issues related to the United Nations. Due to the closure of Headquarters during the COVID-19 pandemic, all activities – virtual tours, online briefings, webinars for teachers and other events – were moved online in the spring of 2020 and continued to be held online throughout 2021. Feedback from visitors has been very positive, and the Section plans to maintain, and even increase, these online offerings in 2023 after noticing an increase in demand for online products. For instance, virtual tours and online briefings showed a 43 per cent increase from June to December 2021 in comparison with the same period in 2020. Overall, 420 online events were conducted in 2021, generating \$117,000 in revenue.
- IS3.28 The online nature of these services has the additional benefit of reaching a much wider global audience, without having to consider constraints such as the availability of conference rooms for in-person briefings with United Nations expert speakers, or COVID-related access restrictions for on-site tours. In this regard, a hybrid operation, combining online and in person activities, is foreseen for 2023 and in the future.
- IS3.29 In 2023, the Visitors' Section will continue to conduct robust marketing and outreach campaigns to promote the United Nations as a tourist and educational destination, not only in New York but also globally, taking into consideration the reach of its online offerings. As recommended by the Advisory Committee on Administrative and Budgetary Questions in its first report on the proposed programme budget for 2022 (A/76/7), the Section will make optimum use of digital technologies and online platforms by introducing 360-degree immersive videos for online tours and interactive displays for in-person visitors. The Section will continue to develop further some of the specialized tours and other activities that were introduced in previous years, such as thematic tours, garden tours, VIP tours and special webinars and other events aimed at educators. Not only is this in line with the global communications strategy, but it also meets the demand of a wider audience and offers the potential to generate additional revenue.

- IS3.30 The Section relies on a core staff of fixed-term, full-time tour guides who conduct tours in person and online in more than a dozen languages, as well as other specialized tours on a range of subjects relevant to the work of the United Nations. To maintain maximum flexibility in an uncertain environment, the Section will continue to rely on additional temporary staff hired as individual contractors, in particular for the peak seasons, all while expanding online activities.
- IS3.31 The Visitors' Section has considered the possibility that other COVID-19 variants may disrupt the operation in the future. To offset the partial loss of revenue caused by a potential suspension of guided tours at Headquarters, followed by a period of a scaled-down operations due to COVID-19 restrictions, combined with upward cost pressures, such as increases in staffing costs due to cost-of-living adjustments, an increase in guided tour ticket pricing is deemed necessary effective 2023. The price increase would allow the Section to maintain its current staffing and continue offering in-person guided tours, along with online tours and briefings. Following a market survey of comparable New York City attractions, price increases are planned as follows: from \$22 to \$26 for adults, from \$15 to \$18 for seniors and students, and from \$12 to \$15 for children.

Geneva

- IS3.32 At the United Nations Office at Geneva, the Visitors' Section continues to deliver guided tours in 12 languages, with a focus on university students and school pupils among its group tours. Measures introduced by the Section over the past few years, such as cooperation with the local tourism board, the introduction of thematic tours and proactive promotional efforts, resulted in a steady increase in the number of visitors until the beginning of the COVID-19 crisis in March 2020. In addition to on-site tours of the Palais des Nations, online tours developed in 2021 are also expected to be offered in 2023. The Section will continue with tours adapted to the renovation work linked to the strategic heritage plan of the United Nations Office at Geneva, modifying routes with new elements (such as the United Nations Museum Geneva) and including information products in various formats. Adaptations of public information support material for visitors who are visually and audibly impaired are also proposed.
- IS3.33 The move of the Visitors' Section's sales operation online in 2021 will continue to improve customer service. The ticket price in 2023 will remain at 2022 levels. For individual visitors, the prices are 18 Swiss francs for adults, 16 Swiss francs for university students and senior citizens, and 10 Swiss francs for those under the age of 18. For groups, the prices are 16 Swiss francs for adults, 13 Swiss francs for university students and senior citizens and 10 Swiss francs for those under the age of 18.

Vienna

- IS3.34 At the United Nations Office at Vienna, the Visitors' Section continues to deliver guided tours and lectures in person and online in more than a dozen languages, with a special focus on children and young people. Visitor surveys have shown both virtual and on-site tours to be highly effective in raising visitors' knowledge and opinion of the work of the United Nations. In autumn 2021, on-site tours resumed after an 18-month suspension, with strict capacity limits and entry requirements to prevent the spread of COVID-19. Despite these restrictions, the Section was able to reach a quarter of its usual volume of visitors during the fourth quarter of 2021, a period that still included intermittent lockdowns in the host city and very little tourist activity.
- IS3.35 Extensive promotion will begin in 2022, with a view to resuming pre-COVID trends related to income and visitor numbers. In preparation, the Section has invested in upgrading its on-site visitor infrastructure to attract a larger share of high-income visitors, such as tourists and professional groups, and justify more robust pricing that will eventually allow the Section to break even. For example, the Section now offers a more attractive range of United Nations-branded auxiliary sales items for purchase with a tour, improved service in the Visitor Centre, lecture rooms equipped with state-of-the art projection equipment, and an audiovisual studio set-up to facilitate high-quality virtual tours and lectures. An overhaul of multimedia resources for virtual tours and on-site exhibits will be completed in 2022. Due to cost pressures and possible COVID-19-related reductions in the

number of visitors, an increase in prices for 2023 is planned as follows: from €12 to €15 for adults and from €10 to €13 for students and retirees, with tickets for schoolchildren remaining at €7.

Nairobi

- IS3.36 The pandemic has been particularly difficult for the Visitors' Section in Nairobi, which remained closed to the public at the start of 2022. The Section was able to offer limited online tours and briefings and will continue to do so, charging a modest fee when possible.
- IS3.37 The Section hopes to be able to return to physical tours at a later point in 2022, with the reopening of the United Nations compound. Nevertheless, a continuation of the upward trends witnessed in the years before the pandemic is unlikely. This is mainly due to the interruption of the Section's services, travel restrictions and the overall economic situation in Kenya, where schools have been closed or are struggling financially, and international tourists are visiting the country in reduced numbers. For 2023, the Section plans a hybrid approach of limited physical tours through the United Nations complex and the continuation of virtual briefings, through which a larger international audience can potentially be reached. In order to revive demand, and concentrating on physical tours through the complex, the Section will invest in marketing and outreach campaigns to known and new target groups.
- IS3.38 Table IS3.20 lists all deliverables, by category and subcategory, for 2023.

Table IS3.20

Deliverables for 2023, by category and subcategory

Category and subcategory

D. Communication deliverables

Outreach programmes, special events and information materials: guided tours, including the development of different tour concepts for general audiences, including young people and children, as well as VIP tours for high-level officials and Goodwill Ambassadors in approximately 20 languages, offered at Headquarters and the United Nations Offices at Geneva, Vienna and Nairobi; design and production of exhibits and interactive tour materials for visitors to all four duty stations in multiple languages; briefing programmes at Headquarters and United Nations Offices, as well as outside speaking engagements, on various United Nations issues presented by Secretariat officials in response to requests from academic institutions, NGOs and other groups; videoconferences linking groups away from Headquarters and United Nations Offices with Secretariat and/or mission officials; and engagement with visitors for promotional purposes and as multipliers of United Nations communications priorities, including on social media and through partnerships with local actors in the educational and tourism sectors in New York, Geneva, Vienna and Nairobi.

Resource requirements (before recosting)

- IS3.39 The amount of \$5,945,500, reflecting a decrease of \$65,600, would provide for the financing of 15 posts, as shown in table IS3.18, in the public services of the Department of Global Communications (Headquarters: 2 P-3, 1 General Service (Principal level) and 7 General Service (Other level); Geneva: 1 P-3 and 2 General Service (Other level); Vienna: 1 P-2; and Nairobi: 1 P-2), as well as non-post requirements to support the implementation of mandates.
- IS3.40 Non-post resources in the amount of \$3,696,100, reflecting a decrease of \$65,600, would provide for other staff costs, hospitality, travel of staff, contractual services, general operating expenses, supplies and materials, and furniture and equipment. The decrease is attributable to reduced requirements for additional part-time tour guides as individual contractors in New York and Geneva to meet seasonal demand.

4. Revenue services of the Department of Economic and Social Affairs

Table IS3.21

Estimates of gross and net revenue (after recosting)

(Thousands of United States dollars)

	2022 approved estimate	2023 estimate	2023 increase (decrease)
Statistics			
Gross revenue	743.2	743.2	–
Less expenses against revenue	732.4	759.1	26.7
Total net revenue	10.8	(15.9)	(26.7)

Table IS3.22

Summary of requirements by category of expenditure

(Thousands of United States dollars)

	2021 expenditure	2022 appropriation	Changes		2023 estimate (before recosting)	Recosting	2023 estimate
			Amount	Percentage			
Non-post	575.6	732.4	(11.6)	(1.6)	720.8	38.3	759.1
Total	575.6	732.4	(11.6)	(1.6)	720.8	38.3	759.1

IS3.41 In 2023, the sales activities of the Department of Economic and Social Affairs under the present section will complement the work of the Statistics Division. The general objective of the activities is to ensure a high-level quality of the databases of the Division, including their metadata. These databases cover the international trade in goods and services statistics (UN Comtrade database), the database on business statistics, the database on national accounts statistics, the classifications registry, the global enterprise group registers and other databases of the Division. The activities also include the facilitation of data exchange between international agencies and countries, and the training on and use of the Statistical Data and Metadata Exchange. Within this general objective, the activities are also intended to assist developing countries in improving the quality, availability and dissemination of their official statistics for inclusion in the databases of the Division, thereby ensuring the continued value of such data for the customer base.

IS3.42 It is expected that UN Comtrade will continue to attract a wide and expanding audience of large data users with added services and products such as the Trade Data Lake, and access to an extended scope of data items. The free access to the database can fulfil the needs of occasional users owing to the commitment to making data more accessible.

Resource requirements (before recosting)

IS3.43 The amount of \$720,800 for non-post resources, reflecting a decrease of \$11,600, would provide for other staff costs, travel of staff, contractual services, general operating expenses, supplies and materials, furniture and equipment, and grants and contributions to support the implementation of mandates. The decrease is attributable to reduced requirements under: (a) contractual services, reflecting lower requirements for the hosting of databases; and (b) grants and contributions due to the increased use of virtual meetings and workshops.

5. Sale of gift items

Table IS3.23

Estimates of gross and net revenue (after recosting)

(Thousands of United States dollars)

	<i>2022 approved estimate</i>	<i>2023 estimate</i>	<i>2023 increase (decrease)</i>
Headquarters gift shop			
Gross revenue	300.0	300.0	–
Less expenses against revenue	–	–	–
Total net revenue	300.0	300.0	–

IS3.44 The gift shop at Headquarters provides staff, members of delegations and visitors with United Nations mementos and souvenirs, as well as handicrafts and other souvenirs from around the world. The gift shop at Headquarters is operated by a contractor that is required to provide the United Nations with a percentage of gross sales and a utilities fee.

IS3.45 The gift shop has been closed since 12 March 2020 owing to the COVID-19 pandemic. In the light of the significantly lower sales anticipated as a result of the closure of Headquarters to visitors and the extended pandemic-related restrictions, an amendment was signed in October 2020 to reduce the commission by more than half its pre-pandemic level, to be applicable when the gift shop is allowed to reopen at Headquarters. The revenue projections for 2023 are based on the new commission rates and the assumption that the number of visitors will return to pre-COVID-19 levels. However, given the uncertainties about the number of visitors post-pandemic, this forecast may be subject to significant variability.

6. Garage operations

Table IS3.24

SS	2	2	–	–	–	–	2	2
Total	6	6	–	–	–	–	6	6

- IS3.46 The garage operations at Headquarters, Geneva and Bangkok provide parking facilities for delegates and staff under conditions and at rates established by the United Nations.
- IS3.47 At Headquarters, the revenue projections for 2023 are based on the assumption that garage operations will normalize and remain stable throughout the year. The projections also take into consideration a plan to issue additional operational parking permits to offices and departments. Given that the utilization of the garage may be altered by an increase in flexible working arrangements as staff return to the workplace, this forecast may be subject to increased variability.
- IS3.48 While the Secretary-General has set prices applicable to staff, the General Assembly has, in the past, decided on the prices for the use of garage facilities at Headquarters for members of permanent missions. In that regard, it should be noted that the present prices applicable to members of delegations at Headquarters (\$2.50 for overnight parking and a monthly rate of \$75 for 24-hour parking) have been in place since January 1984. Those charges were approved by the Assembly in its resolution [38/236](#), following consideration of the proposed programme budget for the biennium 1984–1985 and the related report of the Advisory Committee on Administrative and Budgetary Questions ([A/38/7 \(Supp\)](#)). The Assembly may wish to consider adjusting the fees applicable to delegates in line with the cost of living increases in New York, as was applied to staff effective July 2018.

Resource requirements (before recosting)

- IS3.49 The amount of \$1,268,500, reflecting a net increase of \$7,600, would provide for the financing of six posts, as shown in table IS3.26 (Headquarters: 2 General Service (Other level) and 2 Security Service; and Geneva: 2 General Service (Other level)), as well as non-post requirements to support the implementation of mandates.
- IS3.50 Non-post resources in the amount of \$387,300, reflecting a net increase of \$7,600, would provide for other staff costs, contractual services, general operating expenses and supplies and materials. The net increase is attributable mainly to increased requirements for the garage administration office at Headquarters, offset in part by reduced requirements for the garage administration office at Bangkok.

7. Catering operations

- IS3.51 The United Nations catering contract at Headquarters, signed on 31 December 2015, is currently due to expire on 31 December 2022. The revenue at Headquarters was intended to have been generated by a commission levied on the revenue of the contractor providing the catering services. However, the mitigation measures implemented to contain the COVID-19 pandemic at Headquarters resulted in significant losses to the vendor. All eight dining locations and the catering services at Headquarters had to be closed in March 2020 when all staff other than those whose essential functions required their physical presence at Headquarters transitioned to remote working. Only three of the eight dining locations were reopened in 2021 to meet the reduced demand under the phased return to the premises.
- IS3.52 In accordance with the recommendation of the Advisory Committee on Administrative and Budgetary Questions in paragraph IS3.24 of its first report on the proposed programme budget for 2021 ([A/75/7](#) and [A/75/7/Corr.1](#)), as endorsed by the General Assembly, an independent assessment of the catering operations was undertaken in 2021. The independent assessment report has been finalized and the resulting recommendations are being incorporated in the new solicitation for catering services. Given the uncertainties of catering demands as staff return to the office and activities resume, as well as market conditions, the recommendation is that the new catering contract be structured with a phased approach. The first phase would involve adopting a subsidy model, and the second phase would involve transitioning to a profit-and-loss model after a certain sales amount is reached. Bidders would propose the level of sales that would trigger the transition from a subsidy model to a profit-and-loss model. The assessment also recommended a longer-term contract of five years initially, with a five-year optional extension given the significant investments in time and effort to operate such a complex contract at United Nations Headquarters and make it financially sustainable.
- IS3.53 While continuing to take into account developments related to the COVID-19 pandemic outbreak and market conditions, the Administration intends to issue a solicitation for a new catering contract in line with the recommendations of the independent assessment. As such, the new contract is anticipated to initially follow a subsidy model, and to transition to a profit-and-loss model once specific sales targets are met. The new solicitation will be open to all vendors and in full compliance with United Nations procurement policies, guidelines and procedures. This procurement exercise is expected to conclude in 2023. Arrangements to extend the contract with the existing provider will be made as necessary to ensure continuity of services.
- IS3.54 Pending new contract terms and taking into consideration market conditions and the uncertainties surrounding building occupancy patterns and external events, it is projected that subsidies, at a level comparable to what was budgeted for 2022, would be required in 2023 to ensure the availability of quality catering services at Headquarters. Accordingly, no revenue for the United Nations is projected for 2023.
- IS3.55 Historically, food operations at Headquarters have relied on external catering events for profitability because cafeterias have typically generated losses owing to narrow margins. To mitigate losses, the availability of the various dining facilities will be evaluated on an ongoing basis and adjusted as required as sales patterns stabilize and external catering returns.

- IS3.56 The catering service at ESCAP is provided for the benefit of staff, delegates and participants in non-United Nations meetings and conferences held on the premises. The catering operation generates incidental revenue, and the anticipated revenue from it in Bangkok is estimated at \$63,300 for 2023.

Resource requirements (before recosting)

- IS3.57 The amount of \$2,035,700, reflecting an increase of \$117,200, would provide for the financing of one post (P-4) in the Division of Administration at Headquarters, as well as non-post requirements to support the implementation of mandates both at Headquarters and Bangkok.
- IS3.58 Non-post resources in the amount of \$1,788,000, reflecting a net increase of \$117,200, would provide for other staff costs, contractual services, general operating expenses, and furniture and equipment. The net increase relates mainly to higher requirements under general operating expenses for the repair and maintenance of the equipment in the catering facilities at Headquarters, as all of the equipment will be past its useful life of seven years by 2023.

8. Other commercial operations

Table IS3.30

Estimates of gross and net revenue (after recosting)

(Thousands of United States dollars)

	<i>2022 approved estimate</i>	<i>2023 estimate</i>	<i>2023 increase (decrease)</i>
Vienna commercial activities			
Gross revenue	10.8	–	(10.8)
<i>Less expenses against revenue</i>	33.0	–	(33.0)
Net revenue	(22.2)	–	22.2
ESCAP Conference Centre			
Gross revenue	301.3	301.3	–
<i>Less expenses against revenue</i>	283.4	294.6	11.2
Net revenue	17.9	6.7	(11.2)
ECA Conference Centre			
Gross revenue	41.7	16.3	(25.4)
<i>Less expenses against revenue</i>	–	–	–
Net revenue	41.7	16.3	(25.4)
Total gross revenue	353.8	317.6	(36.2)
<i>Less total expenses against revenue</i>	316.4	294.6	(21.8)
Total net revenue	37.4	23.0	(14.4)

Table IS3.31
Summary of requirements by category of expenditure

(Thousands of United States dollars)

	2021 expenditure	2022 appropriation	Changes		2023 estimate (before recosting)	Recosting	2023 estimate
			Amount	Percentage			
Non-post	226.6	316.4	(34.0)	(10.7)	282.4	12.2	294.6
Total	226.6	316.4	(34.0)	(10.7)	282.4	12.2	294.6

- IS3.59 The main entrance to the Visitor Centre of the Vienna International Centre is expected to undergo refurbishment commencing in 2023, which will not allow for commercial activities to continue. Therefore, no income and expenditure are expected for 2023.
- IS3.60 The other component under this heading relates to the conference centres at ESCAP and at ECA. For 2023, the total gross revenue of the United Nations Conference Centre at ESCAP is estimated at \$301,300, with the assumption that COVID-19 restrictions are lifted and the number of requests to organize conferences and meetings at the conference centre increases and reaches the same level as in 2022.
- IS3.61 The United Nations Conference Centre at ECA provides conference halls and exhibition facilities to other United Nations agencies, NGOs, intergovernmental organizations, government offices and others, for a fee. However, owing to the outbreak of the COVID-19 pandemic, the Conference Centre has been closed since March 2020. Consequently, a majority of the planned meetings and conferences have been held virtually, and revenue from the rental of conference rooms has dropped drastically. The COVID-19 outbreak led to the relocation of in-person activities to the online platform, where a significant number of global meetings and conferences have convened virtually with some benefits and advantages, including a reduction in carbon emissions and an increase in meeting and conference participation. Given the uncertainties as to when the Conference Centre could return to normal operations, the gross revenue resulting from the rental of the Conference Centre is estimated at \$16,300 for 2023. The ongoing maintenance costs of the Conference Centre are budgeted under section 18, Economic and social development in Africa.

Resource requirements (before recosting)

- IS3.62 The amount of \$282,400 for non-post resources, reflecting a decrease of \$34,400, would provide for other staff costs, travel of staff, contractual services, general operating expenses, supplies and materials, and furniture and equipment to support the implementation of mandates. The reduced requirements are attributable mainly to there being no requirements under other staff costs and contractual services for the commercial operations at the Vienna International Centre due to the suspension of activities as a result of the refurbishment of the Visitor Centre, to start in 2023, offset partly by additional requirements under contractual services at the Conference Centre at ESCAP due to increases in the service-level fee for the online meetings management application (gMeets).

B. Programme support

Revenue Accounts Unit

Table IS3.32

Summary of requirements by category of expenditure

(Thousands of United States dollars)

	2021 expenditure	2022 appropriation	Changes		2023 estimate (before recosting)	Recosting	2023 estimate
			Amount	Percentage			
Post	470.9	491.1	–	–	491.1	18.8	509.9
Total	470.9	491.1	–	–	491.1	18.8	509.9

Table IS3.33

Post requirements

Category and grade	Established regular budget		Temporary posts				Total	
	2022	2023	Regular budget		Extrabudgetary		2022	2023
			2022	2023	2022	2023		
Professional and higher
