121. The proposed resource requirements for 2023 for the Mixed Commission amount to \$3,781,300 (net of staff assessment) and would provide for the deployment of one military observer (\$58,800), salaries and common staff costs (\$1,929,200) for nine international positions (2 P-5, 6 P-4 and 1 Field Service) and two national positions (Local level), as well as operational costs (\$1,793,300), comprising the costs for consultants and consulting services (\$530,100), official travel (\$202,300), facilities and infrastructure (\$213,100), ground transportation (\$54,500), air operations (\$196,300), communications and information technology (\$376,400), and other supplies, services and equipment (\$220,600).
122. In 2023, no change is proposed to the number and levels of positions. For international positions, a vacancy rate of 5 per cent has been applied to the estimates, whereas an assumption of full incumbency has been applied to the estimates for national positions based on recent incumbency.
123. The increase in requirements for 2023 compared with the appropriation for 2022 is attributable mainly to: (a) additional requirements for civilian personnel costs, owing to the application of a higher percentage of common staff costs for international staff, based on 2021 expenditure experience and on the increase of the post adjustment multiplier in Senegal in 2022; and (b) additional requirements for operational costs under communications and information technology, for replacement of obsolete equipment and acquisition of public information and publication services with respect to the broadcasting and dissemination of information, offset by decreases in military and police personnel costs, due to the application of the new mission subsistence allowance rates.

Extrabudgetary resources

124. In 2022, extrabudgetary resources in the amount of \$2.3 million are estimated to support the construction of pillars along the border between Cameroon and Nigeria.
125. In 2023, extrabudgetary resources in the amount of \$1.4 million are projected to continue to support the pillar emplacement project. The Mixed Commission will continue fundraising activities to implement socioeconomic projects for the benefit of populations in the vicinity of the demarcation exercise.
126. The decrease in the estimated extrabudgetary resources to be utilized in 2023 compared with 2022 is due to the lower number of pillars identified for construction.

5. Office of the United Nations Special Coordinator for Lebanon

(*\$10,200,100*)

Foreword

Lebanon is facing an unprecedented financial and economic crisis, aggravated by political and institutional instability and the implications of COVID-19 and negatively affecting the security and stability of the country. This is also exacerbating the humanitarian crisis affecting Syrian and Palestine refugees, as well as the Lebanese host communities. The unique and complex nature of the crisis and its sheer magnitude necessitate a multi-year recovery and reform programme and a holistic treatment of the country's societal, economic and governmental challenges. These will be the overriding considerations underlying the interventions of the Office of the United Nations Special Coordinator for Lebanon in 2023: engagements with a range of governmental institutions to enable decisive action to overcome the crisis and with international partners to ensure their continued support for the Lebanese people and the stability of Lebanon, as well as other forms of crisis mitigation and preventive diplomacy initiatives.

The Office of the United Nations Special Coordinator for Lebanon, together with the United Nations country team, will continue to prioritize the facilitation of support to Lebanon as it grapples with the protracted financial, economic and social crisis. Through the parliamentary and presidential elections due in 2022 and in the period ahead, the Special Coordinator's good offices will remain critical in keeping the political momentum towards reforms and restructuring of the economy, promoting effective governance, justice and accountability, and fostering security and stability across Lebanon and its disassociation from regional conflicts. The Office, in coordination with the United Nations Interim Force in Lebanon, will continue to support Lebanon in upholding its obligations under Security Council resolution [1701 \(2006\)](#) and other relevant resolutions; encourage agreement on and the delineation of maritime boundaries between Israel and Lebanon through talks hosted by the Office; and advance other confidence-building measures between the parties towards a permanent ceasefire and long-term solution to the conflict as foreseen in resolution [1701 \(2006\)](#).

(Signed) Joanna **Wronecka**
Special Coordinator, Office of the United Nations Special Coordinator for Lebanon

A. Proposed programme plan for 2023 and programme performance for 2021

Overall orientation

Mandates and background

127. The United Nations Special Coordinator for Lebanon is the most senior United Nations official responsible for the implementation of Security Council resolution 1701 (2006) and is the representative of the Secretary-General to the Government of Lebanon, political parties and the diplomatic community based in Lebanon. The mandate of the Special Coordinator stems from resolution 1701 (2006), as well as subsequent decisions of the Council, including S/2007/85 and S/2007/86, S/PRST/2015/7 and S/PRST/2016/10. The Special Coordinator provides political guidance and promotes coherence across the Organization's activities. The Deputy Special Coordinator and Resident Coordinator, who, since 2012, has also been the Humanitarian Coordinator, leads the United Nations country team and humanitarian country team and is responsible for planning and coordinating United Nations humanitarian and development activities in Lebanon. The Council, in its resolution 2433 (2018), stressed the need for enhanced cooperation between the Office of the United Nations Special Coordinator for Lebanon and the United Nations Interim Force in Lebanon (UNIFIL), with the goal of improving the effectiveness and efficiency of the missions. The Secretary-General outlined his recommendations in that regard in a letter to the Council (S/2018/1182). The Council, in its resolutions 2485 (2019) and 2591 (2021), encouraged the Secretary-General to further those efforts, including through an assessment of UNIFIL.
128. In line with the priorities adopted by the International Support Group for Lebanon and the Secretary-General's vision on prevention, the Office structures its engagement on the basis of three strategic pillars of intervention: (a) peace and security; (b) stability; and (c) stabilization and development support. This "whole-of-Lebanon" approach is reflected in the United Nations strategic framework. In 2022, the United Nations will launch the United Nations Sustainable Development Cooperation Framework with the Government of Lebanon, in complementarity to the Lebanon Crisis Response Plan and the joint United Nations-European Union-World Bank Reform, Recovery and Reconstruction Framework and the emergency response plan.
129. The complex political situation amid a deep economic and financial crisis in Lebanon continues to call for the political good offices of the Special Coordinator and United Nations system-wide support. A continued United Nations political presence remains essential to supporting Lebanese and international efforts to create an enabling environment for implementation of resolution 1701 (2006) and to promote the implementation of resolution 1701 (2006). Within the territory of Lebanon, the continued maintenance of armed personnel, assets and weapons other than those of the Government of Lebanon continues to undermine the authority of the Lebanese State and to pose a risk of reigniting conflict. In this connection, challenges in maintaining law and order and protecting the peaceful character of continued popular protests have stretched the capacity of the security forces, especially the Lebanese Armed Forces, to meet competing obligations under resolution 1701 (2006). Meanwhile, ongoing violations by Israel of Lebanon's sovereignty, on land and by air, also impede efforts to work towards a permanent ceasefire between the parties. These challenges are magnified in a volatile regional context that poses further risks of escalation and spill-over into Lebanon.

Programme of work

Objective

130. The objective, to which this mission contributes, is to prevent and mitigate conflict between Israel and Lebanon in line with the current cessation of hostilities and towards an eventual permanent

ceasefire, and to extend and consolidate State authority in support of the territorial integrity, sovereignty and political independence of Lebanon.

Strategy

131. To contribute to the objective, the mission will:
- (a) Exercise its good offices between the parties to pursue confidence-building opportunities, defuse tensions through shuttle diplomacy and address violations of resolution 1701 (2006) before they escalate into conflict, as well as work towards the resolution of outstanding obligations of both parties under resolution 1701 (2006). This work will be carried out in coordination with UNIFIL, in cooperation with relevant Lebanese State authorities, including the Lebanese Armed Forces, and in line with relevant Security Council resolutions;
 - (b) Advocate the adoption of key structural, governance and economic reforms to address the ongoing financial and economic crisis and the demands and aspirations of the people of Lebanon. This will be done in line with the commitments forged at the Economic Conference for Development through Reforms with the Private Sector in 2018 and Lebanon's commitments to concluding negotiations with the International Monetary Fund (IMF) and implementing an equitable macroeconomic stabilization and reform programme and good governance reforms, including in line with the joint United Nations-European Union-World Bank Reform, Recovery and Reconstruction Framework of 2021. The Office will work for continued international support to state security institutions at a time of depleting State resources and rising domestic tensions, in keeping with international human rights standards. The Office will continue to encourage the international community to support Lebanon fully in meeting its increasing humanitarian needs. This interrelated work will be carried out in coordination with UNIFIL and the United Nations country team, in cooperation with relevant Lebanese State authorities and civil society, and in partnership with key donor countries, international financial institutions and members of the International Support Group for Lebanon, and is aimed at the extension and consolidation of State authority throughout the country, and more effective governance, justice, transparency, accountability and public service delivery countrywide.
132. For 2023, the mission's planned deliverables will support Member States' ongoing management of and recovery from the COVID-19 pandemic. Such planned deliverables and activities will focus on the coordination, planning and monitoring of the response to the pandemic and support the continuity of health services in the context of the pandemic, in particular for the most vulnerable groups, in coordination with the United Nations country team and relevant partners through the Deputy Special Coordinator, who serves also as Resident Coordinator and Humanitarian Coordinator for Lebanon.
133. The above-mentioned work is expected to result in:
- (a) The upholding of commitments of the parties to the current cessation of hostilities;
 - (b) The creation of an environment conducive to dialogue to address outstanding obligations under resolution 1701 (2006) towards an eventual permanent ceasefire.

External factors for 2023

134. The overall programme plan for 2023 is based on the following assumptions:
- (a) International consensus with regard to Lebanon, while present, will continue to be challenged;
 - (b) Concerted political unity and responsible leadership will be required for the country to move forward on the implementation of its comprehensive reform agenda, including reaching an agreement with IMF and securing long-term international financing;
 - (c) While the situation may ease somewhat after the COVID-19 pandemic, the socioeconomic and humanitarian repercussions may be felt over a longer period;

- (d) Lebanon's protracted economic and financial crisis has eroded State institutions, diminishing their ability to provide essential public services and to consolidate State authority across the country. Continuing high inflation, currency depreciation, protracted unemployment, growing poverty and humanitarian challenges will remain sources of instability and social unrest;
 - (e) The tense and volatile regional environment will continue to affect Lebanon's internal stability and security;
 - (f) The continued presence of large numbers of Palestine and Syrian refugees will pose challenges;
 - (g) The cessation of hostilities between Lebanon and Israel will hold, potentially allowing for further progress in line with resolution 1701 (2006), and the continuation of confidence-building efforts;
 - (h) Violations of resolution 1701 (2006) will continue to be perpetrated by the parties and tensions will remain, including over the prevalence and proliferation of weapons in Lebanon outside the authority of the State, as well as violations of Lebanese sovereignty and territorial integrity;
 - (i) Increased extension of State authority south of the Litani river and along the borders will depend on the pattern of law and order requirements elsewhere in the country, including on the budgetary positions of the state security institutions.
135. The mission cooperates closely with UNIFIL in the implementation of resolution 1701 (2006). Pursuant to the request to enhance mission efficiencies and effectiveness as mandated by the Security Council in its resolutions 2433 (2018) and 2485 (2019) which culminated in an assessment of UNIFIL published on 1 June 2020 (S/2020/473), both missions continue to deepen collaboration and joint engagement with national and international stakeholders to maintain the cessation of hostilities and to strengthen the security sector and the extension of State authority across all of Lebanon's territory, including in line with the Rome II communiqué dated 15 March 2018. In 2019, a strategic forum was established between UNIFIL and the Office's heads of mission to take stock of the implications of developments in Lebanon and the region for implementation of resolution 1701 (2006). The forum continues to meet on a regular basis to produce shared assessments aimed at enhancing the effectiveness and efficiency of both missions. Under a memorandum of understanding between UNIFIL and the Office, UNIFIL supports the Office in finance, procurement, engineering, communications, medical services, transport and logistics. The Office also leverages the presence of other United Nations entities, bringing all the United Nations political, security and development tools to bear in support of Lebanon's stability.
136. With regard to cooperation with other entities, the mission coordinates with the League of Arab States, the European Union, international financial institutions, the International Support Group for Lebanon and civil society, including women's groups, to sustain consensus and mobilize support for Lebanon's stability, sovereignty and State institutions, including by convening members of the International Support Group to agree on coordinated messaging and advocacy with Lebanon's political leadership, as well as the issuance of joint statements.
137. With regard to inter-agency coordination and liaison, to further integrate United Nations activities in Lebanon, the Special Coordinator, with the Deputy Special Coordinator/Resident Coordinator/Humanitarian Coordinator, interacts with other United Nations entities, the World Bank and international donors through the United Nations country team and the Lebanon Development Forum. Strengthening the United Nations partnership with international financial institutions, including the World Bank and IMF, has informed the Office's good offices and analysis during the crisis period. Joint collaborative efforts between the Office and the United Nations country team have also been launched, including in the areas of anti-corruption and good governance, as well as in support of a Peacebuilding Fund project dedicated to post-conflict reconciliation.
138. The mission integrates a gender perspective in its operational activities, deliverables and results, as appropriate. In its good offices function and its support for strengthening State institutions, the Office ensures that its political consultations include women in Government, security forces, political parties and civil society. The Office also worked to support the adoption in 2019 of the

national action plan on women and peace and security and in 2020 supported its implementation in partnership with country team entities. The Office is supporting the discussions among key stakeholders on electoral reform, including with respect to the inclusion of a gender quota and increasing the number of women candidates on electoral lists. The Office also participates in events highlighting opportunities and challenges facing women's political participation and involvement in civil society mobilization as part of its advocacy efforts.

Programme performance in 2021

Promoting conditions for the further extension and consolidation of State authority

139. In 2021, the Office, in coordination with the Ministry of Interior and Municipalities, convened an elections forum at the ambassador level to address Lebanon's preparations for the 2022 parliamentary elections and related international assistance. Recognizing the crucial role of the Lebanese Armed Forces in the stability of Lebanon, the Special Coordinator co-chaired a ministerial conference on 17 June to mobilize emergency support for the Lebanese Armed Forces. A follow-up mechanism put in place, co-chaired by the Lebanese Armed Forces and the Office, has since continued to convene with interested donor countries. To take stock of emergency aid to the Lebanese Armed Forces and update on its needs, the Office and the Lebanese Armed Forces organized an ambassadorial meeting in Beirut on 17 September during which the Lebanese Armed Forces presented an updated request for essential needs. Given the loss of purchasing power due to currency devaluation, efforts were also undertaken to facilitate, through a United Nations mechanism, the exceptional payment of stipends to Lebanese Armed Forces and Internal Security Forces personnel for a temporary period.
140. Progress towards the objective is presented in the performance measure below (see table 21).

Table 21
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
Agreement on Economic Conference for Development through Reforms with the Private Sector follow-up mechanism to track implementation	Agreement by political parties to the French-led initiative, with implementation pending	Agreement by political parties on a comprehensive reform programme, in order to successfully conclude negotiations with IMF
Adoption of 2019 State budget	Government delay in preparing the 2021 budget	Adoption of 2022 State budget
Referral of 2020 State budget by Council of Ministers to Parliament within constitutional deadlines	Stalled discussions with IMF due to Government resignation	Referral of 2022 State budget by Council of Ministers to Parliament
Planning of by-elections for vacancies; holding of by-elections in Tripoli and Tyre	Beginning of discussions on electoral reform	Successful support to Lebanese authorities in planning and preparing for the 2022 elections
Adoption of an integrated border management strategy	Adoption of legislation establishing the National Anti-Corruption Institution	

Impact of the pandemic

141. The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of the mandate by constraining the good offices role of the Special Coordinator in furthering the objectives of resolution 1701 (2006). Strict COVID-19 protocols in Israel and related travel restrictions further limited the scope for initiatives to address outstanding issues towards an eventual permanent ceasefire. Within Lebanon, the impact of the pandemic was compounded by the spiralling

socioeconomic crisis and an overstretched health sector, which required strong precautionary measures by the mission to avoid further transmission of COVID-19 among United Nations staff. In-person meetings with external interlocutors were curtailed and meetings among the United Nations country team for inter-agency coordination, programme management and cross-cutting working groups were held online. In addition, to support the Government of Lebanon, the Special Coordinator, with the Deputy Special Coordinator/Resident Coordinator/Humanitarian Coordinator, continued to coordinate the response to the immediate socioeconomic impact of COVID-19 and to enable United Nations support by filling acute gaps in medications, procuring personal protective equipment, increasing clinical management capacity, providing information to the public, and strengthening human resource and laboratory capacity, with a focus on health-care frontline workers and population at risk in Lebanon. Internally, the mission maintained a clustered rotating team modality, reducing the mobility and office presence to ensure the safety of staff while ensuring business continuity.

Planned results for 2023

Result 1: support institutional reform and the democratic process post-elections, and implementation of the financial and economic reform agenda

Programme performance in 2021 and target for 2023

142. In 2021, the mission's work contributed to supporting reform and the democratic process, which met the planned target of the adoption of a revised elections law.
143. For 2023, the Office will support institutional reform and the democratic process, to promote accountability, political legitimacy and economic viability and sustainability. These will be critical conditions for Lebanon to meet in full its commitments and obligations under resolution [1701 \(2006\)](#). The Office will advocate, along with the United Nations country team and International Support Group for Lebanon partners, for the full activation of the newly constituted National Anti-Corruption Commission, in order to promote an end to corruption, the strengthening of public accountability and the building of public trust in State and political institutions. Likewise, the Office, with its partners, will continue to press for the implementation of an IMF programme and the adoption of financial and macroeconomic reforms necessary to stabilize the economy and for Lebanon to regain access to international financing opportunities.
144. Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 22).

Table 22
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Holding of by-elections for vacated positions in Tyre and Tripoli	Launch of discussions in Parliament regarding a new elections law	Adoption of revised elections law	Holding of parliamentary and presidential elections on time, in line with new elections law	Follow-up on implementation of reform agenda, in line with the IMF agreement

Result 2: facilitate increased international support for state security institutions through expedited assistance in the most critically required areas

Proposed programme plan for 2023

145. To address the strong negative impact of the social, economic and humanitarian crises on the capacities of the State security forces, the Office will continue to coordinate international support to the Lebanese Armed Forces and the Internal Security Forces, with a focus on their emergency needs and the resources required to maintain their overall operational readiness in a challenging stability context. In line with resolution 2591 (2021), the Office will seek to facilitate further and increased international support for all state security institutions, through additional and expedited assistance in the most critically needed areas of support, including daily logistical needs and maintenance of counter-terrorism, border protection and naval capacities.

Lessons learned and planned change

146. The lesson for the mission was that the timely assessment by the Office and international donors of the budget constraints of state security institutions and their pressing operational needs were instrumental in addressing early on the impact of the severe economic crisis on personnel. In applying the lesson, the mission will continue to work in a coordinated manner with both state security institutions and international donors to anticipate potential shortfalls and direct international support to adequately respond to the most urgent and vital needs of Lebanon's state security institutions. A thorough follow-up of the support, combined with strict compliance with human rights due diligence policy guidelines, will be key to ensuring continued international donor support.
147. Expected progress towards the objective is presented in the performance measure below (see table 23).

Table 23

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	–	Emergency assistance to Lebanese Armed Forces and Internal Security Forces mobilized through Office of the United Nations Special Coordinator for Lebanon support in accordance with the human rights due diligence policy	Continued support to Lebanese Armed Forces and Internal Security Forces in compliance with the human rights due diligence policy

Deliverables

148. Table 24 lists all deliverables of the mission.

Table 24

Deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	3	3	3	3
1. Report of the Secretary-General on the implementation of Security Council resolution 1701 (2006)	3	3	3	3
Substantive services for meetings (number of three-hour meetings)	3	3	3	3
2. Meetings of the Security Council	3	3	3	3
C. Substantive deliverables				
Good offices: provision of good offices in support of the prevention of conflict and the extension and consolidation of State authority; good offices on elections, peace and stability, including with respect to economic issues; intensive engagement with the Lebanese Armed Forces and the Internal Security Forces, as well as the donor community, to facilitate continued assistance to the security forces; and confidence-building measures between Israel and Lebanon, including with respect to the maritime boundary dispute.				
Consultation, advice and advocacy: consultations with Lebanese and Israeli interlocutors on the implementation of resolution 1701 (2006) ; consultations with the International Support Group for Lebanon and other regional stakeholders on ensuring Lebanon's stability; consultations on the economic and governance reform agenda and development priorities; advice on government accountability, governance policy formulation and public administration reforms; advocacy with international partners in support of Lebanon's efforts for extension of State authority, including strengthened security service agencies; consultations on integrated border management on the Lebanon-Syrian Arab Republic border; advocacy on key human rights standards and protections that could have an impact on long-term security and stability and the strengthening of human rights institutions in Lebanon; advocacy on the political participation and representation of women and young people; and advocacy with international partners in support of Lebanon for continued donor involvement and resources as Lebanon responds to the presence of Palestine and Syrian refugees, taking into account the needs of refugees and host communities.				
D. Communication deliverables				
Outreach programmes, special events and information materials: outreach activities to support the implementation of resolution 1701 (2006) and other key priorities relating to Lebanon's sustainable peace, development and human rights agenda; activities to strengthen the relationship with key Lebanese partners and stakeholders; engaging with young people, including university students, and supporting women's empowerment and representation, in particular in the parliamentary elections; and outreach activities through special events such as United Nations Day and International Women's Day to communicate more effectively with local stakeholders and to spread broader knowledge of the work being undertaken through Office of the United Nations Special Coordinator for Lebanon information materials and joint outreach activities with other United Nations entities on the promotion of United Nations system-wide priorities such as the Sustainable Development Goals.				
External and media relations: press conferences, press statements, background briefings, interviews, op-eds and other media engagements to communicate strategically on the implementation of resolution 1701 (2006) ; and press statements of the International Support Group for Lebanon on safeguarding Lebanon's security, stability and sovereignty and the implementation of resolution 1701 (2006) .				
Digital platforms and multi-media content: deepen local and national understandings of and support to the Office of the United Nations Special Coordinator for Lebanon and its support for the implementation of resolution 1701 (2006) on website or social media.				

B. Proposed post and non-post resource requirements for 2023

Resource requirements (regular budget)

Table 25

Financial resources

(Thousands of United States dollars)

Proposed 2023	1	1 ^a	–	1	2	6	1	–	12	6	–	18	5	60	–	83
Change	–	–	–	–	–	–	–	–	–	(1)	–	(1)	–	2	–	1

^a Position is funded at 50 per cent and cost-shared with the Development Coordination Office.

149. The proposed resource requirements for 2023 for the Office amount to \$10,200,100 (net of staff assessment) and would provide for salaries and common staff costs (\$8,861,800) for 18 international positions (1 Under-Secretary-General, 1 Assistant Secretary-General, 1 D-1, 2 P-5, 6 P-4, 1 P-3 and 6 Field Service) and 65 national positions (5 National Professional Officer and 60 Local level), as well as operational costs (\$1,338,300), comprising the costs for consultants and consulting services (\$12,000), official travel (\$170,000), facilities and infrastructure (\$693,400), ground transportation (\$76,800), communications and information technology (\$239,900), medical (\$17,300), and other supplies, services and equipment (\$128,900).
150. In 2023, the following changes are proposed to the staffing complement:
- Conversion of one position of Administrative Assistant (Field Service) in the Security Section to Administrative Assistant (Local level) to promote national capacity-building;
 - Establishment of one position of Public Information Assistant (Local level) in the Public Information Unit, to support all aspects of the mission's communications requirements, specifically to enhance its digital and social media presence to support the Office's mandate delivery and to ensure uninterrupted and sustained delivery of strategic communications services.
151. A vacancy rate of 5 per cent has been applied to the estimates for international positions. Estimates for National Professional Officer positions are based on the assumption of full incumbency, while a

3 per cent vacancy rate has been applied to estimates for Local level positions. For the Local level position that is proposed to be established, a vacancy rate of 35 per cent is applied in accordance with standard budgeting practice, to take into account the time required for recruitment.

152. The increase in requirements for 2023 compared with the appropriation for 2022 is attributable to the increased requirements under civilian personnel costs, resulting from the increase of the post adjustment multiplier in Lebanon in 2022.

6. United Nations Regional Office for Central Africa

(\$9,074,100)

Foreword

In 2023, the United Nations Regional Office for Central Africa (UNOCA) will continue to support the Central Africa regional peace and security architecture following the institutional reform of the Economic Community of Central African States (ECCAS). The mission will continue to build the capacity of the regional Coalition of Civil Society Organizations for Peace and Conflict Prevention in Central Africa while supporting the operationalization of the ECCAS network of women mediators established in 2021.

In 2023, five countries of the subregion are due to hold elections: Cameroon, the Democratic Republic of the Congo, Equatorial Guinea, Gabon and Rwanda, with most taking place in a polarized political context. In such environments, UNOCA will support political dialogue platforms and scale up its engagement with Governments and political actors with a view to promoting political dialogue as a tool for prevention.

The mission will also support the efforts of ECCAS towards building a subregional governance architecture, linked to the African Governance Architecture, to promote good governance and the rule of law.

As regional stability in Central Africa is confronted with security challenges warranting collective response, UNOCA will extend support to regional efforts geared towards addressing those threats.

By building on its institutional reform and drawing lessons from the COVID-19 pandemic to which the region has shown extraordinary resilience since 2020, ECCAS can play an important role in tackling the peace and security challenges facing the region. UNOCA will spare no effort to reinforce the position of ECCAS as the main regional actor for conflict prevention and sustaining peace in Central Africa.

(Signed) François Louncény **Fall**
Special Representative of the Secretary-General for Central Africa and
Head of the United Nations Regional Office for Central Africa

A. Proposed programme plan for 2023 and programme performance for 2021

Overall orientation

Mandates and background

153. The United Nations Regional Office for Central Africa (UNOCA) is responsible for the prevention of conflicts and the consolidation of peace and security in Central Africa. The mandate was established through an exchange of letters between the Secretary-General and the President of the Security Council (S/2009/697 and S/2010/457). Through another exchange of letters (S/2021/719 and S/2021/720), the mandate was extended until 31 August 2024.
154. The current mandate assigns four objectives to UNOCA, namely: (a) monitor political and security developments in Central Africa and carry out good offices on behalf of the Secretary-General in order to prevent and resolve conflicts, to help to sustain peace and to advise the Secretary-General and United Nations entities in the region on sustaining peace issues in Central Africa; (b) enhance subregional capacities for conflict prevention and mediation in countries of the subregion, with due attention given to the principles of the Charter of the United Nations, including human rights and gender dimensions; (c) support and enhance United Nations efforts in the subregion, as well as regional and subregional initiatives on peace and security, including from human rights and gender perspectives; and (d) enhance coherence and coordination in the work of the United Nations in the subregion on peace and security. UNOCA will also continue to host the secretariat of the United Nations Standing Advisory Committee on Security Questions in Central Africa, coordinate the implementation of the United Nations regional strategy to address the threat and impact of the Lord's Resistance Army and support the implementation of the regional strategy and plan of action on counter-terrorism and the non-proliferation of small arms and light weapons in Central Africa.

Programme of work

Objective

155. The objective, to which this mission contributes, is to prevent conflict and consolidate peace and security in the Central Africa subregion.

Strategy

156. To contribute to the objective, the mission will:
- (a) Engage in good offices activities to help countries to prevent political crises and election-related violence and peacefully resolve conflicts and crises stemming from political and electoral processes, and promote inclusive and peaceful elections;
 - (b) Build regional and national capacities for conflict prevention and sustaining peace, including by providing support to national institutions and platforms for political dialogue where they exist. Where such institutions and platforms are lacking, UNOCA will advocate their establishment and mobilize relevant United Nations entities and other partners to support their operationalization;
 - (c) Leverage its partnership with subregional organizations, especially the Economic Community of Central African States (ECCAS), the International Conference on the Great Lakes Region and the Central African Economic and Monetary Community, in conflict prevention, mediation and early warning, including promoting the participation of women, young people and other actors in peacebuilding and sustaining peace strategies;

- (d) Carry out regular early warning analysis to inform preventive diplomacy and good offices efforts, to highlight threats to peace and security in Central Africa and mobilize support for preventive diplomacy, in collaboration with ECCAS and United Nations regional offices and regional representations of United Nations entities;
 - (e) Enhance the coherence of the work of the United Nations on peace and security issues in Central Africa through regular consultations with relevant United Nations entities in the subregion, coordinate the efforts of United Nations entities geared towards the implementation of the regional conflict prevention framework and support the United Nations country teams in adopting and/or rolling out national sustaining peace strategies, aligned with the framework;
 - (f) Ensure the regular holding of the biannual ministerial meetings of the United Nations Standing Advisory Committee on Security Questions in Central Africa as a platform for confidence-building between Member States that will continue to use it to discuss threats and challenges to regional peace and security, in particular with a view to preventing or addressing conflicts and crises that carry the risk of creating or exacerbating inter-State tensions or of expanding beyond national borders;
 - (g) Continue to support a regional approach to addressing the crisis in the Lake Chad Basin region, within the framework of the Regional Strategy for the Stabilization, Recovery and Resilience of the Boko Haram-affected Areas of the Lake Chad Basin Region;
 - (h) Work closely with UNOWAS to improve coordination between Central and West African States and regional organizations and mechanisms on maritime security in the Gulf of Guinea, including by reinforcing the capacity of the Interregional Coordination Centre for Maritime Safety and Security in the Gulf of Guinea and mobilizing international support. UNOCA will also continue to push for greater alignment of maritime security initiatives by non-regional actors with regional strategies and efforts.
157. For 2023, the mission's planned deliverables will support Member States' ongoing management of and recovery from the COVID-19 pandemic, and this is expected to result in improved coordination among Member States on the cross-border and regional impact of the pandemic on regional integration, peace and security, as well as the development of regional capacities to continue to prevent conflict and sustain peace in the context of a pandemic or a disaster, including the regular functioning of relevant institutions and mechanisms. The mission will support ECCAS and its member States by mobilizing international support for the regional strategy and support the region in drawing lessons from COVID-19 to build regional capacities to anticipate and respond to the impact of pandemics and disasters, especially on peace and security. Such support will target specifically the continuity of institutions and platforms for conflict prevention and sustaining peace in the event of a pandemic or disaster.
158. The above-mentioned work is expected to result in:
- (a) Peaceful electoral processes in the subregion, with relevant prevention mechanisms in place for potential election-related violence;
 - (b) Prevention or mitigation of election-related violence and the initiation or continuation of political dialogue processes assisted by joint early-warning and good offices missions by UNOCA and ECCAS in countries holding elections or facing a political crisis;
 - (c) Progress made by ECCAS towards the adoption of a regional governance framework in Central Africa;
 - (d) The holding of two ministerial meetings of the United Nations Standing Advisory Committee on Security Questions in Central Africa and two field visits of the United Nations Standing Advisory Committee on Security Questions in Central Africa bureau to selected countries on topical issues related to regional peace and security in Central Africa;

- (e) A common understanding of key peace and security challenges and priorities among United Nations entities in Central Africa, integrating emerging drivers of conflicts, including climate change;
- (f) Enhanced coordination of United Nations efforts in support of regional and subregional initiatives on peace and security and governance;
- (g) The adoption and/or implementation of national sustaining peace strategies aligned with the regional conflict prevention framework in at least three countries;
- (h) Improved interregional coordination between Central and West Africa on maritime security in the Gulf of Guinea.

External factors for 2023

159. The overall programme plan for 2023 is based on the following assumptions:
- (a) ECCAS institutional reform becomes fully operational, with all peace and security institutions and mechanisms established and provided with adequate resources for their functioning. UNOCA and the ECCAS Commission maintain or reinforce their cooperation and regular consultations, and adopt and roll out a joint plan of action, within the framework of a new memorandum of understanding between the Commission and the United Nations on peace and security issues;
 - (b) ECCAS member States remain committed to establishing a regional governance framework, work genuinely towards the adoption and implementation of regional governance standards and mechanisms, and solicit or accept the support of regional and international partners, including UNOCA, to that end;
 - (c) The political landscape remains polarized in several countries of the subregion, against the backdrop of growing demands for the opening of political space and the improvement in electoral frameworks, increasing the risks of political violence or conflict while distrust in public institutions persists, prompting some stakeholders to demand neutral platforms for discussion on key political, electoral and institutional reforms;
 - (d) The elections scheduled in the countries of the region are held according to the constitutional and legal time frames and the countries concerned accept the political engagement of UNOCA to prevent and/or resolve election-related violence and crises;
 - (e) Tensions erupt, persist or heighten between several countries of the subregion over cross-border security issues, warranting an increased role of regional institutions and mechanisms, which is accepted by the States concerned and supported by international partners, to calm tensions, build trust and peacefully resolve disputes;
 - (f) The ECCAS Commission and Member States show a genuine commitment to the involvement of civil society actors, including the regional Coalition of Civil Society Organizations for Peace and Conflict Prevention in Central Africa and women and youth organizations, in the activities of ECCAS in the realm of peace and security, including early warning, conflict prevention and peace-making. The Coalition becomes fully operational, with adequate human resources, and is supported by ECCAS member States and partners;
 - (g) ECCAS member States adopt and begin to implement a regional regulation on pastoralism and transhumance in Central Africa, support national and local mechanisms in preventing and peacefully addressing farmer-herder conflicts, and take collective measures to promote peaceful cross-border transhumance.
160. The mission integrates a gender perspective in its operational activities, deliverables and results, as appropriate, including support for the implementation of the regional action plan on Security Council resolution [1325 \(2000\)](#) and the adoption and rolling out of national action plans. The mission continues its advocacy on the reinforcement of the role of women in conflict prevention and

sustaining peace, as well as adequate representation of women in decision-making positions both at the national and regional levels. The mission works with other relevant United Nations entities and external partners to reinforce the capacities of women in decision-making positions and in mediation. UNOCA will support the operationalization and build the capacity of the ECCAS network of women mediators established in December 2021 and endorsed by the Heads of State during the 20th ECCAS Conference of Heads of State and Government, held in Brazzaville in January 2022. In its analysis and reporting, the mission ensures that data and information are disaggregated by gender and that analyses and recommendations give due consideration to the specific situation and needs of women. During fact-finding and good offices visits, the mission ensures adequate consultation and engagement with women and women's groups. Human rights aspects, including the protection of women's rights, are also integrated into conflict analysis and early warning and preventive diplomacy work of the mission.

161. In line with the United Nations Disability Inclusion Strategy, the mission advocates for political and electoral processes in the region to be disability-sensitive, by encouraging Member States to take appropriate measures to facilitate the participation of persons with disabilities. The mission also encourages and supports experience-sharing between the States of the region in the area of disability inclusion, thus facilitating the adoption of measures that take into consideration the specificities of the regional and national contexts. The mission further integrates the situation of persons with disabilities into its analysis and reporting and ensures proper consultation and engagement with organizations representing persons with disabilities during fact-finding, early warning and good offices activities.
162. With regard to cooperation with other entities, the mission carries out joint analyses and activities on cross-regional peace and security challenges with other regional offices. Country-specific early warning and good offices activities are carried out in close coordination with the offices of the resident coordinators concerned. Early warning analysis and good offices are carried out, to the extent possible, jointly or in consultation with ECCAS.
163. With regard to inter-agency coordination and liaison, the mission continues to convene regular meetings of the United Nations presences in Central Africa to achieve a common understanding of the key peace and security challenges in Central Africa and build or reinforce synergies in the action of the United Nations, including through the regional conflict prevention framework. The mission works closely with UNOWAS, the United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic, the United Nations Organization Stabilization Mission in the Democratic Republic of the Congo, the Office of the Special Envoy of the Secretary-General for the Great Lakes Region and other relevant United Nations entities, including with respect to cross-border and transregional challenges to peace and security, in order to avoid duplication and ensure coherence in United Nations activities in the subregion.

Evaluation activities

164. An evaluation of the implementation of the mandate of UNOCA is planned for 2023.

Programme performance in 2021

Defusing tensions in electoral contexts

165. In 2021, several countries under the purview of UNOCA, including Chad, the Congo and Sao Tome and Principe, held presidential elections in a context of political tensions and risks of election-related violence. In all three countries, UNOCA monitored the situation closely in the lead-up to the election, including by deploying technical level fact-finding missions. The mission also encouraged political dialogue, including through standing or ad hoc platforms established to that end, with a view to creating conditions for inclusive and peaceful elections.

166. Ahead of the elections in Chad and the Congo, UNOCA carried out a joint fact-finding and assessment mission with ECCAS, identifying risks of violence and conflicts and making recommendations for the exercise of good offices by the mission. UNOCA also conducted a similar mission to Sao Tome and Principe, in consultation with ECCAS. In the Congo, UNOCA organized a capacity-building workshop for the media to ensure their contribution to a peaceful process.
167. Overall, notwithstanding some tensions, the early warning and good offices activities of UNOCA contributed to peaceful elections in Chad, the Congo and Sao Tome and Principe.
168. Progress towards the objective is presented in the performance measure below (see table 27).

Table 27

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
Increased commitment by States undergoing electoral and dialogue processes reached a workable consensus and peacefully resolved conflicts	Progress ongoing towards the adoption by ECCAS of regional legislation on pastoralism, and by ECCAS and ECOWAS of common policies and joint programmes were delayed owing to COVID-19 restrictive measures and the ECCAS institutional reform process	Reduction in election-related incidents and an increase in the number of constructive and inclusive dialogue initiatives in the subregion

Impact of the pandemic

169. The continuation of the COVID-19 pandemic in 2021 had an impact on the execution of mandates, in particular, in the: (a) cancellation of activities related to support for the regional Coalition of Civil Society Organizations for Peace and Conflict Prevention in Central Africa; (b) cancellation of UNOCA participation in the annual meeting of gender advisers and focal points in New York; (c) holding of the United Nations Standing Advisory Committee on Security Questions in Central Africa meetings virtually and in hybrid format in 2021; and (d) holding of the meeting of the heads of United Nations presences in Central Africa virtually (instead of face-to-face). Wherever practical, the mission continued to use all means available to ensure mandate implementation, while adhering strictly to the preventive measures enforced by States to counter the spread of the virus. The mission resorted to special flights, when recommended, made use of videoconferencing, offered COVID-19 testing for its staff and encouraged the vaccination of staff and dependents, among other measures. That approach resulted in a significant improvement in programme delivery in 2021, in contrast to 2020, when most activities had to be rescheduled.
170. In addition, in order to support Member States on issues related to COVID-19, within the overall scope of the objectives, UNOCA continued to raise the awareness of Member States on their responsibility to meet their international obligations, including with regard to human rights and the efforts to combat sexual and gender-based violence, while responding to the pandemic. The mission also advocated a regional approach to the pandemic, in particular regarding its impact on peace and security.

Planned result for 2023

Election-related violence is prevented or mitigated in line with the Malabo Declaration on democratic elections

Programme performance in 2021 and target for 2023

171. In 2023, at least five countries of the region will hold various elections. Most of these countries have recently experienced election-related violence, including some where grievances stemming from the last electoral processes are yet to be addressed completely and adequately. In December 2020, at the fiftieth ministerial meeting of the United Nations Standing Advisory Committee on Security Questions in Central Africa, a “Declaration on Democratic and Peaceful Elections as a Means of Strengthening Stability and Achieving the Sustainable Development Goals in Central Africa” (the Malabo Declaration) was adopted, whereby Member States reaffirmed their commitment to organizing periodic, democratic and peaceful elections within the constitutional and legal time frame and in compliance with international standards.

Lessons learned and planned change

172. A lesson for the mission was that the groundwork for election-related early warning and good offices should be laid early in the electoral cycle, grounded in commitments taken in international and regional forums by the States concerned. In applying the lesson, UNOCA will engage relevant Member States early in the electoral cycle on the basis of the commitment that they made under the Malabo Declaration. UNOCA will also work closely with ECCAS to strengthen the regional legal framework on democratic elections, including through support for the process towards the adoption of a regional protocol, taking into consideration the norms and frameworks that exist at the level of the African Union.
173. Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 28).

Table 28

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Increased commitment by States undergoing electoral and dialogue processes to reaching a workable consensus and to peacefully resolving any conflict	Adoption of ECCAS-wide legislation on pastoralism; adoption of common policies and joint programmes ahead of the next ECCAS-ECOWAS summit	Reduction in election-related incidents and increase in the number of constructive and inclusive dialogue initiatives in the subregion	Early warning and good offices missions are conducted by UNOCA and ECCAS to States holding elections The majority of elections in Central Africa are generally peaceful, with no or low level of violence	Early warning and good offices missions conducted by UNOCA and ECCAS to States of the region contribute to peaceful elections, with no or low level of violence Progress is achieved in the implementation of the United Nations Standing Advisory Committee on Security Questions in Central Africa Malabo Declaration and towards the adoption of a regional protocol on elections

Deliverables

174. Table 29 lists all deliverables of the mission.

Table 29

Deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	3	3	3	3
1. Reports of the Secretary-General to the Security Council	2	2	2	2
2. Report of the Secretary-General on the activities of the United Nations Standing Advisory Committee on Security Questions in Central Africa	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	6	6	6	6
3. Meetings of the Security Council	2	2	2	2
4. Ministerial meeting of the United Nations Standing Advisory Committee on Security Questions in Central Africa	4	4	4	4
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	60	60	70	70
5. Workshop on conflict prevention, mediation, human rights and women's empowerment	40	40	45	45
6. Workshop for journalists/media on their role in conflict prevention and protection of civilians	20	20	25	25
C. Substantive deliverables				
Good offices: good offices, preventive diplomacy and mediation, high-level diplomatic missions and meetings, including jointly with regional organizations (ECCAS and the African Union), regional and subregional summits, forums and high-level meetings to promote peace and stability, maritime safety and human rights.				
Consultation, advice and advocacy: strategic coordination meetings and round tables with regional and subregional organizations on regional integration, peace and security, human rights and counter-terrorism (including addressing security threats from Boko Haram).				
Fact-finding, monitoring and investigation missions: field visits to Member States to gather information, consult stakeholders and coordinate action on issues related to subregional peace and security, such as political and electoral crises, armed groups, illicit transfers of small arms and light weapons, and human rights violations and abuses.				
D. Communication deliverables				
Outreach programmes, special events and information materials: print media (brochures, information kits, annual review and quarterly publications, and banners); broadcast media (cooperation with radio and television for coverage and broadcasting of relevant activities of the mission); and cultural and sporting events and other awareness-raising activities related to United Nations observances, including an annual football tournament for peace.				
External and media relations: press conferences, press releases, statements and interviews on the activities of the mission.				
Digital platforms and multimedia content: website and social media platforms to disseminate information related to the mission.				

B. Proposed post and non-post resource requirements for 2023

Resource requirements (regular budget)

Table 30

Financial resources

(Thousands of United States dollars)

Category of expenditure	2021	2022	2023		Variance
	Expenditure	Appropriation	Total requirements	Non-recurrent	2023 vs. 2022 Increase/(decrease)
	(1)	(2)	(3)	(4)	(5)=(3)-(2)
Military and police personnel costs	–	–	–	–	–
Civilian personnel costs	5 903.6	6 894.3	7 238.0	–	343.7
Operational costs	1 381.8	1 635.8	1 836.1	119.3	200.3
Total (net of staff assessment)	7 285.4	8 530.1	9 074.1	119.3	544.0

Table 31

Positions

	Professional and higher categories									General Service and related categories			National staff				Total
	USG	ASG	D-2	D-1	P-5	P-4	P-3	P-2	Subtotal	Field/ Security Services	General Service	Total inter- national	National Professional Officer	Local level	United Nations Volunteers		
Approved 2022	1	–	–	2	5	12	6	–	26	7	–	33	4	11	–	48	
Proposed 2023	1	–	–	2	5	12	6	–	26	7	–	33	4	12	1	50	
Change	–	–	–	–	–	–	–	–	–	–	–	–	–	1	1	2	

175. The proposed resource requirements for 2023 for UNOCA amount to \$9,074,100 (net of staff assessment) and would provide for salaries and common staff costs (\$7,238,000) for the continuation of 33 international positions (1 Under-Secretary-General, 2 D-1, 5 P-5, 12 P-4, 6 P-3 and 7 Field Service), 15 national positions (4 National Professional Officer and 11 Local level) and the establishment of 2 positions (1 Local level and 1 United Nations Volunteer), as well as operational costs (\$1,836,100) comprising the costs for consultants (\$24,700), official travel (\$566,400), facilities and infrastructure (\$303,200), ground transportation (\$63,600), air operations (\$159,200), communications and information technology (\$654,700), and other supplies, services and equipment (\$64,300).
176. In 2023, the following changes are proposed to the staffing complement:
- Establishment of one position of Security Assistant (Local level) to strengthen fire prevention service and the residential security service;
 - Establishment of one position of Finance and Budget Assistant (United Nations Volunteer) to support the annual budget preparation and implementation.
177. The increase in requirements for 2023 compared with the appropriation for 2022 is attributable to: (a) higher requirements for international staff due to the application of a lower vacancy rate compared with the rate applied in the approved 2022 budget; (b) the proposed establishment of one Local level position and one United Nations Volunteer position for 2023; and (c) acquisitions to replace obsolete equipment for communications and information technology.

178. A vacancy rate of 10 per cent has been applied to the estimates for international positions, taking into account the actual vacancy rate in 2021 and projected deployment in 2022. An assumption of full incumbency, based on the most recent actual incumbency, has been applied to the estimates for national positions. Vacancy rates of 35 and 50 per cent have been applied, respectively, to the estimates for the proposed Local level and United Nations Volunteer positions.

Extrabudgetary resources

179. In 2022, extrabudgetary resources in the estimated amount of \$600,000 are projected to be utilized to support the reinforcement of institution-building for ECCAS following its reform; the operationalization of the regional network of civil society organizations for peace and stability in Central Africa; the prevention of election-related violence and crises; the implementation of activities related to the climate change agenda; the organization of meetings and related activities of the United Nations Standing Advisory Committee on Security Questions in Central Africa; and activities related to women and peace and security.
180. For 2023, extrabudgetary resources in the amount of \$600,000 are projected for supporting regional capacity to prevent, mitigate and resolve election-related crises and violence in the Central Africa subregion, including through the strengthening of electoral governance and support for the adoption of regional norms and mechanisms on democratic elections; support for the effective functioning of a regional women's platform for peace and security in the Central Africa subregion; support for ECCAS in the reinforcement of its conflict prevention and resolution capacities, with a view to enhancing its effectiveness in early warning; and the strengthening of the role of media organs as a catalyst for peace and security, as well as social cohesion.

7. United Nations Support Mission in Libya

(\$88,432,200)

Foreword

The Libyan political process was derailed when elections scheduled for 24 December 2021 were postponed owing to persisting divisions among political actors and institutions. Further polarization emerged from diverging views on how to put the political process back on track. The United Nations Support Mission in Libya (UNSMIL) facilitated efforts to overcome the impasse by refocusing on supporting the three dialogue tracks: political, security and economic. UNSMIL further supported efforts to develop a consensual path to elections within a constitutional framework, to ensure that the 2020 ceasefire agreement would continue to hold, and to preserve gains achieved on the economic track.

In 2023, UNSMIL will continue to provide its good offices and support to Libyan stakeholders and the coordination of the political, security, economic and human rights tracks, and to facilitate an inclusive dialogue aimed at the formation of a democratically elected Government and Parliament and unified military, police and financial institutions. UNSMIL ceasefire monitors, deployed since October 2021, will continue to assist Libyan authorities in supporting the Libyan-led and Libyan-owned ceasefire monitoring mechanism and implementing the withdrawal of foreign forces and mercenaries in coordination with the Member States and regional organizations concerned.

Further steps are needed towards the inclusion of women and young people in political processes, the promotion of national reconciliation and justice and the protection of civic space. The situation of migrants and refugees in Libya continues to remain of serious concern. UNSMIL, jointly with the United Nations country team, continues to work on these priorities as key elements for building a peaceful and resilient Libya.

(Signed) Raisedon **Zenenga**
Officer-in-Charge, United Nations Support Mission in Libya

A. Proposed programme plan for 2023 and programme performance for 2021

Overall orientation

Mandates and background

181. The United Nations Support Mission in Libya (UNSMIL) is an integrated special political mission established on 16 September 2011 by the Security Council in its resolution [2009 \(2011\)](#), to support the country's transition and post-conflict efforts, including through an inclusive national dialogue and a constitution-drafting process. As a result of the conflict that began in 2014, the Council mandated the mission to support the Libyan political process towards the holding of elections and the unification of institutions, in line with the Libyan Political Agreement signed on 17 December 2015.
182. Following the signing of a nationwide ceasefire agreement on 23 October 2020 that ended the armed conflict, which had begun in April 2019, the Security Council, in its resolution [2570 \(2021\)](#), mandated UNSMIL to provide support to the 5+5 Joint Military Commission and the Libyan-led and Libyan-owned ceasefire monitoring mechanism, including through the facilitation of confidence-building measures and the scalable and incremental deployment of up to an initial maximum of 60 UNSMIL ceasefire monitors, once conditions allow.
183. On 29 April 2022, the Security Council, in its resolution [2629 \(2022\)](#), extended the mandate of UNSMIL, as set out in resolutions [2542 \(2020\)](#) and paragraph 16 of resolution [2570 \(2021\)](#), until 31 July 2022 took note of the independent strategic review of UNSMIL and requested the Mission to implement its recommendations. The Council decided that UNSMIL, as an integrated special political mission, should be led by a Special Representative of the Secretary-General, in Tripoli, supported by two Deputy Special Representatives of the Secretary-General to ensure a renewed focus on the political dynamics of the various aspects of the conflict in Libya, while ensuring complementarity and integration between UNSMIL and the United Nations country team. The Council further requested that, in the implementation of the recommendations of the strategic review, UNSMIL explore all avenues to increase efficiency and redeploy existing resources, including through prioritization and the reconfiguration of tasks and resources, as needed and where appropriate.
184. In its resolution [2629 \(2022\)](#), the Security Council reaffirmed its: [S]trong commitment to a Libyan-led and Libyan-owned political process, facilitated by the United Nations, to create a path to hold free, fair and inclusive national Presidential and Parliamentary elections in Libya as soon as possible, expressing support for the ongoing facilitation of intra-Libyan consultations to create the conditions and circumstances for elections on a constitutional and legal basis, and recalling the timeline elaborated in the Libyan Political Dialogue Forum (LPDF) roadmap and the role of all relevant institutions in delivering elections.
185. The Mission's mandate currently includes mediation and good offices to support: (a) an inclusive political process and security and economic dialogue within the framework of the Libyan Political Agreement and the United Nations Action Plan for Libya; (b) continued implementation of the Libyan Political Agreement; (c) consolidation of the governance, security and economic arrangements of the Government of Libya, including support for economic reform in collaboration with international financial institutions; (d) a ceasefire and ceasefire monitoring support; and (e) subsequent phases of the Libyan transition process, including the constitutional process and the organization of elections. In addition, within operational and security constraints, the Mission is mandated to provide: (a) support to key Libyan institutions; (b) support, on request, for the provision of essential services and delivery of humanitarian assistance, including in response to the COVID-19 pandemic, in accordance with humanitarian principles; (c) human rights monitoring and reporting; (d) support for securing uncontrolled arms and related materiel and countering their proliferation; (e) the coordination of international assistance and the provision of advice and assistance to Government-led efforts, to stabilize post-conflict zones, including those liberated from Da'esh; and (f) support for the 5+5 Joint Military Commission and the Libyan-led and Libyan-owned ceasefire monitoring mechanism, including through the facilitation of confidence-building measures and the scalable and incremental deployment of UNSMIL ceasefire monitors once conditions allow.

Programme of work

Objective

186. The objective, to which this Mission contributes, in accordance with Security Council resolutions [2542 \(2020\)](#), [2570 \(2021\)](#) and [2629 \(2022\)](#) and taking into account the recommendations of the 2021 independent strategic review, is to support an inclusive political process leading to a democratically elected Government and its reconciliation, peacebuilding and State-building efforts, formed on the basis of credible, transparent and inclusive elections; to advance gender equality, advocating the increased participation of women in all aspects of the political process; to foster the unification of political, security, economic and rule of law institutions that are responsive and accountable to all people in Libya; to support the 5+5 Joint Military Commission in maintaining the ceasefire, by supporting the implementation of the provisions of the ceasefire agreement of October 2020, including the withdrawal of foreign forces and mercenaries from Libya based on the Commission's action plan; to advance human rights and rights-based national reconciliation and transitional justice processes; to address the threat from terrorism; and to cultivate mutually beneficial relations with its international partners while respecting the sovereignty of Libya.

Strategy

187. To contribute to the objective, the Mission will:
- (a) Provide mediation and good offices, as well as technical assistance, to contribute to the full unification of the Libyan State with a strengthened focus on the political process, together with economic, security, humanitarian and human rights priorities attentive to the interlinkages between them, complemented by the efforts of the working groups of the International Follow-up Committee on Libya, engaging Libyan stakeholders at all levels to ensure smooth progress on the Libyan-led and Libyan-owned political process;
 - (b) Support the 5+5 Joint Military Commission in continuing to implement the nationwide ceasefire agreement through the work of UNSMIL ceasefire monitoring component in support of the Libyan-led and Libyan-owned ceasefire monitoring mechanism, including the provisions of technical assistance and withdrawal of foreign forces and mercenaries;
 - (c) Support economic policy reform, in close cooperation with Member States and international financial institutions, including reunification and reform of the country's banking system, a decentralization policy and a reform of the subsidy system;
 - (d) Support Libyan parties and international actors in continuing to engage in a rights-based national reconciliation process, on the basis of the principles of transitional justice, with a view to ensuring a Libyan-led and Libyan-owned inclusive political process and a lasting peace;
 - (e) Provide support and good offices within the area of rule of law, to support the judiciary and prosecutorial system, including their critical role in ensuring justice as a part of a sustained peace process;
 - (f) Engage its good offices and work with national authorities on reforming the country's security sector, including support for mine action, security sector reform and support for laying the groundwork for a disarmament, demobilization and reintegration process and facilitating operational planning with national stakeholders on issues of process design, institutional set-up and economic aspects of disarmament, demobilization and reintegration, and for coordinating the provision of technical expertise, training and equipment;
 - (g) Provide technical assistance to the High National Elections Commission and the Central Committee for Municipal Council Elections;
 - (h) Promote and protect human rights, ensure monitoring and reporting of abuses and violations of human rights and international human rights and humanitarian law, including sexual

violence in conflict, and advocate on the humanitarian situation and support the delivery of humanitarian assistance in the country;

- (i) Engage with neighbouring countries, including sub-Saharan countries, to ensure that their views and concerns are taken into consideration.
188. The above-mentioned work is expected to result in:
- (a) The formation of unified national political, security and economic institutions, including Government and Parliament, a unified armed and police services, a unified Central Bank, and a stabilized and unified economy;
 - (b) The development of effective and accountable institutions and the promotion of the rule of law throughout the country, and reconciliation and transitional justice processes, leading to a more resilient and responsive State;
 - (c) The maintenance of the ceasefire and effective support for the implementation of the provisions of the ceasefire agreement, including the withdrawal of mercenaries, foreign fighters and foreign forces.
189. To achieve these results, the independent strategic review recommended the strengthening of key mission capacities and a gradual expansion of the Mission's footprint, which was initiated in 2022 with the deployment of the ceasefire monitoring component, to be based in Sirte, once conditions allow.
190. The 2023 proposal prioritizes the following mission capacities: (a) political analysis and support for ongoing mediation efforts, with an emphasis on constitutional expertise; (b) political and economic expertise focused on economic analysis and reform, and support for the transparent, equitable and accountable management of oil revenue across the country; (c) transitional justice and reconciliation; (d) disarmament, demobilization and reintegration and weapons and ammunition management capacity, included within the ceasefire monitoring component; (e) strategic communications capacity; (f) gender analysis and mainstreaming capacity; (g) enhanced capacity in the Office of the Chief of Staff to ensure the effective direction and integrated management of the Mission's activities and to ensure Mission-wide coherence and harmonization among mandated tasks; and (h) security and support capacity to support the UNSMIL ceasefire monitoring component in Sirte.

External factors for 2023

191. The overall programme plan for 2023 is based on the following assumptions:
- (a) The Libyan Political Agreement of December 2015, Security Council resolution [2510 \(2020\)](#), endorsing the conclusions of the Berlin Conference on Libya, the Libyan Political Dialogue Forum Tunis road map and accompanying outputs and resolutions [2542 \(2020\)](#), [2570 \(2021\)](#), and [2629 \(2022\)](#) will remain the guiding frameworks for United Nations support in Libya;
 - (b) Consensus between the Libyan institutions to restore the electoral path in 2022, through clear timetables and milestones and an agreed constitutional basis, will culminate in an inclusive and transparent electoral process and thereby bring an end to the political transition through the holding of presidential and parliamentary elections as soon as possible and the formation of new executive and legislative authorities thereafter;
 - (c) Implementation of the ceasefire agreement of October 2020, including the withdrawal of foreign fighters and mercenaries, will continue, as will agreed mechanisms to monitor and maintain the agreement, while the fragile stability characterizing the security situation will persist;
 - (d) The economic sector of Libya will continue to suffer from a lack of oversight and clarity with regard to public spending, while efforts regarding the reunification of the Central Bank will continue as part of the implementation of the road map and independent audit recommendations for reunification;

- (e) Elements of instability or stagnation will continue to affect the political and security processes, providing openings for those interested in the status quo and/or potential spoilers to hinder the processes, requiring continued good offices efforts in parallel with sustained support for reconciliation and support for transitional justice mechanisms;
 - (f) The human rights situation in Libya is expected to remain of concern, especially with respect to maintaining civic space for all people in Libya to exercise their rights, in particular civil and political rights;
 - (g) The humanitarian situation will improve, parallel to the stabilization of the security situation, with a steady decrease in the number of internally displaced people;
 - (h) Strategic partnerships will continue between the members of the international community, including regional organizations and the United Nations, in support of a Libyan-led and Libyan-owned political process and adherence to the United Nations sanctions regime.
192. With regard to cooperation with other entities, UNSMIL is mandated by the Security Council pursuant to its resolution [2542 \(2020\)](#) to coordinate international assistance and to provide advice and assistance to efforts led by the Government of Libya to stabilize the country. UNSMIL will seek to maximize collective results in all contexts through partnerships with relevant local and international partners, regional organizations and civil society groups, including through conducting diplomatic briefings and coordination with the African Union, the League of Arab States and the European Union (Libya Quartet) to ensure a unified approach towards supporting Libya's political and security processes and resolving the Libyan crisis. Furthermore, the United Nations-African Union-European Union tripartite task force will continue to work, in particular on stranded migrants and refugees in Libya.
193. Integration with the United Nations agencies, funds and programmes comprising the United Nations country team is a guiding principle for UNSMIL, as a complex United Nations integrated special political mission operating in a post-conflict environment linking several peacebuilding dimensions – political, development, humanitarian, human rights, rule of law, economic and security aspects – into a coherent strategy. The integration principle directs all United Nations actors (UNSMIL and United Nations humanitarian and development actors) to collaborate closely and coherently to maximize the gains of their interventions, under the leadership of the Deputy Special Representative of the Secretary-General/Resident Coordinator/Humanitarian Coordinator. The 2021 independent strategic review highlighted that coordination and synergies between the work of UNSMIL and the United Nations country team had improved and recommended that additional efforts be made to ensure complementarity between their various work streams. Accordingly, UNSMIL and the United Nations country team will carry forward the Secretary-General's focus on the humanitarian-development-peace nexus to facilitate long-term peace, security and sustainable development. On the humanitarian front, the 2022 Libya Humanitarian Response Plan is aimed at reaching approximately 211,000 people in the first five months of 2022, or 27 per cent of the 803,000 people identified as being in need of humanitarian assistance and protection interventions. In recognition that political and security interventions will have a major impact on humanitarian and development efforts and vice versa, an integrated planning and assessment approach will continue to strengthen the ability of UNSMIL to implement its mandate and increase the ability of the country team to carry out its role and, consequently, enhance the impact of United Nations interventions to support people in Libya. UNSMIL and the United Nations country team will work jointly on the implementation of the United Nations Sustainable Development Cooperation Framework (2023-2025) to address the underlying root causes and driving forces of the current crisis in Libya, within the framework of the Sustainable Development Goals, in particular Goal 16 on strong peace and justice institutions, Goal 5 on gender equality and Goal 8 on economic growth, aiming for an inclusive, stable, democratic, prosperous, equal and reconciled society, underpinned by unified and strengthened security, justice, rule of law and human rights institutions that promote and protect human rights. Overall, enhanced integrated planning and assessment between UNSMIL and the United Nations country team, and the identification of benchmarks and indicators present an opportunity to gradually prepare the ground for an eventual handover of tasks in the coming three

to five years, further to national elections, the establishment of government priorities and an improvement in the political, economic and security situation.

194. UNSMIL integrates a gender perspective in its operational activities, deliverables and results, as appropriate. It will continue to promote women's participation in the political process and representation in government institutions, including to ensure effective gender mainstreaming into the constitution-making and electoral processes, in order to safeguard equal rights and opportunities for women. UNSMIL and the United Nations country team will jointly promote equal rights and opportunities for women, including support for efforts by the Government to protect women from all forms of violence, in line with national legislation, applicable international law and relevant Security Council resolutions, as well as to address and prevent violence against women and girls in vulnerable situations, including displaced persons, migrants and refugees, and to identify the impact of extremism conducive to terrorism on women in Libya. UNSMIL and the country team will continue to improve prevention and protection efforts.

Evaluation activities

195. As requested by the Security Council in its resolution [2542 \(2020\)](#), an independent strategic review was carried out in 2021, which provided an assessment and recommendations for improving the efficiency of the overall structure, prioritization of tasks and the capacity and effectiveness of staffing of UNSMIL, including as it related to mediation and peace process management. The Council endorsed the review's recommendations in its resolution [2629 \(2022\)](#) and requested the Mission to explore all avenues to increase efficiency and redeploy existing resources, including through the prioritization and reconfiguration of tasks and resources. The Mission took this into consideration in preparing the proposed programme plan for 2023, in order to strengthen mandate delivery such as enhanced harmonization of efforts to advance the ongoing intra-Libya dialogue tracks (political, economic, security, human rights and international humanitarian law), and, considering humanitarian priorities, to lay the foundation for medium- to long-term processes, including national reconciliation and security sector reform, the establishment of a ceasefire monitoring mechanism and enhanced integration.
196. While there are no independent and external evaluations planned for 2023, the independent strategic review conducted in 2021 recommended the conduct of a strategic review and re-evaluation of staffing and capacity needs following national elections to ensure the alignment with national priorities. The Mission will further continue its efforts to enhance programme planning, monitoring and reporting on programme performance, as an element of self-assessment. UNSMIL will improve the collection of evidence-based information to inform decision-making processes, while focusing on strengthening accountability and identifying areas for improvement for its components.

Programme performance in 2021

Supporting the building of resilient and unified State institutions

197. In 2021, UNSMIL provided technical support and capacity-building to the High National Elections Commission during all phases in the preparation of general elections, including the voter registration process. The Mission also provided technical advice on the reunification of the Central Bank, including through the facilitation of an independent audit. On the security track, UNSMIL continued its advocacy on the unification of Libyan security institutions, which contributed to the establishment of a joint Libyan security force (police) by the 5+5 Joint Military Commission to operate along the coastal road and the deployment of the UNSMIL ceasefire monitoring component to support the Libyan ceasefire monitoring mechanism. The 5+5 Joint Military Commission remained active as the only unified military entity, providing an example for future unification of the military institutions.
198. Progress towards the objective is presented in the performance measure below (see table 32).

Table 32
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
Municipal elections were held in 25 municipalities in the west and south	Intra-Libyan economic-financial, military-security and political tracks convened	A new temporary executive authority selected and endorsed by the House of Representatives to govern Libya for the period leading up to national elections set for 24 December 2022
Government budget for commission secured	Ceasefire arrangements agreed and road map adopted for the transitional period until elections are held	The House of Representatives, which had been divided, was reunified
Commission staff capacity-building and development activities conducted, including on gaining experience from the Tunisian elections		Electoral management body equipped to conduct (national and municipal) elections, including sufficient government budget

Impact of the pandemic

199. While continuation of the COVID-19 pandemic into 2022 did not result in the cancellation of mission activities, it continued to have an impact on the modalities in which UNSMIL delivered its mandate. Accordingly, UNSMIL implemented prevention measures restricting mass meetings, which are key to supporting an inclusive political process, and reconfigured seminars, workshops and training events to allow for their delivery online and provided technical advisory services through webinars and other online means. The Mission was therefore able to continue to deliver its mandate, through virtual means, including security working groups (both co-Chair and plenary sessions). Limited face-to-face working sessions were held, such as the plenary security working group in Tunis, as well as in-person international visits that were key to making progress on the 5+5 Joint Military Commission's action plan for the withdrawal of foreign forces, foreign fighters and mercenaries from Libya. UNSMIL facilitated 10 online mine action coordination meetings with the Libyan Mine Action Centre, implementing partners, interested Member States and stakeholders to enhance operational coordination, facilitate information-sharing and increase efficiency. In addition, 120 electoral support events were delivered online, including weekly and monthly electoral assistance sessions with electoral partners to ensure information-sharing, gender and elections seminars, and thematic workshops.

Planned results for 2023

Result 1: fostering reconciliation and an inclusive democratic process

Programme performance in 2021 and target for 2023

200. In 2021, the Mission's work contributed to maintaining political dialogue among Libyans through the Libyan Political Dialogue Forum and the appointment of a new interim executive, which established a united executive authority, and to advancing efforts aimed at the unification of economic institutions, although this was affected by continued divisions between the parties. Using a variety of strategic communications tools, the Mission supported the political and electoral processes with efforts to counter hate speech, incitement and disinformation in Libyan media, while in parallel promoting principles of ethical journalism and engagement on social media platforms. Innovative digital media dialogues reached thousands of Libyans, opening access to the political dialogue for the public at large.
201. In 2023, UNSMIL will continue to facilitate an inclusive Libyan-led and Libyan-owned political dialogue process to reach an agreement on a constitutional framework that is in accordance with

international standards and that will strengthen State-building, good governance and accountability. UNSMIL will provide support to national efforts for a peaceful political transition, reconciliation and consolidation of democratically elected institutions. Technical support will be provided in the preparation and conduct of elections, including at the local level, further promoting decentralization and local governance.

202. Progress towards the objective and the target for 2023 is presented in the performance measure below (see table 33).

Table 33
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Three-part road map proposed by UNSMIL to cease hostilities, arms embargo maintained and political dialogue resumed	Intra-Libyan economic-financial, military-security and political dialogue tracks launched and supported by respective working groups under the framework of the International Follow-up Committee on the Libya Berlin process	A new temporary executive authority selected by the UNSMIL-facilitated Libyan Political Dialogue Forum and endorsed by the House of Representatives to govern Libya for the period leading up to national elections, and no longer than a total of 18 months	Peaceful transfer of power following national elections	Unified elected parliament and functional Government and its institutions contribute to political stability and reconciliation
Additional revenue (which matched that of oil) integrated into the budgetary process	Ceasefire agreement signed in October 2020 and political road map adopted in November for the transitional period through national elections	Agreement on a constitutional basis for the elections was not reached	Multi-faceted national approach to reconciliation supported, while simultaneously addressing accountability	Constitutional framework is agreed and developed in line with international norms and standards
Meetings of the Central Bank of Libya governors convened with support of international financial institutions to agree on terms of reference	Board of directors of the Central Bank of Libya reactivated, enabling harmonization of monetary policies	Central Bank of Libya board of directors unified exchange rates, thereby strengthening real currency value and expunging market distortions	Finalization of process to adopt a constitution that is in line with minimum internationally recognized standards	Equitable access to political and democratic processes, including access by women and young people, guaranteed and protected under the constitution
Libyan economic dialogue with Libyan economic experts established to consolidate and develop economic policy reform	Contract with auditing company concluded and parallel audits of both Central Bank of Libya branches launched	Audit report on the Central Bank of Libya published on the basis of the audit initiated to restore national accountability process and move towards unification of the two branches	Support for unification of the Central Bank of Libya, management of national deficits and access to foreign exchange in a manner that maintains currency value and steadies the price of vital commodities	Economic and financial institutions have increased capacity to provide macroeconomic stability and enact economic reforms, towards a more productive, efficient and transparent Libyan economy
			Consolidation of the unification of the Central Bank of Libya, including the harmonization of its accounts and its	

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
	Establishment of the Libyan Expert Economic Commission formalized as an interim consultative body to harmonize economic policy and create the conditions for institutional unification	Economic experts supported the transition process to a new unified national Government by taking continuous steps towards supporting the unification of the national budget and other economic processes	supervisory processes over the commercial banks; national accountability process strengthened Economic reform efforts continue, to make the Libyan economy more productive, efficient and transparent	

Result 2: strengthened rule of law institutions and transitional justice process protecting the rights of all people in Libya

Programme performance in 2021 and target for 2023

203. In 2021, UNSMIL supported the launch of a national centre for transitional justice for training national actors, strengthening national capacities and preparing laws on transitional justice. UNSMIL technical support further led to the establishment of a committee in the Libyan Bar Association composed of 20 experienced women lawyers in order to strengthen its focus on women's rights. UNSMIL also facilitated discussions on violence against women, the role of civil society organizations and the protection of human rights defenders. UNSMIL continued to document cases of arbitrary detention in facilities operated by State and non-State actors across the country, as well as incidents in which detainees were subjected to torture, sexual violence and other serious violations of international law.
204. In 2023, UNSMIL, together with the United Nations country team, will support government institutions in respect of their obligations to protect and promote human rights, with an emphasis on protecting civic space and freedom of expression and assembly. The Mission will assist Libyan institutions in rolling out the transitional justice process, with the rights of victims and accountability and justice at the centre of the process. Good offices will be provided to advance the recognition and enjoyment of women's rights and the institutionalization of policies and procedures related to the empowerment of women, and protection of women's and children's rights and victims of violence.
205. Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 34).

Table 34
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Establishment of a civil society forum with human rights defenders and women human rights defenders on the universal periodic report, coordinating the submission of a	Enhanced capacities of Libyan women municipal councillors on the inclusion of Libyan women in the peace and electoral process, on international human	Strengthened judicial leadership, including of the Supreme Judicial Council, on respect, protection and promotion of human rights, with an emphasis on	National mechanism on transitional justice established, strengthening the capacities of national actors on transitional justice laws and the reconciliation	Legal and policy frameworks enacted and implemented by legitimate authorities to promote rule of law, including the endorsement of a law on violence

joint universal period report to the Human Rights Council	rights, national legislation and recommendations on eliminating violence against women	fact-finding and enhancing the judiciary and prosecutorial systems	<p>process, as well as advocacy on the release of arbitrarily detained prisoners</p> <p>Development by governmental bodies and civil society organizations of a protection strategy, and a Government-endorsed protection structure, including a gender-responsive, human rights defender and protection joint commission</p> <p>Establishment of a joint consultation forum, strengthening civil society monitoring, analysis and reporting of human rights abuses and violations</p>	<p>against women, the amendment of Transitional Justice Law 29 of 2013 and the drafting of a new national reconciliation law</p> <p>Rule of law institutions strengthened to investigate, prosecute, adjudicate and prevent abuses and violations of human rights, while monitoring and reporting capacities of civil society organizations are enhanced</p>

Result 3: unified security institutions promoting progress on security sector reform and the implementation of the ceasefire agreement, including an effective Libyan ceasefire monitoring mechanism

Proposed programme plan for 2023

206. The adoption of the 5+5 Joint Military Commission's action plan for the removal of foreign fighters, foreign forces and mercenaries from Libya in October 2021 provides for a gradual, balanced and sequential process of withdrawal of these elements from Libyan territory. UNSMIL efforts contributed to strengthening the basis on which to continue to work towards the unification and reform of the security sector. UNSMIL also initiated the phased, scalable and incremental deployment of the ceasefire monitoring mechanism, comprising international monitors, as well as personnel providing operational, logistical and security support.

Lessons learned and planned change

207. The lesson learned for the Mission was that the ongoing political instability had a negative impact on the progress in implementing the road map agreed with the 5+5 Joint Military Commission and challenged the timely operationalization of the Libyan ceasefire monitoring mechanism. The Mission addressed this by focusing on concrete operational steps, such as the development of standard operating procedures required for establishing the joint operations room and regular engagement with 5+5 Joint Military Commission and local monitors. In applying the lesson, the Mission will continue to strengthen its support to the Libyan-led and Libyan-owned ceasefire monitoring mechanism's capacity development for operational planning, monitoring, validation and reporting on ceasefire provisions, to continue to identify areas of agreement and determine activities to be undertaken.

208. Expected progress towards the objective is presented in the performance measure below (see table 35).

Table 35
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Establishment of the 5+5 Joint Military Commission as a joint Government of National Accord and Libyan National Army body contributing to the reduction in hostilities and forming the nucleus for the full ceasefire agreement in 2020	<p>Ceasefire agreement signed in October 2020</p> <p>Libyan Political Dialogue Forum political road map adopted in November 2020 for the transitional period until national elections are held</p> <p>Libyan-owned ceasefire monitoring mechanism signed on 3 November 2020 by the 5+5 Joint Military Commission and UNSMIL</p>	<p>Trust built between the parties to the ceasefire agreement led to the signing by the 5+5 Joint Military Commission on 8 October of an action plan for the withdrawal of mercenaries, foreign fighters and foreign forces from Libya</p> <p>5+5 Joint Military Commission signed action plan for the implementation of the ceasefire agreement</p>	<p>Implementation of the action plan for the withdrawal of foreign forces, foreign fighters and mercenaries, including the establishment of a joint operations room</p> <p>Extension of the disarmament, demobilization and reintegration committee's efforts to eastern and southern regions</p>	<p>Unified security sector institutions, under civilian oversight including functional, professional and accountable military and police forces</p> <p>Libyan ceasefire monitoring mechanism fully operational and monitors and reports on breaches in the implementation of the ceasefire agreement</p> <p>Comprehensive security sector reform initiatives, including disarmament, demobilization and reintegration of non-State armed groups through effective and inclusive mechanisms established by a national disarmament, demobilization and reintegration committee</p>

Deliverables

209. Table 36 lists all deliverables of the Mission.

Table 36

Deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	3	3	3	3
1. Report to the Security Council	3	3	3	3
Substantive services for meetings (number of three-hour meetings)	6	6	6	6
2. Meeting of the Security Council	6	6	6	6
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	22	4	16	16
3. Projects on policing and security joint programme	20	2	15	15
4. Projects related to arms, ammunition management, counter-proliferation and humanitarian mine action	2	2	1	1
Seminars, workshops and training events (number of days)	140	143	138	138
5. Seminars and workshops on the political process, confidence-building, constitution-making, legislative and economic reform, electoral management and campaigning, mediation and conflict resolution, prevention of and response to incitement to violence and hatred, media, young female social media activists, digital Libyan dialogue, unification of the army, demobilization of armed groups; technical advice, coordination support and advocacy on unexploded ordnance and ammunition management; and capacity development	140	143	138	138
C. Substantive deliverables				
Good offices: provision of good offices to further an inclusive political, security and economic dialogue through engagement of Libyan institutions, political parties and activities, civil society, women, youth and cultural components, including one political, one economic and one human rights working group per month; good offices on the implementation of the ceasefire agreement, including one meeting of the 5+5 Joint Military Commission per month (reaching 12 to 15 key Libyan actors); one co-Chair security working group meeting (reaching 10 to 15 key ambassadorial level actors) and one plenary security working group meeting (reaching 20 to 25 ambassadorial level actors); one security sector working group meeting (reaching 20 beneficiaries, including key defence attachés and police advisers) per month, as well as various subcommittees and liaison committees both inside and outside Libya at least once per month (reaching, on average, 12 beneficiaries), including meetings of the various subcommittees aimed at the unification of the military to address the issue of non-State armed groups and strategic security policy and frameworks (reaching some 20 beneficiaries); provision of good offices to support accountability and transitional justice and strengthen national capacities through the provision of direct technical advice and capacity-building programmes to 15 lawyers and 15 prosecutors/judges, and provision of good offices to support the judiciary and prosecutorial system on sustainable rule of law and access to justice and fair trials; provision of good offices to support the judiciary and prosecutorial system; and provision of good offices to advance the recognition and enjoyment of women's rights, in line with the Convention on the Elimination of All Forms of Discrimination against Women, and advocacy on the institutionalization of systems, policies, procedures and mechanisms related to the protection and empowerment of women victims of violence, as well as women's access to equitable justice and the prioritization of the protection of women's and children's rights, including through meetings with women empowerment units at the police force, the High National Elections Commission and the women's unit at the Presidential Council.				
Fact-finding, monitoring and investigation missions: monitoring missions of the UNSMIL ceasefire monitoring component in support of the efforts of the Libyan ceasefire monitoring mechanism, reaching the different locations in the area of responsibility along the coastal road between Sirte and Abu Qurayn, to Suknah, and between Abu Qurayn and Bin Jawwad, with the possibility of expanding at a later stage; conduct of joint missions to record and report on any alleged violation of the ceasefire, as well as analysis and reporting on the most recent developments in Libya, including periodic threat assessments of the overall situation that could risk and have an impact on ceasefire monitoring; monitoring missions on the human rights situation, with visits to 6 prisons and detention centres, subject to access guarantees by official counterparts, including makeshift and secret detentions and other types of places where there are deprivations of liberty, such as women's shelters and reformatories; monitoring of and reporting on some 60 cases of abuse and violations of human rights and violations of international humanitarian law, including sexual violence in conflict, and monitoring protection issues, with a focus on women and children; and monitoring of protection issues with a victim-centred approach and focus on women, children and migrants, reaching up to 30 beneficiaries who are referred to embassies concerned and/or legal and psychological aid for smooth integration into society.				

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

Consultation, advice and advocacy: support for subsequent phases of the Libyan political process, including the constitutional process and the organization of elections, with workshops on election-related technical subjects reaching 300 national and international election stakeholders; electoral assistance, information-sharing and coordination meetings with international electoral assistance partners and embassies, reaching 100 beneficiaries, as well as advice to advance the constitution-making process; provision of daily advice to the High National Elections Commission and the Central Committee for Municipal Council Elections on electoral matters; assistance in strengthening the electoral management bodies' technical capacities; coordination of international electoral assistance; support for electoral security planning and for the Central Committee for Municipal Council Elections in municipal elections through work with local electoral stakeholders; support to rebuild Libya's national polity by addressing roots of grievances through a national reconciliation process and transitional justice mechanisms, with workshops and seminars reaching 50 beneficiaries; planning and implementation of ceasefire monitoring activities; provision of advice to the 5+5 Joint Military Commission and the Libyan-led and Libyan-owned ceasefire monitoring mechanism, including legal advice, where required, to establish an effective monitoring mechanism that coordinates and assesses progress on the withdrawal of foreign forces and mercenaries; provision of advice on security policy and frameworks; provision of advice and consultations with the Libyan Political Dialogue Forum and House of Representative women's caucus and civil society and women's groups, reaching approximately 500 women; setting up of advocacy plan for the law on violence against women; support for security sector governance, reform and development, including reintegration of non-State armed groups; provision of advice to the 5+5 Joint Military Commission, the Libyan-led and Libyan-owned ceasefire monitoring mechanism, the Libyan Mine Action Centre, and national and international mine action organizations, entities and stakeholders on the control of heavy weapons, arms and ammunition management, including advice on the survey and clearance of explosive remnants of war, booby-traps, improvised explosive devices and mines; conduct of advocacy and provision of advice on international arms control and disarmament instruments; support for mine action coordination and facilitation of capacity-building within available resources; confidence-building sessions with 50 participants from national and local authorities, and civil society organizations in support of reconciliation dialogue initiatives; advocacy on and implementation of the human rights due diligence policy framework, including the monitoring, reporting and communication strategy; advocacy on respect for civic space/freedom of assembly and freedom of expression, involving 30 participants and 4 local institutions, including the Ministry of Justice, the Ministry of Interior, the prosecutor's office and the High Judicial Council, for the release of individuals detained without a legal basis; advocacy on women's rights by facilitating discussions and providing technical advice on the draft law on violence against women to 14 national experts on the rights of women and children, as well as advice on gender equality; advice on violence against women and gender-based violence linked to the electoral process; and advice and support to reinforce the capacity of 30 human right defenders and women human right defenders on the Monitoring Analysis and Reporting Arrangements Technical Working Group.

D. Communication deliverables

Outreach programmes, special events and information materials: media and communications campaigns and messaging through traditional and social media outlets promoting the peace process in its three-track, intra-Libyan dialogue, as well as the promotion of reconciliation, social cohesion and the respect for humanitarian and human rights law, reaching 5 million Libyans (including young people, women, social media influencers and the general public) and 20 official media entities and counterparts, including civil society organizations and non-governmental organizations; targeted meetings, events and leadership field visits in the east, south and west, engaging at least 120 young people and 100 women activists from all parts of Libya to promote their key role in peacebuilding and the peace process in Libya, including through the revival of youth track dialogue efforts and the promotion of women and municipalities track dialogue efforts; promotion of the Mission's outreach activities and engagement with local communities, building trust, maintaining close coordination and operationalizing the withdrawal of foreign fighters and mercenaries; and support for UNSMIL leadership and high-level officials in their international tours and meetings with Member States and diplomatic corps.

External and media relations: at least 40 strategic media interviews, statements and interactions with top-tier international and regional media outlets in Arabic, English and French, as well as select national media; frequent engagement with local media from all parts of Libya, promoting conflict-sensitive reporting; troubleshooting and crisis management pertaining to polarized media campaigns aimed at undermining the implementation of the Mission's mandate; establish partnerships with social media platforms to strengthen efforts in countering hate speech, fake news and misinformation; strengthen the partnership with the Department of Political and Peacebuilding Affairs-Department of Peace Operations Northern Africa Division and the Department of Political and Peacebuilding Affairs Innovation Cell to enhance traditional and social media monitoring and analysis; produce daily traditional and social media monitoring reports; foster professional ties with local, regional and international media outlets; report on the human rights situation and act as a public resource; 140 press releases and statements relating to progress in the best offices process; Special Representative of the Secretary-General's regular briefing to the international community; in-house production of multimedia products, including 4 videos on Libyan Political Dialogue Forum women participants, and a total of 80 minutes of video on the Forum, the 5+5 Joint Military Commission and other meetings that are distributed through social media and media mailing lists; 1,500 minutes of video recordings of livestreaming of Libyan Political Dialogue Forum sessions in the February and June/July rounds; and reports on hate speech and women's civil society organizations.

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
--------------------------	-----------------	----------------	-----------------	-----------------

Digital platforms and multimedia content: daily update of the Mission's website and daily feed on the Mission's official social media platforms in Arabic and English, highlighting activities, meetings, events, public messaging and the implementation of projects and programmes of UNSMIL and United Nations country team; and, with the help of the Department of Political and Peacebuilding Affairs Innovation Cell, conduct of artificial intelligence-powered digital media dialogues with the Libyan public, engaging thousands of Libyans in thematic dialogues, including social groups (youth and women), to seek their views and their recommendations and involve them in the political dialogue.

B. Proposed post and non-post resource requirements for 2023

Resource requirements (regular budget)

Table 37

Financial resources

(Thousands of United States dollars)

Category of expenditure	2021		2022		2023		Variance
	Expenditure		Appropriation		Total requirements		2023 vs. 2022
	(1)	(2)	(3)	(4)	(5)=(3)-(2)	Increase/(decrease)

^b One position is funded at 50 per cent and cost-shared with the Development Coordination Office.

^c Includes one general temporary assistance position.

210. In 2022, by its resolution [76/246 B](#), the General Assembly authorized the Secretary-General to enter into commitments with assessment in an amount not to exceed \$17,945,500, inclusive of the establishment of an additional 99 positions (1 Assistant Secretary-General, 1 D-1, 3 P-5, 10 P-4, 14 P-3, 35 Field Service, 1 National Professional Officer and 34 Local level), in the context of its consideration of the revised estimates for UNSMIL ([A/76/6 \(Sect.3\)/Add.8](#)). In accordance with standard practice, the commitment authority, although constituting part of the Mission's resources in 2022, is not included in the appropriation for 2022, given that the Assembly has yet to approve an appropriation.
211. For 2023, those 99 positions will continue to be essential for the effective delivery of mandates set out in Security Council resolutions [2542 \(2020\)](#) and [2570 \(2021\)](#), as explained in the revised estimates for UNSMIL ([A/76/6 \(Sect.3\)/Add.8](#)).
212. In addition, taking into account the renewal of the mission's mandate in Security Council resolution [2629 \(2022\)](#), a number of changes to staffing, including leadership structure, are proposed for 2023, for a net increase of seven additional positions, reflecting the realignment and renaming of organizational units, the establishment of a new functional team, the abolishment of one position, the establishment of eight positions, the reassignment of one position, the reclassification of one position and the redeployment of two positions, detailed as follows:
- (a) In line with the recommendations of the independent strategic review, endorsed in Security Council resolution [2629 \(2022\)](#), that the UNSMIL structure be reconfigured to its previous model headed by a Special Representative of the Secretary-General supported by a Deputy Special Representative of the Secretary-General for political affairs and a Deputy Special Representative of the Secretary-General who also serves as Resident Coordinator and Humanitarian Coordinator, it is proposed that the names of the following three positions be changed: (i) Special Envoy of the Secretary-General to Special Representative of Secretary-General (Under-Secretary-General); (ii) Mission Coordinator to Deputy Special Representative of the Secretary-General, Political (Assistant Secretary-General); and (iii) Assistant Secretary-General, Resident and Humanitarian Coordinator to Deputy Special Representative of the Secretary-General/Resident Coordinator/Humanitarian Coordinator. Correspondingly, the organizational name of the relevant offices of the three positions will be aligned to reflect the change in the leadership titles;

Office of the Special Representative of the Secretary-General

- (b) Realignment of the Public Information and Communication Section from the Office of the Chief of Staff to the Office of the Special Representative of the Secretary-General, to strengthen strategic communications in support of political engagement efforts with the priorities of the Mission;
- (c) Realignment of the Gender Advisory Section from the Office of the Chief of Staff to the Office of the Special Representative of the Secretary-General, to ensure that a gender perspective is incorporated into all aspects of mandate implementation and to ensure direct engagement with the head of mission and senior mission leadership on women and peace and security issues;
- (d) Abolishment of one position of Military Adviser (D-1), given that it has been determined that the functions of the position can be adequately covered by other existing capacities, namely, the Chief of Service of the Security Institutions Service (D-1) and the Chief of Service, Ceasefire Monitoring Component (D-1);
- (e) Establishment of one position of Senior Economic Affairs Officer (P-5) in Tripoli to lead on the economic policy portfolio to enhance the Mission's capacity on economic analysis and support UNSMIL mediation and good offices efforts on economic reform, in line with the independent strategic review recommendations. The Senior Economic Affairs Officer will support the Mission's leadership on high-level engagements on the economic track to: (i) advise UNSMIL leadership on courses of action for economic reform; and (ii) liaise with key international financial institutions, the United Nations country team and the key Libyan

stakeholders on their economic reform efforts, including on the unification of Libya's economic institutions, starting with a unified Libyan Central Bank, and ensuring the transparent, equitable and accountable management of revenue across the entire country;

Office of the Chief of Staff

- (f) Establishment of a mission planning unit, in line with the recommendations of the independent strategic review, to reinforce the Mission's planning capacity towards improving the effectiveness of the Mission and enhance United Nations integration, in order to support the effective direction and integrated management of the Mission's activities and ensure Mission-wide coherence and harmonization between mandated tasks. In this regard, for 2023, it is proposed that the unit be constituted by the redeployment of the existing position of Mission Planning Officer (P-4) from within the Office of the Chief of Staff;
- (g) Establishment of one position of a Senior Political Affairs Officer (P-5) to serve as Deputy Chief of Staff, in Tripoli, to strengthen the capacity of the Office of the Chief of Staff to adequately guide and provide oversight over a range of accountability and managerial processes assigned to the Office, as well as to provide coordination support in line with the Mission's efforts to ensure overall mission coherence. The incumbent will enhance the coordination capacity in the Office, reflecting the increased complexity of the UNSMIL mandate and the recommendations of the independent strategic review, as well as considering the expansion of the Mission's footprint with the establishment of the ceasefire monitoring component in Sirte;
- (h) Establishment of one position of Translator, Arabic (P-3) in the Translation and Interpretation Unit in Tripoli to provide timely and high-quality translations between Arabic and English of documents and public statements and high-quality consecutive/simultaneous interpretation during high-level meetings (in person and virtual) between UNSMIL senior officials and Libyan interlocutors. The additional capacity will be key to supporting mission leadership and sections' increased political engagement efforts, including support for all tracks and working groups on political, military-security, economic and international human rights and humanitarian law matters, as well as all active channels of negotiations between the parties, and engagement with regional stakeholders and other international partners;

Political Affairs Service

- (i) Establishment of one position of Political Affairs Officer (P-4) in Tripoli, with expertise on constitutions, to support the Libyan constitutional processes, through technical support and advice to the Libyan counterparts and within the Mission, including supporting political consultations on constitutional matters, in line with the independent strategic review recommendations;

Security Institutions Service

- (j) Establishment of one position of Disarmament, Demobilization and Reintegration Officer (P-3) in Tripoli to support its enhanced engagements on disarmament, demobilization and reintegration processes in line with the recommendations from the independent strategic review, including support for the facilitation of operational planning with national stakeholders on issues of process design, institutional set-up and economic aspects of disarmament, demobilization and reintegration, contributing to research and analysis of disarmament, demobilization and reintegration work, including risk and threat assessments, political factors, security and other issues affecting UNSMIL operations;

Gender Advisory Section

- (k) Establishment of one position of Gender Affairs Officer (P-3) in Tripoli to support the Senior Gender Adviser in the coordination of gender affairs in the context of the expanded presence of the Mission and the increased provision of good offices. The incumbent will support the Gender Advisory Unit in assisting the Government in ensuring the full, effective and

meaningful participation and leadership of women in the political transition, reconciliation efforts, the security sector and national institutions;

Public Information and Communication Section

- (l) Establishment of one position of Public Information Officer (P-3) in Tripoli to strengthen the Mission's strategic communications efforts, in line with the independent strategic review recommendations, in order to ensure a clear and compelling narrative outlining the Mission's vision in support of strengthening the political engagement and mediation efforts;

Office of the Chief of Mission Support

- (m) Renaming of two offices under mission support: the Office of Deputy Chief of Mission Support to become the Operations and Resource Management Section, while the Office of the Chief Technical Service will become the Supply Chain and Service Delivery Section, for improved alignment and coordination within the mission support structure;
- (n) Redeployment of one position of Deputy Chief of Mission Support (P-5) from Tunis to Tripoli to serve as Chief of the Operations and Resource Management Section to strengthen oversight of the day-to-day operations of key mission support units, ensure appropriate implementation of key decisions and facilitate the decision-making process involving resources, including on issues of staffing, finance, medical and communication that are key to fulfilling the mandate of the Mission. The incumbent will oversee, manage and direct the Human Resources Unit, the Medical Unit, the Finance Unit and the Communication and IT Unit;
- (o) Reclassification of one position of Chief of Unit, Technical Service from P-4 to P-5 to strengthen and reprioritize logistics and service delivery efforts, considering the expanded span of responsibilities and accountability related to supply chain and service delivery management. For 2023, client demands on the supply chain are expected to increase significantly, commensurate with the anticipated increase in occupancy. The incumbent will oversee the Supply Chain and Service Delivery Section, which will be responsible for managing and coordinating the flow of goods and services and the provision of key logistical support services to all mission components and other clients. The Section will consist of the existing Life Support/Logistics Unit, the Engineering and Facilities Management Unit, the Property Management Unit, the Air Operations and Movements Control Unit, the Transport Unit, the Centralized Warehouse and Acquisition Requisition Unit and the Procurement Unit. The proposed reclassification is to ensure that the level of the function is commensurate with the scope and substance of the responsibilities and will also align the level of the head of the Supply Chain and Service Delivery Section with the levels established in other missions of comparable size, complexity and mandate;
- (p) Establishment of one position of Medical Officer (National Professional Officer) in Tunis to address the identified critical need to have a dedicated medical capacity in Tunis, taking into account that Tunis serves as the entry hub into Libya for all UNSMIL personnel and the United Nations Guard Unit, not just the Mission's authorized deployment footprint on the ground. The incumbent will be entrusted with overseeing all medical evacuations from Libya to Tunis, providing emergency and routine medical support, in accordance with United Nations standards, including with respect to the mental health of United Nations personnel, and conducting hospital assessments in support of the Mission. The proposed establishment will address the operational risk of a lack of immediate medical capacity to respond to cases of medical and casualty evacuations;
- (q) Reassignment of one position of Administration Assistant (Local level) in Tripoli to Laboratory Technician (Local level) in the Medical Unit to augment the medical capacity of the Unit in response to ongoing health-related requirements, to ensure the safety of mission personnel. The incumbent will be responsible for maintaining a sterile environment, organizing logbooks,

- labelling and storing samples, managing medical stock, and performing quality control tests and audit lab logbooks to ensure compliance with established procedures;
- (r) Realignment of the Procurement Unit from the Operations and Resource Management Section (formerly the Office of Deputy Chief of Mission Support) to under the Supply Chain and Service Delivery Section (formerly the Office of the Chief Technical Service);
 - (s) Realignment of the Communication and IT Unit from the Supply Chain and Service Delivery Section (formerly the Office of the Chief Technical Service) to under the Operations and Resource Management Section (formerly the Office Deputy of Chief Mission Support).
213. It is proposed that one general temporary assistance position of Chief of Mine Action Section, in the Office of the Deputy Special Representative of the Secretary-General, Political, be continued in 2023 to lead the UNSMIL mine action component, advise the UNSMIL leadership on mine action issues, supervise the implementation of the workplan, and lead engagement with the national authorities, the United Nations country team and other stakeholders involved in mine action activities.
214. A vacancy rate of 32.9 per cent has been applied to the estimates for the continuing international positions on the basis of recent incumbency and projected recruitment. Vacancy rates of 42.9 per cent and 32.1 per cent have been applied for the continuing National Professional Officer and Local level staff positions, respectively, and a vacancy rate of 50 per cent has been applied for the eight positions proposed for establishment. A vacancy rate of 16.7 per cent has been applied to the estimates for United Nations Volunteers on the basis of recent incumbency and a vacancy rate of 15 per cent has been applied to the estimates for government-provided personnel, on the basis of projected recruitment. The estimates for United Nations Guard Unit personnel are based on the assumption of full deployment.
215. The proposed resource requirements for 2023 for UNSMIL amount to \$88,432,200 (net of staff assessment) and would provide for the deployment of 234 United Nations Guard Unit personnel (\$6,761,100), salaries and related costs (\$41,722,700) for the deployment of 277 international positions (1 Under-Secretary-General, 2 Assistant Secretary-General, 7 D-1, 20 P-5, 42 P-4, 48 P-3, 2 P-2, 154 Field Service and 1 General Service) and 134 national positions (16 National Professional Officer and 118 Local level), 6 United Nations Volunteers and 7 government-provided personnel, including the proposed establishment of 8 positions (7 international and 1 national), and operational costs (\$39,948,400) comprising the costs for consultants and consulting services (\$208,000), official travel (\$1,010,400), facilities and infrastructure (\$23,725,700), ground transportation (\$265,900), air operations (\$7,010,000), communications and information technology (\$3,349,300), medical (\$852,400), and other supplies, services and equipment (\$3,526,700).
216. The increase in requirements for 2023 compared with approved resources for 2022 is attributable mainly to: (a) the continuation of the ceasefire monitoring component into 2023, inclusive of the 99 newly established positions, to ensure no disruption to and effective implementation of the ceasefire monitoring mandate, for which a commitment authorized was approved but no appropriation has yet been made for 2022; (b) higher requirements for civilian personnel costs resulting mainly from the most recent salary scales and the proposed establishment of eight new positions (2 P-5, 1 P-4, 4 P-3 and 1 National Professional Officer) in 2023; and (c) higher requirements for operational costs under: (i) facilities and infrastructure, resulting from the application of the most recent contractual prices for rental of premises and maintenance services; (ii) communications and information technology, owing to the acquisition of equipment that has passed its life expectancy; and (iii) air operations, owing to higher requirements for fuel due to an increase in the price of fuel.

8. United Nations Verification Mission in Colombia

(\$67,454,700)

Foreword

The signatory parties to the Final Agreement for Ending the Conflict and Building a Stable and Lasting Peace made significant progress towards its implementation. More than 13,000 former combatants continued their reintegration process in the former territorial areas for training and reintegration, rural and urban communities. The transitional justice system is advancing in its innovative work to support truth, justice, reparations to victims and non-repetition. Reintegration projects are yielding results, benefiting not only former combatants but also the most vulnerable communities, and resolute and substantial steps have been taken towards reconciliation. In March 2022, representatives in the 16 special transitional electoral districts for peace were elected, in what constituted an exercise of political inclusion derived from the Final Agreement.

While I recognize the progress made, I encourage all parties to continue with their efforts to address important issues, including access to land and housing for former combatants, the sustainability of economic projects and the implementation of measures to address stigmatization. It is especially urgent to strengthen security guarantees for former combatants and social leaders and to reinforce the still fragile presence of the State in some conflict-affected regions.

It will be incumbent on the new authorities who take office following presidential and legislative elections in 2022 to deepen the implementation of key areas of the Final Agreement. The United Nations Verification Mission in Colombia will continue to play a key role in supporting the efforts towards sustainable peace and reconciliation and will accompany the people of Colombia in consolidating the gains of peace.

(Signed) Carlos **Ruiz Massieu**
Special Representative of the Secretary-General for Colombia and
Head of the United Nations Verification Mission in Colombia

A. Proposed programme plan for 2023 and programme performance for 2021

Overall orientation

Mandates and background

217. The United Nations Verification Mission in Colombia is mandated by the Security Council, at the request of the Colombian Government and the former Revolutionary Armed Forces of Colombia – People’s Army (FARC-EP), to verify three key aspects of the Final Agreement for Ending the Conflict and Building a Stable and Lasting Peace, adopted in 2016 by the two parties: (a) the reintegration of FARC-EP members into political, economic and social life (section 3.2 of the Agreement); (b) the implementation of personal and collective security and protection measures for ex-combatants, and comprehensive security and protection programmes for the communities and organizations in the territories (section 3.4 of the Agreement); and (c) compliance and implementation of the sentences issued by the Special Jurisdiction for Peace (section 5.1.2 of the Agreement). The mandate is defined in Security Council resolution [2366 \(2017\)](#) and was subsequently renewed by the Council in its resolutions [2435 \(2018\)](#), [2487 \(2019\)](#), [2545 \(2020\)](#), [2574 \(2021\)](#) and [2603 \(2021\)](#).
218. The Verification Mission works closely with the two parties, including in the framework of the relevant verification bodies established by the Final Agreement, in particular the Commission for the Follow-up, Promotion and Verification of the Implementation of the Final Agreement, the National Reintegration Council and the National Commission on Security Guarantees, as well as with members of the United Nations country team, local and departmental authorities and civil society. The work of the Verification Mission will remain of vital significance in 2023 with regard to supporting the parties in the implementation of the reintegration process and the extension of security and protection to vulnerable communities, social leaders, human rights defenders and former combatants, and providing support to the transitional justice process through the Mission’s verification of restorative sentences issued by the Special Jurisdiction for Peace and the comprehensive implementation of the sections of the Final Agreement that are deeply interconnected and mutually reinforcing under the mandate of the Verification Mission.

Programme of work

Objective

219. The objective, to which the Mission contributes, is to advance the effective implementation of the provisions of the Final Agreement for Ending the Conflict and Building a Stable and Lasting Peace concerning reintegration, security guarantees and restorative sentences.

Strategy

220. To contribute to the objective, the Mission will:
- (a) Apply a proactive and inclusive approach to verification, which includes advocacy, good offices and close engagement with the parties to the Final Agreement, relevant institutions and authorities at the national, regional and local levels;
 - (b) Conduct independent verification and participate, jointly with the parties, in key forums and institutions created for the implementation of the Final Agreement;
 - (c) Promote constructive dialogue and trust-building between the Government and Comunes to address pending issues related to peace implementation and maintain constant coordination

and dialogue with key interlocutors, including actors across the political spectrum, civil society, the private sector and the international community, to foster support for the implementation of the Final Agreement.

221. Reflecting the importance of continuous improvement and responding to the needs of Member States, the Mission has mainstreamed lessons learned and best practices related to the adjustments to and adaptation of its programme as a result of the COVID-19 pandemic. This includes flexibility to adjust to the new realities of the pandemic using virtual platforms, although the pandemic also posed challenges and brought to the fore the vulnerability of productive projects and the limited access to health care of former combatants who reside in the most remote rural areas. The Mission will continue to step up its advocacy to bring attention to these areas within the framework of the tripartite mechanisms, including by working with the Agency for Reintegration and Normalization and the Ministry of Health and Comunes to prevent and respond to the COVID-19 contagion among former combatants, and to align their efforts with those led by United Nations agencies, funds and programmes in rural areas.
222. The above-mentioned work is expected to result in:
 - (a) Increased trust between the parties to the Final Agreement; intensified efforts to ensure the sustainability of the reintegration process; sustained progress on tangible issues that impede successful reintegration, including access to land for the consolidation of former territorial areas for training and reintegration for former combatants' productive projects and housing solutions; the promotion of gender-sensitive reintegration and the active participation of women former combatants; and the provision by the Government of more sustainable solutions for former combatants residing inside and outside of former territorial areas for training and reintegration;
 - (b) Enhanced State capacity and responsiveness to better prevent and investigate attacks against former combatants, social leaders and human rights defenders, as well as increased trust and understanding between the parties regarding security and protection mechanisms, taking into consideration the particular needs of women, children and former combatants of ethnic origin, as well as those of indigenous peoples and other communities at risk;
 - (c) Enhanced trust in the transitional justice system; the reinforced ability of the Special Jurisdiction for Peace to ensure compliance with and implementation of its restorative sentences; and contributions to the realization of victims' rights to truth, justice, reparation and non-repetition, and their full inclusion in the reparative system.

External factors for 2023

223. The overall programme plan for 2023 is based on the following planning assumptions:
 - (a) Continued international support for the close engagement of the United Nations and the Mission in the peace process;
 - (b) The new national Government and legislature will remain focused on the implementation of the Final Agreement;
 - (c) Continued violence caused by illegal armed groups, requiring the further strengthening of engagement with local authorities and security institutions, as well as with the Office of the Attorney General;
 - (d) Continued progress in the transitional justice system resulting in the issuance of restorative sentences.
224. With regard to cooperation with other entities, the Mission will continue to undertake extensive engagement and liaison with international, national and subnational actors supporting the implementation of the Final Agreement. At the international level, the Mission will continue to engage closely with the diplomatic community and regional organizations to identify synergies and

areas of mutual interest and support with regard to peace implementation. At the national and subnational levels, the Mission will maintain its extensive engagement with a broad range of political, civil society and private sector actors, including community; religious; youth; women; ethnic; and lesbian, gay, bisexual, transgender and intersex organizations; and the transitional justice institutions. In Colombia, where civil society is vibrant and highly engaged in the peace process, such cooperation with other entities remains an essential aspect of the Mission's work. The Mission will also continue to bolster its relationships with departmental and local authorities, particularly as they gain more responsibilities with regard to the reintegration process and ensuring security guarantees for communities.

225. With regard to inter-agency coordination and liaison, the Mission will continue to work closely with the United Nations country team and the Resident Coordinator's Office. The work of the country team is guided by the United Nations Sustainable Development Cooperation Framework, signed at the beginning of 2020 and scheduled to be reviewed in 2023. Through coordination in joint mechanisms at different levels, the Mission is able to share conflict analyses and encourage coherent action and engagement across the peace and security and development pillars. This close working relationship is not only undertaken at the national level, where the Mission participates in the regular meetings of the United Nations country team, but also at the local level, where Mission staff work closely with the teams deployed by different agencies, funds and programmes. Moreover, in the spirit of sustaining peace and contributing to long-term stability, the Mission and the country team have enhanced synergies in the implementation of productive projects for former FARC-EP members and have worked together on efforts related to security guarantees, as well as on the implementation of projects supported by the Peacebuilding Fund.
226. The Mission integrates a gender perspective in its operational activities, deliverables and results, as appropriate. The Mission will work to ensure the adequate implementation of its gender directive and gender parity strategy and that the specific needs of female former FARC-EP members are fully incorporated into programme design, implementation and monitoring, and give priority to the security guarantees of female leaders, human rights defenders and former combatants. The Mission will also ensure the adequate inclusion of a gender perspective in the verification of restorative sentences.

Programme performance in 2021

Strengthened investigations into attacks against former combatants, social leaders and communities

227. In 2021, the Mission continued its proactive verification, strategic analysis and advocacy to foster the security guarantees mechanisms created by the Final Agreement at the national and local levels. The Mission also continued to work with and closely support the Government and State institutions in charge of the prevention, protection and investigation of the security guarantees of former FARC-EP combatants, social leaders and communities in the most affected areas, supporting trust-building mechanisms and dialogue among civil society organizations and former combatants and these institutions. In particular, the Mission strengthened the tripartite mechanism created for the participation of former combatants as analysts and liaison officers, at the regional and local levels, dedicated to promoting a comprehensive vision of security matters. Additional support was provided to the tripartite mechanism in relation to gender-sensitive risk analysis and women's protection. The Mission also established a strategic partnership with the Special Jurisdiction for Peace to proactively verify the implementation of the precautionary measures for security guarantees of former FARC-EP members.
228. The above-mentioned work contributed to an increase in the coverage of the subnational security guarantees mechanisms and in the communication between former combatants and State institutions. Progress towards the objective is presented in the performance measure below (see table 39).

Table 39
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
Strengthened tripartite mechanisms and prioritization of investigations into the attacks against former FARC-EP combatants	Expansion of investigations into and increased rates of successful judicial prosecutions of the criminal organizations behind the attacks, including both material and intellectual authors	Progress in dismantling criminal organizations that affect the reintegration process and peace implementation, through the implementation of public policies
Establishment of a regional peace promoters programme to encourage in-depth analysis and investigations regarding the attacks against former combatants		

Impact of the pandemic

229. The continuation of the pandemic into 2021 had an impact on the implementation of mandates. In particular, it created difficulties in verifying the implementation of security guarantees for former combatants, community leaders, human rights defenders and communities. For instance, parties concerned by attacks on the above-mentioned categories were reluctant to provide information over the telephone or by other electronic means of communication, and a significant number of former combatants reside in rural areas where telephone coverage is limited. The pandemic also affected the Mission's ability to follow up on and engage with local authorities as a result of restrictions on in-person meetings and gatherings, and training and sensitization activities on the Mission's mandate and implementation of the Final Agreement for public institutions had to be adapted to a virtual environment. In this regard, the Mission forged partnerships with universities and peace-related institutions to use their online learning and certification platforms, which made these learning sessions more accessible to the audience.

Planned results for 2023

Result 1: ensuring institutional continuity and strengthened security guarantees for communities, human rights defenders and former combatants

Programme performance in 2021 and target for 2023

230. The Mission's work contributed to the effective implementation of the provisions of the Final Agreement for Ending the Conflict and Building a Stable and Lasting Peace concerning security guarantees, as demonstrated by the prioritization of preventive measures at the local level, an expansion of investigations into the attacks, and progress in the dismantling of criminal organizations that affect the reintegration process and peace implementation, through the implementation of public policies. This met the planned target of fostering public policies on security guarantees.
231. In 2023, the Mission will proactively advocate for established and functioning processes and initiatives for prevention, protection and investigation, such as the tripartite mechanisms and working groups, to be given continuity by the newly elected Government. In addition, through good offices and outreach activities, the Mission will work towards the reactivation of the National Commission on Security Guarantees, focusing on the security needs of communities and former FARC-EP combatants living in the municipalities most affected by violence caused by illegal armed groups and criminal organizations, and on the creation and implementation of a public policy to dismantle these organizations. Furthermore, the Mission will continue to advocate for the adequate inclusion of ethnic and gender perspectives in security measures, ensuring that these measures respond to various community needs, with special attention paid to the security of female leaders

and female former combatants. Finally, the Mission will continue to work closely with the Special Jurisdiction for Peace and the Constitutional Court to support the analysis and follow-up on precautionary measures for former FARC-EP combatants. Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 40).

Table 40
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Strengthened tripartite mechanisms and prioritization of investigations into the attacks against former FARC-EP combatants	Expansion of investigations into and increased rates of successful judicial prosecutions of the criminal organizations behind the attacks, including both material and intellectual authors	Progress on the investigation of, and protection and preventive measures for, former FARC-EP members and on the implementation of the Special Jurisdiction for Peace precautionary measures to foster public policies on security guarantees	Strengthened tripartite mechanisms and prioritization of measures at the local level to prevent the attacks against former combatants Expansion of investigations into and increased rates of successful prosecutions of the criminal organizations behind the attacks Progress in dismantling criminal organizations affecting the reintegration process	Security guarantee entities and tripartite mechanisms are strengthened Increased rates of successful judicial prosecutions of criminal organizations Progress in the implementation of the rulings of the Constitutional Court and the Special Jurisdiction for Peace related to security guarantees of former FARC-EP members

Result 2: accelerating efforts towards a sustainable reintegration

Programme performance in 2021 and target for 2023

232. The Mission's work contributed to accelerating the effective implementation of the provisions of the Final Agreement concerning reintegration, as demonstrated by a significant increase in the number of former combatants residing in and outside the former territorial areas for training and reintegration benefiting from State-sponsored measures to guarantee sustainable reintegration solutions for them and their host communities. This met the planned target of ensuring the sustainability of all State-sponsored collective reintegration projects.
233. The Mission will continue working closely with both the Agency for Reintegration and Normalization and former combatants, and with newly elected officials, to promote efforts towards the sustainability of the reintegration process, including by ensuring that all former combatants continue to access reintegration benefits.
234. Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 41).

Table 41
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Increase in the number of State-sponsored collective reintegration projects for former combatants reflecting progress in the socioeconomic reintegration of former combatants inside and outside of former territorial areas of training and reintegration	Significant increase in the number of State-sponsored collective reintegration projects for former combatants, fostering the consolidation of the socioeconomic integration of former combatants throughout Colombia	All State-sponsored collective reintegration projects took into consideration elements to ensure their sustainability, including access to markets, land and credit, technical assistance, strengthening of former combatants' productive associations and ensuring the active participation of women	Significant increase in the number of former combatants and their families benefiting from State-sponsored measures to guarantee sustainable reintegration solutions in and outside former territorial areas for training and reintegration	Sustained increase in the number of former combatants and their families benefiting from State-sponsored measures to guarantee sustainable reintegration solutions in and outside former territorial areas for training and reintegration

Result 3: timely and effective implementation of the restorative sentences issued by the Special Jurisdiction for Peace

Proposed programme plan for 2023

235. Following a request from the Government of Colombia, in resolution [2574 \(2021\)](#) the Security Council mandated the Verification Mission to verify compliance with and implementation of the restorative sentences issued by the Special Jurisdiction for Peace. This included verifying the fulfilment of the terms of sentences and the establishment by State authorities of the conditions necessary for this purpose. The first sentences are expected to be issued in 2022. Verification of their implementation will help build confidence in the process and support the Special Jurisdiction for Peace as part of the Comprehensive System of Truth, Justice, Reparation and Non-Repetition in its contribution to laying the foundations for regaining trust and promoting coexistence and real reconciliation among all Colombians.
236. The Mission has initiated preparations for the implementation of its new responsibilities, and will continue to engage systematically with those responsible for the implementation of the restorative sentences and their monitoring and verification.

Lessons learned and planned change

237. The lesson for the Mission was that, drawing on the experience acquired over previous years, the verification of compliance with and implementation of the restorative sentences will require a proactive approach to facilitate and foster solutions to possible challenges. In applying this lesson, the Mission will adopt a strategic approach to the verification of restorative sentences, focusing on overall trends of compliance and select individual cases. This will be accompanied by strong outreach and advocacy, at both the national and field levels. Expected progress towards the objective is presented in the performance measure below (see table 42).

Table 42

Deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	4	4	4	4
1. Reports of the Secretary-General to the Security Council	4	4	4	4
B. Generation and transfer of knowledge				
Publications (number of publications)	2	2	2	2
2. Thematic reports on security guarantees	2	2	2	2
Technical materials (number of materials)	1	1	2	2
3. Verification manual, including a gender-sensitive verification guide	1	1	1	1
4. Thematic report on lessons learned from the first year of the verification of the restorative sentences	–	–	1	1
Seminars, workshops and training events (number of days)	–	–	105	133
5. Workshops to strengthen the implementation and strategic engagement with the Special Jurisdiction for Peace and the individuals placed under its jurisdiction	–	–	11	11

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
6. Workshops and training with individuals placed under the jurisdiction of the Special Jurisdiction for Peace	–	–	11	11
7. Regional workshops and training with individuals placed under the jurisdiction of the Special Jurisdiction for Peace to promote guidance in the tasks, works or activities with reparatory and restorative content and the restriction of freedoms and rights	–	–	11	11
8. Forum with international academics and policymakers on the transitional justice system in Colombia and the role of the Mission	–	–	1	1
9. Specialized forums with groups of jurists, academics and judicial sector organizations from each region to explain the new mandate	–	–	11	11
10. Training and sensitization sessions with women's organizations at the field level	–	–	4	6
11. Workshops to support the data management and data-sharing protocols with the Special Jurisdiction for Peace and other counterparts	–	–	10	16
12. Workshops relating to case Nos. 2, 4, 5 and 7, respectively, with indigenous and Afro-Colombian populations and authorities	–	–	4	–
13. Regional exchange workshops for local and international journalists	–	–	6	5
14. Workshops with media at the local, regional, national and international levels on the new mandate	–	–	12	9
15. Workshops relating to cases under the purview of the Special Jurisdiction for Peace with indigenous and Afro-Colombian populations and authorities	–	–	–	10
16. Regional media tours to former territorial areas for training and reintegration to explain the Mission's role in verifying the restorative sentences by the Special Jurisdiction for Peace	–	–	12	9
17. Events to promote gender equality and prevention of gender-based violence related to reintegration, security guarantees and implementation of the women and peace and security agenda	–	–	–	6
18. Events with indigenous, Afro-Colombian and Roma populations and authorities with regard to sentences involving members of their communities	–	–	12	9
19. Workshops with key counterparts and stakeholders to advance and follow up on preventive and protection measures as part of the security guarantees provisions of the Final Agreement	–	–	–	4
20. Workshops with indigenous, Afro-Colombian and Roma populations and authorities	–	–	–	4
21. National event with indigenous, Afro-Colombian and Roma populations and authorities	–	–	–	1
22. Events with newly elected officials on the Mission's mandate and advocacy on the implementation of the Final Agreement	–	–	–	4
23. Regional events with Final Agreement stakeholders, including former combatants, on its implementation	–	–	–	4
24. Workshop for regional reintegration focal points on the implementation of new approaches to the verification of social, political and economic reintegration	–	–	–	1

C. Substantive deliverables

Good offices: provision of good offices to implement provisions in sections 3.2, 3.4 and 5.1.2 of the Final Agreement, including for the implementation of the respective gender provisions and the chapter on ethnic perspectives within the Final Agreement; good offices to promote problem-solving, confidence-building and unity of effort in response to implementation challenges in the field; good offices and advocacy on the establishment and continuity of spaces and forums that bring together relevant counterparts and stakeholders for productive dialogue and decision-making; good offices and advocacy on visits from key stakeholders to reincorporation areas and other relevant locations where former combatants are developing productive projects and community-based initiatives as part of their reintegration process, including support to reinforce the role of the technical working group on gender within the National Reintegration Council; good offices for the implementation of the women and peace and security agenda as part of the implementation of the Final Agreement, including advancing women's participation; systematic engagement with the different actors and State entities that have responsibilities in the implementation of the restorative sentences and in their monitoring and verification.

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

Consultation, advice and advocacy: consultations and advice to identify, prevent or resolve challenges in the conditions for increased political participation by the Comunes political party, reintegration of former combatants, improving security and protection measures and conditions, and increased participation in the implementation of the Final Agreement; advocacy for the full implementation of the gender provisions within the Final Agreement, including support to government counterparts and regular consultation with women's organizations and female former combatants; support for the information-management mechanisms of the Special Jurisdiction for Peace to facilitate information-sharing, specifically on the follow-up of restorative sentences.

Fact-finding, monitoring and investigation missions: fact-finding missions to verify compliance with the reintegration process, security conditions and restorative sentences and the adequate inclusion of a gender and ethnic perspective in field locations, as well as to follow up on particular cases related to sections 3.2 and 3.4 of the Final Agreement.

Databases and substantive digital materials: integrated tools for information management on verification of restorative sentences (early warnings and individual cases of special interest); verification reporting system at local, regional and national levels (phase 1: repository, phase 2: forms automation, phase 3: text mining tools); advance of implementation of Final Agreement follow-up tool at local, regional and national levels; databases and information system for indicators related to verification context; database of cases against former FARC-EP combatants, relatives, political party members, social leaders and communities (phase 1: early warnings, phase 2: cases, phase 3: other security guarantees issues); information management platform on associativity and productive projects; tripartite database of transit to legality.

D. Communication deliverables

Outreach programmes, special events and information materials: information materials for former FARC-EP combatants and communities explaining the progress of the Mission's mandate and the implementation of the Final Agreement; outreach programmes to increase the visibility of the reintegration process and security guarantees measures; workshops with local communities and former combatants on reintegration process and security guarantees progress; production and dissemination/broadcasting of thematic videos in support of Mission engagement areas; events to promote reconciliation between ex-combatants and local communities; brochures, flyers, flipcharts, infographics, inserts, profiles and promotional material on the Mission's mandate and developments; outreach programmes through radio and television broadcasting in local, regional and national media; partnership with the United Nations country team and United Nations information centre to share relevant information on the progress of the Mission's mandate and the implementation of the Final Agreement.

External and media relations: conferences with key media partners: journalists, directors and editors of local, regional and national media; press conferences, press briefings and media field visits; media briefing products; relevance and coverage of the quarterly reports of the Secretary-General.

Digital platforms and multimedia content: maintenance of social media channels and United Nations information platforms; animated podcast series showcasing the Mission's mandate and activities; special reports; continuous analysis to help improve dissemination and impact.

B. Proposed post and non-post resource requirements for 2023

Resource requirements (regular budget)

^a Other level, unless otherwise stated.

239. The proposed resource requirements for 2023 for the Verification Mission amount to \$67,454,700 (net of staff assessment) and would provide for the deployment of 120 military observers (\$3,234,400); salaries and common staff costs (\$38,523,000) for 171 international positions (1 Under-Secretary-General, 1 Assistant Secretary-General, 1 D-2, 5 D-1, 25 P-5, 38 P-4, 54 P-3, 1 P-2, 44 Field Service and 1 General Service), 183 national positions (95 National Professional Officer and 88 Local level) and 141 United Nations Volunteers, as well as operational costs (\$25,697,300), comprising the costs for consultants and consulting services (\$439,100), official travel (\$1,500,600), facilities and infrastructure (\$6,206,600), ground transportation (\$2,787,500), air operations (\$7,316,900), marine operations (\$298,900), communications and information technology (\$4,719,100), medical (\$594,500), and other supplies, services and equipment (\$1,834,100).
240. With a view to ensuring the effective delivery of its mandate, a number of changes to the staffing structure are proposed for 2023, including: the realignment and renaming of organizational units, the abolishment of one position, the establishment of one position, the reclassification of one position, the reclassification and redeployment of one position, the reassignment of three positions, the reassignment and redeployment of five positions and the redeployment of one position, as detailed below.

Office of the Special Representative of the Secretary-General

- (a) Realignment of the Strategic Communication and Public Information Unit from the Office of the Chief of Staff to the Office of the Special Representative of the Secretary-General to strengthen linkages of the messages, advocacy efforts and public information engagements with the priorities of the Mission;
- (b) Realignment of the Legal Unit from the Office of the Chief of Staff to the Office of the Special Representative to ensure the reinforcing role of the Unit in advising on a wide range of complex legal issues affecting the Mission's mandated activities, including public, international, private, and administrative law matters, as well as issues of constitutional and other national law;
- (c) Realignment of mission support from the Office of the Deputy Special Representative to the Office of the Special Representative to strengthen the Special Representative's oversight of mission support and better align substantive and administrative priorities, ensure the appropriate implementation of key decisions and facilitate the decision-making process involving resources, including on issues of staffing, finance, communication and logistics that are key to fulfilling the mandate of the mission;
- (d) Reclassification of the position of Principal Military Adviser (D-1) as Senior Military Adviser (P-5) to provide the appropriate level of knowledge and experience to the position and to ensure a more suitable level of interactions with both internal and external interlocutors;

- (e) Reassignment of the position of Finance and Budget Assistant (Field Service) as Senior Staff Assistant (Field Service) to assist with the overall administration and logistics of the Office of the Special Representative of the Secretary-General;
- (f) Reassignment and redeployment of the position of Liaison Officer (P-3) as Conduct and Discipline Officer (P-3) from the Regional Office in Valledupar to the Conduct and Discipline Team to strengthen the existing Team and to focus on case and risk management to anticipate the Mission's response to misconduct;

Office of the Deputy Special Representative of the Secretary-General

- (g) Realignment of the Verification Division from the Office of the Special Representative to the Office of the Deputy Special Representative to improve the coordination of, coherence in and guidance to field operations;
- (h) Realignment of the Cross-cutting Issues Team from the Office of the Special Representative to the Office of the Deputy Special Representative to ensure that political and operational issues are considered in a comprehensive and coherent manner and that they are reflected in the activities in the field;
- (i) Realignment of the Information Management Unit of the Operations and Planning Unit from the Office of the Chief of Staff to the Office of the Deputy Special Representative to provide accurate, real-time and data-driven information to facilitate the decision-making processes affecting operations in the field;

Office of the Chief of Staff

- (j) Realignment of all Regional Offices, and by extension all subregional and local offices, from the Verification Division to the Office of the Chief of Staff to streamline substantive and operational guidance and to ensure greater synergy and collaboration in all Mission activities in the field;
- (k) Realignment of the Field Coordination Office from the Office of the Deputy Special Representative to the Office of the Chief of Staff to concentrate all planning and resources mobilization capacities dedicated to the Regional Offices within a single office to reinforce cohesion and efficiency;
- (l) Division of the Operation and Planning Unit into a Joint Operation Centre and a Planning Team, both reporting directly to the Chief of Staff, to allow the Centre to focus on operational issues and the Team to focus on Mission-wide planning issues;
- (m) Redeployment of one position of Policy and Best Practices Officer (P-4) from the Office of the Special Representative to the Office of the Chief of Staff to support the promotion and facilitation of organizational learning and the sharing of knowledge within the Mission and between the Mission and other missions and United Nations Headquarters with the aim of establishing a Mission-wide system of guidance development based on lessons learned and good practices;

Office of the Chief of Mission Support

- (n) Renaming the Logistics Operations Unit as the Mission Support Unit to better support operations following the closure of camps and the increase of personnel to verify compliance with the rulings issued by the Special Jurisdiction for Peace to individuals and to coordinate support for new and ongoing operations throughout the country;
- (o) Reassignment of one position of Acquisition Planning Officer (P-3) as Centralized Warehousing Officer to ensure a united and synchronized approach to warehousing work processes, functions and activities and an accountable custodian role;

- (p) Reassignment and redeployment of one position of Associate Liaison Officer (National Professional Officer) as Associate Transport Officer from the Verification Division to the Transport Unit to provide surface motor transport support in a planned and organized manner, and to develop and implement a cost-effective plan for surface transport, determining the appropriate means of transport, including associated outsourcing activities, and drafting standard operating procedures and performing statistical analysis;
- (q) Reassignment and redeployment of one position of Logistics Officer (National Professional Officer) as Staff Counsellor from the Logistics Operation Unit to the Staff Counselling Cell to support the emotional and mental well-being of personnel as a fundamental component of duty of care and a key factor in enabling staff to accomplish the Mission's mandates and objectives;
- (r) Reassignment and redeployment of one position of Associate Security Analyst (P-2) as Associate Training Officer from the Security Section to the Training Team to implement the design, development, delivery and evaluation of training, learning and development programmes for field mission personnel;
- (s) Realignment of the Training Team from the Office of the Deputy Special Representative to the Office of the Chief of Mission Support to ensure coherence with the support nature of the training function;
- (t) Reassignment and redeployment of one position of Administrative Assistant (Local level) as Training Assistant from the Regional Office in Florencia to the Training Team to provide administrative support and contribute to the development, delivery and evaluation of training and development programmes for Mission personnel;

Regional Offices, sub-offices, hubs and local teams

- (u) Reclassification and redeployment of the position of Principal Coordination Officer (D-1) to Senior Coordination Officer (P-5) from the Field Coordination Office to serve as Head of Office, Political Affairs, in Cali, to bring the appropriate level of seniority to the Regional Office and to address the increased complexity, workload and geographic coverage of the 25 municipalities (compared with the 19 currently covered) owing to the expansion of the mandate;
- (v) Abolishment of one position of Logistics Assistant (Local level) in San José del Guaviare, as the functions can be discharged by other staff member;

Kuwait Joint Support Office

- (w) Establishment of one position of Finance Assistant (Local level) in the Kuwait Joint Support Office to provide financial support in the processing of education grants and the national staff and military observers payroll, as part of an effort by the Secretariat to align the funding sources of the Support Office to better reflect the workload and the client base that the Support Office services. Such an exercise aims at achieving a more balanced distribution of the workforce of the Support Office among the special political missions. It is proposed that six positions from UNAMA and the United Nations Assistance Mission for Iraq (UNAMI) be abolished, and that six positions be established under four special political missions, including the Verification Mission;

Security Section

- (x) Reassignment of one Liaison Officer (P-3) as Security Information Analyst to equip the Security Information Coordination Team with an experienced analyst to provide security risk management documents that include gender considerations, analyse information on security threats and provide other outputs, as well as provide preventive advice, briefings and substantive input regarding the forecasting of the evolving security environment that directly benefit the Mission and all the other United Nations security management system entities in Colombia.

241. A vacancy rate of 17 per cent has been applied to the estimates for international positions, 12 per cent for national positions, 3 per cent for military observers and 1 per cent for United Nations Volunteers, based on the latest incumbency and projected deployment figures.
242. The increase in requirements for 2023 compared with the appropriation for 2022 is attributable mainly to additional requirements for civilian personnel costs, owing to the delayed impact of 43 positions approved in 2022 for the expanded mandate. These are offset by: (a) decreased requirements for military and police personnel costs, owing to the application of the new mission subsistence allowance rates; and (b) decreased requirements for air operations, owing to the establishment of a new contractual agreement for the rental and operation of fixed-wing aircraft instead of additional rotary-wing aircraft as previously planned.

9. United Nations Mission to Support the Hudaydah Agreement

(\$37,193,000)

Foreword

Despite continued challenges in 2021, the United Nations Mission to Support the Hudaydah Agreement (UNMHA) explored varied ways to maintain momentum towards the full implementation of the Agreement on the City of Hudaydah and the Ports of Hudaydah, Salif and Ra's Isa (Hudaydah Agreement), adjust its approach and establish an appropriate presence in response to a highly challenging and fluid operational environment. The Mission advanced a multilayered engagement strategy to bring the parties back to the previously established joint mechanisms. The Mission further strengthened its on-the-ground monitoring of conflict areas to support ceasefire implementation, albeit within limitations imposed on its movement. Following the unilateral withdrawal of the joint forces of the Government of Yemen on 12 November 2021, UNMHA realigned its approach, working with the parties to calibrate the implementation of the Hudaydah Agreement in this altered context. The Hudaydah Agreement continues to foster an overall reduction of violence and civilian casualties, the protection of the Hudaydah, Ra's Isa and Salif ports, and advanced economic growth within Hudaydah City.

UNMHA remains closely engaged with other United Nations entities and international non-governmental organizations operating in Hudaydah Governorate, leveraging its position to facilitate and increase operational space for humanitarian actors. In addition, the Mission collaborates with other partners who are instrumental to the implementation of the Hudaydah Agreement, including the Office of the Special Envoy of the Secretary-General for Yemen.

UNMHA leadership is grateful for the support that it continues to receive from the Security Council, the wide range of partners across the United Nations system and the international community. The Mission's work would not be possible without the high level of dedication and professionalism of its staff, who continue to perform in a challenging operational environment.

(Signed) Major General (retired) Michael **Beary**
Head of the United Nations Mission to support the Hudaydah Agreement and
Chair of the Redeployment Coordination Committee

A. Proposed programme plan for 2023 and programme performance for 2021

Overall orientation

Mandates and background

243. The United Nations Mission to Support the Hudaydah Agreement (UNMHA) is responsible for supporting the parties to the Stockholm Agreement (S/2018/1134, annex) in implementing the provisions of the Agreement on the City of Hudaydah and the Ports of Hudaydah, Salif and Ra's Isa (Hudaydah Agreement), and their commitments in accordance with the Hudaydah Agreement. The mandate was defined in Security Council resolution 2452 (2019) and extended in resolutions 2481 (2019), 2505 (2020), 2534 (2020) and, most recently, in resolution 2586 (2021) until 15 July 2022.
244. The mandate of the Mission, as set out in resolution 2586 (2021), is to: (a) lead, and support the functioning of, the Redeployment Coordination Committee, assisted by a secretariat staffed with United Nations personnel, to oversee the governorate-wide ceasefire, the redeployment of forces and mine action operations; (b) monitor the compliance of the parties with the ceasefire in Hudaydah Governorate and the mutual redeployment of forces from the City of Hudaydah and the ports of Hudaydah, Salif and Ra's Isa; (c) work with the parties so that local security forces assure the security of the City of Hudaydah and the ports of Hudaydah, Salif and Ra's Isa under Yemeni law; and (d) facilitate and coordinate United Nations support to assist the parties to fully implement the Hudaydah Agreement.
245. Against a backdrop of sustained conflict causing devastating humanitarian and security impacts, continued efforts to enhance the ceasefire, build confidence between the parties and revive dialogue to advance the implementation of the Hudaydah Agreement remain a vital foundation to peace efforts in Hudaydah and, more broadly, in Yemen. Following the unilateral withdrawal of the joint forces of the Government of Yemen from large areas of the Hudaydah Governorate on 12 November 2021, and the significant shift of the front lines to the Governorate's southern districts, these objectives, while subject to realignment, continue to be essential to Hudaydah's stability and, most vitally, the maintenance of the functioning of the ports of Hudaydah, Salif and Ra's Isa. To discharge its mandate, UNMHA will continue to focus on supporting the parties in this evolved context to enable the sustained functioning of the Redeployment Coordination Committee while upholding their commitments to the full implementation of the Hudaydah Agreement.
246. The Mission's efforts to ensure equal access to and dialogue across both parties, maintain an effective presence within respective territories on either side of the shifted front lines, strengthen monitoring and patrolling capacity, enhance ceasefire compliance and provide support to de-escalation, confidence-building and the revival of dialogue between the parties will continue to be central to the Mission's work in 2023. To that end, the Mission will focus its efforts on establishing a presence in the territory controlled by the Government of Yemen in the areas to the south of the new front lines to ensure that the Mission is equally accessible to each party. This is essential to its efforts to provide strengthened and sustained collaboration and support to both parties, to ensure effective, responsive and expanded monitoring, to include the conflict-affected districts on both sides of the shifted front lines and to provide support to the advancement of demining in locations where the threat of mines and explosive remnants of war is highest. Simultaneously, UNMHA will continue in its role as the Chair and facilitator of formal and informal meetings of the Redeployment Coordination Committee and its subsidiary mechanisms in order to ensure ceasefire compliance and de-escalation, build trust-based dialogue and work towards enhancing stability and the full redeployment of forces. The Mission will also focus on strengthened engagement with community-based networks, ensuring an inclusive approach to its mandate implementation and support for the enhanced coordination of the delivery of humanitarian assistance. Wherever possible, this will include thorough engagement with diverse representatives of Yemeni women and youth.

Programme of work

Objective

247. The objective, to which the Mission contributes, is to support the parties in the implementation of the Agreement on the City of Hudaydah and the Ports of Hudaydah, Salif and Ra's Isa, and their commitments in accordance with the Hudaydah Agreement.

Strategy

248. To contribute to the objective, the Mission will:
- (a) Adapt to the evolving environment across the Hudaydah Governorate to ensure it is best positioned and structured to advance its mandate. This will be carried out in close coordination with the Office of the Special Envoy to the Secretary-General for Yemen, including through the Office of the Special Envoy-UNMHA joint mission support structure. To this end, the Mission will establish and operate a presence in the territory of the Government of Yemen south of the newly formed front lines, in conjunction with the operation of its base in Hudaydah City, to ensure representation, capacity and activities in the territories of both parties;
 - (b) Lead and support the sustained operation of the Redeployment Coordination Committee as the key oversight body of the Hudaydah Agreement. To this end, the Head of Mission, acting as Chair, will lead regular Committee meetings between the parties at a location mutually agreed to by both parties with the intent of reinstating dialogue and liaison mechanisms to oversee and ensure implementation of: (i) the full redeployment of forces from Hudaydah City and its ports; (ii) the Governorate-wide ceasefire through trust-building dialogue and collaboration; and (iii) the provision of security by local security forces within Hudaydah City and its ports in accordance with Yemeni law;
 - (c) Strengthen and realign the joint structures previously agreed as part of the framework of the Redeployment Coordination Committee to address shifted realities and conflict-affected areas in the evolved environment, including de-escalation. This will be achieved in part through the reappointment of designated liaison officers from both parties, to be situated in newly identified and strategic locations agreed to by both sides, to aid in de-escalation, cooperation on demining and measures to build confidence and stability and enhance the protection of the local population;
 - (d) Maintain a surge monitoring capacity within the current ceiling to expand and strengthen monitoring of the Hudaydah, Ra's Isa and Salif ports with random daily patrols that access all port installations, with a view to monitoring the redeployment of all military forces from such locations, and the removal of military manifestations, in accordance with the mandate. On-the-ground patrolling will also be expanded in the territories held by the parties on either side of the front lines, including conflict-affected areas. In parallel, the Mission will continue to provide technical expertise and support to advance demining efforts in Hudaydah City, its ports and mine fields in the Governorate, in close coordination with partners and in accordance with the priorities identified by both sides, with a focus on locations posing a high risk to civilians following the withdrawal of the joint forces of the Government;
 - (e) Advance assessment and coordination to implement quick-impact community projects in key locations on either side of the front lines. The anticipated dividends from these projects, which will include a focus on vulnerable groups, including conflict-affected groups, women and children, are essential to building and solidifying confidence and trust between the Mission and local communities and to encourage progress on the collective implementation of the Agreement. Quick-impact project implementation would be coordinated with and fully complement wider development actions that support the local population, de-escalate tensions between communities, strengthen social cohesion and enhance stability.

249. For 2023, the Mission's planned deliverables will support Member States in their ongoing management of and recovery from the COVID-19 pandemic. Such planned deliverables and activities include ongoing coordinated efforts to ensure the health and safety of all Mission personnel with regard to COVID-19 in close coordination with United Nations Headquarters and the United Nations system in Yemen. This will be carried out through the implementation of all possible measures and protocols, in accordance with developments in the pandemic, to mitigate pandemic risks and related implications for UNMHA and the local population. This will also include continued efforts to ensure that all personnel, including UNMHA contractors and the families of national staff, are provided access to vaccines, in accordance with the guidance of the World Health Organization.
250. Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of its programme owing to the COVID-19 pandemic. This includes measures to ensure that risk assessments are regularly carried out by the Mission in coordination with the United Nations system in Yemen, and that COVID-19 protocols are reviewed and updated to address the evolving situation in Yemen. To support this process, the Mission has a designated COVID-19 coordinator to oversee awareness initiatives on applicable COVID-19 protocols, provide oversight on their strict implementation and monitor and advise on COVID-19 developments and recommend changes to Mission operations, including the operation of UNMHA patrols and engagement with the local population. In addition, the Mission's business continuity and criticality plan is continuously reviewed and adjusted to address evolving realities and risks in the Yemen environment.
251. The above-mentioned work is expected to result in:
- (a) Enhanced mutual trust, confidence and dialogue between the parties to strengthen the implementation of the Hudaydah Agreement as a key contribution to the broader peace process;
 - (b) Equal and sustained access and dialogue across both sides in the respective shifted territories of the parties in the Hudaydah Governorate;
 - (c) Strengthened ceasefire implementation across the Governorate and improved security of the local population, including a reduction in casualties resulting from ceasefire violations;
 - (d) Maintenance of the security of Hudaydah City and its ports, and assurance that military forces are redeployed from such locations, military manifestations are removed and security responsibilities are assumed by local security forces in these locations;
 - (e) Reduced violence in Hudaydah Governorate due to the de-escalation of tensions between the parties, enhanced stability and strengthened measures to protect the local population;
 - (f) Advancement in demining in Hudaydah City, its ports and other priority locations, reducing the risk of civilian casualties caused by improvised explosive devices or other explosive remnants of war;
 - (g) An enhanced and inclusive process to ensure implementation of the Agreement on the basis of strengthened community participation.

External factors for 2023

252. The overall programme plan for 2023 is based on the following planning assumptions:
- (a) There is sufficient political will and engagement from domestic, regional and international stakeholders to enable the implementation of the Hudaydah Agreement;
 - (b) Major combat operations between the parties will not recommence in Hudaydah Governorate, nor will there be sustained military impediments that would preclude the use of the main supply routes to and from the Mission's areas of operation;

- (c) A political environment exists that does not obstruct the work of the Redeployment Coordination Committee and its subsidiary joint mechanisms, enabling the parties to advance full redeployment and activate the local security forces;
 - (d) The parties resume their full participation in the activities of the Redeployment Coordination Committee and commit to a revived dialogue process and participation in subsidiary joint mechanisms to monitor the ceasefire and foster de-escalation, confidence-building and collaborative demining efforts;
 - (e) The Government of Yemen agrees to, and cooperates in, facilitating the establishment of a Mission presence in areas to the south of the new front lines to ensure the Mission's equal access to both parties and enable the full deployment and ongoing unimpeded functioning of the Mission;
 - (f) A suitably safe, secure and permissive operating environment exists, and sufficient confidence is established between the parties and with other partners to generate sustained support for and participation in the activities of the Mission;
 - (g) Continued operational cooperation exists with effective command and control structures within both parties to enable compliance at all levels;
 - (h) The parties facilitate the Mission's full access and freedom of movement to all areas required for the effective observation and monitoring of the ports of Hudaydah, Ra's Isa and Salif to enable daily access to all port installations and access to conflict-affected areas across the Governorate, including in the southern districts in the vicinity of the shifted front lines;
 - (i) The parties provide needed access and cooperation to advance demining in Hudaydah City, the ports and areas of priority in other districts to enhance the protection of the local population in the Governorate's shifted context.
253. With regard to cooperation with other entities, UNMHA will continue to liaise and coordinate with the parties to ensure the safety and security of UNMHA personnel, movements and premises, and the unhindered and expeditious movement of Mission personnel and equipment, provisions and essential supplies into and within Yemen. This requires a continued dedicated civilian capacity to maintain direct contact with governmental and de facto authorities at all levels as well as regional actors. Furthermore, UNMHA will engage, where possible, with local stakeholders, partners and other bodies within the Hudaydah Governorate to leverage maximum influence and ensure a unified approach in supporting the Hudaydah Agreement and its implementation and identifying opportunities to enhance stability and confidence in this process, including through quick-impact projects within the territories of both parties.
254. With regard to inter-agency coordination and liaison, UNMHA will continue to facilitate the support of United Nations agencies, funds and programmes and other partners to assist the parties in fully implementing the Hudaydah Agreement. Specifically, UNMHA will maintain close working relationships with the Resident and Humanitarian Coordinator and the United Nations country team engaged in providing support for the implementation of the Stockholm Agreement, particularly the World Food Programme (WFP), UNDP and the United Nations Verification and Inspection Mechanism, as well as other development and humanitarian actors operating in Hudaydah Governorate. UNMHA will also consult and coordinate, as necessary, with the Office for the Coordination of Humanitarian Affairs, the Office of the United Nations High Commissioner for Human Rights (OHCHR) and UN-Women to strengthen ceasefire implementation, de-escalation and access to areas of need.
255. UNMHA integrates a gender perspective in its operational activities, deliverables and results, as appropriate. To contribute to the advancement of the women and peace and security agenda, UNMHA will promote women's participation in its broader consultations in relation to the implementation of the Hudaydah Agreement and related activities and mechanisms. A core focus of the Mission, this will seek to assess the perspectives and views of women on the impact of the evolved situation on the day-to-day lives of the local community, and to assess measures and

planning to enhance stability and protection, including the conduct of full redeployment and local security activities, ceasefire implementation, de-escalation, demining efforts and other aspects of the implementation of the Agreement. In addition, UNMHA will promote equal rights and opportunities for women and the full and active consideration of gender perspectives in planning and implementing mission activities and those undertaken by the parties.

Evaluation activities

256. In June 2021, the Mission issued an evaluation policy and work plan focused on the integration of evaluation into the strategic planning, budget process and overall results-based management of the Mission. This assisted in informing the Mission's evaluation, which was undertaken in November 2021 with a view to realigning its strategic focus and approach following the withdrawal of the joint forces of the Government of Yemen from large areas of the Governorate on 12 November 2021, which significantly altered the military and political landscape of Hudaydah.
257. The results and lessons of the evaluation in November 2021 have been taken into account for the programme plan for 2023. For example, the Mission realigned its strategic approach by reassessing its footprint to ensure equal access to and impartial support of both parties through the establishment of a presence in the territory controlled by the Government of Yemen in the areas to the south of the new front lines. In addition, the Mission reviewed and developed an expanded patrol plan to intensify its monitoring of the ports, including through surged monitoring capacity within the current ceiling, in parallel with a focus on monitoring, patrolling and liaising with conflict-affected areas on either side of the shifted front lines. The Mission further evaluated measures to strengthen confidence building in this altered context, including through intensified efforts to advance demining and its proposal on the implementation of quick-impact projects to build and solidify confidence and trust between the Mission and local communities in key locations on either side of the shifted front lines.
258. The following evaluations are planned for 2023:
 - (a) A systematic, strategically focused evaluation following the establishment of a presence in the territory controlled by the Government of Yemen in the areas to the south of the new front lines. The Mission will carry out a review of coordination measures and avenues to strengthen liaison and dialogue between the parties and advance Agreement dividends by maximizing the Mission's capacity and access to both parties in their respective locations;
 - (b) An evaluation will be undertaken to review the coordination mechanisms between the Mission and the Office of the Special Envoy of the Secretary-General for Yemen to assess gaps and areas where coordination may be strengthened, and to identify good practices for better implementation.

Programme performance in 2021

Reduction of impact of armed conflict on local population, enhanced stability and continued functioning of the ports

259. Recognizing the continued challenges to resuming the Redeployment Coordination Committee, the Mission advanced implementation of its political engagement strategy, in close coordination with the Office of the Special Envoy, focused on taking steps towards a sustainable reactivation of the Committee and political engagement at all levels. UNMHA held 17 meetings with Committee Co-Chairs, 21 meetings at higher political levels in Yemen and 11 meetings regionally. UNMHA further expanded its patrols and monitoring reach, albeit under severe limitations to its freedom of movement.
260. These efforts led to the Hudaydah Agreement remaining largely intact. After the withdrawal of the joint forces of the Government of Yemen, UNMHA realigned its approach to advance efforts towards the prevention of violence, including through an expanded patrol plan to monitor shifted conflict-

affected areas. These activities contributed to ceasefire implementation, demonstrated by a sustained reduction in levels of violence and civilian casualties. The ceasefire facilitated increased mobility to ease aid delivery and preserved the lifeline of the ports. Progress towards the objective is presented in the performance measure below (see table 46).

Table 46
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
Agreement by the parties on all the technical aspects of the redeployment, as called for in the Hudaydah Agreement	Implementation of the concepts of operations agreed by the Redeployment Coordination Committee for phased redeployments from the ports and Hudaydah City	Reduction of the impact of armed conflict on local population, enhanced stability and continued functioning of the ports

Impact of the pandemic

261. The continuation of the pandemic into 2021 had an impact on the implementation of the Mission's mandate, including limited patrolling given the continued constraints imposed by the pandemic on staff movements and the reduced ability to conduct surge engagements with the parties and other stakeholders to advance the resumption of the joint mechanisms. It also affected the Mission's ability to strengthen coordination with the United Nations country team, including with regard to the advancement of mine action and other activities in support of the Hudaydah Agreement. From the second quarter of 2021, even as the Mission continued to operate under strict COVID-19 protocols aligned with the United Nations system in Yemen, it increased its footprint and eased restrictions on operations. The Mission expanded its political presence to Sana'a and Aden and advanced coordination with the United Nations country team on the ground. It further expanded patrolling, including access to districts south of Hudaydah City, though it continued to face limitations to its freedom of movement. Following the roll-out of the United Nations vaccine programme, in parallel with other initiatives to provide access to vaccines for staff, almost all personnel were vaccinated. This allowed activities to be undertaken with fewer constraints and reduced risk to personnel and the local population.

Planned results for 2023

Result 1: redeployment of forces, local security forces take on responsibility for security and effective monitoring of the ceasefire

Programme performance in 2021 and target for 2023

262. The Mission's work contributed to advancing the revival of a sustained functioning of the Redeployment Coordination Committee and its joint mechanisms, which serve as crucial requirements for achieving the first phase of redeployment in accordance with the concept of operations agreed to by the Committee. The target of achieving a sustained resumption of meetings of the Committee was not met owing to several political and operational factors. While sustained efforts were made to close gaps on issues that posed barriers to a resumption of dialogue between the parties, and in turn a revival of the Committee forum, final agreement to secure a joint meeting, which was further affected by broader political and conflict dynamics, could not be reached. The situation was further complicated by the unilateral withdrawal of the joint forces of the Government of Yemen, which significantly shifted the objectives outlined to achieve this target. In turn, mutual redeployment in accordance with the Committee's concept of operations could not be achieved. Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 47).

Table 47
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Agreement by the parties on all aspects of the redeployment, as called for in the Hudaydah Agreement	Implementation of the concepts of operations agreed by the Redeployment Coordination Committee for phased redeployments from the ports and city of Hudaydah	Sustained efforts to resume the Redeployment Coordination Committee and achieve a neutral Mission footprint with equal access to the territories of both parties	Finalization of the redeployment of forces, and local security forces take up their responsibilities in accordance with Yemeni law	Effective monitoring of the ceasefire on both sides of the front lines, re-establishing the Redeployment Coordination Committee, and achieving full redeployment of forces

Result 2: monitor the redeployment of military forces and removal of all military manifestations from the ports of Hudaydah, Ra's Isa and Salif and ensure the Mission's equal access to the territories of both parties

Proposed programme plan for 2023

263. The ports of Hudaydah, Ra's Isa and Salif serve as a critical lifeline for Yemen and a central component of the Hudaydah Agreement. WFP depends on the ports for the entry of 70 per cent of its food aid to support its operations in Yemen. Similarly, the ports serve as the entry point for close to 80 per cent of the country's imports in the north, inclusive of essential commodities. The monitoring of the ports has thus been a core objective of the Mission's work to ensure that they remain safe and demilitarized, enabling the unimpeded flow of aid and essential goods into Yemen. While the Mission's monitoring has contributed to ensuring the continued functioning of the ports and regular assessments of their demilitarized nature, this patrolling has been limited in nature, most notably owing to limitations on the Mission's freedom of movement and compounded by the impacts of COVID-19.
264. Adjusting the Mission's footprint to enable access for both parties to the Mission is also vital to its ability to effectively monitor its area of operations and provide impartial support and engagement to both sides, including through on-the-ground liaison, monitoring and patrols. This is critical to any sustained solution and efforts to effectively advance implementation of the Hudaydah Agreement.

Lessons learned and planned change

265. The lesson learned for the Mission was the need to ensure sufficient capacity to patrol the ports daily, at random, and across all port installations. This has become particularly pertinent within a context of increasing allegations of their militarization. The Mission will therefore increase its monitoring capacity to meet this requirement while expanding patrols to the southern districts. It will also continue to advocate to secure its unimpeded access to undertake the daily port patrols needed to monitor their status with respect to redeployment.
266. In addition, the Mission's footprint, which has been largely in the territory of only one party since its inception, has had an impact on perceptions in terms of the Mission's ability to serve as an impartial interlocutor and to maintain strengthened relations and equal support to both sides. Therefore, the Mission's key objective is to ensure its representation in the territory of the Government of Yemen through the establishment of a presence to the south of the shifted front lines, while maintaining a base in Hudaydah City to ensure its effective monitoring of the ports. Expected progress towards the objective is presented in the performance measure below (see table 48).

Table 48
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	–	Ensure the Mission's equal access to the territories of both parties across the Hudaydah front lines	Monitor the redeployment of military forces and removal of all military manifestations from the ports of Hudaydah, Ra's Isa and Salif and ensure the Mission's equal access to the territories of both parties

Deliverables

267. Table 49 lists all deliverables of the mission.

Table 49
Deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	1
1. Letters of the Secretary-General to the Security Council	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	32	35	39	36
2. Meetings of the Security Council, Security Council Informal Expert Group on Women and Peace and Security	13	7	12	12
3. Redeployment Coordination Committee meetings	9	17	12	9
4. Bilateral meetings with regional political stakeholders	10	11	15	15
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	8	–	16	16
5. Workshops with local community representatives on Hudaydah Agreement implementation	4	–	8	8
6. Workshops with political/civil stakeholders on Hudaydah Agreement implementation	4	–	8	8
C. Substantive deliverables				
Good offices: provision of good offices in the context of the efforts of the parties to fully implement the Hudaydah Agreement, including meetings with local political actors in Hudaydah and from both parties in Aden and Sana'a, as well as regional and international interlocutors.				

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
--------------------------	-----------------	----------------	-----------------	-----------------

Consultation, advice and advocacy: consultations with the relevant Yemeni, regional and international stakeholders, with a view to comprehensively understanding the challenges at hand and to providing advice to the parties in their efforts to implement the Hudaydah Agreement; advocacy among Yemeni, regional and international stakeholders in support of the implementation of the Agreement and enhancement of the ceasefire in the Governorate; exploring the possibility of leveraging support from the Department of Political and Peacebuilding Affairs innovation cell to launch a public opinion poll among the public in Hudaydah Governorate, focusing on the impact of the conflict and ceasefire violations on the civilian population, particularly after the shifting of the military landscape in Hudaydah, with 500–600 participants from both sides of the shifted front lines, to better understand the experiences of the civilian population, with particular reference to marginalized groups and women and youth.

Fact-finding, monitoring and investigation missions: situation and context-driven monitoring missions to monitor the parties' implementation of the ceasefire, the redeployment of forces and the removal of military manifestations in the ports of Hudaydah, Salif and Ra's Isa; fact-finding missions to establish information pertaining to the various incidents related to the maintenance of the ceasefire, in support of the parties' efforts to maintain and enhance the ceasefire.

D. Communication deliverables

Outreach programmes, special events and information materials: development and maintenance of strategic relationships with Mission partners, including the United Nations Communications Group, to ensure alignment in United Nations common messaging and cooperation across different levels; development and regular updating of the Mission's key messages transmitted publicly and in response to developments on the ground; outreach events to enable UNMHA to adequately consult different community-level interest groups, prominent religious figures, civil society, youth and women's organizations to broaden participation and ensure an inclusive process on the implementation of the Agreement.

External and media relations: press releases, messages and audiovisual material on the Mission's activities and key messages; relationships developed with media partners to ensure accurate coverage of the Mission's messaging and activities; answers in a timely manner to media inquiries; strengthened informal interaction and relationships with media partners.

Digital platforms and multimedia content: website establishment and frequent updates on the Mission's activities and public statements; regular updates through social media channels on the Mission's activities and public statements; photographs and videos shared promoting the Mission's activities and key messages on all digital platforms.

B. Proposed post and non-post resource requirements for 2023

Resource requirements (regular budget)

Table 50

Financial resources

(Thousands of United States dollars)

Change	–	–	–	–	–	–	–	–	–	1	–	1	–	2	–	3

^a Includes one P-4 position and one P-3 position approved as general temporary assistance positions.

268. The proposed resource requirements for 2023 for UNMHA amount to \$37,193,000 (net of staff assessment) and will provide for the deployment of 75 United Nations monitors (\$2,342,100); salaries, common staff costs and other related costs (\$13,803,200) for 74 international positions (1 Assistant Secretary-General, 1 D-2, 1 D-1, 6 P-5, 11 P-4, 19 P-3, 1 P-2 and 34 Field Service) and 91 national positions (9 National Professional Officer and 82 Local level), including the proposed establishment of 1 Field Service position and 2 Local level positions in the Kuwait Joint Support Office; and 5 government-provided personnel; as well as operational costs (\$21,047,700), comprising the costs for official travel (\$759,500), facilities and infrastructure (\$4,919,700), ground transportation (\$641,400), air operations (\$8,271,200), communications and information technology (\$1,340,400), medical (\$3,825,900), other supplies, services and equipment (\$1,089,600) and quick-impact projects (\$200,000).
269. With a view to ensuring the effective delivery of its mandate, a number of changes to the staffing structure are proposed for 2023, including the establishment of three positions, the reassignment and redeployment of two positions and the redeployment of one position, as detailed below.

Human Resources Unit

- (a) Reassignment and redeployment of one Close Protection Officer (Field Service) as Human Resources Assistant from the Safety and Security Section in Hudaydah to the Human Resources Unit in Sana'a to ensure human resources expertise and advice is available to UNMHA and Office of the Special Envoy staff in Yemen;

Finance and Budget Unit

- (b) Reassignment and redeployment of one Close Protection Officer (Field Service) as Finance and Budget Assistant from the Safety and Security Section in Hudaydah to the Finance and Budget Unit in Sana'a to provide critical budgetary and/or financial services to the technical units and staff;

Office of the Chief of Supply Chain Management and Service Delivery

- (c) Redeployment of one Logistics Assistant (Local level) in the Engineering and Facilities Management Unit in Hudaydah to the Office of the Chief of Supply Chain Management and Service Delivery in Sana'a to provide support for acquisition planning;

Kuwait Joint Support Office

- (d) Establishment of three Finance Assistants (1 Field Service and 2 Local level) in the Kuwait Joint Support Office as part of an effort by the Secretariat to align the funding sources of the Support Office to better reflect the workload and the client base that the Support Office

services. Such an exercise aims at achieving a more balanced distribution of the workforce of that Support Office among the special political missions. It is proposed that six positions from UNAMA and UNAMI be abolished, and that six positions be established under four special political missions, including UNMHA.

270. It is proposed that one general temporary assistance backstopping position of Finance and Budget Officer (P-3) in the Field Operations Finance Division, Department of Management Strategy, Policy and Compliance in New York, be continued in 2023. The Finance and Budget Officer performs backstopping support and continues to be essential in ensuring sufficient capacity at Headquarters for the management of financial resources, the preparation of budgets and the provision of services to the legislative bodies during their review of the proposed budgets for special political missions.
271. It is also proposed that one general temporary assistance position of Programme Management Officer (P-4) in the Office of Deputy Head of Mission and Coordination in Hudaydah be continued in 2023 to provide demining expertise in Hudaydah City, the ports and the wider Governorate, and to lead the mine action programme embedded in the Mission.
272. For United Nations monitors, international and national staff, and government-provided personnel, a vacancy rate of 25 per cent has been applied to the estimates for continuing positions, taking into account the projected deployment. For proposed reassigned international positions, a vacancy rate of 50 per cent has been applied.
273. The decrease in requirements for 2023 compared with the appropriation for 2022 is attributable mainly to the following: (a) the lack of a provision for the airport headquarters; (b) the non-availability of additional office and accommodation premises in Hudaydah; (c) the lack of a requirement for additional security enhancements and construction works for the existing premises; (d) the reduced number of flight hours; (e) the lack of a requirement for level II hospital services in Djibouti; and (f) reduced requirements for freight costs owing to a lower level of acquisitions. The reduced requirements are offset in part by: (a) new requirements for operational and security services for a new office and accommodation premises in the southern districts; (b) new requirements for the quick-impact projects; (c) the proposed establishment of three new positions (1 Field Service and 2 Local level) in the Kuwait Joint Support Office; (d) increased costs under international staff, owing to the application of the latest salary scales, and under national staff, owing to higher salary rates based on actual average step levels of existing staff, as well as the increase in the salary scales for national staff based in Amman, and the application of a higher percentage of common staff costs; and (e) increased requirements for backup satellite Internet in Hudaydah.

10. United Nations Integrated Office in Haiti

(\$22,342,500)

Foreword

Following the assassination of President Jovenel Moïse in July 2021, the security and political climate of Haiti has deteriorated significantly. The United Nations Integrated Office in Haiti (BINUH) continued its work on encouraging Haitian political, civil society and economic actors to unite around a common project to resolve the country's current political and security crises.

It is essential that Haitian authorities and other key national stakeholders build consensus around a peaceful and democratic way forward to ensure the prompt revitalization of institutions through elections. The precarious context in which Haiti currently finds itself, characterized by broad institutional dysfunction and a deteriorating security situation, renders the support provided by BINUH, the broader United Nations system and the international community at large, more critical than ever going into 2023. The Haitian polity and society continue to require sustained advocacy and encouragement to undertake and implement constitutional and governance reforms, which will require sustained support and advice throughout the upcoming year, as BINUH also engages in efforts to curb gang violence, further develop the Haitian National Police, scale up the fight against impunity and corruption and ensure the continued protection and promotion of human rights.

The activities detailed in the present budget proposal will contribute to fostering a more conducive environment for Haitian leaders from the political, civil society, religious and private sectors that enables them to collaborate more effectively in addressing the root causes of the country's chronic instability and fulfilling the aspirations of all Haitians in their quest to achieve peace, democracy, security and sustainable development.

(Signed) Helen **La Lime**
Special Representative of the Secretary-General for Haiti and
Head of Office, United Nations Integrated Office in Haiti

A. Proposed programme plan for 2023 and programme performance for 2021

Overall orientation

Mandates and background

274. The United Nations Integrated Office in Haiti (BINUH) is responsible for advising the Government of Haiti in promoting and strengthening political stability and good governance, including the rule of law; advancing a peaceful and stable environment, including through supporting an inclusive inter-Haitian national dialogue; and protecting and promoting human rights. Its mandate derives from the priorities established in relevant Security Council resolutions and decisions, in particular Security Council resolution 2476 (2019). The Council extended the mandate to 15 July 2022 through its resolution 2600 (2021).
275. The Haitian Government intends to engage national stakeholders in the establishment of a new Provisional Electoral Council and to guarantee political and security conditions for the holding of a constitutional referendum and national elections. In the light of these planned efforts, in 2023 the strategic priorities for BINUH, in full collaboration with United Nations agencies, funds and programmes, are to advise the national Government on political, good governance, police, rule of law and human rights matters; encourage dialogue and consensus among stakeholders on key constitutional, security and governance reform efforts; enhance the capacity of the Haitian National Police to ensure public safety; and strengthen the justice and corrections sectors to guarantee the rule of law and protect human rights.

Programme of work

Objective

276. The objective, to which the mission contributes, is to strengthen political stability and good governance, including accountability and the rule of law; advance a peaceful and stable environment; protect and promote human rights; and strengthen gender equality.

Strategy

277. To contribute to the objective, the mission will:
- (a) Facilitate dialogue and engagement among national stakeholders to build consensus in the pursuit of a peaceful and sustainable solution to the current political crisis;
 - (b) Continue to provide strategic advice and technical assistance to the national police, judiciary and corrections systems and to the national human rights institutions in Haiti to promote international norms, human rights and gender parity;
 - (c) Contribute to the reduction of crime and community violence, in partnership with United Nations agencies, funds and programmes, in support of governmental institutions addressing the socioeconomic root causes of insecurity.
278. The mission's planned deliverables will support Member States' ongoing assistance to Haiti with regard to the country's recovery from the COVID-19 pandemic. Such planned deliverables and activities include continued engagement by the Special Representative of the Secretary-General for Haiti and her good offices as required to support the national response to the pandemic.
279. Reflecting the importance of continuous improvement and responding to the needs of Member States, the mission has mainstreamed lessons learned and best practices related to the adjustments and adaptation of its programme to tackle the COVID-19 pandemic. This includes the continued use

of virtual meeting formats wherever possible to ensure the safety of all BINUH personnel, national stakeholders, and United Nations and international interlocutors.

280. The above-mentioned work is expected to result in:
- (a) The enhanced capacity of State institutions to build consensus and enhance cooperation to address causes of instability and inequality in Haiti;
 - (b) Effective, inclusive and accountable institutions that contribute to consolidating stability, combating impunity and enabling a protective environment;
 - (c) Enhanced support to State institutions with regard to the protection of women and youth, communities and livelihoods through a reduction in gang violence;
 - (d) Enhanced police performance in ensuring public safety through police reform as a result of the implementation of the 2022–2025 national police strategic development plan, supported by adequate government funding and a multi-donor basket fund;
 - (e) Support for the continued roll-out of the COVID-19 Vaccine Global Access (COVAX) Facility vaccination plan with a target coverage of 20 per cent of an estimated population of 11.2 million.

External factors for 2023

281. The overall plan for 2023 is based on the following planning assumptions:
- (a) Political polarization is likely to continue to undermine the parties' ability to achieve the consensus required to advance tangible initiatives to implement political, legal and economic reforms;
 - (b) The fragile security situation may continue to have a negative impact on both the pace and the sustainability of political, legal and economic reforms. Moreover, as most incidents in the country occur in the Port-au-Prince metropolitan area, the allocation of overstretched State resources is further distorted, exhausting the capacity of security institutions and diminishing the returns on capacity investments in the security infrastructure. These security incidents, however, do not critically affect the ability of the United Nations to carry out its tasks;
 - (c) The Government of Haiti is expected to remain committed to further developing the capacities of the Haitian National Police and its Directorate of Prison Administration, including through the ongoing provision of sufficient budget allocation, complemented by external contributions through a multi-donor basket fund managed by UNDP;
 - (d) The impact of natural hazards on Haiti, including hurricanes and earthquakes, is unpredictable and expected to remain in line with recent years;
 - (e) The international donor community and the national authorities agree on and properly resource key development priorities linked to structural development issues while implementing stronger coordination arrangements to advance the 2030 Agenda for Sustainable Development.
282. With regard to cooperation with other entities, the mission will continue to collaborate with regional organizations, including the Organization of American States and the Caribbean Community. The mission will also engage closely with the diplomatic community to support coordinated approaches to encouraging political consensus and tackling stalemates, when appropriate.
283. With regard to inter-agency coordination and liaison, BINUH will continue to work in an integrated manner with the United Nations country team in mandated areas, as directed by the Security Council in resolution [2476 \(2019\)](#). The mission and the country team are currently implementing an integrated strategic framework developed in 2020, which lays out a streamlined set of priorities for implementation aligned with the six benchmarks for Haiti, while developing a Sustainable Development Cooperation Framework that will take effect in 2023.
284. The mission integrates a gender perspective in its planning, operations, deliverables and results, and encourages the meaningful participation of women in political processes, dialogues and negotiations,

as well as their representation in decision-making positions in institutions, in line with the Constitution's mandated minimum 30 per cent quota for women's participation at all levels. The mission's reporting will include disaggregated data on the impact of human rights violations and abuses on women, as well as on accountability and justice for crimes of violence against women and girls, in coordination with UN-Women. In addition, the mission will work with civil society actors focusing on gender and human rights in the context of the implementation of recommendations issued by the Committee on the Elimination of Discrimination against Women in 2016 and the second universal periodic review cycle for Haiti in 2016 on the human rights situation.

Evaluation activities

285. BINUH provided inputs to an internal lessons learned effort conducted jointly by the Department of Political and Peacebuilding Affairs, the Department of Peace Operations and UNDP to review the transition from peacekeeping to a special political mission. This evaluation has identified considerations for the mission as it plans for transition in the future.
286. An evaluation of the implementation of the recommendations resulting from a review of the mission by an independent expert, mandated by the Security Council in resolution 2600 (2021), is planned for 2023.

Programme performance in 2021

Enhanced protection of women, communities and livelihoods through reversing the surge in gang violence

287. A national disarmament, demobilization and reintegration and community violence reduction strategy was signed by the Prime Minister in July 2021, and a joint strategy to support the implementation of the national strategy and to increase the number of projects and other programmes being implemented in affected communities is in the process of being designed and funded. A working group is harmonizing the draft national weapons and ammunition management law with international standards, and a weapons and ammunition national action plan is being developed. BINUH has also continued by playing a convening role that allows Haiti to make progress towards alignment with the Caribbean Community's regional road map on firearms and ammunition. Progress towards the objective is presented in the performance measure below (see table 52).

Table 52

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
The National Commission on Security Guarantees was reactivated by the Government	<p>A task force to review the framework on arms control was established</p> <p>The Prime Minister established an interministerial task force headed by the National Commission, to which \$6.4 million was allocated for community violence reduction activities</p> <p>With support of the United Nations country team, the national strategy on disarmament, demobilization and reintegration and community violence reduction was submitted to the Prime Minister's Office</p>	<p>The national disarmament, demobilization and reintegration and community violence reduction strategy was signed by the Prime Minister in July 2021 and an implementation programme was in the process of being designed and funded</p> <p>A working group was harmonizing the draft national weapons and ammunition management law with international standards, and a weapons and ammunition national action plan was being developed</p>

Impact of the pandemic

288. The continuation of the pandemic into 2021 had an impact on the implementation of mandates, as health protocols and travel limitations posed challenges to the format of some scheduled events. Where possible, the mission respond by shifting the seminars, workshops and training events to a virtual or hybrid format to enable the provision of strategic and advisory support through online means.

Planned results for 2023**Result 1: effective, inclusive and accountable institutions contribute to consolidating stability and enabling a protective environment****Programme performance in 2021 and target for 2023**

289. The mission's work contributed to generating a commitment by Haitian institutions and other stakeholders to strengthening the national justice system, promoting respect for human rights and advancing the accountability agenda. Among the main initiatives were the revitalization of efforts to release detainees from pretrial detention, enhance the functioning of the national legal aid system, and bolster the capacity of the police to address insecurity, which partially met the planned target of the validation of the national strategy to reduce pretrial detention, the enhancement of operational and administrative capacities for the Haitian National Police to manage public safety in Haiti, and the facilitation of the entry into force of new Penal and Criminal Procedural Codes articulating a more progressive and humane approach to enforcing the law. The target was not fully met owing to the assassination of President Moïse in July 2021 and the absence of a fully functioning Senate, with resultant effects on the renewal of judges' mandates, which delayed plans for the review of the new Penal and Criminal Procedural Codes ahead of their entry into force. In addition, despite continuous engagement with Haitian authorities, limited progress in the prosecution of emblematic human rights cases, including in La Saline in 2018 and Bel-Air in 2019, was recorded and the implementation of the human rights action plan is still pending endorsement by the Council of Ministers.
290. Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 53).

Table 53
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Low satisfaction among the population with public services offered by national institutions	Improved satisfaction among the population through the alignment of the Penal Code and Criminal Procedural Code with international criminal justice and human rights norms and standards and the adoption by presidential decree; the appointment of female leaders for the Bar Association of Port-au-Prince and the Ministry of Human Rights and Fight against Extreme Poverty	The implementation of key reforms to Haitian judicial, police and corrections institutions began, laying the foundation for enhanced effectiveness, accountability and increasing accessibility for the population A new Government assumed office and training on the national strategy to reduce pretrial detention levels resumed	Key reforms to Haitian judicial, police, corrections and anti-corruption institutions are adopted, laying the foundation for enhanced effectiveness, accountability and transparency	Justice institutions begin to take ownership of key reforms to implement anti-corruption measures, increasing accountability and access to justice, while sustainably reducing the pretrial detention rate The national human rights action plan is endorsed by the Council of Ministers The Haitian National Police strategic plan for 2022–2025 provides effective technical support The basket fund receives strong support from donors, and reforms strengthen police performance

Result 2: engagement and consensus-building among key stakeholders and State institutions help address the country’s institutional vacuum and causes of instability

Programme performance in 2021 and target for 2023

291. BINUH continues to seek to promote an environment conducive to consensus-building. The Special Representative and her team, in coordination with the Organization of American States and other national and international actors, engaged political parties and civil society leaders to work with key stakeholders through dialogue to forge a consensus agreement on the way forward. Prime Minister Ariel Henry, who assumed office on 20 July 2021, plans, together with his Cabinet, to set up a constituent assembly in preparation for a constitutional referendum, and seeks to organize presidential, legislative and local elections with the goal of restoring the country’s democratically elected institutions to full service in 2023. However, this plan faces many challenges, including the significant probability of increased political polarization, rampant politically fuelled gang violence, and a crisis of legitimacy and capacity in key institutions including the Haitian National Police. BINUH will remain uniquely positioned to use its good offices to encourage the fostering of consensus by engaging regularly with representatives of the Prime Minister, the governing coalition, non-aligned actors and the opposition, as well as civil society, economic actors and faith-based organizations. The Special Representative will also continue to coordinate political engagement by international actors and boost financial and technical support to the national police through the core group on Haiti.

Lessons learned and planned change

292. The lesson for the mission was that, in order to address institutional dysfunction in Haiti, a holistic yet flexible approach to building consensus on a political way forward is required to ensure that causes of instability can be addressed. In applying the lesson, the mission will ensure that its good offices and political engagement efforts focus on building agreement about the future direction for Haiti, which will set the country on a path towards peace and sustainable development. Expected progress towards the objective is presented in the performance measure below (see table 54)

Table 54
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Legislative elections for the National Assembly and Senate were not held	The mandates of all Lower Chamber Parliamentarians and two thirds of the Senate ended The President, acting by decree, prepared for a constitutional referendum and presidential and legislative elections to return the country to a normal status	The assassination of the President, as well as the death of the President of the Cour de cassation, left all three branches of power in the country dysfunctional Haitian stakeholders worked together to agree on a way forward Prime Minister Ariel Henry assumed office with a pledge to organize elections as soon as possible	The Provisional Electoral Council is established and accepted as credible A constitutional referendum is organized; plans for national elections to be held as soon as possible are under way	Elections take place, the results are accepted by the population and elected institutions begin functioning

Deliverables

293. Table 55 lists all deliverables of the mission.

Table 55
Deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	3	3	3	3
1. Reports of the Secretary-General to the Security Council	3	3	3	3
Substantive services for meetings (number of three-hour meetings)	3	3	3	3
2. Meetings of the Security Council	3	3	3	3
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	32	40	55	40

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
3. Seminars, workshops and training events on four main areas of work: (a) implementation of and resource mobilization for the strategic plan to further develop and equip the Haitian National Police, sustain police service capable of maintaining public security, reduce gang violence, enhance police oversight and protect human rights; (b) implementation by national authorities and the United Nations country team of programmes on disarmament, dismantlement, reintegration, community violence reduction and weapons and ammunition management; (c) management and oversight of prisons and detention centres according to international standards; (d) promotion of human rights and participation of women as decision-makers in State institutions, political parties and initiatives of dialogue and consensus-building	32	40	55	40
Publications (number of publications)	2	2	2	2
4. Joint thematic public human rights reports	2	2	2	2
Technical materials (number of materials)	11	12	11	10
5. Materials conveying advisory support to national interlocutors	11	12	11	10

C. Substantive deliverables

Good offices: good offices of the Special Representative of the Secretary-General to: (a) foster cooperation and dialogue among the main political and social actors, build consensus and strengthen political stability and good governance; (b) support the efforts of national authorities and international partners to facilitate local peace initiatives, reduce gang and community violence and advance a peaceful and stable environment, including by further developing and equipping the Haitian National Police through a multi-donor basket fund; (c) raise awareness about human rights abuses and violations, sexual and gender-based violence and gender discrimination, and strengthen institutional accountability to address these problems and end impunity for perpetrators.

Consultation, advice and advocacy: efforts focus on: developing initiatives that promote dialogue and consensus building; advising on the development of effective, accountable and transparent institutions and advancing political, legal and economic reforms; developing the institutional framework and the electoral calendar; providing the Haitian National Police and the Directorate of Prison Administration with expert advice to strengthen the capacity and oversight of the 15,000-officer police and corrections service; advising State institutions and agencies on the implementation of action plans to promote and protect human rights and gender equality; advising on the development of a regulatory arms control framework, including the effective implementation of a holistic weapons and ammunition inter-institutional mechanism.

Fact-finding, monitoring and investigation missions: missions to assess human rights and allegations of violations; missions on implementing the human rights due diligence policy; joint monitoring missions to assess gang violence in seven gang-controlled neighborhoods of Port-au-Prince and other communities across Haiti.

D. Communication deliverables

Outreach programmes, special events and information materials: field outreach and advocacy materials (brochures, flyers, flipcharts, infographics, banners) explaining thematic objectives in the mission's mandate; outreach events on key priorities of the mission in close collaboration with the United Nations Communications Group; traditional and digital media campaigns, inclusive of print, radio and social platforms, to support United Nations electoral, disarmament, demobilization and reintegration/community violence reduction, police, corrections, justice and human rights initiatives and joint programmes.

External and media relations: strategic plan to ensure coverage of key activities of the mission, inclusive of press conferences, editorials on key issues, press briefings, press releases, targeted interviews and publications with target audiences and networks in close coordination with the United Nations Communications Group; daily media and social platform monitoring providing strategic analysis of media and social platform trends, risks and opportunities to provide guidance for crisis communication management.

Digital platforms and multimedia content: creation and management of website and social media; production and dissemination of content for multimedia products and campaigns (with a focus on digital radio) able to engage key actors on mission priorities and promoting transparency and accountability; campaigns and products for social media platforms showing the impact of the mission's work in close collaboration with the United Nations Communications Group, the United Nations country team and United Nations Headquarters.

B. Proposed post and non-post resource requirements for 2023

Resource requirements (regular budget)

Approved 2022 ^b	–	1	1 ^c	5	8	19	11	1	46	17	2	65	17	28	–	110
Proposed 2023 ^b	–	1	1 ^c	5	8	19	11	1	46	17	2	65	17	28	–	110
Change	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–

^a Other level, unless otherwise stated.^b Includes one D-1, one P-5, one P-4 and two General Service positions approved as general temporary assistance positions.^c Position is funded at 50 per cent and cost-shared with the Development Coordination Office.

294. The proposed resource requirements for 2023 for BINUH amount to \$22,342,500 (net of staff assessment) and would provide for 13 United Nations police personnel (\$789,900); salaries and common staff costs (\$16,151,500) for 65 international positions (1 ASG, 1 D-2, 5 D-1, 8 P-5, 19 P-4, 11 P-3, 1 P-2, 17 Field Service and 2 General Service), 45 national positions (17 National Professional Officer and 28 Local level), and 2 government-provided personnel; as well as operational costs (\$5,401,100), comprising the costs for consultants and consulting services (\$334,000), official travel (\$181,300), facilities and infrastructure (\$2,370,100), ground transportation (\$454,500), communications and information technology (\$1,437,000), medical (\$197,600) and other supplies, services and equipment (\$426,600).
295. In 2023, it is proposed that five general temporary assistance positions be continued:
- (a) One Principal Human Rights Officer (D-1) in the Human Rights Service of the mission to respond to and address the human rights requirements set by the Security Council as reflected in the BINUH mandate, adopted in resolution [2476 \(2019\)](#). Such a dedicated position, with specific human rights expertise, is important to facilitate trusted engagement at a high level with senior Haitian authorities, allowing for the provision of technical assistance and advice to the country's national human rights institutions;

- (b) Three backstopping positions in the Haiti team of the Department of Political and Peacebuilding Affairs, comprising one Senior Political Affairs Officer (P-5), one Political Affairs Officer (P-4) and one Team Assistant (General Service), who have provided backstopping support to BINUH since 2019 and will remain critical to ensuring ongoing support and strategic advice and analysis to principals at Headquarters for decision-making with regard to BINUH. The core functions they undertake are not required on a temporary basis but needed throughout the lifespan of the mission, including its start-up, the duration of the implementation of its mandate and its closing;
 - (c) One Finance and Budget Assistant (General Service) backstopping position in the Department of Management Strategy, Policy and Compliance, where the need remains high for the Field Operations Finance Division to continue delivering high-intensity and high-quality support to legislative bodies in their review of the budgets of special political missions. The continuation of this position will also ensure sufficient capacities for budget preparation, budget administration and performance monitoring of all 38 special political missions.
296. A vacancy rate of 13 per cent has been applied to the estimates for international positions, taking into account the most recent actual vacancy rates and planned deployment. Vacancy rates of 1 and 5 per cent have been applied to the estimates for National Professional Officer and Local level positions, respectively, taking into account the recent actual vacancy rates. The cost estimates for United Nations police and government-provided personnel for 2023 are based on the assumption of full deployment.
297. The increase in requirements for 2023 compared with the appropriation for 2022 is attributable mainly to: (a) higher requirements for international staff owing to the application of a lower vacancy rate compared with the rate applied in the approved 2022 budget, as well as higher hardship allowances resulting from the reclassification of Haiti duty stations from D to E; (b) new requirements for consultants and consulting services to provide short-term services in the areas of corrections and police reforms, constitution and justice matters and the election process; (c) higher requirements under ground transportation and freight costs, primarily due to the acquisition of five vehicles to replace ageing fleet vehicles and higher costs of fuel owing to an increase in fuel prices; and (d) higher requirements for the acquisition of information technology equipment to replace obsolete stock, centralized support services, and software licences and fees. The increase is offset in part by decreased requirements for national staff as a result of the devaluation of the local currency and the application of a lower percentage of common staff costs based on recent expenditure patterns, as well as lower requirements for mission subsistence allowance for United Nations police owing to the application of updated rates.

11. United Nations Integrated Transition Assistance Mission in the Sudan

(\$66,562,100)

Foreword

The year 2021 was challenging for the Sudan: the events that occurred significantly derailed the democratic transition and jeopardized the hard-won political, human rights and economic gains made over the previous two years. The United Nations Integrated Transition Assistance Mission in the Sudan (UNITAMS), together with the entire United Nations country team, did its utmost throughout the year to continue to deliver against its priorities set out by the Security Council. However, the military coup of 25 October 2021 and the ensuing political crisis forced the Mission to adapt and refocus its efforts on supporting Sudanese stakeholders in dialogue to redefine a credible and legitimate path to democratic governance, while also tackling urgent protection and peacebuilding needs in the context of a state of emergency and deteriorating security and economic conditions.

At the time of writing, it remains unclear when and whether the efforts to reach agreement on a way forward for the Sudanese transition will succeed. While the parties remain committed to the implementation of the Juba Agreement for Peace in the Sudan, the outcome of the political talks on the wider transition will have a profound impact on the environment in which the Mission will implement its mandate in 2023. Subject to additional guidance from the Security Council and to requests from the authorities for “scalable support”, UNITAMS will continue to focus within its capacity on the provision of political support for the transition and constitutional reforms, peace processes and peace agreements, as well as on its role in the protection of civilians and support for the Sudan Police Force and the rule of law. The provision by UNITAMS of support for elections is expected to gain in prominence in the event of an agreed political way forward, although the role of the United Nations has yet to be defined. Meanwhile, UNITAMS will continue to work towards the inclusive and comprehensive implementation of the Juba Peace Agreement, including through its role as Chair of the Permanent Ceasefire Committee. The coordination of peacebuilding efforts and the provision of support for international resource mobilization, including for the implementation of the Juba Peace Agreement, will remain critical, although the scope of work will depend on the willingness of donors to engage. The Mission’s integrated approach with the United Nations country team continues to be central: while a new United Nations Sustainable Development Cooperation Framework is due to be finalized with the authorities by the end of 2022, interim joint priorities for the current volatile period have been defined and will help to guide United Nations efforts.

In all of its activities, UNITAMS will continue to integrate gender as a cross-cutting issue, including to promote the full, equal and meaningful participation of women at all levels of peace and political processes. I remain inspired by the steadfast determination of the youth, civil society and wider population of the Sudan to realize the goal of a democratic, inclusive transition that began in 2019. UNITAMS remains fully committed to playing its part in supporting the realization of these aspirations.

(Signed) Volker **Perthes**
Special Representative of the Secretary-General for the Sudan and
Head of the United Nations Integrated Transition
Assistance Mission in the Sudan

A. Proposed programme plan for 2023 and programme performance for 2021

Overall orientation

Mandates and background

298. The mandate of the United Nations Integrated Transition Assistance Mission in the Sudan (UNITAMS) is contained in Security Council resolutions [2524 \(2020\)](#) and [2579 \(2021\)](#). The mandate defined in paragraph 3 of Security Council resolution [2579 \(2021\)](#) included the following strategic objectives: (a) to assist in the political transition, progress towards democratic governance, the protection and promotion of human rights and sustainable peace; (b) to support peace processes and the implementation of the Juba Peace Agreement and future peace agreements; (c) to assist in peacebuilding, civilian protection and the rule of law, in particular in Darfur and the Two Areas (Blue Nile and South Kordofan); and (d) to support the mobilization of economic and development assistance and the coordination of humanitarian and peacebuilding assistance. The Council further decided that the Mission should prioritize six areas, namely: (a) ceasefire monitoring in Darfur; (b) the implementation of the Government's national plan for the protection of civilians (see [S/2020/429](#)); (c) ongoing and future peace negotiations between the Government of the Sudan and Sudanese armed groups; (d) the inclusive implementation of the power-sharing agreements of the Juba Peace Agreement; (e) the constitutional drafting process; and (f) support for the Sudan Police Force and the justice sector. The mandate also recognized the need for scalable support for the implementation of any future peace agreements if so requested by the parties to the negotiations.
299. The military coup of 25 October 2021, and the protracted political crisis that followed, significantly undermined progress in the political transition and the environment for mandate implementation. The lack of an agreed political dispensation and the loss of public trust and confidence in the peace process, as well as gaps in the leadership of key Government institutions, led to delays in many areas of mandated activity. Dialogue with non-signatory armed movements on joining the Juba Peace Agreement was halted, along with the planned roll-out of the national plan for the protection of civilians. The constitution-drafting process also did not advance. In addition, there was a marked uptick in security incidents, including the looting of a former African Union-United Nations Hybrid Operation in Darfur (UNAMID) logistics base in December 2021 amid a rise in intercommunal violence, particularly in Darfur. As a result of the coup, several international partners and international financial institutions suspended assistance to the Sudanese authorities. All of these developments jeopardized some of the gains made since 2019 in tackling the country's significant political, security and socioeconomic challenges. Nevertheless, there was some progress in the implementation of the Juba Peace Agreement, which UNITAMS was able to support.
300. Going forward, UNITAMS is prioritizing: (a) intensive good offices, including by facilitating dialogue, in collaboration with partners, with a view to identifying a Sudanese-owned path to reinvigorate the transitional process; (b) human rights and the protection of civilians, including through intensified advocacy efforts in the context of increased reporting of human rights violations, and support to the Sudan Police Force and rule of law institutions in collaboration with the United Nations country team; and (c) support for peace implementation, in particular through the operationalization of the Permanent Ceasefire Committee in Darfur, which is chaired by UNITAMS, and collaboration with partners to promote peace implementation and peacebuilding based on detailed assessments of local conditions. Across all of these areas, supporting the full participation of women and young people in peacemaking and peacebuilding also remains a key priority.

Programme of work

Objective

301. The overall objective, to which the Mission contributes, is to support a political transition towards inclusive democratic governance in the Sudan, in a manner that fosters sustainable peace and development and ensures that civilians are protected, human rights are respected and the rule of law is upheld.

Strategy

302. To contribute to the objective, the Mission will:
- (a) Provide good offices and technical assistance in support of the political transition in the Sudan, including by facilitating talks and providing assistance towards critical milestones in the transition, such as the constitution-making process and the holding of elections;
 - (b) Facilitate meaningful participation in the political transition and the implementation of peace agreements by a wide and diverse range of Sudanese stakeholders, including civil society, women, youth, refugees, internally displaced persons and members of marginalized groups;
 - (c) Continue its support to Sudanese institutions to deliver justice and accountability and coordinate the civilian protection and peacebuilding activities of the United Nations, including local-level conflict prevention, mitigation and reconciliation, and community violence reduction, in particular for women, children and vulnerable groups. The Mission will, in particular, continue its support for the full implementation of the national plan for the protection of civilians by the Sudanese authorities, including through support for the Sudan Police Force and rule of law institutions in collaboration with the United Nations country team;
 - (d) Fulfil its obligations as Chair of the Permanent Ceasefire Committee and support its various structures under the security arrangements of the Juba Peace Agreement;
 - (e) Support international resource mobilization, national socioeconomic reforms and the establishment of a national architecture for development planning and aid effectiveness.
303. The above-mentioned work is expected to result in:
- (a) An inclusive, comprehensive and sustainable peace agreement and a Sudanese-owned and -led path to a democratic and inclusive political transition;
 - (b) Strengthened and accountable human rights and rule of law institutions;
 - (c) An enhanced protective environment and reinforced peaceful coexistence and reconciliation between communities;
 - (d) Coherent support by the United Nations and the international community to address socioeconomic challenges.

External factors for 2023

304. The overall programme plan for 2023 is based on the following planning assumptions:
- (a) Following political talks, Sudanese stakeholders agree on a path to political transition, enabling the formation of a credible transitional Government and other key transitional institutions, and a growing focus on constitutional reforms and preparation for elections;
 - (b) The Juba Peace Agreement is not yet fully comprehensive, and the implementation of existing agreements is progressing slowly, with the population slowly seeing tangible benefits;

- (c) The security situation in some parts of the country remains volatile and unpredictable but does not lead to a major escalation of violence;
 - (d) The economic situation remains dire, with the risk of threatening the political transition; however, international financial technical assistance and financial support slowly resumes on the basis of the resumption of a credible transition;
 - (e) Trust of the population in institutions, in particular those responsible for civilian protection, justice and rule of law, is low; however, the Sudan begins to implement the national plan for the protection of civilians, creating opportunities for progress with international support;
 - (f) UNITAMS continues to serve as Chair of the Permanent Ceasefire Committee, with a role focused mainly on facilitation and advisory functions to the parties;
 - (g) The Sudanese authorities remain supportive of the Mission's mandate and presence in the country, including with regard to honouring the status-of-mission agreement;
 - (h) International partners remain committed to supporting the Sudanese transition and implementation of the Juba Peace Agreement, including by making available assistance for priority peacebuilding and development initiatives.
305. With regard to cooperation with other entities, the Mission will continue its partnerships with international actors to support the priorities of the Sudanese authorities. The Mission will coordinate with partners to maximize collective impact and avoid a duplication of efforts, on the basis of comparative advantages and a clear division of labour. In this regard, a continued political partnership between the African Union and the United Nations will remain critical. The Mission will also continue to closely coordinate with other regional organizations, including the Intergovernmental Authority on Development, as well as Member States represented by their embassies in Khartoum and by envoys in their respective capitals, and international financial institutions.
306. With regard to inter-agency coordination and liaison, the Mission and the United Nations country team will continue to operate in a complementary and integrated manner, ensuring coordination and aligning the sequencing and implementation of priority programmes during the transitional period, in accordance with Security Council resolution [2579 \(2021\)](#). This approach will be enshrined in a United Nations Sustainable Development Cooperation Framework to be finalized by the end of 2022. With regard to the protection of civilians, human rights, justice and accountability, UNITAMS will work closely with the country office of OHCHR and other members of the United Nations country team to support the implementation of the human rights, equality, accountability and rule of law provisions of the Constitutional Declaration and peace agreements, in particular those provisions that guarantee justice and women's rights. In addition, liaison with the United Nations Interim Security Force for Abyei, the United Nations Mission in South Sudan, UNSMIL, MINUSCA and the Special Envoy of the Secretary-General for the Horn of Africa will ensure continued effective inter-mission cooperation on regional issues through established coordination and liaison mechanisms.
307. The Mission integrates a gender perspective in its activities, deliverables and results, with a view to supporting the full and effective participation, representation and protection of women in the implementation of peace and political processes and all social and economic aspects of life. This will include addressing and overcoming all forms of disparities and discrimination and promoting an inclusive and gender equitable transition by keeping the women and peace and security agenda, as well as youth engagement, at the centre of its efforts, in accordance with relevant Security Council resolutions on women and peace and security and on youth and peace and security.
308. The Sudan is highly vulnerable to the climate crisis and in many global indices ranks among the most affected countries. Extreme climate patterns would have a major impact on the agricultural sector, with potentially devastating consequences for the country's livelihoods and food security. Peace and security in the Sudan are likely to be negatively affected by the effects of the climate crisis, as water scarcity and the loss of livelihoods can intensify competition for natural resources, which could lead to increased

displacement and migration. Accordingly, the Mission, in partnership with the broader country team, will continue to explore ways to analyse and address climate-related security risks and build the resilience of the Sudanese states and communities to cope with, adapt to and recover from climate stressors.

Evaluation activities

309. The Mission established a policy on evaluations in 2022. No formal evaluations were completed in 2021. However, UNITAMS continued to make use of best practices and lessons learned initiatives undertaken by United Nations country team partners and UNAMID to support planning and delivery.
310. Evaluations planned for 2023 include a strategic review of mandate delivery and integration with the members of the United Nations country team.

Programme performance in 2021

Facilitation of women's participation in peace processes

311. Throughout 2021, UNITAMS regularly consulted with women's rights actors from a diverse spectrum of Sudanese society to hear their views on the situation of women, the deepening political crisis and ways to support further inclusion of women in all decision-making processes shaping the future of the country. This included weekly meetings between UNITAMS and women's groups and women's rights defenders based in Khartoum and across the country. Together with UN-Women and UNDP, the Mission facilitated dialogues that led to the establishment of a coalition of women from political parties, armed movements and civil society that came together around a unified platform advocating for women's participation in all ongoing political and peace processes in the Sudan. UNITAMS elevated this platform and supported the coalition's high-level advocacy with capacity-building and training sessions and regular meetings, including by bringing 26 women's rights activists to lobby stakeholders in the margins of the Juba peace negotiations, where they met with Government officials, the Sudan People's Liberation Movement-North Abdelaziz al-Hilu faction, the South Sudanese mediation team and key members of the international community, including the Troika. The joint UN-Women-UNDP-UNITAMS interventions, spearheaded by the Special Representative of the Secretary-General for the Sudan, also led to a breakthrough in the Juba negotiations: the establishment of a five-woman team of gender experts with observer status. The women's rights coalition continued its work after the Juba negotiations to press for women's inclusion at all stages and levels of mediation efforts following the coup. Progress towards the objective is presented in the performance measure below (see table 58).

Table 58

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	–	Progress made in facilitating women's engagement in and influence on political processes

Impact of the pandemic

312. The continuation of the pandemic into 2021 affected mandate implementation, including delaying the roll-out of priority engagements on rule of law and protection of civilians owing to delays in the onboarding of staff. The effectiveness of flexible working arrangement within the country was impeded following the military coup of 25 October 2021, when most Internet service providers were blocked for several weeks. Prior to and in the aftermath of the coup, UNITAMS instituted flexible working modalities, including remote working, to enable staff to continue delivery.

Planned results for 2023

Result 1: political transition and progress towards democratic governance and an inclusive and comprehensive peace in the Sudan

Programme performance in 2021 and target for 2023

313. In 2021, prior to the coup, UNITAMS undertook extensive, nationwide engagement with the transitional Government, military and political constituents, and women's, youth and civil society actors in the Sudan in support of the transition, advising on, inter alia, the constitution-making process and an integrated plan for United Nations electoral assistance. In support of a more comprehensive peace agreement, UNITAMS supported talks between the transitional Government and the Sudan People's Liberation Movement-North Abdelaziz al-Hilu faction from 27 May to 15 June as a facilitator, in collaboration with the South Sudanese mediation team, and facilitated the meaningful participation of women's representatives. Although the Mission's work contributed initially to accelerating progress towards restoring a credible political transition, the planned target was not met, owing largely to deep divisions between the military and civilian components of the transitional authorities that culminated in the military coup of 25 October 2021, as well as the ensuing political crisis.
314. Following the coup, UNITAMS adjusted its focus to concentrate on the promotion of dialogue and the coordination of Sudanese-led mediation efforts aimed at reaching a negotiated political settlement to restore constitutional order and a path to democratic transition. In 2023, and subject to Sudanese stakeholders reaching broad-based agreement on a constitutionally legitimate way forward for the democratic transition, the Mission will renew its efforts to support an inclusive political transition in line with the original objective. Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 59).

Table 59

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	Progress towards political transition and towards a more comprehensive peace agreement with increased participation of women and youth was stalled following the October 2021 coup	Reinvigoration of transitional processes, progress towards a more comprehensive peace agreement, and acceleration of necessary further negotiations	Consolidation of constitutional arrangements and continued commitment of the parties to peace agreements alongside the conclusion of necessary further negotiations

Result 2: increased mobilization of economic and development assistance and coordination of humanitarian and peacebuilding assistance

Programme performance in 2021 and target for 2023

315. The Mission, in coordination with the United Nations country team, supported efforts towards the reintegration of the Sudan into the global economy. In June 2021, the country qualified for the Heavily Indebted Poor Countries Initiative of IMF, paving the way for debt relief. UNITAMS supported the launch of the Sudan partnership forum to foster coordination on the planning and delivery of development assistance in line with national priorities and established global principles of effective development cooperation. Together with the United Nations country team, it launched the Sudan financing platform multi-partner trust fund's "Peacebuilding and Stabilization" window,

which serves as a pooled funding mechanism, and developed the Sudan peacemaking, peacebuilding and stabilization programme, as requested by the Security Council, in order to support mandate implementation. Through these mechanisms, the Mission's work contributed to the identification of the support and priority needs of the country's transition, including donor coordination on debt relief, investment and economic planning. Despite the above, the planned target for 2021 was not met, owing to the economic impact of the military coup and the subsequent suspension of a significant amount of donor assistance, exacerbated by the COVID-19 pandemic, delays in the roll-out of economic reforms and the suspension of social protection initiatives such as the family support programme. Following the coup, the Mission, in collaboration with United Nations entities, worked to develop a common approach and engage with donors on priority needs.

316. In 2023, and subject to political progress that would enable full re-engagement, the Mission will reinvigorate its efforts to support and coordinate economic development undertakings between the transitional Government and the international community, including efforts towards debt relief initiatives and increased foreign direct investment. Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 60).

Table 60
Performance measures

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	Increased engagement with international financial institutions, resulting in debt relief and coordination of donor assistance, but progress reversed as a result of the October coup	Progress in mobilizing resources for critical peacebuilding in conflict-affected areas based on strengthened coordination with international partners	Increased support to and coordination on economic development between the transitional Government and international partners in the form of debt relief and increased foreign direct investment

Result 3: improved protective environment and human rights supported by the implementation of the Juba Peace Agreement, including its security arrangements

Proposed programme plan for 2023

317. Owing to the political instability in the Sudan, the Mission only partially met the planned target of enhanced national capacity for civilian protection and adoption of key reforms for the protection of human rights and the upholding of the rule of law. In a significant change to the planned activities, in July 2021, UNITAMS assumed the role of Chair of the Permanent Ceasefire Committee, foreseen under the security arrangements of the Juba Peace Agreement. After a pause during the post-coup period, the Mission continued its engagements in 2022 with some progress, especially with regard to operationalizing the Committee and security arrangements. In 2023, the Committee structure is expected to remain operational, and will operate at a heightened pace, alongside the scaling up of protection efforts and the provision of support for Sudanese-led peacebuilding.

Lessons learned and planned change

318. A lesson learned for the mission was the need for the effective prioritization of peacebuilding efforts based on realistic timelines and the expectations of Government and civil society counterparts, as well as on the actual capacities and resources available to United Nations and other development partners. The ongoing peacebuilding assessments are expected to assist in future prioritization. In applying the

lesson, measures were put in place to augment the capacity of the Integrated Office of the Deputy Special Representative of the Secretary-General/Resident Coordinator/Humanitarian Coordinator through surge deployment to better facilitate common approaches and partnerships. Expected progress towards the objective is presented in the performance measure below (see table 61).

Table 61
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	National capacity for civilian protection was enhanced and steps were taken to develop key reforms for the protection of human rights and the upholding of the rule of law, but progress stalled or was rolled back after the October coup	National capacity for civilian protection is restored and dialogue is restored on reforms for the protection of human rights, accountability and the rule of law, while key provisions of the Juba Peace Agreement's security arrangements are implemented	National capacity for civilian protection is enhanced to support State and non-State actors Reforms for the protection of human rights, accountability and the rule of law are accelerated The Juba Peace Agreement is in the process of implementation, including a permanent ceasefire and final security arrangement protocol for durable peace in Darfur

Deliverables

319. Table 62 lists all deliverables of the Mission.

Table 62
Deliverables for the period 2021-2023, by category and subcategory

Deliverables	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	4	4	4	4
1. Reports of the Secretary-General to the Security Council	4	4	4	4
Substantive services for meetings (number of three-hour meetings)	4	4	4	4
2. Meetings of the Security Council	4	4	4	4
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	1	2	2
3. United Nations joint peacebuilding programme launched	1	1	2	2
Seminars, workshops, and training events (number of days)	92	176	375	311

<i>Deliverables</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
4. Workshops and civic consultations on subjects relating to peace negotiations and peace agreements, as well as the political transition, including constitution drafting and population census	30	90	61	60
5. Meetings and workshops related to the implementation of the permanent ceasefire and security arrangements	–	–	43	60
6. Seminars and consultations on electoral matters	15	10	53	14
7. Workshops and consultations on disarmament, demobilization and reintegration	9	–	28	18
8. Workshops on community violence reduction	6	18	21	10
9. Workshops and training sessions on human rights and protection	20	32	49	28
10. Workshops on rule of law	12	26	23	24
11. Seminars for Sudan Police Force officers on civilian protection, community policing and sexual and gender-based violence and investigation	–	–	97	91
12. Training for the members of the Darfur Permanent Ceasefire Committee, Sectoral Committees and Field Teams to enhance their capabilities to perform their roles in accordance with the mandates of the Permanent Ceasefire Committee	–	–	–	6
Publications (number of materials)	6	7	16	10
13. Newsletters featuring news and human-interest stories on United Nations engagement, achievements and work throughout the Sudan	4	5	6	4
14. Promotional and educational materials, including posters and/or brochures, on thematic issues of sustainable peace and development	2	2	10	6
Technical materials (number of materials)	3	2	5	3
15. Manual on civilian protection for the Sudan Police Force and pocket booklets for commanders on the protection of civilians, based on competent laws	1	1	1	1
16. Manual on community-oriented policing for the Sudan Police Force	1	1	1	–
17. Manual on conflict-related sexual violence and sexual and gender-based violence for the Sudan Police Force	–	–	1	1
18. Material on peacebuilding financing in the Sudan	1	–	2	1

C. Substantive deliverables

Good offices: good offices to engage with all concerned parties to support the Sudanese peace negotiations and the implementation of peace agreements, as well as assistance to the country's political transition; provide technical assistance for national efforts for an inclusive, participatory and transparent constitution drafting process that provides the basis for consensus-building and dialogue on social cohesion, good governance, protection of civilians, human rights and the rule of law; support the efforts of national authorities to implement the human rights, equality, accountability and rule of law provisions of the Constitutional Declaration, including the strengthening of independent and representative rule of law institutions; support the efforts of national and local authorities to provide and ensure security, justice and protection, including to raise awareness about human rights abuses and violations, sexual and gender-based violence and gender discrimination, to strengthen trust and national accountability and to address those abuses and violations and end impunity for the perpetrators.

Consultation, advice and advocacy: consultations, advice and advocacy on the political transition and peace processes with a broad range of Sudanese stakeholders, including civil society, women, youth, refugees and internally displaced persons and members of marginalized groups; meetings and consultations with international, regional and subregional organizations, as well as with concerned Member States, on the political and security situation in the Sudan; advise on and advocate for the establishment and formulation of institutions, legislative and policy frameworks required to implement the human rights, equality, accountability and rule of law provisions of the Constitutional Declaration, including the strengthening of accountable and representative rule of law institutions in conflict-affected areas that foster a protective environment and advance the peace process, in strong partnership with civil society; advocacy for progress towards the effective re-establishment of the criminal justice chain throughout the Sudan; advocacy for resource mobilization, including for the multi-partner trust fund on peacebuilding; provision of technical support and advice to the Sudan National Mine Action Centre pertaining to mine action and compliance with the Anti-Personnel Mine Ban Convention; provision of advocacy and advice in support of development of local mine action initiatives in areas controlled by non-State armed groups.

<i>Deliverables</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
---------------------	-------------------------	------------------------	-------------------------	-------------------------

Fact-finding, monitoring and investigation missions: joint missions in support of national authorities to assess security incidents, including intercommunal violence and other conflict-related incidents; monitoring and advising on redressal of human rights violations, reporting on impunity.

D. Communication deliverables

Outreach programmes, special events and information materials: information materials (brochures, flyers, flipcharts, infographics, promotional material, frequently asked questions, messaging) explaining the Mission's mandate and developments; outreach events on key priorities of the Mission in close collaboration with partners and United Nations agencies, funds and programmes in the Mission area and awareness-raising events with national stakeholders, including civil society and local communities, to support joint United Nations work in the areas of the rule of law, criminal justice and accountability; activities and campaigns to support United Nations work in support of the political transition, the peace process, peacebuilding, civilian protection, gender equality, economic development and the achievement of the Sustainable Development Goals; production of content for dissemination through national and local media; outreach activities targeted at hard-to-reach audiences through partners, using alternate means such as telecommunications, theatre and other traditional communication methods; training sessions to build capacity, improve relationships and support media relations and improved reporting on the work of the United Nations; public outreach, sensitization and interaction programmes with local people and stakeholders in five Darfur states about the activities of the Permanent Ceasefire Committee structures; outreach programmes with the Sudan Police Force on civilian protection, community policing and sexual and gender-based violence.

External and media relations: strategic plan to cover key activities of the Mission; press conferences, press briefings, press releases; targeted interviews and publications with media in close coordination with the United Nations Communications Group and with target audiences and networks; videos of Mission activities; weekly media monitoring and analysis of media trends, risks and opportunities and crisis communications management; opinion poll survey to get an accurate idea of public perception, with subsequent surveys throughout the Mission duration.

Digital platforms and multimedia content: digital platforms (web and social media); content for various multimedia products and campaigns that promote transparency and accountability and engage key actors on the priorities of the Mission; campaigns and products for social media platforms to show the impact of the Mission's work in close collaboration with the United Nations Communications Group, the United Nations country team and United Nations Headquarters.

B. Proposed post and non-post resource requirements for 2023

Resource requirements (regular budget)

Table 63

Change	-	-	-	-	1	-	-	-	1	-	-	1	-	-	-	1

^a Other level, unless otherwise stated.

^b Position is funded at 50 per cent and cost-shared with the Development Coordination Office.

^c Includes one general temporary assistance position.

320. The proposed resource requirements for 2023 for UNITAMS amount to \$66,562,100 (net of staff assessment) and would provide for the deployment of 28 military observers (\$626,200); 42 United Nations police officers (1,408,900); salaries and common staff costs (\$38,391,300) for 178 international positions (1 USG, 1 ASG, 2 D-2, 5 D-1, 21 P-5, 40 P-4, 37 P-3, 2 P-2, 68 Field Service and 1 General Service), including the establishment of one position (P-5); 166 national positions (57 National Professional Officer and 109 Local level); and 12 United Nations Volunteers; as well as operational costs (\$26,135,700), comprising costs for consultants and consulting services (\$210,900), official travel (\$922,400), facilities and infrastructure (\$3,279,500), ground transportation (\$1,327,200), air operations (\$10,320,000), communications and information technology (\$3,520,200), medical (\$868,100) and other supplies, services and equipment (\$5,687,400).
321. A vacancy rate of 25 per cent has been applied to the estimates for continuing international positions and 30 per cent for National Professional Officer and Local level positions. A vacancy rate of 50 per cent has been applied for the new proposed international position. A vacancy rate of 5 per cent has been applied to the estimates for United Nations Volunteers. Taking into account the projected pace of the deployment schedule for 2023, a delayed deployment factor of 40 per cent and 10 per cent have been applied to the cost estimates for the military observers and United National police personnel, respectively.
322. In 2023, building on the experience gained in recent years, a number of reconfigurations and adaptations to the structure and staffing of UNITAMS are proposed, resulting from efforts focused on optimizing staffing resources to ensure that the Mission's staffing is tailored to the efficient execution of its mandate, as set out below.
323. To better facilitate common approaches and partnerships for the effective prioritization of peacebuilding efforts, the Mission needs to strengthen its coordination function to support integration initiatives with the United Nations country team and transitional authorities to enable mandate delivery, especially in the context of developing and delivering an integrated strategic framework. To this end, the following is proposed:

Integrated Office of the Deputy Special Representative of the Secretary-General, Resident Coordinator and Humanitarian Coordinator

- (a) Establishment of one position of Senior Coordination Officer (P-5) in the Integrated Office of the Deputy Special Representative of the Secretary-General, Resident Coordinator and Humanitarian Coordinator. The proposed position would support the oversight and coordination of the Mission's protection of civilians, elections and peacebuilding pillars, implement the joint vision and oversee strategic partnerships and engagement with international financial institutions, international donors and the Government, in line with requested prioritization of integration by the Security Council in its resolution 2579 (2021);

Office of Support to Civilian Protection

- (b) Establishment of presences in Nyala, El Geneina and Port Sudan through the redeployment of existing human rights and civilian protection positions to these locations, to ensure a human rights presence in the hotspot areas where human rights and protection demands dictate. This would entail the redeployment of one Human Rights Officer (National Professional Officer) position from Khartoum to the El Fasher Regional Office, and the redeployment of one Associate Women's Protection Adviser (National Professional Officer) from Kadugli and one Human Rights Officer (United Nations Volunteer) position from El Fasher to the Kassala Regional Office;

Strategic Communications and Public Information Unit

- (c) Realignment of the Strategic Communications and Public Information Unit from the Office of the Chief of Staff to the Office of the Special Representative of the Secretary-General to address the need for day-to-day interaction between the Head of Mission and the team responsible for public messaging, in the light of the increasing focus on the Mission's role in political dialogue.

Mission support

- 324. In 2023, the Mission intends to streamline its mission support structure with a view to enhancing operational efficiency in the provision of enabling services by responding to the changing contexts on the ground, taking into account the establishment of the Permanent Ceasefire Committee, the closure of UNAMID, the roll-out of the Mission's regional presence and political and security realities on the ground. In addition, there is a need to ensure a minimum level of operational support functions, including logistics, facilities management and administration tasks, at each field location where military, police and substantive civilian personnel are deployed.
- 325. The above would be achieved through existing staffing resources. The proposed establishment of new functional units, reassignments and redeployments of positions are designed to respond to structural gaps and needs in the mission support architecture and to position it for effective delivery of the Mission's mandate.

Office of the Chief of Mission Support

- (a) Redeployment of an Air Safety Officer (P-3) from the Aviation and Movement Control Unit to the Office of the Chief of Mission Support, to provide the required level of expertise to manage the accident prevention programme to better mitigate risks inherent in air operations;

Supply Chain Management and Service Delivery Section

- (b) Closure of the Mission Support Centre and the realignment of all its units under the Supply Chain Management and Service Delivery Section;
- (c) Establishment of the Integrated Centralized Warehousing Unit under the Supply Chain Management and Service Delivery Section to clarify that it specializes in integrated centralized warehousing planning, administration and performance management and to ensure visibility of all stocks and inventory within the Mission and across various field office locations. The Unit would be resourced with the existing three positions (1 P-3 and 2 Local level), as well as one additional position through the reassignment and redeployment of a Logistics Assistant (Field Service) from the Mission Support Centre as Property Disposal Assistant;
- (d) Establishment of an Acquisition and Planning Management Unit responsible for the planning, development and management of the acquisition process for goods and services, to be constituted through the redeployment of the existing two positions (1 Field Service and 1 Local level) from the Office of the Chief of the Supply Chain Management and Service Delivery Section, and through the reassignment of one Contracts Management Officer (Field Service) as Acquisition Planning Officer (Field Service) from the Office of the Chief of the Supply Chain Management and Service Delivery Section;

- (e) Establishment of a Life Support Unit, to be responsible for the management and provision of petroleum, oils and lubricants, rations, stationery and office supplies and other general supply commodities. The Unit would be constituted through the existing three positions (1 P-4, 1 Field Service and 1 Local level) from the Office of the Chief of the Supply Chain and Service Delivery Section, and through the redeployment of one Field Service position from the Mission Support Centre and the reassignment of one position of Property Management Assistant (Local level) in the El Fasher Regional Office as Supply Assistant;

Medical Services Unit

- (f) Redeployment of the Medical Services Unit, including one Medical Officer (P-3), from the El Fasher Regional Office to Khartoum, to develop and implement health-related services for UNITAMS personnel both in Khartoum and in the field locations, provide guidance on health-related matters, coordinate medical and casualty evacuations for the Mission as required and represent UNITAMS in health-related working groups. In addition, to strengthen the Unit's function in Khartoum, it is also proposed that one Aviation Safety Officer (National Professional Officer) from the Office of the Chief of Mission Support be reassigned as Medical Officer (National Professional Officer) in the Unit;

Surface Transportation Unit

- (g) Reassignment and redeployment of one Nurse (Local level) as Transport Assistant from the Medical Services Unit in the El Fasher Regional Office to Khartoum, to augment the capacity for management of the vehicle fleet for the Mission, including analysing the carlog data in Khartoum;

Aviation and Movement Control Unit

- (h) Redeployment of one Movement Control Assistant (Field Service) from the El Fasher Regional Office to Khartoum to oversee the central passenger booking office;
- (i) Reassignment and redeployment of one Nurse (Local level) as Air Operations Assistant from the El Fasher Regional Office to Khartoum to assist in all activities related to flight clearances with the host Government and aviation authorities in Khartoum;

Operations and Resource Management Section

- (j) Realignment of the Procurement Unit from the Supply Chain Management and Service Delivery Section to the Operations and Resources Management Section;
- (k) Realignment of the Property Management Unit from the Supply Chain Management and Service Delivery Section to the Operations and Resource Management Section to balance the workload between the two main mission support sections. The Unit would be constituted with the three existing positions (1 Field Service and 2 Local level), and one additional position through the reassignment of one Paramedic (Field Service) from the Medical Services Unit as Supply Chain Business Intelligence Assistant to strengthen business intelligence and performance analysis.

Regional Offices

326. With the expansion of the UNITAMS footprint to 10 field and liaison offices, which include the Permanent Ceasefire Committee uniformed personnel in Ed Daein, Kauda, Port Sudan, Nyala, Zalingei and El Damazin, there is a requirement to have mission support personnel in these locations to provide a wide range of support services. In this regard, the following is proposed:
- (a) Redeployment of one Logistics Assistant (Local level) from Khartoum to the El Fasher Regional Office (Ed Daein) and one Logistics Assistant (Local level) from the El Fasher Regional Office to the Kassala Regional Office (Port Sudan);
- (b) Reassignment of one Movement Control Assistant (Local level) as Logistics Assistant in the El Fasher Regional Office (Nyala);

- (c) Reassignment and redeployment of one Human Resources Assistant (Local level) as Logistics Assistant from the Human Resources Unit in Khartoum to the El Fasher Regional Office (Zalingei);
 - (d) Reassignment of one Nurse (Local level) as Logistics Assistant (Local level) from the Kassala Regional Office to the Kadugli Regional Office (El Damazin);
 - (e) Reassignment of one Receiving and Inspection Assistant (Local level) as Facilities Management Assistant (Local level) in the El Fasher Regional Office to cover a wide range of facilities-related services.
327. It is proposed that one general temporary assistance position of Programme Management Officer (P-4) in the Mine Action Unit of the Office of the Deputy Special Representative of the Secretary-General, Resident Coordinator and Humanitarian Coordinator be continued in 2023 to provide technical assistance on mine action matters, the clearance of explosive ordnance within priority areas in the UNITAMS area of responsibility with a focus on the Two Areas, and advocate for mine action initiatives in areas under the control of armed groups.
328. The increase in requirements for 2023 compared with the appropriation for 2022 is attributable mainly to: (a) higher requirements for police and civilian personnel owing to the application of lower vacancy rates compared with 2022, as the Mission continues to ramp up its operations following the initial start-up period; (b) additional requirements for civilian personnel costs owing to the delayed impact of 85 positions approved in 2022 for the scaling up of the Mission mandate, offset in part by a decrease in military personnel costs due to the application of the current mission subsistence allowance rate; (c) higher requirements for individual consultants to strengthen expertise in peace consolidation and the protection of civilians; (d) higher requirements for official travel, reflecting the expanded level of engagement, the need to undertake essential within-mission and outside-mission travel activities, and mandatory training requirements that were postponed in 2022; (e) higher requirements for ground transportation related to the planned replacement of ageing vehicles transferred from UNAMID; (f) higher requirements under communications and information technology services owing mainly to the higher number of personnel planned for deployment in 2023 compared with 2022; (g) higher requirements under medical services to cater for the increase in demand for aero-medical evacuation services outside the Mission area; and (h) higher requirements for other supplies, services and equipment related to programmatic activities and the facilitation of meetings. The overall decreased requirements in operational costs are mainly under air operations as a result of the application of the latest contractual prices for the rental and operation of aircraft, and under facilities and infrastructure owing to the non-requirement in 2023 for construction, renovation and major maintenance services, offset in part by increased requirements for the acquisition of vehicles, communications equipment and medical services.

Extrabudgetary resources

329. In 2022, extrabudgetary resources in an estimated amount of \$4.1 million are expected to be utilized in support of the good offices and political functions of the Mission. This includes support to extend and expand the Mission's support to ongoing peace processes, the good offices of the Special Representative of the Secretary-General, the implementation of the Juba Peace Agreement and local deployments to defuse tensions.
330. For 2023, extrabudgetary resources in an estimated amount of \$3.1 million are expected to be utilized to further support good offices activities.
331. The decrease in estimated extrabudgetary resources in 2023 compared with 2022 is due to anticipated reductions in the need for good offices engagement and support for the reinvigoration of the transitional process, which will be prioritized in 2022. It is hoped that this will result in progress towards a more comprehensive peace agreement and enable a shift towards peace implementation and development.

Annex I

Summary of follow-up action taken to implement decisions and requests made by the General Assembly, including the requests and recommendations of the Advisory Committee on Administrative and Budgetary Questions endorsed by the Assembly

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions (A/76/7/Add.4)

The Advisory Committee is concerned about the number of long-vacant posts within the aforementioned special political missions, particularly at the national levels, and trusts that the recruitment for all vacant positions will be completed expeditiously and updated information will be provided to the General Assembly in the next budget submission. The Committee also recommends that the General Assembly request the Secretary-General to conduct a staffing assessment to justify the proposed staffing resources (para. 33).

Special political missions frequently reviewed their staffing needs to ensure that the staffing table supported effective mandate delivery. For instance, during budget preparation, all missions were requested to review their staffing structure and to undertake an analysis of existing vacancies. In addition, when considering the distribution and composition of staffing resources, missions were also requested to review opportunities provided by upcoming retirements in order to identify opportunities to build workforce capabilities for emerging functions and future skills, propose more junior-level positions or seek the nationalization of positions.

The United Nations Assistance Mission in Somalia has conducted its staffing assessment and is dedicated to significantly decreasing the vacancy rate, notwithstanding the challenges in attracting a good pool of suitably qualified candidates, which was aggravated by the generally slow pace in conducting assessments and completing recruitment exercises during the pandemic.

The United Nations Support Mission in Libya (UNSMIL) follows a strategic workforce planning process for identifying the staffing needs of the Mission and ensuring suitable access and availability of staffing resources with the appropriate set of skills required to meet organizational goals and objectives. Since the resumption of Secretariat-wide recruitment in May 2021, the Mission has finalized more than 30 recruitment processes. This has improved the Mission's capacity to deliver its mandate. The Mission is actively recruiting to fill its vacant positions, as well as the new positions approved for new mandated activities (see [A/76/6 \(Sect.3\)/Add.8](#)).

The United Nations Verification Mission in Colombia conducted a staffing review exercise, and the findings informed the proposed staffing changes for the proposed budget for 2023. Following the lifting of the suspension on recruitment in May 2021, the Mission has undertaken an intense recruitment exercise for vacant positions, as well as for new positions approved for the expanded mandate (see [A/76/6](#)

While noting that proposed vacancy rates are adjusted to reflect mission-specific circumstances, the Advisory Committee is of the view that a 50 per cent vacancy rate should consistently be applied to positions proposed for reassignment (para. 34).

The Advisory Committee notes that UNITAMS has been added as a new client mission of the Regional Service Centre in Entebbe and trusts that the review of the mission support concept will include the support to be provided by the Regional Service Centre to UNITAMS and will be reflected in future budget proposals (para. 48).

The Advisory Committee expects that greater efforts will be made to refine the formulation of planning assumptions to ensure more consistency in the reflection of the operational environment, including through the integration of lessons learned, and greater analysis and assessment of applicable factors (para. 49).

(Sect.3)/Add.7). The Mission prioritized the positions according to their criticality for the implementation of the mandate and there are 50 recruitment processes being conducted as of the time of writing.

The United Nations Mission to Support the Hudaydah Agreement is making all efforts to expedite recruitments to fill the vacant positions despite the fact that the onboarding of international staff may also depend on the timely processing of entry visas and travel permits.

The United Nations Integrated Office in Haiti continuously reviews its staffing requirements for mandate implementation and has filled some long-vacant positions.

The United Nations Integrated Transition Assistance Mission in the Sudan (UNITAMS) conducted a structural review to improve the realignment of its support structure, the goal of which was to address the structural gaps and capacities in the architecture and align it to effectively support the Mission's mandate implementation. The outcome of that review is reflected in the current proposed budget. The Mission is actively recruiting to fill its vacant positions, including those approved for new activities (see [A/76/6 \(Sect.3\)/Add.7](#)).

The Secretariat has implemented the recommendation. Starting from the proposed budget for 2023, a vacancy rate of 50 per cent will be consistently applied to all positions proposed for reassignment that fall under the Professional and higher, Field Service and National Professional Officer categories, and a rate of 35 per cent for those proposed for reassignment that fall under the General Service and Local level categories.

The proposed staffing resources for UNITAMS have factored in the location-specific requirements for the Mission, and do not duplicate the non-location-dependent support that is provided by the Regional Service Centre, in accordance with the service-level agreement.

Planning assumptions for the special political missions have been prepared through a robust process, with due consideration for the local political, security and operational environment in which the missions' mandates are implemented.

The missions have mainstreamed lessons learned and best practices related to the adjustments to and adaptation of their programmes resulting from the changing operational environments, which were reflected under the "Lessons learned and planned change" sections of their programme plans.

Brief description of the recommendation
Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions (A/76/7/Add.19)

The Advisory Committee notes that, in the case of the United Nations Verification Mission in Colombia, Security Council resolution 2574 (2021) expanded the mandate of the mission, while for UNITAMS, in its resolution 2579 (2021), the Council decided that the Mission should prioritize support for certain areas in the delivery of its mandate. Going forward, the Committee is of the view that the planning assumptions and the resource requirements should be commensurate with the nature of the mandates of the missions. The Committee trusts that additional information on the planning assumptions will be provided in the next budget submission (para. 6).

Advisory Committee on Administrative and Budgetary Questions (A/76/7/Add.38)

While the Advisory Committee acknowledges the importance of the proposed positions under the Human Rights, Rule of Law and Transitional Justice Service (1 P-5 Senior Women's Protection Adviser and 1 P-4 Child Protection Officer) and recommends their approval, it considers that there could be an overlap with the functions of already existing capacities at the country level. The Committee, therefore, recommends that the General Assembly request the Secretary-General to undertake a comprehensive analysis of all posts within the mission area, with roles and functions related to human rights, including to gender violence and child protection, with due consideration to the nationalization of existing positions, and to provide an update in the next budget submission (para. 26).

The Verification Mission's planning assumptions and resource proposals in its proposed budget for 2023 are commensurate with the scope of work, with due consideration for the expected progress and achievements of the sentences' implementation.

The proposed programme budget for UNITAMS reflects the prioritization by the Security Council in its resolution 2579 (2021), and focuses on the six areas identified by the Council in terms of both operational activity and mission support requirements.

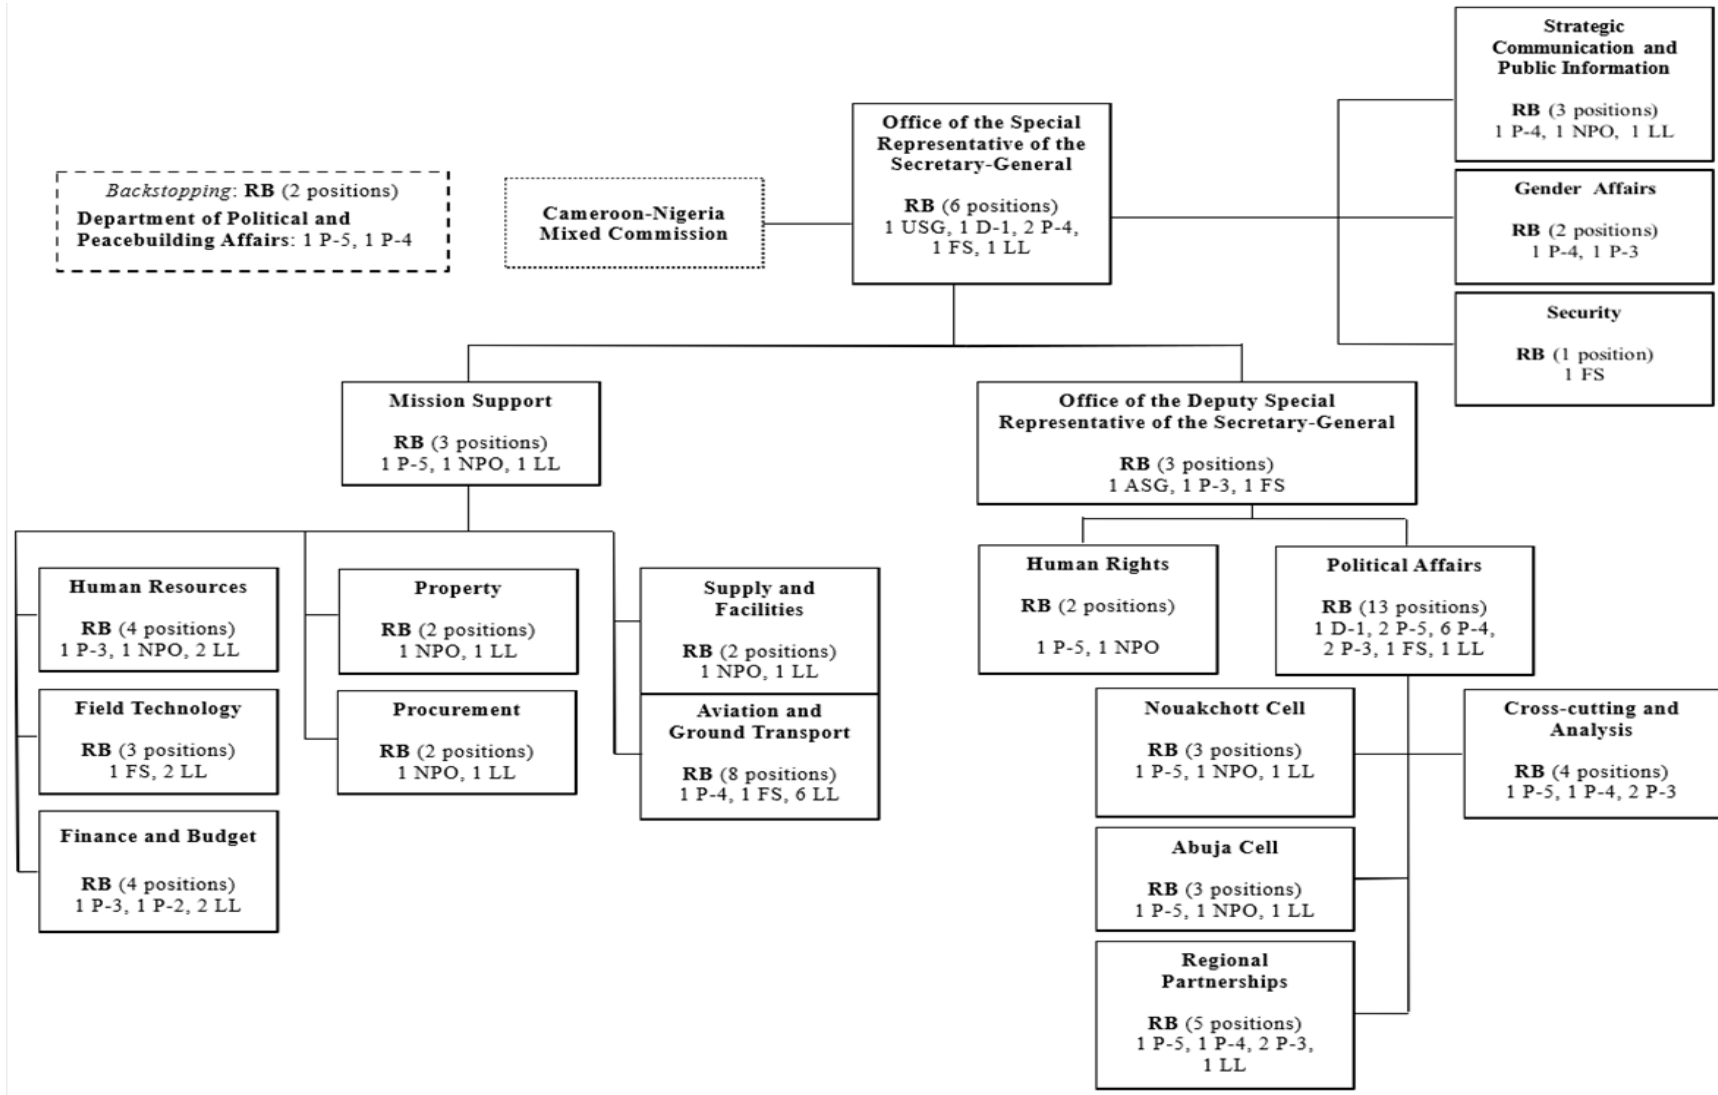

The Secretariat has undertaken a comprehensive analysis of all positions within the UNSMIL mission area with regard to the roles and functions related to human rights, including those pertaining to gender violence and child protection, and with due consideration for the possible nationalization of existing positions. This comprehensive review was conducted in the context of the preparation of the Mission's financial and staffing requirements as part of the proposed budget for 2023.

The review found that the positions as proposed in the proposed budget for 2023 correspond to the Mission's mandate. These positions have distinct functions and roles to enable UNSMIL to meet its mandate from the Security Council. There are currently no further nationalizations of positions proposed, as such nationalization is not currently deemed advisable in order to ensure the delivery of the Mission's mandate in the most effective, efficient and impartial manner possible.

** The part consisting of the proposed programme plan for 2023 is submitted for the consideration of the General Assembly in accordance with the established budgetary procedures and practices reaffirmed in paragraph 13 of resolution [72/266 A](#).

*** In keeping with paragraph 11 of resolution [72/266 A](#), the part consisting of the post and non-post resource requirements is submitted through the Advisory Committee on Administrative and Budgetary Questions for the consideration of the General Assembly.

I. Overview of the Mission

(\$133,609,900)

Foreword

Following the takeover of the country by the Taliban and the disintegration of the Government on 15 August 2021, the Taliban announced on 7 September a predominantly Pashtun and all-male “caretaker cabinet” and other government appointments. Donor funding stopped owing to sanctions-related restrictions. Since the takeover, Afghanistan has faced multiple crises, including a worsening humanitarian emergency, a massive economic contraction and the crippling of the banking and financial systems. Restrictions on freedoms and respect for fundamental human rights, especially for women and girls, continue.

Security dynamics changed significantly following the Taliban declaration on 6 September 2021 of the end of its military offensive against government forces. There has been a significant decline in the overall number of conflict-related security incidents and civilian casualties. However, the security situation remains uncertain owing to increased activities by the Islamic State in Iraq and Levant-Khorasan, intra-Taliban tensions, the emergence of new anti-Taliban resistance forces and enduring threats, including other forms of terrorism and crime.

In 2023, the United Nations Assistance Mission in Afghanistan will continue to play an important role in promoting peace and stability in Afghanistan. The Mission will use its good offices to engage and facilitate dialogue between all relevant Afghan political actors and stakeholders, including the de facto authorities, the region and the wider international community, to promote inclusive, representative, participatory and responsive governance and rule of law; the provision of essential humanitarian assistance and basic human needs; the protection and promotion of human rights; enhanced regional cooperation for political stability and security; and the accountable and transparent delivery of essential services and effectiveness in the use of aid.

(Signed) Deborah Lyons
Special Representative of the Secretary-General for Afghanistan and
Head of the United Nations Assistance Mission in Afghanistan

A. Proposed programme plan for 2023 and programme performance for 2021

Overall orientation

Mandates and background

1. The mandate of the United Nations Assistance Mission in Afghanistan (UNAMA) is defined in Security Council resolutions [1401 \(2002\)](#) and [1662 \(2006\)](#), and renewed by its resolutions [1746 \(2007\)](#), [1806 \(2008\)](#), [1868 \(2009\)](#), [1917 \(2010\)](#), [1974 \(2011\)](#), [2041 \(2012\)](#), [2096 \(2013\)](#), [2145 \(2014\)](#), [2210 \(2015\)](#), [2274 \(2016\)](#), [2344 \(2017\)](#), [2405 \(2018\)](#), [2460 \(2019\)](#), [2489 \(2019\)](#), and [2543 \(2020\)](#). On 17 March 2022, the mandate was adapted and extended until 17 March 2023 by the Council in its resolution [2626 \(2022\)](#).
2. As mandated by the Security Council, UNAMA will continue to play an important role in promoting peace and stability in Afghanistan. To that end, the Mission will coordinate and facilitate strengthened cooperation and coherence in the delivery of humanitarian assistance and the coordination of financial resources for humanitarian activities that support basic human needs and support development, consistent with a United Nations system-wide strategic planning framework; coordinate efforts with donors and other stakeholders to reduce risk and increase accountability, transparency and effectiveness in the use of aid; support efforts, including the provision of essential services, to create the conditions for self-reliance and stability among the Afghan population; provide outreach and good offices to promote dialogue between Afghan stakeholders, the region and the international community to promote inclusive, representative, participatory and responsive governance, including for women and girls, and provide advice on inclusive national and local consultative mechanisms, confidence-building measures and conflict management and reconciliation; promote responsible governance and the rule of law; engage with all stakeholders on the promotion and protection of human rights; support regional cooperation; and support, within the Mission's mandate, existing mechanisms to improve the overall security situation in Afghanistan.

Programme of work

Objective

3. The objective, to which the Mission contributes, is to create the conditions for peace and stability, with foundations established for an inclusive and representative government and functioning and accountable institutions, as well as a coherent and sustainable path towards the economic and social conditions for self-reliance.

Strategy

4. To contribute to the objective, the Mission will:
 - (a) Coordinate international donors and organizations, as well as development and humanitarian partners, in addressing humanitarian and basic human needs of vulnerable Afghans. It will support the mobilization of resources to enable humanitarian activities, the delivery of essential services, and the preservation of community systems for the restoration of livelihoods and the private sector and for economic recovery. UNAMA will engage with the de facto authorities and other stakeholders to facilitate United Nations support for the emergency and recovery response to the coronavirus disease (COVID-19) pandemic and, with the World Bank, international financial institutions and other international and national partners on the socioeconomic recovery from the pandemic and economic crisis;

- (b) Promote inclusive and accountable governance in Afghanistan, in coordination with the international community and in support of the needs and priorities of the Afghan people. It will also facilitate cooperation between the de facto authorities, civil society, the media, communities and other stakeholders on governance and policy issues. It will continue to support the participation of women and minorities in the governance, private sector, civil society, media and socioeconomic spheres. In addition, the United Nations and international partners will monitor and report on developments related to the rule of law in alignment with the United Nations system-wide strategic planning framework (formerly the United Nations Transitional Engagement Framework for Afghanistan), and perform analysis relating to the political economy, including a better understanding of the illicit economy. The Mission will provide technical support to United Nations agencies, funds and programmes, humanitarian partners, civil society, the media, communities and, as authorized, to counterpart institutions of the de facto administration in compliance with the sanctions in line with relevant Security Council resolutions covering clauses pertaining to anti-money laundering and counter-terrorism financing;
 - (c) Advise stakeholders and promote respect for human rights, especially pertaining to the protection of civilians and their right to life and physical integrity, as well as their civil, political, economic, social and cultural rights. It will also continue its work on children affected by armed conflict; women's and girls' rights; the treatment of minorities and those deprived of their liberty, including through the prevention of torture and ill-treatment; and the protection of human rights defenders and civic space. In addition, the Mission will integrate gender mainstreaming as a cross-cutting issue throughout mandate implementation. The Mission will support and promote gender equality, women's and girls' empowerment and the participation, engagement and leadership of women in public life and at all levels and stages of decision-making. The Mission will also partner with the United Nations country team to promote the protection and fulfilment of the rights of women and girls and the implementation of Security Council resolution [1325 \(2000\)](#) on women and peace and security;
 - (d) Support peace and stability in Afghanistan through consultations and by utilizing its convening power for dialogues with high-level political decision makers, leading societal figures and civil society groupings, including women, both at the national and provincial levels. It will use existing mechanisms to advance regional cooperation on economic development and security that can, in turn, help to foster a regional environment conducive to peace. In addition, it will propose and support regional approaches to issues such as the return and reintegration of refugees and internally displaced persons, combating illicit drugs and trafficking and reducing the illegal economy and its impact;
 - (e) Intensify its work on the humanitarian-development-peace nexus, engaging with the de facto authorities, civil society and the media to facilitate the transition of society from conflict to peace and setting the foundations for the localization of the Sustainable Development Goals and the 2030 Agenda for Sustainable Development. The Deputy Special Representative of the Secretary-General/Resident Coordinator/Humanitarian Coordinator will ensure a coherent approach by the United Nations to humanitarian and basic needs programming and promote its alignment with the needs and priorities of the Afghan people. The Mission will improve mechanisms for the implementation, monitoring and reporting of humanitarian and basic needs assistance provided in Afghanistan through the strategic planning framework, in collaboration with the de facto authorities, civil society, humanitarian partners, the media and international partners. UNAMA will also collaborate with all relevant stakeholders in designing and supporting a new aid architecture for Afghanistan, as well as enhanced risk monitoring and mitigation modalities, while upgrading due diligence approaches in compliance applicable Security Council resolutions.
5. Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the Mission has mainstreamed lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. This includes a

significant increase in the use of virtual workspaces for meetings and training and reverse outreach by field offices, inviting interlocutors from different provinces or districts to attend events at UNAMA compounds or other selected venues. However, the use of technology with external interlocutors is challenging, given the instability of power supplies and Internet connections across the country and the disproportionate reliance on this approach on the Mission's outreach to marginalized groups and those living in remote areas. Reverse outreach also makes it difficult for UNAMA to maintain comprehensive and reliable situational awareness, and relationships that depend on trust.

6. The above-mentioned work is expected to result in:
 - (a) Improved representativeness of governing entities, in particular through inclusive consultative mechanisms;
 - (b) Progressively increased compliance by all parties with international humanitarian law and human rights obligations, with accountability for human rights violations and abuses;
 - (c) Initiation of a structured policy dialogue with the de facto authorities, other national stakeholders and the international community to improve the situation of Afghans throughout the country and build confidence between the international community and the de facto authorities;
 - (d) Ongoing accurate reporting to the international community on the evolving situation in Afghanistan;
 - (e) Sustained local, regional and international support to meet humanitarian and basic human needs and to create an environment conducive to inclusive, transparent and accountable governance in Afghanistan.

External factors for 2023

7. With regard to the external factors, the overall plan for 2022 is based on the following planning assumptions:
 - (a) The situation in Afghanistan will remain precarious, with continued political, security, legal, socioeconomic and humanitarian uncertainties;
 - (b) Lack of international and, to an extent, domestic legitimacy of the de facto authorities, the dissonance between their ideology and international norms and standards, and the lack of national resources and capacity to govern will present a significant challenge in engaging the diverse interests of domestic, regional and international stakeholders on Afghanistan's future;
 - (c) The security situation will remain uncertain, with the potential for increasing activities and attacks by Islamic State in Iraq and the Levant-Khorasan against the de facto authorities, as well as the possibility of intra-Taliban tensions and the emergence of new anti-Taliban resistance forces, with an impact on the Mission and development and humanitarian actors in terms of access;
 - (d) Enduring threats, such as terrorism, organized crime and illicit trafficking, including in narcotics, and resource competition continue, with threats emerging from issues such as land rights, minority rights, refugee outflow, unemployment and the impact of evolving regional dynamics;
 - (e) The economy and human development will remain adversely affected by the impact of the sanctions regime and the limitations of the de facto authorities to govern and stabilize the economy, with the resumption of development funding depending on the de facto authorities meeting international norms, especially as they relate to the protection of human rights, including for women and girls, justice, access to basic services, media freedom, and civic space and inclusive governance;

- (f) The United Nations is expected to take an increasing role in humanitarian assistance and recovery support, including focusing on meeting basic human needs by sustaining essential services and preserving community systems;
 - (g) The Mission's ability and requirements to operate (e.g., in terms of security, regular movement operations, including airport management arrangements, medical and logistical support in extremis and liquidity requirements) will continue to be affected by the uncertain security situation, as well as the lack of reliable airport facilities.
8. Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.
 9. The Mission integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, in its engagement with the de facto authorities and political stakeholders, UNAMA will promote gender mainstreaming into programmes and structures to strengthen the representation of women. The Mission will support the implementation of Security Council resolutions [1325 \(2000\)](#) and [2242 \(2015\)](#), in particular on gender equality, the empowerment of women and girls and their human rights. UNAMA will continue its advocacy on the full and meaningful participation of women in political processes at the local, national, regional and international levels.
 10. In line with the United Nations Disability Inclusion Strategy, the Mission will develop a strategy with a view to reinforcing an organizational culture that respects the human rights and supports the inclusion of persons with disabilities; further advancing disability inclusion in strategic planning and management, knowledge and information management and staff career development; and addressing the barriers to accessibility in the workplace and in the performance of functions.
 11. The Mission cooperates with other United Nations and international and regional entities, including the United Nations Regional Centre for Preventive Diplomacy for Central Asia, to provide good offices and expert advice on confidence-building measures in the region that contribute to stability in Afghanistan. It will also support constructive dialogue between the relevant Afghan stakeholders, regional actors and the international community that is focused on the well-being and rights of the Afghan people, including through increasing Afghanistan's trade with and connectivity to the rest of the region.
 12. With regard to inter-agency coordination and liaison, UNAMA engages with agencies, funds and programmes through a "One United Nations" approach to strengthen the humanitarian-development-nexus. Close collaboration between UNAMA and the United Nations country team will include areas related to governance, the rule of law, human rights and gender, focusing on policy issues and good offices. With the evolved context in Afghanistan, the Mission's work will also support the delivery of humanitarian response and meet basic human needs through the restoration of essential services, livelihoods and community systems. The Mission will lead the coordination of an overall risk management approach to mitigate aid diversion, guided by the United Nations system-wide strategic planning framework and in order to set the foundation for the localization of the achievement of the Sustainable Development Goals upon the eventual resumption of development cooperation.

Evaluation activities

13. The following evaluations completed in 2021 have guided the proposed programme plan for 2023:
 - (a) Self-evaluation on the implementation of alternate work arrangements;
 - (b) Office of Internal Oversight Services evaluation of women and peace and security in field-based missions (elections and political transitions).

14. The results and lessons of the evaluations have been taken into account for the 2023 proposed programme plan. For example, UNAMA has considered the different options for ongoing work modalities in the light of the COVID-19 and security situations in Afghanistan and the need to balance mandate implementation requirements with the health, well-being and safety of personnel. To this end, UNAMA has retained the enhanced medical services in the Mission. UNAMA will review its mission-specific strategy, in consultation with the United Nations country team, to promote women's political participation and representation, and the women and peace and security agenda more broadly, to adapt it to the current context.
15. The following evaluations are planned for 2023: audit of cybersecurity preparedness and of the integrated conduct and discipline functions in the Consolidated Kuwait Office.

Programme performance in 2021

Mission-initiated dialogue with de facto authorities

16. After decades of conflict, Afghans finally saw a glimmer of hope for peace in 2021, with the commencement of peace negotiations in September 2020, complemented by intensified engagements between the parties to the conflict and other stakeholders towards a negotiated settlement.
17. However, hopes for a comprehensive peace agreement faded with the withdrawal of residual international troops in Afghanistan starting in April and the Taliban's intensified military campaign, resulting in the rapid fall of the country's districts and provincial capitals starting in May and ending with the disintegration of the Government and the Taliban's control over the country as the de facto authorities on 15 August. Afghanistan faced multiple crises: a growing humanitarian emergency, a massive economic contraction and the crippling of its banking and financial systems. The de facto authorities formed an all-male "caretaker cabinet" and announced appointments across security and government structures at national and subnational levels. The de facto authorities' new governing structures did not reflect the country's ethnic, political and geographic diversity. The Taliban also sought to manage its internal coherence.
18. The security situation in Afghanistan remained highly fluid after the Taliban takeover. While the overall level of conflict decreased significantly, along with the number of civilian casualties, UNAMA received credible allegations of targeted assassinations and other reprisals against former members of the Government and security forces, notwithstanding assurances by the de facto authorities of general amnesties. Afghanistan's social and economic system nearly shut down, with the collapse of social services, owing in large part to the suspension of non-humanitarian aid flows and comprehensive restrictions by the de facto authorities on the rights and freedoms of women and girls. Financial sanctions further escalated the economic crisis, sending many more millions into poverty and hunger, generating a new wave of migration from Afghanistan and giving impetus to the illicit economy. Along with heightened levels of violence and displacement, the combination of natural disasters, severe drought, flooding and the third wave of the COVID-19 pandemic put nearly half of the population of Afghanistan in dire need of humanitarian assistance.
19. Within the framework of its existing mandate, UNAMA initiated dialogue with the de facto authorities to advocate the rights and well-being of the Afghan people while pursuing concrete steps for constructive relations with Afghanistan's neighbours and the international community to avoid a loss of most of the progress made during the previous 20 years. This included the participation of women in public life and their enjoyment of economic, social and cultural rights, including girls' continued access to education, the formation of an inclusive administration reflective of the diversity of the Afghan people, improved access to humanitarian assistance and basic services, and resolute action to counter terrorism.
20. To that end, UNAMA maintained its engagement with political and civil society actors, including by facilitating dialogue with the de facto authorities to encourage and build consensus on subnational governance, inclusion, civic space and fundamental rights. The Mission also continued to pursue a unified stance and messaging by international and regional actors with the de facto authorities on

issues of critical importance to Afghans. This included intense advocacy for an accommodation of rules and conditions imposed pursuant to the sanctions regime to enable life-saving operations for humanitarian assistance and basic human needs, as well as appeals for reinforced donor support. The Mission focused on building confidence between all actors in service of the overarching goal of improving the lives of Afghans through the promotion of rights-based stability, the empowerment of women and girls, and the full protection of their rights.

21. While sustaining the delivery of critical programmes and activities during the COVID-19 pandemic and the evolving political situation, alternate work arrangements remained in place. Following the Taliban takeover in August, the United Nations temporarily reduced its presence by means of telecommuting, relocations and the temporary evacuation of most international personnel to Almaty, Kazakhstan, to continue to perform their functions remotely. Some national staff were also approved for evacuation on the basis of the personal security risk management assessment. UNAMA and United Nations agencies, funds and programmes gradually increased the footprint of international personnel present at the duty station and of national staff reporting to work, informed by regular reviews based on the prevailing security situation and potential changes in the COVID-19 caseload. By the end of 2021, the alternate work arrangements had ceased, with all national and international staff telecommuting outside Afghanistan expected to return to work.
22. Progress towards the objective is presented in the performance measure below (see table 1).

Table 1
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
Increased confidence between the parties to the conflict (i.e., the Government and the Taliban), leading to formal negotiations on the political future of Afghanistan	Start of the Afghanistan peace negotiations between the parties, following the agreement and joint declaration of February 2020, including implementation of confidence-building measures	Following the breakdown of the peace negotiations and takeover by the Taliban as new de facto authorities, UNAMA-initiated dialogue in pursuit of a pathway of concrete steps to enable constructive relations with Afghanistan's neighbours and the international community to support the people of Afghanistan in promoting peace, stability and self-reliance

Impact of the pandemic

23. The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular in the following areas: (a) conduct of most mandate implementation activities at both mission headquarters and field office levels, with the Mission continuing to conduct most of its field office activities through reverse outreach, inviting interlocutors from different provinces or districts to attend events at UNAMA compounds or other selected venues; (b) conduct of internal mission engagements using virtual workspaces for meetings and training; (c) the postponement of some in-person seminars, workshops, training events and monitoring and technical advisory missions and events that could not be provided using other means or delivered online; and (d) sustained alternate work arrangements in the delivery of critical programmes and activities. Much of the in-person human rights monitoring, verification and advocacy engagement had to be telephone-based. Face-to-face human rights capacity-building work with government and non-government partners, as well as the Afghanistan Independent Human Rights Commission, including 24 planned training sessions, on the protection of civilians, women's rights and the elimination of violence against women, children and armed conflict, human rights of conflicted-

related detainees, and peace, civil society and human rights, did not take place, resulting in slower improvement in mitigation measures. The 2021 annual strategic consultation with the United Nations High Commissioner for Human Rights took place virtually.

Planned results for 2023

Result 1: rights-based stability in Afghanistan

Programme performance in 2021 and target for 2023

24. The Mission did not meet the 2021 planned target of continued progress towards a comprehensive peace agreement and cessation of hostilities, creating conditions for further economic and human development, given that the Taliban takeover in August 2021 ended prospects for a peace process.
25. The Mission's work and its decision to "stay and deliver" after the August 2021 Taliban takeover allowed the provision of humanitarian assistance and dialogue on the security of United Nations staff and premises, political inclusion, governance, human rights, rule of law and other issues within the parameters set by the Security Council through its resolutions [2593 \(2021\)](#) and [2596 \(2021\)](#).
26. In 2023, the Mission will continue to engage with the de facto authorities on several overarching priorities, including more inclusive governance; the provision of assistance in a manner that addresses basic human needs; engaging all stakeholders in the promotion and protection of human rights; helping to shape a structured policy dialogue between Afghan stakeholders, including the de facto authorities and the international community, which builds confidence between all actors in service of the overarching goal of improving the lives of Afghans through promoting rights-based stability; and women's and girls' empowerment and the full protection of their rights.
27. The above-mentioned work is expected to result in improved representation of governing entities, in particular through consultative mechanisms, at the national and subnational levels, without any discrimination based on gender, religion or ethnicity; increased compliance by relevant Afghan political actors and stakeholders, including relevant authorities, with international human rights and humanitarian law obligations, with accountability for human rights violations and abuses; initiation of a structured policy dialogue with the de facto authorities, other national stakeholders and the international community to improve the situation of Afghans throughout the country and build confidence between the international community and the de facto authorities; ongoing accurate reporting to the international community on the evolving situation in Afghanistan; sustained local, regional and international support to meet humanitarian and basic human needs; and a more conducive environment for inclusive, transparent and accountable governance in Afghanistan.
28. Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 2).

Table 2
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	<p>Ad hoc engagement between de facto authorities and the international community</p> <p>United Nations injection of cash for humanitarian assistance, in coordination with the Central Bank of Afghanistan and other partners</p> <p>Establishment of a special trust fund for Afghanistan to manage donor funds for joint United Nations programmes to meet basic human needs</p>	<p>Efforts towards inclusion of non-Taliban figures and those from different ethnic groups and geographical regions as ministers and deputy ministers and other key positions</p> <p>Holding of an assembly (<i>jirga</i>) with a representative group of Afghan stakeholders</p> <p>More regular engagements between de facto authorities and the international community</p> <p>Regular United Nations injection of cash for humanitarian assistance, in coordination with the Central Bank of Afghanistan and other partners</p> <p>Launch of a system-wide transitional engagement framework to meet basic human needs</p>	<p>Efforts towards inclusion of non-Taliban figures and those from different ethnic groups and geographical regions as ministers and deputy ministers and other key positions</p> <p>Establishment of more regular mechanism(s) at national and subnational levels advancing inclusive, participatory and responsive governance</p> <p>Initiation of a structured policy dialogue for confidence-building between Afghan stakeholders and the international community</p> <p>Improved functionality of the Central Bank of Afghanistan</p> <p>Adoption of a revised United Nations strategic planning framework (formerly the United Nations Transitional Engagement Framework for Afghanistan)</p>

Result 2: securing rights for all

Programme performance in 2021 and target for 2023

29. The Mission's work contributed to the protection of civilians during the conflict. The abrupt end to armed hostilities as at 15 August 2021 and the Taliban takeover of the country contributed to the significant reduction in civilian harm, greater than the planned target of a 16 per cent year-over-year

reduction in civilian casualties for 2021. Pre-August, the Mission’s monitoring and reporting work on the impact of the conflict on civilians and advocacy with parties to the conflict on mitigation measures had contributed to the reduction in civilian harm. Through technical advice informed by its monitoring work, UNAMA also supported State efforts to secure the rights for all Afghans with regard to the maintenance of civic space; protection of women, children, persons deprived of their liberty, human rights defenders, media workers and journalists, and other vulnerable groups, such as persons with disabilities and minorities; and equitable access to services, including services afforded to victims of the conflict. Post-August, the Mission’s human rights monitoring and reporting work focused on the same areas but specifically on engagement with the de facto authorities, to establish a rapport and hold discussions on relevant minimum human rights standards, given their action and behaviour as they established control of the country.

30. In 2023, the Mission’s human rights monitoring, reporting and advocacy work will continue but from a changed baseline, given the change in operational context as at 15 August 2021 and its impact on the human rights situation. It will include engagement with all stakeholders at the national and subnational levels, including de facto authorities, civil society, international non-governmental organizations and the United Nations country team, in the protection and promotion of the human rights of all Afghans. This work is expected to contribute to the objective, as demonstrated by progressive compliance by de facto authorities with international human rights and humanitarian law obligations, including implementation of recommendations issued by the United Nations human rights mechanisms relevant to Afghanistan and its changed context. This is measured by a reduction in killings of former government and Afghanistan national security and defence forces personnel; a reduction in the recruitment and use of children, and child casualties from explosive remnants of war and unexploded ordnance, by strengthening related child protection measures; progressive unfettered access to prisons and lock-ups, and compliance with international minimum standards for the treatment of prisoners and detainees; a reduction in harassment, threats and intimidation of human rights defenders and media workers; an halt to the regression of women’s rights, and increased access by women and girls to justice for violations of their rights, including sexual and gender-based violence; the progressive realization of Afghans’ economic, social and cultural rights, focusing on women’s and girls’ access to education and health-care services, given regressions post-15 August 2021; and progress in Afghans’ access to justice for criminal and civil matters.
31. Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure I).

Figure I
Performance measure: year-over-year reduction in child casualties from explosive remnants of war and unexploded ordnance

(Percentage)

Result 3: advancing economic and social self-reliance**Proposed programme plan for 2023**

32. Economic sustainability is a major challenge for Afghanistan, owing in large part to its dependence on external aid and the lack of well-established domestic production. The country is, therefore, particularly vulnerable to economic shocks following the reduction in donor funding owing to the current sanctions on elements within the de facto authorities, as well as the overall global economic impact of the COVID-19 pandemic. The Mission proactively engaged with financial and banking sector stakeholders, including private sector actors in Afghanistan, to address the urgent needs of the Afghan economy, such as the dysfunction of the payment system and the financial sector. In compliance with the sanctions regime and general licences, the Mission also provided a socioeconomic lifeline through the shipment of humanitarian cash into Afghanistan. As a short- to medium-term solution, the Mission is also working with local, regional and international stakeholders to establish a humanitarian exchange facility to overcome key impediments arising from sanctions in conducting safe transactions. Working towards a more stable and sustainable solution, the United Nations is also working closely with private sector organizations on several joint programmes involving cash-for-work, livelihood generation, as well as business and social enterprise recovery and support initiatives, including assistance for women-led and women-focused projects. In parallel, UNAMA continues to support Afghanistan in mobilizing international civilian assistance and implementing development and accountability frameworks to facilitate continued donor support.

Lessons learned and planned change

33. The lesson for the Mission was the need to leverage its convening power and technical expertise in engaging the de facto authorities following the Taliban takeover in August 2021, and the coordination of the donor community's priorities and funding streams throughout the United Nations country team. This contributed to substantive and constructive consultations between the donors, regional actors and the United Nations country team. In applying the lesson, the Mission will continue to support the United Nations country team in its work with the de facto authorities and international partners for the institutionalization of verifiable reporting mechanisms for the accountability of the United Nations system-wide strategic planning framework (formerly the United Nations Transitional Engagement Framework for Afghanistan). This work is expected to contribute to the objective, as demonstrated by the implementation of a new aid architecture for Afghanistan involving existing and emergent funding streams; and joint oversight systems and mechanisms, including high-level ministerial-level meetings and senior officials' meetings, commissioned under the overall leadership of the Mission for implementation, coordination, risk monitoring, mitigation and reporting within the new aid architecture.
34. Expected progress towards the objective is presented in the performance measure below (see table 3).

Table 3
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Further development of 10 national priority programmes into detailed action plans and their costing to prepare for implementation	Development of the Afghanistan National Peace and Development Framework II with five additional priority programmes	Implementation of existing national priority programmes following completion of prioritization, sequencing and beginning of preparation for new programmes	Implementation and completion of a monitoring system and results framework for the United Nations Transitional Engagement Framework for Afghanistan through the new aid architecture for Afghanistan	Implementation of the United Nations system-wide strategic planning framework and the new aid architecture for Afghanistan, including multilateral financing for United Nations agencies

Deliverables

35. Table 4 below lists all deliverables of the Mission.

Table 4
Deliverables for the period 2021–2023, by category and subcategory

Deliverables	2020 actual	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	4	4	4	4
1. Reports of the Secretary-General to the Security Council	4	4	4	4
Substantive services for meetings (number of three-hour meetings)	4	4	4	4
2. Meetings of the Security Council	4	4	4	4
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	61	220	48	48
3. Discussion/awareness-raising/sensitization sessions with human rights stakeholders, including local authorities, civil society organizations and human rights defenders, on human rights standards, where applicable	61	220	48	48
Technical materials (number of materials)	7	7	1	1
4. Thematic or special human rights-related reports	7	7	1	1
C. Substantive deliverables				
Good offices: good offices with the de facto authorities, political parties, civil society and countries in the region in support of inclusive and representative governance processes, peace and stability at the national, subnational and local levels and humanitarian and basic services access; good offices through support for dialogue and confidence-building measures between the de facto authorities and other stakeholders to encourage and build consensus on subnational governance, inclusion, civic space and fundamental rights and freedoms; good offices for enhanced regional cooperation on security-political matters, economic development, disaster management and people-to-people contacts; and good offices for a coordinated international response to Afghanistan.				

<i>Deliverables</i>	<i>2020 actual</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
---------------------	------------------------	------------------------	-------------------------	-------------------------

D. Communication deliverables

Outreach programmes, special events and information materials: outreach activities with Afghans, opinion leaders, the media, civil society and other agents of change to support the implementation of the Mission's mandate.

External and media relations: press conferences, statements, advisories, backgrounders, interviews and other media engagements related to the Mission's objectives.

Digital platforms and multimedia content: dissemination of the Mission's mandated work through the Mission's website and social media accounts.

B. Proposed post and non-post resource requirements for 2023

1. Total resource requirements

Resource requirements (regular budget)

Table 5

Financial resources

(Thousands of United States dollars)

<i>Category of expenditure</i>	<i>2021</i>	<i>2022</i>	<i>2022</i>	<i>2023</i>		<i>Variance</i>

Operational costs	37 580.3	–	44 027.4	39 083.1	–	(4 944.3)
Total (net of staff assessment)	136 669.9	44.9	133 609.9	133 609.9	–	–

36. For 2022, the General Assembly approved, by its resolution [76/246](#), a commitment authority for 10 months and requested that a revised proposed budget for 2022 be submitted following the extension of the mandate of the Mission early in 2022. Given that the Assembly has yet to consider the revised proposed budget for 2022 and to approve an appropriation for UNAMA for 2022, no provision exists for the 2022 appropriation in the present report, except for an amount of \$44,900, being the UNAMA portion of the additional resources appropriated for all regular budget entities in the context of the decisions and recommendations contained in the report of the International Civil Service Commission, as approved by the Assembly in resolution [76/246](#) (sect. XIV).
37. In accordance with standard practice with respect to the presentation of budget reports, the baseline for a proposed budget for a forthcoming period to be compared against would normally be the appropriation for the current budget period. However, as explained above, the appropriation for 2022 for UNAMA was not yet known at the time of the finalization of the present report, except for the amount of \$44,900 also explained above. In order to enable a more direct comparison of the resource changes in 2023, compared with 2022, the present report also includes the amount of the proposed resources as contained in the 2022 revised proposed budget ([A/76/6 \(Sect.3\)/Add.9](#)) as an additional reference, with the relevant variance analyses prepared on that basis, while bearing in mind that the revised proposal for 2022 is still subject to the review and approval by the General Assembly.

The following abbreviations are used in the tables: ASG, Assistant Secretary-General; FS, Field Service; NPO, National Professional Officer; USG; Under-Secretary-General.

Table 6

Change	-	-	-	-	-	-	-	-	-	(1)	-	(1)	2	(28)	-	(27)

^a See A/76/6 (Sect.3)/Add.9.

38. The proposed resource requirements for 2023 for UNAMA amount to \$133,609,900 (net of staff assessment) and would provide for the salaries and common staff costs (\$94,502,200) for 1,173 positions (1 Under-Secretary-General, 2 Assistant Secretary-General, 1 D-2, 7 D-1, 28 P-5, 55 P-4, 58 P-3, 5 P-2, 137 Field Service, 1 General Service, 127 National Professional Officer, 646 Local level and 105 United Nations Volunteer) and 1 military observer (\$24,600), as well as operational costs in the amount of \$39,083,100, as detailed in table 22. The proposed staffing for 2023 includes 45 positions to be cost-shared with the resident coordinator system and agencies, funds, and programmes, comprising the Deputy Special Representative of the Secretary-General for the development pillar (Assistant Secretary-General), cost-shared at 50 per cent to UNAMA and 50 per cent to the resident coordinator system, and 44 positions of Field Security Guard (Local level), cost-shared with agency, funds and programmes, with UNAMA covering 33 per cent.
39. The proposed resource requirements for 2023 are at a maintenance level, compared with the 2022 revised proposed budget (A/76/6 (Sect.3)/Add.9). However, there are changes under the different budget classes, with the combined effect being budget-neutral, which include the following:
- (a) An increase of \$4,944,300 for civilian personnel costs, reflecting the net effect of:
 - (i) An increase of \$3,299,300 for international staff due to the application of a lower vacancy rate of 9 per cent compared with 14 per cent applied to the 2022 revised proposed budget;
 - (ii) An increase of \$868,000 for national staff due to the application of a lower vacancy rate of 4 per cent compared with 9 per cent applied to the 2022 revised proposed budget for both National Professional Officer and Local level staff and the proposed establishment of two National Professional Officer positions, which are offset by the proposed abolishment of 28 Local level positions;
 - (iii) An increase of \$777,000 for United Nations Volunteers due to the application of a lower vacancy rate of 10 per cent compared with 16 per cent applied to the 2022 revised proposed budget and the provision for 30 national United Nations Volunteers for 12 months in 2023, compared with 2 months proposed in 2022;
 - (b) A decrease of \$4,944,300 for operational costs, reflecting the net effect of:
 - (i) A decrease of \$2,302,800 for facilities and infrastructure due mainly to the reduced requirements for security services, rental of premises and maintenance services, as a result of the closure and non-renewal of the lease of the Alpha compound in Kabul in July 2023. The decrease is offset in part by increased costs for petrol, oil and lubricants, given that the cost per litre of fuel was calculated on a six-month average during the period from December 2021 to May 2022, which increased significantly compared with the average price per litre of fuel during the period from September 2021 to February 2022 that was applied in the 2022 revised proposed budget;

- (ii) A decrease of \$1,502,200 for air operations due to the reduced cost of air war risk insurance, which is offset in part by increased costs for fixed and rotary-wing aircraft due to planned increases in flight hours in 2023;
- (iii) A decrease of \$736,000 for other supplies, services, and equipment due to the reduced requirement of fees for the shipment of cash into the mission area and reduced requirements for other freight and related charges as a result of less reliance on travel within Afghanistan through the United Nations Humanitarian Air Service;
- (iv) A decrease of \$602,400 for medical due to the discontinuation of the intensive care unit and reduced requirements for the acquisition of medical equipment.

Vacancy rates

40. Table 7 outlines the proposed vacancy rates for 2023, which takes into account the most recent average and the projected deployment and vacancy rates, current incumbency and proposed changes in the composition of staff.

Table 7

Vacancy rates

(Percentage)

International	15	16	16	10
National	–	40	–	7

^a See [A/76/6 \(Sect.3\)/Add.9](#).

41. UNAMA intends to vacate the Alpha compound, which has accommodated senior leadership in the Mission and most substantive personnel based in Kabul since 4 October 2010. This proposal has been under consideration for several years, given the high costs to maintain the facility, with a total annual cost of \$3.4 million, including rent of \$2.4 million, which represents 90 per cent of the total amount for rental of premises. Vacating the compound did not occur in previous periods owing to concerns over the possible negative impact on the levels of engagement and collaboration between the mission leadership and city-based interlocutors. However, the development in 2021 led to the relocation of staff to the United Nations Operations Centre in Afghanistan compound for security reasons, where most of the team has resided and worked since. That arrangement established the benefits of being collocated and integrated into the main United Nations compound in Afghanistan, which hosts at least seven agencies, funds and programmes, as well as the remainder of UNAMA Kabul-based personnel and outweighs the concerns regarding the geographical separation that would be created as a result. The Mission intends to lease a smaller non-residential venue in the city to host meetings and is actively engaged in the identification of such a facility.

2. Staffing requirements

42. The staffing complement proposed for 2023 reflects a net decrease of 27 positions. The proposed staffing changes include the abolishment of 29 positions (1 Field Service and 28 Local level), the establishment of 2 positions (National Professional Officer) and the reassignment of 1 position (Local level), as detailed by organizational unit below.
43. Annex II to the present report provides the organizational charts and annex III provides details on the approved and proposed positions by location.

Special Representative of the Secretary-General for Afghanistan

44. The Mission is headed by the Special Representative of the Secretary-General for Afghanistan, who provides strategic leadership to the political, human rights and development/humanitarian coordination-related work of the United Nations in the country. The Special Representative also provides overall leadership of the Mission and is responsible for overseeing the work of the Front Office of the Special Representative and the political and development pillars and for ensuring their coherence in fulfilment of the Mission's strategic priorities. The Special Representative also serves as Head of Mission and is responsible for the executive management of the Mission's resources and administration.

Proposed organizational changes

47. The Deputy Special Representative of the Secretary-General (Political Affairs) advises the Special Representative of the Secretary-General on political issues and the dynamics affecting the implementation of the mandate of the Mission and manages the political pillar. The Deputy Special Representative supports the implementation of the UNAMA mandate through the provision of regular analyses of the political situation in the country and the region; liaison with the international community, diplomatic community and non-governmental organizations in Afghanistan on political issues; coordination of political priorities within the Mission and with United Nations Headquarters; and implementation of the UNAMA mandate through good offices and outreach, in particular in the areas of political stability and regional cooperation.

Front office of the Deputy Special Representative of the Secretary-General (Political Affairs)	+1	NPO	Political Affairs Officer	Establishment	
Total	1				

48. As reflected in table 12, for 2023 it is proposed that one position of Political Affairs Officer (National Professional Officer) be established in the front office of the Deputy Special Representative of the Secretary-General (Political Affairs) to facilitate and maintain strong working relationships with senior-level interlocutors of the de facto authorities, former government officials who have remained in Kabul, and civil society organizations, think tanks and relevant leaders of ethnic and other communities, and to develop new relationships with relevant actors and groups as the political situation evolves.

**Office of the Deputy Special Representative of the Secretary-General/Resident Coordinator/
Humanitarian Coordinator) (development pillar)**

^a One position is funded at 50 per cent and cost-shared with the Development Coordination Office.

49. The Deputy Special Representative of the Secretary-General/Resident Coordinator/Humanitarian Coordinator is responsible for maintaining links with the United Nations country team as part of the role of Resident Coordinator and Humanitarian Coordinator. The Security Council, in paragraph 5 (a), (b), (i) and (j) of its resolution [2626 \(2022\)](#), mandated the Deputy Special Representative to coordinate and facilitate the provision of humanitarian assistance and financial resources to support humanitarian activities; coordinate international donors and organizations in relation to basic human needs; coordinate the overall risk management approach of the United Nations in Afghanistan; and coordinate explosive ordnance threat mitigation measures in support of humanitarian and development initiatives.

Total	1				

50. As reflected in table 14, for 2023 it is proposed that one position of Coordination Officer (National Professional Officer) be established in the front office of the Deputy Special Representative of the Secretary-General/Resident Coordinator/Humanitarian Coordinator to undertake research and analysis on the delivery of assistance in Afghanistan, ascertaining the humanitarian and basic human needs of the people of Afghanistan and the work of the de facto authorities in relation to overall aid coordination; to develop close working relationships with Afghan civil society, the private sector and the media for effective advocacy, engagement and participation to better position and deliver aid in Afghanistan; and to advocate with the de facto authorities for rights, inclusion, equity, transparency and accountability in aid delivery.

Change	–	–	–	–	–	–	–	–	–	–	–	–	–	(16)	–	(16)

51. Mission Support is under the overall responsibility of the Chief of Mission Support, who coordinates and supervises the work of four main areas, namely, the Office of the Chief of Mission Support, Operations and Resource Management, Supply Chain Management and Service Delivery Management.
52. No changes are proposed to the number, level and functions of the positions under the Operations and Resource Management and the Supply Chain Management pillars.

Service Delivery Management

Table 16

	<i>Change</i>	<i>Level</i>			
Transport Unit	-16	LL	Driver	Abolishment	
Total	(16)				

53. As reflected in table 16, for 2023 it is proposed that 16 positions of Driver (Local level) be abolished in the Transport Unit as a result of the proposed closure of the Alpha compound in Kabul.

Field offices in regions and provinces

54. The field offices will continue to drive mandate implementation at the subnational level through the building of effective working relationships with the de facto authorities to facilitate an enabling environment for mandate and programme implementation, the strengthening of cooperation for and the coherence of United Nations activities; support for the provision of essential services to Afghans; support for dialogue between the de facto authorities and local stakeholders on issues of subnational governance, basic rights and inclusion; the provision of outreach and good offices, including the facilitation of dialogue between political stakeholders, focusing on promoting inclusive, representative, participatory and responsive governance and broad participation in public life; and the provision of advice on local consultative mechanisms, confidence-building measures, and conflict management and reconciliation. Field offices will also maintain situational awareness, reporting and analysis and engage with all stakeholders at the subnational level in the protection and promotion of human rights.
55. The Mission currently maintains six regional offices, located in Kabul, Kandahar, Herat, Balkh (Mazar-e Sharif), Nangarhar (Jalalabad) and Paktiya (Gardez), and five provincial offices, in Bamyán, Faryab (Maymana), Badakhshan (Faizabad), Baghlan (Pul-e Khumri) and Kunduz.
56. The Heads of Office have a direct reporting line to the Chief of Staff.

Regional offices

Table 18
Human resources: regional offices

<i>Office/service/section/unit</i>	<i>Positions</i>			
	<i>Change</i>	<i>Level</i>	<i>Functional title</i>	<i>Action</i>
Kabul	-1	LL	Administrative Assistant	Reassignment
	+1	LL	Political Affairs Assistant	Reassignment
Total	–			

57. As reflected in table 18, for 2023 it is proposed that one position of Administrative Assistant (Local level) in the Kabul Regional Office be reassigned as Political Affairs Assistant (Local level) to engage with the de facto authorities, civil society, and community members, religious scholars, women representatives and other stakeholders on a range of issues to promote political stability and consultative governance at the local level.

Consolidated Kuwait Office

Table 19

Staffing requirements: Consolidated Kuwait Office

	<i>Professional and higher categories</i>								<i>General Service and related categories</i>			<i>National staff</i>				
	<i>USG</i>	<i>ASG</i>	<i>D-2</i>	<i>D-1</i>	<i>P-5</i>	<i>P-4</i>	<i>P-3</i>	<i>P-2</i>	<i>Subtotal</i>	<i>Field/ Security Services</i>	<i>General Service</i>	<i>Total inter-national</i>	<i>National Professional Officer</i>	<i>Local level</i>	<i>United Nations Volunteer</i>	<i>Total</i>

Change	-	-	-	-	-	-	-	-	-	(1)	-	(1)	-	(2)	-	(3)

58. The Consolidated Kuwait Office comprises two components:

- (a) **UNAMA Support Office in Kuwait**, which includes mission staff located in Kuwait, undertakes support functions that are not related to the Kuwait Joint Support Office and comprises one position of Chief, Integrated Conduct and Discipline Unit (P-5), reporting directly to the Chief of Staff;
- (b) **Kuwait Joint Support Office**, which provides full services to UNAMA and the United Nations Assistance Mission for Iraq (UNAMI) and other missions. UNAMA contributes 36 positions (1 P-5, 1 P-4, 2 P-3, 1 P-2, 13 Field Service and 18 Local level) funded directly from the Mission's budget. In addition, both UNAMA and UNAMI contribute to covering the operating costs of the Office.

59. The UNAMA Support Office in Kuwait and the Kuwait Joint Support Office are co-located within the premises occupied by UNAMI in Kuwait City.

Kuwait Joint Support Office	-1	FS	Finance Assistant	Abolishment	
	-1	LL	Finance Assistant	Abolishment	
	-1	LL	Finance Assistant	Abolishment	
Total	(3)				

60. As reflected in table 21, for 2023 it is proposed that three positions in the Kabul Joint Support Office, comprising one Finance Assistant (Field Service) and two Finance Assistants (Local level), be abolished as part of an effort by the Secretariat to align the funding sources of the Office to better reflect the workload and the client base that the Office services. Such an exercise is intended to achieve a more balanced distribution of the workforce of that Office among the special political missions, with proposals being made to reduce six positions from UNAMA and UNAMI and to establish these positions in four other missions, namely, the Office of the Special Envoy of the Secretary-General for Yemen, the United Nations Investigate Team to Promote Accountability for Crimes Committed by Da'esh/Islamic State in Iraq and the Levant, the United Nations Verification Mission in Colombia and the United Nations Mission to Support the Hudaydah Agreement.

3. Financial resources

Total (net of staff assessment)	136 669.9	44.9	133 609.9	133 609.9	–	–

4. Analysis of resource requirements

Military and police personnel costs

(Thousands of United States dollars)

	Expenditure 2021	Appropriation 2022	Revised proposed requirement 2022	Total requirement 2023	Variance 2023 vs. 2022
Military observers	(3.9)	–	24.6	24.6	–

61. Resources amounting to \$24,600 are proposed to provide for the deployment of one military observer, which includes requirements for: (a) mission subsistence allowance based on the standard rate of \$63 per day for the first 30 days and \$42 per day after 30 days, given that accommodation is

provided (\$13,200); (b) travel costs for placement, rotation and repatriation to and/or from the military observer's country of residence (\$6,200); (c) clothing allowance based on a standard rate of \$100 for every six-month period of service (\$200); and (d) provision for death and disability claims (\$5,000). The estimates are based on a vacancy rate of 17 per cent for 2023, which is the same vacancy rate for the 2022 revised proposed budget.

Civilian personnel costs

(Thousands of United States dollars)

	<i>Expenditure 2021</i>	<i>Appropriation 2022</i>	<i>Revised proposed requirement 2022</i>	<i>Total requirement 2023</i>	<i>Variance 2023 vs. 2022</i>
International staff	52 642.7	43.2	52 069.2	55 368.5	3 299.3

62. Resources amounting to \$55,368,500 are proposed to provide for salaries (\$29,095,600), common staff costs (\$23,641,600) and danger pay (\$2,631,300) for the continuation of 295 international positions (1 Under Secretary-General, 2 Assistant Secretary-General, 1 D-2, 7 D-1, 28 P-5, 55 P-4, 58 P-3, 5 P-2, 137 Field Service and 1 General Service (Other level)) and the abolishment of one Field Service position in the Kuwait Joint Support Office. The cost estimate takes into account the application of a vacancy rate of 9 per cent for 2023.
63. The increase is attributable mainly to the application of a lower vacancy rate of 9 per cent compared with the rate of 14 per cent applied in the 2022 revised proposed budget.

(Thousands of United States dollars)

	<i>Expenditure 2021</i>	<i>Appropriation 2022</i>	<i>Revised proposed requirement 2022</i>	<i>Total requirement 2023</i>	<i>Variance 2023 vs. 2022</i>
National staff	42 669.8	1.7	33 452.3	34 320.3	868.0

64. Resources amounting to \$34,320,300 are proposed to provide for salaries (\$21,127,300), common staff costs (\$8,303,800) and danger pay (\$4,889,200) for the continuation of 773 national positions (127 National Professional Officer and 646 Local level) and the establishment of 2 national positions (National Professional Officer) and the abolishment of 28 Local level positions. A vacancy rate of 4 per cent has been applied to the estimates for both National Professional Officer and Local level staff. For the proposed new positions at the National Professional Officer level, a vacancy rate of 50 per cent has been applied.
65. The increase is attributable mainly to the abolishment of 28 Local level positions (26 in Kabul and 2 in Kuwait). This is offset by the application of a lower vacancy rate of 4 per cent compared with the rate of 9 per cent applied in the 2022 revised proposed budget and the proposed establishment of two National Professional Officer positions in 2023.

(Thousands of United States dollars)

	<i>Expenditure 2021</i>	<i>Appropriation 2022</i>	<i>Revised proposed requirement 2022</i>	<i>Total requirement 2023</i>	<i>Variance 2023 vs. 2022</i>
United Nations Volunteers	3 780.9	–	4 036.4	4 813.4	777.0

66. Resources amounting to \$4,813,400 are proposed to provide for 105 United Nations Volunteer positions (75 international and 30 national). Vacancy rates of 10 and 7 per cent are applied, respectively, to the estimates for international and national United Nations Volunteers.

67. The increase is attributable mainly to the application of lower vacancy rates of 10 and 7 per cent, respectively, for international and national United Nations Volunteers compared with vacancy rates of 16 and 40 per cent applied, respectively, in the 2022 revised proposed budget. In addition, the increase is attributable to the provision of 30 national United Nations Volunteer positions for the 12 months in 2023, compared with 2 months budgeted in the 2022 revised proposed budget.

Operational costs

(Thousands of United States dollars)

	<i>Expenditure 2021</i>	<i>Appropriation 2022</i>	<i>Revised proposed requirement 2022</i>	<i>Total requirement 2023</i>	<i>Variance 2023 vs. 2022</i>
Consultants and consulting services	18.6	–	44.1	19.6	(24.5)

68. Resources amounting to \$19,600 are proposed to provide for consultants to train mission personnel in language skills.
69. The decrease is attributable mainly to the exclusion in 2023 for consultants for economic, cultural and social rights monitoring, documentation and advocacy, security, and rigging training and certification who are planned to be hired in 2022.

(Thousands of United States dollars)

	<i>Expenditure 2021</i>	<i>Appropriation 2022</i>	<i>Revised proposed requirement 2022</i>	<i>Total requirement 2023</i>	<i>Variance 2023 vs. 2022</i>
Official travel	3 997.2	–	1 042.0	1 010.9	(31.1)

70. Resources amounting to \$1,010,900 are proposed to provide for official business travel; within-mission travel for essential technical support for field offices and to attend various high-level conferences on Afghanistan to ensure that regular programme consultation takes place among the various components of the Mission for the efficient implementation of its mandate; travel outside the mission area, which includes the Special Representative of the Secretary-General and senior staff, for the implementation of the Mission's mandate, as well as meetings and consultations with political counterparts and for briefings to the Security Council (\$829,400); and travel for training purposes (\$181,500).
71. The decrease is attributable mainly to less official travel planned for the Special Representative of the Secretary-General and decreased external training requirements of the Political Affairs Service and the Strategic Communications Service in 2023.

(Thousands of United States dollars)

	<i>Expenditure 2021</i>	<i>Appropriation 2022</i>	<i>Revised proposed requirement 2022</i>	<i>Total requirement 2023</i>	<i>Variance 2023 vs. 2022</i>
Facilities and infrastructure	19 642.4	–	22 381.1	20 078.3	(2 302.8)

72. Resources amounting to \$20,078,300 are proposed to provide for acquisition of engineering supplies (\$195,800); acquisition of prefabricated facilities, accommodation and refrigeration equipment (\$164,100); acquisition of generators and electrical equipment (\$220,000); acquisition of furniture (\$96,600); acquisition of office and other equipment (\$101,900); acquisition of safety and security equipment (\$417,800); rental of premises (\$1,509,700); utilities and waste disposal services (\$130,600); maintenance services (\$3,009,200); security services (\$9,529,100); construction, alteration, renovation and major maintenance (\$431,000); stationery and office supplies (\$38,900);

spare parts and supplies (\$176,500); field defence supplies (\$55,700); petrol, oil and lubricants (\$3,990,000); and sanitation and cleaning materials (\$11,400).

73. The decrease is attributable mainly to the reduced requirements for rental of premises, security services and maintenance services, due to the planned closure and non-renewal of the lease of the Alpha compound in July 2023, which are offset in part by the increased price per litre of fuel (\$1.01) in 2023 compared with the price per litre of fuel (\$0.82) included in the 2022 revised proposed budget.

(Thousands of United States dollars)

	<i>Expenditure 2021</i>	<i>Appropriation 2022</i>	<i>Revised proposed requirement 2022</i>	<i>Total requirement 2023</i>	<i>Variance 2023 vs. 2022</i>
Ground transportation	207.3	–	465.6	481.1	15.5

74. Resources amounting to \$481,100 are proposed to provide for the rental of vehicles (\$19,000); repairs and maintenance (\$14,800); liability insurance (\$7,400); spare parts (\$210,300); and petrol, oil and lubricants (\$229,600).

75. The increase is attributable mainly to the increased requirement for spare parts and supplies to effectively maintain armoured vehicles.

(Thousands of United States dollars)

	<i>Expenditure 2021</i>	<i>Appropriation 2022</i>	<i>Revised proposed requirement 2022</i>	<i>Total requirement 2023</i>	<i>Variance 2023 vs. 2022</i>
Air operations	7 595.5	–	9 966.2	8 464.0	(1 502.2)

76. Resources amounting to \$8,464,000 are proposed to provide for services (\$100,100); landing fees and ground handling charges (\$113,000); air crew subsistence allowance (\$9,400); petrol, oil and lubricants (\$1,178,200); rental and operational costs for two fixed-wing aircraft (\$4,927,400); rental and operational costs for one rotary-wing aircraft (\$2,115,900); and liability insurance (\$20,000).

77. The decrease is attributable mainly to the new contract negotiated at commercial rates with United Nations registered operators, in which air war risk insurance is now part of the new contract, as well as the cancellation of such insurance for rotary-wing operations. In addition, the decrease is attributable to decreased requirements for landing fees and ground handling charges, air crew subsistence allowances and services. The decreased requirements are offset by the planned increase in the number of flight hours for both fixed and rotary-wing aircraft, owing mainly to less reliance in 2023 on the United Nations Humanitarian Air Service for within-mission travel.

(Thousands of United States dollars)

	<i>Expenditure 2021</i>	<i>Appropriation 2022</i>	<i>Revised proposed requirement 2022</i>	<i>Total requirement 2023</i>	<i>Variance 2023 vs. 2022</i>
Communications and information technology	4 560.1	–	6 185.1	6 424.3	239.2

78. Resources amounting to \$6,424,300 are proposed to provide for communications and information technology equipment (\$1,365,900); telecommunications and network services (\$2,919,000); maintenance of communications and information technology support services (\$640,500); spare parts (\$317,100); software, licences and fees (\$563,600); and public information and publication services (\$618,200).

79. The increase is attributable mainly to the planned acquisition of networking and videoconferencing equipment and the life-cycle replacement of laptop computers. In addition, the increase is due to the increased need for additional spare parts for information and communications technology equipment.

(Thousands of United States dollars)

	<i>Expenditure 2021</i>	<i>Appropriation 2022</i>	<i>Revised proposed requirement 2022</i>	<i>Total requirement 2023</i>	<i>Variance 2023 vs. 2022</i>
Medical	333.5	–	1 453.8	851.4	(602.4)

80. Resources amounting to \$851,400 are proposed to provide for the acquisition of equipment (\$50,000); medical services, including aeromedical evacuations, specialist consultations and additional medical capacity comprising a forward surgical team and an aeromedical evacuation team, with the assumption that agencies, funds and programmes will contribute the remaining two thirds of the budget to cover the total estimated costs of these services (\$643,400); and medical supplies, including vaccines, pharmaceuticals and consumable items (\$158,000).

81. The decrease is attributable mainly to the closure of the intensive care unit, as recommended by the Division of Health-Care Management and Occupational Safety and Health, and decreased acquisitions of medical equipment.

(Thousands of United States dollars)

	<i>Expenditure 2021</i>	<i>Appropriation 2022</i>	<i>Revised proposed requirement 2022</i>	<i>Total requirement 2023</i>	<i>Variance 2023 vs. 2022</i>
Other supplies, services and equipment	1 225.9	–	2 489.5	1 753.5	(736.0)

82. Resources amounting to \$1,753,500 are proposed to provide for: (a) mine detection and mine-clearing services (\$147,600); (b) training fees, supplies and services (\$96,700); (c) official functions (\$20,700); (d) hospitality (\$17,100); (e) general insurance to provide coverage for cash in-transit and for the shipment of equipment and supplies to the mission area (\$25,300); (f) fees associated with the shipment of cash to the Mission to pay staff and vendors owing to the restrictions placed on the Central Bank of Afghanistan by the United States Department of the Treasury, and bank charges payable to financial institutions in locations where the Mission maintains bank accounts (\$518,700); (g) miscellaneous claims and adjustments to cover third-party claims for incidents caused by mission staff in the course of the performance of their official duties and claims for the loss of personal effects (\$18,500); (h) other freight and related costs, including mail and pouch services, freight forwarding and related costs to cover the shipment of materials and supplies, customs clearance services, within-mission travel for flights through the United Nations Humanitarian Air Service, demurrage and detention charges, and freight-related charges for the acquisition of equipment and supplies (\$805,200); (i) rations, including the maintenance of the emergency stock of rations and the supply of filtered water in offices for consumption by staff (\$67,100); and (j) other services related to the Mission's share of the costs of expert panels conducting an assessment and the rostering of candidates for generic job openings used by field missions (\$36,600).

83. The decrease is attributable mainly to the reduction in fees for the shipment of cash into the mission area and reduced requirements for other freight and related costs due to less reliance on internal flights within Afghanistan through the United Nations Humanitarian Air Service, which are offset in part by increased support for mine detection and mine-clearing services budgeted for 12 months in 2023, compared with 2 months budgeted in the 2022 revised proposed budget.

5. Extrabudgetary resources

84. No extrabudgetary funding is projected for 2023.

Annex I

Summary of follow-up action taken to implement the requests and recommendations of the Advisory Committee on Administrative and Budgetary Questions endorsed by the General Assembly

Brief description of the recommendation

Action taken to implement recommendation

Advisory Committee on Administrative and Budgetary Questions (A/76/7/Add.1)

The Committee recalls that, further to its resolutions 61/276 and 66/264, the General Assembly, in its resolution 74/263, requested the Secretary-General to continue his efforts to promote the nationalization of positions, whenever appropriate, as well as to build local capacity within the special political missions and to report thereon in the context of future budget submissions (para. 31).

The Advisory Committee trusts that, in applying lessons learned from the COVID-19 pandemic, travel for workshops, conferences or meetings would be kept to a minimum and more use would be made of virtual meetings and online training tools (para. 40).

While it notes the slight increase in the number of missions with higher rates of compliance for 2020, the Advisory Committee recalls that the General Assembly, in its resolution 74/262, expressed concern at the low rate of compliance with the advance purchase policy directive and requested the Secretary-General to make stronger efforts to further enhance the rate of compliance with the advance purchase policy directive across all travel categories, taking into account the patterns and nature of official travel and the reasons for non-compliance by each department, office and field mission (para. 41).

The Committee reiterates that the Assembly should request the Secretary-General to take measures, including through the recruitment of new staff and by strengthening the accountability framework of the managers, to improve geographical representation and gender balance in all the special political missions and provide an update in future budget submissions, including on geographical representation by nationality (para. 65).

The Advisory Committee expects that the missions will refine the formulation of the planning assumptions to ensure more consistency in the reflection of their operational environment (para. 68).

The Mission has one of the highest proportions of national positions, which stands at 73 per cent, and continues to look for opportunities where positions can be nationalized.

All requests for travel for workshops, conferences, meetings and training are reviewed by the programme manager and, in the case of training, by the training officer to ascertain whether the meeting and training necessitates travel or can be held virtually.

The Mission continues to inform staff and monitor compliance with the advance booking requirements through the regular issuance of monthly and/or quarterly broadcast reminders to submit all official business travel requests sufficiently in advance to enable travel bookings to be made 16 days prior to departure and to otherwise provide compelling justification to support travel requests that are not submitted in time, in order to enable travel to be booked 16 days in advance. Certifying officers in UNAMA are instructed not to approve late travel requests submitted without satisfactory justification.

Throughout the recruitment and selection process, hiring managers are reminded of the requirement to recruit to ensure geographical representation and gender balance. Where a suitably qualified female candidate has not been selected, the hiring manager is required to provide written justification to the Human Resources Section.

The Mission continues to improve the formulation of planning assumptions in reflection of the operational environment through a review at various stages of the preparation of the budget proposal by programme managers, the executive resource stewardship board and the senior leadership team.

Advisory Committee on Administrative and Budgetary Questions (A/76/7/Add.5)

The Advisory Committee trusts that all vacant positions will be filled expeditiously, including with female national United Nations Volunteers and other female national applicants in order to improve the gender balance at UNAMA, and that an update on the recruitment status, including on the long-vacant positions, will be provided to the General Assembly at the time of its consideration of the present report and in the next budget submission (para. 20).

The Advisory Committee recalls that UNAMA shares the cost for joint medical services with agencies, funds and programmes located in Kabul and that the medical emergency response team comprises medical doctors with emergency expertise, with UNAMA covering 60 per cent and the agencies, funds and programmes covering 40 per cent of the cost (see also [A/75/7/Add.6](#), para. 26) ... The Advisory Committee trusts that the Secretary-General will provide to the General Assembly an update thereon at the time of its consideration of the present report, as well as in the next budget submission (para. 31).

The Advisory Committee requests that information on the services provided by UNOPS to UNAMA and the related payments made by the Mission will be presented in all future budget proposals (para. 34).

The Mission seeks to expeditiously fill vacant positions and, subject to the need to maintain the vacancy rates, continues to make every effort to reduce recruitment lead time through rigorous follow-up with programme managers. Female national United Nations Volunteers and other female national applicants are actively encouraged to apply for vacant positions and are sent details of positions as they become vacant. An update on long-vacant positions is included in annex I of the supplementary information for the Advisory Committee, in accordance with standard practice for the budgets of all special political missions.

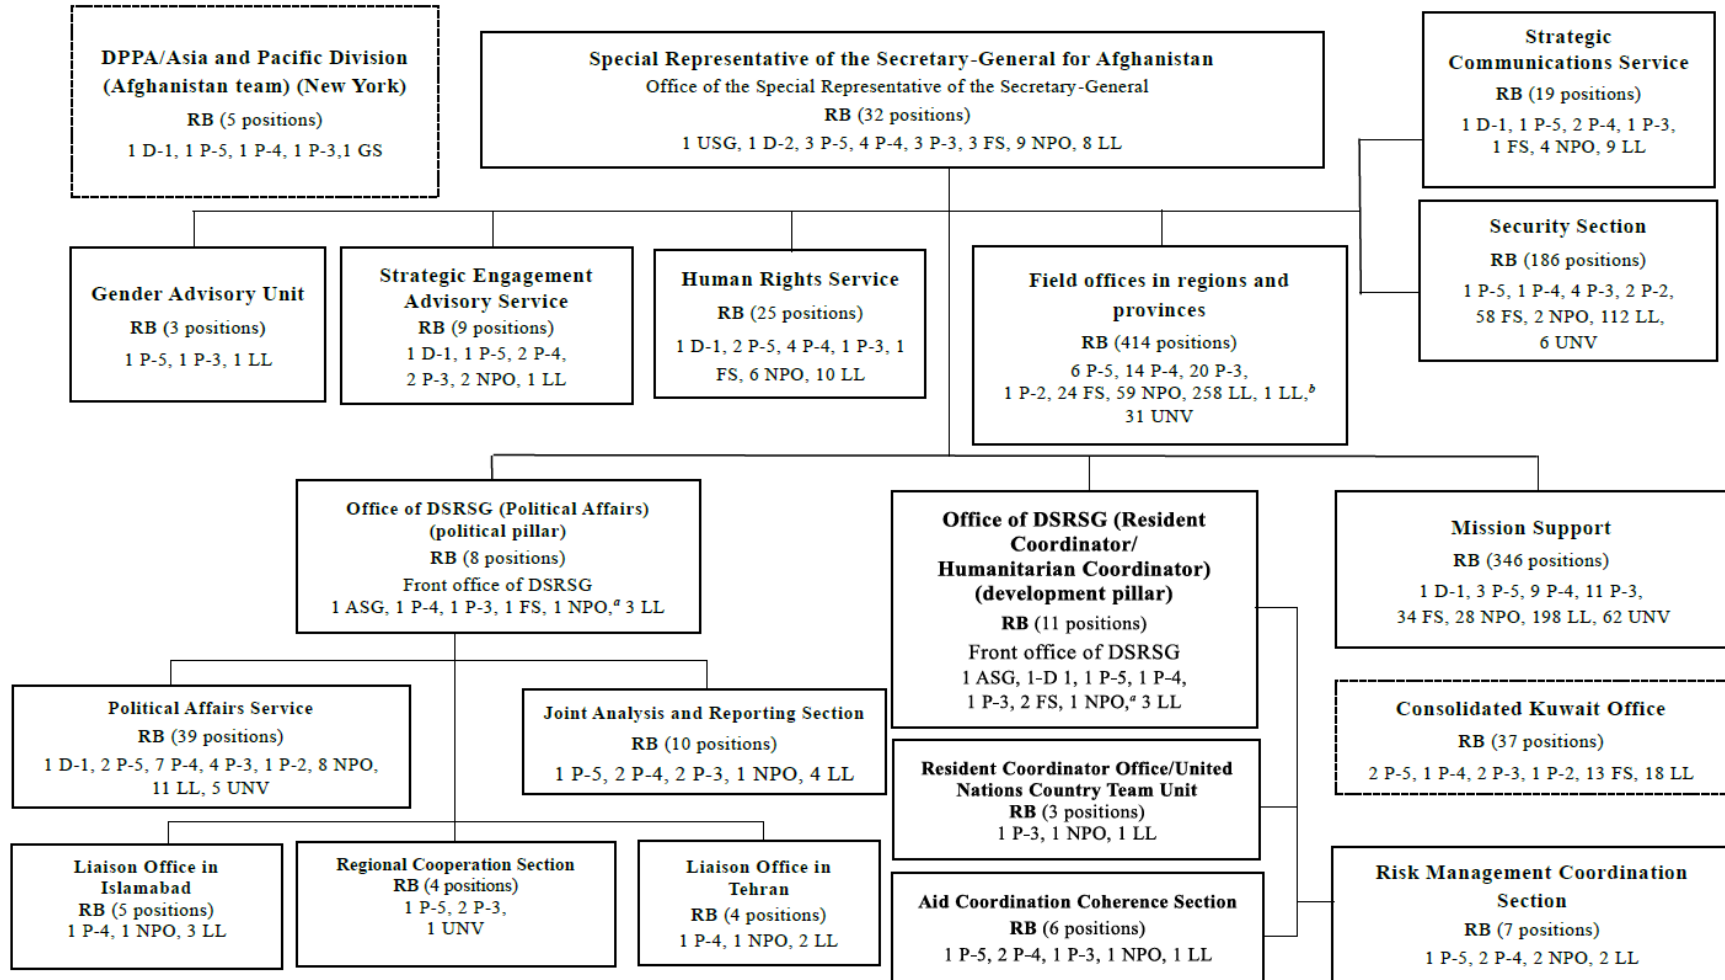

The Mission continues to cost-share joint medical services with 18 other entities and the Medical Emergency Response Team with 15 agencies, funds and programmes, which is reflected in the current budget proposal.

UNOPS will be engaged in the recruitment of local individual contractors to support the Mine Action Service.

Annex IV

Information on 2022 substantive activities of the United Nations agencies, funds and programmes in collaboration with the United Nations Assistance Mission in Afghanistan

<i>Programme</i>	<i>Agencies, funds and programmes</i>	<i>Reporting period and financial resources available to the agencies, funds and programmes for the activity</i>	<i>Description</i>
Platform to launch substantive activities of the United Nations agencies, funds and programmes	<ul style="list-style-type: none"> • Food and Agriculture Organization of the United Nations • International Atomic Energy Agency • International Fund for Agricultural Development • International Labour Organization • International Organization for Migration • Joint United Nations Programme on HIV/AIDS • Mine Action Service • Office for the Coordination of Humanitarian Affairs • Office of the United Nations High Commissioner for Human Rights (OHCHR) • Office of the United Nations High Commissioner for Refugees • United Nations Children's Fund • United Nations Conference on Trade and Development • United Nations Development Programme (UNDP) • United Nations Educational, Scientific and Cultural Organization • United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) 	The overall national mechanism by which the Deputy Special Representative of the Secretary-General (Resident Coordinator/ Humanitarian Coordinator) leads and coordinates all United Nations agencies, funds and programmes is the United Nations country team. The Resident Coordinator Office coordinates United Nations development activities and provides guidance to all United Nations agencies, funds and programmes in Afghanistan.	Mechanisms for the coordination of United Nations development activities comprise working groups for United Nations programme delivery frameworks, including the United Nations Transitional Engagement Framework for Afghanistan and related integrated annual workplans. Key activities that affected the United Nations overall during 2022 included the development of a new aid architecture, the United Nations system-wide strategic planning framework and the monitoring framework, which informed the work of the United Nations in Afghanistan.

<i>Programme</i>	<i>Agencies, funds and programmes</i>	<i>Reporting period and financial resources available to the agencies, funds and programmes for the activity</i>	<i>Description</i>
	<ul style="list-style-type: none"> • United Nations Environment Programme • United Nations Human Settlements Programme (UN-Habitat) • United Nations Industrial Development Organization • United Nations Office for Project Services • United Nations Office on Drugs and Crime (UNODC) • United Nations Population Fund • United Nations Secretariat (Department of Safety and Security and resident coordinator system) • United Nations Institute for Training and Research • World Food Programme • World Health Organization 		
Human rights	<ul style="list-style-type: none"> • OHCHR 	<p>For 2022, OHCHR approved \$250,000 for programme-related activities for the period from 1 January to 31 December 2022 to support the United Nations human rights programme in Afghanistan.</p>	<p>OHCHR is integrated within UNAMA under the Human Rights Service. OHCHR is mandated under Human Rights Council decision 2/113 (2006) to continue, in cooperation with UNAMA, to monitor the human rights situation in Afghanistan, provide and expand advisory services and technical cooperation in the field of human rights and the rule of law, and victim-centred justice, and report regularly to the Council on the situation of human rights in Afghanistan.</p> <p>Funding from OHCHR supports the human rights mandate of UNAMA with regard to outreach, technical cooperation,</p>

<i>Programme</i>	<i>Agencies, funds and programmes</i>	<i>Reporting period and financial resources available to the agencies, funds and programmes for the activity</i>	<i>Description</i>
Women and peace and security • UN-Women		UN-Women had an approved budget of \$1.9 million for 2022 for advancing the women and peace and security agenda. To ensure accountability to international frameworks on women and peace and	<p>awareness-raising and advocacy activities in the core priority areas of human rights work in Afghanistan.</p> <p>Through the mainstreaming of human rights considerations and a human rights-based approach to humanitarian emergencies and development, OHCHR also promotes the implementation of international human rights norms, standards and recommendations of human rights mechanisms in United Nations programmes in Afghanistan, as well as UNAMA.</p> <p>The human rights programme is implemented through a broad approach that includes monitoring, documentation and reporting on mandated priorities, technical support and advice to enhance the capacity of the authorities and civil society for the promotion and protection of human rights, and the use of evidence-based reports as an advocacy and dialogue tool to promote the protection and respect of human rights in Afghanistan.</p> <p>In close collaboration with UNAMA, UN-Women in Afghanistan implements its women and peace and security programme, ensuring that women and girls contribute to and have</p>

<i>Programme</i>	<i>Agencies, funds and programmes</i>	<i>Reporting period and financial resources available to the agencies, funds and programmes for the activity</i>	<i>Description</i>
		<p>security, priority areas of work include the provision of immediate protection support to women human rights defenders, including through referrals, and facilitating safe platforms to elevate the voices of Afghan women in regional and international forums, including the Security Council.</p>	<p>greater influence in building sustainable peace and resilience, and are represented and meaningfully participate in all peace and security, peacebuilding and recovery processes.</p> <p>UN-Women, in close collaboration with UNAMA, strengthened partnerships with Afghan women human rights defenders and women-led organizations to support women's initiatives; hold and expand space on women's rights, facilitate virtual platforms, advance the women's rights agenda, and support women human rights monitoring mechanisms to ensure accountability for women's rights abuses. UN-Women and UNAMA established and engaged with the women's advisory board, which provides guidance to the humanitarian country team.</p>

<i>Programme</i>	<i>Agencies, funds and programmes</i>	<i>Reporting period and financial resources available to the agencies, funds and programmes for the activity</i>	<i>Description</i>
Support for the State Ministry for Peace	• UNDP	<p>The Project Initiation Plan is a funding mechanism for use by the international community to support the State Ministry for Peace, as well as other entities and structures representing Afghanistan in the lead-up to and during intra-Afghan negotiations.</p> <p>The State Ministry for Peace became defunct on 15 August, resulting in the termination of the Plan.</p> <p>The tentatively unutilized fund for 2022 is \$4.79 million; the final amount will be confirmed upon financial closure of the project in June 2023.</p>	<p>The Plan consists of a capacity development programme and support for communications and outreach. The capacity development programme focuses on developing and fine-tuning negotiating and analytical skills and building knowledge in areas relevant to peace negotiations, international standards and good practices.</p>
Coordination and advocacy on counter-narcotics issues	• UNODC	<p>Donors contributed \$5.3 million for 2022 to the country programme of UNODC in support of projects to support the people of Afghanistan on counter-narcotics, drug demand reduction, and alternatives to narcotics cultivation and production. In addition, donors provided \$1.64 million for 2022 to the ongoing UNODC regional programme for Afghanistan and neighbouring countries.</p>	<p>The regional programme launched the third phase (2022–2025) during its tenth programme steering committee meeting. Its aim is to facilitate regional cooperation and improve coordination between the programme member countries in addressing illicit drug trafficking and drug use, as well as crime.</p> <p>UNODC is also coordinating closely with UNAMA, United Nations agencies and other stakeholders to address the illicit economy related to the humanitarian crisis in Afghanistan.</p>

*** In keeping with paragraph 11 of resolution [72/266 A](#), the part consisting of the post and non-post resource requirements is submitted through the Advisory Committee on Administrative and Budgetary Questions for the consideration of the General Assembly.

I. Overview of the Mission

(*\$97,104,500*)

Foreword

Following the successful October 2021 elections, protracted government formation negotiations ensued in 2022. The United Nations Assistance Mission for Iraq (UNAMI) provided mediation and good offices across a wide range of areas. Meanwhile, a long list of domestic priorities remains for the new Government to deal with.

Long-standing issues between the federal Government and the Kurdistan Regional Government remain unresolved. UNAMI will continue to advocate for a regular, structured and institutionalized Baghdad-Erbil dialogue to help identify sustainable solutions to issues of mutual concern.

Building on past efforts, UNAMI will continue to support the Government of Iraq in promoting accountability and the protection of fundamental rights. However, more work needs to be done. In addition to monitoring and reporting, UNAMI will also focus on building further institutional capacity.

Da'esh pockets, armed groups operating outside State control, regional tensions and broader geopolitical dynamics all affect the stability of Iraq. Enhanced security sector reform is therefore critical, as well as a regional policy that safeguards the territorial integrity and sovereignty of Iraq. The United Nations in Iraq will furthermore continue its assistance to the Government of Iraq with the returns of Iraqi citizens from north-eastern Syrian Arab Republic, including Al-Hol.

High levels of poverty and weak institutional capacity risk triggering a resurgence of public unrest and violence. Consequently, the United Nations in Iraq will continue to promote the diversification of the economy of Iraq, improve governance, strengthen viable and responsive State institutions and boost public service delivery.

UNAMI will continue to review its posture in the light of its long-term objective to assist Iraq in assuming full ownership of addressing the aforementioned challenges. Meanwhile, ongoing support of the international community remains of great importance.

(Signed) Jeanine **Hennis-Plasschaert**
Special Representative of the Secretary-General, UNAMI

A. Proposed programme plan for 2023 and programme performance for 2021

Overall orientation

Mandates and background

1. The United Nations Assistance Mission for Iraq (UNAMI) is responsible for the provision of advice, support, and assistance to the Government and people of Iraq on advancing inclusive, political dialogue and national and community-level reconciliation. The mandate is defined in Security Council resolution [1483 \(2003\)](#) and [1500 \(2003\)](#) and expanded by the Council through resolutions [1770 \(2007\)](#) and [2107 \(2013\)](#), and renewed by its resolutions [1830 \(2008\)](#), [1883 \(2009\)](#), [1936 \(2010\)](#), [2001 \(2011\)](#), [2061 \(2012\)](#), [2110 \(2013\)](#), [2169 \(2014\)](#), [2233 \(2015\)](#), [2299 \(2016\)](#), [2367 \(2017\)](#), [2421 \(2018\)](#), [2470 \(2019\)](#) and [2522 \(2020\)](#). On 27 May 2021, the mandate was extended until 27 May 2022 by Council resolution [2576 \(2021\)](#).
2. UNAMI will, at the request of the Government of Iraq, continue to provide outreach and good offices for the promotion of an inclusive political system. The Mission will advise the Government on constitutional review and assist with electoral processes and the resolution of disputed internal boundaries. Furthermore, UNAMI will encourage regional dialogue and cooperation, including on issues of border security, energy, environment, water, and refugees. Support will be provided to the Government and people of Iraq in advancing community and national reconciliation, including issues related to minorities; implementing the women, peace and security agenda and gender mainstreaming; promoting accountability, protection of human rights and the rule of law, in addition to supporting the United Nations Investigative Team to Promote Accountability for Crimes Committed by Da'esh/Islamic State in Iraq and the Levant (UNITAD), pursuant to Security Council resolution [2379 \(2017\)](#); strengthening child protection, including the rehabilitation and reintegration of children; combating terrorism, including by preventing radicalization; and reforming the security sector. Under Council resolution [2107 \(2013\)](#), UNAMI will also promote, support and facilitate efforts regarding the repatriation or return of all Kuwaiti and third-country nationals or their remains, and the return of Kuwaiti property, including the national archives.

Programme of work

Objective

3. The objective, to which this Mission contributes, is to achieve sustainable peace, security and development while reaffirming the independence, sovereignty and territorial integrity of Iraq.

Strategy

4. To contribute to the objective, the Mission will:
 - (a) Promote inclusive political dialogue among political actors, including through broad engagement with institutional stakeholders and the provision of advice and recommendations on key policy issues and their implementation, which is aimed at resulting in broad consensus among political actors to implement and deepen political and other reforms that strengthen public confidence in the State;
 - (b) Work closely with the legislative and executive institutions of Iraq to support the formulation, adoption and implementation of legislative and constitutional reforms that will underpin longer-term political and socio-economic development;
 - (c) Promote cross-community dialogue and reconciliation, mitigate local tensions and strengthen social cohesion;

- (d) Support institutionalized, structured, time-bound dialogue between the federal Government and the Kurdistan Regional Government on all outstanding issues, such as the federal budget, oil and revenue sharing, border control, security issues and internally disputed boundaries, in order to reach a mutually accepted, sustainable solution in line with article 140 of the Iraqi Constitution;
 - (e) Provide its good offices, technical advice and capacity-building to the electoral institutions of Iraq and support to election processes;
 - (f) Assist the Government of Iraq in promoting accountability for human rights violations, to build trust between the Government, justice institutions, civil society and communities;
 - (g) Monitor and report on human rights developments and support government efforts to protect human rights in accordance with the country's constitution and international obligations;
 - (h) Provide technical support to strengthen institutional capacities, national policies and practices for the protection of fundamental freedoms and rights, including the freedom of expression and the right to peaceful assembly, the rights to liberty and protection of all persons from arbitrary arrests, abductions, enforced disappearances and torture;
 - (i) Advocate for the reform of criminal justice law and policy to ensure respect for due process and fair trial standards and promote accountability for perpetrators and redress for victims, including victims of conflict-related sexual violence;
 - (j) Promote sustainable long-term development by coordinating the efforts of national and international stakeholders;
 - (k) Promote stabilization, recovery and peacebuilding initiatives, including those on countering climate change, together with the United Nations country team;
 - (l) Advocate for development assistance in line with government priorities and the updated United Nations Sustainable Development Cooperation Framework;
 - (m) Promote, support and facilitate efforts regarding the repatriation or return of all Kuwaiti and third-country nationals remains and the return of Kuwaiti property, including the national archives.
5. The above-mentioned work will result in:
- (a) The implementation of a government programme that takes the necessary steps to meet the Iraqi people's desire for reform, including economic reform and counter-corruption measures;
 - (b) The implementation of consensus-driven constitutional reforms developed in the reviews by the presidential and parliamentary constitutional review committees;
 - (c) The implementation of laws and other political and security mechanisms crucial to the consolidation of the relationship between Baghdad and Erbil;
 - (d) Strengthened local governance and community-level reconciliation, notably within the disputed internal boundaries;
 - (e) Respect of fundamental human rights principles and norms;
 - (f) Preservation and expansion of civic and democratic space, including the freedom of expression, the right to peaceful assembly and respect for dissent;
 - (g) Increased accountability for human rights violations and abuses, including in the context of demonstrations, as well as accountability for domestic and gender-based violence, including improved redress for victims;
 - (h) Increased compliance with fair trial standards and procedural guarantees, including the prevention of torture and ill-treatment of detainees;
 - (i) A substantial reduction in protracted internal displacement through the application of an area-based coordination mechanism in pursuit of durable solutions, including for conflict-related climate change displacement;
 - (j) Improved socioeconomic indicators.

External factors for 2023

6. The overall plan for 2023 is based on the following planning assumptions:
 - (a) A Government and a Parliament are in place and develop a programme of work;
 - (b) Stakeholders, especially the Government of Iraq, make progress on the adoption and implementation of political, economic, electoral and constitutional reforms;
 - (c) The federal Government and the Kurdistan Regional Government engage in a structured, regular and genuine political dialogue to fully normalize relations and resolve outstanding issues;
 - (d) The security situation remains sufficiently permissive to gain access to all affected populations and key stakeholders in relation to mandate implementation;
 - (e) The Government of Iraq maintains efforts to implement security sector reforms, including bringing all weapons and armed groups under State control and ensuring the successful integration of the Popular Mobilization Forces into the Iraqi security forces;
 - (f) Events unfolding in the wider region do not adversely affect the internal political stability of Iraq;
 - (g) The Government of Iraq engages fully with the United Nations in Iraq to facilitate the implementation of technical cooperation and monitoring of human rights and remains committed to promoting, respecting and protecting human rights and the rule of law, including through measures to preserve and expand civic space and the enactment of relevant legislation, policy measures and action plans;
 - (h) The Government of Iraq demonstrates commitment to advancing women's rights and gender equality, endorsing relevant draft legislation, creating strong institutional mechanisms to ensure accountability and track and monitor progress on meeting international commitments towards the advancement of women in all spheres of life, including decision-making processes;
 - (i) The Government of Iraq engages fully with the United Nations in Iraq to develop a common strategy for climate change mitigation to reduce gas flaring, improve water management systems, increase investment in renewable energy and provide more incentives for green economy projects, in alignment with the country's national adaptation plan;
 - (j) The Government of Iraq works to improve service delivery and meet public expectations, alleviating the root causes of social unrest, including by actively promoting full youth participation in society and creating job opportunities for young people.
7. Reflecting the importance of continuous improvement and responding to the request of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the coronavirus disease (COVID-19) pandemic. At the same time, the programme plan for 2023 assumes that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.
8. The Mission has adapted its working methods, combining virtual and in-person work modalities to enable continued mandate delivery. For instance, human rights monitoring and reporting were undertaken partially using remote modalities, political participation was fostered through hybrid workshops and engagements, and good offices were conducted through hybrid meetings and other outreach activities. While such hybrid working modalities were implemented to ensure continued mandate delivery in a challenging and restrictive environment, they cannot replace the need for in-person meetings. A significant lesson learned during the pandemic was the importance for the Mission to be present on the ground, in communities and with national counterparts, actively responding to the challenges that its constituents face. The need for in-person meetings, supported by travel, remains particularly manifest with respect to delivering on good offices, reconciliation dialogues and human rights monitoring.
9. With regard to cooperation with other entities, UNAMI works in coordination with international donors and 20 resident and 5 non-resident United Nations agencies, funds and programmes. Areas of work

include reconstruction, economic reform, sustainable development, addressing conflict-related climate change and the COVID-19 response. The Mission also supports coordination with international financial institutions, such as the World Bank, the International Finance Corporation and the International Monetary Fund. In doing so, UNAMI leads or participates in critical national development and humanitarian bodies, such as the Executive Committee for Recovery, Reconstruction and Development, the Development Partners' Forum, the Stabilization Task Force, the Returns Working Group, the non-governmental organization (NGO) Coordination Committee for Iraq and the Prospects Partnership.

10. The Mission will continue to support inter-agency coordination and liaison. As part of its efforts to counter violent extremism in Iraq, UNAMI works with the United Nations country team, national and local government authorities and religious organizations to raise awareness of the impact of violent extremism on Iraqi society. The Mission also supports the work of UNITAD in the implementation of its mandate. In addition, UNAMI and the United Nations Development Programme (UNDP) will assist the Government of Iraq on security sector reform and on capacity development of the country's electoral institutions. UNAMI will also engage with the United Nations country team in a wide range of activities aimed at the promotion and protection of human rights and the rule of law, including on issues relating to women, ethnic and religious minorities and grave violations against children in situations of armed conflict.
11. The Mission integrates a gender perspective in its operational activities, deliverables and results, as appropriate. In its engagement with institutional stakeholders at the federal and regional levels, the Mission promotes gender mainstreaming with a focus on strengthening women's representation and participation in political and electoral processes and in decision-making. The Mission co-chairs the United Nations gender taskforce along with the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) and supports the Women's Advisory Group, using these platforms to synergize efforts to advance women's empowerment and gender equality.
12. In line with the United Nations Disability Inclusion Strategy, UNAMI engages with the Government and disability rights organizations to support policy measures to promote the human rights of persons with disabilities, with a focus on accessibility, employment opportunities and access to social and public services. Through its internal working group on the United Nations Disability Inclusion Strategy and the Mission-specific action plan, UNAMI takes actions to develop a more disability-friendly environment.

Programme performance in 2021

Peaceful conduct of early parliamentary elections

13. On 10 October 2021, Iraq held elections for the Council of Representatives. The elections were conducted in advance of the constitutional deadline of May 2022, in response to widespread public calls for more inclusive representation, accountability and good governance.
14. In line with the enhanced electoral mandate pursuant to Security Council resolution [2576 \(2021\)](#), the Mission promoted an environment conducive to credible and inclusive elections, without fear or intimidation. UNAMI supported and advocated for the development of and adherence to an electoral code of conduct and provided advice, technical support and capacity-building to the Independent High Electoral Commission to enhance all stages of the electoral process. In addition, the Mission organized the deployment of 150 United Nations international experts to monitor the elections in all of the 18 governorates of Iraq and coordinated the provision of logistical and security support to third-party international observers with the Government of Iraq. A strategic messaging campaign and support to the Electoral Commission's communication strategy was provided to inform Iraqi voters of electoral preparations and United Nations support to them. Following the elections, the Mission advocated for the use of the appropriate legal channels for electoral complaints and for respecting the final ratified results.
15. The above-mentioned work contributed to the holding of early national parliamentary elections that took place in a largely peaceful manner. This met a key popular demand voiced through demonstrations in 2019 and gave the opportunity for the formation of a new Government. Progress towards the objective is presented in the performance measure below (see table 1).

Table 1
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
The capacity of the Independent High Electoral Commission and the Kurdistan Independent High Electoral Commission to improve inclusiveness and integrity of electoral processes and systems was strengthened	The Independent High Electoral Commission voter registry was improved, as shown by an increase in biometric data collection coverage and cross-checking of voter data; the Commission reviewed and adjusted its regulations and procedures for the timely announcement of election results and the speedy resolution of electoral disputes, for increased representation of women as electoral officials and staff and for countering hate speech in electoral processes	The Government of Iraq fulfilled its commitment to hold early national parliamentary elections. The electoral authorities adopted improved measures for polling and for the counting and publication of results, which, supported by international efforts to monitor the election, helped promote increased transparency of the electoral process. Electoral complaints were addressed through the correct legal channels prior to the ratification of election results on 27 December 2021

Impact of the pandemic

16. The continuation of the coronavirus disease (COVID-19) pandemic into 2021 affected the implementation of the Mission's mandate. The provision of good offices, advocacy and technical support to political stakeholders, and notably the Independent High Electoral Commission, were interrupted briefly by domestic and international travel restrictions and replaced by adaptive working modalities, such as hybrid, virtual and in-person meetings and capacity-building activities. Similarly, owing to national prevention and mitigation measures, the number of interviews with detainees decreased, as well as the number of trials monitored, while development and humanitarian coordination mechanisms were disrupted. UNAMI was successful in introducing preventive and adaptive measures early in the COVID-19 pandemic, setting-up a crisis management working group chaired by the Chief of Staff for working-level engagements, coordinated by an integrated crisis management team chaired by the Head of Mission. These integrated structures ensured that the Mission addressed the impact of the pandemic in a timely and effective manner throughout 2021. UNAMI managed to maintain a flexible footprint while prioritizing staff well-being and ensuring continued mandate delivery, providing continuous support to the Government of Iraq and effectively providing support to the 2021 elections. In addition, in order to support Member States on issues related to COVID-19, within the overall scope of the objectives, UNAMI, in an integrated manner with the United Nations country team, made best use of their comparative advantages to provide technical support, information campaigns, logistical support and information sharing.

Planned results for 2023

Result 1: enhancing trust through reform

Programme performance in 2021

17. The Mission's work contributed to the holding of early national parliamentary elections through the provision of political engagement, technical support and advice. UNAMI, in close coordination with UNDP and the United Nations Office for Project Services (UNOPS), deployed a total of 90 monitoring teams in all 18 Iraqi governorates on election day. Those efforts significantly bolstered the Commission's technical capacity to plan and successfully implement the elections. Furthermore, the Mission made use of its good offices to ensure continuous engagement with government officials, political leaders and protestors, as well as with the international community. Confidence-building measures and close engagement with government officials and Iraqi political leaders at the federal and regional levels

encouraged dialogue and supported the government formation process. This boosted the opportunity for the formation of a new Government, but affected other activities envisaged for 2021, such as reforms.

Target for 2023

18. The Mission will encourage the implementation of a government programme that delivers reform and advances inclusive political dialogue, as well as national and community-level reconciliation. Furthermore, the Mission will continue to advocate for the implementation of political and constitutional reforms suggested by the Presidential and Council of Representatives' constitutional review, and for the establishment of a Federal Council to oversee parliamentary legislation. In addition, advice, support and assistance will be extended to the federal Government and the Kurdistan Regional Government in their dialogue over power sharing, resource allocation, security management and internally disputed boundaries, with a view to reaching formal and structural agreements under the constitution. Furthermore, the Mission will engage actively with stakeholders on the Sinjar Agreement, advocating for its full implementation.
19. Progress towards the objective and target for 2023 are presented in the performance measure below (see table 2).

Table 2

Performance measure:

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Government, political leaders and community representatives took steps towards the establishment of the Baghdad-Erbil coordination and cooperation mechanisms	The Sinjar Agreement between the federal and Kurdistan Regional Governments was a positive step towards resolution of issues in an ethnically diverse area and provides a platform to discuss outstanding issues and overcome political differences	In line with the popular call for reforms, the Government of Iraq fulfilled its commitment to hold early national parliamentary elections. The electoral authorities adopted improved measures for polling and for the publication of results, which helped promote wider public acceptance of election results. Electoral complaints were addressed through the correct legal channels prior to the ratification of election results on 27 December 2021	After a peaceful transition of power within constitutional timelines, the new Government of Iraq begins enactment of a reform programme. Agreement on resource revenue sharing between Baghdad and Erbil allows the Council of Representatives to commence adoption of a hydrocarbon law that promotes fair revenue sharing	The Government of Iraq continues to implement a programme that brings constitutional and economic reform and addresses long-standing domestic issues, such as improving the Baghdad-Erbil relationship

Result 2: transitioning to longer-term development

Programme performance in 2021

20. The Mission supported the Government of Iraq in developing durable solutions for internally displaced persons. With the adoption of the Government's national plan for resolving the displacement of internally displaced persons in 2021, the Mission supported implementation of the plan and wider solutions to protracted displacement by working closely with government counterparts, nationally and

locally, through the United Nations durable solutions mechanism. The Mission continued to play a key role in developing that mechanism, organizing area-based coordination groups in eight areas with high levels of displacement. Furthermore, UNAMI, in close consultation and coordination with the Government and the United Nations country team, updated the United Nations Sustainable Development Cooperation Framework to include a new strategic priority for durable solutions in Iraq. The Mission continued to initiate and lead development coordination forums, including international donor coordination, and follow-up on international commitments.

21. The above-mentioned work was essential for the identification of durable solutions for protracted displacement. Through the United Nations Sustainable Development Cooperation Framework, the United Nations plans to implement a programme totalling \$1.7 billion to support durable solutions from 2021 to 2024. Resolving key concerns regarding displaced people and their return will allow the Government to shift focus as humanitarian needs transition towards longer-term development goals, including next steps toward achieving its sustainable development goals by 2030.

Target for 2023

22. As the number of displaced people in Iraq is decreasing and is further expected to diminish in 2022, the work of the Mission will gradually shift in 2023 from humanitarian responses to sustainable development. Geographically speaking, the focus of the United Nations country team and other development actors is expected to shift from the north to the central and southern regions, where poverty and environmental issues are more severe and contribute to instability. UNAMI will encourage officials in 2023 to shift government development planning from short-term goals toward a long-term evidence-based strategy that is coherent with the United Nations Sustainable Development Cooperation Framework. The Mission will coordinate development interventions around poverty reduction, addressing water scarcity and durable solutions through its area-based coordination groups, ensuring integration with United Nations country team partners.
23. Progress towards the objective and target for 2023 are presented in the performance measure below (see table 3).

Table 3
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
The United Nations Sustainable Development Cooperation Framework was developed in coordination with government partners and aligned with national priorities	A durable solutions task force developed an action plan that promotes area-based coordination, and the Government adopted a national strategy for resolving protracted displacement of internally displaced persons	The United Nations Sustainable Development Cooperation Framework for the period 2020–2024 is effectively implemented, reducing the number of people in need	Area-based coordination results in tailored durable solutions for returning families	In line with the United Nations Sustainable Development Cooperation Framework, the Government adopts an achievable strategy that invests in the longer-term development of Iraq, including climate change mitigation

Result 3: preservation and expansion of civic space and support for accountability

Programme performance in 2021

24. The Mission supported the Government in strengthening the rule of law and promoting respect for human rights in the criminal justice system. UNAMI monitored the human rights of detainees, reviewed allegations of torture and ill-treatment in detention facilities and observed procedural guarantees, detention safeguards and fair trial standards. Advocacy and technical support enabled the finalization of

the guidelines on the rights of suspects and accused and detained persons to promote compliance with international human rights law in official places of detention. UNAMI also engaged in dialogue with senior law enforcement officials with the aim of strengthening the human rights compliance of the domestic legal framework with relevant international human rights law. Furthermore, UNAMI engaged with the Government and United Nations country team partners with the aim of protecting children from the effects of armed conflict, and supported efforts to implement the joint communiqué between the Government and the United Nations for the prevention of and response to conflict-related sexual violence.

25. The above-mentioned work led to the adoption of guidelines by the High Judicial Council for the prevention of torture and ill-treatment, and enhanced capacity and knowledge of government officials to mainstream human rights in law enforcement policies and operations. Despite this important progress to strengthen accountability mechanisms for human rights violations and abuses against political and civic activities, additional efforts are required to ensure that the Government of Iraq adopts and implements legislation to bolster freedom of speech, protect civic space and strengthen accountability for human rights violations.

Target for 2023

26. In 2023, UNAMI will continue to provide technical support, advice and good offices toward the promotion and protection of human rights. The Mission will monitor and report on human rights violations and abuses, in particular in the context of the freedom of expression and the right to peaceful assembly. UNAMI will provide technical support through training for civil society and human rights organizations, as well as capacity-building to the Government for engagement with United Nations human rights mechanisms.

Lessons learned and planned change

27. The lesson learned for the mission was that the effects of shrinking offline civic space could be mitigated by reinforcing online space to exercise fundamental rights. In applying the lesson, UNAMI will continue to support the Government in aligning national legislation with international norms and standards, particularly the draft bill on freedom of expression, and advocate for its endorsement and provide technical assistance to support its implementation. UNAMI will support judiciary, prosecutors, lawyers and law enforcement officials in increasing capacity to implement legal protections and safeguard civic space and media freedom. This work will contribute to the implementation of the national human rights plan and to the adoption of human-rights related legislation and policies, to be demonstrated through the adoption of pending draft legislation on the protection of civic space. Expected progress towards the objective is presented in the performance measure below (see table 4).

Table 4
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
The anti-torture bill was presented to the Council of Representatives while concerns over fair trial standards continued; the Government of Iraq allowed unfettered access to Da'esh trials for monitoring	Adoption of the Anti-Torture Law; the Government of Iraq developed the National Action Plan for the Prevention of Torture in line with its national and international commitments	The Government of Iraq implements the National Action Plan for the Prevention of Torture and reports to United Nations human rights mechanisms on concrete measures taken to promote due process and fair trial guarantees	The Government strengthens and implements legal frameworks for the protection of human rights and promotes accountability for human rights violations and abuses	The draft bill on freedom of expression and the draft information technology law are adopted, compliant with international standards; and plans and policies for the protection of human rights are adopted

Deliverables

28. Table 5 lists the deliverables of the mission.

Table 5

Deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	4	4	4	4
1. Reports of the Secretary-General for the Security Council	4	4	4	4
Substantive services for meetings (number of three-hour meetings)	4	4	4	4
2. Meetings of the Security Council	4	4	4	4
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	7	24	7	24
3. Projects on national reconciliation and the role of women in peace and security	2	–	1	–
4. Country-wide public outreach events to enhance social cohesion and strengthen the rule of law, socioeconomic and longer-term development, recovery and reconstruction	5	24	6	24
Seminars, workshops and training events (number of days)	98	143	85	86
5. Workshops on gender policy, participation of women in electoral and political processes, and the Sustainable Development Goals	18	12	14	5
6. Training events on mediation and negotiation skills, the role of women in peace and security, transparent and inclusive elections, reporting obligations under international treaties, human rights monitoring and reporting, and the rights of women and persons with disabilities	69	121	56	66
7. Workshops on political dialogue and participation, political empowerment of young people	11	10	15	15
Publications (number of publications)	2	2	1	–
8. Reports on strengthening women’s political participation and the challenges and needs of Iraqi women entering politics	2	2	1	–
Technical materials (number of materials)	121	156	157	139
9. Manual on gender-responsive electoral processes and training manual for women in electoral process; leadership manual for women entering public life	1	1	–	–
10. Manual on gender mainstreaming in electoral processes	–	–	1	1
11. Reports on human rights violations and the human rights situation in Iraq, civilian casualties, the Government’s adherence to human rights and international humanitarian law, child protection and conflict-related sexual violence, biometric voter registry and enhancements in election results management, and key development, stabilization and reconstruction issues in governorates	110	141	146	130
12. Manual on elections for the Independent High Electoral Commission and the Kurdistan Region Independent Electoral Commission	8	12	8	8
13. Handbook on human rights for police personnel	1	1	1	–
14. Planning and technical documents on the United Nations Sustainable Development Cooperation Framework for Iraq and the joint United Nations resource mobilization strategy, and strategic support to and progress of the Government’s reconstruction and stabilization programme (recovery and resilience programme)	1	1	1	–

C. Substantive deliverables

Good offices: facilitation sessions and round tables on disputed internal boundaries in Kirkuk Governorate to foster national and community reconciliation and enhance cooperation among interlocutors involved; additional support to political and civil Iraqi counterparts to advance the political process and reconciliation, encompassing at least 800 representatives of civil society, young people and communities; support provided on the devolution of powers, federalism, revenue-sharing and international border management; Baghdad-Erbil and regional relations; electoral reforms; countering violent extremism and terrorism in Iraq

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

and the region; return of missing Kuwaiti and third-country nationals, Kuwaiti missing property and the national archives. Good offices on the implementation of Security Council resolution 1325 (2000) with a focus on advancing the participation, involvement and representation of women and young people in political and electoral processes.

Fact-finding, monitoring and investigation missions: monitoring missions on rule of law institutions, including missions of detention monitoring; trial monitoring missions in Baghdad and Erbil; fact-finding missions on administration of justice within the legal system and with law enforcement officials to follow up on alleged human rights violations; monitoring missions on conflict-related sexual violence and children in armed conflict and the protection of the rights of minorities, including visits to internally displaced persons camps and documenting incidents of armed conflict and verification of civilian casualties; and monitoring missions on the rights of persons with disabilities, including engagements with organizations working on disability rights issues.

Consultation, advice and advocacy: consultations on humanitarian, stabilization, reconstruction and development issues and coordination and monitoring of recovery and reconstruction activities; advice on revenue-sharing, hydrocarbon management, boundary disputes, federalism, security sector reform, youth and women's participation in politics (reaching out to at least 200 young people across 18 governorates) and decentralization of administrative and fiscal authority; consultation and advice on electoral legislative reform initiatives and parliamentary oversight; advice and engagements to support capacity development and enhance confidence in the electoral institutions of Iraq; consultation and advocacy initiatives on human rights issues, including those related to the protection of the freedoms of assembly and expression, women's and minority rights, protection from enforced disappearance, child protection and administration of justice (engaging with at least 100 youth-led and women-led organizations); collaboration with partner organizations of persons with disabilities; advocacy on the implementation of Security Council resolution 1325 (2000), with a focus on the advancement of women's participation, involvement and representation in reconciliation, political and electoral processes through engagement with the Government of Iraq, the Independent High Electoral Commission and civil society, including the Women's Advisory Group; and engagements across all governorates, with the aim of covering at least 250 members of the Women's Advisory Group, women networks and civil society organizations.

Databases and substantive digital materials: database on incidents of violence against women in politics in the context of the 2021 legislative elections; implementing and maintaining the Situational Awareness Geospatial Enterprise system to provide the Mission with a standardized information management system for relevant incidents and events.

D. Communication deliverables

Outreach programmes, special events and information materials: special events that include relevant United Nations Days; organizing awareness-raising events; information materials in support of a common United Nations approach; bimonthly newsletter and annual yearbook highlighting the work of the United Nations in Iraq; United Nations system information material on the Sustainable Development Goals; twice daily media monitoring reports; capacity-building for Iraqi media professionals on combating misinformation and disinformation on social media.

External and media relations: press conferences, press releases and news articles, including op-eds, in three languages, on the work of the Mission and the United Nations country team and UNITAD.

Digital platforms and multimedia content: dissemination of information through the Mission's website and social media accounts, including multimedia products on the Mission, two factsheets and one frequently asked question document on Iraqi elections and United Nations support to the elections, the United Nations in Iraq and events with relevance to Iraq, and participation in United Nations-wide campaigns and dissemination of products from United Nations Headquarters.

E. Enabling deliverables

Safety and security: risk assessments, analysis, briefings, reports, plans, drills and rehearsals, close protection support, staff training and security services in support of UNITAD and the United Nations country team.

Administration: administrative and technical support to UNITAD.

Logistics: provision of transportation, accommodation, utilities and office space for the United Nations country team, procurement services for the United Nations Regional Centre for Preventive Diplomacy for Central Asia and, recently, the United Nations Human Settlements Programme (UN-HABITAT), as well as air transportation for the Office of the Special Envoy of the Secretary-General for Yemen.

Information and communications technology: provision of information and communications services, including internet, data and voice services and maintenance of equipment to UNITAD.

Environment: increase of renewable energy production to achieve self-sufficiency; establishment of a modern system for monitoring, controlling and data analysis of environmental parameters to support the Mission's carbon reduction target; initiatives oriented to make UNAMI a zero-waste mission.

B. Proposed post and non-post resource requirements for 2023

1. Total resource requirements

Resource requirements (regular budget)

Table 6

Total resource requirements (net of staff assessment)

(Thousands of United States dollars)

Category of expenditure	2021	2022	2023		Variance
	Expenditures	Appropriation	Total requirements	Non-recurrent requirements	2022 vs. 2021 Increase/(decrease)
	(1)	(2)	(3)	(4)	(5)=(3)-(2)
Military and police personnel costs	5 163.9	5 140.3	4 939.7	–	(200.6)

^a One position is funded at 50 per cent and cost-shared with the Development Coordination Office.

29. The proposed resource requirements for 2023 for UNAMI amount to \$97,104,500 (net of staff assessment) and would provide for the deployment of 245 military contingent personnel (\$4,939,700), civilian personnel costs (\$75,690,200) consisting of salaries, common staff costs, and danger pay for the deployment of 773 positions (1 Under-Secretary-General, 2 Assistant Secretaries-General, 1 D-2, 6 D-1, 16 P-5, 45 P-4, 51 P-3, 5 P-2, 151 Field Service, 122 National Professional Officers, 371 Local level and 2 United Nations Volunteers), including the establishment of 3 National Professional Officer positions, as well as operational costs (\$16,474,600) comprising consultants and consulting services (\$325,200), official travel (\$1,133,000), facilities and infrastructure (\$6,746,400), ground transportation (\$1,056,500), air operations (\$3,150,500), communications and information technology (\$2,707,000), medical (\$334,900) and other supplies, services and equipment (\$1,021,100).
30. The decrease in the requirements for 2023 compared with the appropriation of 2022 is attributable to:
- A net decrease of \$200,600 in military and police personnel costs, attributable mainly to reduced costs for rations due to lower catering contract costs, offset by increased requirements for travel on emplacement, rotation and repatriation based on the latest letter of assist from the Government of Australia for the rotation of the Guard Unit from Fiji;
 - A net decrease of \$3,643,300 in civilian personnel costs due to (i) the proposed abolishment of 34 positions, as well as the conversion of 6 positions from international to national positions;

and (ii) lower national staff costs resulting from the application of a lower percentage of common staff costs;

- (c) A net increase of \$3,275,200 in operational costs due to higher requirements for: (i) facilities and infrastructure in connection with the planned renovation of the Kuwait office and of facilities related to the United Nations Guard Units; (ii) ground transportation owing to the planned replacement of two medium armoured buses; and (iii) official travel owing to an increase in the number of in-person meetings, especially for within-mission travel, where physical presence is needed to effectively carry out mandated activities.

Vacancy rates

31. The table below outlines the proposed vacancy rates for 2023, which takes into account the 2021 average deployment and vacancy rates, current incumbency and proposed changes in the composition of staff.

2. Staffing requirements

32. For 2023, building on the experience gained in recent years, a number of reconfigurations and adaptations to the structure and staffing of UNAMI are proposed, resulting from efforts focused on:
- (a) Streamlining the mission support structure with a view to enhancing operational efficiency in the provision of enabling services by responding to the changing realities on the ground, taking in the account lessons learned during the COVID-19 pandemic, and the completion of major projects and the 2021 elections. To this end, it is proposed that: (i) the Supply Chain Management and the Service Delivery Management pillars be merged to form the Supply Chain and Service Delivery Management pillar; (ii) the Procurement Section, Contracts Management Unit and Training Unit be realigned under the Operations and Resource Management Pillar; and (iii) the Engineering and Facilities Management Section be split into the Engineering Section and the Integrated Facilities Management Unit;
- (b) Enhancing the coordination of the Mission's political analysis and reporting on dynamics and developments with a view to providing more in-depth research focused on long-term trends and patterns. In this context, it is proposed that the Joint Analysis Unit be merged with the Office of Political Affairs to form the Office of Political Affairs and Analysis;
- (c) Building national capacity through continuous review of the composition of its civilian staffing to identify opportunities of nationalization when and where possible;

- (d) Optimization of staffing resources to ensure that the Mission's staffing is tailored to the efficient execution of the Mission's mandate, aligned with the functions performed, delivering services where they are needed the most, and that long vacant positions are only retained after critical review for continuing needs.
33. In the context of the above, the staffing complement proposed for 2023 reflects a net decrease of 31 positions. The proposed staffing changes include the proposed establishment of three positions, abolishment of 34 positions, redeployment of 31 positions, reclassification of 3 positions, conversion of 6 international positions to national staff positions and the reassignment of 5 positions.
34. Annex II to the present report provides the organizational charts, and annex III provides details on the approved and proposed positions by location.

35. The Special Representative of the Secretary-General is the Head of Mission, supported by the immediate team in the Office. The Special Representative is also the United Nations designated official for security in Iraq. The following organizational units of the Mission have a direct reporting line to the Special Representative: the Front Office of the Special Representative of the Secretary-General; the Women's Protection Unit; the Gender Unit; the Child Protection Unit; the Office of the Chief of Staff; the Human Rights Office; the Public Information Office; and the Security Section.

Total	(3)				

36. The following changes are proposed for 2023:

- (a) **Gender Unit.** Redeployment of one position of Associate Programme Management Officer (National Professional Officer) from the Office of the Chief of Staff to the Gender Unit. In 2023 and beyond, UNAMI is expected to provide stepped-up support to the new Council of Representatives and government authorities to promote legislation and policies that protect and advance women's rights. In accordance with its mandate and in response to Iraqi requests, UNAMI intends to significantly enhance its national engagement on women, peace and security, including by providing technical assistance to newly staffed government institutions at both the federal and regional levels on women, peace and security issues, including gender mainstreaming of policies. The proposed redeployment would support outreach activities, engage with a wide range of interlocutors, including government partners, civil society and the Women's Advisory Group, support documentation and analysis of gender and women, peace and security trends and support the Senior Gender Adviser in providing technical assistance to the Government of Iraq in implementing the National Action Plan on resolution [1325 \(2000\)](#) for the period 2020–2024;
- (b) **Office of the Chief of Staff**
- (i) Reclassification of one position of Senior Legal Officer from P-5 to P-4. The Mission has a well-established and effective working relationship with the Government of Iraq, inclusive of the judiciary and legal institutions. Legal and judicial counterparts continue to engage constructively with UNAMI in a manner that allows the Mission to make tangible progress on operational issues and further its mandate. Within this setting, and taking into account the other existing capacity of the Associate Legal Office (National Professional Officer), the Mission is of the view that the functions can be effectively performed at the P-4 level;
- (ii) Abolishment of one position of Field Interpreter (P-3) and one position of Associate Field Translator (National Professional officer) in Baghdad. Building on the experience during the COVID-19 pandemic, through which the staff, and in particular the national staff of the Unit, was able to cover the workload efficiently by adapting to new working modalities, it is determined that the functions of these two positions could be effectively discharged by other staff;
- (iii) Reassignment of one position of Associate Administrative Officer (National Professional Officer) as Protocol Officer (National Professional Officer) in Erbil. The workload of the Regional Office in Kurdistan Region has progressively increased as a result of more United Nations involvement in local political processes in a complex and evolving environment. This demands increasing interaction of the Erbil Office with local communities and coordination with authorities to implement the Mission's mandate. This

reassignment will meet the identified need to have a dedicated focal point capacity for managing engagement and protocol requirements with the Kurdistan Regional Government, organizing high-level official meetings with the local authorities and engagements with local communities, and to provide coordination support with respect to diplomatic and other senior officials visits to the region;

- (iv) Reassignment of one position of Associate Protocol Officer (National Professional Officer) as Liaison Officer (National Professional Officer) in Baghdad. The Liaison Officer function has grown increasingly complex as additional procedures and processes have been introduced by the host country with respect to custom clearances, shipments and flight permissions, requiring the Mission to strengthen its capacity for increased engagement at the high-level within the Ministry of Foreign Affairs and the Prime Minister's Office. In addition, the incumbent will also serve to engage and manage a close relationship with authorities and high-level offices to facilitate meetings, visits and missions for United Nations senior officials, as well as support the Chief of Staff;
 - (v) Redeployment of one position of Associate Programme Management Officer (National Professional officer) to the Gender Unit in Baghdad as described in paragraph 35 (a) above;
- (c) **Human Rights Office**
- (i) Abolishment of one position of Human Rights Officer (P-3) in Baghdad as the position has been vacant and the functions can be adequately covered by the existing staff within the Office;
 - (ii) Reclassification of one position of Human Rights Officer (P-4) to Associate Human Rights Officer (P-2) in Erbil following a review of the workload of the Unit whereby it has been determined that the functions of the position can effectively be carried out at the P-2 level;
 - (iii) Redeployment of one position of Human Rights Officer (P-4) from Kirkuk to Baghdad to enable the establishment and implementation of the UNAMI programme on human rights in the administration of justice, directly contributing to mandate implementation through its work on trial monitoring, detention monitoring, which has enabled fact-based engagement with High Judicial Council and Ministry of Justice, other government entities, United Nations treaty bodies and civil society;
- (d) **Security Section**
- (i) Reassignment of one position of Security Officer (Field Service) in Erbil to one position of Fire and Safety Officer (Field Service) in Baghdad to strengthen and provide supervisory capacity to the Fire and Safety Team in line with operational requirements;
 - (ii) Redeployment of one position of Security Coordination Officer (P-3) from Mosul to Baghdad to augment the capacity of the security team in Baghdad to support operational activities, strengthen the Planning and Compliance Unit and to provide effective security support to United Nations personnel, assets and operations at the managerial level;
 - (iii) Redeployment of one position of Associate Field Security Coordination Officer (P-2) and one position of Assistant Security Officer (National professional Officer) from Baghdad to Mosul to augment the capacity of the security team in Mosul to support operational activities, monitor security situation, analyse and produce analytical reports and advisories;
 - (iv) Redeployment of one position of Associate Security Officer (P-2) from Erbil to Basra to enhance integrated security workforce and to support operational activities, monitor, analyse the security situation, produce analytical reports and advisories and enhance the supervisory capacity on the ground;
 - (v) Redeployment of three positions of Close Protection Officer (Field Service) to Baghdad, comprising two from Mosul and one from Kirkuk, to enhance the capacity of the Close Protection Team and retain requisite operational capacity within the Central Region.

37. The Iraq team of the Middle East Division and the Electoral Assistance Division of the Department of Political and Peacebuilding Affairs (2 P-4 and 2 P-3) provide backstopping support to the Mission from United Nations Headquarters in New York. In view of the continued political, economic and security uncertainties in Iraq and the key involvement of the United Nations in national and regional reconciliation, reform and elections, the capacity of the Department to respond to backstopping demands will remain essential, with its functions ranging from providing operational support, assisting in identifying and prioritizing critical strategic objectives in line with the Mission's mandate and political needs, to engagement with the Security Council, Member States and other key regional and international partners.

(b) **Office of the Deputy Special Representative of the Secretary-General for Political Affairs and Electoral Assistance**

	+1	P-3	Political Affairs Officer	Reclassification	Baghdad	
Total	(4)					

39. The following changes are proposed for 2023:

(a) **Office of Political Affairs and Analysis (formerly Office of Political Affairs)**

- (i) Merger of the Joint Analysis Unit with the Office of Political Affairs to form the Office of Political Affairs and Analysis, with a consequent redeployment of 11 of the existing positions from the Joint Analysis Unit, namely, one P-5 (Senior Information Analyst, Political Affairs), one P-4 (Information Analyst), three P-3 (one Information Analyst, one

Political Affairs Officer and one Economic Affairs Officer), five National Professional Officers (two Information Analysts and three Associate Information Analysts) and one Local level (Administrative Assistant). This is expected to result in enhanced coordination of the Mission's political analysis and reporting on dynamics and developments, capitalizing on the comparative advantages and competencies of the two teams to achieve closer integration between political developments and in-depth research focusing on long-term trends and patterns;

- (ii) Abolishment of one position of Field Language Assistant (Local level) in Erbil and two positions of Administrative Assistants (Local level) in Baghdad. It has been determined that their functions can effectively be covered by other positions within the Office;
- (iii) Conversion of one position of Political Affairs Officer from P-3 to National Professional Officer to contribute to national capacity-building in Mosul, facilitate regular, close and up-to-date monitoring of the political and security situation in the Ninawa Governorate, including developments concerning its civil society, in particular the various minority communities in the area, communicate with relevant local stakeholders such as different armed groups, and advocate for inclusive dialogue and reconciliation for peace and stability;
- (iv) Reclassification of one position of Political Affairs Officer from P-4 to P-3 in Baghdad. This position provides dedicated support to the ongoing national political dialogue on the constitutional review, a process that requires the Mission's advice and engagement to produce a set of recommendations for political and electoral reforms as demanded by the Iraqi people. This function can be adequately performed at the P-3 level;

(b) Joint Analysis Unit

- (i) Abolishment of one position of Information Analyst (National Professional Officer) in Erbil as the position has been vacant and the functions have been adequately covered by existing staff within the Unit;
- (ii) Redeployment of the 11 remaining positions to merge with the Office of Political Affairs, as described above.

(c) Office of the Deputy Special Representative of the Secretary-General for Development and Humanitarian Affairs

40. The Deputy Special Representative of the Secretary-General for Development and Humanitarian Affairs is also the Resident Coordinator and Humanitarian Coordinator, leading the United Nations country team and coordinating international donors in responding to humanitarian crises, setting strategies, planning, implementing and monitoring both short- and long-term development programmes, as outlined in the Mission's mandate, the United Nations Sustainable Development Cooperation Framework and the integrated strategic framework.
41. The Development Support Office is responsible for the linkages between the Mission's mandate in the development area and the Mission's other mandated responsibilities. Most of the staff are field-based and responsible for supporting Mission activities at the regional and provincial levels. They identify local needs, monitor the implementation of development projects, and ensure cross-organizational coordination and information-sharing between UNAMI, the Office for the Coordination of Humanitarian Affairs and the United Nations country team in support of mandate implementation.
42. The Development Support Office supports the Deputy Special Representative of the Secretary-General for Development and Humanitarian Affairs/Resident Coordinator/Humanitarian Coordinator in her capacity within senior management of UNAMI to ensure delivery of the Mission's mandate. The Development Support Office supports United Nations agencies, funds and programmes, local governments, NGOs, tribal leaders and other actors to assist the Government of Iraq in meeting its immediate socioeconomic challenges. Similarly, the Office for the Coordination of Humanitarian Affairs supports the Deputy Special Representative in her role as the Humanitarian Coordinator for Iraq through its own staff and mechanisms, such as the humanitarian country team. Finally, the Resident Coordinator system supports the Deputy Special Representative in her role as the Resident Coordinator for Iraq by providing five specialized staff to help the Government achieve the Sustainable Development Goals. The support provided to the Mission's triple-hatted Deputy Special Representative through these separate offices is continuously reviewed and adjusted to ensure that she can deliver the mandate related to development and effectively support the Government of Iraq and its citizens, with coordinated strategies, actions and synergy in all three areas of work.

	-2	NPO	Associate Coordination Officer	Abolishment	1 in Erbil, 1 in Salah al-Din
Total	(3)				

43. The following changes are proposed for 2023:

Development Support Office

- (a) Abolishment of one position of Coordination Officer (P-4) in Erbil. Taking into account that by 2023 it is anticipated that the number of internally displaced persons and the workload for the Office in the Kurdistan region will decrease owing to the expected successful implementation of durable solutions through area-based coordination, the functions of the position will no longer be required;
- (b) Abolishment of two positions of Associate Coordination Officer (National Professional Officer), one in Erbil and one in Salah al-Din, reflective of the anticipated reduction in coordination workload by 2023 for the Office in the Kurdistan region and Salah al-Din, taking into account that the number of internally displaced persons will decrease owing to the expected successful implementation of durable solutions through area-based coordination. In this context and looking ahead, the functions and responsibilities of the position in Erbil will be redistributed to other capacities in the Baghdad Office, while the functions of the position in Salah al-Din will be covered by the Assistant Coordination Officer (National Professional Officer) within the Office.

44. Mission Support functions are under the overall responsibility of the Chief of Mission Support, who coordinates and supervises three main workstreams, namely, operations and resource management, service delivery management, and supply chain management.
45. The Chief of Mission Support acts as the principal adviser to the Head of Mission on all matters pertaining to administrative and logistical support and is supported by the Chiefs of Operations and Resource Management and the Supply Chain Management and Service Delivery Management pillars.
46. With a view to achieving greater efficiency gains through the streamlining of business processes, optimizing existing staff resources while at the same time enhancing efficiency of services provided to the client missions, taking into account the lessons learned during the COVID-19 pandemic and the completion of major projects, it is proposed that Supply Chain Management and the Service Delivery Management pillars be merged to form the Supply Chain and Service Delivery Management pillar. For 2023, it is also proposed that the Engineering and Facilities Management Section be split into the Engineering Section and the Integrated Facilities Management and Welfare Unit, with a view to achieving greater efficiency, taking into account the larger number of facilities in the compounds. The Engineering Section will focus on repairs and building maintenance, while the Integrated Facilities Management and Welfare Unit will focus on management of the office and accommodation spaces.
47. The Supply Chain and Service Delivery Management pillar will be responsible for managing and coordinating the flow of supply chain goods and services and the provision of key logistical support services to all mission components and other clients. Supply Chain and Service Delivery Management, reporting to the Chief of Mission Support, oversees the Life Support Unit, the Engineering Section, the Integrated Facilities Management and Welfare Unit, the Surface Transport Section, the Medical Services Section, the Staff Counselling Unit, the Centralized Warehousing Section, the Acquisition Planning and Requisitioning Unit, the Aviation and Movement Control Section and the Property Management Section.
48. The Operations and Resource Management pillar will continue to be responsible for the provision of general support and the management of operations and resources. The Chief of Operations and Resource Management, reporting to the Chief of Mission Support, oversees the Human Resources Section, the Financial Resourcing and Performance Unit, the Field Technology Section and the Regional offices in Erbil and Kirkuk. For 2023, it is proposed that the Procurement Section, Contracts Management Unit and Training Unit be moved to the Operations and Resource Management pillar to ensure an appropriate span of management and balanced distribution of labour between the two pillars.

	+1	NPO	Associate Environment Affairs Officer	Reassignment	From the Property Management Section
	-1	NPO	Assistant Welfare Officer	Redeployment	To the Integrated Facilities Management and Welfare Unit
	-1	LL	Travel Assistant	Redeployment	To the Human Resources Section
	-1	LL	Liaison Assistant	Redeployment	To the Human Resources Section
	-2	LL	Team Assistants	Redeployment	To the Human Resources Section
Total	(4)				

49. The following changes are proposed for 2023:

- (a) Abolishment of one position of Logistics Assistant (Local level) in Baghdad. The Logistics Unit serves as the primary point for the coordination of all Mission Support logistics activities, including full logistics support to the United Nations Guard Units deployed to the Mission area. The functions of the positions have evolved to include increased engagement with government agencies owing to the introduction of new government regulations, training of the incoming United Nations Guard Units Logistics Officer, as well as technical tasks to support the timely implementation of plans and projects. To that end, there is a need to strengthen the capacity of the Unit and it is therefore proposed that the position be abolished and an Associate Logistics Officer (National Professional Officer) be established, as set out the subparagraph below;
- (b) Establishment of one position of Associate Logistics Officer (National Professional Officer) in Baghdad in combination with the abolishment of the Logistics Assistant (Local level). Taking into account new Government regulations with regards to the visas for the United Nations Guard Units and the need for greater and timely coordination with the various Government agencies, the functions of the position have evolved to a higher level of skill set, and the proposed establishment is to provide the Office with the requisite level of capacity commensurate with the duties and responsibilities of the position, which include providing logistics and training support to the United Nations Guard Units deployed to the Mission area;
- (c) Reassignment of one position of Associate Property Control and Inventory Officer (National Professional Officer) from the Property Management Section as Associate Environment Affairs Officer (National Professional Officer) in the Environment Unit in Baghdad to enhance the capacity of the Unit to support the mission-wide environmental plans with respect to waste recycling and waste management within its compound;
- (d) Redeployment of one position of Assistant Welfare Officer (National Professional Officer) to the Integrated Facilities Management and Welfare Unit;
- (e) Redeployment of four positions, comprising one Travel Assistant (Local level) and one Liaison Assistant (Local level), both in Baghdad, and two Team Assistants (Local level) in Kuwait, to the Human Resources Section to enhance central management of the human resources related functions.

Total	22				

50. The following changes are proposed:

(a) **Human Resources Section**

- (i) Abolishment of one position of Human Resources Assistant (Local level) in Baghdad. Based on a review of the section, it has been determined that the functions of the positions can be adequately covered by existing staff within the Section;
- (ii) Conversion of one position of Human Resources Assistant (Field Service) to Associate Human Resources Officer (National Professional Officer) to contribute to local capacity-building in Baghdad. The incumbent will provide capacity to manage client services, act as a dedicated resource to conduct in-depth research and drafting of analysis and responses, advise clients on human resources regulations, rules and policies to ensure they are properly applied, and provide support in the implementation of policies and decision-making through the provision of advisory services on the whole spectrum of operational human resources management issues;
- (iii) Abolishment of one position of Human Resources Assistant (Local level) in Erbil in response to the need to have a more strengthened capacity in response to the need to provide advice to clients with respect to recruitment and selection and provide support to programme managers with respect to with staffing development. To that end, it is proposed that the position be abolished and an Associate Human Resources Officer (National Professional Officer) be established;
- (iv) Establishment of one position of Associate Human Resources Officer (National Professional Officer) in Erbil in combination with the abolishment of the Human

Resources Assistant (Local level) to enhance the Section's ability to meet the anticipated increase in both the volume and complexity of the workload. The incumbent will be responsible for all matters related to client services, including the processing of applications, assisting with the recruitment activities, providing clients with information about Umoja time management and providing support in the implementation of policies and decision-making through the provision of advisory services on the whole spectrum of operational human resources management issues;

- (v) Redeployment of four positions, comprising one Travel Assistant (Local level), one Liaison Assistant (Local level) and two Team Assistants (Local level) from the Office of the Chief of Mission Support, as described in para. 49 (d) above;
- (b) **Field Technology Section.** Abolishment of four positions, comprising one Telecommunications Technician (Field Service), one Information System Assistant (Field Service), one Information Technology Assistant (Local level) and one Telecommunication Assistant (Local level) in Baghdad. Following an internal review of the Mission's mode of operations, which has shifted away from service desk and end user support towards greater utilization of virtual, cloud and enterprise solutions, as well as an increase in use of information and communications technology self-service support solution and various collaboration tools in the mission, it was determined that the functions of these positions could be effectively discharged by other existing staff;
- (c) **Financial Resourcing and Performance Unit**
 - (i) Reassignment of one position of Administrative Assistant (Local level) as a Finance Assistant (Local level) to align the functions performed by the position;
 - (ii) Redeployment of one position of Finance and Budget Officer (P-3) from Erbil to Baghdad to support the delivery of the financial management services, advice and stewardship of the mission's financial resources;
- (d) **Procurement Section**
 - (i) Realignment of the Procurement Section, comprising 16 positions (1 P-4, 2 FS, 1 NPO and 12 LL), from the Supply Chain Management pillar;
 - (ii) Redeployment of one Procurement Assistant (Field Service) from Baghdad to Erbil and one position of Procurement Assistant (Local level) from Kuwait to Erbil to strengthen the procurement team in the Kurdistan Region amid increasing operations in Mosul;
- (e) **Contracts Management Unit**
 - (i) Realignment of the Contracts Management Unit, comprising two positions (1 P-3 and 1 Local level), from the former Supply Chain Management pillar;
 - (ii) Abolishment of one position of Administrative Assistant (Local level) as the current position level is not commensurate with the evolving needs of the Unit for a more strengthened capacity to meet the increase in the volume and workload of the Unit;
 - (iii) Establishment of one position of Assistant Administrative Officer (National Professional Officer) in Baghdad, in combination with the abolishment of the Administrative Assistant (Local level), to strengthen the Unit's capacity with respect to the monitoring and management of critical contracts, taking into account the increase in volume, value and complexity of the mission's contracts;
- (f) **Training Section.** Realignment of the Training Section, comprising five positions (1 P-4, 1 FS, 1 NPO and 2 LL), from the former Supply Chain Management pillar.

Total	(36)				

51. The following changes are proposed for 2023:

(a) **Front Office**

- (i) Merger of the Supply Chain Management pillar with the Service Delivery Management pillar to form the Supply Chain and Service Delivery Management pillar, as described in paragraph 46 above. In this connection, it is proposed that the Aviation and Movement Control Section, the Centralized Warehousing Section, the Property Management Section and the Acquisition Planning and Requisition Unit currently under the Supply Chain Management pillar be subsumed into the new proposed pillar. In addition, to ensure a balanced distribution of labour between the two pillars, it is further proposed that the Procurement Section (16 positions), Contracts Management Unit (2 positions) and Training Section (5 positions) be realigned to the Operations and Resource Management Pillar, as set out in paragraphs 50 (d)–(f) above;
- (ii) Abolishment of one position of Chief of Supply Chain Management (P-5) in Baghdad due to the consolidation of two previously separate pillars;

(b) **Engineering Section**

- (i) Splitting of the Engineering and Facilities Management Section into the Engineering Section, comprising 35 existing positions (1 P-4, 2 P-3, 2 Field Service, 3 National Professional Officers and 27 Local level); and the Integrated Facilities Management and Welfare Unit, comprising 17 existing positions (4 Field Service and 13 Local level);
- (ii) Abolishment of one position of Facilities Management Assistant (Field Service) in Baghdad, as it has been determined that the functions can be effectively covered by the other positions within the section;
- (iii) Abolishment of two Local level positions, comprising one Mail Assistant and one Generator Mechanic in Erbil and in Baghdad, respectively, as the functions of both positions can be effectively covered by other positions within the Section;
- (iv) Redeployment of one position of Engineering Technician (Field Service) from Erbil to Mosul to supervise and manage the United Nations premises, including the allocation of space for offices and accommodation, booking and registration of occupants, overseeing the maintenance of accommodations, offices and common areas and managing the contracts for the services provided;

(c) **Integrated Facilities Management and Welfare Unit.** Redeployment of one position of Assistant Welfare Officer (National Professional Officer) from the Office of the Chief of Mission Support, as noted in para 49 (c) above;

(d) **Surface Transport Section**

- (i) Abolishment of four positions: one Driver (Local level) and three Heavy Vehicle Operators (Local level), including two in Baghdad and one in Erbil, as these positions have been vacant and the functions have been effectively covered by other positions within the section;
- (ii) Conversion of one position of Vehicle Technician (Field Service) to Assistant Transport Officer (National Professional Officer) in Baghdad, and one position of Transport Assistant (Field Service) to Transport Assistant (Local level) in Erbil, to perform the functions of a transport fleet maintenance manager, and to promote nationalization;
- (iii) Redeployment of one position of Transport Assistant (Field Service) from Baghdad to Erbil to bolster the management of the Transport team in the Kurdistan Region and the growing operations in Mosul;

- (e) **Life Support Section**
- (i) Abolishment of one position of Administrative Assistant (Local level) in Baghdad as this position has been vacant and the functions have been effectively covered by other positions within the section;
 - (ii) Redeployment of one position of Supply Assistant (Local level) from Baghdad to Mosul to support the United Nations compound in Mosul;
- (f) **Aviation and Movement Control Section**
- (i) Abolishment of one position of Movement Control Assistant (Local level) in Baghdad as this position has been vacant and the functions have been effectively covered by other positions within the section;
 - (ii) Conversion of one Movement Control Assistant (Field Service) to Assistant Movement Control Officer (National Professional Officer) in Baghdad, to promote nationalization;
 - (iii) Redeployment of one position of Movement Control Assistant (Local level) from Erbil to Kirkuk to provide a dedicated representative on the ground to liaise with airport authorities and oversee ground handling operations;
- (g) **Property Management Section.** Reassignment of one position of Associate Property Control and Inventory Officer (National Professional Officer) as Associate Environment Affairs Officer (National Professional Officer) in the Environment Unit of the Office of the Chief of Mission Support in Baghdad, as described in para 49 (b) above;
- (h) **Centralized Warehousing Section**
- (i) Abolishment of one position of Receiving and Inspecting Assistant (Field Service) in Erbil and two positions of Supply Assistant (Local level), one in Erbil and one in Baghdad, as the functions can be adequately covered by other positions within the section;
 - (ii) Conversion of one Supply Assistant (Field Service) to Associate Supply Officer (National Professional Officer) in Baghdad to promote nationalization.

Kuwait Joint Support Office	-1	FS	Finance Assistant	Abolishment	Kuwait
	-2	LL	Finance Assistant	Abolishment	Kuwait
Total	(3)				

53. The following changes are proposed for 2023: Abolishment of three positions, comprising one Finance Assistant (Field Service) and two Finance Assistants (Local level), as part of an effort by the Secretariat to align the funding sources of the Kuwait Joint Support Office to better reflect the workload and the client base that the Support Office services. Such an exercise aims to achieve a more balanced distribution of the workforce of the Support Office among the special political missions, with proposals being made to reduce a total of six positions from UNAMA and UNAMI, and to establish these positions in four other missions, namely, the Office of the Special Envoy of the Secretary-General for Yemen, UNITAD, the United Nations Verification Mission in Colombia and the United Nations Mission to Support the Hudaydah Agreement.

Medical	255.7	324.5	334.9	–	10.4
Other supplies, services and equipment	682.8	2 022.9	1 021.1	–	(1 001.8)
Subtotal, category III	13 160.3	13 199.4	16 474.6	2 520.0	3 275.2
Total	95 865.8	97 673.2	97 104.5	2 520.0	(568.7)

4. Analysis of resource requirements

Military and police personnel costs

(Thousands of United States dollars)

	Expenditures 2021	Appropriation 2022	Total requirements 2023	Variance 2023 vs. 2022
Military contingents	5 163.9	5 140.3	4 939.7	(200.6)

54. Resources amounting to \$4,939,700 are proposed to provide for the deployment of 245 military contingent personnel and includes requirements for: (a) standard troop cost reimbursement (\$2,740,400); (b) travel on emplacement, rotation and repatriation (\$611,800); (c) recreational leave allowance (\$50,900); (d) daily allowance (\$76,500); (e) death and disability compensation (\$64,700); (f) rations (\$1,319,200); (g) major equipment (\$5,500); and (h) freight and deployment of contingent-owned equipment (\$70,700). A vacancy rate of 1 per cent has been applied.

55. The decrease is attributable mainly to reduced costs for rations based on the new contract rates, offset by increased requirements for travel on emplacement, rotation and repatriation based on the latest letter of assist from the Government of Australia for the rotation of the Guard Unit from Fiji.

Civilian personnel costs

(Thousands of United States dollars)

	<i>Expenditures</i> 2021	<i>Appropriation</i> 2022	<i>Total requirements</i> 2023	<i>Variance</i> 2023 vs. 2022
International staff	51 324.9	53 497.8	51 301.3	(2 196.5)

56. Resources amounting to \$51,301,300 are proposed to provide for salaries (\$25,635,400), common staff costs (\$22,427,200) and danger pay (\$3,238,700) for the deployment of 278 international positions (1 Under-Secretary-General, 2 Assistant Secretaries-General, 1 D-2, 6 D-1, 16 P-5, 45 P-4, 51 P-3, 5 P-2 and 151 Field Service). A vacancy rate of 8 per cent has been applied to the cost estimates.
57. The decrease is attributable mainly to the abolishment of nine international positions (1 P-5, 1 P-4, 2 P-3 and 5 Field Service), reclassification of three positions (1 P-5 to P-4, 1 P-4 to P-2, and 1 P-4 to P-3) and the conversion of six international staff positions (1 P-3 and 5 Field Service) to national staff (5 National Professional Officer and 1 Local level).

(Thousands of United States dollars)

	<i>Expenditures</i> 2021	<i>Appropriation</i> 2022	<i>Total requirements</i> 2023	<i>Variance</i> 2023 vs. 2022
National staff	26 133.8	25 773.6	24 324.2	(1 449.6)

58. Resources amounting to \$24,324,200 are proposed to provide for salaries (\$16,898,100), common staff costs (\$5,248,600) and danger pay (\$2,177,500) for the deployment of 493 national positions (122 National Professional Officers and 371 Local level). Vacancy rates of 9 per cent and 7 per cent have been applied for continuing National Professional Officer and Local level positions, respectively, while a vacancy rate of 50 per cent has been applied to the three positions proposed for establishment in 2023.
59. The decrease is attributable mainly to: (a) the application of a lower percentage of common staff costs of 27 per cent for National Professional Officer positions for 2023, compared with 34 per cent applied to the 2022 budget, and 32 per cent for Local level positions for 2023, compared with 39 per cent applied to the 2022 budget; and (b) the abolishment of 25 national staff positions (4 National Professional Officers and 21 Local level). This decrease is offset by higher requirements for danger pay based on the latest issued monthly danger pay rate.

(Thousands of United States dollars)

	<i>Expenditures</i> 2021	<i>Appropriation</i> 2022	<i>Total requirements</i> 2023	<i>Variance</i> 2023 vs. 2022
United Nations Volunteers	82.9	61.9	64.7	2.8

60. Resources amounting to \$64,700 are proposed to provide for the deployment of two national United Nations Volunteers. A vacancy rate of 0 per cent has been applied.
61. The increase is attributable mainly to the higher requirements for volunteer living allowance and well-being differential based on the latest standard rates provided by the United Nations Volunteers Programme.

Operational costs

(Thousands of United States dollars)

	<i>Expenditures 2021</i>	<i>Appropriation 2022</i>	<i>Total requirements 2023</i>	<i>Variance 2023 vs. 2022</i>
Consultants and consulting services	74.3	136.8	325.2	188.4

62. Resources amounting to \$325,200 are proposed to provide for individual consultants and consultant services for the provision of technical and specialized expertise on electoral issues, energy, conflict prevention, counter-terrorism, mental health and training for Mission personnel.
63. The increase is attributable mainly to the additional requirement for individual consultants in the Joint Analysis Unit with greater focus on the energy sector and armed groups, as well as requirements for consulting services for the Staff Counselling Unit, with focus on psychosocial services for the promotion of the mental health of mission personnel.

(Thousands of United States dollars)

	<i>Expenditures 2021</i>	<i>Appropriation 2022</i>	<i>Total requirements 2023</i>	<i>Variance 2023 vs. 2022</i>
Official travel	351.3	773.0	1 133.0	360.0

64. Resources amounting to \$1,133,000 are proposed to provide for official travel mainly within the mission area for consultations with government counterparts, donors and non-governmental organizations, overseeing regional and field offices, political consultations with local entities and human rights assessment missions. Resources also include requirements for travel outside the mission area for official travel of the Special Representative of the Secretary-General and senior members of her team for high-level political consultations with various entities, meetings with high-level counterparts at United Nations Headquarters and briefings to the Security Council (\$720,400) and training-related travel (\$412,600).
65. The increase is attributable mainly to: (a) an increase in the number of in-person meetings, especially for within-mission travel, reflective of the mission's response to a significant lesson learned during the COVID-19 pandemic, which is the importance for the Mission to be present on the ground, in communities and with national counterparts, actively responding to the challenges that its constituents face, particularly to effectively deliver on good offices, reconciliation dialogues, and human rights monitoring; and (b) increased requirements for training-related travel for requisite in-person training programmes required to strengthen the substantive and technical capacity of Mission staff in various fields.

(Thousands of United States dollars)

	<i>Expenditures 2021</i>	<i>Appropriation 2022</i>	<i>Total requirements 2023</i>	<i>Variance 2023 vs. 2022</i>
Facilities and infrastructure	4 100.1	3 488.2	6 746.4	3 258.2

66. Resources amounting to \$6,746,400 are proposed to provide for the acquisition of: (a) engineering supplies (\$50,800); (b) prefabricated facilities (\$72,000); (c) generators and electrical equipment (\$154,000); (d) furniture (\$35,000); (e) office and other equipment (\$50,000); (f) safety and security equipment (\$377,700); (g) rental of premises (\$293,500); (h) utilities and waste disposal services (\$678,100); (i) maintenance services (\$1,746,200); (j) security services (\$354,000); (k) construction, alteration, renovation and major maintenance (\$2,560,000); (l) stationery and office supplies (\$89,000); (m) spare parts and supplies (\$85,700); (n) construction material and field defence

supplies (\$40,400); (o) petrol, oil and lubricants (\$94,000); and (p) sanitation and cleaning materials (\$66,000).

67. The increase is attributable mainly to higher requirements for: (a) construction, alteration, renovation and major maintenance for repair of the UNAMI building in Kuwait to ensure continuous usability of the building for the health and safety of personnel, as assessed and recommended by structural engineers; (b) maintenance services owing to the transfer of a provision for cleaning and laundry services for the United Nations Guard Units which were previously provided for under other supplies, services and equipment, offset in part by reduced requirements for petrol, oil and lubricants.

(Thousands of United States dollars)

	<i>Expenditures 2021</i>	<i>Appropriation 2022</i>	<i>Total requirements 2023</i>	<i>Variance 2023 vs. 2022</i>
Ground transportation	1 174.8	535.5	1 056.5	521.0

68. Resources amounting to \$1,056,500 are proposed to provide for: (a) acquisition of vehicles (\$520,000); (b) rental of vehicles (\$38,700); (c) repairs and maintenance (\$10,000); (d) liability insurance (\$21,400); (e) spare parts (\$350,700); and (f) petrol, oil and lubricants (\$115,700).
69. The increase is attributable mainly to requirements for the replacement of two medium armoured buses that are past their life expectancy. The replacement will ensure continued operational readiness and safety for the transport of staff.

(Thousands of United States dollars)

	<i>Expenditures 2021</i>	<i>Appropriation 2022</i>	<i>Total requirements 2023</i>	<i>Variance 2023 vs. 2022</i>
Air operations	3 318.3	3 226.1	3 150.5	(75.6)

70. Resources amounting to \$3,150,500 are proposed to provide for the Mission's air transport fleet, which comprises two fixed-wing aircraft, operating an estimated 925 flight-hours, as follows: (a) services (\$7,400); (b) landing fees and ground handling charges (\$173,300); (c) air crew subsistence allowance (\$8,800); (d) petrol, oil and lubricants (\$490,300); (e) rental and operation (\$2,454,800); and (f) liability insurance (\$15,900).
71. The decrease is attributable mainly to the cost-sharing of one fixed-wing aircraft (Learjet 60) with UNITAD, offset in part by higher requirements for petrol, oil and lubricants due to an increase in fuel prices.

(Thousands of United States dollars)

	<i>Expenditures 2021</i>	<i>Appropriation 2022</i>	<i>Total requirements 2023</i>	<i>Variance 2023 vs. 2022</i>
Communications and information technology	3 203.2	2 692.4	2 707.0	14.6

72. Resources amounting to \$2,707,000 are proposed to provide for: (a) communications and information technology equipment (\$143,300); (b) telecommunications and network services (\$486,700); (c) maintenance of communications and information technology equipment and support services (\$1,219,300); (d) spare parts (\$232,300); (e) software, licences and fees (\$502,300); and (f) public information and publication services (\$123,100).
73. The increase is attributable mainly to higher requirements for software, licences and fees owing to new requirement for network infrastructure licence, offset in part by reduced requirements for spare

parts due to stock availability, as well lower requirements for maintenance of communications and information technology equipment and support services owing to lower contractual rates for Internet access service.

(Thousands of United States dollars)

	<i>Expenditures 2021</i>	<i>Appropriation 2022</i>	<i>Total requirements 2023</i>	<i>Variance 2023 vs. 2022</i>
Medical	255.7	324.5	334.9	10.4

74. Resources amounting to \$334,900 are proposed to provide for acquisition of equipment (17,000); medical services (\$170,800) and supplies (\$147,100).
75. The increase is attributable mainly to the acquisition of medical equipment, offset by reduced requirement for medical supplies.

(Thousands of United States dollars)

	<i>Expenditures 2021</i>	<i>Appropriation 2022</i>	<i>Total requirements 2023</i>	<i>Variance 2023 vs. 2022</i>
Other supplies, services and equipment	682.8	2 022.9	1 021.1	(1 001.8)

76. Resources amounting to \$1,021,100 are proposed to provide for: (a) welfare (\$63,900); (b) training fees, supplies and services (\$123,000); (c) official functions (\$25,000); (d) other hospitality (\$25,000); (e) general insurance (\$45,000); (f) bank charges (\$72,200); (g) claims/write-offs/adjustments (\$8,000); (h) other freight and related costs (\$339,700); (i) rations (\$119,100); (j) individual contractual services (\$149,300); and (k) other services (\$50,900).
77. The decrease is attributable mainly to the transfer of a provision for cleaning and laundry services for the United Nations Guard Units, which for 2023 are being provided for under facilities and infrastructure.

II. Status of the planned renovation project for an integrated headquarters compound in Baghdad

78. The trust fund in support of the construction and renovation of the United Nations Integrated Compound in Baghdad was established for the construction of an integrated compound in Baghdad that would accommodate all the United Nations agencies, funds and programmes operating in Iraq.
79. On 31 March 2010, the trust fund received \$25,000,000 from the Government of Iraq and \$760,600 from the Governments of the Czech Republic, Greece, Italy, Luxembourg, Poland and Sweden, through the transfer of their funds from the former distinct entity trust fund. In June 2011, a further contribution of \$25,000,000 was received from the Government of Iraq, bringing total contributions received by the trust fund to \$50,760,600.
80. As of February 2022, the trust fund had allotted a cumulative amount of \$54,699,200, including interest earned on funds totalling to \$3,938,600, of which \$54,272,000 had been expended on various renovation projects, leaving an unspent balance of \$427,200.
81. All the trust fund projects have been successfully completed and in 2022 the mission will finalize the last project funded by the trust fund, the refurbishment of the main office building. The projects are all located in Baghdad.

Annex I

Summary of follow-up action taken to implement the requests and recommendations of the Advisory Committee on Administrative and Budgetary Questions endorsed by the General Assembly

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions (A/76/7/Add.6)

The Advisory Committee considers that there is a need for greater clarity and more detailed information on the Mission's plans for outsourcing the staff counselling services, and recommends that the General Assembly request the Secretary-General to provide, in the next budget proposal, a cost-benefit analysis as well as information on similar experiences in other missions, including the possibility of strengthening confidentiality (para. 14).

The Mission has conducted an analysis that shows that replacing the former P-3 Staff Counsellor position with consulting services is not only cost-effective, but also strengthens the support provided by the Staff Counselling Unit.

First, the consulting services cost \$81,700 per year, which, compared with the costs for the former P-3 position of \$173,300, reflects an annual savings of \$91,600.

Second, the approach improves the overall services to staff, offering them access to eight counselling sessions per event with no limit on the number of events. Under this arrangement, staff can choose from eight counsellors, who possess doctorates and a minimum of 10 years of experience in counselling, and can seek support in the language of their choice, such as Arabic, English, Kurdish, etc.

Third, the approach mitigates the capacity constraints of the Unit and ensures the adequate coverage of all duty stations in the Mission, which was not previously possible with one staff counsellor.

In terms of strengthening confidentiality, the Mission has taken measures such as the mandatory use of a secure mobile application, a designated confidential email address and a secure global case management system. In addition, the consulting company is required to adhere to professional standards with regard to non-disclosure of private and personal information.

The outsourcing approach has previously been adopted at the Office of the United Nations High Commissioner for Refugees. So far, no other missions have replicated this approach, as each evaluates its own specific operating environment and staff needs in order to determine the best suitable approach.

Brief description of the recommendation

The Advisory Committee again welcomes the Mission's efforts to promote the nationalization of positions, including in the area of development support, and encourages the Mission to explore additional opportunities for nationalization (para. 17).

The Advisory Committee trusts that all vacant posts will be filled expeditiously, and that an update on the recruitment status will be provided to the General Assembly at the time of its consideration of the present report and in the next budget submission (para. 18).

The Advisory Committee is not convinced that the proposed level of resources is adequately justified, and considers that the Secretary-General should provide greater clarity as well as more detailed and disaggregated information on the consumption of petrol, oil and lubricants by UNAMI and other United Nations entities in Iraq, the amounts borne by UNAMI and the costs to be recovered, as well as the mechanisms for such recovery, including the possibility for a minimum cost recovery level (para. 25).

The Advisory Committee trusts that the Secretary-General will provide more detailed information regarding cost recovery to the General Assembly at the time of its consideration of the present report and in the context of future budget submissions (para. 29).

The Mission was also scaling up its technical assistance to the Independent High Electoral Commission and implementing one of the largest United Nations electoral projects worldwide, entirely funded through extrabudgetary resources and financially administered by the United Nations Development Programme. The Advisory Committee looks forward to receiving updated information in the context of the next budget submission (para. 30).

Action taken to implement the recommendation

The mission continues to review functions performed by international staff that can be considered nationalized. In 2023, the mission is proposing to nationalize six positions.

The Mission has taken measures to ensure that vacant positions are filled expeditiously. The Mission reviewed the positions in its approved staffing complement that have been vacant and, if determined to be not required, they are proposing for abolishment 34 positions, with the aim that only positions required for the fulfilment of the Mission's mandate are retained.

All operational support cost recoveries, including for petrol, oil and lubricants, are based on a cost recovery memorandum of understanding signed by UNAMI and each United Nations agency. The memorandum of understanding on a cost recovery mechanism stipulates the amount of cost recovery, which is based on the monthly UNAMI sales orders processed.

The Mission frequently reviews the calculation of cost recovery and ensures that the charges accurately reflect the costs. Disaggregated information on the consumption of petrol, oil and lubricants for ground transport, and the costs recovered for 2021, is presented below:

<i>Mission</i>	<i>Consumption</i>		<i>Expenditure</i>	
	<i>(litres)</i>	<i>Percentage</i>	<i>(United States dollars)</i>	<i>Percentage</i>
UNAMI	242 418	63	170 500	64
United Nations country team	143 861	37	95 600	36
Total	386 279	100	266 100	100

UNAMI successfully reacted swiftly to its mandate within the limited time available, deploying a total of 90 monitoring teams in all 18 Iraqi governorates on election day. UNAMI, in collaboration with UNDP, contracted 150 United Nations international electoral experts and 550 elections support personnel through UNOPS that staffed and supported the 90 monitoring teams. The UNOPS-administered project was funded through extrabudgetary resources and in-kind logistical and technical contributions from UNAMI, totalling \$12 million. In addition, UNDP electoral assistance to Iraq contributed \$33.7 million in support of election preparation efforts. With these integrated efforts, the United Nations system in Iraq significantly bolstered the Commission's technical capacity to plan and implement the Iraqi 2021 elections.

Brief description of the recommendation

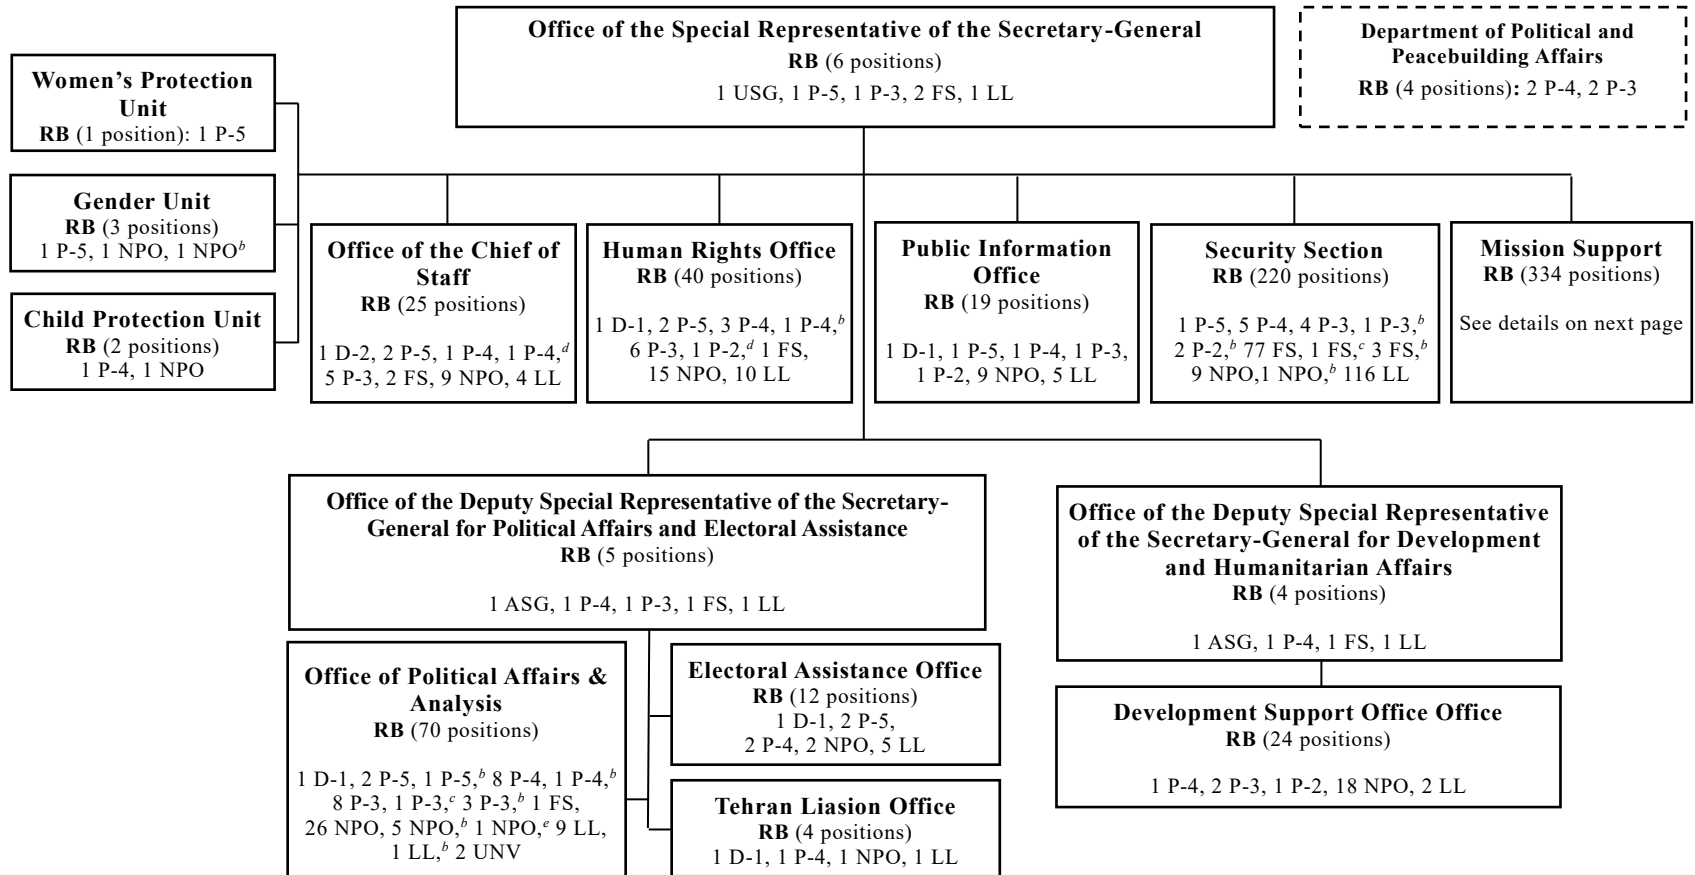

Action taken to implement the recommendation

Upon enquiry, the Advisory Committee was informed that, as at 30 June 2021, 79 per cent of UNAMI civilian personnel were male and 21 per cent were female, reflecting no significant change in the gender representation over the past three years. The Advisory Committee trusts that greater efforts will be made to address the gender imbalance in the staffing of UNAMI (para. 31).

In July 2021, UNAMI updated its gender parity implementation plan to consider the relevant and appropriate recommendations of the field enabling environment guidelines on gender parity issued in March the same year to support missions' efforts at meeting gender parity targets. The UNAMI gender parity working group, chaired by the Deputy Special Representative of the Secretary-General for Political Affairs and Electoral Assistance with the membership of the Office of Chief of Staff, Office of Chief of Mission Support, Human Resources Section and Gender Unit, continues to monitor and report on meeting gender parity goals.

Foreword

Over the course of 2023, the Office for Disarmament Affairs will ensure that it remains agile and fit for purpose to support disarmament in all its aspects. The Office will continue to support Member States during negotiations and deliberations by providing expertise and practical solutions, while building trust.

The programme continued to face challenges posed by the coronavirus disease (COVID-19) pandemic. The primary impact on multilateral disarmament was the disruption of scheduled events and meetings. While the tenth Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons was again postponed to 2022, other meetings, such as those of the First Committee, were conducted either virtually or with some limitations on the number of physical meetings. Other meetings were held virtually or in a hybrid format.

Concerns remain over the continuing threat posed by nuclear weapons, particularly with the growing strategic rivalry and tension among some of the major powers. Global concerns regarding other weapons of mass destruction, particularly chemical weapons, remained significant. The COVID-19 pandemic further highlighted the importance of adequate preparedness to prevent and respond to biological risks. Rising military spending and the continuing proliferation and widespread availability of conventional arms, including small arms and light weapons, remain areas of concern. The threats and challenges from emerging technologies with potentially destabilizing applications in the areas of autonomy, information and telecommunications technology and outer space need to be addressed and the benefits of these technologies fully realized.

The Office for Disarmament Affairs will continue to efficiently deliver on its mandates and assist Member States in supporting their disarmament, arms control and non-proliferation efforts.

(Signed) **Nakamitsu Izumi**
Under-Secretary-General and High Representative for Disarmament Affairs

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 4.1 The Office for Disarmament Affairs continues to be responsible for supporting multilateral efforts aimed at achieving the goal of general and complete disarmament under strict and effective international control. Its mandate derives from the priorities established in relevant General Assembly resolutions and decisions in the field of disarmament, including the final document of the tenth special session of the General Assembly, the first special session devoted to disarmament (resolution *S-10/2*). Weapons of mass destruction, particularly nuclear weapons, remain a major concern owing to their destructive power and the continuing threat posed to humanity. The deteriorating global strategic environment is also exacerbating such concerns. Global concerns regarding other weapons of mass destruction, including chemical weapons, remained significant, while the prolonged pandemic further demonstrated the importance of adequate preparedness to prevent and respond to biological risks. The Office also provides support for combating the illicit trade in small arms and light weapons and works on the identification and analysis of emerging issues, including new technologies, and their impact on international security.

Strategy and external factors for 2023

- 4.2 The Office for Disarmament Affairs will ensure full implementation of its legislative mandates and compliance with United Nations policies and procedures. The Office will continue to support multilateral negotiations and deliberations, and provide expertise and practical solutions, while building confidence and trust. It will continue to facilitate the reconciliation of disparate positions among Member States resulting from a volatile international security environment. The Office will mitigate the risks it faces in carrying out its mandate and will continue to implement its strategic plan, first launched in 2021 and scheduled to run through 2025.
- 4.3 The Office will continue to ensure that it has the capacity and capability to deliver its mandate effectively. The Office will be guided by existing frameworks, including relevant elements of the Sustainable Development Goals and the Secretary-General's peace and security and development reforms, as well as his Agenda for Disarmament, to find synergies and enhance collective efforts.
- 4.4 Reflecting the importance of continuous improvement and responding to the needs of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the coronavirus disease (COVID-19) pandemic. Examples of best practices and lessons learned include the organization of informal virtual or hybrid meetings. While such virtual modalities proved successful for supporting business continuity and led to a wider audience engagement, there were challenges involved related to their sustainability and suitability for intricate and complex negotiations and issues. In applying the lessons for future meetings, the programme will duly consider the needs of Member States for the respective sessions, including holding hybrid sessions upon request. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.
- 4.5 With regard to cooperation with other entities at the global, regional, national and local levels, the Office will continue to enhance cooperation and coordination with other international, regional and subregional organizations in the areas of disarmament, arms control and non-proliferation. Through its three regional centres and the liaison office in Vienna, the Office continues to strengthen global disarmament initiatives by promoting, facilitating and strengthening regional cooperation among

States and regional and subregional organizations and arrangements. The Office will enhance its partnerships with a diverse range of stakeholders in order to achieve the planned results. Through such partnerships, the Office will be able to effectively meet regional and national disarmament and arms control priorities, while simultaneously building greater local disarmament capacity and enhancing the viability of regional frameworks.

- 4.6 With regard to inter-agency coordination and liaison, the Office will continue to pursue cohesive approaches within the United Nations peace and security pillar, as well as with other specialized United Nations agencies and other entities. Through existing processes and tools, the Office will coordinate with other United Nations entities to enable a holistic approach to addressing risks associated with arms, thereby contributing to conflict prevention, the protection of civilians and international peace and security. It will also enhance its partnership network within the United Nations system and among Member States to raise awareness of the potential multifaceted linkages between disarmament and development. The Office will also continue efforts to achieve its diversity and gender equality targets.
- 4.7 With regard to the external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) The political environment is supportive of disarmament efforts;
 - (b) Political developments relating to international peace and security are conducive to the facilitation of negotiations on new arms limitation and disarmament agreements;
 - (c) Member States are willing to implement the recommendations, resolutions and decisions of relevant meetings and conferences;
 - (d) International organizations and entities provide cooperation;
 - (e) There is support to national institutions for advancing gender equality and mainstreaming a gender perspective.
- 4.8 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate, and promotes an age-, disability- and gender-sensitive approach to its work, in line with organizational mandates and policies for mainstreaming a gender perspective into all policies and programmes in the United Nations system (see Economic and Social Council resolution 2011/6), the United Nations Disability Inclusion Strategy (see General Assembly resolution 74/144) and associated departmental action plans. It will continue to implement its gender equality policy and promote disarmament linkages to the women and peace and security agenda, and support the collection and analysis of data disaggregated by sex and age, and gender education on issues related to gender equality and disarmament, including the impact of weapons and disarmament on different people, as an integral part of the activities of its five subprogrammes. The Office will continue to encourage the incorporation of the perspective of young people and support diversity, inclusion, youth engagement, gender equality and the empowerment of women into disarmament processes, policies and programmes.

Programme performance in 2021

Impact of the pandemic

- 4.9 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular through the postponement of the tenth Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons to 2022. Some in-person meetings were held, with limitations on the number of such meetings that could take place, while other meetings were conducted virtually or through the hybrid format. Under subprogramme 1, the Group of Governmental Experts to further consider nuclear disarmament verification issues had to reschedule its meetings originally planned for 2021 to 2022 and its meetings originally planned for 2022 to 2023. Under subprogramme 3, although the Seventh Biennial Meeting of States to Consider the

Implementation of the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects was held in 2021 following its postponement in 2020, a decision was taken to hold the Eighth Biennial Meeting of States in 2022.

Legislative mandates

4.10 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

S-10/2	Final Document of the Tenth Special Session of the General Assembly	62/272	The United Nations Global Counter-Terrorism Strategy
59/95	Improving the effectiveness of the methods of work of the First Committee	68/33	Women, disarmament, non-proliferation and arms control

Security Council resolutions

1325 (2000)	1977 (2011)
1540 (2004)	2055 (2012)
1673 (2006)	2117 (2013)
1810 (2008)	2118 (2013)
1887 (2009)	2475 (2019)

Subprogramme 1

Multilateral negotiations and deliberations on disarmament and arms limitation

General Assembly resolutions and decisions

72/23	Prohibition of the development and manufacture of new types of weapons of mass destruction and new systems of such weapons: report of the Conference on Disarmament	76/47	Implementation of the Convention on Cluster Munitions
		76/62	Report of the Conference on Disarmament
		76/64	Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons Which May Be Deemed to Be Excessively Injurious or to Have Indiscriminate Effects
74/50; decision 75/516	Nuclear disarmament verification		
75/74	United Nations disarmament fellowship, training and advisory services	76/67	Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction
76/26	Implementation of the Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on Their Destruction		

Subprogramme 2

Weapons of mass destruction

General Assembly resolutions and decisions

42/37 C	Measures to uphold the authority of the 1925 Geneva Protocol and to support the conclusion of a chemical weapons convention	55/283	Cooperation between the United Nations and the Organization for the Prohibition of Chemical Weapons
		64/35	International Day against Nuclear Tests
42/38 C	Notification of nuclear tests	69/44	The Hague Code of Conduct against Ballistic Missile Proliferation
54/280	Agreement to regulate the relationship between the United Nations and the Preparatory Commission for the Comprehensive Nuclear-Test-Ban Treaty Organization	70/28	2020 Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons and its Preparatory Committee
		72/31	Taking forward multilateral nuclear disarmament negotiations

Section 4 Disarmament

73/43	Measures to uphold the authority of the 1925 Geneva Protocol	76/36	Follow-up to the 2013 high-level meeting of the General Assembly on nuclear disarmament
73/44	Mongolia's international security and nuclear-weapon-free status	76/48	Universal Declaration on the Achievement of a Nuclear-Weapon-Free World
73/71	Fourth Conference of Nuclear-Weapon-Free Zones and Mongolia, 2020	76/53	Follow-up to the advisory opinion of the International Court of Justice on the legality of the threat or use of nuclear weapons
Decision 73/546	Convening a conference on the establishment of a Middle East zone free of nuclear weapons and other weapons of mass destruction	76/55	Transparency and confidence-building measures in outer space activities
76/20	Establishment of a nuclear-weapon-free zone in the region of the Middle East	76/63	The risk of nuclear proliferation in the Middle East
76/27	Reducing nuclear danger	76/231	Reducing space threats through norms, rules and principles of responsible behaviours
76/28	Measures to prevent terrorists from acquiring weapons of mass destruction		

**Subprogramme 3
Conventional arms***General Assembly resolutions and decisions*

74/24	Objective information on military matters, including transparency of military expenditures	76/42	Conventional arms control at the regional and subregional levels
74/53	Transparency in armaments	76/232	The illicit trade in small arms and light weapons in all its aspects
75/42	Effects of the use of armaments and ammunitions containing depleted uranium	76/233	Problems arising from the accumulation of conventional ammunition stockpiles in surplus
75/54	Information on confidence-building measures in the field of conventional arms	Decision 76/516	Countering the threat posed by improvised explosive devices
76/37	Relationship between disarmament and development		

**Subprogramme 4
Information and outreach***General Assembly resolutions and decisions*

47/53 D	World Disarmament Campaign	76/24	Role of science and technology in the context of international security and disarmament
Decision 54/418	Advisory Board on Disarmament Matters		
75/32	Advancing responsible State behaviour in cyberspace in the context of international security	76/38	Convening of the fourth special session of the General Assembly devoted to disarmament
75/61	United Nations study on disarmament and non-proliferation education	76/39	Observance of environmental norms in the drafting and implementation of agreements on disarmament and arms control
75/80	United Nations Disarmament Information Programme	76/40	Promotion of multilateralism in the area of disarmament and non-proliferation
76/19	Developments in the field of information and telecommunications in the context of international security, and advancing responsible State behaviour in the use of information and communications technologies	76/45	Youth, disarmament and non-proliferation

**Subprogramme 5
Regional disarmament**

General Assembly resolutions and decisions

Decision 73/511	Maintenance of international security – good neighbourliness, stability and development in South-Eastern Europe	76/57	United Nations Regional Centre for Peace and Disarmament in Africa
76/17	Implementation of the Declaration of the Indian Ocean as a Zone of Peace	76/58	United Nations Regional Centre for Peace, Disarmament and Development in Latin America and the Caribbean
76/41	Regional disarmament	76/59	United Nations Regional Centre for Peace and Disarmament in Asia and the Pacific
76/42	Conventional arms control at the regional and subregional levels	76/61	United Nations regional centres for peace and disarmament
76/43	Confidence-building measures in the regional and subregional context	76/65	Strengthening of security and cooperation in the Mediterranean region

Deliverables

4.11 Table 4.1 lists all cross-cutting deliverables of the programme.

Table 4.1

Cross-cutting deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	3	3	3	3
Meetings of:				
1. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
2. The Committee for Programme and Coordination	1	1	1	1
3. The Fifth Committee	1	1	1	1

Evaluation activities

4.12 The following evaluations completed in 2021 and 2022 have guided the proposed programme plan for 2023:

- (a) Office of Internal Oversight Services (OIOS) triennial review in 2021 and 2022 on the implementation of its recommendations made in its report entitled “Evaluation of the United Nations Office for Disarmament Affairs” (IED-18-007);
- (b) Evaluation of the gender training of the Office for Disarmament Affairs;
- (c) Evaluations of projects within the relevant subprogrammes.

4.13 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2023. For example, the Office for Disarmament Affairs has continued to implement all five recommendations contained in the OIOS report, including the recommendation to strengthen its monitoring and self-evaluation capabilities. The launch of the strategic plan for 2021–2025 contributes to institutionalizing a culture of systematic monitoring, reporting and evaluation for the Office.

4.14 An evaluation of the Office’s strategic plan for 2021–2025 is planned for 2023.

Programme of work

Subprogramme 1

Multilateral negotiations and deliberations on disarmament and arms limitation

Objective

- 4.15 The objective, to which this subprogramme contributes, is to advance multilateral negotiations and deliberations on agreements on disarmament, arms limitation and non-proliferation in all its aspects, as required by States parties to existing multilateral agreements and the Conference on Disarmament.

Strategy

- 4.16 To contribute to the objective, the subprogramme will:
- (a) Provide support for negotiations in the Conference on Disarmament and in conferences and meetings of States parties to various multilateral agreements on disarmament, arms limitation and non-proliferation in all its aspects at the organizational, procedural and substantive levels;
 - (b) Render assistance and provide support for the follow-up to decisions, recommendations and programmes of action adopted by conferences and meetings of States parties to various multilateral disarmament, arms control and non-proliferation agreements;
 - (c) Implement the United Nations Disarmament Fellowship, Training and Advisory Services Programme.
- 4.17 The above-mentioned work is expected to result in:
- (a) Effective and efficient holding of the meetings of the Conference on Disarmament and of the various treaty bodies falling under the remit of the subprogramme;
 - (b) Strengthened operational viability and compliance with treaty obligations and adherence to and/or implementation of decisions, recommendations and programmes of action, as well as increased reporting by States parties;
 - (c) Enhanced expertise of Member States in the field of disarmament and non-proliferation through participation in the United Nations Disarmament Fellowship, Training and Advisory Services Programme.

Programme performance in 2021

Continued engagement by States on disarmament, non-proliferation and arms control issues

- 4.18 In 2021, an increased number of meetings were held (including those carried over from 2020), some of which took place in new formats when in-person meetings were not possible owing to the COVID-19 pandemic. The subprogramme provided States with the necessary arrangements to facilitate meetings in person and in virtual or hybrid format. Many meetings, including the Conference on Disarmament, were conducted in hybrid format, using remote simultaneous interpretation platforms. Remote simultaneous interpretation also enabled the organization of thematic events on youth and disarmament and on the role of women in international security in the Conference on Disarmament and led to the highest level of participation in the high-level segment of the Conference in 25 years (53 speakers of ministerial rank). The Conference of the High Contracting Parties to Protocol V to the Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons Which May Be Deemed to Be Excessively Injurious or to Have Indiscriminate Effects and the Annual Conference of the High Contracting Parties to Amended Protocol II to the Convention were also conducted in hybrid format. The subprogramme also supported in-person meetings, including the Meeting of Experts of the High Contracting Parties to Protocol V, the Meeting of the Group of

Experts of the High Contracting Parties to Amended Protocol II, the meetings of the Group of Governmental Experts on Emerging Technologies in the Area of Lethal Autonomous Weapons Systems, the Sixth Review Conference of the High Contracting Parties to the Convention on Certain Conventional Weapons, and the Meetings of Experts of the Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction and the Meeting of States Parties to the Biological Weapons Convention originally scheduled for 2020. Support was also provided to the Meetings of the States Parties to the Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on Their Destruction, which took place virtually, while the second part of the second Review Conference of States Parties to the Convention on Cluster Munitions took place in person in 2021, leading to the postponement of the tenth Meeting of States Parties to the Convention. The conduct of these meetings contributed to continued engagement and deliberations by States on disarmament, non-proliferation and arms control issues.

4.19 Progress towards the objective is presented in the performance measure below (see figure 4.I).

Figure 4.I

Performance measure: continued engagement of States on disarmament, non-proliferation and arms control issues (annual)

(Number of meetings by type)

Planned results for 2023

Result 1: negotiations and deliberations in the Conference on Disarmament

Programme performance in 2021 and target for 2023

- 4.20 The subprogramme's work contributed to the efforts of successive Presidents to propose and adopt a schedule of thematic debates, and to the consideration by the Conference on Disarmament of a proposal to update the rules of procedure to recognize the equality between women and men, which met the planned targets of increased continuity in the work of the six successive Presidents for the annual session and greater attention to gender equality issues, respectively.
- 4.21 The subprogramme's work did not meet the planned targets of an increase in the number of joint statements of the six Presidents of the year or of the progressive identification of areas of convergence for codes of conduct, confidence-building measures and pre-negotiation stages, with

the aim of leading to the negotiation of legally binding instruments, owing to a lack of consensus in the Conference.

4.22 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 4.2).

Table 4.2
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
The Conference conducts thematic discussions on its agenda items	Dialogue among the Member States of the Conference is maintained despite the COVID-19 pandemic	Increased continuity in the work of the six successive Presidents allows for coordinated thematic discussions Proposal to update the rules of procedure to recognize the equality between women and men	The Conference sees increased continuity in the work of the six successive Presidents for each annual session, including an increase in the number of joint statements of the six Presidents of the year, and proceeds in its structured substantive discussions on each agenda item, with the aim of leading to the negotiation of legally binding instruments	The Conference benefits from established coordination and continuity among the six Presidents and reaches agreement on a possible way forward leading to discussions on possible areas of convergence for codes of conduct, confidence-building measures or pre-negotiations

Result 2: improved impact and versatility of the United Nations Disarmament Fellowship, Training and Advisory Services Programme

Programme performance in 2021 and target for 2023

4.23 The subprogramme’s work contributed to an enhanced understanding of disarmament, non-proliferation and arms control among young officials participating in the Fellowship Programme through access to increased online resources, including videos covering several disarmament and arms control issues, as well as virtual study visits, comprising a virtual tour of the Nagasaki Atomic Bomb Museum and remote meetings with a hibakusha, which met the planned target.

4.24 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 4.3).

Table 4.3
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	Fellowship Programme participants have enhanced understanding of disarmament, non-proliferation and arms control through access to increased online resources	Fellowship Programme participants have access to flexible learning modalities and a wide range of online resources which improve learning outcomes and ensure continued access to resources post-completion of the Programme	Fellowship Programme participants have access to additional training resources

Result 3: advanced discussions on the risks and benefits of emerging technologies in biological sciences

Proposed programme plan for 2023

4.25 The subprogramme, through the work of the Biological Weapons Convention Implementation Support Unit, has supported multilateral deliberations on biological weapons since the Eighth Review Conference, in 2016. From 2018 to 2021, the annual meeting of experts on science and technology had a specific focus on emerging technologies in biological sciences. For example, in 2018, in cooperation with the Government of China and Tianjin University, the subprogramme organized a workshop in Tianjin, China, on codes of conduct for biological scientists. In addition, the subprogramme, together with the United Nations Institute for Disarmament Research (UNIDIR), organized an online workshop on mechanisms to review developments in science and technology. These meetings have benefited from the active participation of non-governmental organizations (NGOs), academia and the scientific community.

Lessons learned and planned change

4.26 The lesson for the subprogramme was that informal discussions among Member States and other stakeholders can serve to complement formal meetings and contribute to growing convergence of views among Member States. In applying the lesson, the subprogramme will support informal discussions among Member States and other stakeholders, including academia and the scientific community, through the organization of workshops or webinars on emerging technologies in biological sciences to enable the identification of areas of convergence on these issues.

4.27 Expected progress towards the objective is presented in the performance measure below (see table 4.4).

Table 4.4
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Focused discussions among Member States and relevant stakeholders on risks and benefits of advances in science and technology and ways in which to review them under the Biological Weapons Convention	Two informal webinars on topics relating to the meeting of experts on science and technology organized, as well as one webinar on the specific topic of reviewing advances in science and technology	Convergence among States parties on several aspects of a review mechanism for science and technology under the Biological Weapons Convention Development of the “Tianjin Biosecurity Guidelines for Codes of Conduct for Scientists” by academics from China and the United States of America, supported by the Governments of China and the United States. The Guidelines have subsequently been endorsed by the InterAcademy Partnership	At the Ninth Review Conference, States parties agree on ways to further strengthen the review of risks and benefits of advances in science and technology under the Biological Weapons Convention	States parties converge on certain aspects of the risks and benefits of advances in science and technology under the Biological Weapons Convention

Deliverables

4.28 Table 4.5 lists all deliverables of the subprogramme.

23. On submission of confidence-building measures and on national implementation of the Biological Weapons Convention	1	1	–	–

C. Substantive deliverables

Databases and substantive digital materials: databases relating to annual national reports on compliance, Protocol V and Amended Protocol II to the Convention on Certain Conventional Weapons, explosive remnants of war under Protocol V to the Convention, articles 7 and 8 (9) of the Convention on the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on Their Destruction, and article 7 of the Convention on Cluster Munitions; electronic reporting system for the confidence-building measures and the cooperation and assistance database of the Biological Weapons Convention; website relating to the Conference on Disarmament, the Geneva Branch of the Office for Disarmament Affairs, including web pages on financial matters, fissile material, the Biological Weapons Convention, the Convention on Certain Conventional Weapons, the Convention on the Prohibition of Military or Any Other Hostile Use of Environmental Modification Techniques, the Convention on Cluster Munitions and the Anti-Personnel Landmines Convention, the United Nations Disarmament Fellowship, Training and Advisory Services Programme and the Group of Governmental Experts to further consider nuclear disarmament verification issues.

D. Communication deliverables

Outreach programmes, special events and information materials: briefings and outreach materials (physical and digital) on disarmament, arms limitation and non-proliferation to the Geneva-based permanent missions and governmental, non-governmental and civil society organizations; further strengthening of digital tools to improve national reporting and compliance (Biological Weapons Convention and Convention on Certain Conventional Weapons).

Digital platforms and multimedia content: web pages on financial issues in support of conventions serviced by the subprogramme; digital tools to improve national reporting and compliance.

Subprogramme 2 Weapons of mass destruction

Objective

- 4.29 The objective, to which this subprogramme contributes, is to advance disarmament and non-proliferation in all aspects of nuclear weapons and all other weapons of mass destruction and their means of delivery.

Strategy

- 4.30 To contribute to the objective, the subprogramme will:
- (a) Facilitate and support the process of negotiations, deliberations and consensus-building in the areas of disarmament and non-proliferation of weapons of mass destruction, in particular nuclear weapons and their means of delivery;
 - (b) Support the full implementation of international instruments dealing with the disarmament and non-proliferation of nuclear weapons, including the Treaty on the Non-Proliferation of Nuclear Weapons and the Treaty on the Prohibition of Nuclear Weapons, and for the entry into force of the Comprehensive Nuclear-Test-Ban Treaty;
 - (c) Support Member States in their negotiations on the establishment of a Middle East zone free of nuclear weapons and all other weapons of mass destruction;
 - (d) Provide substantive and technical support to office bearers of the First Committee and the Disarmament Commission;
 - (e) Continue to raise awareness of the dangers posed by nuclear weapons, including through substantive and technical support to the International Day for the Total Elimination of Nuclear Weapons and the International Day against Nuclear Tests;

- (f) Strengthen cooperation with other relevant intergovernmental organizations, such as the International Atomic Energy Agency (IAEA), in areas such as nuclear security and non-proliferation, and expand interaction with civil society, in particular research and academic institutions and NGOs working in the areas of disarmament and non-proliferation of nuclear weapons and their delivery systems;
- (g) Continue its close cooperation with the Organisation for the Prohibition of Chemical Weapons (OPCW) to promote the universality and full implementation of the Convention on the Prohibition of the Development, Production, Stockpiling and Use of Chemical Weapons and on Their Destruction;
- (h) Support efforts to identify the perpetrators of the use of chemical weapons by supporting OPCW efforts in this regard and by working with members of the Security Council in order to build unity. In this context, the subprogramme will continue to brief the Council on the implementation of its resolution [2118 \(2013\)](#) on the elimination of the chemical weapons programme of the Syrian Arab Republic;
- (i) Continue to enhance the operational readiness of the Secretary-General's Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons by organizing, with interested Member States and relevant partners, training and capacity-building activities for experts and analytical laboratories;
- (j) Facilitate the efforts of Member States to prevent an arms race in outer space.

4.31 The above-mentioned work is expected to result in:

- (a) The building of trust and understanding among Member States in order to facilitate consensus on effective measures relating to the total elimination of nuclear weapons and measures to help reduce the risks of nuclear weapon use;
- (b) The strengthening and reinforcement of the norm against chemical weapons use;
- (c) Enhanced ability of Member States to uphold the global norms against the use of weapons of mass destruction;
- (d) Strengthened coordination capabilities of Member States to respond to incidents involving the use of biological weapons.

Programme performance in 2021

Treaty on the Prohibition of Nuclear Weapons: entry into force and progress towards the first meeting of States parties

4.32 The Treaty on the Prohibition of Nuclear Weapons is the first multilateral nuclear disarmament treaty adopted since 1996. It represents both concerns about growing risks associated with nuclear weapons and a commitment to multilateral disarmament. The Treaty entered into force on 22 January 2021, and States parties have subsequently begun preparations for the first meeting of States parties to the Treaty, scheduled for June 2022. The meeting represents an important opportunity for States parties to establish a forward-looking programme of work that strengthens efforts towards the elimination of nuclear weapons, the highest disarmament priority of the United Nations, and ensures the Treaty's complementarity with the disarmament and non-proliferation regime. Throughout 2021, consistent with the tasks given to the Secretary-General under articles 2, 4, 8 and 19 of the Treaty and the requests made in General Assembly resolution [72/31](#), the subprogramme provided assistance and services to the President-designate of the first meeting of States parties to ensure the successful holding of the meeting, including the provision of technical and administrative assistance and support to informal substantive consultations.

4.33 Progress towards the objective is presented in the performance measure below (see table 4.6).

Table 4.6
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	–	Entry into force of the Treaty on the Prohibition of Nuclear Weapons and preparation by States parties for a successful conclusion to the first meeting of States parties to the Treaty, charting a future programme of work that strengthens the Treaty’s implementation and the multilateral disarmament and non-proliferation regime

Planned results for 2023

Result 1: enhanced implementation of disarmament and non-proliferation commitments

Programme performance in 2021 and target for 2023

- 4.34 The subprogramme’s work contributed to enhanced dialogue between Member States on achieving the goals of the Treaty on the Non-Proliferation of Nuclear Weapons and achieving common ground at the Review Conference, including an expanded consultation schedule and a series of webinars with logistical, administrative and substantive support provided to the President-designate and the Bureau, which did not meet the planned target of countries/Member States implementing (or committing to implement) provisions emanating from the outcome of the 2020 Review Conference. While the subprogramme maintained a state of readiness and flexibility, the target was not met owing to the unpredictability caused by the pandemic, resulting in two postponements of the Review Conference, which is planned for August 2022.
- 4.35 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 4.7).

Table 4.7
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Efforts to find commonalities, narrow differences and reduce nuclear risks, including in preparation for the third session of the Preparatory Committee	Expanded scope of consultations and reach of webinars that enabled dialogue on innovative ideas, in the lead-up to the postponed Review Conference to contribute to a consensus outcome	Enhanced dialogue between Member States on achieving the goals of the Treaty on the Non-Proliferation of Nuclear Weapons	States parties develop policies and frameworks for the implementation of provisions emanating from the outcomes of the tenth Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons and the First Meeting of	Countries/Member States implementing (or committing to implement) provisions emanating from the outcome of the tenth Review Conference, therefore advancing nuclear disarmament

Part II Political affairs

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
			States Parties to the Treaty on the Prohibition of Nuclear Weapons, thereby strengthening implementation of disarmament and non-proliferation commitments	

Result 2: establishment of a Middle East zone free of nuclear weapons and other weapons of mass destruction

Programme performance in 2021 and target for 2023

- 4.36 The subprogramme’s work contributed to building a common understanding and strengthened endorsements for the implementation of the decisions of the first session of the Conference on the Establishment of a Middle East Zone Free of Nuclear Weapons and Other Weapons of Mass Destruction, as well as the convening of the second session of the Conference from 29 November to 3 December 2021 at United Nations Headquarters, which met the planned target.
- 4.37 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 4.8).

Table 4.8
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
The first session of the Conference was convened and concluded successfully	Increased knowledge and expertise of Member States, which contributed to the aim of leading to the elaboration of a legally binding treaty	Decisions from the first session of the Conference implemented Outcomes of the second session of the Conference included the establishment of a working committee to undertake substantive intersessional work between annual sessions of the Conference	The Conference progressively identifies areas of convergence, which facilitates the building of common positions towards the elaboration of a legally binding treaty	The Conference continues to progressively identify areas of convergence, which facilitates continuous progress towards the negotiation of a legally binding treaty

Result 3: enhanced operational readiness of the Secretary-General’s Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons

Proposed programme plan for 2023

4.38 The mandate for the Secretary-General’s Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons, which is not a standing body, was established in General Assembly resolution 42/37 C and reaffirmed in Security Council resolution 620 (1988). The subprogramme is tasked with ensuring its operational readiness to carry out a mission in response to reports from Member States. To this effect, the subprogramme maintains rosters of experts and analytical laboratories that may be called upon to support an investigation by the Mechanism in accordance with the guidelines and procedures endorsed by the Assembly in its resolution 45/57 C. The subprogramme also coordinates outreach and training activities with partners, including Member States, laboratories and international organizations. In 2021, these training activities were adapted to a virtual format in the light of COVID-19.

Lessons learned and planned change

- 4.39 The lesson for the subprogramme was that virtual training events for experts can complement in-person training activities to strengthen the operational readiness of the Mechanism. Virtual events allowed more rostered experts to better understand and support the Mechanism’s mandate and procedures. In applying the lesson, the subprogramme will regularly hold virtual events as conducted in 2021. The subprogramme will also develop plans for training courses that can be held in virtual or hybrid formats, while making every effort to implement the postponed in-person activities as soon as conditions permit.
- 4.40 Expected progress towards the objective is presented in the performance measure below (see table 4.9).

Table 4.9
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Strengthened operational readiness of the Mechanism through enhanced capacity of qualified experts and laboratory focal points on hazardous environment awareness and leadership	Strengthened operational readiness of the Mechanism through enhanced capacity of qualified experts, expert consultants and laboratory focal points on their respective roles and mission planning	Increased understanding of qualified experts and laboratory focal points on the Mechanism and planned strategic missions Access to improved training for qualified experts	All newly nominated experts onboarded with increased understanding of the Mechanism Increased nominations of experts for the roster through strengthened outreach to Member States and international organizations	All newly nominated experts onboarded with increased understanding of the Mechanism Enhanced capacity of qualified experts and laboratory focal points on relevant skills based on the Mechanism’s training catalogue.

Deliverables

4.41 Table 4.10 lists all deliverables of the subprogramme.

Table 4.10

Subprogramme 2: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	235	123	200	99
1. Reports of and notes by the Secretary-General to the General Assembly on nuclear and chemical weapons	9	9	9	9
2. Reports and documents for the 2020 (tenth) Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons	205	98	71	–
3. Reports and documents for the Conference on the Establishment of a Middle East Zone Free of Nuclear Weapons and Other Weapons of Mass Destruction	20	16	20	20
4. Reports and documents for the Preparatory Committee for the 2025 Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons	–	–	70	70
5. Report for the fourth Conference of Nuclear-Weapon-Free Zones and Mongolia	1	–	1	–
6. Reports and documents for the First Meeting of States Parties to the Treaty on the Prohibition of Nuclear Weapons	–	–	29	–

7. Meetings of the First Committee	25	25	25	25
8. Meetings of the Disarmament Commission	15	–	15	15
9. Pre-session consultations and meetings of the 2020 (tenth) Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons	–	25	–	–
10. Plenary meetings of the high-level plenary meeting to commemorate and promote the International Day for the Total Elimination of Nuclear Weapons	2	2	2	2
11. High-level plenary meetings to commemorate and promote the International Day against Nuclear Tests	2	1	2	2
12. Meetings of the Conference and the Bureau of the Conference on Facilitating the Entry into Force of the Comprehensive Nuclear-Test-Ban Treaty	2	3	–	2
13. Meetings of the Conference on the Establishment of a Middle East Zone Free of Nuclear Weapons and Other Weapons of Mass Destruction	–	4	10	6
14. Pre-session consultations and meetings for the First Meeting of States Parties to the Treaty on the Prohibition of Nuclear Weapons	–	17	10	–
15. Fourth Conference of Nuclear-Weapon-Free Zones and Mongolia	2	–	–	–
16. Pre-session consultations and meetings for the Preparatory Committee for the 2025 Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons	–	–	30	30
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	24	10	35	30
17. Intersessional briefings of the Conference on the Establishment of a Middle East Zone Free of Nuclear Weapons and Other Weapons of Mass Destruction	4	4	6	6
18. Training courses for the Secretary-General's Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons on chemical weapons investigations and updating the roster of experts	20	4	29	24

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

19. Regional briefings in preparation for the 2020 (tenth) Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons	–	2	–	–
---	---	---	---	---

C. Substantive deliverables

Consultation, advice and advocacy: impartial technical, substantive and procedural advice provided to Member States; consultations with civil society, including on participation by civil society in treaty-related conferences; consultations with academia and specialized technical institutions; liaison with relevant intergovernmental organizations (e.g., OPCW, IAEA and Comprehensive Nuclear-Test-Ban Treaty Organization); interdepartmental coordination, including as Vice-Chair of the United Nations Global Counter-Terrorism Coordination Compact Working Group on Emerging Threats and Critical Infrastructure Protection.

D. Communication deliverables

Outreach programmes, special events and information materials: fact sheets on weapons of mass destruction disarmament and associated treaties; side events at relevant United Nations and ad hoc conferences; newsletter of the Secretary-General’s Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons; outreach and advocacy to the general public and students conducted through events organized by the subprogramme, Member States, civil society, academia and other stakeholders.

Digital platforms and multimedia content: Office for Disarmament Affairs website and social media platforms related to weapons of mass destruction issues, enhanced coordination and cooperation among nuclear-weapon-free zones and 2020 (tenth) Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons.

**Subprogramme 3
Conventional arms**

Objective

- 4.42 The objective, to which this subprogramme contributes, is to advance the regulation and limitation of conventional weapons, taking into account the legitimate needs of States for self-defence.

Strategy

- 4.43 To contribute to the objective, the subprogramme will:
- (a) Carry out preparations for the fourth United Nations Conference to Review Progress Made in the Implementation of the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects, to be held in 2024, including organizing briefing sessions with the relevant regional group of States to identify the President-designate, support the substantive and political work of the President and assist in the preparations for at least six open-ended informal consultations and briefings, including the development of a website and background materials;
 - (b) Assist States in the implementation of the outcomes of the Seventh and Eighth Biennial Meetings of States (held in 2021 and 2022, respectively) leading up to the fourth Review Conference of the Programme of Action;
 - (c) As co-custodian (together with the United Nations Office on Drugs and Crime) for indicator 16.4.2 of the Sustainable Development Goals, continue to manage national reports on the Programme of Action submitted by States, which serve as a tool for data collection for this indicator;
 - (d) Assist in building the capacities of relevant State structures to collect and analyse data on the illicit flows of arms based on weapons that have been seized, found or surrendered;
 - (e) Support the dissemination of the International Ammunition Technical Guidelines through its SaferGuard programme, which serves as the knowledge management platform for the Guidelines, and ensure the dissemination, further translation and revision, as needed, of modules of the voluntary guidance on small arms control, available through the Modular Small-arms-control Implementation Compendium;

- (f) In partnership with the United Nations Development Programme, and with the technical guidance of Coordinating Action on Small Arms, continue activities of the Saving Lives Entity trust facility (a dedicated part of the Peacebuilding Fund) to allocate grants, based on voluntary donor contributions, to catalyse activities in the beneficiary countries in order to operationalize and integrate small arms control and armed violence reduction into peacebuilding and development programmes and policies. This work will support Member States in making progress towards achieving Sustainable Development Goals 5 and 16;
- (g) In accordance with General Assembly resolutions and outcome documents of the Programme of Action review process,¹ work to predictably and consistently integrate small arms and light weapons control considerations into United Nations country-level system-wide approaches to development, based on and reflected in the common country analyses and the United Nations Sustainable Development Cooperation Framework;
- (h) Support projects that develop the capacity of national institutions with regard to the regulation of small arms and ammunition, and address, among other things, physical security and stockpile management and the work of border and customs officials through the organization of national workshops for government and civil society practitioners in order to exchange views on priority issues. This will include work in support of the Silencing the Guns by 2030 initiative of the African Union;
- (i) Manage, maintain and upgrade, as necessary, the databases on military expenditures, as well as the Register of Conventional Arms, including, as resources permit, the translation of the online reporting tool and the Register database website into all six official languages of the United Nations;
- (j) Implement, as required, any relevant recommendations issued by the Group of Governmental Experts on the United Nations Register of Conventional Arms in 2022.

4.44 The above-mentioned work is expected to result in:

- (a) Improved preparedness of States for the fourth Review Conference of the Programme of Action, to be held in 2024, and ability of States to better address the outcome commitments of the Seventh and Eighth Biennial Meetings of States, as well as enable safer and more secure management of ammunition and the implementation of guidance on efforts to combat the illicit trade in small arms and light weapons;
- (b) Strengthened legislation, policies and regulations on small arms and ammunition;
- (c) Reduced armed violence;
- (d) The improved security of weapons armouries, including improved marking and record-keeping;
- (e) Improved capacity in border agencies and customs officials;
- (f) The safe and secure management of ammunition;
- (g) Reduced risk of armed conflict among States by reducing the destabilizing effect of increasing arms transfers and accumulations;
- (h) Improved integration of small arms and light weapons control considerations through United Nations country-level system-wide approaches, based on and reflected in common country analyses and the United Nations Sustainable Development Cooperation Framework;
- (i) Improved innovation and coordination through the Coordinating Action on Small Arms as the main platform for coordinating holistic United Nations action on assisting States with the control of small arms and light weapons, as a key component of the prevention agenda of the Secretary-General;

¹ See General Assembly resolution [75/43](#), and para. 9 of section IV.B and para. 21 of section IV.C of the outcome document of the third United Nations Conference to Review Progress Made in the Implementation of the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects ([A/CONF.192/2018/RC/3](#), annex).

- (j) Greater integration of small arms and light weapons control considerations into development processes.

Programme performance in 2021

Improved ammunition management through SaferGuard quick-response mechanism

- 4.45 In March 2021, a series of explosions took place at a military barracks in Equatorial Guinea, killing over 100 people. The Government of Equatorial Guinea requested assistance in assessing the cause of the incident, as well as identifying and reducing risks of further explosions and potential environmental impacts. The subprogramme activated the quick-response mechanism of the United Nations SaferGuard programme and oversaw the deployment of an assistance mission of ammunition experts to Equatorial Guinea. The mission team assisted the Government in assessing the cause of the incident, as well as identifying and reducing risks of further explosions and potential environmental impacts. The team also provided immediate technical advice on ammunition management and explosives safety and security risks based on the internationally accepted good practice contained in the International Ammunition Technical Guidelines to the Government, which expressed its satisfaction with the work of the Office for Disarmament Affairs and its intention to implement the recommendations.
- 4.46 Progress towards the objective is presented in the performance measure below (see table 4.11).

Table 4.11
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
23 experts on roster for SaferGuard quick-response mechanism	Ammunition Management Advisory Team became fully operational and 12 additional experts on quick-response mechanism roster	Equatorial Guinea identified and reduced risks of further explosions and potential environmental impacts and increased awareness on ammunition management and explosives safety and security risks

Planned results for 2023

Result 1: integrating small arms and light weapons considerations into the Security Council

Programme performance in 2021 and target for 2023

- 4.47 The subprogramme’s work contributed to the continued integration of the issue of small arms and light weapons into the Security Council considerations and the peace activities under its purview, including through three focused Council sessions, the adoption of Council resolution [2616 \(2021\)](#), which addresses the options of peace operations supporting national authorities in combating the illicit transfer and diversion of arms in violation of the arms embargoes, and the enhanced ability of Member States, including those on the Security Council, to easily access United Nations guidance on options for reflecting weapons and ammunition management in relevant decisions, which met the planned target.
- 4.48 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 4.12).

Table 4.12
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Discussion postponed to 2020	Discussion by the Security Council on the thematic issue of small arms and light weapons held in February 2020; the ability of all Member States, and in particular those on the Security Council, to easily access United Nations guidance on options for reflecting weapons and ammunition management in relevant decisions is enhanced	Continued discussion by the Security Council on the thematic issue of small arms and light weapons on three occasions in 2021 Security Council adopts resolution 2616 (2021) Enhanced ability of all Member States, including those on the Security Council, to easily access United Nations guidance on options for reflecting weapons and ammunition management in relevant decisions	Further advancement of discussion of small arms and light weapons issues by the Security Council and the peace activities under its purview	Increased awareness of Member States, and in particular those on the Security Council, on options for reflecting weapons and ammunition management in relevant decisions

Result 2: Silencing the Guns by 2030 through Africa Amnesty Month: reducing illicit arms and ammunition flows through mobilization of broad voluntary handovers by civilians

Programme performance in 2021 and target for 2023

- 4.49 The subprogramme’s work contributed to the further development by national commissions and focal points of small arms and ammunition control in six Member States, and three additional States (Madagascar, the Niger and Uganda) conducting voluntary handover campaigns, which met the planned target.
- 4.50 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 4.13).

Table 4.13
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	Engagement by national commissions and focal points on small arms control, the African Union and the Regional Centre on Small Arms and Light Weapons in the Great Lakes Region, the Horn of Africa and Bordering States in conducting national voluntary surrender of weapons campaigns, including capacity-building in community policing, secure storage and destruction, in seven Member States	National commissions and focal points further develop small arms and ammunition control in six Member States Three additional States conduct voluntary handover campaigns and destroy collected weapons	Further development of expertise by national commissions and focal points on small arms control, both in those States having completed activities in 2020 and 2021 and including up to an additional three States in 2022, in conducting regular voluntary handover campaigns that generate increased voluntary handover by civilians of small arms and light weapons and their destruction	National commissions and focal points on small arms control have increased capacity to conduct national voluntary surrender-of-weapons campaigns, including through capacity-building in community policing, secure storage and destruction

Result 3: improved management of safety and security risks of conventional ammunition**Proposed programme plan for 2023**

- 4.51 Inadequately managed ammunition stockpiles present dangerous challenges and have caused explosions that have led to loss of human lives, humanitarian consequences and environmental damage. There has been a sustained focus and engagement on the issue of conventional ammunition issues in recent years, in particular on addressing the dual risks of unintended explosions and the diversion of ammunition. The subprogramme has been providing support to the Group of Governmental Experts established pursuant to resolution [72/55](#), which met in 2020 and 2021 to look at problems arising from the accumulation of conventional ammunition stockpiles in surplus. The Group's recommendation for the elaboration of a set of political commitments in the form of a new global framework that would address existing gaps in through-life ammunition management was endorsed by the General Assembly in its resolution [76/233](#), in which the Assembly decided to establish an open-ended working group on ammunition and decided that the open-ended working group would meet in 2022 and 2023. The open-ended working group will be supported by the subprogramme in its efforts.

Lessons learned and planned change

- 4.52 The lesson for the subprogramme was the importance of supporting the Chair of the Group of Governmental Experts in convening informal consultations and in providing timely information relevant to the Group's work on the "Meetings Place" website of the Office for Disarmament Affairs to keep all States informed of the work. In applying the lesson, the subprogramme will increase its efforts towards consistent and transparent information-sharing so that all Member States can engage in the work and monitor the progress and outcomes of the open-ended working group.

4.53 Expected progress towards the objective is presented in the performance measure below (see table 4.14).

Table 4.14
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
The Group of Governmental Experts established pursuant to resolution 72/55 holds open, informal consultations	First session of the Group of Governmental Experts held in January. Second and third sessions of the Group postponed to 2021, owing to COVID-19 pandemic. The Group holds virtual informal consultations	Second and third sessions of the Group held in hybrid format. The Group adopts its final report (A/76/324) by consensus. On the basis of the Group's recommendations, the General Assembly establishes an open-ended working group (see resolution 76/233)	The open-ended working group holds a series of informal consultations and two planned sessions on through-life ammunition management	The open-ended working group holds final planned sessions on ammunition and recommends follow-up actions for the consideration of the General Assembly at its seventy-eighth session

Deliverables

4.54 Table 4.15 lists all deliverables of the subprogramme.

Table 4.15
Subprogramme 3: deliverables for the period 2021–2023, by category and subcategory

Section 4 Disarmament

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
8. Meetings of the Eighth Biennial Meeting of States to Consider the Implementation of the United Nations Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects and the International Instrument to Enable States to Identify and Trace, in a Timely and Reliable Manner, Illicit Small Arms and Light Weapons under the Programme of Action on Small Arms	–	–	10	–
9. Informal consultations among Member States further to the Eighth Biennial Meeting of States under the Programme of Action on Small Arms	4	–	4	–
10. Informal consultations among Member States further to the fourth Review Conference of the Programme of Action on Small Arms	–	–	–	4
11. Meetings of the open-ended working group on conventional ammunition	–	–	–	10
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	–	2	1	1
12. Competency training and test on the International Ammunition Technical Guidelines	–	2	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: briefings to delegates on United Nations transparency instruments (Register of Conventional Arms and United Nations Report on Military Expenditures) and to the Eighth Biennial Meeting of States under the Programme of Action on Small Arms; meetings of the SaferGuard Technical Review Board.				
D. Communication deliverables				
Digital platforms and multimedia content: integrated conventional arms information platforms and online reporting systems related to global reported arms trade, military expenditures, military confidence-building measures and implementation of the Programme of Action on Small Arms available for use in voluntary reporting by all Member States; and the SaferGuard programme on ammunition.				

Subprogramme 4 Information and outreach

Objective

- 4.55 The objective, to which this subprogramme contributes, is to enhance awareness, understanding and knowledge by Member States and the public for advancing disarmament, non-proliferation and arms control.

Strategy

- 4.56 To contribute to the objective, the subprogramme will:
- (a) Carry out outreach and information-sharing activities in cooperation with Member States and other relevant partners and stakeholders by organizing panel discussions, public events, exhibitions, media briefings, book launches, film screenings and other activities;
 - (b) Produce publications and implement a comprehensive media strategy. Outreach will reflect and promote diversity through inclusion and the targeting of audiences of different ages, genders, disabilities, geographic locations and perspectives;
 - (c) Support civil society engagement in intergovernmental forums by facilitating access arrangements, organizing consultative meetings and arranging for presentations by invited civil society representatives;
 - (d) Implement the recommendations of the 2002 United Nations study on disarmament and non-proliferation education in cooperation with Member States and other relevant partners, by producing and disseminating educational materials, developing e-modules on substantive

topics and organizing peace and disarmament education activities and contests, with particular emphasis on educating young people, including young women and those not traditionally engaged, to champion and promote disarmament efforts;

- (e) Continue to support the open-ended working group on security of and in the use of information and communications technologies 2021–2025, pursuant to General Assembly resolution [75/240](#).

4.57 The above-mentioned work is expected to result in:

- (a) Increased interest in and support for multilateral disarmament efforts, enhancement of engagement by the general public and other stakeholders on these issues and the availability of clear, timely and impartial information to Member States;
- (b) Better educated stakeholders, including diplomats and other officials, civil society representatives and the general public;
- (c) Progress in the development of common understandings in multilateral discussions by States on information and communications technology security in the context of international security, as well as improved awareness and knowledge of the subject among States and non-governmental actors.

Programme performance in 2021

Increased engagement of youth for disarmament

4.58 Numerous efforts to engage youth in the field of disarmament and non-proliferation have been implemented, as encouraged in General Assembly resolutions [74/64](#) and [76/45](#) on youth, disarmament and non-proliferation.

4.59 The subprogramme continued to make significant inroads in engaging, educating and empowering young people through its “#Youth4Disarmament” outreach initiative, despite the constraints posed by the global pandemic. The subprogramme created and launched a dedicated digital platform for youth engagement at www.youth4disarmament.org and provided an array of activities that used art, writing and physical activity as expressive mediums to engage young people of all interests, knowledge and backgrounds to participate in disarmament efforts. Since 2020, youth engagement in terms of the number of website users has increased by 438 per cent. Through the #Youth4Disarmament initiative, the Office for Disarmament Affairs will continue to provide creative and action-oriented educational activities and practicums, inviting youth of all backgrounds and with a variety of interests to meaningfully participate and contribute.

4.60 Progress towards the objective is presented in the performance measure below (see figure 4.II).

Figure 4.II
Performance measure: number of users of the digital platform for youth engagement at www.youth4disarmament.org

Planned results for 2023

Result 1: building bridges for youth participation in disarmament, non-proliferation and arms control discussions and activities

Programme performance in 2021 and target for 2023

- 4.61 The subprogramme’s work on building fruitful coalitions to empower young people contributed to 29 youth-led organizations and partnerships in the area of disarmament, non-proliferation and arms control, which exceeded the planned target of 17 youth partners for 2021.
- 4.62 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 4.III).

Figure 4.III
Performance measure: number of youth partners (cumulative)

Result 2: enhanced accessibility and usability of meeting information and data to inform Member States

Programme performance in 2021 and target for 2023

- 4.63 The subprogramme’s work contributed to improved ease of access by Member States to all public documents on United Nations disarmament meetings through the Office’s documents portal, which met the planned target.
- 4.64 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 4.16).

Table 4.16
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
–	Member States have improved accessibility to meetings information	Improved ease of access by Member States to all public documents on United Nations disarmament meetings through the Office’s documents portal	Member States have access to the Office’s data portal, and the existing databases are modernized to enhance the usability of data to inform policymaking	Member States have access to additional databases included in the Office’s data portal

Result 3: developments in the field of information and telecommunications in the context of international security, and advancing responsible State behaviour in the use of information and communications technologies

Proposed programme plan for 2023

- 4.65 As reaffirmed by the General Assembly in its resolution [76/19](#), the United Nations should continue to play a leading role in promoting dialogue on the use of information and communications technologies by States. The subprogramme provided substantive support for the open-ended working group on security of and in the use of information and communications technologies 2021–2025, established pursuant to Assembly resolution [75/240](#), which should take into account the outcomes of the previous Open-ended Working Group and the Groups of Governmental Experts on Developments in the Field of Information and Telecommunications in the Context of International Security and add to the efforts undertaken by them, and should be consensus-based and results-oriented.

Lessons learned and planned change

- 4.66 The lesson for the subprogramme was the importance of ensuring the widest possible participation of Member States in intergovernmental processes on security in the use of information and communications technologies, as well as interaction, as appropriate, with other interested parties, including businesses, NGOs and academia. In applying the lesson, the subprogramme will encourage and support inclusive and outcome-oriented dialogue among Member States, including in the 2021–2025 sessions of the open-ended working group.
- 4.67 Expected progress towards the objective is presented in the performance measure below (see table 4.17).

Table 4.17
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	Adoption by Member States of the consensus final reports of the previous United Nations bodies (A/75/816; A/76/135)	Adoption by the open-ended working group by consensus of an annual progress report	Adoption by the open-ended working group by consensus of an annual progress report

Deliverables

4.68 Table 4.18 lists all deliverables of the subprogramme.

Table 4.18
Subprogramme 4: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	17	16	17	17
1. Reports of the Secretary-General, transmitting views of Member States to the General Assembly on the following: environmental norms in the context of disarmament and arms control; the promotion of multilateralism; the United Nations study on disarmament and non-proliferation education; the United Nations Disarmament Information Programme; the role of science and technology; advancing responsible State behaviour in cyberspace	6	5	6	6
2. Report of the Secretary-General on the work of the Advisory Board on Disarmament Matters (including pre-session, in-session and post-session documents)	10	10	10	10
3. Report of the Secretary-General on the work of the Group of Governmental Experts on Advancing Responsible State Behaviour in Cyberspace in the Context of International Security	1	1	–	–
4. Progress report of the open-ended working group on security of and in the use of information and communications technologies 2021–2025	–	–	1	1

Meetings of:				
5. The Advisory Board on Disarmament Matters	12	6 ^a	12	12
6. The Group of Governmental Experts on Advancing Responsible State Behaviour in Cyberspace in the Context of International Security	14	13 ^b	–	–
7. The open-ended working group on security of and in the use of information and communications technologies 2021–2025	–	10	20	20
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	1	1	1	1
8. Training of teachers on disarmament and non-proliferation	1	1	1	1
Publications (number of publications)	8	8	8	8
9. On disarmament, including the <i>United Nations Disarmament Yearbook</i> , Occasional Papers and other serialized and non-serialized publications	8	8	8	8

Category and subcategory	2021 <i>planned</i>	2021 <i>actual</i>	2022 <i>planned</i>	2023 <i>planned</i>
--------------------------	------------------------	-----------------------	------------------------	------------------------

C. Substantive deliverables

Databases and substantive digital materials: database on the status of disarmament and arms regulation agreements, disarmament reference library and e-documents library.

D. Communication deliverables

Outreach programmes, special events and information materials: pamphlets, brochures, publicity kits, guides, posters, disarmament fact sheets; disarmament activities of the Messenger of Peace; symposiums and panel discussions on disarmament issues, in particular disarmament and non-proliferation education; briefings for visitors and outside groups on disarmament; disarmament and non-proliferation education and teacher training; and audiovisual resources, including videos, events and exhibits on matters promoting disarmament and non-proliferation.

External and media relations: opinion pieces placed in international, national and thematic journals.

Digital platforms and multimedia content: websites of the Office for Disarmament Affairs, on disarmament education and Securing Our Common Future: An Agenda for Disarmament; online version of the Office for Disarmament Affairs updates; and Youth4Disarmament web platform, the Office’s Meetings Place website and the *United Nations Disarmament Yearbook* website.

^a Owing to the ongoing COVID-19 pandemic, the Advisory Board for Disarmament Matters held fully virtual meetings with a compressed schedule, which reduced the number of meeting hours.

^b Owing to the ongoing COVID-19 pandemic, the Group of Governmental Experts on Advancing Responsible State Behaviour in Cyberspace in the Context of International Security pivoted to fully virtual meetings in 2021, which somewhat reduced the number of meeting hours.

Subprogramme 5 Regional disarmament

Objective

4.69 The objective, to which this subprogramme contributes, is to advance regional disarmament, non-proliferation and arms control efforts and initiatives, and the effective implementation of global and regional disarmament, non-proliferation and arms control treaties and other instruments, and strengthen partnerships with regional organizations.

Strategy

4.70 To contribute to the objective, the subprogramme will:

- (a) Provide technical and legal training, conduct capacity-building activities and support the implementation by Member States of relevant treaties, international standards and guidelines, including the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects, the Arms Trade Treaty, the Biological Weapons Convention, Security Council resolutions [1325 \(2000\)](#), [1540 \(2004\)](#), [1673 \(2006\)](#), [1810 \(2008\)](#), [1977 \(2011\)](#), [2055 \(2012\)](#), [2325 \(2016\)](#), [2572 \(2021\)](#) and [2622 \(2022\)](#) and General Assembly resolutions [75/48](#), [76/57](#), [76/58](#) and [76/59](#);
- (b) Cooperate with relevant regional, subregional, civil society and other organizations, such as the African Union, the Caribbean Community (CARICOM), the Economic Community of West African States (ECOWAS) and the Pacific Islands Forum, in the field of disarmament, non-proliferation and arms control, building on existing synergies and avoiding duplication with efforts already undertaken by such organizations.

4.71 The above-mentioned work is expected to result in:

- (a) Increased adherence to the disarmament instruments and strengthened small arms, light weapons and ammunition control, thereby curbing illicit trade and the circulation of small arms and light weapons to strengthen regional peace and security;

- (b) Confidence-building measures among Member States;
- (c) Closer partnerships with regional and subregional organizations.

Programme performance in 2021

Improved understanding by stakeholders of a gender perspective to disarmament, non-proliferation and arms control

- 4.72 In line with General Assembly resolutions 65/69, 73/46 and 75/48 on women, disarmament, non-proliferation and arms control, the subprogramme implemented projects with a gender-sensitive approach and continued to make significant progress in incorporating a gender perspective into the workshops dedicated to illustrating and promoting the important role of women in arms control negotiations and policy implementation. The subprogramme also supported Member States and other key stakeholders in strengthening their capacity for integrating a gender perspective into their small arms control programming and policymaking through in-country training programmes.
- 4.73 In 2021, the subprogramme organized or co-organized activities, including workshops and seminars, that reached 1,186 stakeholders (43 per cent of whom were women) in the Asia and the Pacific region, and 4,518 stakeholders (47 per cent of whom were women) in the Latin America and the Caribbean region. The subprogramme also conducted capacity-building activities on the role of women in small arms control in five countries in Africa. In addition to the cross-cutting integration of a gender perspective in all projects, the subprogramme managed multi-year regional programmes with a strong focus on women and disarmament, in line with resolution 65/69, and the integration of a gender perspective in small arms control.
- 4.74 Progress towards the objective is presented in the performance measure below (see figure 4.IV).

Figure 4.IV

Performance measure: number of stakeholders with improved understanding of women and disarmament, non-proliferation and arms control (cumulative)

Planned results for 2023

Result 1: strengthened capacity to prevent and combat illicit arms and ammunition

Programme performance in 2021 and target for 2023

- 4.75 The subprogramme’s work contributed to the rehabilitation of one arms and ammunition depot, which did not meet the planned target of 20. The target was not met owing to the COVID-19 pandemic, which impeded the rehabilitation of arms and ammunition depots.

4.76 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 4.V).

Figure 4.V

Performance measure: number of constructed and rehabilitated arms and ammunition depots (annual)

Result 2: strengthened regional disarmament through substantive partnerships with regional and subregional organizations

Programme performance in 2021 and target for 2023

4.77 The subprogramme’s work contributed to the involvement of CARICOM in the development and consolidation of comprehensive national action plans outlining priorities for the implementation of international instruments on small arms and light weapons, and to the involvement of ECOWAS in the efforts to generate State-to-State synergies in promoting disarmament and non-proliferation in its region, which met the planned target.

4.78 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 4.VI).

Figure 4.VI

Performance measure: number of regional and subregional organizations involved in the development and implementation of projects (annual)

Result 3: strengthened implementation of Security Council resolution 1540 (2004)

Proposed programme plan for 2023

4.79 As recognized in General Assembly resolutions 76/57, 76/58 and 76/59 and Security Council resolution 1540 (2004), the subprogramme should engage in strengthening the capacity of Member States to support the national, regional and subregional implementation of its policies related to resolution 1540 (2004) on the non-proliferation of all weapons of mass destruction. The subprogramme conducted several national assistance projects in 2020 and 2021 to help countries to meet the requirements of resolution 1540 (2004), which included assisting Chile in developing a set of complementary legal regulations required to implement recently enacted legislation on weapons of mass destruction with respect to the Biological Weapons Convention. The subprogramme co-organized national inter-agency workshops on implementing the resolution in Botswana and Mongolia and organized a national round table for Mongolia, which resulted in the production of a draft national action plan that outlined priority measures to be undertaken to strengthen the national implementation of the resolution.

Lessons learned and planned change

4.80 The lesson for the subprogramme was the need to build and strengthen specialized capacity of beneficiary Member States to conceptualize, elaborate and implement a robust legal and policy framework to meet the requirements of resolution 1540 (2004). In applying the lesson, the subprogramme will strengthen engagement with those Member States requiring support and provide targeted assistance in the development of national action plans and related legal and policy instruments.

4.81 Expected progress towards the objective is presented in the performance measure below (see figure 4.VII).

Figure 4.VII

Performance measure: number of Member States with enhanced capacity to strengthen policy on weapons of mass destruction and Security Council resolution 1540 (2004) (annual)

Deliverables

4.82 Table 4.19 lists all deliverables of the subprogramme.

Table 4.19

Subprogramme 5: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>

6. Seminars, workshops and training and capacity-building events on small arms and light weapons	50	182	50	70
7. Seminars, workshops and training and capacity-building events on the non-proliferation of weapons of mass destruction and the implementation and universalization of non-proliferation instruments and relevant Security Council resolutions	30	7	30	20
8. International conferences on disarmament, non-proliferation and arms control	4	2	4	2
Publications (number of publications)	2	6	2	2
9. On disarmament, non-proliferation and arms control	2	6	2	5
C. Substantive deliverables				
Consultation, advice and advocacy: substantive, technical and legal advice as well as training on the effective implementation of relevant instruments in accordance with Security Council and General Assembly mandates upon request by Member States, regional and subregional organizations and civil society organizations in Africa, Asia and the Pacific, and Latin America and the Caribbean.				
D. Communication deliverables				
Outreach programmes, special events and information materials: fact sheets on the work of the regional centres and liaison office in Vienna; outreach events for youth, women and other stakeholders.				
Digital platforms and multimedia content: website and social media accounts.				

B. Proposed post and non-post resource requirements for 2023

Overview

- 4.83 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 4.20 to 4.22.

Table 4.20

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2021 expenditure	2022 appropriation	Changes					2023 estimate (before recosting)

^a Includes two temporary posts (1 D-1 and 1 P-3).

- 4.84 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 4.23 to 4.25 and figure 4.VIII.
- 4.85 As reflected in tables 4.23 (1) and 4.24 (1), the overall resources proposed for 2023 amount to \$12,706,200 before recosting, reflecting a net decrease of \$30,600 (or 0.2 per cent) compared with the appropriation for 2022. Resource changes result from three factors, namely: (a) technical adjustments; (b) new and expanded mandates; and (c) other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Figure 4.VIII
Distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

4.86 As reflected in table 4.23 (1), resource changes reflect a net decrease of \$279,300, as follows:

- (a) **Subprogramme 1, Multilateral negotiations and deliberations on disarmament and arms limitation.** The decrease of \$277,600 under experts (\$253,800) and consultants (\$23,800) relates to the removal of non-recurrent provisions to support the Group of Governmental

Experts to further consider nuclear disarmament verification issues, established pursuant to General Assembly resolution [74/50](#);

- (b) **Subprogramme 2, Weapons of mass destruction.** The decrease of \$1,700 under travel of staff reflects the removal of non-recurrent provisions to support the activities of the open-ended working group on reducing space threats through norms, rules and principles of responsible behaviours, established pursuant to General Assembly resolution [76/231](#).

New and expanded mandates

4.87 As reflected in table 4.23 (1), resource changes reflect an increase of \$248,800, as follows:

- (a) **Subprogramme 1, Multilateral negotiations and deliberations on disarmament and arms limitation.** The increase of \$245,300 under experts would provide for the Group of Governmental Experts to further consider nuclear disarmament verification issues, established pursuant to General Assembly resolution [74/50](#). In accordance with Assembly decision 76/515, two sessions will be held in 2023 in Geneva to compensate for the two planned sessions that had to be postponed in 2021 owing to travel restrictions resulting from the COVID-19 pandemic;
- (b) **Subprogramme 2, Weapons of mass destruction.** The increase of \$3,500 under general operating expenses would provide for the cost of an alternative venue for the session of the open-ended working group on reducing space threats through norms, rules and principles of responsible behaviours, established pursuant to General Assembly resolution [76/231](#), owing to the anticipated limitation of meeting facilities resulting from the implementation of the strategic heritage plan construction project at the United Nations Office at Geneva.

Other changes

4.88 As reflected in table 4.23 (1), resource changes under policymaking organs, amounting to a decrease of \$100, reflect the travel plan for the Secretary-General of the Conference on Disarmament and Personal Representative of the Secretary-General of the United Nations to the Conference, and the Deputy Secretary-General of the Conference when attending the seventy-eighth session of the General Assembly and consultative meetings in New York.

Extrabudgetary resources

- 4.89 As reflected in tables 4.23 (2) and 4.24 (2), the Office for Disarmament Affairs expects to continue to receive both cash and in-kind contributions, which would complement regular budget resources in delivering the Office's mandates. In 2023, extrabudgetary resources (cash contributions) are estimated at \$12,757,400 and would provide for 36 posts, as presented in table 4.24 (2), and non-post requirements. The resources would be used mainly for research and analysis, to support meetings and conventions, raise awareness and build technical and substantive capacity at the national and regional levels, and strengthen partnerships and participation, aimed at contributing to the advancement of international agreements on disarmament best practices. Extrabudgetary resources represent 50.1 per cent of the total resources for this programme. Anticipated in-kind contributions will provide for rent-free premises with an estimated value of \$86,800. The increase of \$1,354,400 mainly reflects additional staffing requirements under subprogrammes 1, 2 and 3.
- 4.90 The extrabudgetary resources for UNIDIR are subject to the oversight of the Advisory Board on Disarmament Matters. The authority to oversee the use of other extrabudgetary resources of subprogrammes rests with the Office for Disarmament Affairs, in accordance with the delegation of authority by the Secretary-General.

Policy-making organs

- 4.91 Table 4.26 provides information on the Conference on Disarmament and related resource requirements under the regular budget.

Table 4.26

Policy-making organs

(Thousands of United States dollars)

<i>Policy-making organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2022 appropriation</i>	<i>2023 estimate (before recosting)</i>
Conference on Disarmament	The Conference on Disarmament is the single multilateral disarmament negotiating forum of the international community. Pursuant to paragraph 120 (c) of the final document of the tenth special session of the General Assembly, the Secretary-General appoints the Secretary-General of the Conference, who also acts as his Personal Representative, to assist the Conference and its Presidents in organizing the Conference. As requested by the Assembly in its resolution 34/83 L, the Secretary-General provides staff, as well as the assistance and services needed by the Conference and any subsidiary bodies that it might establish, in accordance with the arrangements set out in its rules of procedure. The secretariat of the Conference consists of officers of the secretariat and the Geneva Branch of the Office for Disarmament Affairs	Mandate: final document of the tenth special session of the General Assembly – paragraph 120 (resolution S-10/2) Membership: 65 government officials, including of 5 nuclear weapon States and other key militarily significant States Number of sessions in 2023: 1 session of 24 weeks conducted in 3 parts	8.2	8.1
Total			8.2	8.1

- 4.92 The proposed regular budget resources for 2023 amount to \$8,100 and reflect a decrease of \$100 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 4.88. Additional details on the distribution of the proposed resources for 2023 are reflected in table 4.27.

Executive direction and management

- 4.93 The Office of the Under-Secretary-General and High Representative for Disarmament Affairs comprises the immediate Office of the High Representative, the Office of the Director and Deputy to the High Representative, the Science, Technology and International Security Unit and the Policy Coordination and Change Management Unit. The High Representative is assisted by a director who serves as Deputy. The component is responsible for the overall direction, supervision and

management of the Office for Disarmament Affairs in the implementation of its mandates and its approved programme of work, and advises and supports the Secretary-General on all disarmament, non-proliferation, arms control and related security matters and, in that respect, represents the Secretary-General, as required. The component is also responsible for providing authoritative analysis and assessment of developments for policy guidance and decision-making purposes and acts as focal point on these matters between the Secretariat and Member States.

- 4.94 The Office of the Director is responsible for supporting the High Representative; preparing and monitoring the implementation of the programme of work of the Office for Disarmament Affairs and ensuring efficient cooperation between the branches and the effective delivery of the programmatic mandates of the Office; preparing reports and notes on political and managerial issues; providing strategic guidance on programme implementation; and providing advice to the High Representative on all substantive, organizational, administrative, personnel and budgetary matters, including the overall coordination in the preparation and revision of the inputs of the Office for Disarmament Affairs to the annual programme plan and the programme budget.
- 4.95 The Science, Technology and International Security Unit advises the Office of the High Representative, the Office of the Director and the subprogrammes on scientific and technological issues in the context of international security, other strategic issues, including autonomous weapons, outer space, information and telecommunications technology issues, and normative and analytical research activities, in support of the priorities of the Secretary-General related to disarmament. The Unit is responsible for the preparation of political analyses and substantive background notes on a broad range of initiatives and topics within its area of expertise.
- 4.96 The Policy Coordination and Change Management Unit provides direct support to the High Representative and the Office for Disarmament Affairs on cross-cutting policy issues, and internal coordination and change management, including coordination of the mainstreaming and inclusion of gender perspectives in the programmatic work of the Office and oversight of gender parity within the Office.
- 4.97 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), the Office for Disarmament Affairs will continue to reduce its carbon footprint by significantly reducing the usage of photocopy paper and the printing of documentation by encouraging staff to work increasingly with only electronic versions of various documents, including mission reports, assessment notes, inter-office memorandums, submissions by Member States, background materials and talking points. Additional efforts would be made to reduce travel and instead optimize participation in meetings through videoconferencing.
- 4.98 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 4.28. The low compliance rate of 24 per cent for travel in 2021 is due mainly to the late confirmation of meetings by host Governments, late confirmation and submission of documents by meeting participants and delays in finding appropriate venues and processing of travel requests owing to staffing capacity constraints, all of which were related to the COVID-19 pandemic. The Office will continue to ensure that every case submitted late will be backed by a justification from the head of the relevant branch, followed by an approval from the High Representative. Travel ticket purchases will continue to be monitored closely by the Executive Office and reports will be shared with all branch chiefs and with the High Representative for intervention, as required.

4.99 The proposed regular budget resources for 2023 amount to \$2,314,900 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 4.29 and figure 4.IX.

Extrabudgetary resources

4.100 Extrabudgetary resources for executive direction and management are estimated at \$46,100 and would assist the Office in carrying out ad hoc research and analysis activities related to the overarching goals supported by the various subprogrammes.

Programme of work

Subprogramme 1

Multilateral negotiations and deliberations on disarmament and arms limitation

4.101 The proposed regular budget resources for 2023 amount to \$3,123,300 and reflect a decrease of \$32,300 compared with the appropriation for 2022. The proposed decrease is explained in paragraphs 4.86 (a) and 4.87 (a). Additional details on the distribution of the proposed resources for 2023 are reflected in table 4.30 and figure 4.X.

4.102 Pursuant to General Assembly resolution 75/253 A, the resources of \$3,123,300 include a provision for a subvention in the amount of \$683,500 to UNIDIR for 2023, which reflects the same amount compared with the appropriation for 2022. The amount is reflected under grants and contributions and includes a provision of: (a) \$609,800 towards the costs of two posts (1 D-1 and 1 P-5) and general temporary assistance to help to organize quarterly briefings to all regional groupings on research and ideas of relevant disarmament topics, to promote disarmament and non-proliferation knowledge, ideas and dialogue to a broader and more diverse community; and (b) \$73,700 to support the conduct of three events in countries that are not members of the Organisation for Economic Co-operation and Development to promote disarmament and non-proliferation knowledge, ideas and dialogue to a broader and more diverse community.

Subprogramme 1: distribution of proposed resources for 2023 (before recosting)
 (Number of posts/thousands of United States dollars)

Extrabudgetary resources

4.103 Extrabudgetary resources for the subprogramme are estimated at \$4,974,800 and would provide for 11 posts (1 P-5, 2 P-4, 5 P-3 and 3 General Service (Other level)) and non-post resources. The resources would provide for the organization of official meetings relating to the Biological Weapons Convention, the Convention on Certain Conventional Weapons, the Convention on Cluster Munitions and the Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on Their Destruction, as well as the functioning of the Biological and Certain Conventional Weapons Conventions Implementation Support Units. The increase of \$756,700 mainly reflects projected contributions for additional staffing requirements to support the project on building resilience in biosafety and biosecurity.

**Subprogramme 2
 Weapons of mass destruction**

4.104 The proposed regular budget resources for 2023 amount to \$1,669,200 and reflect a net increase of \$1,800 compared with the appropriation for 2022. The proposed increase is explained in paragraphs 4.86 (b) and 4.87 (b). Additional details on the distribution of the proposed resources for 2023 are reflected in table 4.31 and figure 4.XI.

Subprogramme 2: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

4.105 Extrabudgetary resources for the subprogramme are estimated at \$2,105,600 and would provide for three posts (1 P-5, 1 P-4 and 1 General Service (Other level)) and non-post resources. The resources would support the subprogramme’s activities to advance disarmament and non-proliferation in all aspects of nuclear weapons and all other weapons of mass destruction and their means of delivery. The activities are aimed at reducing the risk of nuclear war and facilitating implementation of Member States’ disarmament and non-proliferation commitments. The resources would strengthen the operational readiness of the Secretary-General’s Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons. The increase of \$168,100 mainly reflects projected contributions for additional staffing to support the activities related to the tenth Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons.

Subprogramme 3 Conventional arms

4.106 The proposed regular budget resources for 2023 amount to \$1,080,400 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 4.32 and figure 4.XII.

Table 4.32

Subprogramme 3: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

4.107 Extrabudgetary resources for the subprogramme are estimated at \$2,973,700 and would provide for six posts (1 P-4, 3 P-3 and 2 General Service (Other level)) and non-post resources. The resources would be used mainly to support implementation of gender-mainstreamed policies, programmes and actions in the fight against trafficking in and misuse of small arms, in line with the women and peace and security agenda, and to increase access to technical guidance on small arms control and ammunition management. The resources would also support conventional arms regulation activities

and efforts to further the Silencing the Guns campaign in Africa. The increase of \$301,000 mainly reflects projected contributions for additional staffing to support the second phase of the SaferGuard programme to strengthen international processes on ammunition management.

Subprogramme 4 Information and outreach

4.108 The proposed regular budget resources for 2023 amount to \$1,394,300 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 4.33 and figure 4.XIII.

Subprogramme 4: distribution of proposed resources for 2023 (before recosting)
(Number of posts/thousands of United States dollars)

Extrabudgetary resources

4.109 Extrabudgetary resources for the subprogramme are estimated at \$75,100 and would provide for one post (P-3), as well as non-post resources. The resources would be used to raise awareness of

disarmament issues at the global level and build technical and substantive capacity at the national and regional levels. In support of General Assembly resolution 76/45 on youth, disarmament and non-proliferation, the resources would be used to enhance partnerships and strengthen participation by a broad range of stakeholders in disarmament and the regulation of arms.

Subprogramme 5 Regional disarmament

4.110 The proposed regular budget resources for 2023 amount to \$2,468,200 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 4.34 and figure 4.XIV.

Figure 4.XIV
Subprogramme 5: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

4.111 Extrabudgetary resources for the subprogramme are estimated at \$2,146,400 and would provide for 12 posts (1 P-3 and 11 Local level) and non-post resources. Through the three regional centres for peace and disarmament, the resources would be used to support Member States in addressing disarmament, non-proliferation and arms control issues. The resources would also contribute to building technical and legal capacity at the national and regional levels in support of international agreements and standards on conventional arms control and non-proliferation of weapons of mass destruction, raise awareness of key and cross-cutting issues such as gender and emerging technologies, and facilitate regional and national discussions among relevant stakeholders. The increase of \$102,200 reflects projected contributions mainly for higher costs to support the aforementioned activities.

Programme support

4.112 The Executive Office provides central administrative services related to human resources and financial and general administration, including resource planning and the use of common services, together with administrative support for policymaking organs and meetings, as required.

4.113 The proposed regular budget resources for 2023 amount to \$647,800 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 4.35 and figure 4.XV.

I. Department of Peace Operations

Foreword

The Department works to integrate the efforts of the United Nations and its partners in the context of peacekeeping operations to deliver on their mandates and safeguard the communities they serve, amid increasingly challenging operational environments and the ongoing coronavirus disease (COVID-19) pandemic.

In 2023, the Department of Peace Operations will bring forward the Action for Peacekeeping Plus initiative, which is the implementation plan for the Action for Peacekeeping initiative and provides renewed focus and momentum for that initiative.

Peacekeeping is political, and its ultimate success depends on active and sustainable political processes for the real prospect of a peace process. The Action for Peacekeeping Plus initiative reaffirms the centrality of peacekeeping as a political tool and the importance of developing overarching, coherent political strategies through a collective, integrated effort. Such strategies must address the increased threats to peace and security posed by extremist groups, transnational criminal networks, socioeconomic tensions, population displacement and climate disruption.

The Action for Peace Plus initiative also recognizes the centrality of protecting civilians and supporting institution-building across many operations. It focuses on enhancing our ability to measure and improve peacekeeping performance and putting in place safeguards and measures for the safety and security of peacekeeping personnel. Ensuring that all peacekeeping personnel adhere to United Nations standards of conduct and are held accountable is a central element of the initiative.

Advancing the women and peace and security agenda and pursuing gender parity, along with innovative, data-driven and technology-enabled peacekeeping, are two cross-cutting areas mainstreamed across all seven Action for Peace Plus priorities.

Through the Action for Peace Plus framework, the Department will further enhance its ongoing efforts to reform and improve United Nations peacekeeping.

(Signed) Jean-Pierre **Lacroix**
Under-Secretary-General for Peace Operations

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 5.1 The Department of Peace Operations is responsible for supporting the maintenance of international peace and security by providing political and executive direction to peace operations within its purview in accordance with and by the authority derived from the principles and purposes of the Charter of the United Nations. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolution [72/262 C](#), and the annual comprehensive reviews of the whole question of peacekeeping operations in all their aspects and the annual consideration of cross-cutting issues related to peacekeeping operations. The objectives of the programme are also conceived taking into account Security Council mandates, in particular Council resolutions [1325 \(2000\)](#), [2250 \(2015\)](#), [2282 \(2016\)](#) and [2436 \(2018\)](#), as well as General Assembly resolutions [60/180](#), [70/262](#) and [74/277](#). The Department provides integrated strategic, political, operational and management advice, direction and support on military, police, mine action and other relevant issues to all operations under its responsibility in order to ensure the effective implementation of their mandates. Through its efforts to improve peacekeeping, enhance its performance and adapt to contemporary risks and challenges, the Department will continue to help conflict-affected countries on their path back to sustainable peace. The work of the Department is critical to continuously ensure the relevance and effectiveness of United Nations peacekeeping, which remains a unique instrument for global peace and security.

Strategy and external factors for 2023

- 5.2 The strategy of the Department of Peace Operations remains guided by all relevant Security Council mandates. The Department will continue to prioritize the full implementation of the peace and security reform objectives. The Action for Peacekeeping initiative and its implementation plan, Action for Peacekeeping Plus, will guide the programme, in line with the commitments set out in the Declaration of Shared Commitments on United Nations Peacekeeping Operations. The areas of focus continue to be:
- (a) To enhance political strategies and advance lasting political solutions, including by developing country and regional strategies, through the integrated approach of the peace and security pillar, to develop proposals for the consideration of the Security Council on the sequencing and prioritization of mandates and to reflect the Action for Peacekeeping priorities in reporting;
 - (b) To implement the women and peace and security agenda across all peace functions, including by developing a methodology for gender-sensitive conflict analysis, distributing guidance on women's full, equal and meaningful participation in peace processes and systematizing reporting on women and peace and security outcomes;
 - (c) To strengthen the protection provided by peacekeeping operations, including by updating and disseminating the policy on the protection of civilians in United Nations peacekeeping, integrating strategic approaches to protection into the strategic thinking and actions of missions and conducting context-specific training on the protection of civilians;
 - (d) To support effective performance and accountability of all mission components through the implementation of the Comprehensive Planning and Performance Assessment System to evaluate mission performance using data and analysis, the development of an integrated performance policy framework and increased engagement with troop- and police-contributing countries on performance;

- (e) To strengthen the impact of peacekeeping on sustaining peace, including by implementing joint transition and mobilization strategies and coordinating closely with the Department of Political and Peacebuilding Affairs, including the Peacebuilding Support Office, as well as other United Nations entities and external partners;
 - (f) To improve the safety and security of peacekeepers, including by implementing the related action and training plans and introducing and using technologies, which should be implemented with transparency and in consultation with Member States, as appropriate;
 - (g) To improve peacekeeping partnerships by strengthening United Nations-African Union cooperation on political efforts, including through joint field visits and briefings, as well as through capacity-building and the light coordination mechanism, which will strengthen efforts to identify training requirements and match capacity-building providers with new and emerging troop-contributing countries in need of support;
 - (h) To strengthen the conduct of peacekeeping operations and personnel and enhance the operationalization of the human rights due diligence policy on United Nations support to non-United Nations security forces.
- 5.3 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the coronavirus disease (COVID-19) pandemic. Examples of best practices and lessons learned include a reduction (but not elimination) in the use of in-person meetings with and briefings to the Special Committee on Peacekeeping Operations and expert groups and the introduction of online training workshops, allowing for the participation of all interested troop- and police-contributing Member States, while concluding the process with a face-to-face validation. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.
- 5.4 With regard to cooperation with other entities at the global, regional, national and local levels, partnerships with peace and security actors, in particular regional organizations, and with humanitarian and development actors, including international financial institutions, will remain essential to ensuring that the overall impact of international efforts in peacekeeping contexts is maximized. The Department will also maintain its strategic and operational partnerships with the African Union and other regional and subregional organizations in Africa, as well as with the European Union. The Department will continue to cooperate closely with other regional organizations, including the League of Arab States, the North Atlantic Treaty Organization, the Collective Security Treaty Organization, the Association of Southeast Asian Nations and the Organization for Security and Cooperation in Europe, on issues related to policy, information-sharing and training, among others. The Department will continue to reinforce its cooperation with the World Bank, through the United Nations-World Bank Working Group.
- 5.5 With regard to cooperation with other Secretariat entities, the Department will continue to review and refine the implementation of the reform of the peace and security pillar and ensure coherence, working with the Department of Political and Peacebuilding Affairs with a view to, in particular, strengthening a common organizational culture that fosters inclusion, innovation and professional development. The Department will work closely with the Department of Management Strategy, Policy and Compliance and the Department of Operational Support in assisting peacekeeping operations. The Department will maintain strong coordination with the reformed management and development pillars.
- 5.6 With regard to inter-agency coordination and liaison, the Department will continue to maintain its strong relations with other United Nations agencies, funds and programmes by chairing or participating in a range of inter-agency groups and processes, including the Inter-Agency Working Group on Disarmament, Demobilization and Reintegration, the Inter-Agency Security Sector

Reform Task Force, the Inter-Agency Coordination Group on Mine Action and the new Inter-Agency Task Force on Policing. Other cross-agency cooperation will be undertaken through the global focal point arrangement for the rule of law and the Peacebuilding Strategy Group.

- 5.7 With regard to the external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) Availability of political support and adequate capabilities;
 - (b) Continued support from Member States for the advancement of the Action for Peacekeeping initiative;
 - (c) Continued support from peacekeeping partners and other entities.
- 5.8 The Department integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, it implements the women and peace and security agenda, which includes strengthening gender-sensitive conflict analysis, providing guidance on women’s full, equal and meaningful participation in peace processes and systematizing reporting on women and peace and security outcomes.
- 5.9 In line with the United Nations Disability Inclusion Strategy, the Department will support Secretariat-wide efforts on disability inclusion, including through the implementation of a joint Department of Political and Peacebuilding Affairs-Department of Peace Operations disability inclusion action plan.

Programme performance in 2021

Impact of the pandemic

- 5.10 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular under subprogramme 4, where training courses for troop- and police-contributing Member States were either postponed or conducted with a reduced number of participants, because of travel restrictions and social distancing requirements. Furthermore, mission senior leadership courses were cancelled and replaced with virtual training with reduced hours.

Legislative mandates

- 5.11 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

49/37 ; 74/277	Comprehensive review of the whole question of peacekeeping operations in all their aspects	70/262 72/199	Review of the peacebuilding architecture Restructuring of the United Nations peace and security pillar
58/296	Administrative and budgetary aspects of the financing of the United Nations peacekeeping operations	72/262 C	Special subjects relating to the programme budget for the biennium 2018-2019 (sect. III)
60/180	The Peacebuilding Commission	74/80	Assistance in mine action
61/279 ; 65/290	Strengthening the capacity of the United Nations to manage and sustain peacekeeping operations		

Security Council resolutions

1325 (2000)	2250 (2015)
1894 (2009)	2272 (2016)
2151 (2014)	2282 (2016)
2185 (2014)	2365 (2017)

2382 (2017)	2553 (2020)
2436 (2018)	2589 (2021)
2447 (2018)	2594 (2021)
2518 (2020)	

Deliverables

5.12 Table 5.1 lists all cross-cutting deliverables of the programme.

Table 5.1

Cross-cutting deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	12	12	12	12
1. Meetings of the Fifth Committee	1	1	1	1
2. Meetings of the Committee for Programme and Coordination	1	1	1	1
3. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
4. Formal session of the Special Political and Decolonization Committee	1	1	1	1
5. Formal session of the Special Committee on Peacekeeping Operations	1	1	1	1
6. Meetings of the Security Council on cross-cutting strategic, policy and structural issues related to peacekeeping	3	3	3	3
7. Meetings of the General Assembly and its subsidiary organs on the developments in peacekeeping missions and on cross-cutting strategic, policy and structural issues related to peacekeeping	4	4	4	4
C. Substantive deliverables				
Consultation, advice and advocacy: visits to troop- and police-contributing countries and other Member States to develop strategic partnerships and build common approaches to support United Nations peacekeeping; meetings with or briefings to Member States, regional organizations and groups of friends/contact groups on peacekeeping.				
D. Communication deliverables				
Outreach programmes, special events and information materials: outreach events, including conferences, exhibits and public briefings on United Nations peacekeeping, as well as associated promotional materials.				
External and media relations: media events, including interviews and press briefings on thematic and mission-specific topics.				
Digital platforms and multimedia content: peacekeeping-themed content on digital and social media platforms.				

Evaluation activities

- 5.13 The OIOS evaluation on political affairs in peacekeeping missions completed in 2021 has guided the proposed programme plan for 2023.
- 5.14 In 2021, the Department also continued to focus its evaluation capacities on the roll-out of the Comprehensive Planning and Performance Assessment System in peacekeeping operations, which supports the implementation of Security Council resolution [2436 \(2018\)](#).
- 5.15 The results and lessons of the evaluation referenced above have been taken into account for the proposed programme plan for 2023. For example, the Department will review the peacekeeping mission structures that are in place for implementing missions' political affairs mandates.

- 5.16 In 2023, the Department will continue to support the implementation of the Comprehensive Planning and Performance Assessment System in all United Nations peacekeeping operations, which will help the Department and missions to strengthen mandate implementation.

Programme of work

Subprogramme 1 Operations

Objective

- 5.17 The objective, to which this subprogramme contributes, is to ensure the effective and efficient implementation of all Security Council mandates to plan, establish and adjust peace operations within the purview of the Department, as well as the effective implementation of relevant General Assembly resolutions, in order to maintain international peace and security.

Strategy

- 5.18 To contribute to the objective, the subprogramme will:
- (a) Improve mission- and context-specific analysis and reporting on peacekeeping to the Security Council, the General Assembly and other intergovernmental bodies and troop- and police-contributing countries;
 - (b) Ensure that integrated planning processes are completed according to Security Council substantive and time requirements, with an emphasis on supporting transitions between peacekeeping operations and follow-up United Nations presences;
 - (c) Incorporate regional aspects in country- and mission-specific strategies, as part of the emphasis on a regional approach to peace, security and stability further to the reform of the peace and security pillar;
 - (d) Analyse the pandemic's longer-term impact in peacekeeping contexts on key national political processes or operational activities so as to mitigate risks.
- 5.19 The above-mentioned work is expected to result in:
- (a) Better information on peacekeeping operations being available to the General Assembly, the Security Council and other intergovernmental bodies;
 - (b) Better planning for mandate delivery by peacekeeping operations and for transitions;
 - (c) More coherent and impactful United Nations engagement and support in matters of peace and security provided to countries and the regions in which they are situated.

Programme performance in 2021

Transition from peacekeeping to peacebuilding in the Democratic Republic of the Congo

- 5.20 Pursuant to Security Council resolution [2502 \(2019\)](#), the United Nations Organization Stabilization Mission in the Democratic Republic of the Congo (MONUSCO) and the Government of the Democratic Republic of the Congo agreed on a joint strategy on the progressive and phased drawdown of MONUSCO (see [S/2020/1041](#)) that would allow for a progressive transfer of tasks of MONUSCO to the Congolese authorities, with the support of the United Nations country team and other stakeholders. The joint strategy articulates the desired end state and priority areas of engagement to create an enabling environment for the Mission's sustainable drawdown based on conditions on the ground. In its resolution [2556 \(2020\)](#), the Security Council endorsed the joint

strategy and the broad parameters of the Mission’s transition, as well as its planned withdrawal from the Kasai region in 2021. Accordingly, the Kananga field office and the Tshikapa suboffice closed on 30 June 2021, although MONUSCO continued to provide bridging support for key peacebuilding and stabilization efforts, including support to national authorities to strengthen justice and correctional institutions, and to the United Nations agencies, and for strengthening the capacity of human rights defenders and organizations to monitor, document and report on the human rights situation. This included workshops to support the roll-out of humanitarian assistance, development initiatives and peacebuilding efforts.

5.21 Progress towards the objective is presented in the performance measure below (see table 5.2).

Table 5.2
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	Operationalization of humanitarian assistance, development initiatives and efforts to advance peacebuilding and stabilization, including the linkages between humanitarian assistance, development and peace in the Kasai Province and the identification of four priority zones, namely, Tshikapa/Kamonia and Mweka in Kasai Province and Luiza and Dibaya in Kasai Central Province	Increased United Nations country team presence to support national peacebuilding and stabilization efforts, including the linkages between humanitarian assistance, development and peace, with a focus on the Kasai, Kasai Central and Tanganyika Provinces

Planned results for 2023

Result 1: completing elections and preserving the integrity of the peace process in the Central African Republic

Programme performance in 2021 and target for 2023

- 5.22 The subprogramme’s work contributed to the conclusion of general elections and the swearing in of the President-elect within the constitutional timeline, which met the planned target.
- 5.23 The subprogramme’s work contributed to the planning and preparations to hold local elections, including through the development of the electoral calendar and a resource mobilization strategy, which did not meet the planned target of the holding of local elections. The target was not met because the local elections were postponed to September 2022.
- 5.24 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 5.3).

Table 5.3
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Signing by the Government of the Political Agreement for Peace and Reconciliation in the Central African Republic with major armed groups Promulgation of the Electoral Code	Parliamentary and presidential elections were held on 27 December, within constitutional timelines	The President-elect is sworn in within the constitutional timeline Planning and preparations to hold local elections are undertaken, including the development of the electoral calendar and a resource mobilization strategy	Results of the local elections are announced, authority is extended and decentralization is implemented Commission on Truth, Justice, Reconciliation and Reparation begins its operations	Conclusion of the local elections process

Result 2: progress towards implementation of the peace agreement in Mali

Programme performance in 2021 and target for 2023

- 5.25 The subprogramme’s work contributed to maintaining the dialogue between Malian transition authorities and regional partners, which did not meet the planned target of adoption of an electoral calendar and announcement of dates for presidential and legislative elections. The target was not met as a coup d’état took place on 24 May 2021, following the coup d’état on 18 August 2020.
- 5.26 The subprogramme’s work also contributed to an agreement between the signatory parties to proceed with the socioeconomic reinsertion of former combatants, which did not meet the planned target of steps taken in the implementation of the peace agreement, including institutional and security reforms. The target was not met as the parties did not make progress on key outstanding issues.
- 5.27 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 5.4).

Table 5.4
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	Following a coup d’état, new institutions for an 18-month political transition were established An agreement was reached to hold the new presidential and legislative elections in 2022	Dialogue was maintained between Malian transition authorities and regional partners The signatory parties agreed to proceed with the socioeconomic reinsertion of former combatants	Revised timetable is agreed between transition authorities and regional partners for the completion of the transition and the holding of elections Steps are taken to revitalize the implementation of the peace agreement, including institutional and security reforms	Progress in the political transition and preparations for the holding of parliamentary and presidential elections Progress in the implementation of the peace agreement, including institutional and security reforms

Result 3: improved intercommunity relations and a secure environment for all communities in Kosovo¹

Proposed programme plan for 2023

5.28 Confidence-building projects and programmatic activities will continue to play a pivotal role in enhancing the subprogramme’s delivery on intercommunity trust-building through the United Nations Interim Administration Mission in Kosovo, with a focus on advancing the peace and security agendas relating to women and youth. The subprogramme has focused on strengthening the capacities of authorities and vulnerable communities to address risks, including the COVID-19 pandemic, that could have an impact on their livelihood and resilience. Such projects have also amplified opportunities for the subprogramme to improve collaboration and coherence with key international partners, in line with the Action for Peacekeeping Plus priorities. Strategic communications are currently being strengthened as a tool for advancing an accurate understanding of such efforts.

Lessons learned and planned change

5.29 The lesson for the subprogramme was the need for improved monitoring of its impact in order to strengthen its strategic approach, in particular with regard to enhancing the participation of women and youth in public discourse. In applying the lesson, the subprogramme will further develop indicators that measure the empowerment of women and youth in intercommunity trust-building, which could enhance the design of the subprogramme’s support to local efforts to promote reconciliation.

5.30 Expected progress towards the objective is presented in the performance measure below (see figure 5.I).

Figure 5.I
Performance measure: activities by municipal institutions, civil society and local organizations promoting intercommunity trust-building and integration in Kosovo

(Number of activities)

Deliverables

5.31 Table 5.5 lists all deliverables of the subprogramme.

¹ References to Kosovo shall be understood to be in the context of Security Council resolution [1244 \(1999\)](#).

Table 5.5
Subprogramme 1: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	56	60	54	55
1. Reports of the Secretary-General to the Security Council on matters related to peacekeeping operations	36	35	34	35
2. Letters from the Secretary-General to the President of the Security Council	20	25	20	20
Substantive services for meetings (number of three-hour meetings)	38	32	38	35
3. Meetings of the Security Council on peacekeeping issues	38	32	38	35
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	13	8	13	12
4. Workshops for heads of political components of peacekeeping operations	5	–	5	5
5. Workshops for regional and subregional political strategies for peacekeeping in the Middle East	3	2	3	2
6. Workshops for regional and subregional political strategies for peacekeeping in Africa	5	6	5	5
C. Substantive deliverables				
Consultation, advice and advocacy: advice and information on relevant aspects of peacekeeping operations to approximately 120 troop- and police-contributing countries; consultations with/among 5 regional organizations to promote regional peacekeeping capacities expanded in the context of specific operations; and advice to at least 120 permanent missions to the United Nations, the Bretton Woods institutions, 13 international and regional governance and security organizations and non-governmental organizations on peacekeeping issues.				

Subprogramme 2 Military

Objective

- 5.32 The objective, to which this subprogramme contributes, is to maintain international peace and security through the effective performance of military components of peace operations.

Strategy

- 5.33 To contribute to the objective, the subprogramme will:
- Provide briefings and analysis to Member States on the military aspects of new or anticipated developments, and crisis and security situations;
 - Strengthen partnerships with regional organizations to develop common standards in planning peacekeeping operations, generate and deploy appropriate military units, conduct operational assessments and advisory visits and prepare new troop-contributing countries for future participation in United Nations operations;
 - Train senior military leaders and develop task-related standards for military units and military headquarters on conducting performance evaluations to validate the operational readiness of military units prior to deployment, conduct pre-deployment visits and military capability studies and increase the participation of women in peacekeeping operations;

- (d) Further refine the military performance evaluation system, including implementation of the military performance evaluation tool, further develop a military skills validation training mechanism and initiate and deploy a performance evaluation process for individual uniformed personnel;
- (e) Further refine and develop military doctrine, policies and training materials to support performance evaluation, enhance operational readiness and improve the safety and security of peacekeepers;
- (f) Facilitate policy dialogue and knowledge-sharing on effective response measures with Member States and troop-contributing countries to address the impact of the COVID-19 pandemic and mitigate risks, ensuring the generation and rotation of military capabilities required for mandate delivery and force protection in all missions.

5.34 The above-mentioned work is expected to result in:

- (a) Improved reporting to the Security Council, the General Assembly, intergovernmental bodies and troop-contributing countries;
- (b) Rapid deployment and establishment of, or adjustments to, peacekeeping operations in response to Security Council mandates and related decisions;
- (c) Deployment of better-tailored, better-equipped and more relevant military components to peacekeeping operations;
- (d) Improved performance and increased safety of military components in peacekeeping operations.

Programme performance in 2021

Increased participation of female military individual uniformed personnel in United Nations peace operations

5.35 In line with Security Council resolutions [1325 \(2000\)](#) and [2242 \(2015\)](#), the Uniformed Gender Parity Strategy, 2018–2028, sets out targets for increasing the number of female individual uniformed personnel deployed as military observers and staff officers in United Nations peace operations by 2028. Women peacekeepers can contribute to United Nations peace operations through their interaction with women and girls in local communities, including by gathering community-based information, and can reduce the risk of sexual exploitation and abuse. With a baseline of 15 per cent participation in 2018, the subprogramme set a target of an additional 1 per cent increase per year until 2028. The subprogramme engaged actively with Member States and force headquarters in field missions to increase the number of female peacekeepers. As a result, the representation of female individual uniformed personnel exceeded the target of 18 per cent in 2021.

5.36 Progress towards the objective is presented in the performance measure below (see figure 5.II).

Figure 5.II
Performance measure: female individual uniformed personnel in United Nations peace operations

(Percentage)

Planned results for 2023

Result 1: added safety for peacekeepers through improved management of weapons and ammunition

Programme performance in 2021 and target for 2023

5.37 The subprogramme’s work contributed to improvement in the management of weapons and ammunition by military components in United Nations peacekeeping operations through the use of specialized training materials and enhancement of the knowledge and capacity of ammunition technical officers to implement new standards, which met the planned target.

5.38 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 5.6).

Table 5.6
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Two guidance materials are in use by peacekeeping operations (weapons and ammunition policy and standard operating procedures on the loss of weapons and ammunition)	The manual on ammunition management is in use by peacekeeping operations	Specialized training materials on weapons and ammunition management are in use by peacekeeping operations and knowledge and capacity of ammunition technical officers to implement new standards is enhanced	Weapons and ammunition management in peacekeeping operations is facilitated by revised policy and training	Enhanced standard of weapons and ammunition management in peacekeeping operations

Result 2: enhanced management of the performance of military components in United Nations peacekeeping operations

Programme performance in 2021 and target for 2023

- 5.39 The subprogramme’s work contributed to eight peacekeeping operations piloting the military unit evaluation tool for infantry battalion and quick reaction force units, which met the planned target.
- 5.40 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 5.7).

Table 5.7
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Initial mechanism to assess the performance of military units in place	Initial mechanism to assess the performance of military units in place	8 peacekeeping missions pilot the military unit evaluation tool for infantry battalion and quick reaction force units	All peacekeeping operations use the military unit evaluation tool of the new military performance management system 4 peacekeeping operations pilot the force and sector headquarters evaluation tool	All peacekeeping operations use the military unit evaluation tool (for all units for which standards have been promulgated) All peacekeeping operations use the force and sector headquarters evaluation tool Initial mechanism to assess the performance of individually deployed military personnel in place

Result 3: enhanced preparedness of military units in the Peacekeeping Capability Readiness System

Proposed programme plan for 2023

- 5.41 The subprogramme has been working to further enhance rapid force generation through the Peacekeeping Capability Readiness System, which contributes to the strengthening of engagements with Member States to deploy tailored and well-equipped military components to peacekeeping operations within 60 days of an invitation. The requirements and standards for deployment of military units are set in the statements of unit requirements.

Lessons learned and planned change

- 5.42 The lesson for the subprogramme was that the previous generic statements of unit requirements for the highest level of preparation and readiness, the rapid deployment level units, which were prepared in 2017, do not take into account the latest United Nations operational modalities, and therefore require further updating to enable a more mobile, flexible and technologically advanced force to fulfil the current demands of peacekeeping operations. In applying the lesson, the subprogramme, with the support of Member States, will revise the statements of unit requirements in line with the updated versions of the United Nations military unit manuals to encourage troop-contributing countries to effectively fill the gaps in the Peacekeeping Capability Readiness System.

5.43 Expected progress towards the objective is presented in the performance measure below (see figure 5.III).

Figure 5.III
Performance measure: military units at the rapid deployment level in the Peacekeeping Capability Readiness System

(Number of units)

Deliverables

5.44 Table 5.8 lists all deliverables of the subprogramme.

Table 5.8
Subprogramme 2: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	164	182	178	182
Training events:				
1. With senior military personnel for predeployment induction and post-appointment briefings and intensive orientation	48	25	44	40
2. For command-post exercises for force headquarters	13	26	25	25
3. On the development, revision and implementation of new military policies and guidance materials	25	34	25	25
4. To mainstream a gender perspective for military components of peacekeeping operations	25	20	25	25
5. To improve situational awareness and strengthen the performance of uniformed military components, targeting operational and tactical leadership (heads of military components, sector commanders and force chiefs of staff and infantry battalion commanders)	25	30	35	35
6. On peacekeeping intelligence	24	37	24	24
7. On the management of weapons and ammunition	4	10	–	–
8. For evaluators on the operational performance reporting tool	–	–	–	8

Section 5 Peacekeeping operations

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
Technical materials (number of materials)	93	125	106	116
9. On significant operational developments in peacekeeping operations and on evolving conflict areas	40	43	40	40
10. On force headquarters evaluation	–	–	2	2
11. For new or significantly adjusted peacekeeping operations (strategic military plans)	4	7	6	6
12. On threat assessments reports	13	9	12	12
13. On operational requirements and troop-contributing country capabilities and recommendations prepared after predeployment, assessment and operational advisory visits	20	44	20	20
14. On military skills validation training	–	7	10	10
15. On the deployment of military forces, observers and headquarters staff	12	12	12	12
16. On the military components of peacekeeping operations (policies, guidance materials and standard operating procedures)	4	3	4	4
17. On military performance evaluation standards (scoresheets) for infantry units	–	–	–	6
18. On mid- to long-term requirements and on existing capability gaps	–	–	–	4

C. Substantive deliverables

Consultation, advice and advocacy: briefings to approximately 120 troop-contributing countries and the Military Staff Committee on all military aspects of peacekeeping operations; strategic discussion with 10 Member States and 3 regional organizations on military aspects of peace negotiations, agreements, peacekeeping operations and strategic and operational planning; maintenance of an organized surge capacity comprising a key nucleus of military staff/support team of up to 14 seconded military officers for possible deployment to new and existing missions for up to 90 days.

Databases and substantive digital materials: information on pledged units registered in the Peacekeeping Capability Readiness System by 60 troop-/police-contributing countries; development of a military performance management system.

**Subprogramme 3
Rule of law and security institutions**

Objective

- 5.45 The objective, to which this subprogramme contributes, is to strengthen the rule of law and security sector governance to contribute to the maintenance of international peace and security in countries where peacekeeping operations and special political missions deploy, or where otherwise authorized, or requested by Member States, in full compliance with the Charter of the United Nations.

Strategy

- 5.46 To contribute to the objective, the subprogramme will provide advisory and operational support to peacekeeping operations and special political missions, and where otherwise authorized or requested by Member States. Specifically, the subprogramme will:
- (a) Assist host States in the reform, restructuring and development of their police and other law enforcement institutions, provide operational support and, in rare circumstances, assume interim policing functions in line with the Strategic Guidance Framework for International Policing;
 - (b) Support nationally led efforts to ensure accountability for crimes that fuel armed conflict, in particular those perpetrated against civilians, and crimes committed against United Nations personnel in peacekeeping operations and special political missions, strengthen prison security

and management, re-establish the host State's justice and corrections institutions and engage in trust-building initiatives;

- (c) Support the planning, design and evaluation of processes that remove weapons and individuals from armed groups and facilitate the reintegration of ex-combatants and elements associated with armed groups into society as civilians, and identify and formulate relevant lessons learned and guidance;
- (d) Provide strategic advice on security sector reform and governance and coordinate system-wide efforts to design and implement country-specific assistance, collect lessons learned and develop specialized guidance, while also leveraging partnerships;
- (e) Manage mine action programmes to mitigate explosive threats, train United Nations personnel and enhance national explosive ordnance disposal capacities;
- (f) Rapidly deploy specialist capacities in all the above-mentioned areas;
- (g) Identify and analyse challenges posed by the pandemic in the national rule of law and security sectors and develop and contribute to the implementation of guidance and tools to address them;
- (h) Mainstream support on COVID-19-related issues to national and local responses in policing, justice, corrections, disarmament, demobilization and reintegration, security sector reform and mine action programmes, where possible.

5.47 The above-mentioned work is expected to result in:

- (a) More effective and accountable security and justice institutions in countries receiving assistance, including increased accountability for crimes that fuel conflict and for crimes committed against United Nations personnel in peacekeeping operations and special political missions;
- (b) Reduced threats posed by armed groups and explosive hazards;
- (c) Sustainable peace and the prevention of armed conflict;
- (d) Mitigation of risks affecting the services of national and local rule of law and security institutions;
- (e) Continuity of United Nations operations in the areas of policing, justice, corrections, disarmament, demobilization and reintegration, security sector reform and mine action assistance.

Programme performance in 2021

Rule of law institutions needs met in the context of the pandemic

5.48 Despite COVID-19-related challenges, the subprogramme continued rapid deployment of rule of law and security institutions experts to assist United Nations peace operations and host countries. In addition to the Standing Police Capacity and the Justice and Corrections Standing Capacity, the subprogramme established standing capacities for disarmament, demobilization and reintegration and security sector reform and governance in 2019 and 2021, respectively, to increase responsive capacity and enable delivery of support to field operations and national authorities in conflict and post-conflict situations. In 2021, the standing capacity for security sector reform, jointly with the Standing Police Capacity, contributed to the finalization of the United Nations joint police reform support programme in the Democratic Republic of the Congo and assisted with the formulation of a new joint rule of law strategy in Somalia. The standing capacity for disarmament, demobilization and reintegration continued implementation of community violence reduction initiatives.

5.49 Progress towards the objective is presented in the performance measure below (see table 5.9).

Table 5.9
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	–	<p>Formulation of a new joint rule of law strategy in Somalia</p> <p>Finalization of the United Nations joint police reform support programme in the Democratic Republic of the Congo</p> <p>Improved capacity of prison authorities of the Central African Republic to classify and house prisoners based on security risk levels</p> <p>Improved performance of national criminal justice institutions in South Sudan to respond to serious crimes in priority geographic areas</p> <p>An assessment of the national judicial response to conflict-related sexual violence cases to enable prioritization by national authorities of prosecutions for war crimes and crimes against humanity in the Democratic Republic of the Congo</p>

Planned results for 2023

Result 1: increased awareness by Member States of specialized conflict prevention support provided by the subprogramme

Programme performance in 2021 and target for 2023

- 5.50 The subprogramme’s work contributed to increased awareness of available services and modalities and led to eight Member States receiving specialized support, including on improvised explosive device threat mitigation and prevention of sexual and gender-based violence, which exceeded the planned target of at least two Member States receiving specialized support.
- 5.51 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 5.10).

Table 5.10
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Member States lack awareness of the conflict prevention support provided by the subprogramme and of how to request it	Increased awareness of the subprogramme’s early warning support made available to Member States, regional and subregional organizations and other entities to advance the Secretary-General’s prevention agenda	8 Member States received specialized support from the subprogramme as a result of increased awareness of available services and modalities	An additional 2 Member States receive specialized support from the subprogramme as a result of increased awareness of available services and modalities	An additional 2 Member States receive specialized support from the subprogramme as a result of increased awareness of available services and modalities

Result 2: increased capacity of States hosting United Nations peace operations to strengthen the rule of law and security institutions

Programme performance in 2021 and target for 2023

- 5.52 The subprogramme’s work contributed to the finalization of the joint transition plan between MONUSCO and the Government of the Democratic Republic of the Congo, implementation of the National Congolese Police Reform Action Plan 2020–2024 and improved access to justice and legal protections through prosecution support cells, which met the planned target.
- 5.53 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 5.11).

Table 5.11
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
States hosting peacekeeping operations in transition setting receive joint rule of law programming support (for example, Haiti)	States hosting peacekeeping operations in transition setting receive first whole-of-system programmatic transition support in peacebuilding areas (for example, State liaison functions in the Sudan)	Finalization of the joint transition plan between MONUSCO and the Government of the Democratic Republic of the Congo, implementation of the National Congolese Police Reform Action Plan 2020–2024 and improved access to justice and legal protections through prosecution support cells	States in transition hosting peacekeeping operations receive enhanced programmatic transition support in the area of rule of law and security institutions	States in transition hosting peacekeeping operations continue to receive enhanced programmatic transition support in the area of rule of law and security institutions

Result 3: enhanced accountability for crimes against United Nations personnel in peacekeeping operations and special political missions

Proposed programme plan for 2023

5.54 In its resolution [2589 \(2021\)](#), the Security Council called for specific measures to ensure accountability for crimes against peacekeepers. Overall, 1,082 personnel serving in missions have been killed as result of malicious acts since 1948, including 242 peacekeepers from the United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic (MINUSCA), the United Nations Multidimensional Integrated Stabilization Mission in Mali (MINUSMA) and MONUSCO since 2013, accounting for 80 per cent of all such casualties for the period. Significant progress has been made since 2018 to ensure accountability for such crimes, with an increase in the number of alleged perpetrators identified and detained, an increase in the percentage of cases with confirmed national investigations and a number of convictions in the Central African Republic, the Democratic Republic of the Congo, Lebanon and Mali.

Lessons learned and planned change

5.55 The lesson for the subprogramme was to focus on both the political and the operational aspects of supporting national authorities in their efforts to bring to justice the perpetrators of such crimes. In applying the lesson, the subprogramme will support the implementation of Security Council resolution [2589 \(2021\)](#) through enhanced support to host countries for the investigation and prosecution of cases, including through enhanced implementation of standard operating procedures and development of a comprehensive online database to monitor cases related to the killing of, and all acts of violence against, United Nations personnel serving in peacekeeping operations, and will undertake political advocacy, establish a group of friends and develop public information initiatives.

5.56 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 5.IV).

Figure 5.IV
Performance measure: confirmed investigative measures in MINUSCA, MINUSMA and MONUSCO as of October of each year (cumulative)

(Number of measures)

Deliverables

5.57 Table 5.12 lists all deliverables of the subprogramme.

Table 5.12
Subprogramme 3: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	17	18	18	22
Briefings to Member States on:				
1. Mission/field- and police-specific issues	13	13	14	14
2. Mine action matters	4	5	4	4
3. Accountability for crimes against United Nations personnel in peacekeeping operations and special political missions	–	–	–	4
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	24	45	33	42
4. On police thematic expertise, including on planning and police reform to missions/the field	3	3	3	3
5. On police requirements and capacity and resource needs (predeployment visits to Member States)	5	5	5	5
6. For the development and management of programmes in support of justice and corrections systems	2	2	2	2
7. On mine action (technical and advisory support to field missions and Member States for design of mine action field programmes and oversight)	3	14	3	8
8. On deployment of humanitarian mine action assets	1	2	1	1
9. On risk education in mine action programmes	5	14	14	14
10. On security sector reform policies and strategies	3	3	3	2
11. On disarmament, demobilization and reintegration and community violence reduction	2	2	2	2
12. On accountability for crimes against United Nations personnel in peacekeeping operations and special political missions	–	–	–	5
Seminars, workshops and training events (number of days)	63	63	63	73
13. Seminars on the national selection mechanisms for the readiness, deployment and training of individual police personnel and units	47	47	47	47
14. Training for future heads of police components	6	6	6	6
15. Training/workshops on justice and corrections practices, including predeployment training for corrections officers	10	10	10	10
16. Training/workshops on the investigation and prosecution of crimes against United Nations personnel in peacekeeping operations and special political missions	–	–	–	10
Publications (number of publications)	1	1	1	1
17. Multi-donor report on activities of the Mine Action Service	1	1	1	1
Technical materials (number of materials)	20	22	23	22
18. On disarmament, demobilization and reintegration and community violence reduction	3	3	3	3
19. On the implementation of disarmament, demobilization and reintegration and community violence reduction	2	3	4	4
20. On strategic police capability, police operational plans, standard operating procedures and concepts of operation for police components	6	6	6	6
21. On policing for police-contributing countries, United Nations police and national authorities	4	4	4	4
22. To strengthen assistance in justice and corrections areas	1	1	1	1

Section 5 Peacekeeping operations

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
23. On security sector reform, including defence sector reform, to strengthen assistance to national security sector reform processes	3	3	3	2
24. On issues related to mine action	1	2	2	2
25. On the prevention, investigation and prosecution of serious crimes against United Nations personnel in peacekeeping operations and special political missions	–	–	–	2

C. Substantive deliverables

Consultation, advice and advocacy: consultations with and advice to 22 Member States to strengthen the capacities of national police services and other law enforcement entities; consultations with 47 Member State groupings, regional organizations and specialized institutions on policing; consultations with 35 Member States on disarmament, demobilization and reintegration and community violence reduction, including with the Group of Friends of Disarmament, Demobilization and Reintegration; policy and technical advice to 20 Member States to build the capacity of national authorities and local partners on mine action; technical advice to Member States on weapons and ammunition management and improvised explosive device threat mitigation; advice to facilitate consensus-building on security sector reform options and modalities in “sustaining peace” contexts; consultations and advice to mobilize coordinated and integrated Member State and related partner support for national justice and corrections efforts; consultations with and advice to 25 Member States on issues related to the implementation of Security Council resolution 2589 (2021) on accountability for crimes against peacekeepers, as well as accountability for crimes against United Nations personnel in special political missions.

Databases and substantive digital materials: pledged formed police units registered in the Peacekeeping Capability Readiness System and other personnel matters in the computerized human resources system; online database on accountability for crimes against peacekeepers.

D. Communication deliverables

Digital platforms and multimedia content: digital and social media content on activities of the subprogramme.

Subprogramme 4 Policy, evaluation and training

Objective

- 5.58 The objective, to which this subprogramme contributes, is to enhance the performance and effectiveness of peace operations within the purview of the Department.

Strategy

- 5.59 To contribute to the objective, the subprogramme will:
- Promote and facilitate policy development, evaluation, organizational learning and training on issues relating to peacekeeping, taking into consideration the views and recommendations provided by Member States on the Action for Peacekeeping initiative launched by the Secretary-General in 2018 and the subsequent Action for Peacekeeping Plus initiative launched in 2021;
 - Support peacekeeping operations in the implementation of the Comprehensive Planning and Performance Assessment System;
 - Formulate, update and disseminate policies and practical guidance and provide support to missions in specific thematic areas, such as protection of civilians, civil affairs and child protection;
 - Strengthen knowledge-sharing and guidance development for peacekeeping operations and coordinate the development of guidance for the peace and security pillar and for the Department of Operational Support, in close cooperation with the Department of Political and Peacebuilding Affairs and the Department of Operational Support;

- (e) Build the capacity of policy and best practices officers and focal points in field missions through advice, coordination and training, and continue to strengthen systems and infrastructure for knowledge management by increasing the quality and number of relevant documents available to users in field missions;
- (f) Support Member States that are contributing uniformed personnel through expanded partnerships with national and regional training institutions and partners for the delivery of predeployment training and train-the-trainer courses and the development and delivery of training materials for predeployment preparations;
- (g) Provide civilian predeployment training and leadership and management training for all mission components and backstop missions in the delivery of in-mission training through train-the-trainer courses in operational and support skills;
- (h) Use a learning management system accessible by Member States to host courses, enable the registration of participants, deliver online elements of programmes and enable testing ahead of face-to-face course sessions.

5.60 The above-mentioned work is expected to result in:

- (a) Improved and more responsive decision-making by senior mission management, as comprehensive planning and performance assessment provides senior leadership with data-based evidence showing how resources in their missions are utilized and whether any reorientation of priorities is needed;
- (b) Increased use by missions of specialized information, thematic policy support and guidance, reflecting lessons learned and promoting an exchange of good practices between missions;
- (c) Strengthened and sustained mission performance through consistently trained uniformed and civilian leaders, contingents and individuals.

Programme performance in 2021

Peacekeeping operations implemented the Comprehensive Planning and Performance Assessment System

- 5.61 The subprogramme has continued the work related to the evaluation of the performance of peacekeeping missions, which is aimed at strengthening the effectiveness of missions, including through the implementation of the Comprehensive Planning and Performance Assessment System, which enables peacekeeping operations to systematically assess their operating environment, develop an integrated plan for mandate implementation and assess progress and performance over time using data and analysis. This work informs future plans and helps in the formulation of recommendations to decision makers and mission leadership. The methodology enables missions to respond quickly to changes in the local context and adapt operations, as required. Since the implementation of the System in all peacekeeping operations in 2021, peacekeeping missions have started using it for briefings to the Security Council with visualized data and analysis and for transition planning and monitoring. Based on feedback from peacekeeping operations, the subprogramme streamlined the methodology, migrated the information technology platform to a more secure, integrated and faster infrastructure and developed automated reports that can be tailored to individual missions' needs, including a recommendations tracker that allows for the monitoring of implementation. Using data generated in the System, the subprogramme has started to identify successful approaches and systemic challenges in common mandated areas across missions.
- 5.62 Progress towards the objective is presented in the performance measure below (see figure 5.V).

Figure 5.V
Performance measure: peacekeeping operations implementing the Comprehensive Planning and Performance Assessment System

(Percentage)

Planned results for 2023

Result 1: United Nations police personnel skills training adapted to contemporary requirements

Programme performance in 2021 and target for 2023

- 5.63 The subprogramme’s work contributed to the training of 24 police-contributing Member States, enabling them to build self-sustaining national capacity and deliver foundational predeployment training to individual police personnel who could be deployed to United Nations operations, which did not meet the planned target of a minimum of 43 police-contributing Member States. The target was not met because COVID-19 restrictions affected training activities.
- 5.64 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 5.13).

Table 5.13
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Foundational United Nations police course developed	Continued development of seven specialist United Nations police courses Specialist United Nations police courses could not be fully developed and validated	24 police-contributing Member States received training enabling them to build self-sustaining national capacity and deliver foundational predeployment training to individual police personnel who could be deployed to United Nations operations	Police training centres in 43 police-contributing countries have the capacity to provide foundational or specialist predeployment training courses to police personnel who could be deployed to United Nations operations	Police training centres in 43 police-contributing countries have the capacity to provide foundational or specialist predeployment training courses to police personnel who could be deployed to United Nations operations

Result 2: improved understanding of the performance of units deployed by troop- and police-contributing countries

Programme performance in 2021 and target for 2023

- 5.65 The subprogramme's work contributed to the enhanced understanding of 13 troop- and police-contributing countries of the performance of their units, which met the planned target.
- 5.66 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 5.VI).

Figure 5.VI

Performance measure: troop- and police-contributing countries with enhanced understanding of their performance (cumulative)

(Number of countries)

Result 3: improved access to and understanding of knowledge and guidance materials by United Nations peacekeeping personnel

Proposed programme plan for 2023

- 5.67 The development of guidance and best practice materials is important for the professionalization of peacekeeping. Such materials outline standards for the implementation of mandated tasks, respond to changes in the operational environment and standardize mission processes for greater efficiency and effectiveness. The subprogramme has created over 400 guidance materials over the past decade and aims to improve access and understanding of knowledge and guidance materials by making them available in different formats.

Lessons learned and planned change

- 5.68 The lesson for the subprogramme was the need to strengthen the access to and utility of peacekeeping guidance to enable its effective implementation, taking into account the varied needs and capacities of diverse peacekeeping personnel. In applying the lesson, the subprogramme will tailor the content and format of materials to the needs of different categories of peacekeeping personnel and target distribution to those who need the material. The subprogramme will strengthen its policy and practice database using multimedia formats, including webinars, podcasts and videos, to enhance the uptake and implementation of guidance.
- 5.69 Expected progress towards the objective is presented in the performance measure below (see table 5.14).

Table 5.14
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	Peacekeeping personnel have access to guidance webinars	Peacekeeping personnel have access to the multimedia page on the policy and practice database	Improved access to and understanding of guidance by peacekeeping personnel through the “Policy meets practice” podcast series and guidance and best practice webinars	Improved access to and understanding of guidance by peacekeeping personnel through multimedia guidance and best practice

Deliverables

5.70 Table 5.15 lists all deliverables of the subprogramme.

Table 5.15
Subprogramme 4: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	1
1. Report of the Secretary-General on the implementation of the recommendations of the Special Committee on Peacekeeping Operations	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	38	35	38	38
2. Meetings of the Special Committee on Peacekeeping Operations	34	31	34	34
3. Meetings of the Fourth Committee	4	4	4	4
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	7	5	7	5
4. In the areas of protection of civilians, child protection, civil affairs, conflict-related sexual violence, policy planning, partnerships and force generation	7	5	7	5
Seminars, workshops and training events (number of days)	488	383	421	422
5. Workshops for the provision of strategic guidance, training-of-trainers and assistance in curriculum development and delivery, training methodology, materials and training gap identification to Member States, regional peacekeeping training and policy institutions, and field missions	419	342	365	365
6. Training events on leadership, management and administration for senior civilian and uniformed personnel from field missions and supporting offices, Member States and regional organizations	53	26	45	45
7. Workshops for mission thematic advisers and focal points for knowledge-sharing and training on cross-cutting peacekeeping issues	10	14	10	11
8. Workshops for the European Union and its Member States on a rotational system in support of United Nations peacekeeping operations	6	1	1	1

Part II Political affairs

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
Technical materials (number of materials)	38	39	38	38
9. On all aspects of peacekeeping for Member States and field missions (policy papers, standard operating procedures, technical reports, lessons learned reports, training materials)	34	35	34	34
10. On capability requirements for United Nations peacekeeping operations	4	4	4	4
C. Substantive deliverables				
Consultation, advice and advocacy: briefings and presentations to Member States on peacekeeping issues; expert advice to permanent missions to the United Nations, the Bretton Woods institutions, international and regional organizations and non-governmental organizations on peacekeeping issues.				
Databases and substantive digital materials: the Comprehensive Planning and Performance Assessment System, the Peacekeeping Capability Readiness System, the troop- and police-contributing countries knowledge management system, the policy and practice database and the peacekeeping resource hub accessible to all Member States.				
D. Communication deliverables				
Outreach programmes, special events and information materials: knowledge management newsletter for 15,000 staff; training newsletters for approximately 120 troop- and police-contributing countries and their training institutions; specialist newsletters on child protection for at least 200 experts from Member States and international organizations.				

B. Proposed post and non-post resource requirements for 2023

Overview

5.71 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 5.16 to 5.18.

Table 5.16

5.72 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 5.19 to 5.21 and figure 5.VII.

5.73 As reflected in tables 5.19 (1) and 5.20 (1), the overall resources proposed for 2023 amount to \$5,867,800 before recosting, reflecting no change in resource level compared with the appropriation for 2022. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Figure 5.VII
Distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed and extrabudgetary resources

- 5.74 As reflected in tables 5.19 (2) and 5.20 (2), the Department of Peace Operations expects to continue to be funded from other assessed resources. In 2023, other assessed resources are estimated at \$92,575,600 and would provide for 430 posts, as presented in table 5.20 (2). Post and non-post resources would provide backstopping support and guidance to 12 peacekeeping operations, many of which are deployed in volatile environments. Other assessed resources represent 57.7 per cent of the total resources for the Department and reflect an increase of \$2,307,900, or 2.6 per cent, compared with the estimates for 2022. Further details on the resource changes are reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations (A/76/725).
- 5.75 As reflected in tables 5.19 (3) and 5.20 (3), the Department of Peace Operations expects to receive extrabudgetary resources. In 2023, extrabudgetary resources are estimated at \$61,780,800, and would provide for 81 posts, as presented in table 5.20 (3). Post and non-post resources would mainly provide for the United Nations mine action programme, the implementation of the Action for Peacekeeping initiative, the strengthening of peacekeeping strategic partnerships, the implementation of women and peace and security priorities and the training-of-trainers programme. Extrabudgetary resources represent 38.6 per cent of the total resources for the Department.
- 5.76 The extrabudgetary resources under this section are subject to the oversight of the Department of Peace Operations, which has delegated authority from the Secretary-General.

Executive direction and management

- 5.77 The executive direction and management component comprises the Office of the Under-Secretary-General, the Gender Unit, the Integrated Assessment and Planning Unit, the Office of the Director for Peacekeeping Strategic Partnership and the Office of the Director for Coordination and Shared Services.
- 5.78 The overall responsibilities of the executive direction and management component include the following functions:
- (a) To direct, manage and provide political and policy guidance and strategic direction to the Department-led operations, including in the performance of political, programmatic, managerial and administrative functions;
 - (b) To formulate guidelines and policies for peacekeeping operations, based on Security Council mandates;
 - (c) To advise the Security Council and the General Assembly on all matters related to peacekeeping activities and the future direction of United Nations peacekeeping, including strategic and policy issues and initiatives, such as peacemaking, peacekeeping, peacebuilding, transitions through partnerships with regional organizations and other peacekeeping partners and protection of civilians;
 - (d) To maintain high-level contact with parties to conflict and Member States, in particular members of the Security Council, as well as troop- and police-contributing countries and countries providing financial support, in the implementation of the Security Council mandates;
 - (e) To support peacekeeping operations.
- 5.79 The Gender Unit will continue to operationalize the Action for Peacekeeping commitments on women and peace and security by providing strategic advice on policy development and providing operational and technical backstopping of peacekeeping operations.
- 5.80 The Integrated Assessment and Planning Unit provides strengthened analysis and planning processes at Headquarters and in the missions, including related guidance and training.

Section 5 **Peacekeeping operations**

- 5.81 The Office of the Director for Peacekeeping Strategic Partnership has the overall responsibility for undertaking General Assembly-mandated reviews of peacekeeping operations and oversees the cross-departmental working groups established to address the issues identified.
- 5.82 The Office of the Director of Coordination and Shared Services, which reports to the Under-Secretary-General for Peace Operations and the Under-Secretary-General for Political and Peacebuilding Affairs, includes the joint Executive Office, the Leadership Support Section, the Peacekeeping Situation Centre, the Strategic Communications Section, the Focal Point for Security, the Information Management Unit and the Registry. The Office will continue to prioritize risk management and provide support for organizational resilience and crisis management, including on COVID-19-related challenges, as well as the enhancement of reporting and data analytics capacities and products. It will maintain its outreach efforts, in particular on social media. It will coordinate processes for the selection of and support for senior mission leadership and will continue to increase and diversify the pool of candidates. The Office will pursue its activities in support of organizational change, further to the reform of the peace and security pillar, with an emphasis on reaching gender parity and strengthening a common culture that fosters inclusivity, innovation and professional development.
- 5.83 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), the Department is integrating environmental management practices into its operations. The Department will continue to rely on electronic record-keeping and communications in order to reduce printing, paper-based filing and the use of photocopy paper. The Department also plans to improve electronic waste management to facilitate the environmentally friendly disposal of such waste.
- 5.84 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 5.22. The Department has continued efforts to sensitize staff, through various forms of communication, to the importance of early planning for travel and complying with the advance purchase policy. Managers are required to implement preventive and corrective measures.

Table 5.22
Compliance rate
(Percentage)

Air tickets purchased at least 2 weeks before the commencement of travel	37	49	40	100	100

- 5.85 The proposed regular budget resources for 2023 amount to \$710,300 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 5.23 and figure 5.VIII.

Executive direction and management: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed and extrabudgetary resources

5.86 Other assessed resources for executive direction and management are estimated at \$13,981,400 and would provide for 72 posts (2 D-2, 1 D-1, 9 P-5, 15 P-4, 21 P-3, 3 P-2/1, 2 General Service (Principal level) and 19 General Service (Other level)), as well as non-post resources. The post and non-post resources would support the Office of the Under-Secretary-General in ensuring an integrated approach to planning, directing, managing and supporting peacekeeping operations and would support the Under-Secretary-General in overseeing the strategic direction of the Department and performing political, programmatic, managerial and administrative functions. The proposed increase of \$294,600 relates to the updated standard salary costs, as reflected in the budget for the support account for peacekeeping operations (A/76/725).

5.87 Extrabudgetary resources for the component are estimated at \$5,354,600 and would provide for 12 posts (2 P-5, 9 P-4 and 1 P-3), as well as non-post resources. The post and non-post resources would support the Office of the Under-Secretary-General in implementing the Action for Peacekeeping initiative and strengthen the Department’s digital communication, the capacity of the Office for the Peacekeeping Strategic Partnership and the promotion of activities on women and peace and security.

Programme of work

Subprogramme 1 Operations

5.88 The proposed regular budget resources for 2023 amount to \$3,095,300 and reflect no change in resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 5.24 and figure 5.IX.

(Number of posts/thousands of United States dollars)

Other assessed resources

5.89 Other assessed resources for the subprogramme are estimated at \$12,014,000 and would provide for 59 posts (5 D-1, 8 P-5, 16 P-4, 11 P-3, 4 P-2/1 and 15 General Service (Other level)), as well as non-post resources. The resources would support the regional structure to serve as a single point of entry at Headquarters for all peace and security presences in the field, providing them with coordinated and consolidated political and operational guidance and support. The proposed increase of \$245,600 relates to the updated standard salary costs, as reflected in the budget for the support account for peacekeeping operations ([A/76/725](#)).

**Subprogramme 2
 Military**

5.90 The proposed regular budget resources for 2023 amount to \$504,600 and reflect no change in resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 5.25 and figure 5.X.

(Number of posts/thousands of United States dollars)

Other assessed and extrabudgetary resources

5.91 Other assessed resources for the subprogramme are estimated at \$27,144,800 and would provide for 127 posts (1 D-2, 1 D-1, 9 P-5, 84 P-4, 14 P-3 and 18 General Service (Other level)), as well as non-post resources. The resources would support the Office of Military Affairs in providing technical advice and oversight to the heads of military components on specific military plans and operations; assessing potential threats to military operations; supporting, monitoring and guiding all military components in peacekeeping operations; developing relevant military policy and guidance documents; and maximizing military capability and its timely deployment to peacekeeping operations. The proposed increase of \$752,000 relates to the updated standard salary costs, as reflected in the budget for the support account for peacekeeping operations ([A/76/725](#)).

5.92 Extrabudgetary resources for the subprogramme are estimated at \$1,195,200 and would provide for one P-5 post, as well as non-post resources. The resources would support the operational advisory performance management system.

Subprogramme 3 Rule of law and security institutions

5.93 The proposed regular budget resources for 2023 amount to \$841,000 and reflect no change in resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 5.26 and figure 5.XI.

(Number of posts/thousands of United States dollars)

Other assessed and extrabudgetary resources

- 5.94 Other assessed resources for the subprogramme are estimated at \$22,644,000 and would provide for 108 posts (1 D-2, 3 D-1, 9 P-5, 49 P-4, 30 P-3 and 16 General Service (Other level)), as well as non-post resources. The resources would support rule of law activities undertaken by the Office of the Assistant Secretary-General, the Police Division, the Mine Action Service, the Justice and Corrections Service, the Disarmament, Demobilization and Reintegration Section and the Security Sector Reform Unit. The proposed increase of \$602,800 relates to the updated standard salary costs, the increase of one post and the conversion of one general temporary assistance position to a post, as reflected in the budget for the support account for peacekeeping operations ([A/76/725](#)).
- 5.95 Extrabudgetary resources for the subprogramme are estimated at \$47,329,000 and would provide for 45 posts (1 D-1, 6 P-5, 15 P-4, 11 P-3, 1 P-2/1 and 11 General Service (Other level)), as well as non-post resources. The resources would support the Mine Action Service, the Global Focal Point for Rule of Law, effective weapons management in disarmament, demobilization and reintegration, the Police Division and security sector reform activities.

**Subprogramme 4
Policy, evaluation and training**

- 5.96 The proposed regular budget resources for 2023 amount to \$393,700 and reflect no change in resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 5.27 and figure 5.XII.

Table 5.27

Total		3	–	–	–	–	–	3

Figure 5.XII
Subprogramme 4: distribution of proposed resources for 2023 (before recosting)
 (Number of posts)

Other assessed and extrabudgetary resources

- 5.97 Other assessed resources for the subprogramme are estimated at \$13,524,000 and would provide for 57 posts (1 D-2, 2 D-1, 6 P-5, 21 P-4, 13 P-3, 12 General Service (Other level) and 2 Local level), as well as non-post resources. The resources would enable the Policy, Evaluation and Training Division to implement institutional capacity-building activities to strengthen peacekeeping through the formulation of cross-cutting peacekeeping policy and guidance; knowledge management and the capture and sharing of best practices and innovations; the setting of training standards for peacekeeping personnel; the evaluation of programme performance for mandate implementation; and strategic cooperation within the United Nations and with external partners. The proposed increase of \$233,100 relates to the updated standard salary costs, as reflected in the budget for the support account for peacekeeping operations ([A/76/725](#)).
- 5.98 Extrabudgetary resources for the subprogramme are estimated at \$6,780,300 and would provide for 16 posts (8 P-4, 6 P-3, 1 P-2/1 and 1 General Service (Other level)), as well as non-post resources. The resources would support the Strategic Force Generation Cell, the implementation of the Comprehensive Planning and Performance Assessment System, the prevention of conflict-related sexual violence, the training-of-trainers centre and the light coordination mechanism.

Programme support

- 5.99 Programme support services are provided by the Executive Office of the Department of Political and Peacebuilding Affairs and the Department of Peace Operations for the activities related to the management of financial, human and physical resources.
- 5.100 The proposed regular budget resources for 2023 amount to \$322,900 and reflect no change in resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 5.28 and figure 5.XIII.

Total	320.4	322.9	–	–	–	–	–	322.9

Figure 5.XIII
Programme support: distribution of proposed resources for 2023 (before recosting)

(Thousands of United States dollars)

Other assessed and extrabudgetary resources

- 5.101 Other assessed resources for the component are estimated at \$3,267,400 and would provide for seven posts (1 D-1, 1 P-4, 1 P-3, 1 P-2/1 and 3 General Service (Other level)), as well as non-post resources. The resources would enable the Executive Office to provide finance and budget, human resources and administrative support for the Department. The proposed increase of \$179,700 relates to the updated standard salary costs, the conversion of one general temporary assistance position to a post and additional requirements for general operating expenses, offset in part by a decrease under contractual services, as reflected in the budget for the support account for peacekeeping operations (A/76/725).
- 5.102 Extrabudgetary resources for the component are estimated at \$1,121,700 and would provide for seven posts (2 P-3, 3 General Service (Principal level) and 2 General Service (Other level)), as well as non-post resources. The resources would enable the Executive Office to provide finance and budget, human resources and administrative support for the Department.

II. United Nations Truce Supervision Organization

Foreword

Since its establishment, the United Nations Truce Supervision Organization (UNTSO) has witnessed dramatic changes in its area of operation. The environment is characterized by interaction among a multitude of political, historical and security factors crossing the region. It is unlikely that 2023 will be different, though the changes anticipated may well be positive in relation to the difficulties borne by national populations across the region and the initial steps taken to resolve them. Along with its national and international partners, UNTSO looks to ease the disruptions and temper the effects that could interrupt potential paths towards greater stability.

Uncertainty about the effects of regional agendas and continuing frictions will influence the core mandate functions. The deployment of military observers on the Golan and in south Lebanon in support of peacekeeping mandates contributes to a stable security environment and builds confidence between the parties.

Military observers are also deployed to the mission's regional liaison offices, an equally essential component of the regional peacekeeping equation. The liaison function, at both the strategic and working levels, is a critical conduit for impartial regional engagement to uphold mandate requirements, ease tensions between the parties and reinforce the collective United Nations efforts for peaceful resolution.

(Signed) Patrick **Gaucht**
Head of Mission and Chief of Staff
United Nations Truce Supervision Organization

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 5.103 The United Nations Truce Supervision Organization (UNTSO) is mandated to assist the parties to the 1949 Armistice Agreements in the supervision of the application and observance of the terms of those Agreements. Its mandate derives from Security Council resolutions and decisions, including resolutions 50 (1948), 54 (1948) and 73 (1949). The military observers, assigned to assist the United Nations Mediator in supervising the truce in Palestine pursuant to resolution 50 (1948), became UNTSO pursuant to resolution 73 (1949) to supervise the Armistice Agreements between the parties to the Arab-Israeli conflict. Following the wars of 1956, 1967 and 1973, the functions of the observers were adapted in response to altered circumstances.
- 5.104 UNTSO activities in Egypt, Israel, Jordan, Lebanon and the Syrian Arab Republic are aimed at maintaining the regional liaison architecture established under the Armistice Agreements. UNTSO provides trained military observers to the United Nations Disengagement Observer Force (UNDOF) and the United Nations Interim Force in Lebanon (UNIFIL) in support of the implementation of their respective mandates. Through its regional engagement, regular and senior-level liaison and coordination with the peacekeeping and political missions, UNTSO contributes to the United Nations regional analysis and efforts towards the reduction of tensions.

Programme of work

Objective

- 5.105 The objective, to which UNTSO contributes, is to ensure adherence to the Armistice Agreements of 1949 and related agreements.

Strategy and external factors for 2023

- 5.106 To contribute to the objective, UNTSO will:
- (a) Implement its regional liaison mandate through strategic engagement and regular interaction with the parties, as well as senior representatives of troop-contributing countries and other Member States in the mandate area;
 - (b) Maintain liaison offices in Egypt, Lebanon and the Syrian Arab Republic and conduct regular liaison functions with Israel and Jordan from its headquarters;
 - (c) Extend its strategic and liaison engagements with relevant national and regional organizations and civil society organizations across the mandate area; enhance situational awareness and support informed strategic analysis and decision-making within the Organization, with peacekeeping partners and among regional actors through robust regional assessments; and support peacekeeping partnerships in coordination with other United Nations entities;
 - (d) Conduct seminars, briefings and information exchanges with senior representatives of troop-contributing countries and other Member States;
 - (e) Provide trained military observers to UNDOF and UNIFIL to assist with the implementation of their mandates by providing timely and accurate observation reports, as well as assessments and analyses of regional developments and impacts mission-wide, including on the safety and

security situation. In addition, the mission will provide administrative, logistical and security support to all outstations and liaison offices.

- 5.107 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objective, strategy and mandates and would be reported as part of the programme performance information.
- 5.108 The above-mentioned work is expected to result in:
- (a) Reliable communications channels and relations of confidence with the parties, conflict resolution, reduced tensions, avoidance of misunderstandings that could escalate into cross-boundary conflict and expanded liaison and information networks with national and local community representatives and with actors with influence in the areas of interest;
 - (b) Strengthened situational awareness and informed strategic-level analyses and decision-making, enhancing the coordinated impact of regional United Nations presences;
 - (c) Improved cooperation and understanding of cross-cutting regional issues among regional counterparts;
 - (d) The progressive return to normality of activities on the Golan and continued observation.
- 5.109 With regard to external factors, the overall programme plan for 2023 is based on the following planning assumptions:
- (a) All parties to the Armistice Agreements of 1949 and related agreements will cooperate with UNTSO in the performance of its functions;
 - (b) All parties will remain willing to resolve their disputes and to cooperate with the United Nations in fulfilment of the Security Council mandate.
- 5.110 The mission integrates a gender perspective in its operational activities, deliverables, and results, as appropriate. The UNTSO gender action plan and a gender perspective have been embedded in operational routines at all levels. For example, the presence of female military observers and female military observer patrol members is a standard feature of operational activities, as is the presence of female language assistants to improve interaction with local populations.
- 5.111 In line with the United Nations Disability Inclusion Strategy, UNTSO will continue to take steps to improve disability inclusion in its physical facilities and recruitment processes. The mission ensures that all new and upgraded facilities include disability access as the norm and that job openings for national and international positions include specific provisions to enable recruitment of persons with disabilities.
- 5.112 With regard to cooperation with other entities at the global, regional, national and local levels, UNTSO will continue to cooperate and closely coordinate with its regional peacekeeping partners, special political missions, humanitarian coordinators and relevant agencies to share and validate information from the ground, integrate assessments, ensure consistent key messages and capture synergies to enhance the collective value of regional United Nations presences in the Organization's overall objectives in the Middle East. This strategic cooperation will take place between the heads of missions and agencies and directors through regular encounters and regional inter-mission workshops, as well as at the working level on a systematic basis. UNTSO will continue to expand information-sharing and analysis on regional trends affecting the implementation of United Nations mandates, including through consultative inter-mission coordination activities.
- 5.113 With regard to inter-agency coordination and liaison, UNTSO will continue to maintain close liaison with the Chief Security Adviser of the Department of Safety and Security in all five countries of its area of operations. The UNTSO Chief Security Officer provides reports to the Department at Headquarters

and ensures that the Department's policies and procedures are incorporated in security operations and planning. The UNTSO Chief Security Officer represents UNTSO in the inter-agency security cell, while the Head of Mission and Chief of Staff represents UNTSO in the security management teams.

Evaluation activities

5.114 The following evaluations are planned for 2023:

- (a) Evaluation of the distribution of equipment and supplies across the mission's area of operations;
- (b) Evaluation of the complexity of the supply chain process across countries and for liaison offices and observer groups.

Programme performance in 2021

Enhanced operations on the Bravo side of the area of separation

5.115 UNTSO has been progressively resuming operations on the Bravo side of the area of separation since military observers were relocated temporarily from observation posts in 2014. Observation post 72 was rebuilt and reoccupied on 23 September 2019 and observation post 56 on 30 September 2019. The pace of rebuilding the observation posts as well as the increase in the number of military observers was slower than planned owing to COVID-19 and security restrictions, as well as weather-related construction delays. As a result, observation posts 71 and 57 were not occupied until 2 September 2021 and 1 November 2021, respectively. The number of military observers operating on the Bravo side has steadily increased from 27 in 2019 to 31 in 2020 and 35 in 2021.

5.116 Progress towards the objective is presented in the performance measure below (see table 5.29).

Table 5.29

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
Initiation of return to effective observation on the Golan in support of UNDOF, with two rebuilt and manned observation posts and 27 military observers serving on the Bravo side for observation and reporting on violations	Progressive return to effective observation on the Golan in support of UNDOF, with 4 more (total of 31) military observers serving on the Bravo side for observation and reporting on violations	Progressive return to effective observation on the Golan in support of UNDOF, with an additional 2 rebuilt and manned observation posts and 4 more (total of 35) military observers serving on the Bravo side for observation and reporting on violations

Impact of the pandemic

5.117 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular owing to travel limitations. Despite having to accommodate shifting entry requirements of host nations, the mission and troop-contributing countries were able to adjust with no significant impact on the deployment of military observers. The mission was able to conduct 100 per cent of its necessary rotations, albeit with some minor delays at times that were attributable mainly to the COVID-19 pandemic. While it was not possible to recover strategic-level engagement through remote arrangements for the first half of 2021, the liaison offices were empowered and designated to represent the mission at the levels available with national and international counterparts in direct interactions.

Planned results for 2023

Result 1: projecting mandate activities throughout the area of operations

Programme performance in 2021 and target for 2023

- 5.118 The mission's work contributed to the reopening of two observation posts and the maintenance of the area of observation at approximately 3,200 km², which did not meet the planned target of consolidation of operation over 4,515 km². The target was not met owing to the security situation in southwest Syrian Arabic Republic, which restricted freedom of movement by UNTSO patrols in support of UNDOF.
- 5.119 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 5.30).

Table 5.30
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Increased coverage of the area to 3,200 km ²	Maintenance of static and mobile observations on the Alpha (Israeli-occupied Golan) and Bravo sides Observation coverage of 3,200 km ²	Two observation posts were rebuilt and opened in the area of separation Observation coverage remains at approximately 3,200 km ²	Inhospitable terrain is accessible along the Blue Line	Enhanced observation of the area of separation through improved observation equipment and 24-hour observation Resumption of full inspections on both Alpha and Bravo sides

Result 2: enhanced regional liaison through diversified engagement

Programme performance in 2021 and target for 2023

- 5.120 The mission's work contributed to the enhancement of regional liaison through diversified engagement in strategic and regular liaison with the parties and by linking the regional liaison programme to additional actors among the national and international security, policy and research fields with expertise in regional dynamics, which met the planned target.
- 5.121 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 5.31).

Table 5.31
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Regional liaison with the parties and national experts	Regional liaison with existing parties within the context of COVID-19 restrictions	Diversified regional liaison with additional national and international actors in the security, policy and research fields with regional expertise	Diversified regional liaison engagement with links to other actors and organizations with regional expertise	Deepened and consolidated regional liaison engagement developed through 2019–2022

Result 3: improved situational awareness in the Sinai

Proposed programme plan for 2023

5.122 Following its temporary suspension of patrols in the Sinai in 2019, the Liaison Office Cairo will resume its planned periodic patrols in 2022, maintaining its observation activities in the area.

Lessons learned and planned change

5.123 The lesson for the mission was the need to optimize activities to fulfil the observation, reporting and liaison functions in the area based on enhanced support planning for patrols in the Sinai. In applying the lesson, the mission will implement appropriate plans to maintain patrols and to improve situational awareness.

5.124 Expected progress towards the objective is presented in the performance measure below (see table 5.32).

Table 5.32
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
The Liaison Office Cairo suspended patrols in northern Sinai and conducted short-range patrols in western Sinai	The Liaison Office Cairo relocated to Isma’iliyah	General inspection and administrative move to Cairo completed to support planning for the resumption of patrolling in the Sinai	Improved situational awareness through the resumption of patrolling in the Sinai	Improved situational awareness through maintained patrolling operations in the Sinai

Legislative mandates

5.125 The list below provides all mandates entrusted to UNTSO.

Security Council resolutions

50 (1948) 73 (1949)
54 (1948)

Deliverables

5.126 Table 5.33 lists all deliverables of UNTSO.

Table 5.33
Deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	14	7	16	16
1. Seminars on the implications of regional developments for peacekeeping areas (formerly Seminars Analysis Team)	2	1	2	2

Section 5 **Peacekeeping operations**

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
2. Seminars on UNTSO operations (requested by Member States and international organizations)	12	6	14	14

C. Substantive deliverables

Consultation, advice and advocacy: consultation with national authorities in Egypt, Israel, Jordan, Lebanon and the Syrian Arab Republic, to assess regional stability/security conditions, regional trend effects and potential disturbances among the parties and on peacekeeping areas of operation, and with the 27 troop-contributing countries, other Member State representatives and United Nations operations and organizations in the mission area; liaison with national officers in Egypt, Israel, Jordan, Lebanon and the Syrian Arab Republic and with local government officials, community leaders, international interlocutors, United Nations operations and country offices.

E. Enabling deliverables

Administration: weekly, monthly, and annual situation reports; analytical assessment and thematic reports and briefings; quarterly update briefs on each mandate country; tactical operational reports, including daily operational reports, incident reports and investigation reports; inter-mission support agreements with the Office of the Special Coordinator for the Middle East Peace Process and Personal Representative of the Secretary-General to the Palestine Liberation Organization and the Palestinian Authority, UNIFIL and UNDOF; monthly induction training of incoming military observers prior to deployment to UNDOF and UNIFIL.

B. Proposed post and non-post resource requirements for 2023

Overview

5.127 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 5.34 to 5.36.

Table 5.34

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

5.128 Additional details on the distribution of the proposed resources for 2023 are reflected in table 5.37 and figure 5.XIV.

5.129 As reflected in table 5.37, the overall resources proposed for 2023 amount to \$39,003,000 before recosting, reflecting a net increase of \$65,100 (or 0.2 per cent) compared with the appropriation for 2022. Resource changes result from two factors, namely: (a) technical adjustments; and (b) other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Table 5.37
Overall: evolution of financial and post resources

(Thousands of United States dollars/number of posts)

	2021 expenditure	2022 appropriation	Changes				Total	Percentage	2023 estimate (before recosting)

Figure 5.XIV
Distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor

Overall resource changes

Technical adjustments

5.130 As reflected in table 5.34, resource changes reflect a net increase of \$32,600 related to the higher provision for the reassignment of one post of Finance Assistant (Local level) as an Environmental Assistant (Local level) that was approved pursuant to General Assembly resolution 76/245 and is subject to a 50 per cent vacancy rate in accordance with the established practice for the costing of new posts.

Other changes

5.131 As reflected in table 5.34, resource changes reflect a net increase of \$32,500, comprising an increase under post resources (\$32,500) and cost-neutral changes under non-post resources. The increase of \$32,500 under posts reflects the proposed reclassification of one post of Associate Security Officer (P-2) as a Field Security Officer (P-3) within the Security Section (see annex II).

5.132 Information on compliance with advance booking for air travel is reflected in table 5.38. UNTSO achieved a 73.9 per cent compliance rate in 2021 in spite of the travel restrictions due to the COVID-19 pandemic. UNTSO continues to raise awareness among staff and emphasize that it is important and necessary to comply with the advance purchase rule. Managers are asked to implement preventive measures and monitor corrective actions while monitoring compliance rates.

Table 5.38

III. United Nations Military Observer Group in India and Pakistan

Foreword

The United Nations Military Observer Group in India and Pakistan (UNMOGIP) is the second oldest United Nations peacekeeping mission, beginning its mandate in 1949. The mission continues to perform its mandate, focusing on observing and reporting on the ceasefire between India and Pakistan. It also continues to conduct patrols and investigations into alleged ceasefire violations and incidents at the working boundary through the 44 United Nations military observers who monitor the 770 kilometre-long line of control and the working boundary. This work requires professionalism, competence, impartiality and high precision in reporting and is carried out with the support of 74 civilians, ensuring the smooth running of the peacekeeping operation.

The mission has continued to build confidence in the region and will continue to fulfil its mandate with impartiality. This is made possible through the support of the host nations, India and Pakistan, coupled with the welcoming attitude of the local Kashmiri population. The mission has kept the host Governments informed of its activities at the line of control and the working boundary and continues to regularly engage with United Nations Headquarters on its operations and the challenges it faces in the implementation of its mandate.

UNMOGIP continues to play a role in working towards bringing more peace and stability in the South Asia region. Diversity and professionalism are the strengths of UNMOGIP. With the support of the international community and all stakeholders, peace will one day be achieved in the region.

(Signed) Major General José **Eladio Alcaín**
Head of Mission and Chief Military Observer
United Nations Military Observer Group in India and Pakistan

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 5.133 The United Nations Military Observer Group in India and Pakistan (UNMOGIP) is responsible for observing and reporting to the Secretary-General any developments pertaining to the observance of the ceasefire, pursuant to Security Council resolution [307 \(1971\)](#). In the resolution, the Council demanded that a durable ceasefire and cessation of all hostilities in all areas of conflict be strictly observed and remain in effect until withdrawals take place, as soon as practicable, of all armed forces to their respective territories and to positions which fully respect the ceasefire line in Jammu and Kashmir supervised by UNMOGIP. To complement its ceasefire monitoring efforts, UNMOGIP conducts balanced investigations on any received complaints of alleged ceasefire violations filed by parties.

Programme of work

Objective

- 5.134 The objective, to which UNMOGIP contributes, is to ensure that developments pertaining to ceasefire violations along the line of control are monitored in accordance with the mandate of UNMOGIP as contained in Security Council resolution [307 \(1971\)](#).

Strategy and external factors for 2023

- 5.135 To contribute to the objective, UNMOGIP will:
- (a) Continue to focus on the core mandated tasks of prevention, early warning, observation and reporting, and confidence-building;
 - (b) Provide timely and detailed reports on relevant developments in its area of operations in accordance with the implementation of its mandate;
 - (c) Continue to employ military observers on both sides of the line of control for the conduct of patrols, inspections and investigations of alleged violations of the ceasefire and the performance of other tasks in the vicinity of the line of control to the extent permitted by the host countries.
- 5.136 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objective, strategy and mandates and would be reported as part of the programme performance information.
- 5.137 The above-mentioned work is expected to result in adherence to the ceasefire through the presence of United Nations military observers.

- 5.138 With regard to the external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) Host countries cooperate with UNMOGIP in observing the ceasefire and refraining from hostilities and any actions that may aggravate the situation or endanger international peace as embodied in Security Council resolution 307 (1971);
 - (b) India and Pakistan remain willing to support UNMOGIP in the conduct of its activities for the delivery of its mandate.
- 5.139 The mission integrates a gender perspective in its operational activities, deliverables and results, as appropriate, to maximize its impact in keeping peace in the area of operations. This includes ensuring that the United Nations military observers engage in an inclusive and comprehensive manner with local communities, among both men and women, to ensure that the mission has a gender-sensitive understanding of community perspectives of the situation on the ground and to facilitate the conduct and planning of mission operations.

Programme performance in 2021

Effective monitoring at the line of control pursuant to Security Council resolution 307 (1971)

- 5.140 To implement its mandate, UNMOGIP makes best efforts to monitor the ceasefire between India and Pakistan at the line of control. In 2021, UNMOGIP ensured the supervision of the ceasefire through the presence of United Nations military observers at the 10 UNMOGIP field stations on both sides of the line of control and within the limitations resulting from the COVID-19 pandemic. UNMOGIP continued to implement its mandate through investigations of nine complaints concerning alleged ceasefire violations. In addition, it received 12 petitions from recognized political groups on the situation at and in the vicinity of the line of control in Jammu and Kashmir expressing concern over developments affecting Kashmir, in both India and Pakistan. The significant reduction in the number of complaints received in 2021 was likely due to the reaffirmation by India and Pakistan in February 2021 of their commitment to the 2003 ceasefire agreement at the line of control.
- 5.141 Progress towards the objective is presented in the performance measure below (see figure 5.XV).

Figure 5.XV
Performance measure: investigated complaints
 (Number of investigated complaints)

Impact of the pandemic

- 5.142 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular UNMOGIP temporarily suspended field visits and field trips and tailored reconnaissance patrols to gather information from the local population at locations where precautionary measures, including physical distancing, could be taken. These adaptations enabled the mission to continue to fulfil its mandate in 2021 during the pandemic.

Planned results for 2023

Result 1: ensuring continuity in terms of analysis and consistency of process for planning and execution

Programme performance in 2021 and target for 2023

- 5.143 The mission's work contributed to the availability of a new information collation platform, which exceeded the planned target of the continued use of information collation platforms to inform the understanding of developments pertaining to ceasefire violations.
- 5.144 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 5.39).

Table 5.39

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Information collation platforms used to inform understanding of developments pertaining to ceasefire violations	Information collation platforms continued to be used to inform understanding of developments pertaining to ceasefire violations	A new information collation platform is available (the Comprehensive Planning and Performance Assessment System)	Analytical reports fed by real-time data with the introduction of new information platforms	Strengthened strategic decision-making based on data and evidence from new information collation platforms

Result 2: improved situational awareness through geospatial information systems and high-resolution satellite imagery

Programme performance in 2021 and target for 2023

- 5.145 The mission's work contributed to the scoping of the requirements for geospatial information systems and satellite imagery, which did not meet the planned target of military observers using real-time geospatial information systems and satellite imagery to implement the mission's mandate. The target was not met owing to delays experienced in incorporating geospatial information into operational maps.
- 5.146 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 5.40).

Table 5.40
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Use of outdated information systems and satellite images	Use of outdated information systems and satellite images	Scoping of the requirements for geospatial information systems and satellite imagery	More efficient planning of observer missions by reducing the time needed to plan United Nations military observer movements	Improved analysis of planned routes and the nature of identified posts along the line of control

Result 3: increased presence at the line of control

Proposed programme plan for 2023

5.147 The mission monitors developments pertaining to ceasefire violations at the line of control through the presence of United Nations military observers at UNMOGIP field stations on both sides of the line of control. These military observers conduct patrols, inspections and investigations of alleged violations of the ceasefire. The presence of military observers at the line of control informs parties to the conflict of the mission’s presence and its intent to fulfil its mandate.

Lessons learned and planned change

5.148 The lesson for the mission was that there was a need to leverage the benefits of new monitoring tools to adapt the mission’s operations to increase its presence at the line of control. In applying the lesson, the mission will leverage enhancements to operational planning, including the Comprehensive Planning and Performance Assessment System, to increase its presence at the line of control through the execution of observation post tasks and an increased number of area reconnaissance tasks. The mission will employ new monitoring methods, including new and enhanced operational maps, to facilitate decision-making processes and the production of timely reports. The increased presence of the mission will enable it to more clearly observe the situation at the line of control and obtain confirmation of alleged ceasefire violations.

5.149 Expected progress towards the objective is presented in the performance measure below (see figure 5.XVI).

Figure 5.XVI
Performance measure: presence at the line of control

(Number of posts/thousands of United States dollars)

5.155 Information on compliance with advance booking for air travel is reflected in table 5.46. UNMOGIP continues to raise awareness among staff and emphasize that it is important and necessary to comply with the advance purchase rule. Managers are asked to implement preventive measures and monitor corrective measures. Statistics on compliance rates and information on trends are distributed to managers on a quarterly basis.

^f Chief of Mission Support for the United Nations Truce Supervision Organization and the United Nations Special Coordinator for the Middle East Peace Process.

^g Includes the Training Cell.

^h Includes the Procurement Unit, the Central Warehouse Unit, the Property Management Unit and the Movement Control Unit.

Annex II

United Nations Truce Supervision Organization: summary of proposed post changes

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
UNTSO	(1) 1	P-2 P-3	Reclassification of 1 post from Associate Security Officer (P-2) to Field Security Officer (P-3)	<p>The Security Section will be restructured to merge the current Security Operation Centre and the Security Information and Coordination Unit to establish a Security Information Operation Centre. The new Centre will consolidate the information-gathering and security operations processes, allowing the Security Section to improve and streamline its services to UNTSO staff across all five countries and better contribute to full implementation of the mission's mandate.</p> <p>The establishment of the Security Information Operation Centre will: bring UNTSO into conformity with contemporary United Nations security structures; add a significant qualitative dimension to the conduct of programme delivery by providing detailed security analysis, trend identification, contingency planning and emergency response coordination; and increase the mission's capacity to assess risk levels and their impact on operations. Given the larger unit structure and increased level of responsibility (the P-3 is expected to supervise 9 staff), the post is proposed for reclassification from the P-2 to the P-3 level.</p>

Foreword

In 2023, the Office for Outer Space Affairs, through its established programmes, will assist States to advance international cooperation, strengthen their capacities in space science and technology and their applications and increase understanding of the normative framework that guides the conduct of outer space activities.

The programme will be guided by the resolutions of the General Assembly, including resolution 76/3 entitled “The ‘Space2030’ Agenda: space as a driver of sustainable development”. The “Space2030” Agenda provides a strategy built around the pillars of the space economy, the space society, space accessibility and space diplomacy as enablers of sustainable development by providing essential data for the indicators to monitor progress towards achieving the 2030 Agenda for Sustainable Development and the Sendai Framework for Disaster Risk Reduction 2015–2030, together with the commitments assumed by States parties in the Paris Agreement on climate change. The “Space2030” Agenda also sets out the mechanisms, projects and platforms that Member States can benefit from or contribute to, including the tools and initiatives that have been and are being developed by the Office.

Finally, as space is a game changer, especially with regard to supporting countries in the achievement of the Sustainable Development Goals, the Office will reinforce its assistance to States, through its programmes, to provide broader opportunities to access space for the purposes of science, innovation, research and development, education and capacity-building.

(Signed) **Simonetta Di Pippo**
Director, Office for Outer Space Affairs

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 6.1 The Office for Outer Space Affairs is responsible for advancing international cooperation in space activities. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolutions 1472 A (XIV), 76/3, entitled “The ‘Space2030’ Agenda: space as a driver of sustainable development”, 76/76 on international cooperation in the peaceful uses of outer space and 76/55 on transparency and confidence-building measures in outer space activities, as appropriate.
- 6.2 The core functions of the Office are: (a) serving as the secretariat of the Committee on the Peaceful Uses of Outer Space and its subsidiary bodies (resolution 1472 A (XIV)), as the executive secretariat of the International Committee on Global Navigation Satellite Systems and its Providers’ Forum (resolutions 61/111 and 64/86) and as the secretariat of the Space Mission Planning Advisory Group (resolution 71/90); (b) implementing the United Nations Programme on Space Applications (resolutions 2601 (XXIV) and 37/90) and the programme on the United Nations Platform for Space-based Information for Disaster Management and Emergency Response (UN-SPIDER) (resolution 61/110); (c) maintaining the Register of Objects Launched into Outer Space (resolutions 1721 B (XVI) and 3235 (XXIX)); (d) discharging the responsibilities of the Secretary-General under the United Nations treaties and principles on outer space and related resolutions (resolutions 2222 (XXI), 2345 (XXII), 2777 (XXVI), 3235 (XXIX), 34/68, 37/92, 41/65, 47/68, 59/115 and 62/101); and (e) supporting Member States in fulfilling the “Space2030” Agenda implementation plan (resolution 76/3).

Programme of work

Peaceful uses of outer space

Objective

- 6.3 The objective, to which this programme contributes, is to strengthen international cooperation in the conduct of space activities for peaceful purposes and advance the use of space science and technology and their applications.

Strategy and external factors for 2023

- 6.4 To contribute to the objective, the Office will support the work of the Committee on the Peaceful Uses of Outer Space and its subsidiary bodies and promote international cooperation in the exploration and use of outer space for peaceful purposes. Specifically, the Office will:
- (a) Provide substantive secretariat services to the Committee, the Scientific and Technical Subcommittee, the Legal Subcommittee, the International Committee on Global Navigation Satellite Systems and its Providers’ Forum and the Space Mission Planning Advisory Group;
 - (b) Provide secretariat services to the working groups of the Committee and its subsidiary bodies, including the Working Group on the Long-term Sustainability of Outer Space Activities, which, under a five-year workplan is: (i) identifying and studying challenges and considering possible new guidelines for the long-term sustainability of outer space activities; (ii) sharing experiences, practices and lessons learned from voluntary national implementation of the

- adopted guidelines; and (iii) raising awareness and building capacity, in particular among emerging space nations and developing countries;
- (c) Work with Member States, intergovernmental and non-governmental entities and other partners to promote the responsible use of outer space, including through: (i) the implementation of the international regime governing space activities; (ii) the registration of space objects launched into outer space; (iii) space debris mitigation; (iv) transparency and confidence-building measures in outer space activities, as appropriate; (v) civil satellite-based positioning, navigation, timing and value-added services; and (vi) contributions to a global regime to coordinate space traffic and agree on principles for the future governance of outer space activities;
 - (d) Deliver training events and technical advisory support to assist States and institutions to: (i) enhance their capacities in areas such as space law and policy, space sustainability, climate change, environmental monitoring, natural resources management, precision farming and agriculture, global health, satellite communications, space weather, space exploration, astronomy, search and rescue, disaster risk reduction and emergency response, and global navigation satellite systems (GNSS); and (ii) develop collaborative platforms and promote knowledge-sharing for space-based solutions;
 - (e) Cooperate with the regional centres for space science and technology education affiliated to the United Nations to deliver training in remote sensing and geographic information systems, meteorological satellite applications, satellite communications, space and atmospheric science and GNSS;
 - (f) Raise awareness on the work of the Committee and the Office and the benefits of space activities, especially with regard to sustainable development, by: (i) outreach activities, including the commemoration of historical milestones and international days; and (ii) issuing publications, information and training materials.
- 6.5 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the coronavirus disease (COVID-19) pandemic. Examples of lessons learned and best practices include integrating the use of virtual and hybrid mechanisms in the design of capacity-building activities, replicating pragmatic solutions in response to travel restrictions that produced effective results (such as embedding locally recruited experts in national disaster management institutions), expanding online courses to other subject areas and organizing demonstrations and simulations guided by experts for smaller groups of targeted practitioners and professionals. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objective, strategy and mandates and would be reported as part of the programme performance information.
- 6.6 The above-mentioned work is expected to result in:
- (a) A safer and more sustainable outer space;
 - (b) Greater understanding, acceptance and application of the international legal regime governing outer space activities;
 - (c) An increased number of countries with access to space, in particular developing countries, in using science and technology and related applications, including space-based solutions, to achieve sustainable development, disaster risk reduction and emergency response;
 - (d) Greater compatibility and interoperability of GNSS;
 - (e) Space capabilities being more readily available through strengthened cooperative relationships and new partnerships.

- 6.7 With regard to the external factors, the overall plan for 2023 is based on the planning assumption that stakeholders are able and willing to support the Office in implementing the programme.
- 6.8 With regard to cooperation with other entities at the global, regional, national and local levels, the Office will, in line with its mandate, leverage its established partnerships with governmental, intergovernmental and non-governmental organizations, including space agencies, industry, academia, institutions and other space-related entities, to pursue new opportunities to meet the growing demand for support to strengthen the capacity of countries, in particular developing countries, in using space science and technology and their applications. The Office will also pursue cooperative relationships, including with the private sector, to identify new mechanisms for providing access to space. It will enhance transparency in its programme activities and regularly inform the Committee on the Peaceful Uses of Outer Space of the projects being implemented and of its partnerships with space agencies, governmental and non-governmental organizations and the private sector.
- 6.9 With regard to inter-agency coordination and liaison, the Office will lead the Inter-Agency Meeting on Outer Space Activities (UN-Space) to promote coherence in the space-related work of entities of the United Nations system.
- 6.10 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate, as demonstrated by the implementation of its Space for Women project to promote the empowerment of women and girls in the areas of space science, technology, innovation and exploration and to act as an advocate for greater awareness in science, technology, engineering and mathematics education. The Space for Women project will include working with partners to assess the participation of women in the space workforce and promote concrete policies and action to ensure equal participation of women and girls in space education and employment and in capacity-building activities.
- 6.11 In line with the United Nations Disability Inclusion Strategy and through its Space for Persons with Disabilities project, the Office raises awareness and identifies opportunities for disability inclusion in the space sector. The Office will develop partnerships to enhance the prospects of careers in science, technology, engineering and mathematics for people with disabilities and will share related information through a dedicated webpage with accessible features.

Evaluation activities

- 6.12 The following evaluations completed in 2021 have guided the proposed programme plan for 2023:
- (a) Evaluation of the activities of the UN-SPIDER Beijing office for the period 2017–2020;
 - (b) Evaluation of the processes for the registration of objects launched into outer space.
- 6.13 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2023. For example, following the recommendations of the evaluation conducted on the UN-SPIDER Beijing office, the Office for Outer Space Affairs will involve more partners and stakeholders in the design of the programme activities of the UN-SPIDER Beijing office, including academia and regional and other United Nations entities. For example, the Office for Outer Space Affairs will maximize the resources of its UN-SPIDER regional support offices, the United Nations-affiliated Regional Centre for Space and Technology Education for Asia and the Pacific (China), the Asia-Pacific Space Cooperation Organization and other learning institutions to contribute to the development of its training programmes.
- 6.14 Regarding the registration of space objects, the workplan of the Office includes the development of an online platform to modernize the registration process. The platform will allow for the submission of registration information online, improve document workflows and facilitate engagement with Member States on the timely issuance of the registration information.

6.15 The following evaluations are planned for 2023:

- (a) Midterm evaluation of the activities of the UN-SPIDER Beijing office in the period 2021–2024;
- (b) Evaluation of the capacity-building activities under the Access to Space for All initiative.

Programme performance in 2021

Increased compliance with the international legal regime for objects launched into outer space

6.16 Pursuant to the Treaty on Principles Governing the Activities of States in the Exploration and Use of Outer Space, including the Moon and Other Celestial Bodies (General Assembly resolution [2222 \(XXI\)](#), annex) States parties to the Treaty bear international responsibility for national activities in outer space and jurisdiction and control over objects launched into outer space is retained by the State party on whose registry the object is carried. In its resolution 1721 B (XVI), the Assembly requested the Secretary-General to maintain a public registry of the information on launchings furnished by States. In the Convention on Registration of Objects Launched into Outer Space (Assembly resolution [3235 \(XXIX\)](#), annex) States parties to the Convention noted their desire to provide the means and procedures for the identification of space objects and their belief that this would contribute to the application and development of international law governing the exploration and use of outer space. The Office receives the submissions provided by Member States, validates and verifies the information and records the State of registry for each object in the respective registers and the Office’s online index. To increase the identification of space objects, the Office provided technical advice, supported the harmonization of registration practices and developed templates for Member States.

6.17 Progress towards the objective is presented in the performance measure below (see figure 6.I).

Figure 6.I

Performance measure: number of space objects identified and for which the State of registry is informed to the Secretary-General

Impact of the pandemic

- 6.18 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular on holding in-person intergovernmental meetings and capacity-building, outreach and awareness-raising activities. The pandemic also prevented physical access to technical facilities and planned hands-on events. The Office postponed, relocated to another location or cancelled selected activities. For example, the Space for Women expert meeting was relocated from Brazil to the United Arab Emirates, the annual conference and training course on space-based technologies for disaster risk reduction was cancelled, the microgravity and hypergravity training activities that had been planned for 2020 and 2021 were postponed to 2022 and selected outreach and awareness-raising activities that would have been held at the United Nations premises at Vienna were cancelled.

Planned results for 2023

Result 1: increasing access to space

Programme performance in 2021 and target for 2023

- 6.19 The programme's work contributed to one more State having developed and launched its first satellite, bringing the total number to six, which did not meet the planned target of 13 Member States gaining access to space. The target was not met owing to the postponement of four hypergravity and microgravity experiments and the postponement of three CubeSat deployments because of COVID-19 restrictions and the need for more time than anticipated for technical development and quality control.
- 6.20 Progress towards the objective and target for 2023 are presented in the performance measure below (see figure 6.II).

Figure 6.II

Performance measure: cumulative number of Member States gaining access to space

Result 2: a more secure global navigation satellite systems spectrum

Programme performance in 2021 and target for 2023

- 6.21 The programme's work contributed to a total of 388 specialists receiving access to training in GNSS spectrum protection and interference detection and mitigation, which exceeded the planned target of 103.
- 6.22 Progress towards the objective and target for 2023 are presented in the performance measure below (see figure 6.III).

Figure 6.III
Performance measure: cumulative number of specialists provided with access to training in global navigation satellite systems spectrum protection and interference detection and mitigation

Result 3: increased understanding and application of the international legal regime governing outer space activities

Proposed programme plan for 2023

6.23 The number of participants (governmental, non-governmental, industry and private sector) becoming involved in ventures to explore and use space is increasing, requiring strengthened global governance of outer space activities.

Lessons learned and planned change

6.24 The lesson for the programme was the need to increase and diversify capacity development opportunities and services to Member States. In applying the lesson, and in line with overarching objective 4 of the “Space2030” Agenda (General Assembly resolution 76/3), the programme will tailor capacity-building and technical legal advisory services and develop electronic learning courses to increase the understanding and application of international space law and policy, promote the development of national laws and policies in line with relevant frameworks and strengthen international cooperation in the global governance of outer space activities. Expected progress towards the objective is presented in the performance measure below (see figure 6.IV).

Figure 6.IV
Performance measure: cumulative number of countries taking action to increase understanding, adhere to and/or implement the international legal regime governing outer space activities

Legislative mandates

6.25 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

1472 A (XIV); 1721 B (XVI); 2453 A-B (XXIII); 2601 (XXIV); 3234 (XXIX); 61/111; 64/86; 71/90; 74/82; 76/76	International cooperation in the peaceful uses of outer space	59/115	Application of the concept of the “launching State”
2222 (XXI)	Treaty on Principles Governing the Activities of States in the Exploration and Use of Outer Space, including the Moon and Other Celestial Bodies	61/110	United Nations Platform for Space-based Information for Disaster Management and Emergency Response
2345 (XXII)	Agreement on the Rescue of Astronauts, the Return of Astronauts and the Return of Objects Launched into Outer Space	62/101	Recommendations on enhancing the practice of States and international intergovernmental organizations in registering space objects
2777 (XXVI)	Convention on International Liability for Damage Caused by Space Objects	65/271	International Day of Human Space Flight
3235 (XXIX)	Convention on Registration of Objects Launched into Outer Space	68/74	Recommendations on national legislation relevant to the peaceful exploration and use of outer space
34/68	Agreement Governing the Activities of States on the Moon and Other Celestial Bodies	69/283	Sendai Framework for Disaster Risk Reduction 2015–2030
37/90	Second United Nations Conference on the Exploration and Peaceful Uses of Outer Space	70/1	Transforming our world: the 2030 Agenda for Sustainable Development
37/92	Principles Governing the Use by States of Artificial Earth Satellites for International Direct Television Broadcasting	72/78	Declaration on the fiftieth anniversary of the Treaty on Principles Governing the Activities of States in the Exploration and Use of Outer Space, including the Moon and Other Celestial Bodies
41/65	Principles Relating to Remote Sensing of the Earth from Outer Space	72/79	Consideration of the fiftieth anniversary of the United Nations Conference on the Exploration and Peaceful Uses of Outer Space
47/68	Principles Relevant to the Use of Nuclear Power Sources in Outer Space	73/6	Fiftieth anniversary of the first United Nations Conference on the Exploration and Peaceful Uses of Outer Space: space as a driver of sustainable development
54/68	Third United Nations Conference on the Exploration and Peaceful Uses of Outer Space	74/115	International cooperation on humanitarian assistance in the field of natural disasters, from relief to development
59/2	Review of the implementation of the recommendations of the Third United Nations Conference on the Exploration and Peaceful Uses of Outer Space	75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
		76/3	The “Space2030” Agenda: space as a driver of sustainable development

Deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents per entity/theme)	90	137	90	105
1. Reports to the Committee on the Peaceful Uses of Outer Space, including its Scientific and Technical and Legal Subcommittees	90	137	90	105
Substantive services for meetings (number of three-hour meetings, per entity/theme)	62	61	62	68
2. Meetings of the General Assembly	–	1	–	2
3. Meetings of the Fifth Committee	1	1	1	1
4. Meetings of the Committee for Programme and Coordination	1	1	1	1
5. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
6. Meetings of the Fourth Committee and its Working Group of the Whole on the agenda item entitled “International cooperation in the peaceful uses of outer space”	3	2	3	3
7. Meetings of the Committee on the Peaceful Uses of Outer Space, including its Scientific and Technical and Legal Subcommittees	56	55	56	60
8. Intersessional consultations of the Working Group on the Long-term Sustainability of Outer Space Activities	–	–	–	8
Conference and secretariat services for meetings (number of three-hour meetings)	14	19	14	19
9. Executive secretariat services to the International Committee on Global Navigation Satellite Systems and its Providers’ Forum	10	10	10	10
10. Secretariat services to the Space Mission Planning Advisory Group	4	4	4	4
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	54	67	76	71
11. Training events on space law and policy and other legal and coordination aspects of space activities, including for new space actors	3	5	15	17
12. Training events and research opportunities on space science and technology and their applications	24	30	24	24
13. Training events and technical advisory missions on the use of space technology in disaster management	19	21	30	21
14. World Space Forum	4	3	3	3
15. Planetary Defense Conference (asteroid and comet threats to Earth)	–	5	–	5
16. Panels on Space for Women	3	3	3	2
17. Open forum for Member States and United Nations entities on the use of space technology	1	–	1	1
Publications (number of publications)	5	3	8	6
18. Publications on the activities of the Office and the Committee on the Peaceful Uses of Outer Space	5	3	8	6
Technical materials (number of materials)	54	94	59	75
19. Information furnished in accordance with the United Nations treaties and principles on outer space	4	8	4	5
20. Information furnished in accordance with the Convention on Registration of Objects Launched into Outer Space and General Assembly resolution 1721 B (XVI)	50	86	55	70

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Consultation, advice and advocacy: normative support to Working Group C of the International Committee on Global Navigation Satellite Systems; expert advice to Member States, upon request on: (a) registration of space objects launched into outer space; (b) space science and technology and their applications; (c) educational and operational activities of the six regional centres for space science and technology education affiliated to the United Nations; (d) the use of space-based information in disaster management plans and policies and in the implementation of disaster risk management activities in approximately four Member States; and (e) space-based information to support emergency and humanitarian response in at least five developing countries; administration of long-term training opportunities in the field of space science and technology and related applications; massive online open courses; and normative support to the Space for Women network and secretariat services to the annual session (2 days) of UN-Space.

Databases and substantive digital materials: Register of Objects Launched into Outer Space and Online Index of Objects Launched into Outer Space, website of the Office for Outer Space Affairs and related databases, UN-SPIDER knowledge portal, International Committee on Global Navigation Satellite Systems portal, Space for Water portal, Space Solutions Compendium (database), Space for Women website, space sustainability website and national space law collection.

D. Communication deliverables

Outreach programmes, special events and information materials: exhibits, promotional and educational materials, and celebrations of achievements and other anniversaries relating to outer space.

External and media relations: press releases and press conferences on the work of the Office and the Committee on the Peaceful Uses of Outer Space

B. Proposed post and non-post resource requirements for 2023

Overview

6.27 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 6.2 to 6.4.

Table 6.2

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2021 expenditure ^a	2022 appropriation	Changes				2023 estimate (before recosting)	
			Technical adjustments	New/ expanded mandates	Other	Total		Percentage
Post	3 495.6	3 291.0	–	–	185.5	185.5	5.6	3 476.5

6.28 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 6.5 to 6.7 and figure 6.V.

6.29 As reflected in tables 6.5 (1) and 6.6 (1), the overall resources proposed for 2023 amount to \$4,484,000 before recosting, reflecting a net increase of \$268,900 (or 6.4 per cent) compared with the appropriation for 2022. Resource changes result from one factor, namely, other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Explanation of variances by factor

Overall resource changes

Other changes

6.30 As reflected in table 6.7, resource changes reflect a net increase of \$268,900, comprising \$185,500 under posts and \$83,400 under non-post resources, as follows:

- (a) An increase of \$185,500 resulting from the proposed establishment of two posts (P-3) and the upward reclassification of one post from P-2 to P-3 (see annex III);
- (b) The net increase of \$83,400 under non-post resources reflects:
 - (i) Additional requirements of \$35,000 under other staff costs for capacity-building and advocacy activities on Space for Women, the space economy and Space for Climate Action, to enhance the Office’s website, databases and portals and to support the committees and subsidiary bodies, including the Working Group on the Long-term Sustainability of Outer Space Activities;
 - (ii) The change in the nature of projects requiring consultants would result in a decrease of \$21,100;
 - (iii) An increase of \$7,300 under travel of staff for technical advisory missions on the use of space-based solutions for disaster risk reduction and emergency response, visits to the regional centres for space science and technology education affiliated to the United Nations and to attend a capacity development meeting on policy, governance and sustainability of outer space activities;

- (iv) An increase of \$16,900 under contractual services to conclude the development of the online registration portal required to modernize the receipt and processing of registration submissions;
- (v) A decrease of \$13,100 under general operating expenses due to the increased use of virtual platforms for meetings;
- (vi) An increase of \$58,400 under grants and contributions to support multi-stakeholder meetings on policy, governance and sustainability of outer space and a review of the education curricula offered by the regional centres for space science and technology education affiliated to the United Nations.

Extrabudgetary resources

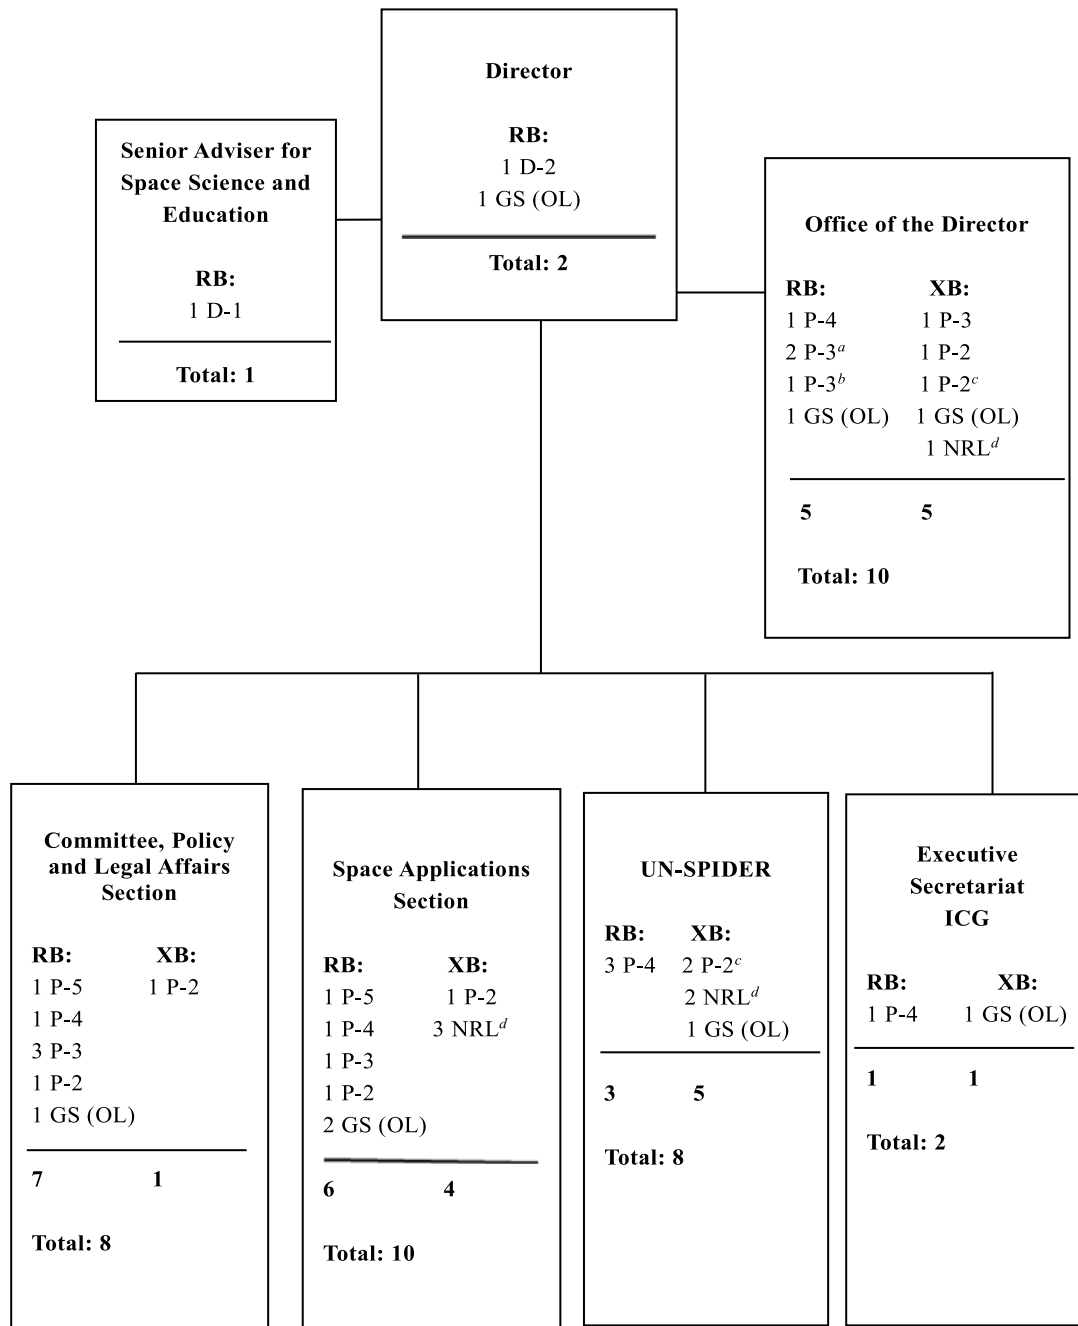

- 6.31 As reflected in tables 6.5 (2) and 6.6 (2), the Office expects to continue to receive both cash and in-kind contributions, which would complement regular budget resources. In 2023, extrabudgetary resources are estimated at \$1,341,800 and would provide for capacity development activities and other services to Member States. Extrabudgetary resources represent 23 per cent of the Office’s total resources. The anticipated increase amounting to \$132,200 reflects mainly the planned resumption and on-site delivery of capacity-building, technical advisory and advocacy activities to Member States.
- 6.32 Anticipated in-kind contributions with an estimated value of \$1,045,000 reflect staff provided on a non-reimbursable loan basis, expert support and launch services provided under the Access to Space for All initiative and the value of the rental of conference facilities, meeting services, room and board for participants, transport and other contractual services provided on a no-cost basis for training events and other activities organized by the Office.
- 6.33 The authority to oversee the use of extrabudgetary resources rests with the Office in accordance with the delegation of authority from the Secretary-General.
- 6.34 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 6.8. The late conclusion of a host country agreement and continued travel-related restrictions arising from the COVID-19 pandemic affected the advance purchase of tickets issued by the Office in 2021. The Office will intensify its review of all late bookings to improve compliance.

Table 6.8

Annex II

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee

[A/76/7](#)

The Advisory Committee welcomes the use of locally recruited experts and encourages the Office to make greater use of such experts in the future. The Committee trusts that information will be included in the next budget submission (para. II.140).

The Advisory Committee trusts that further information on the provision of adequate resources for substantive services to meetings as a whole and for those related to the Working Group on the Long-term Sustainability of Outer Space Activities will be provided to the General Assembly at the time of its consideration of the report of the Advisory Committee and included in the next budget submission (para. II.143).

The Office for Outer Space Affairs will continue using locally recruited experts as reflected in paragraph 6.5 of the main part of the present report.

A new deliverable has been included on the substantive servicing of the meetings of the Working Group (table 6.1, serial 8, in the main part of the present report). Additional resources are included under other staff costs (para. 6.30 (b) (i) of the main part of the report) to cover peak workload periods during the meetings of the Working Group.

Annex III

Summary of proposed post changes

<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
1	P-3	Establishment of 1 Political Affairs Officer	To strengthen the capacity of the Office for Outer Space Affairs to support the increasing involvement of stakeholders in space activities. In line with resolutions 1721 B (XVI) and 3235 (XXIX), the Office receives the submissions provided by Member States, validates and verifies the information and records the State of registry for each object. In 2021, the number of registered space objects increased to 1,895 compared with 357 in 2019 and the number of space objects launched increased to 1,807 compared with 586 in 2019. The functions of the post would include: (a) overseeing the maintenance of the Register of Objects Launched into Outer Space and other treaty obligations discharged on behalf of the Secretary-General; (b) providing policy support and assistance on developments in key space-related matters, such as space traffic management, mega-constellations, space debris and others; and (c) assessing and providing early warning signals on trends (including geopolitical trends) that will affect space sustainability and intraregional engagement and cooperation in the use, exploration, safety and sustainability of outer space activities and operations.
1	P-3	Establishment of 1 Programme Officer	To expand and establish new strategic partnerships with Member States, space-related entities and the private sector. Such partnerships would increase access to space opportunities for Member States, particularly those from developing countries. The functions of the post would include: (a) designing partnership projects and activities to increase technical support and services to Member States in using space for climate action, search and rescue, natural resources management, food security and greater access to health services and to accelerate the achievement of the Sustainable Development Goals; (b) engagement with Member States, space-related entities and the private sector to solicit resources, including contributions in kind for use by developing countries; and (c) coordinating donor engagement activities.
1	P-3	Upward reclassification of Communications Officer from P-2 to P-3	To strengthen strategic communications, outreach and coordination of messaging on the programmes and achievements of the Committee on the Peaceful Uses of Outer Space and the Office for Outer Space Affairs. The number of stakeholders involved in ventures to explore and use space is increasing, as is the demand to strengthen the capacity of countries, in particular developing countries, in using space science and technology and their applications. The pace of development and complexity in space-related activities have advanced, requiring accurate and timely communications. For example, communicating on the high-risk re-entry of space objects through the earth's atmosphere to Member States requires coordination with several Member States to ensure the safety of the re-entry point. Given the complexity and breadth of topics covered and stakeholders involved, a more experienced Communications Officer is required.

Foreword

The International Court of Justice is one of the six main organs of the United Nations, and its principal judicial organ. Its mission and activities are governed by the Charter of the United Nations and by its Statute, which forms an integral part of the Charter.

More than seventy-five years after its inaugural sitting, the Court remains as busy as ever, with 15 contentious cases pending on its docket as at 1 March 2022 – 4 of which were introduced in the previous 12 months. As in recent years, the Court maintains a high level of judicial activity and is able to consider several cases simultaneously. At the same time, the Court is continuing to adapt its working methods in response to the challenges posed by the coronavirus disease (COVID-19) pandemic, allowing it to hold hybrid hearings in five cases and to deliver three judgments and two orders on requests for the indication of provisional measures in 2021.

Mindful of the crucial role of modern technology in the discharge of its judicial tasks, the Court has focused its budgetary proposals for 2023 on the financial resources that are essential for the fulfilment of its mandate, with a particular emphasis on the maintenance and development of its information and communications technology infrastructure.

(Signed) Philippe **Gautier**
Registrar

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 7.1 The International Court of Justice is responsible for settling, in accordance with international law, legal disputes that are submitted to it by States and to give advisory opinions on legal questions referred to it by bodies authorized to do so under the terms of the Charter of the United Nations. It is composed of 15 judges elected by the General Assembly and the Security Council and is one of six principal organs of the United Nations and the principal judicial organ of the Organization. It functions in accordance with its Statute, which is an integral part of the Charter. All 193 States Members of the United Nations are parties to the Statute, and 73 of them have recognized the Court's jurisdiction as compulsory, in line with Article 36, paragraph 2, of its Statute. In addition, more than 300 bilateral and multilateral treaties grant the Court compulsory jurisdiction in the resolution of various types of disputes. States that are not members of the United Nations may become parties to the Statute on conditions to be determined in each case by the Assembly upon the recommendation of the Council. The Court may also be open to States not parties to its Statute, subject to the conditions laid down by the Council and currently set out in its resolution 9 (1946), adopted on 15 October 1946. The Court submits annual reports to the Assembly, the most recent of which is contained in document [A/76/4](#). Under the terms of regulation 2.14 of the Financial Regulations and Rules of the United Nations, the programme budget proposals of the Court are prepared by the Court, in consultation with the Secretary-General, and are submitted to the Assembly by the Secretary-General, together with such observations as the latter may deem desirable.
- 7.2 The activities of the Court are not covered in the proposed programme plan. Although the Court cannot forecast its main workload indicators (e.g. the number of cases that will be pending before the Court in 2023 and the number of new proceedings that will be instituted, including incidental proceedings in pending cases), it has made every effort to assess its requirements for 2023 against the background of its workload for the current and previous budgetary periods.
- 7.3 While the Court has no control over the volume of its activities, which depend in large part on the number of proceedings that will be instituted before it, it must at all times be able to exercise the functions entrusted to it under the Charter. New cases are brought before the Court by States, and advisory opinions are requested of the Court by authorized organs of the United Nations and specialized agencies, all of whom may seize the Court at any time. When a case is pending before the Court, it is not possible to anticipate whether and when recourse will be made to incidental proceedings (e.g. requests for provisional measures). Historically, there have been significant variations in the number of new proceedings commenced in a given year, although in recent times there has been an upward trend in the Court's caseload. In order to meet the demands of its workload, the Court now routinely considers two to three cases simultaneously. The workload represented by each decision of the Court is high. In principle, the parties to cases brought before the Court each submit one set of written pleadings to the Court: a memorial and a counter-memorial. The Court may authorize them to submit a further set of pleadings, namely, a reply and a rejoinder. In practice, these additional pleadings are almost always submitted. The pleadings are tending to become increasingly voluminous, notwithstanding the Court's appeals to the parties not to repeat arguments already exposed. Hearings can also be long and complex, depending on the nature of the case. In cases involving difficult factual issues (e.g. of a highly technical character), parties may call witnesses and experts to testify. Once it has heard the submissions of the parties, the Court does everything in its power to deliver a judgment within as short a time as possible, allowing for the complexity of the case. The entire proceedings must be conducted simultaneously in both of the Court's official languages, English and French, both at the written and oral stages and during deliberations.
- 7.4 In deciding the cases submitted to it, the Court renders decisions that form a coherent body of jurisprudence and which may assist in preventing disputes that may arise between other States. In

addition, in giving advisory opinions in response to the requests of duly authorized organs and specialized agencies of the United Nations, the Court facilitates the proper functioning of the United Nations system and contributes to preventive diplomacy and the development of international law.

- 7.5 Given that the Court is both a judicial body and an international institution that is administratively independent from the Secretariat, its Registry must take on the dual role of providing assistance to the Court in the exercise of its judicial functions and managing the administrative and budgetary matters of an international secretariat. In carrying out this role, the Registry is guided by the Statute, the Rules of the Court and the Instructions for the Registry. Pursuant to Article 21, paragraph 2, of the Statute and articles 22 and 23 of the Rules of the Court, respectively, the Registrar and Deputy-Registrar are elected by the Court for a term of seven years each and may be re-elected. In accordance with Article 21, paragraph 2, of the Statute, the staff of the Registry are appointed by the Court. The Court adopts its own staff regulations.

Programme of work

Registry

Objective

- 7.6 The objective, to which the Registry contributes, is to ensure that the needs of the Court are met in an efficient and effective manner for the sound administration of international justice and the fulfilment by the Court of its mandate under the Charter.

Strategy and external factors for 2023

- 7.7 To contribute to the objective, the Registry will:
- (a) Continue to respond to the needs of the Court in carrying out its judicial activities;
 - (b) Continue to ensure the timely provision of substantive, conference, secretariat and documentation services and legal, diplomatic, linguistic and technical support in cases pending before the Court;
 - (c) To ensure the development of capacities of the Court in the area of information and communications technology in order to support the organization of the meetings and public sittings of the Court.
- 7.8 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 continues to incorporate the lessons learned and best practices related to the adjustments to, and adaptation of the programme owing to the coronavirus disease (COVID-19) pandemic. Examples of lessons learned and best practices include the maintenance and improvement of measures taken to adapt the Court's working methods to the need to work remotely during the COVID-19 pandemic. Through a robust technology infrastructure, the Court will continue to be able to hold all of its planned public sittings, deliberations and other private meetings. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objective, strategy and mandates and would be reported as part of the programme performance information.
- 7.9 The above-mentioned work is expected to result in the needs of the Court being met in an effective and efficient manner in 2023.
- 7.10 With regard to the external factors, the overall plan for 2023 is based on the planning assumption that the Court's judicial activities in 2023 will involve a similar level of work as in 2022.

- 7.11 With regard to cooperation with other entities, the Registry of the Court will continue to cooperate closely with United Nations offices and institutions in 2023.

Programme performance in 2021

Continued functioning of the Court through hybrid hearings

- 7.12 During the COVID-19 pandemic, the Court adapted to the need to work remotely in order to continue to perform its judicial functions. With the use of upgraded videoconference technology and drawing on the experience gained in 2020, the Registry was able to improve and refine the support provided to the Court in organizing planned hearings in a hybrid format. In that context, the Registry provided members of the Court and parties participating in hybrid hearings with technical support in the area of information and communications technology to ensure the smooth conduct of the proceedings in the Court’s two official languages, involving participants joining from different locations around the world. At the same time, the Registry also made arrangements for virtual simultaneous interpretation and the electronic distribution of documents in preparation for the hearings. Owing to those arrangements, which entailed additional time and financial resources, the Court was able to conduct its planned judicial activities.
- 7.13 Progress towards the objective is presented in the performance measure below (see table 7.1).

Table 7.1
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
Members of the Court and parties to pending cases received timely assistance by the Registry	Members of the Court and parties to pending cases received timely assistance by the Registry (including with respect to hybrid hearings in 3 cases)	Members of the Court and parties to pending cases received timely assistance by the Registry (including with respect to hybrid hearings in 5 cases)

Impact of the pandemic

- 7.14 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular the Court’s ability to conduct its judicial activities in person in The Hague. The adaptation of the Court’s working methods, and in particular the amendment of its Rules to allow for hearings and readings of the Court’s judgments to take place by video link in certain circumstances, have, however, enabled the Court to hold all five sets of hearings it had planned for 2021, all of which were held in a hybrid format, with some members of the Court and members of the parties’ respective delegations physically present in the Great Hall of Justice and others following the proceedings via video link. In addition, through the increased use of technology, the Court was able to hold its internal meetings on budgetary, administrative and judicial matters and to pursue the consideration of cases pending on its docket, allowing it to render judgments in three cases in 2021.

Planned results for 2023

Result 1: meeting the Court’s sustained workload

Programme performance in 2021 and target for 2023

- 7.15 In 2021, the Court delivered three judgments in contentious proceedings, two orders on requests for the indication of provisional measures and eight other orders directing the proceedings in the cases before it. During the same period, the Court held public hearings on the merits or on incidental proceedings in five contentious cases and was also seized of three new contentious cases. As at 31 December 2021, there were 15 contentious cases pending before the Court.

7.16 The work of the Registry contributed to the conduct of the Court’s judicial work in those proceedings, which met the planned target.

7.17 Progress towards the objective is presented in the performance measure below (see figure 7.I).

Figure 7.I

Performance measure: provision by the Registry of services to the Court in pending cases

(Number of cases in which hearings were held or are planned to be held and number of decisions rendered)

^a The number of cases in which hearings will be held and the number of decisions that will be rendered are unforeseeable for 2022 and 2023.

^b For 2022, the Court has set tentative dates for hearings in four cases.

Result 2: improved outreach to promote awareness and understanding of the Court’s role as the principal judicial organ of the United Nations

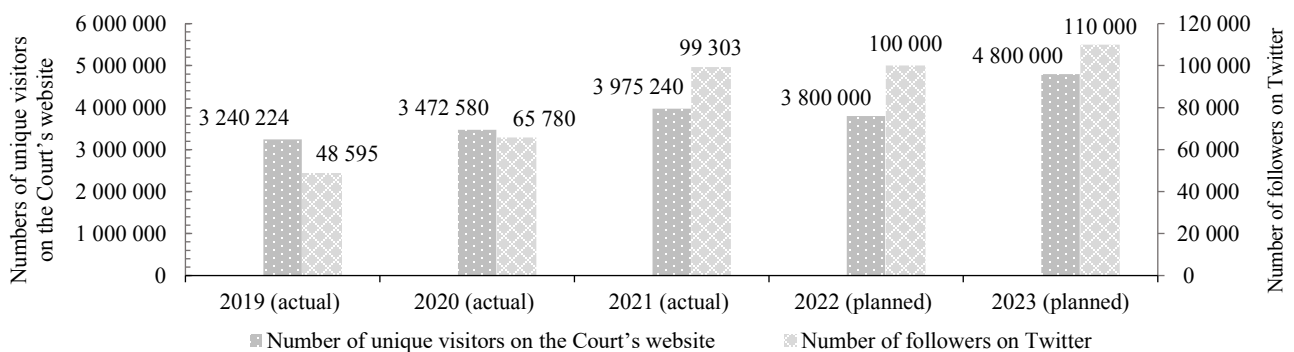

Programme performance in 2021 and target for 2023

7.18 The work of the Registry contributed to improved awareness and understanding of the Court’s role as the principal judicial organ of the United Nations by further developing and strengthening the Court’s social media profile, as well as by enriching and refining the content, appeal and usability of its website, as demonstrated by 3.98 million unique website visitors and 99,303 followers on Twitter, which exceeded the planned target of 3.65 million unique visitors and 85,000 Twitter followers.

7.19 Progress towards the objective and target for 2023 are presented in the performance measure below (see figure 7.II).

Figure 7.II

Performance measure: number of unique visitors on the Court’s website and number of followers on Twitter

Result 3: Improved understanding and awareness of the Court's proceedings among the diplomatic and legal community

Proposed programme plan for 2023

- 7.20 The Registry conducts outreach activities aimed at enhancing and improving the understanding and awareness of the Court's proceedings by States that may appear before it. These activities take several forms, including presentations, workshops, briefings and conferences and the publication of information material aimed at the main target audience of the Registry, namely States (through contacts with the diplomatic community and representatives of States appearing before the Court in proceedings) and the legal community (lawyers appearing before the Court, legal advisers at embassies, lawyers' associations and members of academia).

Lessons learned and planned change

- 7.21 The lesson for the Registry was that, in the context of the COVID-19 pandemic, some of its outreach activities could be successfully conducted in a hybrid or virtual format, enabling the Registry to reach a broader audience. In applying the lesson, the Registry will organize and promote outreach activities for the benefit of the above-mentioned target audience through an increased use of information and communications technology.
- 7.22 Expected progress towards the objective is presented in the performance measure below (see figure 7.III).

Figure 7.III

Performance measure: number of stakeholders in the diplomatic and legal community with improved understanding and awareness of the Court's proceedings (annual)

Legislative mandates

- 7.23 The International Court of Justice is the principal judicial organ of the United Nations. Its activities are governed by the Charter of the United Nations and by its Statute, which forms an integral part of the Charter.

Deliverables

- 7.24 Table 7.2 lists all deliverables of the Registry.

Table 7.2
Registry: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	1
1. Annual report of the Court to the General Assembly	1	1	1	1
Judicial documentation (number of judgements, advisory opinions and orders)	Unforeseeable^a	13	Unforeseeable^a	Unforeseeable^a
2. Judgments, advisory opinions and orders	Unforeseeable ^a	13	Unforeseeable ^a	Unforeseeable ^a
Substantive services for judicial proceedings (number of documents)	1 685	1 439	1 685	1 585
3. Preparation of documents (minutes of private meetings of the Court, case-related letters and distributions prepared, memorandums, speeches, etc.)	1 685	1 439	1 685	1 585
Conference and secretariat services for judicial proceedings (number of three-hour sittings)	149	154	149	149
4. Interpretation at private meetings and public hearings of the Court	149	154	149	149
Substantive services for meetings (number of three-hour meetings)	2	2	2	2
5. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
6. Meetings of the Fifth Committee	1	1	1	1
Documentation services for judicial proceedings (thousands of words)	27 660	29 211	27 660	27 800
7. Translation of documents related to the Court's judicial activities	7 660	8 051	7 660	7 800
8. Processing (editing and proofreading) of documents related to the Court's judicial activities	20 000	21 160	20 000	20 000
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	–	3	4	6
9. Presentations, briefings, workshops and conferences on proceedings of the Court for the diplomatic and legal community	–	3	4	6
Publications of the Court (number of publications)	28	23	26	25
10. Applications/special agreements (including annexes)	Unforeseeable ^a	1	Unforeseeable ^a	Unforeseeable ^a
11. <i>ICJ Reports</i> : bound volumes of judgments, advisory opinions and orders of the Court	2	1	2	2
12. Relevant chapter in <i>Yearbook of the United Nations</i>	1	1	1	1
13. Pleadings series volumes	20 ^b	3 ^c	20 ^b	19 ^c
14. <i>International Court of Justice Annuaire/Yearbook</i>	1	1	1	1
15. Other publications of the Court (non-recurrent, reprints, publications for special occasions (illustrated books, handbooks, etc.))	4	16	2	2
D. Communication deliverables				
Outreach programmes, special events and information materials: exhibits, lectures and presentations for legal and academic visitors, the diplomatic community, students and journalists; and distribution of leaflets, fact sheets and flyers on the Court.				
External and media relations: press releases and summaries of decisions.				
Digital platforms and multimedia content: website and social media platforms of the Court.				

^a It is inherently impossible to forecast the number of cases that will be pending before the Court and the number of new proceedings that will be instituted, including incidental proceedings in pending cases.

^b The planned figures for 2021 and 2022 were based on the number of volumes of written pleadings received from States involved in proceedings before the Court. The approach for 2021 actual and 2023 planned has been changed whereby the figures reflect the number of volumes printed and issued by the Court in the pleadings series.

^c Includes the annexes to the pleadings, which are contained in CD-ROMs accompanying the hard copy volumes. These annexes are accounted for at a rate of 1,000 pages per volume.

B. Proposed post and non-post resource requirements for 2023

Overview

7.25 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 7.3 to 7.5.

Table 7.3

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2021 expenditure	2022 appropriation	Changes				2023 estimate (before recosting)

7.26 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 7.6 to 7.8 and figure 7.IV.

7.27 As reflected in tables 7.6 and 7.7, the overall resources proposed for 2023 amount to \$28,463,200 before recosting, reflecting a net decrease of \$85,900 (or 0.3 per cent) compared with the appropriation for 2022. Resource changes result from two factors, namely: (a) technical adjustments; and (b) other changes. The proposed level of resources provides for the full, efficient, and effective implementation of mandates.

Figure 7.IV
Distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor and component

Overall resource changes

Technical adjustments

7.28 As reflected in table 7.6, resource changes reflect a decrease of \$113,000, as follows:

Programme support. The decrease of \$113,000 relates to the removal of non-recurrent provisions for the purchase of conference servicing and reproduction equipment relating to the implementation of the second phase of the replacement of obsolete audiovisual equipment in the Great Hall of Justice.

Other changes

7.29 As reflected in table 7.6, resource changes reflect a net increase of \$27,100, as follows:

(a) **Members of the Court.** The net decrease of \$203,000 reflects:

- (i) A net decrease of \$204,700 under non-staff compensation, due to lower pension estimates attributable to changes in the composition of the group of retired judges and spouses entitled to a pension and a lower number of children of judges entitled to the education grant (\$262,900). The decrease is partially offset by an increase in the requirements for travel of non-resident judges to Court sessions and of resident judges and their dependents to their home country (\$58,200);
- (ii) An increase of \$1,700 under travel of staff, to support the annual visit of the President of the Court to address the General Assembly and the Security Council in New York and her annual attendance at the International Law Commission meeting in Geneva and to support the travel of members of the Court to attend official meetings outside The Hague;

- (b) **Registry.** The increase of \$98,600 reflects:
- (i) An increase of \$79,800 for the proposed establishment of one post (P-3) in the Information and Communications Technology Division (see annex III);
 - (ii) An increase of \$2,500 under travel of staff, mainly to support the travel of the Registrar and Registry officials to United Nations Headquarters in New York, and to Geneva to represent the Court in hearings before the United Nations Dispute Tribunal and/or the United Nations Appeals Tribunal in cases in which the Court may be involved;
 - (iii) An increase of \$11,000 under contractual services, due mainly to higher anticipated requirements for the language training programme to enhance staff capacities to work in the two official languages of the Court;
 - (iv) An increase of \$5,300 under grants and contributions, due to the anticipated higher requirements for services provided by the United Nations system of administration of justice in accordance with the memorandum of understanding with the United Nations Office at Geneva, the Office of the United Nations Ombudsman and Mediation Services and the Office of Staff Legal Assistance;
- (c) **Programme support.** The net increase of \$131,500 reflects:
- (i) An increase of \$29,000 under contractual services, to take into account higher anticipated requirements for the reduction of the backlog of volumes published in the Pleadings series;
 - (ii) A decrease of \$5,500 under general operating expenses, due to an anticipated reduction in requirements for communications as a result of an increased use of the Court's unified communications platform (Skype for Business and Microsoft Teams) and the replacement of services provided by a private company with services provided by the United Nations Global Service Centre integrated wide area network connection to the United Nations Secretariat;
 - (iii) An increase of \$31,800 under supplies and materials, due to higher anticipated requirements for library books and subscriptions required to maintain the comprehensive collection of public international law material of the Court;
 - (iv) An increase of \$76,200 under furniture and equipment to take into account the higher anticipated requirements for the replacement of obsolete equipment, including printers, laptop computers, network switches, hard disks, blade servers and a digital audio recording appliance, in line with the Court's replacement plan.

Members of the Court

- 7.30 The International Court of Justice is composed of 15 judges ("members of the Court"), who are elected to nine-year terms of office by the General Assembly and the Security Council. Every three years, one third of the Court is elected, the sitting judges being eligible for re-election. The Court, as the principal judicial organ of the United Nations, is a universal body, within which the principal legal systems of the world and the main forms of civilization have to be represented in a balanced way (Article 9 of the Statute). It is as an institution composed in this broad-based way that the Court settles legal disputes submitted to it by States and gives advisory opinions on legal questions referred to it by authorized United Nations organs and specialized agencies. All the members of the Court are, in principle, required to participate in every case before it (Article 25 of the Statute). In accordance with Article 31 of the Court's Statute, a State party to a case may choose a judge ad hoc if the Court includes upon the Bench no judge of the nationality of the parties or a judge of the nationality of another party. Judges ad hoc take part in the decisions of the Court on terms of complete equality with the members of the Court.
- 7.31 The proposed regular budget resources for 2023 amount to \$7,592,100 and reflect a decrease of \$203,000 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 7.29 (a). Additional details on the distribution of the proposed resources for 2023 are reflected in table 7.9 and figure 7.V.

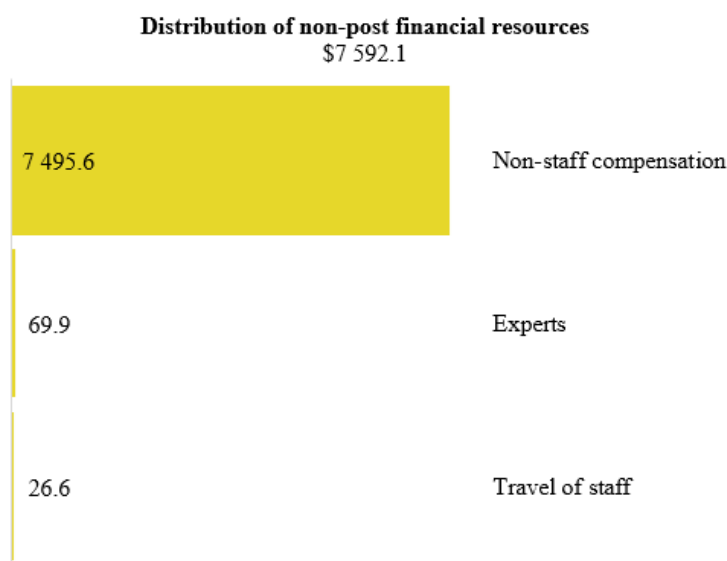

Table 7.9

Figure 7.V
Members of the Court: distribution of proposed resources for 2023 (before recosting)

(Thousands of United States dollars)

Registry

- 7.32 Given that the Court is both a judicial body and an international institution that is administratively independent from the Secretariat, its Registry must take on the dual role of an *auxiliaire de la justice* and an international secretariat. The Registry provides legal, diplomatic, linguistic and technical support to the Court. It is responsible for administrative, conference, computerization, archival, distribution and documentary and library services, and acts as the regular channel for communications to and from the Court.
- 7.33 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 7.10. The impact of COVID-19 and related restrictions on travel in 2021 limited the ability to comply with the advance booking for air travel, which resulted in a compliance rate of 86 percent in 2021.

Table 7.10
Compliance rate
 (Percentage)

	<i>Actual 2019</i>	<i>Actual 2020</i>	<i>Actual 2021</i>	<i>Planned 2022</i>	<i>Planned 2023</i>
Timely submission of documentation	100	100	100	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	100	82	86	100	100

7.34 The proposed regular budget resources for 2023 amount to \$16,755,200 and reflect an increase of \$98,600 compared with the appropriation for 2022. The proposed increase is explained in paragraph 7.29 (b). Additional details on the distribution of the proposed resources for 2023 are reflected in table 7.11 and figure 7.VI.

Programme support

7.35 The provisions under programme support relate to the common service requirements of the Court and its Registry, including the contribution of the United Nations to the Carnegie Foundation for the use of the Peace Palace at The Hague.

7.36 The proposed regular budget resources for 2023 amount to \$4,115,900 and reflect a net increase of \$18,500 compared with the appropriation for 2022. The proposed net increase is explained in paragraphs 7.28 and 7.29 (c). Additional details on the distribution of the proposed resources for 2023 are reflected in table 7.12 and figure 7.VII.

Annex I

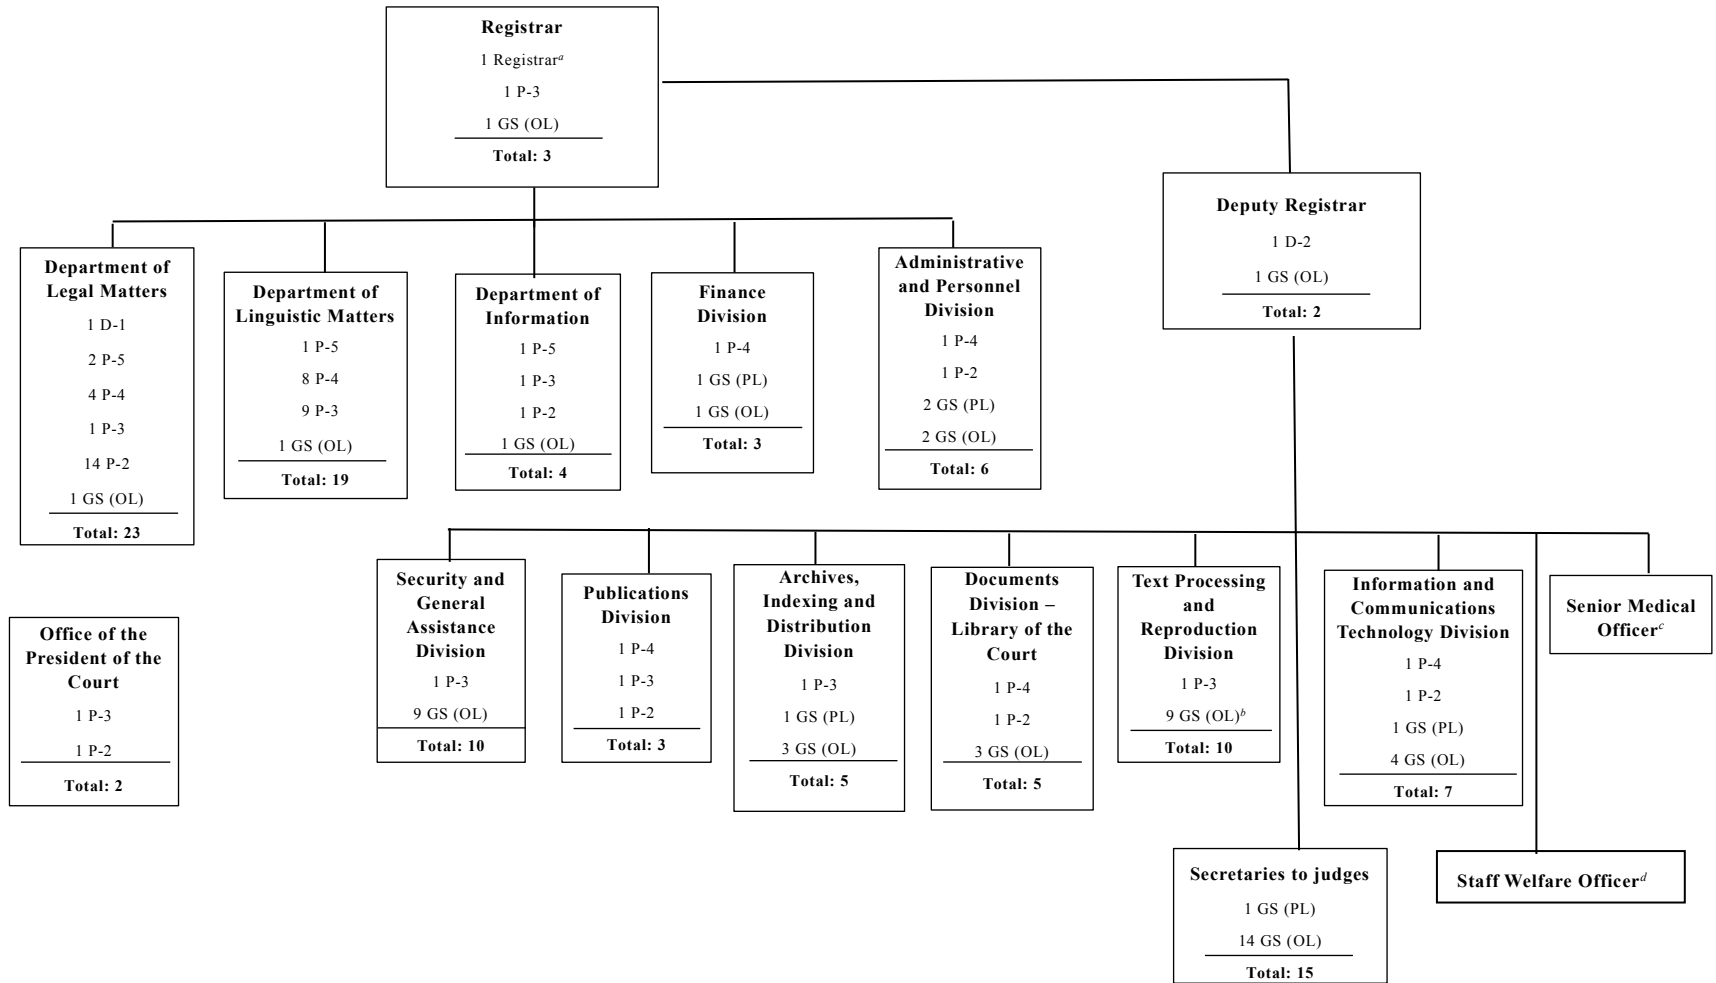

Organizational structure and post distribution for 2023

Two charts showing the organizational structure of the International Court of Justice are presented below. Chart A reproduces the approved organizational structure for 2022, as contained in document [A/76/6 \(Sect. 7\)](#). Chart B presents the proposed organizational structure for 2023.

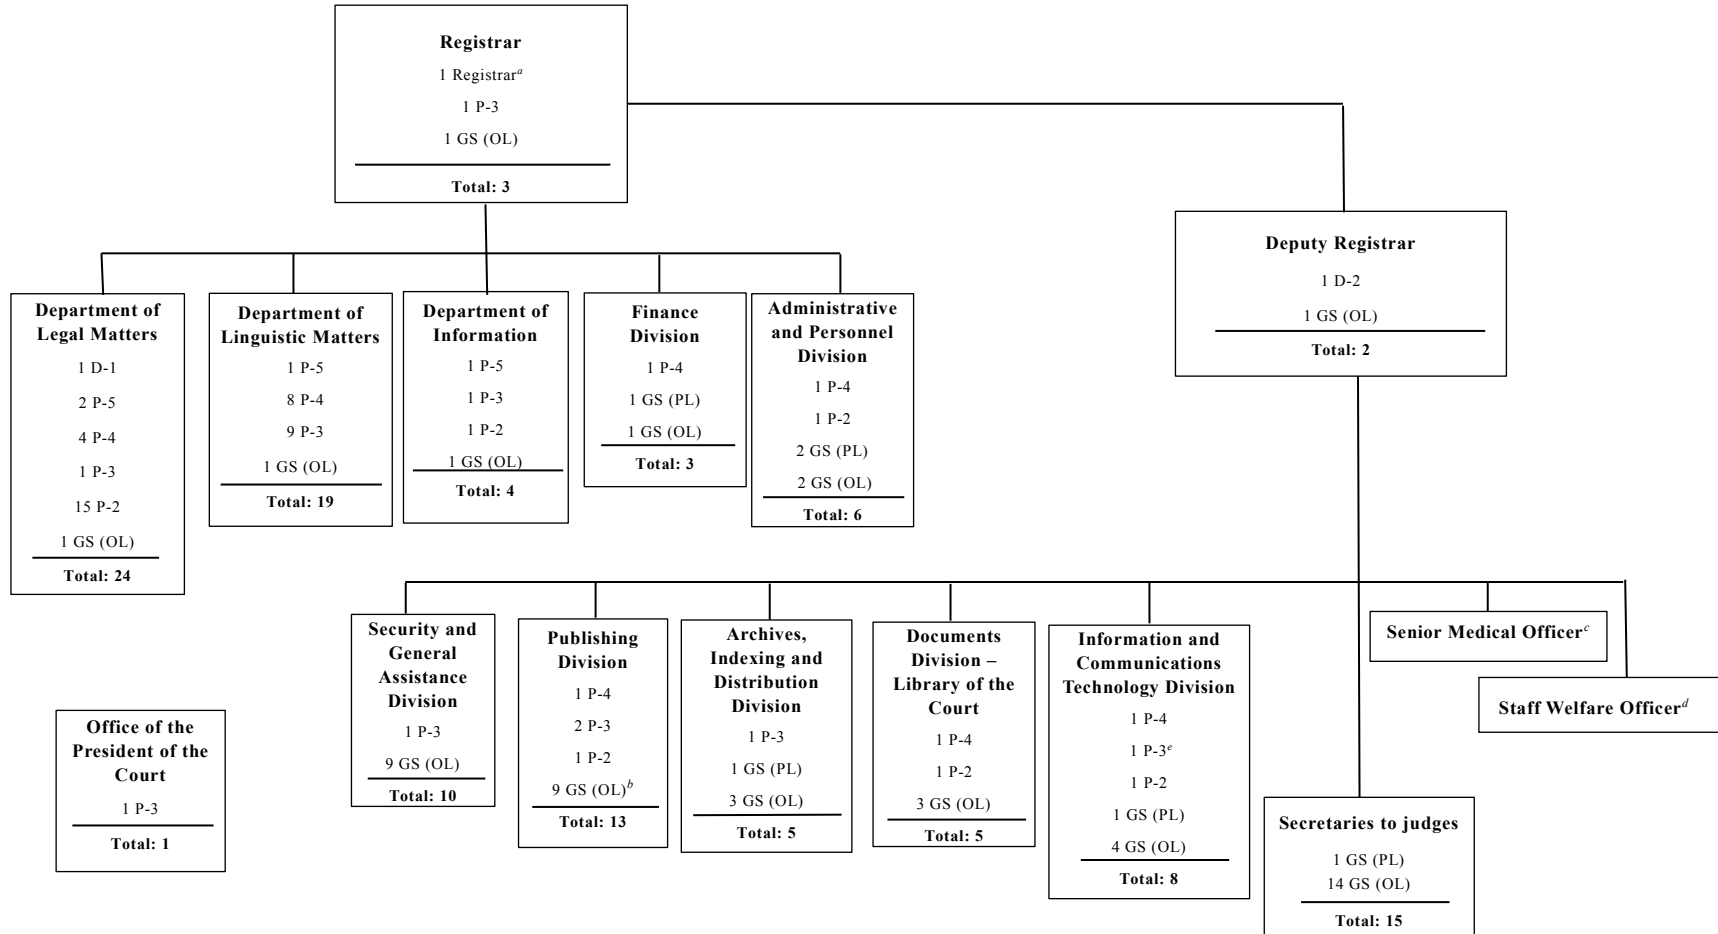

Justification for the proposed changes

In July 2021, the Court decided to merge the Publications Division and the Text Processing and Reproduction Division and establish a new Publishing Division, in order to increase effectiveness in the production and publication of the Court's documents and improve the flow of information. That decision was adopted by the Court on the basis of its Statute and Rules and in the exercise of its autonomy in staff and administrative matters and has no budgetary implications.

A. Approved organizational structure and post distribution for 2022

B. Proposed organizational structure and post distribution for 2023

Abbreviations: GS (OL), General Service (Other level); GS (PL), General Service (Principal level).

^a In accordance with Articles 21 and 32 of the Statute of the Court, the Registrar is appointed by the Court. The Registrar’s salary is fixed by the General Assembly upon the proposal of the Court, and the post is budgeted at the Assistant Secretary-General level.

^b In addition, the Division will have two temporary assistance positions to support its work.

^c One 25 per cent part-time general temporary assistance position (P-5).

^d One 25 per cent part-time general temporary assistance position (P-3).

^e Establishment of one post of Information Systems Officer (Cybersecurity) (P-3).

Annex II

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/76/7](#) and [A/76/7/Corr.1](#)

The Advisory Committee reiterates again its expectation that every effort will be made to ensure the smooth implementation of Umoja in a timely manner with the full realization of the system's benefits (see also [A/75/7](#) and [A/75/7/Corr.1](#), para. III.13, and [A/74/7](#), para. III.10) (para. III.10).

Discussions between the Enterprise Resource Planning Solution Division, the International Court of Justice, and the United Nations human resources and finance business areas are ongoing, including through weekly progress meetings. The deployment of Umoja at the Court will be presented to the Umoja Change Board, as the principal body responsible for the continued development of Umoja, for its review and approval in April 2022. In the meantime, the Court's Umoja task force is continuing its preparations for the forthcoming deployment, including by identifying possible issues and addressing them on time to ensure a smooth transition.

Annex III

Summary of proposed post changes, by component

<i>Component</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Registry	1	P-3	Establishment of 1 Information Systems Officer (Cybersecurity)	The repeated attempts to gain access to the sensitive information of the International Court of Justice, including through an increasing number of attacks on its electronic systems, requires strengthening of the Court's information and communications technology (ICT) capacity. The proposed establishment of one post of Information Systems Officer would enable the Court to develop and put in place a modern and secure ICT infrastructure. The functions of the incumbent would include: (a) managing information security projects involving security threat studies, systems analysis and the design, development and implementation of new systems to secure the information of the Court; (b) developing, implementing and advising on policies on information security practices that ensure the preservation of the confidentiality, integrity and continued availability of information assets based on the needs of the Court and its staff, business processes, workflows, technical architecture and information resource analysis; (c) defining technical and procedural security controls that address the protection of all information processed, whether verbally, electronically, on paper or in any other format, while taking into consideration endpoint security, network security, security architecture and service desk operations; and (d) assisting the Head of the Information and Communications Technology Division in some administrative aspects of information security matters.

I. Office of Legal Affairs

Foreword

Since its inception as the centralized legal service for the United Nations, the Office of Legal Affairs has executed its mandate to deliver advice to the Secretary-General, Secretariat departments and offices and United Nations organs on diverse questions ranging from the interpretation and application of the Charter of the United Nations, legal agreements and United Nations resolutions, as well as general questions of public and private law.

The activities of the Office also encompass varied actions and mandates, such as those related to oceans and the law of the sea, international trade, treaties and international agreements, peacekeeping and special political missions, international tribunals, sanctions, privileges and immunities, contracts, procurement, and administrative and management issues.

The challenges posed by the continuation of the coronavirus disease (COVID-19) pandemic have highlighted the importance of increased international cooperation in the framework of international law. To provide support to Member States and the wider United Nations, the Office of Legal Affairs has adapted to respond to the increased demand for legal services, responding rapidly and accurately to novel questions on legal and procedural issues.

In 2023, the Office of Legal Affairs will continue to discharge its diverse and complex mandate, responding to the needs of Member States and the Organization and as directed by the Secretary-General.

The vast experience accrued by the Office of Legal Affairs over the past 76 years has resulted in a specialized legal skill set, credibility and neutrality, and committed staff dedicated to fulfilling the Office's mandate in the service of the United Nations.

(Signed) Miguel de Serpa Soares
Under-Secretary-General for Legal Affairs and United Nations Legal Counsel

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 8.1 The Office of Legal Affairs is responsible for providing a unified central legal service for the Organization; represents the Secretary-General in legal conferences and in judicial proceedings; performs substantive and secretariat functions for organs involved in public international law, including the General Assembly and its Sixth Committee (Legal Committee), the International Law Commission and the United Nations Commission on International Trade Law (UNCITRAL), as well as for the General Assembly plenary meetings concerning oceans and the law of the sea; and performs the depositary functions of the Secretary-General for multilateral treaties and the functions of registration and publication of treaties. The structure and main functions of the Office are described in Secretary-General's bulletin [ST/SGB/2021/1](#).
- 8.2 The mandate derives from Articles 13, 102, 104, 105 and other relevant provisions of the Charter of the United Nations, as well as the priorities established in relevant General Assembly resolutions, including resolution [13 \(I\)](#) of 13 February 1946, as the central legal service for the Organization (including funds and programmes and treaty bodies institutionally linked to the Organization). The Office of Legal Affairs discharges mandates from the priorities established in relevant Assembly resolutions and decisions, including resolution [2205 \(XXI\)](#), by which the Assembly established UNCITRAL to further the progressive harmonization and unification of the law of international trade, with the Office's International Trade Law Division acting as its secretariat; the Office's Division for Ocean Affairs and the Law of the Sea acting as the secretariat of the Meeting of the States Parties to the United Nations Convention on the Law of the Sea; and resolution [68/70](#), on oceans and the law of the sea, by which the Assembly established the Office as focal point of UN-Oceans. The Secretary-General of the United Nations has also appointed the Under-Secretary-General for Legal Affairs and United Nations Legal Counsel as Secretary-General of the intergovernmental conference on an international legally binding instrument under the United Nations Convention on the Law of the Sea on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction and, pursuant to resolution [73/292](#), as Special Adviser on oceans and legal matters to the Presidents of the United Nations Conference to Support the Implementation of Sustainable Development Goal 14: Conserve and sustainably use the oceans, seas and marine resources for sustainable development.

Strategy and external factors for 2023

- 8.3 The Office of Legal Affairs will continue to support international law as the foundation for Member States to interact and cooperate in achieving their common goals. The Office will continue to respond to the needs of its stakeholders and beneficiaries with a specialized legal skill set, institutional memory, credibility and neutrality, while delivering on a diverse and complex mandate.
- 8.4 The Office of Legal Affairs will continue to respond to the increasing demand for legal services from the Secretariat and other United Nations organs, including through the provision of advice on questions relating to the interpretation and application of international law instruments and on general questions of public international law, to ensure that legal considerations are an integral part of the Organization's operations and the effective functioning of its principal and subsidiary organs. The Office will continue to respond in an agile manner to new types of requests concerning legal and procedural issues to ensure the business continuity of various United Nations intergovernmental bodies.
- 8.5 The Office of Legal Affairs will continue to support Member States in the implementation of the 2030 Agenda for Sustainable Development and be a key partner in the United Nations system efforts

to advance the decade of action and delivery for sustainable development. The Office will continue to provide inputs and to support processes related to the Sustainable Development Goals in which it has a specific mandate, such as Goals 8, 14 and 16. It will continue to engage with stakeholders within and outside the United Nations system on ocean-related initiatives, to enhance the coordination and consistency with current processes and mandates, including those related to the protection and governance of the global commons. Similarly, it will support the processes and initiatives that are discussed with Member States related to the implementation of international law and governance.

- 8.6 The Office of Legal Affairs will contribute to international justice and accountability and continue its role in the Organization's action to improve the response to allegations of sexual exploitation and abuse and in efforts to hold accountable personnel who have engaged in such behaviour. Furthermore, the Office will contribute to the efforts to combat sexual exploitation and abuse, whether committed by United Nations personnel or by non-United Nations security forces operating under a United Nations mandate.
- 8.7 The Office of Legal Affairs will also support new initiatives of the Secretary-General envisioned to increase the Organization's capacity to deliver. To advance the Data Strategy of the Secretary-General for Action by Everyone, Everywhere, the Office will provide support in designing analytics and data management capabilities and support the implementation of a data governance framework and the development of a framework for strategy oversight. The Office will also support the legal aspects related to the implementation of the Secretary-General's strategic action plan on addressing racism and promoting dignity for all in the United Nations Secretariat.
- 8.8 On the general legal services provided to United Nations organs and programmes, the Office of Legal Affairs will continue to maximize the protection of the legal interests of the Organization and minimize its legal liabilities. The Office will continue to advise on the legal aspects arising from United Nations institutional and operational activities and provide legal services for resolving disputes of a private law character involving the operations of the Organization, its subsidiary bodies and organs or its separately administered funds and programmes.
- 8.9 The Office of Legal Affairs will also continue to support the progressive development and codification of international law and the conclusion of legal instruments resulting in the promotion of universal respect for international law, including by continuing to serve as the secretariat of the Sixth Committee and by supporting the International Law Commission, the Special Committee on the Charter of the United Nations and on the Strengthening of the Role of the Organization, other special or ad hoc committees and diplomatic conferences in their consideration and formulation of legal instruments. The Office will disseminate materials on international law through the United Nations Audiovisual Library of International Law and major legal publications.
- 8.10 In support of the implementation and promotion of the ocean-related Sustainable Development Goals, the Office of Legal Affairs will engage in processes related to oceans and the law of the sea and the increased participation of States in, and effective implementation and application of, the United Nations Convention on the Law of the Sea and its implementing agreements, including by providing secretariat functions to oceans-related processes of the General Assembly and the Commission on the Limits of the Continental Shelf. The Office will also continue to deliver capacity-building activities on that topic, including for developing countries.
- 8.11 To further the progressive harmonization, modernization and unification of the law of international trade, the Office will continue to ensure the widespread adoption and use of harmonized and modernized substantive private law rules to govern international commercial transactions, strengthen technical cooperation and promote the participation of developing countries in the law-making activities of UNCITRAL. The Office will support Member States in the preparation of universally acceptable legislative and non-legislative texts.
- 8.12 The Office of Legal Affairs will intensify the use of technological tools and other means to enhance the custody, registration and publication of treaties, including the registration of treaties and treaty actions in line with Article 102 of the Charter, and fulfil the depositary functions of the Secretary-

General. The Office will continue to provide legal assistance and advice to States, specialized agencies, United Nations programmes and offices, treaty bodies and other entities on the law of treaties. The Office will also continue to promote and ensure wider knowledge of the law of treaties, thereby preventing issues of interpretation and implementation of treaty provisions by contracting States.

- 8.13 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of its programme owing to the COVID-19 pandemic. Examples of lessons learned and best practices include exploring alternatives to certain in-person capacity-building activities that, in view of the experience and feedback from participants, can be delivered online or in hybrid mode. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.
- 8.14 With regard to cooperation with other entities at the global, regional, national and local levels, the Office of Legal Affairs will continue to enable the International Law Commission to exchange knowledge, experience and ideas with the President of the International Court of Justice, the African Union Commission on International Law, the Inter-American Juridical Committee, the Asian-African Legal Consultative Organization and the Committee of Legal Advisers on Public International Law of the Council of Europe. The Office will also continue to cooperate with States and bodies established under the United Nations Convention on the Law of the Sea. In the fields of the law of the sea and ocean governance and of international trade law, the Office will continue to cooperate with international financial institutions, donor agencies, intergovernmental organizations, non-governmental organizations (NGOs) and natural and juridical persons.
- 8.15 With regard to inter-agency coordination and liaison, the Office of Legal Affairs has been appointed by the General Assembly in its resolution [68/70](#) as focal point of UN-Oceans, the inter-agency coordination mechanism on oceans and coastal issues within the United Nations system. UN-Oceans currently has 29 members, including competent international organizations, specialized agencies, United Nations programmes, regional commissions, the secretariats of conventions and the International Seabed Authority. In addition, in implementing General Assembly resolution [2205 \(XXI\)](#) on the establishment of UNCITRAL, the Office coordinates the work of organizations dealing with international trade law and encourages cooperation among them. The Office will exchange knowledge with the networks of legal advisers of United Nations agencies and funds and programmes.
- 8.16 With regard to the external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) Extrabudgetary resources are available to complement the programme budget, allowing the Office of Legal Affairs to respond to the increased demand for its services;
 - (b) Principal and subsidiary organs of the United Nations continue to request legal advice as a main component of the decision-making process;
 - (c) Specific mandates related to international trade law, oceans and law of the sea and others are renewed or confirmed by the competent intergovernmental bodies.
- 8.17 The Office of Legal Affairs integrates a gender perspective in its operational activities, deliverables and results, as appropriate, including through permanent interaction with the gender focal points in each division. The Office's gender focal point will continue to provide guidance on gender equality and mainstreaming a gender perspective to inform the Office's programmatic and substantive operations. The Office will also continue to promote gender equality and the empowerment of women throughout all of its subprogrammes, notably by continuing to use gender-inclusive language, in the context of the Office's capacity-building programmes and other related aspects.

- 8.18 In line with the United Nations Disability Inclusion Strategy, the Office of Legal Affairs integrates disability inclusion in its operational activities, deliverables and results, as appropriate. Through the work of its subprogrammes, the Office will continue to implement the directives of the United Nations Disability Inclusion Strategy.

Programme performance in 2021

Impact of the pandemic

- 8.19 The continuation of the pandemic into 2021 had an impact on the implementation of mandates, in particular on the cancellation or postponement of meetings of intergovernmental processes and expert bodies, conferences hosted by or under the auspices of the United Nations and seminars, workshops and training events to be held by the Office of Legal Affairs, which is described in the expected results under subprogrammes 3 and 4. In addition, in order to support Member States on issues related to the COVID-19 pandemic, within the overall scope of the objectives, the Office provided analyses and advice to Member States and United Nations intergovernmental bodies, including the General Assembly and the Security Council, with regard to legal and procedural questions; support for Member States in the identification of solutions to ensure the business continuity of intergovernmental bodies during the pandemic; and comprehensive advice to United Nations Secretariat departments, entities of the United Nations system and Member States to address the legal implications of hosting events at United Nations Headquarters and in connection with measures undertaken in response to the pandemic. The Office held events and organized workshops and training materials for Member States and a wider audience, in support of recovery efforts, under subprogrammes 2, 3, 4 and 5.

Legislative mandates

- 8.20 The list below provides all mandates entrusted to the programme.

Charter of the United Nations

Article 13	Article 104
Article 98	Article 105
Article 102	

General Assembly resolutions

13 (I)	Organization of the Secretariat	62/63; 76/106	Criminal accountability of United Nations officials and experts on mission
22 (I)	Privileges and immunities of the United Nations	62/70; 63/128; 70/118; 75/141; 76/117	The rule of law at the national and international levels
2099 (XX); 56/77; 58/73; 60/19; 62/62; 68/110; 75/134; 76/110	United Nations Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law	70/112; 73/276; 76/242	Administration of justice at the United Nations

Deliverables

8.21 Table 8.1 lists all cross-cutting deliverables of the programme.

Table 8.1
Cross-cutting deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	6	4	10	6
1. Report and notes to the General Assembly	3	1	6	3
2. Report of the Committee on Relations with the Host Country	1	1	1	1
3. Letters to the Security Council	2	2	3	2
4. Documents for the intergovernmental conference on an international legally binding instrument under the United Nations Convention on the Law of the Sea on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction ^a	–	–	–	–
Substantive services for meetings (number of three-hour meetings)	5	5	8	8
Meetings of the:				
5. Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
6. Committee for Programme and Coordination	1	1	1	1
7. Fifth Committee	1	1	1	1
8. Committee on Relations with the Host Country	2	2	5	5

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	2	2	4	4
9. Workshops on international law	2	2	4	4
C. Substantive deliverables				
Consultation, advice and advocacy: advice and legal opinions in the context of the participation of the Legal Counsel in the Senior Management Group, the Executive Committee and other ad hoc groups.				
D. Communication deliverables				
Outreach programmes, special events and information materials: speeches and presentations to Member State representatives, international organizations and academic and civil society organizations regarding the work of the Office of Legal Affairs and issues of public international law, the law of the sea and international trade law; annual treaty event during the opening plenary meeting of the General Assembly session; and events on international law.				
E. Enabling deliverables				
Internal justice and oversight: representation of the Secretary-General before the United Nations Appeals Tribunal and advice on administrative law of the Organization.				
Legal services: legal advice, opinions and services to all principal and subsidiary organs of the United Nations, as detailed in all the subprogrammes, on privileges and immunities, public international law, international humanitarian law, international human rights law and the amicable settlement of disputes; administrative law of the Organization; claims arising from operational activities of the Organization; procurement activities; the Organization's accountability measures and the areas of oceans and law of the sea, treaty law and international trade law; and legal support for initiatives on data strategy and anti-racism.				

^a The postponement of the conference has influenced the planned deliverables.

Evaluation activities

- 8.22 The following evaluations completed in 2021 have guided the proposed programme plan for 2023:
- (a) Evaluation to assess the relevance, efficiency and effectiveness of the support by subprogramme 2 to the COVID-19 pandemic response of the United Nations;
 - (b) Evaluation to assess the relevance, efficiency and effectiveness of the publication function of subprogramme 6 within the framework, scope and limits of its mandate.
- 8.23 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2023. For example, the findings of the evaluation on support to the United Nations COVID-19 pandemic response under subprogramme 2 will inform the support strategies of the Office of Legal Affairs to address information technology shortfalls within the subprogramme; on the basis of the findings, the Office will devise strategies, in coordination with other departments and offices, to provide information on steps that can be undertaken prior to seeking legal advice. In that connection, the Office will continue to draw on the lessons learned in this evaluation by providing a wide spectrum of advice, services and assistance on legal matters affecting the operation and activities of the Organization's COVID-19 pandemic response. Likewise, the findings of the evaluation on treaty publication under subprogramme 6 will inform continued efforts to develop and upgrade information technology systems for treaty publishing, enhance staff capacity and build on enhanced communications on treaty publication.
- 8.24 An evaluation on a select area of work under subprogramme 5, focusing on the capacity-building activities of the subprogramme's technical cooperation strategy, is planned for 2023.

Programme of work

Subprogramme 1

Provision of legal services to the United Nations system as a whole

Objective

- 8.25 The objective, to which this subprogramme contributes, is to ensure respect for, and adherence to, public international law, and the development of international justice and accountability.

Strategy

- 8.26 To contribute to the objective, the subprogramme will:
- (a) Provide legal advice on questions relating to the interpretation and application of the Charter, legal agreements and United Nations resolutions, rules and regulations, as well as on general questions of public international law, including international human rights law, international humanitarian law and international criminal law;
 - (b) Advise the United Nations and United Nations-assisted criminal tribunals and their oversight bodies, and other international accountability mechanisms, including on their founding arrangements, statutes, terms of reference and rules of procedure, and on the functions of the Secretary-General thereunder.
- 8.27 The above-mentioned work is expected to result in:
- (a) A uniform and consistent practice of the law and, subsequently, in the effective functioning of the principal and subsidiary organs of the United Nations in accordance with international law;
 - (b) The protection of the privileges and immunities of the United Nations;
 - (c) The effective functioning of the United Nations and entities entrusted with mandates in the areas of international law;
 - (d) The appointment and reappointment of the principals of the United Nations and United Nations-assisted international criminal tribunals and other international accountability mechanisms.

Programme performance in 2021

Entry into force of the status-of-mission agreement for the United Nations Integrated Transition Assistance Mission in the Sudan

- 8.28 In its resolution [2579 \(2021\)](#), the Security Council decided that the United Nations Integrated Transition Assistance Mission in the Sudan (UNITAMS) would continue implementing its mandate for an additional year. The subprogramme negotiated, with the Government of the Sudan, the status-of-mission agreement for UNITAMS, which was concluded and entered provisionally into force on 4 July 2021, thus providing the Mission with the rights, privileges and immunities, facilities and exemptions needed for it to be able to effectively discharge its mandated tasks. In addition, an arrangement relating to specific aspects of the status-of-mission agreement was then negotiated and was successfully concluded in September 2021.
- 8.29 Progress towards the objective is presented in the performance measure below (see table 8.2).

Table 8.2
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	Security Council establishes UNITAMS on 3 June 2020 for an initial period of 12 months (resolution 2524 (2020)). Draft status-of-mission agreement was sent to the Government of the Sudan on 1 July 2020	The status-of-mission agreement for UNITAMS was signed with the Government of the Sudan in June 2021 and entered into force on 4 July 2021, following the extension of the UNITAMS mandate for an additional 12 months (Security Council resolution 2579 (2021)) An arrangement relating to specific aspects of the status-of-mission agreement was finalized in September 2021

Planned results for 2023

Result 1: host country agreement for the Fifth United Nations Conference on the Least Developed Countries

Programme performance in 2021 and target for 2023

- 8.30 The subprogramme’s work contributed to the conclusion of the host country agreement on 1 October 2021, allowing for the full participation of all participants in the Fifth United Nations Conference on the Least Developed Countries, in Doha, which met the planned target.
- 8.31 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 8.3).

Table 8.3
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
General Assembly decides to hold the Fifth United Nations Conference on the Least Developed Countries in Doha from 21 to 25 March 2021	Negotiations on and planning of the Fifth United Nations Conference on the Least Developed Countries in Doha with host country, despite challenges caused by COVID-19	Signature of the host country agreement on 1 October 2021 allowing for full participation by all participants in the Fifth United Nations Conference on the Least Developed Countries, in Doha	Fifth United Nations Conference on the Least Developed Countries is held in Doha from 23 to 27 January 2022 Member States’ hosting of other large-scale conferences away from Headquarters based on host country agreements is negotiated	Report of the Credentials Committee of the Fifth United Nations Conference on the Least Developed Countries is issued, and the President of the Conference is able to consider and take actions before the Conference in accordance with the rules of procedure of the Conference

Result 2: conclusion of a framework for the completion of the work of the Extraordinary Chambers in the Courts of Cambodia, including with regard to the drawdown of activities and the residual functions requiring performance

Programme performance in 2021 and target for 2023

- 8.32 The subprogramme's work contributed to the approval by the General Assembly of a draft Addendum to the 2003 Agreement between the United Nations and the Government of Cambodia containing a framework for the completion of the work of the Extraordinary Chambers, including with regard to the drawdown of activities and the performance of residual functions, which met the planned target.
- 8.33 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 8.4).

Table 8.4

Result 3: a data protection and privacy framework for the Secretariat**Proposed programme plan for 2023**

8.34 In 2020, the Secretary-General approved the Data Strategy for Action by Everyone, Everywhere, which included a commitment to ensure the protection and privacy of personal data in any form, processed in any manner, and to exercise caution when processing data of vulnerable or marginalized individuals or groups. Since then, the subprogramme has been providing advice on the legal elements required for the development of a Secretary-General's bulletin enshrining a new overarching data protection and privacy policy for the United Nations Secretariat.

Lessons learned and planned change

8.35 The lesson for the subprogramme was that, owing to the complex nature of data protection, especially in the context of vulnerable or marginalized segments of the population, it was necessary to increase discussion on elements of common policy development. In applying the lesson, the subprogramme will organize discussions with other key subprogrammes involved in the handling of personal data within the Secretariat. The new policy would create a data governance framework for the processing of personal and non-personal data in a sensitive context that might put certain individuals and groups at risk of harm. A new policy will ensure that data subjects may exercise their rights by making specific requests in relation to their data.

8.36 Expected progress towards the objective is presented in the performance measure below (see table 8.5).

Table 8.5

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
–	Adoption of the Data Strategy of the Secretary-General for Action by Everyone, Everywhere United Nations Secretariat entities have increased knowledge on international law issues relating to the development of policies for the Secretary-General's bulletin on the data protection and privacy policy	United Nations Secretariat entities provide inputs in accordance with international law principles towards completion of the draft Secretary-General's bulletin on the data protection and privacy policy of the United Nations Secretariat	The Secretary-General's bulletin on the data protection and privacy policy of the United Nations Secretariat is revised to adhere to principles of international law based on consultations prior to the bulletin's promulgation	The Secretary-General's bulletin on the data protection and privacy policy of the United Nations Secretariat is promulgated and assistance is provided to United Nations Secretariat entities for implementing actions to be taken, including for the benefit of vulnerable or marginalized individuals and groups

Deliverables

8.37 Table 8.6 lists all deliverables of the subprogramme.

Table 8.6

Subprogramme 1: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	7	20	13	19
1. Report and notes to the General Assembly	3	8	6	11
2. Report of the Credentials Committee	1	1	1	1
3. Report of the Committee on Relations with the Host Country	1	1	1	1
4. Report of the Credentials Committee on United Nations conferences	2	–	2	1
5. Reports concerning the election of judges of the International Court of Justice	–	3	–	3
6. Letters to the Security Council	–	7	3	2
Substantive services for meetings (number of three-hour meetings)	76	78	89	79
Meetings of the:				
7. General Assembly and its committees	26	33	25	25
8. Credentials Committee of the General Assembly	1	1	1	1
9. Security Council and its subsidiary bodies	2	3	11	6
10. Economic and Social Council and its commissions	10	8	15	10
11. United Nations treaty bodies and United Nations conferences	30	28	30	30
12. Credentials Committee on United Nations conferences	2	–	2	1
13. Committee on Relations with the Host Country	5	5	5	5
14. Panels of experts of the Secretary-General's trust fund to assist States in the settlement of disputes through the International Court of Justice	–	–	–	1
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	20	17	16	18
15. Workshops on international law matters	4	4	4	4
16. Training events on United Nations rules of procedure	5	4	5	5
17. Training events on peacekeeping matters	4	2	–	2
18. Annual meeting of the legal advisers and legal liaison officers of the United Nations offices, funds and programmes, specialized agencies and related and other organizations and field legal advisers and officers	7	7	7	7
C. Substantive deliverables				
Consultation, advice and advocacy: legal advice to and consultation with the General Assembly, the Security Council and the Main Committees of the Assembly on constitutional, institutional and procedural questions.				
D. Communication deliverables				
Outreach programmes, special events and information materials: speeches and presentations to Member State representatives, international organizations and academic and civil society organizations regarding the work of the Office of the Legal Counsel and issues of public international law; and events to promote public international law.				
E. Enabling deliverables				
Legal services: legal advice to and support for the Secretariat and the funds and programmes on privileges and immunities, in particular in support of host country agreements entered into by the United Nations, and public international law, including international humanitarian law, international human rights law and the pacific settlement of disputes; legal advice to and support for 1 United Nations criminal tribunal and its oversight body and other international accountability mechanism; legal advice to and support for approximately 12 peacekeeping and 38 special political missions; liaison with the International Court of Justice and fulfilment of the responsibilities of the Secretary-General under the Statute of the Court; legal advice to and support for 4 Secretariat offices and 4 other entities and bodies on disarmament, sanctions and security; legal advice to 18 United Nations entities on the interpretation and enforcement of the Relationship Agreement between the United Nations and the International Criminal Court.				

Subprogramme 2

General legal services provided to United Nations organs and programmes

Objective

- 8.38 The objective, to which this subprogramme contributes, is to maximize the protection of the legal interests of the Organization and to minimize its legal liabilities.

Strategy

- 8.39 To contribute to the objective, the subprogramme will:
- (a) Assist in ensuring external accountability of the United Nations and related personnel, including on internal sanctions and external enforcement action and liaison with national authorities;
 - (b) Advise on the legal aspects arising from United Nations institutional and operational activities, including the Organization's development, technical assistance, peacekeeping, humanitarian and other operations;
 - (c) Assist the Organization, its organs or its separately administered funds and programmes by providing legal advice on procurement and substantial contracts and on operational and technical assistance activities of those entities;
 - (d) Provide legal services for resolving disputes of a private law character involving the operations of the Organization, its organs or its funds and programmes, including representing the Organization in settlement negotiations and in arbitral proceedings;
 - (e) Advise on management issues and matters in the system for the administration of justice, including determining whether to appeal against a judgment of the United Nations Dispute Tribunal, and represent the Secretary-General before the United Nations Appeals Tribunal;
 - (f) Respond to requests by the Organization for urgent legal advice arising from humanitarian and emergency situations, including the COVID-19 pandemic.
- 8.40 The above-mentioned work is expected to result in:
- (a) The full maintenance of the status, legal rights and privileges and immunities of the Organization arising from United Nations operational activities;
 - (b) The reduction of actual legal liabilities of the Organization.

Programme performance in 2021

Enhanced the capacity of the United Nations to stay and deliver in the field during the COVID-19 pandemic

- 8.41 A framework to treat and medically evacuate United Nations-affiliated personnel with severe cases of COVID-19 is critical to enable United Nations entities and international NGOs to stay in the field and deliver on their mandates. The subprogramme provided legal support to various United Nations entities, including the Department of Operational Support and the Development Coordination Office, on the establishment and implementation of the COVID-19 medical evacuation system for United Nations-affiliated personnel, including with regard to legal instruments with medical facilities, Member States and other international organizations, so that there is maximum protection of the legal interests of the Organization and minimal legal liabilities resulting from such operations.
- 8.42 Progress towards the objective is presented in the performance measure below (see table 8.7).

Table 8.7
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	Access by the Department of Operational Support and the Development Coordination Office to timely legal support for the implementation of the COVID-19 medical evacuation system for United Nations-affiliated personnel, including through the conclusion of respective legal instruments for dedicated hubs to receive patients	Receipt by the Department of Operational Support and the Development Coordination Office of timely legal support for the ongoing implementation of the COVID-19 medical evacuation system for United Nations-affiliated personnel, including through the resolution of legal issues arising from the operation of the system

Planned results for 2023

Result 1: continued reduction of actual legal liability of the Organization

Programme performance in 2021 and target for 2023

- 8.43 The subprogramme’s work contributed to resolving disputes of a private law character involving the operations of the Organization, which originally totalled an aggregate amount of \$32.2 million, for \$7.8 million, thereby resulting in actual liability of 24 per cent of the amounts originally claimed, which exceeded the planned target of actual legal liability being less than 35 per cent of the amounts originally claimed against the Organization.
- 8.44 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 8.I).

Figure 8.I
Performance measure: actual legal liability of the Organization against amounts originally claimed against the Organization^a

(Percentage)

^a Only claims resolved in any given calendar year by way of settlement negotiations, arbitral proceedings and closure owing to claimants not pursuing further their claims against the Organization are included.

Result 2: improved efficiency in finalizing partnership agreements

Programme performance in 2021 and target for 2023

- 8.45 The subprogramme’s work contributed to the progress in the development of pilot guidance materials on select common legal issues in partnership agreements, which did not meet the planned target of such materials being available to all substantive offices. The target was not met owing to reprioritization of the subprogramme’s work to enable the timely finalization of various partnership agreements with Member States, civil society and the private sector in support of the Sustainable Development Goals.
- 8.46 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 8.8).

Table 8.8
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
–	–	Progress in the development of pilot guidance materials on select common legal issues	Increased access to guidance materials on legal issues common to partnership agreements	Guidance materials on select common legal issues available to all substantive offices

Result 3: strengthened capacity for the United Nations to stay and deliver through COVID-19 vaccinations

Proposed programme plan for 2023

- 8.47 In order for the United Nations to stay and deliver on its mandates, United Nations personnel required access to COVID-19 vaccinations. The subprogramme provided legal support regarding the establishment and implementation of the United Nations system-wide COVID-19 vaccination programme, including arrangements for the acquisition and administration of COVID-19 vaccines to eligible personnel.

Lessons learned and planned change

- 8.48 The lesson for the subprogramme was that the urgent need to implement a new vaccination programme required legal officers from different practice areas in the subprogramme to work together in an expedited manner. In applying the lesson, the subprogramme will continue to meet emerging and evolving legal challenges for the Organization by approaching the provision of legal services with lawyers from cross-cutting practice areas within the subprogramme.
- 8.49 Expected progress towards the objective is presented in the performance measure below (see table 8.9).

Table 8.9
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	Access by the Department of Operational Support to timely legal support for the establishment and implementation of the United Nations system-wide COVID-19 vaccination programme, including the acquisition and administration of COVID-19 vaccines to eligible personnel	Access by the Department of Operational Support to timely legal support for the implementation of the United Nations system-wide COVID-19 vaccination programme and related arrangements	Access by the Department of Operational Support to timely legal support for the implementation of the United Nations system-wide COVID-19 vaccination programme, including the administration of booster shots	Access by the Department of Operational Support to timely legal support for the implementation of the United Nations system-wide COVID-19 vaccination programme and related arrangements, including the administration of booster shots

Deliverables

8.50 Table 8.10 lists all deliverables of the subprogramme.

Table 8.10
Subprogramme 2: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory
<p>E. Enabling deliverables</p> <p>Internal justice and oversight: legal advice and services to all United Nations offices and departments, all principal and subsidiary organs of the United Nations, all peacekeeping and special political missions, all regional commissions, all funds and programmes, and the resident coordinator system, on administrative law, on criminal accountability for United Nations personnel, on procurement activities and drafting and negotiating contracts and other commercial matters, on commercial claims and representation before arbitral tribunals, on operational and technical assistance activities of the United Nations, including in the economic, social and humanitarian fields, on partnerships with the private sector, on the legislative and operational arrangements governing the staffing, supply and provision of peace operations, and representing the Secretary-General before the United Nations Appeals Tribunal.</p>

Subprogramme 3 Progressive development and codification of international law

Objective

8.51 The objective, to which this subprogramme contributes, is to develop, codify and advance knowledge of international law progressively.

Strategy

- 8.52 To contribute to the objective, the subprogramme will:
- (a) Provide substantive support to the Sixth Committee, the International Law Commission, the Special Committee on the Charter of the United Nations and on the Strengthening of the Role of the Organization, other special or ad hoc committees and diplomatic conferences in their consideration and formulation of legal instruments by assisting in the conduct of proceedings, rendering legal advice, preparing draft texts of legal instruments, resolutions and decisions and preparing background documents, analytical studies and reports;
 - (b) Provide legal bodies of the General Assembly with assistance when considering the use by States of the procedures envisaged under the relevant resolutions of the Assembly;
 - (c) Implement the mandates of the United Nations Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law. This includes the planning, organization and conduct of four in-person training programmes, namely, the International Law Fellowship Programme and the United Nations Regional Courses in International Law for Africa, for Latin America and the Caribbean and for Asia-Pacific;
 - (d) Further develop, disseminate and maintain the United Nations Audiovisual Library of International Law and prepare and disseminate major legal publications and information on the legal work of the United Nations;
 - (e) Support Member States by assisting the bureaux of the bodies that the subprogramme services in devising and implementing working methods and work programmes that ensure business continuity.
- 8.53 The above-mentioned work is expected to result in:
- (a) The smooth deliberations of legislative and legal bodies, the conclusion of draft legal instruments and the promotion of universal respect for international law;
 - (b) The wider awareness and appreciation of international law by a wider audience;
 - (c) The International Law Commission advancing its study on sea level rise in relation to international law.

Programme performance in 2021

Safeguarded deliberations of the Special Committee on the Charter of the United Nations and on the Strengthening of the Role of the Organization despite ongoing restrictions to in-person meetings resulting from the COVID-19 pandemic

- 8.54 The subprogramme serves as the secretariat of the Special Committee on the Charter of the United Nations and on the Strengthening of the Role of the Organization, which holds its annual session in February. The constraints on in-person meetings at United Nations Headquarters as a consequence of the COVID-19 pandemic posed a risk to the ability of the Special Committee to hold its annual session in 2021. The subprogramme supported the Bureau of the Special Committee in devising and implementing a work programme designed to ensure business continuity while taking into account the concerns and preferences of delegations. This involved adapting the working methods, on an exceptional basis, including holding meetings in hybrid format as well as relying on information and communications technology.
- 8.55 Progress towards the objective is presented in the performance measure below (see table 8.11).

Table 8.11
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
Annual session of the Special Committee on the Charter with the meetings held in person	Annual session of the Special Committee on the Charter with the meetings held in person	Annual session of the Special Committee on the Charter held despite restrictions resulting from the COVID-19 pandemic

Planned results for 2023

Result 1: information relating to international law accessed by more than half a million people

Programme performance in 2021 and target for 2023

- 8.56 The subprogramme’s work contributed to 702,000 individual website end users accessing websites maintained by the subprogramme, which exceeded the planned target of 620,000 individual website end users.
- 8.57 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 8.II).

Figure 8.II
Performance measure: number of individual end users of websites (annual)

(Thousands of users)

Result 2: advancement of the International Law Commission’s study on sea level rise in relation to international law

Programme performance in 2021 and target for 2023

- 8.58 The subprogramme’s work contributed to the preparation of the first study of the Co-Chairs of the International Law Commission Study Group on sea level rise in relation to international law, which focused on implications for the law of the sea, which met the planned target.
- 8.59 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 8.12).

Table 8.12
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	Co-Chairs of the International Law Commission Study Group have access to research material for consideration of the possible protection of persons	Consideration by the International Law Commission of the implications of sea level rise, with a focus on the law of the sea	Advancement in the International Law Commission’s study of issues related to statehood and the protection of persons displaced by sea level rise	Provisional conclusion of the study by the International Law Commission of at least 1 of the focus areas of the implications of sea level rise

Result 3: advancement of the International Law Commission’s consideration of the improvement of its working methods

Proposed programme plan for 2023

8.60 The General Assembly has consistently encouraged the International Law Commission to continue efforts to improve its methods of work. As the secretariat of the Commission, the subprogramme maintains the institutional memory and procedural expertise necessary to advise the Commission on options for revitalizing and improving its working methods.

Lessons learned and planned change

8.61 The lesson for the subprogramme was that the working methods of the Commission benefit from regular review. In applying the lesson, the subprogramme will make proposals to the Commission’s Working Group on Working Methods, including by harnessing information and communication technologies to allow for improved interactions with the Sixth Committee.

8.62 Expected progress towards the objective is presented in the performance measure below (see table 8.13).

Table 8.13
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Consideration of working methods in the International Law Commission Working Group on Working Methods	Consideration of working methods in the International Law Commission Working Group on Working Methods	Consideration of working methods in the International Law Commission Working Group on Working Methods	Adoption of the report of the International Law Commission Working Group on Working Methods (covering 2017–2022)	Formulation of recommendations of the International Law Commission Working Group on Working Methods to improve interaction with the Sixth Committee

Deliverables

8.63 Table 8.14 lists all deliverables of the subprogramme.

C. Substantive deliverables				
Consultation, advice and advocacy: advice to intergovernmental and expert bodies, including the Sixth Committee and the International Law Commission; and provision of technical expertise to the Special Rapporteurs of the International Law Commission, including in relation to reports to the Commission.				
D. Communication deliverables				
Outreach programmes, special events and information materials: lectures and briefings, upon request, on public international law.				
Digital platforms and multimedia content: Sixth Committee, International Law Commission and Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law websites; and online United Nations Audiovisual Library of International Law, which provides high-quality legal content to an unlimited number of individuals and institutions around the world at no charge.				

Subprogramme 4

Law of the sea and ocean affairs

Objective

- 8.64 The objective, to which this subprogramme contributes, is to strengthen the law of the sea for the peaceful use of the oceans and for their conservation and sustainable use, and as the basis for national, regional and global action and cooperation in the marine sector.

Strategy

- 8.65 To contribute to the objective, the subprogramme will:
- (a) Provide expert advice to States and international organizations on the law of the sea and ocean affairs, in particular with respect to the United Nations Convention on the Law of the Sea of 1982, the Agreement for the Implementation of the Provisions of the United Nations Convention on the Law of the Sea of 10 December 1982 relating to the Conservation and Management of Straddling Fish Stocks and Highly Migratory Fish Stocks of 1995 and the work of the General Assembly on oceans and the law of the sea and sustainable fisheries;
 - (b) Support the implementation of the Convention and the United Nations Fish Stocks Agreement in respect of sustainable fisheries-related cooperative activities among States and other entities;
 - (c) Provide secretariat services to intergovernmental bodies and the Commission on the Limits of the Continental Shelf;
 - (d) Undertake capacity-building activities (fellowships, training courses, workshops) related to oceans and the law of the sea in collaboration with relevant stakeholders.
- 8.66 The above-mentioned work is expected to result in:
- (a) An increased number of States parties to the Convention and its implementing agreements and their effective implementation by States;
 - (b) Enhanced cooperation and coordination among stakeholders on ocean and coastal issues leading to enhanced conservation and sustainable use of the oceans and their resources;
 - (c) A better understanding of the legal regime for the oceans and the enhanced human resource capacity of Member States, in particular developing countries, to implement that regime effectively.

Programme performance in 2021

Increased clarity regarding the process and practice concerning deposits under the United Nations Convention on the Law of the Sea

- 8.67 The Convention establishes an obligation for coastal States to deposit with the Secretary-General charts or lists of geographical coordinates, which promotes transparency and legal certainty with respect to sovereignty, sovereign rights and jurisdiction in the oceans and seas. Aiming to assist coastal States in meeting their depository obligation, and in response to a request from the General Assembly (resolution 74/19), the subprogramme published the *Guidelines on Deposit with the Secretary-General of Charts and Lists of Geographical Coordinates of Points under the United Nations Convention on the Law of the Sea* in the six official languages. Those efforts contributed to the achievement, by coastal Member States, of an increase in the total number of their deposits.
- 8.68 Progress towards the objective is presented in the performance measure below (see figure 8.III).

Figure 8.III
Performance measure: coastal Member States' deposits under the United Nations Convention on the Law of the Sea (cumulative)

(Number of deposits)

Planned results for 2023

Result 1: progress in making global fisheries sustainable

Programme performance in 2021 and target for 2023

- 8.69 The subprogramme's work contributed to supporting consultations of States in respect of the resumed Review Conference on the United Nations Fish Stocks Agreement, which did not meet the planned target of countries and regional fisheries management organizations and arrangements receiving and beginning to compile questionnaires regarding the implementation of the recommendations of the Review Conference held in 2016 and countries considering the implementation of an ecosystem approach to fisheries management in the context of the informal consultations of the States parties to the United Nations Fish Stocks Agreement. The target was not met owing to the decision by Member States to postpone (a) the resumed Review Conference on the United Nations Fish Stocks Agreement to 2023; and (b) the fifteenth round of informal consultations of States parties to the United Nations Fish Stocks Agreement to 2022, which was to address the implementation of an ecosystem approach to fisheries management, in the light of the impact of the COVID-19 pandemic.
- 8.70 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 8.15).

Table 8.15
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Countries and regional fisheries management organizations and arrangements continue to review and implement recommendations; the General Assembly decides to hold a new session of the Review Conference in 2021	Countries and regional fisheries management organizations make progress on the preparations for the new session of the Review Conference; Member States have access to a report of the Secretary-General on the impacts of bottom fishing on vulnerable marine ecosystems and the long-term sustainability of deep-sea stocks	Countries and regional fisheries management organizations and arrangements make further progress on the preparations for the new session of the Review Conference	The Review Conference reviews the implementation by States and regional fisheries management organizations and arrangements of the 111 recommendations adopted in 2016 on the basis of a report of the Secretary-General and adopts further recommendations on the enhanced implementation of the United Nations Fish Stocks Agreement, as necessary; the General Assembly undertakes a review on the impacts of bottom fishing on vulnerable marine ecosystems and the long-term sustainability of deep-sea fish stocks	The resumed Review Conference reviews the implementation by States and regional fisheries management organizations and arrangements of the 111 recommendations adopted in 2016 and adopts further recommendations on the enhanced implementation of the United Nations Fish Stocks Agreement, as necessary; the capacity of developing States parties to the United Nations Fish Stocks Agreement to implement its provisions is strengthened through a dedicated capacity-building programme

Result 2: improved capacity for sustainable and integrated ocean governance

Programme performance in 2021 and target for 2023

- 8.71 The subprogramme’s work contributed to assisting States in identifying and meeting their capacity needs in ocean affairs and the law of the sea, including through ocean-related activities to reinforce local ownership and access to new and additional multi-stakeholder training opportunities, and enhancing their capacity needs to respond to emerging issues pertaining to oceans and the law of the sea, which met the planned target.
- 8.72 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 8.16).

Table 8.16
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
States have access to additional training opportunities to improve their capacity to develop and implement national strategies for the development of ocean-based economic sectors within the Convention framework	States have access to new projects and additional technical assistance and virtual training opportunities to enhance their understanding and mitigation of the implications of the COVID-19 pandemic on oceans and the law of the sea, as well as to increase accessibility and knowledge-sharing by a wider audience	States take action, through ocean-related activities, to reinforce local ownership; and States access new and additional multi-stakeholder training opportunities (both in person and online) and enhance their capacity to respond to emerging issues pertaining to oceans and the law of the sea, including by reinforcing local ownership	Improved regional and national capacity to implement the Convention regime and establish and implement ocean governance measures. Improved capacity enables States to establish and implement sustainable and integrated ocean governance measures, including through the adoption or revision of national legislation, policies and mechanisms, and effective and informed participation in relevant international negotiations	Enhanced understanding by States of their capacity-building and technical cooperation needs in ocean affairs and the law of the sea, including through on-demand assistance at the regional and national levels

Result 3: enhanced coordination and cooperation on ocean issues in particular through UN-Oceans

Proposed programme plan for 2023

- 8.73 Addressing the challenges affecting the ocean and its resources today requires increased international coordination and cooperation at all levels. In that regard, strengthening and promoting the coordination and coherence of United Nations system activities related to ocean and coastal areas facilitates the implementation by States of the United Nations Convention on the Law of the Sea and its implementing agreements and of ocean-related goals of the 2030 Agenda for Sustainable Development. To that end, the subprogramme, as focal point for UN-Oceans – the inter-agency mechanism for coordination and cooperation of competent organizations of the United Nations system and the International Seabed Authority – convened a high-level virtual event to take stock of ongoing ocean-related initiatives and to achieve enhanced inter-agency coordination and cooperation on ocean and coastal issues beyond 2020.

Lessons learned and planned change

- 8.74 The lesson for the subprogramme was that, in order to harness synergies and enhance coherence and effectiveness for the benefit of Member States, increased cooperation among competent organizations was needed. In applying the lesson, the subprogramme plans to increase the visibility, frequency and impact of activities undertaken jointly with other organizations, particularly within the framework of

UN-Oceans. As a result, Member States’ awareness and understanding of ocean issues and the need for cooperation and coordination, including at the national level, are expected to increase.

8.75 Expected progress towards the objective is presented in the performance measure below (see table 8.17).

Table 8.17
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
A UN-Oceans contact group is established to facilitate the provision of inputs and guidance to the preparatory phase until the end of the planning phase of the United Nations Decade of Ocean Science for Sustainable Development	Increased awareness by Member States of available initiatives and activities in response and to adapt to the challenges owing to the COVID-19 pandemic following the UN-Oceans virtual high-level event open to States on “Taking stock of ongoing ocean-related initiatives in light of the COVID-19 pandemic: toward enhanced inter-agency coordination and cooperation on ocean and coastal issues beyond 2020”	Increased awareness by Member States of the progress in the implementation of the United Nations Convention on the Law of the Sea and its implementing agreements on the basis of responses by States to a questionnaire on the implementation of Sustainable Development Goal target 14.c	Increased awareness by Member States of collaborative initiatives and activities related to ocean issues of a cross-cutting nature, such as the ocean-climate nexus ^a and marine science	Increased awareness of Member States of the importance of enhanced use by Member States of the UN-Oceans inventory of mandates as a tool for obtaining support from UN-Oceans members

^a General Assembly resolution 76/72, para. 211.

Deliverables

8.76 Table 8.18 lists all deliverables of the subprogramme.

Table 8.18
Subprogramme 4: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	28	21	32	28
1. Reports for the General Assembly on oceans and the law of the sea and on sustainable fisheries	2	2	2	2
2. Report on the work of the Ad Hoc Working Group of the Whole of the General Assembly on the Regular Process for Global Reporting and Assessment of the State of the Marine Environment, including Socioeconomic Aspects	–	2	1	2

30. <i>Law of the Sea Bulletin</i>	3	3	3	3
31. On the law of the sea	1	1	1	1
Technical materials (number of materials)	1	6	1	1
32. Technical materials including in the context of the Regular Process	1	6	1	1

C. Substantive deliverables

Consultation, advice and advocacy: expert advice and programmes of assistance to States and international organizations on the law of the sea and ocean affairs, in particular the United Nations Convention on the Law of the Sea and the United Nations Fish Stocks Agreement; substantive advice to all Member States in relation to the work of the General Assembly and its subsidiary bodies on oceans and the law of the sea and sustainable fisheries; support for the implementation by Member States of the oceans-related Sustainable Development Goals, in particular through UN-Oceans; substantive advice to the 2022 United Nations Ocean Conference and on the implementation of Sustainable Development Goal 14, substantive advice on the implementation of the United Nations Decade of Ocean Science for Sustainable Development and to the Joint Group of Experts on the Scientific Aspects of Marine Environmental Protection; advisory services to the United Nations Environment Assembly of the United Nations Environment Programme, including on marine litter, microplastics and plastic pollution; advice and support to the Co-Chairs of the United Nations Open-ended Informal Consultative Process on Oceans and the Law of the Sea; advice to the United Nations Framework Convention on Climate Change on oceans and climate and advice to the Inter-agency Consultative Group on Small Island Developing States and the Inter-agency Consultative Group for Landlocked Developing Countries, including for the report of the Secretary-General on the follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States; and advisory services to the inter-agency group on protection of refugees and migrants moving by sea.

Databases and substantive digital materials: geographic information system for the deposit of charts and geographical coordinates; and legal web-based information in relation to maritime zones.

D. Communication deliverables

Outreach programmes, special events and information materials: publicly accessible materials, briefings and events to promote a better understanding of the United Nations Convention on the Law of the Sea and the United Nations Fish Stocks Agreement and the work of the General Assembly on oceans and the law of the sea and sustainable fisheries; events for World Oceans Day; and 2 UN-Oceans side events.

Digital platforms and multimedia content: content on the law of the sea and ocean affairs on web portals and websites.

Library services: specialized reference collection and bibliographic database on the law of the sea and ocean affairs.

E. Enabling deliverables

Information and communications technology: specialized geographic information system software packages and related licences, and a repository of geospatial data and information.

^a The postponement of the conference has influenced the planned deliverables.

Subprogramme 5

Progressive harmonization, modernization and unification of the law of international trade

Objective

- 8.77 The objective, to which this subprogramme contributes, is to further the progressive harmonization and unification of the law of international trade.

Strategy

- 8.78 To contribute to the objective, the subprogramme will:
- (a) Serve as the secretariat for UNCITRAL, provide Member States with working papers, draft reports and draft substantive private law rules on international trade, and give advice on and assistance in intergovernmental negotiations and coordinate those activities with equivalent activities of other international organizations in accordance with the UNCITRAL mandate and propose that UNCITRAL recommend the use or adoption of relevant instruments from other organizations;
 - (b) Provide technical assistance and capacity-building to Governments, including diagnostic assessments, implementation guidance and interpretative materials, as well as training activities and advice on the enactment of UNCITRAL texts in national law;
 - (c) Continue to work towards reinforcing the resilience of international trade and global supply chains, with a particular focus on micro-, small and medium-sized enterprises and research and explore possible future legislative development to meet the challenges identified. The work will include research, the exchange of experiences and the submission of reform options to the Member States for consideration.
- 8.79 The above-mentioned work is expected to result in:
- (a) Well-informed, transparent and inclusive deliberations of delegations in working groups and the Commission;
 - (b) Governments agreeing on substantive private law rules governing international trade and their reflection in universally acceptable instruments;
 - (c) The availability of additional instruments to harmonize and unify international trade law;
 - (d) Increased government use and adoption of UNCITRAL instruments in national law and increased legal decisions on those instruments;
 - (e) Increased treaty actions, enactments and legal decisions based on UNCITRAL texts;
 - (f) The availability of additional UNCITRAL instruments to encourage resilience in international trade.

Programme performance in 2021

Expanded capacity to apply and interpret UNCITRAL texts in Latin America and the Caribbean

- 8.80 UNCITRAL texts address legal obstacles to international trade and cross-border commercial transactions by providing substantive rules to govern those transactions and for related domestic legal frameworks. The texts are designed to provide legal certainty for commercial parties, including traders, transport companies, secured lenders and borrowers and professional associations, among others, and legal advisers in such commercial relations must be able to apply the rules in practice.

Ensuring that the texts are uniformly understood and interpreted worldwide is a key element of the harmonization of these substantive rules. Through a regional programme called “UNCITRAL Day”, the subprogramme is building capacity to understand and interpret UNCITRAL texts among the next generation of legal thinkers and policymakers. The UNCITRAL Day programme consists of a regional series of capacity-building events with institutions of higher learning, addressing a selected UNCITRAL subject area. Following the first series in the Asia-Pacific region in 2014, the subprogramme launched the UNCITRAL Latin America and the Caribbean Day in 2020 and further expanded the programme in 2021, which enhanced the capacity of legal practitioners in the region to interpret UNCITRAL texts in the field of commercial arbitration and mediation.

8.81 Progress towards the objective is presented in the performance measure below (see figure 8.IV).

Figure 8.IV
Performance measure: institutions and individuals with increased awareness (capacity) to apply and interpret UNCITRAL texts in the field of commercial arbitration and mediation
 (number of institutions, individuals and countries)

Note: The 2020 and 2021 participation data are extrapolated from information obtained from the participating institutions.

Planned results for 2023

Result 1: reforms to investor-State dispute settlement through development of multiple solutions

Programme performance in 2021 and target for 2023

- 8.82 The subprogramme’s work contributed to UNCITRAL Working Group III having reached consensus on a code of conduct for adjudicators and having developed a workplan to deliver and adopt all reform elements by 2026, which did not meet the planned target of Working Group III continuing to develop reform options and to reach consensus on certain reform elements. The target was not met because the Working Group decided to postpone the submission of two texts, namely, the draft code of conduct with its accompanying commentary, to the Commission in 2023.
- 8.83 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 8.19).

Table 8.19
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Working Group III commences deliberations on possible reform options and on developing a project schedule for reform options in parallel	Working Group III considers multiple reform options	Working Group III reaches consensus on a code of conduct for adjudicators and develops a workplan to deliver and adopt all reform elements by 2026	Working Group III continues to develop reform options and build consensus on the legal instruments to be developed in respect of each option and in respect of the implementation of the overall reform	Working Group III continues to develop additional reform elements and build consensus on the multilateral convention that will deliver the reform

Result 2: greater legal certainty for the use of artificial intelligence and automation in commercial transactions

Programme performance in 2021 and target for 2023

- 8.84 The subprogramme’s work contributed to generating consensus among UNCITRAL member States on referring the topic of artificial intelligence and automation to Working Group IV by preparing a detailed proposal for legislative work ([A/CN.9/1065](#)) that identified the scope of a possible future instrument and the particular policy issues that could be addressed, which met the planned target.
- 8.85 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 8.20).

Table 8.20
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
UNCITRAL member States have access to an appraisal of existing instruments and an initial “taxonomy” of priority topics	UNCITRAL member States have access to a workplan to address legal issues related to the digital economy and a “taxonomy” to guide future work	UNCITRAL member States mandate UNCITRAL Working Group IV to commence work on priority legal issues related to the digital economy and also mandate publication of the “taxonomy” for broader stakeholder engagement	UNCITRAL Working Group IV commences deliberations on priority legal issues related to the digital economy, and the development of a consensus among States through that Working Group on the elements of a sound and harmonized legal and regulatory framework for digital trade and electronic transactions	UNCITRAL member States build consensus on legislative rules and principles that give effect to the elements of a sound and harmonized legal and regulatory framework for digital trade and electronic transactions and identify related topics and issues for further consensus-building

Result 3: a multimodal negotiable transport document for harmonized international trade

Proposed programme plan for 2023

8.86 International trade and economic growth, particularly in developing countries, would benefit from import-export financing for multimodal transport of goods. To advance that area, Member States are embarking on a project in UNCITRAL, with the aim of developing a legal framework for negotiable multimodal transport documents that can be used for financing purposes. The subprogramme has researched related legal issues and started preparatory work towards the development of a new international instrument on negotiable multimodal transport documents.

Lessons learned and planned change

8.87 The lesson for the subprogramme was that introducing negotiable multimodal transport documents raised a wide range of complex legal and practical issues requiring research beyond the legal sphere and engagement with practitioners and relevant organizations to ensure the practicality of a new instrument. In applying the lesson, the subprogramme will coordinate the scope and content of the proposed new legal instrument with the relevant United Nations regional commissions and other organizations.

8.88 Expected progress towards the objective is presented in the performance measure below (see table 8.21).

Table 8.21
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
UNCITRAL member States have access to information on legal issues related to the use of consignment notes	UNCITRAL member States have access to appraisals of legal issues related to the use of consignment notes and similar projects in other organizations	UNCITRAL member States have access to an appraisal of relevant legislation and to expert recommendations, which enables them to develop a draft new instrument on negotiable multimodal transport documents	UNCITRAL member States mandate an UNCITRAL working group to work on a draft instrument on negotiable multimodal transport documents	An UNCITRAL working group commences deliberations on a draft instrument on negotiable multimodal transport documents and on the development of consensus among States through that Working Group on the scope and proposed content of such an instrument

Deliverables

8.89 Table 8.22 lists all deliverables of the subprogramme.

14. Case Law on UNCITRAL Texts (CLOUT) abstracts	10	39	10	81
C. Substantive deliverables				
Consultation, advice and advocacy: expert advice to all Member States, upon request, on international trade law.				
Databases and substantive digital materials: CLOUT (an online database on case law on UNCITRAL texts); Transparency Registry (an online repository for the publication of information and documents in treaty-based investor-State arbitration); and online materials, including presentations on UNCITRAL texts.				
D. Communication deliverables				
Outreach programmes, special events and information materials: brochures, flyers and information kits on UNCITRAL; lectures to groups of legal and other practitioners, academics and law students; colloquiums on international trade law; international commercial law moot court competitions; commemoration events; and international law congresses.				
External and media relations: press releases related to UNCITRAL meetings, accession by States to UNCITRAL texts and issuance of publications.				
Digital platforms and multimedia content: UNCITRAL website.				
Library services: UNCITRAL Law Library.				

Subprogramme 6 Custody, registration and publication of treaties

Objective

- 8.90 The objective, to which this subprogramme contributes, is to ensure the transparency of the international treaty framework, wider knowledge of the law of treaties and broader participation in multilateral treaties concluded under the auspices of the United Nations and deposited with the Secretary-General.

Strategy

- 8.91 To contribute to the objective, the subprogramme will:
- (a) Undertake the registration and publication of approximately 2,000 treaties and treaty actions each year under Article 102 of the Charter and provide timely and accurate information relating to deposited treaties, registered treaties and related actions through the electronic dissemination of treaty-related information on the online United Nations Treaty Collection and the publication of the United Nations *Treaty Series*;
 - (b) Provide legal assistance and advice to States, specialized agencies, United Nations programmes and offices, treaty bodies and other entities on the law of treaties, including final clauses of treaties, the depositary practice of the Secretary-General and the registration and publication of treaties. Such assistance would be provided in particular during the negotiation of multilateral treaties and through the holding of capacity-building seminars at Headquarters and at the national and regional levels, as well as through the elaboration of topical reference publications;
 - (c) Fulfil the depositary functions of the Secretary-General in respect of more than 600 multilateral treaties and hold and conduct treaty events, including during the high-level week of the annual session of the General Assembly.
- 8.92 The above-mentioned work is expected to result in:
- (a) Improved access to treaties deposited with the Secretary-General and related treaty actions, including information on their status, and to treaties and related treaty actions submitted for registration and publication with the Secretariat;
 - (b) The prevention of issues of interpretation and implementation of final clauses of multilateral treaties by contracting States and enhanced familiarity and understanding by States of the technical and legal aspects of participating in the multilateral treaty framework and registering treaties;
 - (c) The entry into force of multilateral treaties deposited with the Secretary-General and the universal participation of States in such treaties.

Programme performance in 2021

States take action on multilateral treaties for the protection of the environment

- 8.93 Over the past four decades, Member States have adopted over 50 international agreements, conventions, protocols and other instruments for the protection of the environment. These include landmark agreements such as the United Nations Framework Convention on Climate Change, the Convention on Biological Diversity and the Paris Agreement. Treaties are a primary source of international environmental law, and their elaboration by Member States, together with widening participation, and effective implementation serve to protect the environment. Subprogramme 6 fulfils the mandate of the Secretary-General as depositary of these multilateral environmental agreements, ensuring adherence to their final clauses and the corresponding requirements of the law of treaties. In 2021, States undertook treaty actions under 25 multilateral treaties on the protection of the environment deposited with the Secretary-General. The subprogramme performed legal analyses of each submission and circulated a total of 78 depositary notifications in English and French, including 33 ratifications, 9 accessions and 25 acceptances, as well as 11 other various treaty actions. The subprogramme communicated the treaty actions undertaken by Member States for the protection of the environment under these multilateral treaties and provided legal advice and technical assistance in relation to depositary practice, upon request, to Member States. Through those actions, Member States gained access to up-to-date and comprehensive information on participation in international environmental agreements deposited with the Secretary-General.
- 8.94 Progress towards the objective is presented in the performance measure below (see figure 8.V).

Figure 8.V
Performance measure: actions undertaken by States on multilateral treaties for the protection of the environment

(cumulative number of treaty actions)

Result 1: modern technology solutions available to Member States to enhance the transparency of the international treaty framework

Programme performance in 2021 and target for 2023

- 8.95 The subprogramme’s work contributed to the development of a prototype of an online treaty registration system to facilitate submissions of treaties for registration, which met the planned target.
- 8.96 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 8.23).

Table 8.23
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Consultations between Member States on outstanding issues regarding the regulations to give effect to Article 102 of the Charter, including on the role of technology in the registration of treaties	The General Assembly encourages the Secretary-General to develop a novel online treaty submission system	Development of a prototype of an online treaty registration system to facilitate submissions of treaties for registration	Further development, in consultation with and on the basis of feedback from Member States, of an online treaty registration system to facilitate submissions of treaties for registration	Continuing development of an online treaty registration system to facilitate submissions of treaties for registration

Result 2: enhanced access to information available to Member States on the United Nations Treaty Collection website

Programme performance in 2021 and target for 2023

- 8.97 The subprogramme’s work contributed to Member States obtaining access to information regarding participation in each multilateral treaty deposited with the Secretary-General through the United Nations Treaty Collection website, which met the planned target.

8.98 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 8.24).

Table 8.24
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	Member States have access to information regarding participation in each multilateral treaty deposited with the Secretary-General, through the United Nations Treaty Collection website	Increased transparency of the international treaty framework and broadening of the participation of States in multilateral treaties deposited with the Secretary-General by providing access to the data dashboard on participation in multilateral treaties	Member States have access to consolidated reports regarding their participation in all multilateral treaties deposited with the Secretary-General through the data dashboard on participation in multilateral treaties

Result 3: enhanced capacity of Member States on treaty law and practice

Proposed programme plan for 2023

8.99 Workshops on treaty law and practice increase the awareness and knowledge of representatives of Member States on issues pertaining to the international treaty framework. These are essential tools for facilitating the work of Member States in joining multilateral treaties deposited with the Secretary-General and registering treaties and treaty actions pursuant to Article 102 of the Charter of the United Nations. The subprogramme organizes capacity-building workshops at Headquarters, as well as at the national and regional levels. However, since 2016, including owing to a lack of funds, workshops at the national and regional levels could not be held. In 2021, by its resolution [76/120](#), the General Assembly invited States and interested organizations and institutions to make voluntary contributions to support the financing of workshops at the national and regional levels, as a complement to workshops held at Headquarters.

Lessons learned and planned change

- 8.100 The lesson for the subprogramme was that in order to allow greater participation in workshops by State officials directly in charge of treaty-related matters, it needed means to respond to requests by Member States for capacity-building at the regional and national levels.
- 8.101 In applying the lesson, the subprogramme will engage Member States and international organizations and institutions with a view to raising voluntary contributions for regional and national workshops to be held in 2023, subject to the availability of voluntary funds, in addition to capacity-building programmes held at United Nations Headquarters.
- 8.102 Expected progress towards the objective is presented in the performance measure below (see table 8.25).

Table 8.25
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Increased knowledge of Member States representatives on treaty law and practice through 2 seminars at United Nations Headquarters	Increased knowledge of Member States representatives on treaty law and practice through 2 seminars at United Nations Headquarters	Increased knowledge of Member States representatives on treaty law and practice through 2 seminars at United Nations Headquarters	Increased knowledge of Member States representatives on treaty law and practice through 2 seminars at United Nations Headquarters	Increased knowledge of Member States representatives on treaty law and practice through 2 seminars at United Nations Headquarters Increased knowledge of Member States representatives on treaty law and practice through additional seminars at the national and regional levels

Deliverables

8.103 Table 8.26 lists all deliverables of the subprogramme.

Table 8.26
Subprogramme 6: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	–	6	–	3
1. Meetings of the Sixth Committee of the General Assembly (informal consultations and plenary meetings)	–	6	–	3
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	2	2	2	2
2. Seminar on treaty law and practice	2	2	2	2
Publications (number of publications)	38	48	38	40
3. United Nations <i>Treaty Series</i> volumes	38	48	38	40

C. Substantive deliverables

Consultation, advice and advocacy: advice to intergovernmental bodies on final clauses and the law of treaties during the negotiations of treaties to be deposited with the Secretary-General; consultation and legal advice concerning the law of treaties, depositary practice and registration of treaties to States, international organizations, secretariats and treaty bodies.

Databases and substantive digital materials: daily online updates of depositary notifications on treaty actions and formalities regarding multilateral treaties deposited with the Secretary-General; original of treaties and certified true copies of treaties deposited with the Secretary-General; certificates of registration and other registration documents regarding treaties and treaty actions registered and filed and recorded by Member States and other entities; and the United Nations Treaty Collection database.

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

D. Communication deliverables

Outreach programmes, special events and information materials: annual treaty event during the opening session of the General Assembly and special treaty events dedicated to a particular treaty deposited with the Secretary-General.

Digital platforms and multimedia content: up-to-date content for the United Nations Treaty Collection website.

E. Enabling deliverables

Legal services: legal advice to and support for United Nations offices, departments and regional commissions on the law of treaties, depositary practice and the registration of treaties.

B. Proposed post and non-post resource requirements for 2023

Overview

8.104 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 8.27 to 8.29.

Table 8.27

Overall: evolution of financial resources by object of expenditure

8.105 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 8.30 to 8.32 and figure 8.VI.

8.106 As reflected in tables 8.30 (1) and 8.31 (1), the overall resources proposed for 2023 amount to \$28,745,100 before recosting, reflecting a net increase of \$551,300 (or 2.0 per cent) compared with the appropriation for 2022. Resource changes result from three factors, namely: (a) technical adjustments; (b) new and expanded mandates; and (c) other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

8.107 As reflected in table 8.30 (1), resource changes reflect a net increase of \$108,100 as follows:

- (a) **Subprogramme 4, Law of the sea and ocean affairs.** The decrease of \$38,400 relates to the removal of non-recurrent provisions under consultants (\$20,800), travel of staff (\$800) and contractual services (\$16,800) to support the work related to (i) sustainable fisheries, including through the 1995 Agreement for the Implementation of the Provisions of the United Nations Convention on the Law of the Sea of 10 December 1982 relating to the Conservation and Management of Straddling Fish Stocks and Highly Migratory Fish Stocks, and related instruments, pursuant to General Assembly resolution [74/18](#); and (ii) the second year of the third cycle of the Regular Process for the period 2021–2025, pursuant to Assembly resolution [75/239](#) on oceans and the law of the sea;
- (b) **Subprogramme 5, Progressive harmonization, modernization and unification of the law of international trade.** The net increase of \$146,500 comprises:
 - (i) An increase of \$159,600 relating to the delayed impact of three temporary posts (1 P-3, 1 P-2 and 1 General Service (Other level)) to provide additional secretariat services to Working Group III of UNCITRAL from 2022 to 2025 as called for in General Assembly resolution [76/229](#). The posts were subject to a 50 per cent vacancy rate in accordance with the established practice;
 - (ii) A decrease of \$13,100 under furniture and equipment reflecting the removal of non-recurrent provisions for the acquisition of furniture and information and communications technology equipment for the above-mentioned new posts.

New and expanded mandates

8.108 As reflected in table 8.30 (1), resource changes reflect an increase of \$443,200 under subprogramme 4, Law of the sea and ocean affairs, which would provide for (a) the travel of regional experts

(\$361,700); (b) communications and audiovisual services under general operating expenses (\$2,900); and (c) the acquisition of software and licences under furniture and equipment (\$56,600). The resources would support the third year of the third cycle of the Regular Process, pursuant to General Assembly resolution [75/239](#). In addition, a non-recurrent amount of \$22,000 is proposed for consultancy services to support the analysis of relevant technical and scientific issues to assist the Review Conference on the Agreement for the Implementation of the Provisions of the United Nations Convention on the Law of the Sea of 10 December 1982 relating to the Conservation and Management of Straddling Fish Stocks and Highly Migratory Fish Stocks, and related instruments in discharging its mandate pursuant to Assembly resolution [76/71](#).

Other changes

- 8.109 As reflected in table 8.30 (1), the net effect of the proposed changes is cost-neutral. The breakdown of changes is as follows:
- (a) **Executive direction and management.** The increase of \$385,100 under posts relates to the proposed inward redeployment of one D-1 post from subprogramme 3 and one P-2 post from subprogramme 6 (see annex II);
 - (b) **Subprogramme 3, Progressive development and codification of international law.** The decrease of \$246,200 under posts reflects the outward redeployment of one D-1 post to executive direction and management (see annex II);
 - (c) **Subprogramme 6, Custody, registration and publication of treaties.** The decrease of \$138,900 under posts reflects the proposed outward redeployment of one P-2 post to executive direction and management (see annex II).

Other assessed and extrabudgetary resources

- 8.110 As reflected in tables 8.30 (2) and 8.31 (2), projected other assessed resources for 2023 of \$4,714,900, including 19 posts, would be utilized to support the activities of the Office of Legal Affairs in relation to peacekeeping activities (\$4,505,100) and the International Residual Mechanism for Criminal Tribunals (\$209,800). The proposal reflects a decrease of \$155,300 compared with the estimate for 2022, which relates mainly to the updated standard salary costs, as reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2022 to 30 June 2023 ([A/76/725](#)). Other assessed resources represent 10.7 per cent of the total resources of the Office of Legal Affairs.
- 8.111 As reflected in tables 8.30 (3) and 8.31 (3), the Office of Legal Affairs expects to continue to receive both cash and in-kind contributions, which would complement regular budget resources. In 2023, extrabudgetary resources are estimated at \$10,593,200 and would provide for 34 posts, as presented in table 8.31 (3). The resources would be used mainly to support the Office in providing legal advice and assistance to facilitate the implementation of substantive mandates and to protect the legal interests and minimize the legal liabilities of the United Nations, including, but not limited to, with regard to: (a) providing legal support and assistance in response to requests made by principal and subsidiary organs of the United Nations; (b) conducting international law training and dissemination under the United Nations Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law; (c) promoting and strengthening the law of the sea for the peaceful use of the oceans and sustainable development; and (d) providing support for the progressive improvement, harmonization, understanding, knowledge, interpretation and application of international trade law and for the coordination of the work of international organizations active in that field. Extrabudgetary resources represent 24.0 per cent of the total resources of the Office of Legal Affairs.
- 8.112 Anticipated in-kind contributions with an estimated value of \$384,100 will provide for: (a) donated right-to-use arrangements under a memorandum of understanding between the United Nations, the Ministry of Justice of the Republic of Korea and the city of Incheon regarding the operation of and

financial contributions to the UNCITRAL Regional Centre for Asia and the Pacific (\$42,800); (b) other services, such as expert advice from two legal experts, for the Regional Centre for Asia and the Pacific (\$119,200); and (c) technical assistance, administrative support and other services as a contribution for the World Oceans Day event (\$222,100).

- 8.113 The extrabudgetary resources under this section are subject to the oversight of the Office of Legal Affairs, which has delegated authority from the Secretary-General.

Policymaking organs

- 8.114 The resources proposed under this component would provide for requirements relating to standing intergovernmental organs and expert bodies. Table 8.33 provides information on the standing intergovernmental organs and related resource requirements under the regular budget.

Table 8.33
Policymaking organs

(Thousands of United States dollars)

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2022 appropriation</i>	<i>2023 estimate (before recosting)</i>
International Law Commission	Pursuant to Article 13, paragraph 1 (a), of the Charter, the General Assembly, by its resolution 174 (II), established the International Law Commission and approved its statute (see resolution 174 (II), annex, as amended by resolutions 485 (V), 984 (X), 985 (X) and 36/39). The Commission has as its objective the promotion of the progressive development of international law and its codification. The Commission holds an annual session in Geneva of 10 to 12 weeks' duration and reports to the Assembly, which provides guidance to the Commission on its programme of work through annual resolutions on the reports of the Commission. Since 2000, as mandated by the Assembly, the Commission has held split annual sessions up to a total of 12 weeks. The length of the session is recommended by the Commission at its previous session and approved by the Assembly. The Codification Division of the Office of Legal Affairs provides the substantive servicing of the Commission.	Mandate: Article 13 (1) (a) of the Charter Membership: 34 experts in international law Number of sessions in 2023: 1 session	1 755.4	1 755.4
UNCITRAL	UNCITRAL is mandated, pursuant to Assembly resolution 2205 (XXI), to further the progressive harmonization and modernization of the law of international trade, which corresponds to subprogramme 5. The Commission carries out its tasks, with the assistance of the International Trade Law Division as its secretariat, in one annual meeting of up to four weeks' duration and in 6 working group meetings on specialized topics of up to 13 weeks' duration per year.	Mandate: Assembly resolution 2205 (XXI) Membership: 70 Member States Number of sessions in 2023: 1	133.5	133.5
Total			1 888.9	1 888.9

8.115 The proposed regular budget resources for 2023 amount to \$1,888,900 and reflect no change compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 8.34 and figure 8.VII.

(Thousands of United States dollars)

Executive direction and management

8.116 The executive direction and management component comprises the Office of the Under-Secretary-General for Legal Affairs and the Evaluation and Strategic Planning Unit. The component is responsible for the following functions:

- (a) Providing the overall policy direction, supervision, administration and management of the Office of Legal Affairs;
- (b) Representing the Secretary-General at meetings and conferences of a legal nature and in judicial and arbitral proceedings, certifying legal instruments issued on behalf of the United Nations, convening meetings of the legal advisers of the United Nations system and representing the Organization at such meetings;
- (c) Monitoring the resources of the Office to address the changing organizational needs and workload and to improve the Office’s management systems;

- (d) Formulating recommendations to the Secretary-General in interdepartmental and inter-agency bodies, supporting the coordination of the United Nations Legal Advisers Network and providing legal advice to high-level inter-agency bodies;
- (e) Ensuring the consistent monitoring and self-evaluation of subprogrammes and supporting subprogrammes with the identification, development and review of monitoring and self-evaluation methodologies and practices;
- (f) Coordinating the working groups on monitoring and evaluation and on the Sustainable Development Goals within the Office of Legal Affairs;
- (g) Acting as the focal point for information on all aspects of the work of the Office of Legal Affairs, including with regard to all capacity-building activities coordinated by the Office, coordinating interdepartmental activities and consulting and negotiating with other departments, offices, subsidiary bodies and related agencies of the United Nations system on matters of mutual concern.

8.117 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Office integrates environmental management practices into its operations. This includes decreasing its greenhouse gas by: (a) encouraging the use of videoconference facilities for interviews and meetings; (b) reducing print services and ensuring that all printers are set to double-sided printing; and (c) encouraging staff to turn off computers and monitors at the end of the workday.

8.118 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 8.35. The timeliness of booking of air travel was impacted by the COVID-19 pandemic outbreak. Compliance rates are monitored, and statistics and trends are distributed to managers.

Air tickets purchased at least 2 weeks before the commencement of travel	79	72	67	100	100

8.119 The proposed regular budget resources for 2023 amount to \$1,560,000 and reflect an increase of \$385,100 compared with the appropriation for 2022. The proposed increase is explained in paragraph 8.109 (a). Additional details on the distribution of the proposed resources for 2023 are reflected in table 8.36 and figure 8.VIII.

Table 8.36

Figure 8.VIII
Executive direction and management: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed and extrabudgetary resources

8.120 Other assessed resources for the component are estimated at \$115,800 and would provide for non-post resources to support peacekeeping operations. In the context of peacekeeping operations, the Office provides legal support and assistance to facilitate the implementation of substantive mandates and to protect the legal interests and minimize the legal liabilities of the United Nations. The net increase of \$2,500 reflects mainly additional planned trips to the field operations for the Legal Counsel and updated salary costs for general temporary assistance positions, as reflected in the budget for the support account for peacekeeping operations for the period from 1 July 2022 to 30 June 2023 (A/76/725).

8.121 Extrabudgetary resources for the component are estimated at \$462,900 and would provide for two posts (1 P-4 and 1 P-3), as well as non-post resources, to support the Evaluation and Strategic Planning Unit in its monitoring and evaluation functions. The resources would be used mainly to

strengthen the Office’s self-evaluation efforts, including through the incorporation of the United Nations Evaluation Group standards and best practices, based on the evaluation policy adopted in 2020. The resources would also be used to support the implementation of the Office’s programmes and processes, including on trust fund management, the coordination of programme activities and the submission of progress reports. The expected decrease of \$ 1,700 is due to the removal of a non-recurrent provision for furniture and equipment.

Programme of work

Subprogramme 1

Provision of legal services to the United Nations system as a whole

8.122 The proposed regular budget resources for 2023 amount to \$1,953,800 and reflect no change compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 8.37 and figure 8.IX.

Figure 8.IX

Subprogramme 1: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed and extrabudgetary resources

- 8.123 Other assessed resources for the subprogramme are estimated at \$1,500,900 and would provide for six posts (1 P-5, 3 P-4, 1 P-2/1 and 1 General Service (Other level)), as well as non-post resources, to support peacekeeping operations and the International Residual Mechanism for Criminal Tribunals. The resources would be used mainly to provide legal advice and assistance on a wide range of operational and support matters, including: advice on the interpretation and implementation of mandates, including the application of rules of engagement and other directives on the use of force; legal advice relating to human rights, international humanitarian law and international criminal law; legal arrangements with host Governments and contributing Governments, including privileges and immunities; and legal arrangements with other international organizations and partners. The expected decrease of \$39,900 is due mainly to updated standard salary costs, as reflected in the budget for the support account for peacekeeping operations for the period from 1 July 2022 to 30 June 2023 (A/76/725).
- 8.124 Extrabudgetary resources for the subprogramme are estimated at \$1,701,000 and would provide for six posts (1 D-1, 4 P-3 and 1 P-2/1), as well as non-post resources that would provide centralized legal support and assistance to facilitate the implementation of substantive mandates, protect the legal interests and minimize the legal liabilities of the United Nations. The resources would be used mainly to provide legal support to the Development Coordination Office, the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) and United Nations entities in cooperation with the International Criminal Court, in accordance with the Relationship Agreement between the United Nations and the International Criminal Court. The estimated decrease of \$3,400 is due to the removal of non-recurrent provisions for furniture and equipment.

**Subprogramme 2
General legal services provided to United Nations organs and programmes**

- 8.125 The proposed regular budget resources for 2023 amount to \$3,775,200 and reflect no change compared with the appropriation for 2022. Additional details on the distribution of proposed resources for 2023 are reflected in table 8.38 and figure 8.X.

(Number of posts/thousands of United States dollars)

Other assessed and extrabudgetary resources

8.126 Other assessed resources for the subprogramme are estimated at \$3,098,200 and would provide for 13 posts (4 P-5, 6 P-4, 2 P-3 and 1 General Service (Other level)), as well as non-post resources, to support peacekeeping operations. The resources would be used mainly to provide legal advice and assistance on the interpretation and application of United Nations regulations, rules and policies; represent the Secretary-General before the United Nations Appeals Tribunal in cases and provide advice on the administrative law of the Organization; provide advice on procurement activities and on the preparation and negotiation of contracts for the acquisition of goods or services for United Nations operations; assist in the resolution of disputes and claims arising from operational activities of the Organization; provide advice on the Organization’s accountability measures in relation to both internal sanctions and external enforcement actions against United Nations officials, experts on

mission and third parties for fraud, corruption and other wrongdoing; and provide advice on development, technical and humanitarian assistance activities, including partnerships with the private sector. The expected decrease of \$117,900 is due mainly to updated standard salary costs, as reflected in the budget for the support account for peacekeeping operations for the period from 1 July 2022 to 30 June 2023 (A/76/725).

- 8.127 Extrabudgetary resources for the subprogramme are estimated at \$3,031,400 and would provide for 13 posts (1 D-1, 1 P-5, 5 P-4, 2 P-3, 1 P-2/1 and 3 General Service (Other level)), as well as non-post resources. The resources would be used mainly to provide legal assistance in response to requests made by principal and subsidiary organs of the United Nations, including offices and departments at Headquarters, and United Nations funds, programmes and regional commissions. The expected decrease of \$228,000 is due mainly to the removal of resources for general temporary assistance not required for 2023.

Subprogramme 3 Progressive development and codification of international law

- 8.128 The proposed regular budget resources for 2023 amount to \$4,271,900 and reflect a decrease of \$246,200 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 8.109 (b). Additional details on the distribution of the proposed resources for 2023 are reflected in table 8.39 and figure 8.XI.

Table 8.39

 (Number of posts/thousands of United States dollars)

Extrabudgetary resources

8.129 Extrabudgetary resources for the subprogramme are estimated at \$103,500 under non-post resources and would be used mainly to prepare the *Repertory of Practice of United Nations Organs*, address the backlog relating to the *Yearbook of the International Law Commission* and supplement the efforts of the subprogramme to meet the increasing demand for international law training and dissemination under the United Nations Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law. This would include the conduct of off-site recordings for the United Nations Audiovisual Library of International Law in various regions in order to expand the geographical representation and multilingualism of the Lecture Series, the provision of additional fellowships to participate in the training programmes, and the update and dissemination of the *International Law Handbook: Collection of Instruments* and the *Recueil de droit international: Collection d'instruments*. The expected decrease of \$214,700 is due mainly to the projected implementation of the main stages of the modernization of the United Nations Audiovisual Library of International Law in 2022.

**Subprogramme 4
 Law of the sea and ocean affairs**

8.130 The proposed regular budget resources for 2023 amount to \$7,450,100 and reflect an increase of \$404,800 compared with the appropriation for 2022. The proposed increase is explained in paragraphs 8.107 (a) and 8.108. Additional details on the distribution of proposed resources for 2023 are reflected in table 8.40 and figure 8.XII.

Table 8.40

Figure 8.XII
Subprogramme 4: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

8.131 Extrabudgetary resources for the subprogramme are estimated at \$3,476,100 and would provide for three posts (1 P-5, 1 P-2 and 1 General Service (Other level)), as well as non-post resources, to support the subprogramme’s capacity-building activities (fellowships and training courses), technical cooperation programmes to provide assistance to developing States in the implementation of the United Nations Convention on the Law of the Sea and the 1995 Fish Stocks Agreement. The resources would also be used to provide for the participation of developing States in ocean-related work of the General Assembly, related global and regional processes and the work of the Commission on the Limits of the Continental Shelf. The resources would allow the subprogramme to continue to implement a number of capacity-building activities and technical cooperation projects, including the programmes of assistance to meet the strategic capacity needs of developing States in the field of ocean governance and the law of the sea, and would provide for non-post resources, including for

14 consultancies, the Hamilton Shirley Amerasinghe Memorial Fellowship on the Law of the Sea and the United Nations-Nippon Foundation of Japan Fellowship Programme for Human Resources Development and Advancement of the Legal Order of the World's Oceans. The estimated decrease of \$651,700 is due mainly to reduced requirements for meetings (travel of experts) such as the intergovernmental conference on an international legally binding instrument under the United Nations Convention on the Law of the Sea on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction and capacity-building programmes for developing countries, including national and regional trainings in activities related to ocean and coastal areas under programmes of assistance to meet the strategic capacity needs of developing States in the field of ocean governance and the law of the sea.

Subprogramme 5 **Progressive harmonization, modernization and unification of the law of international trade**

8.132 The proposed regular budget resources for 2023 amount to \$3,494,900 and reflect an increase of \$146,500 compared with the appropriation for 2022. The proposed increase is explained in paragraph 8.107 (b). Additional details on the distribution of proposed resources for 2023 are reflected in table 8.41 and figure 8.XIII.

Table 8.41

Total		22	–	–	–	–	–	22	

Figure 8.XIII
Subprogramme 5: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

8.133 Extrabudgetary resources for the subprogramme are estimated at \$1,370,305 and would provide for seven posts (2 P-4, 1 P-3, 1 P-2/1, 1 General Service (Other level) and 2 General Service (Local level)), as well as non-post resources. The resources would be used mainly to support the Office of Legal Affairs in ensuring the participation of developing States in UNCITRAL sessions; to operate the Regional Centre for Asia and the Pacific; to manage the Transparency Registry (an online repository for the publication of information and documents in treaty-based investor-State arbitration); and to complement the regular budget resources on the implementation of various activities under the subprogramme. These activities include raising awareness and promoting the effective understanding, adoption and use of UNCITRAL texts; providing advice and assistance to States on the adoption and use of those texts; and building capacity to support their effective use, implementation and uniform interpretation, including through training activities and e-learning modules on UNCITRAL and its texts. The decrease of \$22,400 is due mainly to reduced requirements for general temporary assistance resources.

**Subprogramme 6
 Custody, registration and publication of treaties**

8.134 The proposed regular budget resources for 2023 amount to \$3,419,700 and reflect a decrease of 138,900 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 8.109 (c). Additional details on the distribution of proposed resources for 2023 are reflected in table 8.42 and figure 8.XIV.

Table 8.42

Figure 8.XIV
Subprogramme 6: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

8.135 Extrabudgetary resources for the subprogramme are estimated at \$213,000 and would provide for one P-3 post as well as non-post resources. The resources would be used to support the Treaty Section to meet the increasing demand in the electronic management of treaties submitted for custody, registration and publication by States, international organizations and the United Nations, including all agreements concluded by the Organization for the implementation of voluntary funded activities. The estimated decrease of \$1,700 is due to the removal of a non-recurrent provision for furniture and equipment.

Programme support

8.136 The component comprises the Executive Office, which provides administrative services to the Office of Legal Affairs and policymaking organs, including on human resources, budgetary and financial administration and resource planning.

8.137 The proposed regular budget resources for 2023 amount to \$930,600 and reflect no change compared with the appropriation for 2022. Additional details on the distribution of proposed resources for 2023 are reflected in table 8.43 and figure 8.XV.

Table 8.43

Figure 8.XV
Programme support: distribution of proposed resources for 2023 (before recosting)
 (Number of posts/thousands of United States dollars)

Extrabudgetary resources

- 8.138 Extrabudgetary resources for the component are estimated at \$235,000 and would provide for two posts (2 General Service (Other level)), as well as non-post resources. The resources would support the various administrative functions, including the provision of financial services, human resources management and administrative support related to extrabudgetary activities funded through various trust funds. Associated activities include the administration of personnel and fellowship programmes funded by the Nippon Foundation, travel arrangements, the procurement of goods and services and the review of voluntary contributions in kind.

II. Independent Investigative Mechanism for Myanmar

Foreword

In 2023, the Independent Investigative Mechanism for Myanmar plans to expand its efforts to collect and analyse evidence of the most serious crimes committed in Myanmar since 2011, using technologies in innovative ways and prioritizing the collection of testimonies from those with direct knowledge of events.

The dynamic situation following the February 2021 military takeover in Myanmar required the Mechanism to expand its operational activities in order to address the increasing allegations of serious international crimes and to collect submissions of information and evidence from myriad sources. The Mechanism will continue to use innovative methods and technology to meet the challenges of its mandate in order to assure accountability for the serious crimes inflicted upon the people of Myanmar.

The Mechanism will continue in 2023 to develop its electronic information management system to collect, preserve and process information and evidence; expand its analysis of information and evidence using specialized technological tools; and advance the preparation of evidence and analysis for sharing with national, regional and international courts. The Mechanism will also continue to investigate sexual and gender-based crimes and crimes against children and will increasingly collect and analyse open-source and financial information as an integral part of its investigations into serious international crimes within its mandate and use all available communication channels to better inform victims and the people of Myanmar of its purpose and strategies.

(Signed) Nicholas **Koumjian**
Head of the Independent Investigative Mechanism for Myanmar

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 8.139 The Independent Investigative Mechanism for Myanmar is mandated to collect, consolidate, preserve and analyse evidence of the most serious international crimes and violations of international law committed in Myanmar since 2011 and prepare files that can be shared with national, regional or international courts or tribunals to facilitate fair and independent criminal proceedings. The mandate derives from Human Rights Council resolutions [39/2](#), [42/3](#), [43/26](#), [46/21](#) and [47/1](#) and further encourages cooperation with the International Criminal Court and the International Court of Justice. The mandate is further elaborated in the Mechanism's terms of reference ([A/73/716](#)).
- 8.140 The creation of the Mechanism was welcomed by the General Assembly in its resolution [73/264](#). The Assembly, in its resolutions [75/238](#) and [76/180](#), called upon the United Nations to ensure that the Mechanism was afforded the flexibility that it needed in terms of staffing, location and operational freedom so that it could deliver as effectively as possible on its mandate.

Programme of work

Objective

- 8.141 The objective, to which the Mechanism contributes, is to ensure accountability of perpetrators and justice for victims of the most serious international crimes and violations of international law committed in Myanmar since 2011.

Strategy and external factors for 2023

- 8.142 To contribute to the objective, the Mechanism will:
- (a) Collect and analyse information regarding crimes within its mandate, including by undertaking in-person investigative missions;
 - (b) Pursue cooperation with national authorities and information providers and seek to establish relationships with those who can provide support services to victims and witnesses. Based on the evidence collected, the Mechanism will prepare case files in relation to the individuals responsible for those crimes;
 - (c) Develop and maintain a secure electronic information management system that can protect against evolving cybersecurity threats and facilitate the analysis of vast quantities of information, including social media data and testimonial, photographic and video evidence;
 - (d) Share information with national, regional or international courts or tribunals in accordance with its mandate and cooperate with any ongoing or future proceedings by such courts or tribunals, including the International Criminal Court and the International Court of Justice;
 - (e) Engage in outreach to explain its mandate, strategies and outputs to relevant stakeholders, in particular to victims and witnesses, using various communication tools, including its website, social media and periodic bulletins, in English and in the languages used in Myanmar.
- 8.143 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of its programme owing to the coronavirus disease (COVID-19) pandemic. Examples of lessons learned and best practices include greater

emphasis on open-source investigations and the use of secure electronic communication in lieu of travel for most meetings with interlocutors and to identify and contact potential information sources. The Mechanism will continue to use virtual means to maintain dialogue with key stakeholders. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objective, strategies and mandates and would be reported as part of the programme performance information.

- 8.144 The above-mentioned work is expected to result in:
- (a) The collection and preservation of information that can be shared with national, regional or international courts or tribunals in relation to the most serious international crimes and violations of international law committed in Myanmar since 2011;
 - (b) The initiation of fair and independent criminal proceedings in national, regional or international courts or tribunals in relation to the aforementioned crimes;
 - (c) Greater understanding of the Mechanism's mandate, work and expected results by all relevant stakeholders, including victims and the general public, in particular inside Myanmar.
- 8.145 With regard to the external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) Relevant Member States will permit the Mechanism to conduct evidence collection and victim outreach activities within their territories;
 - (b) National, regional or international tribunals or courts will seek to exercise jurisdiction over the crimes within the Mechanism's mandate and the relevant authorities will continue to request the sharing of information from the Mechanism.
- 8.146 With regard to cooperation with other entities at the global, regional, national and local levels, the Mechanism continues to engage with a diverse range of actors, including Member States, individuals, civil society organizations and business enterprises, to seek relevant information and ensure support for its mandate. The cooperation of Member States remains particularly important for the Mechanism's investigative activities, including permission to access crime sites and interview witnesses on their territory.
- 8.147 With regard to inter-agency coordination and liaison, the Mechanism continues to consult with international courts and other international accountability mechanisms, in particular in the areas of legal and judicial cooperation, information technology systems, witness protection and support, and training. The Mechanism also continues to cooperate with other United Nations entities working on issues relating to Myanmar.
- 8.148 The Mechanism integrates a gender perspective into its policies and activities. The Mechanism will continue its focus on sexual and gender-based crimes and crimes against children, including appropriate access to protection and support measures for victims.

Evaluation activities

- 8.149 The evaluation of the effectiveness of the Mechanism's strategy for collecting evidence, completed in 2021, has guided the programme plan for 2023.
- 8.150 The results and lessons of the evaluation referenced above have been taken into account for the programme plan for 2023, as reflected in results 1 and 3. For example, the Mechanism has streamlined the processes and methodologies for the collection of information through open sources and is diversifying ways to access and interview witnesses to maximize the admissibility and usefulness of the statements in legal proceedings.
- 8.151 The following evaluations are planned for 2023:

- (a) Evaluation on the methodology and processes for collecting witness statements;
- (b) Evaluation on the effectiveness of policies and procedures on information systems and information management.

Programme performance in 2021

Increased and diversified evidentiary sources of information on alleged crimes and violations of international law

- 8.152 The events following the military takeover of 1 February 2021 in Myanmar gave rise to reports of alleged crimes within the Mechanism’s mandate, including widespread instances of arbitrary arrest, torture, enforced disappearance, extrajudicial killing and use of force against peaceful protestors. In response, the Mechanism strategically utilized its public platforms to encourage persons and entities with relevant information to share such evidence with the Mechanism. In addition, the Mechanism used its enhanced open-source investigations capacity to identify persons and entities with potentially valuable information. The Mechanism’s work contributed to an increase in the number of sources. In 2021, the Mechanism actively engaged with 71 sources, including individuals, civil society organizations, businesses, victims and witnesses providing information and evidence to the Mechanism. In addition, following its public outreach, the Mechanism received over 210,000 information items (videos, photographs and documents) from 8,349 individuals and entities after the February military takeover.
- 8.153 Progress towards the objective is presented in the performance measure below (see figure 8.XVI).

Figure 8.XVI

Performance measure: number of sources actively engaged (annual)

Impact of the pandemic

- 8.154 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates; in particular, the Mechanism postponed investigative, diplomatic and outreach missions, slowing progress on in-person data collection and interviews of witnesses; the negotiation of cooperation frameworks with Member States; and the facilitation of greater understanding of the Mechanism’s work. Whenever possible, the Mechanism used remote communications instead of in-person engagements, ensuring that such communications were conducted in a safe and secure manner and that any sensitive information exchanged remained confidential.

Planned results for 2023

Result 1: collection and consolidation of information, documentation and evidence of serious international crimes and violations of international law committed in Myanmar since 2011

Programme performance in 2021 and target for 2023

- 8.155 The Mechanism's work contributed to the processing of 1,389,593 information items (3,062 gigabytes) pertaining to serious international crimes committed in Myanmar since 2011, which exceeded the planned target of 813,300 information items (320 gigabytes).
- 8.156 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 8.XVII).

Figure 8.XVII

Performance measure: number and volume of information items processed for potential sharing (annual)

(Number of items and gigabytes)

Result 2: availability of evidence packs and analytical documents for sharing with relevant entities

Programme performance in 2021 and target for 2023

- 8.157 The Mechanism's work contributed to the availability of 38 evidence packs and analytical documents for sharing with relevant entities, which exceeded the planned target of 13 evidence packs and analytical documents.
- 8.158 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure XVIII).

Figure 8.XVIII

Performance measure: number of evidence packs and analytical documents available for sharing (annual)

Result 3: increased access to evidence with broadest possible admissibility in national, regional and international courts

Proposed programme plan for 2023

- 8.159 Building case files that will stand up to scrutiny in a criminal trial is a complex and often lengthy process, as all elements must be proven to the high standards required for criminal cases. The Mechanism has been scaling up efforts to take detailed signed statements from witnesses who have first-hand information and documentation regarding the commission of the crimes in a manner that will ensure the broadest possible admissibility in national, regional and international criminal proceedings.

Lessons learned and planned change

- 8.160 The lesson for the Mechanism was that it must adopt flexible methods and processes for accessing and interviewing witnesses, victims and other individuals in order to collect evidence with forensic value but without sacrificing the standards and integrity of the procedures by which it is collected. In applying the lesson, the Mechanism will increase the screening and interviewing of witnesses and other individuals of interest in different locations, subject to cooperation by Member States. The Mechanism will endeavour to conduct such screenings and interviews in person to ensure the integrity and forensic value of the statements. When in-person interviews are not possible because of travel or other restrictions, remote methods will also be utilized, in line with confidentiality and information security requirements.
- 8.161 Expected progress towards the objective is presented in the performance measure below (see figure 8.XIX).

Figure 8.XIX
Performance measure: number of screening notes and witness statements available for sharing (cumulative)

Legislative mandates

8.162 The list below provides all mandates entrusted to the Mechanism.

General Assembly resolutions

73/264	Situation of human rights in Myanmar	75/287	The situation in Myanmar
74/246 ; 75/238 ; 76/180	Situation of human rights of Rohingya Muslims and other minorities in Myanmar		

Human Rights Council resolutions

39/2 ; 42/3 ; 47/1	Situation of human rights of Rohingya Muslims and other minorities in Myanmar	43/26 ; 46/21	Situation of human rights in Myanmar

9. Compilation of information and evidence of international crimes	10	20	10	15
10. Compilation of analysis of evidence of international crimes	3	18	5	15
11. Screening notes and witness statements	–	45	–	60
Fact-finding, monitoring and investigation missions (number of missions)	9	–	4	5
12. Investigation missions to identify and meet information providers and witnesses and collect evidence	9	–	4	5
C. Substantive deliverables				
Consultation, advice and advocacy: consultations and cooperation with more than 50 entities, including Member States and civil society organizations, about the Mechanism.				
Databases and substantive digital materials: database to consolidate, organize, preserve, verify and analyse relevant information and evidence.				
D. Communication deliverables				
Outreach programmes, special events and information materials: conferences with relevant stakeholders and civil society organizations on the Mechanism’s mandate and activities; information materials, periodic bulletins, and other material about the Mechanism’s work, tailored to specific audiences in the languages used in Myanmar.				
External and media relations: press conferences and media interviews; panels and events; and briefings to the diplomatic and academic communities on progress of the Mechanism’s work.				
Digital platforms and multimedia content: the Mechanism’s website and social media.				

B. Proposed post and non-post resource requirements for 2023

Overview

8.164 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 8.45 to 8.47.

Table 8.45

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Total	55	–	–	–	–	55

8.165 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 8.48 to 8.50 and figure 8.XX.

8.166 As reflected in tables 8.48 (1) and 8.49 (1), the overall resources proposed for 2023 amount to \$12,933,400 before recosting, reflecting an increase of \$74,700 compared with the appropriation for 2022. Resource changes result from technical adjustments. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Figure 8.XX
Distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor

Overall resource changes

Technical adjustments

8.167 As reflected in table 8.48 (1), resource changes reflect an increase of \$74,700 under other staff costs related to the delayed impact of the reassignment of one Finance and Budget Officer (P-3) as an Administrative Officer (P-3) that was approved pursuant to General Assembly resolution [76/245](#) and was subject to a 50 per cent vacancy rate in accordance with the established practice.

Extrabudgetary resources

8.168 As reflected in tables 8.48 (2) and 8.49 (2), the Mechanism expects to continue to receive cash contributions, which would complement regular budget resources. In 2023, extrabudgetary resources are estimated at \$2,083,900.

8.169 The resources would be used mainly to enhance the Mechanism’s investigative capacity, including through the recruitment of personnel with highly specialized expertise, the procurement of specialized technology, including social media discovery and preservation software, video and image analysis tools, evidence mapping tools and subscriptions to different information services, and the establishment of a regular forum for the Mechanism to engage with civil society organizations, including victims’ groups, on the work of the Mechanism. The estimated decrease of \$120,000 reflects the anticipated income, based on contribution agreements with donors. Extrabudgetary resources represent 13.9 per cent of the total resources for the Mechanism.

8.170 The extrabudgetary resources under this section are subject to the oversight of the Mechanism, which has delegated authority from the Secretary-General.

8.171 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), the Mechanism is integrating environmental management practices into

its operations. For example, the Mechanism continues to minimize energy consumption at its facilities, where it installed special external walls with thermal insulation panels to reduce the dispersion of heat, thermal windows with energy-efficient features designed to resist the loss of heat and cold, light emitting diode lights in all office and common areas, as well as a heating, ventilation and air conditioning system with thermostats in all offices and common areas to enable better control of the system.

8.172 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 8.51. The Mechanism will continue its efforts to enhance the rate of travel compliance through more frequent monitoring of compliance with advance booking requirements for air travel and by bringing up the issue in the monthly resources updates provided to management.

Table 8.51
Compliance rate
 (Percentage)

	<i>Actual 2019</i>	<i>Actual 2020</i>	<i>Actual 2021</i>	<i>Planned 2022</i>	<i>Planned 2023</i>

III. International, Impartial and Independent Mechanism to Assist in the Investigation and Prosecution of Persons Responsible for the Most Serious Crimes under International Law Committed in the Syrian Arab Republic since March 2011

Foreword

In 2023, the International, Impartial and Independent Mechanism will continue to advance the implementation of its mandate to assist in the investigation and prosecution of the most serious crimes under international law committed in the Syrian Arab Republic since March 2011. The Mechanism will continue to conclude cooperation frameworks with information and evidence providers and increase the size and searchability of its central repository of information and evidence.

The analytical work that the Mechanism develops as part of its multiple lines of inquiry not only advances its structural investigation and case files but continues to be increasingly responsive to the growing number of requests for assistance it receives from competent jurisdictions.

The Mechanism will continue to leverage new technologies to develop its capacity to preserve and process information and evidence, improve the accessibility and searchability of such materials in the central repository and enhance its analytical working methods. It has diversified the forms of support that it provides to competent jurisdictions, proactively and in response to their requests, and will continue to adjust to their needs.

The Mechanism has made significant progress in the implementation of its mandate. It remains committed to an inclusive approach to justice, particularly regarding different categories of victims and survivors or historically overlooked and insufficiently documented crimes, such as sexual and gender-based violence and crimes against children.

(Signed) Catherine **Marchi-Uhel**
Head of the Mechanism

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 8.173 The Mechanism is responsible for assisting in the investigation and prosecution of persons responsible for the most serious international crimes committed in the Syrian Arab Republic since March 2011. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolution [71/248](#), as further elucidated in the Mechanism's terms of reference (see [A/71/755](#), annex). The Mechanism has a responsibility to support criminal accountability, and its work relates to both supporting ongoing investigations and prosecutions being conducted by other actors and building case files to be shared with courts or tribunals which currently, or may in the future, have jurisdiction over those crimes.

Programme of work

Objective

- 8.174 The objective, to which the Mechanism contributes, is to achieve accountability for the most serious international crimes committed in the Syrian Arab Republic since March 2011.

Strategy and external factors for 2023

- 8.175 To contribute to the objective, the Mechanism will:
- (a) Build the central repository through existing or new cooperation agreements;
 - (b) Analyse evidence within the framework of its structural investigation and in response to requests for assistance from eligible jurisdictions;
 - (c) Build criminal case files through the analysis of evidence in its possession, pursuing lines of inquiry and conducting the investigations required to fill evidentiary gaps;
 - (d) Share information, evidence, analytical documents, expertise and/or case files with national, regional or international courts and tribunals that have jurisdiction over these alleged crimes;
 - (e) Develop and implement its victim- and survivor-centred approach and integrate a focus on sexual and gender-based violence and crimes against children throughout its work;
 - (f) Promote an integrated approach to justice and accountability through effective dialogue and coordination, including with criminal justice actors, civil society and other United Nations actors, helping Member States to progress towards the achievement of Sustainable Development Goals 5 and 16.
- 8.176 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of its programme owing to the coronavirus disease (COVID-19) pandemic. Examples of lessons learned and best practices include the continued refinement and adjustment of technical capabilities and analytical workflows to accommodate changes in evidence collection and processing plans, allowing progress on the development of case files. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objective, strategy and mandates and would be reported as part of the programme performance information.

- 8.177 The above-mentioned work is expected to result in:
- (a) Requesting parties having access to crucial evidence of alleged crimes, stored in a central repository and available for collation and distribution;
 - (b) Strengthened investigations, prosecutions and trials by jurisdictions with competence over the alleged crimes within the Mechanism's mandate;
 - (c) Greater accessibility to justice and gender equality for victims and survivors of crimes in the Syrian Arab Republic;
 - (d) The strengthening of the broadest possible range of justice initiatives compatible with the Mechanism's mandate.
- 8.178 With regard to the external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) Parties will provide information and evidence in various formats for inclusion in the central repository, necessitating storage capabilities and resources for the ongoing tagging of information and evidence;
 - (b) Relevant materials on chemical weapons usage compiled by the Organization for the Prohibition of Chemical Weapons-United Nations Joint Investigative Mechanism will continue to be made available.
- 8.179 With regard to cooperation with other entities at the global, regional, national and local levels, the Mechanism will continue to cooperate with competent jurisdictions, international organizations, Syrian and international civil society organizations and individuals, utilizing a variety of cooperation frameworks.
- 8.180 With regard to inter-agency coordination and liaison, the Mechanism will continue to cooperate with other United Nations entities working on issues related to the Syrian Arab Republic, including the Independent International Commission of Inquiry on the Syrian Arab Republic, in accordance with its mandate.
- 8.181 The Mechanism integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, the Mechanism continues to incorporate a gender perspective into its evidentiary strategies to avoid bias that results in the inaccurate recording of harm experienced by females and to ensure that due attention is paid to sexual violence against males.
- 8.182 In line with the United Nations Disability Inclusion Strategy, the Mechanism will integrate throughout its work the experiences and perspectives of persons with disabilities in the Syrian context. This is consistent with its victim- and survivor-centred approach, whereby the Mechanism seeks to bring to light and address the experiences of a broad range of victims and survivors who have been historically overlooked. In terms of accessibility, the Mechanism is making changes to its offices in order to accommodate visitors with disabilities.

Evaluation activities

- 8.183 An evaluation of the infrastructure and capacity needs of the Internet Resources Unit and its effectiveness in supporting analysis and sharing activities is planned for 2023.

Programme performance in 2021

Conclusion of cooperation frameworks between the Mechanism and States, international organizations and civil society organizations

- 8.184 One core aspect of the Mechanism's mandate is to collect evidence of violations of international humanitarian law and human rights violations and abuses committed in the Syrian Arab Republic

since March 2011. Relevant information and evidence are in the hands of a wide range of actors, from States and international organizations present in the region to civil society organizations documenting the crimes, and victims, survivors and witnesses. The legislation and policies of numerous States and international organizations require formal agreements regulating the parameters of their cooperation with the Mechanism. Most civil society organizations request memorandums of understanding before sharing their documentation. The Mechanism's collection and investigative activities on any State territory also necessitate an agreed framework. The conclusion of cooperation frameworks is consequently critical to the effective implementation of the Mechanism's mandate. At the end of 2018, the Mechanism had concluded 12 cooperation frameworks. Proactive engagement with information holders from 2019 until 2021 resulted in a total number of 70 cooperation frameworks in place at the end of 2021.

8.185 Progress towards the objective is presented in the performance measure below (see figure 8.XXI).

Figure 8.XXI

Performance measure: total number of cooperation frameworks concluded (cumulative)

Impact of the pandemic

8.186 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular the postponement of on-site missions that required direct contact to manage relationships with relevant sources and conduct consultations with key stakeholders, including civil society actors, and the cancellation of visits from national war crimes units to identify evidence in the Mechanism's database.

Planned results for 2023

Result 1: mixed-format analysis

Programme performance in 2021 and target for 2023

8.187 The Mechanism's work contributed to the review of 15,899 evidentiary records for the purpose of responding to requests for assistance made by competent authorities in relevant jurisdictions, which exceeded the planned target of 6,500 evidentiary records.

8.188 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 8.XXII).

Figure 8.XXII
Performance measure: number of evidence collection records shared (annual)

Result 2: improved integration of a gender perspective throughout the Mechanism’s substantive work to facilitate inclusive justice

Programme performance in 2021 and target for 2023

8.189 The Mechanism’s work contributed to 18 specialized products integrating a gender perspective provided, or prepared for future provision, to external entities requesting the Mechanism’s input into or assistance with justice efforts and activities related to sexual and gender-based violence in the Syrian context and engagement with victims and survivors of such crimes, which exceeded the planned target of 15 specialized products.

8.190 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 8.XXIII).

Figure 8.XXIII
Performance measure: number of specialized products available to external entities integrating a gender perspective (annual)

Result 3: enhanced victim- and survivor-centred approach for inclusive justice

Proposed programme plan for 2023

8.191 Victims and survivors of international crimes have often been relegated to the periphery of accountability processes and viewed as passive beneficiaries of assistance. Meaningful and inclusive justice requires active engagement with victims and survivors to reflect in accountability processes their experiences, perspectives and priorities. The Mechanism has engaged regularly and directly with victims and survivors in diverse forums to facilitate ongoing two-way communication, providing information about and seeking input on its accountability-related work.

Lessons learned and planned change

8.192 The lesson for the Mechanism was that, in order to build trust, it needs to engage constructively and meaningfully with victims and survivors through repeated interaction and open and direct communication and by using proactive strategies to effectively solicit their experiences, perspectives and priorities. In applying the lesson, the Mechanism will seek to expand its engagement with victims and survivors through additional methodologies for engagement, tools (such as standard operating procedures) and information products (outreach materials) and to facilitate the continued incorporation of the experiences, perspectives and priorities of victims and survivors into its work. The new approach is expected to result in enhanced engagement of victims and survivors with the accountability process.

8.193 Expected progress towards the objective is presented in the performance measure below (see figure 8.XXIV).

Figure 8.XXIV

Performance measure: number of engagements of victims and survivors (annual)

Legislative mandates

8.194 The list below provides all mandates entrusted to the Mechanism.

General Assembly resolutions

71/248	International, Impartial and Independent Mechanism to Assist in the Investigations and Prosecutions of Persons Responsible for the Most Serious Crimes under International Law Committed in the Syrian Arab Republic since March 2011	75/193; 76/228	Situation of human rights in the Syrian Arab Republic

9. Compilation of information and evidence of international crimes, including in response to requests for assistance by prosecuting authorities	50	71	50	90
10. Compilation of analysis of evidence of international crimes, for sharing with relevant authorities	19	75	35	100
11. Case files (in whole or in part), including evidentiary modules and other packages of analytical products relevant to individual criminal responsibility for specific international crimes	2	5	2	5
Fact-finding, monitoring and investigation missions (number of missions)	15	6	15	22
12. Investigation missions to identify and meet sources and potential witnesses, to collect evidence and/or to build case file(s) to facilitate proceedings in national, regional or international jurisdictions	15	6	15	22
C. Substantive deliverables				
Consultation, advice and advocacy: consultations with and cooperation in support of national judicial authorities from more than 15 countries; and consultations with civil society, including a broad range of victim and survivor communities.				
Databases and substantive digital materials: central repository of evidence of crimes committed in the Syrian Arab Republic since March 2011.				
D. Communication deliverables				
Outreach programmes, special events and information materials: periodic bulletins for some 200 NGOs and other entities; information and “frequently asked questions” for general dissemination; background papers about the Mechanism; and awareness-raising meetings for United Nations partners of the Mechanism.				
External and media relations: press statements, press conferences and interviews; panels and events; and briefings to the diplomatic and academic communities.				
Digital platforms and multimedia content: the Mechanism’s website.				

B. Proposed post and non-post resource requirements for 2023

Overview

8.196 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 8.53 to 8.55.

Table 8.53

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

8.197 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 8.56 to 8.58 and figure 8.XXV.

8.198 As reflected in tables 8.56 (1) and 8.57 (1), the overall resources proposed for 2023 amount to \$17,129,200 before recosting, reflecting a decrease of \$149,400, or 0.9 per cent, compared with the appropriation for 2022. Resource changes result from other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Explanation of variances by factor

Overall resource changes

Other changes

8.199 As reflected in table 8.56 (1), resource changes reflect a decrease of \$149,400 relating to the proposed reassignment of two posts (P-3), which are subject to a vacancy rate of 50 per cent. In addition, changes include the cost-neutral redeployment of two posts (1 P-4 and 1 General Service (Other level)) from the Collection and Analysis Section to the Support and Sharing Section (see annex II).

Extrabudgetary resources

8.200 As reflected in tables 8.56 (2) and 8.57 (2), the Mechanism expects to continue to receive extrabudgetary contributions, which would complement regular budget resources. In 2023, extrabudgetary resources are estimated at \$4,998,000 and would provide for 29 posts, as presented in table 8.57 (2), and the related non-post resources. The resources would be used mainly to address the increase in requests for assistance from competent jurisdictions; to provide for additional lines of inquiry and/or new case files that require additional expertise on specific types of crimes; to address secondary trauma; to support records management; and to strengthen the Mechanism’s translation and interpretation capabilities. The resources would also be used to support external relations and outreach, including for civil society in the Syrian Arab Republic, through virtual and in-person events and consultations. The expected decrease of \$1,637,800 reflects mainly the expected completion of the renovation of the Villa La Fenêtre, the Mechanism’s building located within the Palais des Nations premises in Geneva. In 2023, extrabudgetary resources are estimated to represent 22.6 per cent of the total resources for the Mechanism.

8.201 The extrabudgetary resources under this section are subject to the oversight of the Mechanism, which has delegated authority from the Secretary-General.

8.202 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Mechanism is integrating environmental management practices into

its operations. For example, the Mechanism has integrated the use of online meeting and videoconferencing tools to reduce travel of staff and meeting participants, where possible.

- 8.203 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 8.59. The nature of the Mechanism’s work means that staff members are often required to travel at short notice, as they need to be reactive to the schedules of the Mechanism’s sources. The low compliance rate in 2021 is due mainly to the changing travel restrictions as a result of the COVID-19 pandemic, which prevented the Mechanism from complying with the rule to purchase air tickets at least two weeks before the commencement of travel. The Mechanism continues to deploy initiatives that will have a positive impact on advance travel planning, including enhanced centralized monitoring and the dissemination of a guidance document on official travel containing clear procedures with regard to the travel approval process.

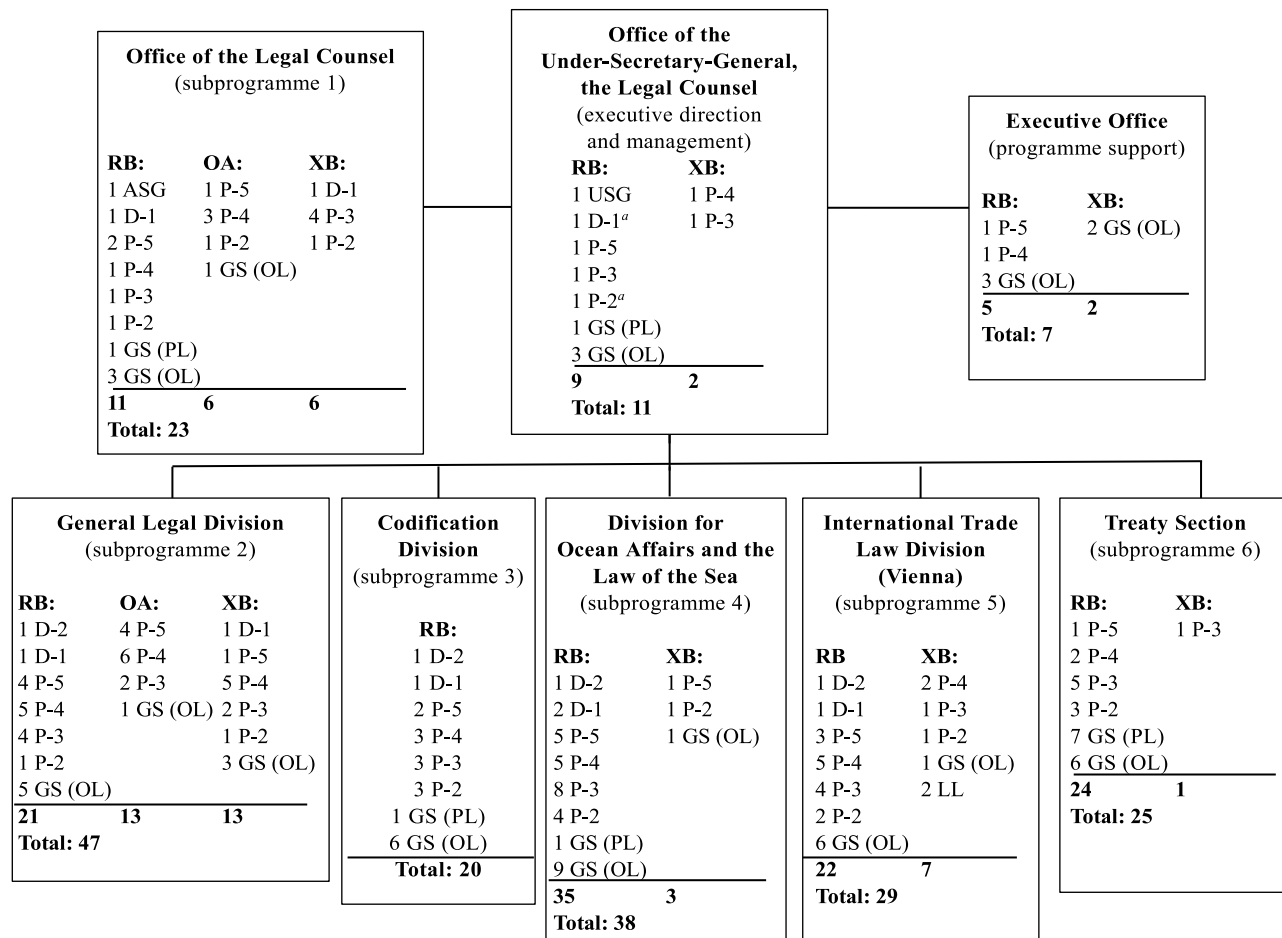

Table 8.59
Compliance rate
 (Percentage)

Annex II

Summary of proposed post changes, by component and subprogramme

A. Office of Legal Affairs

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Executive direction and management	1	D-1	Redeployment of 1 post of Principal Legal Officer (D-1) from subprogramme 3	To strengthen the capacity in the Office of the Under-Secretary-General for Legal Affairs in the conduct of its functions. Currently, the Office of the Under-Secretary-General/Legal Counsel has one P-5 senior-level post to support the Office and the Under-Secretary-General/Legal Counsel. Based on the diverse nature and demand for increasing legal support services, it would be beneficial to have a D-1 Principal Legal Officer to provide additional capacity to support the work of the Office, particularly in relation to the promotion and dissemination of international law as a means of strengthening international peace and security, including those activities undertaken under the Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law. It would allow for a more strategic and integrated management of capacity-building efforts, the leveraging of partnerships and the replication of good practices regarding legal technical assistance across organizational units. The redeployment would also allow the Office to better assist relevant stakeholders and respond to requests by Member States
Subprogramme 3, Progressive development and codification of international law	(1)	D-1		
	1	P-2	Redeployment of 1 post of Associate Data Analyst (P-2) from subprogramme 6	The proposed redeployment of the P-2 post would strengthen the data management capabilities of the Office of the Under-Secretary-General in designing a data strategy that supports the implementation of a data governance framework, including oversight in line with the Data Strategy of the Secretary-General for Action by Everyone, Everywhere. The increasing use and focus on data analytics and data management requires strengthening of this capacity
Subprogramme 6, Custody, registration and publication of treaties	(1)	P-2	Redeployment of 1 post of Associate Data Analyst (P-2) to executive direction and management	See reason for change given under executive direction and management

B. International, Impartial and Independent Mechanism to Assist in the Investigation and Prosecution of Persons Responsible for the Most Serious Crimes under International Law Committed in the Syrian Arab Republic since March 2011

<i>Component</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Programme of work	2	P-3	Reassignment of 2 posts of Legal Officer (P-3) as Investigator (P-3) in the Collection and Analysis Section	The proposed reassignment of the two P-3 posts will further reinforce the Mechanism's investigative capacity to address the gaps identified in its analytical work and the growing volume of investigations related to requests for assistance and to continue building its repository of evidence. In 2020, the Mechanism received 52 requests for assistance and in 2021, it received 73 requests for assistance. This number is expected to accelerate in 2022, during the first quarter of which a total of 22 requests were received. In addition, the number of cooperation frameworks with competent jurisdictions continues to grow, with 19 new ones having been added in 2020, 10 in 2021 and 3 in the first quarter of 2022, for a total of 73 active frameworks. This increased volume of requests for assistance has created a gap in the Mechanism's investigative capacity. The proposed reassignment of the two P-3 posts would address that gap. The incumbents of the reassigned posts will, among other things, undertake investigations in cases involving serious breaches of international humanitarian law, such as genocide, crimes against humanity, war crimes, rape and sexual and gender-based violence, including undertaking field missions; assist national prosecutors, police or law enforcement agencies with investigative and/or prosecutorial activities; and on behalf of the Mechanism, engage with potential information and evidence providers, including individuals and civil society groups
	1 1	P-4 GS (OL)	Redeployment of 2 posts (1 Legal Officer (P-4) and 1 GS (OL)) from the Collection and Analysis Section to the Support and Sharing Section	The Support and Sharing Section is responsible for collaborating with judges, prosecutors and law enforcement agencies, including following requests for assistance, and for supporting their investigative and prosecutorial activities. The Section is also in charge of developing and negotiating formal and informal cooperation frameworks (for example, conventions, protocols and memorandums of understanding) with other United Nations entities, States, international organizations and civil society actors. The proposed redeployment would strengthen the Section in delivering the above-mentioned work and in addressing the related increase in workload. In particular, it would support the Support and Sharing Section in the oversight of the legal work of the Section and engagement with competent jurisdictions and information providers, the provision of legal and policy advice on cooperation agreements and the preparation of files and material to be shared with investigative and prosecuting authorities, and in managing the sharing activities related to information and evidence in response to requests for assistance from competent jurisdictions. It would also help to strengthen the Mechanism's communication with national jurisdictions and understand the needs of present and future domestic investigations and prosecutions, so that additional proactive sharing opportunities can be identified

Foreword

In addition to delivering its core mandates, the Department of Economic and Social Affairs will continue to support global recovery efforts from the coronavirus disease (COVID-19) pandemic, the impact of which continues to reverberate across the world, adding an urgent dimension to the 10 critical action areas committed to by Member States in the political declaration at the Sustainable Development Goals Summit, held in New York in September 2019. In 2023, the Department will continue to assist countries in developing the inclusive, data-driven, people-centred policies needed to move from response to recovery to resilience and accelerate implementation of the 2030 Agenda for Sustainable Development, including the call to leave no one behind.

The Department's support to the intergovernmental machinery remains fundamental to the efforts of Member States to review and ensure development progress. Our analysis and technical guidance are central for informing intergovernmental outcomes that address global development challenges in a holistic manner. We will support Member States in preparing for the milestone intergovernmental processes and events in 2023, including the 2023 Sustainable Development Goals Summit, to ensure that the midterm review of the 2030 Agenda is robust and effective.

Collaboration with Member States, civil society, businesses and other stakeholders remains critical to achieving the Sustainable Development Goals. The Department will continue to support effective partnerships, building trust and mutual understanding at the global, regional and national levels, to respond to current and future challenges.

This 2023 programme plan and budget proposal reflects the mandates entrusted to the Department, outlining the Department's strategies and action to deliver its vital support to Member States.

(Signed) **LIU Zhenmin**
Under-Secretary-General for Economic and Social Affairs

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 9.1 The Department of Economic and Social Affairs supports the development pillar of the United Nations Secretariat, including by ensuring international cooperation in the pursuit of sustainable development for all. The Department's responsibilities include: (a) providing substantive support to the bodies established under the Charter of the United Nations that deal with development issues, namely, the General Assembly, the Economic and Social Council and its related functional commissions, and expert bodies; (b) monitoring and analysing development trends, prospects and policy issues globally; and (c) providing assistance in translating policy frameworks developed in United Nations conferences and summits into policies and programmes at the country level and supporting Member States in building national capacities for implementation, with specific focus on supporting the implementation of the 2030 Agenda for Sustainable Development and the achievement of the Sustainable Development Goals through, among others, the regular programme of technical cooperation and United Nations Development Account projects. The mandate derives from the proposals put forward in the 1997 report of the Secretary-General entitled "Renewing the United Nations: a programme for reform" (A/51/950). In implementing the proposals, the General Assembly, in its resolution 52/220, noted the creation of the new Department of Economic and Social Affairs.
- 9.2 The Department forms the backbone of the normative and analytical support provided by the Secretariat to intergovernmental bodies and the processes that address the economic, social and environmental dimensions of sustainable development, including spearheading numerous initiatives to advance economic and social development issues.

Strategy and external factors for 2023

- 9.3 Concern was expressed at the Sustainable Development Goals Summit, held in New York in September 2019, about the slow progress made in achieving the Sustainable Development Goals in many areas. Pledges were made at the Summit to make the coming decade one of action and delivery, in order to realize the Goals by 2030. As such, a coherent and integrated approach to the work of the United Nations to support Member States in the urgent need to accelerate action on all levels and by all stakeholders, to fulfil the vision and Goals of the 2030 Agenda, remains paramount. Throughout 2020 and 2021 the coronavirus disease (COVID-19) pandemic added an urgent context to the critical action areas committed to by Member States in the political declaration adopted at the Summit.
- 9.4 The COVID-19 pandemic continues to devastate health systems globally, threatening already achieved health outcomes. Tens of millions of people have been pushed back into extreme poverty, and the livelihoods of people everywhere have been severely affected. Women and girls are bearing the brunt of the impact, often shouldering an increase in care work, and are facing alarming levels of violence. The pandemic is disproportionately affecting the world's poorest and most vulnerable people, which too often includes children, older persons, persons with disabilities, indigenous peoples and ethnic minorities, migrants and refugees, and informal sector workers. The most vulnerable countries, including least developed and landlocked developing countries and small island developing States, have been particularly challenged.
- 9.5 While COVID-19 has intensified the need for transformational change, the underlying impetus of the Department's thought leadership, capacity development and normative support to Member States has remained constant. The Department has taken important steps to assist Member States in their efforts to respond to the pandemic, while continuing to fulfil its commitment and contribution to supporting and strengthening multilateral action to achieve the Sustainable Development Goals. The

Department's strategy aims at providing support to Member States in building consensus in the areas of sustainable development and putting its array of tools, expertise and capabilities at the service of Member States.

- 9.6 The Department's support to Member States through major global conferences and summits and regular meetings in the economic, social and environmental fields continues. Furthermore, as a global thought leader, the Department continues to forecast economic, social and population trends and generate, analyse and compile a wide range of data and statistics to inform and advise Member States and other stakeholders as they take stock of trends and policy options to address common problems. The Department also continues to assist in translating policy frameworks developed in United Nations conferences and summits into programmes at the country level and, through technical assistance, continues to support Member States in building national capacities.
- 9.7 With attention given to least developed and landlocked developing countries, small island developing States, and countries in Africa, the Department continues to identify emerging trends and effective policy options for eradicating poverty, addressing inequalities and promoting opportunities and progress towards sustainable development for all. It also continues with its capacity-building activities to support those countries in special situations, including in the areas of transformational leadership and equipping public servants with the capacities to achieve the Sustainable Development Goals.
- 9.8 In 2023, the Department plans to focus on the following:
- (a) Supporting Member States in preparing for important intergovernmental processes and milestones taking place in 2023, including the 2023 Sustainable Development Goals Summit. The Department will continue to work with Member States and other United Nations entities, as needed;
 - (b) Strengthening the availability of critical social, demographic and economic data and analysis for guiding transformative policy in the context of COVID-19 recovery, to create more resilient and inclusive societies and accelerate achievement of the Sustainable Development Goals;
 - (c) Strengthening thought leadership by taking a multidimensional and intersectional approach to analysis, in support of intergovernmental processes that account for the differentiated impacts that emerging and ongoing trends, policies and programmes have on women and girls, and people in vulnerable situations;
 - (d) Leveraging work streams on climate action, financing for sustainable development, digital transformation, data accessibility, projections and frontier issues to move the world closer to achieving sustainable development for all;
 - (e) Enhancing national implementation of internationally agreed objectives through its structured strategic and substantive support for the resident coordinator system and United Nations country teams, with a focus on countries in Africa and in special situations.
- 9.9 For 2023, the Department's planned deliverables will support Member States' ongoing management of and recovery from the COVID-19 pandemic. The Department, across all subprogrammes, will continue to support Member States in gauging trends, building capacities and shaping solutions in the wake of the pandemic, while remaining committed to facilitating implementation of the 2030 Agenda.
- 9.10 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. Examples of lessons learned and best practices include the Department's relevant activities and deliverables across all subprogrammes to support intergovernmental processes, analytical work and capacity-building projects and activities. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the

objectives, strategies and mandates and would be reported as part of the programme performance information.

- 9.11 With regard to cooperation with other entities at the global, regional, national and local levels, the Under-Secretary-General for Economic and Social Affairs will continue to serve as convener of the expanded Executive Committee on Economic and Social Affairs Plus. The Department, through this Committee, will work with United Nations entities to ensure that their intergovernmental bodies contribute to the work of the high-level political forum on sustainable development and enhance common approaches and synergies to support Member States in the implementation of the 2030 Agenda. The Department will continue to contribute to building multi-stakeholder partnerships and capacity development in thematic areas such as natural resources, water, energy, climate, ocean, transport, and science and technology, as well as special concerns of small island developing States. The Department will also continue its important role in the Collaborative Partnership on Forests to enhance collaboration and coordination on the sustainable management of all types of forests, and the full realization of the potential of forests to address global challenges.
- 9.12 With regard to inter-agency coordination and liaison, the Department will support the General Assembly and the Economic and Social Council in the quadrennial comprehensive policy review of operational activities for development of the United Nations system, which helps to advance multilateral guidance for sustainable development, ranging from policy to normative mandates specific to the 2030 Agenda. The Department will work closely with United Nations system entities and the United Nations Sustainable Development Group in carrying out this work. In maximizing the impact of the repositioning of the United Nations development system and its ultimate objective of strengthening results on the ground, the Department established an internal coordination capacity to support the resident coordinator system and the United Nations country teams, facilitating more structured engagement between the Department and resident coordinators, through the Development Cooperation Office. This structured engagement will also strengthen the Department's delivery of its capacity-building activities, assisting Member States in translating at the national level global norms and policy frameworks for the achievement of the Sustainable Development Goals and other internationally agreed objectives, including for least developed and landlocked developing countries, small island developing States and countries in Africa. The Department will continue to rely on the leadership and coordination role of the resident coordinators and their respective offices to help identify effective country-level entry points and partnerships. Engaging at the beginning of the United Nations Sustainable Development Cooperation Framework programming cycle, through the common country analysis, will be critical to ensure an optimal use of the Department's existing capacities and resources, in line with its mandates and comparative advantages. Furthermore, the Department will work with different agencies and stakeholders to step up its capacities for policy analysis and knowledge production. The Department will continue to chair or co-chair the United Nations system inter-agency mechanisms on disability, indigenous peoples, older persons and young people, legal identity, financing for development, statistics, and science, technology and innovation, among others, playing an integral role in ensuring coherence across those topic areas. Moreover, a United Nations economist network was established as part of the ongoing effort to strengthen the United Nations thought leadership in order to respond to the demands of the 2030 Agenda. The network will advance United Nations thinking and policy research on key current and emerging economic, financial and social development issues, specifically in the context of the implementation of the 2030 Agenda.
- 9.13 With regard to the external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) Continued cooperation with policymakers and relevant national, regional and international stakeholders and entities in the consideration of sustainable development issues in the General Assembly, the Economic and Social Council and the high-level political forum on sustainable development, as well as other intergovernmental processes serviced by the programme;
 - (b) Continued availability of up-to-date and accurate information, data and trends for the Department's analytical products;

- (c) Governments and other stakeholders continue to collaborate with the Department in undertaking the proposed programme activities with the necessary capacity and resources.
- 9.14 The Department integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, this will be done through normative and analytical work and in its support for intergovernmental bodies. Members of the Department's gender focal point network will serve as resource persons on gender equality and mainstreaming and to ensure an effective gender perspective in the Department's programmatic and substantive operations, including through outreach activities and the sharing of experience and analytical and substantive knowledge across the Department. The Department's subprogrammes will continue to give due regard to gender equality and the empowerment of women in the implementation of their programme of work for 2023.
- 9.15 In line with the United Nations Disability Inclusion Strategy, the Department will continue to engage in various joint projects and coordination groups that involve other entities of the United Nations system on disability inclusion, including on the implementation of the Strategy. The implementation of the Department's policy and plan of action for disability inclusion will continue in 2023.

Programme performance in 2021

Impact of the pandemic

- 9.16 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular the Department's analytical work, intergovernmental and normative events and capacity-building activities. The Department, under all subprogrammes, changed the approach from in-person to virtual, and in some cases modified, postponed or cancelled events as a result of COVID-19.
- 9.17 In addition, in order to support Member States on issues related to the COVID-19 pandemic, within the overall scope of the objectives, the Department, in its work across all its subprogrammes, sought to support Member States in intergovernmental processes, both in substance and by innovating procedures and processes to accommodate the gradual return to in-person meetings and events. It also strengthened thought leadership through the Department's improved data- and evidence-based publications and through policy briefs, global dialogues and other short-form analytical and discursive outputs and activities on imminent and emerging issues, as well as through the Department's continued capacity development in new virtual and hybrid forms. The provision of much-needed support to Member States to help them respond and recover from the pandemic has been central to the Department's efforts.

Legislative mandates

- 9.18 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

47/190	Report of the United Nations Conference on Environment and Development	51/240	Agenda for Development
47/191	Institutional arrangements to follow up the United Nations Conference on Environment and Development	52/220	Questions relating to the proposed programme budget for the biennium 1998–1999
50/227	Further measures for the restructuring and revitalization of the United Nations in the economic, social and related fields	55/2	United Nations Millennium Declaration
51/176	Implementation of the Programme of Action of the International Conference on Population and Development	55/279	Programme of Action for the Least Developed Countries for the Decade 2001–2010
		57/144	Follow-up to the outcome of the Millennium Summit
		57/253	World Summit on Sustainable Development

Part IV International cooperation for development

57/270 B	Integrated and coordinated implementation of and follow-up to the outcomes of major United Nations conferences and summits in the economic and social fields	69/321 70/1	Revitalization of the work of the General Assembly Transforming our world: the 2030 Agenda for Sustainable Development
58/220	Economic and technical cooperation among developing countries	70/299	Follow-up and review of the 2030 Agenda for Sustainable Development at the global level
58/269	Strengthening of the United Nations: an agenda for further change	72/236; 73/248; 74/238; 76/220	Operational activities for development of the United Nations system
59/243	Integration of the economies in transition into the world economy	72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system
60/1	2005 World Summit Outcome		
60/265	Follow-up to the development outcome of the 2005 World Summit, including the Millennium Development Goals and the other internationally agreed development goals	73/246	Implementation of the Third United Nations Decade for the Eradication of Poverty (2018–2027)
62/208	Triennial comprehensive policy review of operational activities for development of the United Nations system	74/4	Political declaration of the high-level political forum on sustainable development convened under the auspices of the General Assembly
66/288	The future we want	74/228	Role of the United Nations in promoting development in the context of globalization and interdependence
67/226; 71/243; 75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system	74/238	Operational activities for development of the United Nations system
69/15	SIDS Accelerated Modalities of Action (SAMOA) Pathway	75/215; 76/203	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for Sustainable Development of Small Island Developing States
69/143	Implementation of the outcome of the World Summit for Social Development and of the twenty-fourth special session of the General Assembly		
69/151	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly	75/290 A	Review of the implementation of General Assembly resolutions 67/290 on the format and organizational aspects of the high-level political forum on sustainable development and 70/299 on the follow-up and review of the 2030 Agenda for Sustainable Development at the global level
69/214	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development	75/290 B	Review of the implementation of General Assembly resolution 72/305 on the strengthening of the Economic and Social Council
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)		

Economic and Social Council resolutions

1998/7	Importance of population census activities for evaluation of progress in implementing the Programme of Action of the International Conference on Population and Development	2008/29; 2012/30	Role of the Economic and Social Council in the integrated and coordinated implementation of and follow-up to the outcomes of the major United Nations conferences and summits, in the light of relevant General Assembly resolutions, including resolution 61/16
2007/2	The role of the United Nations system in providing full and productive employment and decent work for all	2019/2	Mainstreaming a gender perspective into all policies and programmes in the United Nations system

Ministerial communiqués of the high-level segment of the substantive session of the Economic and Social Council

2002	The contribution of human resources development, including in the areas of health and education, to the process of development	2007	Strengthening efforts at all levels to promote pro-poor sustained economic growth, including through equitable macroeconomic policies
2003	Promoting an integrated approach to rural development in developing countries for poverty eradication and sustainable development	2007	Annual ministerial review on the theme “Strengthening efforts to eradicate poverty and hunger, including through the global partnership for development”
2004	Resources mobilization and enabling environment for poverty eradication in the context of the implementation of the Programme of Action for the Least Developed Countries for the Decade 2001–2010	2008 2008	Development Cooperation Forum Annual ministerial review on the theme “Implementing the internationally agreed goals and commitments in regard to sustainable development”
2006	Creating an environment at the national and international levels conducive to generating full and productive employment and decent work for all, and its impact on sustainable development		

Subprogramme 1 **Intergovernmental support and coordination for sustainable development**

General Assembly resolutions and decisions

45/264	Restructuring and revitalization of the United Nations in the economic, social and related fields	68/229; 69/238; 72/236; 73/248; 74/238; 76/220	Operational activities for development of the United Nations system
48/162	Further measures for the restructuring and revitalization of the United Nations in the economic, social and related fields	70/106	Strengthening of the coordination of emergency humanitarian assistance of the United Nations
48/209	Operational activities for development: field offices of the United Nations development system	70/184 70/201	Information and communications technologies for development Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development
S-19/2	Programme for the Further Implementation of Agenda 21

2017/3	United Nations code of conduct on cooperation in combating international tax evasion		

Evaluation activities

- 9.19 The following evaluations completed in 2021 have guided the programme plan for 2023:
- (a) Evaluation by the Office of Internal Oversight Services of the accountability system in the United Nations;
 - (b) Review by the Joint Inspection Unit of the United Nations system support for landlocked developing countries to implement the Vienna Programme of Action;
 - (c) Evaluation of the impact of the Department's publications;
 - (d) Evaluation of the effectiveness of the Department in providing thought leadership on development and supporting analytical work;
 - (e) Evaluations on capacity-building.
- 9.20 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2023. For example, the evaluation of the impact of the Department's publications will further enhance the outreach and visibility of its publications in 2023. The evaluation on providing thought leadership on development and supporting analytical work will help to streamline the Department's thought leadership processes and collaboration with other United Nations entities in 2023.
- 9.21 The following evaluations and self-evaluations are planned for 2023:
- (a) Evaluations on cross-cutting or thematic topics, with a focus on the efficiency and effectiveness of internal processes;
 - (b) Evaluations on capacity-building activities.

Programme of work

Subprogramme 1

Intergovernmental support and coordination for sustainable development

Objective

- 9.22 The objective, to which this subprogramme contributes, is to advance the roles of the General Assembly, the Economic and Social Council and the high-level political forum on sustainable development in the integrated implementation of and follow-up to the 2030 Agenda for Sustainable Development and the outcomes of other United Nations conferences and summits in the economic, social, environmental and related fields.

Strategy

- 9.23 To contribute to the objective, the subprogramme will continue to provide substantive support to the Economic and Social Council and the high-level political forum on sustainable development in the

promotion and review of the integrated implementation of the 2030 Agenda and related international commitments within the context of the decade of action and delivery for sustainable development. Specifically, the subprogramme will:

- (a) Provide evidence-based analysis and advice to support the Council by: (i) engaging in policy dialogue and formulating policy recommendations; (ii) coordinating the work of its subsidiary bodies and United Nations system entities; (iii) identifying and taking on new and emerging issues affecting the achievement of the Sustainable Development Goals; and (iv) reinforcing the linkages between policy discussions and review and national sustainable development efforts;
- (b) Support the high-level political forum on sustainable development in the follow-up to and implementation of the 2030 Agenda for Sustainable Development by: (i) facilitating the progress review, policy dialogue and development of policy recommendations for the accelerated achievement of the Sustainable Development Goals and the 2030 Agenda; (ii) assisting countries in preparing evidence-based, inclusive and analytical voluntary national reviews of their implementation of the 2030 Agenda; and (iii) engaging United Nations country teams, other subprogrammes of the Department and United Nations system entities in supporting the review process;
- (c) Provide substantive and secretarial support, upon request, to policy discussions and negotiations of the General Assembly, notably its Second Committee (economic and financial issues);
- (d) Provide Member States with the evidence and analysis necessary for reviewing and guiding the operational activities of the United Nations development system based on mandates from the Assembly's 2020 quadrennial comprehensive policy review of the operational activities for development of the United Nations system and other resolutions;
- (e) Provide support to the resident coordinator system through webinars and other activities to guide the support of United Nations country teams to countries conducting voluntary national reviews, as well as to enable United Nations country teams to provide their coordinated assessment of the implementation of the quadrennial comprehensive policy review;
- (f) Facilitate the dialogue on policies and recommendations on effective, people-centred and gender-sensitive response measures to address the impact of the COVID-19 pandemic in a way that accelerates the implementation of the 2030 Agenda, by providing analysis, country-level evidence and recommendations, including addressing the impacts on poverty, inequality and hunger, and on women and people in vulnerable situations;
- (g) Support the engagement of non-governmental organizations (NGOs) in the work of the Economic and Social Council¹ as well as the participation of major groups and other stakeholders in the high-level political forum;²
- (h) Strengthen the engagement of young people in the work of the United Nations through the annual Economic and Social Council Youth Forum.

¹ Economic and Social Council resolution 1996/31 provides the legislative mandate and outlines the modalities that govern the consultative relationship with non-governmental organizations and the Council.

² Nine major groups were first identified in Agenda 21 at the United Nations Conference on Environment and Development in Rio de Janeiro, Brazil. Those major groups and some additional stakeholder groups were identified in General Assembly resolution 66/288, entitled "The future we want", as well as in some of the subsequent resolutions of the Assembly, namely, 67/290, 70/1, 70/299 and 72/305. The Assembly, in its resolution 67/290 on the format and organizational aspects of the high-level political forum on sustainable development, stressed the need for the forum to promote transparency and implementation by further enhancing the consultative role and participation of the major groups and other relevant stakeholders at the international level and decided that the forum should be open to the major groups and other relevant stakeholders.

9.24 The above-mentioned work is expected to result in:

- (a) Enhanced policy and operational guidance by the General Assembly and the Economic and Social Council on the implementation of the 2030 Agenda at the global, regional and country levels;
- (b) Improved understanding by the high-level political forum on sustainable development of progress towards achieving the Sustainable Development Goals, the policies that have worked, levers and entry points, as well as gaps, challenges and new and emerging issues;
- (c) Advancing progress at the country level towards realizing the Sustainable Development Goals through strengthened support for countries presenting voluntary national reviews at the high-level political forum on sustainable development;
- (d) More effective, efficient and coordinated United Nations development system support towards implementing the 2030 Agenda and responding to COVID-19, including support to voluntary national reviews, as well as improved and clearer guidance from Member States to the United Nations development system;
- (e) The voice of young people being heard at United Nations deliberations through the Economic and Social Council Youth Forum;
- (f) Improved engagement of NGOs in the work of the United Nations through support for the Economic and Social Council Committee on Non-Governmental Organizations;
- (g) Increased participation of major groups and other stakeholders in the work of the high-level political forum on sustainable development, as mandated in General Assembly resolution [67/290](#);
- (h) Better understanding among Members States, United Nations system organizations and other stakeholders on the effects of COVID-19 on the implementation of the 2030 Agenda, as well as policy options and practical measures for addressing the impact of the COVID-19 pandemic while accelerating progress towards achieving the Sustainable Development Goals within the decade of action and delivery for sustainable development;
- (i) Greater coordination and coherence in the global response to the COVID-19 pandemic.

Programme performance in 2021

Strengthened coordinated global response to the COVID-19 pandemic

9.25 In 2021, the subprogramme continued to enhance its support to Member States on COVID-19 response and recovery. It supported the Economic and Social Council and the high-level political forum on sustainable development in dealing with the impact of COVID-19 on the achievement of the Sustainable Development Goals, finding policy solutions to respond and recover from the pandemic and enhancing policy coordination and coherence in the global COVID-19 response. It organized three additional meetings of the Council to advance a global commitment to the equitable and timely distribution of COVID-19 vaccines, draw attention to the impact of the pandemic on countries in special situations and promote international cooperation for dealing with the global challenges of COVID-19 and climate change. The subprogramme also prepared the 2021 update of the Secretary-General on the comprehensive United Nations response to COVID-19. Those innovative activities supported Members States' efforts to advance international cooperation in the response to the COVID-19 pandemic and increased the visibility of the work of the Council and the forum as inclusive platforms for integrated policy dialogue on global challenges in the realm of sustainable development.

9.26 Progress towards the objective is presented in the performance measure below (see table 9.1).

Table 9.1
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	Enhanced understanding among Member States on the ways to address the pandemic through the organization of a virtual briefing by the President of the Economic and Social Council on the COVID-19 response, drawing on the expertise of the United Nations system; substantive support to the General Assembly special session in response to the COVID-19 pandemic and preparation of a policy brief on the impact of COVID-19 from the perspective of voluntary national reviews	Strengthened international collaboration and solidarity and improved policies in the global response to the pandemic, not only through policy dialogue and consensus-building among Member States, in particular countries in special situations, but also by sharing knowledge and expertise on integrated policies and good practices to recover better from the COVID-19 pandemic and engagement with United Nations system experts and scientists, and through, inter alia, the organization of a special ministerial meeting of the Economic and Social Council on the theme “A vaccine for all”, and a special meeting of the Economic and Social Council on small island developing States, the least developed countries and landlocked developing countries; Economic and Social Council briefing on the outcomes of the United Nations climate change conference; and preparation of the Secretary-General’s 2021 update on the United Nations Comprehensive Response to COVID-19

Planned results for 2023

Result 1: strengthened stakeholder engagement in the decade of accelerated action and delivery

Programme performance in 2021 and target for 2023

- 9.27 The subprogramme’s work contributed to 546 NGOs applying for consultative status with the Economic and Social Council, which did not meet the planned target of 950 non-governmental organizations applying for consultative status. The target was not met owing to the continuing impact of the COVID-19 pandemic on societies and on the United Nations and other organizations, which also led to the postponement of the 2020 resumed session of the Committee on Non-Governmental Organizations, resulting in a sharp decline in new applications for consultative status with the Council in 2021.
- 9.28 Progress towards the objective and target for 2023 are presented in the performance measure below (see figure 9.I).

Figure 9.I
Performance measure: number of non-governmental organizations applying for consultative status (annual)

Result 2: General Assembly and the Economic and Social Council mainstream COVID-19 into their guidance to and review of United Nations operational activities for development

Programme performance in 2021 and target for 2023

- 9.29 The subprogramme's work contributed to 38 per cent of government representatives indicating that their understanding of progress made on key issues related to the quadrennial comprehensive policy review, including United Nations development system support for countries' COVID-19 responses, improved to a great extent, and an additional 50 per cent indicating that their understanding improved to some extent, which exceeded the planned target of 32 per cent.
- 9.30 Progress towards the objective and target for 2023 are presented in the performance measure below (see figure 9.II).

Figure 9.II

Performance measure: percentage of government representatives indicating that the operational activities segment of the Economic and Social Council improved their understanding of progress made on key quadrennial comprehensive policy review-related issues, including the United Nations COVID-19 response

▨ Government representatives indicating that the operational activities segment of the Economic and Social Council improved their understanding of progress made on key quadrennial comprehensive policy review-related issues to some extent

■ Government representatives indicating that the operational activities segment of the Economic and Social Council improved their understanding of progress made on key quadrennial comprehensive policy review-related issues to a great extent

Result 3: accelerated implementation of Sustainable Development Goals through effective preparatory process for voluntary national reviews

Proposed programme plan for 2023

- 9.31 The high-level political forum on sustainable development promotes and reviews the implementation of the 2030 Agenda for Sustainable Development and its Sustainable Development Goals annually, notably through country-led voluntary national reviews of progress at the national level. Those reviews aim to facilitate the sharing of experiences and lessons learned among countries and the launch of partnerships. Since 2016, the subprogramme has supported a total of 176 countries in the preparation and presentation of their reviews at the high-level political forum, including by organizing annual global workshops, issuing a handbook and voluntary reporting guidelines and maintaining continued interaction with government focal points.

Lessons learned and planned change

- 9.32 The lesson for the subprogramme was that an inclusive preparatory process engaging various parts of Government is critical for fostering peer learning among countries on how to incorporate the Sustainable Development Goals and targets into national policies in order to achieve the Goals. The global voluntary national review workshops encourage countries to engage various parts of the Government in the review process, in order to help countries to shift towards integrated Goals-related implementation approaches in support of the interdependent and mutually reinforcing Goals. By strengthening countries' capacities for an integrated follow-up to and review of the Goals at the national level, the preparatory process helps to ensure the presentation of more rigorous, evidence-based, comprehensive and inclusive voluntary national reviews at the high-level political forum on sustainable development. In applying the lesson, the subprogramme will collect and analyse data on the institutional diversity and inclusiveness of review processes. Use of these analyses is expected to encourage the engagement of all parts of Government in the implementation of the Goals.

9.33 Expected progress towards the objective is presented in the performance measure below (see figure 9.III).

Figure 9.III

Performance measure: countries that engaged more than one national entity in the preparation of their voluntary national reviews (percentage)

Deliverables

9.34 Table 9.2 lists all deliverables of the subprogramme.

16. Studies on the implementation of the quadrennial comprehensive policy review	3	5	6	7
17. Studies and materials on issues related to the Economic and Social Council	2	2	1	1
18. Studies and materials on issues related to the high-level political forum, including on the voluntary national reviews	4	5	4	4
19. Studies and materials on issues related to the Committee on Non-Governmental Organizations	1	–	1	1

C. Substantive deliverables

Consultation, advice and advocacy: informal consultations on resolutions of the General Assembly and the Economic and Social Council, including the follow-up resolutions on the implementation of the Assembly resolution on the quadrennial comprehensive policy review of United Nations system operational activities for development; informal consultations on the ministerial declarations of the Council and the high-level political forum on sustainable development, as well as informal consultations on the reports of the Committee on Non-Governmental Organizations; support to the President and the Bureau of the Economic and Social Council and to the Bureau of the Second Committee; briefings to all Member States on sustainable development issues and processes; expert advice to United Nations intergovernmental bodies, notably the Assembly, the Council and the high-level political forum, the mandated informal Secretary-General's note for the Economic and Social Council Coordination Segment; briefings to NGOs and major groups and other stakeholders on the work of the Assembly, the Council and the high-level political forum; inter-agency consultations and briefings involving more than 50 United Nations system entities in the preparations for the meetings and sessions of the Council, the Assembly and the high-level political forum on sustainable development; enhanced United Nations system coordination through preparation of the engagement of the Department's senior officials in inter-agency and interdepartmental coordination mechanisms, such as the United Nations System Chief Executives Board for Coordination, the High-level Committee on Programmes, the United Nations Sustainable Development Group, the Secretary-General's Executive Committee and the Deputies Committee and the Executive Committee on Economic and Social Affairs Plus; monitoring the implementation of the funding compact; inputs to the annual report on United Nations system-wide results towards the achievement of the Sustainable Development Goals; and analysis and advice to senior United Nations officials on sustainable development issues.

Databases and substantive digital materials: materials for the high-level political forum on sustainable development in support of Member States and other participants; a database on voluntary national reviews; a paperless committee for official documentation of the Committee on Non-Governmental Organizations; integrated information and communications technology platforms for some 5,000 NGOs in consultative status with the Economic and Social Council; an indicator framework to monitor the implementation of the quadrennial comprehensive policy review for all Member States; a database on the funding of United Nations operational activities for development; and a database on the funding compact agreed to by Member States and the United Nations development system in 2019.

D. Communication deliverables

Outreach programmes, special events and information materials: communication and outreach materials on the work of the Economic and Social Council, the General Assembly and the high-level political forum on sustainable development for all Member States and the general public, including press information; content for social media platforms, in collaboration with the Department of Global Communications; and webinars for some 5,000 NGOs in consultative status with the Council on participation in the activities of the Council and the United Nations.

Digital platforms and multimedia content: web pages and multimedia content for the Economic and Social Council and the high-level political forum on sustainable development, and the website of the Integrated Civil Society Organizations System.

Subprogramme 2

Inclusive social development

Objective

- 9.35 The objective, to which this subprogramme contributes, is to advance policies for the eradication of poverty, the reduction of inequality and the achievement of greater social inclusion and well-being for all.

Strategy

- 9.36 To contribute to the objective, the subprogramme will:
- (a) Continue to conduct evidence-based research and analysis, including on indigenous peoples, persons with disabilities, older persons and young people;
 - (b) Monitor national and global socioeconomic trends to identify emerging issues and assess their implications for social policy at the national and international levels, which will help Member States to make progress towards achieving Sustainable Development Goals 1–11 and 16;
 - (c) Continue to provide substantive support for intergovernmental dialogue and processes, including the sessions of the Commission for Social Development, the Permanent Forum on Indigenous Issues, the Conference of States Parties to the Convention on the Rights of Persons with Disabilities, the Open-ended Working Group on Ageing, the Economic and Social Council and the General Assembly;
 - (d) Continue to engage in technical cooperation and capacity development efforts, in partnership with resident coordinators and United Nations entities, including through the use of sport as an enabler of development and peace, as foreseen in the preamble of the 2030 Agenda;
 - (e) Continue its analytical work, intergovernmental support and technical advisory services to requesting countries;
 - (f) Support Member States on issues related to shocks and recovery, such as COVID-19, by promoting socially inclusive policy responses designed to eradicate poverty, reduce inequalities and protect the populations at greatest risk from the ongoing impacts of the crisis in a post-COVID-19 world;
 - (g) Focus its analytical work on reducing inequality and strengthening social protection systems in the post-COVID-19 context, continue to focus on the situation of vulnerable segments of the population and engage more closely with United Nations country teams to enhance action at the national level in addressing the impact of COVID-19.
- 9.37 The above-mentioned work is expected to result in:
- (a) Enhanced knowledge and awareness of Member States to ensure no one is left behind;
 - (b) Recognition by Member States of specific social development issues as a basis for action at the national level;
 - (c) Increased capacity of Member States to effectively implement the social dimension of the 2030 Agenda and its Sustainable Development Goals;
 - (d) Recovery of Member States from the COVID-19 pandemic with more resilient and inclusive societies, placing the world back on track to implementing the 2030 Agenda.

Programme performance in 2021

Increased ministerial-level engagement in the Commission for Social Development

9.38 The subprogramme provides substantive support to the Bureau of the Commission for Social Development, which in 2018 decided to add a ministerial forum to the annual session of the Commission. This was in accordance with Economic and Social Council resolution 2018/3, in which the Council encouraged the Commission to propose high-level events and ministerial and expert workshops that engage Member States and relevant stakeholders, so as to encourage dialogue on the social dimensions of the 2030 Agenda. The 2021 ministerial forum, on the theme “Promoting multilateralism to realize inclusive, resilient and sustainable recovery from COVID-19 in the context of the decade of action and delivery for sustainable development and its social dimensions”, has encouraged dialogue and addressed the implementation of, follow-up to and review of the social dimension of the 2030 Agenda for Sustainable Development, including through discussions on multilateralism, poverty alleviation, social protection and social services; the protection and promotion of employment; harnessing the potential of new technologies; and international cooperation for vaccination. The forum generated great engagement of Member States and enhanced the impact of the Commission’s work at the national and regional levels, with positive feedback from Member States.

9.39 Progress towards the objective is presented in the performance measure below (see figure 9.IV).

Figure 9.IV

Performance measure: number of ministers and vice-ministers who participated in the annual sessions of the Commission for Social Development

Planned results for 2023

Result 1: effective social protection systems through enhanced governance systems

Programme performance in 2021 and target for 2023

9.40 The subprogramme’s work contributed to increasing the capacity of an additional 175 officials in the management and governance of social protection in 2021, which met the planned target.

9.41 Progress towards the objective and target for 2023 are presented in the performance measure below (see table 9.3).

Table 9.3
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	Increased capacity of 185 officials in management and governance of social protection	Increased capacity of an additional 175 officials in management and governance of social protection	Increased usage of online platforms on governance and management of national social protection systems by government officials to expand knowledge exchange and sharing of good practices	Increased usage of policy briefs and other products on social protection by government officials to deepen knowledge base and awareness of good practices

Result 2: promotion of the rights and well-being of older persons

Programme performance in 2021 and target for 2023

- 9.42 The subprogramme’s work contributed to strengthened national capacity to contribute to the implementation and review of the Madrid International Plan of Action on Ageing, which met the planned target.
- 9.43 Progress towards the objective and target for 2023 are presented in the performance measure below (see table 9.4).

Table 9.4
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Agreed common vision and goals and increased awareness of the policy options, factors for success and the challenges in addressing rights and the well-being of older persons	Countries endorsed the timeline for carrying out the fourth review and appraisal of the Madrid International Plan of Action	Strengthened national capacity of 13 countries to contribute to the implementation and review of the Madrid International Plan of Action on Ageing	Increased number of Member States contribute to the fourth review and appraisal of the International Plan of Action	At least 13 countries consider the successes and good practices, shortcomings and future priorities identified in their national and regional levels of review and appraisal in furthering implementation of the Madrid International Plan of Action on Ageing

Result 3: strengthened capacities of cooperatives towards realizing inclusive development**Proposed programme plan for 2023**

9.44 Cooperatives continue to empower communities, create employment and generate income. These member-owned and, in many cases, grass-roots organizations respond to community needs and correct market failures, making them powerful vehicles for lifting people out of poverty and for reducing inequality. The subprogramme prepares a biannual report of the Secretary-General on cooperatives in social development with evidence-based analysis and policy recommendations to support Member States in leveraging the contributions of cooperatives. In particular, the subprogramme prepared such a report for the General Assembly at its seventy-sixth session (A/76/209), with a focus on creating a more conducive environment for cooperatives. Member States welcomed the report of the Secretary-General in adopting Assembly resolution 76/135, in which the Assembly drew the attention of Governments towards promoting a national legal and regulatory environment that is more conducive to the creation and growth of cooperatives, and requested the Secretary-General, in cooperation with relevant United Nations entities, to provide support as appropriate.

Lessons learned and planned change

9.45 The lesson for the subprogramme was that, in order to influence legislative framework changes in creating an enabling environment for cooperatives, it had an opportunity to translate the analysis and recommendations of the Secretary-General's reports into policy and practice. In applying the lesson, the subprogramme will engage stakeholders, including national offices in charge of regulation and leadership of cooperatives, to implement the General Assembly resolution, by organizing demand-driven capacity development workshops and providing tailored knowledge products. A particular focus of these workshops will be on improving national legislative and regulatory frameworks with the aim of creating an enabling environment for cooperative growth towards the realization of the Sustainable Development Goals.

9.46 Expected progress towards the objective is presented in the performance measure below (see table 9.5)

Table 9.5
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Governments and cooperative practitioners engaged in dialogue on strengthening cooperatives for sustainable development	Social and solidarity economy actors committed to join with the United Nations in the decade of action to deliver the Sustainable Development Goals	Member States adopted General Assembly resolution 76/135, including a call on the United Nations system to support Governments in strengthening cooperatives	Regional and national stakeholders report engagement, increased knowledge and capacity to implement General Assembly resolution 76/135	Countries and Resident Coordinators indicate that knowledge and capacity were applied to promote and support cooperatives for the realization of the Sustainable Development Goals

Deliverables

9.47 Table 9.6 lists all deliverables of the subprogramme.

Table 9.6
Subprogramme 2: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	30	28	28	27
Documentation for:				
1. The General Assembly on ageing, cooperatives in development, persons with disabilities, policies and programmes concerning youth, follow-up to the International Year of the Family, follow-up to the World Summit for Social Development, social inclusion and other social development issues, the Third United Nations Decade for the Eradication of Poverty and sport for development and peace	10	10	9	10
2. The Commission for Social Development	6	5	5	6
3. The Permanent Forum on Indigenous Issues	10	9	10	7
4. The Conference of States Parties to the Convention on the Rights of Persons with Disabilities	4	4	4	4
Substantive service for meetings (number of three-hour meetings)	87	86	85	85
Meetings of:				
5. The Second Committee of the General Assembly	4	4	4	4
6. The Third Committee of the General Assembly	6	6	6	6
7. The Open-ended Working Group on Ageing	10	10	8	8
8. The Economic and Social Council	6	6	6	6
9. The high-level political forum on sustainable development	1	3	1	1
10. The Commission for Social Development	20	20	20	20
11. The Permanent Forum on Indigenous Issues	24	21	24	24
12. The Conference of States Parties to the Convention on the Rights of Persons with Disabilities	16	16	16	16
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	1	2	2
13. Projects on social policy formulation	2	1	2	2
Seminars, workshops and training events (number of days)	10	10	10	10
14. Training events on social issues for Member States and other stakeholders, including lectures and multi-stakeholder panels	10	10	10	10
Publications (number of publications)	2	–	1	2
15. Publication of the <i>World Youth Report</i>	1	–	–	–
16. Publication of the <i>World Social Report</i>	1	–	1	1
17. Publication on indigenous peoples	–	–	–	1
Technical materials (number of materials)	7	6	7	9
19. Outcome documents of expert groups on various social issues	7	6	7	7
20. Update on the Disability and Development Report	–	–	–	1
21. Contribution to the report of the Secretary-General on homelessness	–	–	–	1
C. Substantive deliverables				
Consultation, advice and advocacy: Member States' socioeconomic situations and normative, policy and administrative frameworks in relation to the social dimensions of sustainable development and the Sustainable Development Goals; briefings/expert advice to more than 40 Member States on sustainable development issues, including on high-level bilateral consultations and intergovernmental meetings.				

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

D. Communication deliverables

Outreach programmes, special events and information materials: special events, including commemorations of international days on various social issues; and policy briefs and communication activities to promote advancement of social development with a global reach.

External and media relations: briefings, press conferences and press releases on various social issues.

Digital platforms and multimedia content: electronic, audio and video messaging on ageing, cooperatives, disability, family, indigenous issues, young people, sport for development and peace and various other issues.

Subprogramme 3 Sustainable development

Objective

- 9.48 The objective, to which this subprogramme contributes, is to accelerate the implementation of the 2030 Agenda for Sustainable Development, including the Sustainable Development Goals and their targets and commitments, through increased engagement of Member States and other stakeholders.

Strategy

- 9.49 To contribute to the objective, the subprogramme will:
- (a) Continue to prepare analytical reports and assessments, maintain online databases and organize thematic expert meetings and conferences on specific Sustainable Development Goals and their interlinkages;
 - (b) Continue to organize, in the months leading up to the high-level political forum on sustainable development, expert group meetings and conferences, accessible to Member States, on the themes of the forum and the Sustainable Development Goals that are under review;
 - (c) Continue to play a central role in interagency coordination mechanisms on water, energy, small island developing States, oceans and transport and in the area of science, technology and innovation, and through its long-standing cooperation with specific agencies on issues such as climate change and partnership-building for sustainable development;
 - (d) Continue to coordinate the work of the Technology Facilitation Mechanism, including the multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals and the online platform on existing science, technology and innovation initiatives (2030 Connect);
 - (e) Convene special events in connection with the high-level political forum on sustainable development, including the Sustainable Development Goals business forum and the local and regional governments forum, to allow the sharing of lessons learned and good practices related to the Goals by key stakeholder sectors and exchanges between Member States and all other stakeholders in the development arena;
 - (f) Organize, in coordination with the regional commissions, resident coordinator offices and United Nations country teams, as applicable, capacity-building activities at the global, regional and national levels on the above topics;
 - (g) Support Member States on issues related to COVID-19 by intensifying its analytical work through policy briefs highlighting the impact of COVID-19 on various topics of sustainable development, through the organization of a series of webinars for Member States, providing access to expert opinion on these topics, and through capacity-building activities aimed at,

among others, enhancing the capacities of policymakers and micro-, small and medium-sized enterprises to respond to and recover from the pandemic.

- 9.50 The above-mentioned work is expected to result in:
- (a) Increased knowledge of Member States and other key stakeholders of the 2030 Agenda and the Sustainable Development Goals, including for their deliberations during the high-level political forum on sustainable development and other related forums, and for the development of related national policies and programmes;
 - (b) Increased use of science and technology to leverage their full potential in the achievement of the Sustainable Development Goals by Member States and other stakeholders;
 - (c) Increased integration of the Sustainable Development Goals into inclusive national planning processes, policies and strategies, and an increased number of actions and initiatives taken by Member States and other stakeholders to accelerate the implementation of the 2030 Agenda.

Programme performance in 2021

High-level dialogue on energy announced over \$400 billion in “energy compact” commitments towards achieving Sustainable Development Goal 7

9.51 The subprogramme organized and convened a high-level dialogue on energy in 2021 to promote the implementation of the energy-related Sustainable Development Goals and targets of the 2030 Agenda, as requested by the General Assembly in its resolution [74/255](#), with the subprogramme acting as secretariat of UN-Energy, the inter-agency body that coordinates the system-wide efforts of the United Nations to support the implementation of Sustainable Development Goal 7 and the United Nations Decade of Sustainable Energy for All. The dialogue, the first high-level meeting on energy in over 40 years, focused on five technical tracks: energy access; energy transition; enabling the Sustainable Development Goals through just and inclusive energy transitions; innovation, technology and data; and finance and investment. Over 130 Heads of State and Government, as well as global leaders from business and other sectors, attended the dialogue, resulting in the announcement of over \$400 billion in new investments for clean energy as part of over 150 voluntary commitments, called “energy compacts”. The compacts collectively aim to provide hundreds of millions of people with access to clean energy, speeding up energy transition while creating new jobs. Another major outcome of the dialogue was the delivery of a “global road map” to achieve a radical transformation of energy access and transition by 2030, while also contributing to net zero emissions by 2050.

9.52 Progress towards the objective is presented in the performance measure below (see table 9.7).

Table 9.7
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
In its resolution 74/225 , General Assembly requested the convening of a high-level dialogue on energy in 2021	The Secretary-General convened the dialogue at the summit level during the high-level segment of the General Assembly at its seventy-sixth session, in September 2021	130 global leaders attended the dialogue and reaffirmed their unequivocal political commitment to the implementation of Sustainable Development Goal 7

2019 (actual)	2020 (actual)	2021 (actual)
	The preparatory process for the dialogue was initiated	The first ever global road map for accelerated action on Sustainable Development Goal 7 was developed, and more than 150 voluntary commitments (“energy compacts”) amounting to over \$400 billion in investments, were announced

Planned results for 2023

Result 1: achieving the Sustainable Development Goals through multi-stakeholder coalitions in the areas of water, energy and hunger

Programme performance in 2021 and target for 2023

- 9.53 The subprogramme’s work contributed to 6,192 database entries made available to Member States, and the number of Sustainable Development Goal acceleration actions increasing to 319, of which 116 are related to Goal 6, coupled with the number of Goal-related good practices increasing to a total of 1,007, which met the planned target.
- 9.54 Progress towards the objective and target for 2023 are presented in the performance measure below (see table 9.8).

Table 9.8
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Member States and other stakeholders can consult the database on good practices related to the Sustainable Development Goals, a compendium of successful initiatives for the implementation of the Goals. After an announcement at the Sustainable Development Goal Summit in September 2019, that database is complemented by a database on voluntary actions taken to accelerate the implementation of the Goals	Member States have access to the new Sustainable Development Goal 6 global acceleration framework The number of Sustainable Development Goal partnerships and commitments reached 5,286, the number of good practices reached 512 and the database of acceleration actions contains 237 entries, 70 of which are related to Goal 6	The number of Sustainable Development Goal partnerships and commitments now available to Member States and other stakeholders is 6,192, and the number of Goal-related acceleration actions increased to 319, of which 116 are related to Goal 6. At the same time, the number of Goals-related good practices increased to 1,007	Partnerships and commitments recorded in the databases will reach 6,000, the number of Goal-related good practices will increase to 800, and the number of Goal-related acceleration actions will reach 450	With 2023 marking the midterm period for the implementation of the 2030 Agenda, and with Goals 6, 7, 9, 11 and 17 being specifically reviewed at the high-level political forum on sustainable development, the number of partnerships and commitments will exceed 7,000, while the number of good practices will reach 2,000 and the number of new acceleration actions will reach 500

Result 2: accelerated progress towards ensuring the availability and sustainable management of water and sanitation for all by 2030

Programme performance in 2021 and target for 2023

- 9.55 The subprogramme’s work contributed to the convening of a high-level meeting by the General Assembly and an increased number of registered acceleration actions related to Sustainable Development Goal 6, which met the planned target.
- 9.56 Progress towards the objective and target for 2023 are presented in the performance measure below (see table 9.9).

Table 9.9
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Member States adopted resolution 73/226, calling for a United Nations conference in 2023 to comprehensively review the implementation of the objectives of the Water Action Decade	The Sustainable Development Goal 6 global acceleration framework is launched during high-level political forum on sustainable development in order to mobilize United Nations agencies, governments, civil society, private sector and other stakeholders to drive progress on water and sanitation issues, and therefore on the 2030 Agenda as a whole	The high-level meeting on the implementation of the water-related Sustainable Development Goals and targets of the 2030 Agenda was convened. In total, 7 Heads of State and Government, 48 ministers and more than 100 representatives from intergovernmental organizations, the United Nations system and other stakeholders attended The number of acceleration actions related to Goal 6 reached 116 by the end of 2021	More than 150 Sustainable Development Goal 6 acceleration actions registered	200 Sustainable Development Goal 6 acceleration actions registered Additional target countries for the Goal 6 capacity development initiative

Result 3: an interdisciplinary look at implementation of the Sustainable Development Goals – the Global Sustainable Development Report

Proposed programme plan for 2023

- 9.57 As mandated by the General Assembly in its resolution 70/1 on the 2030 Agenda for Sustainable Development, the Secretary-General entrusted an independent group of scientists comprising 15 experts from a wide range of disciplines to prepare the 2023 edition of the *Global Sustainable Development Report*. The quadrennial report informs the high-level political forum, complementing other Sustainable Development Goals-related publications by the Secretariat, notably the Sustainable Development Goals progress reports, as an “assessment-of-assessments” that synthesizes specific issues of sustainable development to inform action. The subprogramme is tasked with providing

support to the independent group of scientists throughout its nomination cycle. It also manages outreach for the report, and supported the launch of the first *Global Sustainable Development Report* under this format, entitled *The Future is Now – Science for Achieving Sustainable Development*.

Lessons learned and planned change

- 9.58 The lesson for the subprogramme was that the *Global Sustainable Development Report*, as a tool for communicating state-of-the-art scientific evidence to decision-makers, requires extensive outreach to gather evidence and understand the complex dimensions of challenges facing decision makers and society. For the 2023 edition, the context of the COVID-19 crisis has created a new focus on the role of science in responding to global challenges and the importance of strengthening the science-policy interface. The independent group of scientists will respond to the heightened expectations for science to help implement the 2030 Agenda. In applying the lesson, the subprogramme will support the group by facilitating broad outreach across the respective scientific communities of the group’s members, as well as regional outreach activities, with an emphasis on the inclusion of underrepresented communities.
- 9.59 Expected progress towards the objective is presented in the performance measure below (see table 9.10)

Table 9.10
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
First edition of the <i>Global Sustainable Development Report</i> , entitled “ <i>The Future in Now</i> ” is published in September 2019 on the occasion of the Sustainable Development Goals Summit, the General Assembly’s first quadrennial review of implementation of the 2030 Agenda	Member States decide to use the levers and entry points of the 2019 report as the framework for the thematic review of the Sustainable Development Goals during the 2020 high-level political forum on sustainable development The Secretary-General appoints a new group of 15 scientists for the preparation of the 2023 <i>Global Sustainable Development Report</i>	The new independent group of scientists gave a briefing to Member States during the 2021 high-level political forum on sustainable development with the outline of the report finalized A call for inputs is widely circulated to secure evidence from stakeholders, including underrepresented communities	During the 2022 high-level political forum on sustainable development, the independent group of scientists gives a briefing to Member States on progress made to date and emerging issues identified in the new report	The 2023 <i>Global Sustainable Development Report</i> is formally launched in September A first series of global and regional briefings will start immediately after the launch, with a focus on localizing the global calls for action to support implementation in different contexts

Deliverables

9.60 Table 9.11 lists all deliverables of the subprogramme.

Table 9.11

Subprogramme 3: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies

12. Sustainable development in action: voluntary commitments and multi-stakeholder partnerships for sustainable development	1	2	–	–
13. Summary reports on progress gaps and challenges in the implementation of resolution 67/215, in which the General Assembly declared 2014–2024 the United Nations Decade of Sustainable Energy for All	1	1	–	–
14. Progress report on multi-stakeholder partnerships for small island developing States	1	1	–	–
15. Publications on the 2030 Agenda for Sustainable Development	–	31	8	15
C. Substantive deliverables				
Consultation, advice and advocacy: briefings/expert advice to Member States on sustainable development issues, including high-level bilateral consultations and intergovernmental meetings, and materials related to stakeholder engagement in the 2030 Agenda follow-up and review and on multi-stakeholder partnerships in support of the Sustainable Development Goals.				

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

Databases and substantive digital materials: public databases on voluntary initiatives, small island developing States, partnerships, voluntary commitments made during the United Nations Conference to Support the Implementation of Sustainable Development Goal 14, Sustainable Development Goal good practices, the United Nations system achievement of the Goals, Sustainable Development Goal acceleration actions, the Technology Facilitation Mechanism, UN-Energy, harmony with nature and other topics of sustainable development.

D. Communication deliverables

Outreach programmes, special events and information materials: special meetings and side events on sustainable development issues during major United Nations conferences at Headquarters or elsewhere.

Digital platforms and multimedia content: Sustainable Development Knowledge Platform.

Subprogramme 4 Statistics

Objective

- 9.61 The objective, to which this subprogramme contributes, is to strengthen the capacity of Member States with regard to the production and use of high-quality, timely, disaggregated, open data and national statistics and geospatial information as a basis on which to inform policy and decision-making for the 2030 Agenda for Sustainable Development and for other United Nations policy agendas and to review progress at the national and international levels.

Strategy

- 9.62 To contribute to the objective, the subprogramme will:
- (a) Promote and advance the development of statistical and geospatial information frameworks, standards and methods, especially those related to the Sustainable Development Goals and other new emerging policy issues;
 - (b) Provide in-person and online training to Member States on topics including modernization of statistical information systems and integrated geospatial information management, the use of big data, environmental economic accounting, geospatial information management and survey instruments to fill data gaps and leave no one excluded from decision-making and policies that affect them;
 - (c) Continue to expand the coordination of its international statistical programmes and activities;
 - (d) Facilitate the coordination of international activities by promoting the availability, accessibility and application of geospatial information, including the standardization of geographical names and work towards a better integration of statistical and geospatial information;
 - (e) Cooperate with the resident coordinator system and United Nations country teams in data and statistical activities and their interaction with the global statistical community, including through the Global Network of Data Officers and Statisticians. Also, cooperate closely with other international organizations and establish partnerships with civil society organizations, academia and private sector data providers;
 - (f) Continue to collect, compile and disseminate global statistical information and data in the areas of economic, social, demographic and environmental statistics, including the Sustainable Development Goals indicators, through the use of technology, such as the Statistical Data and Metadata Exchange, to facilitate data exchange and enhance access to data and national statistics and geospatial information for policymakers and other users at the national and international levels;

- (g) Issue flagship data publications, maintain databases and data platforms and continue to develop open data hubs and labs to showcase innovative uses of data and explore the visualization of data and metadata;
- (h) Collect information from Member States on the implementation of the Cape Town Global Action Plan for Sustainable Development Data for data relating to the 2030 Agenda, including on financing needs in the specific areas included in the Plan and on the impact of the COVID-19 pandemic on national statistical offices' operations, in collaboration with the World Bank's Development Data Group, the Partnership in Statistics for Development in the 21st Century and the United Nations regional commissions;
- (i) Develop and share guidance and information on initiatives, tools and best practices to help national statistics systems to continue to operate efficiently during and in the aftermath of the COVID-19 pandemic and respond to the new specific data needs to address and mitigate the impact of the pandemic on societies, and to address issues of open and timely access to critical data needed by Governments and all sectors of society to respond to and recover from the COVID-19 pandemic.

9.63 The above-mentioned work is expected to result in:

- (a) Enhanced quality, availability and access to policy-relevant statistical and geospatial information;
- (b) Increased production and dissemination by Member States of better data and national statistics and geospatial information that are comparable and in line with the adopted international frameworks and standards and provision of enhanced and open access to them;
- (c) Enhanced coherence and more effective functioning and transformation of the global statistical and geospatial systems;
- (d) Increased statistical and geospatial information capacity of Member States and the United Nations system.

Programme performance in 2021

Increased collaboration across the data and statistical community for new data solutions

9.64 The programme contributed to the growth of the global data and statistical community and the increased level of collaboration across different data communities for the development of data and statistical systems around the world, with the organization of the United Nations World Data Forum, held in Bern in October 2021. The Forum brought together data experts, participants from various government agencies, representatives from national statistical offices, the private sector and academia, international organizations and civil society groups from more than 100 countries. New data solutions were presented, and one new partnership and two key new initiatives for the better funding of data and statistics in countries were launched, to make timely, open quality data a reality. The "Bern Data Compact for the Decade of Action on the Sustainable Development Goals" was also launched to guide actions by the data community. The Forum's initiative, including the main event and the series of webinars, contributed to strengthening the global data community and fostering cooperation.

9.65 Progress towards the objective is presented in the performance measure below (see figure 9.V).

Figure 9.V
Performance measure: number of retained participants in the United Nations World Data Forum

Planned results for 2023

Result 1: Data for Now – timely data for the Sustainable Development Goals

Programme performance in 2021 and target for 2023

- 9.66 The subprogramme’s work contributed to six new countries testing new data solutions on additional Sustainable Development Goals targets and topics, with an increased availability of timely and disaggregated data on the Goals, which met the planned target.
- 9.67 The subprogramme’s work also contributed to the organization of knowledge-sharing workshops, which did not meet the planned target of 10 additional countries having access to the new data solutions validated during the first and second phases of the initiative. The target was not met due to travel restrictions, which limited the organization of training workshops to effectively share knowledge, thus no additional countries had access to the new data solutions being tested.
- 9.68 The subprogramme’s work also contributed to two more targets having tested data solutions, which did not meet the planned target of five more targets having new tested measurement solutions. The target was not met due to the limited availability of additional extrabudgetary funds necessary to implement activities on a broader range of areas.
- 9.69 Progress towards the objective and target for 2023 are presented in the performance measure below (see table 9.12).

Table 9.12
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Launch of the Data for Now initiative enabling 8 pilot countries to use new data sources, methods and technologies to fill critical data gaps and deliver timely data that accelerates progress on the Sustainable Development Goals	One additional country has access to the new data solutions validated during the first phase of the initiative by the 8 initial countries and is testing new solutions on additional Sustainable Development Goal targets and topics Overall, 5 targets have new tested measurement solutions	No additional countries have access to the new data solutions validated during the first and second phases of the initiative and 6 more countries test new solutions on additional Sustainable Development Goal targets and topics Overall, 2 more targets have new tested measurement solutions	5 additional countries have access to the new data solutions validated during the first and second phases of the initiative and 5 more countries test new solutions on additional Sustainable Development Goal targets and topics Overall, 5 more targets have new tested measurement solutions	5 additional countries have access to the new data solutions validated during the first and second phases of the initiative and 6 more countries test new solutions on additional Sustainable Development Goal targets and topics Overall, 2 more targets have new tested measurement solutions

Result 2: integrated approach to environmental and economic policies through the use of the System of Environmental-Economic Accounting

Programme performance in 2021 and target for 2023

- 9.70 The subprogramme’s work contributed to 89 countries implementing the System of Environmental-Economic Accounting, which did not meet the planned target of 92. The target was not met because the COVID-19 pandemic affected time, resource and funding allocations for implementation of the System in countries.
- 9.71 Progress towards the objective and target for 2023 are presented in the performance measure below (see figure 9.VI).

Figure 9.VI
Performance measure: number of countries implementing the System of Environmental-Economic Accounting (cumulative)

Result 3: increased engagement with trade statistics

Proposed programme plan for 2023

- 9.72 The 2030 Agenda recognizes international trade as an engine for inclusive economic growth and poverty reduction and an important means to achieve the Sustainable Development Goals by tracking progress towards trade-related Goals. Consequently, trade data are crucial for evidence-based policymaking, trade monitoring, promotion, negotiations and agreements like the General Agreement on Tariffs and Trade.
- 9.73 In recent years, the programme on trade statistics upgraded the dissemination system, resulting in a significant increase in user demand, and conducted capacity-building activities to enhance the quality, availability and accessibility of trade data. The wide application of trade data to monitor the impact of the COVID-19 pandemic on international trade and its relation to well-being, labour, productivity and sustainability has further increased the need for more timely, higher frequency and disaggregated data.

Lessons learned and planned change

- 9.74 The lesson for the subprogramme was that, in order to provide analytics crucial for measuring the impact of the COVID-19 pandemic, notably on the disruption to the global value chain, it needed to advance timelines and further harmonize trade data sets. In applying the lesson, the programme will strengthen the statistical capacity for producing and disseminating trade data by providing tailored e-learning courses, developing new data tools, implementing a standard automated data exchange mechanism and improving access to the UN Comtrade database, the official repository of global trade data.
- 9.75 Expected progress towards the objective is presented in the performance measure below (see figure 9.VII).

Figure 9.VII
Performance measure: number of countries that submitted timely trade data, 2019-2023

Deliverables

C. Substantive deliverables

Consultation, advice and advocacy: consultation and advice on economic, demographic and social, and environmental statistics and geospatial information, Sustainable Development Goal indicators and cross-cutting statistical areas; and briefings/expert advice to Member States on sustainable development issues, including high-level bilateral consultations and intergovernmental meetings.

Databases and substantive digital materials: databases on economic, demographic and social, and environmental statistics and geospatial information, Sustainable Development Goals indicators and cross-cutting statistical areas, with data for more than 200 statistical territories (includes countries and areas).

D. Communication deliverables

Outreach programmes, special events and information materials: outreach, events and information materials on economic, demographic and social, and environmental statistics and geospatial information, Sustainable Development Goals indicators and cross-cutting statistical areas.

Subprogramme 5 Population

Objective

- 9.77 The objective, to which this subprogramme contributes, is to improve knowledge of global population trends, advance an evidence-based understanding of interactions between population change and sustainable development among policymakers and the public, and to strengthen the international community’s capacity to effectively address current and emerging population issues and integrate the population dimension into the international development agenda.

Strategy

- 9.78 To contribute to the objective, the subprogramme will:
- (a) Prepare studies on issues related to population growth, population ageing, migration, urbanization, fertility, family planning, mortality and other aspects of population in relation to sustainable development using population estimates and projections, the analysis of demographic trends and the evaluation of population policies;
 - (b) Produce comprehensive global data sets on selected topics, as well as brief reports to highlight these topics and related data, and an annual report on a selected major demographic topic. Data sets will include aggregated results for groups of countries in special situations;
 - (c) Provide capacity development on population data and analysis to requesting countries and to United Nations country teams;
 - (d) Continue to provide substantive support to United Nations intergovernmental bodies, in particular the Commission on Population and Development, including by preparing reports and convening expert meetings and panels;
 - (e) Assist Governments in assessing progress made in implementing the Programme of Action of the International Conference on Population and Development held in 1994, and with a focus on the global monitoring of Sustainable Development Goal indicators on reproductive health, international migration and child and maternal mortality, often in partnership with other entities of the United Nations system;
 - (f) Continue to improve the United Nations estimates and projections of the global population;

- (g) Study the interaction of COVID-19 with demographic phenomena, including mortality, population ageing, fertility and family planning, and international migration, and including these analyses, as appropriate, in publications and technical materials.

9.79 The above-mentioned work is expected to result in:

- (a) Improved access to data and reports on population matters for Governments and other users and increased use of the subprogramme's data and findings in the work of stakeholders;
- (b) Increased awareness of population trends and their relationship to sustainable development through accurate data and policy-relevant reports, benefiting Member States and other stakeholders in policy and development planning;
- (c) Advancement in the international community's usage of scientifically grounded information about the demographic impacts of the COVID-19 pandemic, in particular on mortality.

Programme performance in 2021

New evidence of the impact of the COVID-19 pandemic on demographic trends

9.80 The programme collaborated with the World Health Organization (WHO) to establish the WHO-Department of Economic and Social Affairs Technical Advisory Group on COVID-19 Mortality Assessment in order to obtain accurate estimates of numbers of deaths attributable to the direct and indirect impacts of the pandemic. Those estimates are needed to assess the global impact of the pandemic and to inform the mortality estimates to be included in *World Population Prospects 2022*. The Group brings together over 30 experts in demography, epidemiology and statistics from around the world, including from national statistical offices, ministries of health and the academic community. In addition, over 30 people from United Nations agencies and partners, academia and the private sector participate in the Group as observers. The Group has proposed a method for generating estimates of excess mortality on the global, regional and national scales, scheduled for publication by WHO in 2022 following a process of country consultation to identify any problems with the estimation methodology, to discover any missing data sources and to confirm the results. The subprogramme convened an expert group meeting in May 2021 to assess the possible impact of the pandemic on fertility. The consensus view at that time was that short-term declines in fertility of varying magnitudes could be observed or anticipated in 2020 and 2021, and that fertility levels were likely to return to pre-pandemic levels between 2023 and 2025.

9.81 Progress towards the objective is presented in the performance measure below (see table 9.14).

Table 9.14

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	Emergence of COVID-19 on a global scale, with limited data available to assess demographic impacts	Methods made available for generating internationally comparable estimates of excess mortality associated with the COVID-19 pandemic

Planned results for 2023

Result 1: global population estimates and projections for the Sustainable Development Goals era

Programme performance in 2021 and target for 2023

- 9.82 The subprogramme’s work contributed to 12,600 additional citations of *World Population Prospects* in academic articles, which exceeded the planned target of 5,000.
- 9.83 Progress towards the objective and target for 2023 are presented in the performance measure below (see figure 9.VIII).

Figure 9.VIII

Performance measure: number of additional citations of *World Population Prospects* in academic articles (annual)

Result 2: improved estimates of the number of international migrants

Programme performance in 2021 and target for 2023

- 9.84 The subprogramme’s work contributed to the review of data on the numbers of international migrants for 183 countries or areas and the development of computer scripts for improving the efficiency, quality and reproducibility of the estimates of international migrant stocks, which met the planned target.
- 9.85 Progress towards the objective and target for 2023 are presented in the performance measure below (see table 9.15).

Table 9.15
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Member States benefited from access to the 2019 estimates of numbers (the “stock”) of international migrants, disaggregated by age, sex and countries of origin and destination	Member States benefited from access to an update of the stock of international migrants, produced using pre-existing methods, including an adjustment for the impact of COVID-19	Data reviewed for 183 countries or areas and piloted improvements in the estimation of the stock of international migrants, which would further benefit stakeholders, including Member States	Member States, policymakers and the public have improved knowledge, and have access to updated and improved data on the stock of international migrants	Stakeholders, including Member States, have access to additional data for the remainder of the 235 geographical units in the migrant stock database; improvements implemented in the estimation of numbers of international migrants

Result 3: strengthened evidence on population-related data and policies for the further implementation of the Programme of Action of the International Conference on Population and Development

Proposed programme plan for 2023

9.86 The Programme of Action of the International Conference on Population and Development, adopted in Cairo in 1994, was a landmark agreement among countries, recognizing that people are at the centre of concerns for sustainable development and acknowledging the interdependence of demographic processes, sustained economic growth and sustainable development. The 2030 Agenda for Sustainable Development integrated the discussion of linkages between population and development, building on international frameworks that preceded it. An expert panel on the work programme in population, held during the fifty-fourth session of the Commission on Population and Development, encouraged strengthened integration of countries’ inputs to the Commission and to the United Nations Inquiry among Governments on Population and Development. In 2023, countries will be preparing for the 30-year review of the Programme of Action during the annual session of the Commission, in 2024. The subprogramme has produced reports examining major population trends and their linkages to sustainable development. The organization of virtual events, including expert group meetings and both formal and informal meetings during the annual sessions of the Commission on Population and Development, has increased the engagement of Member States and other stakeholders.

Lessons learned and planned change

9.87 The lesson for the subprogramme was that systematic outreach and communications in the context of reports, data sets, expert meetings and work with national counterparts help to ensure greater engagement of target audiences. In applying the lesson, the subprogramme will focus its main report in 2023 on the interrelations between population trends and sustainable development and how population-related policies can contribute to the further implementation of the Programme of Action of the International Conference on Population and Development and the 2030 Agenda. It will organize hybrid and virtual events, strengthen collaboration with United Nations country teams and systematize communications plans for reports and data sets.

9.88 Expected progress towards the objective is presented in the performance measure below (see table 9.16)

Table 9.16
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Member States reaffirm their commitment to the full and effective implementation of the Programme of Action	Shift to virtual events enables broader engagement	Expert panel stresses the need for strengthened integration of country inputs and outreach to countries	Engagement with stakeholders to integrate updated information on population trends and policies	Countries benefit from strengthened integration of evidence in their preparations for the 2024 review of the Programme of Action

Deliverables

9.89 Table 9.17 lists all deliverables of the subprogramme.

Table 9.17
Subprogramme 5: deliverables for the period 2021–2023, by category and subcategory

15. Major data sets on population topics	2	2	2	–
16. Sustainable Development Goals indicator data sets	3	3	3	1

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
17. Reports of expert group meetings on population topics	3	3	3	3
18. Technical papers on population topics	4	4	4	4

C. Substantive deliverables

Consultation, advice and advocacy: briefings for and consultations with Member States concerning the annual session of the Commission on Population and Development; and briefings/expert advice to Member States on population and sustainable development issues, including high-level bilateral consultations and intergovernmental meetings.

Databases and substantive digital materials: databases and data sets on population topics.

D. Communication deliverables

Outreach programmes, special events and information materials: booklets, fact sheets, wall charts and information kits on population topics; and special events on population topics.

External and media relations: press conferences and press releases related to the Commission on Population and Development; press releases to support the launch of major publications or data sets; and responses to requests from Member States, the media, United Nations entities and other stakeholders.

Digital platforms and multimedia content: interactive data visualizations and social media and multimedia content on population topics.

Subprogramme 6 Economic analysis and policy

Objective

- 9.90 The objective, to which this subprogramme contributes, is to strengthen national capacities and international policy coordination for identifying and managing short-term macroeconomic risks, to shape medium- and long-term socioeconomic policies for development, and to accelerate sustainable development, especially of least developed countries, small island developing States and other countries in special situations.

Strategy

- 9.91 To contribute to the objective, the subprogramme will:
- Monitor and forecast the macroeconomic situation at the national, regional and global levels, with a focus on countries in special situations, including the least developed countries;
 - Broaden the scope of economic forecasting and simulation tools to assess policy trade-offs in promoting economic growth, while reducing poverty, inequality and enhancing environmental sustainability, in line with the 2030 Agenda;
 - Continue to organize and support the Committee for Development Policy and provide analytical input to the intergovernmental processes related to the least developed countries, as well as to the annual themes of the Economic and Social Council and the high-level political forum on sustainable development;
 - Design and implement capacity development activities, with a special focus on the least developed countries, including graduating and recently graduated least developed countries, that improve their capacity to take advantage of international support measures, prepare and implement a smooth transition strategy and participate in the monitoring process of the Committee for Development Policy;
 - Examine rapid technological change, noting both its constructive and disruptive potential and identifying strategies and policies necessary to harness its positive potential for achieving sustainable development and to mitigate its possible negative effects;

- (f) Provide policy guidance and recommendations on selected topics to Member States for the recovery from the socioeconomic impacts of the COVID-19 pandemic, building on the subprogramme's analytical work;
- (g) Provide support to the resident coordinator system through analytical inputs and customized online resources for the preparation of Common Country Analyses and United Nations Sustainable Development Cooperation Frameworks, as well as for COVID-19 recovery and other pertinent topics; raise awareness of macroeconomic and other socioeconomic development issues; and organize technical support activities for Member States in partnership with resident coordinator offices and in coordination with United Nations country teams, as needed;
- (h) Maintain the global economic outlook database, the least developed country criteria database, the Least Developed Countries Portal on international support measures and other online resources available to policymakers and other national and international stakeholders;
- (i) Provide Member States with solid information for the formulation of global, regional and national policies, by gathering country-level empirical evidence, organizing expert group meetings and preparing background studies on short- and long-term economic development thematic issues.

9.92 The above-mentioned work is expected to result in:

- (a) Greater articulation of short-term macroeconomic stability with long-term development goals, while advancing the achievement of the Sustainable Development Goals, through the better integration of economic, social and environmental priorities in national development plans and strategies;
- (b) Improved awareness among Member States of the necessary multilateral efforts and economic policy options for a sustainable recovery from the COVID-19 pandemic, consistent with the 2030 Agenda;
- (c) Improved information basis for the Committee for Development Policy and the Economic and Social Council when assessing and recommending least developed countries for graduation;
- (d) Enhanced awareness and knowledge of Member States and the international community about the development trajectory of the least developed countries, their risks and challenges and the specific support options;
- (e) Increased capacity of Member States to effectively use international support measures, prepare for graduation from the least developed country category, and ensure the stability of their development progress and the realization of the 2030 Agenda;
- (f) Enhanced coordination and efficacy of the United Nations development system, which will provide a more coherent cooperation framework towards the implementation of the 2030 Agenda and bolster sustainable development at the country level.

Programme performance in 2021

Endorsed policy recommendations for a faster recovery from the socioeconomic impacts of the COVID-19 pandemic

9.93 In the context of the COVID-19 pandemic, the subprogramme, in response to Economic and Social Council resolution [2020/10](#), undertook research on the impacts of the COVID-19 pandemic and on policy options for mitigation and to accelerate recovery. The subprogramme led the preparation of the Committee for Development Policy's comprehensive study on the impact of COVID-19 on the least developed country category for the Economic and Social Council. The subprogramme also prepared a scenario analysis that examined how recent events, such as the COVID-19 pandemic, have affected the outlook for Sustainable Development Goals 1, 2, 3, 8 and 10. The analysis

examined various scenarios that policymakers were likely to face in the aftermath of the global pandemic and proposed policy priorities to achieve the goals of the 2030 Agenda. The analytical work provided to Member States were in the form of written reports and web-based events, enhancing understanding of the socioeconomic impacts of the pandemic and raising awareness about potential setbacks in the development progress from previous years.

- 9.94 The analytical work on the impact of COVID-19 on the least developed countries category provided the basis for the Committee for Development Policy to recommend an extended preparatory period for several graduating least developed countries, allowing Member States from that group of countries to focus on more urgent socioeconomic challenges, prolonging their benefits from international support measures and maintaining a more stable development path. The report also reinforced multilateral cooperation for the least developed countries, as the Economic and Social Council also invited those countries and their development and trading partners to consider the findings of the Committee when designing, implementing and supporting strategies and policy measures to address the impacts of COVID-19 (Economic and Social Council resolution [2021/11](#), para. 13). Those findings will be incorporated to further enhance monitoring mechanisms for graduating and graduated countries.
- 9.95 Progress towards the objective is presented in the performance measure below (see table 9.18).

Table 9.18

Performance measure

<i>2015 (actual)</i>	<i>2018 (actual)</i>	<i>2021 (actual)</i>
–	–	<p>The comprehensive study increased awareness of the socioeconomic impacts of the COVID-19 pandemic in the least developed countries</p> <p>The Economic and Social Council endorsed new recommendations of the Committee for Development Policy, including the extension of the preparatory period for graduating countries and strengthening international support for the least developed countries</p>

Planned results for 2023**Result 1: strengthened economic analysis of macroeconomic and sustainable development impacts****Programme performance in 2021 and target for 2023**

- 9.96 The subprogramme's work contributed to the preparation of 15 common country analyses and United Nations Sustainable Development Cooperation Frameworks, including through a comprehensive macroeconomic analysis on debt sustainability and analytical support on technical feasibility for domestic bond issuance in Cambodia, and the use of climate, land, energy and water systems methodology in Ethiopia and Namibia, as well as on the implications of graduation from the least developed country category, which met the planned target.
- 9.97 Progress towards the objective and target for 2023 are presented in the performance measure below (see figure 9.IX).

Figure 9.IX
Performance measure: number of countries incorporating macroeconomic analysis and/or recommendations on graduation into their common country analyses and United Nations Sustainable Development Cooperation Frameworks (annual)

Result 2: strengthened economic analysis and knowledge of development policy options for accelerating progress towards achieving the Sustainable Development Goals, including through the recovery from the pandemic and the leveraging of megatrends

Programme performance in 2021 and target for 2023

- 9.98 The subprogramme’s work contributed to Member States having benefited from research and analytical outputs, with a particular focus on the opportunities and challenges posed by new technologies: two chapters for 2021 *World Social Report* on “reconsidering rural development” and two Frontier Technology Issues on issues related to a fossil fuel-free economy and addressing smallholder farmers specific challenges, which met the planned target.
- 9.99 Progress towards the objective and target for 2023 are presented in the performance measure below (see table 9.19).

Table 9.19
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	Member States have access to policy recommendations on addressing the short- and long-term impacts of COVID-19 on sustainable development	Member States benefited from increased knowledge and analysis on the economic and social benefits and challenges posed by new technologies	Member States have access to policy recommendations on two new thematic issues: the influence of new technologies on the structure of the economy and the impact of ongoing population ageing	Member States will have access to an up-to-date analysis on inequalities, as well as on other major socioeconomic challenges, and sustainable development policy recommendations to resolve them

Result 3: enhanced monitoring mechanism for graduating and recently graduated least developed countries, improved responsiveness to crisis and strengthened international support**Proposed programme plan for 2023**

- 9.100 The subprogramme supports the Committee for Development Policy which, at the request of the Economic and Social Council and the General Assembly, monitors the following: (a) the development progress of countries that are in the process of graduating from the least developed country category, on an annual basis; and (b) the development progress of graduated countries, in consultation with the respective Governments, on an annual basis for three years after graduation and triennially thereafter, coinciding with the two subsequent triennial reviews. In the monitoring exercise, the Committee considers information it receives from the countries that have been invited by the General Assembly to report to the Committee on the preparation and implementation of their transition strategy. The monitoring allows the Committee to bring any signs of deterioration in the development progress of the concerned country to the attention of the Economic and Social Council.

Lessons learned and planned change

- 9.101 The lesson for the subprogramme was that the current monitoring system should be more effective, as very few countries prepare them. The Committee for Development Policy has identified three main factors that limit the incentives for countries to participate in the monitoring: (a) the current monitoring mechanism is conducted only once a year, just prior to the plenary meeting of the Committee; (b) in case of a crisis, no immediate response can be organized; and (c) support and mitigating measures, including General Assembly resolutions on extending the preparatory period, are not linked with the outcomes of the monitoring. In applying the lesson, the subprogramme will develop an enhanced monitoring mechanism for the Committee, including a crisis response process, in line with the 2021 report of the Committee for Development Policy ([E/2021/33](#)).
- 9.102 The enhancements include a more comprehensive set of macroeconomic indicators, building on the improvements implemented in 2021; the utilization of the new supplementary graduation indicators, starting with the 2022 monitoring; the introduction of virtual consultations with countries, starting with the 2022 monitoring; and the development of country-specific crisis indicators, for the 2023 monitoring. The subprogramme will also design a crisis response process for further intergovernmental consideration in 2022 and 2023 that can be triggered upon request by the least developed countries or by reaching specific thresholds for the crisis indicators, that mobilizes existing crisis expertise of the United Nations system and other international entities. The enhancements are expected to result in an increase in the number of graduating and recently graduated least developed countries providing additional inputs and participating in the monitoring process, as well as better and more timely international responses in case of crisis.
- 9.103 Expected progress towards the objective is presented in the performance measure below (see figure 9.X)

Figure 9.X

Performance measure: number of least developed countries participating in the enhanced monitoring mechanism

Deliverables

9.104 Table 9.20 lists all deliverables of the subprogramme.

Table 9.20

Subprogramme 6: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	5	4	3	4
1. Reports to the General Assembly	3	2	1	2
2. Reports to the Economic and Social Council	2	2	2	2
Substantive services for meetings (number of three-hour meetings)	30	19	22	22
Meetings of:				
3. The General Assembly	14	8	6	6
4. The Economic and Social Council	8	3	6	6
5. The Committee for Development Policy	8	8	10	10
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	–	–	–
6. Projects on sustainable development	2	–	–	–
Seminars, workshops and training events (number of days)	34	34	45	45
7. Training events on sustainable development	34	34	45	45
Publications (number of publications)	2	2	2	2
8. Publications on the world economy	1	1	1	1
9. Committee for Development Policy note	1	1	1	1
Technical materials (number of materials)	61	54	65	50
10. Background studies on development and frontier issues and the world economy	14	12	11	7
11. Presentations on the global economy	25	2	4	2

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
12. Monthly briefing notes on the world economic situation	16	12	12	12
13. Reports from meetings on the world economy, development and frontier issues	3	3	3	2
14. Reports on the world economy	2	–	–	–
15. Committee for Development Policy background studies	1	5	11	10
16. Technical input for common country analyses/United Nations Sustainable Development Cooperation Framework	–	15	22	15
17. Policy briefs	–	5	2	2

C. Substantive deliverables

Consultation, advice and advocacy: policy advice on various economic thematic issues and/or economic national situations and to Member States on sustainable development issues, including high-level bilateral consultations and intergovernmental meetings.

Databases and substantive digital materials: ePing, an online platform providing information on World Trade Organization regulations on agreements on technical barriers to trade and the application of sanitary and phytosanitary measures; Least Developed Countries Portal on international support measures; least developed country data and impact assessments; modelling tools for sustainable development policies; and global economic outlook database.

D. Communication deliverables

External and media relations: press releases on the world economic situation.

Subprogramme 7 Public institutions and digital government

Objective

- 9.105 The objective, to which this subprogramme contributes, is to advance effective, accountable and inclusive governance and public institutions for sustainable development, including through innovation, digital government and digital transformation.

Strategy

- 9.106 To contribute to the objective, the subprogramme will:
- (a) Continue to service the Committee of Experts on Public Administration by providing policy advice and programmatic guidance to the Economic and Social Council and the high-level political forum on sustainable development. The subprogramme’s substantive support to the Committee includes organizing expert meetings and preparing analytical papers and technical guidelines to operationalize the principles of effective governance for sustainable development, developed by the Committee and endorsed by the Council in 2018, together with all relevant stakeholders;
 - (b) Continue to monitor global developments on institutional dimensions covered by Sustainable Development Goal 16 and to review national institutional arrangements for the achievement of the Goals, with a specific focus on countries in special situations. This will directly support the follow-up on and review of the 2030 Agenda at the global level. The subprogramme will continue to promote policy guidance on innovation, digital government and digital transformation for the Goals through the United Nations E-Government Survey;
 - (c) Foster policy dialogue and advocacy for the implementation of the outcomes of the World Summit on the Information Society. Continue to facilitate the implementation of and follow-up on the action lines of the Continue to facilitate the implementation, namely, C1 (the role of Governments and all stakeholders in the promotion of information and communications

technology (ICTs) for development), C7 (ICT applications: benefits in all aspects of life (e-government)) and C11 (international and regional cooperation);

- (d) Facilitate multi-stakeholder policy dialogue on Internet governance, including bottom-up engagement on issues such as data governance, digital inclusion and data protection (A/75/16, para. 204), and shape policy decisions at the global, national and local levels by supporting the Secretary-General in convening the annual meeting of the Internet Governance Forum and intersessional activities;
- (e) Expand capacity development support to respond to Member States' requests for technical cooperation with regard to strengthening their governance and public institutions and their human resource capacities in support for the decade of action, including through partnerships with regional commissions and the resident coordinator system;
- (f) Expand work on equipping public servants with the capacities to realize the 2030 Agenda by providing advisory support and developing and piloting new methodologies to strengthen leadership capacities, institutional arrangements for policy coherence, transparency and integrity in the public service, digital government, digital transformation and innovations in public service delivery, with an emphasis on countries in special situations, in collaboration with its project office on governance and the Resident Coordinator system;
- (g) Strengthen the capacity of Member States to promote innovation in public governance through new follow-up mechanisms to the United Nations Public Service Day Awards Ceremony and Forum, such as peer-to-peer learning for the transfer and adaptation of innovative practices, including on gender-sensitive analysis, and through the United Nations Public Administration Network;
- (h) Continue to support supreme audit institutions on auditing the achievement of the Sustainable Development Goals by providing analytical work, expert advice, technical assistance and capacity-building, on the basis of existing demand for support by groups of the International Organization of Supreme Audit Institutions;
- (i) Support Member States on issues related to COVID-19 by continuing to promote and leverage public governance innovative practices and digital government strategies to address the impact of COVID-19 and as an opportunity for further transformation of the public sector.

9.107 The above-mentioned work is expected to result in:

- (a) Enhanced awareness of emerging governance and public administration issues at the national and subnational levels and countries contextualizing institutional aspects of their voluntary national reviews so that Member States can develop their capacities to promote effective governance for sustainable development;
- (b) Increased capacities of Member States to build effective, accountable and inclusive institutions to deliver the Sustainable Development Goals;
- (c) Increased capacity of Member States in designing and implementing effective and inclusive digital government policies, strategies and services to improve people's lives;
- (d) Improved capacities of public servants to deliver services in areas such as health and education, justice, social protection and employment, with a focus on gender equality;
- (e) Adjustments by Member States at the structural, organizational and programme levels to accelerate delivery of the Sustainable Development Goals;
- (f) Adoption of digital government strategies to build resilient societies against the ongoing pandemic and future ones, and the closing of the digital divide.

Programme performance in 2021

Public servants equipped with the capacities to address COVID-19 and accelerate implementation of the Sustainable Development Goals to safeguard people's well-being

- 9.108 The 2021 *World Public Sector Report* took stock of the impacts of the COVID-19 pandemic on national institutions and the implications for delivering on the 2030 Agenda. Policy briefs were produced containing key policy messages and recommendations. Furthermore, a curriculum on governance for the Sustainable Development Goals was launched, containing ready-to-use and customizable training materials on key governance dimensions to advance the implementation of the Goals, including modules addressing COVID-19 recovery. Capacity development webinars also took place on leveraging public governance to address COVID-19 and accelerate implementation of the Goals. There was interaction with supreme audit institutions concerning events on accountability, transparency and citizen engagement during COVID-19. Sessions on integrating recovery planning from COVID-19, building resilience and strengthening policy coherence towards the Goals took place during the 2021 high-level political forum on sustainable development. The subprogramme provided support to the Resident Coordinator system by contributing to common country analyses in 22 countries. The 2021 United Nations Public Service Awards were held, including a focus on innovative practices on gender-responsive public services to achieve the Goals. The sixteenth meeting of the Internet Governance Forum was organized under the overall theme of "Internet United". These activities resulted in the increased capacities of Member States to promote transparency, accountability, policy coherence and social inclusion of people in vulnerable situations, as well as innovation and digital government in the public sector. The programme increased the capacities of Member States by equipping public servants with the capacities to address COVID-19 and accelerate implementation of the Goals. These activities resulted in increased capacities of Member States on key Internet governance and digital policy issues.
- 9.109 Progress towards the objective is presented in the performance measure below (see table 9.21).

Table 9.21

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
Member States have access to a competency framework for the Sustainable Development Goals, aimed at strengthening capacities of schools of public administration	To recover from COVID-19, more than 100 Member States gained access to relevant knowledge on how to promote effective public institutions and digital government in their everyday work	Enhanced understanding of over 14,000 policymakers in over 100 Member States of the impacts of the COVID-19 pandemic on national institutions and their implications for delivering on the 2030 Agenda

Planned results for 2023

Result 1: digital government and digital transformation

Programme performance in 2021 and target for 2023

- 9.110 The subprogramme's work contributed to 145 Member States providing online services for people in vulnerable situations and women, which met the planned target.
- 9.111 Progress towards the objective and target for 2023 are presented in the performance measure below (see figure 9.XI).

Figure 9.XI
Performance measure: number of Member States providing online services for people in vulnerable situations and women (annual)

Result 2: digital inclusion of those who are vulnerable in countries in special situations

Programme performance in 2021 and target for 2023

- 9.112 The subprogramme’s work contributed to increasing the capacities of Member States to bridge the digital divide by promoting the inclusion of people in vulnerable situations through the provision of online services, in particular in countries in special situations (least developed countries, landlocked developing countries and small island developing States), with 130 Member States providing online services to people living in poverty, which met the planned target.
- 9.113 Progress towards the objective and target for 2023 are presented in the performance measure below (see figure 9.XII).

Figure 9.XII
Performance measure: number of Member States providing online services to those who are vulnerable, disaggregated by group (annual)

Result 3: public institutions empowered to spearhead climate action**Proposed programme plan for 2023**

9.114 The programme has addressed closely the role of public institutions and climate action, including by the Committee of Experts on Public Administration and the subprogramme's analytical work and capacity development, with a focus on small island developing States. Strengthening the capacities of public institutions to spearhead climate change action is essential for Member States to reverse and adapt to climate change trends. There is an increasing recognition that no progress can be made in addressing climate change without concerted actions and capacities at the institutional, organizational and individual levels of national and local governments.

Lessons learned and planned change

9.115 The lesson for the subprogramme was that it needed to address the challenges identified at the institutional level, such as low levels of collaboration and lack of long-term environmental planning and strategic foresight, in order to promote effective policy coherence and sustainable development, linking post-COVID-19 recovery needs to long-term sustainable development. Weak national to local governance mechanisms may stifle the ability to spearhead climate action, including in the area of disaster risk reduction and management through the use of innovative technologies. At the organizational and individual levels, public institutions are impeded by a silos-based organizational culture and limited capacities to spearhead climate action. These impede the performance and responsiveness of the public service. In applying the lesson, the subprogramme will assist Governments to increase capacities to promote climate action at the institutional, organizational and individual levels.

9.116 Expected progress towards the objective is presented in the performance measure below (see table 9.22).

Table 9.22

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Embedded institutional arrangements at the national level to promote sustainable development	Enhanced institutional arrangements to facilitate coordination among ministries in the integrated assessment and evaluation of climate action policies in support of national development plans and the Sustainable Development Goals	Enhanced capacities for integrated planning towards achieving the Sustainable Development Goals, linking post-COVID-19 recovery needs to long-term sustainable development objectives	Member States have established effective national to local governance mechanisms for climate action, including on disaster risk reduction and management, through the use of innovative technologies	Member States have developed organizational and individual capacities to promote systems thinking and strategic planning, as well as experimental, foresight, digital and evidence-based mindsets and competencies among public servants in support of climate action

Deliverables

9.117 Table 9.23 lists all deliverables of the subprogramme.

C. Substantive deliverables

Consultation, advice and advocacy: guidelines, manuals or materials for the public sector; briefings/expert advice to Member States on sustainable development issues, including high-level bilateral consultations and intergovernmental meetings; and knowledge-sharing and networks, including the United Nations Public Administration Network, a global network that connects relevant international, regional, subregional and national institutions and experts worldwide working on effective governance and public administration for sustainable development in line with Sustainable Development Goal 16.

Databases and substantive digital materials: databases on issues related to public administration, such as the E-Government Knowledge Base and the United Nations Public Service Awards hub that track issues at the national level.

D. Communication deliverables

Outreach programmes, special events and information materials: United Nations Public Administration Network newsletter.

Digital platforms and multimedia content: web pages of the subprogramme, including the United Nations Project Office on Governance, the Internet Governance Forum, the United Nations Public Administration Network and the Division for Public Institutions and Digital Government websites.

Subprogramme 8 Sustainable forest management

Objective

- 9.118 The objective, to which this subprogramme contributes, is to ensure the effective implementation of sustainable management of all types of forests at all levels in accordance with the United Nations strategic plan for forests 2017–2030.

Strategy

- 9.119 To contribute to the objective, the subprogramme will:
- (a) Continue to support the intergovernmental forest policy dialogue through the United Nations Forum on Forests in accordance with the strategic plan and the quadrennial programme of work (2021–2024) and coordinate the Forum’s input to the high-level political forum on sustainable development;
 - (b) Advance coordination and cooperation with relevant United Nations entities, member organizations of the Collaborative Partnership on Forests and other forest stakeholders;
 - (c) Continue to develop the online clearing house of the Global Forest Financing Facilitation Network and assist countries and partners in designing forest financing strategies and in developing bankable project proposals to gain access to financing for sustainable forest management;
 - (d) Place an emphasis on the special needs and circumstances of Africa, the least developed countries, countries with low forest cover, countries with high forest cover, countries with medium forest cover and low deforestation and small island developing States, as well as countries with economies in transition (Economic and Social Council resolution [2017/4](#), para. 63);
 - (e) Continue to advance the implementation of the United Nations strategic plan for forests 2017–2030 and to assist countries in developing robust national reporting frameworks;
 - (f) Continue to support common country analyses through the United Nations Sustainable Development Cooperation Framework in order to provide resident coordinators with the tools to tailor their responses to countries’ specific needs and realities and to effectively support national implementation of sustainable forest management;

- (g) Continue to implement the communications and outreach strategy of the United Nations strategic plan for forests 2017–2030;
- (h) Support Member States on issues related to COVID-19 by further deepening its normative work, technical assistance and capacity-building activities and international policy dialogue on the impact and implications of the pandemic on sustainable forest management, and the challenges that countries are facing in reducing these impacts in line with the resolutions adopted by the United Nations Forum on Forests at its fifteenth and seventeenth sessions, and outcome of the sixteenth session.

9.120 The above-mentioned work is expected to result in:

- (a) Strengthened political commitment and action for sustainable forest management, leading to increased contributions by forests to implementation of the 2030 Agenda, biological diversity conservation, climate change mitigation and adaptation, and greater integration of forests into national sustainable development plans, COVID-19 stimulus packages and recovery plans, and poverty reduction strategies;
- (b) Improved capacity of eligible countries to mobilize and gain access to financing for sustainable forest management from all sources, and improved information on and access to existing and emerging multilateral and other funding sources and data;
- (c) Member States' progress towards achieving the global forest goals and the forest-related Sustainable Development Goals;
- (d) Increased awareness among Member States of the multiple benefits of forests based on the 2022 theme of the International Day of Forests, and on the contribution of forests to the Sustainable Development Goals that will be reviewed during the high-level political forum on sustainable development in 2022;
- (e) Identification of emerging opportunities, potential responses and measures for the forest sector's recovery from the COVID-19 pandemic and the enhanced contribution of forests to inclusive sustainable development.

Programme performance in 2021

Forest sector sustainable management practices contributed to COVID-19 recovery

- 9.121 The forest sector has been heavily affected by the COVID-19 pandemic and by measures to contain its spread. Due to the broad range of vital services that forests provide for economic functioning and human well-being, as well as their roles in providing income and livelihoods, especially for rural communities, indigenous peoples, small farms holders and other forest-dependent communities, it was important to assess the challenges that countries face and identify the opportunities for the forest sector to play a key role in advancing a transformative change towards sustainable post-COVID-19 recovery. The programme carried out a global assessment of the challenges countries face and the strategies, recovery measures and best practices implemented to reduce the impact of the pandemic on forests and the forest sector. In carrying out that work, the subprogramme commissioned 16 regional and subregional assessments in Africa, Asia-Pacific, Latin America and the Caribbean, Eastern Europe, North America (United States and Canada) and Western Europe and other groups. The above-mentioned work contributed to the objective, as demonstrated by Member States having increased knowledge of strategies, recovery measures and best practices for reducing the impact of COVID-19 on forests and the forest sector.
- 9.122 Progress towards the objective is presented in the performance measure below (see table 9.24).

Table 9.24
Enhanced knowledge of challenges in addressing COVID-19, strategies and recovery measures in the forest sector

2019 (actual)	2020 (actual)	2021 (actual)
–	–	Member States have enhanced knowledge of the challenges in addressing the impacts of COVID-19 on sustainable forest management, including the strategies, recovery measures and best practices adopted by countries and other stakeholders to address the impacts of the pandemic on forests and the forest sector

Planned results for 2023

Result 1: progress towards advancing the United Nations strategic plan for forests for stakeholders

Programme performance in 2021 and target for 2023

- 9.123 The subprogramme’s work contributed to effective implementation of sustainable management of all types of forests at all levels, guided by the quadrennial programme of work for the period 2021–2024 in two countries, including by providing assistance and advice to countries and subregional organizations with regard to developing bankable project proposals to gain access to financing for sustainable forest management and designing national forest financing strategies, which met the planned target.
- 9.124 Progress towards the objective and target for 2023 are presented in the performance measure below (see figure 9.XIII).

Figure 9.XIII
Performance measure: number of countries with increased knowledge of the global trends on the implementation of the United Nations strategic plan for forests 2017–2030 and increased capacity to mobilize funding for forests (annual)

Result 2: strengthened access by Member States to data on financing sustainable forest management

Programme performance in 2021 and target for 2023

- 9.125 The subprogramme’s work contributed to countries’ efforts towards achieving global forest goal 4 and Sustainable Development Goal 15.b. Member States have access to phase 1 of the clearing house with 130 data entries on financing opportunities for forests, learning materials and lessons learned and best practices, which exceeded the planned target of 80 data entries.
- 9.126 Progress towards the objective and target for 2023 are presented in the performance measure below (see table 9.25).

Table 9.25
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
–	Member States’ data needs are incorporated into the finalization of the design of the clearing house website	Member States have access to the clearing house phase 1, including 130 data entries on financing opportunities for forests, learning materials and lessons learned and best practices	Member States use the data in the clearing house to make progress towards achieving global forest goal 4 and target 15.b of the Sustainable Development Goals, including in the context of COVID-19 recovery plans Member States have access to an additional 80 data entries added to the databases on financing opportunities for forests, learning materials and lessons learned and best practices, including in the context of COVID-19 recovery plans	Member States have access to one additional database on forest financial flows and use the data in the clearing house to make progress towards achieving global forest goal 4 and target 15.b of the Sustainable Development Goal 15, including in the context of COVID-19 recovery plans

Result 3: strengthened effectiveness of the International Arrangement on Forests to address climate change and biodiversity loss

Proposed programme plan for 2023

- 9.127 Promoting the sustainable management of all types of forests is essential to ensure that forests remain as healthy, productive, resilient and renewable ecosystems, mitigating the adverse impacts of climate change and preventing biodiversity loss, while providing essential goods and services to people worldwide. In accordance with Economic and Social Council resolution 2015/33, in 2024, the United Nations Forum on Forests will undertake a midterm review of the effectiveness of the international

arrangement on forests in achieving its objective. In the context of preparing for the midterm review, the subprogramme plans to promote coherence, synergies with other main global forest-related processes, including the Paris Agreement on climate change and the post-2020 global biodiversity framework. The programme in 2021 initiated preparations for the midterm review, focusing on identifying proposals for consideration of the Forum at its seventeenth session, to promote a synergetic agenda on forests, climate change and biodiversity in support of the global forest-related goals and commitments. This preparatory work continued in 2022 and will culminate in 2023 in the adoption of concrete proposals that will be considered in the midterm review in 2024 at the nineteenth session of the Forum.

Lessons learned and planned change

- 9.128 The lesson for the subprogramme was that it needed to increase its focus efforts, including the communications strategy on highlighting the interdependent role of forests in enabling the world to meet the Sustainable Development Goals, contributing to climate change adaptation and maintaining eco-system services. In applying the lesson, the subprogramme will continue to develop knowledge-promoting materials, conduct both in person and virtual capacity-building efforts (training workshop) and work in collaboration with the Collaborative Partnership on Forests, regional partners, major groups and United Nations country teams to ensure action at all global, regional and national levels. The subprogramme also plans to enhance the contribution of forests to addressing climate change and biodiversity loss, by contributing to the implementation of the outcomes of the twenty-sixth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change of the United Nations Framework Convention on Climate Change and the post-2020 global biodiversity framework.
- 9.129 Expected progress towards the objective is presented in the performance measure below (see table 9.26).

Table 9.26

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
–	–	–	Member States benefit from preparations for the midterm review of the international arrangement on forests, including by submitting their proposals to strengthen the arrangement, including national actions to enhance the contributions of forests to other global forest-related goals and commitments, including climate change and biodiversity	Member States develop proposals to strengthen the international arrangement on forests that also include national actions to enhance the contributions of forests to other global forest-related goals and commitments, including climate change and biodiversity

Deliverables

9.130 Table 9.27 lists all deliverables of the subprogramme.

External and media relations: press conference/press releases on the United Nations Forum on Forests and the International Day of Forests.				

Subprogramme 9 Financing for sustainable development

Objective

- 9.131 The objective, to which this subprogramme contributes, is to advance the follow-up to and review of the implementation of the outcomes of the International Conferences on Financing for Development, including the Addis Ababa Action Agenda and the delivery of the means of implementation of the 2030 Agenda for Sustainable Development.

Strategy

- 9.132 To contribute to the objective, the subprogramme will:
- (a) Build on continuing analytical work in collaboration with partners in the Inter-Agency Task Force on Financing for Development; prepare the annual *Financing for Sustainable Development Report* and other reports to support Member State negotiations at the Economic and Social Council forum on financing for development follow-up, Second Committee deliberations and others; advance implementation of integrated national financing frameworks, which will help to guide countries in mobilizing financing and other means of implementation for sustainable development;
 - (b) Scale up investment for the Sustainable Development Goals; provide concrete solutions to scale up investment in sustainable development through the work of the Global Investors for Sustainable Development Alliance; facilitate the dialogue on sustainable investment, including through the Sustainable Development Goals Investment Fair, which provides a platform for direct engagement between Member States and investors;
 - (c) Foster international tax cooperation and support Member States in enhancing their tax policies and administration, to improve their domestic resource mobilization, increase fiscal space, recover from the COVID-19 pandemic, and help them get the Sustainable Development Goals back on track. The strategy in this respect entails advancing the subprogramme's integrated approach to the policy and capacity-building work in the tax and domestic resource mobilization area to respond effectively to the needs of countries, in particular the least developed countries, landlocked developing countries and small island developing States;
 - (d) Enhance its support for the Development Cooperation Forum in its action-oriented and results-focused reviews of trends, progress and emerging issues in international development cooperation, with an emphasis on policies and practices in support of those with the fewest resources and the weakest capacities;
 - (e) Follow up on the results of the workstreams of the Initiative on Financing for Development in the Era of COVID-19 and Beyond. This initiative is intended to enable discussions of concrete financing solutions to the economic and social crisis triggered by the COVID-19 pandemic, as part of ongoing analytical work, including through leading the work of the Inter-Agency Task Force on Financing for Development, for the *Financing for Sustainable Development Report* and for the methodology and implementation of integrated national financing frameworks.
- 9.133 The above-mentioned work is expected to result in:
- (a) Direct contributions to advancing policy and action on financing for sustainable development through strengthened analytical foundations for the outcomes of the Economic and Social Council forum on financing for development follow-up and Second Committee deliberations;
 - (b) Countries designing and using integrated national financing frameworks, including actionable policy options to mobilize financing for sustainable development;
 - (c) The acceleration of the mobilization of resources for the Sustainable Development Goals, leading to greater investment opportunities with positive impacts;

- (d) More effective implementation by Governments and other stakeholders of United Nations policy and practical guidance on tax matters and better solutions at the global, regional, national and local levels for strengthening domestic resource mobilization;
- (e) Utilization by Governments and other stakeholders of policy guidance to enhance international development cooperation, for the effective implementation of the 2030 Agenda, the Addis Ababa Action Agenda, the Paris Agreement and the Sendai Framework for Disaster Risk Reduction 2015–2030;
- (f) Strengthened analytical foundations for Member State negotiations on financing for sustainable development options in the context of COVID-19 and in the recovery phase.

Programme performance in 2021

Advanced high-level discourse on the elimination of illicit financial flows

- 9.134 Illicit financial flows erode domestic resource mobilization and directly undermine the collective efforts of the global community to successfully achieve the Sustainable Development Goals. In March 2020, the President of the General Assembly and the President of the Economic and Social Council jointly convened the High-level Panel on International Financial Accountability, Transparency and Integrity for Achieving the 2030 Agenda to provide political leadership and a bold vision for changing the international institutional architecture. The subprogramme provided substantive and logistical support to the work of the High-level Panel. The subprogramme provided coordinated expert contributions, including eight in-depth background papers, wide-ranging multi-stakeholder consultations and dialogues and the production of two reports. The Panel’s February 2021 report, *Financial integrity for sustainable development*, enhanced global policy dialogue on measures to reduce corruption, counter money-laundering and combat tax avoidance and evasion.
- 9.135 Progress towards the objective is presented in the performance measure below (see table 9.28).

Table 9.28
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	Eight expert background papers and one interim report made available to the High-level Panel on International Financial Accountability, Transparency and Integrity for Achieving the 2030 Agenda to inform their discussions on options for the elimination of illicit financial flows	The High-level Panel on International Financial Transparency and Integrity for Achieving the 2030 Agenda report on financial integrity for sustainable development enabled Member States to debate coherent changes to global norms related to corruption, money-laundering and tax avoidance and evasion

Planned results for 2023

Result 1: integrated national financial frameworks

Programme performance in 2021 and target for 2023

- 9.136 The subprogramme’s work contributed to 89 countries developing integrated national financial frameworks, which exceeded the planned target of 20 countries. The target was exceeded owing to higher demand from countries than earlier anticipated.

9.137 Progress towards the objective and target for 2023 are presented in the performance measure below (see figure 9.XIV).

Figure 9.XIV

Performance measure: number of countries developing integrated national financial frameworks (cumulative)

Result 2: strengthened capacities of developing countries for the design and implementation of fiscal, financial and related policies that reduce risks and build resilience

Programme performance in 2021 and target for 2023

9.138 The subprogramme’s work contributed to increased awareness of government officials of national ministries of finance, tax administrations and other ministries, departments and offices at the regional, national and local levels participants, of the importance and the role of: (a) fiscal policies and practices; (b) infrastructure asset management; and (c) effective development cooperation to manage risk and build resilience, with 90 per cent of trained government officials having reported an increased awareness and understanding of how the above-referenced policies, practices and tools can help to manage risk and build resilience, which exceeded the planned 2021 target of 70 per cent.

9.139 Progress towards the objective and target for 2023 are presented in the performance measure below (see table 9.29).

Table 9.29

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	90 per cent of national ministry of finance and tax administration staff attending capacity development activities report increased awareness and understanding of fiscal policies and practices to reduce risk and build resilience	75 per cent of national ministry of finance and tax administration staff attending capacity development activities report increased awareness and understanding of fiscal policies and practices to reduce risk and build resilience	90 per cent of national ministry of finance and tax administration staff report increased awareness and understanding of fiscal policies and practices to reduce risk and build resilience

Result 3: enhanced capacity of developing countries in attracting sustainable investments for the Sustainable Development Goals

Proposed programme plan for 2023

9.140 The COVID-19 pandemic contributed to a decline in national and international investments, and developing countries needed assistance to identify and develop concrete sustainable development investment opportunities. The programme strengthened efforts to support the mobilization of private investment for sustainable development in developing countries, as emphasized in the Addis Ababa Action Agenda. To expand the capacities of Governments to engage with the private sector and to enhance the support to countries in preparing presentations for investors, the subprogramme converted the annual matchmaking event – the Sustainable Development Goals Investment Fair – into a year-round standing network. This network now provides continuous opportunities for direct engagements between Governments and investors.

Lessons learned and planned change

9.141 The lesson for the subprogramme was that its support to developing countries to increase their capacity to attract private investment, including in areas such as project pipeline development and presentation of investment opportunities and engagement with investors, required a change in the format in order to ensure continuous engagement.

9.142 In applying the lesson, the programme will build the capacity of developing countries to attract investments for achieving the Sustainable Development Goals, particularly from the private sector. This will be done through four critical steps: (a) organizing a series of national and regional workshops to support developing countries with the identification of sustainable development investment opportunities; (b) providing substantive reviews of project proposals to strengthen their viability for private investors; (c) continuing to increase the number of countries presenting investment opportunities to the private sector at the Sustainable Development Goals Investment Fair; and (d) supporting follow-up activities to further elevate project profiles and to facilitate engagement with investors. In that context, the subprogramme will need to expand its capacity to support countries with the development of viable projects, including with the preparation of their presentations and engagement with private investors at the Sustainable Development Goals Investment Fair.

9.143 Expected progress towards the objective is presented in the performance measure below (see table 9.30).

Technical materials (number of materials)	4	10	4	4
23. Building on Monterrey: selected policy issues on financing for development	1	3	1	1
24. Analytical studies on selected issues in development cooperation, including South-South cooperation, and an independent assessment of trends and progress in development cooperation	2	6	2	3
25. Issues note summarizing selected issues in the <i>Financing for Sustainable Development Report</i>	1	1	1	–

C. Substantive deliverables

Consultation, advice and advocacy: consultations on the work of the Group of Friends on Financing the Sustainable Development Goals; consultations on financing sustainable development and the Goals to members of civil society organizations, the private sector, including the Global Investors for Sustainable Development Alliance, academia, foundations and other entities of the United Nations system; and briefings/expert advice to Member States on sustainable development issues, including high-level bilateral consultations and intergovernmental meetings.

D. Communication deliverables

External and media relations: press releases on its annual work, including: Economic and Social Council forum on financing for development follow-up; biennial Development Cooperation Forum high-level meeting, event on financing for sustainable development multi-stakeholder consultations on financing for development; work of the Committee of Experts on International Cooperation in Tax Matters; Sustainable Development Goal Investment Fair; launch of the *Financing for Sustainable Development Report*; and implementation of the Global Investors for Sustainable Development Alliance.

Digital platforms and multimedia content: Op-eds and blogs; websites of the Financing for Sustainable Development Office, such as the financing for sustainable development homepage, the Inter-Agency Task Force on Financing for Development online annex, the website of the Development Cooperation Forum, the website of the Committee of Experts on International Cooperation in Tax Matters, the website of the joint Department of Economic and Social Affairs/United Nations Capital Development Fund and United Nations Office for Project Services global capacity development initiative on infrastructure asset management; the website of the Global Investors for Sustainable Development Alliance and the integrated national financing frameworks knowledge platform; development and production of Development Cooperation Forum newsletters and other outreach materials; and information kit for events on financing for sustainable development.

B. Proposed post and non-post resource requirements for 2023

Overview

9.145 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 9.32 to 9.34.

Table 9.32

^a Includes nine temporary posts (3 P-5, 2 P-4, 3 P-3 and 1 GS (OL)), which were approved pursuant to General Assembly resolutions [70/248](#) and [71/272](#).

9.146 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 9.35 to 9.37 and figure 9.XV.

9.147 As reflected in tables 9.35 (1) and 9.36 (1), the overall resources proposed for 2023 amount to \$85,814,100 before recosting, reflecting a net increase of \$178,000 (or 0.2 per cent) compared with the appropriation for 2022. Resource changes result from three factors, namely: (a) technical adjustments; (b) new and expanded mandates; and (c) other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

9.148 As reflected in table 9.35 (1), resource changes reflect an increase of \$217,600, as follows:

- (a) **Subprogramme 2, Inclusive social development.** The increase of \$75,600 relates to the annual provision of a post of Social Affairs Officer (P-3), which was established in 2022 pursuant to General Assembly resolution [76/245](#) and was subject to a 50 per cent vacancy rate in accordance with established practice;
- (b) **Subprogramme 3, Sustainable development; subprogramme 7, Public institutions and digital government; and programme support.** The total increase of \$142,000 relates to the annual provision of a post of Senior Programme Management Assistant (General Service (Principal level)) under subprogramme 3 (\$42,800), a post of Associate Information Systems Officer (P-2) under subprogramme 7 (\$62,400) and a post of Finance and Budget Assistant (General Service (Other level)) under programme support (\$36,800), which were reassigned in 2022 pursuant to General Assembly resolution [76/245](#) and were subject to a 50 per cent vacancy rate in accordance with established practice.

New and expanded mandates

9.149 As reflected in table 9.35 (1), resource changes reflect an increase of \$59,600 under subprogramme 2, Inclusive social development, related to non-recurrent requirements for the preparation, in collaboration with the United Nations Human Settlements Programme, of a report on inclusive social development policies and programmes to address homelessness, pursuant to General Assembly resolution [76/133](#). The resources would provide for general temporary assistance at the P-3 level for four months to conduct focused research on challenges faced by disadvantaged social groups, such as indigenous peoples, older persons, persons with disabilities and young people.

Other changes

- 9.150 As reflected in table 9.35 (1), resource changes reflect a net decrease of \$99,200, as follows:
- (a) **Policymaking organs.** The decrease of \$42,100 under travel of representatives relates to the proposed outward redeployment of resources to subprogramme 1 to accommodate the travel of members of the Ad Hoc Advisory Group on Haiti, pursuant to General Assembly resolution [76/246 A](#). The decrease would be based on pre-pandemic patterns of expenditure;
 - (b) **Executive direction and management.** The decrease of \$62,400 relates to the proposed reassignment of one post of Associate Information Systems Officer (P-2) as an Associate Public Information Officer (P-2), which is subject to a 50 per cent vacancy rate in accordance with established practice (see annex II);
 - (c) **Subprogramme 1, Intergovernmental support and coordination for sustainable development.** The increase of \$42,100 under travel of representatives relates to the proposed inward redeployment of resources from policymaking organs to cover the travel of members of the Ad Hoc Advisory Group on Haiti, pursuant to General Assembly resolution [76/246 A](#);
 - (d) **Programme support.** The decrease of \$36,800 relates to the proposed reassignment of one post of Human Resources Assistant (General Service (Other level)) as a Programme Management Assistant (General Service (Other level)), which is subject to a 50 per cent vacancy rate in accordance with established practice (see annex II).

Extrabudgetary resources

- 9.151 As reflected in tables 9.35 (2) and 9.36 (2), the Department expects to continue to receive both cash and in-kind contributions, which would complement regular budget resources. In 2023, extrabudgetary resources (cash contributions) are estimated at \$82,368,100 and would provide for 35 posts, as presented in table 9.36 (2). The resources would be used mainly to provide for various substantive and capacity development activities, as described under each subprogramme. Extrabudgetary estimates also include resources in the amount of \$49,751,200 for the trust funds for the Junior Professional Officers Programme and the United Nations Assistance to the Khmer Rouge Trials, which the Department administers (both reflected under programme support). The expected net decrease of \$12,468,400 is attributable mainly to the anticipated full implementation and completion of various projects in 2022 and an estimated reduction in the number of projects in 2023, together with a decrease in contributions for the United Nations Assistance to the Khmer Rouge Trials, offset in part by an anticipated increase in contributions for the Junior Professional Officers Programme. Extrabudgetary resources represent 49.0 per cent of the total resources for this section.
- 9.152 Anticipated in-kind contributions will provide for donated right of use of premises for project offices with an estimated value of \$300,000 (\$256,000 under subprogramme 3 and \$44,000 under subprogramme 7), and other services such as expert advice, use of training facilities and provision of equipment, with an estimated value of \$337,000 (\$75,000 under subprogramme 3 and \$262,000 under subprogramme 7).
- 9.153 The extrabudgetary resources under this section are subject to the oversight of the Department, which has delegated authority from the Secretary-General.

Policymaking organs

- 9.154 The resources proposed under this component would provide for requirements relating to standing intergovernmental organs and expert bodies, special sessions of the General Assembly and intergovernmental processes serviced by the Department. The provisions for experts serving on committees in their individual capacity are in accordance with Assembly resolution [2491 \(XXIII\)](#), as amended by resolutions [41/176](#), [42/25](#), section VI, and [43/217](#), section IX, while the provisions for members of the functional commissions are in accordance with Assembly resolutions [1798](#)

(XVII), 2128 (XX) and 2245 (XXI). Table 9.38 provides information on the standing intergovernmental organs and expert bodies and related resource requirements under the regular budget.

Table 9.38

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2022 appropriation</i>	<i>2023 estimate (before recosting)</i>
High-level political forum on sustainable development	<p>The forum provides political leadership, guidance and recommendations for sustainable development, follows up on and reviews progress in the implementation of sustainable development commitments, enhances the integration of the 3 dimensions of sustainable development and has a focused, dynamic and action-oriented agenda, ensuring the appropriate consideration of new and emerging sustainable development challenges.</p> <p>The forum also reviews progress in the implementation of the 2030 Agenda and the achievement of the Sustainable Development Goals and oversees a network of follow-up and review processes at the global level. In addition, the forum conducts voluntary national reviews and thematic reviews every year under the auspices of the Economic and Social Council.</p> <p>The travel of representatives from the least developed countries to the meetings is funded from the regular budget. The outcome of the meetings of the forum under the auspices of the Council is a negotiated ministerial declaration. In those years when the forum also meets under the auspices of the General Assembly (every 4 years), a negotiated political declaration is adopted only by the forum convened under the auspices of the Assembly.</p>	<p>Mandate: General Assembly resolutions 66/288, 67/290 and 70/299</p> <p>Membership: All States Members of the United Nations and States members of the specialized agencies</p> <p>Number of sessions in 2022: 1</p> <p>Number of sessions in 2023: 2 (1 annual session under the auspices of the Economic and Social Council and 1 session under the auspices of the General Assembly at the Head of State level)</p>	426.8	426.8
Commission for Social Development	<p>The Social Commission was established in 1946 as a functional commission of the Economic and Social Council. In 1966, the Council renamed it the Commission for Social Development to clarify its role as a preparatory body of the Council for the entire range of social development policy issues. In 1996, the Council decided that the Commission would have the primary responsibility for follow-up to the World Summit for Social Development and review of the implementation of the Copenhagen Declaration on Social Development and the Programme of Action of the World Summit for Social Development. In 2016, the Council affirmed that the Commission would contribute to the follow-up to the 2030 Agenda, within its existing mandate, by supporting the thematic reviews of the high-level political forum on sustainable development on progress on the achievement of the Sustainable Development Goals.</p>	<p>Mandate: Economic and Social Council resolutions 10 (II), 1139 (XLI), 1996/7 and 2016/6</p> <p>Membership: 46 government officials</p> <p>Number of sessions in 2022: 1</p> <p>Number of sessions in 2023: 1</p>	116.8	116.8

Section 9 Economic and social affairs

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2022 appropriation</i>	<i>2023 estimate (before recosting)</i>
Permanent Forum on Indigenous Issues	The Permanent Forum is a subsidiary organ of the Economic and Social Council. Its members serve in their personal capacity as independent experts on indigenous issues. The Permanent Forum serves as an advisory body to the Council with a mandate to discuss indigenous issues within the mandate of the Council relating to economic and social development, culture, the environment, education, health and human rights.	Mandate: Economic and Social Council resolution 2000/22 Membership: 16 experts Number of sessions in 2022: 1 Number of sessions in 2023: 1	202.3	202.3
Statistical Commission	The Commission is a functional commission of the Economic and Social Council. It assists the Council in promoting the development of national statistics and the improvement of their comparability, coordinating the statistical work of the specialized agencies, developing the central statistical services of the Secretariat, advising the organs of the United Nations on questions relating to the collection, analysis and dissemination of statistical information and promoting the improvement of statistics and statistical methods in general.	Mandate: Economic and Social Council resolution 1566 (L), reaffirming its resolution 8 (I), as amended by 8 (II) of 1946; and resolutions 2006/6 and 2020/5 Membership: 24 government officials Number of sessions in 2022: 1 Number of sessions in 2023: 1	60.7	60.7
Committee of Experts on Global Geospatial Information Management	The Committee is a subsidiary body of the Economic and Social Council. The Committee makes joint decisions and sets directions on the production, availability and application of geospatial information within national and global policy frameworks, promotes common principles, policies, methods, mechanisms and standards for the interoperability of geospatial data and services, and provides a platform for the development of effective strategies on how to build and strengthen national capacity concerning geospatial information, especially in developing countries. The Committee is administered within existing resources and is organized accordingly.	Mandate: Economic and Social Council resolution 2011/24 and 2016/27 Membership: experts from all Member States and experts from international organizations who participate as observers Number of sessions in 2022: 1 Number of sessions in 2023: 1	–	–
Commission on Population and Development	The Commission on Population and Development is a functional commission of the Economic and Social Council. The Commission assists the Council by: (a) arranging for studies and advising the Council on population issues and trends, the integration of population and development strategies, population and related development policies and programmes and the provision of population assistance, as well as addressing population and development questions on which either the principal or the subsidiary organs of the United Nations or the specialized agencies may seek advice; (b) monitoring, reviewing and assessing the implementation of the Programme of Action of the International Conference on Population and Development at the national, regional and global levels, identifying reasons for success and failure and advising the Council thereon; and (c) reviewing the findings of research and analysis pertaining to the interrelationships between population and development at the national, regional and international levels and advising the Council thereon.	Mandate: Economic and Social Council resolutions 3 (III), 150 (VII) and 2016/25 and decision 1995/320, and General Assembly resolution 49/128 Membership: 47 government officials Number of sessions in 2022: 1 Number of sessions in 2023: 1	70.0	70.0

Part IV International cooperation for development

<i>Policy-making organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2022 appropriation</i>	<i>2023 estimate (before recosting)</i>
Committee for Development Policy	The Committee is a subsidiary body of the Economic and Social Council. It considers the annual theme of the Council and is called upon to undertake a triennial review of the status of least developed countries and to meet on that issue once every 3 years. The Committee also monitors the development progress of graduated countries on a yearly basis for a period of 3 years after graduation became effective, and triennially thereafter, as a complement to the 2 triennial reviews of the list of least developed countries carried out by the Committee. It briefs the Council every 4 years, in the year preceding the quadrennial comprehensive policy review, on how the United Nations development system is applying the least developed country category.	Mandate: Economic and Social Council resolutions 1998/46 and 2017/29 and General Assembly resolution 67/221 Membership: 24 experts serving in their personal capacity from the fields of economic development, social development and environmental protection Number of sessions in 2022: 1 Number of sessions in 2023: 1	197.5	197.5
Committee of Experts on Public Administration	The Committee is a subsidiary body of the Economic and Social Council. It supports intergovernmental deliberations by providing policy advice and programmatic guidance to improve governance and public administration structures and processes for development. It also assists the Council by reviewing trends, issues and priorities in public administration and institution-building, notably in relation to the 2030 Agenda and in support of the implementation and progress reviews of the Sustainable Development Goals.	Mandate: Economic and Social Council resolutions 2001/45 and 2003/60 Membership: 24 experts serving in their personal capacity from the interrelated fields of public economics, public administration and public finance Number of sessions in 2022: 1 Number of sessions in 2023: 1	191.1	191.1
United Nations Forum on Forests	The Forum is an intergovernmental subsidiary body of the Economic and Social Council. The core functions of the Forum are to: (a) provide a coherent, open, transparent and participatory global platform for policy development, dialogue, cooperation and coordination on issues related to the sustainable management of all types of forests, including emerging issues, in an integrated and holistic manner, including through cross-sectoral approaches; (b) promote, monitor and assess the implementation of sustainable forest management, in particular the United Nations strategic plan for forests and the achievement of its global forest goals and associated targets and the United Nations forest instrument, and mobilize, catalyse and facilitate access to financial, technical and scientific resources to that end; (c) promote governance frameworks and enabling conditions at all levels to achieve sustainable forest management; (d) promote coherent and collaborative international policy development on issues related to all types of forests; and (e) strengthen high-level political engagement, with the participation of major groups and other stakeholders, in support of sustainable forest management.	Mandate: Economic and Social Council resolutions 2000/35 and 2015/33 and General Assembly resolution 71/285 Membership: 197 government officials Number of sessions in 2022: 1 Number of sessions in 2023: 1	57.8	57.8

Committee of Experts on International Cooperation in Tax Matters	The Committee is a subsidiary body of the Economic and Social Council. It is recognized for its work in shaping international tax norms and providing policy and practical guidance to assist countries in mobilizing domestic resources for sustainable development. The Committee engages with the Council through the Council's annual special meeting on international cooperation in tax matters, with a view to enhancing intergovernmental consideration of tax issues. The Committee is mandated to: (a) keep under review and update as necessary the United Nations Model Double Taxation Convention between Developed and Developing Countries and the Manual for the Negotiation of Bilateral Tax Treaties between Developed and Developing Countries; (b) provide a framework for dialogue with a view to enhancing and promoting international tax cooperation among national tax authorities; (c) consider how new and emerging issues could affect international cooperation in tax matters and develop assessments, commentaries and appropriate recommendations; (d) make recommendations on capacity-building and the provision of technical assistance to developing countries and countries with economies in transition; and (e) give special attention to developing countries and countries with economies in transition in dealing with all the above issues.	Mandate: Economic and Social Council resolutions 1273 (XLIII), 2004/69 and 2017/2 and General Assembly resolution 69/313 Membership: 25 experts nominated by Governments and acting in their expert capacity Number of sessions in 2022: 2 Number of sessions in 2023: 2	469.1	427.0
Total			1 792.1	1 750.0

9.155 The proposed regular budget resources for 2023 amount to \$1,750,000 and reflect a decrease of \$42,100 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 9.150 (a). Additional details on the distribution of the proposed resources for 2023 are reflected in table 9.39.

Executive direction and management

- 9.156 The Under-Secretary-General for Economic and Social Affairs is responsible for the overall management, supervision and administration of the Department in the implementation of its mandates and its approved programme of work. As head of the Department, the Under-Secretary-General is delegated managerial authority over human, financial and physical resources to allow for the effective delivery of the Department's mandates. Within the United Nations system, he serves as the convener of the Executive Committee on Economic and Social Affairs, as well as the Programme Manager of the United Nations Development Account and is responsible for the overall management of capacity development activities. He is also a member of the United Nations Sustainable Development Group, a joint policy and decision-making body for development operations in countries. The Under-Secretary-General is assisted by the Assistant Secretary-General for Policy Coordination and Inter-Agency Affairs and the Assistant Secretary-General for Economic Development, who also serves as the Chief Economist.
- 9.157 The Assistant Secretary-General for Policy Coordination and Inter-Agency Affairs supports the Under-Secretary-General by providing substantive support and policy advice on departmental support to intergovernmental processes, including the General Assembly, the Economic and Social Council and its subsidiary bodies, and the high-level political forum on sustainable development. She is also responsible for inter-agency coordination, including support to the Under-Secretary-General in the work of the United Nations Sustainable Development Group and the United Nations System Chief Executives Board for Coordination.
- 9.158 The Assistant Secretary-General for Economic Development and Chief Economist serves as the principal economic adviser to the Under-Secretary-General, whom he assists by providing thought leadership and guidance on the policy research and analysis work of the Department, including on frontier and emerging issues. He is also responsible for the coordination and review of the publications of the Department, reports of the Secretary-General and other technical products that provide a platform for amplifying and delivering the work of the Department on global development policy.
- 9.159 The Office of the Under-Secretary-General supports the senior leadership of the Department in the overall coordination and management of its programmes and resources, as well as the implementation of Department-wide initiatives. It assists the Under-Secretary-General in implementing the Department's overall programming, monitoring and evaluation activities, including its representation in intergovernmental and expert oversight bodies and internal and external audit entities. The Office coordinates the Department's support for the resident coordinator system, in collaboration with the Development Coordination Office. It also facilitates the work of the Department's gender and disability inclusion focal points and is responsible for the review of legislative reports and flagship publications of the Department.
- 9.160 The Strategic Planning and Communications Service supports the Under-Secretary-General in advancing the Department's strategic direction, integration and policy coherence, including its collaborative work with other Secretariat entities in the areas of knowledge management, communications, websites, social and multimedia outreach, publishing and information technology. It supports the Department's engagement in the Secretary-General's Executive Committee and coordinating mechanisms or bodies and represents the Department in relevant Secretariat policy and normative bodies, including the Publications Board, the Information and Communications Technology Board and the United Nations Communications Group. The Service plays a central role in the programme delivery of the Department through its support for information systems and enterprise applications. It also supports the Department's editorial board and departmental strategic planning and communications networks, and is responsible for the Department's strategic communications framework, including its implementation.
- 9.161 The Programme, Monitoring and Evaluation Unit coordinates the preparation of the Department's annual programme plan and programme performance reports and is responsible for the internal monitoring and evaluation of the Department's work. The Unit serves as the focal point for

evaluations by oversight bodies and provides support to the Executive Office and the Capacity Development Programme Management Office on audits of the Department. It is also responsible for producing monitoring reports for decision-making in close collaboration with the Department's relevant subprogrammes. The Unit reports to the Under-Secretary-General through the Chief of Office of the Under-Secretary-General. The Unit operates independently from other operational and management functions within the Department.

- 9.162 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Department is integrating environmental management practices into its operations. Drawing on its experience in 2020 and 2021, the Department uses online platform tools and organizes meetings and workshops in a virtual or hybrid format whenever possible. In 2023, the Department will continue to review its information technology infrastructure with a view to assessing necessary improvements to online meetings and workshops, as well as digital distribution, and reducing printed documentation and physical promotion materials. It will also contribute to the implementation of the Secretariat's climate neutrality plan.
- 9.163 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 9.40. The outbreak of the COVID-19 pandemic has resulted in uncertainty in air travel and penalty fees for cancelled tickets, and advance planning for travel continues to be challenging. The Department plans to issue updated internal guidance to its staff on the advance booking policy with clear timelines for all travel categories, especially those related to intergovernmental meetings, workshops and events organized by the Department. The late receipt of voluntary contributions and late nominations of non-staff travellers also contributed to non-compliance in 2021. The Department will continue to make efforts to improve the compliance rate by, among other things, promoting advance planning for all Department events, working more closely with Governments on the nominations of representatives, working more closely with the Travel Unit to reserve tickets on the basis of preliminary itinerary in order to secure tickets at the lowest price and minimizing instances of exceptions.

Table 9.40

- 9.164 The proposed regular budget resources for 2023 amount to \$4,978,000 and reflect a decrease of \$62,400 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 9.150 (b). Additional details on the distribution of the proposed resources for 2023 are reflected in table 9.41 and figure 9.XVI.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

9.165 Extrabudgetary resources for the component are estimated at \$643,800 and would provide for non-post resources. The resources would be used mainly to support activities aimed at increasing understanding and awareness of the 2030 Agenda and expanding partnerships for implementation through global policy dialogues. The expected decrease of \$700,000 is due mainly to the scheduled completion of various projects related to the Department’s thought leadership on sustainable and inclusive development in early 2023.

Programme of work

Subprogramme 1

Intergovernmental support and coordination for sustainable development

9.166 The proposed regular budget resources for 2023 amount to \$7,747,600 and reflect an increase of \$42,100 compared with the appropriation for 2022. The proposed increase is explained in paragraph 9.150 (c). Additional details on the distribution of the proposed resources for 2023 are reflected in table 9.42 and figure 9.XVII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

9.167 Extrabudgetary resources for the subprogramme are estimated at \$123,000 and would provide for non-post resources. The resources would be used mainly to provide for: (a) the improvement of analytical work for the quadrennial comprehensive policy review of operational activities for development of the United Nations system, including the follow-up and monitoring of the implementation of General Assembly resolution 75/233 on the implementation of the 2020 quadrennial comprehensive policy review and resolution 72/279 on the repositioning of the United Nations development system; and (b) the participation of government experts of developing countries in presenting their countries' voluntary national reviews at the high-level political forum on sustainable development. The expected decrease of \$355,500 is due mainly to the scheduled completion of projects related to voluntary national reviews.

**Subprogramme 2
Inclusive social development**

9.168 The proposed regular budget resources for 2023 amount to \$9,691,100 and reflect an increase of \$135,200 compared with the appropriation for 2022. The proposed increase is explained in paragraphs 9.148 (a) and 9.149. Additional details on the distribution of the proposed resources for 2023 are reflected in table 9.43 and figure 9.XVIII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

9.169 Extrabudgetary resources for the subprogramme are estimated at \$739,000 and would provide for non-post resources. The resources would be used mainly to support: (a) activities related to persons with disabilities, young people, ageing, family activities and indigenous peoples; and (b) capacity development projects and activities related to sport for development and peace. The expected decrease of \$321,100 is due mainly to the scheduled completion of various projects, including those related to indigenous peoples and national youth policies, in 2022.

**Subprogramme 3
 Sustainable development**

9.170 The proposed regular budget resources for 2023 amount to \$9,131,300 and reflect an increase of \$42,800 compared with the appropriation for 2022. The proposed increase is explained in paragraph 9.148 (b). Additional details on the distribution of the proposed resources for 2023 are reflected in table 9.44 and figure 9.XIX.

Subprogramme 3: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

9.171 Extrabudgetary resources for the subprogramme are estimated at \$6,905,400 and would provide for one post (P-5), as well as non-post resources. The resources would be used mainly to support analytical work and the implementation of capacity-building projects on cross-cutting topics, such as partnerships for sustainable development, the localization of the Sustainable Development Goals, the strengthening of the role of micro-, small and medium-sized enterprises for the implementation of the 2030 Agenda, and the integration of the Sustainable Development Goals into national sustainable development strategies. They would also cover sectoral topics such as water, energy, climate change, oceans, sustainable transport, smart cities, sustainable production and consumption and agriculture, and their interlinkages. The work of the subprogramme will remain focused on countries in special situations, such as least developed countries, landlocked developing countries, countries in Africa and small island developing States. The expected decrease of \$1,997,600 is due mainly to the scheduled completion of various projects in 2022.

**Subprogramme 4
 Statistics**

9.172 The proposed regular budget resources for 2023 amount to \$18,699,200 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 9.45 and figure 9.XX.

Extrabudgetary resources

9.173 Extrabudgetary resources for the subprogramme are estimated at \$5,430,200 and would provide for non-post resources. The resources would be used mainly to support: (a) the modernization and transformation of the national statistical and geospatial information systems of developing countries to meet the increased demand for data for the implementation of the 2030 Agenda; and (b) capacity development projects and activities for strengthening the ability of developing countries to produce better and more timely data to inform policies and monitor progress towards achieving the Sustainable Development Goals, and for strengthening geospatial information management systems. The expected decrease of \$1,070,700 is due mainly to the scheduled completion of various projects in 2022.

Subprogramme 5 Population

9.174 The proposed regular budget resources for 2023 amount to \$7,106,000 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 9.46 and figure 9.XXI.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

9.175 Extrabudgetary resources for the subprogramme are estimated at \$568,200 and would provide for two posts (1 P-3 and 1 P-2/1), as well as non-post resources. The resources would be used mainly to support the preparatory work for the 2024 release of the global data set and model-based estimates

of family planning indicators, the preparation of training materials to accompany the data set, further improvements to the web-based data dissemination platform (data portal), which will enhance the dissemination of key family planning and population data, and the preparation of technical papers on family planning and population topics. The expected decrease of \$357,400 is due mainly to lower planned expenditures for staff and consultants.

Subprogramme 6 Economic analysis and policy

9.176 The proposed regular budget resources for 2023 amount to \$6,899,700 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 9.47 and figure 9.XXII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

9.177 No extrabudgetary resources for the subprogramme are estimated for 2023. The expected decrease of \$494,700 is due mainly to the scheduled completion of a project related to the implementation of the 2030 Agenda in the least developed countries in 2022.

**Subprogramme 7
 Public institutions and digital government**

9.178 The proposed regular budget resources for 2023 amount to \$6,632,400 and reflect an increase of \$62,400 compared with the appropriation for 2022. The proposed increase is explained in paragraph 9.148 (b). Additional details on the distribution of the proposed resources for 2023 are reflected in table 9.48 and figure 9.XXIII.

Extrabudgetary resources

9.179 Extrabudgetary resources for the subprogramme are estimated at \$3,296,100 and would provide for non-post resources. The resources would be used mainly to support capacity development projects and activities for developing countries to strengthen coherent and integrated approaches to the implementation of the 2030 Agenda at the local, national and regional levels, as well as to enhance the presence and leadership of women in public institutions at the local and national levels. The expected decrease of \$3,990,700 is due mainly to the scheduled completion of a large-scale fellowship project and other capacity development activities in 2022.

**Subprogramme 8
 Sustainable forest management**

9.180 The proposed regular budget resources for 2023 amount to \$2,347,900 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 9.49 and figure 9.XXIV.

Extrabudgetary resources

9.181 Extrabudgetary resources for the subprogramme are estimated at \$722,700 and would provide for three posts (2 P-3 and 1 General Service (Other level)), as well as non-post resources. The resources would be used mainly to support activities related to the Global Forest Financing Facilitation Network and the work of the secretariat of the United Nations Forum on Forests on communications and outreach in connection with the implementation of the United Nations strategic plan for forests 2017–2030. The expected decrease of \$424,900 is due mainly to the scheduled completion of capacity development projects related to the Global Forest Financing Facilitation Network in 2022.

Subprogramme 9 Financing for sustainable development

9.182 The proposed regular budget resources for 2023 amount to \$6,093,500 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 9.50 and figure 9.XXV.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

- 9.183 Extrabudgetary resources for the subprogramme are estimated at \$4,555,500 and would provide for non-post resources. The resources would be used mainly to provide intergovernmental support, analytical work and capacity development to Member States to implement the outcomes of International Conferences on Financing for Development, in particular the Addis Ababa Action Agenda. Activities would include: (a) the preparation of policy papers; (b) the provision of options for countries to respond to the COVID-19 crisis; (c) the provision of strategic advice and support for capacity development in key areas, such as international cooperation in tax matters; (d) the strengthening of dialogue with international financial institutions and organizations to steer flows to alleviate the impact of COVID-19; (e) multi-stakeholder engagement, in particular with the private sector; and (f) support for development cooperation. The expected increase of \$844,200 is due mainly to increased requirements to carry out new capacity development projects in 2022.

Programme support

- 9.184 Programme support comprises the Executive Office and the Capacity Development Programme Management Office.
- 9.185 The Executive Office supports the Under-Secretary-General as follows: (a) in his exercise of the delegation of authority to manage the human, financial and physical resources of the Department; (b) in the context of the monitoring and accountability framework; and (c) as his main interlocutor with the Department of Management Strategy, Policy and Compliance and the Department of Operational Support, including in relation to participation in focal point networks or committees in support of various management-related reform initiatives. The Executive Office also provides administrative support to the Office of the Special Adviser on Africa, the Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States, the New York office of the secretariat of the United Nations System Chief Executives Board for Coordination and the Regional Commissions New York Office.
- 9.186 The Capacity Development Programme Management Office manages and coordinates the capacity development function of the Department through the formulation, coordination and implementation of the Department's capacity development activities for the coherent and integrated delivery of capacity development programmes, projects and other activities and the promotion of direct and effective translation of intergovernmental outcomes into the operational programmes. The Office supports the Under-Secretary-General in his role as Programme Manager of the United Nations Development Account, and in promoting strategic cooperation and partnerships within the Secretariat and with the United Nations development system at large, including the resident coordinator system, to promote more coherent, coordinated and cross-sectoral support for the implementation of the two agendas. The Office also manages the Junior Professional Officers Programme for the Secretariat, including the resident coordinator system.
- 9.187 The proposed regular budget resources for 2023 amount to \$4,737,400 and reflect cost-neutral changes compared with the appropriation for 2022. The proposed changes are explained in paragraphs 9.148 (b) and 9.150 (d). Additional details on the distribution of the proposed resources for 2023 are reflected in table 9.51 and figure 9.XXVI.

Figure 9.XXVI
Programme support: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

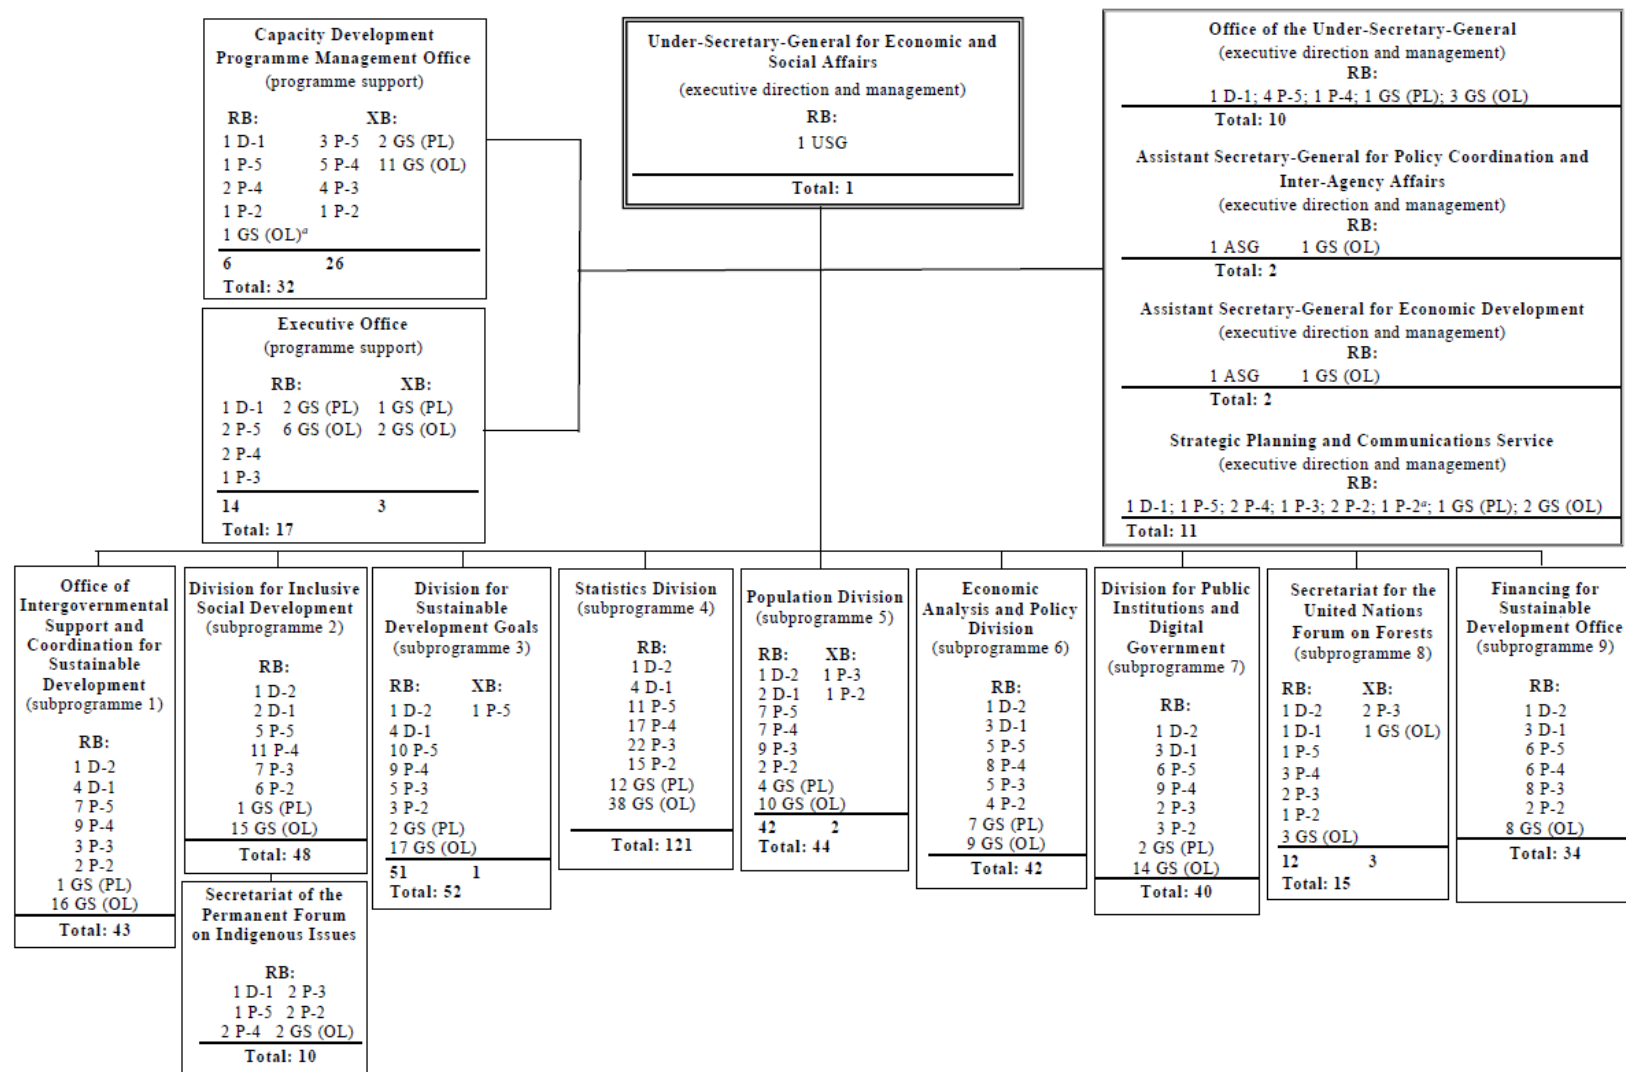

Extrabudgetary resources

9.188 Extrabudgetary resources for the component are estimated at \$59,384,200 and would provide for 29 posts (3 P-5, 5 P-4, 4 P-3, 1 P-2/1, 3 General Service (Principal level) and 13 General Service (Other level)), as well as non-post resources. The resources would be used mainly to support operational programmes of the Department and the delivery of capacity development activities. Extrabudgetary resources include estimates in the amount of \$49,751,200 for the trust funds for the Junior Professional Officer Programme and the United Nations Assistance to the Khmer Rouge Trials, which the Department administers. The expected net decrease of \$3,600,000 is due mainly to decreased contributions for the United Nations Assistance to the Khmer Rouge Trials, offset in part by increased estimates for the Junior Professional Officer Programme.

Annex II

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Executive direction and management	1	P-2	Reassignment of 1 Associate Information Systems Officer as Associate Public Information Officer	The proposed reassignment is intended to address the growing needs of the Department in outreach and communication, through the increased use of websites, newsletters, and multimedia and social media content, to various stakeholders on sustainable development issues under the purview of the Department. The incumbent of the reassigned post will bring into the Department updated skills in public communication and information using new technologies.
Programme support	1	GS (OL)	Reassignment of 1 Human Resources Assistant as Programme Management Assistant	The proposed reassignment is intended to address the shift from human resources to more programmatic functions. The responsibilities of the incumbent previously included services related to recruitment and the placement of project personnel and capacity development training activities under the regular programme of technical cooperation and United Nations Development Account projects. The work and activities of the incumbent have increasingly shifted from processing-focused tasks to supporting the Head of the Office in the management, coordination, monitoring and evaluation of the capacity development programme as a whole, to ensure more effective and efficient programme delivery by the Department's substantive divisions.

Abbreviation: GS (OL), General Service (Other level).

Foreword

Over the course of 2023, the Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States will continue to advocate strongly on behalf of the 91 most vulnerable Member States, to ensure that their special needs and challenges remain the focus of global solidarity, including by building their resilience and providing better and quicker access to finance relief, given that many continue to struggle with the impacts of the coronavirus disease (COVID-19), climate change and debt.

With the Fifth United Nations Conference on the Least Developed Countries again postponed from 2022 to 2023, our focus for least developed countries is on pivoting towards building innovative multi-stakeholder partnerships that will boost the implementation of the Doha Programme of Action, at a time of deepening inequalities and crisis.

The road map for the accelerated implementation of the Vienna Programme of Action will continue to guide our coordinating work in support of the landlocked developing States, which has contributed to the implementation of climate-resilient transport infrastructure projects. We will also continue to organize training workshops for policymakers in the landlocked developing countries, equipping them with the knowledge and networks to deliver transformative projects.

For small island developing States, we anticipate that the roll-out of the multidimensional vulnerability index will be crucial to defining the vulnerabilities of small island developing States, in order to better guide development financing to these countries.

Substantive national and regional preparations and support for intergovernmental processes for the fourth International Conference on Small Island Developing States and the third United Nations Conference on Landlocked Developing Countries will also be key pillars of the engagement of the Office of the High Representative in 2023.

In a world still in the grips of a global pandemic, we remain steadfast on our multifaceted support for the most vulnerable countries on their road to sustainable recovery and accelerated implementation of their programmes of action and the achievement of the Sustainable Development Goals.

(Signed) Heidi **Schroderus-Fox**
Acting High Representative

Office of the High Representative for the Least Developed Countries,
Landlocked Developing Countries and Small Island Developing States

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 10.1 The Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States is responsible for advocating for, supporting, mobilizing, coordinating and reporting on the implementation of the programmes of action for the least developed countries, landlocked developing countries and small island developing States, as well as the achievement of other internationally agreed goals, including the Sustainable Development Goals. The mandate of the Office derives from the priorities established in relevant General Assembly resolutions and decisions, including resolution [56/227](#), whereby the Assembly decided to establish the Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States; resolution [69/15](#), whereby the Assembly endorsed the small island developing States Accelerated Modalities of Action (SAMOA) Pathway; resolution [69/137](#), whereby the Assembly endorsed the Vienna Declaration and the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024; and resolution [76/XXX](#), whereby the Assembly endorsed the Programme of Action for the Least Developed Countries for the Decade 2022–2031.
- 10.2 The implementation of the three programmes of action, namely, the Doha Programme of Action, the Vienna Programme of Action and the Samoa Pathway, are integral to the 2030 Agenda for Sustainable Development, supporting progress towards achievement of the Sustainable Development Goals. The 2030 Agenda indicated that, in the context of the global follow-up and review processes of the Agenda, effective linkages should be made with the follow-up and review arrangements of all relevant United Nations conferences and processes, including those on the least developed countries, landlocked developing countries and small island developing States. As the coronavirus disease (COVID-19) pandemic crisis continues to have an impact on all countries and regions in the world, least developed countries, landlocked developing countries and small island developing States experience a disproportionate social and economic fallout from the pandemic, owing in large part to limited capacities and financial resources. These same binding constraints, if not addressed, will thwart their ability to sustainably recover from the pandemic and accelerate implementation of their programmes of action and achievement of the Sustainable Development Goals. More than before, the most vulnerable countries need continued and stronger international attention, action and support.

Strategy and external factors for 2023

- 10.3 Following the adoption of the Doha Programme of Action, the most important task ahead for least developed countries and the international community is one of ensuring its effective implementation, in support of the 2030 Agenda. This could not happen without mainstreaming the provisions of the new Programme of Action into least developed countries' national strategic planning and the mobilization of commensurate resources and knowledge in support of the recovery of least developed countries from the COVID-19 pandemic and their sustainable development.
- 10.4 As the implementation of the Doha Programme of Action begins, the two other constituencies of the Office – the landlocked developing countries and small island developing States – and their development partners will embark on comprehensive reviews of the implementation of programmes of action of landlocked developing countries and small island developing States. The outcomes of these reviews will inform the next generation of global compacts that are aimed at addressing the special needs of these two groups of countries.
- 10.5 In pursuit of these priorities, the Office will raise awareness, mobilize support and build consensus. Key audiences will continue to be built both in the most vulnerable countries, as well as in partner

countries and in regional and global organizations and forums. The Office will also mobilize resources to ensure that least developed countries, landlocked developing countries and small island developing States participate in the process and have their voices heard in global deliberations. These resources will also enable the representatives from the most vulnerable countries to benefit from capacity-building activities, peer-learning and the exchange of best practices, all on thematic areas relevant to the Sustainable Development Goals and to building resilience in the aftermath of the COVID-19 pandemic. Furthermore, the Office will forge broad and durable partnerships, including within and outside the United Nations system, for the advancement of sustainable development in least developed countries, landlocked developing countries and small island developing States. Cognizant of the importance of the involvement of young people in the implementation of and follow-up to the programmes of action for least developed countries, landlocked developing countries and small island developing States, the Office will enhance cooperation with the Office of the Secretary-General's Envoy on Youth to foster the involvement, participation and input of young people in intergovernmental negotiations and United Nations processes.

- 10.6 For 2023, the Office's planned deliverables will support Member States in their ongoing management of and recovery from the COVID-19 pandemic. Such planned deliverables and activities include bringing more prominence to sustainable recovery from the pandemic in the content of the Office's knowledge generation, advocacy and intergovernmental backstopping support, and designing and delivering cross-cutting activities and deliverables for all three groups of countries, such as on climate change, debt sustainability and accelerating the sustainable energy transition. Such planned deliverables and activities feature in the preparations for the fourth International Conference on Small Island Developing States and the third United Nations Conference on Landlocked Developing Countries, which will include exploring ways to address challenges posed by COVID-19 and build resilience against future shocks in the context of new global frameworks for landlocked developing countries and small island developing States.
- 10.7 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.
- 10.8 Cooperation with other entities at the global and regional levels will be anchored through the inter-agency consultative groups for least developed countries, landlocked developing countries and small island developing States, of which the Office is a convener. The groups will continue to offer space in which United Nations entities and other international organizations, exchange information on their work on the most vulnerable countries, strengthen coordination of their activities and mount joint inter-agency activities.
- 10.9 The Office's footprint at the national level will rely on its cooperation with the networks of national focal points for least developed countries, landlocked developing countries and small island developing States and those of United Nations resident coordinators. Designed as an interface between the global, regional and national processes, the national focal points promote coherence and coordination on issues relevant to the three groups of countries and policy formulation, implementation, and follow-up and review of their programmes of action, the 2030 Agenda and other global frameworks. Complementary to the national focal points are the resident coordinator networks that help to promote integration of the programmes of action into the United Nations strategic plans and the United Nations Sustainable Development Cooperation Frameworks, along with supporting resident coordinators in engaging with Member States on the ground on specific issues relating to least developed countries, landlocked developing countries and small island developing States.

- 10.10 With regard to the external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) The security and political situation in least developed countries, landlocked developing countries and small island developing States and in their surrounding regions is conducive to the implementation of the three programmes of actions, namely, the Doha Programme of Action for Least Developed Countries for the Decade 2022–2031, the Vienna Programme of Action and the Samoa Pathway;
 - (b) Continued international support measures in the areas of development finance, market access, technology and technical assistance are made available by development partners in favour of these countries.
- 10.11 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, as part of its monitoring and reporting work, the Office will include gender-disaggregated data and analysis across its reports.
- 10.12 In line with the United Nations Disability Inclusion Strategy, the Office will continue to mainstream the rights of persons with disabilities and disability inclusion into its programme of work, to reflect the intersection of disabilities and sustainable development in least developed countries, landlocked developing countries and small island developing States in outreach products such as remarks and talking points by the Office, and reports, factsheets and web content to increase awareness of disability perspectives in the implementation of the relevant programmes of action.

Programme performance in 2021

Impact of the pandemic

- 10.13 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular the modalities of the programme's delivery of its support to the three constituencies. As a result of COVID-19, the Office pivoted towards virtual delivery of its analytical, advocacy, partnership-building and capacity-building activities, as described in the programme performance in 2021 under subprogrammes 1, 2 and 3. Limited broadband connectivity across the three groups of countries; reduced opportunities for networking, forging partnerships, peer learning and exchange of best practices among these representatives; and geographical dispersion across the world and over different time zones posed challenges to the effectiveness of delivery of support to Member States through virtual means.

Legislative mandates

- 10.14 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

69/15	SIDS Accelerated Modalities of Action (SAMOA) Pathway		
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system	74/3	Political declaration of the high-level meeting to review progress made in addressing the priorities of small island developing States through the implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway
72/307	Modalities for the high-level review of the SIDS Accelerated Modalities of Action (SAMOA) Pathway		

Deliverables

10.15 Table 10.1 lists all cross-cutting deliverables of the programme.

Table 10.1
Cross-cutting deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	7	7	7	7
Meetings of:				
1. The Groups of least developed countries, landlocked developing countries and small island developing States	4	4	4	4
2. The Fifth Committee	1	1	1	1
3. The Committee for Programme and Coordination	1	1	1	1
4. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
B. Generation and transfer of knowledge				
Publications (number of publications)	1	1	1	1
5. Thematic reports of the Office of the High Representative	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: briefing for all Member States on issues pertaining to all three subprogrammes.				
Databases and substantive digital materials: databases on topics of relevance to Member States, including but not limited to the ongoing response to the COVID-19 pandemic and achievement of goals under the various programmes of action.				
D. Communication deliverables				
Outreach programmes, special events and information materials: strategic communications materials supporting global outreach campaigns and other materials supporting common agendas, especially the Sustainable Development Goals.				
External and media relations: press releases, media briefings and targeted interviews with select media.				
Digital platforms and multimedia content: website of the Office of the High Representative, reflecting key thematic priorities and support events, providing a platform for research, analysis and opinion on major themes.				

Evaluation activities

- 10.16 The evaluation of the project strengthening productive capacity in least developed countries through the provision of an enabling environment for investment in sustainable energy, completed in 2021 has guided the proposed programme plan for 2023.
- 10.17 The results and lessons of the evaluation report referenced above have been taken into account for the proposed programme plan for 2023. The report recognizes, among others, the importance of appropriate partnerships to ensure delivery at the country level and of in-person meetings, when conditions allow, for peer learning and exchange of best practices. Building on these recommendations, the Office plans to forge stronger partnerships with United Nations organizations, within inter-agency consultative groups and with other important stakeholders, including through the networks of national focal points and United Nations resident coordinators, and with the view to advancing the development agenda of the most vulnerable countries. In addition, the Office intends to opt for modalities of delivery of its meetings that build on the advantages of virtual and in-person interaction while minimizing their shortcomings.
- 10.18 An evaluation of the effectiveness of the Office’s support for the network of the national focal points of least developed countries is planned for 2023.

Programme of work

Subprogramme 1 Least developed countries

Objective

- 10.19 The objective, to which this subprogramme contributes, is to strengthen policies to eradicate poverty in the least developed countries and accelerate structural transformation of their economies; and to ensure effective graduation from the least developed country category.

Strategy

- 10.20 To contribute to the objective, the subprogramme will:
- (a) Continue to provide support to Member States in their intergovernmental processes related to the priorities of least developed countries, including by supporting the implementation of the Doha Programme of Action;
 - (b) Prepare analytical materials on how to address the specific challenges of the least developed countries and facilitate related exchanges of experiences and peer learning on critical enablers to poverty eradication and structural transformation, including through mainstreaming a gender perspective, especially in the areas of skills development and investment promotion;
 - (c) Continue its advocacy activities related to resource mobilization for sustainable development in the least developed countries, especially with respect to public and private financing, including innovative finance, for resilience-building, and therefore support Member States in making progress towards achieving the Sustainable Development Goals;
 - (d) Continue to provide support to countries graduating from the least developed country category through leading the inter-agency task force on least developed country graduation, organizing workshops and technical support on establishing consultative mechanisms with development partners and preparing smooth transition strategies, and continue to facilitate peer learning, as graduating countries can benefit from the experience of countries that have already graduated;
 - (e) Support Member States on issues related to COVID-19 by providing policy advice relevant to least developed countries towards enhancing resilience, including support for building partnerships.
- 10.21 The above-mentioned work is expected to result in:
- (a) Enhanced capacity of the least developed countries to accelerate progress towards reaching the Sustainable Development Goals and other internationally agreed development goals, including the goals of the Doha Programme of Action, and addressing the challenges of the impact of COVID-19;
 - (b) Enhanced capacity of graduating countries with respect to a smooth transition out of the least developed country category.

Programme performance in 2021

Enhanced capacity of researchers from least developed countries to provide policy advice

- 10.22 The research capacity in many least developed countries is limited. The share of scientific publications in least developed countries was less than 1 per cent of the global total in 2019, despite accounting for 13 per cent of the world's population. Furthermore, these countries have few female researchers. The subprogramme has invited researchers from least developed countries and those working on least developed countries to various meetings that it organized to discuss the main challenges of least developed countries over the past years. In 2021, the subprogramme organized an academic conference, the LDC Future Forum, in hybrid format. Of the 240 researchers and policymakers who attended the Forum, some 70 participated in person (half of whom were women). The Forum enabled an exchange

of views and experiences between policymakers, practitioners and researchers from least developed countries and other countries to contribute to country-specific and evidence-based policymaking, including in the areas of poverty eradication, human development, structural transformation, emerging technologies, climate adaptation and access to finance. Among the innovative solutions identified at the Forum are a rule-of-law approach to debt restructuring, with the United Nations playing a facilitating role; considering social protection in least developed countries as an investment rather than a cost; and an enhanced focus on preparing students, especially girls, from least developed countries for the future of work, including in science, technology, engineering and mathematics.

10.23 Progress towards the objective is presented in the performance measure below (see table 10.2).

Table 10.2
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	–	Policymakers from more than 20 least developed countries indicated they would use the presented research results on designing and implementing future policies

Planned results for 2023

Result 1: a new global framework to boost sustainable development progress in those countries that are lagging the most behind

Programme performance in 2021 and target for 2023

10.24 The subprogramme’s work contributed to the negotiations of the action-oriented Doha Programme of Action that was approved and reflects the views of all stakeholders, which met the planned target.

10.25 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 10.3).

Table 10.3
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Member States adopt General Assembly resolution 74/232, in which they call for the effective participation of all relevant stakeholders in the Fifth United Nations Conference on the Least Developed Countries	Multi-stakeholder partners participated in the preparatory meetings for the Conference	The preparatory committee approved the draft Doha Programme of Action for Least Developed Countries and decided to recommend it to the Conference for adoption	Member States implement effective partnerships with various stakeholders	Member States strengthen partnerships with various stakeholders to eradicate poverty, in line with the priorities of the Doha Programme of Action

Result 2: accelerated progress towards sustainable development through the implementation of a new programme of action for least developed countries

Programme performance in 2021 and target for 2023

- 10.26 The subprogramme’s work contributed to the mobilization of United Nations agencies and resident coordinators in least developed countries in support of the preparatory process for the Fifth United Nations Conference on the Least Developed Countries, analysing challenges and making commitments for enhanced support to least developed countries, including designing the Doha Programme of Action, which met the planned target.
- 10.27 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 10.4).

Table 10.4
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Inter-agency meetings held to mobilize United Nations agencies to support implementation of the Istanbul Programme of Action and the preparations of the Fifth United Nations Conference on the Least Developed Countries	Report on United Nations support to least developed countries published, recommending mainstreaming and prioritization of such support	United Nations agencies and resident coordinators in least developed countries mobilized in support of the preparatory process for the Fifth United Nations Conference on the Least Developed Countries	Ten least developed countries mainstreaming the new programme of action into their development plans with support from the United Nations system	Ten additional least developed countries mainstreaming the new programme of action into their development plans with support from the United Nations system

Result 3: private sector plays an enhanced role in addressing vulnerabilities of least developed countries

Proposed programme plan for 2023

- 10.28 Private investment in least developed countries has been hampered by the effects of COVID-19, leading to the closure of many micro-, small and medium-sized enterprises, especially those led by women, and declining foreign direct investment (FDI). In collaboration with other United Nations entities, the subprogramme provided related analysis, which fed into the Doha Programme of Action and contributed, in collaboration with the United Nations Conference on Trade and Development, the United Nations Industrial Development Organization, the International Labour Organization, the Enhanced Integrated Framework and the World Association of Investment Promotion Agencies, to the formulation of a capacity-building project for investment promotion agencies. The pilot phase of implementation commenced in 2021 with the provision of tailored capacity-building activities, taking into account the diverse needs of the various least developed countries with respect to FDI attraction and facilitation, including through sharing know-how and best practices.

Lessons learned and planned change

- 10.29 The lesson for the subprogramme was to leverage existing partnerships with private sector entities to strengthen private sector engagement in support of the least developed countries. In applying the lesson, the subprogramme will collaborate on conducting online surveys on the investment climates of least developed countries and involve the private sector more effectively in the preparations for the Fifth United Nations Conference on the Least Developed Countries. This will culminate in the Private Sector Forum, to be held in Doha in 2023. The subprogramme will organize dedicated meetings involving private sector representatives and government representatives from least developed countries and development partners to discuss obstacles to contributions of the private

sector towards gender-sensitive sustainable development in least developed countries and business opportunities in least developed countries for the private sector, including for women-led micro-, small and medium-sized enterprises, with the aim of launching partnerships related to the objectives of the Doha Programme of Action at the Forum.

10.30 Expected progress towards the objective is presented in the performance measure below (see table 10.5).

Table 10.5
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Private sector actors involved in selected meetings	Private sector actors involved in selected meetings	Investment promotion agencies strengthen capacity on FDI attraction and facilitation	Private sector actors engage in dialogue and consider commitments in support of the least developed countries in preparation of a Private Sector Forum at the Fifth United Nations Conference on the Least Developed Countries	Five partnerships related to the objectives of the Doha Programme of Action launched at the Private Sector Forum in areas such as leveraging innovation and creating productive employment and decent work

Deliverables

10.31 Table 10.6 lists all deliverables of the subprogramme.

Table 10.6
Subprogramme 1: deliverables for the period 2021–2023, by category and subcategory

Seminars, workshops and training events (number of days)	6	7	8	8
12. Workshops for national focal points of least developed countries, ministerial meeting and round-table discussions on the implementation of the Programme of Action for the Least Developed Countries	4	5	6	6
13. Forums for main stakeholders on partnerships for least developed countries	2	2	2	2
Technical materials (number of materials)	8	10	14	14
14. On the state of the least developed countries	1	1	1	1
15. On the implementation of the Programme of Action for the Least Developed Countries and synergies with the Sustainable Development Goals and the Addis Ababa Action Agenda of the Third International Conference on Financing for Development	3	3	–	–
16. On progress towards the graduation of the least developed countries	–	–	1	1
17. On the implementation of specific areas of the new programme of action for the least developed countries	–	–	4	4
18. On key issues relating to the least developed countries	4	6	8	8
C. Substantive deliverables				
Consultation, advice and advocacy: substantive support to the group of 46 least developed countries; briefing of all Member States on the work of the Office of the High Representative and of the Technology Bank for the Least Developed Countries; advice on the implementation of the Programme of Action for the 46 least developed countries; substantive advice for the meetings of the High-Level Committee on Programmes and the United Nations System Chief Executives Board for Coordination; support to the work of the Broadband Commission and advocacy for support towards the 46 least developed countries.				
D. Communication deliverables				
Outreach programmes, special events and information materials: promotional materials on the global outreach campaign raising awareness of and accountability of Member States and other stakeholders towards the Programme of Action arising from the Fifth United Nations Conference on the Least Developed Countries; and communications campaigns on upcoming graduations, and advocacy for enhanced smooth transition measures.				
External and media relations: press releases and press conferences on issues relating to the least developed countries; editorial opinions (op-eds) ensuring that least developed countries issues are at the forefront of international development discourse; information campaign (including videos, infographics and other social media material) on progress achieved in the Programme of Action for Least Developed Countries				
Digital platforms and multimedia content: information on the outcome of the Fifth United Nations Conference on the Least Developed Countries for all Member States and other relevant stakeholders.				

**Subprogramme 2
Landlocked developing countries**

Objective

- 10.32 The objective, to which this subprogramme contributes, is to strengthen policies and capacities to improve the connectivity of landlocked developing countries, with the aim of supporting their sustainable development, reduce their trade transaction costs, increase their regional cooperation and increase their regional, subregional and global trade and strengthen their institutions and social and environmental protection; and to increase structural transformation in landlocked developing countries for sustainable development.

Strategy

- 10.33 To contribute to the objective, the subprogramme will:
- (a) Continue to provide support to Member States in their intergovernmental processes related to landlocked developing countries, in line with the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024, the 2030 Agenda, the Paris Agreement and regional programmes, including Agenda 2063: The Africa We Want.
 - (b) Lead the preparations of the third United Nations Conference on Landlocked Developing Countries;
 - (c) Undertake analytical work related to the priorities of the Vienna Programme of Action and on the impact of COVID-19 on landlocked developing countries and the policies and support required for sustainable recovery, the outcome of which will inform both the backstopping support, as well as capacity-building and advocacy activities;
 - (d) Organize capacity-building activities, and facilitate the exchange of experiences and peer learning among landlocked developing countries and transit countries on the priorities for action of the Vienna Programme of Action;
 - (e) Continue its advocacy activities for enhanced international support towards the implementation of the Vienna Programme of Action and of the Political Declaration of its High-level Midterm Review and of the 2030 Agenda;
 - (f) Coordinate and monitor the effective implementation of the road map for accelerated implementation of the Vienna Programme of Action.
- 10.34 The above-mentioned work is expected to result in:
- (a) Increased support towards landlocked developing countries from the international community, including the United Nations system, to address the needs and challenges arising from landlockedness;
 - (b) Increased adoption and implementation by landlocked developing countries of initiatives to enhance transit, connectivity and trade facilitation;
 - (c) Enhanced capacity of landlocked developing countries to devise and formulate policies that promote diversification, integration into global value chains and structural economic transformation;
 - (d) Enhanced capacity of landlocked developing countries to formulate policies that foster recovery and build their resilience post COVID-19.

Programme performance in 2021

Strengthened capacity of government officials from landlocked developing countries and transit countries to promote transport connectivity and the development of bankable transport infrastructure projects

- 10.35 Strengthened policies and capacities to improve the connectivity of landlocked developing countries and develop bankable transport infrastructure projects are critical for reducing their trade transaction costs and increasing their regional cooperation and trade. The subprogramme, working with regional commissions and other partners, provided a series of virtual training workshops for policymakers from 25 landlocked developing countries and 13 transit countries to strengthen their capacity to develop policies for enhanced transport connectivity and bankable transport infrastructure projects, including developing supportive regulatory frameworks and enabling environments to attract financing and encourage the use of public-private-partnerships. The subprogramme prepared three sets of training modules that helped to successfully create awareness and build the capacity of more than 200 government officials from landlocked developing countries and transit countries on how to further improve transport connectivity, including both hard and soft infrastructure, and in a sustainable manner. The training contributed to enhancing the ability of government officials from landlocked developing countries and transit countries to apply the knowledge acquired to their day-

to-day work. In the evaluations conducted, participants pledged that they had gained additional knowledge and skills on ways to improve transport connectivity, which they, in turn, would use in their workplace. However, all participants expressed that they would have preferred in-person training, given that it would have provided a more impactful learning experience, and indicated their desire for future in-person training once the COVID-19 pandemic was over.

10.36 Progress towards the objective is presented in the performance measure below (see table 10.7).

Table 10.7
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	Member States indicate an interest in capacity-building on policies that promote transport connectivity and on the development of bankable infrastructure projects	202 government officials from landlocked developing countries and transit countries gained access to relevant knowledge on policies to promote transport connectivity and on the development of bankable transport infrastructure projects

Planned results for 2023

Result 1: enhanced transit to facilitate greater trade potential for landlocked developing countries

Programme performance in 2021 and target for 2023

10.37 The subprogramme’s work contributed to landlocked developing countries adopting three new initiatives to improve transit, trade facilitation and structural transformation, including the establishment of a one-stop border post, the development of a trade information portal and the enhancements to transit railway infrastructure, which met the planned target.

10.38 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 10.8).

Table 10.8
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Member States ratify the World Trade Organization Agreement on Trade Facilitation and call upon all members that have not yet done so to ratify the Agreement	Member States adopt General Assembly resolution 75/233 Adoption of three tangible initiatives on transit, trade facilitation and structural economic transformation that are being implemented by landlocked developing countries and transit countries	Landlocked developing country Member States adopted three new initiatives to improve transit, trade facilitation and structural economic transformation	Increased number of landlocked developing country and transit country Member States that report increased implementation of trade facilitation measures under the World Trade Organization Agreement on Trade Facilitation	Twenty-five landlocked developing countries designate capital-based national focal points for the Vienna Programme of Action to promote national-level implementation and follow-up of the Vienna Programme of Action, including trade facilitation

Result 2: better coordinated United Nations support to landlocked developing countries

Programme performance in 2021 and target for 2023

- 10.39 The subprogramme’s work contributed to better coordinated United Nations support to landlocked developing countries and 10 megaprojects in renewable sources of energy, with an investment of \$2.5 billion, and 18 transport infrastructure projects, which exceeded the planned target of Member States implementing at least 2 new initiatives included in the road map.
- 10.40 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 10.9).

Table 10.9
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Member States call upon the United Nations system to provide support to accelerate the implementation of the Vienna Programme of Action (General Assembly resolution 74/15)	Member States request the Secretary-General to prepare a road map on coordinated United Nations support to the implementation of the Vienna Programme of Action. The road map was coordinated, prepared and adopted in the same year	Member States implemented 10 megaprojects in renewable sources of energy and 18 transport infrastructure projects	Member States implement at least five new initiatives contained in the road map, including on transit, transport, trade facilitation, energy and ICT development, and structural economic transformation	Member States implement eight new initiatives contained in the road map, including on transit, transport, energy and ICT development, and structural economic transformation

Abbreviation: ICT, information and communications technology.

Result 3: strengthened capacities of landlocked developing countries to achieve climate action and sustainable recovery from the COVID-19 pandemic

Proposed programme plan for 2023

- 10.41 The Midterm Review on the Implementation of the Vienna Programme of Action for Landlocked Developed Countries for the Decade 2014–2024, held in 2019, indicated that progress made by landlocked developing countries was insufficient to achieve the Vienna Programme of Action targets and Sustainable Development Goals. COVID-19 has exacerbated existing challenges related to the geography of landlocked countries. Exports and imports have been constrained by a lack of smooth functioning of borders, lockdowns, trade restrictions, disruptions in global supply chains and commodity price shocks. At the same time, there is evidence that the impact of climate change is exacerbating heat waves, flooding, droughts and desertification, landslides and other disasters in landlocked developing countries. To support landlocked developing countries, the subprogramme undertook research and organized thematic events on enhancing diversification, structural transformation, trade facilitation and integration into global value chains, as well as on accelerating climate change adaptation and mitigation. The subprogramme also assisted Member States in organizing two ministerial meetings on COVID-19 recovery and a meeting with the resident coordinators to mobilize their support for national-level implementation of the Vienna Programme of Action.

Lessons learned and planned change

- 10.42 The lesson for the subprogramme was that, with regard to preparations for the third United Nations Conference on Landlocked Developing Countries, it is particularly important that the subprogramme provide normative support to analyse the impact of the COVID-19 pandemic on recovery and

sustainable development and emerging challenges linked to climate change. In applying the lesson, the subprogramme will incorporate analysis of the twin challenges of climate change and COVID-19 and suggest recommendations on action that will feed into the preparations for the Conference.

10.43 Expected progress towards the objective is presented in the performance measure below (see table 10.10).

Table 10.10
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
–	–	The General Assembly adopted resolution 76/217 , in which it called for a third United Nations Conference on Landlocked Developing Countries, which would comprehensively review the Vienna Programme of Action	Landlocked developing countries build their common position on transport and transit for input to the third United Nations Conference on Landlocked Developing Countries	Member States identify and agree on regional focused action and commitments to support the landlocked developing countries in achieving climate action and sustainable COVID-19 recovery

Deliverables

10.44 Table 10.11 lists all deliverables of the subprogramme.

14. Panel discussion on best practices and solutions to specific needs of landlocked developing countries	1	1	1	1
15. Events on capacity-building, best practices and thematic areas in line with the 2030 Agenda for Sustainable Development and other United Nations practices, including COVID-19, energy, ICT, infrastructure, Sustainable Development Goal 14, climate change and desertification	2	2	2	2
16. Events in preparation for the third United Nations Conference on Landlocked Developing Countries on thematic areas, including transit, trade facilitation, corridor development, connectivity, global value chains, climate change, water, desertification and road safety	–	–	–	4
Technical materials (number of materials)	4	4	4	4
17. On thematic issues and indicators of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024 and the 2030 Agenda for Sustainable Development	2	2	2	2
18. On thematic development issues in landlocked developing countries	2	2	2	2
C. Substantive deliverables				
Consultation, advice and advocacy: substantive support to the Group of Landlocked Developing Countries; briefings to 32 landlocked developing countries, 34 transit countries and 28 development partners on the work of the Office of the High Representative; side events promoting the implementation of the 2030 Agenda and the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024; substantive advice to and support for 32 United Nations country teams and other United Nations organizations to ensure synergy and coherence in the implementation and monitoring of, and follow-up to, the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024 and the 2030 Agenda at the national and regional levels; and technical support towards the preparation of national review reports on the 10-year implementation of the Vienna Programme of Action in landlocked developing countries.				
Databases and substantive digital materials: database of indicators for landlocked developing countries.				
D. Communication deliverables				
Outreach programmes, special events and information materials: promotional materials on the global outreach campaign for landlocked developing countries.				
External and media relations: press releases and press conferences on issues relating to landlocked developing countries.				
Digital platforms and multimedia content: webpages relating to landlocked developing countries.				

Subprogramme 3 Small island developing States

Objective

- 10.45 The objective, to which this subprogramme contributes, is to increase sustainable economic, social and environmental resilience in small island developing States.

Strategy

- 10.46 To contribute to the objective, the subprogramme will:
- (a) Advocate for the special case of small island developing States in achieving sustainable development by engaging with development partners, international financial institutions and the private sector in relevant forums;
 - (b) Mobilize increased resources for small island developing States in priority areas, including through a targeted resource mobilization strategy and by developing tailored policy tools;
 - (c) Provide more structured support through the Small Island Developing States Partnership Framework for the facilitation of collaborative partnerships, especially between small island developing States and the private sector;
 - (d) Strengthen coherence and coordination at the national, regional and global levels, including by providing more structured support to the small island developing States national focal points network and increasing coordination between United Nations entities supporting those States;
 - (e) Integrate COVID-19 recovery into the work on the implementation of the Samoa Pathway, facilitate the sharing of experiences between small island developing States, advocate enhanced support and increased resources in addressing the impact of COVID-19, and ensure the coherence of the support provided by the United Nations system for recovery efforts at the national, regional and global levels;
 - (g) Lead the preparations for the fourth International Conference on Small Island Developing States.
- 10.47 The above-mentioned work is expected to result in:
- (a) Strengthened international support measures aimed at enabling small island developing States to implement the Samoa Pathway, the Paris Agreement and other priorities of those States for sustainable development;
 - (b) Enhanced access to finance for small island developing States.

Programme performance in 2021

Strengthened private sector engagement on oceans

- 10.48 Recognizing the critical importance of the oceans as a cross-cutting sector for sustainable development in small island developing States and recovery from the COVID-19 pandemic, the subprogramme organized a virtual small island developing States global business network forum and a series of webinars to promote partnerships and exchange experiences with small island developing States in the following areas: ocean energy; sustainable fisheries and use of marine natural resources; ocean conservation; sustainable shipping; and sustainable and diversified tourism. The Small Island Developing States Partnership Framework promotes South-South, North-South and triangular partnerships involving small island developing States, which further the implementation of the Samoa Pathway. Furthermore, given the disproportionate impact of COVID-19 on tourism in small island developing States, a dedicated tourism working group was initiated with tourism associations from across small island developing State regions. The subprogramme's work contributed to the establishment of three partnerships with the private sector in 2021 to enable investment in renewable energy, strengthen tourism recovery and increase resilience to disasters in small island developing States.

10.49 Progress towards the objective is presented in the performance measure below (see figure 10.I).

Figure 10.I

Performance measure: number of ocean-related partnerships for sustainable development of small island developing States (cumulative)

Planned results for 2023

Result 1: enhanced coordination and coherence of the United Nations system to support the implementation of the Samoa Pathway

Programme performance in 2021 and target for 2023

10.50 The subprogramme’s work contributed to 16 additional small island developing States that communicated the establishment or operationalization of an integrated policy, strategy or plan related to climate change, climate resilience and greenhouse gas emissions, which met the planned target.

10.51 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 10.12).

Table 10.12

Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Small island developing States strongly express a need for more targeted support in the context of the midterm review of the Samoa Pathway	Adoption of General Assembly resolution 74/297	Sixteen small island developing States that have communicated the establishment or operationalization of an integrated policy, strategy or plan related to climate change, climate resilience and greenhouse gas emissions	Small island developing States review the implementation of the multi-country office review, with a view to further enhancing tailored United Nations support, including strengthened policy support related to climate change, climate resilience and greenhouse gas emissions	Small island developing States better integrate climate action into national development policies, furthering implementation of the Samoa Pathway, through the implementation of the multi-country office review

Result 2: enhanced access to finance for small island developing States through the strengthening and development of policy tools

Programme performance in 2021 and target for 2023

- 10.52 The subprogramme’s work contributed to the General Assembly considering the recommendations on a multidimensional vulnerability index provided by the Secretary-General in his report on the implementation of resolution 75/215, which met the planned target.
- 10.53 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 10.13).

Table 10.13
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
In the political declaration of the midterm review of the Samoa Pathway, the need to devise methodologies to better account for the complex and diverse realities of small island developing States was recognized	The General Assembly adopted resolution 75/215, in which it called upon the Secretary-General to provide recommendations on the development of a multidimensional vulnerability index for small island developing States, including on its potential finalization and use	The General Assembly adopted resolution 76/203, in which it welcomed the Secretary-General’s recommendations on the potential development and coordination of work within the United Nations system on a multidimensional vulnerability index for small island developing States, including on its potential finalization and use	Strengthened international support measures to enable small island developing States to better withstand extreme shocks and build sustainable economic, social and environmental resilience	Increased awareness and recognition of the need for the multidimensional vulnerability index, which can inform the delivery of targeted development finance

Result 3: data leveraged for a new global framework for the sustainable development of small island developing States

Proposed programme plan for 2023

- 10.54 Small island developing States remain a special case for sustainable development and have not achieved sustained high levels of economic growth, owing in part to their vulnerabilities to the ongoing negative impacts of environmental challenges, COVID-19 and other external economic and financial shocks. These countries need increased global commitments and additional solutions for their current and emerging challenges, so as to support them in sustaining the momentum realized in implementing the Samoa Pathway and the 2030 Agenda.
- 10.55 The subprogramme supported small island developing States in their advocacy efforts by organizing high-level and expert meetings in cooperation with the Alliance of Small Island States and other partners. During these events, the subprogramme leveraged the convening power of the High Representative to bring together key stakeholders in making the case for a new global framework, which would recognize current and emerging challenges and strengthen international support measures to enable these countries to build economic, social and environmental resilience.

Lessons learned and planned change

- 10.56 The lesson for the subprogramme was that advocacy activities are most impactful when complemented by up-to-date data and evidence. In applying the lesson, the subprogramme will increase its focus on data analysis and knowledge products that provide updated information on the

vulnerabilities of small island developing States and include concrete recommendations on support needed by these countries. This is expected to contribute to the evidence-based foundation for a new global framework for small island developing States, enabling those States to determine the action and commitments needed to achieve the Sustainable Development Goals.

10.57 Expected progress towards the objective is presented in the performance measure below (see table 10.14).

Table 10.14
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
The General Assembly adopted the political declaration of the midterm review of the Samoa Pathway, in which it urged further action to advance the sustainable development priorities of small island developing States	The General Assembly adopted resolution 75/215, in which it called for immediate and substantial actions to facilitate the COVID-19 responses by small island developing States, while preserving their sustainable development achievements and commitments, and reinforce their resilience in line with the Samoa Pathway and the political declaration of the midterm review of the Samoa Pathway	The General Assembly adopted resolution 76/203, in which it called for the convening in 2024 of a fourth International Conference on Small Island Developing States, which would be aimed at assessing the ability of small island developing States to meet the 2030 Agenda and the Sustainable Development Goals	Small island developing States focus on enhanced reporting on the implementation of the Samoa Pathway to serve as basis for an evidence-based framework for the fourth International Conference on Small Island Developing States	Small island developing States use timely data and analysis on vulnerabilities to determine the global actions and commitments needed to implement the 2030 Agenda

Deliverables

10.58 Table 10.15 lists all deliverables of the subprogramme.

Table 10.15
Subprogramme 3: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	9	9	9	17
1. Meetings and consultations of the Second Committee of the General Assembly	3	3	3	3
2. Meetings and consultations of the high-level political forum on sustainable development of the Economic and Social Council	2	2	2	2
3. Regional and interregional review meetings on the implementation of the Samoa Pathway	–	–	–	8
4. Meetings of the group of small island developing States	2	2	2	2
5. Expert group meetings on mainstreaming the Samoa Pathway and issues relating to small island developing States in the work of the United Nations system and enhancing the coherence of issues relating to small island developing States in United Nations processes	2	2	2	2

Section 10 Least developed countries, landlocked developing countries and small island developing States

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	–	1	1
6. On strengthening the capacity of small island developing States to attract climate finance from the private sector	1	–	1	1
Seminars, workshops and training events (number of days)	14	18	15	15
7. Seminars on the support from development partners to small island developing States for the implementation of the Sustainable Development Goals and the small island developing States Accelerated Modalities of Action (SAMOA) Pathway	2	8	2	2
8. Seminars in support of the Alliance of Small Island States related to the implementation of the Samoa Pathway and the 2030 Agenda for Sustainable Development	2	1	2	2
9. Seminars with the small island developing States national focal points on the coordination of efforts to achieve and monitor the implementation of the Samoa Pathway and the 2030 Agenda	4	4	4	4
10. Seminars on how the United Nations system and other international intergovernmental institutions, including regional intergovernmental organizations of which the small island developing States are members, can strengthen collaboration through joint efforts and activities	3	2	3	3
11. Seminars on private sector involvement in supporting implementation of the Samoa Pathway	1	1	2	2
12. Seminars on the access of small island developing States to climate change-related finance for development objectives	2	2	2	2
Publications (number of publications)	–	–	1	1
13. On mainstreaming the Samoa Pathway and issues relating to small island developing States in the work of the United Nations system and enhancing the coherence of issues relating to small island developing States in United Nations processes	–	–	1	1
Technical materials (number of materials)	10	7	10	10
14. On implementing the Samoa Pathway, the Programme of Action for the Sustainable Development of Small Island Developing States and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States	2	1	2	2
15. On international support provided to small island developing States for the implementation of the Sustainable Development Goals and the Samoa Pathway	2	1	2	2
16. On matters relating to the financing, implementation and monitoring of the Samoa Pathway and the 2030 Agenda in small island developing States	2	1	2	2
17. On issues relevant to the implementation of the 2030 Agenda in small island developing States	2	2	2	2
18. On mainstreaming the Samoa Pathway and issues relating to small island developing States in the work of the United Nations system and enhancing the coherence of issues relating to small island developing States in United Nations processes	2	2	2	2
C. Substantive deliverables				
Consultation, advice and advocacy: substantive events to provide support to 38 small island developing States and 3 regional and 5 global entities; briefings to 38 Member States on the work of the Office; and advocacy in appropriate forums for the special case of small island developing States in achieving sustainable development.				
D. Communication deliverables				
Outreach programmes, special events and information materials: campaigns on matters relating to small island developing States and sustainable development, including advocacy materials for the special case of small island developing States in achieving sustainable development.				
External and media relations: press releases and press appearances on issues relating to small island developing States, as well as ongoing engagement with journalists in small island developing States on relevant United Nations processes and activities.				
Digital platforms and multimedia content: web pages, including information on the preparatory processes for the fourth International Conference on Small Island Developing States.				

B. Proposed post and non-post resource requirements for 2023

Overview

10.59 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 10.16 to 10.18.

Table 10.16

10.60 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 10.19 to 10.21 and figure 10.II.

10.61 As reflected in tables 10.19 (1) and 10.20, the overall resources proposed for 2023 amount to \$7,469,900 before recosting, reflecting a net increase of \$149,700 (or 2.0 per cent) compared with the appropriation for 2022. Resource changes result from technical adjustments. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Figure 10.II
Distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

10.62 As reflected in table 10.19 (1), resource changes reflect a net increase of \$149,700, as follows:

- (a) **Executive direction and management.** The net increase of \$66,200 reflects the annual provision for one new post of Associate Data Analyst (P-2) established in 2022 pursuant to General Assembly resolution [76/245](#) (\$69,000), which was subject to a 50 per cent vacancy rate in accordance with the established practice for new posts, offset in part by the removal of a non-recurrent provision for furniture and equipment (\$2,800) related to this post and the new post established in 2022 under subprogramme 3 (see para. 10.62 (b) below);
- (b) **Subprogramme 3, Small island developing States.** The increase of \$83,500 reflects the annual provision for one new post of Programme Management Officer (P-3) established in 2022 pursuant to General Assembly resolution [76/245](#), which was subject to a 50 per cent vacancy rate in accordance with the established practice for new posts.

Extrabudgetary resources

10.63 As reflected in table 10.19 (2), the Office of the High Representative expects to continue to receive cash contributions, which would complement regular budget resources. In 2023, extrabudgetary resources are estimated at \$2,376,100 and would be used mainly to carry out activities related to the preparations for and follow-up on the Fifth United Nations Conference on the Least Developed Countries and preparations for the third United Nations Conference on Landlocked Developing Countries and the fourth International Conference on Small Island Developing States. Extrabudgetary resources represent 24.1 per cent of the total resources for this section. The expected increase of \$129,400 compared with the estimate for 2022 is due primarily to the follow-up activities related to the Fifth United Nations Conference on the Least Developed Countries.

- 10.64 The extrabudgetary resources under this section are subject to the oversight of the Office of the High Representative, which has delegated authority from the Secretary-General.

Executive direction and management

- 10.65 The Under-Secretary-General and High Representative is responsible for the overall leadership and direction of the Office in the implementation of its mandates and approved programme of work. The High Representative engages in high-level consultations with Member States, organizations of the United Nations system, multilateral and regional financial institutions, the private sector, and civil society groups and academia, and supports the Economic and Social Council and the General Assembly in their reviews and assessments of progress achieved in the implementation of the programmes of action for the three groups of countries and the 2030 Agenda, as it relates to these countries.
- 10.66 The Office of the High Representative advises the Under-Secretary-General and High Representative on issues of policy and management; acts as a focal point for information on all aspects of the work of the Office and ensures that such information is disseminated internally and projected externally, as appropriate; and consults, negotiates and coordinates with other departments, offices, funds and programmes, as well as with non-United Nations entities, on matters of common concern. The Office is headed by a Director (D-2), who is responsible for the overall coordination and strategic management of the Office and who acts as a deputy to the High Representative.
- 10.67 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, organizations are encouraged to integrate sustainability information into their reporting cycles, and, in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), the Office has started the implementation of its guide entitled “Things to Know, Things to Do – Reducing Environmental Impacts in the Workplace”, which is the Office’s strategic document on environmental sustainability. The guide provides details of daily environmentally sound steps to reduce waste and greenhouse gas emissions and move toward achieving the targets of the United Nations Secretariat climate action plan 2020–2030. These steps include promoting the use of reusable bags and water and coffee bottles, commuting by bicycle when possible, and using hand driers instead of paper towels. A baseline survey was administered in 2020 to assess existing practices among staff members in the Office and a follow-up survey will take place when return to the premises reaches a more advanced state.
- 10.68 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 10.22. The rate of compliance with the advance booking policy decreased in 2021 compared with 2020 but is higher than in 2019. For the Office, international travel resumed in the late summer of 2021, with major preparatory meetings for the Fifth United Nations Conference on the Least Developed Countries and expert group meetings on the Vienna Programme of Action for the Landlocked Developing Countries for the Decade 2014–2024. Continued uncertainties pertaining to the COVID-19 pandemic notwithstanding, the Office was able to ensure the effective participation of many least developed country and landlocked developing country government representatives in those meetings. Delays in nominations and putting together the documentation required for travel approval, including new COVID-19-related documents, were a major cause of the lower rate of compliance with the policy on the advance purchase of air tickets, over which the Office has little control. For travel of staff, delays in receiving the programmes of and background documents for events to which the Office is invited had an impact on the timely submission. Furthermore, the recent COVID-19 Omicron variant led to the cancellation of events and related travel on very short notice.
- 10.69 Going forward, the Office will commit itself to striving to achieve a better level of compliance with the policy on the advance booking of air travel. It will continue to raise awareness among staff and managers of the need to comply with the policy, including through quarterly travel plans and regular monitoring of progress. With regard to partners, the Office will engage with both meeting organizers and participants sponsored by the Office with a view to improving the timeliness of submission of their documentation. The Office will also continue to work closely with the Executive Office to streamline the requirements for the issuance of travel authorizations, within the existing rules and regulations guiding official travel.

Air tickets purchased at least 2 weeks before the commencement of travel	43	84	47	100	100

10.70 The proposed regular budget resources for 2023 amount to \$7,469,900 and reflect an increase of \$149,700 compared with the appropriation for 2022. The proposed increase is explained in paragraph 10.62 above. Additional details on the distribution of the proposed resources for 2023 are reflected in table 10.23 and figure 10.III.

Programme of work

Subprogramme 1 Least developed countries

10.71 The proposed regular budget resources for 2023 amount to \$3,695,900 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 10.24 and figure 10.IV.

Table 10.24

Figure 10.IV
Subprogramme 1: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

10.72 Extrabudgetary resources for the subprogramme are estimated at \$1,613,700 and would provide for non-post resources. The resources would enable representatives of least developed countries to attend the Fifth United Nations Conference on the Least Developed Countries and follow-up

meetings pertaining to the implementation of the Doha Programme of Action. The expected increase of \$395,500 is due mainly to activities and increased support for least developed countries planned in the immediate follow up to the Conference.

Subprogramme 2 Landlocked developing countries

10.73 The proposed regular budget resources for 2023 amount to \$1,157,000 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 10.25 and figure 10.V.

Table 10.25
Subprogramme 2: evolution of financial and post resources

(Thousands of United States dollars/number of posts)

	2021 expenditure	2022 appropriation	Changes			Total	Percentage	2023 estimate (before recosting)

Figure 10.V
Subprogramme 2: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

10.74 Extrabudgetary resources for the subprogramme are estimated at \$365,400 and would provide for non-post resources. The resources would enable representatives of landlocked developing countries and staff to take part in activities pertaining to the preparatory process of the third United Nations Conference on Landlocked Developing Countries. The expected increase of \$13,600 is due mainly to the preparations for the Conference.

**Subprogramme 3
Small island developing States**

10.75 The proposed regular budget resources for 2023 amount to \$1,048,700 and reflect an increase of \$83,500 compared with the appropriation for 2022. The proposed increase is explained in paragraph 10.62 above. Additional details on the distribution of the proposed resources for 2023 are reflected in table 10.26 and figure 10.VI.

Figure 10.VI
Subprogramme 3: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

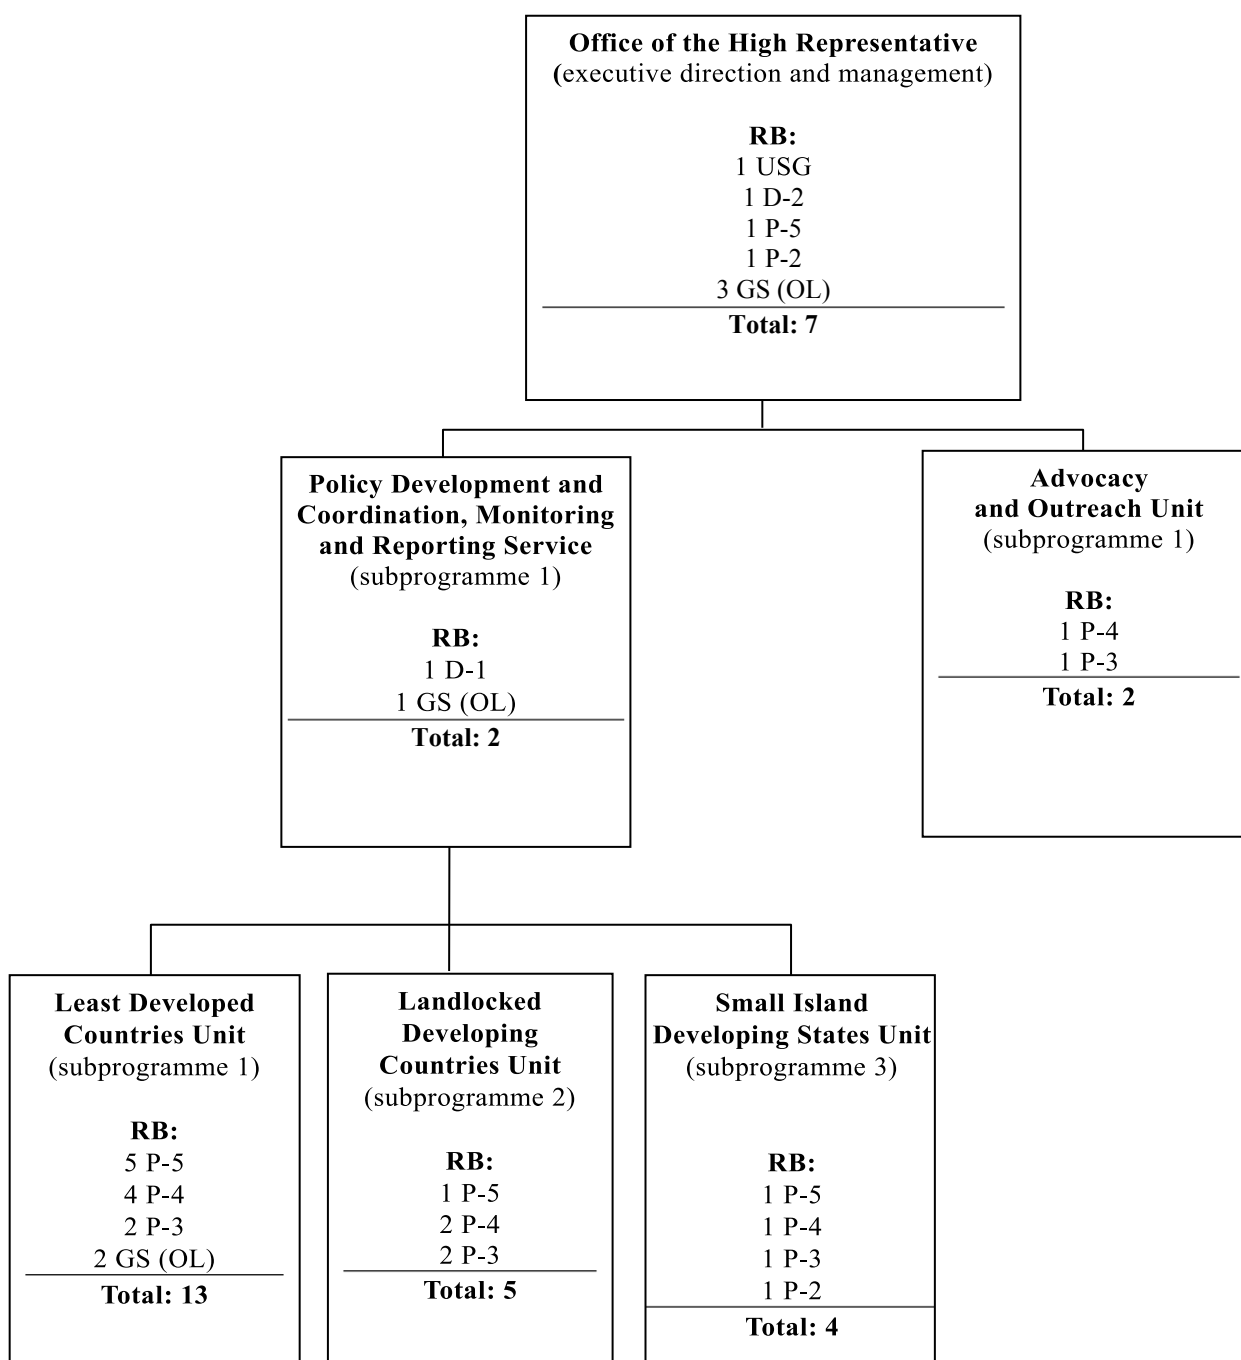

Extrabudgetary resources

10.76 Extrabudgetary resources for the subprogramme are estimated at \$397,000 and would provide for non-post resources. The resources would provide for activities and the development of knowledge products to support representatives of small island developing States in preparation for the fourth International Conference on Small Island Developing States. The expected decrease of \$279,800 is due mainly to the completion of activities in preparation for the Conference in 2022, including the Small Island Developing States Global Business Network and the United Nations Ocean Conference.

Annex II

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/76/7](#)

The Advisory Committee trusts that information on all sources of funding and the cooperation among all relevant entities towards achieving the programmes of action for the least developed countries, landlocked developing countries and small island developing States will be provided (para. IV.38).

The Office of the High Representative cooperates with a large number of entities to achieve the objectives established in the programmes of action for the least developed countries, landlocked developing countries and small island developing States, both within the United Nations system and with partners outside the United Nations system, including private sector partners, other international organizations, international financial institutions and civil society organizations, which all contribute through their funding to the implementation of these programmes.

Beyond the Office, a number of entities within the United Nations Secretariat support the implementation of the programmes of action for the least developed countries, landlocked developing countries and small island developing States through dedicated work programmes.

The collaboration and coordination of the Office and the United Nations development system entities and other multilateral international organizations take place under the umbrella of four well-established mechanisms with very broad memberships: the Inter-agency Consultative Group for Least Developed countries, the inter-agency task force on least developed country graduation, the Inter-agency Consultative Group for Landlocked Developing Countries and the Inter-agency Consultative Group on Small Island Developing States (jointly chaired by the Office and the Department of Economic and Social Affairs). With regard to specific programmes and partnerships with various United Nations entities, the Office engages in wide-ranging cooperation on various thematic areas. For example, it collaborated with the International Telecommunication Union to prepare a joint report on digital connectivity in least developed countries, to accelerate progress towards universal and affordable connectivity.

Brief description of the recommendation

Action taken to implement the recommendation

Given that all the programmes of action have a strong focus on multi-stakeholder implementation, a large number of entities outside the United Nations system contribute to achieving their objectives. These include other international organizations and international financial institutions, private sector partners and civil society organizations and foundations. Examples of such collaboration include a partnership established with the International Road Transport Union to improve transit and advance implementation of the Vienna Programme of Action or co-organizing with Microsoft the Private Sector Forum at the Fifth United Nations Conference on the Least Developed Countries.

Foreword

The year 2021 witnessed the emergence of a new gap that threatens to increase world inequalities: the vaccine divide. African countries have been severely affected by both the limitations of their pharmaceutical industry and the lack of compliance of global stakeholders with agreed commitments to vaccine distribution. The reduced rate of vaccination on the continent has prevented African economies from fully reopening and has continued to hamper health, social protection and education systems, threatening to undermine Africa's most valuable asset: its demographic dividend. This dire reality has underscored the need for a renewed multilateralism that leads to more justice and equity in the international community and a new scenario in which an empowered Africa is fully autonomous, independent and interdependent and its voice is heard and respected in international forums.

That is the vision of Agenda 2063 and the main objective of programme 9. In that regard, the programme will step up efforts to maximize the potential of the recovery through coordinated action on areas that are key to the leapfrogging of Africa towards sustainable development. The Office of the Special Adviser on Africa, the Economic Commission for Africa and the Department of Global Communications will continue to promote digitization and the African Continental Free Trade Area as critical tools for the recovery. In addition, the three subprogrammes will increase their focus on climate adaptation and energy access to ensure that African countries have the capacity to power their industrialization and, consequently, increase their resilience.

(Signed) **Cristina Duarte**
Under-Secretary-General and Special Adviser on Africa

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 11.1 The Office of the Special Adviser on Africa is responsible for ensuring a coherent and integrated approach for United Nations support for Africa and addressing gaps; following up on the implementation of all relevant global summit and conference outcomes of the United Nations related to Africa; coordinating and guiding the preparation of Africa-related reports and inputs; initiating reports on critical issues affecting Africa; monitoring the implementation of commitments made towards Africa's development; and coordinating global advocacy in support of the New Partnership for Africa's Development (NEPAD), currently subsumed under Agenda 2063: The Africa We Want. The Economic Commission for Africa (ECA) is responsible for promoting the economic and social development of its member States, fostering intraregional integration and promoting international cooperation for the development of Africa. ECA is mandated to operate at the regional and subregional levels to harness United Nations assets and bring them to bear on Africa's priorities. To enhance its impact, ECA places a special focus on collecting up-to-date and original regional statistics in order to ground its policy research and advocacy in clear objective evidence; promoting policy consensus; providing meaningful capacity development; and providing advisory services in key thematic fields. The Department of Global Communications raises international awareness of the economic, political and social situation in Africa, as well as of the efforts made by Africa, the United Nations and the international community to promote the economic recovery and sustainable development of the region in pursuit of the goals of NEPAD and the achievement of the Sustainable Development Goals. The mandates of the Office of the Special Adviser on Africa, ECA and the Department of Global Communications derive from the priorities established in relevant resolutions and decisions, including General Assembly resolutions [32/197](#), [57/7](#), [57/300](#), [61/296](#), [66/293](#) and [76/236](#) and Economic and Social Council resolutions [671 \(XXV\) A](#) and [1998/46](#).
- 11.2 In view of the impact of the coronavirus disease (COVID-19) pandemic on health systems, social protection structures, employment, education and other areas critical for Africa's development, enhanced coordination and advocacy efforts are critically needed to ensure that the planning and implementation of programmes and projects to address the impact of COVID-19 are aligned with the 2030 Agenda for Sustainable Development, Agenda 2063 and the priorities established by the African Union, the African Union Development Agency-NEPAD, regional economic communities and African countries for a strong recovery. Despite the challenges, the COVID-19 pandemic provides an opportunity to build forward, build better and accelerate the implementation of the 2030 Agenda during the decade of action for the Sustainable Development Goals. This will require strong analytical and monitoring capacities that can be sharply focused on identifying key policies and programmes with a multiplying effect that contribute decisively to Africa's development and that establish Africa's common position on COVID-19 recovery responses in the global arena.

Strategy and external factors for 2023

- 11.3 In 2021, the COVID-19 pandemic continued to prove that no country was ready to overcome the challenges of the future on its own. It created an opportunity to promote a change of paradigm in the international multilateral system, one that is particularly relevant for Africa. To this end, a new narrative is needed, one that reflects and strengthens Africa's role as a key stakeholder and a vital player in the global arena, with its success stories and best practices to share; that brings to the global debate issues that are key for Africa's development, such as domestic resource mobilization, the energy mix and the role of digitization in underpinning institution-building, innovation and economic growth; and of Africa and from Africa, to be fully embraced within the United Nations and beyond. The programme's strategy is aimed at promoting this new narrative.

- 11.4 The implementation of the programme's strategy will be guided by the vision of an empowered Africa that drives its own development to progressively fulfil its potential as a continent of hope, opportunities and prosperity with the coherent support of the international system. To transform the vision into a reality, the programme has a strategic mission: to leverage data and knowledge to promote evidence-based policies through advisory services, awareness-raising, communications and advocacy that mobilize the United Nations system, African Member States, international partners, civil society and the private sector at the global and regional levels around the transformative vision of the African Union and in support of the joint implementation of the 2030 Agenda and Agenda 2063 on the continent, building on synergies, complementarities, strong partnerships, innovation and strategic foresight.
- 11.5 To fulfil that mission, the Office of the Special Adviser on Africa, ECA and the Department of Global Communications will promote the new narrative through coordinated and complementary action in policy analysis, research and development, advocacy, communications, global and regional coordination, monitoring and evaluation and support for Member States. The strategic agenda, developed in consultation with the Group of African States and other stakeholders, will guide the programme activities around six cluster areas identified as key for Africa's development because of their multiplying impact: financing for development; achieving sustainable development to deliver durable peace; governance, resilience and human capital; science, technology and innovation; industrialization, the demographic dividend and trade, with a focus on the African Continental Free Trade Area; and sustainable energy and climate change. Taking into account the crucial role of young people in Africa in the continent's development, special attention will be given to promoting youth-focused policies and proposals under each cluster area, in particular when addressing human capital and the demographic dividend.
- 11.6 Following the approval by the General Assembly of the strategy in its resolution [76/236](#), as well as its decision to change of name of the programme to underscore United Nations support for Agenda 2063 as the road map for the achievement of sustainable development in Africa, it is proposed to change the names of the three subprogrammes with the objective of ensuring their alignment with both Agenda 2063 and the programme's new strategy.
- 11.7 For 2023, the planned deliverables of programme 9 will support Member States in their ongoing management of and recovery from the COVID-19 pandemic. The Office of the Special Adviser on Africa will provide evidence and data-based advice to Member States to maximize the impact of recovery plans and will monitor the implementation of recovery-related commitments. ECA will continue to work with the African Union and its organs, as well as with other United Nations entities, on developing joint COVID-19 responses in order to support Member States on initiatives related to their sustainable recovery from the disruptive impact of the pandemic on their economies. The Department of Global Communications will continue to amplify Africa's COVID-19 response and recovery efforts. The establishment and strengthening of strategic partnerships that are translated into joint planning exercises are fundamental to ensure that recovery is approached as a coherent exercise in which synergies and complementarities among United Nations entities and other stakeholders are leveraged. All entities will support the Special Adviser in undertaking high-level advocacy activities to mobilize international support for Africa's recovery.
- 11.8 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. Examples of lessons learned and best practices include the organization of virtual and hybrid meetings at the request of Member States, migration from paper to digital content production and dissemination and maximization of digital technologies to engage with younger and more technology-savvy audiences. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.

- 11.9 With regard to cooperation with other entities at the global, regional, national and local levels, the programme will continue to work closely with African Member States and African Union institutions as their main partners, in particular with the African Union Commission, the secretariat of the African Union Development Agency-NEPAD, the regional economic communities, the African Peer Review Mechanism and the African Capacity-Building Foundation, among others. In addition, the programme will continue to promote partnerships with an array of Member States, international organizations, civil society, the private sector, academia, think tanks, the African diaspora and other external stakeholders to enhance common approaches and synergies in their efforts to support Africa's development in the key areas identified in the programme's strategy. The Office of the Special Adviser on Africa will lead cooperation efforts at the global level under subprogramme 1, while ECA will lead cooperation at the regional, national and local levels under subprogramme 2.
- 11.10 With regard to inter-agency coordination and liaison, programme 9 will promote enhanced coherence of the United Nations system in Africa, leveraging the complementarities between the interdepartmental task force on African affairs, to which the Office of the Special Adviser on Africa provides support through subprogramme 1, and the Regional Collaborative Platform for Africa, to which ECA provides support through subprogramme 2. The interdepartmental task force will ensure strategic-level coordination among United Nations entities, in particular by identifying priorities for building forward and building better, promoting results-based planning to develop the African Union-United Nations framework for the joint implementation of the 2030 Agenda and Agenda 2063 and monitoring the implementation of the agreed plans and priorities. The Regional Collaborative Platform will ensure operational-level coordination among United Nations entities in the field and with the resident coordinator system, bringing to the attention of the interdepartmental task force the areas of work where strategic guidance is needed or gaps are identified and providing the data and information necessary for the identification of priorities and the monitoring of the work of the United Nations. The new structure of programme 9 as approved by the General Assembly, in particular the establishment of the executive direction and management component under the leadership of the Special Adviser, will ensure that both coordination mechanisms feed into each other.
- 11.11 With regard to the external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) African countries significantly realign their priorities towards building forward and building better;
 - (b) International partners continue to support Africa's sustainable development through financial contributions, technical support and the adoption of policy frameworks that support African ownership and empowerment;
 - (c) The partnership between the United Nations and the African Union is further strengthened through the continued implementation of the Joint United Nations-African Union Framework for Enhanced Partnership in Peace and Security, the renewed approach to the African Union-United Nations Framework for the Implementation of Agenda 2063 and the 2030 Agenda for Sustainable Development, and the adoption of the African Union-United Nations Framework on Human Rights;
 - (d) International organizations and partners are committed to the implementation of multi-stakeholder projects and programmes in support of the implementation of the 2030 Agenda, Agenda 2063, NEPAD and the priorities of the African Union and African countries;
 - (e) United Nations entities actively engage in the interdepartmental task force on African affairs;
 - (f) United Nations entities working in Africa participate in the Regional Collaborative Platform for Africa and its opportunity and issue-based coalitions with the regional Development Coordination Office, the Regional Bureau for Africa of the United Nations Development Programme and ECA as the joint secretariat;
 - (g) Member States actively participate in the Africa Dialogue Series and other policy development and advocacy activities;

- (h) External stakeholders and potential, partners including media organizations, academic institutions, civil society organizations and creative communities, continue to engage with the programme's priorities.
- 11.12 The Office of the Special Adviser on Africa, ECA and the Department of Global Communications integrate a gender perspective in their operational activities, deliverables and results, as appropriate. For example, the Office incorporates a gender perspective into all the analytical and policy documents that it produces, with a particular focus on the relevance of issues relating to peace, security and development for the empowerment of women and girls and, as part of its advocacy activities, organizes specific events that are focused on the realization of human rights for women and the challenges that women face in their efforts to promote their countries' inclusive sustainable development. The Office actively participates in and co-organizes with its strategic partners side events on gender equality and issues relating to the empowerment of women during the annual sessions of the Commission on the Status of Women. A gender perspective will continue to be mainstreamed across the activities of subprogramme 2 with respect to the development and delivery of United Nations support for the implementation of the priorities of the African Union and the African Union Development Agency, including the push for sex-disaggregated statistics, the effects of COVID-19 on the employment of women and the increase in domestic violence owing to COVID-19, as well as work towards mainstreaming a gender perspective into all the opportunity and issue-based coalitions. Lastly, under subprogramme 3, the Department promotes gender equality and the empowerment of women by producing and disseminating communications products, through *Africa Renewal* platforms, that are focused on women and gender equality and by promoting a balanced presence of women and men in all of its multimedia products, promotional campaigns and events. The Department works to counter stereotypes and discrimination against women by offering a wide range of alternative perspectives and ensuring that the voices of women are given prominence in its products, communication campaigns and events.
- 11.13 In line with the United Nations Disability Inclusion Strategy, the programme will promote, through its activities and policy recommendations, proposals that specifically foster the inclusion of persons with disabilities and will take the measures necessary to increase the accessibility of its products and events.

Programme performance in 2021

Impact of the pandemic

- 11.14 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular travel restrictions, which limited the capacity of the Special Adviser on Africa to undertake high-level advocacy missions. Such restrictions also forced the Office of the Special Adviser to cancel some advocacy activities and reprogramme others under subprogramme 1. ECA experienced similar limitations, compounded by the fact that, in Africa, limited access to vaccines transformed virtual meetings into the norm and further limited travel options. This created an additional challenge for subprogrammes 1 and 2 owing to the digital divide. An overconcentration of activities during available time slots between the COVID-19 waves and the increase in virtual events led to the fatigue of participants, resulting in reduced engagement and a more limited impact of workshops, webinars and interactive activities for all subprogrammes. Restrictions also affected the use of interpretation services, hindering the implementation of the multilingualism mandate.
- 11.15 In order to support Member States on issues related to the COVID-19 pandemic, within the overall scope of the objectives, subprogramme 1 increased its advisory support to Member States in United Nations bodies, in particular the Group of African States, in the identification of key priorities for the recovery, and subprogramme 2 promoted, through the Regional Collaborative Platform for Africa, joint United Nations COVID-19 responses. Each opportunity and issue-based coalition supported several initiatives, such as improving country liquidity to finance the recovery and the purchase of vaccines, the development of the pharmaceutical industry in Africa and the pooled purchasing of vaccines. All opportunity and issue-based coalitions were urged to mainstream

COVID-19 into all work streams. Subprogramme 3 featured interviews with African Union officials and African Permanent Representatives to the United Nations in which they referred to their COVID-19 response efforts.

Legislative mandates

11.16 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

32/197	Restructuring of the economic and social sectors of the United Nations system	69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)
54/232	Implementation of the first United Nations Decade for the Eradication of Poverty	70/1	Transforming our world: the 2030 Agenda for Sustainable Development
57/2	United Nations Declaration on the New Partnership for Africa's Development	74/225	Ensuring access to affordable, reliable, sustainable and modern energy for all
57/7	Final review and appraisal of the United Nations New Agenda for the Development of Africa in the 1990s and support for the New Partnership for Africa's Development	71/254	Framework for a Renewed United Nations-African Union Partnership on Africa's Integration and Development Agenda 2017–2027
57/300	Strengthening of the United Nations: an agenda for further change	75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
61/296	Cooperation between the United Nations and the African Union	76/236	Programme planning
63/1	Political declaration on Africa's development needs		

Security Council resolutions

1197 (1998)	2282 (2016)
2033 (2012)	2457 (2019)

Economic and Social Council resolutions

1998/46	Further measures for the restructuring and revitalization of the United Nations in the economic, social and related fields	2020/23	Progress in the implementation of General Assembly resolution 71/243 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system
2021/9	Social dimensions of the New Partnership for Africa's Development		

Subprogramme 1

Data and knowledge management for evidence-based policies and advocacy in support of Agenda 2063

General Assembly resolutions

53/92; 54/234; 57/296	The causes of conflict and the promotion of durable peace and sustainable development in Africa	74/302	Implementation of the recommendations contained in the report of the Secretary-General on the causes of conflict and the promotion of durable peace and sustainable development in Africa
58/233; 71/320; 73/335; 74/301; 75/322	New Partnership for Africa's Development: progress in implementation and international support	75/327	Implementation of the recommendations contained in the report of the Secretary-General on the promotion of durable peace and sustainable development in Africa
66/293	A monitoring mechanism to review commitments made towards Africa's development

Evaluation activities

11.18 The Office of Internal Oversight Services evaluation on strengthening the role of evaluation and the application of evaluation findings on programme design, delivery and policy directives ([A/76/69](#)), completed in 2021, has guided the proposed programme plan for 2023.

- 11.19 The results and lessons of the evaluation referenced above have been taken into account for the proposed programme plan for 2023. In particular, evaluation findings have been considered when undertaking the design and planning of the highlighted results. For example, in response to the finding that overemphasis on a project-based approach has limited the transferability and broader impact of results, the programme has sought to identify highlighted results in areas with a multiplying effect, such as energy access, to ensure the transferability of positive results to other sectors of development. Furthermore, the programme will embed evaluation actions in the road map of the proposed results to increase its capacity to take corrective action when and if needed to ensure the achievement of the expected outcomes.
- 11.20 An Office of Internal Oversight Services evaluation on the implementation of the recommendations included in the evaluation of the United Nations support to NEPAD (IED-19-018) is planned for 2023.

Programme of work

Subprogramme 1

Data and knowledge management for evidence-based policies and advocacy in support of Agenda 2063

Objective

- 11.21 The objective, to which this subprogramme contributes, is to advance effective implementation of the 2030 Agenda and Agenda 2063 through coherent, integrated and effective United Nations system engagement, global advocacy and strategic partnership with African Member States and the African Union.

Strategy

- 11.22 To contribute to the objective, the subprogramme will:
- (a) Act as the focal point for the African Union Development Agency-NEPAD and Agenda 2063 at Headquarters; support enhanced collaboration between the United Nations system and the African Union Commission, regional economic communities, the Agency-NEPAD, the African Peer Review Mechanism and other African Union communities; and contribute to strengthening the implementation of the African Union-United Nations framework for the joint implementation of the 2030 Agenda and Agenda 2063;
 - (b) Coordinate the interdepartmental task force on African affairs and monitor United Nations system support for Africa's sustainable development in order to promote strategic planning and programming in the United Nations system in Africa in accordance with the priorities of the African Union and African Member States as enshrined in Agenda 2063 and its first 10-year implementation plan;
 - (c) Perform horizon scanning and analyse emerging trends, challenges and opportunities in the areas of strategic focus of the programme, as well as develop policy proposals to maximize opportunities and minimize and mitigate identified risks, in particular through the management of data and knowledge;
 - (d) Track and monitor the implementation of commitments to Africa's development with clear benchmarks and indicators aimed at assessing their contribution to the implementation of the 2030 Agenda and Agenda 2063 and, when appropriate, propose corrective measures;
 - (e) Facilitate intergovernmental deliberations on issues related to Africa's sustainable development and support African Member States in their participation in intergovernmental processes;

- (f) Develop and implement communication and global advocacy strategies in coordination with subprogramme 3 to establish a global advocacy platform in support of Agenda 2063;
- (g) Promote strategic partnerships with African Member States and African Union institutions, as well as leverage United Nations knowledge and capacities through technical cooperation with United Nations agencies, funds and programmes around flagship initiatives and projects.

11.23 The above-mentioned work is expected to result in:

- (a) Enhanced empowerment of African Member States that are able to mobilize increased resources for Africa's development and maximize their impact through targeted data and evidence-based policies;
- (b) Strengthened cooperation between the United Nations system and the African Union and other African institutions, as well as increased complementarity of the activities of the United Nations and the African Union in support of the implementation of the 2030 Agenda and Agenda 2063;
- (c) A more coherent and integrated approach by the United Nations system support for Africa to challenges affecting Africa's development that includes and addresses existing gaps and leverages opportunities through impact-focused priorities with a multiplying impact;
- (d) Stronger alignment of intergovernmental discussions with the priorities of African countries and the African Union, as well as increased integration of African perspectives into global debates and decisions;
- (e) Greater accountability of stakeholders in the implementation of commitments to Agenda 2063 and the 2030 Agenda;
- (f) Increased awareness and understanding of the international community of the perspective of the African Union and the realities and priorities of African countries.

Programme performance in 2021

Increased platforms for the participation of African youth in policymaking

11.24 Africa is the youngest continent in the world. Over 800 million Africans, approximately 65 per cent of the continent's population, are under 25 years of age. However, their participation in policymaking processes is not always proportional to their demographic weight. To contribute to addressing this issue, the subprogramme has organized an annual Africa regional breakout session at the Economic and Social Council youth forum. In response to the impact of the COVID-19 pandemic, the subprogramme turned to digital platforms as a way to ensure business continuity. The subprogramme realized that digital platforms, in particular social media, provided an opportunity to increase its engagement with African youth. Furthermore, in view of the impact that response policies would have on Africa's development during the next decade, the subprogramme considered that it was fundamental not only to increase the number of platforms dedicated to African youth but also to ensure that those platforms were linked to the forums and initiatives that the subprogramme organized for policymakers. In this regard, the subprogramme organized, along with several youth associations, a series of debates on the future of Africa on the social media application Clubhouse to commemorate Africa Day. It also launched the Youth Stage, a new section of the Africa Dialogue Series consisting of virtual debates on the three sub-themes of the Series that were continued on Twitter and that contributed to the Public Policy Forum discussions of the Series.

11.25 Progress towards the objective is presented in the performance measure below (see figure 11.I).

Figure 11.1
Performance measure: number of African youth participating in policy-focused platforms

Planned results for 2023

Result 1: empowerment and ownership of African countries over their financial resources

Programme performance in 2021 and target for 2023

- 11.26 The subprogramme’s work contributed to the participation of 10 African countries in voluntary national reviews, which did not meet the planned target of 20 African countries. The impact of the COVID-19 pandemic limited overall participation in the voluntary national reviews.
- 11.27 The subprogramme’s work also contributed to the consideration by Member States and stakeholders of the study on impact of illicit financial flows in Africa and the analysis on bottlenecks in remittances regulation, as well as to the increased awareness of Member States and stakeholders of the role of credit-rating agencies, which met the planned targets.
- 11.28 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 11.2).

Table 11.2
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
17 African countries participated in voluntary national reviews	16 African countries participated in voluntary national reviews African countries’ perspectives are included in official forums and conferences to advance the effective implementation of the 2030 Agenda and Agenda 2063 through coherent,	10 African countries participated in voluntary national reviews Member States and stakeholders considered the study on impact of illicit financial flows in Africa Member States and stakeholders considered the analysis on bottlenecks in	Member States discuss proposed framework to address the impact of illicit financial flows on Africa Member States consider the road map to address remittances bottlenecks	Member States endorse specific proposals for the increase in domestic resource mobilization in Africa

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
	integrated and effective United Nations system engagement and partnership with African Member States	remittances regulation Increased awareness of Member States and stakeholders of the role of credit-rating agencies		

Result 2: technology and digitization to strengthen Africa’s self-reliance in addressing health issues

Programme performance in 2021 and target for 2023

- 11.29 The subprogramme’s work contributed to increased emphasis on the relevance of intellectual property rights in Africa, as well as 3,395 patent applications originating in Africa from African residents in 2021, which exceeded the planned target of 3,230 such applications.
- 11.30 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 11.II).

Figure 11.II

Performance measure: annual number of patent applications in Africa by African residents

Result 3: action for a balanced energy mix in Africa to achieve the Sustainable Development Goals

Proposed programme plan for 2023

- 11.31 Over 600 million Africans, representing over 50 per cent of the total population and over 70 per cent of the rural population in sub-Saharan Africa, do not have access to electricity. Without access to energy, African citizens will not be able to see their basic rights, such as to health and education, fulfilled, and the continent will not be able to industrialize or achieve sustainable development. The subprogramme has raised awareness of the need to create a framework that will enable African countries to adopt the energy mix necessary to multiply energy access substantially on the continent. In particular, the subprogramme has focused on promoting a common understanding among Member States that energy access is a precondition for the achievement of other Goals.

Lessons learned and planned change

11.32 The lesson for the subprogramme was that advocacy efforts are significantly more effective when complemented by relevant data and evidence to substantiate them. In applying the lesson, the subprogramme will work with the International Renewable Energy Agency, the International Energy Agency, the African Development Bank, the African Union Commission and other stakeholders to compile accurate data and evidence that showcases the importance of pursuing a balanced energy mix for Africa to achieve the Goals. These efforts are expected to result in the increased energy preparedness of African countries.

11.33 Expected progress towards the objective is presented in the performance measure below (see table 11.3).

Table 11.3
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Member States decided to convene the high-level dialogue on energy to address global energy access challenges	Industrialized Member States promoted a commitment to net zero emissions	Member States adopted a global road map to achieve energy access for all by 2030	Member States acknowledge the trade-offs between energy and climate change as a challenge for Africa's sustainable development	Member States endorse specific proposals for the implementation of an energy mix to achieve energy access for all in Africa

Deliverables

11.34 Table 11.4 lists all deliverables of the subprogramme.

Table 11.4
Subprogramme 1: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	3	4	3	4
1. Report of the Secretary-General to the General Assembly on the New Partnership for Africa's Development	1	1	1	1
2. Report of the Secretary-General on the promotion of durable peace and sustainable development in Africa	1	1	1	1
3. Biennial report of the Secretary-General to the General Assembly on the review of the implementation of commitments towards Africa's development	–	1	–	1
4. Report of the Secretary-General to the Committee for Programme and Coordination on the United Nations system support for Agenda 2063	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	–	3	3	3
5. Meetings of the General Assembly	–	3	3	3
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	2	6	6	10
6. Workshops on Africa's sustainable development, peace and security	2	2	2	4

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
7. Seminars of the research network	–	4	4	6
Publications (number of publications)	–	1	2	6
8. On Africa’s sustainable development	–	1	2	6
Technical materials (number of materials)	11	16	18	30
9. On Africa’s sustainable development, peace and security	6	6	6	6
10. On sustainable development and durable peace in Africa	5	10	6	12
11. On key issues for Africa’s peace and development	–	–	6	12

C. Substantive deliverables

Consultation, advice and advocacy: consultations and strategic-level coordination with African Union institutions; consultations on an annual results-oriented workplan for the interdepartmental task force on African affairs; evidence-based and data-driven advice and policy proposals provided to United Nations leadership and African Member States, including monthly briefings focused on trends, foresight and policy analysis, as well as quarterly briefings and materials in support of the participation of African Member States in intergovernmental processes; advocacy products focused on the prioritization of policy proposals aimed at supporting Africa’s transformational agenda, including panels, round tables and side events during the Economic and Social Council youth forum, the high-level political forum on sustainable development and other major United Nations conferences aimed at an audience of at least 200 participants (government and academia) for each advocacy event, and at least four advocacy videos.

Databases and substantive digital materials: online knowledge repository with digital copies of the work of the Office of the Special Adviser on Africa in at least four official languages of the United Nations; United Nations monitoring mechanism database; data on United Nations action in Africa made available to complement the Office’s reporting mandate; database of African think tanks and non-governmental organizations.

D. Communication deliverables

Outreach programmes, special events and information materials: awareness-raising events, toolkits and pamphlets on key issues affecting Africa’s sustainable development.

External and media relations: press releases, press conferences and media dialogues on issues related to Africa’s sustainable development, peace and security and human rights in Africa.

Digital platforms and multimedia content: Office of the Special Adviser on Africa website and social media with updated content in at least four official languages of the United Nations; multimedia documents in all United Nations official languages; communication and multimedia content that meet the full accessibility standards issued by the Office.

**Subprogramme 2
Regional coordination of United Nations support for the integrated
implementation of the 2030 Agenda for Sustainable Development and the
Agenda 2063**

Objective

- 11.35 The objective, to which this subprogramme contributes, is to accelerate the integrated implementation of Agenda 2063 and the 2030 Agenda through United Nations system-wide coherence and collaboration and to enhance capacities of African Union organs and agencies, in particular the African Union Commission, the African Union Development Agency-NEPAD and the regional economic communities, at the regional and subregional levels.

Strategy

- 11.36 To contribute to the objective, the subprogramme will:
 - (a) Promote and strengthen joint planning and implementation of actions of United Nations entities working on development in relation to the 2030 Agenda through the vehicles of the Regional Collaborative Platform for Africa;

- (b) Conduct policy research and analysis on key African Union priorities and targeted studies on transboundary issues relevant to Africa's regional transformation and integration drive, as well as disseminate the findings at regional and subregional intergovernmental and high-level stakeholder platforms across the five subregions of Africa;
- (c) Provide technical assistance and advisory services within the framework of Agenda 2063 and the 2030 Agenda, taking into account the United Nations-African Union cooperation frameworks and the African Union strategic priorities;
- (d) Build the capacity of subregional entities to formulate coherent strategies for the integrated implementation of development priorities of regional economic communities and intergovernmental organizations in collaboration with the subregional offices and subprogrammes of ECA;
- (e) Continue to work under the architecture of the Regional Collaborative Platform for Africa, with the opportunity and issue-based coalitions as its vehicles in the promotion of coherence in United Nations system-wide support for the African Union and support for resident coordinators and United Nations country teams in the implementation of activities towards the realization of Agenda 2063 and the 2030 Agenda;
- (f) Continue to support the African Union Development Agency-NEPAD in the context of continental priorities and Africa's development agenda in collaboration with subprogrammes 1 and 2.

11.37 The above-mentioned work is expected to result in:

- (a) Enhanced United Nations system-wide collaboration at the regional level towards the realization of the 2030 Agenda;
- (b) Increased and more effective United Nations support for the African Union and its development priorities as reflected in Agenda 2063;
- (c) Development and implementation by Member States of their national development priorities.

Programme performance in 2021

Improved monitoring by African countries of progress towards the 2030 Agenda and Agenda 2063

11.38 High-quality data and statistics and robust monitoring are key to tracking progress towards achievement of the 2030 Agenda and Agenda 2063 and to providing the foundation for informed decision-making and effective policy responses. The subprogramme has been working to enhance United Nations system-wide collaboration in response to Africa's emerging needs by implementing various institutional changes to operationalize the Regional Collaborative Platform for Africa, including its opportunity and issue-based coalitions and task forces. As part of these efforts in 2021, the subprogramme, under the Regional Collaborative Platform, launched the Africa United Nations Data for Development Platform, the first platform to serve as a one-stop repository that captures high-quality data on and evidence of the 2030 Agenda and the Goals from all African countries, disaggregated by target and indicators to enable more granular monitoring of progress. The publicly available portal also allows users to classify the statistics by various dimensions, such as the eight regional economic communities recognized by the African Union, least developed countries and landlocked developing countries, and by thematic areas, such as agriculture, energy and health. Such reliable and collective data will enable all actors, including national policymakers and planners, civil society organizations, academia and the private sector, to engage in evidence-based policy action and strengthen collaboration to accelerate progress towards the 2030 Agenda and Agenda 2063.

11.39 Progress towards the objective is presented in the performance measure below (see table 11.5).

Table 11.5
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	–	Improved monitoring by policymakers and planners, civil society organizations, academia and the private sector of progress towards the 2030 Agenda and Agenda 2063, enabling informed decision-making and evidence-based policy action

Planned results for 2023

Result 1: coherent and integrated support for the implementation of Agenda 2063 and the 2030 Agenda

Programme performance in 2021 and target for 2023

- 11.40 The subprogramme’s work contributed to the adoption of a road map to enhance integrated approaches for the implementation of the 2030 Agenda and Agenda 2063 in policies and strategies of the African Union Development Agency-NEPAD and the African Union regional economic communities, which met the planned target.
- 11.41 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 11.6).

Table 11.6
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Countries agree to analyse the Joint United Nations-African Union Framework for Enhanced Partnership in Peace and Security, the African Union-United Nations Framework for the Implementation of Agenda 2063 and the 2030 Agenda for Sustainable Development and the seven strategic priorities of the African Union to promote an integrated approach in the implementation of Agenda 2063 and the 2030 Agenda	African Union Commission and the regional economic communities reaching a consensus on methodology to enhance integrated policies and strategies of African Union organs and agencies for the implementation of Agenda 2063 and the 2030 Agenda for the subregional studies	Adoption of a road map to enhance integrated approaches for the implementation of the 2030 Agenda and Agenda 2063 in policies and strategies of the African Union Development Agency-NEPAD and the African Union regional economic communities	At least one policy and one strategy of the African Union organs and agencies promote an integrated approach for the implementation of the 2030 Agenda and Agenda 2063	One additional policy and one additional strategy of the African Union organs and agencies promote an integrated approach for the implementation of the 2030 Agenda and Agenda 2063

Result 2: the role of digitization and the African Continental Free Trade Area for a transformative recovery from the COVID-19 pandemic

Programme performance in 2021 and target for 2023

- 11.42 The subprogramme’s work contributed to 14.4 per cent of intra-African trade as a percentage of total trade in Africa,¹ which did not meet the planned target of 18.7 per cent. The target was not met owing in part to the impact of COVID-19 on supply chains and consumption and production patterns.
- 11.43 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 11.III).

Figure 11.III
Performance measure: share of intra-African trade in the total trade of Africa
 (Percentage)

Result 3: enhanced action by African countries on energy access and climate adaptation

Proposed programme plan for 2023

- 11.44 Coordination within the United Nations system and with African Union institutions is crucial to achieve success in the joint implementation of the 2030 Agenda and Agenda 2063. The subprogramme is responsible for strengthening collaboration in the implementation of the priority areas in the Africa region, acting in particular as a member of the joint secretariat of the Regional Collaborative Platform for Africa. Furthermore, the subprogramme is working closely with the African Union Development Agency-NEPAD to advance six priority areas identified in the recently signed memorandum of understanding between ECA and the African Union Development Agency-NEPAD that will run over the next three years. Those areas are: climate resilience and governance, environmental sustainability and natural resources management; sustainable energy, nexus energy-water-food and empowerment of rural communities; knowledge management and evaluation and human and institutional development; science, technology and innovation; economic integration, macroeconomics and governance policy; and wealth creation – industrialization.

Lessons learned and planned change

- 11.45 The lesson for the subprogramme was that improved coherent strategies for energy and climate adaptation in Africa require joint approaches to delivery, including supporting Member States through the integration of climate resilience into development planning for a better impact of

¹ Indicative estimates based on latest available data.

interventions. In applying the lesson, the subprogramme will leverage its comparative advantage of being the only field-based entity in the programme to complement the efforts of other subprogrammes towards climate adaptation and energy access in Africa. In particular, the subprogramme will facilitate exchanges and feedback with the Regional Collaborative Platform for Africa and the resident coordinator system to support Member States with tools and capacities for the integration of climate resilience into investments in key sectors, including energy, water, agriculture and transport, and the development of policies and strategies to promote energy access.

11.46 Expected progress towards the objective is presented in the performance measure below (see figure 11.IV).

Figure 11.IV

Performance measure: cumulative number of national and regional strategies developed to promote energy access and climate adaptation

Deliverables

11.47 Table 11.7 lists all deliverables of the subprogramme.

Table 11.7

20. On progress on decisions of the Regional Collaborative Platform for Africa	–	–	1	1
21. On implementation of integrated approaches towards Agenda 2063 and the 2030 Agenda	3	2	2	2

C. Substantive deliverables

Consultation, advice and advocacy: advisory services, upon request, relating to integrated implementation of Agenda 2063 and the 2030 Agenda for ECA member States, the African Union Commission, the African Union Development Agency-NEPAD and the six regional economic communities; advocacy relating to capacity-building support for the African Union in the context of United Nations-African Union frameworks.

D. Communication deliverables

Outreach programmes, special events and information materials: pamphlets, booklets and celebrations and commemorations of special events and exhibits.

Digital platforms and multimedia content: website with up-to-date content on the work of the subprogramme.

^a The unit of measurement used for the fellowship programme under this subcategory is the number of fellows rather than the number of projects that the fellows will work on at ECA.

Subprogramme 3

Public information and awareness activities in support of Agenda 2063

Objective

- 11.48 The objective, to which this subprogramme contributes, is to achieve the informed understanding and engagement of a global audience in support of the economic, political and social development of Africa.

Strategy

- 11.49 To contribute to the objective, the subprogramme will:
- (a) Develop global comprehensive editorial plans on priority issues affecting Africa, including generating support in Africa and beyond for the African Union Development Agency-NEPAD, the African Union's Agenda 2063 and the achievement of the 2030 Agenda, as well as in support of the work of the Office of the Special Adviser on Africa and ECA and their advocacy strategies. This is under the umbrella of the strategy of the Africa Section of the Department of Global Communications, which supports a shift to a digital focus, and in line with the global communications strategy;
 - (b) Produce external communications content, including through the *Africa Renewal* digital platforms, background notes, media advisories and other public information, for use by external media, both African and international, and provide external communications support to the Office of the Special Adviser on Africa;
 - (c) Produce or translate select content into languages including Chinese, French and Kiswahili.
- 11.50 The above-mentioned work is expected to result in enhanced awareness of key thematic issues of the African Union Development Agency-NEPAD and other issues related to economic recovery and sustainable development in Africa.

Programme performance in 2021

Increased awareness of the general public through *Africa Renewal* audio articles

- 11.51 According to the Global System for Mobile Communication, in 2021, Africa had the greatest mobile penetration in the world and was expected to reach 615 million unique subscribers by 2025. Furthermore, between 2010 and 2019, more than 300 million Africans gained access to the Internet, with nearly 500 million new smartphone connections. Taking advantage of these technological advancements to reach audiences in new ways, the subprogramme produced articles in audio format. In 2021, the subprogramme produced audio versions of 110 *Africa Renewal* articles that were fully played 6,002 times. Among the most played were an op-ed by the Chair of the African Group of Negotiators on Climate Change on Africa's priorities at the twenty-sixth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change and a story on the impact of providing clean water in a village in South Sudan.
- 11.52 Progress towards the objective is presented in the performance measure below (see figure 11.V).

Figure 11.V
Performance measure: number of plays of *Africa Renewal* audio articles

Planned results for 2023

Result 1: highlighting Africa’s challenges and priorities in a digital and multilingual world

Programme performance in 2021 and target for 2023

- 11.53 The subprogramme’s work contributed to 212,036 combined followers on the *Africa Renewal* English and French Facebook and Twitter accounts, which did not meet the planned target of 224,000 followers. The target was not met owing to delays in the development of the social media strategy and in arrangements for dedicated expertise as part of the subprogramme’s overall digital focus. While the target was not met, there was an overall positive trend.
- 11.54 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 11.VI).

Figure 11.VI
Performance measure: cumulative number of followers of *Africa Renewal* social media accounts

Result 2: the role of digitalization for sustainable recovery from the COVID-19 pandemic**Programme performance in 2021 and target for 2023**

- 11.55 The subprogramme's work contributed to 18 *Africa Renewal* articles with a focus on digitalization that were also amplified on social media, which exceeded the planned target of 12.
- 11.56 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 11.VII).

Figure 11.VII

Performance measure: annual number of *Africa Renewal* articles published with a focus on digitalization**Result 3: amplified African voices in the public sphere on issues related to climate change and energy****Proposed programme plan for 2023**

- 11.57 In the run-up to the twenty-sixth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, in 2021, research showed that of about 1,300 authors involved in the 100 most cited climate change research papers from 2016 to 2020, only 22 per cent of them were women. In addition, 90 per cent of the scientists were affiliated with academic institutions in Australia, Europe or North America, and only 10 authors were from Africa. Women were also not cited in the media as experts as frequently as men. In 2020, the Global Media Monitoring Project found that, globally, just under a quarter (24 per cent) of expert voices in the news were women. As stated in the report, in Africa during the period 1995–2020, the overall presence of women as subjects or sources in print, radio and television news reached just 22 per cent. The subprogramme worked on showcasing the voices of women experts in 2021, including those of young women scientists from Ethiopia, Kenya, Nigeria and Senegal working on Goal 2 (tackling hunger), and an interview was conducted with one of the few African women authors of the Intergovernmental Panel on Climate Change report, from Madagascar.

Lessons learned and planned change

- 11.58 The lesson for the subprogramme was that *Africa Renewal*, as a United Nations platform, is a trusted and credible media space in which women experts can tell their stories or showcase their expertise. In applying the lesson, the subprogramme will increase the number of African women experts featured in *Africa Renewal* to showcase their knowledge of climate change and energy issues, as well as to voice African perspectives on global dialogues.
- 11.59 Expected progress towards the objective is presented in the performance measure below (see figure 11.VIII).

Figure 11.VIII
Performance measure: annual number of African women experts on climate and energy cited, published or interviewed in *Africa Renewal*

Deliverables

11.60 Table 11.8 lists all deliverables of the subprogramme.

Table 11.8
Subprogramme 3: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
B. Generation and transfer of knowledge				
Publications (number of publications)	6	–	–	–
<i>Africa Renewal</i> magazine	6	–	–	–
D. Communication deliverables				
Outreach programmes, special events and information materials: partnerships with at least 25 editors and writers at major media houses in Africa and other countries, education institutions, civil society organizations and creative communities to amplify <i>Africa Renewal</i> content for wider distribution and dissemination; two webinars with youth organizations; external communications products, including relating to the annual Africa Dialogue Series, the Commission on the Status of Women, the Economic and Social Council youth forum, the General Assembly and African Union flagship events; contributions to the work of the Regional Collaborative Platform for Africa and the interdepartmental task force on African affairs; publicity in support of international, regional and local initiatives and campaigns that foster or have an impact on Africa’s economic and social development.				
External and media relations: media round tables; content tailored to specific media outlets interested in Africa’s development for syndication or citation and in including relevant information on United Nations support for Africa in their own materials; international, regional and local initiatives and campaigns that foster or affect Africa’s economic and social development; and public information material, including media advisories.				
Digital platforms and multimedia content: digital products and written and audio content for <i>Africa Renewal</i> digital platforms, including the <i>Africa Renewal</i> website, <i>Africa Renewal</i> social media accounts, 24 curated newsletters in English and French and a mobile phone application.				

B. Proposed post and non-post resource requirements for 2023

Overview

11.61 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 11.9 to 11.11.

Table 11.9

11.62 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 11.12 and 11.14 and figure 11.IX.

11.63 As reflected in tables 11.12 (1) and 11.13, the overall resources proposed for 2023 amount to \$8,271,700 before recosting, reflecting a net increase of \$64,300 (or 0.8 per cent) compared with the appropriation for 2022. Resource changes result from two factors, namely: (a) technical adjustments; and (b) other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

11.64 As reflected in table 11.12 (1), resource changes reflect a net increase of \$64,300, as follows:

Subprogramme 1, Data and knowledge management for evidence-based policies and advocacy in support of Agenda 2063. The net increase of \$64,300 reflects the annual provision for one new post of Data Analyst (P-3) established in 2022 pursuant to General Assembly resolution 76/245, which was subject to a 50 per cent vacancy rate in accordance with the established practice for the costing of new posts (\$65,700); offset in part by the removal of a non-recurrent provision for furniture and equipment in 2022 related to this new post (\$1,400).

Other changes

11.65 As reflected in table 11.12 (1), resource changes reflect the cost-neutral redeployment of resources from the executive direction and management component to the programme of work, as follows:

- Executive direction and management.** The decrease of \$45,000 reflects the redeployment of non-post resources, under other staff costs, to subprogramme 1, as those resources are needed for general temporary assistance for the implementation of the programme of work rather than for executive direction and management;
- Subprogramme 1, Data and knowledge management for evidence-based policies and advocacy in support of Agenda 2063.** The net increase of \$45,000 reflects the redeployment of non-post resources for other staff costs from the executive direction and management component, in order to provide for general temporary assistance during periods of peak workload and extended maternity or sick leaves of staff.

Extrabudgetary resources

- 11.66 As reflected in table 11.12 (2), the Office of the Special Adviser on Africa expects to continue to receive cash contributions, which would complement regular budget resources. In 2023, extrabudgetary non-post resources are estimated at \$652,000 and would be used mainly to continue strengthening the operationalization of the data function in the Office and the programme's capacity to use data to underpin its advisory, advocacy, coordination, communications and monitoring functions. Some examples of such projects are: the analysis of the domestic resource mobilization landscape in African Member States; the identification of specific policy measures to support the maximization of domestic resource mobilization in each country by addressing illicit financial flows, leveraging remittances and addressing credit ratings; and support for the implementation of those measures. Extrabudgetary resources represent 7.3 per cent of the total resources for United Nations support for the African Union's Agenda 2063. The increase in voluntary contributions is anticipated as a result of current efforts in resource mobilization to complement regular budget resources in implementing the programme of work, including for new projects in the areas of energy, delivering durable peace through sustainable development, education systems and the strengthening of domestic resource mobilization mechanisms.
- 11.67 The extrabudgetary resources are subject to the oversight of the Office of the Special Adviser on Africa based on delegated authority from the Secretary-General.

Executive direction and management

- 11.68 The Executive direction and management component comprises the Office of the Under-Secretary-General and the Strategic Management Unit.
- 11.69 The overall responsibilities of the executive direction and management component include the following functions:
- (a) To represent the programme and facilitate the interaction of the three subprogrammes with other entities and stakeholders;
 - (b) To contribute to and facilitate debate among Member States, in particular those in the Group of African States, on the strategic direction of programme 9;
 - (c) To develop a forward-looking strategy for the activities of programme 9 to respond to emerging and foreseeable priorities of African Member States and the African Union;
 - (d) To coordinate the joint planning and performance monitoring of programme 9 and to provide strategic guidance for the prioritization of issues within the programme;
 - (e) To provide strategic guidance for the development of policy for, and to provide direction for and ensure the implementation of, the programme of work of the Office of the Special Adviser on Africa, through continuous planning, monitoring and evaluation of subprogrammes performance;
 - (f) To promote transparency, cooperation, synergies and coherence among the three subprogrammes;
 - (g) To provide guidance for the mainstreaming of data analysis and management in the programme's activities;
 - (h) To manage all administrative issues regarding the functioning of the Office of the Special Adviser and to provide logistical and administrative support for the implementation of subprogramme 1;
 - (i) To contribute to United Nations reform discussions and implementation, in particular in relation to improving system-wide coherence in United Nations development work in Africa.

- 11.70 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the programme is integrating environmental management practices into its operations. In 2021, it continued to reduce its carbon footprint through the mainstreaming of virtual platforms for internal and external communications, which resulted in a reduction in travel and in the use of documentation and, in turn, also reduced the Organization's carbon footprint. In 2023, the Office will continue this practice, including by further operationalizing virtual platforms for strategic engagement and interaction with its stakeholders and by implementing measures to limit energy waste.
- 11.71 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 11.15. Cases of non-compliance are due mostly to the late receipt of documentation needed for travel requests or participation as part of delegations of other senior officials. To improve future compliance, the Office will continue to take every measure needed to enable the timely submission of travel requests, including by developing standard operating procedures and checklists to improve compliance and monitoring.

Table 11.15
Compliance rate
(Percentage)

	<i>Actual 2019</i>	<i>Actual 2020</i>	<i>Actual 2021</i>	<i>Planned 2022</i>	<i>Planned 2023</i>
Timely submission of documentation	100	100	100	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	25	25	40	100	100

- 11.72 The proposed regular budget resources for 2023 amount to \$1,540,000 and reflect a decrease of \$45,000 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 11.63 (a). Additional details on the distribution of the proposed resources for 2023 are reflected in table 11.16 and figure 11.X.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

11.73 Extrabudgetary resources for the executive direction and management component are estimated at \$190,000 and would provide for non-post resources. The resources would support the continued strengthening of the data function.

Programme of work

Subprogramme 1

Data and knowledge management for evidence-based policies and advocacy in support of Agenda 2063

11.74 The proposed regular budget resources for 2023 amount to \$4,566,400 and reflect a net increase of \$109,300 compared with the appropriation for 2022. The proposed net increase is explained in paragraphs 11.62 and 11.63 (b). The distribution of proposed resources in 2023 is reflected in table 11.17 and figure 11.XI.

Table 11.17

Figure 11.XI
Subprogramme 1: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

11.75 Extrabudgetary resources for the subprogramme are estimated at \$462,000 and would provide for non-post resources. The resources would be used mainly to strengthen the analytical capacity of the subprogramme and its technical support provided to Member States with regard to domestic resource mobilization and the promotion of sustainable development and durable peace. Given the impact of the pandemic, the subprogramme will join efforts with other entities and stakeholders to promote

initiatives aimed at identifying key policies that may have a multiplying impact and to support the acceleration of the recovery and the implementation of the 2030 Agenda and Agenda 2063. In this regard, the subprogramme intends to use extrabudgetary resources to complement the regular budget resources in the implementation of its mandate.

Subprogramme 2 Regional coordination of United Nations support for the integrated implementation of the 2030 Agenda for Sustainable Development and Agenda 2063

- 11.76 The proposed regular budget resources for 2023 amount to \$841,900 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 11.18 and figure 11.XII

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/76/7](#) and [A/76/7/Corr.1](#)

The Advisory Committee recommends to the General Assembly the consideration of the Secretary-General's revised proposal, subject to the approval of the recommendations of the Committee for Programme and Coordination, and trusts that the implications for the revised proposal, if any, will be presented in the next programme budget submission (para. IV.42).

The Advisory Committee trusts that information on the experience gained with respect to the pooling of support staff in the Office of the Under-Secretary-General will be provided in the next budget submission (see also para. IV.53) (para. IV.58).

The Advisory Committee looks forward to an update on the implementation of the resource mobilization strategy in the next budget proposal (para. IV.68).

The Committee for Programme and Coordination had no recommendations with implications for the revised proposal, the implementation of which began on 1 January 2022.

Despite the short period that has elapsed since the implementation of the new structure, the pooling of support staff in the Office of the Under-Secretary-General has already enabled the realignment of functions among support staff, which has, in turn, led to an increase of the areas of work covered. In particular, the pooling has led to an increase in support for programme implementation and for the operationalization of the internal monitoring process and in support for internal evaluation. In addition, the pooling has also resulted in enhanced staff support through the centralization of meeting support, scheduling and correspondence responsibilities. This has improved the capacity of the Office to track and follow up on correspondence, documentation and engagements and has enabled some staff to specialize in meeting management, which, in turn, has been particularly helpful in enabling the generalized use of virtual platforms. In addition, it has allowed staff in the Professional category, who, until the implementation of the reform had devoted part of their time to the drafting of correspondence, the logistical organization of meetings and other administrative tasks, to focus on substantive technical areas of work.

The resource mobilization strategy has been launched and is aimed at getting extrabudgetary resources to complement the work of the programme in the six areas identified in the strategy. The mobilization of resources during 2022 is, however, expected to be lower than previously anticipated in 2021, for two reasons: first, delays in the implementation of existing extrabudgetary activities due to issues prior to the reform affected the programme's capacity to mobilize as many resources as expected during 2022; second, in view of the continued impact of the coronavirus

Section 11 United Nations support for the African Union’s Agenda 2063: The Africa We Want

Brief description of the recommendation

Action taken to implement the recommendation

disease (COVID-19) pandemic, some of the project proposals have been redesigned, which has affected the overall resources mobilized for project implementation. The mobilization of resources during 2022 is, however, expected to yield to higher voluntary contributions for that year than in 2021, with a further increase in 2023, as reflected in table 11.12 (2).

Foreword

The 2023 programme plan of the United Nations Conference on Trade and Development (UNCTAD) is unique for three reasons. First, because of its urgency – being, as we are, in a divergent recovery from the coronavirus disease (COVID-19) pandemic, one that is risking another lost decade in much of the developing world. Second, because it follows our fifteenth ministerial conference, whose bold outcome document – the Bridgetown Covenant – strengthens the UNCTAD mandate and asks us to break new ground. And third, because it is my first programme plan as UNCTAD Secretary-General, a post to which I have vowed to bring renewed vision, effort and purpose.

This is therefore an ambitious document. It details how we seek to revitalize our three pillars of work, across all our divisions, to support member States' ambition of a post-pandemic world that it is up for the challenge to meet the goals of the 2030 Agenda for Sustainable Development and more resilient for future crises.

This implies closer and more cross-cutting coordination with the United Nations system, of which we are the focal point for the integrated treatment of trade and development and interrelated issues in the areas of finance, technology, investment and sustainable development. As part of the Bridgetown Covenant, we also need to include the areas of gender and environment and climate change under an integrated framework from a new development perspective.

Tackling old problems from new angles and novel issues through time-tested tools, I will lead UNCTAD in this undertaking, under the conviction that our most important work remains ahead of us. That much, indeed, depends on our collective effort.

(Signed) Rebeca **Grynspar**
Secretary-General
United Nations Conference on Trade and Development

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 12.1 The United Nations Conference on Trade and Development (UNCTAD) is responsible for assisting developing countries in integrating beneficially into the global economy in support of inclusive, resilient and sustainable growth and development. This task is now more critical than ever, in the light of the highly regressive impact of the coronavirus disease (COVID-19) pandemic crisis both within and among countries, as highlighted by the Bridgetown Covenant – the outcome document of the fifteenth quadrennial session of UNCTAD. The Covenant contains calls for UNCTAD to contribute to the coordinated international dialogue on COVID-19 response and recovery measures to counter the negative impact of the pandemic on the global economy and trade, to help developing countries to transform their economies through diversification, sustainability and resilience, to transform how development is financed, and to strengthen multilateralism. Special attention is called for the least developed countries, landlocked developing countries, small island developing States, African countries, other structurally weak, vulnerable and small economies, and countries in conflict and post-conflict situations, while also taking account of the challenges of middle-income countries and countries with economies in transition. The Covenant also contains a reaffirmation of the UNCTAD role as the focal point within the United Nations system for the integrated treatment of trade and development and interrelated issues in the areas of finance, technology, investment and sustainable development. In the face of a complex set of global challenges (e.g., growing inequality and vulnerabilities, including high debt levels; accelerating climate change and continuing environmental degradation; and the widening digital divide), UNCTAD will support countries in building a fairer, more equitable, resilient, inclusive, just and sustainable world, that is, a world of shared prosperity. It will also give account to a number of essential underlying issues, most notably respect for human rights, including gender equality.

Strategy and external factors for 2023

- 12.2 The COVID-19 pandemic has had a strong impact on the work of UNCTAD. As suggested in the Bridgetown Covenant, securing an inclusive global recovery from the pandemic forms the basis of the UNCTAD goals to revitalize its three interrelated pillars of work: (a) conducting high-quality and evidence-based research and policy analysis that feed national, regional and international policies, with the aim of generating inclusive and sustainable development under the principle of leaving no one behind; (b) providing technical cooperation to developing countries on the basis of such analysis; and (c) bringing member States together through its intergovernmental machinery to build consensus on policies that allow developing countries to maximize the opportunities of globalization and economic integration, as well as to address cross-cutting economic, social and environmental challenges.
- 12.3 UNCTAD will continue to address interrelated issues essential to all countries in attaining sustainable and equitable growth and development, while being particularly mindful of the needs and priorities of developing countries. This requires extensive cross-fertilization and cooperation across the UNCTAD subprogrammes. Addressing such interrelated issues is also supported through its work on issues related to South-South and triangular cooperation and regional integration, including by promoting dialogue between all stakeholders and relevant institutions with a view to enhancing and exchanging best practices and experiences, towards the achievement of the Sustainable Development Goals.
- 12.4 In accordance with its mandate in the interrelated areas of trade and sustainable development, UNCTAD will support the implementation, monitoring and review of the 2030 Agenda for Sustainable Development and the relevant targets of the Sustainable Development Goals. UNCTAD

is the custodian of eight Goal indicators at the global level and supports the monitoring and implementation of a wide range of Goals, with its main contributions to Goals 8, 9, 10 and 17, and with contributions to Goals 2, 5, 12, 14, 15 and 16. UNCTAD will continue to support the Inter-Agency and Expert Group on Sustainable Development Goal Indicators. UNCTAD activities are also aligned with other relevant agendas, as appropriate.

- 12.5 Along with the global agendas, UNCTAD will strive, in particular, to ensure the implementation of mandates reconfirmed and reinforced at its fifteenth session, held in 2021, and which are outlined in the Bridgetown Covenant. UNCTAD will be guided by four major transformations, outlined in the document, to move to a more resilient, inclusive and sustainable world: transforming economies through diversification; transforming to a more sustainable and more resilient economy; transforming how development is financed; and transforming multilateralism.
- 12.6 To foster a world of shared prosperity, UNCTAD will support the building of a new integrated treatment of development economics, one that more fully integrates inclusiveness, climate change and the environment into a new global trade, financial and policy framework, as also highlighted in the Bridgetown Covenant.
- 12.7 To support its member States and to promote structural transformation, as requested pursuant to the Bridgetown Covenant, UNCTAD will continue to provide reliable statistical information and indicators across trade and development areas. To ensure greater coordinated statistical capacity development at the organizational level, support the implementation of the four transformations outlined in the Covenant and catalyse the support provided to member States in achieving the Sustainable Development Goals, UNCTAD offers a cross-cutting service that will ensure synergies and quality controls.
- 12.8 As requested in the Bridgetown Covenant, UNCTAD will continue to support countries, through technical cooperation, in addressing the challenges exacerbated or revealed as a result of the COVID-19 pandemic and build their resilience to future economic shocks by building productive capacities, develop the capacity of Governments to formulate and implement policies on financing for development, investment, international trade, science and technology and logistics, and support sustainable development.
- 12.9 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. Examples of lessons learned and best practices include integrating analysis of COVID-19-related challenges and economic recovery into UNCTAD programming; adapting delivery methods through broader use of information technology-based approaches (e.g., online training, online/hybrid meetings and the use of e-platforms such as the investment policy hub); and adapting technical cooperation and capacity-building to the emerging needs and priorities of countries (e.g., provision of UNCTAD e-tools to member States to mitigate the effects of the COVID-19 pandemic (see subprogramme 2)). At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.
- 12.10 With regard to cooperation with other entities at the global, regional, national and local levels, UNCTAD will continue to combine its expertise with the reach and in-country presence of partners. UNCTAD remains engaged with the United Nations development system reform process, by collaborating with resident coordinator offices, serving as reviewer for projects of the Joint Sustainable Development Goals Fund and supporting integrated national financing frameworks. UNCTAD will continue to be involved in the preparation of common country assessments and United Nations Sustainable Development Cooperation Frameworks. It will also continue to actively support regional organizations, such as the secretariat of the African Continental Free Trade Area, to gain access to the full potential of regional integration. In addition, UNCTAD continues to foster partnerships with various international organizations and non-governmental organizations, inter-governmental organizations, academic institutions and private sector entities, including by bringing together a broad range of private sector entities in its World Investment Forum. Moreover, UNCTAD will continue to

increase its partnership mechanisms with the private sector by enhancing its due diligence guidelines and drawing from the experiences and new strategy of the United Nations Global Compact.

- 12.11 With regard to inter-agency coordination and liaison, UNCTAD participates in the United Nations System Chief Executives Board for Coordination and its subsidiary bodies. As one of the five major institutional stakeholders of the financing for development follow-up process, UNCTAD is leading inter-agency dialogue on monitoring and accountability of the means for the implementation of targets through the dedicated follow-up to the Addis Ababa Action Agenda commitments, with a particular focus on its trade, finance, investment and technology dimensions. UNCTAD participates in the Inter-Agency Task Force on Financing for Development and continues to lead the United Nations Inter-Agency Cluster on Trade and Productive Capacity in “delivering as one” operational activities at the country level. As a member of the United Nations inter-agency task team on science, technology and innovation for the Sustainable Development Goals and as secretariat to the Commission on Science and Technology for Development, UNCTAD will continue to support the implementation of outcomes related to science, technology and innovation of the 2030 Agenda, including the Technology Facilitation Mechanism and the Technology Bank for the Least Developed Countries. UNCTAD also remains part of the steering committee for the multi-partner trust fund for the socioeconomic response to the COVID-19 pandemic.
- 12.12 With regard to the external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) Up-to-date and accurate economic and financial information and data at the country and regional levels continue to be available and cooperation continues with relevant entities on the production of statistics;
 - (b) Extrabudgetary funding continues to be available for technical cooperation programmes, and conditions and capacities exist in member States to adopt and implement policies and strategies;
 - (c) There is political will to achieve consensus in intergovernmental meetings;
 - (d) There is an agreed outcome of the Twelfth Ministerial Conference of the World Trade Organization (WTO);
 - (e) There is an agreed outcome of the Fifth United Nations Conference on the Least Developed Countries.
- 12.13 UNCTAD integrates a gender perspective in its operational activities, deliverables and results, as appropriate, and in line with the Bridgetown Covenant. UNCTAD is committed to the integrated and cross-cutting treatment of a gender perspective in trade and development. It will continue to strengthen the capacity of member States to design and implement policies and establish institutions, frameworks and/or mechanisms that support women’s economic empowerment, economic security and rights, and enhance their economic and digital skills and opportunities. UNCTAD will continue to analyse the gender impact of the COVID-19 pandemic and other phenomena, and advocate policy responses that are gender-sensitive. UNCTAD will also continue its pioneering work on trade and sex-disaggregated statistics and measuring the ways in which women and men experience the impacts of trade.
- 12.14 In line with the United Nations Disability Inclusion Strategy, UNCTAD will continue to support the advancement of disability inclusion in both its programmatic work and its operational activities, in close collaboration with the United Nations Office at Geneva. For example, it will ensure that all venues and conference facilities are accessible to persons with disabilities.

Programme performance in 2021

Impact of the pandemic

- 12.15 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular the negotiation process of the Bridgetown Covenant. Following two postponements of the fifteenth quadrennial session of UNCTAD in the wake of the uncertainty

created by the pandemic, the conference was held virtually in October 2021. Two studios – one in Bridgetown and one in Geneva – enabled the maximization of visibility of the host country and the full participation of the membership. It also allowed for hybrid elements of the conference, namely, the in-person participation of the Secretary-General of the United Nations. Moreover, 24 least developed countries had antenna offices from where stakeholders with less connectivity could participate in the conference. By contrast, the Asia E-commerce Week, to be held in Abu Dhabi, was initially postponed to October 2021 but eventually cancelled.

Legislative mandates

12.16 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

1995 (XIX)	Establishment of the United Nations Conference on Trade and Development as an organ of the General Assembly	73/245	Promotion of sustainable tourism, including ecotourism, for poverty eradication and environment protection
63/204	Report of the twelfth session of the United Nations Conference on Trade and Development	73/291	Buenos Aires outcome document of the second High-level United Nations Conference on South-South Cooperation
63/303	Outcome of the Conference on the World Financial and Economic Crisis and Its Impact on Development	74/228	Role of the United Nations in promoting development in the context of globalization and interdependence
66/288	The future we want	76/190	International trade and development
67/226	Quadrennial comprehensive policy review of operational activities for development of the United Nations system	76/191	Unilateral economic measures as a means of political and economic coercion against developing countries
68/219	Role of the United Nations in promoting development in the context of globalization and interdependence	76/192 76/198	International financial system and development Follow-up to and implementation of the outcomes of the International Conferences on Financing for Development
69/137	Programme of Action for Landlocked Developing Countries for the Decade 2014–2024	76/202	Promoting sustainable consumption and production patterns for the implementation of the 2030 Agenda for Sustainable Development, building on Agenda 21
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)	76/203	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States
70/1	Transforming our world: the 2030 Agenda for Sustainable Development		
70/133	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly	76/215	Development cooperation with middle-income countries
72/234	Women in development	76/217	Follow-up to the second United Nations Conference on Landlocked Developing Countries
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system	76/218	Implementation of the Third United Nations Decade for the Eradication of Poverty (2018–2027)
73/241	International migration and development	76/221	South-South cooperation

Economic and Social Council resolutions

2021/28	Assessment of the progress made in the implementation of and follow-up to the outcomes of the World Summit on the Information Society	2021/29 2021/30	Science, technology and innovation for development Open-source technologies for sustainable development

Economic and Social Council resolutions

2015/26	Assessment of the progress made in the implementation of and follow-up to the outcomes of the World Summit on the Information Society	2020/13	Science, technology and innovation for development
2020/12	Assessment of the progress made in the implementation of and follow-up to the outcomes of the World Summit on the Information Society		

**Subprogramme 5
Africa, least developed countries and special programmes**

General Assembly resolutions

67/221	Smooth transition for countries graduating from the list of least developed countries	74/3	Political declaration of the high-level meeting to review progress made in addressing the priorities of small island developing States through the implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway
68/18	Graduation of countries from the least developed country category		
68/225	Specific actions related to the particular needs and problems of landlocked developing countries: outcome of the International Ministerial Conference of Landlocked and Transit Developing Countries and Donor Countries and International Financial and Development Institutions on Transit Transport Cooperation	74/15	Political Declaration of the High-level Midterm Review on the Implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024
69/15	SIDS Accelerated Modalities of Action (SAMOA) Pathway	74/234	Implementation of the Third United Nations Decade for the Eradication of Poverty (2018–2027)
69/217	Follow-up to and implementation of the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States	76/216	Follow-up to the Fourth United Nations Conference on the Least Developed Countries

Economic and Social Council resolutions

2017/29	Report of the Committee for Development Policy on its nineteenth session	2019/8	Report of the Committee for Development Policy on its twenty-first session
2018/27	Report of the Committee for Development Policy on its twentieth session		

Deliverables

12.17 Table 12.1 lists all cross-cutting deliverables of the programme.

Table 12.1
Cross-cutting deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	10	10	10	10
1. Conference room paper for the Trade and Development Board	1	1	1	1

Part IV International cooperation for development

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
2. Report on the follow-up to the major United Nations conferences and summits in the areas of UNCTAD expertise	1	1	1	1
3. Report on matters requiring action by the Trade and Development Board in relation to the fifteenth session of UNCTAD	1	1	1	1
4. Conference room papers and working papers prepared for the Working Party on the Programme Plan and Programme Performance	4	4	4	4
5. Overview of the external evaluations of UNCTAD programmes and projects	1	1	1	1
6. Report on the external evaluation of an UNCTAD subprogramme	1	1	1	1
7. Review of the technical cooperation activities of UNCTAD and their financing	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	104	111	107	107
Meetings of:				
8. The Trade and Development Board, including annual, special and executive sessions of the Board and its subsidiary bodies	92	94	92	92
9. The Working Party on the Programme Plan and Programme Performance	12	14	12	12
10. The Advisory Committee on Administrative and Budgetary Questions	–	1	1	1
11. The Fifth Committee	–	1	1	1
12. The Committee for Programme and Coordination	–	1	1	1
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	9	22	24	24
13. Seminars on topics to be determined by the Secretary-General of UNCTAD, in consultation with member States (e.g., ad hoc expert discussions)	3	3	3	3
14. Seminars, including public symposium, with civil society and member States to generate and transfer knowledge in connection with the work programme of UNCTAD, subject to further consideration and decision by the Trade and Development Board	1	1	2	2
15. Seminar on topical trade and development issues (Raúl Prebisch lecture)	1	1	1	1
16. Seminar on topical international trade and development issues, such as multi-stakeholder dialogues	1	1	1	1
17. Seminars with UNCTAD special advisers and advocates	1	2	2	2
18. Seminar on the coordination of national development strategies oriented towards sustainable development (Cabinet meeting)	1	–	1	1
19. Workshops with civil society and youth, including networking events and online networking discussions	1	14	14	14
Technical materials^a (number of materials)	9	7	9	8
20. Policy briefs on trade and development issues	1	–	1	1
21. Reports on evaluations of United Nations Development Account projects and of external evaluations required by contribution agreements	8	7	8	7
C. Substantive deliverables				
Databases and substantive digital materials: UNCTAD civil society database and civil society electronic alerts and UNCTAD Youth Network.				
D. Communication deliverables				
Outreach programmes, special events and information materials: “UNCTAD at a Glance”; outreach programmes; special events; regional outreach materials; press kits, media briefs and flyers for flagship publications; news briefs and opinion pieces; public information materials on UNCTAD, including brochures and posters; and specialized information sessions for students, delegates, academics and youth visiting UNCTAD and, upon request, in other locations, including online outreach.				
External and media relations: press conferences, press releases and information notes.				
Digital platforms and multimedia content: UNCTAD website and social media content, including podcasts and blogs about UNCTAD meetings, events and publications, including policy briefs.				

^a Secretary-General opinion pieces, previously included under technical materials, are reflected under section communication deliverables.

Evaluation activities

- 12.18 The following evaluations completed in 2021 have guided the proposed programme plan for 2023:
- (a) Office of Internal Oversight Services evaluation on strengthening the role of evaluation and the application of evaluation findings on programme design, delivery and policy directives;
 - (b) Independent project evaluations completed by UNCTAD:
 - (i) Cluster evaluation of UNCTAD support for capacity-building on trade and gender (online training);
 - (ii) African Continental Free Trade Area support programme to eliminate non-tariff barriers, increase regulatory transparency and promote industrial diversification;
 - (iii) Transparency in trade regulation and facilitation in the Pacific Agreement on Closer Economic Relations (PACER) Plus;
 - (iv) Improving the value added of cotton by-products in East and Southern Africa;
 - (v) Development policies for sustainable economic growth in Southern Africa;
 - (vi) Indices for benchmarking productive capacities for evidence-based policymaking in landlocked developing countries.
- 12.19 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2023. For example, in response to a recommendation from the evaluation of a project implemented jointly by teams under subprogrammes 2, 3 and 4 that contained a call for strengthened mainstreaming of a gender perspective under relevant areas of work, UNCTAD has conducted a background analysis of the gender perspective and the impact of non-tariff measures/barriers. The results will guide the next phase of this work by actively addressing three perspectives of gender equality: access to training; access to information; and access to complaint mechanisms. With regard to a recommendation to strengthen and systematize relationships with the United Nations country teams from an evaluation of the UNCTAD work to develop the productive capacities index under subprogramme 5, UNCTAD has already cooperated with resident coordinator offices in the organization of workshops related to the index in the participating countries but will aim to extend this cooperation to the data-analysis stage, through greater involvement of the economists in the offices in the national productive capacities gap assessments. UNCTAD is also improving engagement with United Nations resident coordinator offices by showcasing its expertise through seminars and communications with resident coordinators and participating more actively in the United Nations Economists' Network in which several country office economists are present. With regard to the evaluation of work on development policies for sustainable economic growth in Southern Africa under subprogramme 1, UNCTAD was recommended to find a way to foster more substantial engagement with key stakeholders in the project design or inception phases to ensure that incentives and ownership were established from the beginning. In this regard, UNCTAD will explore ways to better engage with key partner institutions with a national presence that can support the sustainability of project results at the national level after the end of its projects.
- 12.20 The following evaluations are planned for 2023:
- (a) Independent evaluation of UNCTAD subprogramme 2: investment and enterprise;
 - (b) Independent evaluation of UNCTAD subprogramme 3: international trade and commodities (to be presented in 2024);
 - (c) Six independent evaluations of completed projects covering various subprogrammes.

Programme of work

Subprogramme 1

Globalization, interdependence and development

Objective

- 12.21 The objective, to which this subprogramme contributes, is to advance inclusive and sustainable development, sustained growth, full employment and decent work for all through evidence-based economic policies and strategies at the national, regional and international levels and to achieve progress towards a durable solution to the debt problems of developing countries, as well as poverty eradication in developing countries, especially the least developed countries, including through North-South cooperation, complemented but not substituted by South-South and triangular cooperation.

Strategy

- 12.22 To contribute to the objective, the subprogramme will:
- (a) Identify specific needs and measures arising from the interdependence of trade, finance, investment, technology and macroeconomic policies, from the point of view of their effects on development through the three pillars of work of UNCTAD referred to in paragraph 12.2 above;
 - (b) Support developing countries in their efforts to formulate development strategies and practical policy options and recommendations at all levels, including through technical assistance, training and the dissemination of best practices;
 - (c) Provide timely statistics and support developing countries in developing their national statistical systems through technical assistance and capacity-building programmes;
 - (d) Promote cooperation at all levels of the interplay between successful development finance strategies, debt sustainability and effective debt management, in accordance with its mandate and complementing the work done by other relevant stakeholders;
 - (e) Focus on the challenges in short- and long-term debt sustainability in developing countries and sustainable domestic and international financial resource mobilization for development, which will help member States to make progress towards the achievement of Sustainable Development Goals 16 and 17;
 - (f) Undertake research and analysis on trends and prospects for closer cooperation and integration among developing countries;
 - (g) Provide technical assistance and research and analysis to support the Palestinian people, in line with paragraph 127 (bb) of the Bridgetown Covenant and responding to the request of the General Assembly in its resolutions [75/20](#), on the Committee on the Exercise of the Inalienable Rights of the Palestinian People, and [76/126](#), on assistance to the Palestinian people;
 - (h) Analyse specific ways in which South-South cooperation can enhance development effectiveness, contribute to recovery from the COVID-19 pandemic and build resilience in developing countries;
 - (i) Analyse the relation between trade and development and the environment and propose sustainable development policies pertaining to its mandate, as stated in paragraph 75 of the Bridgetown Covenant, given that transforming to a more sustainable economy under the current climate trends requires enhancing the ability of countries and economies to adapt to higher temperatures, thus necessitating a better understanding of how trade and development will be affected by a warmer world.

- 12.23 The above-mentioned work is expected to result in:
- (a) Increased understanding of the coherence between international economic rules, practices and processes and national policies and development strategies;
 - (b) Strengthened linkages between economic and development policies and decision-making and improvements in the compilation and dissemination of the official statistics of member States;
 - (c) Strengthened national capacities for effective debt management;
 - (d) Increased understanding by developing countries of the global economic environment and of policy choices for inclusive and sustained development;
 - (e) Contributions to an increase in understanding at the international level of debt issues and debt sustainability;
 - (f) Increased understanding, at all levels, of the challenges from a trade and development perspective posed by climate change and the type of support and action needed.

Programme performance in 2021

Promotion of policy proposals for enhanced structural transformation towards sustainable development and a resilient economy in developing countries

12.24 The subprogramme, in the 2021 edition of the *Trade and Development Report*, titled *From Recovery to Resilience: the Development Dimension*, released ahead of the twenty-sixth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, advocated effective ways of sustaining growth and promoting structural transformation through international and national action for the promotion of productive capacities and investment, and the enhancement of physical and social infrastructure. Developing countries are more exposed to not only environmental shocks, but also a more permanent state of economic stress because of climate impacts. To advance both their developmental and environmental agendas, ahead of the twenty-sixth session UNCTAD called for nations to increase funding for developing countries to adapt to the worsening impacts of climate change and fulfil the \$100 billion a year pledge for the Green Climate Fund. UNCTAD, in its report, recommended specific reforms, including on official development assistance commitments; debt relief and restructuring for developing countries; increased availability of capital for multilateral development banks; and green bond markets (see [A/75/269](#)) to help to raise long-term financing. The outcome of the twenty-sixth session recognized the slow progress made in channelling additional climate finance and member States making renewed commitments to accelerate such flows.

12.25 Progress towards the objective is presented in the performance measure below (see table 12.2).

Table 12.2
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
Member States supported in better understanding of the imbalances in the global economy through analytical work of UNCTAD	Member States advance financing for development issues through contributions to the implementation of the Initiative on Financing for Development in the Era of COVID-19 and Beyond, under the leadership of Canada and Jamaica, and to the launch of the United Nations Research Roadmap for the COVID-19 Recovery, with the support of analytical work of UNCTAD	Member States engage in international discussion of additional allocation of special drawing rights, with the support of analytical work of UNCTAD

Planned results for 2023

Result 1: improving industrial policy and fostering regional value chains in Southern Africa

Programme performance in 2021 and target for 2023

- 12.26 The subprogramme's work contributed to increased engagement by Governments with the private sector in economic policy discussions, with the enhanced capacity of Mauritius, Mozambique, the United Republic of Tanzania and Zambia to design industrial policy and through expanding cross-border activities of firms in the region, which met the planned target.
- 12.27 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 12.3).

Table 12.3

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Initial proposals developed for a regional industrial policy of several SADC countries	At least three sectors identified (agroprocessing, mining machinery and energy provision) in which regional value chains can be established and relevant stakeholders identified, brought together and presented to several SADC countries and to private sector companies	Increased engagement of the private sector in economic policy discussions through identification of six subcommittees in the framework of the Mauritius industrial policy and strategic plan (2020–2025) and export development certificate introduced, providing several incentives to export enterprises favouring the progressive expansion of cross-border activities of firms in the region	Increased capacities of developing countries to formulate and implement industrialization strategies	The regional value chain approach from Southern African countries will be replicated in other regions, resulting in increased intraregional trade of the targeted countries (at least three Latin American countries) through strengthened economic integration and industrial policy capacity

Result 2: advancement of analysis and policy proposals for monitoring the debt situation of developing countries

Programme performance in 2021 and target for 2023

- 12.28 The subprogramme's work contributed to the analysis of debt issues in developing countries and necessary policies to improve their external sustainability, which did not meet the planned target of further advancement of debt issues in international forums through the organization of an international debt conference with the participation of representatives from at least 40 countries and international institutions to discuss further measures for debt relief. The planned target was not met because the conference had to be postponed to mid-2022 owing to COVID-19-related meeting restrictions.
- 12.29 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 12.4).

Table 12.4
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Developing countries are provided with analysis of the current challenges to their debt sustainability and a platform for discussion on improving the global debt restructuring mechanism	Debt issues and policy measures are advanced through proposals and initiatives by representatives of developing countries, including through a global initiative on debt relief for developing countries proposed by the Prime Minister of Pakistan based on the subprogramme's work as presented in the <i>Trade and Development Report 2020</i>	Debt issues are further advanced in the Second Committee through the analysis of current debt positions of developing countries and the formulations of proposals for improving their debt sustainability	The risk and severity of debt issues in developing countries are diminished through the proposal of multilateral measures for debt alleviation and a fairer debt rescheduling framework, with at least 30 developing countries continuing building their debt management capacity	Thirty developing countries benefit from assessment of their debt management capacity

Result 3: increased agility in providing evidence-based and data-driven analysis to implement the 2030 Agenda for all, reflecting the challenges of member States

Proposed programme plan for 2023

- 12.30 Since 2019, the subprogramme has been providing the most recent statistics and data-driven analysis as an annual online publication (*SDG Pulse*), which has become a tool for member States and all other interested stakeholders to monitor sustainable development while informing them of the progress made and the challenges facing the world today. The 2021 update of the *SDG Pulse*, illustrated in numbers, tracked countries' progress and challenges in achieving the goals by 2030 and presented analyses for a range of indicators relevant to trade, investment, financing for development, debt, transport and technology. Examples are the UNCTAD business-to-consumer (B2C) e-commerce index that informs countries of their preparedness for e-commerce, and the UNCTAD index of remoteness, which helps countries to mitigate geographical distance and enhance connectivity.

Lessons learned and planned change

- 12.31 The lesson for the subprogramme was that, at the onset of the COVID-19 pandemic, *SDG Pulse* did not provide timely data on and analysis of the sudden changes and impact brought on by it. In applying the lesson, the subprogramme reviewed the focus of *SDG Pulse* in order for it to be further developed as an agile tool to offer timely data on Sustainable Development Goal indicators while illustrating persisting inequalities, emerging risks and vulnerabilities faced by developing countries, including in the context of the pandemic. The review also resulted in the changing of the annual themes selected to address a topical policy challenge reflecting the needs of the member States, especially developing countries, to enable targeting efforts in an evidence-based approach to implement the 2030 Agenda for all.
- 12.32 Expected progress towards the objective is presented in the performance measures below (see figure 12.I).

Figure 12.I

Performance measure: number of member States benefiting from the agile *SDG Pulse* with dynamic content, including on new data on Sustainable Development Goal indicators

(Percentage)

Deliverables

12.33 Table 12.5 lists all deliverables of the subprogramme.

Table 12.5

Subprogramme 1: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	10	9	8	8
1. Reports for the General Assembly, including on external debt sustainability and development, assistance to the Palestinian people, the economic cost of occupation for the Palestinian people and the situation of and assistance to Palestinian women	5	4	4	4
2. Reports for the Trade and Development Board, including on financing for development issues and on UNCTAD assistance to the Palestinian people, and the overview of the <i>Trade and Development Report</i>	3	3	2	2
3. Reports for the Trade and Development Commission and the Investment, Enterprise and Development Commission	1	1	1	1
4. Reports for the Intergovernmental Group of Experts on Financing for Development	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	24	39	18	18
Meetings of:				
5. The General Assembly (Second Committee) and the Economic and Social Council and its subsidiary bodies	4	4	4	4
6. The fifteenth session of UNCTAD, including preparatory meetings	–	25	–	–
7. The Trade and Development Board (annual and executive sessions)	3	2	3	3
8. The Working Party on the Programme Plan and Programme Performance	2	2	2	2
9. The Trade and Development Commission and related multi-year expert meetings	3	–	3	3
10. The Intergovernmental Group of Experts on Financing for Development	6	6	6	6
11. The Debt Management Conference	6	–	–	–

Section 12 Trade and development

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects, per entity/theme)	19	17	17	17
12. Enhancing public, private and/or international capacity related to assistance to the Palestinian people	1	1	1	1
13. Trade in services development for the member countries of the West African Economic and Monetary Union	1	1	–	–
14. Development policies for sustainable economic growth in Southern Africa	1	1	–	–
15. Installation, update and maintenance of the Debt Management and Financial Analysis System	15	13	15	15
16. Measuring illicit capital flows in sub-Saharan Africa (jointly with the United Nations Office on Drugs and Crime and the Economic Commission for Africa)	1	1	1	1
Seminars, workshops and training events (number of days)	126	136	145	150
17. Seminars and workshops for policymakers, including on formulating development strategies and policy recommendations; sovereign borrowing and lending; and globalization, trade and development	30	30	28	28
18. Seminars on inclusive growth and the Sustainable Development Goals, including ad hoc expert discussions on the interdependence between trade, finance, investment, technology and macroeconomic policies	6	6	7	7
19. Training events on Debt Management and Financial Analysis System for administrators and debt auditors from selected countries in recording debt data, reporting, debt statistics, debt analysis and debt auditing	90	100	110	115
Publications (number of publications)	10	11	10	10
20. <i>Trade and Development Report</i>	1	1	1	1
21. <i>UNCTAD Handbook of Statistics</i>	1	1	1	1
22. <i>SDG Pulse</i>	1	1	1	1
23. <i>Development and Globalization: Facts and Figures</i>	–	1	–	–
24. Studies on external debt, resource mobilization, illicit financial flows and their underlying activities, South-South cooperation, regional integration and Palestinian economic development	7	7	7	7
Technical materials^a (number of materials)	11	13	10	11
25. On macroeconomic, development, financing and debt, structural transformation and South-South cooperation issues	6	6	5	5
26. Economic and maritime statistical country profiles	2	2	2	2
27. Debt Management and Financial Analysis System documentation and software	3	5	3	4

C. Substantive deliverables

Consultation, advice and advocacy: policy advice to policymakers, including on domestic resource mobilization, structural transformation, growth policy (Group of 20), debt renegotiation at the Paris Club, financial instability, debt sustainability and statistical capacity in the area of trade and development.

Databases and substantive digital materials: UNCTAD financial database; world economic macro-level modellers database; UNCTAD statistical data centre for approximately 250,000 users; and financial stress and debt sustainability indicators.

D. Communication deliverables

Outreach programmes, special events and information materials: lectures and presentations on external debt, development finance and macroeconomic and development policy issues; and newsletters and brochures on the Debt Management and Financial Analysis System and the Virtual Institute.

External and media relations: press releases, press conferences and interviews, including on developing country debt and external financing, South-South cooperation and regional integration and assistance to the Palestinian people.

Digital platforms and multimedia content: Debt Management and Financial Analysis System; and Virtual Institute.

^a “Training materials on debt management” was removed because it is part of the training indicated in row 19 of the table.

Subprogramme 2 Investment and enterprise

Objective

- 12.34 The objective, to which this subprogramme contributes, is to advance inclusive growth and sustainable development through investment and enterprise development for productive capacity-building, economic diversification and job creation.

Strategy

- 12.35 To contribute to the objective, the subprogramme will:
- (a) Continue to assist member States through research, policy analysis and technical assistance in designing and implementing policies to scale up mobilization of public and private finance and enhanced investment and entrepreneurship for sustainable development, helping member States to make progress towards achieving Sustainable Development Goals 1, 8, 10, 12, 13 and 17;
 - (b) Monitor, assess and analyse regional and global trends and prospects in international investment and prepare the annual *World Investment Report* and other analytical publications on international investment for development;
 - (c) Conduct reviews of national investment policies and backstop policy dialogue on the international investment agreement regime and support and design new international investment agreements that are better aligned with nationally and internationally agreed development objectives;
 - (d) Provide policy advice to Governments on investment promotion, business facilitation and innovative financing for the Sustainable Development Goals, including through stock exchanges and institutional funds, as well as on incentives in the context of the global tax reform implications for developing countries;
 - (e) Contribute to the enhancement of the international competitiveness of member States' enterprises through advice on policies aimed at stimulating enterprise development, including through mobilizing global efforts in financing and investment in micro-, small and medium-sized enterprises to support their sustainable development transformation, as well as by promoting best practices in corporate social responsibility and accounting and reporting;
 - (f) Foster dialogue and an exchange of best practices related to investment and enterprise development issues through consensus-building mechanisms and the World Investment Forum;
 - (g) Provide an assessment of the impact of the COVID-19 pandemic on investment, global value chains and enterprise development, as well as policy advice, frameworks and tools for recovery.
- 12.36 The above-mentioned work is expected to result in:
- (a) Increased capacity of developing countries to close the gaps related to Sustainable Development Goal investment, especially with regard climate change mitigation and adaptation, in particular for countries that are most vulnerable to the adverse impact of climate change;
 - (b) Improved ability of countries to address key and emerging issues related to investment and investment policies that promote development, including issues on taxation related to investment policy, and on international investment agreements and their development dimension;
 - (c) Increased capacity of member States to collect, analyse and report on foreign direct investment and multinational enterprise data and formulate development-oriented investment policies;
 - (d) Additional resources leveraged and channelled towards global investment development objectives and addressing concerns pertaining to entities using the Sustainable Development Goals to market their positive contribution to some Goals without making a meaningful

contribution to sustainable development, including to the achievement of the Goals, or having a negative impact on others, also referred to as “SDG washing”;

- (e) Enhanced understanding by member States and other development stakeholders of enterprise development issues and ability to boost productive capacity, including through assistance to attract investment capital, grow business linkages with transnational corporations and participate in global and regional value chains;
- (f) Increased awareness of member States of policies, innovations and tools aimed at gaining traction and driving investment for sustainable development;
- (g) Mitigation of the effect of the COVID-19 pandemic on the ability of member States to attract and benefit from investment for development and in fostering private sector recovery.

Programme performance in 2021

Increased resilience of member States through the use of e-tools for continuity of business during the COVID-19 pandemic

12.37 During the COVID-19 pandemic, e-government platforms proved to be a value-for-money, adaptable and easy-to-implement solution for Governments to ensure that they remained open for business in times of crisis, fostering the resilience of public and private sector stakeholders. The subprogramme provided policy advice and assistance to member States through its e-platforms and e-tools, thereby broadly allowing for continuity of business during restrictions and lockdowns. UNCTAD e-government platforms were used to adapt to COVID-19, mitigate its impact and prepare for post-crisis recovery by providing business support activities and facilitating the implementation of COVID-19 fiscal rescue measures. Concrete applications included social security administration for temporarily retrenched workers, the processing of business grant requests, the handling of tax relief or late payments administration, the monitoring of disbursements and post-crisis recovery of State aid through tax systems. Enterprise competitiveness programmes were adapted to help beneficiary countries’ entrepreneurs to identify and tap into new business opportunities. As at 31 December 2021, 27 member States had used at least one of the e-tools and e-platforms developed by UNCTAD to ensure that they remained open for business and mitigate the effects of the pandemic.

12.38 Progress towards the objective is presented in the performance measure below (see figure 12.II).

Figure 12.II
Performance measure: number of member States that used UNCTAD e-tools to mitigate the effects of the COVID-19 pandemic

Planned results for 2023

Result 1: an investment chain to bridge the Sustainable Development Goal financing gap

Programme performance in 2021 and target for 2023

- 12.39 The subprogramme's work contributed to 740 individual investment stakeholders adhering to UNCTAD principles and recommendations, including through impact initiatives and Sustainable Development Goal-related investment compacts, which exceeded the planned target of 683 individual investment stakeholders adhering to UNCTAD principles and recommendations.
- 12.40 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 12.III).

Figure 12.III

Performance measure: number of individual investment stakeholders adhering to United Nations Conference on Trade and Development principles and recommendations (cumulative)

Result 2: investment and enterprise development for recovery and resilience

Programme performance in 2021 and target for 2023

- 12.41 The subprogramme's work contributed to 392 public and private sector stakeholders, including sustainability-themed funds, reporting the integration of UNCTAD tools related to investment for sustainable development, such as the Investment Policy Framework for Sustainable Development and the guidance on core indicators, into their activities, which exceeded the planned target of 356 stakeholders integrating the UNCTAD investment for sustainable development tools.
- 12.42 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 12.IV).

Figure 12.IV

Performance measure: number of stakeholders integrating United Nations Conference on Trade and Development tools related to investment for sustainable development into their activities (cumulative)

Result 3: reignited investment policies in support of member States' COVID-19 recovery and sustainable development

Proposed programme plan for 2023

- 12.43 To address COVID-19 pandemic- and climate change-related challenges, the subprogramme will continue to support member States in taking advantage of the opportunities offered by the realignment of global value chains and foreign investment to revitalize investment as an engine of growth and, through structural transformation and economic diversification, build a more resilient, inclusive, environmentally sound and sustainable world.

Lessons learned and planned change

- 12.44 The lesson for the subprogramme was that the reconfiguration of global value chains for recovery and resilience will have profound implications for inclusive and sustainable growth. This created a need to address three new investment recovery challenges, including: (a) an update of the investment frameworks for development strategies, which require new industrial development policies and smart investment promotion strategies, including through the development of “SDG model zones”,¹ aimed at attracting investment in Sustainable Development Goal-relevant activities, adopting the highest levels of environmental, social and governance standards and compliance and promoting inclusive growth through linkages and spillovers; (b) the promotion of investment in infrastructure and the energy transition, to attract significant project outlays, which requires the development of a pipeline of bankable projects; and (c) boosting investment in the Goals in sectors with the greatest needs, including climate change mitigation and adaptation in countries that are the most vulnerable to the adverse impacts of climate change, based on investment promotion strategies for the Goals. In applying the lesson, the subprogramme will place additional emphasis on supporting investment policymakers by addressing these three investment recovery challenges through assistance in implementing the recommendations emanating from the UNCTAD investment policy framework in support of COVID-19 recovery and sustainable development.
- 12.45 Expected progress towards the objective is presented in the performance measure below (see figure 12.V).

¹ The term “SDG model zones” refers to the concept presented in the *World Investment Report 2019*.

Figure 12.V

Performance measure: recommendations emanating from the United Nations Conference on Trade and Development investment policy framework in support to COVID-19 recovery and sustainable development implemented by member States

(Percentage)

Deliverables

12.46 Table 12.6 lists all deliverables of the subprogramme.

Table 12.6

Subprogramme 2: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	8	8	8	8
1. Report of the Secretary-General to the General Assembly on investment and entrepreneurship for sustainable development	1	1	1	1
2. Reports for the Trade and Development Board on investment for development	1	–	1	1

Section 12 Trade and development

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
13. On policy options in investment for development, including on taxation as it relates to investment policy	–	–	–	5
14. On special economic zones, including piloting SDG model zones	2	2	2	2
15. On international investment regimes	8	13	8	10
16. On investment promotion and facilitation, including strengthening investment promotion agencies	3	3	3	3
17. On intellectual property rights for development	1	1	1	1
18. On investment guides	2	5	2	3
19. On business facilitation initiatives	10	11	10	10
20. On enterprise development initiatives, including micro-, small and medium-sized enterprise financing and business linkages	3	4	3	3
21. On the Entrepreneurship Development Programme (EMPRETEC)	6	6	6	6
22. On accounting and reporting	3	3	3	3
23. On the contribution of foreign direct investment to inclusive growth and the Sustainable Development Goals, including on climate change mitigation and adaptation for least developed countries, landlocked developing countries and small island developing States	5	5	5	5
24. On institutional investors	2	2	2	2
25. On family businesses	2	2	2	2
26. On responsible investment	2	2	2	2
Seminars, workshops and training events (number of days)	107	195	107	136
27. Seminars on foreign direct investment, its development dimension and the themes of the <i>World Investment Report</i>	6	14	6	12
28. Training events on best practices in national and international policies related to investment, including on taxation related to investment policy	4	4	4	4
29. Training events on investment policy reviews, follow-up and investment facilitation enhancement (national)	14	15	14	14
30. Training events on international investment statistics and survey methodologies	5	9	5	5
31. Ad hoc expert discussions on key issues in investment for development, including concerns of “green-washing” ^a and “SDG washing”	3	16	3	3
32. Training events on investment promotion and facilitation for policymakers, investment promotion officials and diplomats	10	14	10	10
33. Training events on the negotiation, implementation and reform of international investment agreements	15	15	15	15
34. Ad hoc expert discussions on investment policies for sustainable development	4	6	4	4
35. Training workshops on intellectual property for development	10	16	10	10
36. Training workshops on enterprise development policies	16	19	16	15
37. Training seminars on accounting and sustainability reporting	6	23	6	12
38. Workshops and seminars on responsible investment issues	4	30	4	20
39. Ad hoc expert discussions on the development of small and medium-sized enterprises and start-ups	6	6	6	6
40. Seminars on institutional investors and sustainable development	2	5	2	3
41. Ad hoc expert discussions on family businesses	2	3	2	3
Publications (number of publications)	25	26	25	22
42. <i>World Investment Report</i> and its overview	2	2	2	2
43. On investment issues for development, including the <i>Transnational Corporations Journal</i> , best practices and lessons learned in foreign direct investment in the least developed countries, and studies on responsible and sustainable investment	7	8	7	8

Part IV International cooperation for development

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
44. On investment policies for development, including <i>Investment Policy Reviews</i> and studies on policy options on investment for development	9	9	9	6
45. On investment promotion and facilitation, including on investing in Sustainable Development Goal sectors and Sustainable Development Goal model zones development	3	3	3	2
46. On enterprise development and entrepreneurship policy support	2	2	2	2
47. On international standard of accounting and reporting	2	2	2	2
Technical materials (number of materials) ^b	13	20	16	15
48. <i>Global Investment Trends Monitor</i> (series), including the <i>Sustainable Development Goals Investment Trends Monitor</i>	4	4	4	4
49. <i>Global Investment Policy Monitor</i> (series)	–	–	3	3
50. Investment guides	2	3	2	2
51. On measures affecting international investment	2	4	2	2
52. International investment agreement issues notes	2	4	2	2
53. On intellectual property rights for development	1	1	1	1
54. On enterprise development and entrepreneurship policy support	1	3	1	1
55. On ambassadors round table	1	1	1	–

C. Substantive deliverables

Consultation, advice and advocacy: policy advice to developing countries, including on policies to attract foreign direct investment; advice on statistics and international investment, including responsible investment; advice to all member States, upon request, on national policies and international investment agreements and sustainable development, as well as investment promotion and facilitation, intellectual property rights, entrepreneurship and enterprise development and business facilitation, with a focus on those in the most vulnerable situation, and on accounting and reporting standards; and advocacy and advisory services to some 200 investment promotion agencies, special economic zones and other stakeholders in the global investment chain and EMPRETEC centres, with a specific focus on the impact of the COVID-19 pandemic on investment and enterprise development.

Databases and substantive digital materials: databases on foreign direct investment, national policies, international investment agreements and related databases; and sustainable finance databases.

D. Communication deliverables

External and media relations: International Standards of Accounting and Reporting updates, EMPRETEC newsletters (electronic newsletter are distributed to more than 2,000 subscribers and made available online) and newsletters, booklets and newflashes on responsible investment; World Investment Forum report for more than 8,000 recipients.

Digital platforms and multimedia content: Global Enterprise Registration portal; and Investment Policy Hub

^a The terms “green-washing” and “SDG-washing” refer to products and strategies presented as sustainable without making a meaningful contribution to sustainable development, including the achievement of the Sustainable Development Goals.

^b The technical materials are presented in more detail, compared with the proposed programme budget for 2022, owing to a change in classification of the monitors (*Global Investment Policy Monitor*) and the launching of the *Sustainable Development Goals Investment Trends Monitor*.

**Subprogramme 3
International trade and commodities**

Objective

- 12.47 The objective, to which this subprogramme contributes, is to ensure that international trade and commodities enable the economic diversification, sustainable and resilient economy and multilateralism transformations needed to create a more inclusive, resilient, sustainable and prosperous world through the participation of all member States.

Strategy

- 12.48 To contribute to the objective and in support of implementation of the four major transformations outlined in the Bridgetown Covenant, the subprogramme will:
- (a) Support developing countries in fostering structural transformation through economic diversification, thus helping developing countries to make progress towards achieving Sustainable Development Goals 1, 2, 7, 8, 9, 12 and 13;
 - (b) Promote and support developing countries transformation towards a more sustainable and more resilient economy, to help member States to make progress towards achieving Sustainable Development Goals 7, 12, 13, 14 and 15;
 - (c) Work to strengthen the multilateral trading system, ensuring that the system works effectively for developing countries and is a driver for inclusive and sustainable development by providing impact assessments of alternative scenarios on a country's sustainable development strategies and helping them to make progress towards achieving Sustainable Development Goals 1, 2, 8, 10 and 17;
 - (d) Support the adoption of, improvement in and enforcement of national and regional competition and consumer protection legislation, through best practices, guidelines and peer reviews, helping member States to achieve inclusive development and make progress towards achieving Sustainable Development Goals 8, 10, 12 and 17;
 - (e) Foster the mainstreaming of gender equality into trade policies, strengthening the capacity of member States to design and implement trade policies that allow women to benefit more from the opportunities arising from international trade, ensuring that no one is left behind and helping them to make progress towards achieving Sustainable Development Goals 1, 5, 8 and 17;
 - (f) Contribute to research on international trade as an engine for development in the report of the Inter-Agency Task Force on Financing for Development, *The Sustainable Development Goals Report*, *World Tariff Profiles* and *World Economic Situation and Prospects*;
 - (g) Monitor and analyse the effects of the COVID-19 pandemic on international trade and provide policy recommendations, including through market studies, consumer protection analyses and competition impact assessments, for an improved recovery in specific sectors.
- 12.49 The above-mentioned work is expected to result in:
- (a) Mitigation of the effect of the COVID-19 pandemic on the ability of member States to benefit from international trade and foster the recovery of the trade sectors;
 - (b) Improved capacity of member States to design and implement trade-policy responses to the climate crisis from a development perspective;
 - (c) Improved capacity of member States to identify and address the trade barriers and supply-side obstacles that disproportionately affect women and girls;
 - (d) Continued work on the impact of non-tariff measures on trade relations, market access, investment and transit, and thus their development implications and impact on the well-being of the population of affected countries, including through the strengthening of its cooperation on the topic with other relevant partners, as well as through participation in the Multi-Agency Support Team on the non-tariff measures database;
 - (e) Member States achieving positive development outcomes in relation to increased trade integration and activity;
 - (f) Improved capacity of member States to seize opportunities emerging from commodity trade and enhanced international and regional cooperation;
 - (g) Member States' increased adoption, revision and/or effective implementation of competition and consumer protection legislation and institutional frameworks;

- (h) Member States harnessing opportunities related to trade in environmentally sustainable products, and increasing capacities to assess the economic potential of ocean-based sectors and devise integrated sustainable use and trade action plans;
- (i) Member States creating an enabling environment for the promotion of services and the creative economy to leapfrog into new, high-growth sectors of the world economy towards achieving the Sustainable Development Goals.

Programme performance in 2021

Trade and biodiversity advanced and incorporated into development frameworks of member States to create valuable economic opportunities and improved livelihoods

12.50 The subprogramme updated and made available for countries the UNCTAD BioTrade Principles and Criteria, a set of guidelines for Governments and companies to conduct biodiversity-friendly trade and to address new challenges and priorities now and in the future. The updated content included important new elements such as climate resilience, marine biodiversity and sustainable tourism, as well as workers’ rights, health and safety, and access and benefit-sharing. The update also aligned the guidelines with landmark international agreements, including the 2030 Agenda, the Paris Agreement and the Nagoya Protocol. The implementation of these principles has enabled countries to diversify their economies and capture opportunities arising from new market trends in biodiversity-friendly sectors by incorporating trade and biodiversity issues into their existing regulations and/or national strategies. UNCTAD and its BioTrade programme partners have called for the updated principles and criteria to be reflected in the new post-2020 global biodiversity framework, which will provide the biodiversity road map for the coming decade.

12.51 Progress towards the objective is presented in the performance measure below (see table 12.7).

Table 12.7

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
One country (Peru) incorporates trade and/or biodiversity issues into its sustainable development policy and legal frameworks	Two countries (Lao People’s Democratic Republic and Peru) are incorporating trade and/or biodiversity issues into their sustainable development policy and legal frameworks; updated BioTrade Principles and Criteria made available for countries and companies to use in their work related to trade and biodiversity	Six countries (Colombia, Ecuador, Lao People’s Democratic Republic, Peru, South Africa and Saint Lucia) are incorporating trade and biodiversity issues into their sustainable development policy and legal frameworks and projects, and companies and entrepreneurs assessed their activities against the updated BioTrade Principles and Criteria, which are available for the products and services related to the marine and terrestrial ecosystems through a new online self-assessment tool developed by the subprogramme

Planned results for 2023

Result 1: oceans economy – supporting small island developing States and coastal developing countries in realizing economic benefits from the sustainable use of marine resources

Programme performance in 2021 and target for 2023

- 12.52 The subprogramme’s work contributed to three member States adopting national oceans economy and trade strategies, with the production, validation and publication of oceans economy and trade strategies of Barbados (large pelagic longline fishery), Belize (a multispecies finfish management plan) and Costa Rica (a collective trademark for fish and seafood products), which exceeded the planned target of two.
- 12.53 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 12.8).

Table 12.8
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Member States have increased interest and are better supported in formulating national oceans economy and trade strategies, including as a result of the United Nations Trade Forum	Member States have increased their capacities to formulate national oceans economy and trade strategies as a result of the subprogramme’s activities, including two member States (Belize and Costa Rica) which formulated such a strategy	Three national oceans economy and trade strategies were produced, validated and published for Barbados, Belize and Costa Rica	Member States identify actions and realign efforts for progress and compliance with trade-related targets of Sustainable Development Goal 14 as a result of the Fourth Oceans Forum and at least two Blue BioTrade ^a value chain assessments for selected species and a regional action plan are developed by the subprogramme	Three more member States take steps to replicate the approach and implement an oceans economy and trade strategy or “Blue BioTrade” value chains analysis

^a Blue BioTrade aims to promote trade and investment in marine biological resources in line with social, economic and environmental sustainability criteria, known as the BioTrade Principles and Criteria (2017, revised in 2020). See <https://unctad.org/topic/trade-and-environment/biotrade/principles-and-criteria>.

Result 2: tearing down trade barriers – transparent and streamlined regulations for sustainable development

Programme performance in 2021 and target for 2023

- 12.54 The subprogramme’s work contributed to enhanced trade transparency on non-tariff measures, enriched by the monitoring of and reporting on COVID-19-related non-tariff measures, such as export restrictions on medicine products, and enabling policymakers to design “goods regulations” through the increased use of the information published on non-tariff measures on trade portals. The portals registered a total of 17,530 users, which exceeded the planned target of increased information use, with at least 1,500 additional users registered (14,500 in total).
- 12.55 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 12.9)

Table 12.9
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Increased awareness among member States of the importance of non-tariff measures for international trade. Development and improvement of non-tariff measures data portals to facilitate access to information on such measures collected by the subprogramme, specifically for developing countries	Increased use of the information published on non-tariff measures on trade portals, with 13,000 total users registered	Increased use of the information published on non-tariff measures on trade portals, with 17,530 total users registered	Increased use of the information published on non-tariff measures on trade portals, with at least 2,000 additional users registered (16,500 in total)	Increased use of the information published on non-tariff measures on trade portals, with at least 22,000 users registered

Result 3: integrated climate change dimension into the implementation of the African Continental Free Trade Area agreement at the national level

Proposed programme plan for 2023

12.56 The Bridgetown Covenant explicitly refers to the importance of supporting African countries in the implementation of the African Continental Free Trade Area, but also highlights climate change as one of the biggest challenges in sustainable economic development, with decoupling economic growth from environmental degradation being crucial to ensuring sustainable progress. The subprogramme’s recent analysis focused on the implications of the African Continental Free Trade Area for BioTrade and identified several opportunities in the agreement for establishing relevant protocols with the potential to emphasize the sustainability aspect of the African Continental Free Trade Area. For its part, the *2021 Trade and Environment Review* highlighted trade-climate readiness challenges, focusing on ways that developing countries could enhance the resilience of their trade to climate change. With a view to putting the analysis into action, the subprogramme plans to identify the best options to mitigate and adapt to climate change that fit into the African Continental Free Trade Area process, with specific focus given to incorporating sustainability elements into national African Continental Free Trade Area implementation strategies and identifying climate change adaptation action needed to maintain productivity in prominent sectors in the coming decades as climate variability increases.

Lessons learned and planned change

12.57 A lesson for the subprogramme was that the African Continental Free Trade Area allows for sustainable value chains to play a substantial role in driving regional and continental trade, and that there is a need to advance the development of regional sustainable value chains while adapting to climate variability in relevant sectors to ensure that these value chains are resilient in the face of climate change. Regional sustainable value chains can also help countries to optimally adjust to shifts in agricultural and food production patterns resulting from climate change. In applying the lesson, the subprogramme will support research and analyses undertaken by regional and national experts on regional sustainable value chains, focusing on climate change and sustainable transition. The specific sustainable value chains will be selected by regional and national stakeholders. The subprogramme will also support the development of value addition strategies that are focused on sustainable initiatives.

12.58 Expected progress towards the objective is presented in the performance measure below (see table 12.10).

Table 12.10
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Five African countries supported by the subprogramme in developing sustainable product export strategies through “national green export reviews”	Twelve African countries supported by the subprogramme in the implementation of African Continental Free Trade Area annex on non-tariff barriers, and increase in regulatory transparency	The subprogramme identified several opportunities in the agreement establishing the African Continental Free Trade Area and relevant implementing protocols that have the potential to add the sustainability perspective of the African Continental Free Trade Area and boost BioTrade, and presented the African countries with options on how they can enhance the resilience of their trade to climate change through economic diversification and adaptation actions	Value chain analysis made available to member States, with a specific focus on climate change and sustainable transition and on selected priority value chains	Ten African countries develop sustainable African Continental Free Trade Area implementation strategies and at least two regional sustainable value chains through collaboration with other countries in their respective regions

Deliverables

12.59 Table 12.11 lists all deliverables of the subprogramme.

Table 12.11
Subprogramme 3: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	21	18	20	19
1. Reports to the General Assembly on international trade and development and world commodity trends and prospects	2	2	1	2
2. Report of and background documents for the fifteenth session of UNCTAD	–	2	–	–
3. Reports on trends in trade and on trade regulations and sustainability standards and ad hoc reports on commodities trends and prospects for the Trade and Development Board	2	3	2	3
4. Background documentation for the Trade and Development Commission and for related expert meetings, including on non-tariff measures and sustainability standards	7	2	7	4
5. Reports of the Intergovernmental Group of Experts on Competition Law and Policy and the Intergovernmental Group of Experts on Consumer Protection Law and Policy	10	9	10	10

Part IV International cooperation for development

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
Substantive services for meetings (number of three-hour meetings)	33	55	33	33
6. Meetings of the General Assembly (Second Committee)	2	2	2	2
7. Meetings of the fifteenth session of UNCTAD, including preparatory meetings	–	26	–	–
8. Annual and executive sessions of the Trade and Development Board	2	3	2	2
9. Meetings of the Working Party on the Programme Plan and Programme Performance	2	7	2	2
10. Meetings of the annual sessions of the Trade and Development Commission and related expert meetings	16	6	16	16
11. Meetings of the annual sessions of the Intergovernmental Group of Experts on Competition Law and Policy and the Intergovernmental Group of Experts on Consumer Protection Law and Policy	10	10	10	10
12. Annual meeting of the Intergovernmental Forum on Mining, Minerals, Metals and Sustainable Development	1	1	1	1
B. Generation and transfer of knowledge^a				
Field and technical cooperation projects (number of projects)	24	22	20	20
13. On trade, a gender perspective and development	1	1	1	1
14. On assisting developing countries in acceding to WTO, on generalized and global systems of trade preferences, on services, regional and multilateral trading negotiations, on strengthening the creative economy, and on dispute settlement and commercial diplomacy	7	7	6	6
15. On competition and consumer protection laws and policies	4	4	4	4
16. On trade, the environment and development	4	4	4	4
17. On collecting, monitoring, reporting on and disseminating data on non-tariff measures, on formulating development-oriented trade policies, and on sustainability standards	4	2	2	2
18. On assistance to commodity-dependent countries in achieving greater diversification and value addition	4	4	3	3
Seminars, workshops and training events (number of days)	125	171	108	118
19. Seminars on the World Integrated Trade Solution, the Trade Analysis and Information System and non-tariff measures, and sustainability standards	10	10	15	17
20. Seminars and training events on preferential trading arrangements, WTO accession, services policies and frameworks, emerging development challenges in the international trading system and trade, international trade negotiations, and the creative economy	24	38	25	27
21. Workshops on trade, a gender perspective and development	23	48	10	12
22. Workshops on trade, the environment and development	20	32	25	27
23. Workshops on competition and consumer protection laws and policies	20	20	20	22
24. Seminars for supporting commodity-dependent developing countries to formulate strategies and policies and harness development gains, and respond to the challenges and opportunities of commodity markets	10	13	5	5
25. Workshops on the changing international trade landscape and trade costs	1	1	1	1
26. Workshops on challenges and opportunities of international trade for the promotion of sustainable development	12	4	2	2
27. Seminars on the role of competition law and policy and on consumer protection and policy, including ad hoc expert discussion	1	1	1	1
28. Geneva Trade and Development Workshop series, held jointly by UNCTAD, WTO, the University of Geneva and the Graduate Institute of International and Development Studies	4	4	4	4
Publications (number of publications)	35	38	36	35
29. On trade and the environment	6	6	6	6
30. On trade, a gender perspective and development	4	2	4	3
31. On trade, services, the international trading system and the creative economy	7	5	8	6

Section 12 Trade and development

40. UNCTAD, WTO and International Trade Centre publication <i>World Tariff Profiles</i>	1	1	1	1
41. Trade-related aspects of the <i>Sustainable Development Goals Report</i>	1	1	1	1
42. United Nations Forum on Sustainability Standards	–	–	1	–
43. On topics in international trade negotiations	2	3	2	2

C. Substantive deliverables

Consultation, advice and advocacy: (a) on trade-related decision-making to five member States and two regional South-South economic integration groupings; (b) on integration into the global economy and participation in regional and multilateral trade agreements; (c) on integration of trade concerns into national trade and services policies; (d) on cooperation and partnerships for inclusive growth and sustainable development; (e) on trade and a gender perspective; (f) on developing competition and consumer protection frameworks; and (g) on trade and environment issues and creative economy potential for sustainable development.

Databases and substantive digital materials: World Integrated Trade Solution and Trade Analysis and Information System; and online training course on non-tariff measures for approximately 300 people.

D. Communication deliverables

Outreach programmes, special events and information materials: multi-stakeholder meeting on commodities and development; BioTrade Congress; event on trade and a gender perspective; event on illicit trade for more than 100 people; event on the creative economy; lectures and exhibits on issues related to the work of the subprogramme; newsletters on the Generalized System of Preferences and on UNCTAD work on competition and consumer protection; brochures and flyers on trade and a gender perspective and on commodity policy research and implementation and projects; and booklets and fact sheets related to the work of the subprogramme.

External and media relations: press releases and op-ed pieces.

Digital platforms and multimedia content: interactive tools related to national competition and consumer protection laws, commercial diplomacy and dispute settlement; UNCTAD, WTO and International Trade Centre website on trade-related Sustainable Development Goals and indicators; electronic version of the model law on competition; online course on negotiating regional trade agreements for trade in times of crisis and pandemic; and teaching package on trade and a gender perspective.

^a The deliverables under category B are presented with additional details, compared with the proposed programme budget for 2022. The deliverables have not changed.

Subprogramme 4 Technology and logistics

Objective

- 12.60 The objective, to which this subprogramme contributes, is to harness innovation and technology, including e-commerce and the digital economy, improve trade logistics and increase human capacities for inclusive and sustainable trade and development in developing countries and economies in transition.

Strategy

12.61 To contribute to the objective, the subprogramme will:

- (a) Identify and disseminate policy options, good practices and lessons learned in the areas of technology and logistics, to limit the impact of the COVID-19 pandemic and promote resilient and sustainable recovery;
- (b) Provide research and analysis and policy recommendations for capturing value in the digital economy, including through the flagship publication “Digital Economy Report”, and support developing countries in measuring e-commerce and the digital economy;
- (c) Ensure that the interests of developing countries are identified and integrated into international policy dialogues on e-commerce and the digital economy, including through the Intergovernmental Group of Experts on E-commerce and the Digital Economy and the annual E-commerce Week;
- (d) Assist developing countries in systematically assessing their state of play and readiness to engage and integrate into the digital economy, including through eTrade Readiness Assessments and e-commerce strategies, by supporting the improvement of legal frameworks and helping women’s participation in e-commerce;
- (e) Ensure that international debates on science, technology and innovation incorporate the perspectives and priorities of developing countries through the Commission on Science and Technology for Development and the Technology Facilitation Mechanism, among others;
- (f) Inform policies and deliberations on science, technology and innovation for development, especially on frontier technologies, through research and analysis, including the flagship publication *Technology and Innovation Report*, and other reports analysing policy options, including for the Inter-Agency Task Force on Financing for Development;
- (g) Build capacities of member States in science, technology and innovation for development, including through science, technology and innovation policy reviews, support the implementation of technology assessment and foresight exercises, and provide substantive support to the United Nations inter-agency task team on science, technology and innovation for the Sustainable Development Goals of the Technology Facilitation Mechanism;
- (h) Support implementation of trade facilitation reforms, including the WTO Agreement on Trade Facilitation, and enhance its support for the development and the implementation of appropriate legal and regulatory frameworks that reduce trade transaction costs. To that end, the subprogramme will support trade facilitation reforms and automation through the Automated System for Customs Data;
- (i) Provide technical guidance, data and policy recommendations and promote the sharing of best practices on the integration of developing countries into regional and global supply chains and transport networks, including through the flagship publication *Review of Maritime Transport* and other research products, legislative frameworks and capacity-building;
- (j) Foster international policy dialogue on trade logistics issues, ensuring that the interests and specific challenges facing developing countries are addressed in relevant regional and international forums, and in this context continue to address specific trade logistics challenges affecting small island developing States and landlocked developing countries;
- (k) Deliver training courses on key issues on the international economic agenda and the Training Development in the Field of International Trade (TrainForTrade) programme, to enhance capacities of relevant stakeholders and government experts on various aspects of trade policies and interrelated issues of finance, investment, technology and sustainable development, including port management, trade statistics and digital economy;

- (l) Mainstream gender equality considerations and the empowerment of women and girls across the three pillars of the subprogramme, thus contributing to the promotion of inclusive development, with a special focus on enhancing their economic and digital skills and opportunities.

12.62 The above-mentioned work is expected to result in:

- (a) Improved policy formulation at the national, regional and global levels on e-commerce and digital economy for sustainable development;
- (b) Improved coordination among Governments, together with development partners, civil society and the private sector, to implement policies on e-commerce and the digital economy that work for sustainable development;
- (c) Improved knowledge and understanding of policy options by policymakers and international consensus on emerging challenges and opportunities in science, technology and innovation for development;
- (d) Implementation of the outcomes of the World Summit on the Information Society and of the Technology Facilitation Mechanism;
- (e) Increased capacities of member States to harness science, technology and innovation for their national development strategies;
- (f) Improved ability of countries to address key and emerging issues in trade logistics, including maritime transport policies;
- (g) Improved knowledge and capacity of member States to implement trade facilitation reforms, including the WTO Agreement on Trade Facilitation;
- (h) Enhanced capacity of member States to design and implement policies and action aimed at improving the efficiency of trade transactions, as well as the management of transport operations, including through the Automated System for Customs Data programme;
- (i) Increased capacity of policymakers to assess, analyse and formulate policies on key issues on the international economic agenda through the UNCTAD “Paragraph 166” programme² and through the TrainForTrade programme on port management, trade statistics and the digital economy;
- (j) Increased understanding by member States of policy options to mitigate the impact of and accelerate the recovery from the COVID-19 pandemic and other shocks, in the areas of technology and trade logistics.

Programme performance in 2021

Enriched international dialogue on science, technology and innovation for development leading to enhanced cooperation for harnessing technology for the Sustainable Development Goals

12.63 The Commission on Science and Technology for Development is the focal point within the United Nations for science, technology and innovation for development. The work of the Commission is enabled through recognized research (e.g., the UNCTAD *Technology and Innovation Report 2021*, which focused on frontier technologies and inequality) and access to leading scientific expertise. As the secretariat to the Commission, the subprogramme connects technology stakeholders in various development-oriented partnerships. In this context, programmes initiated at the Commission, such as national science, technology and innovation policy reviews, have helped developing countries to strengthen their innovation systems. Commission member States also benefited from partnerships for technological capacity-building, including with scholarships for young female scientists, and capacity-building to use space technologies and big data to monitor crops and improve food security. The subprogramme also facilitated partnerships for training policymakers from developing countries

² Refers to paragraph 166 of the Bangkok Plan of Action.

on good practices in technology and innovation policy. Following Commission deliberations in 2021 and its resolution on science, technology and innovation, the subprogramme launched a new project to develop the capacity of science, technology and innovation stakeholders in African countries to conduct technology assessments so that they could make better choices concerning the introduction of frontier technologies to progress towards achieving the Sustainable Development Goals.

12.64 Progress towards the objective is presented in the performance measure below (see figure 12.VI).

Figure 12.VI

Performance measure: number of policymakers in developing countries benefiting from Commission on Science and Technology for Development initiatives

Planned results for 2023

Result 1: strengthened capacity of developing countries to comply with international and regional trade facilitation rules and standards

Programme performance in 2021 and target for 2023

12.65 The subprogramme’s work contributed to 37 national trade facilitation committees being assisted by UNCTAD in identifying their national implementation obligations with regard to the WTO Agreement on Trade Facilitation, which exceeded the planned target of 15.

12.66 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 12.VII).

Figure 12.VII

Performance measure: number of national trade facilitation committees assisted by the United Nations Conference on Trade and Development in identifying their national implementation obligations with regard to the Agreement on Trade Facilitation of the World Trade Organization (annual)

Result 2: women digital entrepreneurs empowered to build a more inclusive digital economy

Programme performance in 2021 and target for 2023

- 12.67 The subprogramme’s work contributed to a cumulative total of 200 women digital entrepreneurs from more than 20 developing countries with improved business and leadership skills, acquired by participating in capacity- and community-building activities under the leadership of eTrade for Women Advocates, as well as in policy dialogues with policymakers on digital transformations, which exceeded the planned target of 100.
- 12.68 The subprogramme’s work also contributed to three new communities being established in 2021, in South-East Asia, East Africa and the Balkans, adding to the first eTrade for Women community launched in West Africa in 2020, which met the planned target.
- 12.69 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 12.12).

Table 12.12
Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Increased awareness of Governments and the private sector regarding the role of eTrade for Women advocates in building a more inclusive digital economy	Improved business and leadership skills of 50 women digital entrepreneurs participating in eTrade for Women activities	Improved business and leadership skills of a cumulative total of 200 women digital entrepreneurs participating in eTrade for Women activities and three new communities established, in South-East Asia, East Africa and the Balkans	Improved business and leadership skills of a cumulative total of 200 women digital entrepreneurs participating in eTrade for Women activities. At least four eTrade for Women communities active across regions	Improved business and leadership skills of a cumulative total of 300 women digital entrepreneurs participating in eTrade for Women activities. At least four eTrade for Women communities active across regions

Result 3: Simplified trade procedures through the Automated System for Customs Data Single Window

- 12.70 The UNCTAD Automated System for Customs Data programme, led by the subprogramme, is an integrated customs management system running in more than 100 countries and territories, including 39 least developed countries, 34 small island developing States and 21 landlocked developing countries. It has also created a platform on which to build an electronic Single Window enabling the integration of processes among government agencies, cross-border regulatory agencies and customs, allowing traders to submit import/export paperwork online, through a single interface. Single Window has multiple benefits, including simplifying and streamlining trade procedures and increasing customs revenue for beneficiary countries. The benefit of Single Window further improves with the increase in the number of participating agencies, owing to the enhanced integration of trade-related procedures. In Jamaica, it is expected that Single Window for trade will reduce clearance times to fewer than 29 hours in 2023, compared with approximately 32 hours in 2020, lowering associated costs by 20 per cent. Automated System for Customs Data Single Window projects have been or are being implemented in Burundi, the Comoros, Jamaica, Kazakhstan, Rwanda, Uganda, Vanuatu and Zimbabwe. Barbados, Timor-Leste and Turkmenistan have also recently embarked on implementing Automated System for Customs Data Single Window systems.

Lessons learned and planned change

- 12.71 The lesson for the subprogramme was that, in order to better assess the state of play, impact and associated benefits of the Single Window implementation, it is important to gather and analyse socioeconomic data before starting a trade automation project. In applying the lesson, the Automated System for Customs Data programme will explore ways to bolster analytical capacity to establish baselines, assess socioeconomic impacts and report results more systematically.
- 12.72 Expected progress towards the objective is presented in the performance measure below (see figure 12.VIII).

Figure 12.VIII

Performance measure: number of new border regulatory agencies and partner governmental agencies participating in and benefiting from the Automated System for Customs Data Single Window system

Deliverables

- 12.73 Table 12.13 lists all deliverables of the subprogramme.

Table 12.13

Subprogramme 4: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	22	12	21	20
1. Reports to the General Assembly on the outcomes of the World Summit on the Information Society, and on science and technology for development	2	2	1	2
2. Reports to the Commission on Science and Technology for Development and its intersessional panels	6	6	6	6
3. Background notes and reports for the Trade and Development Board	2	1	2	2
4. Note by the UNCTAD secretariat and reports for the Investment, Enterprise and Development Commission and related expert meetings on issues related to science, technology and innovation	4	1	4	2
5. Note by the UNCTAD secretariat and reports for the Trade and Development Commission and related expert meetings	4	–	4	4
6. Note by the UNCTAD secretariat and reports for the Intergovernmental Group of Experts on E-commerce and the Digital Economy	2	–	2	2
7. Note by the UNCTAD secretariat and reports for the Working Group on Measuring E-commerce and the Digital Economy	2	2	2	2

Section 12 Trade and development

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
Substantive services for meetings (number of three-hour meetings)	50	33	49	55
8. Meetings of the General Assembly (Second Committee) and the Economic and Social Council on the follow-up to the World Summit on the Information Society	3	3	2	3
9. Annual session and intersessional expert panels of the Commission on Science and Technology for Development	16	13	16	16
10. Meetings of the fifteenth session of UNCTAD, including preparatory meetings	–	4	–	–
11. Annual and executive sessions of the Trade and Development Board	3	1	3	3
12. Meetings of the Working Party on the Programme Plan and Programme Performance	2	2	2	2
13. Annual sessions of the Investment, Enterprise and Development Commission and related expert meetings	7	2	7	5
14. Annual sessions of the Trade and Development Commission and related expert meetings on transport, trade logistics and trade facilitation	7	2	7	7
15. Meetings of the Intergovernmental Group of Experts on E-commerce and the Digital Economy	6	–	6	6
16. Meetings of the Working Group on Measuring E-commerce and the Digital Economy	4	4	4	4
17. Multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals of the Technology Facilitation Mechanism (with the Department of Economic and Social Affairs of the Secretariat)	2	2	2	2
18. Meetings for E-commerce Week	–	–	–	6
19. Meetings of the global trade and transport facilitation forum	–	–	–	1
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	32	32	32	32
20. Training Development in the Field of International Trade (TrainForTrade) capacity-building programme: port management; issues related to trade, including e-commerce and statistics; and pedagogical methodology	7	7	7	7
21. National, regional and interregional projects on transport and related services, including the Automated System for Customs Data	22	22	22	22
22. Transport, trade facilitation and trade logistics	2	2	2	2
23. E-commerce and the digital economy	1	1	1	1
Seminars, workshops and training events (number of days)	458	448	404	406
24. Training events for trainers: TrainForTrade train-the-trainer events	55	40	–	–
25. Training events for trainers TrainForTrade national delivery workshops	260	260	300	300
26. Seminars, workshops, fellowships and training events on transport, trade logistics and trade facilitation	80	91	52	52
27. Seminar on transport, trade logistics and trade facilitation, including ad hoc expert discussions	1	1	1	1
28. Seminar on the role of technology (including information and communications technology) and innovation in development, including for the operationalization of technology transfer, including ad hoc expert discussions	1	1	1	1
29. Seminars, workshops and training events on e-commerce and the digital economy for development, including on information economy statistics, economic, technical, legal and regulatory aspects of e-commerce and the digital economy for development and e-commerce, and measuring the digital economy and eTrade for Women	10	10	10	12
30. Training courses on key issues on the international economic agenda (paragraph 166 of the Bangkok Plan of Action), regional and short courses	36	30	25	25

41. eTrade Readiness Assessments	10	2	7	5
Technical materials (number of materials)	12	13	12	12
42. Policy briefs on the following topics: science, technology and innovation; e-commerce and the digital economy; and trade logistics	4	4	4	4
43. Automated System for Customs Data annual report	1	1	1	1
44. <i>Year in Review</i> of the e-commerce and digital economy programme	1	1	1	1
45. Technical notes on information and communications technology (including e-commerce and the digital economy) for development	2	3	2	2
46. Technical notes on trade facilitation	1	1	1	1
47. Background notes for the multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals	1	1	1	1
48. Economic and maritime country profiles	1	1	1	1
49. Report of the UNCTAD Advisory Group on Strengthening Training Capacity and Human Resource Development	1	1	1	–
50. Technical note on science, technology and innovation for development	–	–	–	1

C. Substantive deliverables

Consultation, advice and advocacy: Africa E-commerce Week; multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals; sessions of the UNCTAD Advisory Group on Strengthening Training Capacity and Human Resource Development; and policy advice on science, technology and innovation policies for development, policy and practical aspects of e-commerce and the digital economy, transport policies and international legal instrument standards and rules related to the facilitation of international trade, transport and transport security for port operators and the eTrade for All initiative.

Databases and substantive digital materials: UNCTAD platform for learning and capacity-building managed by the TrainForTrade programme, which trains approximately 1,500 beneficiaries per year; port performance statistics platform; online repository on national trade facilitation committees; Global Cyberlaw Tracker; online e-learning modules for the courses on key issues on the international economic agenda, for 200 users annually; online platform for sustainable freight transport; and eTrade for All online platform.

D. Communication deliverables

Outreach programmes, special events and information materials: newsletters on ASYCUDA and eTrade for All for more than 2,000 recipients and transport and trade facilitation for more than 5,000 recipients, STI Digest newsletter, brochures, flyers and information kits.

External and media relations: press releases, press briefings, interviews, press conferences and news items related to the issuance of major publications under the subprogramme and the organization of important events.

Digital platforms and multimedia content: TrainForTrade; Commission on Science and Technology for Development; Automated System for Customs Data and paragraph 166 of the Bangkok Plan of Action website; eTrade for All Platform; and online platforms for innovation policy learning.

Subprogramme 5

Africa, least developed countries and special programmes

Objective

- 12.74 The objective, to which this subprogramme contributes, is to enhance the effective integration of Africa, the least developed countries and other groups of countries in special situations (landlocked developing countries, small island developing States and other structurally weak, vulnerable and small economies) into the global economy through fostering sustainable structural transformation, reducing vulnerabilities and developing domestic productive capacities in the targeted groups.

Strategy

- 12.75 To contribute to the objective, the subprogramme will:
- (a) Carry out research and technical cooperation activities to diversify the export and productive structures of the above-mentioned countries, including through contributions to reports of the Secretary-General to the General Assembly and the reports on the implementation and follow-up of relevant agendas;
 - (b) Implement technical cooperation programmes to promote structural transformation through diversification;
 - (c) Advocate consensus in the international development community regarding the policy measures that best address the sustainable development problems of least developed countries, small island developing States and landlocked developing countries, including at the multilateral level, through the identification of new approaches, training and capacity-building workshops, as well as greater interaction with research institutes in least developed countries and with development partners;
 - (d) Strengthen efforts to provide domestic policy support and capacity-building to the targeted groups derived from its innovative research and analysis and technical support;
 - (e) Increase the availability of strategic policy-based options aimed at enhancing domestic productive capacities and structural transformation for sustainable development in developing countries and facilitate their implementation through the development of demand-driven technical cooperation and programmatic support within its areas of expertise;
 - (f) Provide support to the least developed countries, which are either in the process of graduation or recently graduated from the least developed country category, to ensure a smooth transition towards their new status;
 - (g) Broaden its country-based technical support to include aspects such as national strategies for the development of productive capacities and structural transformation, rules of origin, inequality and vulnerability, enhanced market access and preference utilization, value addition in strategic products and geographical indications, which will help member States, in particular least developed countries and other groups of countries in special situations, to make progress towards the achievement of Sustainable Development Goals 9 and 17;
 - (h) Support member States in addressing the socioeconomic impact of COVID-19 on economies in target countries, through research work and technical cooperation, in order to facilitate specific policy design and implementation in the short, medium and long term aimed at building resilience to future economic shocks;
 - (i) Support African countries in addressing their special concerns and needs, including as articulated in the New Partnership for Africa's Development and in Agenda 2063: The Africa We Want, as well as to contribute to the implementation of the African Continental Free Trade Area, most notably through research, technical cooperation and targeted policy advice.

- 12.76 The above-mentioned work is expected to result in:
- (a) Greater structural transformation and inclusive growth in beneficiary countries;
 - (b) Improved development policy formulation and implementation capacities of member States, including capacities to account for current and future shocks, reduce exposure to external shocks and build resilience;
 - (c) Improved development policy formulation and implementation capacities in countries with specific needs for more effective technical cooperation strategies;
 - (d) Strengthened capacity of member States to implement the African Continental Free Trade Area.

Programme performance in 2021

Enhanced understanding of policymakers of debt, economic diversification and natural resources challenges in small island developing States

- 12.77 The subprogramme has conducted targeted policy-oriented research, “Building resilience in small island developing States: a compendium of research”. The compendium expanded the knowledge of policymakers on the issues of debt, economic diversification, post-COVID tourism revenue and the potential development of products in a freshwater scarcity environment. By providing a unique perspective on challenges facing small island developing States, the compendium served as a useful analytical tool and enabled the policymakers to formulate policies and plan their next steps in the economic development of small island developing States.
- 12.78 Progress towards the objective is presented in the performance measure below (see table 12.14).

Table 12.14

Enhanced understanding of policymakers of debt, economic diversification, and water resource issues in small island developing States

2019 (actual)	2020 (actual)	2021 (actual)
–	To address the negative impact of COVID-19 on small island developing States’ tourism-related revenue, simulation-related research is initiated to drive targeted policy measures	Policymakers from small island developing States are better equipped to address their specific challenges owing to available evidence-based research and policy recommendations on issues of debt, economic diversification, tourism and the development of products in a freshwater scarcity environment

Planned results for 2023

Result 1: building economic resilience in the least developed countries

Programme performance in 2021 and target for 2023

- 12.79 The subprogramme’s work contributed to an estimated 20 least developed countries that have achieved a reduction in their export concentration index, which did not meet the planned target of 28 least developed countries experiencing a reduction in their export concentration index. The target was not met owing to the negative effects of the COVID-19 pandemic on the countries’ economic outputs, resulting in a reconcentration of exports, greater unemployment and higher poverty rates.
- 12.80 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 12.IX).

Figure 12.IX

Performance measure: number of least developed countries experiencing a reduction in their export concentration index (annual)

Note: The performance measure for 2021 is estimated, given that data for 2021 were not available at the time of preparing the present report.

Result 2: improved participation of African countries in regional and global value chains

Programme performance in 2021 and target for 2023

- 12.81 The subprogramme's work contributed to the assessment of the regional customs network for transit trade (SIGMAT) in Burkina Faso and the Niger and the evaluation of cross-border performance in the Malanville border post, between Benin and the Niger, resulting in a road map for a functional inter-State transit programme and in support of the activities related to the inter-State transit programme in the region, which met the planned target of an inventory of existing protocols for inter-State road transit in Benin, Burkina Faso and the Niger.
- 12.82 The subprogramme's work also supported activities related to the road map for a functional inter-State transit programme in the region, which did not meet the planned target of validation by the beneficiary countries, through the established interministerial working group, owing to delays caused by the COVID-19 pandemic.
- 12.83 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 12.15).

Table 12.15

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Recognition by the ministries of commerce, transport and planning, chambers of commerce and private sector actors of the need for a transit and transport coordination mechanism due to UNCTAD raising awareness of the issue	Raising awareness among the beneficiary countries through the established interministerial working group to the benefits arising from implementation of the regional convention on transit (ECOWAS Convention relating to Inter-States Road Transit of Goods) and the WTO Agreement on Trade Facilitation	Assessment of the regional customs network for transit trade (SIGMAT) in Burkina Faso and the Niger and evaluation of cross-border performance in Malanville border post (between Benin and the Niger), and the subprogramme supported activities related to the road map for a functional inter-State transit programme in the region	Increase in inter-State trade between the three beneficiary countries (Benin, Burkina Faso and the Niger) resulting from UNCTAD policy guidance and advisory support made available for the coordinated implementation of inter-State transit and transport policies	Enhanced management of joint border post among the three beneficiary countries (Benin, Burkina Faso and the Niger) and an enhanced understanding of the domestic reforms for implementation of the regional convention on transit (ECOWAS Convention relating to Inter-States Road Transit of Goods) and the WTO Agreement on Trade Facilitation

Result 3: enhanced understanding of the challenges and opportunities to foster productive capacities and structural transformation in countries with special needs

Proposed programme plan for 2023

- 12.84 Institutional mechanisms to systematically evaluate, monitor and diagnose the evolution of the level of productive capacities are not developed in targeted beneficiary countries, leading to a gap between the present productive development challenges and national and regional strategies, policy guidelines, frameworks and recommendations to address them. The subprogramme, using the UNCTAD productive capacities index, is enabling countries to formulate and implement policies that are better tailored to national circumstances.

Lessons learned and planned change

- 12.85 The lesson for the subprogramme was that the implementation of targeted policies by developing countries, in particular least developed countries, to undertake their productive transformation and achieve structural transformation was lacking a systematic assessment of the specific productive capacities gap, affecting their development. In applying the lesson, the subprogramme began to operationalize the UNCTAD productive capacities index through national and regional productive capacities gap assessments that will allow countries to enhance their capability to develop, maintain and utilize productive capacities, in line with the Bridgetown Covenant and relevant ministerial declarations of least developed countries and landlocked developing countries.
- 12.86 Expected progress towards the objective is presented in the performance measure below (see table 12.16).

Table 12.16

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (planned)</i>	<i>2023 (planned)</i>
Lack of understanding and awareness by national and regional authorities of gaps and limitations to productive capacities development due to insufficient policy-oriented methodologies to assess gaps and data-driven tools to measure productive capacities gaps	Enhanced awareness by national and regional policymakers of the challenges and areas where productive capacities are lagging, with the support of the UNCTAD productive capacities index	The UNCTAD productive capacities index made available for all countries on a dedicated web portal, and the subprogramme developed a coherent structure for national and regional productive capacities gap assessments	<ul style="list-style-type: none"> National and regional productive capacities gap assessments are undertaken, utilizing the productive capacities index and related analysis of national policies and programmes, for at least five countries Countries design and validate policies and programmes to address the identified gaps and limitations to the building and use of productive capacities 	National and regional productive capacities gap assessments are used as input to the General Assembly-mandated vulnerability profiles of those countries found eligible to leave the least developed country category for the first time

Deliverables

12.87 Table 12.17 lists all deliverables of the subprogramme.

Table 12.17

Subprogramme 5: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	9	5	4	7
1. Reports for the Economic and Social Council, including on vulnerability profiles	5	4	1	5
2. Reports for the Trade and Development Board, including the overviews of the <i>Economic Development in Africa Report</i> , on UNCTAD-wide activities for least developed countries, UNCTAD-wide activities in favour of Africa and the implementation of the outcome of the second United Nations Conference on Landlocked Developing Countries	4	1	3	2
Substantive services for meetings (number of three-hour meetings)	8	8	9	9
3. Meetings of the General Assembly and the Economic and Social Council and its Committee for Development Policy	1	2	2	2
4. Annual and executive sessions of the Trade and Development Board	5	4	5	5
5. Meetings of the Working Party on the Programme Plan and Programme Performance	2	2	2	2
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	4	4	7	2
6. On trade, transit and development to build national capacity	2	2	5	1
7. On the Enhanced Integrated Framework	2	2	2	1
Seminars, workshops and training events (number of days)	18	32	25	26
8. Workshops on trade issues relevant to least developed countries, including on duty-free and quota-free market access, diagnostic trade integration study and post-diagnostic trade integration study and trade activities under the Enhanced Integrated Framework and structural transformation and progress towards post-least developing country status	14	22	14	13
9. Workshops on the implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024, the SIDS Accelerated Modalities of Action (SAMOA) Pathway, issues of thematic or sectoral relevance to landlocked developing countries, the Istanbul Programme of Action for the Least Developed Countries for the Decade 2011–2020, the agreed outcome of the Fifth United Nations Conference on the Least Developed Countries, and trade and poverty	3	8	9	10
10. Workshops on matters relevant to development in least developed countries and Africa	1	2	2	3
Publications (number of publications)	10	10	12	14
11. <i>The Least Developed Countries Report</i> and its overview	2	2	2	2
12. The <i>Economic Development in Africa Report</i> and its overview	1	1	1	2
13. Report on building and measuring productive capacities	–	–	1	3
14. Report on enhancing coherence between trade and industrial strategies for poverty alleviation in Africa and a special issues paper on Africa	1	1	1	2
15. Analytical studies on duty-free and quota-free market access and rules of origin	1	1	1	1
16. Lessons learned on geographical indications and related analysis for least developed countries	2	2	1	–
17. Sectoral, statistical and thematic issues of interest for landlocked developing countries: policy implications for the implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024 and the Sustainable Development Goals	2	2	1	1

Part IV International cooperation for development

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
18. Challenges faced by least developed countries in terms of achieving the Sustainable Development Goals and actions to take in the context of the final appraisal of the Istanbul Programme of Action for the Least Developed Countries for the Decade 2011–2020	1	1	–	–
19. Research papers on economic development issues in least developed countries and Africa	–	–	4	3
Technical materials (number of materials)	6	5	8	8
20. Technical material on trade and poverty	2	2	2	2
21. Technical material on trade and development in vulnerable economies, including small island developing States	2	1	4	6
22. Enhanced Integrated Framework-related documents, including on transit, transport and trade facilitation	2	2	2	–

C. Substantive deliverables

Consultation, advice and advocacy: policy advice: (a) to ministries of trade, transport and planning on the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024 and to national statistical offices on measuring productive capacities for landlocked developing countries; (b) on smooth transition strategies for graduating and graduated least developed countries; (c) on trade and development issues for small island developing States, landlocked developing countries and African countries; and (d) on trade issues relevant to least developed countries, including duty-free and quota-free market access, to least developed countries and the Enhanced Integrated Framework; consultations on UNCTAD activities related to the New Partnership for Africa’s Development; and consultations with United Nations partner agencies and African countries for the implementation of the Third Industrial Development Decade for Africa.

D. Communication deliverables

Outreach programmes, special events and information materials: lectures on issues related to least developed countries and African development, globalization, development strategies and policy coherence for the benefit of member States, for a minimum of 100 participants; and policy briefs related to *The Least Developed Countries Report* and the *Economic Development in Africa Report*.

External and media relations: press releases on *The Least Developed Countries Report* and the *Economic Development in Africa Report*, opinion pieces on salient policy recommendations from the flagship reports and other topical research, press conferences on *The Least Developed Countries Report* and the *Economic Development in Africa Report* and interviews on research results and policy proposals.

B. Proposed post and non-post resource requirements for 2023

Overview

12.88 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 12.18 to 12.20.

Table 12.18

Overall: evolution of financial resources by object of expenditure^a

^a Includes four temporary posts (1 Senior Economic Affairs Officer (P-5), 2 Economic Affairs Officers (P-4) and 1 Economic Affairs Officer (P-3)).

12.89 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 12.21 to 12.23 and figure 12.X.

12.90 As reflected in tables 12.21 (1) and 12.22 (1), the overall resources proposed for 2023 amount to \$72,644,800 before recosting, reflecting a net increase of \$1,370,000 (or 1.9 per cent) compared with the appropriation for 2022. Resource changes result from three factors, namely: (a) technical adjustments; (b) new and expanded mandates; and (c) other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

12.91 As reflected in table 12.21 (1), resource changes reflect a net increase of \$307,800, related to the delayed impact of the reassignment of posts in 2022, which were subject to a 50 per cent vacancy rate in accordance with the established practice for reassigned posts, as follows:

- (a) **Subprogramme 4, Technology and logistics (increase of \$153,900).** One Programme Management Officer (P-4) was reassigned as an Economic Affairs Officer and one Staff Assistant (General Service (Other level)) was reassigned as a Statistics Assistant;

- (b) **Subprogramme 5, Africa, least developed countries and special programmes (increase of \$67,300).** One Research Assistant (General Service (Other level)) was reassigned as a Staff Assistant;
- (c) **Programme support (increase of \$86,600).** One Public Information Officer (P-4) was reassigned as an Intergovernmental Affairs Officer.

New and expanded mandates

12.92 The General Assembly, in its resolution [76/245](#), requested the Secretary-General to include relevant proposals for implementation of the Bridgetown Covenant ([TD/541/Add.2](#)) adopted at the fifteenth session of the United Nations Conference on Trade and Development. Accordingly, and as reflected in table 12.21 (1), resource changes reflect an increase of \$757,300, related to requirements for the implementation of mandates under the Covenant, in which UNCTAD is requested, inter alia, to: reinforce its work through its three pillars to support implementation of trade facilitation reforms, including the Agreement on Trade Facilitation of the World Trade Organization, and enhance its support to the development and the implementation of appropriate legal and regulatory frameworks that reduce trade transaction costs; strengthen its programme of assistance to the Palestinian people with adequate resources and effective operational activities, including relevant studies as part of the international community's commitment to building an independent Palestinian State; and strengthen the work on assisting developing countries to systematically assess their state of play and readiness to engage and integrate into the digital economy, thus contributing to the closing of the digital divide. The distribution across the components and subprogrammes is as follows:

- (a) **Executive direction and management.** The increase of \$93,600 reflects the proposed establishment of a Statistician (P-3) post, related to the strengthening of the work of UNCTAD in relation to developing countries and the digital economy, as reflected in annex II;
- (b) **Subprogramme 1, Globalization, interdependence and development.** The increase of \$140,100 reflects the proposed establishment of one Economic Affairs Officer (P-3) post (\$93,600), as reflected in annex II, and non-post resources (\$20,000 under experts, \$6,500 under travel of staff and \$20,000 under contractual services), related to the strengthening of the UNCTAD programme of assistance to the Palestinian people, including relevant studies;
- (c) **Subprogramme 4, Technology and logistics.** The increase of \$523,600 reflects the proposed establishment of four posts: three Economic Affairs Officer (P-4) posts (two related to strengthening the work of UNCTAD in relation to the digital economy and one to enhancing the support of UNCTAD for legal and regulatory frameworks that reduce trade transaction costs), and one Economic Affairs Officer (P-3) post related to strengthening the work of UNCTAD in relation to the digital economy (\$423,600), as reflected in annex II, and non-post resources (\$70,000 under experts and \$30,000 under travel of staff).

Other changes

12.93 As reflected in table 12.21 (1), resource changes reflect a net increase of \$304,900, related to the revitalization of the work of UNCTAD to make the organization more fit for purpose and serve the needs of its member States in the triple context of the implementation of the Bridgetown Covenant, uneven recovery from the COVID-19 pandemic and the enduring urgency and pertinence of the 2030 Agenda. The proposed changes would help to address critical areas for a new development economics narrative by furthering support for developing countries, amplifying win-win situations, redirecting trade-offs and fully integrating the environment and climate change into a development perspective. The breakdown of changes is as follows:

- (a) **Executive direction and management.** The net increase of \$2,710,500 relates to the proposed establishment of the Statistics Service, including the inward redeployment of 18 statistics-related posts (1 D-1, 1 P-5, 3 P-3, 1 P-2, 3 General Service (Principal level) and 9 General Service (Other level)) from the Division on Globalization and Development Strategies, under subprogramme 1, and the outward redeployment of a Chief of Service (D-1) post to the Division on Technology and Logistics, under subprogramme 4 (net increase under post

resources of \$2,649,400), as reflected in annex II, and the inward redeployment of non-post resources (\$21,100 under consultants and \$40,000 under travel of staff). Justification for the proposed establishment of the Statistics Service is provided in annex I;

- (b) **Subprogramme 1, Globalization, interdependence and development.** The net decrease of \$2,715,100 reflects the proposed outward redeployment of 18 posts offset in part by the establishment of two posts, one Economic Affairs Officer (P-4) post and one Economic Affairs Officer (P-3) post (net decrease under post resources of \$2,694,000), to strengthen work on external debt sustainability and illicit financial flows, as reflected in annex II, and a decrease of \$21,100 under consultants, related to the outward redeployment of statistics-related functions, in order to establish the cross-cutting Statistics Service under executive direction and management;
- (c) **Subprogramme 2, Investment and enterprise.** The decrease of \$67,300 relates to the proposed reassignment, as reflected in annex II, of one Programme Management Assistant (General Service (Other level)) post to Graphic Design Assistant, which is subject to a 50 per cent vacancy rate in accordance with the established practice;
- (d) **Subprogramme 3, International trade and commodities.** The increase of \$35,000, under experts (\$3,700), travel of staff (\$15,000) and contractual services (\$16,300), reflects the increased requirements of organizing meetings with external participants, making arrangements for their attendance at conferences and printing materials related to competition and consumer policies;
- (e) **Subprogramme 4, Technology and logistics.** The increase of \$248,200 relates to the proposed inward redeployment of one Chief of Service (D-1) post from executive direction and management, the Office of the Secretary-General, as reflected in annex II;
- (f) **Subprogramme 5, Africa, least developed countries and special programmes.** The increase of \$93,600 relates to the proposed establishment of an Economic Affairs Officer (P-3) post, as reflected in annex II.

Extrabudgetary resources

- 12.94 As reflected in tables 12.21 (2) and 12.22 (2), UNCTAD expects to continue to receive both cash and in-kind contributions, which would complement regular budget resources. In 2023, extrabudgetary resources are estimated at \$44,548,200 and would provide for 15 posts, as presented in table 12.22 (2). Extrabudgetary resources represent 38.0 per cent of the total resources for this section.
- 12.95 The extrabudgetary resources under this section are subject to the oversight of UNCTAD, which has delegated authority from the Secretary-General.

Policymaking organs

- 12.96 The resources proposed under this component would provide for requirements relating to standing intergovernmental organs and expert bodies, special sessions of the General Assembly and intergovernmental processes, the servicing of which is the responsibility of UNCTAD. The provisions for experts serving on committees in their individual capacity are in accordance with Assembly resolution [46/235](#), while the provisions for members of the functional commissions are in accordance with Assembly resolution [49/130](#). Table 12.24 provides information on the standing intergovernmental organs and related resource requirements under the regular budget.

Part IV International cooperation for development

**Table 12.24
Policymaking organs**

(Thousands of United States dollars)

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2022 appropriation</i>	<i>2023 estimate (before recosting)</i>
Commission on Science and Technology for Development	The Commission meets annually and provides overall direction to the related programme of work. It receives specialized and technical advice from ad hoc panels and workshops that meet between sessions of the Commission to examine specific issues on science and technology for development. The UNCTAD secretariat provides substantive support to the Commission.	Mandate: General Assembly resolution 46/235 Membership: 43 government experts One session per year One intersessional panel per year	146.4	146.4
Investment, Enterprise and Development Commission	The Commission deals with issues related to investment, technology and related financial issues, as well as enterprise and information and communications technology issues. It is assisted by 16 expert advisers, serving in their individual capacity and selected from both developed and developing countries. It is open to all States members of UNCTAD and has a standing subsidiary expert body, namely, the Intergovernmental Working Group of Experts on International Standards of Accounting and Reporting.	Mandate: General Assembly resolution 49/130 TD/442 , TD/442/Corr.1 and TD/442/Corr.2 (Accra Accord), para. 202 Membership: 16 experts One session per year	31.1	31.1
Quadrennial session of UNCTAD	The General Assembly determines the dates and the location of the sessions of UNCTAD, taking into account the recommendations of the Conference or the Trade and Development Board. The fifteenth session of the Conference was held in 2021. Consultations with member States on issues and mandates will continue.	Mandate: General Assembly resolution 1995 (XIX) , para. 2 Held every four years	15.1	15.1
Total			192.6	192.6

12.97 The proposed regular budget resources for 2023 amount to \$192,600 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of the proposed resources for 2023 are reflected in table 12.25 and figure 12.XI.

Executive direction and management

- 12.98 The Office of the Secretary-General of UNCTAD coordinates cross-cutting institutional processes, such as the systematic inclusion of gender equality aspects in all areas of the work of UNCTAD and reaching gender parity in staff. To that end, the Office of the Secretary-General is coordinating the Gender Task Force, which is chaired by the Deputy Secretary-General of UNCTAD and is mandated to improve and better coordinate gender mainstreaming activities, including by appointing, for each UNCTAD subprogramme, gender focal points whose responsibilities include reviewing and clearing trust fund project documents from a gender mainstreaming perspective. The Statistics Coordination Task Force, chaired by the Deputy Secretary-General of UNCTAD, which has the mandate to improve the coordination of statistical activities in UNCTAD and to exploit synergies, sets strategic priorities for UNCTAD statistics and coordinates statistical activities, including production, dissemination and capacity development.
- 12.99 The Communications and External Relations Section is charged with the planning and delivery of UNCTAD media outreach and external relations activities, web content management, civil society liaison and implementation of the communications strategy, including the production and dissemination of information and media products targeted to specific audiences. The Section is responsible for the effective and timely maintenance and operational monitoring of the content on the UNCTAD multilingual website and the implementation of the UNCTAD web strategy. It also promotes cooperation and working relationships with civil society organizations, including NGOs, trade unions, academia and intergovernmental organizations, and carries out fundraising and intergovernmental liaison activities in respect of civil society work.
- 12.100 The Evaluation Unit coordinates and conducts activities that serve to ensure and enhance the quality and resonance of UNCTAD programmes and projects, by providing internal oversight, including oversight and management of external evaluations mandated by the Trade and Development Board, oversight and management of project evaluations funded by the United Nations Development Account and external evaluations required by contribution agreements. The Unit provides strategic support and advice to the management on oversight, self-assessments and self-evaluations.

- 12.101 The Statistics Service is responsible for supporting the coordination, standardization and coherence of statistical activities throughout the organization, and conducting independent quality assurance on UNCTAD statistics. The cross-organizational Service will provide relevant and timely statistics on trade and development areas and, by implementing the UNCTAD Statistics Quality Assurance Framework, will align the organization’s overall statistical requirements to enable better planning, more synergies and quality controls.
- 12.102 The UNCTAD New York Office works on enhancing outreach and promotes UNCTAD objectives at United Nations Headquarters and with relevant actors based in New York and Washington, D.C., including enhancing coordination with all United Nations system entities, funds and specialized programmes, diplomatic missions, the press corps, research and NGOs and technical assistance agencies in the areas of trade, investment, technology and development.
- 12.103 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, UNCTAD is integrating environmental management practices into its operations. As part of its commitment, UNCTAD will continue to reduce its carbon footprint by substituting air travel through the use of information and communications tools whenever possible. As a non-resident entity housed within the premises of the United Nations Office at Geneva, the UNCTAD carbon footprint comprises exclusively air travel-related emissions.
- 12.104 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 12.26. The lower rate of compliance with the advance air ticket policy in 2021 is mainly attributed to continued restrictions and uncertainties relating to the COVID-19 pandemic. However, UNCTAD continues to make efforts to increase the compliance rate, including by monitoring advance ticket purchase compliance in the Management Information System (UNCTAD management dashboard) and reporting to senior management once a month. The Mission Travel Portal is used by staff members to clear their travel requests with senior management before initiating travel requests in Umoja. The portal identifies requests that are not compliant with the advance air ticket purchase policy and sends automated warnings to senior managers. In addition, UNCTAD continues to make efforts to raise awareness among staff members and to encourage early planning of meetings and conferences, whenever possible.

- 12.105 The proposed regular budget resources for 2023 amount to \$8,238,700 and reflect an increase of \$2,804,100 compared with the appropriation for 2022. The proposed increase is explained in paragraphs 12.92 (a) and 12.93 (a). Additional details on the distribution of the proposed resources for 2023 are reflected in table 12.27 and figure 12.XII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

12.106 Extrabudgetary resources for executive direction and management are estimated at \$958,400 and would provide for one post (1 D-2), as well as non-post resources. The resources would be used mainly for substantive and policy coherence throughout the organization and to ensure that UNCTAD efforts and delivery of mandates are coherent, timely, effective and targeted to the needs of developing countries. The estimated resource level for 2023 reflects no change compared with the estimate for 2022.

Programme of work

Subprogramme 1

Globalization, interdependence and development

12.107 The proposed regular budget resources for 2023 amount to \$8,683,400 and reflect a decrease of \$2,575,000 compared with the appropriation for 2022. The proposed decrease is explained in paragraphs 12.92 (b) and 12.93 (b). Additional details on the distribution of the proposed resources in 2023 are reflected in table 12.28 and figure 12.XIII.

Table 12.28

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

12.108 Extrabudgetary resources for the subprogramme are estimated at \$6,463,700 and would provide for non-post resources. The resources would help the subprogramme to disseminate its research findings to policymakers and enable them to benefit from its analysis and policy recommendations in areas such as resource mobilization to increase national and regional capacities in Asia; support for Asian countries in adopting integrated policy strategies and regional policy coordination for resilient, sustainable and transformative development; economic diversification and resilience in Barbados; and the economic development prospects of the Occupied Palestinian Territory and the examination of obstacles to trade and development. The resources would also enable the provision of technical assistance to developing countries for the strengthening of the capacity of Governments to manage their debt effectively and sustainably in support of poverty eradication, development, transparency and good governance. The estimated resource level for 2023 reflects no change compared with the estimate for 2022.

Subprogramme 2 Investment and enterprise

12.109 The proposed regular budget resources for 2023 amount to \$13,324,800 and reflects a decrease of \$67,300 compared with the appropriation for 2022. The proposed decrease is explained in paragraph 12.93 (c). Additional details on the distribution of the proposed resources for 2023 are reflected in table 12.29 and figure 12.XIV.

Subprogramme 2: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

12.110 Extrabudgetary resources for the subprogramme are estimated at \$2,616,500 and would provide for non-post resources. The resources would be used mainly to provide technical cooperation projects to build and strengthen the human and institutional capacity of developing countries, in particular those with the most vulnerable economies, to formulate policies conducive to promoting investment in sustainable development, as well as to fostering the development of the private sector, in line with national development strategies that stimulate progress towards the achievement of the Sustainable Development Goals. The estimated resource level for 2023 reflects no change compared with the estimate for 2022.

**Subprogramme 3
 International trade and commodities**

12.111 The proposed regular budget resources for 2023 amount to \$14,796,100 and reflect an increase of \$35,000 compared with the appropriation for 2022. The proposed increase is explained in paragraph 12.93 (d). Additional details on the distribution of the proposed resources for 2023 are reflected in table 12.30 and figure 12.XV.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

12.112 Extrabudgetary resources for the subprogramme are estimated at \$3,142,300 and would provide for non-post resources. The resources would be used mainly to provide technical cooperation and capacity-building projects to requesting countries in the areas of trade in goods, services and commodities, the creative economy, environmental degradation, climate change and sustainable development, competition and consumer policies, trade and gender, and trade analysis. The estimated resource level for 2023 reflects no change compared with the estimate for 2022.

**Subprogramme 4
Technology and logistics**

12.113 The proposed regular budget resources for 2023 amount to \$9,405,500 and reflect an increase of \$925,700 compared with the appropriation for 2022. The proposed increase is explained in paragraphs 12.91 (a), 12.92 (c) and 12.93 (e). Additional details on the distribution of the proposed resources for 2023 are reflected in table 12.31 and figure 12.XVI.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

12.114 Extrabudgetary resources for the subprogramme are estimated at \$25,791,000 and would provide for one post (1 P-4), as well as non-post resources. The resources would be used mainly to provide capacity-building to enable beneficiary countries to better harness technology and logistics for trade and development. Technical assistance services provided by the subprogramme include the automation of customs and other trade-related processes through ASYCUDA, capacity-building in e-commerce, science, technology and innovation policies, trade facilitation, transport, port management and other training courses for experts on issues related to the international economic agenda. The estimated resource level for 2023 reflects no change compared with the estimate for 2022.

Subprogramme 5 Africa, least developed countries and special programmes

12.115 The proposed regular budget resources for 2023 amount to \$5,075,000 and reflect an increase of \$160,900 compared with the appropriation for 2022. The proposed increase is explained in paragraphs 12.91 (b) and 12.93 (f). Additional details on the distribution of the proposed resources for 2023 are reflected in table 12.32 and figure 12.XVII.

Table 12.32

Figure 12.XVII
Subprogramme 5: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

12.116 Extrabudgetary resources for the subprogramme are estimated at \$1,329,900 and would provide for non-post resources. The resources would be used mainly to support the 2030 Agenda for Sustainable Development Sub-Fund project on developing integrated programmes to alleviate binding constraints to development by fostering structural transformation, building productive capacities and

enhancing investment opportunities. The resources would also enable the continuation of technical assistance and capacity-building activities to help build productive capacities to diversify the developing countries' economies and exports in a sustainable manner. The resources will enable the subprogramme to build and strengthen the human and institutional capacity of least developed countries and African countries in designing and implementing national and international policies that enable them to effectively utilize trade preferences and rules of origin contained in unilateral and reciprocal trade arrangements. The estimated resource level for 2023 reflects no change compared with the estimate for 2022.

Programme support

- 12.117 Programme support is organized through two services: first, the Programme Support and Management Service, which integrates the former Technical Cooperation Section and the Resources Management Service, and second, the Intergovernmental Outreach and Support Service.
- 12.118 The proposed regular budget resources for 2023 amount to \$12,928,700 and reflect an increase of \$86,600 compared with the appropriation for 2022. The proposed increase is explained in paragraph 12.91 (c). Additional details on the distribution of proposed resources for 2023 are reflected in table 12.33 and figure 12.XVIII.

Table 12.33

Figure 12.XVIII
Programme support: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

12.119 Extrabudgetary resources for programme support are estimated at \$4,246,400 and would provide for 13 posts (1 P-5, 1 P-4, 2 P-3 and 9 General Service (Other level)), as well as non-post resources. The resources would be used mainly to support subprogrammes in implementing technical cooperation activities, research and analysis and administrative support related to extrabudgetary activities. The resources will also enable the participation of UNCTAD in a number of United Nations Sustainable Development Cooperation Frameworks, through the development of relevant joint country-level programmes in UNCTAD areas of expertise, as laid out in the UNCTAD Toolbox, following United Nations Development Coordination Office guidelines. The estimated resource level for 2023 reflects no change compared with the estimate for 2022.

Annex I

Organizational structure and post distribution for 2023

Two charts showing the organizational structure of UNCTAD are presented below. Chart A reproduces the approved organizational structure for 2022, as contained in document [A/76/6 \(Sect. 12\)](#). Chart B presents the proposed organizational structure for 2023.

Justification for the proposed changes

The establishment of the cross-organizational Statistics Service is proposed in support of revitalizing UNCTAD to make it more fit for purpose and in line with the emphasis on statistics reflected in the Bridgetown Covenant. Through its direct reporting line to the Office of the Secretary-General of UNCTAD, it will be servicing all subprogrammes to enable better planning, substantive coherence and more synergies.

Annex II

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Executive direction and management	1	P-3	Establishment of 1 Statistician	The proposed establishment of a Statistician post in the area of sex-disaggregated data on economic empowerment and trade and in the measurement of the gender dimension of e-commerce and information and communications technology, in order to strengthen the collection and processing of available data for the production of statistics and policy analysis related to the opportunities and challenges of the digital economy, as mandated in the Bridgetown Covenant (para. 127 (gg)).
	1	D-1	Redeployment of 18 posts from subprogramme 1 (Chief of Service, Senior Statistician, Statisticians, Associate Statistician, Senior Statistics Assistants, Statistics Assistants, Information Systems Assistants, Library Assistant and Administrative Assistant)	The redeployment of 18 posts from the Division on Globalization and Development Strategies relates to the establishment of the stand-alone cross-organizational Statistics Service in support of the revitalization of UNCTAD to make it more fit for purpose and in line with the emphasis on statistics in the Bridgetown Covenant.
	1	P-5		The Statistics Service will be servicing all subprogrammes to enable better planning, substantive coherence and more synergies. The 18 posts were previously included under subprogramme 1, but it is proposed to redeploy them to executive direction and management because of the cross-cutting nature of the work. The head of the Statistics Service (D-1) will report to the Office of the Secretary-General of UNCTAD, as indicated in annex I.
	3	P-3		
	1	P-2		
	3	GS (PL)		
	9	GS (OL)		
	(1)	D-1	Redeployment of 1 Chief of Service to subprogramme 4	See reason for change given under subprogramme 4.
Subprogramme 1 Globalization, interdependence and development	1	P-4	Establishment of 1 Economic Affairs Officer	The proposed establishment of an Economic Affairs Officer post is related to support for the revitalization of UNCTAD to make it more fit for purpose and for the effective implementation of the four transformations referred to in the Bridgetown Covenant (para. 39). The Economic Affairs Officer would work on external debt sustainability and sustainable development finance beyond COVID-19 and would conduct substantive research and policy analysis for the UNCTAD contributions to long-term debt sustainability analysis and sustainable development finance assessments for developing countries, placing particular emphasis on the pandemic's long-term impact on sustainable financial resource mobilization for development and the integrated treatment of climate and development finance.
	2	P-3	Establishment of 2 Economic Affairs Officers	The proposed establishment of one post is related to strengthening the UNCTAD programme of assistance to the Palestinian people, including relevant studies, as mandated in the Bridgetown Covenant (para. 127 (bb)). It is proposed for one Economic Affairs Officer to perform technical, modelling and quantitative analysis as part of the Assistance to the Palestinian People Unit. The proposed establishment of a second post is related to support for the revitalization of UNCTAD to make it more fit for purpose and for its effective implementation of the four transformations referred to in the Bridgetown Covenant (para. 39). It is proposed for one Economic Affairs Officer to conduct work on illicit financial flows and perform substantive research and make policy contributions.

Part IV International cooperation for development

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
	(18)		Redeployment of 18 posts to executive direction and management	See reason for change given under executive direction and management.
Subprogramme 2 Investment and enterprise	1	GS (OL)	Reassignment of 1 Programme Management Assistant post to a Graphic Design Assistant post	The proposed reassignment is related to the need to improve the capacity for subprogramme 2 to deliver its products and deliverables to the member States in a more efficient, technology-driven and accessible way.
Subprogramme 4 Technology and logistics	3	P-4	Establishment of 3 Economic Affairs Officers	<p>The proposed establishment of two posts is related to UNCTAD strengthening its work on assisting developing countries to systematically assess their state of play and readiness to engage and integrate into the digital economy, as mandated in the Bridgetown Covenant (para. 127 (gg)). The Economic Affairs Officers would contribute to enhancing the work of UNCTAD in the area of digital economy, specifically through e-Trade Readiness Assessments and corresponding policy analysis.</p> <p>The proposed establishment of one post is related to UNCTAD reinforcing its work through its three pillars to support the implementation of trade facilitation reforms and enhancing its support for the development and implementation of appropriate legal and regulatory frameworks that reduce trade transaction costs, as mandated in the Bridgetown Covenant (para. 127 (n)). The Economic Affairs Officer would strengthen the work related to trade facilitation under the Automated System for Customs Data (ASYCUDA) programme, and to the conduct of research and data collection.</p>
	1	P-3	Establishment of 1 Economic Affairs Officer	The proposed establishment of one post is related to UNCTAD strengthening its work to assist developing countries to systematically assess their state of play and readiness to engage and integrate into the digital economy, as mandated in the Bridgetown Covenant (para. 127 (gg)). The Economic Affairs Officer would strengthen the work of UNCTAD on data collection and e-commerce statistics.
	1	D-1	Redeployment of 1 Chief of Service post from executive direction and management	The proposed redeployment from the Office of the Secretary-General of UNCTAD to the Division on Technology and Logistics is related to the revitalization of UNCTAD to make it more fit for purpose and would reinforce its efforts to reduce trade transaction costs, as reflected in the Bridgetown Covenant. The Chief of Service would strengthen and anchor the work related to trade facilitation in the ASYCUDA programme.
Subprogramme 5 Africa, least developed countries and special programmes	1	P-3	Establishment of 1 Economic Affairs Officer	The proposed establishment of one post is related to support for the revitalization of UNCTAD to make it more fit for purpose and for the effective implementation of the four transformations referred to in the Bridgetown Covenant (para. 39). The Economic Affairs Officer would identify key indicators and statistics, as well as qualitative information necessary for updating and further improving the productive capacities index.

Foreword

In 2023, the International Trade Centre (ITC) will implement its vision of building inclusive, sustainable and prosperous economies through trade. In the second year of implementation of the ITC strategic plan for the period 2022–2025, the Centre’s strategic vision will be firmly grounded in the 2030 Agenda for Sustainable Development and in the Centre’s mandates, re-establishing the promise for a better future and prosperity for all.

ITC will aim to contribute to the achievement of the Sustainable Development Goals through interventions aimed at women, youth and people in vulnerable situations.

Focusing on prosperity for all, ITC will support micro-, small and medium-sized enterprises in creating and maintaining jobs through entrepreneurship and value chain development.

Activities of ITC for the planet will include identifying and facilitating business opportunities for micro-, small and medium-sized enterprises in the markets for environmental goods and services, and promoting sustainable production, consumption and climate action.

While ITC has a portfolio of projects in over 128 developing countries and countries with economies in transition, its contribution to peace will be visible in the expansion of its work in countries in armed conflict or at risk of lapsing or relapsing into conflict. It will reconfirm its dedication to the least developed countries, sub-Saharan Africa, landlocked developing countries, small and vulnerable economies and small island developing States, which comprise the majority of its country-specific interventions.

Finally, ITC will continue to focus on internal improvements, such as leveraging data for better insights and learning, with the aim of optimizing its impact on the ground. It will remain dedicated to United Nations reforms, implementing joint strategies and action plans and maximizing synergies within the United Nations system.

ITC extends its thanks to the Member States, its partners and beneficiaries, for their continuous confidence and support. It looks forward to continuing its work together towards building inclusive, sustainable and prosperous economies through trade.

(Signed) Pamela **Coke-Hamilton**
Executive Director, International Trade Centre

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 13.1 The International Trade Centre (ITC) is responsible for the business aspects of trade development, as the joint technical cooperation agency of the United Nations and the World Trade Organization (WTO). The mandate derives from the priorities established by the contracting parties to the General Agreement on Tariffs and Trade (GATT) on 19 March 1964 and the General Assembly on 12 December 1967 (Assembly resolution [2297 \(XXII\)](#)). Since 1 January 1968, ITC has operated under the joint auspices of GATT/WTO and the United Nations. In its resolution 1819/LV of 9 August 1973, the Economic and Social Council reaffirmed the Centre's mandate as the focal point for technical assistance and cooperation activities for trade promotion within the United Nations system of assistance for developing countries.
- 13.2 In the context of the 2030 Agenda for Sustainable Development, Member States explicitly recognized trade as a key engine for sustainable and inclusive economic growth and poverty eradication, specifically through target 8.a of the Sustainable Development Goals, to increase Aid for Trade support, and targets 17.10 and 17.11 of the Goals, for an open, rules-based, transparent and fair trading system and a significant increase in exports from developing countries.
- 13.3 Against the backdrop of trade tensions and the severe negative impact on trade and development caused by the coronavirus disease (COVID-19) pandemic, the General Assembly, in its resolution [76/190](#), reiterated this position for the target beneficiaries of ITC – micro-, small and medium-sized enterprises – which make up 99 per cent of the world's businesses and form the economic backbone of every community.

Programme of work

Subprogramme 6

Operational aspects of trade promotion and export development

Objective

- 13.4 The objective, to which this subprogramme (hereafter ITC) contributes, is to enhance inclusive and sustainable growth and development through trade and international business development for micro-, small and medium-sized enterprises in developing countries, especially the least developed countries, and countries with economies in transition, through increased business capacities of those enterprises to trade and through a conducive business environment and strengthened institutional ecosystems for those enterprises.

Strategy and external factors for 2023

- 13.5 To contribute to the objective, ITC will provide advisory services, training and awareness-building to enterprises, business support institutions and government agencies in areas that are key to the international competitiveness of micro-, small and medium-sized enterprises. In particular, the Centre will:
- (a) Improve enterprise-level capacities in the areas of market analysis, value addition, quality improvement, e-commerce, marketing, access to finance and investment, climate resilience and environmental risk mitigation, including on how to sustain the resilience of micro-, small and medium-sized enterprises in the post-pandemic period;

- (b) Provide micro-, small and medium-sized enterprises with market knowledge and new market linkage opportunities, including through initiatives such as ecomConnect and #FastTrackTech, which digitally connect enterprises to foreign markets, and the “Alliances for Action” initiative, which matches businesses and develops public-private partnerships in targeted value chains and helps micro-, small and medium-sized enterprises to strengthen existing and open new trade channels;
 - (c) Enable business transactions and investment for micro-, small and medium-sized enterprises, with a focus on growing local, regional, South-South and global value chains for women-owned businesses, youth entrepreneurs, refugees, internally displaced persons and artisan and farmer communities, including through the ITC SheTrades, Ye! (young entrepreneurs) and Responsible Sustainable Ethical Trade initiatives;
 - (d) Strengthen the governance, performance, advocacy capacities, quality and scope of services and interconnectedness of national, subnational and regional business support institutions and ecosystems, including trade and investment promotion agencies, chambers of commerce, sector associations, youth and women’s business groups, cooperatives, incubators and technical and vocational training providers, including through tailored advisory services, assessments and workshops;
 - (e) Support policymakers in leading public-private dialogues and consensus-building and decision-making processes that foster the growth and internationalization of micro-, small and medium-sized enterprises, including through the promotion of the benefits of a universal, rules-based, open, predictable, inclusive, non-discriminatory and equitable multilateral trading system under WTO;
 - (f) Maintain, develop and scale up its comprehensive and globally accessible trade intelligence that addresses information gaps, including analytical tools such as the ITC Sustainability Map, which houses information on voluntary sustainability standards and compliance requirements.
- 13.6 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. Examples of lessons learned and best practices include the maintenance and consolidation of the hybrid approach to delivery, where field interventions, usually implemented with local partners, are complemented by online advisory or training services. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objective, strategy and mandates and would be reported as part of the programme performance information.
- 13.7 The above-mentioned work is expected to result in:
- (a) Increased resilience of micro-, small and medium-sized enterprises to external shocks and their enhanced competitiveness, sustainable business practices and integration into regional and international value chains that generate business transactions, sustainable jobs and higher incomes, especially for women, youth and vulnerable groups;
 - (b) Improved usefulness of services provided by business support institutions to micro-, small and medium-sized enterprises, including enhanced management and operational functioning of the service providers;
 - (c) Better-informed government decision makers, with options for new or improved inclusive trade-related policies, strategies and regulatory frameworks that contribute to an enabling environment for micro-, small and medium-sized enterprises to participate in international trade;
 - (d) Increased awareness among policymakers, business support organizations and businesses related to the potential trade opportunities and challenges for micro-, small and medium-sized enterprises, including those resulting from the COVID-19 pandemic, market opportunities and sustainable business practices.

- 13.8 With regard to the external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) Extrabudgetary resources will remain stable and earmarked funds will be available for interventions;
 - (b) Programming countries will maintain political, economic and social conditions that allow for the implementation of development interventions;
 - (c) International trade and investment conditions do not deteriorate significantly compared with 2022.
- 13.9 With regard to cooperation with other entities at the global, regional, national and local levels, ITC will maintain and develop partnerships with the private sector, civil society, academia and trade and development organizations to advance the 2030 Agenda. In view of evaluation findings, ITC will have tailored approaches for the different types of partnerships at the country and corporate levels. ITC will develop partnerships that contribute to the operationalization of the African Continental Free Trade Area, to scalable initiatives, especially for the least developed countries, and to the implementation of WTO ministerial discussions and outcomes, including on e-commerce, investment facilitation, women and trade, and micro-, small and medium-sized enterprises and trade. ITC will continue to work with the private sector to support market access and supplier programmes for micro-, small and medium-sized enterprises, especially women-owned enterprises.
- 13.10 With regard to inter-agency coordination and liaison, ITC will continue to coordinate with United Nations agencies, including through membership in the United Nations Sustainable Development Group and United Nations regional and country teams. ITC will collaborate with the United Nations Conference on Trade and Development and WTO, and with other agencies and initiatives, such as the United Nations Global Compact, the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women), the United Nations Capital Development Fund, the United Nations Development Programme, the Food and Agriculture Organization of the United Nations and the Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States, to partner with on interventions related to micro-, small and medium-sized enterprises and trade development.
- 13.11 ITC integrates a gender perspective in its operational activities, deliverables and results, as appropriate. ITC will address specific barriers for women in accessing markets, finance, digital technologies and business development services, and will improve ecosystems for women's entrepreneurship, working with local institutions as "SheTrades hubs". ITC will advance its SheTrades Outlook tool to include an expanded repository of country-specific information on including a gender perspective in trade policies and practices.
- 13.12 With regard to disability inclusion, ITC will be guided by the United Nations Disability Inclusion Strategy and will address disability inclusion in its operational planning process.

Evaluation activities

- 13.13 The following evaluations completed in 2021 have guided the proposed programme plan for 2023:
- (a) Review by the ITC Independent Evaluation Unit of the strategic plan for the period 2018–2021;
 - (b) Evaluation of the ITC SheTrades initiative;
 - (c) Sustainability reviews for two projects, three to four years after their completion, in collaboration with the Enhanced Integrated Framework.
- 13.14 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2023. In its review of the 2018–2021 strategic plan, the Independent Evaluation Unit identified opportunities for further development in the areas of partnerships, needs assessment practices and enhanced internal collaboration.

- 13.15 ITC will incorporate lessons learned in the development of coordinated solutions and blueprints and in dialogue with partners to deliver both custom and standard solutions for specific client groups.
- 13.16 The following evaluations are planned for 2023:
 - (a) 2023 annual evaluation synthesis report (meta-evaluation of the 2022 evaluation findings);
 - (b) One corporate-level evaluation;
 - (c) One evaluation of an ITC thematic area;
 - (d) One large project evaluation.

Programme performance in 2021

Accelerated recovery of the Lao People’s Democratic Republic coffee sector

- 13.17 Coffee is one of the key agricultural crops of the Lao People’s Democratic Republic, with a high export value, and its production is projected to reach 1 million tons by 2025. During the COVID-19 pandemic, however, the global coffee sector, which is subject to volatile market prices and uncertainties linked to climate change, technology and changing consumer patterns, experienced decreased demand and supply chain disruptions.
- 13.18 ITC published the fourth edition of *The Coffee Guide*, covering new market dynamics, including the effects of the COVID-19 pandemic on the global coffee trade. Furthermore, the Centre provided technical assistance to the coffee sector of the Lao People’s Democratic Republic, focusing on export market requirements, the improvement of the quality of the coffee and climate change resilience. ITC also performed a rapid COVID-19 business impact assessment, identifying key emerging issues for the country’s coffee sector. The findings informed the development of an export road map for the coffee sector of the Lao People’s Democratic Republic, launched by the Government in July 2021 to enhance coffee export capacities, boost the national economy and improve the livelihoods of smallholder farmers in rural communities going forward.
- 13.19 The coffee sector road map recommends strategies to increase the resilience of the coffee sector, including supply chain diversification, access to finance, digitalization and trade intelligence. It sets the way forward for policymakers, institutions, farmers and micro-, small and medium-sized enterprises in the Lao People’s Democratic Republic towards the improved competitiveness of the coffee sector, new international business linkages, sustainable jobs and growth through trade and investment.
- 13.20 Progress towards the objective is presented in the performance measure below (see table 13.1).

Table 13.1
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
The Lao People’s Democratic Republic identified the gaps in the export performance of the coffee sector and defined market-led strategic orientations	Through a rapid COVID-19 business impact assessment, the Lao People’s Democratic Republic had extensive research available to inform the development of a road map for the coffee sector	The Lao People’s Democratic Republic launched the export road map for the coffee sector

Impact of the pandemic

- 13.21 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular through cancellations of on-site events. In order to support Member States on issues related to the COVID-19 pandemic, within the overall scope of the objective, ITC assisted

Member States through rapid COVID-19 assessments, as specified in the result for 2021 described above, and through the SheTrades country-specific COVID-19 reports that showcased the particular impact of the pandemic on women-owned businesses and how women entrepreneurs have responded to the crisis. The Centre’s trade intelligence on temporary trade measures in response to COVID-19 and on evolving product requirements and procedures about which countries notify WTO in response to the pandemic was offered through its global public goods tools, namely, the Market Access Map and ePing. The flagship report *SME Competitiveness Outlook 2021: Empowering the Green Recovery* examined the lessons that emerged from the pandemic and their application to the climate emergency; it identified that as increased competitiveness made firms more resilient, lessons could be applied to climate resilience strategies, including areas where small firms could achieve the best returns on investment for their sustainable transition.

Planned results for 2023

Result 1: South-South trade and investment creates growth opportunity for micro-, small and medium-sized enterprises from East African countries

Programme performance in 2021 and target for 2023

- 13.22 The Centre’s work contributed to extensive support for facts-based decision-making and the facilitation of connections and negotiations with public and private sector actors for client micro-, small and medium-sized enterprises, leading to the conclusion of a large-scale investment deal, in addition to multiple new trade deals on a smaller scale, resulting in a cumulative \$228 million in deals in South-South trade and investment, which exceeded the planned target of \$202 million.
- 13.23 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 13.I).

Figure 13.I
Performance measure: trade investments facilitated by the International Trade Centre’s South-South trade and investment programme (cumulative)

(Millions of United States dollars)

Result 2: increased demand for trade intelligence as a global public good, enabling decisions for global trade recovery

Programme performance in 2021 and target for 2023

- 13.24 The Centre’s work contributed to increased use of its trade intelligence, including on COVID-19, with timely updates and the addition of new areas, such as the Economic Partnership Agreements, and increased data accessibility, software compatibility for mobile use and decision-making, as evidenced by 1,227,578 users and \$1,085 million of facilitated transactions, which exceeded the

planned target of 1,125,000 users and \$993 million of transactions facilitated by the Centre’s global public goods offering.

- 13.25 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 13.II).

Figure 13.II

Performance measure: number of users of and total volume of transactions facilitated by the International Trade Centre’s global public goods offering (cumulative)

Result 3: partnerships for enhanced trade and more resilient micro-, small and medium-sized enterprises in countries in conflict and post-conflict situations

Proposed programme plan for 2023

- 13.26 Countries in conflict and post-conflict situations face multiple challenges, with micro-, small and medium-sized enterprises being particularly affected through negative effects on their production and sales, followed by loss of jobs, as evidenced in a study on the impact of COVID-19 in Iraq conducted by ITC, the Food and Agriculture Organization of the United Nations and the International Organization for Migration. ITC has increasingly engaged in such countries, including Iraq, Afghanistan and South Sudan, to assist recovery through the rebuilding of trade. As an example, the Strengthening the Agriculture and Agrifood Value Chain and Improving Trade Policy in Iraq (SAAVI) project has worked on building entrepreneurship and business management skills, the provision of trade intelligence and the expansion of trade opportunities to improve sector competitiveness and support trade development. To maximize synergies and complement other rebuilding and humanitarian efforts, ITC engaged early with the Resident Coordinator Office and the United Nations country team, policymakers, micro-, small and medium-sized enterprises and other partners. Furthermore, ITC and the Norwegian Refugee Council have partnered to deliver market-led solutions to such enterprises in hard-to-reach areas in Iraq, including in Basrah, Ninawa and Dhi Qar Governorates, leveraging the wide network and experience of the Norwegian Refugee Council.

Lessons learned and planned change

- 13.27 The lesson for ITC was that early consultations and partnerships were essential to ensure the long-term and meaningful engagement of all relevant partners. The support from the Resident Coordinator Office and the United Nations country team was particularly valuable for enabling efficient operational structures in countries in situations of conflict and in post-conflict countries by virtue of their established relations with the Government, insights on the policy and institutional framework and security support, among other things. In applying the lesson, ITC will forge partnerships to scale up support to micro-, small and medium-sized enterprises and contribute to institutional strengthening and policy dialogue, contributing to recovery, stability and resilience against future shocks. Partners as multipliers will enable the provision of assistance to hundreds of such enterprises

to improve their business operations or achieve trade, complementing policy-level changes, such as the accession of Iraq to WTO. The inclusive approach to partnerships for development and trade will be extended to other countries at risk of lapsing or relapsing into conflict.

13.28 Expected progress towards the objective is presented in the performance measure below (see figure 13.III).

Figure 13.III

Performance measure: number of micro-, small and medium-sized enterprises that improved business or transacted trade, and partnerships for trade in conflict and post-conflict situations (cumulative)

Legislative mandates

13.29 The list below provides all mandates entrusted to ITC.

General Assembly resolutions

2297 (XXII)	International Trade Centre	70/1	Transforming our world: the 2030 Agenda for Sustainable Development
64/220; 66/218; 74/238; 76/220	Operational activities for development of the United Nations system	71/243; 75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system

C. Substantive deliverables

Consultation, advice and advocacy: advice to policymakers, trade support institutions and enterprises to address the international competitiveness challenges for micro-, small and medium-sized enterprises in developing countries and countries with economies in transition, to facilitate public-private dialogue on improvements to the business environment and to ensure that trade supports inclusive and sustainable development; advisory services to disadvantaged groups among micro-, small and medium-sized enterprises, such as women and youth-owned enterprises, on improving their productive capacity and market access; advisory and advocacy services for policymakers and business support institutions on how to consider the needs of micro-, small and medium-sized enterprises and disadvantaged groups in their service offer; and advocacy that allows for the systematic inclusion of such enterprises and disadvantaged groups in policy and strategy processes.

Databases and substantive digital materials: databases and other online tools to make global trade more transparent and facilitate market access and business and policy decisions. Databases cover trade flows, tariffs and non-tariff measures, export potential, procurement opportunities, rules of origin, private standards and knowledge on sustainable trade and youth and women entrepreneurship. They include the SheTrades database for over 20,000 active women entrepreneurs, “SheTrades Outlook”, the ITC “SME trade academy”, the Ye! community and platform (with 20,000 young entrepreneurs) and the suite of trade intelligence tools (Market Access Map, Trade Map, Standards Map, Investment Map, Global Trade Helpdesk, Export Potential Map, Procurement Map, Trade Strategy Map, Sustainability Map and ePing).

D. Communication deliverables

Outreach programmes, special events and information materials: special events, including the World Export Development Forum, SheTrades Global, the Trade for Sustainable Development Forum, the world trade promotion organizations network conference and awards; the *International Trade Forum* magazine; Micro-, Small and Medium-sized Enterprises Day; newsletters on trade-related subjects for over 16,000 recipients; and information materials and outreach, including on export strategy, trade support networks and capacities, entrepreneurship, skills and export development opportunities, world trade trends, the multilateral trading system, regional integration, technical regulations and standards for export, and trade and the Sustainable Development Goals.

Digital platforms and multimedia content: ITC website and social media accounts, engaging sustainable micro-, small and medium-sized enterprises, women entrepreneurs and youth.

Library services: on-demand services for ITC clients related to trade information.

B. Proposed post and non-post resource requirements for 2023

Overview

13.31 The proposed regular budget resources for 2023 are reflected in table 13.3.

Table 13.3

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2021 expenditure ^a	2022 appropriation	Changes				2023 estimate (before recosting)
			Technical adjustments	New/ expanded mandates	Other	Total Percentage	
Grants and contributions ^b	20 100.2	20 174.9	–	–	–	–	20 174.9
Total	20 100.2	20 174.9	–	–	–	–	20 174.9

^a At the time of reporting, the expenditures presented in this table and subsequent tables are not final and may be subject to adjustments that could result in minor differences between the information contained in the present report and the financial statements to be published by 31 March 2022.

^b Represents the United Nations share of the ITC full regular budget disbursed as a grant.

13.32 The General Assembly, in section I of its resolution [59/276](#), endorsed revised administrative arrangements for ITC as set out in the report of the Secretary-General ([A/59/405](#)). In conformity with those administrative arrangements, the regular budget of ITC is denominated in Swiss francs and is funded equally by the United Nations and WTO. The United Nations share of the ITC full regular budget is disbursed as a grant.

13.33 The grant proposed for 2023 amounts to \$20,174,900, before recosting, reflecting no change in the resource level compared with the appropriation for 2022. The full regular budget requirements of ITC amount to SwF 37,263,000 (before recosting), net of projected miscellaneous income of SwF 200,000. The United Nations grant remains at 50 per cent of the ITC full regular budget, or SwF 18,631,500. After applying an exchange rate of SwF 0.9235 to \$1.00, the United States dollar equivalent is \$20,174,900. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

13.34 The General Assembly has approved, on a trial basis, a change from a biennial to an annual budget period for the United Nations, while WTO maintains its biennial budget period; this has implications for the administrative arrangements relating to the ITC budget. The administrative arrangements will be suitably updated should the annual budget cycle be confirmed by the General Assembly. Similar to the 2020, 2021 and 2022 annual budgets, the present proposal for 2023 is put forward under an interim arrangement agreed with the WTO secretariat.¹

13.35 The total resource requirements for 2023 for ITC, comprising its full regular budget in Swiss francs and projected extrabudgetary resources in Swiss francs, are reflected in tables 13.4 and 13.5 and figure 13.IV. In the interest of clarity and transparency, details of post resources, which would be provided for by the proposed grants from the United Nations and WTO, are presented in tables 13.6 and 13.7 and annex I, despite not being part of the approved or proposed staffing table of the United Nations regular budget.

Note: The following abbreviations are used in tables and figures: ASG, Assistant Secretary-General; GS (OL), General Service (Other level).

¹ The WTO General Council approved the budget of ITC for the biennium 2022–2023 in the WTO format in December 2021.

Overall resource changes

Other changes

- 13.36 As reflected in table 13.5, resource changes under the ITC full regular budget reflect the planned reclassification of the head of the Information Technology Section from Information Systems Officer (P-4) to Chief of Section, Information Systems (P-5) in the Division of Programme Support (see annex III). The resulting increase of SwF 27,200 in post resources would be provided for within the proposed grants from the United Nations and WTO. The decrease of SwF 27,200 in non-post resources mainly reflects reduced requirements under consultants owing to the expected decrease in demand for consultants in the areas of information and communications technology systems analysis and workflow automations.

Extrabudgetary resources

- 13.37 As reflected in table 13.4, ITC expects to continue to receive both cash and in-kind contributions, which would complement regular budget resources. In 2023, extrabudgetary resources are estimated at SwF 96,967,500, equivalent to \$105,000,000 at an exchange rate of SwF 0.9235 to \$1.00, and would provide for 20 posts (1 P-5, 3 P-4, 4 P-3, 1 P-2/1 and 11 General Service (Other level)), as presented in table 13.7, and non-post resources, including project personnel.
- 13.38 The extrabudgetary resources would be used mainly to implement technical cooperation projects, complementing and leveraging the core expertise and global offering of ITC provided through regular budget resources, at the request of Member States. Examples of such projects include technical cooperation and assistance provided to micro-, small and medium-sized enterprises in

developing countries, especially least developed countries, and countries with economies in transition related to the promotion of trade and international business development, including through initiatives such as SheTrades, Alliances for Action and One Trade Africa. ITC continues to negotiate with donors for the funding of large-scale integrated programmes. Estimated extrabudgetary resources represent 72.2 per cent of the total resources for this subprogramme.

- 13.39 The authority to oversee the use of extrabudgetary resources rests with ITC, as per the delegation of authority by the Secretary-General.

Other information

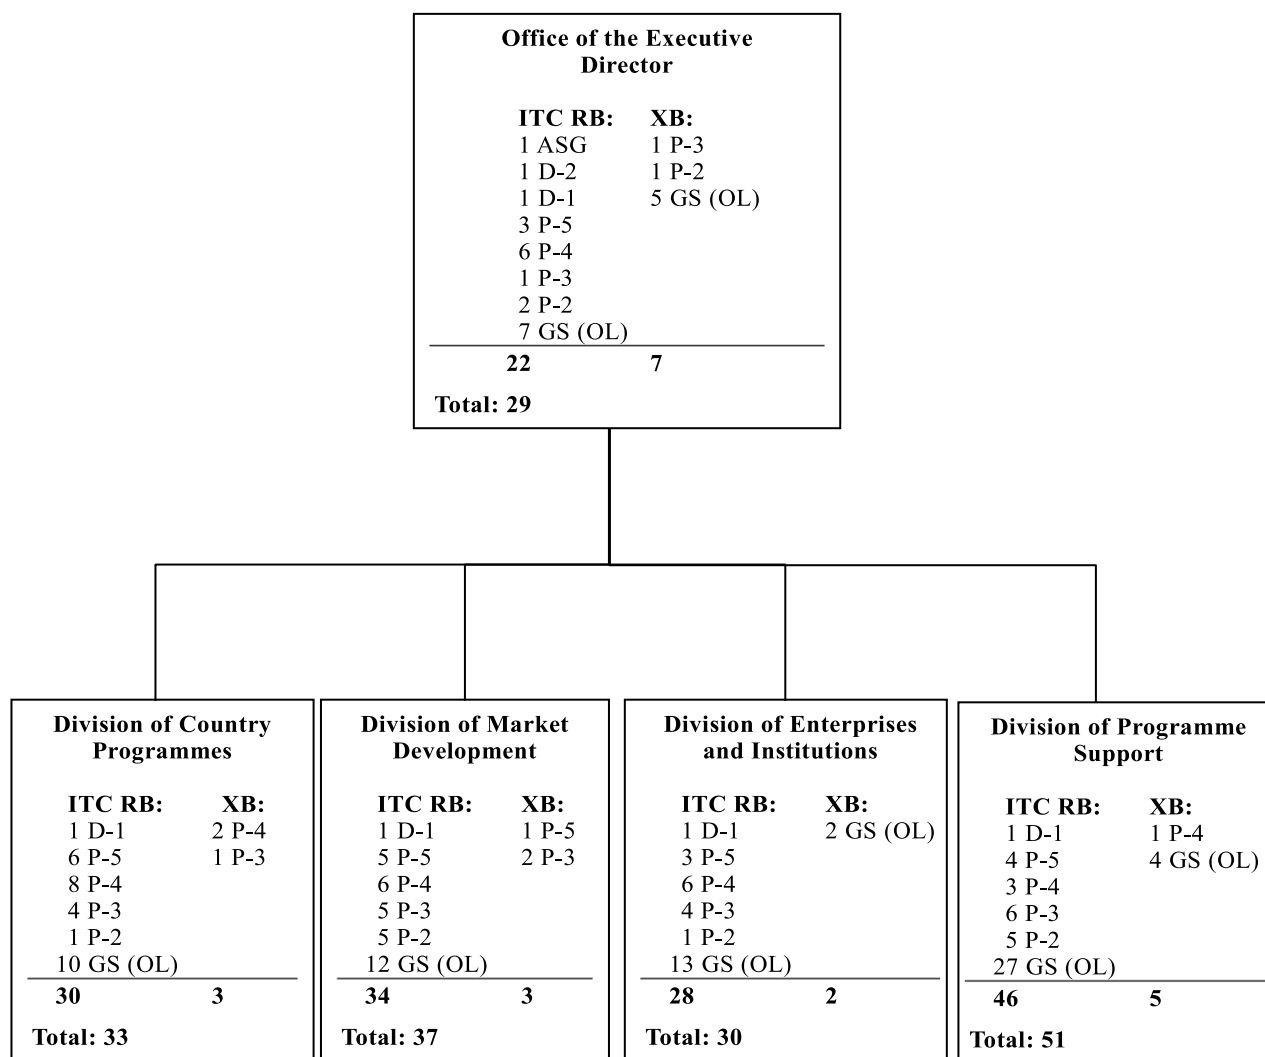

- 13.40 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Centre is integrating environmental management practices into its operations. ITC became greenhouse gas neutral in 2018 and is continuously exploring new ways to further reduce its greenhouse gas emissions. For example, following the negotiations initiated by ITC, the owner of the ITC headquarters building in Geneva has agreed to renovate the building in line with the latest Swiss environmental standards.
- 13.41 Information on compliance with regard to the timely submission of documentation and advance booking for air travel is reflected in table 13.8. Efforts undertaken by ITC to further enhance the rate of travel compliance include the quarterly dissemination of a newsletter addressed to all ITC personnel that provides the actual compliance rates and the category of non-compliance justifications broken down by division. Training at ITC also highlights the policy so that any ITC staff raising travel requests are fully aware of the advance booking policy. Since 2020, divisional directors have been provided with details of individual staff compliance rates twice a year, with a ranking from the least to the most compliant. Additionally, measures have been put in place to document more clearly, in the enterprise resource planning system or otherwise, when non-compliance is due to factors beyond the control of ITC. Efforts have been made to receive confirmations and collect the required details for travel earlier, and ITC will continue to undertake all of these efforts, as they have shown steady and progressive results.

Table 13.8
Compliance rate
 (Percentage)

	<i>Actual 2019</i>	<i>Actual 2020</i>	<i>Actual 2021</i>	<i>Planned 2022</i>	<i>Planned 2023</i>
Timely submission of documentation	100	100	100	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	39	39	69	100	100

Annex I

Organizational structure and post distribution for 2023

Note: ITC RB posts refer to ITC full regular budget posts, which are not part of the proposed United Nations regular budget staffing table. XB posts are funded through the special account for programme support costs.

Abbreviations: ASG, Assistant Secretary-General; GS (OL), General Service (Other level); ITC RB, International Trade Centre full regular budget; XB, extrabudgetary.

Annex II

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Board of Auditors

A/76/5 (Vol. III), chap. II

The Board recommends that ITC specify the programme support cost rate and the appendix D rate separately in donor agreements (para. 29).

The International Trade Centre (ITC) separated the programme support cost rate and the appendix D rate in new donor agreements. The recommendation is implemented and will be proposed for closure to the Board of Auditors during the 2022 audit.

The Board reiterates the recommendation that ITC adopt corrective measures to improve compliance with the advance ticket purchase policy (para. 60).

The Senior Management Committee has implemented tight control measures. ITC has put in place clear accountability mechanisms at all levels, as articulated in paragraph 13.41 of the present report, to ensure improved compliance with the advance ticket purchase policy.

Advisory Committee on Administrative and Budgetary Questions

A/76/7 and A/76/7/Corr.1

Noting that the post of Director (D-1) of the Addis Ababa office of ITC has been vacant for an extended period of time since 1 January 2016, the Advisory Committee trusts that recruitment for the post will be completed as soon as possible and that updated information will be provided to the General Assembly at the time of its consideration of the present report and in the context of the proposed programme budget for 2023 (para. IV.86).

Recruitment is under way and updated information will be provided to the General Assembly at the time of its consideration of the present report.

The Advisory Committee recommends that the General Assembly request the International Trade Centre to implement the recommendations of the Board of Auditors fully and expeditiously and to provide an update in the proposed programme budget for 2023, including information on the provision of guidelines on the selection of consultants and individual contractors in order for its managers to enhance accountability and transparency (para. IV.95).

The Board of Auditors, in its report for the year ended 31 December 2020, confirmed that ITC had a total of 12 outstanding recommendations from prior periods (A/76/5 (Vol. III), chap. II, para. 6) and made 9 new recommendations to ITC.

ITC is working towards implementing all recommendations, and an update on their status will be provided in the report of the Board of Auditors for the year ended 31 December 2021, which would be provided to the General Assembly during its consideration of the proposed programme budget for 2023.

ITC completed the necessary actions related to 10 recommendations and will propose them for closure to the Board of Auditors during the 2022 audit, which will commence in April 2022.

Annex III

Summary of planned post changes

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 6 Operational aspects of trade promotion and export development	(1) 1	(P-4) P-5	Reclassification of 1 Information Systems Officer (P-4), head of the Information Technology Section, to Chief of Section, Information Systems (P-5) in Division of Programme Support	The planned upward reclassification of this post reflects the increased complexity of the job function as a result of growing focus on and demand for data analytics and management, digital transformation and innovation. The reclassification will strengthen the capacity of the International Trade Centre in the area of information and communications technology (ICT) and support the implementation of the Centre's digital transformation agenda. In addition, the reclassification will place the Centre on a par with other similar-sized United Nations entities in terms of leadership posts with functions relating to ICT.

Foreword

Despite the continued disruption caused by the coronavirus disease (COVID-19) pandemic in 2021, the personnel of the United Nations Environment Programme (UNEP) played a key role in addressing the planet's biggest environmental challenges. Achievements in 2021 included the provision of support to Member States in building capacity to tackle the triple planetary crisis, namely, the climate crisis, the nature and biodiversity loss crisis and the pollution and waste crisis. Working in the science-policy interface, UNEP supported Member States in implementing their commitment under a variety of multilateral conventions addressing the three crises. In parallel, it worked with the private sector to boost financing for everything from net-zero targets to nature-based solutions, coordinating global efforts to reduce methane emissions and finalizing an historic campaign to end the use of lead in petrol, saving millions of lives. However, even greater challenges lie ahead.

At the start of 2023, UNEP will begin the implementation of the second year of its medium-term strategy for the period 2022–2025. At the same time, the world will begin the fourth year of the decade of action to deliver the Sustainable Development Goals. In view of the setbacks that COVID-19 has caused with respect to reaching the Goals, there is now no time to waste. Long-term solutions must be found to create a world that works with nature, not against it. As the world's global environment authority, UNEP will wisely use the funds outlined in the present budget proposal to push ever harder to help create solutions and to support Member States to deliver on the Paris Agreement, to restore the planet's ecosystems, to reduce pollution and transboundary flows of waste and to increase the availability of environmental data through new digital tools.

Throughout this work, UNEP will collaborate closely with the rest of the United Nations system to ensure that their combined power comes to bear upon the triple planetary crisis which, if left unabated, will have wide-ranging consequences for all societies and economies.

(Signed) Inger **Andersen**
Executive Director, United Nations Environment Programme

A. Proposed programme plan for 2023 and programme performance in 2021

Overall orientation

Mandates and background

- 14.1 The United Nations Environment Programme (UNEP) is responsible for leading and coordinating action on environmental matters within the United Nations system. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolution [2997 \(XXVII\)](#), and by the Governing Council of UNEP in its decision 19/1. That decision set out the Nairobi Declaration on the Role and Mandate of the United Nations Environment Programme, which the Assembly subsequently endorsed in 1997 in the annex to its resolution [S-19/2](#) and further reaffirmed by its resolutions [53/242](#), in 1999, and [66/288](#) and [67/213](#), in 2012. Member States recognize the importance of the environmental dimension to the successful implementation of the 2030 Agenda for Sustainable Development. Within its mandate, UNEP will support Member States by providing strategic direction towards the achievement of environmental sustainability, while contributing to a balanced integration of the economic, social and environmental dimensions of sustainable development. Acknowledging the integrated nature of the challenges that countries face, UNEP will play a critical role in catalysing the fulfilment of the commitments and action that drive transformational change for sustainable development.

Strategy and external factors for 2023

- 14.2 The medium-term strategy for the period 2022–2025 contains a vision of UNEP as supporting Member States in developing and implementing policies, strategies and programmes to strengthen the environmental dimension of the 2030 Agenda, but with a forward-looking 2050 perspective on planetary sustainability (see United Nations Environment Assembly decision 5/2). The strategy depends on recognition of the existence of three planetary crises, namely, climate change, biodiversity loss and pollution, and outlines a set of transformative shifts to target the drivers of those crises. The strategy also maps out the actions needed to reshape consumption and production patterns towards more sustainable and equitable models that contribute to the UNEP vision for planetary sustainability, human health and well-being. The aim of the programme for 2023 is to focus on how UNEP can meet current and future expectations, while continuing to deliver on the promises made to Member States in 2012 through the United Nations Conference on Sustainable Development and its outcome document, entitled “The future we want” (General Assembly resolution [66/288](#)). It demonstrates the role of UNEP in supporting countries’ efforts to build their capacity to deliver on their environmental goals and commitments under international agreements.
- 14.3 Through the strategy, UNEP places the three planetary crises at the heart of its work. UNEP will tackle those crises through transformative multi-stakeholder actions that target the root causes and drivers of the crises. The aims of the strategy are to enable the Programme to make a deeper and broader impact that can underpin positive social and economic outcomes, while reducing vulnerabilities in support of sustainable development. UNEP will ensure that science remains at the centre of all decision-making processes, including on emerging issues, and that the environmental rule of law continues to improve global environmental governance, closely aligned with the multilateral environmental agreements for which it provides the secretariats and the direction set by the 2030 Agenda. Following the adoption of United Nations Environment Assembly decision 5/2 on 23 February 2021, UNEP realigned its programmatic work with its existing mandate to optimize its crucial role as a global substantive and normative environmental organization that services Member States. Accordingly, the programme plan for 2023 is presented under the newly adopted subprogramme structure. The reporting on the performance of UNEP in 2021 is presented under the previous structure, consisting of a mainstreamed subprogramme, which was in place at the time of the programme planning for 2021 (see annex to part A below).

- 14.4 For 2023, the UNEP planned deliverables will support Member States in their ongoing management of and recovery from the coronavirus disease (COVID-19) pandemic. Such planned deliverables and activities include providing guidance on COVID-19 recovery-related investments; enhancing the capacity of Member States to protect elephants; enabling policies and practices to support finance and economic transformations; and increasing capacity to mitigate future zoonotic pandemics in response to the COVID-19 pandemic, described in subprogrammes 1, 4, 6 and 7, respectively.
- 14.5 Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the programme plan for 2023 continues to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. Examples of lessons learned and best practices include capitalizing on virtual engagement with partners from their capitals and from countries that do not have diplomatic representation in Nairobi, upon request, to drive efficacy, reduce greenhouse gas emissions and broaden collaboration. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.
- 14.6 With regard to cooperation with other entities at the global, regional, subregional, national and local levels, UNEP will continue raising ambitions and promoting leadership through advocacy and a normative and standard-setting approach. It will support Member States through transformative strategic partnerships that deliver sustainable solutions, integrating health, education, poverty reduction, and economic and social well-being. Its partnership with the secretariats of multilateral environmental agreements will remain pivotal to securing stronger synergies and enhancing the impact of the work of the respective parties. UNEP will encourage non-governmental stakeholders, including the private sector and the finance community, to increase investment in new and renewable sources of energy and improve environmental sustainability. Within the context of those partnerships, actions will be aimed at ensuring delivery and making a broader impact in support of sustainable development, while strengthening the ability of countries to rapidly respond to the environmental impacts of disasters and conflicts.
- 14.7 With regard to inter-agency coordination and liaison, UNEP has the overall responsibility for leading and coordinating the response on environmental issues within the United Nations system. Through the United Nations Environment Management Group, UNEP will catalyse international action to enhance the coherence of environmental sustainability strategies and provide more visibility on partnership initiatives. It will use the opportunity provided by the United Nations development system reform to empower the United Nations to address global environmental crises. UNEP will also leverage this opportunity to enhance its guiding role, raise ambitions and accelerate and scale up progress during the decade of action to deliver the Sustainable Development Goals. It will continue to focus on ensuring that its work is reflected and embedded in the new generation of United Nations country teams and the reinvigorated resident coordinator system through engagement with the Development Coordination Office and to leverage its work and expertise at the regional, subregional and country levels. UNEP will integrate the priorities of the multilateral environmental agreements into those processes to enable the United Nations system to respond to environmental issues in a coordinated manner.
- 14.8 With regard to the external factors, the overall plan for 2023 is based on the following planning assumptions:
- (a) The sustained expansion of effective partnerships and networks continuing to set the direction of science-based environmental policies for countries and major implementing agencies;
 - (b) The ability of local and national approaches to be scaled up at the subregional, regional and global levels to ensure a systemic impact;
 - (c) The continued availability of extrabudgetary funding, enabling countries to make the transition to sustainable development.

- 14.9 UNEP integrates a gender perspective into its operational activities, deliverables and results, as appropriate. It will work to fully implement Environment Assembly resolution 4/17 on promoting gender equality and the human rights and empowerment of women and girls in environmental governance and will continue to operationalize it in programme and project design, operational activities, deliverables and results. UNEP will support Member States in their achievement of Sustainable Development Goal 5 in the context of the environment, calling for women’s full and effective participation and equal opportunities for leadership at all levels of environmental decision-making.
- 14.10 In addition to full respect for human rights and the programming principle of leaving no one behind, and in line with the United Nations Disability Inclusion Strategy, UNEP will be attentive and responsive to the inclusion of persons with disabilities, including by sensitizing their needs and concerns in its programme and project design and implementation and tailoring its projects to fit the conditions and needs of local communities. Addressing the concerns and needs of persons with disabilities is particularly relevant when supporting climate change-related early warning systems or in projects that deal with environmental disasters and conflicts. UNEP will continue to reinforce the promotion and protection of the rights of persons with disabilities through its safeguard risk screening and mitigation procedure.

Programme performance in 2021

Impact of the pandemic

- 14.11 The continuation of the COVID-19 pandemic into 2021 had an impact on the implementation of mandates, in particular owing to travel restrictions and the consequent inability to collect data under subprogrammes 3 and 5. In addition, in order to support Member States on issues related to the COVID-19 pandemic, within the overall scope of the objectives, UNEP continued to support the global response to reduce the environmental impacts of the COVID-19 pandemic under all subprogrammes.

Legislative mandates

- 14.12 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

2997 (XXVII)	Institutional and financial arrangements for international environmental cooperation	67/251	Change of the designation of the Governing Council of the United Nations Environment Programme
47/190	Report of the United Nations Conference on Environment and Development	68/99	Strengthening of international cooperation and coordination of efforts to study, mitigate and minimize the consequences of the Chernobyl disaster
S-19/2	Programme for the Further Implementation of Agenda 21		
53/242	Report of the Secretary-General on environment and human settlements	68/215	Report of the Governing Council of the United Nations Environment Programme on its first universal session and the implementation of section IV.C, entitled “Environmental pillar in the context of sustainable development”, of the outcome document of the United Nations Conference on Sustainable Development
65/2	Outcome document of the High-level Review Meeting on the Implementation of the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States		
66/288	The future we want	70/1	Transforming our world: the 2030 Agenda for Sustainable Development
67/213	Report of the Governing Council of the United Nations Environment Programme on its twelfth special session and the implementation of section IV.C, entitled “Environmental pillar in the context of sustainable development”, of the outcome document of the United Nations Conference on Sustainable Development	71/243	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
		72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system

Section 14 Environment

73/238	The role of the international community in the prevention of the radiation threat in Central Asia	76/189	Information and communications technologies for sustainable development
74/213	Cooperative measures to assess and increase awareness of environmental effects related to waste originating from chemical munitions dumped at sea	76/197	Promoting investments for sustainable development
74/216	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development	76/199	Oil slick on Lebanese shores
74/302	Implementation of the recommendations contained in the report of the Secretary-General on the causes of conflict and the promotion of durable peace and sustainable development in Africa	76/201	Sustainable tourism and sustainable development in Central America
75/271	Nature knows no borders: transboundary cooperation – a key factor for biodiversity conservation, restoration and sustainable use	76/202	Promoting sustainable consumption and production patterns for the implementation of the 2030 Agenda for Sustainable Development, building on Agenda 21
75/322	New Partnership for Africa's Development: progress in implementation and international support	76/203	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States
76/39	Observance of environmental norms in the drafting and implementation of agreements on disarmament and arms control	76/204	Disaster risk reduction
76/75	Effects of atomic radiation	76/206	Implementation of the United Nations Convention to Combat Desertification in Those Countries Experiencing Serious Drought and/or Desertification, Particularly in Africa
76/124	Strengthening of the coordination of emergency humanitarian assistance of the United Nations	76/208	Report of the United Nations Environment Assembly of the United Nations Environment Programme
76/128	International cooperation on humanitarian assistance in the field of natural disasters, from relief to development	76/211	Combating sand and dust storms
76/129	International Year of Sustainable Mountain Development, 2022	76/212	Strengthening cooperation for integrated coastal zone management for achieving sustainable development
76/137	Policies and programmes involving youth	76/213	Science, technology and innovation for sustainable development
		76/214	Culture and sustainable development
		76/224	Towards global partnerships: a principle-based approach to enhanced cooperation between the United Nations and all relevant partners

Governing Council of the United Nations Environment Programme decisions

SS.VIII/1, sect. II, 25/1, sect. II	Implementation of decision SS.VII/1 on international environmental governance: strengthening the scientific base of the United Nations Environment Programme	23/11	Gender equality in the field of the environment (para. 10)
SS.XI/2	United Nations Environment Programme support for Haiti: strengthening environmental response in Haiti	24/11	Intensified environmental education for achieving sustainable development
19/1	Nairobi Declaration on the Role and Mandate of the United Nations Environment Programme	26/15	Strengthening international cooperation on the environmental aspects of emergency response and preparedness
23/7	Strengthening environmental emergency response and developing disaster prevention, preparedness, mitigation and early-warning systems in the aftermath of the Indian Ocean tsunami disaster	27/2	Implementation of paragraph 88 of the outcome document of the United Nations Conference on Sustainable Development
		27/11	State of the environment and contribution of the United Nations Environment Programme to meeting substantive environmental challenges

United Nations Environment Assembly resolutions and decisions

1/1	Ministerial outcome document of the first session of the United Nations Environment Assembly of the United Nations Environment Programme	2/20	Proposed medium-term strategy for 2018–2021 and programme of work and budget for 2018–2019
1/4	Science-policy interface	2/22	Review of the cycle of the United Nations Environment Assembly of the United Nations Environment Programme
1/8	Ecosystems-based adaptation		
1/10	Different visions, approaches, models and tools to achieve environmental sustainability in the context of sustainable development and poverty eradication	2/24	Combating desertification, land degradation and drought and promoting sustainable pastoralism and rangelands
1/11	Coordination across the United Nations system in the field of the environment, including the Environment Management Group	2/25	Application of Principle 10 of the Rio Declaration on Environment and Development in the Latin America and Caribbean Region
1/12	Relationship between the United Nations Environment Programme and multilateral environmental agreements	3/1	Pollution mitigation and control in areas affected by armed conflict or terrorism
1/13	Implementation of Principle 10 of the Rio Declaration on Environment and Development	3/2	Pollution mitigation by mainstreaming biodiversity into key sectors
1/16	Management of trust funds and earmarked contributions	3/3	Contributions of the United Nations Environment Assembly to the high-level political forum on sustainable development
1/17	Amendments to the Instrument for the Establishment of the Restructured Global Environment Facility	3/4	Environment and health
		3/5	Investing in innovative environmental solutions for accelerating the implementation of the Sustainable Development Goals
2/1	Amendments to the rules of procedure		
2/2	Role and functions of the regional forums of ministers of the environment and environment authorities	3/6	Managing soil pollution to achieve sustainable development
		3/8	Preventing and reducing air pollution to improve air quality globally
2/3	Investing in human capacity for sustainable development through environmental education and training	3/9	Eliminating exposure to lead paint and promoting environmentally sound management of waste lead-acid batteries
2/4	Role, functions and modalities for United Nations Environment Programme implementation of the SAMOA Pathway as a means of facilitating achievement of the Sustainable Development Goals	3/10	Addressing water pollution to protect and restore water-related ecosystems
		3/11	Implementation of paragraph 88 (a)–(h) of the outcome document of the United Nations Conference on Sustainable Development, entitled “The future we want”
2/5	Delivering on the 2030 Agenda for Sustainable Development		
2/6	Supporting the Paris Agreement	4/1	Programme of work and budget for the biennium 2020–2021
2/13	Sustainable management of natural capital for sustainable development and poverty eradication	4/3	Sustainable mobility
		4/6	Marine plastic litter and microplastics
2/15	Protection of the environment in areas affected by armed conflict	4/17	Promote gender equality, and the human rights and empowerment of women and girls in environmental governance
2/16	Mainstreaming of biodiversity for well-being		
2/17	Enhancing the work of the United Nations Environment Programme in facilitating cooperation, collaboration and synergies among biodiversity-related conventions	4/18	Poverty environment Nexus
		4/19	Mineral resource governance
		4/20	Fifth Programme for the Development and Periodic Review of Environmental Law (Montevideo V): delivering for people and the planet
2/18	Relationship between the United Nations Environment Programme and the multilateral environmental agreements for which it provides the secretariat	4/21	Implementation plan “Towards a pollution-free planet”
2/19	Midterm review of the fourth Programme for the Development and Periodic Review of Environmental Law (Montevideo Programme IV)	4/22	Implementation and follow up of United Nations Environment Assembly resolutions

Section 14 Environment

4/23	Keeping the world environment under review: enhancing the United Nations Environment Programme science-policy interface and endorsement of the Global Environment Outlook	5/9 5/10	Sustainable and resilient infrastructure Environmental dimension of a sustainable, resilient and inclusive post COVID-19 recovery
5/1	Animal Welfare – Environment – Sustainable Development Nexus	5/11	Enhancing circular economy as a contribution to achieving sustainable consumption and production
5/2	Sustainable Nitrogen Management	5/12	Environmental aspects of minerals and metals management
5/3	Future of the Global Environment Outlook		
5/4	Sustainable lake management	5/13	Due regard to the principle of equitable geographical distribution, in accordance with paragraph 3 of Article 101 of the Charter of the United Nations
5/5	Nature-based solutions for supporting sustainable development		
5/6	Biodiversity and health	5/14	End plastic pollution: Towards an international legally binding instrument
5/7	Sound management of chemicals and waste		
5/8	Science-Policy Panel to contribute further to the sound management of chemicals and waste and to prevent pollution		

**Subprogramme 1
Climate action***General Assembly resolutions*

69/225	Promotion of new and renewable sources of energy	76/205	Protection of global climate for present and future generations of humankind
73/230	Effective global response to address the impacts of the El Niño phenomenon	76/210	Ensuring access to affordable, reliable, sustainable and modern energy for all

Governing Council of the United Nations Environment Programme decisions

27/10 Climate Technology Centre and Network

**Subprogramme 2
Digital transformation in supporting environmental action***Governing Council of the United Nations Environment Programme decisions*

23/1, sect. I Implementation of decision SS.VII/1 on international environmental governance: Bali Strategic Plan for Technology Support and Capacity-building

**Subprogramme 3
Nature action***General Assembly resolutions*

65/161	Convention on Biological Diversity	75/239	Oceans and the law of the sea
68/205	World Wildlife Day	75/311	Tackling illicit trafficking in wildlife
68/232	World Soil Day and International Year of Soils	76/71	Sustainable fisheries, including through the 1995 Agreement for the Implementation of the Provisions of the United Nations Convention on the Law of the Sea of 10 December 1982 relating to the Conservation and Management of Straddling Fish Stocks and Highly Migratory Fish Stocks, and related instruments 76/200
72/306	Implementation of the United Nations Decade of Action on Nutrition (2016–2025)		
73/251	World Pulses Day		
74/227	Sustainable mountain development		
75/214	Towards the sustainable development of the Caribbean Sea for present and future generations	76/200	Agricultural technology for sustainable development
75/220	Harmony with Nature		

Part IV International cooperation for development

76/207	Implementation of the Convention on Biological Diversity and its contribution to sustainable development	76/222	Agriculture development, food security and nutrition
--------	--	--------	--

Governing Council of the United Nations Environment Programme decisions

26/14	Global Environment Monitoring System/Water Programme	27/3	International water quality guidelines for ecosystems
26/16	Promoting South-South cooperation on biodiversity for development	27/4	Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services
		27/6	Oceans

United Nations Environment Assembly resolutions

1/9	Global Environment Monitoring System/Water Programme (GEMS/Water)	4/12	Sustainable management for global health of mangroves
2/10	Oceans and seas	4/13	Sustainable coral reefs management
2/14	Illegal trade in wildlife and wildlife products	4/15	Innovations in sustainable rangelands and pastoralism
4/10	Innovation on biodiversity and land degradation	4/16	Conservation and sustainable management of peatlands

**Subprogramme 4
Environmental governance***Governing Council of the United Nations Environment Programme ministerial declarations and decisions*

SS.VI/1	Malmö Ministerial Declaration	27/5	Coordination across the United Nations system, including the Environment Management Group
SS.VII/4	Compliance with and enforcement of multilateral environmental agreements		
SS.XI/5	Environmental law	27/9	Advancing justice, governance and law for environmental sustainability
SS.XII/3	International environmental governance		
25/11	Environmental law		

United Nations Environment Assembly resolutions

1/3	Illegal trade in wildlife

Deliverables

14.13 Table 14.1 lists all cross-cutting deliverables of the programme.

Table 14.1
Cross-cutting deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Conference and secretariat services for meetings (number of three-hour meetings)	4	4	4	3
Meetings of the:				
1. United Nations Environment Assembly	1	1	1	–
2. Advisory Committee on Administrative and Budgetary Questions	1	1	1	1

Part IV International cooperation for development

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
3. Committee for Programme and Coordination	1	1	1	1
4. Fifth Committee	1	1	1	1
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	4	4	2	2
5. To assess environmental risks from disasters and conflicts ^a	2	2	1	1
6. On institutional and legal frameworks to improve national and local preparedness to mitigate environmental risks from disasters and conflicts ^a	2	2	1	1
Publications (number of publications)	4	4	3	2
7. On disaster risk reduction, preparedness assessments and road maps ^a	2	2	2	1
8. UNEP medium-term strategy for the period 2022–2025	1	1	–	–
9. UNEP annual report	1	1	1	1

C. Substantive deliverables

Consultation, advice and advocacy: advice to humanitarian and military actors on environmental footprint reduction; advice to 20 Member States and approximately 20 international partners, upon request, on the monitoring and implementation of strategies to enhance environmental risk reduction, environmental emergency response and environmental recovery and to make progress towards the achievement of the Sustainable Development Goals.^a

^a Deliverables of the mainstreamed subprogramme 2, Resilience to disasters and conflicts.

Evaluation activities

- 14.14 The following evaluations completed in 2021 have guided the proposed programme plan for 2023:
- (a) Independent review of the contribution by UNEP to poverty reduction;
 - (b) Enhanced coordination and implementation of the 10-Year Framework of Programmes on Sustainable Consumption and Production Patterns;
 - (c) Support to eligible parties to produce the sixth national report to the Convention on Biological Diversity;
 - (d) Fifteen other independent evaluations on completed UNEP projects.
- 14.15 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2023. For example, the independent review of the contribution by UNEP to poverty reduction underscored the need to emphasize poverty-related effects in new project designs. These findings fed into the Programme’s “readiness” initiatives to prepare for the implementation of the medium-term strategy for the period 2022–2025. Project-level evaluations fed back into improved project implementation initiatives and improved project design. Synthesis of common lessons and recommendations from across those evaluations were highlighted for the attention of senior management. These included: (a) greater attention and resources to be allocated to the establishment of robust project baselines and project monitoring systems; and (b) improvement in project-level knowledge management through: (i) improved handover processes for outgoing staff; (ii) consistent storage of project documentation; and (iii) clear responsibility for action on learning from projects with no future phase.
- 14.16 The following evaluations are planned for 2023:
- (a) Evaluation on the Climate action subprogramme;
 - (b) Evaluation on 20 projects representative of the programme of work and reaching completion;
 - (c) Evaluation on approximately 40 projects upon completion.

Programme of work

Subprogramme 1

Climate action

Objective

- 14.17 The objective, to which this subprogramme contributes, is to advance the transition of countries to low-emission economic development and increase their adaptation and resilience to climate change.

Strategy

- 14.18 To contribute to the objective, the subprogramme will:
- (a) Support Member States in the development of policies and standards to promote low-emission development plans and investment in clean energy and improve the global rate of energy efficiency, to make progress towards the achievement of Sustainable Development Goal 7;
 - (b) Continue helping Member States to implement gender-sensitive policies that achieve quantifiable social and environmental benefits, including through the reduction of greenhouse gas emissions from deforestation and forest degradation, to make progress towards the achievement of Goals 5 and 15;
 - (c) Continue building the technical capacity of Member States to integrate ecosystem-based management into their national adaptation plans, put in place institutional arrangements to coordinate such plans and access climate change adaptation finance for implementing such plans, thereby helping to make progress towards the achievement of Goals 13 and 15;
 - (d) Continue to collaborate with the private sector in constructive and results-oriented partnerships that leverage climate finance and scale up the ambitions and impacts of climate action globally, which will help Member States to make progress towards the achievement of targets under Goals 13 and 17;
 - (e) Advocate and provide evidence and technical support for the use of climate strategies, such as a fiscal stimulus, in the context of sustainable COVID-19 recovery.
- 14.19 The above-mentioned work is expected to result in:
- (a) Member States lowering their emissions of greenhouse gases and other pollutants by reducing energy intensity and demand in sectors such as lighting, appliances, equipment, buildings and transport;
 - (b) Member States increasingly capitalizing on investment opportunities that reduce greenhouse emissions from deforestation and forest degradation with adequate social and environmental safeguards;
 - (c) Member States increasingly capable of better institutionalizing, implementing and monitoring their national adaptation plans alongside efforts to deliver sustainable development;
 - (d) Member States making use of innovative models to enhance financing for sustainable investments and the dissemination of low-emission technologies that help to significantly reduce greenhouse gas emissions, promote access to energy and enhance productive energy use;
 - (e) Increased low-emission investment as a result of countries using climate strategies to guide COVID-19 recovery investments, as specified in more detail under result 2 below.

Programme performance in 2021

Increased global action to reduce methane emissions by at least 30 per cent by 2030

- 14.20 The emission of methane, to which the oil and gas, agriculture and waste sectors contribute, has been shown to be detrimental to climate. The Global Methane Pledge, which is aimed at cutting human-caused methane emissions by up to 30 per cent during the current decade (from 2020 levels), could help to limit global warming to no more than 1.5 degrees Celsius above pre-industrial levels, in line with the goals of the Paris Agreement. The subprogramme has been undertaking targeted action to help monitor and assess methane emissions globally and enable increased global action to reduce methane emissions particularly in the oil and gas, agriculture and waste sectors. The subprogramme supported the launch of the International Methane Emissions Observatory, the UNEP Climate and Clean Air Coalition to Reduce Short-lived Climate Pollutants Global Methane Assessment, the Global Methane Pledge and the Oil and Gas Methane Partnership 2.0.
- 14.21 Progress towards the objective is presented in the performance measure below (see table 14.2).

Table 14.2
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)
–	–	<p>More than 100 countries signed the Global Methane Pledge to reduce methane emissions in the oil and gas, agriculture and waste sectors by at least 30 per cent by 2030</p> <p>Over \$300 million pledged at the twenty-sixth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change</p>

Planned results for 2023

Result 1: electric mobility: raising the ambition through a global electric mobility programme

Programme performance in 2021 and target for 2023

- 14.22 The subprogramme’s work contributed to the establishment of fiscal incentives for the rapid uptake of electric vehicles by four countries (Chile, Namibia, North Macedonia and Rwanda), which met the planned target.
- 14.23 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 14.3).

Table 14.3
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Launch of the global electric mobility programme and commitment by 29 countries to develop comprehensive national and/or city electric mobility projects	Two countries developed soot-free bus fleet programmes, with the support of the global electric mobility programme	Four countries established fiscal incentives for the rapid uptake of electric vehicles	Four additional countries develop fiscal policies for electric vehicles, with the support of the regional hubs of the global electric mobility programme	One additional country develops fiscal policies for electric vehicles

Result 2: improved low-emission investment by leveraging climate strategies as the guide for COVID-19 recovery investments

Programme performance in 2021 and target for 2023

- 14.24 The subprogramme’s work contributed to \$201 billion in financial assets invested in the low-emission mandate, which exceeded the planned target of \$200 billion.
- 14.25 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 14.I).

Figure 14.I

Performance measure: financial assets invested in the low-emission mandate (cumulative)

(Billions of United States dollars)

Result 3: country reporting under the enhanced transparency framework of the Paris Agreement

Proposed programme plan for 2023

- 14.26 The Paris Agreement on climate change rests upon a foundation of nationally determined contributions, each of which represents the national plans and pledges that individual countries make to keep global temperature increases to well below 2 degrees Celsius, compared with pre-industrial levels, while aiming for 1.5 degrees Celsius to avoid the worst impacts of climate change. In 2021, an enhanced transparency framework for tracking and reporting the progress of existing and future country commitments under the Paris Agreement was established as a key outcome of the twenty-

sixth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change. The subprogramme supported 56 countries to submit their transparency reports to the Convention, while pursuing synergies with regional and global multilateral environmental agreements to facilitate coordination and complementarity between the respective reporting obligations and contribute to greater coherence in tracking the progress of the implementation of the decisions of the multilateral environmental agreements.

Lessons learned and planned change

- 14.27 The lesson for the subprogramme was the need to better align the Programme’s foundational and supporting subprogrammes with climate objectives in order to provide more comprehensive and targeted support for Member States’ reporting on their progress on existing and future country commitments under the Paris Agreement. In applying the lesson, the subprogramme will align the Programme’s scientific work with the enhanced transparency framework and increase the focus on management of results across subprogrammes towards climate objectives by elevating climate change, biodiversity loss and pollution as the overarching focus. The new midterm strategy also provides the platform for this work through an overarching focus on these aspects across the entire organization. Furthermore, the subprogramme will support the submission of transparency reports to the United Nations Framework Convention on Climate Change by 60 additional Member States by 2023.
- 14.28 Expected progress towards the objective is presented in the performance measure below (see figure 14.II).

Figure 14.II

Performance measure: number of countries reporting under the enhanced transparency framework of the Paris Agreement (cumulative)

Deliverables

- 14.29 Table 14.4 lists all deliverables of the subprogramme.

Table 14.4

Subprogramme 1: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	3	3	3	3
1. On mitigation and adaptation technologies through the Climate Technology Centre and Network	3	3	3	3
Publications (number of publications)	6	6	6	6
2. On renewable energy, energy efficiency and the energy sector	3	3	3	3
3. On adaptation and resilience (assessments and tools)	3	3	3	3
C. Substantive deliverables				
Consultation, advice and advocacy: advice to some 20 countries on climate matters, including South-South cooperation, ecosystem-based adaptation, climate financing, the United Nations Framework Convention on Climate Change, short-lived climate pollutants, low-emission development, sustainable energy and energy efficiency, and the Warsaw Framework for REDD-plus.				
D. Communication deliverables				
Outreach programmes, special events and information materials: side events; goodwill ambassador outreach on adaptation to and mitigation of climate change, and the benefits of reducing emissions from deforestation and forest degradation, reaching an audience in excess of 1 million.				
Digital platforms and multimedia platforms: content on social media platforms and web pages.				

Subprogramme 2

Digital transformations in supporting environmental action

Objective

- 14.30 The objective, to which this subprogramme contributes, is to advance the use of data and analytics on environmental issues to allow more effective policies, decisions, actions and investments by Member States and the private sector towards the achievement of the targets of the Sustainable Development Goals related to climate, nature and pollution, and of relevant multilateral environmental agreements.

Strategy

- 14.31 To contribute to the objective, the subprogramme will support and scale up access to environmental information through an effectively governed and inclusive data architecture and digital ecosystem for the planet. Specifically, the subprogramme will:
- (a) Through its enabling role, leverage digital transformations to digitize scientific knowledge and democratize its availability across the three thematic subprogrammes of UNEP. Digital tools will be used strategically to enable, accelerate and amplify impact, as well as to bring more transparency to knowledge about the state of the planet, in line with the Secretary-General's Road Map for Digital Cooperation ([A/74/821](#)), the Data Strategy of the Secretary-General for Action by Everyone, Everywhere and the System-wide Road Map for Innovating United Nations Data and Statistics ([CEB/2020/1/Add.1](#));
 - (b) Initiate partnerships with public and private sector actors to harness data, digital technologies and computational sustainability, in order to help Member States to amplify and accelerate deeper structural transformations, with a view to driving markets, value chains, consumer

behaviours and decision-making towards the achievement of environmental sustainability outcomes;

- (c) Use integrated data sets and analysis, based on digital norms and governance frameworks, to produce actionable, real-time and predictive insights, enabling the automatic monitoring of global, national and local progress towards key targets of the Sustainable Development Goals related to climate, biodiversity and pollution and relevant internationally agreed frameworks, including multilateral environmental agreements;
- (d) Work with key stakeholders to improve digital literacy and use digital platforms to enable further public participation in decision-making, open innovation and citizen science. These planned activities will help Member States to make progress towards the implementation of the targets under Sustainable Development Goals 9, 16 and 17;
- (e) Provide normative support, upon request, on how to close the digital divide through the use of information and communications technologies procured in accordance with sustainability standards.

14.32 The above-mentioned work is expected to result in:

- (a) Increased capacity of Member States to monitor the world environmental situation through the adoption of a global data architecture, governance framework, safeguards and standards for environmental and climate data and related digital public goods;
- (b) Improved ability of Member States to predict and address future environment-related risks through the development of big data platforms that can measure the increasing convergence of environmental and climate stress and disaster vulnerability over space and time and to provide predictive analytics and an early warning system;
- (c) Accelerated adoption of low-emission and low-carbon behaviours, lifestyles and products by consumers and citizens, through increased greenhouse gas emissions transparency, digital eco-labelling and digital nudging, including through e-commerce platforms and digital games;
- (d) Identification and scaled adoption of digital technologies by Member States to support the conservation, sustainable use and equitable benefit-sharing of biodiversity;
- (e) Improved capacity of Member States and other stakeholders to consider and develop policies, using digital transformations to achieve environmental outcomes;
- (f) Reduced environmental impacts, e-waste and greenhouse gas emissions arising from the procurement and installation of digital infrastructure used to bridge the digital divide as part of COVID-19 economic recovery efforts.

Planned results for 2023

Result 1: use of data and data analytics to amplify and accelerate contributions to achieving the Sustainable Development Goals

Proposed programme plan for 2023

- 14.33 The subprogramme's work is expected to contribute to increased accessibility of environmental data and analytics, enabling countries to monitor national and global progress towards the environmental Sustainable Development Goal indicators and key targets of multilateral environmental agreements.
- 14.34 The target for 2023 is presented in the performance measure below (see table 14.5).

Table 14.5
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	–	Five flagship partnerships established with major digital platforms as a step towards ensuring the universal availability of consolidated planetary data, to facilitate effective decision-making and policy development for Member States and the private sector	Increased public participation in environmental monitoring, consensus-building, decision-making and digital transformation

Result 2: increased multi-stakeholder engagement on digital environmental sustainability

Proposed programme plan for 2023

14.35 The adoption of digital technologies can have an increased ecological impact linked to energy and material consumption as well as a social impact resulting from problems linked to accelerated unsustainable consumption patterns, unequal access to digital technologies, discrimination in the provisioning of digital skills and capabilities, or targeted rights violations. The subprogramme co-championed and co-convened the Coalition for Digital Environmental Sustainability to support digital technologies that can facilitate greater inclusion, poverty reduction and sustainability. This new global initiative joins forces from UNEP, the United Nations Development Programme (UNDP), the International Science Council, the German Environment Agency, the Government of Kenya, Future Earth and Sustainability in the Digital Age.

Lessons learned and planned change

14.36 The lesson for the subprogramme was the need to increase the use of digital tools for collecting and analysing feedback from users and stakeholders through a global engagement process. In applying the lesson, the subprogramme will employ digital “sense-making” tools such as artificial intelligence and natural language processing to collect and process the feedback from the increased number of stakeholders from the Coalition for Digital Environmental Sustainability, contributing to the development of the action plan on digital environmental sustainability, which outlines core investment priorities to harness digital technologies that address climate action, nature protection and pollution prevention.

14.37 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 14.6).

Table 14.6
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
–	–	–	Development of the action plan on digital environmental sustainability	Adoption of the action plan on digital environmental sustainability

Deliverables

14.38 Table 14.7 lists all deliverables of the subprogramme.

Table 14.7
Subprogramme 2: deliverables for 2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	–	–	1	2
1. Technical support in using the World Environment Situation Room for digital transformation	–	–	1	2
Seminars, workshops and training events (number of days)	–	–	17	24
2. Training events on digital transformation for environmental sustainability – national training	–	–	4	6
3. Seminars and workshops on development of a global environmental data strategy and digital cooperation framework	–	–	6	6
4. Seminars and workshops on development of the World Environment Situation Room and identification of transformative applications	–	–	6	6
5. Seminars and workshops on development and implementation of the environmental action plan for the Secretary-General’s Road Map for Digital Cooperation	–	–	1	6
Publications (number of publications)	–	–	1	4
6. Digital technologies to achieve climate neutrality and pollution-reduction	–	–	1	4
Technical materials (number of materials)	–	–	1	2
7. Minimizing the environmental, climate and e-waste footprint of the information and communications technology sector	–	–	1	2
C. Substantive deliverables				
Consultation, advice and advocacy: consultation with at least 50 Member States and other entities, including from the United Nations system and stakeholders, on the global environmental data strategy and on integration methods for environmental data and analytics to support digital platforms, files and algorithms; advice to some 10 Member States and stakeholders on strengthening the adoption of data and digital transformation to achieve national climate, nature and pollution targets; advice to more than 10 Member States and stakeholders on using digital platforms and tools to enhance public participation in decision-making, open innovation and citizen science; 2 business alliance partnerships and networks leveraging environmental data and digital transformation approaches.				
D. Communication deliverables				
Digital platforms and multimedia content: 2 digital platforms to support transparency, predictive analytics and risk identification; and thematic web page, social media, multimedia video and audio content.				
E. Enabling deliverables				
Information and communications technology: 2 digital applications and engagement platforms to support e-governance and enhance public participation in environmental monitoring, consensus-building, decision-making and digital transformation.				

Subprogramme 3

Nature action

Objective

- 14.39 The objective, to which this subprogramme contributes, is to strengthen the capacity of countries to manage marine, freshwater and terrestrial ecosystems through an integrated approach for maintaining and restoring their biodiversity and long-term functioning and ensuring the supply of ecosystem goods and services.

Strategy

- 14.40 To contribute to the objective, the subprogramme will:
- (a) Continue to advance cooperation with Member States, regional entities and other partners, including the United Nations Educational, Scientific and Cultural Organization and the Food and Agriculture Organization of the United Nations, to support education on sustainability by engaging with formal and non-formal education activities that shift knowledge, attitudes, behaviours and norms, which will help Member States to make progress towards the achievement of Sustainable Development Goals 4 and 13;
 - (b) Improve knowledge-sharing among countries and other non-governmental sectoral partners within the scope of existing transboundary cooperation frameworks by promoting the uptake and use of knowledge products, such as scenarios, spatial plans, trade-off analyses and ecosystem-based sectoral monitoring systems, disseminating publications and conducting normative work, which will help Member States to make progress towards targets under Goals 2, 6, 14 and 15;
 - (c) Raise awareness on how to take into consideration nature and the ecosystem approach in public and private economic decision-making, helping Member States to mainstream nature effectively into all key sectors, using a well-coordinated, whole-of-government approach that balances the demands of different sectors, and thus to make progress towards the achievement of Goals 12, 15 and 17;
 - (d) Provide technical advice, policy support and capacity-building to Member States on sustainable approaches to natural resource management and improve understanding of biodiversity and health linkages among different sectors.
- 14.41 The above-mentioned work is expected to result in:
- (a) More coherent and cross-sectoral participation and cooperation among countries worldwide, including at the transboundary level, for the management and effective monitoring of nature;
 - (b) Youth-led actions that address the indirect drivers of biodiversity loss and the degradation of nature;
 - (c) Creation of an enabling environment for embedding nature considerations into the financial and economic decision-making of public and private sector entities at multiple levels (global, regional, subregional and national);
 - (d) Development of updated national plans for natural capital accounting by Member States;
 - (e) Enhanced capacity of Member States to manage and reduce risks to both human and ecosystem health and to integrate nature into national and international public health decision-making through science-based approaches.

Programme performance in 2021

Ratification and implementation of the Nagoya Protocol in countries of the Pacific Region

- 14.42 The Nagoya Protocol on Access to Genetic Resources and the Fair and Equitable Sharing of Benefits Arising from their Utilization to the Convention on Biological Diversity is an international agreement aimed at sharing the benefits arising from the utilization of genetic resources in a fair and equitable way. Through the subprogramme's support, four countries in the Pacific ratified the Nagoya Protocol during the period 2018–2020. In 2021, the subprogramme supported Kiribati to join the Protocol and Papua New Guinea to finalize its instrument of accession and submit it to an internal country coordinating committee for clearance. In addition, the subprogramme supported seven countries in making significant progress in the development of policies relating to access and benefit-sharing.
- 14.43 Progress towards the objective is presented in the performance measure below (see table 14.8).

Table 14.8

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
Palau and Tuvalu ratified the Nagoya Protocol	Tonga and Solomon Islands ratified the Nagoya Protocol	Kiribati ratified the Nagoya Protocol Palau, the Cook Islands, Fiji, the Federated States of Micronesia, Samoa, the Marshall Islands, Tuvalu and Tonga made significant progress towards the development of policies relating to access and benefit-sharing

Planned results for 2023

Result 1: Global Peatlands Initiative for the restoration, conservation and sustainable management of peatlands

Programme performance in 2021 and target for 2023

- 14.44 The subprogramme's work contributed to the strengthening of the capacities of countries to sustainably manage peatland ecosystems, including through four important launches at the twenty-sixth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, which did not meet the planned target of countries and Global Peatlands Initiative partners endorsing the global peatlands assessment and initiating the development of a global peatlands inventory. The target was not met owing to travel restrictions and the inability to collect data owing to the COVID-19 pandemic.
- 14.45 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 14.9).

Table 14.9
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Member States adopt United Nations Environment Assembly resolution 4/16 on the conservation and sustainable management of peatlands	An active Canadian peatlands research network is established for engagement in the development of a baseline picture of the state of global peatlands	Four official launches: the Global Peatlands Pavilion, the global peatlands assessment process and the global peatlands map as the base map, and the peatlands economics paper to fill the knowledge gap	Countries and Global Peatlands Initiative partners endorse the global peatlands assessment and initiate the development of a global peatlands inventory	A global peatlands knowledge-sharing platform is established with policy-relevant knowledge for use by Member States

Result 2: lowering the risk of future pandemics and health crises by strengthening environmental considerations of human and animal health

Programme performance in 2021 and target for 2023

- 14.46 The subprogramme’s work contributed to the secretariat of the Convention on Biological Diversity, UNDP, the World Health Organization (WHO), the Government of Germany, the World Organization for Animal Health, the International Union for Conservation of Nature and EcoHealth Alliance committing to incorporating environmental considerations into the One Health approach, taking into consideration that the conception of the One Health approach needs further discussion. This exceeded the planned target of two additional subnational, national and international entities.
- 14.47 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 14.III).

Figure 14.III

Performance measure: number of subnational, national and international entities that committed to incorporating environmental considerations into the One Health approach (cumulative)

Result 3: enhanced conservation and restoration efforts of critical marine habitats

Proposed programme plan for 2023

14.48 Critical marine and coastal habitats such as coral reefs, seagrass and mangroves are in decline around the world, despite providing valuable ecosystem goods and services to coastal communities locally and greenhouse gas sequestration and climate change mitigation services globally. To reverse that negative trend, the subprogramme, in collaboration with the International Coral Reef Initiative, rolled out a small grants programme dedicated specifically to the conservation and restoration of threatened and critical coastal habitats. The subprogramme supported government agencies and non-governmental organizations in developing innovative and sustainable approaches to coastal ecosystem conservation and restoration, with a special focus on marine protected areas, locally managed marine areas and other effective area-based conservation measures.

Lessons learned and planned change

14.49 The lesson for the subprogramme was that localized support offered by the subprogramme in the areas of marine and coastal ecosystems management, which is also aimed at addressing climate change challenges, could help to institutionalize community-based, inclusive and bottom-up ecosystem restoration and conservation approaches and supplement co-management approaches with national or local governments to enable positive and sustainable social and ecological outcomes in coastal areas. In applying the lesson, the subprogramme will scale up localized support through the incorporation of marine and coastal ecosystems into the national determined contributions under the United Nations Framework Convention on Climate Change, the development of national and regional marine biodiversity action programmes and the assessment and valuation of ecosystems goods and services to be used for national development programmes. The subprogramme will work in tandem with national and local governments and coastal communities to implement the Programme's best practice guidelines in areas for the sustainable management of marine and coastal ecosystems.

14.50 Expected progress towards the objective is presented in the performance measure below (see figure 14.IV).

Figure 14.IV

Performance measure: number of countries that enhanced restoration and conservation of critical coastal ecosystems (cumulative)

Deliverables

14.51 Table 14.10 lists all deliverables of the subprogramme.

Table 14.10

Subprogramme 3: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	4	4	5	4
1. Meetings of the governing bodies for multilateral environmental agreements	4	4	5	4
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	2	2	2
2. On ecosystem services	2	2	2	2
Seminars, workshops and training events (number of days)	6	7	6	6
3. Seminars and training events on ecosystems management	6	7	6	6
Publications (number of publications)	10	10	11	10
4. On mainstreaming biodiversity in production sectors	2	2	2	2
5. On the knowledge, networks and funding available to influence public and private financial flows for ecosystem-based approach and nature-based solutions	2	2	3	2
6. On marine and terrestrial ecosystems	4	4	4	4
7. On biodiversity and wildlife	2	2	2	2
Technical materials (number of materials)	3	5	3	4
8. On integrated ecosystem management (tools and methodologies)	2	3	2	2
9. On investing in nature (assessments, tools and methodologies)	1	2	1	2
C. Substantive deliverables				
Consultation, advice and advocacy: consultations with the open-ended working group on the post-2021 global biodiversity framework, supporting 193 Member States in the development of the post-2021 global biodiversity framework.				
D. Communication deliverables				
Outreach programmes, special events and information materials: outreach campaigns on an ecosystem-based approach and sustainable management and use of natural resources and on the United Nations Decade on Ecosystem Restoration, intended for Member States, private companies, civil society organizations and the public.				

Subprogramme 4 Environmental governance

Objective

- 14.52 The objective, to which this subprogramme contributes, is to ensure that countries achieve environmental policy coherence and abide by strong legal and institutional frameworks that increasingly implement environmental goals in the context of sustainable development at the global, regional and national levels.

Strategy

- 14.53 To contribute to the objective, the subprogramme will:
- (a) Continue to facilitate relevant meetings and intergovernmental processes at the global, regional and national levels involving Governments, other United Nations entities, inter-agency mechanisms and regional ministerial forums through the provision of information management products, technical support and advisory services on environmental law and policy;

- (b) Support the coherent implementation of the multilateral environmental agreements operating in similar clusters by increasing the effectiveness of national efforts to achieve global environmental targets and supporting parties in national reporting to related conventions, including to ease the national reporting load by promoting effective knowledge management across ministries and administrative units;
- (c) Promote the uptake of environmentally sound practices across the United Nations system through the provision of policy advice;
- (d) Develop and disseminate innovative knowledge management tools and initiatives such as the United Nations Information Portal on Multilateral Environmental Agreements and the Programme for the Development and Periodic Review of Environmental Law (Montevideo Programme), supported by training, technical assistance and communication activities, including from a gender-sensitive perspective and in the context of COVID-19, helping Member States to make progress towards the achievement of Sustainable Development Goals 1, 5 and 16;
- (e) Cooperate with United Nations country teams to mainstream lessons learned through the implementation of programmes and replicate and scale up interventions, helping Member States to make progress towards the achievement of Goal 17.

14.54 The above-mentioned work is expected to result in:

- (a) Member States becoming increasingly efficient in environmental policymaking processes leading to coherent and science-based policies, including through their concerted action on international environmental issues as highlighted in resolutions of the United Nations Environment Assembly, similar intergovernmental processes and/or the implementation of decisions of the governing bodies of multilateral environmental agreements;
- (b) Improved governance and partnerships with major groups and stakeholders in the development of synergistic national programmes, as well as increased integration of the environment into national and subnational planning and budgeting processes on sustainable development;
- (c) The increased capacity of Member States to develop new policies for addressing negative environmental impacts associated with the COVID-19 pandemic.

Programme performance in 2021

Enhanced capacity of Member States to protect elephants amidst the COVID-19 pandemic

14.55 COVID-19-related restrictions have led to adverse economic implications for the livelihoods of vulnerable segments of the population and have resulted in increased ivory poaching. In addition, there is greater risk of human-elephant conflict, as elephants started to roam further following the restrictions in human movement. The subprogramme collaborated with the African Elephant Fund Steering Committee to implement projects addressing elephant conservation challenges in Chad, Ghana, Kenya, Malawi and the Niger, which contributed to increased capacity of local authorities and communities to mitigate the social and environmental impact arising from COVID-19-related restrictions.

14.56 Progress towards the objective is presented in the performance measure below (see figure 14.V).

Figure 14.V

Performance measure: countries with increased capacity to mitigate the negative impacts of COVID-19 on elephant conservation (cumulative)

Planned results for 2023

Result 1: leaving no one behind: more countries engage in financial shifts to deliver on the poverty-environment nexus

Programme performance in 2021 and target for 2023

- 14.57 The subprogramme’s work contributed to four countries (Bangladesh, Indonesia, the Lao People’s Democratic Republic and Malawi) integrating environmental goals into national development plans, which exceeded the planned target of two countries mainstreaming poverty and environmental sustainability in their national policies, plans, regulations or budgets while shifting public and private finance investment options towards poverty eradication and environmental sustainability.
- 14.58 Progress towards the objective and the target for 2023 are presented in the performance measure below (see table 14.11).

Table 14.11
Performance measure

2019 (actual)	2020 (actual)	2021 (actual)	2022 (planned)	2023 (planned)
Countries adopt United Nations Environment Assembly resolution 4/18 on the poverty-environment nexus, which emphasizes the need for countries to shift public and private finance investment options towards poverty eradication and environmental sustainability	Two countries mainstream poverty and environmental sustainability in their national policies, plans, regulations or budgets while shifting public and private finance investment options towards poverty eradication and environmental sustainability	Four countries mainstream poverty and environmental sustainability in their national policies, plans, regulations or budgets while shifting public and private finance investment options towards poverty eradication and environmental sustainability	Six additional countries mainstream poverty and environmental sustainability in their national policies, plans, regulations or budgets while shifting public and private finance investment options towards poverty eradication and environmental sustainability	Two additional countries mainstream poverty and environmental sustainability in their national policies, plans, regulations or budgets while shifting public and private finance investment options towards poverty eradication and environmental sustainability

Result 2: improved coherence of environmental policies by building environmental law capacity

Programme performance in 2021 and target for 2023

- 14.59 The subprogramme’s work contributed to 860 digital resources on environmental law being accessed by Member States, which exceeded the planned target of 850 digital resources.
- 14.60 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 14.VI).

Figure 14.VI
Performance measure: access of Member States to digital resources on environmental law (cumulative)
 (Number of digital resources)

Result 3: strengthened capacity to disrupt illegal waste trafficking in the Asia-Pacific region

Proposed programme plan for 2023

- 14.61 Since 2018, transboundary flows of waste trade have evolved and waste trafficking has become a serious concern for many countries in the Asia-Pacific region. Illegal waste trafficking trends have been aggravated as a result of the COVID-19 pandemic’s increased plastic and hazardous medical waste, the closure of recycling facilities and the reduction in enforcement capabilities. The subprogramme has supported countries in the Asia-Pacific region to face those challenges by strengthening international operational networking between the European Union and the Asia-Pacific region on the impacts of transboundary waste shipment policies and forensic data analysis for waste trafficking and on the implementation of stakeholder capacity-building activities and support for operational networking among practitioners in Europe and with their counterparts in the Asia-Pacific region.

Lessons learned and planned change

- 14.62 The lesson for the subprogramme was that there is an increased need to strengthen its support on environmental law capacity to meet the requirements of requesting Member States, strengthen policy coherence and global cooperation and increase access to global legislation related to climate change, including both overarching climate change laws and sectoral legislation. In applying the lesson, the subprogramme will build capacity in supporting global policy and environmental law coherence, especially in the field of international trafficking of illegal waste. The multidisciplinary training sessions will include the development of digital resources and coherence platforms to advance the

environmental rule of law at cross-cutting levels, such as the law and environment assistance platform¹ and the data reporting tool.

14.63 Expected progress towards the objective is presented in the performance measure below (see figure 14.VII).

Figure 14.VII

Performance measure: number of Member State representatives in the Asia-Pacific region with enhanced capacities to address international trafficking of illegal waste (cumulative)

Deliverables

14.64 Table 14.12 lists all deliverables of the subprogramme.

Table 14.12

Subprogramme 4: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
A. Facilitation of the intergovernmental process and expert bodies				
Conference and secretariat services for meetings (number of three-hour meetings)	27	33	30	40
1. Meetings of the Committee of Permanent Representatives on environmental law and governance	27	33	30	40
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	4	20	8	10
2. On environmental law development and support to mainstream environmental issues, the implementation of multilateral environmental agreements and the poverty-environment linkages	4	20	8	10

3. Train-the-trainer events on environmental governance	15	20	15	30
Publications (number of publications)	8	8	8	10
4. On environmental law (global)	8	8	8	10
C. Substantive deliverables				
Consultation, advice and advocacy: advice to approximately 15 Member States, upon request, on the monitoring and implementation of multilateral environmental agreements, legislative strategies and frameworks to counter environmental degradation resulting from climate change and environmental crime.				

¹ Examples of such tools include the law and environment assistance platform and the United Nations Information Portal on Multilateral Environmental Agreements (www.informea.org/en).

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

Databases and substantive digital materials: the United Nations Information Portal on Multilateral Environmental Agreements, which provides access to nearly 500 treaties, over 12,000 decisions made by governing bodies, over 9,000 national plans and reports, and a large body of laws, court decisions and other documents and literature, for over 150,000 users; and the e-learning platform of the portal, for over 20,000 users from 190 countries.

Subprogramme 5 Chemicals and pollution action

Objective

- 14.65 The objective, to which this subprogramme contributes, is to advance the sound management of chemicals and waste and improve air quality at all levels in order to achieve a healthier environment and better health for all.

Strategy

- 14.66 To contribute to the objective, the subprogramme will:
- (a) Provide technical advice, policy support and capacity-building to Member States, the private sector and civil society, within the framework of relevant multilateral environmental agreements and the broader international chemicals and waste agenda, by enabling the development and implementation of policies, strategies, legislation and action plans on sound chemicals and waste management, including, but not limited to, mercury, persistent organic pollutants, ozone-depleting substances and lead, as well as on waste prevention and the sound management of electronic and other forms of waste. This work will be carried out at the global, regional, subregional, national and subnational levels;
 - (b) Provide technical and advisory support to Member States regarding the identification of national emissions sources; the building of institutional capacity for the development and use of air quality assessments with publicly accessible monitoring data and information; and the development of policies, standards and legal, regulatory, fiscal or institutional frameworks and mechanisms for the reduction of air pollutants;
 - (c) Continue to support awareness-raising efforts on the importance of air quality, in particular through the BreatheLife campaign, which encourages Governments to work for cleaner air by raising awareness and implementing new solutions;
 - (d) Strengthen the capacities of Member States, in the context of the COVID-19 pandemic, to improve waste management systems and soundly manage medical and household waste, while also enhancing understanding of the global impact of the COVID-19 pandemic on pollution, including marine litter;
 - (e) In doing so, the subprogramme will help Member States to make progress towards the achievement of targets under Sustainable Development Goals 3, 6, 7, 11, 12 and 14.
- 14.67 The above-mentioned work is expected to result in:
- (a) An increased number of Member States adopting and implementing policies and legal, institutional or fiscal strategies and mechanisms for the sound management of chemicals and waste, as well as enhanced non-governmental action and involvement by industry and civil society organizations to advance the broader international chemicals and waste agenda;

- (b) An improved ability of Member States to identify national emissions sources, develop and adopt air quality policies, deploy good practices or technologies and consider alternatives, including low-emission transport solutions, such as walking, cycling and electric mobility;
- (c) The increased capacity of Member States to communicate effectively about air quality and to make air quality data and other relevant information publicly available;
- (d) The enhanced capacity of Member States to deal with the surge in waste related to the COVID-19 pandemic in an environmentally sound manner and an improved understanding of the global impact of the pandemic on pollution.

Programme performance in 2021

Strengthened monitoring of national air quality

14.68 WHO estimates that 9 out of 10 people worldwide breathe polluted air, which increases the risk of respiratory infections, heart disease and lung cancer, and around 7 million people die every year as a result of exposure to polluted air. In that context, UNEP highlighted that while ambient air quality standards are embedded in most national legislations, there is a need, in many cases, for strengthened monitoring to ensure their effective implementation. To address that need, the subprogramme supported 61 countries and 28 cities in identifying and monitoring air pollution sources and developing plans and road maps to reduce the pollutants, while raising awareness about the importance of clean air for all, within WHO air quality guideline values. The subprogramme also teamed up with a Swiss air quality technology company (IQAir) to build the world’s largest air quality data platform, providing real-time data on global air quality and pollution hotspots. That work contributed to strengthened national legislation implementation capacity as well as increased awareness on the importance of air quality and its monitoring.

14.69 Progress towards the objective is presented in the performance measure below (see figure 14.VIII).

Figure 14.VIII

Performance measure: number of countries that have air quality monitoring stations (cumulative)

Planned results for 2023

Result 1: stepping up worldwide efforts to advance the sound management of waste

Programme performance in 2021 and target for 2023

14.70 The subprogramme’s work contributed to 36 countries implementing policies on the prevention and sound management of waste, which exceeded the planned target of 27 countries.

14.71 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 14.IX).

Figure 14.IX

Performance measure: number of countries implementing policies on the prevention and sound management of waste (cumulative)

Result 2: strengthened waste and wastewater management systems to prevent and minimize waste and pollution associated with COVID-19

Programme performance in 2021 and target for 2023

- 14.72 The subprogramme’s work contributed to four countries strengthening their medical and household waste and wastewater management systems, which did not meet the planned target of five countries. While the subprogramme supported informed decision-making as part of the UNEP rapid response to the COVID-19 pandemic, the target was not met mainly owing to operational challenges posed by the pandemic and measures enacted to limit its spread.
- 14.73 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 14.X).

Figure 14.X

Performance measure: number of countries that strengthened their medical and household waste and wastewater management systems (cumulative)

Result 3: Reduced release of pollutants to the environment

Proposed programme plan for 2023

- 14.74 Pollution is currently one of the main challenges to human health and sustainable development. In that context, UNEP has identified preventing, reducing and ceasing the release of pollutants as a critical success factor. The subprogramme assisted in the development and implementation of policies and regulatory, financial and technical measures on sound management of chemicals and waste and on the reduction of air pollution and land-based pollution sources, including plastics. As a result, the use of leaded petrol in ground transport worldwide was banned in September 2021 after almost 20 years of campaigning by the UNEP-led Global Partnership for Clean Fuels and Vehicles.

Lessons learned and planned change

- 14.75 The lesson for the subprogramme was the need for UNEP and its stakeholders to scale up their ambitions to quantify the impact of those interventions in the form of measurable reductions in pollutants emitted and/or released. In applying the lesson, the subprogramme will assume leadership in pollution prevention, pollutant reduction and quantification of the impact of interventions through the promotion of the life cycle approach to production and consumption throughout the value chains, targeting high-impact sectors and commodities such as mercury and plastic.
- 14.76 Expected progress towards the objective is presented in the performance measure below (see figure 14.XI).

Figure 14.XI

Performance measure: reduction in releases of pollutants to the environment (cumulative)

(Metric tons of persistent organic pollutants and mercury)

Deliverables

- 14.77 Table 14.13 lists all deliverables of the subprogramme.

Table 14.13

Subprogramme 5: deliverables for the period 2021–2023, by category and subcategory

Category and subcategory	2021 planned	2021 actual	2022 planned	2023 planned
B. Generation and transfer of knowledge

Subprogramme 6 Finance and economic transformations

Objective

- 14.78 The objective, to which this subprogramme contributes, is to advance the transition by countries and businesses to sustainable development through multiple pathways, including the uptake of green economy in the context of sustainable development and poverty eradication, the adoption of sustainable consumption and production patterns and the decoupling of economic activity from unsustainable resource use and environmental impact, while improving human well-being.

Strategy

- 14.79 To contribute to the objective, the subprogramme will:
- (a) Continue to deliver country assessments, promote the uptake of policy planning and implementation tools and convene knowledge platforms that will enable policymakers and businesses to actively pursue sustainable pathways;
 - (b) Generate and disseminate knowledge through its extensive network of partners in the public and private sectors, including the financial sector, as well as civil society and academia;
 - (c) Promote sustainable patterns of consumption and production with the aim of reducing climate impacts, biodiversity loss and pollution through policy recommendations on the green economy in the context of sustainable development and poverty eradication, on sustainable finance and on business practices and tools and knowledge that allow consumers to make informed choices, while considering issues related to generational and gender equality;
 - (d) Catalyse the alignment of finance and investment with sustainability objectives and policy priorities by developing or contributing to the norms for sustainable finance, providing the basis for standard-setting and promoting the role of private sustainable finance in complementing public finance;
 - (e) Support Governments and subnational governments in strengthening institutional capacities and implementing national development plans, policies and/or action plans; and support businesses adopting and implementing sustainable management and cleaner production practices, across value chains, helping Member States to make progress towards the achievement of targets under Sustainable Development Goals 1, 4, 5, 7, 8, 9, 11, 12, 13 and 17;
 - (f) Develop policy recommendations on COVID-19 pandemic recovery and strengthen the capacities of State and non-State partners to integrate environmental sustainability and

sustainable patterns of consumption and production into their decision-making approaches, including on sustainable finance, trade and infrastructure.

- 14.80 The above-mentioned work is expected to result in:
- (a) Integrated sustainable development pathways, including sustainable consumption and production, and the development and implementation of policies and frameworks on inclusive green economy in the context of sustainable development and poverty eradication, resulting in improved resource efficiency and human well-being and reduced ecological and material footprints;
 - (b) Private sector actors, including in the financial sector, improving environmental sustainability in their core business practices and across their value chains, including through sustainable investment and resource extraction, transformation and use, to create sustainable and more inclusive markets and economies;
 - (c) Public, private and individual consumers having access to, and increasingly consuming and demanding, sustainable goods and services through demand and behaviour.

Programme performance in 2021

Progress towards the reduction of food waste through strengthened measurement at the national level

14.81 Food waste burdens waste management systems and exacerbates food insecurity, making it a major contributor to the three planetary crises of climate change, nature and biodiversity loss, and pollution and waste. Food waste from households, retail establishments and the food service industry totals 931 million tons each year, with a global average of 74 kg per capita of food wasted each year. Measurement in line with internationally agreed methodologies is the first step towards the reduction and prevention of food waste. The subprogramme provided technical and policy guidance and methodologies to public and private stakeholders for the measurement, prevention and reduction of food waste and the development of sustainable diet strategies and activities, thereby enabling country reporting towards the achievement of Sustainable Development Goal target 12.3. That support led to an increased number of countries measuring and reporting their national food waste statistics and strategies at the household, retail and consumer levels as documented in the *Food Waste Index Report 2021*.

14.82 Progress towards the objective is presented in the performance measure below (see figure 14.XII).

Figure 14.XII

Performance measure: number of countries that measure food waste at the national level using internationally agreed methodologies (cumulative)

Planned results for 2023

Result 1: accelerating progress towards sustainable consumption and production

Programme performance in 2021 and target for 2023

- 14.83 The subprogramme's work contributed to 38 countries adopting and implementing sustainable consumption and production frameworks, policies and action plans in 2021, which met the planned target.
- 14.84 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 14.XIII).

Figure 14.XIII

Performance measure: number of countries adopting and implementing sustainable consumption and production frameworks, policies and action plans (cumulative)

Result 2: making finance and economies more inclusive, sustainable and resilient

Programme performance in 2021 and target for 2023

- 14.85 The subprogramme's work contributed to 45 outcome-level sustainable consumption and production activities reported by countries in reporting on Sustainable Development Goal 12 in their voluntary national reports, which met the planned target.
- 14.86 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 14.XIV).

Figure 14.XIV

Performance measure: number of outcome-level sustainable consumption and production activities reported by countries in reporting on Sustainable Development Goal 12 in their voluntary national reports (annual)

Result 3: enabling policies to advance environmental sustainability

Proposed programme plan for 2023

14.87 In order to meet the 2030 Agenda objectives, it is necessary to manage resources more responsibly while also addressing sustainability, poverty, equity, employment, economic growth, security and health objectives. The subprogramme contributed to a finance and economic transformation by supporting the development of enabling policies and the adoption of environmentally sustainable business practices, demand and behaviour. Furthermore, building on the decades-long normative work by UNEP on sustainable finance, life cycle thinking, inclusive green economy in the context of sustainable development and poverty eradication, sustainable trade and infrastructure, the subprogramme leveraged the United Nations reform and its partnerships in support of environmental sustainability and an environmentally, socially and economically sustainable post-COVID-19 recovery.

Lessons learned and planned change

14.88 The lesson for the subprogramme was the need to address a heightened demand for specific industry-related policy formulation and implementation support for transitioning from unsustainable consumption and production patterns to sustainable alternatives. In applying the lesson, the subprogramme will work to address climate, nature and pollution by undertaking capacity-building activities for the formulation and implementation of policies that respond to national priorities. Furthermore, the subprogramme will focus on enhancing sectoral partnerships and access to technologies, working with public and private stakeholders to promote sustainable value chains and resource efficiency and sustainability in key sectors.

14.89 Expected progress towards the objective is presented in the performance measure below (see figure 14.XV).

Figure 14.XV

Performance measure: number of economic, finance, industry and trade policies adopted by Member States to enable sustainable transitions (cumulative)

Deliverables

14.90 Table 14.14 lists all deliverables of the subprogramme.

Table 14.14

Subprogramme 6: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
B. Generation and transfer of knowledge

2. On sustainable consumption and production	12	12	–	–
3. On finance and economic transformations	–	–	20	20
Seminars, workshops and training events (number of days)	15	15	15	15
4. Seminars and training events on resource efficiency	15	15	–	–
5. Seminars and training events on finance and economic transformation approaches	–	–	15	15
Publications (number of publications)	5	5	3	3
6. On resource efficiency, the green economy in the context of sustainable development and poverty eradication, and sustainable consumption and production	5	5	–	–
7. On finance and economic transformation approaches	–	–	3	3
Technical materials (number of materials)	10	10	10	10
8. On the green economy in the context of sustainable development and poverty eradication (assessments, tools and methodologies)	5	5	–	–
9. On sustainable consumption and production (assessments, tools and methodologies)	5	5	–	–
10. On finance and economic transformations approaches	–	–	10	10
C. Substantive deliverables				
Consultation, advice and advocacy: advice on sustainable lifestyles, resource efficiency, the green economy in the context of sustainable development and poverty eradication, sustainable consumption and production, and finance and economic transformations; meetings of the International Resource Panel, enabling the participation of steering committee members from 20 Member States; and meetings of the 10-Year Framework of Programmes on Sustainable Consumption and Production Patterns/One Planet network.				
Databases and substantive digital materials: global material flows database, life cycle database, sustainable consumption and production clearing-house database and Green Growth Knowledge Platform.				
D. Communication deliverables				
Outreach programmes, special events and information materials: on the One Planet network, sustainable lifestyles, the green economy in the context of sustainable development and poverty eradication.				

Subprogramme 7

Science policy

Objective

- 14.91 The objective, to which this subprogramme contributes, is to strengthen the capacity of Governments and non-government actors to access, generate and use quality environmental data and analysis and to sustain a strengthened science-policy interface that generates evidence-based environmental assessments, identifies emerging environmental issues and fosters relevant policy action at the global, regional and national levels, including for the achievement of the environment-related Sustainable Development Goals.

Strategy

- 14.92 To contribute to the objective, the subprogramme will:
- (a) Continue reviewing the world environmental situation and strengthen the interface between science and policymaking across the sustainable development agenda, including through collaboration with the Statistical Commission and the five regional commissions;
 - (b) Deliver scientifically credible and unbiased data, information and knowledge and provide policy-relevant analysis and policy recommendations to catalyse and accelerate solutions and actions for the environment, based on a continuous review of the global status and trends;
 - (c) Aim to be a catalyst of systemic and transformative shifts that can drive progress towards the aspirations of achieving the 2030 Agenda, through gender-sensitive partnerships across all geographical areas, involving Governments and non-governmental organizations, the business and scientific communities, and citizens;
 - (d) Pursue broad stakeholder engagement as a critical step in enhancing societal understanding, acceptance and uptake of its scientific analysis and serve as a knowledge broker that builds consensus on existing and emerging environmental issues through platforms and networks, such as the Science-Policy-Business Forum on the Environment, the International Resource Panel, the World Adaption Science Programme and the One Planet network;
 - (e) Continue to provide analytical research, increase awareness on the environmental dimension of sustainable development and build capacity to measure, monitor and report on the environmental dimension of the Sustainable Development Goals, helping Member States to integrate common methods for tracking and measuring the environment-related Goals, including in their national processes, in particular, Goals 6, 12, 13, 14, 15 and 17.
- 14.93 The above-mentioned work is expected to result in:
- (a) The increased availability of scientific environmental data to Member States and other stakeholders, provided by the World Environment Situation Room;
 - (b) A more coherent approach to harmonizing country data, tracking progress and science-based environmental policymaking within and among countries;
 - (c) The increased capacity of Member States to measure progress towards and to implement the Sustainable Development Goals and to increase policy coherence for the integration of national sustainable development plans and other internationally agreed environmental goals.

Programme performance in 2021

Increased capacity to mitigate future zoonotic pandemics

- 14.94 The effects caused by COVID-19 underscored the importance of measures to minimize the chances of another zoonotic pandemic. In that context, providing relevant information to policymakers on how to prevent the next pandemic has emerged as a critical need. The subprogramme published the *Frontiers Report*, which increased the level of awareness of the COVID-19 crisis, evidenced by some chapters of the report being used in several meetings across the regions. As illustrated by South Africa, the report has resulted in the publication of further scientific research and policy recommendations.² According to the Organisation for Economic Co-operation and Development, some countries are introducing regulatory measures that promote the conservation, sustainable use and restoration of biodiversity in response to COVID-19. Through knowledge exchange, the subprogramme's work has increased the capacity of countries to prevent and respond to zoonotic disease outbreaks and pandemics.

² See commentary in *South African Journal of Science*, vol. 116, No. 7/8, 2020.

14.95 Progress towards the objective is presented in the performance measure below (see figure 14.XVI).

Figure 14.XVI
Performance measure: number of countries enacting regulatory measures to prevent and respond to zoonotic disease outbreaks (cumulative)

Planned results for 2023

Result 1: towards more ambitious climate action through science-based decision-making

Programme performance in 2021

14.96 The subprogramme’s work contributed to 24 Member States engaging in the development of the *Emissions Gap Report* through the country data-vetting process, which exceeded the planned target of 18 Member States.

14.97 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 14.XVII).

Figure 14.XVII
Performance measure: number of countries engaged in the development of the *Emissions Gap Report* through the country data-vetting process (cumulative)

Result 2: scientific knowledge harnessed to address interlinked environmental challenges and their impact on socioeconomic well-being

Programme performance in 2021 and target for 2023

14.98 The subprogramme’s work contributed to 24 decisions in the United Nations Environment Assembly that were influenced by science-based policymaking, which met the planned target.

14.99 Progress towards the objective and the target for 2023 are presented in the performance measure below (see figure 14.XVIII).

Figure 14.XVIII
Performance measure: number of decisions in the United Nations Environment Assembly influenced by science-based policymaking (cumulative)

Result 3: increased use of environmental data and statistics for policy formulation

Proposed programme plan for 2023

14.100 There is a gap on the use of environmental data and statistics to inform government policy and decision-making. Specifically, the use of disaggregated data to fine-tune policy responses according to local contexts and the needs of specific ecosystems remains a challenge. Strengthening environmental data capacities and availability of science-based standards is needed for policymakers to improve their understanding of the environmental priority actions required to reach sustainable development. The subprogramme supported Member States, the private sector, citizens and civil society in their efforts to improve smart environmental data generation, monitoring and analysis through the World Environment Situation Room. These data underpin the common country analysis by the United Nations country team and the United Nations Sustainable Development Cooperation Framework. Furthermore, the subprogramme engaged with United Nations country teams and United Nations resident coordinators in at least 15 pilot countries and provided outreach to 20 additional countries to enhance the World Environment Situation Room platform.

Lessons learned and planned change

14.101 The lesson for the subprogramme was the opportunity to leverage the World Environment Situation Room in measuring the pace and scale of the policy transformations required to address the three dimensions of sustainable development. In applying the lesson, the subprogramme will support member countries in using assessments and data collected in the process of the World Environment Situation Room, the common country analysis and the European Commission country fiches to build as much as possible on existing credible data on climate change, biodiversity loss and pollution and, in turn, ease the burden of country reporting on progress. Expected progress towards the objective is presented in the performance measure below (see figure 14.XIX).

Figure 14.XIX
Performance measure: number of countries using data and statistics on environmental trends and assessments for policy formulation (cumulative)

Deliverables

14.102 Table 14.15 lists all deliverables of the subprogramme.

Table 14.15

Subprogramme 7: deliverables for the period 2021–2023, by category and subcategory

<i>Category and subcategory</i>	<i>2021 planned</i>	<i>2021 actual</i>	<i>2022 planned</i>	<i>2023 planned</i>
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	9	9	9	9
1. On keeping the environment under review	6	6	6	6
2. On supporting the implementation of the Sustainable Development Goals	3	3	3	3
Seminars, workshops and training events (number of days)	–	–	2	3
3. Seminar on keeping the environment under review	–	–	2	3
Publications (number of publications)	1	2	2	3
4. On keeping the environment under review (global)	1	2	2	3
Technical materials (number of materials)	3	3	3	3
5. On early warning and assessments	3	3	3	3
C. Substantive deliverables				
Consultation, advice and advocacy: consultation with some 25 Member States and other entities and stakeholders on methodology development and capacity development in the area of data collection methodologies relating to the Sustainable Development Goals; advice to at least 20 Member States and stakeholders on strengthening the science-policy interface; and advice to at least 25 Member States and stakeholders on implementing national environmental information systems.				
D. Communication deliverables				
Digital platforms and multimedia content: web pages, multimedia material and audio, video and social media content on the scientific work of UNEP utilized by Member States, stakeholders and the public on open data platforms.				

Annex

Programme performance in 2021

Subprogramme 2 Resilience to disasters and conflicts

- A.1 Programme performance in 2021 includes programme performance presented under result 1, as well as result 2, that emerged during 2021.

Result 1: enhanced United Nations action on disaster-related environmental crises

- A.2 The subprogramme’s work contributed to nine ongoing projects to meet requests for environmental risk reduction, response and recovery support made by Member States through the United Nations resident coordinators, special missions and country offices, which exceeded the planned target of eight projects.
- A.3 The performance measure is presented below (see figure below).

Performance measure: number of ongoing projects meeting requests for environmental risk reduction, response and recovery support made by Member States through United Nations resident coordinators, special missions and country offices (annual)

Result 2: global response to reduce the environmental impacts of the COVID-19 pandemic

- A.4 Following the COVID-19 pandemic, face masks became ubiquitous around the world, with more than a billion masks disposed of daily, contributing to an environmental scar in the years to come. The subprogramme advised Member States on recovery measures with minimal social, economic and environmental damage, while incorporating environmental dimensions into their COVID-19 response efforts. Furthermore, the subprogramme assisted low- and middle-income countries with practical advice and solutions tailored to existing capacities and infrastructure in affected States. That included three dedicated rapid country assessments, for Afghanistan, South Africa and the Sudan, and one global assessment. The subprogramme also provided remote tailored technical assistance for effective medical waste management, for the conduct of rapid environmental needs/risks assessments and for the mitigation of adverse environmental impacts and enhancement of the sustainability of humanitarian action, in addition to a technical assistance training series consisting of three webinars attended by 603 attendees from 108 countries.
- A.5 The performance measure is presented in the table below.

Performance measure

<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (actual)</i>
–	–	Enhanced understanding and capacity of Member States to incorporate environmental dimensions into COVID-19 response and recovery efforts

Deliverables

A.6 Deliverables of the subprogramme are listed in table 14.1 above.

B. Proposed post and non-post resource requirements for 2023

Overview

14.103 The proposed regular budget resources for 2023, including the breakdown of resource changes, as applicable, are reflected in tables 14.16 to 14.18.

Table 14.16

14.104 Additional details on the distribution of the proposed resources for 2023 are reflected in tables 14.19 to 14.21 and figure 14.XX.

14.105 As reflected in tables 14.19 (1) and 14.20 (1), the overall resources proposed for 2023 amount to \$22,826,800 before recosting, reflecting a net decrease of \$85,600 (or 0.4 per cent) compared with the appropriation for 2022. Resource changes result from two factors, namely: (a) new and expanded mandates; and (b) other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Figure 14.XX
Distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

New and expanded mandate

- 14.106 As reflected in table 14.19 (1), resource changes reflect an increase of \$18,500 in executive direction and management, United Nations Scientific Committee on the Effects of Atomic Radiation, and relate to the increase in the membership of the Scientific Committee from 27 to 31 States, pursuant to General Assembly resolution 76/75. The resource requirements are proposed in line with the report of the Secretary-General on the operational cost implications of increased membership of the United Nations Scientific Committee on the Effects of Atomic Radiation (A/76/279) and the oral statement dated 2 November 2021 by the Secretariat in connection with the draft resolution contained in the document entitled “Effects of atomic radiation” (A/C.4/76/L.5). The requirement consists of other staff costs (\$8,600), travel of representatives (\$2,800), consultants (\$6,700) and supplies and materials (\$400).

Other changes

- 14.107 As reflected in table 14.19 (1), resource changes reflect a net decrease of \$104,100, as follows:
- (a) **Subprogramme 2, Digital transformations in supporting environmental action.** The decrease of \$326,600 under post resources relates to:
 - (i) A decrease of \$268,100 reflecting the proposed reassignment of three Humanitarian Affairs Officers (P-4) as Data Specialists (see annex III). All posts are subject to a 50 per cent vacancy rate in accordance with established practice;
 - (ii) A decrease of \$58,500 reflecting the proposed reassignment of one Coordinator Programme Management (P-3) as Data Analyst and a proposed redeployment (geographical) of the post from Manama to Beirut (see annex III). The post is subject to a 50 per cent vacancy rate in accordance with established practice;
 - (b) **Subprogramme 3, Nature action.** The increase of \$90,500 under post resources reflects the proposed redeployment (geographical) of two posts (one D-1 and one P-4) from Manama to Beirut (see annex III);

- (c) **Subprogramme 4, Environmental governance.** The increase of \$33,000 under post resources reflects the proposed redeployment (geographical) of one P-3 from Manama to Beirut (see annex III);
- (d) **Subprogramme 6, Finance and economic transformations.** The increase of \$33,000 under post resources reflects the proposed redeployment (geographical) of one P-3 from Manama to Beirut (see annex III);
- (e) **Subprogramme 7, Science policy.** The increase of \$66,000 under post resources reflects the proposed redeployment (geographical) of two P-3s from Manama to Beirut (see annex III).

Extrabudgetary resources

- 14.108 As reflected in tables 14.19 (2) and 14.20 (2), UNEP expects to continue to receive both cash and in-kind contributions, which would complement regular budget resources. In 2023, extrabudgetary resources are estimated at \$413,260,000 and would provide for 881 posts, as presented in table 14.20 (2), and non-post resources.
- 14.109 The resources would be used mainly to address key environmental challenges through subprogramme 1, Climate action, subprogramme 3, Nature action, and subprogramme 5, Chemicals and pollution action, in the context of sustainable consumption and production, while at the same time contributing to global COVID-19 recovery. Examples of such projects include, but are not limited to: (a) enhancing climate information and knowledge services for resilience in five island countries of the Pacific Ocean; (b) addressing ecosystem degradation and rapid biodiversity loss to build the resilience of landscapes and seascapes, with ecosystem integrity and conservation being leveraged as assets and tools for disaster risk reduction and greater social resilience; and (c) enhancing capacity and leadership in the sound management of chemicals and waste to optimize human health and environmental outcomes. In addition, under subprogramme 2, Digital transformations in supporting environmental action, technical cooperation projects funded by extrabudgetary resources are anticipated to strengthen the environmental digital literacy and e-governance capacities of diverse stakeholders to engage in the environmental dimensions of digital transformation, with an emphasis on the global South. Under subprogramme 4, Environmental governance, the extrabudgetary resources are planned to be used in various areas including, but not limited to, developing and implementing the environmental rule of law and identifying integrated legal and policy responses that promote participatory and effective environmental decision-making. Under subprogramme 6, Finance and economic transformations, the extrabudgetary resources are planned to be used to promote sustainable patterns of consumption and production by enhancing finance and economic transformation policy approaches, shifting business and investment practices and leveraging public, private and citizen consumer behaviour. Under subprogramme 7, Science policy, the extrabudgetary resources are planned to be used to increase the uptake of science for transformative action; provide authoritative science, delivered with greater coherence and integration; close the gap regarding the availability of environmental data for the achievement of the Sustainable Development Goals; foster synergies among the various multilateral environmental agreements; digitize scientific knowledge and democratize availability while anticipating emerging issues through foresight and horizon scanning; and develop an inclusive science-policy interface that speaks to all, particularly for environmental indicators that remain without internationally established methodologies and standards. The estimates are in line with the priorities and deliverables approved by the United Nations Environment Assembly for the programme of work for the biennium 2022–2023. Extrabudgetary resources represent 94.8 per cent of the total resources for UNEP.
- 14.110 The extrabudgetary resources under this section are subject to the oversight of the United Nations Environment Assembly.

Policymaking organs

14.111 The resources proposed under this component would provide for requirements relating to the annual meeting of the subcommittee of the Committee of Permanent Representatives. The United Nations Environment Assembly, which normally holds a biennial session in odd years, decided to exceptionally reschedule the sixth session of the Assembly from 2023 to 2024 pursuant to its decision 5/4. Therefore, the resources that would have normally been required for 2023 and included within the proposed programme budget for 2023 are not included in the current proposal. The additional resources for the sixth session of the Assembly will be proposed in the context of the proposed programme budget for 2024. Table 14.22 provides information on the standing intergovernmental organs and related resource requirements under the regular budget.

Table 14.22

Policymaking organs

(Thousands of United States dollars)

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2022 appropriation</i>	<i>2023 estimate (before recosting)</i>
United Nations Environment Assembly	The United Nations Environment Assembly is the governing body of UNEP and has the mandate to take strategic decisions, provide political guidance for the work of UNEP and promote a strong science-policy interface. It holds biennial sessions, currently every odd year	Mandate: General Assembly resolutions 67/213 and 67/251 and Governing Council decision 27/2 Membership: 193 government officials Number of sessions in 2023: 0	—	—
Committee of Permanent Representatives	The Committee of Permanent Representatives, as a subsidiary body of the United Nations Environment Assembly, provides policy advice to the Environment Assembly, contributes to the preparation of the agendas for its sessions and the draft decisions it will consider, oversees the implementation of resolutions and the programme of work once they are adopted and prepares the forthcoming programme of work for adoption by it. The Committee holds its regular one-day meetings on a quarterly basis and meets in open-ended form every two years, prior to the Environment Assembly session	Mandate: Governing Council decision 27/2 Membership: 123 government officials Number of sessions in 2023: 4	—	—
Subcommittee of the Committee of Permanent Representatives	The subcommittee meets annually for five days to review the medium-term strategy, programme of work and budget and to prepare the forthcoming programme of work for adoption by the Environment Assembly. In addition, one- or half-day subcommittee meetings are held once or twice a month to consider specific issues in depth, as needed and upon request	Mandate: Governing Council decision 27/2 Membership: 123 government officials Number of sessions in 2023: 1	8.1	8.1
Total			8.1	8.1

14.112 The proposed regular budget resources for 2023 amount to \$8,100 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of proposed resources for 2023 are reflected in table 14.23 and figure 14.XXI.

Table 14.23

(Thousands of United States dollars)

Extrabudgetary resources

14.113 Extrabudgetary resources for the component are estimated at \$2,260,000 and would provide for 12 posts (1 D-1, 1 P-5, 2 P-4, 1 P-3, 1 P-2 and 6 Local level), as well as non-post resources. The resources would be used mainly for activities that strengthen engagement with the governing bodies of UNEP to enhance their visibility, authority and impact on delivery of the organization’s mandate.

Executive direction and management

14.114 The executive direction and management component is composed of the Office of the Executive Director and the United Nations Scientific Committee on the Effects of Atomic Radiation. The proposed regular budget resources for 2023 amount to \$4,129,600 and reflect an increase of \$18,500 in the resource level compared with the appropriation for 2022. The proposed increase is explained in paragraph 14.106. Additional details on the distribution of resources in 2023 are reflected in table 14.24 and figure 14.XXII.

Figure 14.XXII
Executive direction and management: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Office of the Executive Director

14.115 The executive direction and management of UNEP is carried out by the Executive Office, the Governance Affairs Office and an independent Evaluation Office. The Executive Office provides executive and support services to the Executive Director, the Deputy Executive Director and other members of the UNEP senior management team. It provides guidance and policy clearance on all programmatic and administrative matters. The Executive Director, with the support of the Deputy Executive Director, provides the vision and direction for the work of UNEP in accordance with its legislative mandates and has overall responsibility for the management of UNEP resources.

- 14.116 The Executive Office also has overall responsibility for providing leadership and direction for UNEP to provide guidance on environmental issues within the United Nations system. That guidance will consider assessments of the causes and effects of environmental challenges, as well as emerging issues of global and regional significance. The Executive Office will catalyse international action to bring about a coordinated response both within the United Nations system and between the United Nations and its partners. This will be executed through inter-agency mechanisms such as the United Nations Environment Management Group and the United Nations System Chief Executives Board for Coordination and its subsidiary bodies. In addition, UNEP will integrate the priorities of the multilateral environmental agreements into those processes to enable the United Nations system to respond to environmental issues in a coordinated manner.
- 14.117 The Evaluation Office is an independent unit reporting directly to the Executive Director. It is responsible for implementing the evaluation workplan by conducting and managing independent evaluations. It also provides analysis of findings and lessons for management.
- 14.118 The Programme’s transformation process, launched in 2019, increased its internal capacity to deliver more impactful results. Based on this process and on lessons learned, UNEP elaborated a results-oriented and streamlined medium-term strategy for the period 2022–2025 and a programme of work for 2022–2023 that uses data as a critical tool for decision-making. Focusing on indicators that are aligned with organizational objectives, the Sustainable Development Goals and/or internationally agreed environmental indicators to reflect true transformational change, UNEP strives to monitor change over a term longer than a single biennium or the four years of its strategy. This will be done by employing impact metrics with project performance dashboards and cross-project leader boards to gauge effectiveness and assess the level of uptake of its products and services.
- 14.119 With regard to inter-agency mechanisms, UNEP will continue to provide a “clear line of sight” for its delivery of the 2030 Agenda. Working with the wider United Nations is one of the levers of change for better delivery of the Programme’s medium-term strategy for the period 2022–2025 and its programmes. UNEP will continue to enhance its guiding role on the environmental dimension of sustainable development and influence global environmental policymaking under the global intergovernmental processes and deliberations of the General Assembly, the Economic and Social Council, the Human Rights Council and the Security Council. UNEP will pursue the global aspirations of the Sustainable Development Goals while delivering support in response to national needs and realities and taking account of differing regional integration processes, capacities and levels of development.
- 14.120 In 2022, UNEP will continue to support the coherent implementation of the United Nations development system reform at the country, regional and global levels and contribute to: (a) the roll-out of the common approach to integrating biodiversity and nature-based solutions for sustainable development into the United Nations policy and programme planning and delivery that was endorsed by the United Nations System Chief Executives Board for Coordination in 2021; (b) the development of an inter-agency integrated offer of support on the triple planetary crisis for resident coordinators and country teams, under the auspices of the United Nations Sustainable Development Group and co-facilitated with UNDP and the Development Coordination Office; and (c) the United Nations development system response to restore balance with nature, address the climate and pollution emergencies and secure the well-being of people. As the secretariat and Chair of the United Nations Environment Management Group, UNEP will continue to harness the Group’s collective capacity to develop transformational responses for a more sustainable world, including in a post-COVID-19 scenario.
- 14.121 After the establishment of a high-level steering committee to guide the UNEP Environment Management System at headquarters, carbon pricing mechanisms have been increased from \$20 to \$40 a ton and a virtual meeting pilot has been launched to reduce the carbon footprint of in-person meetings and to align them with United Nations best practices. For 2022, UNEP internal sustainability is focusing on further implementing the UNEP Environment Management System across global offices, reducing paper usage, creating sustainable e-waste management practices and greatly reducing greenhouse gas emissions from flights.

- 14.122 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, and also further to the ban on single-use plastics effective since 2018, UNEP is continuing to integrate environmental management practices into its operations. In 2023, UNEP will continue to look at waste problems, including hazardous waste and the emerging issue of e-waste. In particular, UNEP is working to address a sharp increase in waste associated with the COVID-19 pandemic. In that regard, it has published guidelines on the management of health-care waste and municipal solid waste, which have reached thousands of people in more than 150 countries. In Afghanistan, Haiti, India, South Sudan and the Sudan, UNEP has provided Governments with practical waste management advice and in South Africa, it has supported a COVID-19 needs assessment to inform a national recovery strategy.
- 14.123 In 2023, UNEP will continue to measure its climate emissions, mitigate them where possible and offset greenhouse gas emissions by means of certificates of emission reduction managed by the carbon offset platform of the United Nations Framework Convention on Climate Change.
- 14.124 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 14.25. The reduction in the travel compliance rate is due mainly to the continuation of COVID-19 pandemic-related travel restrictions and uncertainties in 2021. However, UNEP continues to streamline its processes following the issuance of internal guidelines to all staff and continuous improvements in the travel dashboard to assist with monitoring and reporting on the compliance rate.

Table 14.25
Compliance rate
(Percentage)

	Actual 2019	Actual 2020	Actual 2021	Planned 2022	Planned 2023
Timely submission of documentation	65	85	100	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	61	53	42	100	100

- 14.125 The proposed regular budget resources for 2023 amount to \$3,304,200 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of resources in 2023 are reflected in table 14.26 and figure 14.XXIII.

Table 14.26

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

14.126 Extrabudgetary resources for the component are estimated at \$4,700,000 and would provide for 26 posts (1 Assistant Secretary-General, 1 D-1, 5 P-5, 4 P-4, 1 P-3, 1 P-2 and 13 Local level), as well as non-post resources. The resources would be used by the Executive Office, with support from the Evaluation Office, to provide executive direction and management, including on strategic, programmatic and administrative matters, as well as to strengthen accountability for the delivery of the medium-term strategy and its related programmes of work, as mandated by the United Nations Environment Assembly and as set out in the compact between the Executive Director and the Secretary-General. The estimated resource level for 2023 reflects no change compared with the estimates for 2022.

United Nations Scientific Committee on the Effects of Atomic Radiation

14.127 The General Assembly, by its resolution [913 \(X\)](#), established the United Nations Scientific Committee on the Effects of Atomic Radiation to undertake broad scientific evaluations on developing knowledge on sources of ionizing radiation and its effects on human health and the environment. Since 1955, the Scientific Committee has played an important role in improving international scientific understanding of levels of exposure to ionizing radiation and its health and environmental effects and setting the scientific basis for radiation protection worldwide. In its resolution [76/75](#), the General Assembly reaffirmed its decision to maintain the present functions and independent role of the Committee.

14.128 In the context of the 2030 Agenda for Sustainable Development, the work of the Scientific Committee contributes to the achievement of Sustainable Development Goal 3. Evaluations by the Committee are conducted on behalf of all States Members of the United Nations and are used to assess the levels and trends of exposure from using radiation in medicine, research, education, agriculture and industry, including nuclear power production. The Committee’s scientific synthesis of the most up-to-date radiobiological and epidemiological knowledge is fundamental for the international radiation safety

regime and underpins international standards for protecting workers, patients and the public against ionizing radiation. The findings of the Committee also contribute to the achievement of Goals 14 and 15. This was particularly evident in the Committee's 2020/2021 report to the General Assembly (annex B) entitled "Levels and effects of radiation exposure due to the 2011 accident at the Fukushima Daiichi nuclear power station in Japan". Through its work, the Committee also contributes to the achievement of Goal 17 by collaborating and maintaining long-term partnerships with national and international organizations, including the International Atomic Energy Agency, the International Labour Organization, WHO and, more recently, the European Commission.

- 14.129 The secretariat, located in Vienna, convenes and services the annual sessions of the Scientific Committee. In 2021, the General Assembly welcomed the Committee's annual reports from the sixty-seventh session, held in 2020, and its sixty-eighth session, held in 2021. Owing to the COVID-19 pandemic, the sixty-seventh session was convened in November 2020 after the meeting of the Fourth Committee, and hence its report was presented to the General Assembly together with the 2021 report of the United Nations Scientific Committee on the Effects of Atomic Radiation (A/76/46). The Assembly welcomed the Committee's four scientific reports on (a) evaluation of medical exposure to ionizing radiation (annex A); (b) levels and effects of radiation exposure due to the accident at the Fukushima Daiichi nuclear power station: implications of information published since the 2013 report of the Scientific Committee (annex B); (c) biological mechanisms relevant for the inference of cancer risks from low-dose and low-dose-rate radiation (annex C); and (d) evaluation of occupational exposure to ionizing radiation (annex D), which provide up-to-date information and contribute to the achievement of Sustainable Development Goals 3, 14, 15 and 17. The General Assembly also supported the launch of a new evaluation in 2021 on diseases of the circulatory system from radiation exposure.
- 14.130 The Committee's report to the General Assembly was based on 10 parliamentary documents reviewed and discussed at the sixty-seventh and sixty-eighth sessions on the following subjects, in addition to the subjects of the above four scientific reports: (a) second primary cancer after radiotherapy; (b) epidemiological studies on radiation and cancer; (c) evaluation of public exposure to ionizing radiation from natural and other sources; (d) implementation of the Committee's strategy to improve the collection, analysis and dissemination of data on radiation exposure; (e) implementation of the Committee's future programme of work (2020–2024); and (f) public information and outreach, including a strategy for the period 2020–2024.
- 14.131 In line with General Assembly resolution 76/75, the secretariat continues to maintain and foster the online platform for the collection of public exposure data from Member States, enabling the Committee to regularly monitor exposure trends. By the end of 2021, 99 Member States had nominated national contact persons to participate in the Committee's global survey on public exposure started in March 2021. The Committee is also evaluating lessons learned from the recently completed occupational and medical exposures survey and is preparing a new data collection strategy for its approval in 2022.
- 14.132 In its resolution 76/75, the General Assembly welcomed the progress on the implementation of the Committee's outreach strategy for the period 2020–2024, encouraged that consideration be given to publishing the Committee's website in all the official languages of the United Nations and noted that the dissemination of the Committee's findings and further enhancements to the website would depend on the financial and human resources made available to the secretariat. In that respect, with in-kind support, in 2021, the secretariat published the UNEP booklet "Radiation: Effects and Sources" in the Korean language and updated the Fukushima project website in Japanese. In view of the latest scientific evaluations from 2019 to 2022, the Committee is working on the update of the booklet, with publication scheduled in early 2023.
- 14.133 In 2021, the General Assembly endorsed the Committee's future programme of work until 2024, and hence the launch of three new evaluations on (a) diseases of the circulatory system from radiation exposure (2021); (b) diseases of the nervous system (2022); and (c) eye lens opacities (2023), all of which will contribute further to the achievement of Sustainable Development Goal 3.

Section 14 Environment

- 14.134 For its sixty-ninth session, in 2022, the Scientific Committee will review progress on the implementation of four ongoing scientific evaluations, namely, (a) second primary cancers after radiotherapy; (b) epidemiological exposure; (c) public exposure to ionizing radiation; and (d) diseases of the circulatory system from radiation, and will formulate a new strategy for data collection, analysis and dissemination and a proposed programme of work for the period 2025–2029.
- 14.135 In 2023, the Scientific Committee is planning to approve (a) a report on the evaluation of second primary cancer after radiotherapy, which is expected to provide the scientific basis for the development of international safety standards in this field by, for example, the International Atomic Energy Agency; and (b) its programme of work for the period 2025–2029. This will contribute to the achievement of Goals 3, 14, 15 and 17 and the long-term planning of the scientific work of the Committee.
- 14.136 The proposed regular budget resources for 2023 amount to \$825,400 and reflect an increase of \$18,500 in the resource level compared with the appropriation for 2022. The proposed increase is explained in paragraph 14.106. Additional details on the distribution of resources in 2023 are reflected in table 14.27 and figure 14.XXIV.

United Nations Scientific Committee on the Effects of Atomic Radiation: distribution of proposed resources for 2023 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

14.137 Extrabudgetary resources for the component are estimated at \$350,000 and would provide for two posts (one P-3 and one General Service (Other level)), as well as non-post resources to support scientific evaluations and to increase the outreach and awareness of the Scientific Committee’s findings, as well as to provide additional support to modernize, strengthen and expedite the implementation of the Committee’s programme of work within its mandate. The estimated resource level for 2023 reflects no change compared with the estimates for 2022.

Programme of work

14.138 The proposed regular budget resources for 2023 amount to \$17,551,000 and reflect a net decrease of \$104,100 in the resource level compared with the appropriation for 2022. The proposed decrease is explained in paragraph 14.107.

**Subprogramme 1
 Climate action**

14.139 The proposed regular budget resources for 2023 amount to \$2,181,300 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of resources in 2023 are reflected in table 14.28 and figure 14.XXV.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

14.140 Extrabudgetary resources for the subprogramme are estimated at \$112,850,000 and would provide for 171 posts (7 D-1, 14 P-5, 28 P-4, 39 P-3, 12 P-2/1, 7 National Professional Officer and 64 Local level), as well as non-post resources. The resources would be used mainly in activities that would accelerate the adoption of low-emission technologies and climate-resilient development. The estimated resource level for 2023 reflects no change compared with the estimates for 2022.

Subprogramme 2 Digital transformations in supporting environmental action

14.141 The proposed regular budget resources for 2023 amount to \$1,205,800 and reflect a decrease of \$326,600 in the resource level compared with the appropriation for 2022. The proposed decrease is explained in paragraph 14.107 (a). Additional details on the distribution of resources in 2023 are reflected in table 14.29 and figure 14.XXVI.

Table 14.29

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

14.142 Extrabudgetary resources for the subprogramme are estimated at \$21,350,000 and would provide for 44 posts (1 D-1, 7 P-5, 11 P-4, 11 P-3 and 14 Local level), as well as non-post resources. The resources would be used mainly for the establishment of the global digital standards, architecture and governance framework needed to integrate data sets and analysis on the environment, as well as to leverage data and data analytics to amplify and accelerate contributions to the achievement of the Sustainable Development Goals. The estimated resource level for 2023 reflects no change compared with the estimates for 2022.

**Subprogramme 3
Nature action**

14.143 The proposed regular budget resources for 2023 amount to \$2,654,500 and reflect an increase of \$90,500 compared with the appropriation for 2022. The proposed increase is explained in paragraph 14.107 (b). Additional details on the distribution of resources in 2023 are reflected in table 14.30 and figure 14.XXVII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

14.144 Extrabudgetary resources for the subprogramme are estimated at \$101,100,000 and would provide for 117 posts (4 D-1, 11 P-5, 24 P-4, 16 P-3, 16 P-2/1, 1 National Professional Officer and 45 Local level), as well as non-post resources. The resources would be used mainly to support the delivery of science-based solutions for nature across sectors and levels of governance to halt and reverse the loss of biodiversity and ecosystem integrity, which are key to many economic activities and the provision of goods and services critical for human welfare. The estimated resource level for 2023 reflects no change compared with the estimates for 2022.

**Subprogramme 4
 Environmental governance**

14.145 The proposed regular budget resources for 2023 amount to \$4,580,300 and reflect an increase of \$33,000 compared with the appropriation for 2022. The proposed increase is explained in paragraph 14.107 (c). Additional details on the distribution of resources in 2023 are reflected in table 14.31 and figure 14.XXVIII.

Table 14.31
Subprogramme 4: evolution of financial and post resources

(Thousands of United States dollars/number of posts)

	2021 expenditure	2022 appropriation	Changes			Total	Percentage	2023 estimate (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

14.146 Extrabudgetary resources for the subprogramme are estimated at \$27,600,000 and would provide for 113 posts (5 D-1, 7 P-5, 18 P-4, 15 P-3, 8 P-2/1, 2 National Professional Officer and 58 Local level), as well as non-post resources. The resources would be used mainly to support institutional strengthening and the development and effective implementation of appropriate legal frameworks and policies to enhance delivery on the environmental dimension of the 2030 Agenda for Sustainable Development. The estimated resource level for 2023 reflects no change compared with the estimates for 2022.

Subprogramme 5 Chemicals and pollution action

14.147 The proposed regular budget resources for 2023 amount to \$1,780,000 and reflect no change in the resource level compared with the appropriation for 2022. Additional details on the distribution of resources in 2023 are reflected in table 14.32 and figure 14.XXIX.
