256. In 2023, crimes in Haiti, including homicide, kidnapping and rape, escalated to unprecedented levels. BINUH continued to mentor and advise senior national police commanders in better addressing criminal networks and gangs, especially on anti-kidnapping and police intelligence. The mission supported the Haitian National Police in developing a three-year strategic development plan for the period 2022–2025 that focuses on strengthening institutional and operational capacities, promoting the rule of law and improving security. Joint efforts are made by the international community to support the professionalization of the Haitian National Police. Advocacy, supported by the mission, for a UNDP-managed, multi-donor basket fund has, to date, resulted in pledges of \$25.5 million of the \$28.0 million requested for the two-year joint programme, while \$2.5 million remains to be mobilized.
257. Progress towards the objective is presented in the performance measure below (see table 54).

Table 54

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
Low satisfaction among the population with public services offered by national institutions	Disruptions in governance due to a political crisis and a lack of responsive, inclusive, participatory and representative decision-making	The basket fund received \$25.5 million in pledges from donors, and reforms were devised and implemented to strengthen police performance

Planned results for 2025

Result 1: engagement and consensus-building among key stakeholders and State institutions help to address the country's institutional vacuum and causes of instability

Programme performance in 2023 and target for 2025

258. In 2023, BINUH conducted electoral support activities following the signing of a political agreement on 21 December 2022, which foresaw the installation of a new elected President by 7 February 2024. However, the deteriorating security situation and divergencies among stakeholders did not allow for the creation of conditions for holding elections in 2023. The mission therefore did not meet its target of the holding of a constitutional referendum by the Government in 2023.
259. In 2025, BINUH will continue to support an inclusive inter-Haitian dialogue on ways to promote a Haitian-led political process permitting the organization of free, fair and credible legislative and presidential elections, with the full, equal and meaningful participation of women, young people and civil society.
260. Expected progress towards the objective and the target for 2025 are presented in the performance measure below (see table 55).

Table 55
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
<p>The assassination of the President, as well as the death of the President of the Cour de cassation, left all three branches of power in the country dysfunctional</p> <p>Haitian stakeholders worked together to agree on a way forward.</p> <p>Prime Minister Ariel Henry assumed office with a pledge to organize elections as soon as possible</p>	<p>Significant civil unrest and increased gang violence led to heightened international concern about the situation in Haiti, a recommendation by the Secretary-General for the deployment of a non-United Nations rapid action force in response to a request from the Government of Haiti for assistance through an armed international specialized force, and the imposition of sanctions, contributing to the signing of a consensus agreement on 21 December as a road map to elections in 2023</p>	<p>Continued political standoff and escalating gang violence</p>	<p>Expansion and strengthening of the High Transitional Council, establishment of a new Electoral Provisional Council, formation of a national unity government; dialogue on governance/ constitutional reforms continue</p>	<p>Elections are held and permit the restoration of democratic institutions</p>

Result 2: encouraging non-partisan buy-in and constructive engagement towards a new constitution by referendum

Proposed programme plan for 2025

261. The majority of Haitian stakeholders believe that the current Constitution, adopted in 1987 at the collapse of a 30-year-long dictatorship, has proved to not meet the requirements of Haiti today. The need for a constitutional review remains at the forefront of national debate. Over the course of 2023, BINUH engaged with key stakeholders, underscoring the importance of constitutional reforms as a critical tool to promote political stability and good governance.

Lessons learned and planned change

262. The lesson for the mission was the need to further encourage Haitian-led dialogue while simultaneously supporting the Caribbean Community's efforts to facilitate more constructive talks that could pave the way for broader national consensus on critical reforms, as well as on ways to restore democratic institutions. In applying the lesson, the mission will explore and advocate for procedures that can encourage non-partisan buy-in and constructive engagement.
263. Expected progress towards the objective is presented in the performance measure below (see table 56).

Table 56
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
All three branches of power in the country became dysfunctional Haitian stakeholders worked together to agree on a way forward The Prime Minister, Ariel Henry, assumed office with a pledge to organize elections as soon as possible	Significant civil unrest and increased gang violence led to heightened international concern about the situation in Haiti, a recommendation by the Secretary-General for the deployment of a non-United Nations rapid action force in response to a request from the Government of Haiti for assistance through an armed international specialized force, and the imposition of sanctions	High Transitional Council was established and launched a national dialogue on electoral and political reforms Continued divergences among stakeholders and escalating gang violence hamper wider progress in the political process	Advocacy for a sustained and inclusive Haitian-led dialogue on constitutional reforms and elections	Security conditions permitting, constitutional review/reform and electoral process advance

Deliverables

264. Table 57 lists all deliverables of the mission.

Table 57
Deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	4	4	4	4
1. Reports of the Secretary-General to the Security Council	4	4	4	4
Substantive services for meetings (number of three-hour meetings)	4	4	4	4
2. Meetings of the Security Council	4	6	4	4
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	40	40	150	150
3. Seminars, workshops and training events on four main areas of work: (a) implementation of and resource mobilization for the strategic plan to further develop and equip the Haitian National Police, sustain police service capable of maintaining public security, reduce gang violence, enhance police oversight and protect human rights; (b) implementation by national authorities and the United Nations country team of programmes on disarmament, demobilization and reintegration, community violence reduction and weapons and ammunition management; (c) management and oversight of prisons and detention centres according to international standards; and (d) promotion of human rights and participation of women as decision-makers in State institutions, political parties and initiatives of dialogue and consensus-building	40	40	150	150

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
Field and technical cooperation projects (number of projects)	9	9	9	9
4. Projects in support of operationalizing the Haitian National Police basket fund, including on strategic planning, vetting, intelligence-led operations, anti-gang activities, efforts against illicit financial flows and support for the development of the national police legal framework	6	6	6	6
5. Projects to support strengthened air, land and sea border controls, including the Container Control Programme, the Airport Communication Programme and the Global Maritime Crime Programme	3	3	3	3
Publications (number of publications)	2	5	6	6
6. Thematic public reports on human rights, as well as quarterly global horizontal notes on child rights violation	2	5	6	6
Technical materials (number of materials)	11	1	10	10
7. Materials conveying advisory support to national interlocutors	11	1	10	10
Fact-finding, monitoring and investigation missions (number of missions)	45	50	50	50
8. Fact-finding, monitoring and investigation missions to assess prison facilities, the condition of detainees and administration and security arrangements; to conduct police inspections to assess the status of police stations and police services in each department, as well as the internal administration and quality of police services; to conduct an assessment of police stations and police services to assess the implementation of the basket fund in support of the Haitian National Police; to assess human rights and allegations of violations; to assess implementation of the human rights due diligence policy; and to carry out joint monitoring missions to assess gang violence in seven gang-controlled neighbourhoods of Port-au-Prince and other communities across Haiti	45	50	50	50

C. Substantive deliverables

Good offices: good offices to: (a) foster cooperation and dialogue among the main political and social actors, build consensus and strengthen political stability and good governance; (b) support the efforts of national authorities and international partners to facilitate local peace initiatives, reduce gang and community violence and advance a peaceful and stable environment; and (c) raise awareness of human rights abuses and violations, sexual and gender-based violence and gender discrimination, and strengthen institutional accountability to address these problems and end impunity for perpetrators.

Consultation, advice and advocacy: developing initiatives that promote dialogue and consensus-building; advising on the development of effective, accountable and transparent institutions and advancing political, legal and economic reforms; developing the institutional framework and the electoral calendar; providing the Haitian National Police and the Directorate of Prison Administration with expert advice to strengthen the capacity and oversight of the police and corrections service; advising State institutions and agencies on the implementation of action plans to promote and protect human rights and gender equality; and advising on the development of a regulatory arms control framework, including the effective implementation of a holistic weapons and ammunition interinstitutional mechanism.

D. Communication deliverables

Outreach programmes, special events and information materials: field outreach and advocacy materials (brochures, flyers, flipcharts, infographics and banners) explaining thematic objectives in the mission's mandate; outreach events on key priorities of the mission; traditional and digital media campaigns, inclusive of print, radio and social platforms, to support United Nations electoral, disarmament, demobilization and reintegration/community violence reduction, police, corrections, justice and human rights initiatives and joint programmes.

External and media relations: strategic plan to ensure coverage of key activities of the mission, inclusive of press conferences, editorials on key issues, press briefings, press releases, targeted interviews and publications with target audiences and networks; daily media and social platform monitoring providing strategic analysis of media and social platform trends, risks and opportunities to provide guidance for crisis communication management.

Digital platforms and multimedia content: creation and management of website and social media; production and dissemination of content for multimedia products and campaigns (with a focus on digital radio) able to engage key actors on mission priorities and promoting transparency and accountability; and campaigns and products for social media platforms showing the impact of the mission's work.

B. Proposed post and non-post resource requirements for 2025

Resource requirements (regular budget)

Table 58

Financial resources

(Thousands of United States dollars)

Category of expenditure	2023		2024	2025	Variance
	Appropriation	Expenditure	Appropriation	Requirements	2025 vs. 2024 Increase/(decrease)
	(1)	(2)	(3)	(4)	(5)=(4)-(3)
Military and police personnel costs	1 226.1	842.8	1 826.6	1 968.4	141.8
Civilian personnel costs	19 278.1	21 728.7	24 239.1	25 869.0	1 629.9
Operational costs	7 397.9	5 989.4	10 474.4	7 925.6	(2 548.8)
Total (net of staff assessment)	27 902.1	28 560.9	36 540.1	35 763.0	(777.1)

Table 59

Human resources

	International staff										National staff			United Nations Volunteers			Total	
	USG	ASG	D-2	D-1	P-5	P-4	P-3	P-2	FS	GS ^a	Subtotal	NPO	LL	Subtotal	International	National		Subtotal
	Approved 2024 ^b	–	1	1 ^c	5	10	28	15	3	41	2	106	24	47	71	4		–
Proposed 2025 ^b	–	1	1 ^c	5	10	28	15	3	44	2	109	24	47	71	4	–	4	184
Change	–	–	–	–	–	–	–	–	3	–	3	–	–	–	–	–	–	3

^a Other level, unless otherwise stated.

^b Includes one D-1, one P-5, one P-4 and two General Service positions approved as general temporary assistance positions.

^c Position is funded at 50 per cent and cost-shared with the Development Coordination Office.

265. The proposed resources for 2025 for BINUH amount to \$35,763,000 (net of staff assessment) and would provide for the deployment of 48 United Nations police personnel (\$1,968,400), salaries, common staff costs and danger pay (\$25,869,000) for 109 international posts (1 Assistant Secretary-General, 1 D-2, 5 D-1, 10 P-5, 28 P-4, 15 P-3, 3 P-2, 44 Field Service and 2 General Service) and 71 national posts (24 National Professional Officer and 47 Local level), 4 international United Nations Volunteers and 3 government-provided personnel, including the establishment of 3 new posts (Field Service), and operational costs (\$7,925,600), comprising costs for consultants and consulting services (\$110,900), official travel (\$374,700), facilities and infrastructure (\$4,233,100), ground transportation (\$586,200), communications and information technology (\$1,707,700), medical (\$285,300) and other supplies, services and equipment (\$627,700).

266. A vacancy rate of 20.7 per cent has been applied to the estimates for international posts on the basis of the actual average vacancy rate in 2023. Vacancy rates of 31.0 and 13.7 per cent have been applied to the estimates for National Professional Officer and Local level posts, respectively, on the basis of the actual average vacancy rates in 2023. A vacancy rate of 25 per cent has been applied to international United Nations Volunteers on the basis of the anticipated deployment plan since the positions were approved effective 1 January 2024. A vacancy rate of 26.2 per cent has been applied to the estimates for United Nations police personnel on the basis of the actual average vacancy rate in 2023. A vacancy rate of 50.0 per cent has been applied to three new international posts proposed for establishment. The cost estimates for government-provided personnel for 2024 are based on the assumption of full deployment on the basis of the actual incumbency in March 2024.

Establishment of three Close Protection Officer (Field Service) posts

267. In the light of the escalating gang violence in the Port-au-Prince metropolitan area, the security situation has become a growing concern, which has had a tangible adverse impact on the mission's ability to deliver on its mandate, especially for senior United Nations officials who face significant security risks owing to the volatile environment and the high visibility and nature of their work. To address this, three additional Close Protection Officer posts are proposed to strengthen the Close Protection Unit protective services. In accordance with the most recent personal security risk assessment, a close protection team of 12 officers is recommended to provide armed, concentric layers of defence around the designated official to prevent or, at least minimize, hostile threats. The three Close Protection Officers will add to the existing nine officers to provide round-the-clock protection for senior United Nations officials.
268. The approved 2024 staffing table for BINUH includes five general temporary assistance positions. It is proposed that the positions be continued in 2025, comprising the following:
- (a) One Principal Human Rights Officer (D-1) in the Human Rights Service to respond to and address the human rights requirements set by the Security Council as reflected in the BINUH mandate, adopted in resolution [2476 \(2019\)](#). Such a dedicated position, with specific human rights expertise, is important to facilitate trusted engagement at a high level with senior Haitian authorities, allowing for the provision of technical assistance and advice to the country's national human rights institutions;
 - (b) Three backstopping positions in the Haiti team of the Americas Division of the Department of Political and Peacebuilding Affairs, comprising one Senior Political Affairs Officer (P-5), one Political Affairs Officer (P-4) and one Team Assistant (General Service), who have been providing backstopping support to BINUH since 2019 and will remain critical to ensuring ongoing support and strategic advice and analysis to principals at Headquarters for decision-making with regard to BINUH. The core functions that they undertake are required throughout the lifespan of the mission, including its start-up, the duration of the implementation of its mandate and its closing;
 - (c) One Finance and Budget Assistant (General Service) backstopping position in the Department of Management Strategy, Policy and Compliance, where the need remains high for the Field Operations Finance Division to continue the delivery of high-intensity and high-quality support to legislative bodies in their review of the budgets of special political missions. The continuation of this position will also ensure sufficient capacities for budget preparation, budget administration and performance monitoring of all continuing special political missions.
269. The decrease in requirements for 2025 compared with the appropriation for 2024 is attributable to reduced requirements under operational costs, as follows: (a) a reduction under ground transportation due to the non-requirement for the acquisition of vehicles, given that the revised estimates for 2024 included 10 additional light passenger vehicles, 5 armoured vehicles, 1 armoured ambulance and 1 mobile workshop; (b) a reduction under other supplies, services and equipment due to lower requirements for freight charges and related charges relating to the removal of the one-time provision for the acquisition of vehicles and equipment in 2024; (c) a reduction under facilities and infrastructure due to non-requirements for the construction, alteration, renovation and major maintenance for the installation of prefabricated facilities undertaken in the previous period, as well as the non-requirement for the acquisition of prefabricated facilities, furniture and electrical and fuel distribution equipment acquired in previous periods; (d) a decrease in communications and information technology equipment due to adequate stock acquired in the previous period; and (e) a reduction under consultancy services due to a reliance on in-house capacity. The decrease requirement was offset in part by increases under civilian personnel costs due to: (a) the delayed impact of 33 new posts and positions approved for 2024; (b) the revised salary scales for national staff promulgated in April 2024; and (c) the increase in the post adjustment multiplier in Haiti from 60.9 in April 2023 to 62.8 in April 2024. Furthermore, the increased requirement under United

Nations police is due to the delayed impact of the 27 additional police personnel approved in the 2024 revised estimates.

Extrabudgetary resources

270. In 2024, extrabudgetary resources in the amount of \$154,800 are projected to be used to provide resources for two main initiatives: (a) promoting women-led social community dialogues and local conflict prevention initiatives in vulnerable neighbourhoods of Port-au-Prince; and (b) enhancing inclusive political participation in Haiti while creating a safe and peaceful space for dialogue.
271. In 2025, extrabudgetary resources in the amount of \$154,800 are projected to be used to support the continuation of the above-mentioned projects.

Annex I

Summary of follow-up action taken to implement decisions and requests made by the General Assembly, including the requests and recommendations of the Advisory Committee on Administrative and Budgetary Questions endorsed by the Assembly

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/78/7/Add.4](#)

The Advisory Committee trusts that further clarifications will be provided to the General Assembly on the need for this asset (helicopter) and the availability of more cost-efficient alternative options, and that an update will be included in the next budget submission (para. 33).

The Advisory Committee trusts that an update on the recruitment status of all vacant positions, including long-vacant positions, will be provided to the General Assembly at the time of its consideration of the present report and in the next budget submission. The Committee also trusts that the Secretary-General will propose appropriate budgetary actions in the next budget submission for any long-vacant positions that have not been recruited (para. 52).

The Advisory Committee reiterates its concern regarding cases of “temporary” assignments of staff members to higher-level positions for lengthy periods and trusts that an explanation will be provided to the General Assembly at the time of its consideration of the present report and in the next budget submission (para. 54).

The Advisory Committee notes the continued significant variances between the appropriations and expenditure [for medical] since 2021 and trusts that efforts will be strengthened to ensure the efficient and effective use of resources and services, and that an update will be provided in the next budget report (para. 81).

The United Nations Mission to Support the Hudaydah Agreement (UNMHA) retained the helicopter in 2023 to provide backup for CASEVAC/MEDEVAC and for the evacuation of personnel, if required, in particular for personnel deployed in isolated or difficult-to-reach locations. In line with the Advisory Committee’s recommendation to explore cost-efficient alternatives, the Mission carefully assessed the requirements and terminated the contract of a rotary-wing aircraft in Djibouti in March 2024, given that the Mission will rely more on national health facilities rather than Djibouti for hospital care, referral and CASEVAC/MEDEVAC services for urgent and critical medical and surgical cases.

In line with the Advisory Committee’s recommendation, an update on the recruitment status of all vacant posts, including long-vacant posts, of all special political missions will be presented as supplementary information to enable a consolidated and holistic view.

Special political missions are making every effort to fill all vacant posts, in particular those that are long vacant. However, the efforts have been constrained further by the challenging liquidity situation, which has resulted in higher vacancy rates.

The update on cases of “temporary” assignments of staff members to higher-level positions for lengthy periods for all special political missions will be presented centrally in annexes to the report of the Secretary-General to enable a consolidated and holistic view.

The special political missions are taking steps to ensure that temporary assignments of staff to higher-level positions are kept to a minimum and do not exceed the two-year maximum.

UNMHA reduced its medical costs in 2023 by focusing its medical support strategy on local resources in Yemen and reducing the need for an aeromedical evacuation team to be based in Djibouti.

The Advisory Committee trusts that the Mission will ensure that quick-impact projects result in tangible benefits for the local communities, and that an update will be included in the next budget submission (para. 87).

The Advisory Committee trusts that the special political missions under cluster III will intensify their efforts to achieve a more equitable geographical representation of Member States and gender balance among their staff, and provide an update in future budget submissions (para. 91).

The Advisory Committee trusts that detailed information on cost-recovery resources will be included in all future budget submissions (para. 93).

UNMHA is actively working to ensure that the quick-impact projects result in tangible benefits for local communities and will be reporting on this in the next budget submission. Although the UNMHA quick-impact project programme was established only in 2023, the tangible benefits are already evident. Discussions around quick-impact project identification has served as an entry point for engagement with local representatives, non-governmental organizations, community leaders and civil society, in line with the UNMHA mandate, which stresses the importance of community engagement. UNMHA is providing much-needed support to the local community and local authorities, which helped to build trust in the work of the Mission

Special political missions are making the efforts required to achieve equitable geographical representation and gender balance among their staff. For all recruitment cases, it is mandatory to consider both geographical representation and gender balance, and hiring managers are required to adhere strictly to these requirements, which are monitored by the leadership of each mission. Prior to any recruitment, the hiring managers are also provided with the status of gender balance and geographical distribution for consideration. Missions are prioritizing outreach to underrepresented countries to attract candidates and to encourage qualified female candidates to apply for positions in the missions.

Effective 1 January 2024, positions in the Professional and higher categories have been identified as geographical posts, and the missions ensure that appropriate outreach is done, among other measures to attract candidates from underrepresented countries. The human resources teams share the monthly report of unrepresented or underrepresented countries with the hiring managers for any recruitment done at the Professional and higher levels. During the selection process, the hiring manager is required to prioritize female candidates from unrepresented or underrepresented countries. Missions will continue their efforts to achieve geographical representation while taking into account the other priorities set by the Organization, such as the placement of downsized staff and gender parity.

The cost-recovery and cost-sharing arrangements of all special political missions are presented centrally in annexes VI, VII and VIII of document [A/79/6 \(Sect. 3\)/Add.1](#) to enable a consolidated and holistic view.

*Brief description of the recommendation**Action taken to implement the recommendation*

The Advisory Committee reiterates that disaggregated data and resources related to cost-sharing will be included as separate tables in future budget submissions (A/77/7/Add.4, para. 78) (para. 94).

The Advisory Committee reiterates that, following any change to organizational structures and initiatives, a period of stability to facilitate implementation and operations would be desirable. The Committee trusts that future budget submissions will provide more clarity on the rationale behind the proposed structural and related changes, including whether any workload analysis, staffing review or repurposing of vacant positions was conducted (A/77/7/Add.4, para. 77; see also A/78/7, chap. I, paras. 84–85) (para. 95).

Advisory Committee on Administrative and Budgetary Questions A/78/7/Add.23

The Committee also recommends that a cost-benefit analysis be conducted of rental and purchase models, as well as hybrid models, using current rates and that the results of the analysis be included in the next programme budget submission for special political missions. In this regard, the Committee also encourages the Mission to explore receiving vehicles from downsizing missions, including MINUSMA, as appropriate (para. 39).

The cost-recovery and cost-sharing arrangements of all special political missions are presented centrally in annexes VI, VII and VIII of document A/79/6 (Sect. 3)/Add.1 to enable a consolidated and holistic view.

The proposals contained in the present thematic cluster reflect carefully considered adaptations to the largely stable staffing tables in all missions, reflecting a period of stability for those missions undergoing major changes in recent years, including in the context of new mandates. The Secretariat will ensure that any future proposed structural changes will be accompanied by workload analyses, staffing reviews and proposals for repurposing vacant positions, in line with the Advisory Committee's recommendation.

Since the establishment of the United Nations Verification Mission in Colombia in 2017, the method of leasing vehicles locally has been used to provide the ground transportation services required for the execution of the Mission's mandate in a satisfactory way.

In response to the Advisory Committee's recommendation, the Mission established a fleet replacement working group, which carried out a cost-benefit analysis. The following options were analysed for the provision of ground transportation services: (a) local vehicle lease contract; (b) UN Fleet leasing with outsourced workshops; and (c) ownership (local purchase) with outsourced workshops.

The results of the analysis showed: (a) the continued use of the local vehicle lease contract would not be the best option; (b) the UN Fleet leasing option was assessed to provide the highest estimated savings among the options explored and had the lowest start-up costs; and (c) the purchase model would require additional upfront costs and other costs for workshops and warehouses and provide less flexibility to changes in operational requirements.

The UN Fleet is a collaboration between the Office of the United Nations High Commissioner for Refugees and the World Food Programme and offers safe, efficient and sustainable fleet services to the entire United Nations system in Colombia. The arrangement builds on those two entities' combined 25 years of experience in setting up a self-sustaining vehicle-leasing scheme and leverages this expertise and

The Committee also encourages the mission to explore receiving vehicles from downsizing missions, including MINUSMA, as appropriate. The Committee also trusts that further consideration will be given to the possibility of cost-sharing arrangements for the use of some vehicles by other United Nations entities and that an update will be provided in the context of the next programme budget (para. 58).

While the Advisory Committee acknowledges the cost benefit in using United Nations Volunteer positions, it considers that an assessment should be made to ensure clarity of their roles and responsibilities, performance monitoring and accountability mechanisms. The Committee trusts that the results of the assessment will be included in the next programme budget submission for special political missions (para. 64).

experience to offer the same light vehicle provision model to all other United Nations agencies. The Mission concluded that adopting the UN Fleet lease contract to provide the vehicle fleet was the best option. This analysis has served as the basis for the proposed requirements for ground transportation in the 2025 budget.

BINUH has acquired five armoured vehicles from MINUSMA, which have arrived in the port of Port-au-Prince from Mali, and one armoured ambulance is pending shipment from Mali. The Mission is actively exploring with the United Nations Logistics Base at Brindisi, Italy the possibility of receiving additional armoured vehicles that meet the required mechanical standards.

UNOCA acquired five vehicles from MINUSMA, including one armoured vehicle, three light passenger vehicles already in the mission and one medium bus pending shipment from Mali.

UNOWAS has received four light passenger vehicles and the Cameroon-Nigeria Mixed Commission received one light passenger vehicle from the United Nations Interim Transition Assistance Mission in the Sudan.

UNMHA selected an armoured ambulance vehicle from MINUSMA, which is expected to arrive in the Mission before the end of 2024.

Owing to the receipts of these vehicles, the 2025 budget for the above-mentioned missions does not contain any proposal for vehicle acquisitions.

UNSOM, the United Nations Regional Centre for Preventive Diplomacy for Central Asia, the Office of the United Nations Special Coordinator for Lebanon, UNSMIL and the United Nations Verification Mission in Colombia did not receive any vehicles from downsizing or liquidating missions.

A joint study was conducted in 2023 by the Department of Operational Support and the United Nations Volunteers programme, covering 34 United Nations Secretariat peace operations, special political missions and good offices. The study focused on onsite United Nations Volunteers physically serving in those Secretariat entities (national and international United Nations Volunteers). The objective was to identify best practices and obstacles for the integration of United Nations Volunteers into peacekeeping and special political missions.

*Brief description of the recommendation**Action taken to implement the recommendation*

Taking into consideration the joint activities and cooperation between the special political missions and other United Nations entities, the Advisory Committee is of the view that information should have been provided about cost-recovery mechanisms in the missions in relation to shared resources. The Committee trusts that detailed information on the cost-recovery mechanisms and any related efficiencies, including in respect of ground, air and marine operations costs, will be included in the next programme budget submission for special political missions (para. 65).

The value and contribution of United Nations Volunteers to peacekeeping operations, special political missions and other political presences were recognized throughout the initiative by survey and focus group participants. The project also recognized benefits of hosting United Nations Volunteers, including bringing new skills and ideas to missions and offices, helping to achieve the missions' mandates and being highly motivated to deliver.

The study identified several obstacles to stronger integration of United Nations Volunteers across those missions and offices. These included funding issues, a lack of awareness of how and when to budget United Nations Volunteer positions, uneven understanding and awareness of United Nations Volunteer support options, restrictions on United Nations Volunteer access in some United Nations financial and human resources information technology systems, the quality and depth of United Nations Volunteer candidate shortlists and a perceived lack of flexibility on some volunteer recruitment areas.

Many obstacles can be overcome by increased and improved communication among stakeholders. It was proposed that the Human Resources Services Division in the Department of Operational Support and the United Nations Volunteers programme develop an implementation action plan to guide those recommendations. The implementation plan is being developed in consultation with relevant stakeholders across the Secretariat and the United Nations Volunteers programme.

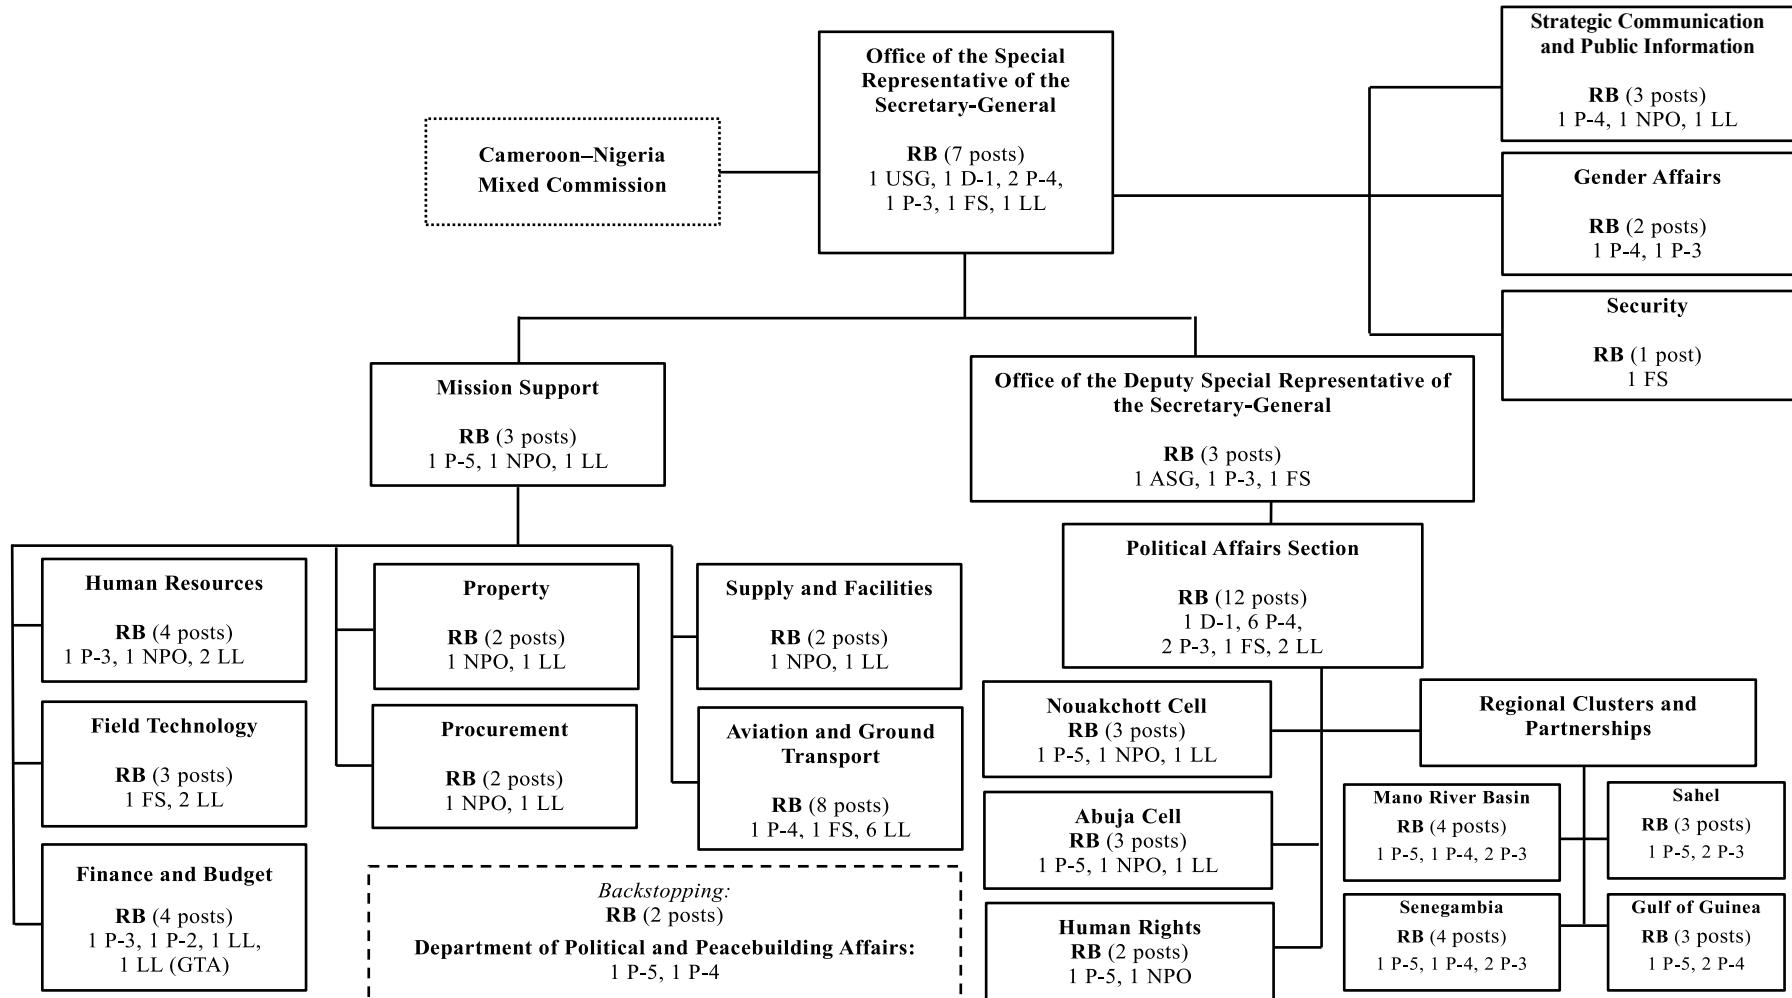

Overall, the recommendations will offer potential for enhancing the utilization and, therefore, contribution of United Nations Volunteers across United Nations peacekeeping operations, special political missions and other political presences.

The cost-recovery and cost-sharing arrangements of all special political missions are presented centrally in annexes VI, VII and VIII of document [A/79/6 \(Sect. 3\)/Add.1](#) to enable a consolidated and holistic view.

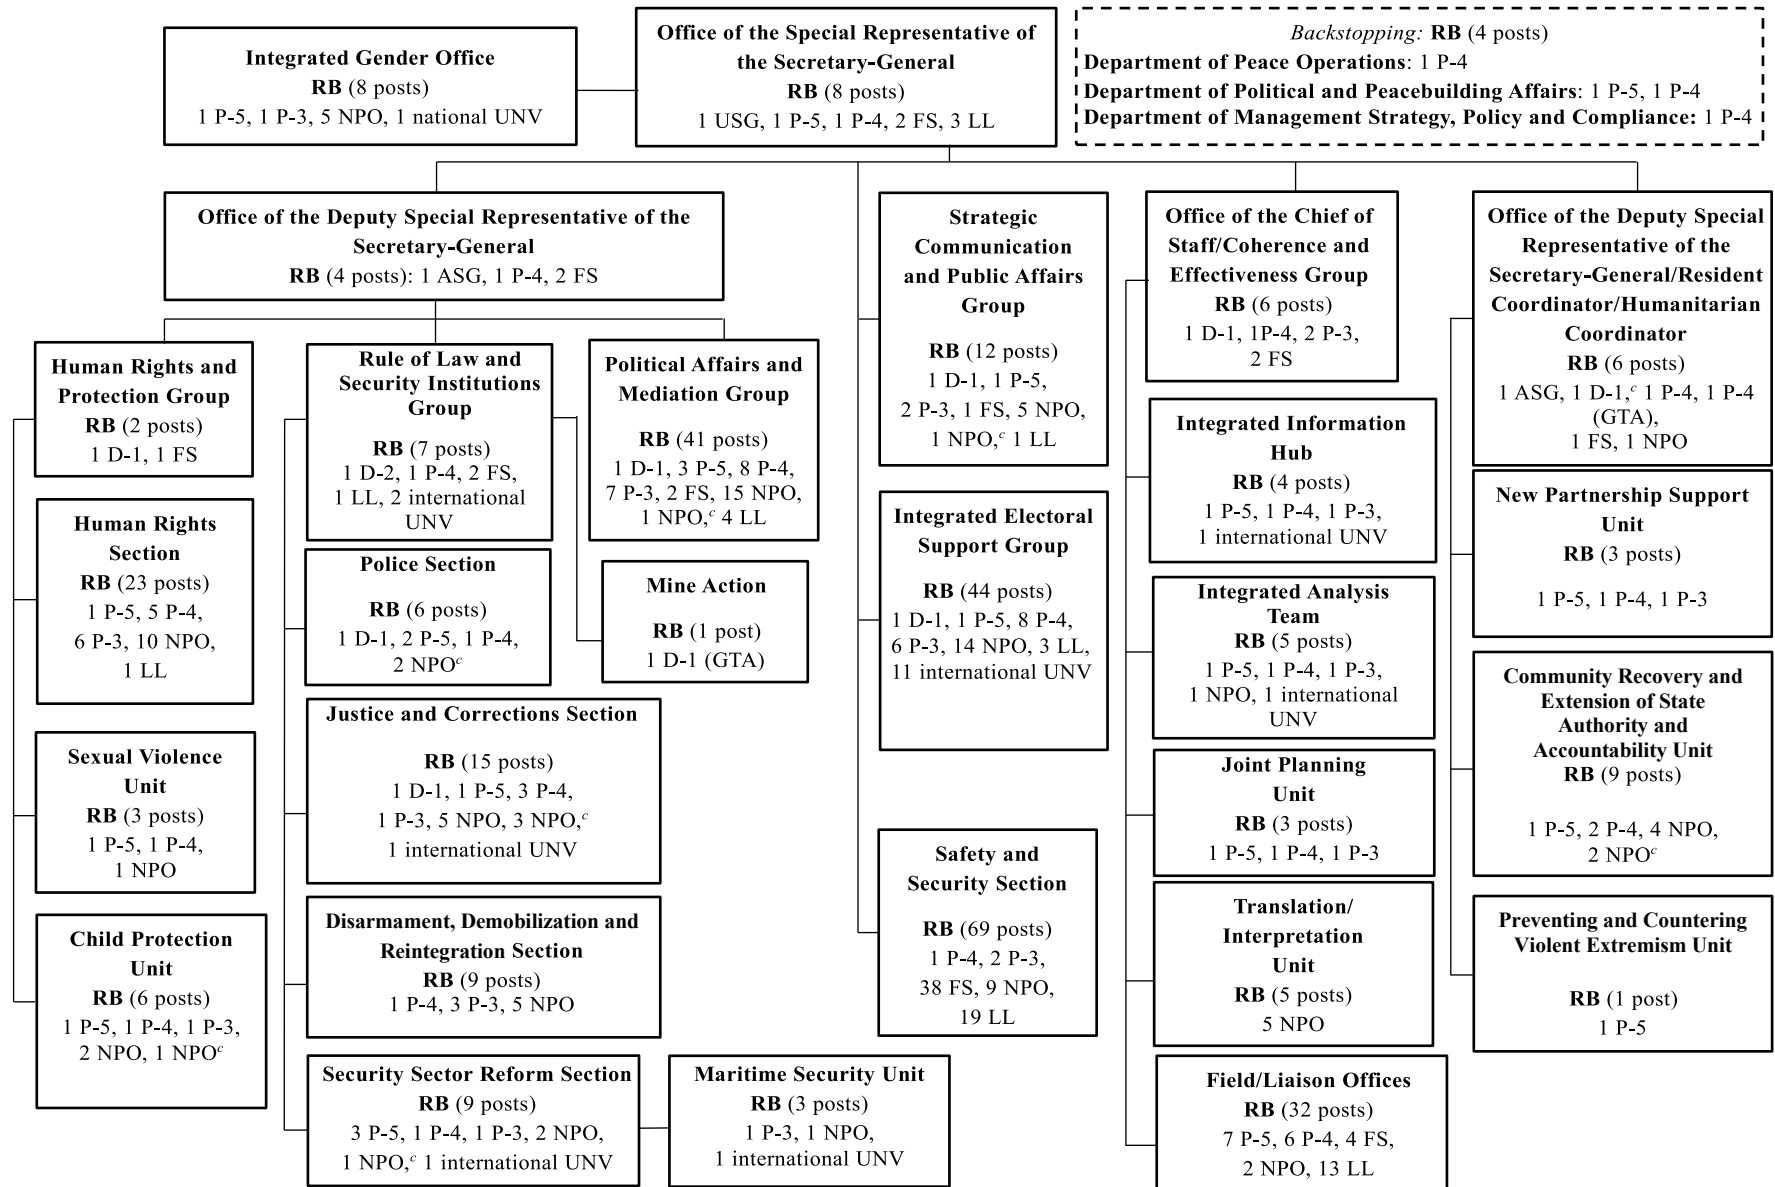

Annex II

Organizational structure and post distribution for 2025

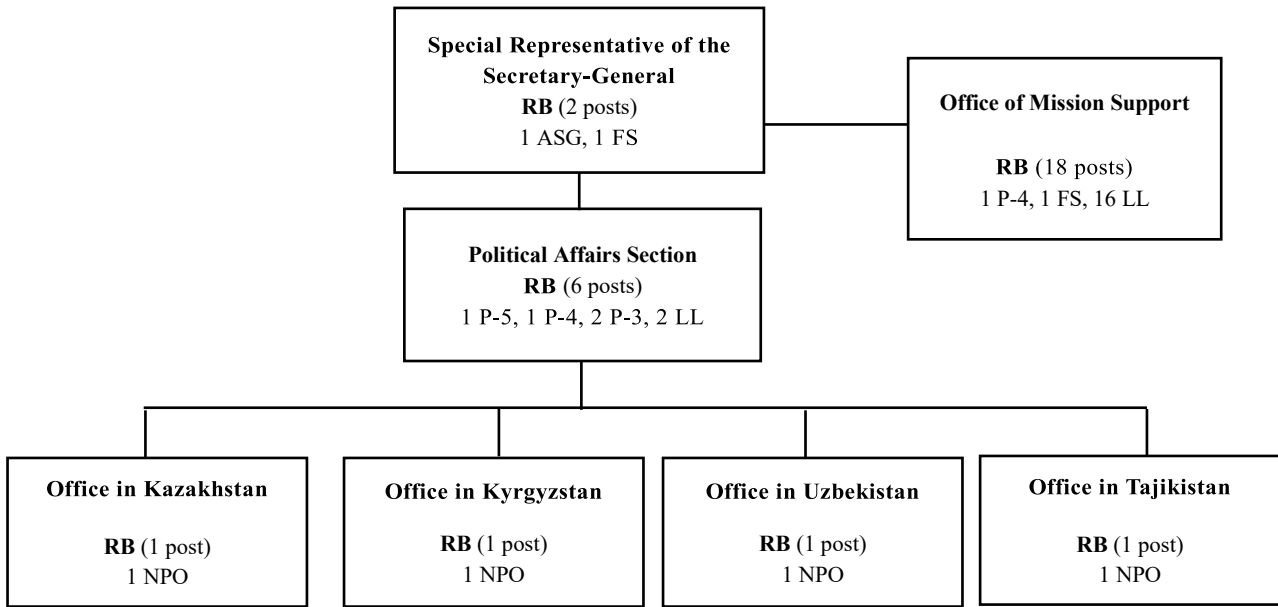

1. United Nations Office for West Africa and the Sahel

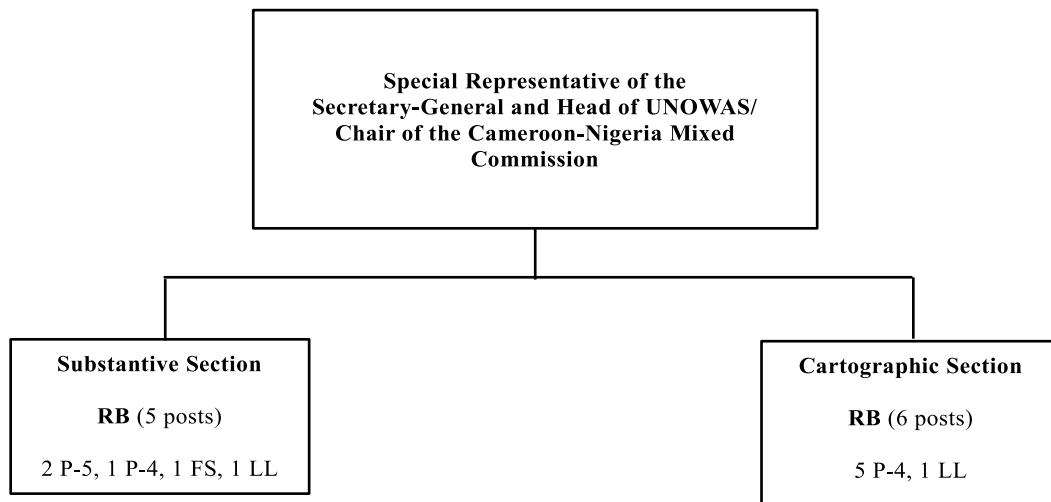

2. United Nations Assistance Mission in Somalia

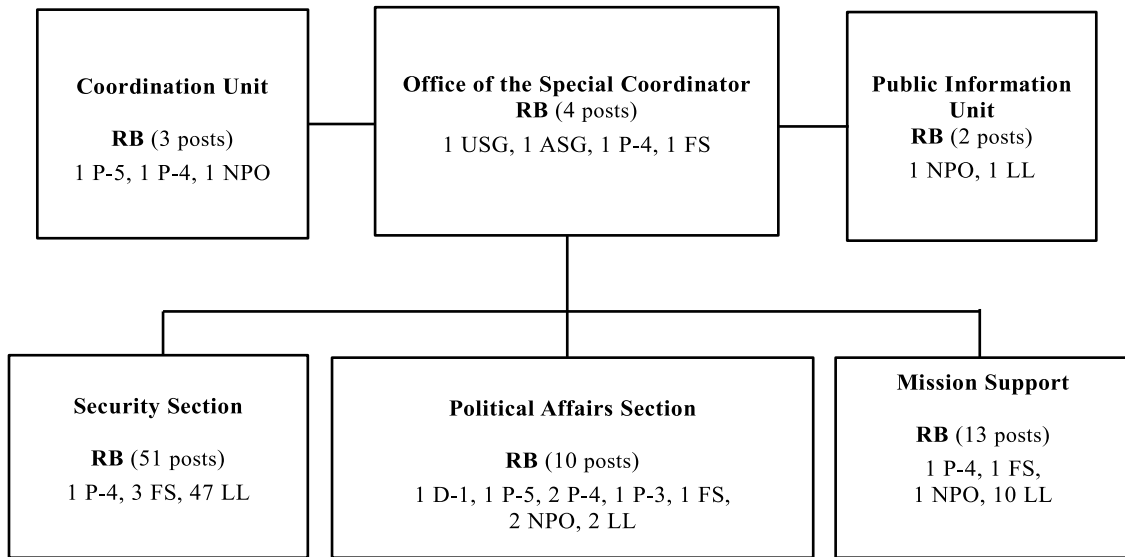

3. United Nations Regional Centre for Preventive Diplomacy for Central Asia

** The part consisting of the proposed programme plan for 2025 is submitted for the consideration of the General Assembly in accordance with the established budgetary procedures and practices reaffirmed in paragraph 7 of Assembly resolution [77/267](#).

*** In keeping with paragraph 10 of General Assembly resolution [77/267](#), the part consisting of the post and non-post resource requirements (part III) is submitted through the Advisory Committee on Administrative and Budgetary Questions for the consideration of the Assembly.

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

1. The mandate of the United Nations Assistance Mission in Afghanistan (UNAMA) is defined in Security Council resolutions [1401 \(2002\)](#), [1662 \(2006\)](#) and [2626 \(2022\)](#), and renewed by its subsequent resolutions, including most recently resolution [2727 \(2024\)](#), which extended the mandate of the Mission until 17 March 2025.
2. As mandated by the Security Council, UNAMA will continue to play an important role in promoting peace and stability in Afghanistan. To that end, the Mission will coordinate and facilitate strengthened cooperation and coherence in the financial resourcing and delivery of humanitarian and basic human needs assistance that support strengthened resilience, consistent with its mandate and the United Nations Strategic Framework for Afghanistan, 2023–2025; coordinate efforts with donors and other stakeholders to reduce risk and increase accountability, transparency and effectiveness in the use of aid; support efforts, including the provision of essential services and economic recovery, to create the conditions for self-reliance and stability for the Afghan population; provide assessments of the explosive ordnance threat and coordinate mitigation measures to enable humanitarian and development initiatives; provide outreach and good offices to promote dialogue between Afghan stakeholders, the region and the international community to promote inclusive, representative, participatory and responsive governance, including for women and youth, and provide advice on inclusive national and local consultative mechanisms, confidence-building measures and conflict management and reconciliation; promote responsible governance and the rule of law; engage with all stakeholders on the promotion and protection of human rights; support regional cooperation; and support, within its mandate, existing mechanisms for the benefit of improving the overall security situation in Afghanistan, including support to regional and international efforts to prevent and address the illicit trade in and destabilizing accumulation of small arms and light weapons and their diversion in Afghanistan and the region.

Programme of work

Objective

3. The objective, to which the Mission contributes, is to create the conditions for peace and stability, with foundations established for the promotion of inclusive, representative, participatory and responsive governance and functioning and accountable institutions, as well as a coherent and sustainable path towards the economic and social conditions for self-reliance.

Strategy and external factors for 2025

4. To contribute to the objective, the Mission will:
 - (a) Coordinate with international donors, organizations and partners in addressing the humanitarian and basic human needs of vulnerable Afghans. The Mission will partner with United Nations agencies, funds and programmes to support economic development and continue to build donor confidence to increase basic human needs support as emphasized in the independent assessment requested by the Security Council in its resolution [2679 \(2023\)](#). It will support the mobilization of resources to enable humanitarian efforts, essential services, restoration of livelihoods, support to the private sector, economic development and mitigation of the dangers of explosive remnants of war. UNAMA will engage with the de facto authorities

and other stakeholders to facilitate the support of the United Nations, the World Bank, international financial institutions and other international and national partners to the socioeconomic recovery of Afghanistan from the severe economic contraction;

- (b) Promote inclusive, representative, participatory and responsive governance in Afghanistan, in coordination with the international community and in support of the needs and priorities of the Afghan people. UNAMA will use its convening platforms at the national and subnational levels to facilitate engagement and cooperation between the de facto authorities, civil society, youth, communities and other stakeholders, including women-led organizations, on governance and policy issues, such as inclusion, participation and responsiveness to constituencies' concerns. It will continue to support the participation of women and minorities in all spheres, including governance, the private sector, civil society, the media and the socioeconomic sphere. UNAMA will also continue to identify further entry points for engagement with the de facto authorities for the benefit of all Afghan people. In addition, the United Nations and international partners will monitor and report on developments related to the rule of law and perform analysis relating to the political economy. The Mission will provide technical and analytical support to United Nations entities, humanitarian partners, civil society, the media, communities and, as authorized, counterpart institutions of the de facto authorities, in compliance with the sanctions set out in relevant Security Council resolutions related to anti-money-laundering and counter-terrorism financing;
- (c) Advise stakeholders on and promote respect for civil, political, economic, social and cultural rights, and human rights issues pertaining to children affected by armed conflict; women and girls; the treatment of detainees and the prevention of torture and ill-treatment; human rights defenders and civic space; and the promotion of accountability for human rights violations. In addition, the Mission will continue to integrate gender mainstreaming as a cross-cutting issue in mandate implementation. The Mission will support and promote gender equality, women's and girls' empowerment and the participation, engagement and leadership of women in public life and at all levels and stages of decision-making. It will also partner with the United Nations country team to promote the protection and fulfilment of the rights of women and girls and the implementation of Security Council resolution [1325 \(2000\)](#) on women and peace and security;
- (d) Support peace and stability in Afghanistan through consultations and by utilizing its convening power for dialogues with various political stakeholders. It will use existing mechanisms to advance regional cooperation on economic development and security that can, in turn, help to foster a regional environment conducive to sustainable peace and stability. In addition, it will propose and support regional approaches to issues, such as the return and reintegration of refugees and internally displaced persons, combating illicit drugs and trafficking, addressing the illicit accumulation and trafficking of small arms and light weapons in Afghanistan and the region, and reducing the illegal economy and its impact. It will also coordinate explosive ordnance threat mitigation measures to enable the safe delivery of humanitarian and basic human needs initiatives;
- (e) Intensify its work on the humanitarian-development-peace nexus, engaging with the de facto authorities, civil society and the media to facilitate the transition of society from conflict to peace, removing explosive remnants of war and setting the foundations for the localization of the Sustainable Development Goals and the 2030 Agenda for Sustainable Development, in line with the United Nations Strategic Framework for Afghanistan, 2023–2025. UNAMA will contribute to reduced dependency on aid, prioritizing assistance in critical sectors such as banking, trade and economic reform. The Deputy Special Representative of the Secretary-General/Resident Coordinator/Humanitarian Coordinator will ensure a coherent approach by the United Nations to humanitarian and basic needs programming and promote its alignment with the needs and priorities of the Afghan people. The Mission will streamline the delivery, oversight and reporting of aid provided in Afghanistan, in alignment with the Strategic Framework and in partnership with the de facto local authorities, civil society and international partners. UNAMA will also enhance collaboration on aid architecture and risk management practices.

5. The above-mentioned work is expected to result in:
 - (a) Improved representativeness and responsiveness of governing entities, in particular through inclusive consultative mechanisms;
 - (b) Progressive compliance by all parties with international humanitarian law and human rights obligations, with progressive accountability for human rights violations and abuses that build confidence in such mechanisms and between the population and the de facto authorities;
 - (c) Pursuit of a feasible political path with the de facto authorities and other national stakeholders inside and outside Afghanistan, as well as the international community, to improve the situation of Afghans and support the creation of conditions that would eventually lead to the reintegration of the Afghan State with the international community in accordance with relevant Security Council resolutions;
 - (d) Ongoing accurate reporting to the international community on the evolving situation in Afghanistan and its implications for international peace and security;
 - (e) Sustained local, regional and international support to meet humanitarian and basic human needs and economic development and to create a safe environment conducive to inclusive, representative, participatory and responsive governance and to socioeconomic recovery in Afghanistan.
6. With regard to cooperation with other entities, the Mission cooperates with international and regional entities and supports constructive dialogue between the relevant Afghan stakeholders, regional actors and the international community that is focused on the rights and socioeconomic progress of the Afghan people.
7. With regard to inter-agency coordination and liaison, the Mission coordinates with the United Nations Regional Centre for Preventive Diplomacy for Central Asia, to provide good offices and expert advice on confidence-building measures in the region that contribute to stability in Afghanistan. UNAMA engages with agencies, funds and programmes to strengthen the repositioning of the United Nations development system and to deliver more effectively and efficiently in line with the achievement of the 2030 Agenda, the Sustainable Development Goals and the humanitarian-development-peace nexus. Close collaboration between UNAMA and the United Nations country team includes areas related to governance, the rule of law, human rights and gender, focusing on policy issues and good offices. With the evolving context in Afghanistan, the Mission's work also supports the delivery of humanitarian response and meeting basic human needs through the restoration of essential services, livelihoods and community systems, in line with Inter-Agency Standing Committee recommendations. The Mission will support the removal of explosive ordnance, the delivery of risk education and the provision of victim assistance to enable humanitarian and basic human needs activities. In addressing the needs of Afghans, the Mission, working in collaboration with various stakeholders, explores new aid approaches targeting economic promotion and recovery. The Mission leads the coordination of an overall risk management approach of the United Nations in Afghanistan, including mitigating the risk of aid diversion, guided by the United Nations Strategic Framework for Afghanistan, 2023–2025, to set the foundation for the localization of progress towards achievement of the Sustainable Development Goals upon the eventual resumption of development cooperation.
8. With regard to the external factors, the overall plan for 2025 is based on the following planning assumptions:
 - (a) The de facto authorities will remain in control of the territory of Afghanistan. However, political, security, human rights, legal, socioeconomic and humanitarian uncertainties will continue, and the likely continuation of restrictive policies will present challenges for the full reintegration of Afghanistan with the international community;
 - (b) Lack of international recognition, and, to an extent, domestic legitimacy of the de facto authorities due to questions about lack of representation and inclusion, the dissonance between

their ideology and international norms and standards, and a continuation of their ambiguous governance framework, notably the absence of a constitution, will present significant challenges in engaging domestic, regional and international stakeholders, including donors, on the future of Afghanistan;

- (c) The security situation will remain uncertain, with continued attacks by Islamic State in Iraq and the Levant-Khorasan against the de facto authorities and international presence, activities of anti-Taliban resistance forces and dynamics related to the presence of regional and international foreign terrorist fighters and their access to illicitly accumulated small arms and light weapons, with an impact on the Mission, as well as development and humanitarian actors, in terms of access and physical security;
 - (d) Relations between Afghanistan and some of its neighbours will remain tense due to unresolved security issues, threat perceptions regarding terrorism, and migration and water management issues;
 - (e) Civilians, including those working as humanitarians and supporting basic human needs, will continue to face the threats of explosive ordnance, including those from improvised explosive devices and explosive remnants of war;
 - (f) Enduring threats, such as terrorism, organized crime and illicit trafficking, including in narcotics and small arms and light weapons, and resource competition, will continue, with threats emerging from issues such as land rights, minority rights, refugee outflow, returnees, unemployment and the impact of evolving regional dynamics, as well as vulnerability to the adverse impact of climate change, ecological changes and natural disasters, which may lead to heightened risks of local conflicts over land, water and other resources;
 - (g) The economy and human development will remain adversely affected by the continuing impact of non-recognition and donor sensitivities, the ban by the de facto authorities on Afghan females working in the United Nations and non-governmental organizations (NGOs) and the limitations of the de facto authorities to reinvigorate the economy and reduce poverty, with the resumption of development funding depending on the de facto authorities meeting international norms, especially as they relate to the protection of human rights, including for women and girls;
 - (h) In a context where funding is diminishing and mobilizing additional resources is becoming increasingly challenging, the United Nations is expected to assume a more prominent role in humanitarian assistance and recovery support. This includes focusing on meeting basic human needs by maintaining essential services and preserving community systems;
 - (i) The United Nations in Afghanistan will need to continue to rely on, and incur the high costs associated with, the cash importation facility of the Secretariat, which is managed by UNAMA.
9. The Mission integrates a gender perspective in its operational activities, deliverables and results. For example, in its engagement with the de facto authorities and political stakeholders, UNAMA promotes gender mainstreaming into programmes and structures to strengthen the representation of women. The Mission continues to support the implementation of Security Council resolutions [1325 \(2000\)](#) and [2493 \(2019\)](#), in particular on gender equality, the empowerment of women and girls and their human rights. UNAMA continues its advocacy on the full and meaningful participation of women in political processes at the local, national, regional and international levels.
10. In line with the United Nations Disability Inclusion Strategy, the Mission plans to revise its implementation plan with a view to: (a) reinforcing an organizational culture that respects the human rights and supports the inclusion of persons with disabilities; (b) further advancing disability inclusion in strategic planning and management, knowledge and information management and staff career development; and (c) addressing the barriers to accessibility in the workplace and in the performance of functions.

Evaluation activities

11. The audit by the Office of Internal Oversight Services (OIOS) of the integrated conduct and discipline function in Kuwait and related entities was completed in 2023. The Mission also completed an internal assessment, and another assessment of the “One United Nations” approach at the subnational level. The results and lessons of the audit and assessments have been taken into account in the proposed programme plan for 2025. For example, the findings and recommendations of the assessments have informed the approach to mandate implementation, including steps to improve the coherence of the United Nations in responding to the changed context.
12. The following evaluations are planned for 2025: audits by OIOS of the strategic delivery of the UNAMA mandate and of the UNAMA medical services.

Programme performance in 2023

Enhanced Mission-facilitated dialogue between diverse Afghan constituencies and the de facto authorities, including the identification of common interests for engagement

13. UNAMA engaged the de facto authorities on the protection of fundamental rights and freedoms, including for women. This engagement included outreach with the de facto authorities and other stakeholders to understand their positions and advocate for an articulated political and policy agenda supported by the de facto Cabinet and its leadership in Kandahar; and the facilitation of outreach and community engagements with the de facto authorities, religious leaders, youth, civil society and business actors. The Mission also engaged with the political opposition and former government officials. Outreach was impacted by restrictions on women, including United Nations national female personnel.
14. Despite significant restrictions on women, UNAMA continued countrywide consultations and created space for women to frame their agenda for dialogue with the de facto authorities. It also supported women’s engagement with the de facto authorities on their political and economic participation and empowerment.
15. Based on stakeholder engagements, UNAMA identified areas of common interest for targeted action, such as on counter-narcotics, climate change, microfinance and women’s entrepreneurship. It also engaged with the de facto authorities and other stakeholders on illicit small arms and light weapons accumulation and diversion.
16. Progress towards the objective is presented in the performance measure below (see table 1).

Table 1
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
Following the takeover by the Taliban, UNAMA-piloted dialogue initiatives between select Afghan constituencies and the de facto authorities to raise issues of community concern	Enhanced UNAMA-facilitated dialogues between diverse Afghan constituencies and the de facto authorities to discuss good governance principles and improve community relations, as well as to promote international community engagement with the de facto authorities on international norms and principles	Despite significant restrictions on women, continuous engagement with Afghan constituencies, as well as the facilitation of outreach meetings, contributed to maintaining some space for diverse voices

Planned results for 2025

Result 1: advancing economic and social self-reliance

Programme performance in 2023 and target for 2025

17. In 2023, the Mission, with the United Nations country team, completed the development of a results framework and monitoring system for the United Nations Strategic Framework for Afghanistan, 2023–2025, and continued to implement the post-August 2021 aid architecture for Afghanistan. UNAMA continued to assist the people of Afghanistan by mobilizing international assistance, supporting the finalization of the Framework for International Partner Support in Afghanistan, 2023–2025, and coordinating the Afghanistan Coordination Group to facilitate continued donor support.
18. In 2025, the Mission will engage with stakeholders at the national and subnational levels, including the de facto authorities, civil society and international NGOs, in supporting humanitarian assistance and basic human needs service delivery. UNAMA will support an inclusive economic dialogue and the implementation of essential reforms for the country's economic recovery. It will also foster an environment conducive to sustainable economic growth, including collaborative efforts with key stakeholders to address structural challenges, promote financial stability and implement policies that contribute to the revival and sustainability of Afghanistan.
19. Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 2).

Table 2
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Implementation of existing national priority programmes following completion of prioritization, sequencing and beginning of preparation for new programmes	Completion and implementation of a monitoring system and results framework for the United Nations Transitional Engagement Framework for Afghanistan through the new aid architecture for Afghanistan	Implementation of the United Nations system-wide strategic planning framework and the new aid architecture for Afghanistan, including multilateral financing for United Nations agencies	Continued implementation of the United Nations Strategic Framework for Afghanistan, 2023–2025, and the aid architecture for Afghanistan, including multilateral financing for United Nations agencies, funds and programmes, taking into consideration restrictions imposed on the female Afghan workforce by the de facto authorities	Continued implementation of the United Nations Strategic Framework for Afghanistan, 2023–2025, and the aid architecture for Afghanistan; and increased support towards an inclusive economic dialogue and the implementation of essential reforms to address obstacles to economic recovery

Result 2: rights-based stability in Afghanistan**Programme performance in 2023 and target for 2025**

20. In 2023, the Mission maintained regular engagement with the de facto authorities, other national stakeholders and the international community on matters related to human rights, the rule of law, governance and inclusion. Through the various ministries, the de facto authorities engaged at the subnational and national levels with various constituencies, including ethnic and religious minorities and community representatives from remote areas. UNAMA continued to engage other national and subnational stakeholders, including community representatives, religious scholars, political opposition and former government officials, women's groups, human rights defenders and civil society activists, former justice sector officials, and business actors. Following the de facto authorities' ban on female workers and amid shrinking civic space, UNAMA continued advocacy with the de facto authorities to reverse their restrictions on women, civil society and media, as well as to engage other national and subnational stakeholders, including community representatives, religious scholars, political opposition and former government and justice sector officials, women's groups, human rights defenders and civil society activists, and business actors.
21. In 2025, the Mission will continue to engage with the de facto authorities on overarching priorities, particularly on removing restrictions on women's and girls' rights and freedoms, ensuring the rights of ethnic and religious minorities and increasing efforts and transparency on accountability for human rights violations by de facto authorities and personnel. This work is expected to contribute to the level of international assistance to meet humanitarian and basic human needs and efforts towards compliance with international human rights and humanitarian law obligations, as well as a more conducive environment for inclusive governance.
22. Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 3).

Table 3
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Ad hoc engagement between de facto authorities and the international community	Regular United Nations engagement with the de facto authorities, other national stakeholders and the international community for sustained support to meet humanitarian and human needs, as well as compliance by relevant de facto authorities with international human rights and humanitarian law obligations	Regular United Nations engagement with the de facto authorities, non-Taliban figures and those from different ethnic groups and geographical regions, to advocate for inclusive governance as well as support for the establishment of mechanisms at the national and subnational levels for inclusive governance.	Continued efforts towards inclusive, representative, participatory and responsive governance; and pursuit of a political path for confidence-building between Afghan stakeholders and the international community	Continued efforts towards an inclusive, representative, participatory and responsive governance model, including dialogue between diverse Afghan constituencies and the de facto authorities
United Nations injection of cash for humanitarian assistance, in coordination with the Central Bank of Afghanistan and other partners	Regular United Nations injection of cash for humanitarian	Provision of support to the

	assistance, in coordination with the Central Bank and other partners Regular subnational outreach meetings and facilitated community relationship-building and engagement with de facto authorities	development of a structured policy dialogue for confidence-building between Afghan stakeholders and the international community		

Result 3: supporting efforts towards the full reintegration of the Afghan State with the international community

Proposed programme plan for 2025

23. UNAMA will focus on engagement with the de facto authorities and other Afghan stakeholders in supporting efforts towards the reintegration of Afghanistan into the international community while respecting the State's legal obligations. This engagement will include continued advocacy with the de facto authorities to reverse their restrictions on women, civil society and media.
24. The Mission will renew its efforts towards facilitating a dialogue between Afghan stakeholders that includes actors from all strata of society inside Afghanistan, as well as political actors based outside the country. The Mission will continue to support the United Nations country team and international partners with institutionalizing the monitoring of the delivery of principled basic human needs assistance into regular, verifiable reporting mechanisms for the accountability of the United Nations Strategic Framework.

Lessons learned and planned change

25. The lesson for the Mission was the need to continue coordination of the international community's priorities and donor funding streams across UNAMA and the United Nations country team. In applying this lesson, UNAMA will continue its advocacy and support for engagement with the international community and the de facto authorities to find ways to address ongoing impediments to the reintegration of Afghanistan into the international community.
26. Expected progress towards the objective is presented in the performance measure below (see table 4).

Table 4
Performance measure

Deliverables

27. Table 5 lists all deliverables of the Mission.

Table 5
Deliverables for the period 2023–2025, by category and subcategory

<i>Deliverables</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	4	4	4	4
1. Reports of the Secretary-General to the Security Council	4	4	4	4
Substantive services for meetings (number of three-hour meetings)	4	4	4	4
2. Meetings of the Security Council	4	4	4	4
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	48	54	42	50
3. Discussion/awareness-raising/sensitization sessions with human rights stakeholders, including local authorities, civil society organizations and human rights defenders, on human rights standards, where applicable	48	33	32	30
4. Consultations with Afghan women to enable an articulation of their views for engagement with the de facto authorities	–	21	10	20
Technical materials (number of materials)	1	5	1	1
5. Thematic or special human rights-related reports	1	5	1	1
C. Substantive deliverables				
Good offices: good offices with the de facto authorities, Afghan political and economic actors, civil society (inside and outside of Afghanistan) and countries in the region, to support inclusive, representative, participatory and responsive governance processes, peace and stability at the national, subnational and local levels and humanitarian and basic services access; good offices through support for dialogue and confidence-building measures between the de facto authorities and other stakeholders to encourage and build consensus on subnational governance, inclusion, civic space, youth and fundamental rights and freedoms; good offices for enhanced regional cooperation on security-political matters, economic development, disaster management and people-to-people contacts; and good offices for a coordinated international response to Afghanistan.				
D. Communication deliverables				
Outreach programmes, special events and information materials: outreach activities with Afghans, opinion leaders, the media, civil society, youth and other agents of change to support the implementation of the Mission's mandate.				
External and media relations: press conferences, statements, advisories, backgrounders, interviews and other media engagements related to the Mission's objectives.				
Digital platforms and multimedia content: dissemination of the Mission's mandated work through the Mission's website and social media accounts.				

B. Proposed post and non-post resource requirements for 2025

1. Total resource requirements

Resource requirements (regular budget)

Change	-	-	-	-	(1)	1	(1)	-	(4)	-	(5)	2	(21)	(19)	-	16	16	(8)

^a One post is funded at 50 per cent and cost-shared with the Development Coordination Office.

^b Includes one P-5 position and one P-4 position approved as general temporary assistance.

^c Includes one NPO position and one LL position proposed for establishment as general temporary assistance.

28. The proposed resource requirements for 2025 for UNAMA amount to \$126,119,300 (net of staff assessment) and would provide for civilian personnel costs (\$92,904,900) consisting of salaries, common staff costs and danger pay for the deployment of 1,149 posts and positions (1 Under-Secretary-General, 2 Assistant Secretary-General, 1 D-2, 5 D-1, 27 P-5, 54 P-4, 55 P-3, 5 P-2, 133 Field Service, 1 General Service, 128 National Professional Officer, 626 Local level and 111 United Nations Volunteer), inclusive of eight new positions proposed for establishment and 16 national United Nations Volunteers proposed for conversion from extrabudgetary resources; the cost of one military observer (\$23,700); and operational costs in the amount of \$33,190,700.
29. The decrease in the requirements for 2025 compared with the appropriation for 2024 is attributable to:
- (a) A decrease of \$96,000 for civilian personnel costs, reflecting the net effect of:
- (i) A decrease of \$1,687,100 for Local level staff costs owing to the application of a higher vacancy rate of 11.2 per cent, compared with 9.5 per cent applied in the 2024 approved budget; a lower share from the Mission of the staff costs for security-related posts, which

Note: The following abbreviations are used in tables: ASG, Assistant Secretary-General; FS, Field Service; GS, General Service; LL, Local level; NPO, National Professional Officer; UNV, United Nations Volunteer; USG, Under-Secretary-General.

are cost-shared with the agencies, funds and programmes, as described in paragraph 32 below; and the proposed abolishment of 23 posts;

- (ii) A decrease of \$570,500 for National Professional Officer posts due to the application of a higher vacancy rate of 15.5 per cent, compared with a vacancy rate of 10.5 per cent applied in the 2024 approved budget;
 - (iii) A decrease of \$238,800 for United Nations Volunteers, owing to the application of a cost-sharing ratio to 26 international medical-related positions with the agencies, funds and programmes, as described in paragraph 32 below, offset in part by the proposed conversion of 16 national United Nations Volunteer positions from extrabudgetary funding to regular budget funding, as described in paragraph 33 below;
 - (iv) An increase of \$2,305,100 for international staff, owing to: a. the application of a lower vacancy rate of 8.3 per cent, compared with a vacancy rate of 9.5 per cent applied for 2024; b. the application of the higher post adjustment multiplier for Afghanistan of 48.0 per cent compared with 38.7 per cent applied in the 2024 approved budget; and c. the proposed establishment of two posts (1 P-4 and 1 P-3);
- (b) A decrease of \$1,104,400 for operational costs, reflecting the net effect of:
- (i) A decrease of \$807,400 under facilities and infrastructure, attributable mainly to lower requirements for security services and maintenance services, as well as lower fuel costs;
 - (ii) A decrease of \$423,600 under air operations, owing primarily to lower anticipated rental and operational costs of the fixed-wing aircraft, as well as the reduced planned number of 700 flight hours based on recent usage patterns, compared with 1,060 flight hours included in the 2024 approved budget;
 - (iii) A decrease of \$201,200 under medical, owing primarily to the lower share from the Mission in the cost of shared medical services compared with the estimates applied in the 2024 approved budget;
 - (iv) An increase of \$427,300 under communications and information technology, attributable to higher requirements for the replacement of obsolete equipment that is critical to support the Mission's network security, as well as for the upgrade of equipment in connection with the enhancement of the perimeter monitoring systems of the compounds and premises.

Vacancy rates

30. The proposed vacancy rates applied in the budget take into account the experience to date. The assumptions considered for the proposed vacancy rates include the 12-month average vacancy rate in 2023 and the actual vacancy rate as at 31 March 2024. The lower of the two was used as the 2025 budgeted vacancy rate. This is in line with the policy guidance to improve the accuracy and consistency of the vacancy rates applied in the proposed budgets for 2025 and to ensure that proposed vacancy rates are based, as much as possible, on actual rates. A vacancy rate of 50 per cent has been applied in the calculation of costs for the proposed establishment of new posts and positions, or posts and positions proposed for reassignment.

Table 8
Vacancy rates

(Percentage)

<i>Category</i>	<i>Actual average in 2023</i>	<i>Approved 2024</i>	<i>Actual as at 31 March 2024</i>	<i>Proposed 2025</i>

International	9.3	12.0	5.3	9.3
National	20.0	40.0	5.0	5.0

2. Staffing requirements

31. For 2025, a number of reconfigurations and adaptations to the structure and staffing of UNAMA are proposed, resulting from efforts focused on:
- Streamlining the mission support structure, taking into account the prioritization of available resources and experience from other entities (the United Nations Assistance Mission for Iraq (UNAMI) in the case of staff counselling). To this end, it is proposed that: (i) the Supply Chain Management pillar and the Service Delivery Management pillar be merged into a new Supply Chain and Service Delivery Management pillar, leading to the abolishment of one P-5 post; and (ii) the Procurement Unit and the Acquisition Management Unit be realigned under the Operations and Resource Management pillar. In addition, it is proposed that the staff counselling services be partially outsourced, leading to the proposed abolishment of two posts (1 P-3 and 1 National Professional Officer);
 - Further streamlining of the Mission's driver capacities by rightsizing resources required to support the Mission's transport needs in an effort to make more efficient use of a central pool of drivers, leading to the proposed abolishment of 17 Driver posts (Local level) and the rebalancing of the remaining driver capacities through the redeployment of 12 posts (eight posts from substantive sections to the Transport Unit and four posts from the Transport Unit to the field offices);
 - Achieving consistency of the mission support team structures across field offices to better align support delivery with demand and practices in the field, resulting in the proposed reassignment of 11 posts;
 - Optimization of staffing resources to ensure that the Mission's staffing is tailored to the efficient execution of the Mission's mandate, aligned with the functions performed, and that positions are only retained after critical review for continuing needs.
32. With regard to cost-recovery activities, following a review of the cost-sharing arrangements with the agencies, funds and programmes, the 2025 budget incorporates progress made to increase the cost-sharing of services among more agencies and in more locations, as well as efforts to closely align budgeted resources with the Mission's contribution to the cost of these services. To this end, eight medical-related posts (1 P-4, 1 P-3, 2 National Professional Officer and 3 Local level) and 26 international United Nations Volunteer positions that provide capacity support to the Joint Medical Services and the United Nations Medical Emergency Response Team will be costed at 30 per cent,

representing the UNAMA share of the salary costs for these positions, resulting in a reduced funding requirement of \$1.6 million for 2025, compared with the full cost provided for in the 2024 budget. In addition, the budget takes into account the lowering of the UNAMA proportion for the staff costs of security guard personnel (Local level) in the UNAMA-managed field offices, in line with the memorandum of understanding, giving rise to a reduced funding requirement of \$1.2 million.

33. In view of the consistent low percentage of female national staff within the Mission, UNAMA is continuously undertaking efforts to address the gender issues, which are deeply interwoven in Afghan systematized patriarchal society, through capacity-building of women. With the support of the Department of Political and Peacebuilding Affairs of the Secretariat, the Mission implemented a national youth United Nations Volunteers project in 2019 targeting female national university graduates and young professionals to create entry-level job opportunities. This programme serves as a critical tool to help address the imbalance of female national staff, becoming a pipeline for young Afghan women to enter the workforce and thereby contributing to improved gender balance. To date, 31 former participants of the programme have been recruited by the United Nations or other international organizations. In October 2022, the General Assembly approved the conversion of 20 national United Nations Volunteer positions from extrabudgetary to regular budget funding. In continuation of the efforts to continue to improve the gender balance in the Mission's staffing, it is proposed that the currently existing 16 national United Nations Volunteer positions be converted from extrabudgetary resources to regular budget funding in 2025, to continue to support programmes of work of components across the Mission. These positions play a critical role in mission activities and are required in the longer term for mandate delivery and related operations.
34. In the context of the above, the staffing complement proposed for 2025 for the Mission reflects a net decrease of eight posts, as a result of the following changes:
- Abolishment of 32 posts (1 P-5, 2 P-3, 4 Field Service, 2 National Professional Officer and 23 Local level)
 - Establishment of eight posts (1 P-4, 1 P-3, 4 National Professional Officer and 2 Local level)
 - Reclassification of six posts
 - Reassignment of 12 posts
 - Redeployment of 12 posts
 - Conversion of 16 positions from extrabudgetary funding.
35. These changes are detailed by organizational unit in the sections below. Annex II to the present report provides the organizational charts.

36. The Special Representative of the Secretary-General for Afghanistan provides strategic leadership to the political, human rights and development/humanitarian coordination-related work of the United Nations in the country. The Special Representative serves as Head of Mission and is responsible for the executive management of the Mission's resources and administration. She is supported by the Front Office. The following organizational units report to the Special Representative: the Office of the Chief of Staff; the Human Rights Service; the Strategic Communications Section; the Gender Advisory Unit; and the Security Section.

Proposed organizational changes

Table 10

Human resources: Office of the Special Representative of the Secretary-General for Afghanistan

Total	(4)				

37. The following changes are proposed for 2025:

- (a) **Human Rights Service:** redeployment of one post of Driver (Local level) to the Transport Unit, as referred to in paragraph 31 (b);
- (b) **Strategic Communications Section:** establishment of one post of Public Information Officer (P-3) to support the Deputy Special Representative of the Secretary-General/Resident Coordinator/Humanitarian Coordinator in enhanced coordination and efficiencies in United Nations-wide content and messaging; strengthened communications and reporting around the increasingly demanding mandate priorities of risk management, prevention of aid diversion and upholding international humanitarian law, including increased demands for public and donor reporting on mission efforts to increase accountability, transparency and the effective use of aid; enhanced thematic advocacy on climate change and environment issues; data-driven public advocacy on gender-related themes; promotion of social, economic and cultural rights and the rights of persons with disabilities; support to the coordination of the humanitarian mine action sector; increased vernacular advocacy and content production; and increased monitoring and analysis to counter the threat of mis- and disinformation;
- (c) **Security Section:**
 - (i) Abolishment of three posts of Security Officer (Field Service) following a review of the Section's workload, whereby it was determined that functions can be effectively carried out by the remaining existing capacities within the Section;
 - (ii) Redeployment of three posts of Driver (Local level) to the Transport Unit, as referred to in paragraph 31 (b);
 - (iii) Conversion of two positions of Local Security Assistant (national United Nations Volunteer) from extrabudgetary resources to regular budget funding, as referred to in paragraph 33, to provide effective administrative, logistical and operational support to the Crisis Coordination Centre in the Security Section and serve as the first security point of contact to all United Nations staff requiring security assistance.

38. The Afghanistan Team of the Asia and the Pacific Division of the Department of Political and Peacebuilding Affairs (1 D-1, 1 P-5, 1 P-4, 1 P-3 and 1 General Service (Other level)) will continue to provide backstopping to the Mission, including the provision of operational support, assistance in identifying and prioritizing critical strategic objectives in line with the Mission's mandate and political needs, and engagement with Member States and other key regional and international partners.

39. The Deputy Special Representative of the Secretary-General (Political Affairs) advises the Special Representative of the Secretary-General on political issues and the dynamics affecting the implementation of the mandate of the Mission, and manages the political pillar. The Deputy Special Representative supports the implementation of the mandate through the provision of regular analyses of the political situation in the country and the region, by: (a) liaising with the international community, diplomatic community and NGOs in Afghanistan on political issues; (b) coordinating political priorities within the Mission and with United Nations Headquarters; and (c) providing good offices and outreach, particularly in the areas of political stability and regional cooperation.

Table 13

Strategic Engagement Advisory Unit	-1	LL	Driver	Redeployment		To Transport Unit
Total	(1)					

40. The following changes are proposed for 2025:

(a) Political Affairs Service:

- (i) Reassignment of one post of Assistant Electoral Officer (National Professional Officer) as Assistant Political Affairs Officer (National Professional Officer) to reflect adjustments to the roles and responsibilities needed to meet the objectives of the Service, in line with paragraph 5 (d) of Security Council resolution 2626 (2022), wherein the Mission is mandated to perform analysis of the political economy, including a better understanding of the illicit economy;

- (ii) Redeployment of three posts of Driver (Local level) to the Transport Unit, as referred to in paragraph 31 (b);
- (iii) Conversion of three positions of Associate Political Affairs Officer (national United Nations Volunteer) from extrabudgetary resources to regular budget funding, as referred to in paragraph 33, to monitor, support and report on activities related to political inclusion and security-related activities by the de facto security forces, facilitate engagement with different actors, and support data collection and management as the basis for political economy analysis;
- (b) **Strategic Engagement Advisory Unit:** redeployment of one post of Driver (Local level) to the Transport Unit, as referred to in paragraph 31 (b).

^a Funded at 50 per cent and cost-shared with the Development Coordination Office.

^b Includes one P-5 position and one P-4 position approved as general temporary assistance.

^c Includes one NPO position and one LL position proposed for establishment as general temporary assistance.

41. The Deputy Special Representative of the Secretary-General/Resident Coordinator/Humanitarian Coordinator is responsible for maintaining links with the United Nations country team as part of the role of Resident Coordinator and Humanitarian Coordinator. The Security Council, in paragraph 5 (a), (b), (i) and (j) of its resolution [2626 \(2022\)](#), mandated the Deputy Special Representative to coordinate and facilitate the provision of humanitarian assistance and financial resources to support humanitarian activities; coordinate international donors and organizations in relation to basic human needs; coordinate the overall risk management approach of the United Nations in Afghanistan; and coordinate explosive ordnance threat mitigation measures in support of humanitarian and development initiatives.

Total	+3				

42. The following proposals are made for 2025:

Front Office of the Deputy Special Representative/Resident Coordinator/Humanitarian Coordinator:

- (a) Establishment of one post of Economic Affairs Officer (P-4) to support United Nations and development partners to identify and implement policies and strategies for economic diversification, fostering entrepreneurship and improving access to international markets, as well as to strengthen reporting by UNAMA on economic progress and challenges. In alignment with Security Council resolution [2626 \(2022\)](#), this post will play a crucial role in the coordination of international donors and financial institutions to support economic and social conditions for self-reliance and stability. The proposed post will provide the Mission with the required technical expertise that it currently lacks in the areas of economic recovery, trade and transit, and financial systems analysis;
- (b) Continuation of two general temporary assistance positions, comprising:
- (i) One position of Senior Programme Management Officer (P-5), to continue to lead the implementation of the Mission's mine action programme in line with Security Council resolution [2626 \(2022\)](#), paragraph 5 (c). The incumbent will continue to provide technical and strategic advice to Mission leadership and relevant stakeholders on mine action and engage with national mine action authorities, the United Nations country team and the humanitarian team to advocate for mine action;
- (ii) One position of Coordination Officer (P-4), to continue to undertake research and analysis, triangulating information on the delivery of assistance in Afghanistan, and facilitate engagement and negotiation with the de facto institutions around operational challenges in delivering humanitarian and basic human needs assistance

to the people of Afghanistan, as well as advocating with the de facto authorities for rights, inclusion, equity, transparency and accountability in aid delivery.

43. The Mine Action Service of the United Nations provides mine detection and mine-clearing services to UNAMA through its long-standing partnership with the United Nations Office for Project Services (UNOPS), in accordance with the umbrella memorandum of understanding between the United Nations and UNOPS. OIOS recommended in its audit on the monitoring and evaluation mechanism of the Mine Action Service that the Service strengthen its control environment and increase financial monitoring, as well as monitoring and evaluation. The Board of Auditors, in its audit of the United Nations peacekeeping operations for the period from 1 July 2019 to 30 June 2020, recommended that the Mine Action Service reduce dependency on UNOPS and evaluate the benefits of implementing a certain share of mine action activities itself (A/75/5 (Vol. II), chap. II, para. 175).
44. In this context, it is proposed that two general temporary assistance positions (1 National Professional Officer and 1 Local level) be established, as shown in table 15 above, to advance the UNAMA mine action objectives in the most effective, cost-efficient and transparent manner. The establishment of these two positions will replace the previous arrangement of using UNOPS in delivering such services, for which resources for two national personnel were formerly budgeted under the “other supplies, services and equipment” budget class. This approach will improve the governance and transparency of the delivery of the mine action programme by providing a direct reporting line for mine action personnel to the existing Senior Programme Management Officer (P-5) referenced in paragraph 42 (b) (i) above. The proposal will also improve the effectiveness of programme delivery by ensuring that the core functions are performed by UNAMA personnel. In addition, cost-efficiency will be achieved in staffing and in the avoidance of programme support costs from the previous implementation modality with UNOPS that are no longer applicable, as outlined in table 16.

Table 16
New delivery model for mine action programme

(Thousands of United States dollars)

Category	Amount	Initiative
The estimated efficiency is achieved in staffing and in programme support costs that are no longer applicable, which had previously been budgeted under “Other supplies, services and equipment” for mine detection and mine clearing services, as follows:		
Other supplies, services and equipment	158.7	2 posts (national personnel) (\$146,700), and UNOPS programme service costs and administrative costs (\$12,000) that are no longer applicable
General temporary assistance	(64.3)	2 temporary positions (1 NPO and 1 LL) transferred to the UNAMA staffing table at a vacancy rate of 50 per cent. In subsequent periods, in terms of full cost, the annual cost estimate would be \$128,600
Total	94.4	Estimated cost-efficiencies of \$94,400 in 2025. In subsequent periods, in terms of full cost, the estimated annual cost-efficiencies would be approximately \$30,100 from 2026 onward.

45. The functions of the two general temporary assistance positions proposed for establishment are as follows:
- One position of Associate Programme Management Officer (National Professional Officer) to support the development of explosive ordnance threat assessments, provide technical expertise on explosive ordnance threat mitigation to UNAMA as well as to the de facto authority Directorate of Mine Action Coordination in the review and implementation of national and international mine action standards, and facilitate coordination of the mine action response in Afghanistan and information-sharing between UNAMA, the de facto authority Directorate and mine action operators in Afghanistan, comprising over 35 national and international NGOs;
 - One position of Data Analysis Assistant (Local level) to be responsible for mine action data analysis and interpretation and the preparation of a wide range of information management

products, including maps and dashboards, in support of the day-to-day implementation of the Mission's mine action programme.

46. These resource requirements were reviewed by the Mine Action Service Programme Review Committee, composed of Headquarters and Mission personnel, to ensure that the mine action programme in UNAMA is designed to support the delivery of the UNAMA mandate efficiently and effectively.

47. Mission Support functions are under the overall responsibility of the Chief of Mission Support, who coordinates and supervises three main workstreams, namely, operations and resource management, service delivery management, and supply chain management.
48. The Chief of Mission Support acts as the principal adviser to the Head of Mission on all matters pertaining to administrative and logistical support and is supported by the Chiefs of the Operations and Resource Management and the Supply Chain and Service Delivery Management pillars.
49. With a view to achieving greater efficiency gains through the streamlining of structures, and following consultation with the Office of Supply Chain Management in the Department of Operational Support, it is proposed that the Supply Chain Management and the Service Delivery

Management pillars be merged to form the Supply Chain and Service Delivery Management pillar, with a consequent realignment of the Procurement Unit and the Acquisition Management Unit from the Supply Chain Management pillar to the Operations and Resource Management pillar to enable segregation of duties and balanced distribution of labour between the two remaining pillars.

50. The Operations and Resource Management pillar will continue to be responsible for general support and the management of operations and resources. The Chief of Operations and Resource Management, reporting to the Chief of Mission Support, oversees the Human Resources and Training Section, the Budget and Finance Unit, the Field Technology Section and the coordination of support provided by Mission Support field offices. As noted above, for 2025, it is proposed that the Procurement Unit and the Acquisition Management Unit be moved from the Supply Chain Management pillar to the Operations and Resource Management pillar.
51. The Supply Chain and Service Delivery Management pillar will be responsible for managing and coordinating the flow of supply chain goods and services and the provision of key logistical support services to all Mission components and other clients. The Chief of Supply Chain and Service Delivery Management, reporting to the Chief of Mission Support, oversees the Property Management Unit, the Centralized Warehousing Unit, the Aviation and Movement Control Section, the General Supply and Fuel Unit, the Engineering and Facilities Maintenance Section, the Transport Unit and the Medical, Staff Counselling and Welfare Section.

Total	+1				

52. The following change is proposed for 2025:

Office of the Chief of Mission Support: reassignment of an Aviation Technical Compliance Officer (P-3) from the Aviation and Movement Control Section as a Data Analyst (P-3) to support workforce capabilities in data analytics and management, and the development of dashboards and business intelligence reports to support strategic resource management. The post will be used to support the generation, analysis and communication of data-driven facts and insights in support of more effective monitoring and oversight of compliance and decision-making. The creation of this post will enable the Mission to use technology and data to better support the implementation and delivery of mandated activities.

Operations and Resource Management

Total	+17				

53. The following changes are proposed for 2025:

- (a) **Office of the Chief of Operations and Resource Management:** conversion of one position of Field Coordination Assistant (national United Nations Volunteer) from extrabudgetary resources to regular budget funding (see para. 33 above) to support the ongoing coordination of the work in the field offices, compile information to support decision-making, and conduct more streamlined engagement, communication and reporting;
- (b) **Field Technology Section:** conversion of two positions of Associate Information Management Assistant (national United Nations Volunteer) from extrabudgetary resources to regular budget funding (see para. 33 above) to support the implementation of the file classification scheme and records management;
- (c) **Human Resources and Training Section:** conversion of one position of Human Resources Assistant (national United Nations Volunteer) from extrabudgetary resources to regular budget funding (see para. 33 above) to support the work of the Section, specifically on recruitment tasks for national posts, to include the review of applications to ensure that candidates meet eligibility criteria, initiation of and follow-up on reference checks, administration of entitlements and benefits, and assistance in preparing background materials to support the recruitment process;
- (d) **Procurement Unit:** realignment of the Procurement Unit, comprising eight posts and positions (1 P-4, 1 P-3, 2 Field Service, 1 National Professional Office, 2 Local level and 1 United Nations Volunteer), from the Supply Chain Management pillar (see para. 49 above);
- (e) **Acquisition Management Unit:** realignment of the Acquisition Management Unit, comprising five posts and positions (1 Field Service, 2 Local level and 2 United Nations Volunteer), from the Supply Chain Management pillar, (see para. 49 above).

Total	(35)				

54. The following changes are proposed for 2025:

(a) **Office of the Chief of Supply Chain and Service Delivery Management:**

- (i) Merger of the Supply Chain Management pillar with the Service Delivery Management pillar to form the Supply Chain and Service Delivery Management pillar, as described in paragraph 49 above. In this connection, it is proposed that the Centralized Warehousing Unit and the Property Management Unit currently under the Supply Chain Management pillar be subsumed into the new proposed pillar. In addition, it is further proposed that the

Procurement Unit (8 posts) and the Acquisition Management Unit (5 posts) be realigned to the Operations and Resource Management pillar, as set out in paragraph 50 above;

- (ii) Abolishment of one post of Chief, Supply Chain Management (P-5) in view of the consolidation of the two previously separate pillars;
- (b) **Centralized Warehousing Unit:**
- (i) Abolishment of one post of Administrative Assistant (Local level) following a review of the workload of the Unit, whereby it was determined that the functions of the post can be subsumed by the remaining capacities;
 - (ii) Reassignment of one post of Vehicle Technician (Field Service) as a Logistics Assistant (Field Service) to enhance the capacity of the Unit to support the end-to-end supply chain processes. The post will ensure that all materials purchased by the Mission are correctly received, stored and accounted for until properly disposed of;
- (c) **Aviation and Movement Control Section:**
- (i) Reassignment of one post of Aviation Technical Compliance Officer (P-3) as a Data Analyst (P-3) in the Office of the Chief of Mission Support to support workforce capabilities in data analytics and management, digital transformation and innovation, as described in paragraph 52 above;
 - (ii) Abolishment of four posts, namely, one Associate Movement Control Officer (National Professional Officer), two Movement Control Assistants (Local level) and one Air Operations Assistant (Local level), following a review of the workload of the Section, whereby it was determined that the functions of the posts can be effectively carried out by the remaining capacities within the Section;
 - (iii) Conversion of one position of Air Operations Assistant (national United Nations Volunteer) from extrabudgetary resources to regular budget funding (see para. 33 above) to support the work of the Section, including the management of the electronic databases, the monitoring of agreed periods of aircraft non-availability due to maintenance and/or aircrew sickness and that valid maintenance/medical release certificates are provided, and the monitoring and verification of aviation fuel consumption;
- (d) **Medical, Staff Counselling and Welfare Section:**
- (i) Abolishment of two posts, namely, one Staff Counsellor (P-3) and one Associate Staff Counsellor (National Professional Officer), in connection with the proposal to partially outsource the Mission's staff counselling capacity (see para. 92 below), while leveraging the available capacity of the Stress Counsellor of the Department of Safety and Security of the Secretariat. To this end, the remaining staff counselling capacity, comprising one Associate Staff Counsellor (National Professional Officer) and one Staff Counsellor (international United Nations Volunteer), will continue to provide on-site counselling services and coordinate engagement with external service providers with the support of the Stress Counsellor of the Department of Safety and Security;
 - (ii) Abolishment of one post of Nurse (Local level) following a review of the workload of the Section, whereby it was determined that the functions of the post can be effectively subsumed by the remaining posts within the Section;
- (e) **General Supply and Fuel Unit:**
- (i) Abolishment of one post of Fuel Assistant (Field Service) following a review of the workload of the Unit, whereby it was determined that the functions of the post can be effectively subsumed by the remaining posts within the Unit;
 - (ii) Conversion of one position of Finance Assistant (national United Nations Volunteer) from extrabudgetary resources to regular budget funding (see para. 33 above), to support the

work of the Unit, including management of and reporting on the Unit's regular and cost-recovery budget expenditure, and the processing of invoices and payments;

(f) **Transport Unit:**

- (i) Abolishment of 17 posts of Driver (Local level), resulting from the further streamlining of activities and the optimization of resources, taking into account a full year of experience gained following the consolidation of all UNAMA personnel in one main compound;
- (ii) Redeployment of eight posts of Driver (Local level), comprising three from the Political Affairs Service, three from the Security Section, one from the Human Rights Service and one from the Strategic Engagement Advisory Unit, to augment the Unit and the central pool of drivers, in view of the proposed abolishment of the 17 posts noted above;
- (iii) Redeployment of four posts of Driver (Local level) (two to the Bamyan Field Office, one to the Kunduz Field Office and one to the Kandahar Field Office), to support the field offices' increasing number of road missions.

Field offices in regions and provinces

55. The field offices will continue to drive mandate implementation at the subnational level through the building of effective working relationships with the de facto authorities to facilitate an enabling environment for mandate and programme implementation and to strengthen the coherence of United Nations activities. They will provide: (a) support for the provision of essential services to Afghans; (b) support for dialogue between the de facto authorities and local stakeholders on issues of subnational governance, basic rights and inclusion; (c) outreach and good offices, including the facilitation of dialogue between political stakeholders, focusing on promoting inclusive, representative, participatory and responsive governance and broad participation in public life; and (d) advice on local consultative mechanisms, confidence-building measures, and conflict management and reconciliation. The field offices will also maintain situational awareness, reporting and analysis, and engage with all stakeholders at the subnational level in the protection and promotion of human rights.
56. The Mission currently maintains six regional offices, located in Kabul, Kandahar, Herat, Balkh (Mazar-e Sharif), Nangarhar (Jalalabad) and Paktiya (Gardez), and five provincial offices, located in Bamyan, Faryab (Maymana), Badakhshan (Faizabad), Baghlan (Pul-e Khumri) and Kunduz.
57. The Heads of Office have a direct reporting line to the Chief of Staff.

Total	+2				

58. The following changes in the UNAMA regional offices are proposed for 2025:

- (a) **Kabul:** conversion of three national United Nations Volunteer positions from extrabudgetary resources to regular budget funding (see para. 33 above), comprising one position of Gender Affairs Officer to support the work of the Office in the areas of monitoring and reporting on gender-related issues, and one position of Associate Political Affairs Officer and one position of Associate Political Affairs Assistant to provide political analysis and support in the monitoring of provincial- and district-level developments;
- (b) **Kandahar:**
 - (i) Reassignment of one post of Air Operations Assistant (Local level) as Logistics Assistant (Local level) following a review of mission support capacities in field offices to reflect adjustments to the roles and responsibilities currently undertaken by the post in line with operational requirements, with a view to ensuring consistency in the mission support structure across field offices;
 - (ii) Reassignment of one post of Facilities Management Assistant (Local level) as Logistics Assistant (Local level) to the Bamyan Field Office to ensure that logistics support is provided to all field offices;
 - (iii) Redeployment of one post of Driver (Local level) from the Transport Unit to support the offices to meet the demand of an increasing number of road missions;
 - (iv) Conversion of one position of Associate Political Affairs Officer (national United Nations Volunteer) from extrabudgetary resources to regular budget funding (see para. 33 above), to provide political analysis and support in the monitoring of provincial- and district-level developments;
- (c) **Herat:**
 - (i) Reassignment of one post of Air Operations Assistant (Local level) as Logistics Assistant (Local level) to reflect adjustments to the roles and responsibilities currently undertaken by the post in line with operational requirements, with a view to ensuring consistency in the mission support structure across field offices;
 - (ii) Reassignment of one post of Facilities Management Assistant (Local level) as Logistics Assistant (Local level) in the Gardez Field Office to ensure that logistics support is provided to all field offices;
- (d) **Mazar-e Sharif:**
 - (i) Reassignment of one post of Information Systems Assistant (Field Service) as Administrative Officer (Field Service) to enhance the day-to-day administrative needs of the Office. The incumbent will also be responsible for the coordination of actions related to the administration of the human resources activities, and budget and finance functions within the Office;
 - (ii) Reassignment of one post of Air Operations Assistant (Local level) as Logistics Assistant (Local level) to reflect adjustments to the roles and responsibilities currently undertaken by the post in line with operational requirements, with a view to ensuring consistency in the mission support structure across field offices;
 - (iii) Reassignment of one post of Facilities Management Assistant (Local level) as Information Systems Assistant (Local level) in the Kunduz Field Office to provide the information technology infrastructure and end-user support to include covering application support, server/data administration, network administration and other information and communications technology-related service support to the Kunduz Field Office. The incumbent will also undertake logistical support functions covering aviation and facilities management;

(e) **Jalalabad:**

- (i) Abolishment of one post of Security Coordination Officer (P-3) following a review of the workload of the Jalalabad Field Office, taking into account the capacity in the Office, leading to the streamlining of some functions;
- (ii) Reassignment of one post of Air Operations Assistant (Local level) as Logistics Assistant (Local level) to reflect adjustments to the roles and responsibilities currently undertaken by the post in line with operational requirements, with a view to ensuring consistency in the mission support structure across field offices;
- (iii) Conversion of one position of Associate Political Affairs Officer (national United Nations Volunteer) from extrabudgetary resources to regular budget funding (see para. 33 above), to support the Field Office in the areas of gathering, selecting and analysing information from diverse sources through engagement with various governmental and non-governmental counterparts, with special attention to the representation of all segments of society, including vulnerable categories such as minorities and women; and supporting the monitoring of provincial- and district-level developments and keeping abreast of the latest trends and developments in the area of assignment in accordance with the priorities established by the Mission;

(f) **Gardez:**

- (i) Reassignment of one post of Air Operations Assistant (Local level) to Bamyan Field Office as an Administrative Assistant (Local level) to enhance the day-to-day administrative functions of the Office, including human resources management and budget and finance management, as well as undertaking logistics support functions covering aviation and facilities management;
- (ii) Reassignment of one post of Facilities Management Assistant (Local level) from Herat Field Office as Logistics Assistant (Local level) to ensure that logistics support is provided to all field offices.

Total	+9				

59. The following changes in the UNAMA provincial offices are proposed for 2025:

(a) **Bamyan:**

- (i) Establishment of one post of Political Affairs Assistant (Local level) to support outreach, reporting on conflict drivers, specifically Kuchi nomad migration and marginalization of the local population, and the mapping of significant actors and related dynamics. The post will also support information gathering for the analysis of developments in the region, including conflict dynamics, and assist preparations for outreach and engagement with external and internal partners for the successful development and implementation of specific conflict prevention and resolution initiatives. In support of the core peace and governance activities, the post would also contribute to enhanced United Nations inter-agency coordination on related matters by providing support to the secretariat of the United Nations regional team (comprising all United Nations entities operating in the Central Highlands region);
- (ii) Abolishment of one post of Administrative Assistant (Local level) following a review of mission support capacities in the field offices, which identified that the functions of the post had evolved to a higher-level skill set. To this end, there is a need to strengthen the capacity of the Office, and it is therefore proposed that the post be abolished and an Assistant Administrative Officer (National Professional Officer) be established, as set out in subparagraph (iii) below;
- (iii) Establishment of one post of Assistant Administrative Officer (National Professional Officer) in combination with the abolishment of the Administrative Assistant (Local level). The post will be responsible for all the administrative functions in the Field Office, including human resources management, budget and finance management and logistics support, and will bolster the decision-making process within the Office;
- (iv) Redeployment of two posts of Driver (Local level) from the Transport Unit to support the increased number of road missions;
- (v) Reassignment of two posts, namely, one Logistics Assistant (Local level) from Kandahar and one Administrative Assistant (Local level) from Gardez (see para. 57 (b) and (f) above);

(b) **Maymana:** establishment of Assistant Political Affairs Officer (National Professional Officer) to strengthen national capacity in the Office in support of independent travels and coverage to the 17 districts in Faryab Province, support the Head of the Field Office in setting priorities for good offices and outreach efforts, and support the analysis of relevant conflict dynamics and the development of specific conflict prevention and resolution projects, as well as preparatory outreach and engagement with external and internal partners;

(c) **Pul-e Khumri:** establishment of Assistant Political Affairs Officer (National Professional Officer) in response to the identified need to enhance national personnel capacity to enable independent travel to all districts in Baghlan Province and support the Head of the Field Office in determining priorities for good offices, outreach efforts, and advising Mission leadership on matters impacting the area of responsibility. The incumbent would be required to meet with interlocutors and coordinate their engagement with the de facto authorities, facilitate the mapping of governance relationships of the de facto authorities with local communities, and

engaging with external and internal partners to ensure the successful implementation of the political affairs work of the Office. Additionally, the incumbent will gain an in-depth understanding of relationships among the de facto authorities and community perceptions, coordinate relevant information for collaboration with the broader United Nations family in humanitarian assistance, basic humanitarian needs support and public service delivery, and monitor local security dynamics and assess their impact at the provincial, regional and national levels;

- (d) **Kunduz:**
- (i) Redeployment of one post of Driver (Local level) from the Transport Unit to support the increase in the number of road missions;
 - (ii) Reassignment of one post of Facilities Management Assistant (Local level) from Mazar-e Sharif as an Information Systems Assistant (Local level) to provide the information technology infrastructure and end-user support to the Office, as described in paragraph 58 (d) (iii) above;
 - (iii) Reassignment of one post of Air Operations Assistant (Local level) as Logistics Assistant (Local level) to undertake logistical support functions covering aviation and facilities management.

60. The Consolidated Kuwait Office comprises two components:
- (a) **UNAMA Support Office in Kuwait**, which includes one mission staff located in Kuwait, undertakes support functions that are not related to the Kuwait Joint Support Office, namely the post of Chief, Integrated Conduct and Discipline Unit (P-5), reporting directly to the Chief of Staff;
 - (b) **Kuwait Joint Support Office**,¹ which provides full services to UNAMA and UNAMI and other missions. UNAMA contributes 39 posts (1 P-5, 1 P-4, 2 P-3, 1 P-2, 14 Field Service and 20 Local level) funded directly from the mission's budget.
61. The UNAMA Support Office in Kuwait and the Kuwait Joint Support Office are co-located within the premises occupied by UNAMI in Kuwait City.
62. No changes are proposed to the UNAMA Support Office in Kuwait and the Kuwait Joint Support Office.

¹ In its resolution 65/259, the General Assembly noted the intention of the Secretary-General to establish a support office in Kuwait for UNAMA and requested him to explore possibilities for cost-sharing between UNAMA and UNAMI. Following a period of assessment, in October 2012 the Secretary-General informed the Assembly that the Kuwait Office would include a Kuwait Joint Support Office, which would integrate UNAMA and UNAMI functions in the areas of finance and human resources.

Table 25
Staffing requirements: Kuwait Joint Support Office

4. Analysis of resource requirements

Military and police personnel costs

(Thousands of United States dollars)

	Appropriation 2023	Expenditures 2023	Appropriation 2024	Requirements 2025	Variance 2025 vs. 2024
Military observers	24.6	15.3	28.7	23.7	(5.0)

63. Resources amounting to \$23,700 are proposed to provide for the deployment of one military observer, which includes requirements for: (a) mission subsistence allowance based on the standard daily rate of \$63 for the “first 30 days” and \$42 for “after 30 days”, given that accommodation is provided (\$16,000); (b) travel costs for placement, rotation and repatriation to and/or from the military observer’s country of residence (\$7,500); and (c) clothing allowance based on a standard rate of \$100 for every six-month period of service (\$200).
64. The decrease is attributable to the removal of a provision for death and disability compensation following a review of the historical expenditure pattern.

Civilian personnel costs

(Thousands of United States dollars)

	<i>Appropriation 2023</i>	<i>Expenditures 2023</i>	<i>Appropriation 2024</i>	<i>Requirements 2025</i>	<i>Variance 2025 vs. 2024</i>
International staff	54 831.6	56 379.4	55 059.0	57 364.1	2 305.1

65. Resources amounting to \$57,364,100 are proposed to provide for salaries (\$29,673,500), common staff costs (\$24,931,500) and danger pay (\$2,759,100) for 284 international posts (1 Under-Secretary-General, 2 Assistant Secretary-General, 1 D-2, 5 D-1, 27 P-5, 54 P-4, 55 P-3, 5 P-2, 133 Field Service and 1 General Service (Other level)), including the establishment of two posts (1 P-4 and 1 P-3).
66. A vacancy rate of 8.3 per cent has been applied to the estimates for continuing posts, based on the actual vacancy rate in March 2024, while a vacancy rate of 50 per cent has been applied to the two posts proposed for establishment and the three posts (1 P-3 and 2 Field Service) proposed for reassignment.
67. The increase is attributable mainly to: (a) the application of a lower vacancy rate of 8.3 per cent, compared with a vacancy rate of 9.5 per cent applied for 2024; (b) the application of the higher post adjustment multiplier for Afghanistan of 48.0 per cent compared to 38.7 per cent applied in the 2024 approved budget; and (c) the proposed establishment of two posts (1 P-4 and 1 P-3). The increased requirements are offset in part by: (a) the proposed abolishment of six posts (1 P-5, 2 P-3 and 4 Field Service); (b) the proposed reassignment of three posts (1 P-3 and 2 Field Service), with the application of a 50 per cent vacancy rate; and (c) the application of a lower percentage of common staff costs at 84 per cent based on recent expenditure patterns, compared with 86 per cent applied in the 2024 approved budget.

(Thousands of United States dollars)

	<i>Appropriation 2023</i>	<i>Expenditures 2023</i>	<i>Appropriation 2024</i>	<i>Requirements 2025</i>	<i>Variance 2025 vs. 2024</i>
National Professional Officer	10 311.3	8 696.3	9 504.2	8 933.5	(570.7)

68. Resources amounting to \$8,933,500 are proposed to provide for salaries (\$5,991,300), common staff costs (\$2,206,200) and danger pay (\$736,000) for 127 National Professional Officer posts, including the establishment of three posts.
69. A vacancy rate of 15.5 per cent has been applied to the estimates for continuing posts, based on the actual average vacancy rate in 2023.
70. The decrease is attributable mainly to the application of a higher vacancy rate of 15.5 per cent, compared with 10.5 per cent applied for 2024, the proposed abolishment of two posts, and the proposed reassignment of one post, with the application of a 50 per cent vacancy rate. The decreased requirements are offset in part by the application of a higher percentage of common staff costs at

37 per cent based on recent expenditure patterns, compared with 31 per cent applied in the 2024 approved budget, as well as the proposed establishment of three posts.

(Thousands of United States dollars)

	<i>Appropriation 2023</i>	<i>Expenditures 2023</i>	<i>Appropriation 2024</i>	<i>Requirements 2025</i>	<i>Variance 2025 vs. 2024</i>
Local level staff	24 150.8	22 518.3	23 391.5	21 704.4	(1 687.1)

71. Resources amounting to \$21,704,400 are proposed to provide for salaries (\$12,915,600), common staff costs (\$5,383,800) and danger pay (\$3,405,000) for 625 national Local level posts, including the proposed establishment of one post.
72. A vacancy rate of 11.2 per cent has been applied to the estimates for continuing posts, based on the actual average vacancy rate in 2023.
73. The decrease is attributable mainly to: (a) the adjustment of the cost-shared ratios for the costs of security guard posts (to reflect the UNAMA contribution); (b) the application of a higher vacancy rate of 11.2 per cent, compared with 9.5 per cent approved for 2024; (c) the proposed abolishment of 23 posts; and (d) the proposed reassignment of nine posts, with the application of a 50 per cent vacancy rate.

(Thousands of United States dollars)

	<i>Appropriation 2023</i>	<i>Expenditures 2023</i>	<i>Appropriation 2024</i>	<i>Requirements 2025</i>	<i>Variance 2025 vs. 2024</i>
United Nations Volunteers	4 692.5	3 995.3	4 567.4	4 328.6	(238.8)

74. Resources amounting to \$4,328,600 are proposed to provide for the deployment of 111 United Nations Volunteer positions (75 international and 36 national), including the proposed conversion from extrabudgetary resources of 16 national United Nations Volunteer positions.
75. Vacancy rates of 5.3 per cent and 5.0 per cent have been applied to the estimates for international and national United Nations Volunteers, respectively, based on the actual vacancy rate in March 2024.
76. The decrease is attributable to the application of a 30 per cent cost-shared ratio (reflecting the UNAMA contribution) to the costs of 26 international United Nations Volunteer positions in connection with the Joint Medical Services and the United Nations Medical Emergency Response Team, compared with the full costs provided for in the approved 2024 budget. The reduced requirements are offset in part by the proposed conversion of 16 national United Nations Volunteer positions from extrabudgetary funding, and the application of a lower vacancy rate of 5.3 per cent for international United Nations Volunteers, compared with the vacancy rate of 12.0 per cent approved for 2024, and the application of a lower vacancy rate of 5.0 per cent for national United Nations Volunteers, compared with the vacancy rate of 40 per cent approved for 2024.

(Thousands of United States dollars)

	<i>Appropriation 2023</i>	<i>Expenditures 2023</i>	<i>Appropriation 2024</i>	<i>Requirements 2025</i>	<i>Variance 2025 vs. 2024</i>
General temporary assistance	369.3	159.9	478.8	574.3	95.5

77. Resources amounting to \$574,300 are proposed to provide for the continuation of two general temporary assistance positions (1 P-5 and 1 P-4), as well as the proposed establishment of two general temporary assistance positions (1 National Professional Officer and 1 Local level), as explained in paragraphs 43-45 above.
78. A vacancy rate of 8.3 per cent has been applied to the cost estimates for the continuing positions, based on the actual vacancy rate for international staff in March 2024, while a vacancy rate of 50 per cent has been applied to the two positions proposed for establishment.
79. The increase is attributable primarily to: (a) the proposed establishment of two general temporary assistance positions, with the application of a vacancy rate of 50.0 per cent in line with standard budgetary practice, in connection with the transfer of the remaining core functions and the delivery of the mine action programme to UNAMA, formerly provided by two UNOPS personnel, for which the provision was included under other supplies, services and equipment (for mine detection and mine clearing services) in the approved 2024 budget; and (b) the application of a lower vacancy rate of 8.3 per cent to the two existing international positions, compared to the rate of 9.5 per cent approved for 2024.

Operational costs

(Thousands of United States dollars)

	<i>Appropriation 2023</i>	<i>Expenditures 2023</i>	<i>Appropriation 2024</i>	<i>Requirements 2025</i>	<i>Variance 2025 vs. 2024</i>
Consultants and consulting services	19.6	3.7	19.6	19.6	–

80. Resources amounting to \$19,600 are proposed to provide for consulting services to train Mission personnel in language skills in Dari, Pashto and English.

(Thousands of United States dollars)

	<i>Appropriation 2023</i>	<i>Expenditures 2023</i>	<i>Appropriation 2024</i>	<i>Requirements 2025</i>	<i>Variance 2025 vs. 2024</i>
Official travel	1 010.9	1 067.6	994.7	994.5	(0.2)

81. Resources amounting to \$994,500 are proposed to provide for official business travel (\$758,500), comprising: within-Mission travel for essential technical support for field offices and to attend various high-level conferences on Afghanistan to ensure that regular programme consultation takes place among the various components of the Mission for the efficient implementation of its mandate; and travel outside the Mission area, which includes the Special Representative of the Secretary-General and senior staff, for the implementation of the Mission's mandate, as well as meetings and consultations with political counterparts and for briefings to the Security Council, as well as travel for training purposes (\$236,000).
82. The Mission has maintained a similar level of resources for 2025 compared with the approved budget for 2024.

(Thousands of United States dollars)

	<i>Appropriation 2023</i>	<i>Expenditures 2023</i>	<i>Appropriation 2024</i>	<i>Requirements 2025</i>	<i>Variance 2025 vs. 2024</i>
Facilities and infrastructure	20 078.3	20 023.2	19 357.4	18 550.0	(807.4)

83. Resources amounting to \$18,550,000 are proposed to provide for the acquisition of engineering supplies (\$196,300); prefabricated facilities, accommodation and refrigeration equipment (\$164,100); generators and electrical equipment (\$300,000); furniture (\$91,300); office and other equipment (\$3,100); safety and security equipment (\$600,200); rental of premises (\$1,182,900); utilities and waste disposal services (\$105,500); maintenance services (\$2,852,600); security services (\$8,464,600); construction, alteration, renovation and major maintenance (\$383,900); stationery and office supplies (\$37,500); spare parts and supplies (\$151,900); field defence supplies (\$27,200); petrol, oil and lubricants (\$3,982,900); and sanitation and cleaning materials (\$6,000).
84. The decrease is attributable mainly to lower requirements for: (a) security and maintenance services, resulting from adjustments to the Mission's share of the cost of services in line with the memorandum of understanding with the agencies, funds and programmes; and (b) petrol, oil and lubricants, owing to the lower projected consumption of 4.0 million litres of diesel fuel at an average cost of \$0.947 per litre, compared with 4.3 million litres at an average cost of \$0.991 per litre provided for in the 2024 approved budget. The reduced requirements are offset in part by increased requirements for the rental of premises, owing to a new provision for the Mission's share for the rental of an annex logistics base in the United Nations Operations Centre in Afghanistan compound to provide additional space for the hosting of a fully centralized warehouse facility, as well as higher requirements for the acquisition of safety and security equipment to include firearms training equipment, uniforms and pass and ID accessories, in line with operational requirements.

(Thousands of United States dollars)

	<i>Appropriation 2023</i>	<i>Expenditures 2023</i>	<i>Appropriation 2024</i>	<i>Requirements 2025</i>	<i>Variance 2025 vs. 2024</i>
Ground transportation	481.1	451.3	459.5	469.4	9.9

85. Resources amounting to \$469,400 are proposed to provide for the rental of vehicles (\$19,900); repairs and maintenance (\$13,600); liability insurance (\$6,900); spare parts (\$195,400); and petrol, oil and lubricants (\$233,600).
86. The increase is attributable to higher requirements for spare parts, partially offset by lower requirements for petrol, oil and lubricants owing to the lower average costs for diesel fuel.

(Thousands of United States dollars)

	<i>Appropriation 2023</i>	<i>Expenditures 2023</i>	<i>Appropriation 2024</i>	<i>Requirements 2025</i>	<i>Variance 2025 vs. 2024</i>
Air operations	8 210.1	3 510.8	4 422.4	3 998.8	(423.6)

87. Resources amounting to \$3,998,800 are proposed to provide for services (\$57,400); landing fees and ground handling charges (\$44,400); air crew subsistence allowance (\$10,900); petrol, oil and lubricants (\$1,576,500); rental and operational costs for one fixed-wing aircraft (\$2,301,100); and liability insurance (\$8,500).
88. The decrease is attributable primarily to lower requirements for the rental and operation of one fixed-wing aircraft based on the latest contractual prices, as well as the lower number of 700 flight hours compared with 1,060 flight hours provided for in the approved 2024 budget. The reduced requirements are offset in part by higher consumption of fuel of the replacement aircraft at an average price of \$1.438 per litre of jet fuel (based on the six-month average ending in March 2024), compared with the average price of \$1.233 applied in the approved budget for 2024.

(Thousands of United States dollars)

	<i>Appropriation 2023</i>	<i>Expenditures 2023</i>	<i>Appropriation 2024</i>	<i>Requirements 2025</i>	<i>Variance 2025 vs. 2024</i>
Communications and information technology	5 781.9	8 947.1	5 730.2	6 157.5	427.3

89. Resources amounting to \$6,157,500 are proposed to provide for the acquisition of communications and information technology equipment (\$1,468,200); telecommunications and network services (\$1,668,500); maintenance of communications and information technology support services (\$1,526,400); spare parts (\$289,500); software, licences and fees (\$678,400); and public information and publication services (\$526,500).
90. The increase is attributable mainly to higher requirements for communications and information technology equipment, owing to: (a) the replacement of checkpoint firewalls that will be made obsolete by the vendor in 2025 and will require replacement to ensure sustainable and secure network connectivity at various locations, as well as to mitigate exposure of the Mission's network to the risk of cybersecurity attacks; (b) the upgrading of 14 existing wide area network edge routers to software-defined wide area network necessary to ensure compatibility with interconnectivity devices between Kabul and the 10 field offices and the United Nations Logistics Base at Brindisi, Italy; and (c) the upgrading of security infrastructure, such as cameras, high-capacity public announcement speakers and access control units and systems to enhance the perimeter monitoring systems of the compounds and premises. This increase is partially offset by lower requirements for public information services owing to lower requirements for subscriptions.

(Thousands of United States dollars)

	<i>Appropriation 2023</i>	<i>Expenditures 2023</i>	<i>Appropriation 2024</i>	<i>Requirements 2025</i>	<i>Variance 2025 vs. 2024</i>
Medical	851.4	344.5	802.6	601.4	(201.2)

91. Resources amounting to \$601,400 are proposed to provide for the acquisition of equipment (\$30,300); medical services (\$568,500), including aeromedical evacuations, specialist consultations and the UNAMA contribution to shared medical services with agencies, funds and programmes; and supplies (\$2,600) for replacing consumable items in emergency trauma bags.
92. The decrease is attributable primarily to the lower overall cost-shared budget for the Joint Medical Services and the United Nations Medical Emergency Response Team, offset in part by new requirements for the engagement of a contractor to provide remote counselling and psychosocial support services to staff members in connection with the proposed abolishment of two Staff Counsellor posts (1 P-3 and 1 National Professional Officer), resulting in net savings of \$187,200 due to outsourcing.

(Thousands of United States dollars)

	<i>Appropriation 2023</i>	<i>Expenditures 2023</i>	<i>Appropriation 2024</i>	<i>Requirements 2025</i>	<i>Variance 2025 vs. 2024</i>
Other supplies, services and equipment	1 665.8	1 852.7	2 508.7	2 399.5	(109.2)

93. Resources amounting to \$2,399,500 are proposed to provide for: (a) welfare (\$61,300); (b) training fees, supplies and services (\$91,200); (c) official functions (\$19,700); (d) hospitality (\$16,200); (e) general insurance (\$20,000); (f) bank charges payable to financial institutions in locations where the Mission maintains bank accounts (\$75,000); (g) miscellaneous claims and adjustments

(\$10,000); (h) other freight and related costs, including mail and pouch services, freight forwarding, customs clearance services, within-mission travel for flights through the United Nations Humanitarian Air Service, demurrage and detention charges and freight-related charges for the acquisition of equipment and supplies (\$1,192,600); (i) rations (\$99,400); and (j) other services, including the costs associated with the shipment of cash to Afghanistan owing to the restrictions placed on the Central Bank of Afghanistan (\$814,100).

94. The decrease is attributable primarily to the absence of a provision under mine detection and mine-clearing services due to the proposed transfer of the remaining core functions and the delivery of the mine action programme to Secretariat staff managed directly by UNAMA, for which the salary costs of two newly proposed positions are included under the general temporary assistance budget class (see para. 79 above) and the removal of any programme support costs that were previously budgeted for the service of UNOPS.

5. Extrabudgetary resources

(a) Voluntary contributions

95. In 2024, voluntary contributions in the amount of \$514,200 are projected to be utilized, comprising the following funding sources:
- (a) \$398,700 through the Department of Political and Peacebuilding Affairs to support the national female youth United Nations Volunteers programme. The programme's objective is in line with the Mission's mandate and contributes to advancing mandate implementation, including inclusive governance, respect for human rights, and peacebuilding with reinforced local capacities, and to good practices across the range of mandated activities and operations;
 - (b) \$115,500 under the Mission's trust fund for the staff costs of one post (P-3) to support activities in local peace and political engagement and meetings with regional governments. The P-3 post provides capacity support towards aligning humanitarian and development efforts in Afghanistan with the United Nations Strategic Framework for Afghanistan, 2023–2025, coordinating messaging and strategies with national priorities, as well as supporting the Resident Coordinator's Office in implementing workplans and facilitating information flow between United Nations entities and stakeholders.
96. In 2025, voluntary contributions in the estimated amount of \$101,800 are projected to be utilized under the Mission's trust fund to continue to provide for one post (P-3).
97. The decrease in the estimates projected for 2025 compared with the estimates for 2024 is attributable primarily to the proposed conversion of the 16 national United Nations Volunteer positions to the regular budget.

(b) Cost recovery

98. In 2024, resources in the amount of \$23,700,000 are estimated to be received from United Nations agencies, funds and programmes and other entities through the cost recovery mechanism, for services provided by the Mission to these entities, including co-location in Mission compounds and medical services throughout Afghanistan. Such services are provided to achieve economies of scale and enable cost-effective programme delivery, while promoting higher cooperation as envisaged by the "One UN" principle. These cost recovery resources will be utilized to provide for the staff costs of four positions (1 P-3 funded from the Joint Medical Services budget, 1 Field Service funded from the United Nations Operations Centre in Afghanistan common services budget, and 2 Field Service positions funded from the cost recovery administration fee), and for medical-related requirements, including medical personnel and supplies, as well as the costs associated with maintaining United Nations compounds, including security services, rent, utilities and maintenance services. Such resources will complement regular budget resources of the Mission.

99. Similarly, in 2025, resources in the amount of \$23,700,000 are projected to be received from these entities and will continue to be utilized to provide for the staff costs of four positions (1 P-3 and 3 Field Service, as mentioned above), medical-related requirements, including medical personnel and supplies, and the costs associated with maintaining United Nations compounds, including security services, rent, utilities and maintenance and related services.

Annex I

Summary of follow-up action taken to implement the requests and recommendations of the Advisory Committee on Administrative and Budgetary Questions endorsed by the General Assembly

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions (A/78/7/Add.5)

The Advisory Committee trusts that all vacant positions will be filled as soon as possible and that an update on the recruitment status, including on the long-vacant positions, will be provided to the General Assembly at the time of its consideration of the present report and in the next budget submission (para. 21).

The Advisory Committee trusts that an update on the status of staff working outside their approved duty station will be provided to the General Assembly at the time of its consideration of the present report and in the context of the next budget submission (para. 27).

Taking into account the lower expenditure in 2022 and the first six months of 2023, as well as the trend of unused capacity of fixed-wing flying hours by the Mission since 2018 and the cost-effective alternative of United Nations Humanitarian Air Service flights, the Advisory Committee is not fully convinced that the rental and deployment of a second fixed-wing asset is justified at the present time, recommends against the inclusion of the related requirements and recommends that the General Assembly request the Mission to consider using alternative arrangements and to provide an update in the context of the next budget submission (para. 33).

As at the end of February 2024, seven posts had been vacant for more than two years, one of which is proposed to be abolished in 2025; and 28 posts had been vacant for more than one year, five of which the Mission is proposing to abolish in 2025. Recruitment has been impacted by the liquidity situation, which requires more posts to remain vacant than those required for mandate implementation, and for which the Mission has capacity to fill expeditiously. At the same time, UNAMA is expecting to incur significant additional common staff costs compared to 2023 and will have to maintain many posts vacant independently of their importance. A list of posts vacant for over two years, including justification and information on the recruitment status, is provided in the supplementary information to the present report.

International staff are ordinarily not permitted to engage in flexible working arrangements outside Afghanistan; however, where there are compelling grounds for this, individual cases of flexible working arrangements outside the duty station may be approved in accordance with [ST/SGB/2019/3](#) and [ST/IC/2019/15](#). There are 23 national staff approved for evacuation by the Secretary General, currently waiting for resettlement in third/other countries.

The direct impact of the loss of a second fixed-wing asset is that, independently of the fact that emergency tasking will always take priority over regular flights, there is a high likelihood that the sole aircraft available to the Mission could be away from base on regular tasking when it is required for emergency tasking, or out of the country supporting travel to regional capitals, or possibly be out of service, since the high utilization that this aircraft is expected to receive will result in an increased frequency of maintenance intervals, which will take it out of service for four or more days. In 2023, the aircraft was out of service for maintenance for a total of 29 days, at four different times.

The Advisory Committee trusts that an update on the efforts of UNAMA to improve its geographical and gender balance will be provided to the General Assembly at the time of its consideration of the present report and in the context of the next budget submission (para. 40).

The Advisory Committee reiterates its view (see [A/77/7/Add.5](#), para. 37, [A/76/7/Add.5](#), para. 30 and [A/75/7/Add.6](#), para. 28) that UNAMA should continue its efforts to formalize cost-sharing agreements for security-related support provided to the agencies, funds and programmes, and that the Secretary-General, in his role as Chair of the United Nations System Chief Executives Board for Coordination, should help support UNAMA in these efforts, including through targeted discussions in the High-level Committee on Management, and will provide an update thereon in the context of the next budget submission (para. 46).

The increased dependence on the Mission's sole aircraft is reflected in the higher utilization of the Mission's aircraft during 2023 than the utilization of two fixed-wing aircraft during the same periods in 2020, 2021 and 2022.

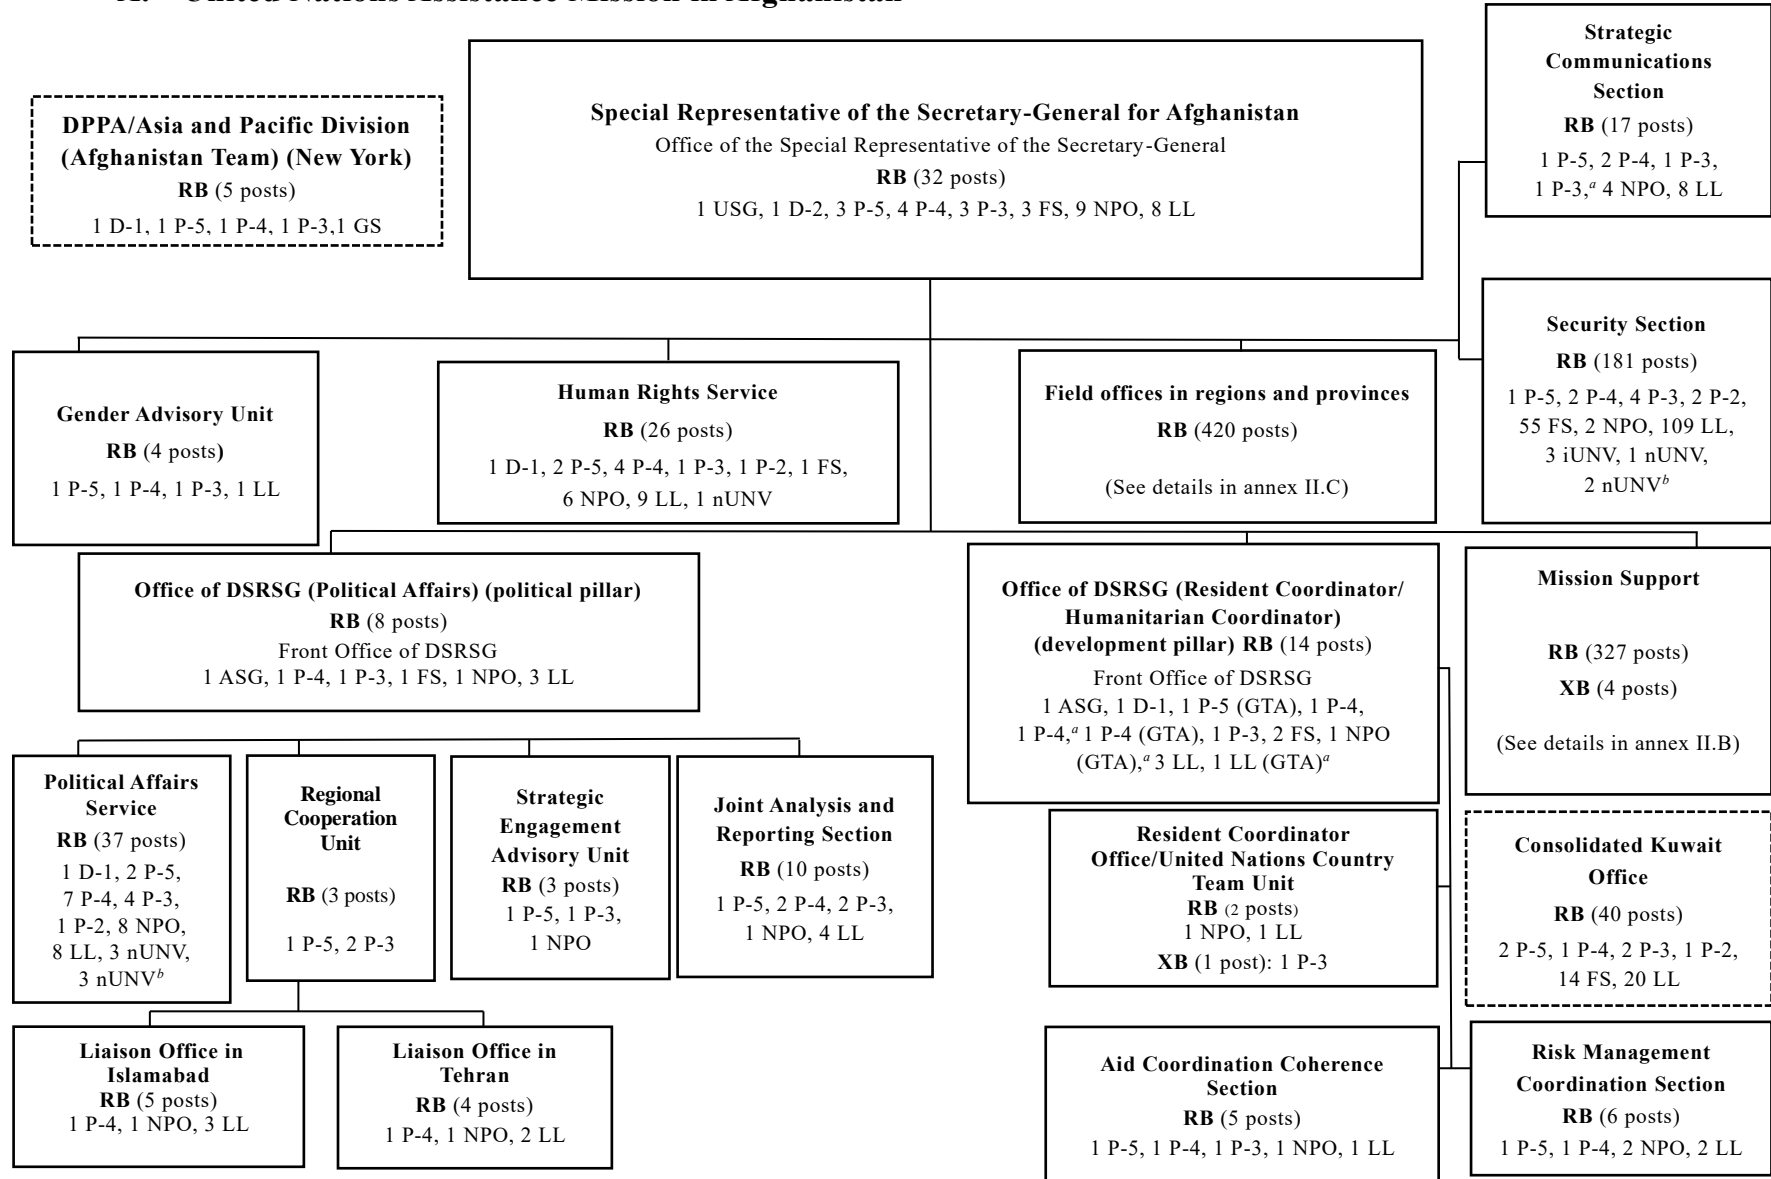

The Mission issues to the hiring managers a pre-vacancy/job opening posting memorandum sharing the gender and geographical representation in their Section/Units and the Mission at large. In addition, UNAMA has established a mandatory requirement for proof of outreach to underrepresented staff categories, as well as written justification for non-selection of recommended female candidates. Effective 1 January 2024, the Mission has added a new indicator, the geographical representation in accordance with the system of desirable ranges in the monthly staffing, to its monthly incumbency reports.

The cost estimates for 2025 reflect a greater proportion of cost-shared posts compared to 2024. The cost estimates also reflect an element of growth resulting from the cost-sharing of services among more agencies and in more locations.

*** In keeping with paragraph 10 of General Assembly resolution [77/267](#), the part consisting of the post and non-post resource requirements is submitted through the Advisory Committee on Administrative and Budgetary Questions for the consideration of the General Assembly.

I. Overview of the Mission

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

1. The United Nations Assistance Mission for Iraq (UNAMI) is responsible for the provision of advice, support and assistance to the Government and people of Iraq on advancing inclusive, political dialogue and national and community-level reconciliation. The mandate is defined in Security Council resolutions [1483 \(2003\)](#), [1500 \(2003\)](#), [1770 \(2007\)](#) and [2107 \(2013\)](#), and renewed by its subsequent resolutions, including most recently by resolution [2682 \(2023\)](#).
2. In its resolution [2682 \(2023\)](#), the Security Council extended the mandate of the Mission until 31 May 2024 and requested that the Secretary-General provide the Council with an independent strategic review of UNAMI. In the resolution, the Council requested that the independent strategic review assess current threats to peace and security of Iraq as well as the continued relevance of Mission's tasks and priorities, and provide recommendations to optimize the mandate, mission structure and staffing of UNAMI to support the Government of Iraq in addressing the challenges of peace and security. The review is due to be considered by the Council in the context of the mandate renewal of UNAMI.
3. Under its existing mandate, UNAMI will, at the request of the Government of Iraq, continue to provide its good offices for the promotion of an inclusive political system. The Mission will facilitate dialogue on key matters, including the situations in Sinjar and Kirkuk and the disputed internal boundaries. The Mission will provide its advice and assistance in support of electoral processes. UNAMI will also encourage regional dialogue and cooperation, including on issues of border security, energy, environment, water, the adverse impacts of climate change, resilience building, infrastructure and refugees. Support will be provided to the Government and people of Iraq and its institutions in advancing social cohesion and national reconciliation, including on issues related to minorities and countering hate speech; implementing the women and peace and security agenda and integrating gender perspectives; promoting accountability, the protection of human rights and the rule of law; strengthening child protection, including the rehabilitation and reintegration of children; combating terrorism, including by preventing radicalization; and reforming the security sector. In line with Security Council resolution [2107 \(2013\)](#), UNAMI will also promote, support and facilitate efforts regarding the repatriation or return of all Kuwaiti and third-country nationals or their remains and the return of Kuwaiti property, including the national archives.

Programme of work

Objective

4. The objective, to which this Mission contributes, is to achieve sustainable peace, security and development while reaffirming the independence, sovereignty and territorial integrity of Iraq.

Strategy and external factors for 2025

5. To contribute to the objective, the Mission will:
 - (a) Encourage inclusive dialogue among political actors and provide advice on key policy issues, including through broad engagement with institutional stakeholders and civil society, in order to promote institutional reforms and strengthen public confidence in the State;

- (b) Work closely with the legislative and executive institutions of Iraq to support the formulation, adoption and implementation of legislative and constitutional reforms;
 - (c) Promote cross-community dialogue and reconciliation, mitigate local tensions and strengthen social cohesion, in particular with regard to the implementation of the Sinjar Agreement, the conclusion of the Kirkuk negotiations and the resolution of the disputed internal boundaries;
 - (d) Support an institutionalized, structured dialogue between the federal Government and the Kurdistan Regional Government in order to resolve key issues such as the federal budget, oil and revenue-sharing, border control, security issues and the disputed internal boundaries;
 - (e) Provide technical advice and assistance to further strengthen the electoral institutions of Iraq and support the planning and preparation of electoral processes, including the next elections of the Council of Representatives expected to take place in the third quarter of 2025;
 - (f) Assist the Government of Iraq in promoting accountability for human rights violations in order to build and strengthen trust among the Government, justice institutions, civil society and communities;
 - (g) Monitor and report on human rights developments in order to support government efforts to protect and promote human rights in accordance with the country's Constitution and international obligations;
 - (h) Provide technical support to strengthen institutional capacities and policies for the protection of civic and democratic space and fundamental rights and freedoms, including the freedom of expression and the right to peaceful assembly, and the rights to liberty and protection of all persons from arbitrary arrests, abductions, enforced disappearances and torture;
 - (i) Advocate for the reform of criminal justice law and policy and for the adoption of measures to ensure respect for due process and fair trial standards, and promote accountability for perpetrators and redress for victims, including victims of gender-based and domestic violence and conflict-related sexual violence;
 - (j) Promote sustainable long-term development by coordinating the efforts of national and international stakeholders;
 - (k) Promote stabilization, recovery and peacebuilding initiatives, including security sector reform and climate change mitigation (in particular in relation to peace and security), in collaboration with the United Nations country team;
 - (l) Organize climate resilience dialogues in support of government efforts to tackle the negative impacts of climate change, supported by integrated climate change analysis and coordinated United Nations programming and informed government-led climate policy and programming;
 - (m) Advocate for development assistance in line with government priorities and the 2025–2029 United Nations Sustainable Development Cooperation Framework;
 - (n) Promote, support and facilitate efforts regarding the repatriation or return of remains of all Kuwaiti and third-country nationals and the return of Kuwaiti property, including the national archives.
6. The above-mentioned work will result in:
- (a) The implementation of a government programme that takes the necessary steps to meet the Iraqi people's desire for reform, including economic reform and counter-corruption measures;
 - (b) The implementation of consensus-driven constitutional reforms developed in the reviews by the presidential and parliamentary constitutional review committees;
 - (c) Strengthened and inclusive local governance and community-level reconciliation, notably in relation to the implementation of the Sinjar Agreement, the Kirkuk negotiations and the disputed internal boundaries;

- (d) The implementation of laws and other political and security mechanisms crucial to the consolidation of the relationship between Baghdad and Erbil;
 - (e) Increased and sustained capacity of Iraqi electoral institutions to conduct Iraqi-led, Iraqi-owned free and fair elections, including the next Council of Representatives elections, with enhanced public participation and acceptance of election results;
 - (f) Increased accountability for human rights violations and abuses, including in the context of protests;
 - (g) Respect for fundamental human rights principles and norms;
 - (h) The preservation and expansion of civic and democratic space, including the freedom of expression and the right to peaceful assembly and respect for dissent;
 - (i) Increased compliance with fair trial standards and procedural guarantees, including the prevention of torture and ill-treatment of detainees, as well as accountability for domestic and gender-based violence;
 - (j) A reduction in protracted internal displacement, with continued support for durable solutions and an increased focus on climate change-related displacement;
 - (k) The coordination of development assistance, in close collaboration with the United Nations country team, through national and local coordination mechanisms and in line with the 2025–2029 United Nations Sustainable Development Cooperation Framework;
 - (l) The expedited repatriation of the remains of Kuwaiti and third-country nationals and the accelerated return of Kuwaiti property.
7. With regard to cooperation with other entities, UNAMI collaborates and coordinates with international donors and 23 resident and 5 non-resident United Nations agencies, funds and programmes. Areas of work include economic reform, capacity development and support for the electoral institutions and processes of Iraq, sustainable development and addressing climate change. The Mission also supports coordination with international financial institutions, such as the World Bank, the International Finance Corporation and the International Monetary Fund. In doing so, UNAMI leads or participates in critical national development and humanitarian bodies, such as the Executive Committee for Recovery, Reconstruction and Development, the Development Partners' Forum, the Stabilization Task Force, the Returns Working Group, the non-governmental organization Coordination Committee for Iraq and the Prospects Partnership.
8. With regard to inter-agency coordination and liaison, UNAMI engages with the United Nations country team in a wide range of activities aimed at the promotion and protection of human rights and the rule of law, including on issues relating to women, ethnic and religious minorities and grave violations against children in situations of armed conflict. In particular, UNAMI works with the United Nations country team, in support of the national and local government authorities, to counter hate speech, promote social cohesion and raise awareness of the impact of violent extremism. Also, in cooperation with the United Nations Development Programme (UNDP), UNAMI assists the Government of Iraq with anti-corruption trial monitoring and security sector reform and helps to develop the capacity of the country's electoral institutions.
9. The overall plan of UNAMI for 2025 is anchored in Security Council resolution [2682 \(2023\)](#) and based on the following planning assumptions:
- (a) The Government and Parliament continue to make progress towards the implementation of priorities as identified in the federal Government's programme of work;
 - (b) Elections for the Kurdistan Regional Government take place in 2024, Iraqi Governorate Councils are established in accordance with the outcomes of the Governorate Council elections of December 2023 and the new Board of Commissioners of the Independent High Electoral Commission is appointed in 2024;

- (c) The Government of Iraq and other Iraqi stakeholders make progress on the adoption and implementation of political, economic, electoral and constitutional reforms in priority areas, in particular with regard to corruption, unemployment and public service delivery;
 - (d) The security situation remains sufficiently permissive to gain access to all affected populations and key stakeholders in relation to mandate implementation;
 - (e) Events unfolding in the wider region do not adversely affect the internal political stability of Iraq;
 - (f) The federal Government and the Kurdistan Regional Government engage in a structured, regular and genuine political dialogue to resolve key issues;
 - (g) The Government of Iraq makes efforts to implement security sector reforms, including bringing all weapons and armed groups under State control, ensuring the successful integration of the Popular Mobilization Forces into the Iraqi security forces, improving the coordination between Iraqi security and Kurdistan Region security institutions and improving the security situation along its borders;
 - (h) The Government of Iraq engages with the United Nations in Iraq on technical cooperation and human rights monitoring and remains committed to promoting, respecting and protecting human rights and the rule of law, including through measures to preserve and expand civic and democratic space and the enactment of relevant legislation, policy measures and action plans in accordance with the Constitution of Iraq and its international obligations;
 - (i) The Government of Iraq demonstrates commitment to advancing women's rights and equality, submitting relevant draft legislation and creating strong institutional mechanisms to ensure accountability and track and monitor progress on meeting international commitments towards the advancement of women in all spheres of life, including decision-making processes;
 - (j) The Government of Iraq supports detention and trial monitoring and commits to procedural safeguards and due process as part of its efforts to promote the rule of law;
 - (k) The Government of Iraq engages with the United Nations in Iraq to develop a common strategy to tackle the security implications and adverse impact of climate change, including the reduction of gas flaring, the improvement of water management systems, increased investment in renewable energy and the provision of incentives for green economy projects, in alignment with the country's national adaptation plan;
 - (l) The Government of Iraq works to improve service delivery and meet public expectations, alleviating the root causes of social unrest, including by actively promoting full youth participation in society and creating job opportunities for young people.
10. The Mission integrates a gender perspective in its operational activities, deliverables, data collection and results, as appropriate and in support of the women and peace and security agenda. In its engagement with institutional stakeholders at the federal and regional levels, the Mission promotes gender mainstreaming with a focus on strengthening women's representation and participation in political and electoral processes and in decision-making. The Mission co-chairs the United Nations Gender Task Force for Iraq along with the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) and supports the Women's Advisory Group, which is composed of prominent female Iraqi human rights defenders, former politicians, media experts and civil society activists, using those platforms to synergize efforts across United Nations entities in Iraq to advance women's rights, equality and empowerment.
11. In line with the United Nations Disability Inclusion Strategy, UNAMI engages with the Government, disability rights organizations and the United Nations country team to support policy measures to promote the human rights of persons with disabilities, with a focus on accessibility, employment opportunities and access to social and public services. Furthermore, the Mission supports the implementation of recommendations of United Nations human rights mechanisms on disability rights. Through its internal working group on the United Nations Disability Inclusion Strategy and the Mission-specific action plan, UNAMI takes actions to develop a disability-friendly working environment.

Programme performance in 2023

Facilitation of dialogue and inclusive political participation

12. In 2023, UNAMI encouraged the development and implementation of a government programme that prioritized continued State-building, including counter-corruption efforts and socioeconomic reforms, and advocated for inclusive political dialogue as well as national and community-level reconciliation. The Mission leveraged its good offices to promote engagement on security, climate and other key issues between Iraq and neighbouring States, including by engaging with several actors in the context of the border security agreement between the Islamic Republic of Iran and Iraq. The Mission engaged with key stakeholders, including political parties, civil society, women, youth and minorities, in each governorate, ahead of and after the Governorate Council elections, to encourage increased political participation and to plan for capacity-building support to these newly elected local representative bodies in 2024.
13. During this period, the Mission provided integrated technical assistance and advisory support to the Independent High Electoral Commission's efforts to organize the Governorate Council elections, the first in 10 years, which took place on 18 December 2023 in an orderly manner. UNAMI made use of its good offices and provided technical advice in preparing for the Kurdistan Region parliamentary elections, which have been postponed to 2024.
14. Progress towards the objective is presented in the performance measure below (see table 1).

Table 1

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
The Government of Iraq fulfilled its commitment to hold early national parliamentary elections. The electoral authorities adopted improved measures for polling and for the counting and publication of results, which, supported by international efforts to monitor the election, helped promote increased transparency of the electoral process. Electoral complaints were addressed through the correct legal channels prior to the ratification of election results on 27 December 2021	A government that included three female ministers was formed, representing an important step towards inclusive governance. A programme of work was developed, reflecting the aspirations of the Government and the Iraqi population, with a focus on fighting corruption and unemployment and improving public service delivery. The federal Government and the Kurdistan Regional Government continued to address outstanding issues and took limited steps towards structured dialogue	The Government of Iraq continued to implement its programme of work, aiming at bringing institutional and economic reform and addressing long-standing domestic issues such as the Baghdad-Erbil relationship. Iraq held Governorate Council elections, the first in 10 years, enabling the reconstitution of representative governance structures at the provincial level. The Council of Representatives adopted a federal budget law for three fiscal years, from 2023 to 2025

Planned results for 2025

Result 1: continued reform and support to political dialogue

Programme performance in 2023 and target for 2025

15. In 2023, UNAMI continued to provide its good offices to support inclusive political dialogue in Iraq. The Mission met its 2023 target as the Government continued to implement its programme that aims at bringing institutional and economic reform, including the adoption of a triennial budget that is reflective of the Iraqi population's calls for reforms. The Mission advocated for the meaningful political participation of women and engaged with the federal Government and the Kurdistan Regional Government to advocate for a structured dialogue between Baghdad and Erbil.

16. In implementing its mandate, as stipulated in Security Council resolution [2682 \(2023\)](#), the Mission will encourage the continued implementation of the Government programme and support the country's preparations for the next Council of Representatives elections, expected to take place in 2025; support inclusive political dialogue that enhances trust in the political system, delivers on reforms and encourages women's and youth's political participation; and encourage a sustained and structured dialogue between the federal Government and the Kurdistan Regional Government, including on the Sinjar Agreement and Kirkuk.
17. Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 2).

Table 2
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
In line with popular calls for reforms, the Government of Iraq fulfilled its commitment to hold early national parliamentary elections. The electoral authorities adopted improved measures for polling and for the counting and publication of results which helped promote wider public acceptance of election results. Electoral complaints were addressed through the correct legal channels prior to the ratification of election results on 27 December 2021	A long-delayed but relatively peaceful transition of power allowed the formation of a new government with a programme that intended to address long-standing challenges. The Government of Iraq sought to address its priorities and to develop a budget that supported these efforts. Post-election evaluations led to action to improve the conduct and management of future elections and national institutions	The Government of Iraq continued to implement its programme that brings institutional and economic reform and addresses long-standing domestic issues such as the Baghdad-Erbil relationship	Structured dialogue between Baghdad and Erbil supports the introduction of legal and institutional reforms, leading to progress in resolving issues currently under dispute. Federal governance becomes more inclusive and accountable, contributing to developing public trust in the political leadership and institutions of Iraq	Structured dialogue between Baghdad and Erbil supports the introduction of legal and institutional reforms, leading to progress in resolving issues such as revenue-sharing, the establishment of a federation council and the adoption of a federal hydrocarbon law. Federal governance becomes more inclusive and accountable, including at the subnational level, contributing to developing public trust in the political leadership and institutions of Iraq

Result 2: strengthened respect for civic and democratic space, justice and accountability**Programme performance in 2023 and target for 2025**

18. In 2023, the Mission's work contributed to fostering the protection of human rights, respect for the rule of law and accountability for human rights violations and abuses. The target related to draft bills was partly met, but the Mission continued engaging with the Government to enhance institutional capacity, advocating for the endorsement of human rights-related legislation and providing technical support for the adoption of human rights policies and measures. UNAMI implemented a programme to strengthen the capacities of civil society, the Iraqi High Commission for Human Rights and government officials to preserve and expand civic space, protect human rights in the digital domain and strengthen the role of women journalists and media workers in promoting human rights and countering hate speech. In March 2023, the Government signed a plan of action for the prevention of the use and recruitment of children by the Popular Mobilization Forces. Later that year, the report of the Secretary-General on children and armed conflict ([A/77/895-S/2023/363](#)) indicated that the Popular Mobilization Forces had been removed from the Security Council's list of groups sanctioned for recruiting and using children.
19. In implementing its mandate as stipulated in resolution [2682 \(2023\)](#), UNAMI will continue to engage with the Government and other stakeholders to promote the adoption of legislation, policies and measures for the increased protection of civic and democratic space, including freedom of expression. The Mission will also help to enhance the capacity of the judiciary to promote accountability for human rights violations and abuses. The Mission will provide technical support to law enforcement officials and judicial and legislative institutions in order to increase their compliance with international norms and standards, and support Iraq in achieving its national and international commitments and enhance its engagement with the United Nations human rights mechanisms.
20. Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 3).

Table 3
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
The Government of Iraq implemented the National Action Plan for the Prevention of Torture and reports to United Nations human rights mechanisms on concrete measures taken to promote due process and fair trial guarantees	The Government compensated families of the majority of victims killed during the 2019 demonstrations and provided some assistance for those injured. Accountability efforts remained limited and few investigations of alleged human rights violations and abuses progressed to the trial phase	The draft laws on freedom of expression and information technology were pending endorsement. The draft law on freedom of expression had passed the second reading and remained at the voting stage in the Council of Representatives	The Government strengthens impartial, fully functional and effective national mechanisms to promote accountability for human rights violations and abuses and adopts legislation to promote the protection of human rights and civic space and protection from enforced disappearances	The Government adopts measures to strengthen judicial capacity to deliver justice for victims and establish accountability for human rights violations and abuses, and complies with international norms and standards to protect the freedom of expression

Result 3: integrated durable solutions and addressing climate change**Programme performance in 2023 and target for 2025**

21. In 2023, UNAMI met its target by continuing to initiate and lead several coordination forums, including in cooperation with international donors, which contributed to durable solutions for displacement and returnees, against the backdrop of the transition from humanitarian to development-related support. The Mission encouraged the Government to explore more effective solutions for the displaced population as outlined in its national plan and increase its work on analysis and capacity-building with regard to tackling the adverse impact of climate change. The Mission continued its advocacy towards mitigation and adaptation efforts.
22. In implementing its mandate as stipulated in resolution 2682 (2023), UNAMI will enhance its integrated approach to support the Government of Iraq in tackling the adverse impact of climate change and strengthen national ownership of sustainable durable solutions, including through active participation in the development of the next United Nations Sustainable Development Cooperation Framework for 2025–2029.

Lessons learned and planned change

23. The lesson for the Mission was that close cooperation with the Government and the United Nations country team was important with regard to leveraging the Mission's comparative advantage in analytical capacity and advocacy in support of climate-related policymaking. In applying the lesson, UNAMI will enhance United Nations-wide and national capacities in climate risk analysis, which will contribute to integrated climate change policy advice and technical assistance from the United Nations system in Iraq.
24. Expected progress towards the objective is presented in the performance measure below (see table 4).

Table 4

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
The United Nations Sustainable Development Cooperation Framework for the period 2020–2024 was effectively implemented, reducing the number of people in need	Eight area-based coordination groups were established and are in operation. Their use resulted in a more coordinated and tailored approach to durable solutions for returning families in Iraq. First steps were taken to support the transition from humanitarian to development-oriented efforts, including greater national ownership within these processes	Climate change risk analysis at the national and local levels was included in priority areas of work such as analysis and capacity-building, supporting the Government in enhancing peace and security through climate action and mitigation policies	A durable solution compact is developed and implemented, led by the Government and supported by a robust coordination architecture, linking local coordination mechanisms to federal mechanisms. National ownership of humanitarian and development activities increases, with a focus on sustainable development	Climate change analysis supports climate resilience dialogues and the development of sustainable solutions and participatory climate action, and informs Government-led climate policy and programming. The United Nations Sustainable Development Cooperation Framework for 2025–2029 mainstreams climate and durable solutions

Deliverables

25. Table 5 lists the deliverables of the Mission.

Table 5

Deliverables for the period 2023–2025, by category and subcategory

17. Monitoring missions related to conflict-related sexual violence and children in armed conflict and the protection of the rights of minorities, internally displaced persons and persons with disabilities, including engagements with approximately four organizations working on disability rights issues	55	55	55	55

C. Substantive deliverables

Good offices: facilitation of sessions and round tables to foster national and community reconciliation and enhance cooperation among interlocutors involved; additional support to political and other Iraqi counterparts to advance the political process and reconciliation, encompassing civil society, young people and communities; support provided on Baghdad-Erbil and regional relations; electoral legislative and regulatory reforms; return of missing Kuwaiti and third-country nationals or their remains and Kuwaiti missing property; provision of good offices with a focus on advancing the participation, involvement and representation of women and young people in political and electoral processes; facilitation of climate-resilience dialogues on water- and land-use at the subnational level, where these issues are climate-related drivers of conflict, in order to promote peaceful resolution and enhance cooperation for climate change adaptation.

Consultation, advice and advocacy: consultations on stabilization, reconstruction and development issues; advice on revenue-sharing, security sector reform and decentralization of administrative and fiscal authority; consultation and advice on electoral legislative reform initiatives and parliamentary oversight; advice and engagements to support capacity development and enhance confidence in the electoral institutions of Iraq; consultation and advocacy initiatives on human rights issues, including those related to the protection of the freedoms of assembly and expression, women's and minority rights, protection from enforced disappearance, child protection and administration of justice.

Databases and substantive digital materials: database on incidents of violence against women in politics in the context of the 2025 legislative elections; implementing and maintaining the Situational Awareness Geospatial Enterprise system to provide the Mission with a standardized information management system for relevant incidents and events.

D. Communication deliverables

Outreach programmes, special events and information materials: special events that include relevant United Nations Days; organizing awareness-raising events on the transition from humanitarian efforts towards durable solutions and sustainable development, including in relation to climate change; information materials in support of a common United Nations approach; bimonthly newsletter and annual yearbook highlighting the work of the United Nations in Iraq; United Nations system information material on the Sustainable Development Goals; twice-daily media monitoring reports; capacity-building for Iraqi media professionals on combating misinformation and disinformation on social media.

External and media relations: press conferences, press releases and news articles, including op-eds, in three languages, on the work of the Mission and the United Nations country team.

Digital platforms and multimedia content: dissemination of information through the Mission's website and social media accounts, including multimedia products about the Mission; two factsheets and one frequently asked questions document on Iraqi elections and United Nations support to the elections, the United Nations in Iraq and events with relevance to Iraq; participation in United Nations-wide campaigns and dissemination of products from United Nations Headquarters.

^a In accordance with Security Council resolution 2631 (2022), the periodicity of reports to the Council was decreased from four to three reports and meetings per year.

B. Proposed post and non-post resource requirements in 2025

1. Total resource requirements

Resource requirements (regular budget)

Table 6

^a One position is funded at 50 per cent and cost-shared with the Development Coordination Office.

26. The proposed resource requirements for 2025 for UNAMI amount to \$103,202,600 (net of staff assessment) and would provide for the deployment of 245 military contingent personnel (\$4,793,800), civilian personnel costs (\$82,795,200) consisting of salaries, common staff costs and danger pay for the deployment of 772 posts and positions (1 Under-Secretary-General, 2 Assistant Secretaries-General, 1 D-2, 6 D-1, 17 P-5, 44 P-4, 51 P-3, 5 P-2, 151 Field Service, 124 National Professional Officers, 365 Local level, 2 international United Nations Volunteers and 3 national United Nations Volunteers), including the establishment of 3 United Nations Volunteer positions, as well as operational costs (\$15,613,600) comprising consultants and consulting services (\$164,000), official travel (\$844,400), facilities and infrastructure (\$4,742,900), ground transportation (\$890,000), air operations (\$4,997,200), communications and information technology (\$2,596,500), medical (\$357,400) and other supplies, services and equipment (\$1,021,200).
27. The increase in the requirements for 2025 compared with the appropriation for 2024 is attributable to the net effect of:

Note: The following abbreviations are used in tables: ASG, Assistant Secretary-General; FS, Field Service; LL, Local level; NPO, National Professional Officer; UNV, United Nations Volunteer; USG, Under-Secretary-General.

- (a) An increase of \$5,866,500 in civilian personnel costs, attributable to higher salary costs for: (i) international staff, owing to the application of a higher common staff costs rate compared with the rate applied in the approved 2024 budget; (ii) National Professional Officers and Local level staff due to the application of the higher revised salary scale promulgated in February 2024 but retroactively effective to 1 March 2023, as well as the application of lower vacancy rates compared with the rates approved for 2024; and (iii) United Nations Volunteers, owing to the proposed establishment of three positions (2 international and 1 national);
- (b) A net decrease of \$306,000 in military and police personnel costs, attributable mainly to lower requirements for: (i) travel on emplacement, rotation and repatriation based on the latest letter of assist; (ii) rations, owing to a change in the planned deployment location of 25 Guard Unit personnel from Mosul to Kirkuk resulting in a lower rations rate; and (iii) death and disability compensation, owing to a downward revision of the estimates based on historical expenditure patterns;
- (c) A net decrease of \$484,400 in operational costs attributable to reduced requirements for: (i) facilities and infrastructure, owing to fewer projects being undertaken, lower costs for maintenance services based on the latest contractual rates and reduced requirements for utilities and waste disposal service owing to increased utilization of renewable energy sources and other consumption efficiencies; (ii) communications and information technology, owing to efforts to reduce the acquisition of equipment with the planned transfer of computer equipment such as laptops and computer servers from the United Nations Investigative Team to Promote Accountability for Crimes Committed by Da'esh/Islamic State in Iraq and the Levant (UNITAD); (iii) ground transportation, owing to efforts to maximize the use of existing vehicles and vehicles to be transferred from UNITAD, resulting in no requirements for the acquisition of vehicles in 2025; and (iv) official travel, owing to increased utilization of videoconferencing, especially with regard to within-mission travel and training activities. The above decreases are offset in part by increased requirements under air operations due to higher contractual costs for the rental and operation of the Mission's two fixed-wing aircraft.

Vacancy rates

28. The proposed vacancy rates applied in the budget take into account the experience to date. The assumptions considered for the proposed vacancy factors include the 12-month average vacancy rate in 2023 and the actual vacancy rate as at 31 March 2024. The lower of the two was used as the budgeted vacancy rate. This is in line with the policy guidance to improve the accuracy and consistency of the vacancy rate factors applied in the proposed budgets for 2025 and to ensure that proposed vacancy rates are based, as much as possible, on actual rates. A vacancy rate of 50 per cent has been applied in the calculation of costs for the proposed establishment of new posts and positions and those proposed for reassignment.

Table 8
Vacancy rates
 (Percentage)

31. The Special Representative of the Secretary-General is the Head of Mission, supported by the immediate team in the Office. The Special Representative is also the United Nations-designated official for security in Iraq. The following organizational units of the Mission report to the Special Representative: the Women's Protection Unit; the Gender Unit; the Child Protection Unit; the Office of the Chief of Staff; the Human Rights Office; the Strategic Communications and Public Information Office; the Security Section; and Mission Support.

Table 10

Staffing changes: Office of the Special Representative of the Secretary-General

	+1	FS	Administrative Assistant	Reassignment
	-6	LL	Field Security Radio Operator	Abolishment
	+3	UNV	Security Assistant	Establishment
Total	(3)			

32. The following changes are proposed for 2025:

Security Section

- (a) Reassignment of one post of Close Protection Officer (Field Service) as an Administrative Assistant (Field Service) to provide dedicated support capacity to the UNAMI Integrated Security Team, in line with the recommendations of the ad hoc security risk management process report of January 2024. Pursuant to the recommendation of the Advisory Committee on Administrative and Budgetary Questions (A/78/7/Add.6), as endorsed by the General Assembly in its resolution 78/253, the Department of Safety and Security conducted a risk assessment which indicated a need for a dedicated administrative post to be established in the Section to coordinate duty roster management. The functions of this new position would include administrative support and coordination on training, administrative processes for the movement of security personnel, and administrative and logistical functions with relevant United Nations country team security entities. These functions are expected to lead to increased effectiveness of the Section in the delivery of security services to the Section's clientele in Iraq. The proposed reassignment is intended to address this capacity gap in the Security Section from within its existing resources;
- (b) Abolishment of six Field Security Radio Operators (Local level), three in Kirkuk and three in Basrah. These posts are cost-shared under the local cost-shared security budget and are managed under the UNAMI staffing table, and the participating United Nations entities have indicated that the capacities will no longer be required and thus their contributions would not continue in 2025, taking into account the reduced footprint and movement of the United Nations security management system in the region. In this context, based on an assessment undertaken by the Department of Safety and Security, it was determined that some functions of these posts could be consolidated into the Erbil and Baghdad security operations centres, while the remaining functions would be redistributed among the three remaining Field Security Radio Operators (Local level) in Kirkuk and Basrah, respectively;
- (c) Establishment of three positions of Security Assistant (2 international United Nations Volunteer and 1 national United Nations Volunteer) to support a thorough review of all security support functionalities and related activities in support of 220 personnel. The establishment of these positions will support the Security Section in monitoring security identification and passes; providing security training and gender mainstreaming on security issues; and processing all acquisitions, including ordering for materials, goods, services, contracts and projects for the Section.

33. The Iraq team of the Middle East Division and the Electoral Assistance Division of the Department of Political and Peacebuilding Affairs (2 P-4 and 2 P-3) provide backstopping support to the Mission from United Nations Headquarters in New York. In support of the Mission's mandate delivery, the capacity of the Department to respond to backstopping demands will remain essential, with functions ranging from providing operational support and assisting in identifying and prioritizing critical strategic objectives to engagement with the Security Council, Member States and other key regional and international partners.

(b) Office of the Deputy Special Representative of the Secretary-General for Political Affairs and Electoral Assistance

Front Office	+1	P-4	Climate, Peace and Security Adviser	Reassignment	}
Office of Political Affairs and Analysis	-1	P-4	Political Affairs Officer	Reassignment	
Total	-				

35. The following change is proposed for 2025: reassignment of one post of Political Affairs Officer (P-4) from the Office of Political Affairs and Analysis as a Climate, Peace and Security Adviser (P-4) in the Front Office to support the Mission and its leadership in responding to the increased focus on the adverse impact of climate change in the UNAMI mandate, referenced in Security Council resolutions [2576 \(2021\)](#), [2631 \(2022\)](#) and [2682 \(2023\)](#). The post will enable the Mission to build analysis on climate-related conflict drivers, mainstream climate-change approaches in its work, and strengthen its support to climate-resilience dialogues to promote climate action in support of Government policies. Furthermore, this capacity will enable the Mission to engage its good offices and advocacy in dialogues that are specifically designed to enhance political stability, peace and security in an integrated and coordinated manner, ensuring inclusive engagement and meaningful public participation, especially by woman and young people.

36. The Deputy Special Representative of the Secretary-General for Development and Humanitarian Affairs leads the Mission's Development Support Office and is responsible for supporting the Special Representative of the Secretary-General in promoting and facilitating, as well as coordinating with the Government of Iraq and the United Nations country team on, efforts relating to humanitarian assistance and sustainable development. In that role, the Deputy Special Representative also serves as the Resident Coordinator and Humanitarian Coordinator, leading the United Nations country team and coordinating international donor support. The Deputy Special Representative is supported by a Front Office and by the Development Support Office in the coordination and monitoring of both short- and long-term development programmes as outlined in the Mission's mandate and the United Nations Sustainable Development Cooperation Framework.
37. The Development Support Office supports the coordination of the Deputy Special Representative's work with government counterparts as well as with United Nations country team counterparts in areas relating to development and durable solutions, including climate change. The Office maintains essential linkages in the Mission's field locations, in support of the triple-hatted functions of the Deputy Special Representative/Resident Coordinator/Humanitarian Coordinator, with United Nations agencies, funds and programmes, local governments, non-governmental organizations, tribal leaders and other actors to assist the Government of Iraq in meeting its immediate socioeconomic and climate-related challenges to peace and security. The Office facilitates the access of humanitarian and development actors to different regions and provinces by working with local government officials and other key interlocutors.

Table 15

	+1	P-5	Senior Coordination Officer	Reclassification
Total	-			

38. Given the important function of the Office of the Deputy Special Representative/Resident Coordinator/Humanitarian Coordinator within an integrated mission and the ongoing efforts to ensure that it is able to effectively support its mandate-related functions, the Secretariat continues to strengthen coherence and collaboration between the respective pillars in mission settings. An appropriately sized and dedicated capacity in the mission structure is required to support the Office in carrying out its cross-pillar function within the mission and to provide sufficient support to its role in coordinating the work of the various units reporting to the Office. To ensure a predictable and stable capacity, and building on an initial review, the Secretariat undertook an in-depth study of 11 field missions to formulate a common approach in order to objectively assess the enhanced managerial and coordination support requirements for the Office of the Deputy Special Representative/Resident Coordinator/Humanitarian Coordinator in both peacekeeping and special political missions. This study showed that while a dedicated senior staff providing support to the Office was required, the level of this position should be differentiated depending on: (a) the number of units reporting to the Office; and (b) the number of substantive mandate points assigned to the Office.
39. Based on a review of the number of units and mandate points assigned to the Office in UNAMI, the following change is proposed for 2025: reclassification of one post of Coordination Officer (P-4) to one post of Senior Coordination Officer (P-5) to provide a dedicated capacity for the management and oversight of the Development Support Office as well as coordination with other United Nations country team counterparts. The incumbent would directly supervise the Office, providing

management, strategic guidance and oversight; assist and advise the Deputy Special Representative/ Resident Coordinator/Humanitarian Coordinator in the coordination, implementation, monitoring and reporting of the Mission's durable solution strategy; lead the work of developing the durable solutions coordination architecture with area-based coordination groups; ensure a high-degree of regular, senior-level engagement and coordination with the full range of national stakeholders, including representation functions, including at the governor and minister levels, with civil society leaders, heads of non-governmental organizations and implementing partner organizations; and lead close collaboration with the Front Office of the Deputy Special Representative for Development and Humanitarian Affairs during the humanitarian transition towards sustainable development.

(d) Mission Support

40. Mission Support functions are under the overall responsibility of the Chief of Mission Support, who coordinates and supervises two main workstreams, namely, operations and resource management and supply chain and service delivery management.
41. The Chief of Mission Support acts as the principal adviser to the Head of Mission on all matters pertaining to administrative and logistical support and is supported by the Chiefs of the Operations and Resource Management and the Supply Chain and Service Delivery Management pillars.
42. The Operations and Resource Management pillar is responsible for the provision of general support and the management of operations and resources. The Chief of Operations and Resource Management oversees the Human Resources Section, the Financial Resourcing and Performance Unit, the Field Technology Section, the regional offices in Erbil and Kirkuk, the Procurement Section, the Contract Management Unit and the Training Unit.

43. The Supply Chain and Service Delivery Management pillar is responsible for managing and coordinating the flow of supply chain goods and services and the provision of key logistical support services to all mission components and other clients. The Chief of Supply Chain and Service Delivery Management oversees the Life Support Unit, the Engineering Section, the Integrated Facilities Management and Welfare Unit, the Surface Transport Section, the Medical Services Section, the Staff Counselling Unit, the Centralized Warehousing Section, the Acquisition Planning and Requisitioning Unit, the Aviation and Movement Control Section and the Property Management Section.

Supply Chain and Service Delivery Management

Staffing changes

Office/service/section/unit	Positions				Action	Description
	Change	Level	Functional title			
Aviation and Movement Control Section	-1	LL	Movement Control Assistant		Abolishment	
Total	-1					

44. The following change is proposed for 2025: the abolishment of one Movement Control Assistant (Local level) in Kirkuk, as the position has been vacant for more than two years and the functions have been assumed by other positions.

Kuwait Joint Support Office

45. The Kuwait Joint Support Office will continue to support UNAMI, the United Nations Assistance Mission in Afghanistan and other missions. No changes are proposed for 2025.

III. Operational costs					
Consultants and consulting services	287.5	178.6	283.7	164.0	(119.7)
Official travel	1 079.0	816.8	1 014.6	844.4	(170.2)
Facilities and infrastructure	6 420.6	6 632.6	5 580.1	4 742.9	(837.2)
Ground transportation	1 056.5	1 053.9	1 126.3	890.0	(236.3)
Air operations	3 150.5	3 068.2	3 734.6	4 997.2	1 262.6
Communications and information technology	2 707.0	2 448.7	2 927.5	2 596.5	(331.0)
Medical	334.9	97.3	345.2	357.4	12.2
Other supplies, services and equipment	970.0	814.0	1 086.0	1 021.2	(64.8)
Subtotal, category III	16 006.0	15 110.2	16 098.0	15 613.6	(484.4)
Total	96 910.6	98 999.7	98 126.5	103 202.6	5 076.1

4. Analysis of resource requirements

Military and police personnel costs

(Thousands of United States dollars)

	<i>Appropriation 2023</i>	<i>Expenditures 2023</i>	<i>Appropriation 2024</i>	<i>Requirements 2025</i>	<i>Variance 2025 vs. 2024</i>
Military contingents	4 939.7	4 583.1	5 099.8	4 793.8	(306.0)

46. Resources amounting to \$4,793,800 are proposed to provide for the deployment of 245 military contingent personnel and include requirements for: (a) standard troop cost reimbursement (\$2,809,700); (b) travel on emplacement, rotation and repatriation (\$618,000); (c) recreational leave allowance (\$55,800); (d) daily allowance (\$75,800); (e) death and disability compensation (\$26,200); (f) rations (\$1,174,200); (g) major equipment (\$4,800); and (h) self-sustainment (\$29,300).
47. A vacancy rate of 0 per cent has been applied based on the planned deployment for 2025.
48. The decrease is attributable mainly to lower costs for: (a) travel on emplacement, rotation and repatriation for the rotation of the Guard Unit from Fiji, based on the most recent letter of assist from the Government of Australia; (b) rations, owing to a change in the planned deployment of troop personnel from Mosul to Kirkuk at a lower rations rate, against a troop strength of 25 personnel in Mosul, which was provided for in the 2024 approved budget, as well as the non-requirement for a provision for the one-time mobilization costs to Mosul provided for in the 2024 approved budget; and (c) death and disability compensation, owing to reduced provisions based on historical expenditure patterns.

Civilian personnel costs

(Thousands of United States dollars)

	<i>Appropriation 2023</i>	<i>Expenditures 2023</i>	<i>Appropriation 2024</i>	<i>Requirements 2025</i>	<i>Variance 2025 vs. 2024</i>
International staff	51 438.6	51 741.6	50 245.0	53 565.2	3 320.2

49. Resources amounting to \$53,565,200 are proposed to provide for salaries (\$25,595,000), common staff costs (\$24,711,700) and danger pay (\$3,258,500) for the deployment of 278 international posts (1 Under-Secretary-General, 2 Assistant Secretaries-General, 1 D-2, 6 D-1, 17 P-5, 44 P-4, 51 P-3, 5 P-2 and 151 Field Service).
50. A vacancy rate of 14.6 per cent has been applied to the estimates for continuing positions, based on the actual average vacancy rate in 2023, while a vacancy rate of 50 per cent has been applied to the two posts proposed for reassignment.
51. The increase is attributable mainly to: (a) the application of a higher percentage of common staff costs at 96.5 per cent based on recent expenditure patterns, compared with 92.9 per cent applied in the 2024 approved budget; and (b) the application of the higher post adjustment multiplier for Iraq of 37.8 per cent, compared with 29.4 per cent applied in the 2024 approved budget. The increased requirements are offset in part by the application of the higher vacancy rate of 14.6 per cent, compared with the rate of 13.3 per cent applied in the 2024 approved budget, and the proposed reassignment of two posts (1 P-4 and 1 Field Service) with the application of a 50 per cent vacancy rate.

(Thousands of United States dollars)

	<i>Appropriation 2023</i>	<i>Expenditures 2023</i>	<i>Appropriation 2024</i>	<i>Requirements 2025</i>	<i>Variance 2025 vs. 2024</i>
National Professional Officer	9 631.9	10 691.4	10 452.3	11 634.0	1 181.7

52. Resources amounting to \$11,634,000 are proposed to provide for salaries (\$8,706,300), common staff costs (\$2,238,800) and danger pay (\$688,900) for the deployment of 124 National Professional Officers.
53. A vacancy rate of 9.4 per cent has been applied to the cost estimates for continuing posts, based on the actual average vacancy rate in 2023.
54. The increase is attributable mainly to: (a) higher salary rates based on the revised salary scale for Iraq promulgated in February 2024; (b) the application of the higher average level/step of NO-C/IX of the salary scale based on the current staffing composition, compared with the level/step of NO-B/IX applied in the approved budget for 2024; and (c) the application of the lower vacancy rate of 9.4 per cent, compared with the rate of 9.8 per cent applied in the 2024 approved budget.

(Thousands of United States dollars)

	<i>Appropriation 2023</i>	<i>Expenditures 2023</i>	<i>Appropriation 2024</i>	<i>Requirements 2025</i>	<i>Variance 2025 vs. 2024</i>
Local level staff	14 829.7	16 750.2	16 168.5	17 447.7	1 279.2

55. Resources amounting to \$17,447,700 are proposed to provide for salaries (\$11,838,800), common staff costs (\$3,853,600) and danger pay (\$1,755,300) for the deployment of 365 Local level posts.
56. A vacancy rate of 7.9 per cent has been applied to the cost estimates for continuing posts based on the actual average vacancy rate in 2023.
57. The increase is attributable mainly to: (a) the higher salary rates based on the revised salary scale for Iraq promulgated in February 2024, compared with the rates applied in the 2024 approved budget; and (b) the application of the lower vacancy rate of 7.9 per cent, compared with the rate of 8.3 per cent applied in the 2024 approved budget. The increased requirements are offset in part by the proposed abolishment of seven posts.

(Thousands of United States dollars)

	<i>Appropriation 2023</i>	<i>Expenditures 2023</i>	<i>Appropriation 2024</i>	<i>Requirements 2025</i>	<i>Variance 2025 vs. 2024</i>
United Nations Volunteers	64.7	122.8	62.9	148.3	85.4

58. Resources amounting to \$148,300 are proposed to provide for the continuing deployment of two national United Nations Volunteers and for the proposed establishment of two international United Nations Volunteers and one national United Nations Volunteer.
59. A vacancy rate of 0 per cent has been applied to the estimates for continuing national United Nations Volunteer positions, based on the actual vacancy rate as at 31 March 2024, while a vacancy rate of 50 per cent has been applied to the estimates for the three positions proposed for establishment.
60. The increase is attributable mainly to the additional requirement for the establishment of two international and one national United Nations Volunteer positions to provide support capacity in the Security Section.

Operational costs

(Thousands of United States dollars)

	<i>Appropriation 2023</i>	<i>Expenditures 2023</i>	<i>Appropriation 2024</i>	<i>Requirements 2025</i>	<i>Variance 2025 vs. 2024</i>
Consultants and consulting services	287.5	178.6	283.7	164.0	(119.7)

61. Resources amounting to \$164,000 are proposed to provide for individual consultants and consulting services for the provision of technical and specialized expertise on electoral issues, legislative processes, cybersecurity audits, records management and training for Mission personnel.
62. The decrease is attributable mainly to: (a) the non-requirement for individual consultants with expertise on human rights and climate change, digital transformation and digitalization, and durable solutions, owing to the completion of consultant works in these areas, as well as the proposed reassignment of one post of Political Affairs Officer (P-4) as a Climate, Peace and Security Adviser (P-4), as described in paragraph 36 above, which will provide dedicated in-house capacity on climate change and durable solutions; and (b) the realignment of the provision related to the outsourcing of psychosocial services to support staff counselling needs under medical expenditures.

(Thousands of United States dollars)

	<i>Appropriation 2023</i>	<i>Expenditures 2023</i>	<i>Appropriation 2024</i>	<i>Requirements 2025</i>	<i>Variance 2025 vs. 2024</i>
Official travel	1 079.0	816.8	1 014.6	844.4	(170.2)

63. Resources amounting to \$844,400 are proposed to provide for within-Mission travel for essential engagements; mediation and facilitation with national counterparts and civil society, including non-governmental organizations; overseeing regional and field offices; political consultations with local entities; and human rights fact-finding, monitoring and investigation missions. Travel outside the Mission area includes that of the Special Representative of the Secretary-General and senior members of her team for high-level political consultations with various entities, meetings with high-level counterparts at United Nations Headquarters and briefings to the Security Council (\$550,200) and training-related travel (\$294,200).
64. The decrease is attributable mainly to the increased utilization of hybrid videoconferencing services to the extent possible for within-Mission consultations and for training activities.

(Thousands of United States dollars)

	<i>Appropriation 2023</i>	<i>Expenditures 2023</i>	<i>Appropriation 2024</i>	<i>Requirements 2025</i>	<i>Variance 2025 vs. 2024</i>
Facilities and infrastructure	6 420.6	6 632.6	5 580.1	4 742.9	(837.2)

65. Resources amounting to \$4,742,900 are proposed to provide for the acquisition of: (a) engineering supplies (\$107,800); (b) prefabricated facilities (\$58,300); (c) furniture (\$94,000); (d) office and other equipment (\$5,700); (e) safety and security equipment (\$312,000); (f) rental of premises (\$1,059,100); (g) utilities and waste disposal services (\$441,600); (h) maintenance services (\$1,437,800); (i) security services (\$404,100); (j) construction, alteration, renovation and major maintenance (\$400,000); (k) stationery and office supplies (\$77,600); (l) spare parts and supplies (\$118,900); (m) construction material and field defence supplies (\$41,400); (n) petrol, oil and lubricants (\$124,600); and (o) sanitation and cleaning materials (\$60,000).

66. The decrease is attributable mainly to lower requirements for: (a) construction, alteration, renovation and major maintenance owing to fewer projects undertaken, as the requirements for the completion of the major construction and renovation projects have been provided for in prior periods; (b) maintenance services, owing to lower contractual prices for cleaning services and general operational maintenance; and (c) utilities and waste disposal services, owing to increased utilization of renewable energy sources and other consumption efficiencies. The reduced requirements are offset in part by increased requirements for: (a) rental of premises, owing to higher costs for office and living accommodations in the Basrah International Hotel based on the most recent annual contractual rates, and higher requirements for the Mission's portion of accommodation costs in the Mosul compound, based on the most recent billing from UNDP; (b) acquisition of furniture for the replacement of ageing offices and accommodation items; and (c) spare parts, owing to new requirements in connection with the maintenance of the Mission's solar photovoltaic system.

(Thousands of United States dollars)

	<i>Appropriation 2023</i>	<i>Expenditures 2023</i>	<i>Appropriation 2024</i>	<i>Requirements 2025</i>	<i>Variance 2025 vs. 2024</i>
Ground transportation	1 056.5	1 053.9	1 126.3	890.0	(236.3)

67. Resources amounting to \$890,000 are proposed to provide for: (a) acquisition of vehicle workshop equipment (\$36,000); (b) rental of vehicles (\$23,200); (c) repairs and maintenance (\$69,000); (d) liability insurance (\$7,000); (e) spare parts (\$392,400); and (f) petrol, oil and lubricants (\$362,400).
68. The decrease is attributable mainly to the non-requirement for the acquisition of vehicles for which a provision was included in the 2024 approved budget, offset in part by higher requirements for repairs and maintenance and spare parts mainly for the Mission's ageing armoured vehicles and for the refurbishment of the driver's cabins of two trucks.

(Thousands of United States dollars)

	<i>Appropriation 2023</i>	<i>Expenditures 2023</i>	<i>Appropriation 2024</i>	<i>Requirements 2025</i>	<i>Variance 2025 vs. 2024</i>
Air operations	3 150.5	3 068.2	3 734.6	4 997.2	1 262.6

69. Resources amounting to \$4,997,200 are proposed to provide for the Mission's air transport fleet, which comprises two fixed-wing aircraft, operating for an estimated 800 flight-hours, as follows: (a) services (\$10,400); (b) landing fees and ground-handling charges (\$164,500); (c) air crew subsistence allowance (\$8,200); (d) petrol, oil and lubricants (\$777,200); (e) rental and operation (\$4,026,900); and (f) liability insurance (\$10,000).
70. The increase is attributable mainly to: (a) higher requirements for the rental and operation of fixed-wing aircraft based on the latest contractual prices; and (b) the discontinuation of contributions from UNITAD for the cost-sharing of the rental and operation of one fixed-wing aircraft (\$200,000 per year) owing to the end of its mandate, as well as the Office of the Special Envoy of the Secretary-General for Yemen opting out of aircraft-sharing with the Mission. The increased requirements are offset in part by lower requirements for petrol, oil and lubricants due primarily to the lower average cost price of jet fuel of \$1.853 per litre, compared with the average price of \$2.270 per litre applied in the approved 2024 budget, as well as the reduction in estimated flight hours to 800, compared with 925 flight hours approved in 2024.

(Thousands of United States dollars)

	<i>Appropriation 2023</i>	<i>Expenditures 2023</i>	<i>Appropriation 2024</i>	<i>Requirements 2025</i>	<i>Variance 2025 vs. 2024</i>
Communications and information technology	2 707.0	2 448.7	2 927.5	2 596.5	(331.0)

71. Resources amounting to \$2,596,500 are proposed to provide for: (a) communications and information technology equipment (\$81,100); (b) telecommunications and network services (\$396,600); (c) maintenance of communications and information technology equipment and support services (\$1,296,700); (d) spare parts (\$130,000); (e) software, licences and fees (\$567,200); and (f) public information and publication services (\$124,900).

72. The decrease is attributable mainly to: (a) fewer acquisitions of communications equipment owing to the anticipated receipt of computer equipment such as laptops and a computer server to be transferred from UNITAD in view of the end of its mandate; and (b) a reduced need for spare parts owing to the availability of stock in inventory acquired in prior periods. The decreased requirements are offset in part by increased requirements for software, licences and fees owing to new requirements for a cloud-based service licence, as well as an increase in centralized support services costs for enterprise software licences.

(Thousands of United States dollars)

	<i>Appropriation 2023</i>	<i>Expenditures 2023</i>	<i>Appropriation 2024</i>	<i>Requirements 2025</i>	<i>Variance 2025 vs. 2024</i>
Medical	334.9	97.3	345.2	357.4	12.2

73. Resources amounting to \$357,400 are proposed to provide for the acquisition of equipment (\$6,000), medical services (\$165,000) and supplies (\$128,200).

74. The increase is attributable mainly to the realignment of the provision related to the outsourcing of psychosocial services to support staff counselling needs from the consultant and consulting services class of expenditures, offset by lower requirements for supplies of drugs and consumables.

(Thousands of United States dollars)

	<i>Appropriation 2023</i>	<i>Expenditures 2023</i>	<i>Appropriation 2024</i>	<i>Requirements 2025</i>	<i>Variance 2025 vs. 2024</i>
Other supplies, services and equipment	970.0	814.0	1 086.0	1 021.2	(64.8)

75. Resources amounting to \$1,021,200 are proposed to provide for: (a) welfare (\$59,600); (b) training fees, supplies and services (\$139,200); (c) other hospitality (\$25,000); (d) general insurance (\$45,000); (e) bank charges (\$71,000); (f) claims, write-offs and adjustments (\$8,000); (g) other freight and related costs (\$293,900); (h) rations (\$123,800); (i) individual contractual services (\$189,700); and (j) other services (\$66,000).

76. The decrease is attributable mainly to lower requirements for freight and related costs owing to a lower planned level of acquisition, as well as a non-requirement for official functions. This decrease is offset in part by additional requirements for individual contractors to provide security support to various engineering projects at different Mission sites and United Nations compounds, as well as to provide capacity support to the Mission's energy and conservation initiatives in the area of organic waste and composting activities.

Extrabudgetary resources**(a) Voluntary contributions**

77. In 2024, voluntary contributions amounting to approximately \$731,100 are projected to be utilized for the staff costs of one position (P-4) to support efforts to combat the adverse impacts of climate change in Iraq and to continue to support activities aimed at enhancing the Mission's political engagement and strengthening the participation of Iraqi women and young people in political dialogue.
78. In 2025, voluntary contributions in the estimated amount of \$402,000 are projected to continue supporting activities that strengthen Iraqi women's and youth's engagement in political dialogue.
79. The decrease in the estimated voluntary contributions compared with 2024 is due mainly to the discontinuation of the staff costs for one position (P-4) supporting climate change efforts.

(b) Cost recovery

80. In 2024, resources in the amount of \$10,279,800 are estimated to be received from the United Nations country team in Iraq, through the cost recovery mechanism, for services provided by the Mission in the areas of security, space management, medical services, fuel and other supplies. Such services are provided to achieve economies of scale and enable more effective and efficient delivery of mandates, in accordance with the "One United Nations" initiative. These cost recovery resources will be utilized to provide for six positions (two Field Service and four international United Nations Volunteers) and to continue to support the United Nations Guard Unit, cost-sharing of other security staff costs and services, space management, cleaning services, field technology services, ground transport, medical services, fuel and other supplies and will complement the regular budget resources of the Mission.
81. In 2025, resources in the amount of \$9,251,800 are projected to be received from the United Nations country team and will continue to be utilized to provide for the continuation of six positions (two Field Service and four international United Nations Volunteers) and to continue to support the United Nations Guard Unit, cost-sharing of other security staff costs and services, space management, cleaning services, field technology services, ground transport, medical services, fuel and other supplies.
82. The decrease in the estimated amount to be received is due to the anticipated closure of UNITAD in 2024.

II. Status of the renovation project for an integrated headquarters compound in Baghdad

83. The trust fund in support of the construction and renovation of the United Nations Integrated Compound in Baghdad was established for the construction of an integrated compound in Baghdad that would accommodate all the United Nations agencies, funds and programmes operating in Iraq.
84. On 31 March 2010, the trust fund received \$25,000,000 from the Government of Iraq and \$760,600 from the Governments of the Czech Republic, Greece, Italy, Luxembourg, Poland and Sweden. In June 2011, a further contribution of \$25,000,000 was received from the Government of Iraq, bringing total contributions received by the trust fund to \$50,760,600.
85. All the trust fund projects have been successfully completed and the Mission is in the process of closing the trust fund.

III. Status of the project for the rehabilitation of the United Nations Assistance Mission for Iraq building in Kuwait

86. The Kuwait Joint Support Office premises were provided to the United Nations free of charge by the Government of Kuwait to host its support office for UNAMI and the United Nations Assistance Mission in Afghanistan. The rehabilitation of the Kuwait office buildings and facilities has been pending since 2004 when it was handed over to UNAMI from the United Nations Iraq-Kuwait Observation Mission.
87. The planned rehabilitation of the UNAMI office building and the general compound in Kuwait is aimed at ensuring a safe, secure and conducive working environment for the staff who continue to use the facilities. A contract for the construction was awarded on 24 December 2023. However, despite the Mission's efforts, no approval has been received from the Government of Kuwait for the start of the project. Given this significant delay and the uncertainty of obtaining approval in the short term, a decision was made to cancel the renovation project.

Annex I

Summary of follow-up action taken to implement decisions and requests of the General Assembly, including the requests and recommendations of the Advisory Committee on Administrative and Budgetary Questions endorsed by the Assembly

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

(A/78/7/Add.6)

The Advisory Committee trusts that information on an updated risk assessment for the United Nations Assistance Mission for Iraq (UNAMI) will be included in the next budget submission (para. 20).

In the context of a Mission-wide risk assessment carried out in January 2024, the Department of Safety and Security conducted an ad hoc risk assessment which supported the need for a dedicated administrative post to be established in the Security Section to support the Section's Integrated Security Team's crisis management responsibilities.

The Advisory Committee trusts that information on the status of the construction of the new building, as well as efficiencies related to the maintenance of the new premises, will be provided in the next budget report (para. 33).

Information on the status of the project and the anticipated efficiencies to be realized is included in paragraphs 87 and 88 of the present report.

The Advisory Committee trusts that an update on the efforts of UNAMI to improve its geographical balance will be provided to the General Assembly at the time of its consideration of the present report and in the context of the next budget submission (para. 34).

Effective 1 January 2024, for all positions under recruitment, UNAMI hiring managers are provided with guidance on gender and geographical balance requirements, the corresponding data of the relevant section/unit and the Mission, and information on the strategic and conscious efforts taken to achieve these goals. Additional information provided to managers includes the names of candidates from underrepresented staff categories for each position and grade cleared by the Field Central Review Body.

Bimonthly gender parity and geographical representation sensitization meetings and performance review forums led by the Deputy Special Representative of the Secretary-General for Political Affairs and Electoral Assistance are also conducted by the Mission.

The Advisory Committee trusts that UNAMI will intensify its efforts to achieve gender balance among its staff and provide an update in future programme budget submissions (see also [A/77/7/Add.6](#), para. 31, [A/76/7/Add.6](#), para. 31, and [A/75/7/Add.7](#), para. 16) (para. 35).

The UNAMI gender parity working group, chaired by the Deputy Special Representative of the Secretary-General for Political Affairs and Electoral Assistance with the membership of the Office of the Chief of Staff, the Office of the Chief of Mission Support, the Human Resources Section and the Gender Unit, continues to monitor and report on meeting gender parity goals. The group regularly reviews recruitments and best practices, monitors progress towards the gender parity implementation plan for 2024–2025 and

The Advisory Committee trusts that the Secretary-General will systematically include in future budget proposals disaggregated information on cost recovery, specifying the services provided to different entities and the respective amounts recovered (see also [A/77/7/Add.6](#), para. 30, and [A/76/7/Add.6](#), para. 29) (para. 38)

The Advisory Committee notes that the Mission, in cooperation with the United Nations country team, is supporting the host country to transition from an approach focused on humanitarian activities towards one focused on development activities and trusts that updated information will be included in the next report. The Committee also trusts that the proposed budget for UNAMI for 2025 will reflect the results of the independent strategic review and any impact on the transition strategy, as well as implications for the Kuwait Joint Support Office (para. 42).

ensures the implementation of increased outreach to female candidates, in particular with regard to field support and security staff recruitments, where gender imbalances have been identified.

Information on cost recovery specifying the services provided to different entities is provided in the main report on the estimates in respect of special political missions ([A/79/6 \(Sect. 3\)/Add.1](#)).

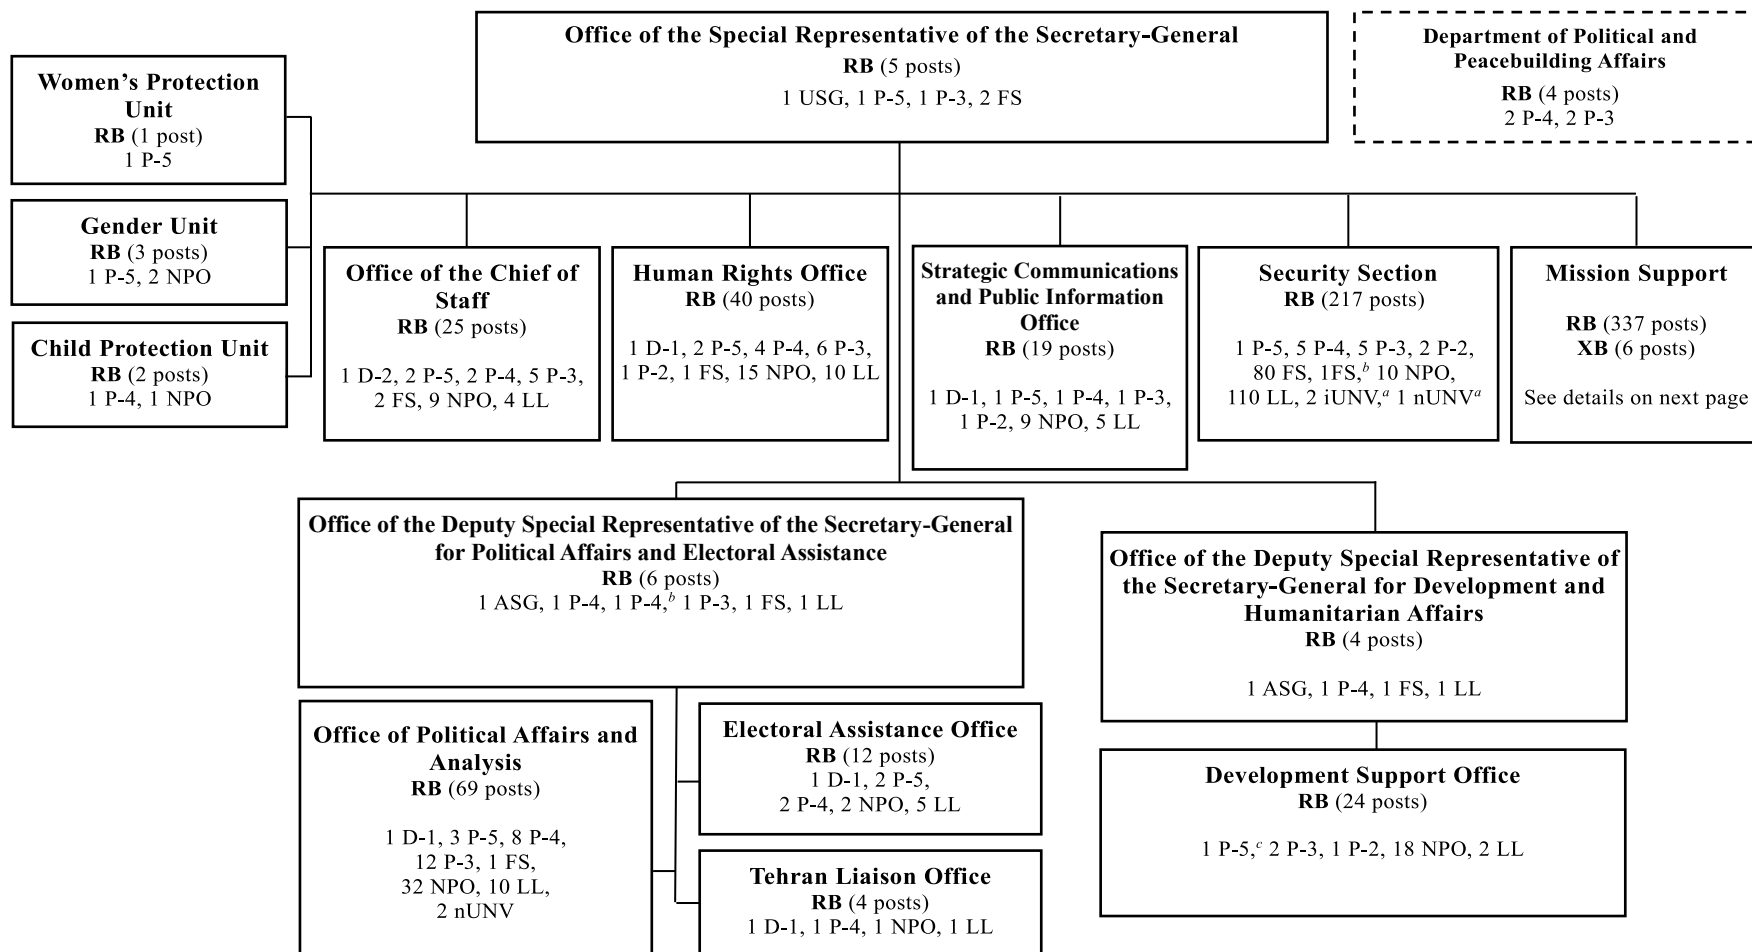

In line with the request of the Government of Iraq to shift from humanitarian to development activities, the latest United Nations Sustainable Development Cooperation Framework, covering the period 2020–2024, has focused on the transition from humanitarian assistance to support for the achievement of the Sustainable Development Goals. Similarly, as the Mission and the United Nations country team are currently drafting the Cooperation Framework for the period 2025–2029, the four strategic priorities earmarked for the next five years include social and human development, economic development, climate change and governance.

The present budget proposal reflects the resources required for the Mission to implement its existing mandate and does not incorporate any findings or recommendations of the independent strategic review, which is due to be considered by the Security Council in the context of the renewal of the mandate of UNAMI. Any impact on the Mission's interventions and structure, including the posture of the Kuwait Joint Support Office and resource implications related to the strategic review, would need to be formulated on the basis of the endorsement by the Council and the mandate to be given in that context.

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 4.1 The Office for Disarmament Affairs is responsible for supporting multilateral efforts aimed at achieving the goal of general and complete disarmament under strict and effective international control. Its mandate derives from the priorities established in relevant General Assembly resolutions and decisions in the field of disarmament, including the final document of the tenth special session of the General Assembly, the first special session devoted to disarmament (resolution [S-10/2](#)). Weapons of mass destruction, particularly nuclear weapons, remain a major concern owing to their destructive power and the continuing threat posed to humanity. The deteriorating global strategic environment is also exacerbating such concerns. Global concerns regarding other weapons of mass destruction, including chemical weapons, remained significant, demonstrating the importance of adequate preparedness to prevent and respond to biological risks. The Office provides support for combating the illicit trade in small arms and light weapons and works on the identification and analysis of emerging issues, including new technologies, and their impact on international security.

Strategy and external factors for 2025

- 4.2 The Office will ensure full implementation of its legislative mandates and compliance with United Nations policies and procedures. It will continue to support multilateral negotiations and deliberations and provide expertise and practical solutions, while building confidence and trust, and will strive to facilitate the reconciliation of disparate positions among Member States resulting from a volatile international security environment. The Office will seek to mitigate the risks that it faces in carrying out its mandate and will continue to implement its strategic plan, first launched in 2021 and scheduled to run through 2025.
- 4.3 The Office will continue to be guided by existing frameworks, including relevant elements of the Sustainable Development Goals and the Secretary-General's peace and security and development reforms, in accordance with relevant General Assembly resolutions. The Office will also be informed by *Securing Our Common Future: An Agenda for Disarmament*, in accordance with the mandates of the Office.
- 4.4 With regard to cooperation with other entities at the global, regional, national and local levels, the Office will continue to enhance cooperation and coordination with other international, regional and subregional organizations in the areas of disarmament, arms control and non-proliferation. Through its three regional centres and its liaison office in Vienna, the Office continues to strengthen global disarmament initiatives by promoting, facilitating and strengthening regional cooperation among States and regional and subregional organizations and arrangements. The Office will further enhance its partnerships with a diverse range of stakeholders in order to achieve the planned results. Through such partnerships, it will be able to effectively meet regional and national disarmament and arms control priorities, while simultaneously building greater local disarmament capacity and enhancing the viability of regional frameworks.
- 4.5 With regard to inter-agency coordination and liaison, the Office will continue to pursue cohesive approaches within the United Nations peace and security pillar, and with other specialized United Nations agencies and other entities, such as the Coordinating Action on Small Arms: the United Nations system-wide inter-agency coordination mechanism for small arms and ammunition control and the reduction of armed violence. The Office will continue to work with other United Nations entities to enable a holistic approach to addressing risks associated with arms, thereby contributing to conflict prevention, the protection of civilians and international peace and security. It will also

enhance its partnership network within the United Nations system and among Member States to raise awareness of the potential multifaceted linkages between disarmament and development.

- 4.6 With regard to the external factors, the overall plan for 2025 is based on the following planning assumptions:
- (a) The political environment and developments are supportive of disarmament efforts and are conducive to the facilitation of negotiations on new arms limitation and disarmament agreements;
 - (b) Member States are willing to implement the recommendations, resolutions and decisions of relevant meetings and conferences;
 - (c) International organizations and entities provide cooperation;
 - (d) National institutions support the promotion of equal opportunities for women in all decision-making processes and the promotion of meaningful and inclusive participation and engagement of young people in disarmament, non-proliferation and arms control.
- 4.7 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate, in line with organizational mandates and policies for mainstreaming a gender perspective into policies and programmes in the United Nations system (see Economic and Social Council resolution 2011/6) and associated departmental action plans. The Office will continue to accord high priority to assisting Member States in the implementation of Security Council resolutions on women and peace and security and to assisting States, upon request, in promoting the role of women in disarmament, non-proliferation and arms control and gender-sensitive policymaking and programming in line with General Assembly resolution 65/69 and subsequent resolutions on women, disarmament, non-proliferation and arms control. The Office will support the collection of data on the representation of women and men in disarmament meetings and education on gender mainstreaming related to disarmament, non-proliferation and arms control to support the activities of its five subprogrammes.
- 4.8 In line with the United Nations Disability Inclusion Strategy and General Assembly resolution 74/144, the Office will continue to implement its departmental action plan and work collaboratively with other United Nations entities to accelerate the full and effective mainstreaming of disability inclusion. This will include the promotion of accessibility and the equal participation of persons with disabilities in disarmament discussions and decision-making processes.
- 4.9 The Office will continue to facilitate youth engagement and promote the meaningful and inclusive participation of young people in discussions in the field of disarmament and non-proliferation, in line with General Assembly resolution 78/31 on youth, disarmament and non-proliferation.

Legislative mandates

- 4.10 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

S-10/2	Final Document of the Tenth Special Session of the General Assembly	68/33	Women, disarmament, non-proliferation and arms control
59/95	Improving the effectiveness of the methods of work of the First Committee	76/234	Promoting international cooperation on peaceful uses in the context of international security
62/272	The United Nations Global Counter-Terrorism Strategy		

Security Council resolutions

1325 (2000)	1673 (2006)
1540 (2004)	1810 (2008)

1887 (2009)	2117 (2013)
1977 (2011)	2118 (2013)
2055 (2012)	2475 (2019)

**Subprogramme 1
Multilateral negotiations and deliberations on disarmament and arms limitation**

General Assembly resolutions and decisions

74/50; 78/239; decisions 75/516, 76/515 and 77/514	Nuclear disarmament verification	78/52	Transparency and confidence-building measures in outer space activities
75/31	Prohibition of the development and manufacture of new types of weapons of mass destruction and new systems of such weapons: report of the Conference on Disarmament	78/61 78/64	Report of the Conference on Disarmament Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons Which May Be Deemed to Be Excessively Injurious or to Have Indiscriminate Effects
77/81	United Nations disarmament fellowship, training and advisory services	78/67	Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction
78/20	Reducing space threats through norms, rules and principles of responsible behaviours	78/238	Further practical measures for the prevention of an arms race in outer space
78/32	Implementation of the Convention on Cluster Munitions	78/241	Lethal autonomous weapons systems
78/45	Implementation of the Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on Their Destruction		

**Subprogramme 2
Weapons of mass destruction**

General Assembly resolutions and decisions

42/37 C	Measures to uphold the authority of the 1925 Geneva Protocol and to support the conclusion of a chemical weapons convention	76/48 77/50	Universal Declaration on the Achievement of a Nuclear-Weapon-Free World Measures to uphold the authority of the 1925 Geneva Protocol
42/38 C 54/280	Notification of nuclear tests Agreement to regulate the relationship between the United Nations and the Preparatory Commission for the Comprehensive Nuclear-Test-Ban Treaty Organization	77/56 77/66	Mongolia's international security and nuclear-weapon-free status Eleventh Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons and its Preparatory Committee
55/283	Cooperation between the United Nations and the Organization for the Prohibition of Chemical Weapons	78/17	Establishment of a nuclear-weapon-free zone in the region of the Middle East
64/35	International Day against Nuclear Tests	78/27	Follow-up to the 2013 high-level meeting of the General Assembly on nuclear disarmament
69/44	The Hague Code of Conduct against Ballistic Missile Proliferation	78/28	Treaty banning the production of fissile material for nuclear weapons or other nuclear explosive devices
72/31	Taking forward multilateral nuclear disarmament negotiations		
73/71	Fourth Conference of Nuclear-Weapon-Free Zones and Mongolia, 2020	78/33	Follow-up to the advisory opinion of the International Court of Justice on the legality of the threat or use of nuclear weapons
Decision 73/546	Convening a conference on the establishment of a Middle East zone free of nuclear weapons and other weapons of mass destruction	78/35	Treaty of the Prohibition of Nuclear Weapons

78/43	Measures to prevent terrorists from acquiring weapons of mass destruction	78/239	Nuclear disarmament verification
78/44	Reducing nuclear danger	78/240	Addressing the legacy of nuclear weapons: providing victim assistance and environmental remediation to Member States affected by the use or testing of nuclear weapons
78/53	Nuclear disarmament		
78/63	The risk of nuclear proliferation in the Middle East		

Subprogramme 3
Conventional arms

General Assembly resolutions and decisions

77/33	Objective information on military matters, including transparency of military expenditures	78/23	Relationship between disarmament and development
77/49	Effects of the use of armaments and ammunitions containing depleted uranium	78/37	Conventional arms control at the regional and subregional levels
77/64	Countering the threat posed by improvised explosive devices	78/46	The illicit trade in small arms and light weapons in all its aspects
77/69	Transparency in armaments	78/47	Through-life conventional ammunition management
77/72	Information on confidence-building measures in the field of conventional arms	78/54	Assistance to States for curbing the illicit traffic in small arms and light weapons and collecting them

Subprogramme 4
Information and outreach

General Assembly resolutions and decisions

47/53 D	World Disarmament Campaign	78/22	Role of science and technology in the context of international security and disarmament
Decision 54/418	Advisory Board on Disarmament Matters		
57/60	United Nations study on disarmament and non-proliferation education	78/25	Observance of environmental norms in the drafting and implementation of agreements on disarmament and arms control
77/52	United Nations study on disarmament and non-proliferation education	78/26	Promotion of multilateralism in the area of disarmament and non-proliferation
77/87	United Nations Disarmament Information Programme	78/31	Youth, disarmament and non-proliferation
Decision 77/512	Open-ended working group on security of and in the use of information and communications technologies 2021–2025 established pursuant to General Assembly resolution 75/240	78/237	Developments in the field of information and telecommunications in the context of international security
78/16	Programme of action to advance responsible State behaviour in the use of information and communications technologies in the context of international security		

Subprogramme 5
Regional disarmament

General Assembly resolutions and decisions

Decision 77/511	Maintenance of international security – good neighbourliness, stability and development in South-Eastern Europe	78/38	Confidence-building measures in the regional and subregional context
78/13	Implementation of the Declaration of the Indian Ocean as a Zone of Peace	78/56	United Nations Regional Centre for Peace and Disarmament in Africa
78/36	Regional disarmament		

Section 4 Disarmament

78/57	United Nations Regional Centre for Peace, Disarmament and Development in Latin America and the Caribbean	78/60	United Nations regional centres for peace and disarmament
78/58	United Nations Regional Centre for Peace and Disarmament in Asia and the Pacific	78/65	Strengthening of security and cooperation in the Mediterranean region

Deliverables

4.11 Table 4.1 lists all cross-cutting deliverables of the programme.

Table 4.1

Cross-cutting deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	3	3	3	3
Meetings of:				
1. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
2. The Committee for Programme and Coordination	1	1	1	1
3. The Fifth Committee	1	1	1	1

Evaluation activities

- 4.12 The evaluation of the Office’s strategic plan for 2021–2025, which was planned for 2023, was delayed and will be completed in 2024.
- 4.13 An evaluation of the Office’s substantive and administrative support to the Conference on Disarmament is planned for 2025.

Programme of work**Subprogramme 1****Multilateral negotiations and deliberations on disarmament and arms limitation****Objective**

- 4.14 The objective, to which this subprogramme contributes, is to advance multilateral negotiations and deliberations on agreements on disarmament, arms limitation and non-proliferation in all its aspects, as required by States parties to existing multilateral agreements and the Conference on Disarmament.

Strategy

- 4.15 To contribute to the objective, the subprogramme will:
- (a) Provide support for negotiations in the Conference on Disarmament and in conferences and meetings of States parties to various multilateral agreements on disarmament, arms limitation and non-proliferation in all its aspects at the organizational, procedural and substantive levels;

- (b) Render assistance and provide support for the follow-up to decisions, recommendations and programmes of action adopted by conferences and meetings of States parties to various multilateral disarmament, arms control and non-proliferation agreements and to treaty-making conferences, expert groups and other disarmament meetings under the responsibility of the subprogramme;
 - (c) Implement the United Nations Disarmament Fellowship, Training and Advisory Services Programme;
 - (d) Facilitate the efforts of Member States to prevent an arms race in outer space.
- 4.16 The above-mentioned work is expected to result in:
- (a) Effective and efficient holding of the meetings of the Conference on Disarmament, other conferences, working groups and expert groups and of the various treaty bodies falling under the remit of the subprogramme;
 - (b) Strengthened operational viability and compliance with treaty obligations and adherence to and/or implementation of decisions, recommendations and programmes of action, as well as increased reporting by States parties;
 - (c) Enhanced expertise of Member States in the field of disarmament and non-proliferation through participation in the United Nations Disarmament Fellowship, Training and Advisory Services Programme.

Programme performance in 2023

Group of Governmental Experts to further consider nuclear disarmament verification issues adopts a consensus report

- 4.17 In its resolution [74/50](#), the General Assembly requested the Secretary-General to establish a Group of Governmental Experts to further consider nuclear disarmament verification issues. The subprogramme supported the work of the Group of Governmental Experts with drafting, research and advice, and liaised with the experts and the Chair throughout the intersessional process.
- 4.18 Progress towards the objective is presented in the performance measure below (see table 4.2).

Table 4.2

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
–	–	The Group concluded its work with the adoption of a consensus report that presented an in-depth discussions on general considerations, conceptual issues, capacity-building and the concept of a group of scientific and technical experts

Planned results for 2025

Result 1: advanced discussions on the risks and benefits of emerging technologies in biological sciences

Programme performance in 2023 and target for 2025

- 4.19 The subprogramme’s work contributed to States parties converging on certain aspects of the risks and benefits of advances in science and technology under the Biological Weapons Convention, which met the planned target.
- 4.20 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 4.3).

Table 4.3
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Convergence among States parties on several aspects of a review mechanism for science and technology under the Biological Weapons Convention	The ninth Review Conference of the Biological Weapons Convention decided to develop, with a view to its establishment, a mechanism to review and assess scientific and technological developments relevant to the Biological Weapons Convention and provide States parties with relevant advice	States parties converged on certain aspects of the risks and benefits of advances in science and technology under the Biological Weapons Convention, including holding substantive discussions on a review mechanism for science and technology and intersessional consultations conducted by the Friends of the Chair	The working group on strengthening the Convention develops recommendations on establishing a mechanism to review and assess scientific and technological developments relevant to the Convention	The recommendations on establishing a mechanism to review and assess scientific and technological developments relevant to the Convention are endorsed by States parties and the mechanism is formally established
Development of the Tianjin Biosecurity Guidelines for Codes of Conduct for Scientists by academics from China and the United States of America, supported by the Governments of China and the United States. The Guidelines were subsequently endorsed by the Inter-Academy Partnership Unit				

Result 2: increase in deliberations and eventual negotiations in the Conference on Disarmament

Programme performance in 2023 and target for 2025

- 4.21 The subprogramme’s work contributed to States members of the Conference on Disarmament holding formal and informal thematic discussions on agenda items of the Conference and other specific topics and coming to a consensus on the annual report and resolution adopted by the General Assembly (resolution 78/61), which met the planned target.
- 4.22 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 4.4).

Table 4.4
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Increased continuity in the work of the six successive Presidents allowed for coordinated thematic discussions States members put forward a proposal to update the rules of procedure to recognize equality between women and men	The Conference on Disarmament adopted two of the five reports of the subsidiary bodies and a procedural report of the Conference to the General Assembly	Formal and informal thematic discussions were held on agenda items of the Conference and other specific topics, a consensus was reached on the annual report and a resolution was adopted by the General Assembly (resolution 78/61)	States members of the Conference reach agreement on a possible way forward, leading to discussions on possible areas of convergence for codes of conduct, confidence-building measures or pre-negotiations	States members of the Conference are able to carry out substantive work in a sustained and progressive manner on priority and emerging issues

Result 3: prevention of an arms race in outer space

Proposed programme plan for 2025

- 4.23 In the final document of the first special session of the General Assembly devoted to disarmament, on resolutions and decisions adopted by the Assembly during its tenth special session (A/S-10/4), it was stated that, in order to prevent an arms race in outer space, further measures should be taken and appropriate international negotiations held. To that end, the subprogramme supports the work of intergovernmental bodies and the processes responsible for the prevention of an arms race in outer space in all its aspects.

Lessons learned and planned change

- 4.24 The lesson for the subprogramme was the value of facilitating the participation of a geographically representative set of experts drawn from commercial actors, academia and civil society who can contribute to the discussion of specialized legal and technical aspects of the topic and contribute to stimulating interactive discussion among Member States participating in the work of the respective intergovernmental bodies. In applying the lesson, the subprogramme will intensify its cooperation with other United Nations entities, including the Office for Outer Space Affairs and the United Nations Institute for Disarmament Research, in order to facilitate deeper engagement on topics that could benefit from focused discussion with specialized experts.
- 4.25 Expected progress towards the objective is presented in the performance measure below (see table 4.5).

Table 4.5
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Adoption of substantive recommendations by the Disarmament Commission Conclusion of work within the open-ended working group on reducing space threats through norms, rules and principles of responsible behaviours Initiation of work in the Group of Governmental Experts on Further Practical Measures for the Prevention of an Arms Race in Outer Space	Adoption of a substantive outcome in the Group of Governmental Experts on Further Practical Measures for the Prevention of an Arms Race in Outer Space and inclusion of agreed language on the prevention of an arms race in outer space in “A Pact for the Future”, facilitating the work of future intergovernmental processes on this topic	Substantive deliberations in intergovernmental bodies contribute towards negotiations for the conclusion of an international agreement or agreements to prevent an arms race in outer space

Deliverables

4.26 Table 4.6 lists all deliverables of the subprogramme.

Table 4.6
Subprogramme 1: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies

Databases and substantive digital materials: databases relating to annual national reports on compliance, Protocol V and Amended Protocol II to the Convention on Certain Conventional Weapons, explosive remnants of war under Protocol V to the Convention, articles 7 and 8 (9) of the Convention on the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on Their Destruction, and article 7 of the Convention on Cluster Munitions; electronic reporting system for the confidence-building measures and the cooperation and assistance database of the Biological Weapons Convention; website relating to the Conference on Disarmament, the Geneva Branch of the Office for Disarmament Affairs, including web pages on financial matters, fissile material, the Biological Weapons Convention, the Convention on Certain Conventional Weapons, the Convention on the Prohibition of Military or Any Other Hostile Use of Environmental Modification Techniques, the Convention on Cluster Munitions and the Anti-Personnel Landmines Convention, the United Nations Disarmament Fellowship, Training and Advisory Services Programme and the Group of Governmental Experts to further consider nuclear disarmament verification issues.				
D. Communication deliverables				
Outreach programmes, special events and information materials: briefings and outreach materials on disarmament, arms limitation and non-proliferation to the Geneva-based permanent missions and governmental, non-governmental and civil society organizations; digital tools to improve national reporting and compliance (Biological Weapons Convention and Convention on Certain Conventional Weapons).				
Digital platforms and multimedia content: web pages on financial issues in support of conventions; digital tools to improve national reporting and compliance.				

Subprogramme 2

Weapons of mass destruction

Objective

- 4.27 The objective, to which this subprogramme contributes, is to advance disarmament and non-proliferation in all aspects of nuclear weapons and all other weapons of mass destruction and their means of delivery.

Strategy

- 4.28 To contribute to the objective, the subprogramme will:
- (a) Facilitate and support the process of negotiations, deliberations and consensus-building in the areas of disarmament and non-proliferation of weapons of mass destruction, in particular nuclear weapons and their means of delivery;
 - (b) Support the full implementation of international instruments dealing with the disarmament and non-proliferation of nuclear weapons, including the Treaty on the Non-Proliferation of Nuclear Weapons and the Treaty on the Prohibition of Nuclear Weapons, and for the entry into force of the Comprehensive Nuclear-Test-Ban Treaty;
 - (c) Support Member States in their negotiations on the establishment of a Middle East zone free of nuclear weapons and all other weapons of mass destruction;
 - (d) Provide substantive and technical support to office bearers of the First Committee and the Disarmament Commission;
 - (e) Continue to raise awareness of the dangers posed by nuclear weapons, including through substantive and technical support to the International Day for the Total Elimination of Nuclear Weapons and the International Day against Nuclear Tests;
 - (f) Strengthen cooperation with other relevant intergovernmental organizations, such as the International Atomic Energy Agency, in areas such as nuclear security and non-proliferation, and expand interaction, as appropriate, with civil society, in particular research and academic institutions and non-governmental organizations working in the areas of disarmament and non-proliferation of nuclear weapons and their delivery systems;
 - (g) Continue its close cooperation with the Organisation for the Prohibition of Chemical Weapons (OPCW) to promote the universality and full implementation of the Convention on the Prohibition of the Development, Production, Stockpiling and Use of Chemical Weapons and on Their Destruction;
 - (h) Support efforts to ensure accountability for the use of chemical weapons by, inter alia, supporting OPCW efforts in this regard and by working with members of the Security Council in order to build unity on the issue. The subprogramme will also continue to provide briefings to the Council on the implementation of resolution [2118 \(2013\)](#) on the elimination of the chemical weapons programme of the Syrian Arab Republic;
 - (i) Continue to enhance the operational readiness of the Secretary-General's Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons by organizing, with interested Member States and relevant partners, training and capacity-building activities for experts and analytical laboratories.
- 4.29 The above-mentioned work is expected to result in:
- (a) The building of trust and understanding among Member States in order to facilitate consensus on effective measures relating to the total elimination of nuclear weapons and measures to

prevent any use of a nuclear weapon, and to uphold the norms against the proliferation and testing of nuclear weapons;

- (b) The strengthening and reinforcement of the norm against chemical weapons use;
- (c) Enhanced ability of Member States to uphold the global norms against the use of weapons of mass destruction;
- (d) Strengthened coordination capabilities of Member States to respond to incidents involving the use of biological weapons.

Programme performance in 2023

Implementation of the Treaty on the Prohibition of Nuclear Weapons by States parties

- 4.30 Consistent with the mandate contained in General Assembly Resolution [77/54](#) in 2023, the subprogramme supported the second Meeting of States Parties to the Treaty on the Prohibition of Nuclear Weapons and its intersessional work programme.
- 4.31 Progress towards the objective is presented in the performance measure below (see table 4.7).

Table 4.7
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
–	<p>A declaration entitled “Our commitment to a world free of nuclear weapons” and the Vienna Action Plan for further implementation of the Treaty was adopted at the first Meeting of States Parties to the Treaty on the Prohibition of Nuclear Weapons</p> <p>An intersessional programme of work was established</p>	<p>A declaration entitled “Our commitment to upholding the prohibition of nuclear weapons and averting their catastrophic consequences” was adopted at the second Meeting of States Parties to the Treaty on the Prohibition of Nuclear Weapons</p> <p>An intersessional programme of work was established</p>

Planned results for 2025

Result 1: enhanced operational readiness of the Secretary-General’s Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons

Programme performance in 2023 and target for 2025

- 4.32 The subprogramme’s work contributed to strengthening the operational readiness of the Secretary-General’s Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons, which met the planned target.
- 4.33 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 4.8).

Table 4.8
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Increased understanding of qualified experts and laboratory focal points on the Mechanism and planned strategic missions Access to improved training for qualified experts	All newly nominated experts onboarded had an increased understanding of the Mechanism An increase in the nomination of experts for the roster	Strengthened operational readiness of the Mechanism through enhanced capacity of qualified experts and laboratory focal points based on the Mechanism’s training catalogue, including participation in two basic training and three skills training courses and onboarding of newly nominated experts	All newly nominated experts onboarded have an increased understanding of the Mechanism Increase in the number of experts with specialized skills training relevant to the Mechanism, and a broader geographical and skills base of rostered experts	All newly nominated experts onboarded have an increased understanding of the Mechanism Increase in the number of nominated experts with basic training and specialized skills training relevant to the Mechanism

Result 2: strengthening the multilateral nuclear disarmament and non-proliferation regime

Programme performance in 2023 and target for 2025

- 4.34 The subprogramme’s work contributed to the successful holding of the first session of the Preparatory Committee for the 2026 Review Conference of Parties to the Treaty on the Non-Proliferation of Nuclear Weapons, which met the planned target.
- 4.35 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 4.9).

Table 4.9
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Enhanced dialogue between Member States on achieving the goals of the Treaty on the Non-Proliferation of Nuclear Weapons	The 2020 Review Conference of the Parties to the Treaty, which was delayed by two years owing to the coronavirus disease (COVID-19) pandemic, was held States parties established a working group to further strengthen the review process of the Treaty	The first session of the Preparatory Committee for the 2026 Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons was held	The second Preparatory Committee meeting for the 2026 Review Conference of the Parties to the Treaty is held	The third session of the Preparatory Committee for the 2026 Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons is held States agree on arrangements for the 2026 Review Conference

Result 3: process to achieve the establishment of a Middle East zone free of nuclear weapons and other weapons of mass destruction

Proposed programme plan for 2025

4.36 The General Assembly, in its decision 73/546, requested the Secretary-General to convene annual sessions of a conference on the establishment of a Middle East zone free of nuclear weapons and other weapons of mass destruction until it concluded the elaboration of a legally binding treaty creating the aforementioned zone. The subprogramme contributes to advancing the process, through its support for the Conference.

Lessons learned and planned change

4.37 The lesson for the subprogramme was that the progressively more technical nature of discussions at the third and fourth sessions of the Conference on the Establishment of a Middle East Zone Free of Nuclear Weapons and Other Weapons of Mass Destruction would benefit from engagement from national experts, including from relevant agencies. In applying the lesson, the subprogramme will support States to include such experts in their delegations to support the technical discussions.

4.38 Expected progress towards the objective is presented in the performance measure below (see table 4.10).

Table 4.10
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	The Conference undertook substantive discussions and agreed to continue deliberations at its intersessional working committee meetings on, inter alia, nuclear verification, peaceful uses and technical cooperation and an index of the list of topics to be addressed by future sessions of the Conference	The Conference undertakes substantive deliberations, including through its intersessional working committee meetings, to advance the preparations for the negotiation of a legally binding instrument Implementation of the decision adopted at the fourth session (see A/CONF.236/2023/DEC.3)	The President of the sixth session, together with the members of the Conference, undertakes organizational and substantive preparations for the sixth session aimed at reaching a common position on the negotiation of a Middle East zone treaty

Deliverables

4.39 Table 4.11 lists all deliverables of the subprogramme.

Table 4.11

Subprogramme 2: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned

4. Reports and documents for the Meetings of States Parties to the Treaty on the Prohibition of Nuclear Weapons	–	28	–	30
Substantive services for meetings (number of three-hour meetings)	82	122	84	148
5. Meetings of the First Committee	25	25	25	25
6. Meetings of the Disarmament Commission	15	10	15	15
7. Plenary meetings of the high-level plenary meeting to commemorate and promote the International Day for the Total Elimination of Nuclear Weapons	2	2	2	2
8. High-level plenary meetings to commemorate and promote the International Day against Nuclear Tests	2	2	2	2
9. Meetings of the Conference and the Bureau of the Conference on Facilitating the Entry into Force of the Comprehensive Nuclear-Test-Ban Treaty	2	2	–	2
10. Meetings of the Conference on the Establishment of a Middle East Zone Free of Nuclear Weapons and Other Weapons of Mass Destruction	6	9	10	10
11. Pre-session consultations and meetings for the Meetings of States Parties to the Treaty on the Prohibition of Nuclear Weapons	–	41	–	60
12. Pre-session consultations and meetings for the Preparatory Committee for the 2026 Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons	30	31	30	32
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	30	44	35	38
13. Intersessional briefings of the Conference on the Establishment of a Middle East Zone Free of Nuclear Weapons and Other Weapons of Mass Destruction	6	8	3	8
14. Training courses for the Secretary-General's Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons on chemical weapons investigations and updating the roster of experts	24	36	32	30
C. Substantive deliverables				
Consultation, advice and advocacy: impartial technical, substantive and procedural advice provided to Member States; consultations with civil society, including on participation by civil society in treaty-related conferences; consultations with academia and specialized technical institutions; liaison with relevant intergovernmental organizations (e.g. OPCW, International Atomic Energy Agency and Comprehensive Nuclear-Test-Ban Treaty Organization); interdepartmental coordination, including as Vice-Chair of the United Nations Global Counter-Terrorism Coordination Compact Working Group on Emerging Threats and Critical Infrastructure Protection.				
D. Communication deliverables				
Outreach programmes, special events and information materials: fact sheets on weapons of mass destruction disarmament and associated treaties; side events at relevant United Nations and ad hoc conferences; newsletter of the Secretary-General's Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons; outreach and advocacy to the general public and students conducted through events organized by the subprogramme, Member States, civil society, academia and other stakeholders.				
Digital platforms and multimedia content: website and social media platforms related to weapons of mass destruction issues.				

Subprogramme 3 Conventional arms

Objective

- 4.40 The objective, to which this subprogramme contributes, is to advance the regulation and limitation of conventional weapons and ammunition, taking into account the legitimate needs of States for self-defence.

Strategy

- 4.41 To contribute to the objective, the subprogramme will:
- (a) Provide substantive support, including preparatory activities for intergovernmental processes, to the following:
 - (i) First Committee of the General Assembly and the Security Council;
 - (ii) Preparatory meeting of States on the Global Framework for Through-life Conventional Ammunition Management;
 - (b) Support and assist with the development, updating, revision, translation and dissemination, as appropriate, of the following:
 - (i) International Ammunition Technical Guidelines through the SaferGuard programme;
 - (ii) Database on military expenditures;
 - (iii) Register of Conventional Arms;
 - (iv) Modular Small-arms-control Implementation Compendium;
 - (v) Repository of military confidence-building measures;
 - (vi) Database on national reports of the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects;
 - (vii) Online platform and reporting database related to the Global Framework for Through-life Conventional Ammunition Management;
 - (viii) Dedicated fellowship training programmes on through-life conventional ammunition management and on small arms and light weapons control;
 - (c) Assist States in the implementation of the outcomes of the fourth United Nations Conference to Review Progress Made in the Implementation of the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects, to be held in 2024;
 - (d) Assist States in the regional and national implementation of the Global Framework for Through-life Conventional Ammunition Management;
 - (e) Provide capacity-building support for requesting States to collect and consolidate data to support monitoring of indicator 16.4.2 of the Sustainable Development Goals;
 - (f) In partnership with United Nations system entities:
 - (i) Promote safe and secure weapons and ammunition management, in disarmament, demobilization and reintegration processes and in peace operation contexts;
 - (ii) In line with the 2030 Agenda for Sustainable Development, support the integration of small arms control considerations into United Nations country-level system-wide approaches to development;

- (g) Support, implement and facilitate assistance projects that develop the capacity of national institutions with regard to conventional arms and ammunition control, including through the United Nations Trust Facility Supporting Cooperation on Arms Regulation, the Saving Lives Entity fund and the SaferGuard Programme, through the establishment and operationalization of an efficient and agile global mechanism for requesting, offering and receiving assistance in through-life conventional ammunition management; support the continued work of the Ammunition Management Advisory Team; and support the Silencing the Guns by 2030 and its Africa Amnesty Month initiative of the African Union;
 - (h) Implement, as required, relevant recommendations issued in 2022 by the Group of Governmental Experts on the United Nations Register of Conventional Arms, take stock of the work of the Group in 2024 and undertake preparations for the meetings of the Group to be held in 2025;
 - (i) Manage the transparency instruments on military expenditures and the Register of Conventional Arms and provide support to States for their increased participation and use;
 - (j) Support initiatives and efforts for fostering military confidence-building measures at the subregional and regional levels.
- 4.42 The above-mentioned work is expected to result in:
- (a) Strengthened implementation of global arms control instruments, including legislation, policies and regulations on small arms and light weapons and conventional ammunition at the national, regional and subregional levels;
 - (b) Enhanced effectiveness of existing international assistance frameworks through the implementation of the Programme of Action on Small Arms, the International Instrument to Enable States to Identify and Trace, in a Timely and Reliable Manner, Illicit Small Arms and Light Weapons (the International Tracing Instrument) and the Global Framework for Through-life Conventional Ammunition Management;
 - (c) Improved integration of small arms and light weapons and conventional ammunition control considerations into development and prevention processes and frameworks;
 - (d) Reduced armed violence and risk of armed conflict by reducing the destabilizing effect of increasing arms and ammunition transfers and accumulations, as well as fostering confidence-building measures among States;
 - (e) Continued relevance and improved participation of States in the United Nations Report on Military Expenditures and the Register of Conventional Arms.

Programme performance in 2023

Integration of small arms and ammunition control into national development frameworks

- 4.43 In partnership with the Development Coordination Office and other relevant United Nations entities, the subprogramme has been developing guidance for country-level approaches to integrate small arms and ammunition control into national development frameworks. The subprogramme established and operationalized, with the support of the United Nations Development Programme and the Peacebuilding Fund, a sustainable financing mechanism, the Saving Lives Entity fund, to support the integration of small arms and ammunition control into national development frameworks and address the supply and demand of small arms towards the reduction of armed violence and conflict.
- 4.44 Progress towards the objective is presented in the performance measure below (see table 4.12).

Table 4.12
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
Member States, in partnership with United Nations country teams, gained access to \$5 million in funds from the Saving Lives Entity fund	Cameroon, Jamaica and South Sudan partnered with United Nations country teams to implement pilot projects related to small arms control and reduction of armed violence	Three pilot countries – Cameroon, Jamaica and South Sudan – agreed to review their common country analyses and United Nations Sustainable Development Cooperation Frameworks to integrate small arms control
Member States integrated small arms control into national development programming		10 countries that participated in the bilateral consultations agreed to consider small arms control as part of their sustainable development plans

Planned results for 2025

Result 1: improved management of safety and security risks of conventional ammunition

Programme performance in 2023 and target for 2025

- 4.45 The subprogramme’s work contributed to the adoption of a new Global Framework for Through-life Conventional Ammunition Management by the General Assembly, elaborated by the open-ended working group on conventional ammunition at its third and fourth substantive sessions in 2023, which met the planned target.
- 4.46 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 4.13).

Table 4.13
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
The second and third sessions of the Group of Governmental Experts on problems arising from the accumulation of conventional ammunition stockpiles in surplus were held in a hybrid format	The open-ended working group held a series of informal consultations, one organizational session and two substantive sessions on through-life ammunition management	The General Assembly adopted the new Global Framework for Through-life Conventional Ammunition Management, elaborated by the open-ended working group, which held its third and fourth substantive sessions in 2023	Initiation of a follow-up process based on General Assembly guidance related to a global framework on through-life ammunition management	Review and follow-up process for the effective implementation of the Global Framework is initiated by Member States with the convening of the first preparatory meeting of States, which prepares a Meeting of States in 2027
The Group adopted its final report (A/76/324) by consensus				

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
On the basis of the Group’s recommendations, the General Assembly established an open-ended working group (see resolution 76/233)				

Result 2: strengthened implementation of the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects and the International Instrument to Enable States to Identify and Trace, in a Timely and Reliable Manner, Illicit Small Arms and Light Weapons

Programme performance in 2023 and target for 2025

- 4.47 The subprogramme’s work contributed towards the preparation of the dedicated fellowship training programme commencing in 2024.
- 4.48 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 4.I).

Figure 4.I

Performance measure: government officials benefiting from a dedicated fellowship training programme on small arms and light weapons to strengthen the implementation of the Programme of Action on Small Arms and the International Tracing Instrument

(Number of fellows)

Result 3: increased utilization of the global assistance mechanism for through-life ammunition management

Proposed programme plan for 2025

- 4.49 In December 2023, the General Assembly adopted the Global Framework for Through-life Conventional Ammunition Management as a dedicated regulatory international instrument. The subprogramme supports the implementation of the Global Framework, which requires the establishment, under the *SaferGuard* programme, of an efficient and agile global mechanism for requesting, offering and receiving assistance in through-life conventional ammunition management.

Lessons learned and planned change

- 4.50 The lesson for the subprogramme was that the gathering of good practices and lessons learned from other assistance mechanisms would help with the conceptualization of the global assistance mechanism for through-life ammunition management and maximize its utility for Member States. In applying the lesson, the subprogramme will conduct a design phase process, including consultations with relevant stakeholders, which takes into account relevant existing assistance mechanisms at the international, regional and subregional levels.
- 4.51 Expected progress towards the objective is presented in the performance measure below (see table 4.14).

Table 4.14
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	The General Assembly requested the establishment, under the SaferGuard programme, of an efficient and agile global mechanism for requesting, offering and receiving assistance in through-life conventional ammunition management	Strengthened cooperation with relevant stakeholders in the conceptualization of the processes and modalities for the global assistance mechanism for through-life ammunition management	Member States make requests and access offers for assistance in utilizing the global assistance mechanism for through-life ammunition management

Deliverables

- 4.52 Table 4.15 lists all deliverables of the subprogramme.

Table 4.15

C. Substantive deliverables				
Consultation, advice and advocacy: one briefing to delegates on United Nations transparency instruments (Register of Conventional Arms and United Nations Report on Military Expenditures) and one briefing to the preparatory committee for the fourth Review Conference on the Programme of Action on Small Arms; three regional briefings and consultations on the new Global Framework for Through-life Conventional Ammunition Management to support the development of regional and subregional commitments; one meeting of the SaferGuard Technical Review Board and two briefings to delegations on weapons of mass destruction.				
Databases and substantive digital materials: online reporting systems related to global reported arms trade, military expenditures, military confidence-building measures and implementation of the Programme of Action on Small Arms available for use in voluntary reporting by Member States; online collaborative platform for International Ammunition Technical Guidelines management; online secured platform for the global assistance mechanism for through-life conventional ammunition management; online reporting and data collection platform related to the Global Framework for Through-life Conventional Ammunition Management.				
D. Communication deliverables				
Digital platforms and multimedia content: conventional arms webpage; website of the SaferGuard programme on ammunition.				

Subprogramme 4 Information and outreach

Objective

- 4.53 The objective, to which this subprogramme contributes, is to enhance awareness, understanding and knowledge by Member States and the public for advancing disarmament, non-proliferation and arms control.

Strategy

- 4.54 To contribute to the objective, the subprogramme will:
- (a) Carry out outreach and information-sharing activities in cooperation with Member States and other relevant partners and stakeholders by organizing panel discussions, public events, exhibitions, media briefings, book launches, film screenings and other activities;
 - (b) Produce publications and implement a comprehensive media strategy. Outreach will reflect and promote diversity through inclusion and the targeting of audiences of different ages, genders, disabilities, geographic locations and perspectives;
 - (c) Support civil society engagement in intergovernmental forums by facilitating access arrangements, organizing consultative meetings and arranging for presentations by invited civil society representatives;
 - (d) Implement the recommendations of the 2002 United Nations study on disarmament and non-proliferation education, in cooperation with Member States and other relevant partners, by producing and disseminating educational materials, developing e-modules on substantive topics and organizing peace and disarmament education activities and contests, with particular emphasis on educating young people, including young women and those not traditionally engaged, to champion and promote disarmament efforts;
 - (e) Continue to support the open-ended working group on security of and in the use of information and communications technologies 2021–2025, pursuant to General Assembly resolution [75/240](#);
 - (f) Seek specific measures to promote the meaningful and inclusive participation and empowerment of young people on disarmament and non-proliferation issues, including through the effective utilization of the dedicated digital platform Youth for Disarmament and through token grants and awards supported by voluntary contributions.
- 4.55 The above-mentioned work is expected to result in:
- (a) Increased interest in and support for multilateral disarmament efforts, enhancement of engagement by the general public and other stakeholders on these issues and the availability of clear, timely and impartial information to Member States;
 - (b) Better informed stakeholders, including government officials, civil society representatives and the general public;
 - (c) Progress in the development of common understandings in multilateral discussions by States on information and communications technology security in the context of international security, as well as improved awareness and knowledge of the subject among States and non-governmental actors.

Programme performance in 2023

Increased reach to a global audience on disarmament and non-proliferation issues

- 4.56 The subprogramme helped to commemorate the inaugural International Day for Disarmament and Non-Proliferation Awareness on 5 March 2023, pursuant to resolution [77/51](#), to promote better awareness and understanding of disarmament issues among the public, especially young people. The subprogramme launched a dedicated social media campaign in cooperation with the Department of Global Communications. The campaign included, among other things, tailor-made “facts and figures” cards that showed the relationship between disarmament and development, and involved Member States in order to showcase their support for disarmament. As part of the campaign, the Office for Disarmament Affairs engaged Member States, United Nations entities, international organizations and civil society organizations to cross-promote the content.
- 4.57 Progress towards the objective is presented in the performance measure below (see figure 4.II).

Figure 4.II

Performance measure: number of social media impressions reached around the time of the International Day for Disarmament and Non-Proliferation Awareness (27 February to 5 March annually)

Planned results for 2025

Result 1: developments in the field of information and telecommunications in the context of international security, and advancing responsible State behaviour in the use of information and communications technologies

Programme performance in 2023 and target for 2025

- 4.58 The subprogramme’s work contributed to the adoption by the open-ended working group on security of and in the use of information and communications technologies 2021–2025, by consensus, of an annual progress report, which met the planned target.
- 4.59 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 4.16).

Table 4.16
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Adoption by Member States of the consensus final reports of the previous United Nations bodies (A/75/816; A/76/135)	Adoption by the open-ended working group, by consensus, of an annual progress report	Adoption by the open-ended working group, by consensus, of an annual progress report	Adoption by the open-ended working group, by consensus, of an annual progress report	Adoption by the open-ended working group, by consensus, of an annual progress report

Result 2: United Nations Disarmament Yearbook – strengthened engagement and increased reach of topical issues and trends with respect to multilateral disarmament, non-proliferation and arms control

Programme performance in 2023 and target for 2025

- 4.60 The subprogramme’s work contributed to 2,360 unique visitors to the online *United Nations Disarmament Yearbook*, which exceeded the planned target of 1,600.
- 4.61 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 4.III).

Figure 4.III
Performance measure: number of unique visitors to the *United Nations Disarmament Yearbook* website (annual)

Result 3: empowerment of youth in the field of disarmament and non-proliferation

Proposed programme plan for 2025

- 4.62 The subprogramme, through its “Youth4Disarmament” outreach programme, as mandated by the General Assembly resolutions on youth, disarmament and non-proliferation, enables youth participation at formal and informal meetings on disarmament issues through creative and action-oriented educational activities.

Lessons learned and planned change

- 4.63 The lesson for the subprogramme, building on the launch of the “Youth Leader Fund for a World without Nuclear Weapons” initiative in 2023, was the importance of having an immersive youth training programme on nuclear disarmament – the top priority of the United Nations according to Member States – while ensuring the widest possible youth participation. In applying the lesson, the subprogramme will strengthen the training programme with a focus on developing more practical training, including engagements with disarmament experts from governments, academia and civil society. The activities are expected to include online self-paced courses, virtual live webinars and skills-based training sessions, as well as a week-long in-person study tour to Hiroshima and Nagasaki, Japan, to learn about the tragic consequences of nuclear weapons use.
- 4.64 Expected progress towards the objective is presented in the performance measure below (see table 4.17).

Table 4.17
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Adoption by Member States of the consensus resolution on youth, disarmament and non-proliferation (resolution 76/45)	Youth leaders developed projects to engage youth on topics related to disarmament, non-proliferation and arms control following the completion of the Leaders4Tomorrow training programme	100 youth leaders from 60 countries selected to participate in an online meeting to launch the Youth Leader Fund for a World without Nuclear Weapons	Youth leaders participate in webinars, training and site visits related to nuclear disarmament and non-proliferation	Youth leaders organize and participate in activities, such as dialogues to raise awareness and networking events, related to nuclear disarmament and non-proliferation

Deliverables

- 4.65 Table 4.18 lists all deliverables of the subprogramme.

Table 4.18
Subprogramme 4: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	18	18	17	18
1. Reports of the Secretary-General, transmitting views of Member States to the General Assembly on: environmental norms in the context of disarmament and arms control; the promotion of multilateralism; the United Nations study on disarmament and non-proliferation education; the United Nations Disarmament Information Programme; the role of science and technology; and advancing responsible State behaviour in cyberspace	6	6	6	6
2. Reports of the Secretary-General on the work of the Advisory Board on Disarmament Matters (including pre-session, in-session and post-session documents)	10	10	10	10
3. Report of the Secretary-General on youth, disarmament and non-proliferation	1	1	–	1
4. Progress report of the open-ended working group on security of and in the use of information and communications technologies 2021–2025	1	1	1	1

Section 4 Disarmament

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
Substantive services for meetings (number of three-hour meetings)	32	42	42	32
Meetings of:				
5. The Advisory Board on Disarmament Matters	12	12	12	12
6. The open-ended working group on security of and in the use of information and communications technologies 2021–2025	20	30	30	20
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	1	1	1	1
7. Training of teachers on disarmament and non-proliferation	1	1	1	1
Publications (number of publications)	8	9	8	8
8. On disarmament, including the <i>United Nations Disarmament Yearbook</i> , Occasional Papers and other serialized and non-serialized publications	8	9	8	8
C. Substantive deliverables				
Databases and substantive digital materials: database on the status of disarmament and arms regulation agreements, disarmament reference library and e-documents library.				
D. Communication deliverables				
Outreach programmes, special events and information materials: pamphlets, brochures, publicity kits, guides, posters, disarmament fact sheets; disarmament activities of the Messenger of Peace, including public service announcements; symposiums, workshops, youth contests and panel discussions on disarmament issues, in particular disarmament and non-proliferation education; briefings for visitors and outside groups on disarmament; disarmament and non-proliferation education and teacher and youth training; audiovisual resources, including videos, events and exhibits on matters promoting disarmament and non-proliferation.				
External and media relations: opinion pieces placed in international, national and thematic journals.				
Digital platforms and multimedia content: websites on disarmament education and Securing Our Common Future: An Agenda for Disarmament; Youth for Disarmament web platform, the Office's Meetings Place website and the <i>United Nations Disarmament Yearbook</i> website.				

Subprogramme 5 Regional disarmament

Objective

- 4.66 The objective, to which this subprogramme contributes, is to advance regional disarmament, non-proliferation and arms control efforts and initiatives, and the effective implementation of global and regional disarmament, non-proliferation and arms control treaties and other instruments, and strengthen partnerships with regional organizations.

Strategy

- 4.67 To contribute to the objective, the subprogramme will:
- Provide technical and legal training, conduct capacity-building activities and support the implementation by Member States of relevant treaties, international standards and guidelines, including the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects, the Arms Trade Treaty, the Biological Weapons Convention, Security Council resolutions [1325 \(2000\)](#), [1540 \(2004\)](#), [1673 \(2006\)](#), [1810 \(2008\)](#), [1977 \(2011\)](#), [2055 \(2012\)](#), [2325 \(2016\)](#), [2370 \(2017\)](#), [2572 \(2021\)](#), [2622 \(2022\)](#) and [2663 \(2022\)](#) and General Assembly resolutions [77/55](#), [78/56](#), [78/57](#) and [78/58](#);

- (b) Cooperate with relevant regional, subregional, civil society and other organizations, such as the African Union, the Caribbean Community (CARICOM), the Economic Community of West African States, the Organization of American States, the Association of Southeast Asian Nations, the Organization for Security and Co-operation in Europe and the Pacific Islands Forum, in the field of disarmament, non-proliferation and arms control, building on existing synergies and avoiding duplication with efforts already undertaken by such organizations.
- 4.68 The above-mentioned work is expected to result in:
- (a) Increased adherence to the disarmament instruments and strengthened small arms, light weapons and ammunition control, thereby curbing illicit trade and the circulation of small arms and light weapons to strengthen regional peace and security;
- (b) Confidence-building measures among Member States;
- (c) Closer partnerships with regional and subregional organizations.

Programme performance in 2023

Reduction of illicit proliferation of firearms and ammunition in the context of the Caribbean Firearms Road Map

- 4.69 The trafficking of illicit small arms and light weapons and ammunition contributes to all forms of armed violence and is an enabler and multiplier of violence and crime, and regional cooperation can help tackle this issue. The Caribbean Firearms Road Map, adopted by 15 CARICOM States and the Dominican Republic, aims at addressing the issue of illicit proliferation of firearms and ammunition. The Road Map serves as a guiding document for commonly agreed levels of performance at the strategic, policy and operational levels. The subprogramme supported the strengthening of data collection and reporting capabilities of Member States in the region through the development of a monitoring and evaluation and reporting platform to enable the measurement and evaluation of progress made against the Road Map.
- 4.70 Progress towards the objective is presented in the performance measure below (see table 4.19).

Table 4.19

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	–	Deployment of a monitoring and evaluation and reporting platform in partnership with the Implementation Agency for Crime and Security of CARICOM, which included States starting baseline assessments to enable consistent reporting on the platform

Planned results for 2025

Result 1: strengthened implementation of Security Council resolution 1540 (2004)

Programme performance in 2023 and target for 2025

- 4.71 The subprogramme's work contributed, through the Security Council Committee established pursuant to resolution 1540 (2004), but also at the request of Member States, to enhancing the

capacity of 25 Member States to meet the requirements of resolution 1540 (2004), which exceeded the planned target of 19 Member States.

4.72 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 4.IV).

Figure 4.IV

Performance measure: number of Member States with enhanced capacity to strengthen policy on weapons of mass destruction and Security Council resolution 1540 (2004) (annual)

Result 2: disarmament and non-proliferation education and training for all

Programme performance in 2023 and target for 2025

4.73 The subprogramme’s work contributed to the engagement of new education and training partners, including academia, civil society, regional organizations and the United Nations system, in developing disarmament education programmes and non-formal education opportunities, which met the planned target.

4.74 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 4.20).

Table 4.20

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	The General Assembly adopted resolution 77/51, proclaiming 5 March as the International Day for Disarmament and Non-Proliferation Awareness A common framework for education in disarmament and non-proliferation	Greater engagement of educational and training partners in developing disarmament education programmes and non-formal education opportunities	Greater regional spread of educational opportunities through an incremental expansion of partnerships with academia and training partners Educational partners and educators deliver tailored and	Educators and educational partners, including academia, civil society and regional organizations, implement or contribute to educational initiatives in disarmament and non-proliferation in partnership with the subprogramme and use its educational

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
	was made available to Member States, regional organizations and other stakeholders to strengthen coherence and coordination of educational initiatives		contextualized education to broaden knowledge and skills on disarmament and non-proliferation	materials, knowledge and skills development programmes Educational tools and available content for educators and partners are expanded and diversified to maximize reach of knowledge and skills development in disarmament and non-proliferation

Result 3: regional, subregional and national-level sensitization and support to the implementation of the Global Framework for Through-life Conventional Ammunition Management

Proposed programme plan for 2025

4.75 The subprogramme will promote the Global Framework for Through-life Conventional Ammunition Management, adopted by the General Assembly in resolution [78/47](#), and support its implementation at the regional and national levels.

Lessons learned and planned change

4.76 The lesson for the subprogramme is that the promotion, at the regional and national levels, of newly adopted instruments and treaties can help their effective implementation. In applying the lesson, the subprogramme will support the roll-out of the new instrument in the regions, using awareness-raising activities and workshops for national officials, for example, to support its implementation in line with international standards and guidelines in order to contribute to reducing the safety and security risks related to conventional ammunition.

4.77 Expected progress towards the objective is presented in the performance measure below (see table 4.21).

Table 4.21
Performance measure

4.80 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 4.26 to 4.27 and figure 4.V.

4.81 As shown in tables 4.26 (1) and 4.27 (1), the overall resources proposed for 2025 amount to \$19,202,000 before recosting, reflecting a net increase of \$2,507,400 (or 15.0 per cent) compared with the approved budget for 2024. Resource changes result from technical adjustments and new and expanded mandates. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Overall resource changes

Technical adjustments

4.82 As shown in table 4.26 (1), resource changes reflect a net increase of \$104,700, as follows:

- (a) **Executive direction and management.** The increase of \$91,800 relates to the higher provision at continuing vacancy rates for one post, Programme Management Officer (P-3), established in 2024 pursuant to General Assembly decision 78/541, which was subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts;

- (b) **Subprogramme 1, Multilateral negotiations and deliberations on disarmament and arms limitation** (net increase of \$88,100):
- (i) The increase of \$90,100 relates to the higher provision at continuing vacancy rates for one post, Political Affairs Officer (P-3), established in 2024 pursuant to Assembly resolution [78/238](#), which was subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts;
 - (ii) The decrease of \$2,000 relates to the removal of non-recurrent provisions for furniture and equipment associated with the new post;
- (c) **Subprogramme 2, Weapons of mass destruction** (decrease of \$269,700). The decrease of \$237,700 under experts and \$32,000 under consultants relates to the removal of non-recurrent provisions associated with the Group of Governmental Experts on Further Practical Measures for the Prevention of an Arms Race in Outer Space pursuant to Assembly resolution [77/250](#);
- (d) **Subprogramme 3, Conventional arms** (net increase of \$106,200):
- (i) The increase of \$107,500 relates to the higher provision at continuing vacancy rates for one post, Programme Management Officer (P-4), established in 2024 pursuant to Assembly resolution [77/71](#), which was subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts;
 - (ii) The decrease of \$1,300 relates to the removal of non-recurrent provisions for furniture and equipment associated with the new post;
- (e) **Subprogramme 5, Regional disarmament** (net increase of \$88,300):
- (i) The increase of \$94,500 relates to the higher provision at continuing vacancy rates for three posts of Programme Management Officer (NPO) established in Lomé, Kathmandu and Lima, and one post of Senior Programme Assistant (GS (PL)) established in Vienna in 2024 pursuant to Assembly resolution [77/71](#), which were subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts;
 - (ii) The decrease of \$6,200 relates to the removal of non-recurrent provisions for furniture and equipment associated with the four new posts.

New and expanded mandates

4.83 As shown in table 4.26 (1), resource changes reflect an increase of \$2,402,700 as follows:

- (a) **Subprogramme 1, Multilateral negotiations and deliberations on disarmament and arms limitation**. The increase of \$33,200 relates to the provision of consultancy services to provide technical and substantive support to the open-ended working group on reducing space threats through norms, rules and principles of responsible behaviours in connection with General Assembly resolution [78/20](#) entitled “Reducing space threats through norms, rules and principles of responsible behaviours”;
- (b) **Subprogramme 3, Conventional arms**. The increase of \$2,241,100 comprises:
- (i) An increase of \$2,111,600 pursuant to Assembly resolution [78/47](#). The increase of \$2,111,600 comprises:
 - a. Post: an increase of \$617,900 for the proposed establishment of six posts: three posts in Geneva (1 Political Affairs Officer (P-4), 1 Programme Management Officer (P-3) and 1 Senior Programme Assistant GS (PL)), and three posts in New York (1 Political Affairs Officer (P-4), 1 Information Management Officer (P-3) and 1 Senior Programme Assistant (GS (PL))). See annex II to the present report for further details;

- b. Non-post: the increase of \$1,493,700 comprises:
- i. An amount of \$695,600 to provide for consultancy services to design and develop training curricula and materials for the fellowship training programme on through-life conventional ammunition management; develop an online platform for subregional, regional and global initiatives and an online reporting platform under the Global Framework for Through-life Conventional Ammunition Management; support the review of and update existing International Ammunition Technical Guidelines modules and develop new modules on security aspects of the through-life management of conventional ammunition; develop an online secured platform for the SaferGuard global assistance mechanism; support assessments and quick-response deployments under the SaferGuard global assistance mechanism; and provide technical expertise to support the preparatory meeting of States on the Global Framework;
 - ii. An amount of \$168,300 to cover travel expenses for 15 experts to participate in the annual SaferGuard validation exercise on physical security and stockpile management, and travel expenses for 15 State experts to attend two informal meetings on the review and further development of the International Ammunition Technical Guidelines;
 - iii. An amount of \$50,900 for the travel of staff to support the SaferGuard validation exercise, the assessments and quick response deployments under the global assistance mechanism and the two informal meetings on the review and further development of the International Ammunition Technical Guidelines;
 - iv. An amount of \$538,300 under contractual services to provide an online collaborative platform to coordinate the management and further development of the International Ammunition Technical Guidelines and related hosting costs; services to host an online secured platform for the SaferGuard global assistance mechanism; maintenance fees for the SaferGuard website; translation of the International Ammunition Technical Guidelines; services to support the development and conduct of the SaferGuard validation exercise; services to support technical components of the assessments and quick-response deployments under the SaferGuard global assistance mechanism; services to develop a self-paced online course, including translations, for the United Nations Disarmament Fellowship, Training and Advisory Services Programme; and services to cover the annual costs of hosting an online platform for subregional, regional and global initiatives and the online reporting platform for voluntary national reports, including translations;
 - v. An amount of \$40,600 related to the non-post provisions associated with the proposed establishment of six posts, including under general operating expenses (\$27,800), supplies and materials (\$1,200) and furniture and equipment (\$11,600);
- (ii) An increase of \$129,500 to support the work of the Group of Governmental Experts on the United Nations Register of Conventional Arms on transparency in armaments pursuant to Assembly resolution [77/69](#). Resource estimates include \$105,900 under experts to cover travel expenses for 20 governmental experts to attend two five-day sessions on transparency in armaments (one session in New York and one session in Geneva); \$13,500 for consultants to provide technical and substantive support to the work of the Group of Governmental Experts; and \$10,100 to cover the cost for the travel of staff to support the session in Geneva;
- (c) **Subprogramme 5, Regional disarmament.** An increase of \$128,400 to cover the costs for three posts of National Programme Management Officer (NPO) to support the new fellowship training programme for through-life conventional ammunition management requested by the Assembly in its resolution [78/47](#). See annex II for the functions of the three posts, which would be based in Lomé, Kathmandu and Lima.

Other changes

- 4.84 As shown in table 4.26 (1), the proposed changes reflect cost-neutral changes under subprogramme 1 and subprogramme 2, as follows:
- (a) **Subprogramme 1, Multilateral negotiations and deliberations on disarmament and arms limitation.** The increase of \$11,700 relates to the redeployment of resources from subprogramme 2, Weapons of mass destruction, to cover the travel of staff to attend two substantive sessions of the Group of Governmental Experts on Further Practical Measures for the Prevention of an Arms Race in Outer Space and provide technical and substantive support to the Group of Governmental Experts;
- (b) **Subprogramme 2, Weapons of mass destruction.** The decrease of \$11,700 reflects the redeployment of resources to subprogramme 1 as explained in paragraph 4.84 (a) above.

Extrabudgetary resources

- 4.85 As reflected in tables 4.26 (2) and 4.27 (2), extrabudgetary resources amount to \$20,515,900. The resources would complement regular budget resources and would be used to provide for 44 posts (2 P-5, 6 P-4, 15 P-3, 2 P-2, 1 GS (PL), 12 GS (OL) and 6 LL), and non-post resources. The resources would be used to: (a) conduct research and analysis on topics such as conventional arms ammunition management and its global trends, biological and toxin weapons threats, new developments in weapon technologies, and women, youth and disarmament issues; (b) support meetings and conventions, raise awareness and build technical and substantive capacity at the national and regional levels; and (c) strengthen partnerships and participation aimed at contributing to the advancement of international agreements on disarmament best practices. Anticipated in-kind contributions would provide for rent-free premises with an estimated value of \$86,800.
- 4.86 The extrabudgetary resources under the present section are subject to the oversight of the Office for Disarmament Affairs, in accordance with the delegation of authority by the Secretary-General. The extrabudgetary resources under the present section for the United Nations Institute for Disarmament Research (UNIDIR) are subject to the oversight of the Advisory Board on Disarmament Matters.

Policymaking organs

- 4.87 The resources proposed under this component would provide for the policymaking organs as shown in table 4.29.

Table 4.29

<i>Policymaking organ</i>	<i>Brief description</i>	<i>Additional information</i>	<i>2025 estimate (before recosting)</i>	
			<i>2024 approved</i>	<i>2025 estimate (before recosting)</i>
Conference on Disarmament	The Conference on Disarmament is the single multilateral disarmament negotiating forum of the international community. As requested by the General Assembly in its resolution 34/83 L, the Secretary-General provides staff, as well as the assistance and services needed by the Conference and any subsidiary bodies that it might establish, in accordance with the arrangements set out in its rules of procedure. The secretariat of the Conference consists of officers of the secretariat and the Geneva Branch of the Office for Disarmament Affairs	Mandate: final document of the tenth special session of the General Assembly, paragraph 120 (resolution S-10/2) Membership: 65 government officials, including of 5 nuclear weapon States and other key militarily significant States Number of sessions in 2025: 1 session of 24 weeks conducted in 3 parts	9.5	9.5
Total			9.5	9.5

Section 4 Disarmament

- 4.88 The proposed regular budget resources for 2025 amount to \$9,500 and reflect no change compared with the approved budget for 2024. Additional details on the distribution of the proposed resources for 2025 are reflected in table 4.30.

Executive direction and management

- 4.89 The executive direction and management component comprises the immediate Office of the High Representative for Disarmament Affairs, the Office of the Director and Deputy to the High Representative, the Science, Technology and International Security Unit and the Policy Coordination and Change Management Unit. The High Representative is assisted by a director who serves as Deputy. The component is responsible for the overall direction, supervision and management of the Office for Disarmament Affairs in the implementation of its mandates and its approved programme of work and advises and supports the Secretary-General on all disarmament, non-proliferation, arms control and related security matters and, in that respect, represents the Secretary-General as required. The component is also responsible for providing authoritative analysis and assessment of developments for policy guidance and decision-making purposes and acts as focal point on these matters between the Secretariat and Member States.
- 4.90 The Office of the Director is responsible for supporting the High Representative; preparing and monitoring the implementation of the programme of work of the Office for Disarmament Affairs and the effective delivery of the programmatic mandates of the Office; preparing reports and notes on political and managerial issues; providing strategic guidance on programme implementation; and providing advice to the High Representative on all substantive, organizational, administrative, personnel and budgetary matters, including the overall coordination in the preparation and revision of the inputs of the Office to the annual programme plan and the programme budget.
- 4.91 The Science, Technology and International Security Unit provides advice to the Office of the High Representative, the Office of the Director and subprogrammes on scientific and technological issues in the context of international security, other strategic issues, including autonomous weapons, outer space and information and telecommunications technology issues, and normative and analytical research activities, in support of the priorities of the Secretary-General related to disarmament. The Unit is responsible for the preparation of political analyses and substantive background notes on a broad range of initiatives and topics within its area of expertise.
- 4.92 The Policy Coordination and Change Management Unit provides direct support to the High Representative and the Office for Disarmament Affairs on cross-cutting policy issues and internal coordination and change management, including coordination of the mainstreaming and inclusion of gender perspectives in the programmatic work of the Office and oversight of gender parity within the Office.

- 4.93 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Office for Disarmament Affairs will continue to reduce its carbon footprint by significantly reducing the usage of photocopy paper and the printing of documentation by encouraging staff to work increasingly with only electronic versions of various documents, including mission reports, assessment notes, inter-office memorandums, submissions by Member States, background materials and talking points. Additional efforts will be made to reduce travel and instead optimize participation in meetings through videoconferencing.
- 4.94 Information on the timely submission of documentation and advance booking for air travel is reflected in table 4.31. While the rate has improved compared with 2022, the non-compliance rate in 2023 is due mainly to the late confirmation of meetings. Travel ticket purchases will continue to be monitored closely by the Office, and reports will be shared with all branch chiefs and the High Representative for intervention, as required.

Table 4.31

- 4.95 The proposed regular budget resources for 2025 amount to \$2,945,500 and reflect an increase of \$91,800 compared with the approved budget for 2024. The proposed change is explained in paragraph 4.82 (a). Additional details on the distribution of the proposed resources for 2025 are reflected in table 4.32 and figure 4.VI.

Programme of work

Subprogramme 1

Multilateral negotiations and deliberations on disarmament and arms limitation

- 4.96 The proposed regular budget resources for 2025 amount to \$3,526,200 and reflect an increase of \$133,000 compared with the approved budget for 2024. The proposed change is explained in paragraphs 4.82 (b) and 4.83 (a). Additional details on the distribution of the proposed resources for 2025 are reflected in table 4.33 and figure 4.VII.
- 4.97 Pursuant to General Assembly resolution [75/253 A](#), the resources of \$3,526,200 include a provision for a subvention in the amount of \$763,700 to UNIDIR for 2025, reflecting no change compared with the appropriation for 2024. The amount is reflected under grants and contributions and includes a provision of: (a) \$676,500 towards the costs of two posts (1 D-2 and 1 P-5) and general temporary assistance to help organize quarterly briefings for all regional groupings on research and ideas of relevant disarmament topics to promote disarmament and non-proliferation knowledge, ideas and dialogue to a broader and more diverse community; and (b) \$87,200 to support the conduct of three events in countries that are not members of the Organisation for Economic Co-operation and Development to promote disarmament and non-proliferation knowledge, ideas and dialogue to a broader and more diverse community.

Annex II

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 3 Conventional arms	1	P-4	Establishment of Political Affairs Officer (Geneva)	To implement the mandate provided in paragraphs 6 and 12 of General Assembly resolution 78/47, the incumbent would provide substantive oversight of the strengthening of the SaferGuard programme and its operational activities. The functions include managing the establishment and operationalization of an efficient and agile global mechanism for requesting, offering and receiving assistance in through-life conventional ammunition management, including modalities and processes. The incumbent would also oversee the review, updating and further development of the International Ammunition Technical Guidelines, which involves coordinating the review of the existing Guidelines modules with interested States and other stakeholders and overseeing the design and development of new Guidelines modules on security-related aspects, as well as promoting the global accessibility of the Guidelines by overseeing the maintenance and updating of the SaferGuard website and the translation of the Guidelines.
Subprogramme 3 Conventional arms	1	GS (PL)	Establishment of Senior Programme Management Assistant (Geneva)	To implement the mandate provided in paragraphs 6 and 12 of General Assembly resolution 78/47, the incumbent would manage the administrative and financial aspects of the SaferGuard programme and the fellowship training programme on through-life conventional ammunition management, including monitoring budgets, managing logistics, including travel, and handling consultant and general contractual services. This position would serve as the administrative point of contact for all activities under the SaferGuard programme and the fellowship training programme.
Subprogramme 3 Conventional arms	1	P-3	Establishment of Programme Management Officer (Geneva)	To implement the mandate provided in paragraph 11 of General Assembly resolution 78/47, whereby the Assembly decided to establish a new standing dedicated fellowship training programme on “through-life conventional ammunition management to strengthen the technical and practical knowledge and expertise of government officials directly responsible for the implementation of the Global Framework for Through-life Conventional Ammunition Management”. The incumbent would serve as the global programme manager and substantive lead, responsible for the development of training materials to ensure cohesiveness and alignment with global guidance (the International Ammunition Technical Guidelines and other tools and support materials) and for managing, monitoring, reporting on and evaluating the fellowship training programme, including the development and updating of training materials.
Subprogramme 3 Conventional arms	1	P-4	Establishment of Political Affairs Officer (New York)	To implement the mandate provided in paragraphs 6 to 11 and 18 of General Assembly resolution 78/47, the incumbent would provide substantive Secretariat support to the follow-up meetings on the Global Framework for Through-life Conventional Ammunition Management, manage the follow-up and review process of the Global Framework, including the preparatory meeting of States in

Part II Political affairs

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 3 Conventional arms	1	P-3	Establishment of Information Management Officer (New York)	2025 and the Meeting of States in 2027, and would be responsible for developing a reporting template in consultation with Member States. The incumbent would also be responsible for the substantive preparation of the report of the Secretary-General to the Assembly on the implementation of the resolution. Furthermore, the incumbent would support and provide oversight on the fellowship training programme on through-life conventional ammunition management globally and would ensure coordination and information-sharing between the operational activities of the SaferGuard programme, including on international cooperation and assistance, and the follow-up meetings of the Global Framework.
Subprogramme 3 Conventional arms	1	GS (PL)	Establishment of Senior Programme Management Assistant (New York)	To implement the mandate provided in paragraphs 6 and 10 of General Assembly resolution 78/47, the incumbent would develop, manage, maintain and update an online reporting database for the Global Framework for Through-life Conventional Ammunition Management, including a national and regional point-of-contact database, as well as an online platform for subregional, regional and global initiatives on through-life conventional ammunition management. The incumbent would also be responsible for developing, managing, maintaining and updating an online secured platform for the SaferGuard global assistance mechanism.
Subprogramme 3 Conventional arms	1	GS (PL)	Establishment of Senior Programme Management Assistant (New York)	To implement the mandate provided in paragraphs 7 to 10 of General Assembly resolution 78/47, the incumbent would manage the administrative aspects of the follow-up process of the Global Framework for Through-life Ammunition Management, including the preparatory meeting of States in 2025, the intersessional process and subsequent follow-up meetings in preparation for the Meeting of States in 2027. The incumbent would also assist with the selection and contracting of consultants in support of the follow-up meetings on the Global Framework as well as with the logistical and contracting services for the development, maintenance and updating of the online platform for subregional, regional and global initiatives, and the online reporting platform.
Subprogramme 5 Regional disarmament	3	NPO	Establishment of Programme Management Officer (1 each in Lomé, Lima and Kathmandu)	To implement the mandate provided in paragraph 11 of General Assembly resolution 78/47, the incumbents, under the supervision of the directors of the regional centres for peace and disarmament, would coordinate and execute the regional administration of the fellowship training programme on through-life conventional ammunition management and coordinate with partner training institutions. The functions include tailoring the overall course material to regional contexts, identifying key technical expertise to support the training programme and determining the eligibility of and selecting the fellows. The incumbents would serve as the key liaisons to the fellows both before, during and after the fellowship in their respective regions. They would also support programme monitoring, evaluation and reporting through the Programme Management Officer in Geneva and under the global coordination of the programme at United Nations Headquarters in New York.

Abbreviation: NPO, National Professional Officer; GS (PL), General Service (Principal level).

I. Department of Peace Operations

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 5.1 The Department of Peace Operations is responsible for supporting the maintenance of international peace and security by providing political and executive direction to peace operations within its purview in accordance with and by the authority derived from the principles and purposes of the Charter of the United Nations. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolution [72/262 C](#), and the annual comprehensive reviews of the entire question of peacekeeping operations in all their aspects and the annual consideration of cross-cutting issues related to peacekeeping operations. The objectives of the programme are also conceived by taking into account Security Council mandates. The Department provides integrated strategic, political, operational and management advice, direction and support on military, police, mine action and other relevant issues to all operations under its responsibility in order to ensure the effective implementation of their mandates. Through its efforts to improve peacekeeping, enhance its performance and adapt to contemporary risks and challenges, the Department will continue to help conflict-affected countries on their path back to sustainable peace. The work of the Department is critical to continuously ensuring the relevance and effectiveness of United Nations peacekeeping, which remains a vital instrument for international peace and security.

Strategy and external factors for 2025

- 5.2 The strategy of the Department remains guided by all relevant Security Council mandates. The Department will continue to prioritize the full implementation of the peace and security reform objectives. The Action for Peacekeeping initiative and its implementation plan, Action for Peacekeeping Plus, will guide the programme, in line with the commitments set out in the Declaration of Shared Commitments on United Nations Peacekeeping Operations, taking into account the views expressed by Member States. The areas of focus continue to be:
- (a) To enhance political strategies and advance lasting political solutions, including by developing country and regional strategies, through the integrated approach of the peace and security pillar, to develop proposals for the consideration of the Security Council on the sequencing and prioritization of mandates and to reflect Action for Peacekeeping priorities in reporting;
 - (b) To implement the women and peace and security agenda across all peace functions, including by developing a methodology for gender-sensitive conflict analysis, distributing guidance to ensure women's full, equal and meaningful participation in peace processes and systematizing reporting on women and peace and security outcomes;
 - (c) To strengthen the protection provided by peacekeeping operations, including by maintaining the protection of civilians, where mandated, as one of the core objectives of the relevant peacekeeping operations, updating and disseminating the policy on the protection of civilians in United Nations peacekeeping, integrating strategic approaches to protection into the strategic thinking and action of missions and conducting context-specific training on the protection of civilians, on the protection of children, and on preventing and responding to conflict-related sexual violence;
 - (d) To support effective performance and accountability of all mission components through the ongoing implementation of the Comprehensive Planning and Performance Assessment System,

as part of the integrated peacekeeping performance and accountability framework, to evaluate mission performance using data and analysis and increase engagement with troop- and police-contributing countries on performance;

- (e) To strengthen the impact of peacekeeping on sustaining peace, including by implementing joint transition and mobilization strategies and coordinating closely with the Department of Political and Peacebuilding Affairs, including the Peacebuilding Support Office, as well as other United Nations entities and external partners;
 - (f) To improve the safety and security of peacekeepers, including by implementing the related action and training plans and introducing and using technologies, which should be implemented with transparency and in consultation with Member States, as appropriate;
 - (g) To improve peacekeeping partnerships by strengthening United Nations-African Union cooperation on political efforts, including through joint field visits and briefings, as well as through capacity-building and the light coordination mechanism, which will strengthen efforts to identify training requirements and match capacity-building providers with new and emerging troop-contributing countries in need of support;
 - (h) To strengthen the conduct of peacekeeping operations and personnel and enhance the operationalization of the human rights due diligence policy on United Nations support to non-United Nations security forces.
- 5.3 With regard to cooperation with other entities at the global, regional, national and local levels, partnerships with peace and security actors, in particular regional organizations, and with humanitarian and development actors, including international financial institutions, will remain essential to strengthening the overall impact of international efforts in peacekeeping contexts. The Department will also maintain its strategic and operational partnerships with the African Union and other regional and subregional organizations in Africa, as well as with the European Union. The Department will continue to cooperate closely with other regional organizations, including the League of Arab States, the North Atlantic Treaty Organization, the Collective Security Treaty Organization, the Association of Southeast Asian Nations and the Organization for Security and Cooperation in Europe, on issues related to policy, information-sharing and training, among others.
- 5.4 With regard to inter-agency coordination and liaison, the Department will continue to review and refine the implementation of the reform of the peace and security pillar and ensure coherence, working with the Department of Political and Peacebuilding Affairs with a view to, in particular, strengthening a common organizational culture that fosters inclusion, innovation and professional development. The Department will work closely with the Department of Management Strategy, Policy and Compliance and the Department of Operational Support in assisting peacekeeping operations. The Department will maintain strong coordination with the reformed management and development pillars.
- 5.5 The Department will continue to maintain its strong relations with other United Nations agencies, funds and programmes by chairing or participating in a range of inter-agency groups and processes, including the United Nations-World Bank Working Group, the Inter-Agency Working Group on Disarmament, Demobilization and Reintegration, the Inter-Agency Security Sector Reform Task Force, the Inter-Agency Coordination Group on Mine Action and the Inter-Agency Task Force on Policing. Other cross-agency cooperation will be undertaken through the global focal point arrangement for the rule of law and the Peacebuilding Strategy Group.
- 5.6 With regard to the external factors, the Department considered applicable risks and, accordingly, the overall plan for 2025 is based on the following planning assumptions:
- (a) Member States continue to support the advancement of the Action for Peacekeeping initiative and its implementation strategy, Action for Peacekeeping Plus;
 - (b) The Security Council reaches consensus on clear, focused and achievable mandates for peacekeeping operations and Member States support their implementation;

- (c) Peacekeeping partners and other entities sustain the common political strategies supported by peace operations;
 - (d) Availability of capabilities required for deployment to peacekeeping operations.
- 5.7 The Department integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, it implements the women and peace and security agenda through guidance on women’s full and meaningful participation in peace and political processes, gender-sensitive analysis and the mainstreaming of a gender perspective into planning, budgeting, implementation and reporting, and through the promotion of the increased representation of women uniformed personnel.
- 5.8 In line with the United Nations Disability Inclusion Strategy, the Department will support Secretariat-wide efforts on disability inclusion, including through the implementation of a joint Department of Political and Peacebuilding Affairs-Department of Peace Operations disability inclusion action plan.

Legislative mandates

- 5.9 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

49/37; 76/263; 77/302	Comprehensive review of the whole question of peacekeeping operations in all their aspects	72/199	Restructuring of the United Nations peace and security pillar
58/296	Administrative and budgetary aspects of the financing of the United Nations peacekeeping operations	72/262 C	Special subjects relating to the programme budget for the biennium 2018–2019 (sect. III)
60/180	The Peacebuilding Commission	74/80; 76/74	Assistance in mine action
61/279; 65/290	Strengthening the capacity of the United Nations to manage and sustain peacekeeping operations	76/84 B; 77/128 B	United Nations global communications policies and activities
70/262	Review of the peacebuilding architecture	76/274 77/64	Cross-cutting issues Countering the threat posed by improvised explosive devices

Security Council resolutions

1325 (2000)	2436 (2018)
1894 (2009)	2447 (2018)
2151 (2014)	2518 (2020)
2185 (2014)	2553 (2020)
2250 (2015)	2589 (2021)
2272 (2016)	2594 (2021)
2282 (2016)	2668 (2022)
2365 (2017)	2686 (2023)
2382 (2017)	

Deliverables

- 5.10 Table 5.1 lists all cross-cutting deliverables of the programme.

Table 5.1
Cross-cutting deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	12	12	12	11
1. Meetings of the Fifth Committee	1	1	1	1
2. Meetings of the Committee for Programme and Coordination	1	1	1	1
3. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
4. Formal session of the Special Political and Decolonization Committee	1	1	1	1
5. Formal session of the Special Committee on Peacekeeping Operations	1	1	1	1
6. Meetings of the Security Council on cross-cutting strategic, policy and structural issues related to peacekeeping	3	3	3	2
7. Meetings of the General Assembly and its subsidiary organs on the developments in peacekeeping missions and on cross-cutting strategic, policy and structural issues related to peacekeeping	4	4	4	4
C. Substantive deliverables				
Consultation, advice and advocacy: visits to troop- and police-contributing countries and other Member States to develop strategic partnerships and build common approaches to support United Nations peacekeeping; and meetings with or briefings to Member States, regional organizations and groups of friends/contact groups on peacekeeping.				
D. Communication deliverables				
Outreach programmes, special events and information materials: 20 special events, including conferences and exhibits, as well as public briefings and associated promotional materials.				
External and media relations: media events, including interviews and press briefings on thematic and mission-specific topics; and approximately 25 media engagements of senior leadership.				
Digital platforms and multimedia content: approximately 1,500 items of peacekeeping-themed content on 10 digital and social media platforms.				

Evaluation activities

- 5.11 A thematic evaluation by the Office of Internal Oversight Services of the youth, peace and security agenda: youth participation (E/AC.51/2023/7), completed in 2023, has guided the proposed programme plan for 2025.
- 5.12 In response to the results of the evaluation referenced above, the Department will integrate the youth, peace and security agenda into relevant new and revised policies and guidance, and establish a youth, peace and security coordination network at Headquarters and in the field to improve knowledge-sharing on existing and upcoming guidance. Furthermore, the Department will develop terms of reference for youth, peace and security focal points, raise awareness of the youth, peace and security agenda across communication platforms, including on social media, and continue to seek dedicated capacities at Headquarters and in the field. Pursuant to Security Council resolution 2436 (2018), the Department will also continue to support the implementation of the Comprehensive Planning and Performance Assessment System in all United Nations peacekeeping operations, as part of the integrated peacekeeping performance and accountability framework, which will help the Department and missions to strengthen mandate implementation. The Department will also resume its evaluation functions in 2024 following their temporary suspension in 2018 to repurpose its capacities for the development of the Comprehensive Planning and Performance Assessment System, as part of the integrated peacekeeping performance and accountability framework.
- 5.13 Three evaluations of the Department’s programme activities, on topics to be determined, are planned for 2025.

Programme of work

Subprogramme 1 Operations

Objective

- 5.14 The objective, to which this subprogramme contributes, is to ensure the effective and efficient implementation of all Security Council mandates to plan, establish and adjust peace operations within the purview of the Department, as well as the effective implementation of relevant General Assembly resolutions, in order to maintain international peace and security.

Strategy

- 5.15 To contribute to the objective, the subprogramme will:
- (a) Improve mission- and context-specific analysis and reporting on peacekeeping to the Security Council, the General Assembly and other intergovernmental bodies and troop- and police-contributing countries;
 - (b) Ensure that integrated planning processes are completed according to Security Council substantive and time requirements, with an emphasis on supporting transitions between peacekeeping operations and follow-up United Nations presences;
 - (c) Incorporate regional aspects in country- and mission-specific strategies, as part of the emphasis on a regional approach to peace, security and stability further to the reform of the peace and security pillar;
- 5.16 The above-mentioned work is expected to result in:
- (a) Better information on peacekeeping operations being available to the General Assembly, the Security Council and other intergovernmental bodies;
 - (b) Better planning for mandate delivery by peacekeeping operations and for transitions;
 - (c) More coherent and impactful United Nations engagement and support in matters of peace and security provided to countries and the regions in which they are situated.

Programme performance in 2023

Ngok Dinka and Misseriya communities in Abyei reached agreements to reduce intercommunal violence

- 5.17 Beginning in April 2023, the United Nations Interim Security Force for Abyei (UNISFA) took a series of measures to ensure continued mandate implementation in the face of challenges associated with the conflict in the Sudan. This allowed a continued focus on mandated activities in Abyei, including support for peace between the Ngok Dinka and Misseriya communities. The two communities have experienced intermittent incidents of intercommunal violence in recent years, notably during the seasonal migration when pastoralists move their cattle to reach fresh pastures. UNISFA, with the support of the subprogramme, engaged in intercommunal reconciliation efforts, which resulted in agreements reached in March and December 2023. These agreements established conflict mitigation mechanisms and identified migration corridors to enable freedom of movement. As the migration period in the latter part of 2023 got under way, no significant incidents of violence were recorded between these two communities.
- 5.18 Progress towards the objective is presented in the performance measure below (see table 5.2).

Table 5.2
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
Intermittent incidents of intercommunal violence between the Ngok Dinka and Misseriya communities, with 11 clashes resulting in deaths or injuries	Intermittent incidents of intercommunal violence between the Ngok Dinka and Misseriya communities, with eight clashes resulting in deaths or injuries	Intermittent incidents of intercommunal violence between the Ngok Dinka and Misseriya communities, with 10 clashes resulting in deaths or injuries through August, and none during the rest of the year The Ngok Dinka and Misseriya communities reached agreement on continuing dialogue and preventing violence during the traditional annual migration process

Planned results for 2025

Result 1: improved intercommunity relations and a secure environment for all communities in Kosovo¹

Programme performance in 2023 and target for 2025

- 5.19 The subprogramme’s work contributed to the organization of 927 activities by municipal institutions, civil society and local organizations, including women’s organizations, promoting intercommunity trust-building and integration, which exceeded the planned target of 880 activities.
- 5.20 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 5.I).

Figure 5.I
Performance measure: number of activities organized by municipal institutions, civil society and local organizations promoting intercommunity trust-building and integration in Kosovo (annual)

¹ References to Kosovo shall be understood to be in the context of Security Council resolution 1244 (1999).

Result 2: progress in the peace process in the Central African Republic is maintained, including through continued preparation for local and general elections

Programme performance in 2023 and target for 2025

- 5.21 The subprogramme’s work contributed to the revitalization and decentralization of the peace process through enhanced national ownership, which met the planned target.
- 5.22 The subprogramme’s work also contributed to continued planning and preparations for the holding of local elections, which did not meet the planned target of announcement of results of the local elections. The target was not met due to the postponement of elections until after the holding of a constitutional referendum in 2023.
- 5.23 The subprogramme’s work also contributed to progress in the operationalization of the Truth, Justice, Reparation and Reconciliation Commission, which held its first-ever round table to update partners on its three-year plan for 2023–2025 and priorities for 2023, which met the planned target.
- 5.24 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 5.3).

Table 5.3
Performance measure: progress made in the peace process

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
The President-elect is sworn in within the constitutional timeline	Planning and preparations to hold local elections continued; however, local elections were postponed to mid-2023	Revitalization and decentralization of the peace process through enhanced national ownership	Preparations commence for organization of general presidential and legislative elections	Preparations commence for organization of general presidential and legislative elections scheduled for 2025 or 2026
Planning and preparations to hold local elections are undertaken, including the development of the electoral calendar and a resource mobilization strategy	Dialogue was maintained between Central African authorities and those armed groups that remained committed to the 2019 peace agreement, resulting in the dissolution of four armed groups	Continued planning and preparations for the holding of local elections; however, local elections were postponed until 2024 or 2025	Progress in the implementation of the peace agreement, including dialogue between government and armed groups	Dialogue between the Government and armed groups in the context of the peace process is maintained
		Progress in the operationalization of the Truth, Justice, Reparation and Reconciliation Commission continued		

Result 3: progress in the implementation of the 2018 Revitalized Agreement on the Resolution of the Conflict in the Republic of South Sudan

Proposed programme plan for 2025

- 5.25 Since 2011, South Sudan has experienced two civil wars, culminating in the signing of peace agreements in 2015 and 2018. The United Nations has been supporting South Sudan towards democratic and transparent governance for long-term peace and stability.

Lessons learned and planned change

- 5.26 The lesson for the subprogramme was the need to promote continued dialogue between key stakeholders to preserve and build on gains made in the peace process. With elections scheduled to take place in December 2024, the subsequent political and security context would be affected by the response of the stakeholders to election results. In applying the lesson, the subprogramme will support the United Nations Mission in South Sudan (UNMISS) in maintaining continued dialogue between key stakeholders and mitigating the risk of post-election violence.
- 5.27 Expected progress towards the objective is presented in the performance measure below (see table 5.4).

Table 5.4
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Limited progress in the implementation of the Revitalized Peace Agreement	Limited progress in the implementation of the Revitalized Peace Agreement	Legislation on the National Elections Commission, the National Constitutional Review Commission and the Political Parties Council passed into law and members sworn in First and second batches of the Necessary Unified Forces trained and deployed	Preparations for elections begin, with UNMISS support at a level to be decided by the Security Council	The political transition is completed in accordance with the provisions contained in the Revitalized Peace Agreement

Deliverables

- 5.28 Table 5.5 lists all deliverables of the subprogramme.

Table 5.5
Subprogramme 1: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	55	46	55	36
1. Reports of the Secretary-General to the Security Council on matters related to peacekeeping operations	35	30	35	23
2. Letters from the Secretary-General to the President of the Security Council	20	16	20	13

3. Meetings of the Security Council on peacekeeping issues	35	52	35	36

Section 5 Peacekeeping operations

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	12	7	13	7
4. Workshops for heads of political components of peacekeeping operations	5	2	5	3
5. Workshops for regional and subregional political strategies for peacekeeping in the Middle East	2	5	3	2
6. Workshops for regional and subregional political strategies for peacekeeping in Africa	5	–	5	2
C. Substantive deliverables				
Consultation, advice and advocacy: advice and information on relevant aspects of peacekeeping operations to approximately 120 troop- and police-contributing countries; consultations with/among 5 regional organizations to promote regional peacekeeping capacities expanded in the context of specific operations; and advice to at least 120 permanent missions to the United Nations, the Bretton Woods institutions, 13 international and regional governance and security organizations and non-governmental organizations on peacekeeping issues.				

Subprogramme 2 Military

Objective

- 5.29 The objective, to which this subprogramme contributes, is to maintain international peace and security through the effective performance of military components of peace operations.

Strategy

- 5.30 To contribute to the objective, the subprogramme will:
- (a) Provide briefings and analysis to Member States on the military aspects of new or anticipated developments, and crisis and security situations;
 - (b) Strengthen partnerships with regional organizations to develop common standards in planning peacekeeping operations, generate and deploy appropriate military units, conduct operational assessments and advisory visits, and prepare new troop-contributing countries for future participation in peace operations;
 - (c) Train senior military leaders and develop and update military standards for the military component to validate the operational readiness of military units prior to deployment, and conduct in-mission performance evaluations, predeployment/pre-rotation visits and military capability studies;
 - (d) Facilitate the participation of women in peace operations, at all levels, through engagement with troop-contributing countries;
 - (e) Further refine the military performance evaluation system, including implementation of the military performance evaluation tool, further develop an evaluator training mechanism, and initiate and deploy a performance evaluation process for individual uniformed personnel;
 - (f) Further refine and develop military doctrine, policies and training materials to support performance evaluation, enhance operational readiness and improve the safety and security of peacekeepers.
- 5.31 The above-mentioned work is expected to result in:
- (a) Improved reporting to the Security Council, the General Assembly, intergovernmental bodies and troop-contributing countries;
 - (b) Rapid deployment and establishment of or adjustments to peace operations in response to Security Council mandates and related decisions;

- (c) Deployment of better-tailored, better-equipped and more relevant military components to peace operations;
- (d) Improved performance and increased safety of military components in peace operations;
- (e) A safe and secure environment in the host country, with a view to enhancing the safety of civilians and the delivery of humanitarian services.

Programme performance in 2023

Peacekeeping missions utilize evaluations to improve performance

- 5.32 In its resolution [2436 \(2018\)](#), the Security Council reaffirmed its support for the development of a comprehensive and integrated performance policy framework that identifies clear standards of performance for evaluating all United Nations civilian and uniformed personnel working in and supporting peacekeeping operations. In 2021, the subprogramme adopted a task-centric approach to facilitate the measurement of military components' performance, focusing on developing clear, comprehensive and well-defined standards for the evaluation of military performance, and engaged with all peacekeeping missions to promote adherence to the in-mission performance evaluation methodology of the new military units. The evaluation system provides missions with a structured and consistent framework to assess military units against established standards and indicators, focusing on task execution and adherence to United Nations guidelines. In 2023, four new sets of tasks, standards and indicators were developed by the subprogramme for a range of specialized military units. These evaluations have led to the development and implementation of performance improvement plans, and have also informed decision-making on the deployment and training of contingents.
- 5.33 Progress towards the objective is presented in the performance measure below (see figure 5.II).

Figure 5.II

Performance measure: number of peacekeeping missions utilizing the performance evaluation methodology

Planned results for 2025

Result 1: enhanced preparedness of military units in the Peacekeeping Capability Readiness System

Programme performance in 2023 and target for 2025

- 5.34 The subprogramme's work contributed to an increase in the number of military units at the rapid deployment level in the Peacekeeping Capability Readiness System to 13, which exceeded the planned target of 12 military units.

5.35 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 5.III).

Figure 5.III
Performance measure: number of military units at the rapid deployment level in the Peacekeeping Capability Readiness System (annual)

Result 2: advanced gender parity for military individual uniformed personnel in United Nations peace operations

Programme performance in 2023 and target for 2025

5.36 The subprogramme’s work contributed to the percentage of female military individual uniformed personnel in United Nations peace operations reaching 22.6 per cent, which exceeded the planned target of 22 per cent.

5.37 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 5.IV).

Figure 5.IV
Performance measure: percentage of female military individual uniformed personnel in United Nations peace operations (annual)

Result 3: missions establish explosive ordnance disposal capabilities to respond to threats posed by improvised explosive devices

Proposed programme plan for 2025

- 5.38 In its resolution [2370 \(2017\)](#) and its presidential statement of 24 May 2021 ([S/PRST/2021/11](#)), the Security Council called for unified efforts to respond to the threats posed by improvised explosive devices, assessing capabilities and measures necessary to better mitigate this threat. In its efforts to implement this mandate, the subprogramme started to actively engage with troop-contributing countries in order to update the statement of unit requirements, seek pledges for explosive ordnance disposal units in the Peacekeeping Capability Readiness System and add all arms search teams for combat units.

Lessons learned and planned change

- 5.39 The lesson for the subprogramme was that the existing guidance materials were not comprehensive and would benefit from greater coherence and standardization. In applying the lesson, the subprogramme will review and synchronize all relevant existing manuals on the mitigation of threats posed by improvised explosive devices and prepare and translate dedicated guidance materials, including by updating the manual for explosive ordnance disposal units to provide support to the peacekeeping missions that require explosive ordnance disposal capabilities.
- 5.40 Expected progress towards the objective is presented in the performance measure below (see table 5.6).

Table 5.6

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Limited explosive ordnance disposal capabilities and training on explosive hazard awareness in peacekeeping missions	The United Nations Multidimensional Integrated Stabilization Mission in Mali established explosive ordnance disposal capabilities	The United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic (MINUSCA) and the United Nations Organization Stabilization Mission in the Democratic Republic of the Congo established explosive ordnance disposal capabilities	The United Nations Interim Force in Lebanon (UNIFIL) establishes explosive ordnance disposal capabilities The explosive ordnance disposal capabilities of MINUSCA are expanded to include infantry battalions with explosive ordnance disposal search-and-detect capabilities	Explosive ordnance disposal capabilities are established or strengthened by any missions with such requirements

Deliverables

- 5.41 Table 5.7 lists all deliverables of the subprogramme.

Table 5.7
Subprogramme 2: deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	182	163	181	161
Training events:				
1. With senior military personnel for predeployment induction and post-appointment briefings and intensive orientation	40	31	44	34
2. For command-post exercises for force headquarters	25	16	25	20
3. On the development, revision and implementation of new military policies and guidance materials	25	33	28	28
4. To mainstream a gender perspective for military components of peacekeeping operations	25	23	28	21
5. To improve situational awareness and strengthen the performance of uniformed military components, targeting operational and tactical leadership (heads of military components, sector commanders and force chiefs of staff and infantry battalion commanders)	35	23	20	20
6. On peacekeeping-intelligence/information gathering and analysis	24	29	28	30
7. For evaluators on the operational performance reporting tool	8	8	8	8
Technical materials (number of materials)	116	126	116	99
8. On significant operational developments in peacekeeping operations and on evolving conflict areas	40	49	40	36
9. On force headquarters evaluation	2	1	2	2
10. For new or significantly adjusted peacekeeping operations (strategic military plans)	6	7	6	6
11. On threat assessments reports	12	12	12	11
12. On operational requirements and troop-contributing country capabilities and recommendations prepared after predeployment, assessment and operational advisory visits	20	21	20	20
13. On military skills validation training	10	5	10	4
14. On the deployment of military forces, observers and headquarters staff	12	12	12	12
15. On the military components of peacekeeping operations (policies, guidance materials and standard operating procedures)	4	6	4	4
16. On military performance evaluation standards (scoresheets) for infantry units	6	9	6	–
17. On mid- to long-term requirements and on existing capability gaps	4	4	4	4
C. Substantive deliverables				
Consultation, advice and advocacy: briefings to approximately 120 troop-contributing countries and the Military Staff Committee on all military aspects of peacekeeping operations; strategic discussion with 10 Member States and 3 regional organizations on military aspects of peace negotiations, agreements, peacekeeping operations, strategic and operational planning, and military performance issues; and maintenance of an organized surge capacity comprising a key nucleus of military staff/support team of up to 14 seconded military officers for possible deployment to new and existing peacekeeping operations for up to 90 days.				
Databases and substantive digital materials: information on pledged units registered in the Peacekeeping Capability Readiness System by 60 troop-/police-contributing countries; and a military performance management system.				

Subprogramme 3

Rule of law and security institutions

Objective

- 5.42 The objective, to which this subprogramme contributes, is to strengthen the rule of law and security sector governance to contribute to the maintenance of international peace and security in countries where peacekeeping operations and special political missions deploy, or where otherwise authorized, or requested by Member States, in full compliance with the Charter of the United Nations.

Strategy

- 5.43 To contribute to the objective, the subprogramme will provide advisory and operational support to peacekeeping operations and special political missions, as well as resident coordinators, and where otherwise authorized or requested by Member States. Specifically, the subprogramme will:
- (a) Assist host States in the reform, restructuring and development of their police and other law enforcement institutions, provide operational support and, in rare circumstances, assume interim policing functions in line with the Strategic Guidance Framework for International Policing;
 - (b) Support nationally led efforts to ensure accountability for crimes that fuel armed conflict, in particular those perpetrated against civilians, and crimes committed against United Nations personnel in peacekeeping operations and special political missions, strengthen prison security and management, re-establish the host State's justice and corrections institutions and engage in trust-building initiatives;
 - (c) Support the planning, design and evaluation of processes that remove weapons and individuals from armed groups and facilitate the reintegration of ex-combatants and elements associated with armed groups into society as civilians, and identify and formulate relevant lessons learned and guidance;
 - (d) Undertake research and develop knowledge and guidance in the areas of rule of law and security sector reform and governance, and provide targeted, strategic country support, upon request;
 - (e) Manage mine action programmes to mitigate explosive threats, train United Nations personnel and enhance national explosive ordnance disposal capacities;
 - (f) Rapidly deploy specialist capacities in all the above-mentioned areas.
- 5.44 The above-mentioned work is expected to result in:
- (a) More effective and accountable security and justice institutions in countries receiving assistance, including increased accountability for crimes that fuel armed conflict and for crimes committed against United Nations personnel in peacekeeping operations and special political missions;
 - (b) Reduced threats posed by armed groups and explosive hazards;
 - (c) Sustainable peace and the prevention of armed conflict;
 - (d) Mitigation of risks affecting the services of national and local rule of law and security institutions;
 - (e) Continuity of United Nations operations in the areas of policing, justice, corrections, disarmament, demobilization and reintegration, security sector reform and governance, and mine action assistance.

Programme performance in 2023

Towards strengthened rule of law and security institutions in States supported by special political missions

- 5.45 Countries emerging from armed conflict require a strong rule of law, as well as effective and accountable security and justice institutions, to reduce violence, prevent further conflict and build peace. The subprogramme, through its rapidly deployable standing capacities, provided expert assistance to special political missions and Member States in response to increasing requests for support, thereby advancing their political, stabilization and prevention objectives. Over the course of the 2021–2023 period, the subprogramme supported United Nations presences in 19 countries. Key results achieved in 2023 are outlined below.
- 5.46 Progress towards the objective is presented in the performance measure below (see table 5.8).

Table 5.8
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	–	<p>Libyan public prosecution services commenced digitalization to improve governance and expedite pretrial procedures</p> <p>A civil society network on security sector reform and governance in Libya was established to enhance civilian oversight</p> <p>National authorities of Sao Tome and Principe launched a reform process for the country’s justice and security sectors</p> <p>The West African Bar Association revised its constitution and strengthened its efforts to promote democratic governance and the rule of law in the subregion</p>

Planned results for 2025

Result 1: enhanced accountability for crimes against United Nations personnel in peacekeeping operations and special political missions

Programme performance in 2023 and target for 2025

- 5.47 The subprogramme’s work contributed to 134 confirmed investigative measures by host country authorities of the Central African Republic, the Democratic Republic of the Congo and Mali, which did not meet the planned target of 150 investigative measures. The target was not met because only 134 of the cases of fatalities as a result of malicious acts since 2013 have been formally referred by the missions concerned to national authorities for investigation and prosecution. The decision to initiate investigative measures is strictly a national prerogative. In addition, 23 individuals were convicted in 2023 for killing seven MINUSCA peacekeepers in 2020 and 2021. Furthermore, in 2023 in Lebanon, there were two confirmed investigative measures by host country authorities, and one individual was convicted for killing six UNIFIL peacekeepers in 2007.
- 5.48 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 5.V).

Figure 5.V
Performance measure: number of confirmed investigative measures by host country authorities of the Central African Republic, the Democratic Republic of the Congo and Mali as of October of each year (cumulative)

Result 2: troop-contributing countries generate well-prepared troops for deployment in high explosive ordnance threat environments

Programme performance in 2023 and target for 2025

5.49 The subprogramme’s work contributed to two troop-contributing countries conducting explosive ordnance threat mitigation training to United Nations standards, which met the planned target; one troop-contributing country arriving in a peacekeeping mission having received the predeployment training to United Nations standards, which exceeded the planned target of zero; and eight weeks for contingents to reach full operational capability from the time of arrival in mission, which met the planned target.

5.50 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 5.VI).

Figure 5.VI
Performance measure: improved explosive ordnance threat mitigation training by troop-contributing countries and reduced time for trained contingents to reach full operational capability

Result 3: improved performance of United Nations police to enhance mandate implementation

Proposed programme plan for 2025

5.51 A more people-centred, innovative and data-driven United Nations police is essential to meet growing demands for specialized police support. The subprogramme has been assessing and evaluating United Nations police performance to further align with system-wide efforts to improve performance.

Lessons learned and planned change

5.52 The lesson for the subprogramme was the need to systematically analyse performance data and follow up on performance-related recommendations to integrate them into existing tools, including to support Member State mechanisms. In applying the lesson, the subprogramme will mainstream the core principles of the Strategic Guidance Framework for International Policing into the United Nations police performance management regime, thereby further strengthening the predeployment operational readiness and in-mission performance of all types of United Nations police personnel. The subprogramme will assess United Nations police performance on a quarterly basis and formulate tailored performance improvement plans, as required, to inform future rotations and deployments.

5.53 Expected progress towards the objective is presented in the performance measure below (see figure 5.VII).

Figure 5.VII
Performance measure: percentage of evaluations of United Nations formed police units that indicate a performance level of “satisfactory” or above (annual)

Deliverables

5.54 Table 5.9 lists all deliverables of the subprogramme.

Table 5.9
Subprogramme 3: deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	22	28	26	27
Briefings to Member States on:				
1. Mission/field- and police-specific issues	14	14	14	14
2. Mine action matters	4	6	6	6
3. Accountability for crimes against United Nations personnel in peacekeeping operations and special political missions	4	4	3	4
4. Justice and/or corrections	–	4	3	3
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	42	57	48	53
5. On police thematic expertise, including on planning and police reform to missions/the field	3	3	3	3
6. On police requirements and capacity and resource needs (predeployment visits to Member States)	5	5	5	5
7. For the development and management of programmes in support of justice and corrections systems	2	4	2	2
8. On mine action (technical and advisory support to field missions and Member States for design of mine action field programmes and oversight)	8	8	8	12
9. On deployment of humanitarian mine action assets	1	1	1	1
10. On risk education in mine action programmes	14	15	15	14
11. On security sector reform and governance	2	4	2	2
12. On assessment of training capability of troop-contributing countries on improvised explosive device threat mitigation	–	8	5	6
13. On disarmament, demobilization and reintegration and community violence reduction	2	2	2	3
14. On accountability for crimes against United Nations personnel in peacekeeping operations and special political missions	5	5	5	5
Seminars, workshops and training events (number of days)	73	82	67	69
15. Seminars on the national selection mechanisms for the readiness, deployment and training of individual police personnel and units	47	47	47	47
16. Training for future heads of police components	6	12	6	6
17. Training/workshops on justice and corrections practices, including predeployment training for corrections officers	10	10	1	3
18. Training/workshops on the investigation and prosecution of crimes against United Nations personnel in peacekeeping operations and special political missions	10	10	10	10
19. Seminars on mine action for national mine action directors	–	3	3	3
Publications (number of publications)	1	1	1	1
20. Multi-donor report on the activities of the Mine Action Service	1	1	1	1
Technical materials (number of materials)	24	27	24	25
21. On disarmament, demobilization and reintegration and community violence reduction	7	7	7	7
22. On strategic police capability, police operational plans, standard operating procedures and concepts of operation for police components	6	6	6	6
23. On policing for police-contributing countries, United Nations police and national authorities	4	4	4	4
24. To strengthen assistance in justice and corrections areas	1	4	1	2

Section 5 Peacekeeping operations

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
25. On security sector reform, and governance	2	2	2	2
26. On issues related to mine action	2	2	2	2
27. On the prevention, investigation and prosecution of serious crimes against United Nations personnel in peacekeeping operations and special political missions	2	2	2	2

C. Substantive deliverables

Consultation, advice and advocacy: consultations with and advice to 22 Member States to strengthen the capacities of national police services and other law enforcement entities; consultations with 47 Member State groupings, regional organizations and specialized institutions on policing; consultations with 35 Member States on disarmament, demobilization and reintegration and community violence reduction, including with the Group of Friends of Disarmament, Demobilization and Reintegration; policy and technical advice to 25 Member States to build the capacity of national authorities and local partners on mine action, weapons and ammunition management and improvised explosive device threat mitigation; advice to facilitate consensus-building on security sector reform options and modalities in “sustaining peace” contexts; consultations and advice to mobilize coordinated and integrated Member State and related partner support for national justice and corrections efforts; consultations with and advice to 40 Member States on issues related to the implementation of Security Council resolution [2589 \(2021\)](#); advice to and advocacy with Member States’ senior police executives and other partners.

Databases and substantive digital materials: pledged formed police units registered in the Peacekeeping Capability Readiness System and other personnel matters in the computerized human resources system; and online database on accountability for crimes against peacekeepers, pursuant to Security Council resolution [2589 \(2021\)](#).

D. Communication deliverables

Digital platforms and multimedia content: digital and social media content on activities of the subprogramme.

Subprogramme 4 Policy, evaluation and training

Objective

- 5.55 The objective, to which this subprogramme contributes, is to enhance the performance and effectiveness of peace operations within the purview of the Department.

Strategy

- 5.56 To contribute to the objective, the subprogramme will:
- Promote and facilitate policy development, evaluation, organizational learning and training on issues relating to peacekeeping, taking into consideration the views and recommendations provided by Member States on the Action for Peacekeeping initiative launched by the Secretary-General in 2018, the subsequent Action for Peacekeeping Plus initiative launched in 2021 and the Strategy for the Digital Transformation of United Nations Peacekeeping, in line with the Data Strategy of the Secretary-General for Action by Everyone, Everywhere;
 - Support peacekeeping operations in the implementation of the Comprehensive Planning and Performance Assessment System, as part of the integrated peacekeeping performance and accountability framework;
 - Formulate, update and disseminate policies and practical guidance and provide support to missions in specific thematic areas, such as the protection of civilians, conflict-related sexual violence, community engagement with a view to supporting sustainable political solutions, and child protection, as well as the use of strategic communications, the countering of disinformation and misinformation and the distribution of accurate content;
 - Strengthen knowledge-sharing and guidance development for peacekeeping operations and coordinate the development of guidance for the peace and security pillar and for the

Department of Operational Support, in close cooperation with the Department of Political and Peacebuilding Affairs and the Department of Operational Support;

- (e) Build the capacity of policy and best practices officers and focal points in field missions through advice, coordination and training, and continue to strengthen systems and infrastructure for knowledge management by increasing the quality and number of relevant documents available to users in field missions;
- (f) Support Member States that are contributing uniformed personnel through strategic force generation engagement and expanded partnerships with national and regional training institutions and partners for the delivery of predeployment training and train-the-trainer courses and the timely completion and dissemination of core and specialist predeployment training materials to support predeployment training for troop- and police-contributing countries, specifically in areas related to emerging challenges;
- (g) Provide civilian predeployment training and leadership and management training for all mission components and support the delivery of in-mission training through train-the-trainer courses in operational and support skills for uniformed and civilian personnel;
- (h) Use a learning management system accessible by Member States to host courses, enable the registration of participants, deliver online elements of programmes and enable testing ahead of face-to-face course sessions.

5.57 The above-mentioned work is expected to result in:

- (a) Improved and more responsive decision-making by senior mission management, given that comprehensive planning and performance assessment provides senior leadership with data-based evidence showing how resources in their missions are utilized and whether any reorientation of priorities is needed;
- (b) Increased use by missions of specialized information, thematic policy support and guidance, reflecting lessons learned and promoting an exchange of good practices between missions;
- (c) Strengthened and sustained mission performance through consistently trained uniformed and civilian leaders, contingents and individuals.

Programme performance in 2023

The United Nations Mission in South Sudan responds to risks to peace and security associated with climate change

5.58 The Security Council, in its resolutions [2567 \(2021\)](#), [2625 \(2022\)](#) and [2677 \(2023\)](#), recognized the adverse effects of climate change, among other factors, on the humanitarian situation and stability in South Sudan, and emphasized the need for comprehensive risk assessments and risk management strategies by the Government of South Sudan and the United Nations to inform programmes relating to these factors. The subprogramme, through a joint initiative with the Department of Political and Peacebuilding Affairs, the United Nations Environment Programme and the United Nations Development Programme, supported the deployment of an adviser in 2022 to UNMISS to integrate considerations related to climate change into the Mission's risk analysis and response strategies. In response to the Council's request in its resolution [2677 \(2023\)](#), the UNMISS adviser, supported by the subprogramme, provided training to increase the Mission's capacity to analyse risks associated with climate change that may have an adverse impact on peace and security in South Sudan and implementation of the mandate. These efforts have enabled UNMISS to analyse and respond to risks associated with climate change.

5.59 Progress towards the objective is presented in the performance measure below (see table 5.10).

Table 5.10
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	UNMISS began to integrate climate change considerations into its risk analysis and response strategies	UNMISS further enhanced dykes to protect internally displaced persons camps from flood damage UNMISS monitored access to water in areas where migratory cattle herders were present and promoted dialogue between communities and cattle herders on the sharing of resources

Planned results for 2025

Result 1: improved access to knowledge and guidance materials by United Nations peacekeeping personnel

Programme performance in 2023 and target for 2025

- 5.60 The subprogramme’s work contributed to improved access by United Nations peacekeeping personnel to multimedia guidance and best practice materials through animated learning videos highlighting lessons and policy principles in mandated areas such as the protection of civilians and conflict-related sexual violence, which met the planned target.
- 5.61 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 5.11).

Table 5.11
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Peacekeeping personnel have access to the multimedia page on the policy and practice database	Improved access to knowledge and guidance materials by United Nations peacekeeping personnel through the launch of the “Policy meets practice” podcast series and 6 guidance and best practice webinars	Improved access to multimedia guidance and best practices by peacekeeping personnel through animated videos on the protection of civilians and conflict-related sexual violence	Improved access to peacekeeping guidance by peacekeeping personnel through summary guidance materials, multimedia guidance and best practice and improved feedback exchange	Peacekeeping personnel can access and generate customized information from the Policy and Practice Database through enhanced functionalities enabled by artificial intelligence

Result 2: troop-contributing countries prepare infantry battalions in line with United Nations standards

Programme performance in 2023 and target for 2025

- 5.62 The subprogramme’s work contributed to 34 troop-contributing countries deploying infantry battalions prepared in line with United Nations standards, which did not meet the planned target of

36 infantry battalions. The target was not met due to administrative and logistical challenges precluding two Member States from receiving the training.

5.63 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 5.VIII).

Figure 5.VIII

Performance measure: number of troop-contributing countries deploying infantry battalions prepared in line with United Nations standards (cumulative)

Result 3: an online platform to foster direct collaboration among Member States on the preparation of peacekeeping personnel

Proposed programme plan for 2025

5.64 The subprogramme supports Member States that contribute peacekeeping personnel through partnerships, including with training institutions, for the delivery of training, and through capacity-building in the form of training infrastructure, equipment, and logistical and financial support to ensure the preparation, performance, safety and security of military and police personnel. In past years, training calendars were consolidated manually, on an annual basis.

Lessons learned and planned change

5.65 The lesson for the subprogramme was that the manual consolidation of training calendars did not provide insight into eventual amendments to or cancellations of the planned activities once submitted. In applying the lesson, the subprogramme developed an online platform in 2023, which was opened for Member State registration in January 2024, to allow Member States to securely share their peacekeeping-related training activities with the light coordination mechanism by having designated users enter, update and share data with other Member States and receive alerts about scheduling conflicts. Increased use of the platform will contribute to better information-sharing and coordination among Member States and enable real-time insight into training plans, current capacities and partnerships. In 2024, the subprogramme will add a second feature, the “Marketplace”, through which Member States can directly engage with each other on offers of and requests for training and capacity-building support.

5.66 Expected progress towards the objective is presented in the performance measure below (see figure 5.IX).

Figure 5.IX

Performance measure: number of Member States registering their peacekeeping-related training and capacity-building data in the light coordination mechanism online system, and number of offers and requests on the “Marketplace”

Deliverables

5.67 Table 5.12 lists all deliverables of the subprogramme.

Table 5.12

Subprogramme 4: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	1
1. Report of the Secretary-General on the implementation of the recommendations of the Special Committee on Peacekeeping Operations	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	38	38	38	40
2. Meetings of the Special Committee on Peacekeeping Operations	34	34	34	36
3. Meetings of the Fourth Committee	4	4	4	4
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	5	6	5	5
4. In the areas of protection of civilians, child protection, community engagement, conflict-related sexual violence, policy planning, partnerships and force generation	5	6	5	5
Seminars, workshops and training events (number of days)	422	423	424	425
5. Workshops for the provision of strategic guidance, training-of-trainers and assistance in curriculum development and delivery, training methodology, materials and training gap identification to Member States, regional peacekeeping training and policy institutions, and field missions	365	365	367	367
6. Training events on leadership, management and administration for senior civilian and uniformed personnel from field missions and supporting offices, Member States and regional organizations	45	45	47	47
7. Workshops for mission thematic advisers and focal points for knowledge-sharing and training on cross-cutting peacekeeping issues	11	12	10	10

Part II Political affairs

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
8. Workshops for the European Union and its States members on operational support for United Nations peacekeeping operations	1	1	–	1
Technical materials (number of materials)	38	38	36	34
9. On all aspects of peacekeeping for Member States and field missions (policy papers, standard operating procedures, technical reports, lessons learned reports, training materials)	34	34	32	30
10. On capability requirements for United Nations peacekeeping operations	4	4	4	4
C. Substantive deliverables				
Consultation, advice and advocacy: briefings and presentations to Member States on peacekeeping issues; expert advice to permanent missions to the United Nations, the Bretton Woods institutions, international and regional organizations and non-governmental organizations on peacekeeping issues.				
Databases and substantive digital materials: the Comprehensive Planning and Performance Assessment System, as part of the integrated peacekeeping performance and accountability framework; the Peacekeeping Capability Readiness System; the troop- and police-contributing countries knowledge management system; the policy and practice database; and the peacekeeping resource hub accessible to all Member States.				
D. Communication deliverables				
Outreach programmes, special events and information materials: knowledge management newsletter for 15,000 staff; training newsletters for approximately 120 troop- and police-contributing countries and their training institutions.				

B. Proposed post and non-post resource requirements for 2025

Overview

5.68 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 5.13 to 5.15.

Table 5.13

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2023 expenditure	2024 approved	Changes				2025 estimate (before recosting)	
			Technical adjustments	New/expanded mandates	Other	Total		Percentage
Posts	5 593.9	5 834.0	–	–	–	–	–	5 834.0

5.69 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 5.16 to 5.18 and figure 5.X.

5.70 As shown in tables 5.16 (1) and 5.17 (1), the overall resources proposed for 2025 amount to \$6,282,500 before recosting, reflecting no change compared with the approved budget for 2024. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Other changes

5.71 As shown in table 5.16 (1) cost-neutral changes are proposed as follows:

- (a) **Executive direction and management.** The increase of \$21,400 under travel of staff relates to the proposed redeployment of travel resources from subprogrammes 1, 2 and 3 to executive direction and management. Depending on the destination and duration of the trip, the amount of \$21,400 would cover approximately four trips by the Under-Secretary-General, to conduct consultations on various peacekeeping aspects in support of the mandate. Based on historical spending patterns, the majority of travel relates to trips undertaken by the Under-Secretary-General, resulting in the proposed redeployment of resources to executive direction and management;
- (b) **Subprogramme 1, Operations.** The decrease of \$8,000 under travel of staff relates to the proposed redeployment of resources under executive direction and management, as explained above;
- (c) **Subprogramme 2, Military.** The decrease of \$6,700 under travel of staff relates to the proposed redeployment of resources under executive direction of management, as explained above;
- (d) **Subprogramme 3, Rule of law and security institutions.** The decrease of \$6,700 under travel of staff relates to the proposed redeployment of resources under executive direction and management, as explained above.

Other assessed resources

5.72 As reflected in tables 5.16 (2) and 5.17 (2), other assessed resources amount to \$101,262,900. The resources would complement regular budget resources and provide for the requirements indicated in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2024 to 30 June 2025 (A/78/746).

Extrabudgetary resources

- 5.73 As reflected in tables 5.16 (3) and 5.17 (3), extrabudgetary resources amount to \$68,306,700. The resources would complement regular budget resources and would be used mainly to provide for 108 posts (1 D-1, 13 P-5, 40 P-4, 30 P-3, 3 P-2/1, 3 General Service (Principal level) and 18 General Service (Other level)) and non-post resources that would be used to support the United Nations mine action programme, implementation of the Action for Peacekeeping initiative, digital innovation and transformation, the implementation of priorities related to women and peace and security, effective weapons management, regional capacity-building and the implementation of conflict-related sexual violence mandates.
- 5.74 The extrabudgetary resources under the present section are subject to the oversight of the Under-Secretary-General of the Department of Peace Operations, as per the delegation of authority by the Secretary-General.

Executive direction and management

- 5.75 The executive direction and management component comprises the Office of the Under-Secretary-General, the Gender Unit, the Integrated Assessment and Planning Unit, the Office of the Director for Peacekeeping Strategic Partnership and the Office of the Director for Coordination and Shared Services.
- 5.76 The main responsibilities of the executive direction and management component include the following functions:
- (a) Direct, manage and provide political and policy guidance and strategic direction to the Department-led operations, including in the performance of political, programmatic, managerial and administrative functions;
 - (b) Formulate guidelines and policies for peacekeeping operations, based on Security Council mandates;
 - (c) Advise the Security Council and the General Assembly on all matters related to peacekeeping activities and the future direction of United Nations peacekeeping, including strategic and policy issues and initiatives, such as peacemaking, peacekeeping, peacebuilding, transitions through partnerships with regional organizations and other peacekeeping partners, and protection of civilians;
 - (d) Maintain high-level contact with parties to conflict and Member States, in particular the Security Council, as well as troop-, police- and financially contributing countries, in the implementation of the Security Council mandates;
 - (e) Support peacekeeping operations.
- 5.77 The Integrated Assessment and Planning Unit will strengthen analysis and planning at Headquarters and in the missions and provide related guidance, training and support to planning processes in line with the Action for Peacekeeping Plus implementation strategy. The Gender Unit will facilitate the implementation of commitments on gender equality and women and peace and security through strategic and policy guidance, capacity-building and knowledge management, data driven evidence-generation, gender analysis and systematized gender integration, including the operational and technical backstopping of peacekeeping operations.
- 5.78 The Office of the Director for Peacekeeping Strategic Partnership will undertake reviews of peacekeeping operations mandated by the General Assembly. In particular, the Office will coordinate and drive implementation of the action plan for improving the safety and security of United Nations peacekeepers with Headquarters and all high-risk missions and undertake integrated studies and after-action reviews.

- 5.79 The Office of the Director for Coordination and Shared Services, which reports to the Under-Secretaries-General of both the Departments of Peace Operations and Political and Peacebuilding Affairs, includes the joint Executive Office, the Leadership Support Section, the Peacekeeping Situation Centre, the Strategic Communications Section, the Focal Point for Security, the Information Management Unit and the Registry. The Office will continue to provide support to peacekeeping operations for organizational resilience and crisis management, as well as the enhancement of reporting and data analytics capacities and products. The Office will pursue its strategic communication efforts in support of peacekeeping, with particular emphasis on social media and countering misinformation and disinformation. It will coordinate processes for the selection of, and support for, senior mission leadership and will continue outreach efforts to increase and diversify the pool of candidates.
- 5.80 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Department is integrating environmental management practices into its operations. The Department will continue to rely on electronic record-keeping and communications in order to reduce printing, paper-based filing and the use of photocopy paper. The Department also plans to improve e-waste management to facilitate the environmentally friendly disposal of expendable e-waste.
- 5.81 Information on the timely submission of documentation and advance booking for air travel is reflected in table 5.19. The Department has continued its efforts to raise awareness among staff through various forms of communication on the importance of early planning for travels and complying with the 16-day advance purchase policy. Managers are required to implement preventive and corrective measures. In 2023, all documents were submitted within the prescribed timelines.

Table 5.19
Compliance rate
(Percentage)

	2021 <i>actual</i>	2022 <i>actual</i>	2023 <i>actual</i>	2024 <i>planned</i>	2025 <i>planned</i>

- 5.82 The proposed regular budget resources for 2025 amount to \$769,300 and reflect an increase of \$21,400 compared with the approved budget for 2024. The proposed change is explained in paragraph 5.71 (a). Additional details on the distribution of the proposed resources for 2025 are reflected in table 5.20 and figure 5.XI.

II. United Nations Truce Supervision Organization

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 5.88 The United Nations Truce Supervision Organization (UNTSO) is mandated to assist the parties to the 1949 Armistice Agreements in the supervision of the application and observance of the terms of those Agreements. Its mandate derives from Security Council resolutions and decisions, including resolutions [50 \(1948\)](#), [54 \(1948\)](#) and [73 \(1949\)](#). The military observers, assigned to assist the United Nations Mediator in supervising the truce in Palestine pursuant to resolution [50 \(1948\)](#), became UNTSO pursuant to resolution [73 \(1949\)](#) to supervise the Armistice Agreements between the parties to the Arab-Israeli conflict. Following the wars of 1956, 1967 and 1973, the functions of the observers were adapted in response to altered circumstances.
- 5.89 UNTSO activities in Egypt, Israel, Jordan, Lebanon and the Syrian Arab Republic are aimed at maintaining the regional liaison architecture established under the Armistice Agreements. UNTSO provides trained military observers to the United Nations Disengagement Observer Force (UNDOF) and the United Nations Interim Force in Lebanon.

Programme of work

Objective

- 5.90 The objective, to which UNTSO contributes, is to ensure adherence to the Armistice Agreements of 1949 and related agreements.

Strategy and external factors for 2025

- 5.91 To contribute to the objective, UNTSO will:
- (a) Provide trained military observers to UNDOF and UNIFIL to assist in their mandate implementation by providing timely and accurate observation, reports, investigations and inspections. The mission provides administrative, logistical, communications and security support to all outstations and liaison offices;
 - (b) Conduct regional liaison through strategic engagement and regular interaction with the parties, as well as senior representatives of troop-contributing countries and other Member States in the mandate area, and conduct regular liaison, through offices in Egypt, Lebanon and the Syrian Arab Republic, and with Israel and Jordan from its headquarters;
 - (c) Support informed strategic analysis and decision-making within the Organization, with peacekeeping partners and among regional actors through regional assessments, and support peacekeeping partnerships in coordination with other United Nations entities;
 - (d) Conduct seminars, briefings and information exchanges with regional stakeholders, think tanks and senior representatives of troop-contributing countries and other Member States.
- 5.92 The above-mentioned work is expected to result in:
- (a) Reliable communications channels and relations of confidence with the parties, conflict resolution, reduced tensions, avoidance of misunderstandings that could escalate into cross-

boundary conflict and expanded liaison and information networks with national and local community representatives and with actors with influence in the areas of interest;

- (b) Strengthened situational awareness and decision-making by other United Nations entities, enhancing the impact of regional United Nations presences;
 - (c) Improved cooperation and understanding of cross-cutting regional issues among regional counterparts.
- 5.93 With regard to the external factors, the overall plan for 2025 is based on the following planning assumptions:
- (a) All parties to the Armistice Agreements of 1949 and related agreements will cooperate with UNTSO in the performance of its functions;
 - (b) All parties will remain willing to resolve their disputes and to cooperate with the United Nations in fulfilment of the Security Council mandate.
- 5.94 With regard to cooperation with other entities and inter-agency coordination and liaison, UNTSO will engage with relevant national and regional organizations, and cooperate and closely coordinate with its regional peacekeeping partners, special political missions, humanitarian coordinators, United Nations security management systems in all five countries in which it operates and other relevant agencies. These engagements are intended to facilitate the sharing and validation of information from the ground, integrate assessments, ensure consistent key messages and capture synergies to enhance the collective value of regional United Nations presences in the Middle East. This strategic cooperation will take place between the heads of missions and agencies through regular consultations and regional inter-mission engagements, as well as at the working level. UNTSO will continue to expand information-sharing and analysis on regional trends affecting the implementation of United Nations mandates, including through consultative inter-mission coordination activities.
- 5.95 The mission will continue to integrate a gender perspective in its operational activities, deliverables and results, as appropriate. This will include ensuring the inclusion of female military observers in operations and female language assistants in UNTSO activities.

Evaluation activities

- 5.96 The following evaluations conducted by UNTSO and completed in 2023 have guided the proposed programme plan for 2025:
- (a) Evaluation of the distribution of equipment and supplies across the mission's areas of operations;
 - (b) Evaluation of the complexity of the supply chain process across countries and for liaison offices and observer groups.
- 5.97 In response to the results of the evaluations referenced above and the increasing complexity of distributing equipment and supplies, including restrictions at crossings and lengthy administrative and clearance procedures, UNTSO will continue to adapt its operations to ensure continued support of mandated activities across the mission area. UNTSO will implement mitigation measures, including adjusting its activity schedules, consolidating shipments where possible for more efficient utilization of human and material resources, increasing liaison with regional missions for support, undertaking additional communication with local authorities and pursuing local sourcing, where possible, to expedite the delivery of required material, ensuring compliance with local technical standards and minimizing potential customs clearance difficulties.

Programme performance in 2023

Increased awareness of the mandate of the United Nations Truce Supervision Organization and its contribution to stability in the region

- 5.98 The mission regularly engages with diverse national and international actors with regional and country-level expertise to enable a comprehensive situational awareness of regional trends and drivers of armed conflict. UNTSO took the opportunity of the seventy-fifth anniversary of the mission and United Nations peacekeeping to engage with host countries and other Member State representatives in the region, including through commemorations in Beirut, Damascus and Jerusalem. In addition, following increased tensions in the region since October 2023, the mission increased its outreach and engagement with host countries, the resident diplomatic community and representatives of troop-contributing countries to increase awareness of the UNTSO mandate and its contribution to stability in the region.
- 5.99 Progress towards the objective is presented in the performance measure below (see table 5.26).

Table 5.26
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	–	Through strategic communication, the mission increased awareness among host countries, the resident diplomatic community and 28 troop-contributing countries of the UNTSO mandate and its contribution to stability in the region

Planned results for 2025

Result 1: improved situational awareness in the Sinai

Programme performance in 2023 and target for 2025

- 5.100 The mission’s work contributed to improved situational awareness in the Sinai, with the resumption of patrolling in central Sinai in August 2023 and northern Sinai in December 2023, which met the planned target.
- 5.101 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 5.27).

Table 5.27
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
General inspection and administrative move to Cairo completed to support planning for the resumption of patrolling in the Sinai	Patrolling in the Sinai restarted, providing situational awareness in the region	Improved situational awareness through resumption of patrolling in central Sinai in August 2023 and northern Sinai in December 2023	Improved situational awareness through maintained patrolling operations in the Sinai	Situational awareness maintained through patrolling operations throughout the Sinai

Result 2: improved confidence in decision-making by the United Nations Disengagement Observer Force through upgraded observation

Programme performance in 2023 and target for 2025

- 5.102 The mission’s work contributed to the maintenance of reporting through observation within existing capability and planning for the reoccupation of observation post 52, which did not meet the planned target of improved accuracy and quality of reporting through upgraded 24-hour observation equipment with recording capability and increased observation capability through reconstruction and reopening of observation post 52. The target was not met due to the security situation, which delayed the delivery, and therefore deployment, of upgraded observation equipment and the reconstruction and reoccupation of observation post 52.
- 5.103 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 5.28).

Table 5.28
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	Limited visibility and object identification at night and lack of recording capability	Reporting maintained through observation with existing capability	Improved confidence in decision-making by UNDOF enabled by improved accuracy and quality of reporting through upgraded 24-hour observation equipment at five observation posts	Improved quality of reporting enabled by additional observation of the area of separation and its limits, the Alpha and Bravo lines

Result 3: increased engagement in the mandate and work of the United Nations Truce Supervision Organization

Proposed programme plan for 2025

- 5.104 Building on the commemoration of the seventy-fifth anniversary of the mission and United Nations peacekeeping, the mission has been exploring ways to strengthen its outreach.

Lessons learned and planned change

- 5.105 The lesson for the mission was to utilize strategic communication to raise awareness, build support for the mandate of UNTSO and disseminate accurate and reliable information. In applying the lesson, the mission will further develop its regional liaison function with a comprehensive set of meetings strengthened by a new digital outreach to effectively reach specific intended audiences, including host Governments and other Member States, as well as troop-contributing countries, think tanks and academics, in line with the Strategy for the Digital Transformation of United Nations Peacekeeping.
- 5.106 Expected progress towards the objective is presented in the performance measure below (see table 5.29).

Table 5.29
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Information on the history and mandate of UNTSO available through the seventy-fifth anniversary commemorations and the corresponding Yearbook	Increased engagement by think tanks and academics, enabling better analysis and awareness of national and regional dynamics and perspectives	Enhanced regional liaison through diversified engagement with target audiences, including Member States, troop-contributing countries, think tanks and academics

Legislative mandates

5.107 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to UNTSO.

Security Council resolutions

50 (1948)

73 (1949)

54 (1948)

Deliverables

5.108 Table 5.30 lists all deliverables of UNTSO.

Table 5.30
Deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	16	23	16	16
1. Seminars on the implications of regional developments for peacekeeping areas	2	2	2	2
2. Seminars on UNTSO operations (requested by Member States and international organizations)	14	21	14	14
C. Substantive deliverables				
Consultation, advice and advocacy: consultation and liaison with national authorities in Egypt, Israel, Jordan, Lebanon and the Syrian Arab Republic, as well as local government officials, community leaders, international interlocutors and United Nations operations, organizations and country offices in the mission area to assess regional stability/security conditions, regional trend effects and potential disturbances among the parties and on peacekeeping areas of operation, and with the 28 troop-contributing countries and other Member State representatives.				
E. Enabling deliverables				
Administration: weekly, monthly, and annual situation reports; analytical assessment and thematic reports and briefings; quarterly update briefs on each mandate country; tactical operational reports, including daily operational reports, incident reports and investigation reports; inter-mission support agreements with the Office of the Special Coordinator for the Middle East Peace Process, UNIFIL and UNDOF; and monthly mandatory induction training of incoming military observers prior to deployment in observer groups and liaison offices, and tactical training of military observers on the use of observation equipment.				

B. Proposed post and non-post resource requirements for 2025

Overview

5.109 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 5.31 to 5.33.

Table 5.31

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2023 expenditure	2024 approved	Changes				2025 estimate (before recosting)

Total	229	–	–	–	–	229

5.110 Additional details on the distribution of the proposed resources for 2025 are reflected in table 5.34 and figure 5.XVII.

5.111 As shown in table 5.34, the overall resources proposed for 2025 amount to \$41,802,100 before recosting, reflecting an increase of \$791,000 (or 1.9 per cent) compared with the approved budget for 2024. Resource changes result from other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Table 5.34
Overall: evolution of financial and post resources

(Thousands of United States dollars/number of posts)

Figure 5.XVII
Distribution of proposed resources for 2025 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Other changes

5.112 As shown in table 5.31, resource changes reflect a net increase of \$791,000 as follows:

- (a) **Posts.** The increase of \$22,200 reflects the proposed reclassification of one post of Chief Security Officer from the P-4 to the P-5 level (see annex II);
- (b) **Non-posts.** The net increase of \$768,800 reflects:
 - (i) An increase of \$50,700 that would cover travel of staff to the field to install the United field remote infrastructure monitoring system and upgrade the infrastructure for communication and microwave links on the Golan, and travel to provide technical and operational support to outstations;
 - (ii) An increase of \$843,000 under furniture and equipment that would provide mainly for:
 - a. The purchase of six units of mid-range optical equipment, including the operating system, to be positioned at six observation posts at the Golan for military observers to conduct 24-hour observation and support UNTSO in recording incidents, improve the accuracy of reporting, facilitate investigations, enhance situational awareness and provide improved safety and security. The six units would supplement the two units of long-range electrical optical system cameras, including the operating system, for the observation posts to be acquired in 2024, in line with the recommendations of the military capability study (\$525,000);
 - b. The replacement of 15 vehicles and acquisition of 2 additional vehicles in 2025 (\$178,200);
 - (iii) An increase of \$110,700 under improvement of premises that would provide for periodic maintenance and upgrade of all observation posts on both Alpha and Bravo sides of the Golan to ensure safe accessibility to and from observation posts for military observers;

(iv) The increased requirements are partially offset by reductions of \$235,600 under the following: contractual services (\$139,200); general operating expenses (\$76,300), due to reduced maintenance work planned for the premises at UNTSO headquarters in Jerusalem; and supplies and materials (\$20,100), due to lower requirements for the replacement of uniforms.

5.113 In 2023, UNTSO remained steadfast in enforcing stringent measures to maintain compliance with the advance ticket purchase policy, resulting in a 96 per cent compliance rate. UNTSO diligently monitored adherence to the policy through standard Umoja Business Intelligence reports, aiming to streamline the process of requesting and approving official travel.

III. United Nations Military Observer Group in India and Pakistan

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 5.114 The United Nations Military Observer Group in India and Pakistan (UNMOGIP) is responsible for observing and reporting to the Secretary-General any developments pertaining to the observance of the ceasefire, pursuant to Security Council resolution [307 \(1971\)](#). In the resolution, the Council demanded that a durable ceasefire and cessation of all hostilities in all areas of conflict be strictly observed and remain in effect until withdrawals take place, as soon as practicable, of all armed forces to their respective territories and to positions that fully respect the ceasefire line in Jammu and Kashmir supervised by UNMOGIP. To complement its ceasefire monitoring efforts, UNMOGIP conducts balanced investigations on any received complaints of alleged ceasefire violations filed by parties.

Programme of work

Objective

- 5.115 The objective, to which UNMOGIP contributes, is to ensure that developments pertaining to ceasefire violations along the line of control are monitored in accordance with the mandate of UNMOGIP as contained in Security Council resolution [307 \(1971\)](#).

Strategy and external factors for 2025

- 5.116 To contribute to the objective, UNMOGIP will:
- (a) Continue to focus on the core mandated tasks of prevention, early warning, observation and reporting, and confidence-building;
 - (b) Provide timely and detailed reports on relevant developments in its area of operations in accordance with the implementation of its mandate;
 - (c) Continue to employ military observers on both sides of the line of control for the conduct of patrols, inspections; and investigations of alleged violations of the ceasefire and the performance of other tasks in the vicinity of the line of control to the extent permitted by the host countries.
- 5.117 The above-mentioned work is expected to result in adherence to the ceasefire through the presence of United Nations military observers.
- 5.118 With regard to the external factors, the overall plan for 2025 is based on the following planning assumptions:
- (a) Host countries cooperate with UNMOGIP in observing the ceasefire and refraining from hostilities and any action that may aggravate the situation or endanger international peace as embodied in Security Council resolution [307 \(1971\)](#);
 - (b) India and Pakistan remain willing to support UNMOGIP in the conduct of its activities for the delivery of its mandate.
- 5.119 The mission integrates a gender perspective in its operational activities, deliverables and results, as appropriate. This includes ensuring that the United Nations military observers engage in a

comprehensive manner with local communities, among both men and women, to ensure that the mission has a gender-sensitive understanding of community perspectives of the situation on the ground and to facilitate the planning and conduct of mission operations.

Programme performance in 2023

Limited number of complaints concerning alleged ceasefire violations

5.120 To implement its mandate, UNMOGIP undertakes best efforts to monitor the ceasefire between India and Pakistan at the line of control. During 2023, the mission ensured supervision of the ceasefire through the presence of United Nations military observers at the 10 UNMOGIP field stations on both sides of the line of control. UNMOGIP continued to implement its mandate by performing core field tasks. The mission received two complaints concerning alleged ceasefire violations in 2023. In addition, it received 17 petitions from recognized political groups on the situation at and in the vicinity of the line of control in Jammu and Kashmir, expressing concerns over developments affecting Kashmir, in both India and Pakistan.

5.121 Progress towards the objective is presented in the performance measure below (see figure 5.XVIII).

Figure 5.XVIII

Performance measure: number of investigated complaints (annual)

Planned results for 2025

Result 1: increased presence at the line of control

Programme performance in 2023 and target for 2025

5.122 The mission's work contributed to the increased presence of United Nations military observers at UNMOGIP field stations on both sides of the line of control, with 1,700 operational tasks conducted, which exceeded the planned target of 1,400 operational tasks.

5.123 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 5.XIX).

Figure 5.XIX
Performance measure: presence at the line of control (annual)

(Number of operational tasks)

Result 2: enhanced observation along the line of control

Programme performance in 2023 and target for 2025

- 5.124 The mission’s work contributed to the use of new software by a limited number of field stations, which did not meet the planned target of increased accuracy of observation through new software to store, review and analyse data. The target was not met due to the need for further training of military observers on using the software.
- 5.125 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 5.36).

Table 5.36
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Use of observation equipment with limited capabilities and scoping of the requirements for new equipment	Enhanced field observation and reporting at field stations with the new observation equipment	Use of new software to store, review and analyse data by a limited number of field stations	Enhanced observation and reporting along the line of control with all field stations using the new observation equipment	Quality of observation and reporting maintained by all field stations

Result 3: improved situational awareness through geospatial information systems

Proposed programme plan for 2025

- 5.126 United Nations military observers routinely travel by land through insecure mountain ranges to inspect vast and remote areas along the line of control. Because of the rugged terrain in the area of operation, routes are often in bad and unpredictable condition, and the military observers therefore need geospatial technologies to better plan patrols and observer missions. In 2022, a new operational map was used by the mission to plan observer missions.

Lessons learned and planned change

- 5.127 The lesson for the mission was the need to further enhance the operational map to enable a comprehensive picture to be gained of the situation on the ground and to provide real-time information to support patrols. In applying the lesson, the mission will work with the United Nations Global Service Centre to utilize geospatial information systems to add additional layers of information and data points into the operational map, such as the location of field posts, public facilities and road infrastructure. The use of such systems will also enable real-time tracking of the movements of military observers and information-sharing on security incidents.
- 5.128 Expected progress towards the objective is presented in the performance measure below (see table 5.37).

**Table 5.37
Performance measure**

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023(actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Observation based on traditional handheld global positioning systems and VHF/HF radio systems	Planning of observer missions through the introduction of the first stage of an operational map	Identification of requirements to enhance operational maps to ensure that they are fit for purpose	Patrols planned through pilot testing of operational maps with additional data points and information layers	Enhanced security and improved planning of patrols through the use of comprehensive operational maps with real-time information

Legislative mandates

- 5.129 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to UNMOGIP.

Security Council resolutions

39 (1948) 307 (1971)
47 (1948)

Deliverables

- 5.130 Table 5.38 lists all deliverables of UNMOGIP.

**Table 5.38
Deliverables for 2025, by category and subcategory**

<i>Category and subcategory</i>
C. Substantive deliverables
Consultation, advice, and advocacy: regular engagement with military personnel of host nations.
D. Communication deliverables
Outreach programmes, special events and information materials: briefings and presentations to troop-contributing countries' ambassadors and military attachés.
Digital platforms and multimedia content: UNMOGIP website.
E. Enabling deliverables
Administration: investigation reports, field trips reports, incident reports, daily, weekly, monthly and annual situation reports, monthly induction training of incoming military observers, and bimonthly training of officers-in-charge.

B. Proposed post and non-post resource requirements for 2025

Overview

5.131 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 5.39 to 5.41.

^a In line with General Assembly resolution 72/262 C, in which the Assembly stressed that the actions to restructure the United Nations peace and security pillar should be implemented with full respect for the relevant mandates, decisions and resolutions of the Assembly and of the Security Council, without changing established mandates, functions or funding sources of the peace and security pillar, information on post resources under section 3 are provided for information purposes.

^b 1 P-3 post and 1 Local level post based in Nairobi.

C. United Nations Truce Supervision Organization

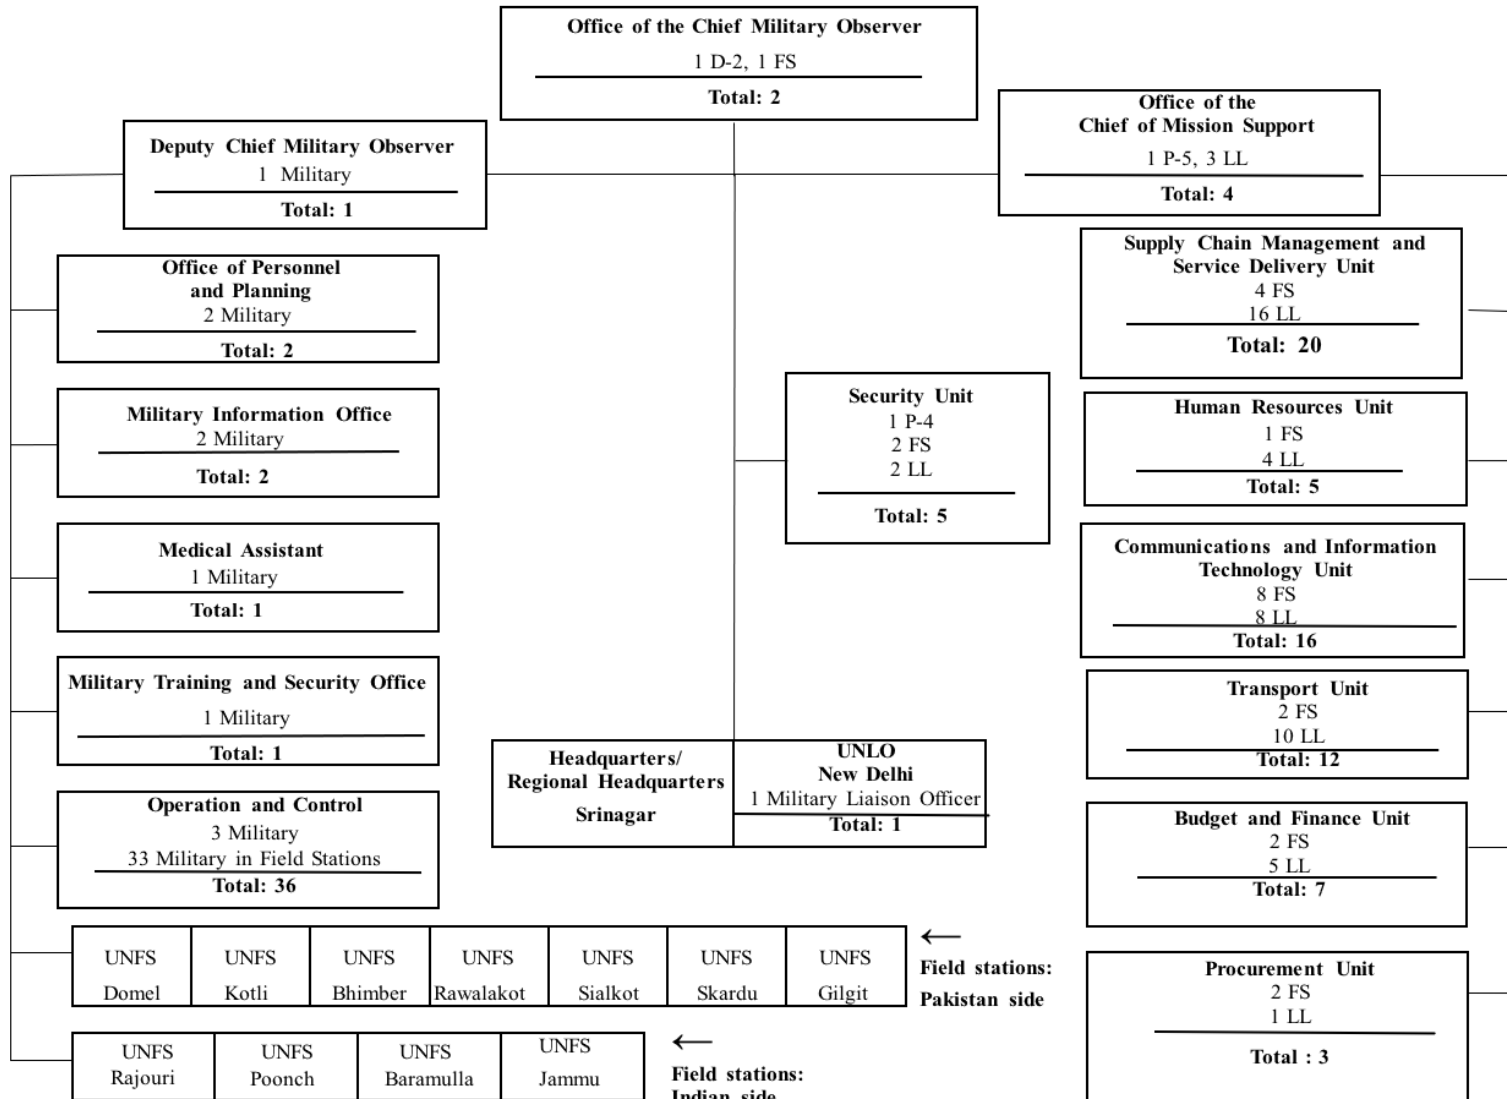

^a Reclassification.

^b D-1 Chief of Mission Support for United Nations Truce Supervision Organization and the Special Coordinator for the Middle East Peace Process.

^c Includes protocol and occupational health and safety.

^d Includes Travel Unit and Training Unit.

D. United Nations Military Observer Group in India and Pakistan

Abbreviations: ALO, Administrative and Logistics Office; ASG, Assistant Secretary-General; FS, Field Service; GS (OL), General Service, (Other level); HQ, headquarters; LL, Local level; LOATA, Liaison Office Amman/Tel Aviv; LOB, Liaison Office Beirut; LOC, Liaison Office Cairo; LOD, Liaison Office Damascus; NPO, National Professional Officer; OA, other assessed; OGG, Observer Group Golan; OGL, Observer Group Lebanon; RB, regular budget; UNFS, United Nations Field Station; UNLO, United Nations Liaison Office; USG, Under-Secretary-General; XB, extrabudgetary.

Annex II

United Nations Truce Supervision Organization: summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Security Section	1	P-4 to P-5	Reclassification of one Chief Security Officer	<p>The reclassification of the post of Chief Security Officer from the P-4 to the P-5 level is to reflect the increased level of responsibility of this post to support the mandate of UNTSO across all five countries, which have an increasingly diverse and challenging security context.</p> <p>The Chief Security Officer provides direct security support to mandate delivery provided by 388 UNTSO personnel (159 military and 229 civilian) and has direct supervision of 53 international and national security staff spread across seven outstations. The Chief Security Officer liaises directly with seven designated officials to ensure security in seven very different and increasingly complex areas in five countries of the UNTSO mandate, and coordinates UNTSO operations with seven P-5 and P-4 Security Advisers. The Chief Security Officer also reviews and reconciles the different security protocols adopted by the seven designated officials and translates them into coherent guidance for UNTSO leadership and personnel.</p>

Abbreviation: UNTSO, United Nations Truce Supervision Organization.

** In keeping with paragraph 10 of General Assembly resolution [77/267](#), the part consisting of the programme plan and programme performance information (part II) is submitted through the Committee for Programme and Coordination for the consideration of the Assembly.

*** In keeping with paragraph 10 of General Assembly resolution [77/267](#), the part consisting of the post and non-post resource requirements (part III) is submitted through the Advisory Committee on Administrative and Budgetary Questions for the consideration of the Assembly.

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 6.1 The Office for Outer Space Affairs is responsible for advancing international cooperation in space activities. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolutions [1472 A \(XIV\)](#), [76/3](#), entitled “The ‘Space2030’ Agenda: space as a driver of sustainable development”, [78/72](#) on international cooperation in the peaceful uses of outer space and [76/55](#) on transparency and confidence-building measures in outer space activities, as appropriate.
- 6.2 The core functions of the Office are: (a) serving as the secretariat of the Committee on the Peaceful Uses of Outer Space and its subsidiary bodies (resolution [1472 A \(XIV\)](#)), as the executive secretariat of the International Committee on Global Navigation Satellite Systems and its Providers’ Forum (resolutions [61/111](#) and [64/86](#)) and as the secretariat of the Space Mission Planning Advisory Group (resolution [71/90](#)); (b) implementing the United Nations Programme on Space Applications (resolutions [2601 \(XXIV\)](#) and [37/90](#)) and the programme on the United Nations Platform for Space-based Information for Disaster Management and Emergency Response (UN-SPIDER) (resolution [61/110](#)); (c) maintaining the Register of Objects Launched into Outer Space (resolutions [1721 B \(XVI\)](#) and [3235 \(XXIX\)](#)); (d) discharging the responsibilities of the Secretary-General under the United Nations treaties and principles on outer space and related resolutions (resolutions [2222 \(XXI\)](#), [2345 \(XXII\)](#), [2777 \(XXVI\)](#), [3235 \(XXIX\)](#), [34/68](#), [37/92](#), [41/65](#), [47/68](#), [59/115](#) and [62/101](#)); and (e) supporting Member States in fulfilling the “Space2030” Agenda implementation plan (resolution [76/3](#)).

Programme of work

Peaceful uses of outer space

Objective

- 6.3 The objective, to which this programme contributes, is to strengthen international cooperation in the conduct of space activities for peaceful purposes and advance the use of space science and technology and their applications.

Strategy and external factors for 2025

- 6.4 To contribute to the objective, the Office will support the work of the Committee on the Peaceful Uses of Outer Space and its subsidiary bodies and promote international cooperation in the exploration and use of outer space for peaceful purposes. Specifically, the Office will:
- (a) Provide substantive secretariat services to the Committee, the Scientific and Technical Subcommittee, the Legal Subcommittee, the International Committee on Global Navigation Satellite Systems and its Providers’ Forum and the Space Mission Planning Advisory Group;
 - (b) Provide secretariat services to the working groups of the Committee and its subsidiary bodies, including the Working Group on Legal Aspects of Space Resource Activities and the Working Group on the Long-term Sustainability of Outer Space Activities;
 - (c) Work with Member States, intergovernmental and non-governmental entities and other partners to promote the peaceful use of outer space, including through: (i) the implementation of the

international legal framework governing space activities; (ii) the registration of space objects launched into outer space; (iii) space debris mitigation; (iv) transparency and confidence-building measures in outer space activities, as appropriate; (v) civil satellite-based positioning, navigation, timing and value added services; and (vi) assistance to the Committee in further developing the governance of outer space activities;

- (d) Deliver training events and technical advisory support to assist States, upon their request, and institutions in: (i) enhancing their capacities in areas such as space law and policy, space sustainability, space economy, climate change, environmental monitoring, natural resources management, precision farming and agriculture, global health, satellite communications, space weather, space exploration, astronomy, search and rescue, disaster risk reduction and emergency response, and global navigation satellite systems; and (ii) developing collaborative platforms and promoting knowledge-sharing for space-based solutions;
- (e) Cooperate with the regional centres for space science and technology education affiliated to the United Nations to deliver training in remote sensing and geographic information systems, meteorological satellite applications, satellite communications, space and atmospheric science and global navigation satellite systems;
- (f) Promote and augment the impact of the work of the Committee and the Office on progress towards achieving the Sustainable Development Goals, through: (i) targeted outreach activities that develop a greater understanding and increased adoption of space technology, data and services, including through issuing publications, information leaflets and training materials; and (ii) exchanges with relevant stakeholders to promote more systematic sharing of space-based data and information to foster sustainable development and space sustainability.

6.5 The above-mentioned work is expected to result in:

- (a) A safer and more sustainable outer space;
- (b) Space-based solutions enabling monitoring of and progress towards the achievement of the Sustainable Development Goals;
- (c) Greater understanding, acceptance and application of the international legal regime governing outer space activities;
- (d) An increased number of countries with access to space and space benefits, in particular developing countries, in using science and technology and related applications, including space-based solutions, to achieve sustainable development, disaster risk reduction and emergency response;
- (e) Greater compatibility and interoperability of global navigation satellite systems;
- (f) Space capabilities being more readily available through strengthened cooperative relationships and new partnerships.

6.6 With regard to the external factors, the overall plan for 2025 is based on the planning assumption that governmental, intergovernmental and non-governmental organizations are able and willing to support the Office in implementing the programme.

6.7 With regard to cooperation with other entities at the global, regional, national and local levels, the Office will, in line with its mandate, leverage its established partnerships with governmental, intergovernmental and non-governmental organizations, including space agencies, industry, academia, institutions and other space-related entities, to pursue new opportunities to meet the growing demand for support to strengthen the capacity of countries, in particular developing countries, in using space science and technology and their applications. The Office will also pursue cooperative relationships, including with the private sector. It will enhance transparency in its programme activities and regularly inform the Committee of the projects being implemented and of its partnerships with space agencies, governmental and non-governmental organizations and the private sector.

- 6.8 With regard to inter-agency coordination and liaison, the Office will lead the Inter-Agency Meeting on Outer Space Activities (UN-Space) to promote coherence and increase collaboration on space-related work among entities of the United Nations system, with a view to better coordinating their data-sharing and cooperating on the procurement of space-based information, to accelerate the application of space assets in order to achieve the Sustainable Development Goals.
- 6.9 The Office integrates a gender perspective into its operational activities, deliverables and results, as appropriate, as demonstrated by the implementation of its Space for Women project to promote the empowerment of women and girls in the areas of space science, technology, innovation and exploration, and to increase awareness of education and career opportunities in science, technology, engineering and mathematics. The Office will work with partners to strengthen the capacity and skills of individuals and institutions, with an emphasis on enhancing the participation and retention of women and girls in space activities.
- 6.10 In line with the United Nations Disability Inclusion Strategy and through its Space for Persons with Disabilities project, the Office raises awareness and identifies opportunities for disability inclusion in the space sector. The Office will develop partnerships to enhance the prospects of careers in science, technology, engineering and mathematics for people with disabilities and will share good practices for accessibility and in scientific research, education and outreach, and publish related information through a dedicated web page.

Evaluation activities

- 6.11 The planned evaluation for 2023 of the activities under the Access to Space for All initiative was delayed and will be completed in 2024.
- 6.12 An evaluation of the Space4Water portal is planned for 2025.

Programme performance in 2023

Increased commitment on compatibility, interoperability and transparency in the use of global navigation satellite systems

- 6.13 Satellite-based positioning, navigation and timing services provide a number of services, such as enabling road traffic management, maritime and aviation navigation, supporting precision agriculture and assisting in humanitarian search and rescue missions. The proliferation and increasing development of satellite navigation systems can benefit from enhanced compatibility, interoperability and transparency among these systems to promote and protect the use of their open service applications, to help to ensure that civilian users globally can benefit in full from global navigation satellite systems and their applications. The programme, as executive secretariat to the International Committee on Global Navigation Satellite Systems, provides services and supports intergovernmental discussions and coordination among Member States, United Nations entities and governmental, intergovernmental and non-governmental organizations on issues relating to global navigation satellite systems, and organizes regional workshops, training courses and technical seminars on the use of technologies relating to those systems.
- 6.14 Progress towards the objective is presented in the performance measure below (see figure 6.I).

Figure 6.I
Performance measure: States Members of the United Nations, United Nations entities and governmental, intergovernmental and non-governmental organizations participating in the International Committee on Global Navigation Satellite Systems (cumulative)

Planned results for 2025

Result 1: increased understanding and application of the international legal regime governing outer space activities

Programme performance in 2023 and target for 2025

- 6.15 The programme’s work contributed to 48 countries taking action to increase understanding of, adhere to and/or implement the international legal regime governing outer space activities, which exceeded the planned target of 41 countries.
- 6.16 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 6.II).

Figure 6.II
Performance measure: number of countries taking action to increase understanding, adhere to and/or implement the international legal regime governing outer space activities (cumulative)

Result 2: direct access to space-based emergency response mechanisms

Programme performance in 2023 and target for 2025

- 6.17 The programme's work contributed to 23 national disaster management agencies becoming authorized users of the International Charter on Space and Major Disasters, which did not meet the planned target of 25. The target was not met because there were no official requests from national management authorities to become an authorized user of the International Charter.
- 6.18 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 6.III).

Figure 6.III

Performance measure: number of national disaster management agencies becoming authorized users of the International Charter on Space and Major Disasters (cumulative)

Result 3: increased access to space

Proposed programme plan for 2025

- 6.19 Increased access to space technologies can strengthen national capabilities of Member States to develop space-based solutions that foster socioeconomic development and address global challenges. The programme assists Member States in developing the capacity to build and launch satellites into outer space through partnerships with space agencies, research institutions and industry to develop specialized know-how and engineering processes for satellite development and space exploration.

Lessons learned and planned change

- 6.20 The lesson for the programme was the possibility to strengthen the capacity of individuals and teams to plan and execute activities within the entire development cycle of space technology, from preparing project proposals and applications to the launching of satellites and data usage, thereby increasing their capacity for gaining access to space opportunities more broadly. In applying the lesson, the programme will focus its efforts on supporting participants through technical advice and specialized training, with the purpose of increasing their capacity to develop competitive and high-quality project proposals and applications and to maximize the learning outcomes of individuals.
- 6.21 Expected progress towards the objective is presented in the performance measure below (see figure 6.IV).

Figure 6.IV

Performance measure: number of satellites launched into outer space through the Access to Space for All initiative (cumulative)

Legislative mandates

6.22 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

1472 A (XIV); 1721 B (XVI); 2453 A–B (XXIII); 2601 (XXIV); 3234 (XXIX); 61/111; 64/86; 71/90; 74/82; 77/121; 78/72	International cooperation in the peaceful uses of outer space	47/68	Principles Relevant to the Use of Nuclear Power Sources in Outer Space
2222 (XXI)	Treaty on Principles Governing the Activities of States in the Exploration and Use of Outer Space, including the Moon and Other Celestial Bodies	54/68	Third United Nations Conference on the Exploration and Peaceful Uses of Outer Space
2345 (XXII)	Agreement on the Rescue of Astronauts, the Return of Astronauts and the Return of Objects Launched into Outer Space	59/2	Review of the implementation of the recommendations of the Third United Nations Conference on the Exploration and Peaceful Uses of Outer Space
2777 (XXVI)	Convention on International Liability for Damage Caused by Space Objects	59/115	Application of the concept of the “launching State”
3235 (XXIX)	Convention on Registration of Objects Launched into Outer Space	61/110	United Nations Platform for Space-based Information for Disaster Management and Emergency Response
34/68	Agreement Governing the Activities of States on the Moon and Other Celestial Bodies	62/101	Recommendations on enhancing the practice of States and international intergovernmental organizations in registering space objects
37/90	Second United Nations Conference on the Exploration and Peaceful Uses of Outer Space	65/271	International Day of Human Space Flight
37/92	Principles Governing the Use by States of Artificial Earth Satellites for International Direct Television Broadcasting	68/74	Recommendations on national legislation relevant to the peaceful exploration and use of outer space
41/65	Principles Relating to Remote Sensing of the Earth from Outer Space	69/283	Sendai Framework for Disaster Risk Reduction 2015–2030
		70/1	Transforming our world: the 2030 Agenda for Sustainable Development
		72/78	Declaration on the fiftieth anniversary of the Treaty on Principles Governing the Activities of States in the Exploration and Use of Outer Space, including the Moon and Other Celestial Bodies

Part II	Political affairs		
72/79	Consideration of the fiftieth anniversary of the United Nations Conference on the Exploration and Peaceful Uses of Outer Space	75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
73/6	Fiftieth anniversary of the first United Nations Conference on the Exploration and Peaceful Uses of Outer Space: space as a driver of sustainable development	76/3	The “Space2030” Agenda: space as a driver of sustainable development
74/115	International cooperation on humanitarian assistance in the field of natural disasters, from relief to development	77/29	International cooperation on humanitarian assistance in the field of natural disasters, from relief to development
		77/120	Space and global health

Conference of the Parties to the United Nations Framework Convention on Climate Change decisions

1/CP.21 Adoption of the Paris Agreement

Deliverables

20. Information furnished in accordance with the Convention on Registration of Objects Launched into Outer Space and General Assembly resolution 1721 B (XVI)	70	70	70	70

C. Substantive deliverables

Consultation, advice and advocacy: normative support to Working Group C of the International Committee on Global Navigation Satellite Systems, the Space for Women network and meetings on the sustainability of space activities; expert advice to Member States, upon request, on: (a) the registration of space objects; (b) space science and technology and their applications; (c) activities of the United Nations-affiliated regional centres for space science and technology education; (d) the use of space-based information in disaster management plans, policies and disaster risk management activities in approximately 5 Member States; and (e) space-based information to support emergency and humanitarian response in at least 4 developing countries; and the organization of long-term training opportunities in the field of space science and technology and related applications.

Databases and substantive digital materials: Register of Objects Launched into Outer Space and Online Index of Objects Launched into Outer Space, UN-SPIDER knowledge portal, International Committee on Global Navigation Satellite Systems portal, Space for Water portal, Space Solutions Compendium (database), e-learning courses including space for climate action and agriculture and national space law collection.

D. Communication deliverables

Outreach programmes, special events and information materials: exhibits, promotional and educational materials, and celebrations of achievements and other anniversaries relating to outer space.

External and media relations: press releases and press conferences on the work of the Office and the Committee on the Peaceful Uses of Outer Space.

Digital platforms and multi-media content: websites for the Office for Outer Space Affairs, Space for Women, Space for Climate Action and space sustainability.

B. Proposed post and non-post resource requirements for 2025

Overview

6.24 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 6.2 to 6.4.

Table 6.2

Overall: evolution of financial resources by object of expenditure

6.25 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 6.5 to 6.7 and figure 6.V.

6.26 As reflected in tables 6.5 (1) and 6.6 (1), the overall resources proposed for 2025 amount to \$4,783,800 before recosting, reflecting no change compared with the approved budget for 2024. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Figure 6.V
Distribution of proposed resources for 2025 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

- 6.27 As reflected in tables 6.5 (2) and 6.6 (2), extrabudgetary resources amount to \$1,664,200. The resources would complement regular budget resources and would be used mainly to provide for eight posts (1 P-3, 2 P-2/1 and 5 General Service (Other level)) and non-post resources to support capacity development activities and other services to Member States.
- 6.28 Anticipated in-kind contributions with an estimated value of \$1,793,000 reflect staff provided on a non-reimbursable loan basis, expert support and launch services provided under the Access to Space for All initiative and the value of the rental of conference facilities, meeting services, room and board for participants, transport and other contractual services provided on a no-cost basis for training events and other activities organized by the Office for Outer Space Affairs.
- 6.29 The extrabudgetary resources under the present section are subject to the oversight of the Office in accordance with the delegation of authority from the Secretary-General.

Other information

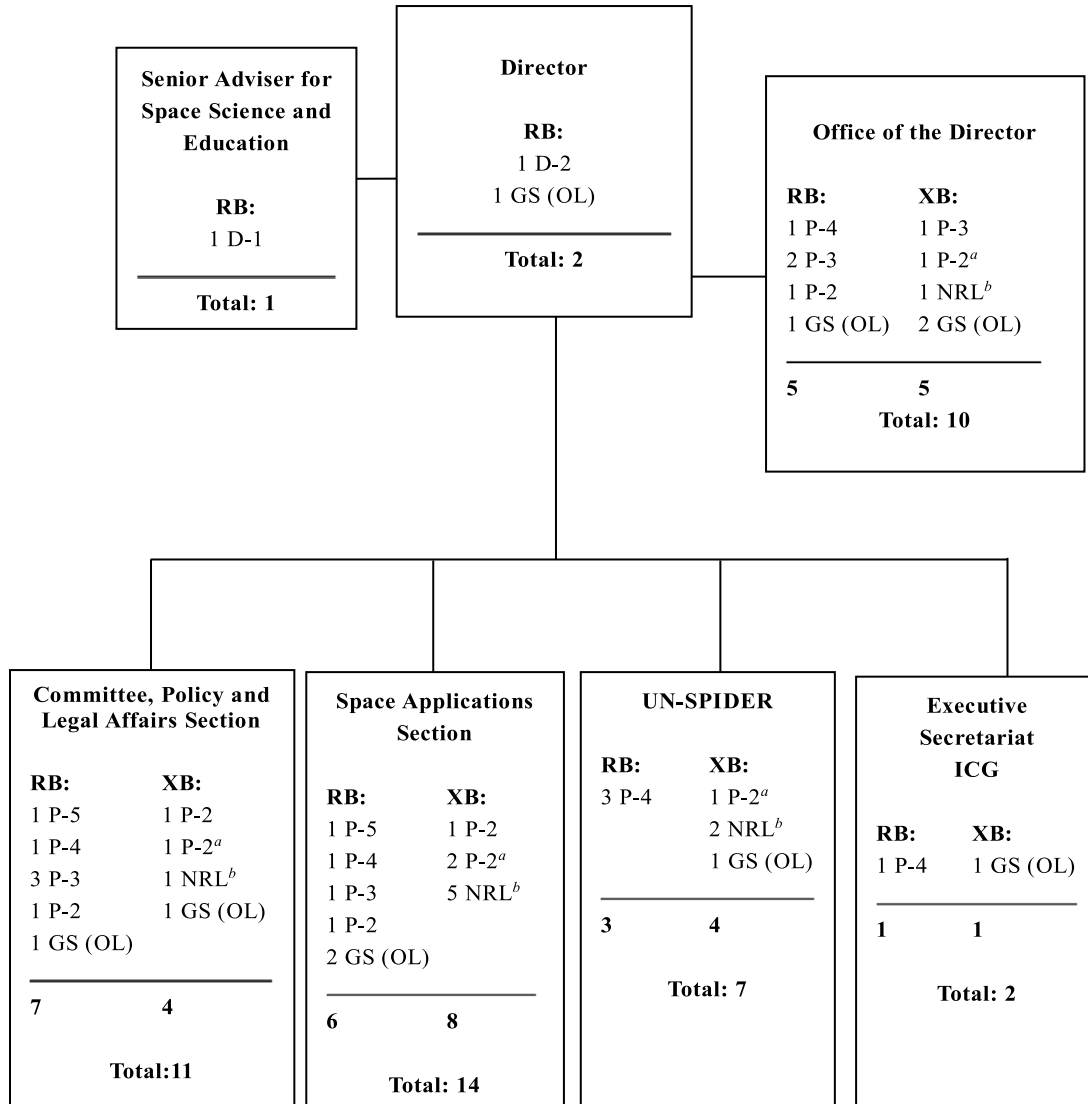

- 6.30 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Office for Outer Space Affairs complies with the policies and procedures rolled out by the United Nations Office at Vienna. The Vienna headquarters is a climate neutral facility, running 100 per cent on renewable energy. Since 2020, the Vienna-based organizations of the United Nations common system have started to renew entrances, replaced existing air-curtains and upgraded or refurbished all elevator cabins. While some of these projects have been completed in parts of the compound, they are still ongoing in others, combined with an increased focus on upgrading air conditioning units and on replacing pipes and insulation and lighting systems throughout the Vienna International Centre from the 1978 standards. These projects, which will continue throughout 2025 and beyond, will result in a further reduction in the environmental impact of the Vienna International Centre as they will increase energy efficiency.
- 6.31 Information on the timely submission of documentation and advance booking for air travel is reflected in table 6.8. Advance purchasing of some tickets was restricted owing to operational constraints arising from the late availability of extrabudgetary funding sources. The Office for Outer Space Affairs will review late bookings to mitigate instances that have an impact on compliance.

** The part consisting of the proposed programme plan for 2025 is submitted for the consideration of the General Assembly in accordance with the established budgetary procedures and practices reaffirmed in paragraph 7 of resolution [77/267](#).

*** In keeping with paragraph 10 of General Assembly resolution [77/267](#), the part consisting of the post and non-post resource requirements is submitted through the Advisory Committee on Administrative and Budgetary Questions for the consideration of the Assembly.

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 7.1 The International Court of Justice is responsible for settling, in accordance with international law, legal disputes that are submitted to it by States and to give advisory opinions on legal questions referred to it by bodies authorized to do so under the terms of the Charter of the United Nations. It is composed of 15 judges elected by the General Assembly and the Security Council and is one of six principal organs of the United Nations and the principal judicial organ of the Organization. It functions in accordance with the Statute of the Court, which is an integral part of the Charter. All 193 States Members of the United Nations are parties to the Statute, and 74 of them have recognized the Court's jurisdiction as compulsory, in line with Article 36, paragraph 2, of its Statute. In addition, more than 300 bilateral and multilateral treaties grant the Court compulsory jurisdiction in the resolution of various types of disputes. States that are not members of the United Nations may become parties to the Statute on conditions to be determined in each case by the Assembly upon the recommendation of the Council. The Court may also be open to States not parties to its Statute, subject to the conditions laid down by the Council and currently set out in its resolution 9 (1946), adopted on 15 October 1946. The Court submits annual reports to the Assembly, the most recent of which is contained in document [A/78/4](#). Under the terms of regulation 2.14 of the Financial Regulations and Rules of the United Nations, the programme budget proposals of the Court are prepared by the Court, in consultation with the Secretary-General, and are submitted to the Assembly by the Secretary-General, together with such observations as the latter may deem desirable.
- 7.2 Although the Court cannot forecast its main workload indicators (e.g. the number of cases that will be pending before the Court in 2025 and the number of new proceedings that will be instituted, including incidental proceedings in pending cases), it has made every effort to assess its requirements for 2025 against the background of its workload for the current and previous budgetary periods.
- 7.3 While the Court has no control over the volume of its activities, which depend in large part on the number of proceedings that will be instituted before it, it must at all times be able to exercise the functions entrusted to it under the Charter. New cases are brought before the Court by States, and advisory opinions are requested of the Court by authorized organs of the United Nations and specialized agencies, all of whom may seize the Court at any time. When a case is pending before the Court, it is not possible to anticipate whether and when recourse will be made to incidental proceedings (e.g. requests for provisional measures). Historically, there have been significant variations in the number of new proceedings commenced in a given year, although in recent times there has been an upward trend in the Court's caseload. In order to meet the demands of its workload, the Court now routinely considers three cases simultaneously. In 2023, the Court was seized of a record number of seven new cases, including three requests for advisory opinions, one of which involved the filing of 57 written statements by States and intergovernmental organizations. In 2023, the Court also delivered three judgments and six orders on requests for the indication or modification of provisional measures and held seven sets of hearings. With 24 cases pending on its General List as at 30 April 2024 – which involve, inter alia, 127 States Members of the United Nations – the Court will no doubt maintain its intense pace of judicial activity in the years to come.
- 7.4 The workload represented by each decision of the Court is high. In principle, the parties to cases brought before the Court each submit one set of written pleadings to the Court: a memorial and a counter-memorial. The Court may authorize them to submit a further set of pleadings, namely, a reply and a rejoinder. In practice, these additional pleadings are almost always submitted. The pleadings are tending to become increasingly voluminous, notwithstanding the Court's appeals to the parties not to repeat arguments already exposed. Hearings can also be long and complex, depending on the nature of the case. In cases involving difficult factual issues (e.g. of a highly technical character), parties may

call witnesses and experts to testify. Once it has heard the submissions of the parties, the Court does everything in its power to deliver a judgment within as short a time as possible, allowing for the complexity of the case. The entire proceedings must be conducted simultaneously in both of the Court's official languages, English and French, both at the written and oral stages and during deliberations.

- 7.5 In deciding the cases submitted to it, the Court renders decisions that form a coherent body of jurisprudence and which may assist in preventing disputes that may arise between other States. In addition, in giving advisory opinions in response to the requests of duly authorized organs and specialized agencies of the United Nations, the Court facilitates the proper functioning of the United Nations system and contributes to preventive diplomacy and the development of international law.
- 7.6 Given that the Court is both a judicial body and an international institution that is administratively independent from the Secretariat, its Registry must take on the dual role of providing assistance to the Court in the exercise of its judicial functions and managing the administrative and budgetary matters of an international secretariat. In carrying out this role, the Registry is guided by the Statute, the Rules of the Court and the Instructions for the Registry. Pursuant to Article 21, paragraph 2, of the Statute and articles 22 and 23 of the Rules of Court, respectively, the Registrar and Deputy-Registrar are elected by the Court for a term of seven years each and may be re-elected. In accordance with Article 21, paragraph 2, of the Statute, the staff of the Registry are appointed by the Court. The Court adopts its own staff regulations.

Programme of work

Registry

Objective

- 7.7 The objective, to which the Registry contributes, is to ensure that the needs of the Court are met in an efficient and effective manner for the sound administration of international justice and the fulfilment by the Court of its mandate under the Charter.

Strategy and external factors for 2025

- 7.8 To contribute to the objective, the Registry will:
- (a) Respond to the needs of the Court in carrying out its judicial activities;
 - (b) Ensure the timely provision of substantive, conference, secretariat and documentation services and legal, diplomatic, linguistic and technical support in cases pending before the Court.
- 7.9 The above-mentioned work is expected to result in the needs of the Court being met in an effective and efficient manner in 2025.
- 7.10 With regard to the external factors, the overall plan for 2025 is based on the planning assumption that the Court's judicial activities in 2025 will involve a similar level of work as in 2023 and 2024.
- 7.11 With regard to cooperation with other entities, the Registry of the Court will continue to cooperate closely with United Nations offices and institutions in 2025.

Programme performance in 2023

Increased awareness about the Court's activities among networks of professionals

- 7.12 The work of the Registry contributed to increased dissemination of information about the Court's judicial activities by further developing and strengthening the Court's social media profile, with a

particular focus on professional networking platforms, which allow the Court to share information about its activities with networks of professionals interested in its work. Press releases announcing the institution of proceedings, upcoming hearings and the delivery of the Court's decisions, links to watch the Court's public sittings and other relevant information related to the Court's judicial functions are regularly shared through such platforms.

7.13 Progress towards the objective is presented in the performance measure below (see figure 7.I).

Figure 7.I

Performance measure: number of professionals kept abreast of the Court's judicial activities through professional networking platforms

(Number of followers on LinkedIn per year)

Planned results for 2025

Result 1: improved understanding and awareness of the Court's proceedings among the diplomatic and legal community

Programme performance in 2023 and target for 2025

- 7.14 The Registry's work contributed to 726 stakeholders in the diplomatic and legal community having improved understanding and awareness of the Court's proceedings, which exceeded the planned target of 450 stakeholders.
- 7.15 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 7.II).

Figure 7.II
Performance measure: number of stakeholders in the diplomatic and legal community with improved understanding and awareness of the Court’s proceedings (annual)

Result 2: increased dissemination of the Court’s publications

Programme performance in 2023 and target for 2025

- 7.16 The work of the Registry contributed to making the Court’s anniversary book, entitled *The International Court of Justice: 75 Years in the Service of Peace and Justice*, accessible for persons with print disabilities, including persons with a visual impairment, and publishing for the general public a catalogue of the Court’s publications and the reprinted decisions of the Permanent Court of International Justice, which met the planned target.
- 7.17 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 7.1).

Table 7.1
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Increased accessibility of Court publications through access by the general public to digital collections in the United Nations iLibrary; access by the general public to a revised consolidated version of the Court’s basic documents	Access by the general public to the anniversary book and the new catalogue of the Court’s publications since 1946	Persons with print disabilities, including persons with a visual impairment, have access to the anniversary book; access by the general public to a catalogue of new publications and the entire set of the reprinted decisions of the Permanent Court of International Justice	Access by the general public to an increased digital collection of publications in the United Nations iLibrary and on the redesigned “Publications” page on the Court’s website	Access by the general public to an updated version of the Court’s Handbook, a booklet of official case citations of the Permanent Court of International Justice and the International Court of Justice, and an interactive catalogue of new titles

Result 3: enhanced process of transmission and receipt of documents relating to judicial proceedings

Proposed programme plan for 2025

- 7.18 The judicial proceedings before the Court generate a large volume of documents, both for internal distribution and for communication to and from the Court, including correspondence to participants in pending cases and the United Nations Secretariat, notes, memorandums and minutes of private meetings of the Court. With a view to streamlining its working methods, the Registry of the Court has turned to electronic means for the transmission of some case-related documents, where appropriate, including letters to States Members of the United Nations and States entitled to appear before the Court.

Lessons learned and planned change

- 7.19 The lesson for the Registry was that, where appropriate, electronic means may constitute an effective tool for the transmission of certain case-related documents, while at the same time achieving gains in effectiveness and optimizing the Registry's workflow. In applying the lesson, the Registry will consider further expanding its use of electronic means of transmission, by identifying categories of documents that are suitable for such mode of communication. Transmission by electronic means not only is faster, thus allowing States to receive documents more promptly, but also increases the recipient's ease of retrieval, access, tracing and follow-up on case-related documents transmitted by the Court.
- 7.20 Expected progress towards the objective is presented in the performance measure below (see table 7.2).

Table 7.2

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Member States and States entitled to appear before the Court receive case-related letters through electronic means, where appropriate	United Nations Secretariat receives documents and notifications through electronic means, where appropriate	Member States and States entitled to appear before the Court receive other case-related documents (written pleadings, hearing programmes and judges' folders for hearings) through electronic means, where appropriate

Legislative mandates

- 7.21 The International Court of Justice is the principal judicial organ of the United Nations. Its activities are governed by the Charter of the United Nations and by its Statute, which forms an integral part of the Charter. Pursuant to its Statute, the Court's role is to settle, in accordance with international law, legal disputes submitted to it by States and to give advisory opinions on legal questions referred to it by authorized United Nations organs and specialized agencies.

Deliverables

7.22 Table 7.3 lists all deliverables of the Registry.

Table 7.3

7.24 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 7.7 to 7.9 and figure 7.III.

7.25 As shown in tables 7.7 and 7.9, the overall resources proposed for 2025 amount to \$33,729,200 before recosting, reflecting a net increase of \$1,114,400 (or 3.4 per cent) compared with the approved budget for 2024. Resource changes result from technical adjustments, new and expanded mandates, and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Explanation of variances by factor and component

Overall resource changes

Technical adjustments

- 7.26 As shown in table 7.9, resource changes reflect a net decrease of \$515,700, as follows:
- (a) **Members of the Court.** The decrease of \$396,500 under non-staff compensation relates to the removal of non-recurrent provisions approved for 2024 that are no longer required in 2025, associated with the repatriation and installation costs for five judges whose terms of office ended in February 2024;
 - (b) **Registry.** The net decrease of \$44,000 results from the removal of non-recurrent provisions under other staff costs, for the provision of advisory proceedings in the case concerning *Legal Consequences arising from the Policies and Practices of Israel in the Occupied Palestinian Territory, including East Jerusalem*, pursuant to General Assembly resolution [77/247](#), and the advisory proceedings on the *Obligations of States in respect of Climate Change*, pursuant to Assembly resolution [77/276](#) (\$151,000). The decrease is partially offset by an increase of \$107,000 under posts relating to the higher provision, at continuing vacancy rates, for one Reviser (French) (P-4) post established in 2024, pursuant to Assembly resolution [78/252](#), which was subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts;
 - (c) **Programme support.** The decrease of \$75,200 under contractual services (\$40,600), general operating expenses (\$25,200) and supplies and materials (\$9,400) relates to the removal of non-recurrent provisions associated with the advisory proceedings on the *Obligations of States in respect of Climate Change*, pursuant to General Assembly resolution [77/276](#), which were approved for 2024 and are no longer required in 2025.

New and expanded mandates

- 7.27 As shown in table 7.9, resource changes under programme support reflect an increase of \$10,000 under contractual services to cover printing of documents for dissemination to all States Members of the United Nations for the advisory proceedings on the *Obligations of States in respect of Climate Change*, pursuant to General Assembly resolution [77/276](#).

Other changes

- 7.28 As reflected in table 7.9, resource changes reflect a net increase of \$1,620,100, as follows:
- (a) **Members of the Court.** The net increase of \$20,200, under non-staff compensation, reflects the net effect of an increase of \$153,000 relating to the greater number of former judges entitled to pensions and the greater number of children of judges entitled to an education grant, partly offset by a decrease of \$132,800 under travel of non-resident judges to Court sessions and of resident judges and their dependants to their home countries;
 - (b) **Registry.** The increase of \$1,519,500 relates to:
 - (i) *Posts.* An increase of \$524,800 for the proposed establishment of seven new posts: one Reviser (French) (P-4), two Legal Officers (P-3), one Legal Assistant (GS (OL)), one Associate Finance and Budget Officer (P-2), one Associate Procurement Officer (P-2) and one Information Management Assistant (GS (OL)) (see annex II);
 - (ii) *Other staff costs.* The net increase of \$994,700 relates to:
 - a. The proposed establishment of six general temporary assistance positions to support the Court in addressing the unprecedented level of increased judicial activity and to normalize the workload of existing staff. The six positions include: one Reviser (French) (P-4), one Translator (French) (P-3), one Language Reference Assistant

- (GS (OL)), one Legal Officer (P-3), one Associate Information Management Officer (P-2) and one Publishing Assistant (pre-press) (GS (OL)) (\$893,500);
- b. An increase in temporary assistance for meetings to address the upsurge in judicial activity and preparation of hearings, including contact with the media (\$50,000);
 - c. An increase in general temporary assistance (from 60 days to 180 days) to support the Registry with respect to the asbestos remediation project in the Peace Palace (\$61,300);
 - d. An increase in requirements to cover peak work periods related to the yearly physical verification of the Court's inventory (\$10,300);
 - e. A decrease of \$20,400, relating to the redeployment of requirements to cover the hiring of additional security personnel for high-profile hearings to general operating expenses under programme support;
- (c) **Programme support.** The net increase of \$80,400 relates to:
- (i) *Contractual services.* A net increase of \$18,200, reflecting an increase \$30,000 for the cost of printing the updated edition of the Court's Handbook in its English and French versions, that is partly offset by a decrease of \$11,800 under data processing services, to be achieved as a result of the use of new information technology services, such as SharePoint, and moving the Court's email to Exchange Online;
 - (ii) *General operating expenses.* A net decrease of \$12,000, reflecting a decrease of \$32,400 resulting from the reductions in the rental of audiovisual equipment for the Court's public sittings achieved by the recent replacement of the audiovisual equipment in the Great Hall of Justice, which is partly offset by an increase of \$20,400 attributed to the redeployment of resources from the Registry as explained in paragraph 7.28 (b) (ii) e. above;
 - (iii) *Supplies and materials.* A decrease of \$7,100 to be achieved through the greater use of electronic means of transmission for judicial proceedings;
 - (iv) *Furniture and equipment.* An increase of \$81,300 relating to the planned replacement of one of the Court's vehicles and the purchase of an e-bike.

Members of the Court

- 7.29 The International Court of Justice is composed of 15 judges ("members of the Court"), who are elected to nine-year terms of office by the General Assembly and the Security Council. Every three years, one third of the Court is elected, the sitting judges being eligible for re-election. The Court, as the principal judicial organ of the United Nations, is a universal body, within which the principal legal systems of the world and the main forms of civilization have to be represented in a balanced way (Article 9 of the Statute). It is as an institution composed in this broad-based way that the Court settles legal disputes submitted to it by States and gives advisory opinions on legal questions referred to it by authorized United Nations organs and specialized agencies. All the members of the Court are, in principle, required to participate in every case before it (Article 25 of the Statute). In accordance with Article 31 of the Court's Statute, a State party to a case may choose a judge ad hoc if the Court includes upon the Bench no judge of the nationality of the parties or a judge of the nationality of another party. Judges ad hoc take part in the decisions of the Court on terms of complete equality with the members of the Court.
- 7.30 The proposed regular budget resources for 2025 amount to \$8,520,100 and reflect a net decrease of \$376,300 compared with the approved budget for 2024. The proposed change is explained in paragraphs 7.26 (a) and 7.28 (a). Additional details on the distribution of the proposed resources for 2025 are reflected in table 7.10 and figure 7.IV.

(Thousands of United States dollars)

Registry

- 7.31 Given that the Court is both a judicial body and an international institution that is administratively independent from the Secretariat, its Registry must take on the dual role of an *auxiliaire de la justice* and an international secretariat. The Registry provides legal, diplomatic, linguistic and technical support to the Court. It is responsible for administrative, conference, archival, distribution and documentary and library services, including digitization and digitalization, and acts as the regular channel for communications to and from the Court.
- 7.32 Information on the timely submission of documentation and advance booking for air travel is reflected in table 7.11. The Court will continue its efforts to improve its travel compliance rate by reinforcing internal controls and procedures. In 2023, the Court continued to submit all its documents within the prescribed timelines.

Table 7.11

	2021 actual	2022 actual	2023 actual	2024 planned	2025 planned
Timely submission of documentation	100	100	100	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	86	61	73	100	100

7.33 The proposed regular budget resources for 2025 amount to \$20,646,500 and reflect a net increase of \$1,475,500 compared with the approved budget for 2024. The proposed change is explained in paragraphs 7.26 (b) and 7.28 (b). Additional details on the distribution of the proposed resources for 2025 are reflected in table 7.12 and figure 7.V.

Programme support

7.34 The provisions under programme support relate to the common service requirements of the Court and its Registry, including the contribution of the United Nations to the Carnegie Foundation for the use of the Peace Palace at The Hague.

7.35 The proposed regular budget resources for 2025 amount to \$4,562,600 and reflect a net increase of \$15,200 compared with the approved budget for 2024. The proposed change is explained in paragraphs 7.26 (c), 7.27 and 7.28 (c). Additional details on the distribution of the proposed resources are reflected in table 7.13 and figure 7.VI.

Annex I

Organizational structure and post distribution for 2025

Abbreviations: GS (OL), General Service (Other level); GS (PL), General Service (Principal level).

^a In accordance with Articles 21 and 32 of the Statute of the Court, the Registrar is appointed by the Court. The Registrar's salary is fixed by the General Assembly upon the proposal of the Court, and the post is budgeted at the Assistant Secretary-General level.

^b New posts.

^c One 25 per cent part-time general temporary assistance position (P-5).

^d One 25 per cent part-time general temporary assistance position (P-3).

Annex II

Summary of proposed post changes, by component

<i>Component</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reasons for change</i>
Registry	1	P-4	Establishment of 1 Reviser (French)	<p>The unprecedented level of judicial activity of the International Court of Justice, including the rise in the number of incidental proceedings and cases involving multiple participants (interventions, advisory proceedings), has led to an exponential growth in the workload of the Department of Linguistic Matters, with the number of words translated and revised each year rising from 7,457,363 words in 2015 to 9,351,000 in 2020, 10.5 million in 2022 and 12.2 million in 2023. In 2025, the Department needs to work on cases being heard and under deliberation and prepare for cases that will be ready for hearing in 2026, as well as any new proceedings brought before the Court.</p> <p>While the Department of Linguistic Matters has recently been strengthened (with the approval of one new Reviser (French) P-4 in 2024), the continued increase in the quantity and length of written pleadings submitted by States involved in proceedings before the Court calls for the establishment of a new Reviser, to deal with an accumulation of written pleadings awaiting revision and provide more training and support to the in-house and external translators.</p> <p>The establishment of the new post, together with computer-assisted translation tools, would enable the Court to increase its output, while maintaining the quality of that output.</p>
Registry	2	P-3	Establishment of 2 Legal Officers	<p>In recent years, the Court's caseload has remained exceptionally high. Of the 24 cases pending on the Court's docket on 30 April 2024, 19 have been brought in the last five years, and at least five cases will be ready for hearing in 2025.</p> <p>With a higher number of active cases, several of which are being dealt with simultaneously, the Department of Legal Matters requires additional capacity to continue to deliver the requisite support for the Court's judicial activities, including assisting the Court's drafting committees, preparing diplomatic correspondence and case-related distributions, reports on the Court's activities, research memorandums, procedural notes, speaking notes, minutes and speeches, attending meetings with representatives of the parties involved in cases before the Court and answering their various queries. The establishment of the new posts would enable the Department to meet the demands of its increased workload associated with the consistently high number of cases pending on the Court's docket.</p>
Registry	1	GS (OL)	Establishment of 1 Legal Assistant	<p>The significant rise in the number of documents generated by the Department of Legal Matters (from 1,483 in 2019 to 2,548 in 2023), including minutes of private meetings of the Court, case-related letters and distributions, memorandums and speeches, has increased the workload of the Department's sole Administrative Assistant, who is responsible for ensuring the technical processing of these documents in both languages of the Court (English and French) in a timely and accurate manner. The Legal Assistant would facilitate the handling of the increased volume of documents produced and also support the Legal Officers in addressing the high number of cases pending on the Court's docket and the increased workload of the Department.</p>
Registry	1	P-2	Establishment of 1 Associate Finance and Budget Officer	<p>The Finance Division, which currently consists of the Head of the Division (P-4), one Senior Accounting Assistant (GS (PL)) and one Finance and Budget Assistant (GS (OL)), is responsible for the financial services of the Court, which include two main areas of activities: finance activities (financial accounting, processing and approval of payments, closure of accounts ensuring compliance with the International Public Sector Accounting Standards, payroll revision and processing of judges' payments) and budget activities (yearly budget preparation, yearly budget administration, reporting (performance) and financial data analysis).</p>

Section 7 International Court of Justice

<i>Component</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reasons for change</i>
Registry	1	P-2	Establishment of 1 Associate Procurement Officer	<p>The Associate Finance and Budget Officer would support the Head of the Division in performing the above functions and would address the structural need to reinforce internal controls, accountability and reporting capabilities, oversee the day-to-day operations and strengthen the Court's financial risk management. Currently, the Head of the Division and the Finance and Budget Assistant assume the functions of approving officer. The Associate Finance and Budget Officer would strengthen internal controls by performing certification functions, such as the certification of travel requests, expenses and pre-commitments in Umoja.</p> <p>The Administrative and Personnel Division, which has one Procurement Assistant (GS (PL)) who carries out the procurement functions of the Court and reports to the Head of the Administrative and Personnel Division.</p> <p>The proposed establishment of the Associate Procurement Officer would help to ensure proper and effective planning and monitoring of and reporting on the Registry's procurement activities, as well as improve compliance, cost effectiveness and quality of purchases and ensure the timely initiation and completion of procurement processes.</p>
Registry	1	GS (OL)	Establishment of 1 Information Management Assistant	<p>As the Court's level of activity increases (judicial records maintained on 194 cases since 1945, of which 18 new cases were added in the last five years), the Archives, Indexing and Distribution Division lacks the internal capacity to deal with its multiple tasks and at the same time ensure effective management of inventory and publications stocks. There are currently five staff members (one P-3, one GS (PL) and three GS (OL)) in the Division who cover a wide range of tasks, including maintaining the Court's archives and records, managing all incoming and outgoing communications and distributing internal documents to judges and staff and receiving and distributing publications.</p> <p>The Information Management Assistant would develop and maintain an inventory database, support the Division's distribution activities and help the Court to manage its inventory and publications stock.</p>

Abbreviations: GS (OL), General Service (Other level); GS (PL), General Service (Principal level).

I. Office of Legal Affairs

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 8.1 The Office of Legal Affairs is responsible for providing a unified central legal service for the Organization; represents the Secretary-General in legal conferences and in judicial proceedings; performs substantive and secretariat functions for organs involved in public international law, including the General Assembly and its Sixth Committee (Legal Committee), the International Law Commission and the United Nations Commission on International Trade Law (UNCITRAL), as well as for the General Assembly plenary meetings concerning oceans and the law of the sea; and performs the depositary functions of the Secretary-General for multilateral treaties and the functions of registration and publication of treaties. The structure and main functions of the Office are described in Secretary-General's bulletin [ST/SGB/2021/1](#).
- 8.2 The mandate derives from Articles 13, 98, 102, 104, 105 and other relevant provisions of the Charter of the United Nations, as well as the priorities established in relevant General Assembly resolutions, including resolution [13 \(I\)](#) of 13 February 1946, as the central legal service for the Organization (including funds and programmes and treaty bodies institutionally linked to the Organization). The Office discharges mandates from the priorities established in relevant Assembly resolutions and decisions, including resolution [2205 \(XXI\)](#), by which the Assembly established UNCITRAL to further the progressive harmonization and unification of the law of international trade, with the Office's International Trade Law Division acting as its secretariat; resolution [49/28](#), by which the Assembly requested the Secretary-General to provide secretariat services to the Meeting of the States Parties to the United Nations Convention on the Law of the Sea that are discharged through the Office's Division for Ocean Affairs and the Law of the Sea; and resolution [68/70](#), on oceans and the law of the sea, by which the Assembly established the Office as the focal point for UN-Oceans. The Secretary-General has also appointed, pursuant to resolution [78/128](#), the Under-Secretary-General for Legal Affairs and United Nations Legal Counsel, as Special Adviser on oceans and legal matters to the Presidents of the 2025 United Nations Conference to Support the Implementation of Sustainable Development Goal 14. In addition, the Legal Counsel and the Office discharge the mandates derived from resolution [77/321](#).

Strategy and external factors for 2025

- 8.3 The Office will support international law as the foundation for Member States to interact and cooperate in achieving their common goals. The Office will respond to the needs of its stakeholders and beneficiaries with a specialized legal skill set, institutional memory, credibility and neutrality, while delivering on a diverse and complex mandate.
- 8.4 The Office will respond to the increasing demands for legal services from the Secretariat and other United Nations organs, including through the provision of advice on questions relating to the interpretation and application of international law instruments and on general questions of public international law, to ensure that legal considerations are an integral part of the Organization's operations and the effective functioning of its principal and subsidiary organs.
- 8.5 The Office will support Member States in the implementation of the 2030 Agenda for Sustainable Development and be a key partner in the United Nations system efforts to advance the decade of action and delivery for sustainable development. The Office will continue to provide input and to support processes relating to the Sustainable Development Goals in which it has a specific mandate, such as Goals 8, 14 and 16. It will engage with stakeholders within and outside the United Nations

system on ocean-related initiatives, to enhance the coordination and consistency with current processes and mandates. Similarly, it will support the processes and initiatives that are discussed with Member States relating to the implementation of international law.

- 8.6 The Office will contribute to international justice and accountability and continue its role in the Organization's action to improve the United Nations response to allegations of sexual exploitation and abuse and in efforts to hold accountable personnel who have engaged in such behaviour. Furthermore, the Office will contribute to the efforts to combat sexual exploitation and abuse, whether committed by United Nations personnel or by non-United Nations security forces operating under a United Nations mandate.
- 8.7 The Office will also support initiatives of the Secretary-General envisioned to increase the Organization's capacity to deliver. To advance the Data Strategy of the Secretary-General for Action by Everyone, Everywhere, the Office will continue to provide guidance on the legal aspects relating to the implementation of the policy on data protection and privacy policy for the United Nations Secretariat. The Office will also support the legal aspects relating to the implementation of the Secretary-General's strategic action plan on addressing racism and promoting dignity for all in the Secretariat.
- 8.8 With regard to the general legal services provided to United Nations organs and programmes, the Office will provide those services to maximize the protection of the legal interests of the Organization and minimize its legal liabilities. The Office will advise on the legal aspects arising from United Nations institutional and operational activities and provide legal services for resolving disputes of a private law character involving the operations of the Organization, its subsidiary bodies and organs, and its separately administered funds and programmes.
- 8.9 The Office will also support the progressive development and codification of international law and the conclusion of legal instruments resulting in the promotion of universal respect for international law, including by continuing to serve as the secretariats of the Sixth Committee, the International Law Commission, the Special Committee on the Charter of the United Nations and on the Strengthening of the Role of the Organization, other special or ad hoc committees and diplomatic conferences convened to consider and formulate legal instruments. The Office will disseminate materials on international law through the United Nations Audiovisual Library of International Law and major legal publications.
- 8.10 In support of the implementation and promotion of the Sustainable Development Goals, in particular Goal 14, the Office will engage in processes relating to oceans and the law of the sea and the increased participation of States in and the effective implementation and application of the United Nations Convention on the Law of the Sea and its implementing agreements, including by providing secretariat functions to oceans-related processes of the General Assembly and the Commission on the Limits of the Continental Shelf. The Office will also continue to deliver capacity-building activities on that topic, including for developing countries.
- 8.11 To further the progressive harmonization, modernization and unification of the law of international trade, the Office will ensure the widespread adoption and use of harmonized and modernized substantive private law rules to govern international commercial transactions, strengthen technical cooperation and promote the participation of developing countries in the law-making activities of UNCITRAL. The Office will support Member States in the preparation of universally acceptable legislative and non-legislative texts.
- 8.12 The Office will intensify the use of technological tools and other means to enhance the custody, registration and publication of treaties, including the registration of treaties and treaty actions in line with Article 102 of the Charter, and fulfil the depositary functions of the Secretary-General. The Office will continue to provide legal assistance and advice to States, specialized agencies, United Nations programmes and offices, treaty bodies and other entities on the law of treaties. The Office will also promote and ensure wider knowledge of the law of treaties, including through capacity-building activities and workshops, thereby preventing issues of interpretation and implementation of treaty provisions by contracting States.

- 8.13 With regard to cooperation with other entities at the global, regional national and local levels, the Office will continue to enable the International Law Commission to exchange knowledge, experience and ideas with the President of the International Court of Justice, the African Union Commission on International Law, the Inter-American Juridical Committee, the Asian-African Legal Consultative Organization and the Committee of Legal Advisers on Public International Law of the Council of Europe. The Office will also continue to cooperate with States and bodies established under the United Nations Convention on the Law of the Sea. In the fields of the law of the sea and ocean governance and of international trade law, the Office will continue to cooperate with international financial institutions, donor agencies, intergovernmental organizations, non-governmental organizations (NGOs) and natural and juridical persons.
- 8.14 With regard to inter-agency coordination and liaison, the Under-Secretary-General for Legal Affairs and United Nations Legal Counsel serves as the focal point for UN-Oceans, the inter-agency coordination mechanism on oceans and coastal issues within the United Nations system. In addition, the Office coordinates the work of organizations dealing with international trade law and encourages cooperation among them. The Office will exchange knowledge with the networks of legal advisers of United Nations agencies, funds and programmes.
- 8.15 With regard to the external factors, the overall plan for 2025 is based on the following planning assumptions:
- (a) Extrabudgetary resources are available to complement the programme budget, allowing the Office to respond to the increased demand for its services;
 - (b) Principal and subsidiary organs of the United Nations continue to request legal advice as a main component of the decision-making process;
 - (c) Specific mandates relating to international trade law, oceans and law of the sea and others are renewed or confirmed by the competent intergovernmental bodies.
- 8.16 The Office integrates a gender perspective into its operational activities, deliverables and results, as appropriate. The Office will continue to promote gender equality and the empowerment of women throughout all its subprogrammes, notably by continuing to use gender-inclusive language, in the context of the Office’s capacity-building programmes and other related aspects.
- 8.17 In line with the United Nations Disability Inclusion Strategy, the Office will integrate disability inclusion in its operational activities, deliverables and results, as appropriate.

Legislative mandates

- 8.18 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

Charter of the United Nations

Article 13	Article 104
Article 98	Article 105
Article 102	

General Assembly resolutions

13 (I)	Organization of the Secretariat	62/63; 78/102	Criminal accountability of United Nations officials and experts on mission
22 (I)	Privileges and immunities of the United Nations	62/70; 63/128; 70/118; 78/112	The rule of law at the national and international levels

Custody, registration and publication of treaties

General Assembly resolutions

23 (I)	Registration of treaties and international agreements	33/141	Registration and publication of treaties and international agreements pursuant to Article 102 of the Charter of the United Nations
24 (I)	Transfer of certain functions, activities and assets of the League of Nations	51/158	Electronic treaty database
97 (I)	Registration and publication of treaties and international agreements: regulations to give effect to Article 102 of the Charter of the United Nations	52/153; 54/28 73/210; 75/144; 76/120; 78/236	United Nations Decade of International Law Strengthening and promoting the international treaty framework
364 (IV); 482 (V)	Registration and publication of treaties and international agreements		

Deliverables

8.19 Table 8.1 lists all cross-cutting deliverables of the programme.

Table 8.1
Cross-cutting deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	6	31	10	10
1. Report and notes to the General Assembly	3	9	6	6
2. Report of the Committee on Relations with the Host Country	1	1	1	1
3. Letters to the Security Council	2	2	3	3
4. Documents for the intergovernmental conference on an international legally binding instrument under the United Nations Convention on the Law of the Sea on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction	–	19	–	–
Substantive services for meetings (number of three-hour meetings)	8	8	8	8
Meetings of the:				
5. Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
6. Committee for Programme and Coordination	1	2	1	1
7. Fifth Committee	1	1	1	1
8. Committee on Relations with the Host Country	5	4	5	5
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	4	3	5	6
9. Workshops on international law	4	3	5	6
C. Substantive deliverables				
Consultation, advice and advocacy: advice and legal opinions in the context of the participation of the Legal Counsel in the Senior Management Group, the Executive Committee and other ad hoc groups.				
D. Communication deliverables				
Outreach programmes, special events and information materials: speeches and presentations to Member State representatives, international organizations and academic and civil society organizations regarding the work of the Office and issues of public international law, the law of the sea and international trade law; annual treaty event during the opening plenary meeting of the General Assembly session; and events on international law, including those provided at the request of and in coordination with Member States.				
E. Enabling deliverables				
Internal justice and oversight: representation of the Secretary-General before the United Nations Appeals Tribunal and advice on administrative law of the Organization.				
Legal services: legal advice, opinions and services to all principal and subsidiary organs of the United Nations, as detailed in all the subprogrammes, on privileges and immunities, public international law, international humanitarian law, international human rights law and the amicable settlement of disputes; administrative law of the Organization; claims arising from operational activities of the Organization; procurement activities; the Organization’s accountability measures and the areas of oceans and law of the sea, treaty law and international trade law; and legal support for initiatives on data strategy and anti-racism.				

Evaluation activities

8.20 The following evaluations conducted by the Office and completed in 2023 have guided the proposed programme plan for 2025:

- (a) Evaluation of the International Trade Law Division’s Case Law on UNCITRAL Texts (CLOUT) system (2019–2023);
- (b) Evaluation of the Office of the Legal Counsel’s support for peacekeeping operations (2018–2023).

- 8.21 In response to the results of the evaluations referenced above, with respect to the evaluation of the CLOUT system, the Office is strengthening the integration of cross-cutting issues into the system, as well as developing new layouts that better suit an online format for the enhanced use of legal professionals. Furthermore, the evaluation reflected the importance of monitoring the development of artificial intelligence applications and of promoting the no-cost availability of legal resources, including online databases, to experts from all regions as an alternative to commercial databases. With respect to the evaluation of the Office of the Legal Counsel's support for peacekeeping operations, the evaluation confirmed that the Office consistently demonstrated high relevance by offering responsive and request-based legal advice and guidance integral to the operational efficacy of peacekeeping operations. In addition, a broader assessment on capacity-building activities has informed the proposal to continue the strategic management and coordination of all capacity-building activities, including special initiatives, through the Office of the Under-Secretary-General for Legal Affairs. This will further improve the leveraging of partnerships and the replication of good practices regarding legal technical assistance across the Office, better assisting relevant stakeholders and responding to requests by Member States, as demonstrated by the first workshop of international law for West Africa, in 2023, and the second workshop on international law for East Africa and the Indian Ocean, held in February 2024.
- 8.22 An evaluation to be conducted by the Office of a select area of work of the executive office, focusing on internal procedures, is planned for 2025.

Programme of work

Subprogramme 1

Provision of legal services to the United Nations system as a whole

Objective

- 8.23 The objective, to which this subprogramme contributes, is to ensure respect for and adherence to public international law, and the development of international justice and accountability.

Strategy

- 8.24 To contribute to the objective, the subprogramme will:
- (a) Provide legal advice on questions relating to the interpretation and application of the Charter, legal agreements and United Nations resolutions, rules and regulations, as well as on general questions of public international law, including international human rights law, international humanitarian law and international criminal law;
 - (b) Advise the United Nations and United Nations-assisted criminal tribunals and their oversight bodies, and other international accountability mechanisms, including on their founding arrangements, statutes, terms of reference and rules of procedure, and on the functions of the Secretary-General thereunder.
- 8.25 The above-mentioned work is expected to result in:
- (a) A uniform and consistent practice of the law and, subsequently, in the effective functioning of the principal and subsidiary organs of the United Nations in accordance with international law;
 - (b) The protection of the privileges and immunities of the United Nations;
 - (c) The effective functioning of the United Nations and entities entrusted with mandates in the areas of international law;
 - (d) The appointment and reappointment of the principals of the United Nations and United Nations-assisted international criminal tribunals and other international accountability mechanisms.

Programme performance in 2023

Publication of a dossier of documents on the International Court of Justice website in relation to an advisory opinion on the obligations of States in respect of climate change

- 8.26 On 29 March 2023, the General Assembly, in its resolution [77/276](#), requested the International Court of Justice to render an advisory opinion regarding the obligations of States in respect of climate change. The subprogramme prepared and submitted a dossier containing a collection of all documents that were likely to throw light on the questions raised by the Assembly in its request in order to assist the Court in its consideration of the request for an advisory opinion.
- 8.27 Progress towards the objective is presented in the performance measure below (see table 8.2).

Table 8.2
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	–	Publication of dossier of documents on the International Court of Justice website in relation to an advisory opinion on the obligations of States in respect of climate change

Planned results for 2025

Result 1: a data protection and privacy framework for the Secretariat

Programme performance in 2023 and target for 2025

- 8.28 The subprogramme’s work contributed to the completion of the legal work to adopt a Secretary-General’s bulletin on the data protection and privacy policy of the United Nations Secretariat, which did not meet the target of the promulgation of the Secretary-General’s bulletin. The target was not met owing to the postponement of the promulgation to 2024.
- 8.29 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 8.3).

Table 8.3
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
United Nations Secretariat entities provide inputs in accordance with international law principles towards completion of the draft Secretary-General’s bulletin on the data protection and privacy policy of the United Nations Secretariat	Revised Secretary-General’s bulletin on the data protection and privacy policy of the United Nations Secretariat adhering to principles of international law based on consultations prior to the bulletin’s promulgation	Legal work on the Secretary-General’s bulletin on the data protection and privacy policy of the United Nations Secretariat completed	United Nations Secretariat entities implement actions on data protection-related matters in line with the Secretary-General’s bulletin	United Nations Secretariat entities implement additional actions on data protection-related matters in line with the Secretary-General’s bulletin

Result 2: legal and procedural framework for United Nations conferences, including the fourth International Conference on Small Island Developing States

Programme performance in 2023 and target for 2025

- 8.30 The subprogramme’s work contributed to progress towards the finalization and signature of the host country agreement, which did not meet the planned target of signature of the host country agreement. The target was not met owing to ongoing consideration and negotiation of specific provisions in the host country agreement.
- 8.31 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 8.4).

Table 8.4
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Call by the General Assembly for the convening of the fourth International Conference on Small Island Developing States	Decision by the General Assembly to convene the fourth International Conference on Small Island Developing States	General Assembly adopted resolution 77/328 on further modalities of the fourth International Conference on Small Island Developing States Progress towards the finalization and signature of the host country agreement with necessary privileges and immunities and related requirements allowing for full participation by all participants in the Conference	Fourth International Conference on Small Island Developing States is held	Signature of the host country agreement for the 2025 United Nations Conference to Support the Implementation of Sustainable Development Goal 14 2025 United Nations Conference to Support the Implementation of Sustainable Development Goal 14 is held

Result 3: conclusion of an agreement concerning continuing residual functions of the Extraordinary Chambers in the Courts of Cambodia

Proposed programme plan for 2025

- 8.32 Under the Addendum on Transitional Arrangements and the Completion of Work of the Extraordinary Chambers, the United Nations and the Government of Cambodia shall review the progress of the residual functions and determine which functions should continue to be performed by the Extraordinary Chambers and for how long after 2025. The subprogramme is undertaking consultations with the Government in order to reach an agreement and undertake necessary action with respect to the legal framework.

Lessons learned and planned change

- 8.33 The lesson for the subprogramme from negotiations of the Addendum was that, while many issues could be negotiated utilizing virtual methods, for issues that required more complex and political consideration, there was value in holding in-person negotiations. In applying the lesson, the subprogramme will aim to ensure that there will be opportunities for in-person negotiations.

8.34 Expected progress towards the objective is presented in the performance measure below (see table 8.5).

Table 8.5
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Adoption of General Assembly resolution 75/257 B in which the Assembly approved the draft Addendum on Transitional Arrangements and the Completion of Work of the Extraordinary Chambers	Implementation of the Addendum and commencement of negotiations regarding supplementary arrangements	Continued implementation of the Addendum by the Government of Cambodia and the United Nations	Government of Cambodia, in consultation with the United Nations, agrees on the continuing residual functions required and the time period and framework for performance of those functions	Government of Cambodia, in partnership with the United Nations, undertakes action required to ensure that the legal framework reflects agreement concerning the continuing residual functions after 2025, the time period for those functions and the framework for the performance of those functions

Deliverables

8.35 Table 8.6 lists all deliverables of the subprogramme.

Table 8.6
Subprogramme 1: deliverables for the period 2023–2025, by category and subcategory

18. Annual meeting of the legal advisers and legal liaison officers of the United Nations offices, funds and programmes, specialized agencies and related and other organizations and field legal advisers and officers	7	8	8	8
C. Substantive deliverables				
Consultation, advice and advocacy: legal advice to and consultation with the General Assembly, the Security Council and the Main Committees of the Assembly on constitutional, institutional and procedural questions.				
D. Communication deliverables				
Outreach programmes, special events and information materials: speeches and presentations to Member State representatives, international organizations and academic and civil society organizations regarding the work of the Office of the Legal Counsel and issues of public international law; and events to promote public international law.				
E. Enabling deliverables				
Legal services: legal advice to and support for the Secretariat and the funds and programmes on privileges and immunities, in particular in support of host country agreements entered into by the United Nations, and public international law, including international humanitarian law, international human rights law and the pacific settlement of disputes; legal advice to and support for 1 United Nations criminal tribunal and its oversight body and other international accountability mechanisms; legal advice to and support for an estimated 12 peacekeeping and 36 special political missions; liaison with the International Court of Justice and fulfilment of the responsibilities of the Secretary-General under the Statute of the Court; legal advice to and support for 4 Secretariat offices and 4 other entities and bodies on disarmament, sanctions and security; and legal advice to 18 United Nations entities on the interpretation and implementation of the Relationship Agreement between the United Nations and the International Criminal Court.				

**Subprogramme 2
General legal services provided to United Nations organs and programmes**

Objective

- 8.36 The objective, to which this subprogramme contributes, is to maximize the protection of the legal interests of the Organization and to minimize its legal liabilities.

Strategy

- 8.37 To contribute to the objective, the subprogramme will:
- (a) Assist in ensuring external accountability of the United Nations and related personnel, including on internal sanctions and external enforcement action and liaison with national authorities;
 - (b) Advise on the legal aspects arising from United Nations institutional and operational activities, including the Organization's development, technical assistance, peacekeeping, humanitarian and other operations;

- (c) Assist the Organization, its organs or its separately administered funds and programmes by providing legal advice on procurement and substantial contracts and on operational and technical assistance activities of those entities;
- (d) Provide legal services for resolving disputes of a private law character involving the operations of the Organization, its organs or its funds and programmes, including representing the Organization in settlement negotiations and in arbitral proceedings;
- (e) Advise on management issues and matters in the system for the administration of justice, including determining whether to appeal against a judgment of the United Nations Dispute Tribunal, and represent the Secretary-General before the United Nations Appeals Tribunal;
- (f) Respond to requests by the Organization for urgent legal advice arising from humanitarian and emergency situations.

8.38 The above-mentioned work is expected to result in:

- (a) The full maintenance of the status, legal rights and privileges and immunities of the Organization arising from United Nations operational activities;
- (b) The reduction of actual legal liabilities of the Organization.

Programme performance in 2023

Access to numerous instances of legal advice to support the activities of the seventy-eighth session of the General Assembly and high-level week

8.39 In 2023, the subprogramme provided significant legal assistance to support many activities in the lead up to the seventy-eighth session of the General Assembly and the high-level week, both to protect the Organization’s legal interests and to minimize the legal risks and liability relating to those activities.

8.40 Progress towards the objective is presented in the performance measure below (see table 8.7).

Table 8.7
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
–	–	Access to numerous instances of legal advice to support many activities in the lead-up to the seventy-eighth session of the General Assembly and high-level week

Planned results for 2025

Result 1: strengthened capacity for the United Nations to stay and deliver through COVID-19 vaccinations

Programme performance in 2023 and target for 2025

8.41 The subprogramme’s work contributed to timely access by the Department of Operational Support to legal support, including arrangements for the acquisition and administration of coronavirus disease (COVID-19) vaccines to eligible personnel, which met the planned target for 2023.

8.42 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 8.8).

Table 8.8
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Access by the Department of Operational Support to timely legal support for the implementation of the United Nations system-wide COVID-19 vaccination programme and related arrangements	Access by the Department of Operational Support to timely legal support for the implementation of the United Nations system-wide COVID-19 vaccination programme	Department of Operational Support received timely legal support for the implementation of the United Nations system-wide COVID-19 vaccination programme and related arrangements, including the administration of booster shots	Access by the Department of Operational Support to timely legal support with respect to any residual issues of a legal nature following the discontinuation of the implementation of the United Nations system-wide COVID-19 vaccination programme and related arrangements	Access by the Department of Operational Support to timely legal support with respect to any residual issues of a legal nature following the discontinuation of the implementation of the United Nations system-wide COVID-19 vaccination programme and related arrangements

Result 2: a model contract for global freight-forwarding

Programme performance in 2023 and target for 2025

8.43 The subprogramme’s work contributed to a preliminary draft model freight-forwarding contract being made available for comments, which met the planned target for 2023.

8.44 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 8.9).

Table 8.9
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	Receipt by Department of Operational Support of ad hoc legal support on freight-forwarding contracts	Preliminary draft model freight-forwarding contract made available for comments	Revised draft model freight-forwarding contract made available, taking into account comments received	Final model freight-forwarding contract made available

Result 3: access by client offices to legal advice facilitated by the updated matter management system

Proposed programme plan for 2025

8.45 The subprogramme handles a large number of requests for legal advice. The subprogramme’s matter management system is the central means by which the subprogramme’s legal officers and support staff organize and work collaboratively on the subprogramme’s work. This work entails the provision of accurate, consistent and timely legal advice in order to maximize the protection of the legal

interests of the Organization and to minimize its legal liabilities. The current matter management system that is in use by the subprogramme will be phased out in 2024.

Lessons learned and planned change

- 8.46 The lesson for the subprogramme was the need for an updated matter management system that made more easily accessible previous legal advice provided to facilitate the provision of accurate, consistent and timely legal advice and to maximize the protection of the legal interests of the Organization and minimize its legal liabilities. In applying the lesson, the subprogramme will work on the design and deployment of an updated matter management system that is intended to achieve that purpose.
- 8.47 Expected progress towards the objective is presented in the performance measure below (see table 8.10).

**Table 8.10
Performance measure**

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
–	–	–	Matter management system developed with basic features	Access by client offices to legal advice facilitated by the updated matter management system

Deliverables

- 8.48 Table 8.11 lists all deliverables of the subprogramme.

**Table 8.11
Subprogramme 2: deliverables for 2025, by category and subcategory**

Category and subcategory

E. Enabling deliverables

Internal justice and oversight: legal advice and services to all United Nations offices and departments, all principal and subsidiary organs of the United Nations, all peacekeeping and special political missions, all regional commissions, all funds and programmes, and the resident coordinator system, on administrative law, on criminal accountability for United Nations personnel, on procurement activities and drafting and negotiating contracts and other commercial matters, on commercial claims and representation before arbitral tribunals, on operational and technical assistance activities of the United Nations, including in the economic, social and humanitarian fields, on partnerships with the private sector, on the legislative and operational arrangements governing the staffing, supply and provision of peace operations, and representing the Secretary-General before the United Nations Appeals Tribunal.

**Subprogramme 3
Progressive development and codification of international law**

Objective

- 8.49 The objective, to which this subprogramme contributes, is to progressively develop, codify and advance knowledge of international law.

Strategy

8.50 To contribute to the objective, the subprogramme will:

- (a) Provide substantive support to the Sixth Committee, the International Law Commission, the Special Committee on the Charter of the United Nations and on the Strengthening of the Role of the Organization, other special or ad hoc committees and diplomatic conferences in their consideration and formulation of legal instruments by assisting in the conduct of proceedings, rendering legal advice, preparing draft texts of legal instruments, resolutions and decisions and preparing background documents, analytical studies and reports;
- (b) Provide legal bodies of the General Assembly with assistance when considering the use by States of the procedures envisaged under the relevant resolutions of the Assembly;
- (c) Implement the mandates of the United Nations Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law. This includes the planning, organization and conduct of four in-person training programmes, namely, the International Law Fellowship Programme and the United Nations Regional Courses in International Law for Africa, for Latin America and the Caribbean and for Asia-Pacific;
- (d) Further develop, disseminate and maintain the United Nations Audiovisual Library of International Law and prepare and disseminate major legal publications and information on the legal work of the United Nations;
- (e) Support Member States by assisting the bureaux of the bodies that the subprogramme services in devising and implementing working methods and work programmes that ensure business continuity.

8.51 The above-mentioned work is expected to result in:

- (a) The smooth deliberations of legislative and legal bodies, the conclusion of draft legal instruments and the promotion of universal respect for international law;
- (b) The wider awareness and appreciation of international law by a wider audience.

Programme performance in 2023

A new structured format of deliberations in the working group of the Sixth Committee of the General Assembly on the protection of persons in the event of disasters

8.52 Working groups convened by the Sixth Committee have traditionally followed an unstructured format, with mixed results. The subprogramme proposed to the working group on the protection of persons in the event of disasters a new structured format for its debate, organized on the basis of five thematic clusters of draft articles. With the agreement of the working group, the subprogramme implemented the new format, which resulted in a rich and substantive exchange of views among delegations, thus contributing to the successful conclusion of the work of the working group at the seventy-eighth session of the General Assembly.

8.53 Progress towards the objective is presented in the performance measure below (see table 8.12).

Table 8.12

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
–	–	Working group on the protection of persons in the event of disasters held its debate on the basis of a new structure organized on thematic clusters

Planned results for 2025

Result 1: advancement of the International Law Commission's consideration of the improvement of its working methods

Programme performance in 2023 and target for 2025

- 8.54 The subprogramme's work contributed to the decision to include the recommendation of the International Law Commission Working Group on Working Methods that an internal practice guide, handbook or manual on the working methods and procedures of the Commission be prepared, which met the planned target.
- 8.55 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 8.13).

Table 8.13

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Consideration of working methods in the International Law Commission Working Group on Working Methods	Consideration of working methods in the International Law Commission Working Group on Working Methods	Decision to include recommendations of the International Law Commission Working Group on Working Methods in the form of an internal practice guide, handbook or manual	Adoption of the report of the International Law Commission Working Group on Working Methods (covering 2017–2022)	Consideration by the International Law Commission Working Group on Working Methods of the practice guide, handbook or manual

Result 2: advancement of the consideration by the International Law Commission of the subsidiary means for the determination of rules of international law

Programme performance in 2023 and target for 2025

- 8.56 The subprogramme's work contributed to the consideration by the International Law Commission of the topic of subsidiary means for the determination of rules of international law through the preparation of a first Secretariat research memorandum, which met the planned target.
- 8.57 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 8.14).

Table 8.14

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Inclusion by the International Law Commission of the topic of subsidiary means for the determination of rules of international law in its long-term programme of work	Inclusion by the International Law Commission of the topic of subsidiary means for the determination of rules of international law in its regular programme of work and request by the	Consideration by the International Law Commission of the first part of the research memorandum on the topic	Consideration by the International Law Commission of the second part of the research memorandum on the topic	Advancement in the consideration by the International Law Commission of the first reading of the draft conclusions on subsidiary means for the determination of rules of international law

Commission that the subprogramme prepare an in-depth study of the topic				

Result 3: applications from more States for the training programmes in international law under the programme of assistance

Proposed programme plan for 2025

8.58 Pursuant to the mandate of the Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law, four in-person training programmes are conducted annually on diverse topics of international law for developing countries and countries with emerging economies. However, participation remains uneven, with some countries having had fewer than five participants between 2016 and 2020. The subprogramme has increased its outreach activities, including through social media and United Nations information centres, to encourage applications of eligible candidates from countries with few participants between 2016 and 2020.

Lessons learned and planned change

8.59 The lesson for the subprogramme was that there was an opportunity for further enhancement of the dissemination of information about the training programmes among eligible government officials and young academics in order to increase the number of applicants from a given State and thereby bridge the gap between States with high and low representation rates. In applying the lesson, the subprogramme will focus its dissemination and awareness-raising efforts, including through social media, in States that had few participants between 2016 and 2020, encouraging, in particular, applications from qualified female candidates.

8.60 Expected progress towards the objective is presented in the performance measure below (see figure 8.I).

Figure 8.I
Performance measure: applicants^a from States that had few participants between 2016 and 2020 in the training programmes conducted under the Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law

(Percentage)

^a For the purposes of this table, applicants are those from eligible States that had fewer than five and no participants, attending the training programmes conducted under the Programme of Assistance between 2016 and 2020.

^b No in-person training programmes were held in 2021 owing to the COVID-19 pandemic.

Deliverables

8.61 Table 8.15 lists all deliverables of the subprogramme.

Table 8.15

Subprogramme 3: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	12	12	15	12

Technical materials (number of materials)	25	25	25	25
17. Entries in the United Nations Audiovisual Library of International Law, including lectures	25	25	25	25
C. Substantive deliverables				
Consultation, advice and advocacy: advice to intergovernmental and expert bodies, including the Sixth Committee and the International Law Commission; and provision of technical expertise to the Special Rapporteurs of the International Law Commission, including in relation to reports to the Commission.				
D. Communication deliverables				
Outreach programmes, special events and information materials: lectures and briefings, upon request, on public international law.				
Digital platforms and multimedia content: Sixth Committee, International Law Commission and Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law websites; and online United Nations Audiovisual Library of International Law, which provides high-quality legal content to an unlimited number of individuals and institutions around the world at no charge.				

Subprogramme 4 Law of the sea and ocean affairs

Objective

- 8.62 The objective, to which this subprogramme contributes, is to strengthen the law of the sea for the peaceful use of the oceans and for their conservation and sustainable use, and as the basis for national, regional and global action and cooperation in the marine sector.

Strategy

- 8.63 To contribute to the objective, the subprogramme will:
- (a) Provide expert advice to States and international organizations on the law of the sea and ocean affairs, in particular with respect to the United Nations Convention on the Law of the Sea of 1982, the Agreement for the Implementation of the Provisions of the United Nations Convention on the Law of the Sea of 10 December 1982 relating to the Conservation and Management of Straddling Fish Stocks and Highly Migratory Fish Stocks of 1995, the Agreement under the United Nations Convention on the Law of the Sea on the Conservation and Sustainable Use of Marine Biological Diversity of Areas beyond National Jurisdiction, and the work of the General Assembly on oceans and the law of the sea and sustainable fisheries;
 - (b) Support the implementation of the Convention and the United Nations Fish Stocks Agreement in respect of sustainable fisheries-related cooperative activities among States and other entities;
 - (c) Provide secretariat services to intergovernmental bodies and the Commission on the Limits of the Continental Shelf;
 - (d) Undertake capacity-building activities (fellowships, training courses and workshops) relating to oceans and the law of the sea in collaboration with relevant stakeholders, including to promote a better understanding of the Agreement under the United Nations Convention on the Law of the Sea on the Conservation and Sustainable Use of Marine Biological Diversity of Areas beyond National Jurisdiction.
- 8.64 The above-mentioned work is expected to result in:
- (a) An increased number of States parties to the Convention and its implementing agreements and their effective implementation by States;
 - (b) Enhanced cooperation and coordination among stakeholders on ocean and coastal issues, leading to enhanced conservation and sustainable use of the oceans and their resources;
 - (c) A better understanding of the legal regime for the oceans and the enhanced human resource capacity of Member States, in particular developing countries, to implement that regime effectively.

Programme performance in 2023

Adoption and opening for signature of the Agreement under the United Nations Convention on the Law of the Sea on the Conservation and Sustainable Use of Marine Biological Diversity of Areas Beyond National Jurisdiction

- 8.65 The subprogramme, by providing substantive and administrative support to the process that led to the adoption, on 19 June 2023, by the intergovernmental conference convened by the General Assembly pursuant to its resolution [72/249](#) of the Agreement under the United Nations Convention on the Law of the Sea on the Conservation and Sustainable Use of Marine Biological Diversity of Areas Beyond National Jurisdiction, will contribute to achieving the ocean-related goals and targets

of the 2030 Agenda. The year 2023 was the culmination of the subprogramme’s support for 20-year-long intergovernmental negotiations in different formats, including providing support, in 2023, to 118 meetings of the intergovernmental conference and its subsidiary bodies. In its resolution [77/321](#), the Assembly, welcoming the adoption of the Agreement, approved the assumption by the Secretary-General of the functions assigned to him thereunder, including the performance, through the subprogramme, of the secretariat functions ad interim under the Agreement.

8.66 Progress towards the objective is presented in the performance measure below (see table 8.16).

Table 8.16
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	–	The Agreement under the United Nations Convention on the Law of the Sea on the Conservation and Sustainable Use of Marine Biological Diversity of Areas Beyond National Jurisdiction is adopted and opened for signature on 20 September 2023, and it received, by the end of 2023, 84 signatories, including the European Union (see A/CONF.232/2023/4 and A/CONF.232/2023/5)

Planned results for 2025

Result 1: enhanced coordination and cooperation on ocean issues, in particular through UN-Oceans

Programme performance in 2023 and target for 2025

- 8.67 The subprogramme’s work contributed to increased awareness of Member States about the interlinkages between the ocean and other ecosystems for sustainable development, which met the planned target.
- 8.68 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 8.17).

Table 8.17

Result 2: strengthened role of the Commission on the Limits of the Continental Shelf and its subcommissions in accordance with the United Nations Convention on the Law of the Sea

Programme performance in 2023 and target for 2025

- 8.69 The subprogramme’s work contributed to enabling the Commission on the Limits of the Continental Shelf to continue to fulfil its role to the satisfaction the General Assembly as expressed in its resolution [78/69](#), which met the planned target for 2023.
- 8.70 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 8.18).

Table 8.18
Performance measure

Result 3: enhanced commitment of Member States to the conservation and sustainable use of oceans and their resources through the implementation of international law

Proposed programme plan for 2025

- 8.71 The subprogramme is supporting the preparations and providing substantive servicing for the 2025 Oceans Conference, to be held in 2025. The preparation of substantive documents and the organization of ocean action dialogues contribute to the identification by the Conference of synergies in the implementation of international law, including with regard to the science-policy interface, by increasing awareness among Member States and enhancing cross-sectoral capacity-building, in particular by creating multi-stakeholder partnerships.

Lessons learned and planned change

- 8.72 The lesson for the subprogramme was to fully utilize opportunities for enhanced coordination through the United Nations system to effectively support the Oceans Conference. In applying the lesson, the subprogramme will work through UN-Oceans to strengthen and promote coordination and coherence of United Nations system activities relating to ocean and coastal areas to ensure synergies and seamless interaction in the preparations for and delivery of the Conference outcomes.
- 8.73 Expected progress towards the objective is presented in the performance measure below (see table 8.19).

**Table 8.19
Performance measure**

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>

C. Substantive deliverables

Consultation, advice and advocacy: information, advice and assistance to States, organizations of the United Nations system, other intergovernmental organizations and relevant expert bodies in the field of the law of the sea and ocean affairs, in particular in the context of the work of the General Assembly and its subsidiary bodies; advice to the Meeting of States Parties to the United Nations Convention on the Law of the Sea and the Commission on the Limits of the Continental Shelf; advice for the implementation by Member States of the oceans-related Sustainable Development Goals; promotion of a better understanding of the Agreement under the United Nations Convention on the Law of the Sea on the Conservation and Sustainable Use of Marine Biological Diversity of Areas beyond National Jurisdiction and support for its future implementation, in particular through UN-Oceans; substantive advice on the preparations for the 2025 Oceans Conference and on the implementation of the United Nations Decade of Ocean Science for Sustainable Development; advice and support to the United Nations Open-ended Informal Consultative Process on Oceans and the Law of the Sea; advice to the United Nations Framework Convention on Climate Change on oceans and climate; and advisory services to relevant inter-agency groups, such as the Inter-agency Consultative Group on Small Island Developing States and the Inter-agency Consultative Group for Landlocked Developing Countries.

Databases and substantive digital materials: Geographical Information System for the deposit of charts and geographical coordinates; and legal web-based information in relation to maritime zones.

D. Communication deliverables

Outreach programmes, special events and information materials: publicly accessible materials, briefings and events to promote a better understanding of the United Nations Convention on the Law of the Sea, the United Nations Fish Stocks Agreement, the Agreement under the United Nations Convention on the Law of the Sea on the Conservation and Sustainable Use of Marine Biological Diversity of Areas beyond National Jurisdiction, and the work of the General Assembly on oceans and the law of the sea and sustainable fisheries; events for World Oceans Day; and UN-Oceans side events.

Digital platforms and multimedia content: content on the law of the sea and ocean affairs on web portals, publications, websites and social media.

Library services: specialized reference collection and bibliographic database on the law of the sea and ocean affairs.

E. Enabling deliverables

Information and communications technology: specialized repository of geospatial data and information on outer limits of maritime zones and maritime boundaries.

Subprogramme 5 Progressive harmonization, modernization and unification of the law of international trade

Objective

- 8.75 The objective, to which this subprogramme contributes, is to further the progressive harmonization and unification of the law of international trade.

Strategy

- 8.76 To contribute to the objective, the subprogramme will:
- (a) Serve as the secretariat for UNCITRAL, provide Member States with working papers, draft reports and draft substantive private law rules on international trade, and give advice on and assistance in intergovernmental negotiations and coordinate those activities with equivalent activities of other international organizations in accordance with the UNCITRAL mandate and propose that UNCITRAL recommend the use or adoption of relevant instruments from other organizations;
 - (b) Provide technical assistance and capacity-building to Governments, including diagnostic assessments, implementation guidance and interpretative materials, as well as training activities and advice on the enactment of UNCITRAL texts in national law;
 - (c) Conduct research and facilitate the exchange of experience among Member States on reinforcing the resilience of international trade and global supply chains, with a particular focus on micro-, small and medium-sized enterprises and explore possible future legislative development to meet the challenges identified for consideration by the Member States.
- 8.77 The above-mentioned work is expected to result in:
- (a) Well-informed, transparent and inclusive deliberations of delegations in working groups and the Commission;
 - (b) Governments agreeing on substantive private law rules governing international trade and their reflection in universally acceptable instruments;
 - (c) The availability of additional UNCITRAL instruments to harmonize and unify international trade law and to encourage resilience in international trade;
 - (d) Increased government use and adoption of UNCITRAL instruments in national law and increased legal decisions on those instruments;
 - (e) Increased treaty actions, enactments and legal decisions based on UNCITRAL texts.

Programme performance in 2023

Enhanced stakeholders' knowledge of recent UNCITRAL texts and ongoing work on investor-State dispute settlement reform

- 8.78 The UNCITRAL special session on alternative dispute resolution is an annual knowledge-sharing forum and capacity-building flagship event of the subprogramme, bringing together national officials, legal experts and other stakeholders from across the Asia-Pacific region in an interactive, informal setting to discuss developments and exchange perspectives on alternative dispute resolution, including international commercial arbitration and mediation, and the adoption, implementation or uniform interpretation of related UNCITRAL instruments. The 2023 special session focused on investor-State dispute settlement reform, specifically the texts adopted in 2023 on investment mediation and the codes of conduct for arbitrators and for judges in international investment dispute resolution. In order to broaden the discussion on those topics and facilitate additional opportunities for stakeholders to strengthen their capacity, the subprogramme opened virtual participation to the public with travel support for officials from some Asia-Pacific developing States.
- 8.79 Progress towards the objective is presented in the performance measure below (see table 8.21).

Table 8.21
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
17 jurisdictions with 105 participants attended the special session on alternative dispute resolution, including 27 participants from landlocked developing countries and 14 from small island developing States	18 jurisdictions with 57 participants attended the special session on alternative dispute resolution, including two participants from landlocked developing countries and three from small island developing States	73 jurisdictions with 339 participants, an increase of more than 300 per cent, attended the special session on alternative dispute resolution, including five participants from landlocked developing countries and 71 from small island developing States

Planned results for 2025

Result 1: a negotiable cargo document for harmonized international trade

Programme performance in 2023 and target for 2025

- 8.80 The subprogramme’s work contributed to UNCITRAL Working Group VI commencing deliberations on a draft legislative instrument on negotiable cargo documents and to the development of consensus on the scope and proposed content of such an instrument through the preparation of preliminary draft provisions for the consideration of the Working Group, which met the planned target.
- 8.81 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 8.22).

Table 8.22
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
UNCITRAL member States have access to an appraisal of relevant legislation and to expert recommendations, which enables them to develop a draft new instrument on negotiable multimodal transport documents	UNCITRAL working group mandated by UNCITRAL member States to develop a draft instrument on negotiable multimodal transport documents, and commencement of deliberations of UNCITRAL Working Group VI on relevant legal and policy issues related to the new draft instrument	UNCITRAL Working Group VI commenced deliberations on a draft instrument on negotiable cargo documents, and States developed consensus through that Working Group on the scope and proposed content of such an instrument	Consensus reached by Working Group VI on the main features of a draft legislative instrument on negotiable cargo documents	Consensus reached by Working Group VI on additional features of a draft legislative instrument on negotiable cargo documents, including key provisions on electronic aspects

Result 2: reforms to investor-State dispute settlement through development of multiple solutions

Programme performance in 2023 and target for 2025

- 8.82 The subprogramme’s work contributed to the finalization of the codes of conduct for arbitrators and judges, and treaty provisions and guidelines on investment mediation, which were adopted by UNCITRAL, and consensus by Working Group III on additional reform elements, which met the planned target.
- 8.83 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 8.23).

Table 8.23
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Development by Working Group III of a workplan to deliver and adopt all reform elements by 2026	Consensus reached by Working Group III on a code of conduct for adjudicators and on treaty provisions and guidelines on investment mediation	Codes of conduct for arbitrators and judges and treaty provisions and guidelines on investment mediation adopted by UNCITRAL	Consensus reached by Working Group III on mechanisms for dispute prevention and an advisory centre, and further development of other reform elements	Consensus reached by Working Group III on the reform of a wide range of procedural and cross-cutting issues, and continued development of institutional reforms, including a standing mechanism to resolve investment disputes

Result 3: greater legal certainty for commercial data transactions

Proposed programme plan for 2025

- 8.84 Further to the exploratory work carried out since 2018, the subprogramme has been assisting Working Group IV in developing new model legislative provisions on the use of automation and artificial intelligence in contracting. In parallel, the subprogramme continues to support the ongoing Working Group deliberations on developing a uniform legislative text and accompanying guide on commercial data contracts.

Lessons learned and planned change

- 8.85 The lesson learned for the subprogramme was the need to ensure coordination in other international settings regarding cross-border data flows, such as the World Trade Organization, and similar regional digital trade initiatives. In applying the lesson, the subprogramme will focus efforts on liaising with other international institutions and on developing clear messaging for States regarding the synergies between the different workstreams.
- 8.86 Expected progress towards the objective is presented in the performance measure below (see table 8.24).

Table 8.24
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
UNCITRAL member States had access to a draft “taxonomy” of legal issues related to data transactions	UNCITRAL member States mandated Working Group IV to commence work on data provision contracts, while requesting other types of data transactions to be monitored	Working Group IV had access to draft default rules on data provision contracts and made progress on deliberations for the future direction of the project	Consensus reached by UNCITRAL member States on the scope and content of default rules	Consensus reached by UNCITRAL member States on default rules for data provision contracts and assessment of possible future work on other data transactions

Deliverables

8.87 Table 8.25 lists all deliverables of the subprogramme.

Table 8.25
Subprogramme 5: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	208	207	208	208
1. Reports of UNCITRAL to the General Assembly	1	1	1	1
2. Reports of UNCITRAL to the Commission	13	13	13	13
3. Notes by the secretariat to the Commission and its subsidiary bodies	87	65	87	87
4. Conference room papers of the Commission and its subsidiary bodies	92	114	92	92
5. Information papers for the Commission and its subsidiary bodies	15	14	15	15
Substantive services for meetings (number of three-hour meetings)	160	153	160	160
6. Meetings of the Commission	30	27	30	30
7. Meetings of UNCITRAL subsidiary bodies	130	126	130	130
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	12	20	12	12
8. On international trade law (regional)	9	9	9	9
9. On international trade law (country-based)	3	11	3	3
Seminars, workshops and training events (number of days)	88	109	75	88
10. Training events on international trade law at the international, regional and country levels	88	109	75	88
Publications (number of publications)	7	1	6	4
11. Legal texts (international conventions, UNCITRAL model laws, legislative guides and other legal texts)	5	1	5	3
12. UNCITRAL publications (<i>Yearbook of the United Nations Commission on International Trade Law</i> , guides to UNCITRAL, digests of case law)	2	–	1	1

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
Technical materials (number of materials)	84	78	84	84
13. Promotional and technical assistance materials	3	1	3	3
14. Case Law on UNCITRAL Texts (CLOUT) abstracts	81	77	81	81

C. Substantive deliverables

Consultation, advice and advocacy: advice to all Member States, upon request, on the adoption and application of international trade law texts prepared by UNCITRAL.

Databases and substantive digital materials: CLOUT (an online public database with over 2,000 records on case law on UNCITRAL texts, accessed by over 50,000 practitioners, judges, arbitrators, academics and other interested users); Transparency Registry (an online public repository with 26 records for the publication of information and documents in treaty-based investor-State arbitration); and online materials, including six online training courses for prospective UNCITRAL delegates, government officials, researchers and practitioners with a general interest in UNCITRAL and presentations on UNCITRAL texts.

D. Communication deliverables

Outreach programmes, special events and information materials: brochures, flyers and information kits on UNCITRAL; five lectures to groups of legal and other practitioners, academics and law students; one colloquium on international trade law; three international commercial law moot court competitions; and one commemoration event.

External and media relations: press releases and social media posts related to UNCITRAL meetings, accession by States to UNCITRAL texts and issuance of publications.

Digital platforms and multimedia content: UNCITRAL website.

Library services: UNCITRAL Law Library.

Subprogramme 6 Custody, registration and publication of treaties

Objective

- 8.88 The objective, to which this subprogramme contributes, is to ensure the transparency of the international treaty framework, wider knowledge of the law of treaties and broader participation in multilateral treaties concluded under the auspices of the United Nations and deposited with the Secretary-General.

Strategy

- 8.89 To contribute to the objective, the subprogramme will:
- (a) Undertake the registration and publication of treaties and treaty actions submitted under Article 102 of the Charter of the United Nations and provide timely and accurate information relating to deposited treaties, registered treaties and related actions through the electronic dissemination of treaty-related information on the online United Nations Treaty Collection and the publication of the *United Nations Treaty Series*;
 - (b) Provide legal assistance and advice to States, specialized agencies, United Nations programmes and offices, treaty bodies and other entities on the law of treaties, including final clauses of treaties, the depositary practice of the Secretary-General and the registration and publication of treaties. Such assistance would be provided in particular during the negotiation of multilateral treaties and through the holding of capacity-building seminars at Headquarters and at the national and regional levels, as well as through the elaboration of topical reference publications;

- (c) Fulfil the depositary functions of the Secretary-General in respect of more than 600 multilateral treaties and hold and conduct treaty events, including during the high-level week of the annual session of the General Assembly.
- 8.90 The above-mentioned work is expected to result in:
- (a) Improved access to treaties deposited with the Secretary-General and related treaty actions, including information on their status, and to treaties and related treaty actions submitted for registration and publication with the Secretariat;
 - (b) The prevention of issues of interpretation and implementation of final clauses of multilateral treaties by contracting States and enhanced familiarity and understanding by States of the technical and legal aspects of participating in the multilateral treaty framework and registering treaties;
 - (c) The entry into force of multilateral treaties deposited with the Secretary-General and the universal participation of States in such treaties.

Programme performance in 2023

Opening for signature of the Agreement under the United Nations Convention on the Law of the Sea on the Conservation and Sustainable Use of Marine Biological Diversity of Areas beyond National Jurisdiction

- 8.91 The annual treaty event organized on the sidelines of the general debate of the seventy-eighth session of the General Assembly supported the signing of the Agreement under the United Nations Convention on the Law of the Sea on the Conservation and Sustainable Use of Marine Biological Diversity of Areas beyond National Jurisdiction of 19 June 2023. On this occasion, 80 States from all regional groups and one regional economic integration organization signed the Agreement.
- 8.92 Following the adoption of the Agreement, the subprogramme prepared the original text of the Agreement and issued and circulated certified true copies for domestic ratification processes. It also provided procedural information on the opening for signature of the Agreement and reviewed instruments of full powers. Furthermore, the subprogramme made all logistical arrangements, including with respect to protocol and press coverage, to schedule 81 signature ceremonies with representatives of States. The Secretary-General’s depositary notifications and official pictures of ceremonies were circulated daily.
- 8.93 Progress towards the objective is presented in the performance measure below (see table 8.26).

Table 8.26
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
–	–	80 States from all regional groups and one regional economic integration organization signed the Agreement under the United Nations Convention on the Law of the Sea on the Conservation and Sustainable Use of Marine Biological Diversity of Areas beyond National Jurisdiction during the 2023 treaty event

Planned results for 2025

Result 1: improved access to procedural information on treaty law and practice

Programme performance in 2023 and target for 2025

- 8.94 The subprogramme's work contributed to increased knowledge of Member States representatives on treaty law and practice through two seminars at United Nations Headquarters, which did not meet the planned target of holding two seminars at United Nations Headquarters and additional seminars at the national and regional levels. The target was not met owing to insufficiency of voluntary funds.
- 8.95 No seminar could be held at the national or regional levels owing to insufficiency of voluntary funds, despite significant fundraising efforts. The subprogramme invited Member States to make voluntary contributions towards the financing of such seminars, and promoted the organization of workshops with States, international organizations and the Sixth Committee of the General Assembly. The subprogramme also participated in the Office of Legal Affairs regional workshop on international law for francophone countries of West Africa, held in Dakar in 2023.
- 8.96 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 8.27).

Table 8.27

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Increased knowledge of Member States representatives on treaty law and practice through two seminars at United Nations Headquarters	Increased knowledge of Member States representatives on treaty law and practice through two seminars at United Nations Headquarters	Increased knowledge of Member States representatives on treaty law and practice through two seminars at United Nations Headquarters	Increased knowledge of Member States representatives on treaty law and practice through two seminars at United Nations Headquarters and additional seminars at the national and regional levels	Increased knowledge of Member States representatives on treaty law and practice through two seminars at United Nations Headquarters and additional seminars at the national and regional levels

Result 2: action by States on multilateral treaties during the treaty event

Programme performance in 2023 and target for 2025

- 8.97 The subprogramme's work contributed to States taking actions during the 2023 treaty event held from 19 to 22 September 2023, which met the planned target.
- 8.98 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 8.28).

Table 8.28
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	States took treaty actions under multilateral treaties deposited with the Secretary-General during the treaty event	States took treaty actions under multilateral treaties deposited with the Secretary-General during the treaty event	States take treaty actions under multilateral treaties deposited with the Secretary-General during the treaty event	States take treaty actions under multilateral treaties deposited with the Secretary-General during the treaty event

Result 3: Member States advance discussion on treaty practice

Proposed programme plan for 2025

8.99 In its resolution [78/236](#) on strengthening and promoting the international treaty framework, the General Assembly decided to undertake a regular thematic debate in the Sixth Committee to foster a technical exchange of views on treaty practice, and in that regard invited Member States to focus their debate at the eightieth session on the subtopic “The role of technology in shaping treaty-making practice”.

Lessons learned and planned change

8.100 The lesson for the subprogramme, based on a request by Member States, was that additional information, including a report of the Secretary-General providing comprehensive information on the treaty practice of States and international organizations, was beneficial for the debate of Member States. In applying the lesson, the subprogramme will collect and publish contributions from Member States and international organizations on their treaty practice. The subprogramme will also provide information based on its review of the treaty practice available in the United Nations treaty database, which comprises more than 76,000 treaties in more than 100 languages and 134,000 treaty actions and over 600 multilateral treaties deposited with the Secretary-General.

8.101 Expected progress towards the objective is presented in the performance measure below (see table 8.29).

Table 8.29
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
The Sixth Committee updated the General Assembly regulations to give effect to Article 102 of the Charter of the United Nations	–	In its resolution 78/236 , the General Assembly requested the subprogramme to support the regular thematic debate in the Sixth Committee, including for the preparation of the report on the subtopic selected	Member States and international organizations submit information on their treaty practice	The Sixth Committee holds a debate on the subtopic “The role of technology in shaping treaty-making practice”

Deliverables

8.102 Table 8.30 lists all deliverables of the subprogramme.

Table 8.30

Subprogramme 6: deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	3	3	–	3
1. Meetings of the Sixth Committee of the General Assembly (informal consultations and plenary meetings)	3	3	–	3
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	2	2	2	2
2. Seminar on treaty law and practice	2	2	2	2
Publications (number of publications)	40	45	40	40
3. United Nations <i>Treaty Series</i> volumes	40	45	40	40
C. Substantive deliverables				
Consultation, advice and advocacy: advice to intergovernmental bodies on final clauses and the law of treaties during the negotiations of treaties to be deposited with the Secretary-General; consultation and legal advice concerning the law of treaties, depositary practice and registration of treaties to States, international organizations, secretariats and treaty bodies.				
Databases and substantive digital materials: daily online updates of depositary notifications on treaty actions and formalities regarding multilateral treaties deposited with the Secretary-General; original of treaties and certified true copies of treaties deposited with the Secretary-General; certificates of registration and other registration documents regarding treaties and treaty actions registered and filed and recorded by Member States and other entities; and the United Nations Treaty Collection database.				
D. Communication deliverables				
Outreach programmes, special events and information materials: annual treaty event during the opening session of the General Assembly and special treaty events dedicated to a particular treaty deposited with the Secretary-General.				
Digital platforms and multimedia content: up-to-date content for the United Nations Treaty Collection website.				
E. Enabling deliverables				
Legal services: legal advice to and support for United Nations offices, departments and regional commissions on the law of treaties, depositary practice and the registration of treaties.				

B. Proposed post and non-post resource requirements for 2025

Overview

8.103 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 8.31 to 8.33.

Table 8.31

Overall: evolution of financial resources by object of expenditure

^a Includes 11 temporary posts (2 P-4, 2 P-3, 3 P-2, 1 GS (PL) and 3 GS (OL)).

8.104 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 8.34 to 8.36 and figure 8.II.

8.105 As shown in tables 8.34 (1) and 8.35 (1), the overall resources proposed for 2025 amount to \$34,993,900 before recosting, reflecting a net decrease of \$377,000 (or 1.1 per cent) compared with the approved budget for 2024. Resource changes result from technical adjustments, and new and expanded mandates. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

8.106 As shown in table 8.34 (1), resource changes reflect a net decrease of \$484,600, as follows:

- (a) **Subprogramme 4, Law of the sea and ocean affairs.** The net decrease of \$582,600 relates to the following:
 - (i) An increase of \$421,100 relating to the higher provision at continuing vacancy rates for the five temporary posts (2 P-4, 1 P-2, 1 General Service (Principal level) and 1 General Service (Other level)) established in 2024 pursuant to General Assembly resolution [78/253](#), which

were subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts;

- (ii) A decrease of \$1,003,700 relating to the removal of non-recurrent requirements under consultants (\$52,000), experts (\$293,400), travel of staff (\$63,000), contractual services (\$195,700), general operating expenses (\$1,600), furniture and equipment (\$9,900) and grants and contributions (\$388,100) to support the work related to General Assembly resolutions [75/239](#) and [77/321](#), and the subsequent approval of the resources in resolution [78/253](#), section IX, paragraph 3;
- (b) **Subprogramme 6, Custody, registration and publication of treaties.** The net increase of \$98,000 relates to:
- (i) An increase of \$100,100 relating to the higher provision at continuing vacancy rates for one P-3 post established pursuant to General Assembly resolution [78/236](#), which was subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts;
 - (ii) A decrease of \$2,100 relating the removal of non-recurrent requirements under furniture and equipment pursuant to resolution [78/236](#).

New and expanded mandates

- 8.107 As reflected in table 8.34 (1), resource changes reflect an increase of \$107,600, as follows:

Subprogramme 4, Law of the sea and ocean affairs. The increase of \$107,600 relates to the provision under contractual services for an additional 5 terabytes of digital storage space and for technical support and maintenance of scientific analysis and plotting software, pursuant to General Assembly resolution [78/69](#).

Other assessed resources

- 8.108 As reflected in tables 8.34 (2) and 8.35 (2), other assessed resources for 2025 amount to \$5,059,000. The resources would complement regular budget resources and provide for the requirements indicated in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2024 to 30 June 2025 ([A/78/746](#)).

Extrabudgetary resources

- 8.109 As reflected in tables 8.34 (3) and 8.35 (3), the Office of Legal Affairs expects to continue to receive both cash and in-kind contributions, which would complement regular budget resources. In 2025, extrabudgetary resources are estimated at \$14,295,200 and would provide for 33 posts (2 D-1, 2 P-5, 8 P-4, 10 P-3, 2 P-2, 7 General Service (Other level) and 2 Local level) and non-post resources. The resources would be used primarily to provide legal advice and assistance to facilitate the implementation of substantive mandates and to protect the legal interests and minimize the legal liabilities of the United Nations, including, but not limited to: (a) providing legal support and assistance in response to requests made by principal and subsidiary organs of the United Nations; (b) conducting international law training and dissemination under the United Nations Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law; (c) promoting and strengthening the law of the sea for the peaceful use of the oceans and sustainable development; and (d) providing support for the progressive improvement, harmonization, understanding, knowledge, interpretation and application of international trade law and for the coordination of the work of international organizations active in that field.
- 8.110 Anticipated in-kind contributions with an estimated value of \$588,900 would provide for: (a) donated right-to-use arrangements under a memorandum of understanding between the United Nations, the Ministry of Justice of the Republic of Korea and the city of Incheon regarding the operation of and financial contributions to the UNCITRAL Regional Centre for Asia and the Pacific (\$42,000); (b) other services, such as expert advice from two legal experts, for the Regional Centre

Section 8 Legal affairs

for Asia and the Pacific (\$123,400); and (c) technical assistance, administrative support and other services as a contribution for the World Oceans Day event (\$423,500).

8.111 The extrabudgetary resources for the Office of Legal Affairs are subject to the oversight of the Office, which has delegated authority from the Secretary-General.

Policymaking organs

8.112 The resources proposed under this component would provide for the policymaking organs as shown in table 8.37.

Table 8.37

Executive direction and management

8.114 The executive direction and management component comprises the Office of the Under-Secretary-General for Legal Affairs and the Evaluation and Strategic Planning Unit. The component is responsible for the following functions:

- (a) Providing the overall policy direction, supervision, administration and management of the Office of Legal Affairs;
- (b) Representing the Secretary-General at meetings and conferences of a legal nature and in judicial and arbitral proceedings, certifying legal instruments issued on behalf of the United Nations, convening meetings of the legal advisers of the United Nations system and representing the Organization at such meetings;
- (c) Monitoring the resources of the Office of Legal Affairs to address the changing organizational needs and workload and to improve the Office's management systems;
- (d) Formulating recommendations to the Secretary-General in interdepartmental and inter-agency bodies, supporting the coordination of the United Nations Legal Advisers Network and providing legal advice to high-level inter-agency bodies;
- (e) Ensuring the consistent monitoring and self-evaluation of subprogrammes and supporting subprogrammes with the identification, development and review of monitoring and self-evaluation methodologies and practices;
- (f) Coordinating the working groups on monitoring and evaluation and on the Sustainable Development Goals within the Office of Legal Affairs;
- (g) Acting as the focal point for information on all aspects of the work of the Office of Legal Affairs, including on capacity-building activities coordinated by the Office, coordinating interdepartmental activities and consulting and negotiating with other departments, offices, subsidiary bodies and related agencies of the United Nations system on matters of mutual concern;
- (h) Acting as the centre for coordination and supervision of all capacity-building activities, including those undertaken under the United Nations Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law (subprogramme 3), and for the strengthening of the capacity of the Office of Legal Affairs to concentrate the planning,

implementation, monitoring and evaluation of those activities to allow for a more strategic and integrated management of capacity-building efforts, the leveraging of partnerships and the replication of good practices regarding legal technical assistance across organizational units to better assist relevant stakeholders and better respond to requests by Member States.

- 8.115 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Office integrates environmental management practices into its operations. This includes decreasing its greenhouse gas by: (a) encouraging the use of videoconference facilities for interviews and meetings; (b) reducing print services and ensuring that all printers are set to double-sided printing; and (c) encouraging staff to turn off computers and monitors at the end of the workday.
- 8.116 Information on the timely submission of documentation and advance booking for air travel is reflected in table 8.39. The timeliness of booking compliance was affected by several factors, such as the change in participants for workshops and seminars by sponsoring Member States, delays in participants obtaining entry visas and delayed confirmations of travellers and sponsors regarding their participation in activities.

II. Independent Investigative Mechanism for Myanmar

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 8.126 The Independent Investigative Mechanism for Myanmar is mandated to collect, consolidate, preserve and analyse evidence of the most serious international crimes and violations of international law committed in Myanmar since 2011 and prepare files that can be shared with competent investigative, prosecutorial and judicial authorities (“competent authorities”) in order to facilitate fair and independent criminal proceedings in national, regional or international courts or tribunals. The mandate derives from Human Rights Council resolutions [39/2](#), [42/3](#), [43/26](#), [46/21](#), [47/1](#), [49/23](#), [50/3](#), [52/31](#) and [53/26](#). In its resolution [43/26](#), the Council called for close and timely cooperation between the Mechanism and any future investigations by the International Criminal Court or the International Court of Justice. The mandate is further elaborated in the Mechanism’s terms of reference ([A/73/716](#), annex).
- 8.127 The General Assembly welcomed the creation of the Mechanism in its resolution [73/264](#) and, in its resolutions [75/238](#), [76/180](#), [77/227](#) and [78/219](#), called upon the United Nations to ensure that the Mechanism was afforded flexibility in terms of staffing, location and operational freedom so that it could deliver as effectively as possible on its mandate.

Programme of work

Objective

- 8.128 The objective, to which the Mechanism contributes, is to ensure accountability of perpetrators and justice for victims of the most serious international crimes and violations of international law committed in Myanmar since 2011.

Strategy and external factors for 2025

- 8.129 To contribute to the objective, the Mechanism will:
- (a) Collect and analyse information and evidence regarding crimes within its mandate, including by undertaking investigative missions;
 - (b) Provide protection and support services to witnesses and information providers, including through cooperation with national authorities and other partners;
 - (c) Develop and maintain a secure electronic information management system that can protect against evolving risks to information and communications technology security and facilitate the analysis of vast quantities of data in multiple formats and languages;
 - (d) Share evidence and analysis with competent authorities in accordance with its mandate, including for proceedings at the International Criminal Court and the International Court of Justice;
 - (e) Engage in outreach to relevant stakeholders, in particular to victims and witnesses, using various communication tools and civil society dialogues.
- 8.130 The above-mentioned work is expected to result in:
- (a) The collection and preservation of information and evidence that can be shared with competent authorities in relation to crimes within the Mechanism’s mandate;

- (b) The initiation of fair and independent criminal proceedings by competent authorities in relation to the aforementioned crimes;
 - (c) Greater understanding of the Mechanism's mandate, work and expected results by all relevant stakeholders, including victims and the general public, in particular inside Myanmar.
- 8.131 With regard to the external factors, the overall plan for 2025 is based on the following planning assumptions:
- (a) Some relevant Member States will permit the Mechanism to conduct evidence collection and witness interviews on their territory and facilitate the safety and well-being of witnesses and information providers;
 - (b) Some competent authorities will seek to exercise jurisdiction over the crimes within the Mechanism's mandate and such authorities will continue to request information from the Mechanism.
- 8.132 With regard to cooperation with other entities at the global, regional, national and local levels, the Mechanism continues to engage with a diverse range of actors, including Member States, individuals, civil society organizations and business entities, to seek relevant information and ensure support for its mandate.
- 8.133 With regard to inter-agency coordination and liaison, the Mechanism continues to consult with international courts and other accountability mechanisms, in particular in the areas of legal and judicial cooperation, information management systems, witness protection and support, and training. The Mechanism also cooperates with other United Nations entities working on issues relating to Myanmar.
- 8.134 The Mechanism integrates a gender perspective in its operational activities, deliverables and results, as appropriate. The Mechanism will continue its focus on sexual and gender-based crimes and crimes against children, including appropriate access to protection and support measures for victims of such crimes.

Evaluation activities

- 8.135 The following evaluations completed in 2023 have guided the proposed programme plan for 2025:
- (a) Evaluation on the methodology and processes for collecting witness statements;
 - (b) Evaluation on the effectiveness of policies and procedures on information systems and information management.
- 8.136 The results of these evaluations have been taken into account for the proposed programme plan for 2025. For example, the evaluation under subparagraph (a) affirmed the effectiveness of efforts, reflected in result 1, in taking signed witness statements of high forensic value with the broadest possible admissibility in national and international courts and tribunals, but suggested that future statements could benefit from the utilization of more culturally informed interviewing techniques. The evaluation also informed the current strategy to focus the statements on the core elements of crimes and evidence of perpetrator identity and responsibility. As a result of the evaluation under subparagraph (b), the Mechanism plans to adopt an information and technology governance and policy framework that is a better fit for the Mechanism's post-pandemic requirements and operations. The new framework will better respond to improving and evolving technology systems, and will enhance compliance by Mechanism staff and personnel.
- 8.137 An evaluation of the Mechanism's investigative mission planning process and implementation is planned for 2025.

Programme performance in 2023

Member States and other stakeholders cooperate with the Mechanism in support of accountability for the most serious international crimes

8.138 The Mechanism requires the cooperation of numerous entities, including States, international organizations, civil society organizations, business entities and victims and survivors, in order to collect information and evidence of the most serious international crimes committed in Myanmar. The collection of direct testimonial evidence from those who witnessed or have direct knowledge of key events and information is necessary for building case files that can facilitate criminal prosecutions. Many States require the negotiation of formal arrangements regulating the parameters of their cooperation, such as for the Mechanism to conduct witness interviews in their territory. Some international organizations, civil society organizations and corporate providers also require cooperation arrangements before sharing information with the Mechanism. The conclusion of cooperation arrangements is consequently critical to the effective implementation of the Mechanism's mandate. The Mechanism's proactive engagement with States and other stakeholders from 2021 to 2023 resulted in a total number of 35 cooperation arrangements in place at the end of 2023.

8.139 Progress towards the objective is presented in the performance measure below (see figure 8.XII).

Figure 8.XII

Performance measure: number of cooperation arrangements concluded (cumulative)

Planned results for 2025

Result 1: increased access to evidence with broadest possible admissibility in national, regional and international courts

Programme performance in 2023 and target for 2025

8.140 The Mechanism's work contributed to the availability of 327 screening notes and witness statements for sharing, which exceeded the planned target of 165.

8.141 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 8.XIII).

Figure 8.XIII
Performance measure: number of screening notes and witness statements available for sharing (cumulative)^a

^a Due to a technical error, the number of screening notes and witness statements available for sharing in 2021 and 2022 was overreported in the 2023 and 2024 proposed programme plans. To maintain accountability for the programme plans, the 2021 and 2022 targets have accordingly been modified to reflect the actual number of screening notes and witness statements for those years. The error had no impact on the Mechanism meeting its planned targets for 2021 and 2022.

Result 2: domestic and international authorities have access to evidence that assists in establishing specific crimes and identifying perpetrators

Programme performance in 2023 and target for 2025

- 8.142 The Mechanism’s work contributed to domestic and international authorities having access to tailored, comprehensive and timely analytical products and underlying evidence in diverse formats that can assist such authorities in establishing specific crimes and identifying perpetrators of the most serious international crimes, which met the planned target.
- 8.143 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 8.48).

Table 8.48
Performance measure: domestic and international authorities have access to:

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Repository of diverse information and evidence	Repository and analysis of information and evidence regarding priority situations and incidents	Repository of evidence and targeted analysis of hate speech; military structures and chain of command; sexual and gender-based crimes; and two post-coup priority incidents in Kayah and Sagaing	Repository of evidence and targeted analysis of financial structures and connections between persons and groups of interest; and digital analysis and geolocation of sites of interest	Repository of evidence and analysis pertaining to key suspected individuals linked to priority situations and incidents

Result 3: victims, survivors, civil society and information providers engage in accountability processes

Proposed programme plan for 2025

8.144 The Mechanism recognizes the need to directly engage with victims, survivors, civil society representatives and other information providers and keep them informed regarding ongoing accountability processes related to crimes under its mandate. The Mechanism engages in regular dialogues and diverse forums with these stakeholders, who are on the front line of efforts to gather information and evidence, in order to increase mutual understanding and cooperation. When stakeholders are actively engaged and well-informed, accountability processes can better reflect their experiences, perspectives, needs and priorities.

Lessons learned and planned change

8.145 The lesson for the Mechanism is that active and regular engagement with stakeholders can build trust and deepen mutual understanding of respective roles, perspectives and challenges. Examples include the Mechanism's efforts to communicate extensively with victims' and survivors' groups to maintain an ongoing and productive relationship and to develop a large network of civil society partners both within and outside the region. In applying the lesson, the Mechanism plans to expand its engagement with diverse groups of stakeholders, diversify its methods of engagement and utilize proactive strategies to effectively solicit and consider their experiences, perspectives and priorities, through different communication channels and tools.

8.146 Expected progress towards the objective is presented in the performance measure below (see figure 8.XIV).

Figure 8.XIV

Performance measure: number of engagements of victims, survivors, civil society representatives and information providers

Legislative mandates

8.147 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the Mechanism.

General Assembly resolutions

73/264	Situation of human rights in Myanmar	75/287	The situation in Myanmar
74/246; 75/238; 76/180; 77/227; 78/219	Situation of human rights of Rohingya Muslims and other minorities in Myanmar		

Human Rights Council resolutions

39/2; 42/3; 47/1; 50/3; 53/26	Situation of human rights of Rohingya Muslims and other minorities in Myanmar	43/26; 46/21; 49/23; 52/31	Situation of human rights in Myanmar
----------------------------------	---	-------------------------------	--------------------------------------

Deliverables

8.148 Table 8.49 lists all deliverables of the Mechanism.

Table 8.49
Deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	2	2	2	2
1. Reports for the General Assembly	1	1	1	1
2. Reports for the Human Rights Council	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	5	5	5	5
Meetings of:				
3. The Human Rights Council	1	1	1	1
4. The General Assembly	1	1	1	1
5. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
6. The Committee for Programme and Coordination	1	1	1	1
7. The Fifth Committee	1	1	1	1
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	6	14	7	10
8. Workshops for national, regional and international courts or tribunals on the Mechanism’s investigations in order to facilitate proceedings	4	7	3	4
9. Workshop on collaboration between civil society groups working on Myanmar and the Mechanism	2	7	4	6
Technical materials (number of materials)	90	291	155	180
10. Compilation of information and evidence of international crimes	15	78	40	50
11. Compilation of analysis of evidence of international crimes	15	47	25	35
12. Screening notes and witness statements	60	166	90	95
Fact-finding, monitoring and investigation missions (number of missions)	5	5	6	5
13. Investigation missions to interview witnesses and collect evidence	5	5	6	5
C. Substantive deliverables				
Consultation, advice and advocacy: consultations with more than 50 entities, including Member States and civil society organizations.				
Databases and substantive digital materials: databases and analytical tools to register, preserve, verify and analyse relevant information and evidence; information technology systems to enable safe and secure operations.				

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

Direct service delivery: protection and support measures for witnesses, including 150 threat assessments to identify security risks to witnesses, in-house psychosocial services to facilitate witness interviews, and referrals of witnesses to service providers to facilitate medical and psychosocial support.

D. Communication deliverables

Outreach programmes, special events and information materials: two conferences with relevant stakeholders on the Mechanism’s mandate and activities; three periodic bulletins; five visual materials about the Mechanism’s work in at least two languages of Myanmar in addition to the Myanmar language (Burmese).

External and media relations: 15 press conferences and media interviews; panels and events; and at least four briefings to the diplomatic and academic communities on progress of the Mechanism’s work.

Digital platforms and multimedia content: Mechanism’s website and social media accounts.

B. Proposed post and non-post resource requirements for 2025

Overview

8.149 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 8.50 to 8.52.

Table 8.50

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2023 expenditure	2024 approved	Changes				2025 estimate (before recosting)
			Technical adjustments	New/expanded mandates	Other	Total Percentage

General Service and related							
GS (OL)	9	–	–	–	–	–	9
Subtotal	9	–	–	–	–	–	9
Total	57	–	–	–	–	–	57

8.150 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 8.53 to 8.55 and figure 8.XV.

8.151 As shown in tables 8.53 (1) and 8.54 (1), the overall resources proposed for 2025 amount to \$14,413,100 before recosting, reflecting no change in the resource level compared with the approved budget for 2024. Cost-neutral resource changes result from other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Table 8.53

Figure 8.XV
Distribution of proposed resources for 2025 (before recosting)

(Number of positions/thousands of United States dollars)

Explanation of variances by factor

Other changes

8.152 As reflected in table 8.51, cost-neutral changes are proposed in respect of the redeployment of five general temporary assistance positions, namely, two Witness Protection and Support Officers (P-3), two Associate Witness Protection and Support Officers (P-2) and one Security Coordination Officer (P-3) from the Collection, Analysis and Sharing Section to Office of the Head of the Mechanism; and the redeployment of one Senior Legal Officer (P-5) from the Office of the Head of the Mechanism to the Collection, Analysis and Sharing Section (see annex II).

Extrabudgetary resources

8.153 As reflected in tables 8.53 (2) and 8.54 (2), extrabudgetary resources amount to \$3,190,400. The resources would complement regular budget resources and would be used mainly to provide for 12 general temporary assistance positions (3 P-4, 5 P-3 and 4 P-2) and other non-post resources to enhance the Mechanism’s investigative capacity with specialized expertise, for the procurement of specialized technology and tools for the preservation of digital information and evidence, and for the convening of a forum to engage with civil society organizations.

8.154 The extrabudgetary resources for the Mechanism are subject to the oversight of the Mechanism, which has delegated authority from the Secretary-General.

Other information

8.155 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Mechanism continues to minimize energy consumption at its facilities, where it installed special external walls with thermal insulation panels to reduce the dispersion of heat, thermal windows with energy-efficient features designed to resist the loss of heat and cold, light emitting diode lights in all office and common areas, and a heating, ventilation and air conditioning system with thermostats in all offices and common areas to enable better control of the system.

Section 8 **Legal affairs**

8.156 Information on the timely submission of documentation and advance booking for air travel is reflected in table 8.56. The Mechanism will continue its efforts to enhance the rate of travel compliance through more frequent monitoring of compliance with advance booking requirements for air travel and by bringing up the issue in the monthly resources updates provided to management.

Table 8.56
Compliance rate
(Percentage)

III. International, Impartial and Independent Mechanism to Assist in the Investigation and Prosecution of Persons Responsible for the Most Serious Crimes under International Law Committed in the Syrian Arab Republic since March 2011

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 8.157 The Mechanism is responsible for assisting in the investigation and prosecution of persons responsible for the most serious international crimes committed in the Syrian Arab Republic since March 2011. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolution [71/248](#), as further elucidated in the Mechanism's terms of reference ([A/71/755](#), annex). The Mechanism has a responsibility to support criminal accountability and in doing so provides support to ongoing investigations and prosecutions in competent jurisdictions. It also generates analytical products that can be shared with competent jurisdictions that either currently, or may in the future, have jurisdiction over the crimes within the Mechanism's mandate.

Programme of work

Objective

- 8.158 The objective, to which the Mechanism contributes, is to achieve accountability for the most serious international crimes committed in the Syrian Arab Republic since March 2011.

Strategy and external factors for 2025

- 8.159 To contribute to the objective, the Mechanism will:
- (a) Build the central repository through existing or new cooperation agreements and focused investigative work and analysis of evidence within the framework of its structural investigation and in response to requests for assistance from competent jurisdictions;
 - (b) Prepare analytical products in the context of projects within active lines of inquiry in its structural investigation;
 - (c) Share information, evidence, analytical products and expertise with national, regional or international courts and tribunals that have jurisdiction over these alleged crimes;
 - (d) Develop and implement its victim- and survivor-centred approach and integrate a focus on gender-based violence, including sexual violence, and crimes against children throughout its work, as well as addressing broader justice objectives, such as assisting efforts to clarify the fate of missing persons;
 - (e) Promote an integrated approach to justice and accountability through effective dialogue and coordination, including with criminal justice actors, civil society and other United Nations actors;
 - (f) Provide support and protection to witnesses who cooperate with the Mechanism to ensure that they can do so in safety and security.

- 8.160 The above-mentioned work is expected to result in:
- (a) Requesting parties having access to crucial evidence of alleged crimes, stored in a central repository and available for collation and distribution;
 - (b) Strengthened investigations, prosecutions and trials by jurisdictions with competence over the alleged crimes within the Mechanism’s mandate;
 - (c) Greater accessibility to, and influence over, justice processes for victims and survivors, including those disadvantaged by gender-based and/or age-related discrimination, of crimes in the Syrian Arab Republic;
 - (d) The strengthening of the broadest possible range of justice initiatives compatible with the Mechanism’s mandate.
- 8.161 With regard to the external factors, the overall plan for 2025 is based on the following planning assumptions:
- (a) Entities and individuals will provide and/or facilitate the Mechanism’s access to information and evidence in various formats for inclusion in the central repository;
 - (b) Further materials on chemical weapons usage compiled by the Organisation for the Prohibition of Chemical Weapons-United Nations Joint Investigative Mechanism will be made available for collection.
- 8.162 With regard to cooperation with other entities at the global, regional, national and local levels, the Mechanism will continue to request access to a growing number of States for evidence-gathering as well as to cooperate with competent jurisdictions, international organizations, Syrian and international civil society organizations and individuals, utilizing a variety of cooperation frameworks.
- 8.163 With regard to inter-agency coordination and liaison, the Mechanism will continue to cooperate with other United Nations entities working on issues related to the Syrian Arab Republic, including the Independent International Commission of Inquiry on the Syrian Arab Republic, in accordance with its mandate.
- 8.164 The Mechanism integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, the Mechanism continues to incorporate a gender perspective into its evidentiary strategies to avoid bias that results in the incomplete or inaccurate recording of harm experienced by females and to ensure that due attention is paid to sexual violence against males.
- 8.165 In line with the United Nations Disability Inclusion Strategy, the Mechanism will integrate throughout its work the experiences and perspectives of persons with disabilities in the Syrian context. This is consistent with its victim- and survivor-centred approach, whereby the Mechanism seeks to bring to light and address the experiences of a broad range of victims and survivors who have been historically overlooked.

Evaluation activities

- 8.166 An evaluation on the programme of work for the period 2016–2022, conducted by the entity and completed in 2023, has guided the proposed programme plan for 2025.
- 8.167 In response to the results of this evaluation, the Mechanism engaged in a review of its strategic plan for the period 2023–2025. It further assessed its legal, analytical and investigative capacity with a view to ensuring continued support to competent jurisdictions, facilitating justice opportunities in line with its victim- and survivor-centred approach.
- 8.168 An evaluation of the digital infrastructure and capacity needs of the Mechanism’s collection, analysis and sharing activities is planned for 2025.

Programme performance in 2023

Competent jurisdictions' investigations furthering criminal accountability

8.169 The Mechanism supports criminal accountability through its mandate and, in doing so, provides support to ongoing investigations and prosecutions of most serious international crimes committed in the Syrian Arab Republic since March 2011 in competent jurisdictions. The Mechanism has supported investigations by sharing information, data sets, witness evidence, evidentiary modules and analytical products with competent jurisdictions.

8.170 Progress towards the objective is presented in the performance measure below (see figure 8.XVI).

Figure 8.XVI

Performance measure: number of distinct investigations enhanced with information provided by the Mechanism (cumulative)

Planned results for 2025

Result 1: enhanced victim- and survivor-centred approach for inclusive justice

Programme performance in 2023 and target for 2025

8.171 The Mechanism's work contributed to 20 engagements of victims and survivors, which exceeded the planned target of 19 engagements.

8.172 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 8.XVII).

Figure 8.XVII

Performance measure: number of engagements of victims and survivors (annual)

Result 2: increased availability of information in support of ongoing investigations and prosecutions and the search for missing persons

Programme performance in 2023 and target for 2025

- 8.173 The Mechanism’s work contributed to 26 information and evidence packages proactively made available to competent jurisdictions and to assist the search for missing persons, which exceeded the planned target of 25 proactive sharing activities.
- 8.174 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 8.XVIII).

Figure 8.XVIII

Performance measure: number of information and evidence packages proactively made available to competent jurisdictions and to assist the search for missing persons (annual)

Result 3: enhanced protection and support to victims, witnesses or other sources cooperating with the Mechanism

Proposed programme plan for 2025

- 8.175 In line with its terms of reference, the Mechanism is working to ensure that all witnesses, victims and any other persons who cooperate with the Mechanism can do so in safety and security. The Mechanism has established a limited internal capacity and is operationalizing best international practices in its witness and victim protection and support services, including with regard to cooperating witnesses who have relayed serious and credible concerns for their security. The Mechanism provides protection and support to concerned individuals, namely: (a) victims, witnesses and sources of information and evidence relevant to its mandate who cooperate with investigators in the context of its investigations; and (b) persons who are at risk because they are associated with someone from one of the above-mentioned groups, such as family members or friends, as and when required.

Lessons learned and planned change

- 8.176 The lesson for the Mechanism was that there was a need to respond to increasing demand from competent jurisdictions for the Mechanism to conduct witness interviews in support of their ongoing investigations. In parallel, the Mechanism’s advancement of its structural investigation led to a shift in focus from large-scale collections of existing information and evidence to more targeted collection activities and witness interviews. Both trends have resulted in new and increased witness and victim support needs. In applying the lesson, the Mechanism will increase the integration of protection and support services into investigation activities, in particular those related to witness interviews. Full integration into the process will ensure that the concerned individuals, particularly the most vulnerable, receive appropriate and timely protection and support as required.

8.177 Expected progress towards the objective is presented in the performance measure below (see table 8.57).

Table 8.57
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	–	Enhanced protection and support for witnesses, victims and other sources, including integrated protective measures and support mechanisms available throughout every phase of the investigative process	Witnesses, victims and other sources have access to systematic support, including standing referral pathways to Member States for protection and support-related services

Legislative mandates

8.178 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the Mechanism.

General Assembly resolutions

71/248	International, Impartial and Independent Mechanism to Assist in the Investigation and Prosecution of Persons Responsible for the Most Serious Crimes under International Law Committed in the Syrian Arab Republic since March 2011	75/193; 76/228; 77/230; 78/222	Situation of human rights in the Syrian Arab Republic
--------	---	--------------------------------	---

Deliverables

B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	6	6	6	4
6. Workshops on collaboration strategies between NGOs in the Syrian Arab Republic and the Mechanism	2	2	2	2
7. Workshops on accountability for civil society	2	2	2	–
8. Seminar on victim-centred approach	2	2	2	2
Technical materials (number of materials)	195	191	193	172
9. Compilation of information and evidence of international crimes, including in response to requests for assistance by prosecuting authorities	90	109	90	90
10. Compilation of analysis of evidence of international crimes, for sharing with relevant authorities	100	82	100	80
11. Packages of analytical products relevant to individual criminal responsibility for specific international crimes	5	–	3	2
Fact-finding, monitoring and investigation missions (number of missions)	22	21	20	20
12. Investigation-related missions to identify and meet sources and potential witnesses, to interview witnesses and/or to collect evidence for the Mechanism’s repository of information and evidence	22	21	20	20
C. Substantive deliverables				
Consultation, advice and advocacy: consultations with and cooperation in support of national judicial authorities from more than 15 countries; and consultations with civil society, including a broad range of victim and survivor communities.				
Databases and substantive digital materials: central repository of evidence of crimes committed in the Syrian Arab Republic since March 2011.				
Direct service delivery: protection and support measures for Mechanism witnesses, including threat assessments to identify security risks to witnesses and referrals of witnesses to service providers to facilitate medical and psychosocial support.				
D. Communication deliverables				
Outreach programmes, special events and information materials: periodic bulletins for some 200 NGOs and other entities; information and “frequently asked questions” for general dissemination; background papers about the Mechanism; and awareness-raising meetings for United Nations partners of the Mechanism.				
External and media relations: press statements, press conferences and interviews; panels and events; and briefings to the diplomatic and academic communities.				
Digital platforms and multimedia content: the Mechanism’s website.				

B. Proposed post and non-post resource requirements for 2025

Overview

8.180 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 8.59 to 8.61.

Table 8.59

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

8.181 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 8.62 to 8.64 and figure 8.XIX.

8.182 As shown in tables 8.62 (1) and 8.63 (1), the overall resources proposed for 2025 amount to \$19,343,800 before recosting, reflecting no change compared with the approved budget for 2024. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

- 8.183 As reflected in tables 8.62 (2) and 8.63 (2), extrabudgetary resources amount to \$9,015,700. The resources would complement regular budget resources and would be used to provide for 40 posts (1 P-5, 11 P-4, 9 P-3, 16 P-2/1 and 3 General Service (Other level)) and non-post resources. The resources would also be used to support external relations and outreach, including for civil society in the Syrian Arab Republic, through virtual and in-person events and consultations. In addition, non-post resources would be used for witness protection and support activities.
- 8.184 The extrabudgetary resources for the Mechanism are subject to the oversight of the Mechanism, which has delegated authority from the Secretary-General.

Other information

- 8.185 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Mechanism is integrating environmental management practices into its operations. The Mechanism will seek to minimize its environmental footprint by participating in energy conservation efforts led by the United Nations Office at Geneva and, where appropriate and where permitted by the Secretariat, utilizing shared technological services.
- 8.186 Information on the timely submission of documentation and advance booking for air travel is reflected in table 8.65. The nature of the Mechanism’s work means that staff members are often required to travel at short notice, as they need to be reactive to the schedules of the Mechanism’s sources. The Mechanism continues to deploy initiatives that will have a positive impact on advance travel planning, including enhanced centralized monitoring and the dissemination of a guidance document on official travel containing clear procedures with regard to the travel approval process.

Annex II

Summary of proposed changes to general temporary assistance positions, by component

Independent Investigative Mechanism for Myanmar

<i>Component</i>	<i>Positions</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Programme of work	1	P-5	Redeployment of a Senior Legal Officer (P-5) from the Office of the Head of the Mechanism to the Collection, Analysis and Sharing Section	The Mechanism was established in 2018 with a particular focus on crimes committed against the Rohingya in 2016 and 2017. Since the military coup in February 2021, the number, complexity and geographic scope of crimes committed in Myanmar have continued to expand. The Mechanism has two separate teams working on each of these scenarios and requires two experienced criminal lawyers at the P-5 level to lead each team, with one team investigating crimes against the Rohingya and another team investigating crimes against other victims. The Mechanism therefore proposes that the Senior Legal Officer (P-5) be redeployed from the Office of the Head of the Mechanism to the Collection, Analysis and Sharing Section.
	2	P-3	Redeployment of Witness Protection and Support Officers from the Collection, Analysis and Sharing Section to the Office of the Head of the Mechanism	The Mechanism has two Witness Protection and Support Officers (1 P-3 and 1 P-2), who are responsible for assessing and implementing measures to ensure the protection and safety of witnesses. The other two Witness Protection and Support Officers (1 P-3 and 1 P-2) are responsible for assessing the psychosocial needs of witnesses and facilitating the required support measures. In line with established practice in international justice and accountability mechanisms, and to ensure that witness protection and support needs are prioritized during investigations, these four specialized experts need to report to the Head of the Mechanism, while continuing to advise investigation teams. The Mechanism therefore proposes the redeployment of the four Witness Protection and Support Officers from the Collection, Analysis and Sharing Section to the Witness Protection and Support Subunit in the Office of the Head of the Mechanism, which reports directly to the Head of the Mechanism.
	2	P-2		
	1	P-3	Redeployment of Security Coordination Officer from the Collection, Analysis and Sharing Section to the Office of the Head of the Mechanism	The Security Coordination Officer (P-3) is responsible for advising the Head of the Mechanism on matters related to the safety of all Mechanism personnel, as well as the security of Mechanism premises, including by conducting threat and risk assessments and developing and implementing mitigating measures. This position is particularly important for the Mechanism due to the sensitivity of its mandate and the high risks associated with all of its personnel and operational activities. In order to ensure that the Security Coordination Officer (P-3) has a direct reporting line to the Head of the Mechanism, who has overall accountability for safety and security, the Mechanism proposes that this position be redeployed from the Collection, Analysis and Sharing Section to the Office of the Head of the Mechanism.

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 9.1 The Department of Economic and Social Affairs supports the development pillar of the United Nations Secretariat, including by ensuring international cooperation in the pursuit of sustainable development for all. The Department's responsibilities include: (a) providing substantive support to the bodies established under the Charter of the United Nations that deal with development issues, namely, the General Assembly, the Economic and Social Council and its related functional commissions, and expert bodies; (b) monitoring and analysing development trends, prospects and policy issues globally; and (c) providing assistance in translating policy frameworks developed in United Nations conferences and summits into policies and programmes at the country level and supporting Member States in building national capacities for implementation, with a specific focus on supporting the implementation of the 2030 Agenda for Sustainable Development and the achievement of the Sustainable Development Goals through, among others, the regular programme of technical cooperation and United Nations Development Account projects. The mandate derives from the proposals put forward in the 1997 report of the Secretary-General entitled "Renewing the United Nations: a programme for reform" (A/51/950); in implementing the proposals, the General Assembly, in its resolution 52/220, noted the creation of the new Department of Economic and Social Affairs.
- 9.2 The Department forms the backbone of the normative and analytical support provided by the Secretariat to intergovernmental bodies and the processes that address the economic, social and environmental dimensions of sustainable development, including spearheading numerous initiatives to advance economic and social development issues.

Strategy and external factors for 2025

- 9.3 The world continues to suffer significant setbacks in terms of development progress, triggered by interrelated shocks, namely, the coronavirus disease (COVID-19) pandemic, conflicts, the cost-of-living crisis and debt distress, in addition to longer-term threats and challenges, such as climate change, biodiversity loss and demographic change. Accordingly, a coherent and integrated approach to the work of the United Nations to support Member States in the urgent need to accelerate action to fulfil the vision and Goals of the 2030 Agenda remains paramount.
- 9.4 Building on the 10 critical action areas outlined by Member States in the political declaration of the 2019 Sustainable Development Goals Summit, the political declaration adopted at the 2023 Sustainable Development Goals Summit (see General Assembly resolution 78/1) recognizes the urgent need for necessary actions to reverse declines and accelerate progress to achieve the 2030 Agenda. Countries in special situations, including the least developed countries, landlocked developing countries and small island developing States, remain particularly challenged. In addition, middle-income countries still face significant challenges in achieving sustainable development.
- 9.5 Guided by the outcomes of the Sustainable Development Goals summits and informed by the report of the Secretary-General on Our Common Agenda (A/75/982), the Department continues to champion synergistic, future-focused approaches to address multiple, interlinked crises and accelerate a recovery that improves the livelihood and lives of all people, including through its work on climate action, sustainable infrastructure investment and risk-informed development cooperation.
- 9.6 The Department supports Member States through global conferences, summits and regular meetings in the economic, social and environmental fields. The Department forecasts economic, social and population trends and generates, analyses and compiles a wide range of data and statistics to inform Member States and other stakeholders as they take stock of trends and policy options to address common problems. The Department also translates policy frameworks developed in United Nations

conferences and summits into programmes at the country level and, through technical assistance, supports Member States in building national capacities.

- 9.7 Focusing on countries in special situations and countries in Africa, the Department identifies emerging trends and effective policy options for eradicating poverty, addressing inequalities and promoting opportunities and progress towards sustainable development for all.
- 9.8 In 2025, the Department will continue to:
- (a) Support Member States in preparing for important intergovernmental processes, including the Fourth International Conference on Financing for Development, and the Second World Summit for Social Development;
 - (b) Strengthen the availability of critical social, demographic and economic data and analysis for guiding transformative policy in crisis recovery, to create more resilient and inclusive societies and accelerate achievement of the Sustainable Development Goals;
 - (c) Strengthen thought leadership by taking a multidimensional and intersectional approach to analysis, in support of intergovernmental processes that account for the differentiated impacts that emerging and ongoing trends, policies and programmes have on the poorest and the most vulnerable, and on women and girls;
 - (d) Leverage workstreams on climate action, financing for sustainable development, digital transformation, data accessibility, projections and frontier issues to move the world closer to achieving sustainable development for all;
 - (e) Enhance national implementation of internationally agreed objectives through its structured strategic and substantive support for the resident coordinator system and United Nations country teams, with a focus on countries in Africa and countries in special situations;
 - (f) Continue to support development cooperation with middle-income countries, in accordance with its mandate.
- 9.9 With regard to cooperation with other entities, the Under-Secretary-General for Economic and Social Affairs serves as convener of the expanded Executive Committee on Economic and Social Affairs Plus. The Department, through this Committee, works with United Nations entities to ensure that intergovernmental bodies contribute to the work of the high-level political forum on sustainable development and enhance common approaches and synergies to support implementation of the 2030 Agenda, including continued support to enhance the voluntary national reviews and reporting of progress towards the 2030 Agenda. The Department contributes to building multi-stakeholder partnerships and capacity development in thematic areas, including natural resources, water, energy, the climate, the ocean, transport, and science and technology, and special concerns of small island developing States. The Department also contributes to the Collaborative Partnership on Forests to enhance collaboration and coordination on the sustainable management of all types of forests, and the potential of forests to address global challenges.
- 9.10 With regard to inter-agency coordination and liaison, the Department continues to support the quadrennial comprehensive policy review of operational activities for development of the United Nations system. This work is coordinated with United Nations system entities and the United Nations Sustainable Development Group. With its established internal coordination capacity to support the resident coordinator system and the United Nations country teams, the Department continues to facilitate more structured engagement with resident coordinators, through the Development Coordination Office. This engagement further strengthens the Department's delivery of its capacity-building activities, assisting Member States in translating at the national level global norms and policy frameworks for achieving the 2030 Agenda and other internationally agreed objectives. The Department continues to rely on the leadership and coordination role of the resident coordinators to help identify effective country-level entry points and partnerships. Furthermore, the Department continues to work with various agencies and stakeholders to improve its capacities for policy analysis and knowledge production. The Department continues to chair or co-chair inter-agency mechanisms on disability, Indigenous Peoples, older persons and young people, legal identity,

financing for development, statistics, and science, technology and innovation, among others, ensuring coherence across these topic areas. As part of the ongoing effort to strengthen United Nations thought leadership, the United Nations Economists' Network continues to advance policy research on key current and emerging economic, financial and social development issues.

- 9.11 With regard to the external factors, the overall plan for 2025 is based on the following planning assumptions:
- (a) Continued cooperation with policymakers and relevant national, regional and international stakeholders and entities on sustainable development issues in the various intergovernmental processes serviced by the programme;
 - (b) Continued availability of up-to-date and accurate information, data and trends for the Department's analytical products;
 - (c) Governments and other relevant stakeholders continue to collaborate with the Department in undertaking the proposed programme activities with the necessary capacity and resources.
- 9.12 The Department continues to mainstream a gender perspective into its normative and analytical work and its support for intergovernmental bodies, including in its programme activities, deliverables and results as appropriate. It continues to apply gender analysis in its work and highlight issues related to gender equality in the substantive documentation, programme and deliberations of intergovernmental bodies, as appropriate. The Department's gender focal point network continues to serve as a resource on gender equality and mainstreaming, ensuring a gender perspective in the Department's programme of work.
- 9.13 In line with the United Nations Disability Inclusion Strategy, the Department promotes inclusive social and economic development for all, including persons with disabilities, and realizes the promise of the 2030 Agenda to leave no one behind. As secretariat to the Conference of States Parties to the Convention on the Rights of Persons with Disabilities, the Department facilitates global dialogue to address existing gaps in translating the international commitments to persons with disabilities into development policies, programming and practices at the national and international levels. This includes the compilation and analysis of disability data and the highlighting of best practices in fostering more accessible and disability-inclusive societies.

Legislative mandates

- 9.14 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

47/190	Report of the United Nations Conference on Environment and Development	55/279	Programme of Action for the Least Developed Countries for the Decade 2001–2010
47/191	Institutional arrangements to follow up the United Nations Conference on Environment and Development	57/144	Follow-up to the outcome of the Millennium Summit
50/227	Further measures for the restructuring and revitalization of the United Nations in the economic, social and related fields	57/253 57/270 B	World Summit on Sustainable Development
51/176	Implementation of the Programme of Action of the International Conference on Population and Development	58/220	Integrated and coordinated implementation of and follow-up to the outcomes of major United Nations conferences and summits in the economic and social fields
51/240	Agenda for Development	58/269	Economic and technical cooperation among developing countries
52/220	Questions relating to the proposed programme budget for the biennium 1998–1999	59/243	Strengthening of the United Nations: an agenda for further change
55/2	United Nations Millennium Declaration	60/1	Integration of the economies in transition into the world economy
			2005 World Summit Outcome

Part IV International cooperation for development

60/265	Follow-up to the development outcome of the 2005 World Summit, including the Millennium Development Goals and the other internationally agreed development goals	74/4; 78/1	Political declaration of the high-level political forum on sustainable development convened under the auspices of the General Assembly
62/208	Triennial comprehensive policy review of operational activities for development of the United Nations system	74/228	Role of the United Nations in promoting development in the context of globalization and interdependence
66/288	The future we want	75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
69/15	SIDS Accelerated Modalities of Action (SAMOA) Pathway		
69/143; 77/188	Implementation of the outcome of the World Summit for Social Development and of the twenty-fourth special session of the General Assembly	75/290 A	Review of the implementation of General Assembly resolutions 67/290 on the format and organizational aspects of the high-level political forum on sustainable development and 70/299 on the follow-up and review of the 2030 Agenda for Sustainable Development at the global level
69/151	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly	75/290 B	Review of the implementation of General Assembly resolution 72/305 on the strengthening of the Economic and Social Council
69/214	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development	76/204; 78/152 76/220; 78/166	Disaster risk reduction Operational activities for development of the United Nations system
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)	77/150; 78/132	Information and communications technologies for sustainable development
69/321	Revitalization of the work of the General Assembly	77/179; 78/164	Implementation of the Third United Nations Decade for the Eradication of Poverty (2018–2027)
70/1	Transforming our world: the 2030 Agenda for Sustainable Development	77/183; 78/165	Eradicating rural poverty to implement the 2030 Agenda for Sustainable Development
70/299	Follow-up and review of the 2030 Agenda for Sustainable Development at the global level	77/245; 78/232	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system		

Economic and Social Council resolutions

1998/7	Importance of population census activities for evaluation of progress in implementing the Programme of Action of the International Conference on Population and Development	2021/30	Open-source technologies for sustainable development
2007/2	The role of the United Nations system in providing full and productive employment and decent work for all	2022/18; 2023/11 2023/14	Mainstreaming a gender perspective into all policies and programmes in the United Nations system Creating full and productive employment and decent work for all as a way of overcoming inequalities to accelerate the recovery from the COVID-19 pandemic and the full implementation of the 2030 Agenda for Sustainable Development
2008/29; 2012/30	Role of the Economic and Social Council in the integrated and coordinated implementation of and follow-up to the outcomes of the major United Nations conferences and summits, in the light of relevant General Assembly resolutions, including resolution 61/16		

Economic and Social Council agreed conclusion

2007	Ministerial declaration on strengthening efforts to eradicate poverty and hunger, including through the global partnership for development		
------	--	--	--

Ministerial communiqués of the high-level segment of the substantive session of the Economic and Social Council

2002	The contribution of human resources development, including in the areas of health and education, to the process of development	2007	Strengthening efforts at all levels to promote pro-poor sustained economic growth, including through equitable macroeconomic policies
2003	Promoting an integrated approach to rural development in developing countries for poverty eradication and sustainable development	2007	Annual ministerial review on the theme “Strengthening efforts to eradicate poverty and hunger, including through the global partnership for development”
2004	Resources mobilization and enabling environment for poverty eradication in the context of the implementation of the Programme of Action for the Least Developed Countries for the Decade 2001–2010	2008	Development Cooperation Forum
		2008	Annual ministerial review on the theme “Implementing the internationally agreed goals and commitments in regard to sustainable development”

Evaluation activities

- 9.16 The following evaluations completed in 2023 have guided the proposed programme plan for 2025:
- (a) Thematic evaluation of United Nations Secretariat support to the Sustainable Development Goals conducted by the Office of Internal Oversight Services;
 - (b) Internal evaluation of Department-wide preparation of reports of the Secretary-General.

- 9.17 Results of the aforementioned evaluations have been considered for the proposed programme plan for 2025. For example, the Department is: (a) taking the lead on fostering data interoperability of Sustainable Development Goals data portals and databases in the Secretariat; and (b) improving the quality and impact of reports of the Secretary-General, strengthening the planning process and collaboration with all stakeholders to better address emerging issues and priorities of Member States.
- 9.18 The following evaluations are planned for 2025:
- (a) Evaluation on the integration of a gender perspective in the work of the Department;
 - (b) Evaluations on capacity-building activities.

Programme of work

Subprogramme 1

Intergovernmental support and coordination for sustainable development

Objective

- 9.19 The objective, to which this subprogramme contributes, is to advance the roles of the General Assembly, the Economic and Social Council and the high-level political forum on sustainable development in the integrated implementation of and follow-up to the 2030 Agenda and the outcomes of other United Nations conferences and summits in the economic, social, environmental and related fields.

Strategy

- 9.20 To contribute to the objective, the subprogramme will continue to provide substantive support to the Economic and Social Council and the high-level political forum on sustainable development in the promotion and review of the integrated implementation of the 2030 Agenda and related international commitments within the context of the follow-up to the 2023 political declaration adopted by the high-level political forum on sustainable development convened under the auspices of the General Assembly and the 2024 ministerial declaration of the high-level political forum. Specifically, the subprogramme will:
- (a) Provide evidence-based analysis and advice to support the Council by: (i) engaging in policy dialogue and formulating policy recommendations; (ii) coordinating the work of its subsidiary bodies and United Nations system entities; (iii) identifying and taking on new and emerging issues affecting the achievement of the Sustainable Development Goals; and (iv) reinforcing the linkages between policy discussions and review and national sustainable development efforts;
 - (b) Support the high-level political forum on sustainable development in the follow-up to and implementation of the 2030 Agenda by: (i) facilitating the progress review, policy dialogue and the development of policy recommendations for the accelerated achievement of the Sustainable Development Goals and the implementation of the 2030 Agenda; (ii) assisting countries in preparing evidence-based, inclusive and analytical voluntary national reviews of their implementation of the 2030 Agenda; and (iii) engaging United Nations country teams, other subprogrammes of the Department and United Nations system entities in supporting the review process;
 - (c) Provide substantive and secretarial support, upon request, to policy discussions and negotiations of the General Assembly, notably its Second Committee (economic and financial issues);
 - (d) Provide Member States with the evidence and analysis necessary for reviewing and guiding the operational activities of the United Nations development system based on mandates from the

Assembly's 2020 quadrennial comprehensive policy review of the operational activities for development of the United Nations system, including through the quadrennial comprehensive review monitoring and reporting framework, which will be redesigned in 2025, in collaboration with United Nations system entities;

- (e) Provide support to the resident coordinator system through webinars and other activities to guide the support of United Nations country teams for countries conducting voluntary national reviews, as well as to enable United Nations country teams to provide their coordinated assessment of the implementation of the quadrennial comprehensive policy review, in coordination with the Development Coordination Office;
- (f) Facilitate dialogue on policies and recommendations on effective, people-centred and gender-sensitive response measures to address the multiple and interlinked global food, energy, financial and climate crises in a way that accelerates the implementation of the 2030 Agenda, by providing analysis, country-level evidence and recommendations, including addressing the impacts on poverty, inequality and hunger, and on women and people in vulnerable situations so that no one is left behind;
- (g) Support the engagement of non-governmental organizations (NGOs) in the work of the Economic and Social Council¹ and the participation of major groups and other stakeholders in the high-level political forum on sustainable development;²
- (h) Strengthen the meaningful engagement of young people in the work of the United Nations by improving the annual Economic and Social Council youth forum, in cooperation with the United Nations Youth Office and subprogramme 2, and by facilitating the enhanced participation of youth speakers in other Council segments, forums and special meetings, as well as in the high-level political forum on sustainable development.

9.21 The above-mentioned work is expected to result in:

- (a) Enhanced policy and operational guidance by the General Assembly and the Economic and Social Council on the implementation of the 2030 Agenda at the global, regional and country levels;
- (b) Improved understanding by the high-level political forum on sustainable development of progress towards achieving the Sustainable Development Goals, the policies that have worked, levers and entry points, as well as gaps, challenges and new and emerging issues;
- (c) Better understanding among Member States, United Nations system organizations and other stakeholders of the multiple and interlinked global crises on the implementation of the 2030 Agenda, as well as of policy options and practical measures for addressing the global food, energy, financial and climate crises, while accelerating progress towards achieving the Sustainable Development Goals;
- (d) Progress at the country level towards realizing the Sustainable Development Goals, including in countries presenting voluntary national reviews at the high-level political forum on sustainable development;
- (e) More effective, efficient and coordinated United Nations development system support towards implementing the 2030 Agenda and responding to other crises, including support to voluntary

¹ Economic and Social Council resolution 1996/31 provides the legislative mandate and outlines the modalities that govern the consultative relationship with non-governmental organizations and the Council.

² Nine major groups were first identified in Agenda 21 at the United Nations Conference on Environment and Development in Rio de Janeiro, Brazil. Those major groups and some additional stakeholder groups were identified in General Assembly resolution 66/288, entitled "The future we want", as well as in some of the subsequent resolutions of the Assembly, namely, 67/290, 70/1, 70/299 and 72/305. The Assembly, in its resolution 67/290 on the format and organizational aspects of the high-level political forum on sustainable development, stressed the need for the forum to promote transparency and implementation by further enhancing the consultative role and participation of the major groups and other relevant stakeholders at the international level and decided that the forum should be open to the major groups and other relevant stakeholders.

national reviews, as well as improved and clearer guidance from Member States to the United Nations development system;

- (f) The voice of young people being heard at United Nations deliberations through the Economic and Social Council youth forum;
- (g) Improved engagement of NGOs in the work of the United Nations through support for the Economic and Social Council Committee on Non-Governmental Organizations, including through the use of the integrated Civil Society Organizations system;
- (h) Increased participation of major groups and other stakeholders in the work of the high-level political forum on sustainable development, as mandated in General Assembly resolution [67/290](#);
- (i) Better coordination and coherence in the global response to ongoing crises.

Programme performance in 2023

Achieving consensus by Member States on the political declaration adopted at the 2023 Sustainable Development Goals Summit

- 9.22 The subprogramme supported Member States in achieving consensus on the political declaration adopted by the high-level political forum on sustainable development convened under the auspices of the General Assembly in September 2023 (see Assembly resolution [78/1](#)). The subprogramme also supported the co-facilitators and the negotiation process, provided substantive guidance (including qualitative and quantitative data, as requested) and created an inclusive process for engagement by major groups and other stakeholders.
- 9.23 Progress towards the objective is presented in the performance measure below (see table 9.2).

Table 9.2

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
	Recovery and sustainable development were interlinked in the intergovernmental dialogue of Member States and stakeholders throughout the recovery from the pandemic	Intergovernmental dialogue focused on strengthened multilateralism to navigate crises

Planned results for 2025

Result 1: accelerated implementation of Sustainable Development Goals through effective preparatory process for voluntary national reviews

Programme performance in 2023 and target for 2025

- 9.24 The subprogramme's work contributed to 83 per cent of countries engaging more than one national entity in the preparation of their voluntary national reviews, which exceeded the planned target of 60 per cent.
- 9.25 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 9.I).

Figure 9.1
Performance measure: countries that engaged more than one national entity in the preparation of their voluntary national reviews

(Percentage)

Result 2: strengthened coordinated global response to multiple interlinked crises

Programme performance in 2023 and target for 2025

- 9.26 The subprogramme’s work contributed to enhanced international coordination and cooperation among Member States and other stakeholders in response to multiple, interlinked crises, which met the planned target.
- 9.27 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 9.3).

Table 9.3
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Strengthened international collaboration and solidarity and improved policies in the global response to the COVID-19 pandemic	Member States pursue coordinated response to interlinked global crises through policy dialogue and intergovernmental cooperation	Adoption of a forward-looking political declaration at the 2023 Sustainable Development Goals Summit	Accelerated efforts among Member States to achieve the Sustainable Development Goals by 2030, including by addressing ongoing and emerging global challenges in sustainable development, within the context of the 2024 high-level political forum on sustainable development and the Summit of the Future and its outcomes	Building on the momentum from previous forums, Member States commit to concrete, integrated and targeted policies and actions to achieve the 2030 Agenda

Result 3: strengthened role of the Economic and Social Council to support Member States to translate commitments from the Sustainable Development Goals Summit into actions and national policies

Proposed programme plan for 2025

9.28 The subprogramme provides support to the Economic and Social Council, including the high-level political forum on sustainable development. Pursuant to General Assembly resolutions 75/290 A and B, the Assembly is expected to review steps taken to strengthen the work of the Council in 2024.

Lessons learned and planned change

9.29 The lesson for the subprogramme was that strengthening coherence between the activities of the Council, its subsidiary bodies and the General Assembly can help better translate intergovernmental outcomes into policy guidance and practical actions. In applying the lesson, the subprogramme will support Member States and stakeholders in implementing the outcomes of the 2024 review process and will continue improving the preparatory process for the voluntary national reviews.

9.30 Expected progress towards the objective is presented in the performance measure below (see table 9.4).

Table 9.4
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Strengthened coordination between the Economic and Social Council and the General Assembly, leading to policy guidance from the Council that helps Member States translate commitments from the Sustainable Development Goals Summit into national policies and programmes	The Economic and Social Council provides policy guidance for the Summit of the Future	The Economic and Social Council and its subsidiary bodies provide policy guidance towards intergovernmental meetings, including the Fourth International Conference on Financing for Development

Deliverables

9.31 Table 9.5 lists all deliverables of the subprogramme.

14. High-level political forum on sustainable development: workshops (regional) on the preparation of voluntary national reviews in the context of the high-level political forum	5	5	5	5
15. High-level political forum on sustainable development: seminars, workshops and other events related to the preparation of the high-level political forum	4	4	4	4
Technical materials (number of materials)	13	11	11	12
16. Studies on the implementation of the quadrennial comprehensive policy review	7	7	6	7
17. Studies and materials on issues related to the Economic and Social Council	1	1	1	1
18. Studies and materials on issues related to the high-level political forum, including on the voluntary national reviews	4	3	4	3
19. Studies and materials on issues related to the Committee on Non-Governmental Organizations	1	–	–	1

C. Substantive deliverables

Consultation, advice and advocacy: consultations on resolutions of the General Assembly and the Economic and Social Council, including on the quadrennial comprehensive policy review of United Nations system operational activities for development and on the ministerial declarations of the Council and the high-level political forum on sustainable development and the reports of the Committee on Non-Governmental Organizations; provision of advice and analysis to the President and the Bureau of the Economic and Social Council, the Bureau of the Second Committee and joint Bureaux meetings, and Member States and stakeholders on sustainable development issues; consultation and advice to the Ad Hoc Advisory Group on Haiti; advocacy for the accelerated implementation of the 2030 Agenda and participation of NGOs, major groups and other stakeholders in the work of the Council and the high-level political forum; advocacy for the funding compact; advice on inter-agency coordination mechanisms.

Databases and substantive digital materials: database on voluntary national reviews (375 entries); database on input to the high-level political forum (1,400 entries); paperless committee for official documentation of the Committee on Non-Governmental Organizations (38 sessions); integrated information and communications technology platforms for some 6,000 NGOs in consultative status; indicator framework on the implementation of the quadrennial comprehensive policy review for Member States (400 new entries); database on the funding of United Nations operational activities for development (25,000 new entries); database on the funding compact agreed to by Member States and the United Nations Sustainable Development Group in 2024.

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

D. Communication deliverables

Outreach programmes, special events and information materials: information materials on the work of the Council, the Assembly and the high-level political forum on sustainable development; content for social media platforms, in collaboration with the Department of Global Communications; webinars for some 6,000 NGOs in consultative status on participation in the activities of the Council and the United Nations.

Digital platforms and multimedia content: web pages and multimedia content for the Council and the high-level political forum on sustainable development; website of the integrated Civil Society Organizations System.

Subprogramme 2 Inclusive social development

Objective

- 9.32 The objective, to which this subprogramme contributes, is to advance policies for the eradication of poverty, the reduction of inequality and the achievement of greater social inclusion and well-being for all.

Strategy

- 9.33 To contribute to the objective, the subprogramme will:
- (a) Conduct evidence-based research and analysis, including on Indigenous Peoples, persons with disabilities, older persons and young people;
 - (b) Monitor national and global socioeconomic trends to identify emerging issues and assess their implications for social policy at the national and international levels, which will help Member States to make progress towards achieving Sustainable Development Goals 1 to 11 and 16;
 - (c) Provide substantive support for intergovernmental dialogue and processes, including the sessions of the Commission for Social Development, the Permanent Forum on Indigenous Issues, the Conference of States Parties to the Convention on the Rights of Persons with Disabilities, the Open-ended Working Group on Ageing, the Economic and Social Council and the General Assembly;
 - (d) Engage in analytical work and provide intergovernmental support, technical advice and capacity development to requesting countries in partnership with resident coordinators and United Nations entities, including through the use of sport as an enabler of development and peace, as foreseen in the preamble of the 2030 Agenda;
 - (e) Support Member States on issues related to shocks and recovery, such as COVID-19, by promoting socially inclusive policy responses designed to eradicate poverty, reduce inequalities and protect the most vulnerable populations;
 - (f) Focus its analytical work on reducing inequality and strengthening social protection systems in the post-COVID-19 context, continue to focus on the situation of vulnerable segments of the population and engage more closely with United Nations country teams to enhance action at the national level in addressing the impact of COVID-19.
- 9.34 The above-mentioned work is expected to result in:
- (a) Enhanced knowledge and awareness of Member States to ensure that no one is left behind;
 - (b) Recognition by Member States of specific social development issues as a basis for action at the national level;

- (c) Increased capacity of Member States to effectively implement the social dimension of the 2030 Agenda and its Sustainable Development Goals;
- (d) Recovery of Member States from the COVID-19 pandemic with more resilient and inclusive societies, placing the world back on track to implementing the 2030 Agenda.

Programme performance in 2023

Availability of policy analysis and key messages that integrate demographic, economic and social lenses in the *World Social Report*

- 9.35 The subprogramme led the research and drafting of the *World Social Report 2023: Leaving No One Behind in an Ageing World*, in collaboration with two other subprogrammes, ensuring that the analysis, policy recommendations and key messages integrated demographic, economic and social lenses.
- 9.36 Progress towards the objective is presented in the performance measure below (see table 9.6).

Table 9.6
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	Member States express the need to better understand challenges and opportunities of population ageing, including a gender perspective	Availability of integrated policy recommendations in the <i>World Social Report</i> , including a gender perspective. The <i>Report</i> was cited in over 500 articles across 52 countries

Planned results for 2025

Result 1: strengthened cooperatives for inclusive development

Programme performance in 2023 and target for 2025

- 9.37 The subprogramme’s work contributed to countries and resident coordinators promoting and supporting cooperatives for the realization of the Sustainable Development Goals, which met the planned target.
- 9.38 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 9.7).

Table 9.7
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Member States adopted General Assembly resolution 76/135 , including a call on the United Nations system to support Governments in strengthening cooperatives	Regional and national stakeholders engaged towards strengthened cooperatives for the realization of the Sustainable Development Goals	Countries and resident coordinators promoted and supported cooperatives for the realization of the Sustainable Development Goals through workshops	Countries and resident coordinators advocate for an enabling environment for cooperatives	The International Year of Cooperatives is celebrated, further raising awareness of and supporting an enabling environment for cooperatives

Result 2: improved accessibility for the full and inclusive participation of persons with disabilities at the Conference of States Parties to the Convention on the Rights of Persons with Disabilities

Programme performance in 2023 and target for 2025

- 9.39 The subprogramme’s work contributed to a more accessible sixteenth session of the Conference by incorporating guidance and feedback received from the Bureau of the Conference, organizations of persons with disabilities, experts and stakeholders on specific modalities promoting accessibility, which met the planned target.
- 9.40 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 9.8).

Table 9.8
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
First-ever accessible virtual sessions of the Conference allowed for broader engagement of the disability community	Greater inclusion through introduction of official documents in easy-to-read format	Guidance and feedback on specific modalities promoting accessibility were received and incorporated in the organization of the Conference	Member States and other stakeholders exchange good practices on the use of specific modalities promoting accessibility	Good practices on the use of specific modalities exchanged by Member States are incorporated to continuously enhance the accessibility of the Conference

Result 3: improved coherence of the United Nations system efforts in addressing the needs of Indigenous Peoples

Proposed programme plan for 2025

- 9.41 In line with the outcome document of the 2014 World Conference on Indigenous Peoples (General Assembly resolution 69/2), the United Nations System Chief Executives Board for Coordination signed a call to action to accelerate the work of the system-wide action plan on the rights of Indigenous Peoples and strengthen collective efforts to achieve the United Nations Declaration on the Rights of Indigenous Peoples. The subprogramme, as the permanent Co-Chair of the Inter-Agency Support Group on Indigenous Peoples’ Issues, has organized round tables with resident coordinators and United Nations country teams and supported the development of an internal knowledge-sharing platform for stakeholders.

Lessons learned and planned change

- 9.42 The lesson for the subprogramme was that regular and targeted interactions with resident coordinators and United Nations country teams can help enhance stakeholders’ awareness, knowledge and capacity to address the needs and rights of Indigenous Peoples at the country level. In applying the lesson, the subprogramme will organize tailored briefings and capacity-building activities, and will finalize the development of an indicator framework for the system-wide action plan.
- 9.43 Expected progress towards the objective is presented in the performance measure below (see table 9.9).

Table 9.9
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	The Inter-Agency Support Group on Indigenous Peoples' Issues identified elements to develop an indicator framework for the system-wide action plan on the rights of Indigenous Peoples	The draft indicator framework for the system-wide action plan on the rights of Indigenous Peoples is piloted in selected countries	Additional countries use a final indicator framework for the system-wide action plan on the rights of Indigenous Peoples

Deliverables

9.44 Table 9.10 lists all deliverables of the subprogramme.

Table 9.10
Subprogramme 2: deliverables for the period 2023–2025, by category and subcategory

Part IV International cooperation for development

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
Seminars, workshops and training events (number of days)	10	11	10	10
14. Training events on social issues for Member States and other stakeholders, including lectures and multi-stakeholder panels	10	11	10	10
Publications (number of publications)	1	–	1	–
15. <i>World Youth Report</i>	–	–	1	–
16. Publication on Indigenous Peoples	1	–	–	–
Technical materials (number of materials)	9	7	7	6
17. Outcome documents of expert groups on various social issues	7	6	7	5
18. Update on the <i>Disability and Development Report</i>	1	–	–	–
19. Segments of the report of the Secretary-General on homelessness (joint report with the United Nations Human Settlements Programme (UN-Habitat))	1	1	–	1
C. Substantive deliverables				
Consultation, advice and advocacy: advice to requesting Member States on their socioeconomic situations and normative, policy and administrative frameworks on the social dimensions of sustainable development and the Sustainable Development Goals; briefings/expert advice to more than 40 Member States on sustainable development issues, including on high-level bilateral consultations and intergovernmental meetings.				
Databases and substantive digital materials: database on policies and measures to combat hunger and poverty.				
D. Communication deliverables				
Outreach programmes, special events and information materials: special events, including commemorations of international days on various social issues; policy briefs and communication activities to promote advancement of social development with a global reach.				
External and media relations: briefings, press conferences and press releases on various social issues.				
Digital platforms and multimedia content: electronic, audio and video messaging on ageing, cooperatives, disability, family, issues concerning Indigenous Peoples, young people, and sport for development and peace.				

Subprogramme 3 Sustainable development

Objective

- 9.45 The objective, to which this subprogramme contributes, is to accelerate the implementation of the 2030 Agenda, including the Sustainable Development Goals and their targets and commitments, through increased engagement of Member States and other stakeholders.

Strategy

- 9.46 To contribute to the objective, the subprogramme will:
- (a) Prepare analytical reports and assessments, maintain online databases and organize thematic expert meetings and conferences on specific Sustainable Development Goals and their interlinkages;
 - (b) Organize, in the months leading up to the high-level political forum on sustainable development, expert group meetings and conferences, accessible to Member States, on the themes of the forum and the Sustainable Development Goals that are under review;
 - (c) Play a central role in inter-agency coordination mechanisms on water, energy, small island developing States, oceans and transport and in the area of science, technology and innovation, and through its long-standing cooperation with specific agencies on issues such as climate change and partnership-building for sustainable development;

- (d) Coordinate the work of the Technology Facilitation Mechanism, including the multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals and the online platform on existing science, technology and innovation initiatives (2030 Connect);
- (e) Convene special events in connection with the high-level political forum on sustainable development, including the Sustainable Development Goals business forum and the local and regional governments forum, to allow the sharing of lessons learned and good practices related to the Goals by key stakeholder sectors and exchanges among Member States and all other stakeholders in the development arena;
- (f) Organize, in coordination with the regional commissions, resident coordinator offices and United Nations country teams, as applicable, capacity-building activities at the global, regional and national levels on the above topics.

9.47 The above-mentioned work is expected to result in:

- (a) Increased knowledge of Member States and other key stakeholders of the 2030 Agenda and the Sustainable Development Goals, including for their deliberations during the high-level political forum on sustainable development and other related forums, and for the development of related national policies and programmes;
- (b) Increased use of science and technology to leverage their full potential in the achievement of the Sustainable Development Goals by Member States and other stakeholders;
- (c) Increased integration of the Sustainable Development Goals into inclusive national planning processes, policies and strategies, and increased action and initiatives taken by Member States and other stakeholders to accelerate the implementation of the 2030 Agenda.

Programme performance in 2023

Strengthened synergies in addressing climate action and achieving the Sustainable Development Goals

9.48 Since 2019, the subprogramme, in partnership with the secretariat of the United Nations Framework Convention on Climate Change, has been co-convening an annual conference focusing on the synergistic implementation of the Paris Agreement and the 2030 Agenda. The Global Conference on Strengthening Synergies between the Paris Agreement and the 2030 Agenda for Sustainable Development provides a platform for political advocacy, knowledge-sharing and partnership-building among governments, academia, civil society and other stakeholder groups.

9.49 Progress towards the objective is presented in the performance measure below (see table 9.11).

Table 9.11
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
A set of key recommendations emerged from the virtual dialogues held in 2020 and 2021 (constituting the second Global Conference), calling for strengthened linkages between climate and the Sustainable Development Goals	The third Global Conference, held in Japan, with 2,000 participants, put forward a key recommendation of deepening the evidence base and conducting comprehensive global analysis on synergies between climate and the Sustainable Development Goals	The fourth Global Conference brought together 4,000 participants and linked the Paris Agreement with the 2030 Agenda and the Sustainable Development Goals Summit

Planned results for 2025

Result 1: an interdisciplinary look at implementation of the Sustainable Development Goals – the *Global Sustainable Development Report*

Programme performance in 2023 and target for 2025

- 9.50 The subprogramme's work contributed to the publication and launch of the *Global Sustainable Development Report* entitled *Times of Crisis, Times of Change: Science for Accelerating Transformations to Sustainable Development*. The *Report* assessed the progress in the implementation of the Sustainable Development Goals and proposed promising solutions grounded in evidence, which met the planned target.
- 9.51 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 9.12).

Table 9.12

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
<p>The new independent group of scientists gave a briefing to Member States during the 2021 high-level political forum on sustainable development with the outline of the report finalized</p> <p>A call for inputs is widely circulated to secure evidence from stakeholders, including underrepresented communities</p>	<p>Member States received a briefing by the independent group of scientists during the 2022 high-level political forum and participated in regional consultations, providing context-specific insights to inform the <i>Global Sustainable Development Report</i></p>	<p>The 2023 <i>Global Sustainable Development Report</i> was formally launched in September and was reflected in the political declaration adopted at the Sustainable Development Goals Summit (General Assembly resolution 78/1)</p> <p>A first series of global and regional briefings started after the launch in Asia-Pacific, Africa and Latin America and the Caribbean, focusing on localizing the global calls for action to support transformative implementation in different contexts</p>	<p>Member States integrate the findings of the report into their national development strategies and policies</p> <p>Appointment of a new group of 15 scientists for the preparation of the 2027 <i>Global Sustainable Development Report</i></p>	<p>The draft outline of the 2027 <i>Global Sustainable Development Report</i> is agreed and calls for inputs are launched</p> <p>Findings of the 2023 <i>Global Sustainable Development Report</i> are reflected in intergovernmental processes and decisions</p>

Result 2: strengthened commitment and action to address the unique needs of small island developing States

Programme performance in 2023 and target for 2025

- 9.52 The subprogramme’s work contributed to high participation in preparatory meetings for the fourth International Conference on Small Island Developing States and the development of a multidimensional vulnerability index, which met the planned target.
- 9.53 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 9.13).

Table 9.13
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
The General Assembly, in its resolution 76/203 , called for the convening, in 2024, of a fourth International Conference on Small Island Developing States	A first set of modalities of the 2024 Conference was defined by Member States	Member States, including 118 representatives of small island developing States, participated in the preparatory process for the fourth Conference, comprising 3 regional meetings and 1 interregional meeting The report of the High-level Panel on the Development of a Multidimensional Vulnerability Index for Small Island Developing States was issued	The Conference is held in Antigua and Barbuda An internationally agreed, focused, forward-looking and action-oriented outcome document is adopted by Member States and a monitoring framework is developed and agreed upon	New and additional mandates emanating from the outcome document of the fourth Conference are implemented, including the possible operationalization of the multidimensional vulnerability index Coordinated capacity-building support to small island developing States is initiated

Result 3: accelerated progress for Sustainable Development Goal 14 through the third United Nations Ocean Conference

Proposed programme plan for 2025

- 9.54 The subprogramme has been supporting the co-hosts, France and Costa Rica, to organize the third United Nations Ocean Conference, to be held from 9 to 13 June 2025 in Nice, France.

Lessons learned and planned change

- 9.55 The lesson for the subprogramme, based on the experience of the United Nations Ocean Conferences in 2017 and 2022, was that in-depth discussion on the implementation of Sustainable Development Goal 14 can help garner support for safeguarding the health and sustainability of the ocean. In applying the lesson, the subprogramme will produce more analytical background papers to inform the substantive meetings of the Conference by intensifying inter-agency cooperation.
- 9.56 Expected progress towards the objective is presented in the performance measure below (see table 9.14).

Table 9.14
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	The General Assembly decides to convene the third United Nations Ocean Conference in 2025	Adoption by the General Assembly of resolution 78/128 on the modalities for the third Ocean Conference	Preparatory meeting for the third Ocean Conference is held Member States agree on the overall thematic framework of the Conference	A political declaration, with commitments, is adopted by Member States at the third Ocean Conference

Deliverables

9.57 Table 9.15 lists all deliverables of the subprogramme.

Table 9.15
Subprogramme 3: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	12	19	12	12
Documentation for:				
1. The General Assembly	6	13	6	6
2. The high-level political forum on sustainable development	5	5	5	5
3. The multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	90	156	88	88
Meetings of:				
4. The General Assembly	42	96	42	42
5. The Economic and Social Council	4	2	2	2
6. The high-level political forum on sustainable development	30	42	30	30
7. The multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals	4	4	4	4
8. The independent group of scientists for the <i>Global Sustainable Development Report</i>	10	12	10	10
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	5	10	7	5
9. Projects on sustainable development (water, energy, sustainable transport, sustainable consumption and production, stakeholder engagement, small island developing States, partnerships, micro-, small and medium-sized enterprises, etc.)	5	10	7	5
Seminars, workshops and training events (number of days)	100	112	100	100
10. Training events on strengthening national capacities in all areas of sustainable development for and with national policymakers in developing countries and small island developing States with economies in transition	100	112	100	100
Publications (number of publications)	1	1	–	–
11. <i>Global Sustainable Development Report</i>	1	1	–	–

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
Technical materials (number of materials)	15	24	15	15
12. Publications on the 2030 Agenda for Sustainable Development	15	24	15	15

C. Substantive deliverables

Consultation, advice and advocacy: briefings/expert advice to Member States on sustainable development issues, including high-level bilateral consultations and intergovernmental meetings, and materials related to stakeholder engagement in the 2030 Agenda follow-up and review, and on multi-stakeholder partnerships in support of the Sustainable Development Goals.

Databases and substantive digital materials: public databases on voluntary initiatives, small island developing States, partnerships (7,000 registered), voluntary commitments made during the United Nations Conference to Support the Implementation of Sustainable Development Goal 14, Sustainable Development Goal good practices (500 registered), the United Nations system achievement of the Goals, Sustainable Development Goal acceleration actions (450 registered), the Technology Facilitation Mechanism, UN-Energy (200 commitments registered), harmony with nature and other topics of sustainable development.

D. Communication deliverables

Outreach programmes, special events and information materials: special meetings and side events on sustainable development issues during major United Nations conferences; and the issuance of the *Natural Resources Forum*.

Digital platforms and multimedia content: Sustainable Development Knowledge Platform.

Subprogramme 4 Statistics

Objective

- 9.58 The objective, to which this subprogramme contributes, is to strengthen the capacity of Member States with regard to the production and use of high-quality, timely, disaggregated, open data and national statistics and geospatial information as a basis on which to inform policy and decision-making for the 2030 Agenda and for other United Nations policy agendas and to review progress at the national and international levels.

Strategy

- 9.59 To contribute to the objective, the subprogramme will:
- (a) Develop, disseminate and support the implementation by Member States of statistical and geospatial information frameworks, standards and methods, especially those related to the Sustainable Development Goals, the Integrated Geospatial Information Framework and other new emerging policy issues;
 - (b) Provide technical assistance and advice to Member States through in-person and online training on topics, including modernization of statistical information systems, the Integrated Geospatial Information Framework, the use of big data, environmental-economic accounting, quality assurance and survey instruments, to fill data gaps and leave no one excluded from decision-making and policies that affect them;
 - (c) Facilitate and expand the coordination and coherence of international statistical and geospatial information programmes and activities by promoting the availability, accessibility and application of geospatial information, including the standardization of geographical names, and a better integration of statistical and geospatial information;
 - (d) Cooperate with the resident coordinator system and United Nations country teams in data and statistical activities and their interaction with the global statistical community, including through the Global Network of Data Officers and Statisticians, cooperate closely with other

international organizations and establish partnerships with civil society organizations, academia and private sector data providers;

- (e) Collect, compile and disseminate global statistical information and data in the areas of economic, social, demographic and environmental statistics, including the Sustainable Development Goal indicators, through the use of technology, such as the Statistical Data and Metadata Exchange;
- (f) Issue flagship data publications, maintain databases and data platforms and continue to modernize UNdata as a United Nations system-wide portal, and support the development of open data hubs and labs to showcase innovative uses of data and explore the visualization of data and metadata;
- (g) Collect information from Member States on the implementation of the Integrated Geospatial Information Framework and the Cape Town Global Action Plan for Sustainable Development Data for data relating to the 2030 Agenda, including on financing needs in the specific areas included in the Plan, in collaboration with the World Bank's Development Data Group, the Partnership in Statistics for Development in the 21st Century and the United Nations regional commissions;
- (h) Develop and share guidance and information on initiatives, tools and best practices to help national statistics systems to continue to operate efficiently and respond to the new specific data needs to address and mitigate the impact of global crises on societies, and to address issues of open and timely access to critical data needed by Governments and all sectors of society to accelerate the implementation of the 2030 Agenda.

9.60 The above-mentioned work is expected to result in:

- (a) The enhanced quality, availability and access to policy-relevant statistical and geospatial information;
- (b) Increased production and dissemination by Member States of better data and national statistics and geospatial information that are comparable and in line with the adopted international frameworks and standards, and provision of enhanced and open access to them;
- (c) Enhanced coherence and more effective functioning and transformation of the global statistical and geospatial systems;
- (d) Increased statistical and geospatial information capacity of Member States and the United Nations system.

Programme performance in 2023

Increased availability of internationally comparable data on the Sustainable Development Goals

- 9.61 The subprogramme has contributed to considerable progress in increasing the availability of such data by providing technical support for the implementation of the global indicator framework and capacity-building activities for selected countries. From 2016 to 2023, the Global Sustainable Development Goals Indicators Database expanded significantly, with an increase to the indicators from 115 to 227.
- 9.62 Progress towards the objective is presented in the performance measure below (see figure 9.II).

Figure 9.II
Performance measure: number of data records in the Global Sustainable Development Goals Indicators Database

Planned results for 2025

Result 1: increased engagement with trade statistics

Programme performance in 2023 and target for 2025

- 9.63 The subprogramme’s work contributed to the timely submission of annual and monthly trade data from 84 and 49 countries, respectively, for monitoring global economic trends, which exceeded the planned target of 75 and 45 countries that submitted annual and monthly data, respectively.
- 9.64 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 9.III).

Figure 9.III
Performance measure: number of countries that submitted timely trade data

Result 2: accelerated implementation of the Integrated Geospatial Information Framework

Programme performance in 2023 and target for 2025

- 9.65 The subprogramme’s work contributed to inclusive engagement and the development of six country-level action plans implementing an integrated whole-of-government approach to unlocking and sharing geospatial information capabilities, which met the planned target.
- 9.66 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 9.IV).

Figure 9.IV
Performance measure: number of countries that developed action plans based on the Integrated Geospatial Information Framework

Result 3: UNdata modernization: a single entry point for authoritative statistical data from the United Nations system

Proposed programme plan for 2025

9.67 The subprogramme is leading the modernization of the UNdata portal to provide policymakers and decision makers with a user-friendly single entry point for authoritative statistical data and metadata from the United Nations system and other partner organizations.

Lessons learned and planned change

9.68 The lesson for the subprogramme was the importance of user-centric design in enhancing data accessibility and the need for robust data governance and partnership with data producers from across the United Nations system. In applying the lesson, the subprogramme will simplify the user interface and provide tailored user guides and support, and will further implement clear data governance and establish a regular feedback mechanism to actively involve stakeholders in the ongoing development and refinement of the portal. The portal will continue to add data sets, incorporate disaggregated data and showcase artificial intelligence-based natural language search and analytical capabilities.

9.69 Expected progress towards the objective is presented in the performance measure below (see figure 9.V).

Figure 9.V
Performance measure: average number of UNdata user sessions per month

Deliverables

9.70 Table 9.16 lists all deliverables of the subprogramme.

Table 9.16

Subprogramme 4: deliverables for period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	20	27	22	21

37. <i>Monthly Bulletin of Statistics</i>	12	12	12	12
38. <i>World Statistics Pocketbook</i>	1	1	1	1
39. <i>Sustainable Development Goals Report</i>	1	1	1	1
40. <i>Progress chart on the Sustainable Development Goal indicators</i>	1	1	1	1
Technical materials (number of materials)	32	52	35	30
41. Technical materials on economic statistics	3	4	3	3
42. Technical materials on demographic and social statistics	2	3	1	2
43. Technical materials on environmental statistics and geospatial information	3	6	7	2
44. Technical materials on Sustainable Development Goal indicators and cross-cutting statistical areas	24	39	24	23

C. Substantive deliverables

Consultation, advice and advocacy: consultation and advice on economic, demographic and social and environmental statistics and geospatial information, Sustainable Development Goal indicators and cross-cutting statistical areas; and briefings/expert advice to Member States on sustainable development issues, including high-level bilateral consultations and intergovernmental meetings.

Databases and substantive digital materials: UN Comtrade Database, containing over 109 billion trade records, with 280,000 data files on annual and monthly trade in goods and services, 77,000 current registered user accounts and over 3 trillion items of downloaded trade data in 2023; UNdata platform, containing 60 million records, with 1 million users; Global SDG Indicators Database, containing 2.3 million data records, with 100,000 users; databases on cross-cutting statistical areas, with data for more than 200 statistical territories (includes countries and areas).

D. Communication deliverables

Outreach programmes, special events and information materials: outreach, events and information materials on economic, demographic and social, and environmental statistics and geospatial information, Sustainable Development Goal indicators and cross-cutting statistical areas.

Subprogramme 5 Population

Objective

- 9.71 The objective, to which this subprogramme contributes, is to improve knowledge of global population trends, advance an evidence-based understanding of interactions between population change and sustainable development among policymakers and the public, and strengthen the international community’s capacity to effectively address current and emerging population issues and integrate the population dimension into the international development agenda.

Strategy

- 9.72 To contribute to the objective, the subprogramme will:
- (a) Prepare studies on issues related to population growth, population ageing, migration, urbanization, fertility, family planning, mortality and other aspects of population in relation to sustainable development using population estimates and projections, the analysis of demographic trends and the evaluation of population policies;
 - (b) Produce comprehensive global data sets on selected topics, as well as brief reports to highlight these topics and related data, and an annual report on a selected major demographic topic. Data sets will include aggregated results for groups of countries in special situations;
 - (c) Provide capacity development on population data and analysis to requesting countries and to United Nations country teams;
 - (d) Provide substantive support to United Nations intergovernmental bodies, in particular the Commission on Population and Development, including by preparing reports and convening expert meetings and panels;
 - (e) Assist Governments in assessing progress made in implementing the Programme of Action of the International Conference on Population and Development held in 1994, with a focus on the global monitoring of Sustainable Development Goal indicators on reproductive health, international migration and child and maternal mortality, often in partnership with other entities of the United Nations system;
 - (f) Improve the United Nations estimates and projections of the global population and study the interaction of COVID-19 with demographic phenomena, including mortality, population ageing, fertility and family planning and international migration, and including these analyses, as appropriate, in publications and technical materials.
- 9.73 The above-mentioned work is expected to result in:
- (a) Improved access to data and reports on population matters for Governments and other users and increased use of the subprogramme's data and findings in the work of stakeholders;
 - (b) Increased awareness of population trends and their relationship to sustainable development through accurate data and policy-relevant reports, benefiting Member States and other stakeholders in policy and development planning;
 - (c) Advancement in the international community's usage of scientifically grounded information about the demographic impacts of the COVID-19 pandemic, in particular on mortality.

Programme performance in 2023

Better informed global analysis of gender equality and women's empowerment, which incorporates key population indicators

- 9.74 Family planning and adolescent birth rate data sets were incorporated into the new Women's Empowerment Index, a composite index created by the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) and the United Nations Development Programme to guide national and international policy action, research and advocacy. The subprogramme provided technical advice on the indicators and the construction of the Index.
- 9.75 Progress towards the objective is presented in the performance measure below (see table 9.17).

Table 9.17
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	–	Member States have access to more targeted population data that are integrated with other indicators on gender equality and women’s empowerment

Planned results for 2025

Result 1: strengthened evidence on population-related data and policies for the further implementation of the Programme of Action of the International Conference on Population and Development

Programme performance in 2023 and target for 2025

- 9.76 The subprogramme’s work contributed to Member States having access to integrated evidence on population-related programmes and policies, including through the collection of available regional and national reports on the 30-year review of implementation of the Programme of Action of the International Conference on Population and Development on the website of the Commission on Population and Development, which met the planned target.
- 9.77 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 9.18).

Table 9.18
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Expert panel stresses the need for strengthened integration of country inputs and outreach to countries	Participation of Member State delegates and civil society representatives in events on topics related to the Programme of Action of the International Conference on Population and Development	Countries benefit from strengthened integration of evidence in their preparations for the 2024 review of the Programme of Action	Review of the implementation of the Programme of Action by the Commission on Population and Development leads to renewed commitment by Member States to its further implementation	Countries implement commitments made at the Commission on Population and Development

Result 2: enhanced integration of the population dimension into implementation of the 2030 Agenda by Member States

Programme performance in 2023 and target for 2025

- 9.78 The subprogramme’s work contributed to a cumulative total of three data sets in the Data Portal with 156,000 annual users, which exceeded the planned target of three data sets and 75,000 annual users.
- 9.79 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 9.VI).

Figure 9.VI
Performance measure: number of users of the Data Portal (annual) and number of data sets contained in the Data Portal (cumulative)

Result 3: enhanced comparability of estimates and projections of urbanization and spatial distribution for the Sustainable Development Goals

Proposed programme plan for 2025

9.80 The *World Urbanization Prospects* is used within the United Nations system and among Member States as a measure of socioeconomic development and for the disaggregation of Sustainable Development Goal indicators by urban classification. Changes in spatial distribution of the global population have implications for managing urbanization in a sustainable and equitable manner and for achieving the Goals, particularly Goal 11, which calls for making cities and human settlements inclusive, safe, resilient and sustainable.

Lessons learned and planned change

9.81 The lesson for the subprogramme was that the *World Urbanization Prospects* data set could be improved to meet the growing demand for geographical detail and enhance comparability between countries, which was limited due to varied national definitions of “urban”. In applying the lesson, the subprogramme will build on the collaboration with relevant governments and partners to incorporate the new “degree of urbanization”, a more nuanced and internationally comparable measure of urbanization.

9.82 Expected progress towards the objective is presented in the performance measure below (see table 9.19).

Table 9.19
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
The degree of urbanization methodology was endorsed by the Statistical Commission	Selected countries piloted the new methodology to measure urbanization	Stakeholders and Member States contributed to methodological advancements in the estimation and projection of urbanization time series	Stakeholders and Member States contribute to a systematic update of the database used in the preparation of the <i>Demographic Yearbook</i> with census data on urban and rural populations	An increased number of stakeholders and Member States implement the new “degree of urbanization” to enable comparable global urbanization trends

Deliverables

9.83 Table 9.20 lists all deliverables of the subprogramme.

Table 9.20

Subprogramme 5: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	2	2	4	2

14. <i>World Population Policies: Highlights</i>	–	–	–	1
Technical materials (number of materials)	8	9	8	8
15. Major data sets on population topics	–	–	2	2
16. Sustainable Development Goal indicator data sets	1	2	1	1
17. Reports of expert group meetings on population topics	3	3	2	2
18. Technical papers on population topics	4	4	3	3
C. Substantive deliverables				
Consultation, advice and advocacy: briefings for and consultations with Member States concerning the annual session of the Commission on Population and Development; and briefings/expert advice to Member States on population and sustainable development issues, including high-level bilateral consultations and intergovernmental meetings.				
Databases and substantive digital materials: databases and data sets on population topics, including documentation.				
D. Communication deliverables				
Outreach programmes, special events and information materials: policy briefs, key messages and information kits on population topics; and special events on population topics.				
External and media relations: press conferences and press releases related to the Commission on Population and Development; press releases to support the launch of major publications or data sets; and responses to requests from Member States, the media, United Nations entities and other stakeholders.				
Digital platforms and multimedia content: interactive data visualizations and social media and multimedia content on population topics.				

Subprogramme 6

Economic analysis and policy

Objective

- 9.84 The objective, to which this subprogramme contributes, is to strengthen national capacities and international policy coordination for identifying and managing short-term macroeconomic risks, to shape medium- and long-term socioeconomic policies for development, and to accelerate sustainable development, especially of least developed countries, small island developing States and other countries in special situations.

Strategy

- 9.85 To contribute to the objective, the subprogramme will:
- (a) Monitor and forecast the macroeconomic situation at the national, regional and global levels, with a focus on countries in special situations, including the least developed countries;
 - (b) Broaden the scope of economic forecasting and simulation tools to assess policy trade-offs in promoting economic growth, while reducing poverty and inequality and enhancing environmental sustainability, in line with the 2030 Agenda;
 - (c) Support the Committee for Development Policy and provide analytical input to the intergovernmental processes related to the least developed countries, as well as to the annual themes of meetings of the Economic and Social Council and of the high-level political forum on sustainable development;
 - (d) Design and implement capacity development activities for a range of countries, including for graduating and recently graduated least developed countries, that improve capacity for economic planning monitoring and policymaking;
 - (e) Examine rapid technological change, noting both its constructive and disruptive potential and identifying the strategies and policies necessary to harness its positive potential for achieving sustainable development and to mitigate its possible negative effects;
 - (f) Provide policy guidance and recommendations on selected topics to Member States for recovery from recurrent shocks and crises, building on the subprogramme's analytical work;
 - (g) Provide support to the resident coordinator system for the provision of technical support to Member States and for the preparation of common country analyses and United Nations Sustainable Development Cooperation Frameworks, and other pertinent topics, through analytical input and customized online resources;
 - (h) Deliver the substantive leadership and coordination of the United Nations Economists' Network, which provides a platform that brings together United Nations system economists to share perspectives from the local, national, regional and global levels;
 - (i) Maintain the global economic outlook database, the least developed country criteria database, the Support Measures Portal for Least Developed Countries on international support measures and other online resources available to policymakers and other national and international stakeholders;
 - (j) Provide Member States with solid information for the formulation of global, regional and national policies, by gathering country-level empirical evidence, organizing expert group meetings and preparing background studies on short- and long-term economic development thematic issues.
- 9.86 The above-mentioned work is expected to result in:
- (a) Greater articulation of short-term macroeconomic stability with long-term development goals, while advancing the achievement of the Sustainable Development Goals, through the improved integration of economic, social and environmental priorities into national development plans and strategies;

- (b) Improved awareness among Member States of the multilateral efforts and economic policy options necessary for a sustainable recovery from recurrent shocks and crises, consistent with the 2030 Agenda;
- (c) Improved information basis for the Committee for Development Policy and the Economic and Social Council when assessing and recommending least developed countries for graduation;
- (d) Enhanced awareness and knowledge of Member States and the international community of the development trajectory of the least developed countries, their risks and challenges and the specific support options;
- (e) Increased capacity of Member States to effectively use international support measures, prepare for graduation from the least developed country category and ensure the stability of their development progress and the realization of the 2030 Agenda;
- (f) Enhanced collaboration, coordination and efficacy of the United Nations development system, which will provide a more coherent cooperation framework towards the implementation of the 2030 Agenda and bolster sustainable development at the country level.

Programme performance in 2023

Establishment of the Sustainable Graduation Support Facility

9.87 The subprogramme contributed to the establishment of the Sustainable Graduation Support Facility (iGRAD) by developing a concept, surveying country needs and piloting programmes, together with the Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States. The Facility was one of the five key deliverables of the Fifth United Nations Conference on the Least Developed Countries.

9.88 Progress towards the objective is presented in the performance measure below (see figure 9.VII).

Figure 9.VII

Performance measure: number of countries that received country-specific capacity-building under iGRAD

Planned results for 2025

Result 1: enhanced monitoring mechanism for graduating and recently graduated least developed countries, improved responsiveness to crisis and strengthened international support

Programme performance in 2023 and target for 2025

9.89 The subprogramme's work contributed to the development of the enhanced monitoring mechanism for the Committee for Development Policy, including a crisis response process, which met the planned target.

9.90 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 9.VIII).

Figure 9.VIII
Performance measure: number of least developed countries participating in the enhanced monitoring mechanism

Result 2: enhanced policy coherence in the implementation of the 2030 Agenda through a revitalized United Nations Economists’ Network

Programme performance in 2023 and target for 2025

9.91 The subprogramme’s work contributed to the revitalization of the United Nations Economists’ Network, with an increased number of entities in the United Nations system with members in the Network, which met the planned target. The Network provided a platform to strengthen United Nations thought leadership and provided guidance and policy advice on key issues, including on innovative financing, financial technology (fintech), digital economic transformation and the concept note on “New economics for sustainable development”.

9.92 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 9.IX).

Figure 9.IX
Performance measure: number of entities in the United Nations system with members in the United Nations Economists’ Network (cumulative)

Result 3: use of advanced policy simulation tools for data-driven and evidence-informed policymaking

Proposed programme plan for 2025

- 9.93 The subprogramme supports Member States with specific tools, such as the World Economic Forecasting Model, the core overlapping generations macroeconomy model and a climate, land-use, energy and water systems modelling tool to strengthen their capacity for data-driven and evidence-informed policymaking in mitigating the adverse effects resulting from various shocks.

Lessons learned and planned change

- 9.94 The lesson for the subprogramme was that it can be helpful to develop tools to account for interactions between different aspects of sustainable development and integrate data and models from multiple sectors. In applying the lesson, the subprogramme will further develop capacities to use innovative analytical modelling tools for supporting policymakers.
- 9.95 Expected progress towards the objective is presented in the performance measure below (see figure 9.X).

Figure 9.X

Performance measure: number of countries conducting quantitative assessments for coherent policymaking on sustainable development (cumulative)

Deliverables

- 9.96 Table 9.21 lists all deliverables of the subprogramme.

Table 9.21

Subprogramme 6: deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>

7. Publications on the world economy	1	1	1	1
8. Committee for Development Policy note	1	1	1	1
Technical materials (number of materials)	50	50	46	46
9. Background studies on development and frontier issues and the world economy	7	7	7	7
10. Presentations on the global economy	2	3	2	2
11. Monthly briefing notes on the world economic situation	12	10	11	11
12. Reports from meetings on the world economy, development and frontier issues	2	2	2	2
13. Committee for Development Policy background studies	10	10	10	10
14. Technical input for common country analyses/United Nations Sustainable Development Cooperation Frameworks	15	16	12	12
15. Policy briefs	2	2	2	2
C. Substantive deliverables				
Consultation, advice and advocacy: policy advice on economic thematic issues and/or economic national situations to Member States on sustainable development issues, including high-level bilateral consultations and intergovernmental meetings.				
Databases and substantive digital materials: ePing, an online platform with approximately 20,000 registered users, covering 189 countries; Support Measures Portal for Least Developed Countries on international support measures (100,000 page views and 393 updated entries); least developed country data and impact assessments (3 online databases, covering 143 countries and 23 years of data); modelling tools for sustainable development policies; and global economic outlook database.				
D. Communication deliverables				
External and media relations: 2 global and 5 regional press releases on the world economic situation.				

Subprogramme 7 Public institutions and digital government

Objective

- 9.97 The objective, to which this subprogramme contributes, is to advance effective, accountable and inclusive governance and public institutions for sustainable development, including through innovation, digital government and digital transformation.

Strategy

- 9.98 To contribute to the objective, the subprogramme will:
- (a) Service the Committee of Experts on Public Administration by organizing expert meetings and preparing analytical papers and technical guidelines to operationalize the principles of effective governance for sustainable development, developed by the Committee and endorsed by the Economic and Social Council in 2018, together with all relevant stakeholders;
 - (b) Promote policy guidance on innovation, digital government and digital transformation for the Sustainable Development Goals through the United Nations E-Government Survey, monitor global developments on institutional dimensions covered by Sustainable Development Goals 16 and 17 and review national institutional arrangements for the achievement of the Goals,

with a specific focus on countries in special situations, and in direct support of the follow-up on and review of the 2030 Agenda at the global level;

- (c) Foster policy dialogue and advocacy for the implementation of the outcomes of the World Summit on the Information Society and facilitate the implementation of and follow-up on its assigned action lines, namely, C1 (the role of Governments and all stakeholders in the promotion of information and communications technology (ICT) for development), C7 (ICT applications: benefits in all aspects of life (e-government)) and C11 (international and regional cooperation);
- (d) Facilitate multi-stakeholder policy dialogue on Internet governance, including discussion of public policy issues related to key elements of Internet governance, such as data governance, digital inclusion and data protection (A/75/16, para. 204), and shape policy decisions at the global, national and local levels by supporting the Secretary-General in convening the annual meeting of the Internet Governance Forum and intersessional activities;
- (e) Expand capacity development support to respond to Member States' requests for technical cooperation with regard to strengthening their governance and public institutions and their human resources capacities in support of the decade of action and delivery for sustainable development, including through partnerships with regional commissions and the resident coordinator system;
- (f) Expand work on equipping public servants with the capacities to realize the 2030 Agenda by providing advisory support and developing and piloting new methodologies on leadership, institutional arrangements for policy coherence, transparency and integrity in the public service, digital government, digital transformation and innovations in public service delivery, with an emphasis on countries in special situations, in collaboration with the resident coordinator system;
- (g) Strengthen the capacity of Member States to promote innovation in public governance through follow-up mechanisms to the United Nations Public Service Day Awards Ceremony and Forum, such as peer-to-peer learning for the transfer and adaptation of innovative practices, including on gender-sensitive analysis, and through the United Nations Public Administration Network;
- (h) Support supreme audit institutions on auditing the achievement of the Sustainable Development Goals by providing analytical work, expert advice, technical assistance and capacity-building, on the basis of existing demand for support by groups of the International Organization of Supreme Audit Institutions;
- (i) Promote and leverage public governance innovative practices and digital government strategies.

9.99 The above-mentioned work is expected to result in:

- (a) Enhanced awareness of emerging governance and public administration issues at the national and subnational levels and countries contextualizing institutional aspects of their voluntary national reviews so that Member States can develop their capacities to promote effective governance for sustainable development;
- (b) Increased capacities of Member States to build effective, accountable and inclusive institutions to deliver the Sustainable Development Goals;
- (c) Increased capacity of Member States in designing and implementing effective and inclusive digital government policies, strategies and services to improve people's lives at all levels of government;
- (d) Improved capacities of public servants to deliver services to people in areas such as health and education, justice, social protection and employment, with a focus on the improved professionalization of the public sector workforce and progress towards gender equality in the public sector;
- (e) Adjustments by Member States at the structural, organizational and programme levels to accelerate delivery of the Sustainable Development Goals;
- (f) Adoption of digital government strategies to build resilient societies and close digital divides.

Programme performance in 2023

Enhanced access to online services at the local level through the application of the Local Online Service Index methodology

- 9.100 The implementation of the Local Online Service Index methodology in two countries empowered officials to assess local e-government development, leading to informed legislative decision-making.
- 9.101 Progress towards the objective is presented in the performance measure below (see table 9.22).

Table 9.22
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
The Local Online Service Index methodology for assessing e-government development at the local level was piloted	The first application of the methodology at the country level occurred in 3 countries, with 18, 15 and 52 local assessments, respectively. The assessment outcomes enabled targeted resource mobilization, benefiting both national and local governments	The methodology implementation expanded to 2 more countries, with 18 and 14 local assessments, respectively. These assessments highlighted regional and local strengths and weaknesses, informing targeted investment strategies in e-government

Planned results for 2025

Result 1: public institutions empowered to spearhead climate action

Programme performance in 2023 and target for 2025

- 9.102 The subprogramme’s work contributed to the design of institutional arrangements to promote the evidence-based decision-making models related to climate, land-use, energy and water systems, which met the planned target.
- 9.103 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 9.23).

Table 9.23
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Enhanced capacities for integrated planning towards achieving the Sustainable Development Goals, linking post-COVID-19 recovery needs to long-term sustainable development objectives	National road map for the institutionalization of evidence-based decision-making related to climate, land-use, energy and water systems adopted by Namibia	Member States developed institutional, organizational and individual capacities to promote systems thinking related to climate, land-use, energy and water systems	Member States have institutionalized organizational capacities for systems thinking and strategic planning in support of climate action	Member States have the capacity to promote evidence-based decision making in support of climate action

Result 2: enhanced innovation and digital government transformation for effective and inclusive public service delivery

Programme performance in 2023 and target for 2025

- 9.104 The subprogramme's work contributed to the training of trainers through work with national schools of public administration, government ministries and agencies on changing mindsets, policy coherence, effective national to local governance, innovation and digital government transformation for effective and inclusive public service delivery. In 18 countries, 558 civil servants were trained on mainstreaming the curriculum on governance for the Sustainable Development Goals in their programmes and activities, which exceeded the planned target of 70 civil servants.
- 9.105 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 9.XI).

Figure 9.XI

Performance measure: number of civil servants supporting the preparation of action plans and road maps on innovation and digital government (annual)

Result 3: national implementation of the principles of effective governance for sustainable development to enhance trust in public institutions

Proposed programme plan for 2025

- 9.106 The operationalization of the principles of effective governance for sustainable development can contribute to effective, accountable and inclusive institutions. The subprogramme is developing strategy guidance notes to provide technical advice to Member States on how to promote effective governance, and is undertaking related capacity development activities.

Lessons learned and planned change

- 9.107 The lesson for the subprogramme was that engaging diverse partners in building capacities on the principles of effective governance for sustainable development can help public officials accelerate action to achieve the Sustainable Development Goals. In applying the lesson, the subprogramme will organize more joint activities with other partners, including resident coordinators, regional commissions and other United Nations entities, to build the capacities of public officials to implement the principles of effective governance.
- 9.108 Expected progress towards the objective is presented in the performance measure below (see table 9.24).

Table 9.24
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Public officials implemented more coherent and evidence-based policies	Public officials implemented administrative acts that balance the short-term needs of people today with the longer-term needs of future generations	Public officials at the national level promoted effective localization	Public officials increase transparency in the execution of their functions and promote access to information	Public officials utilize the principles of effective governance for sustainable development and associated tools to perform their functions

Deliverables

9.109 Table 9.25 lists all deliverables of the subprogramme.

Table 9.25
Subprogramme 7: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned

15. Online training courses on matters related to public administration	2	3	2	2
16. Technical materials on issues related to governance and public institutions for sustainable development	3	3	3	3
17. Compendium of best practices and innovation in public service delivery	1	1	1	1
18. Compendium of best practices on public institutions and digital government for sustainable development	1	1	1	1

C. Substantive deliverables

Consultation, advice and advocacy: briefings/expert advice to Member States on governance and public administration aspects of sustainable development, including consultations and intergovernmental meetings; knowledge-sharing and networks, including the United Nations Public Administration Network, a global network (more than 30 members and 5,000 users) that connects relevant international, regional, subregional and national institutions and experts worldwide working on effective governance for sustainable development in line with Sustainable Development Goals 16 and 17.

Databases and substantive digital materials: databases, including the United Nations Public Service Innovation Hub, with more than 350 good practices in public administration innovation at the national and subnational levels, and the e-government knowledge base, covering 193 Member States and the most populous cities in each Member State.

D. Communication deliverables

Outreach programmes, special events and information materials: United Nations Public Administration Network newsletter; social media content and alerts; virtual and in-person outreach activities on major deliverables.

Digital platforms and multimedia content: subprogramme websites, including of the United Nations Public Administration Network, the Division for Public Institutions and Digital Government, the United Nations Project Office on Governance and the Internet Governance Forum.

**Subprogramme 8
Sustainable forest management**

Objective

- 9.110 The objective, to which this subprogramme contributes, is to ensure the effective implementation of sustainable management of all types of forests at all levels in accordance with the United Nations strategic plan for forests 2017–2030.

Strategy

- 9.111 To contribute to the objective, the subprogramme will:
 - (a) Support the intergovernmental forest policy dialogue through the United Nations Forum on Forests, in accordance with the strategic plan and the quadrennial programme of work (2025–2028), and the outcomes of the midterm review in 2024 of the effectiveness of the international arrangement on forests and coordinate the Forum’s input to the high-level political forum on sustainable development;
 - (b) Advance coordination and cooperation with relevant United Nations entities, member organizations of the Collaborative Partnership on Forests and other forest stakeholders;
 - (c) Develop the online clearing house of the Global Forest Financing Facilitation Network and assist countries and partners in designing forest financing strategies, in facilitating access to financing and assisting Member States in mobilizing resources for sustainable forest management;

- (d) Place an emphasis on the special needs and circumstances of Africa, the least developed countries, countries with low forest cover, countries with high forest cover, countries with medium forest cover and low deforestation and small island developing States, as well as countries with economies in transition (Economic and Social Council resolution 2017/4, para. 63);
- (e) Advance the implementation of the United Nations strategic plan for forests 2017–2030, including through implementation of its communications and outreach strategy, and assist countries in developing robust national reporting frameworks;
- (f) Support common country analyses, which inform the United Nations Sustainable Development Cooperation Framework, in order to provide resident coordinators with the tools to tailor their responses to countries' specific needs and priorities and to effectively support the achievement of the 2030 Agenda, including through national implementation of sustainable forest management;
- (g) Support Member States, as appropriate, on issues related to sustainable forest management, by further deepening its normative work, technical assistance and capacity-building activities and international policy dialogue on the integration of sustainable forest management into decision-making processes concerning land-use planning and development, in line with the resolutions adopted by the United Nations Forum on Forests at its fifteenth and seventeenth sessions, and outcomes of the sixteenth and eighteenth sessions.

9.112 The above-mentioned work is expected to result in:

- (a) Strengthened political commitment and action for sustainable forest management, leading to increased contributions by forests to the achievement of the Sustainable Development Goals, including on climate change and biodiversity loss, and greater integration of forests into national sustainable development plans and poverty reduction strategies;
- (b) Improved capacity of eligible countries to mobilize and gain access to financing for sustainable forest management from all sources, and improved information on and access to existing and emerging multilateral and other funding sources and data;
- (c) Member States' progress towards achieving the global forest goals and the forest-related Sustainable Development Goals;
- (d) Increased awareness among Member States of the multiple benefits of forests based on the 2025 theme of the International Day of Forests, and on highlighting the interdependent role of forests in enabling the world to meet the Sustainable Development Goals that will be reviewed during the high-level political forum on sustainable development in 2025.

Programme performance in 2023

Improved capacity of Member States to mobilize and gain access to financing for sustainable forest management

- 9.113 The subprogramme provided capacity development support to Member States through the Global Forest Financing Facilitation Network, which contributes to the scaling up of sustainable forest management by facilitating access by countries to resources to implement the United Nations strategic plan for forests through the development of national forest financing strategies and bankable project proposals.
- 9.114 Progress towards the objective is presented in the performance measure below (see table 9.26).

Table 9.26
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	15 countries and 3 subregional organizations developed evidence-based national forest financing strategies and project proposals, resulting in the finalization of 4 project concept notes and 5 national/regional forest financing strategies	12 countries and 1 subregional organization developed evidence-based national forest financing strategies and project proposals, resulting in the finalization of 5 project concept notes and 4 national forest financing strategies

Planned results for 2025

Result 1: strengthened effectiveness of the international arrangement on forests, including the United Nations forest instrument, to contribute to the achievement of the Sustainable Development Goals, including on climate change and biodiversity loss

Programme performance in 2023 and target for 2025

- 9.115 The subprogramme’s work contributed to the development of proposals by Member States to strengthen the international arrangement on forests, which met the planned target.
- 9.116 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 9.27).

Table 9.27
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	Preparations for the 2024 midterm review of the effectiveness of the international arrangement on forests with involvement of Member States, regional and subregional partners, major groups and other relevant stakeholders	Member States developed proposals to strengthen the international arrangement on forests, such as enhancing the impact and visibility of the United Nations Forum on Forest	Member States decide on actions to strengthen the international arrangement on forests that also include national actions to enhance the contributions of forests to the achievement of the Sustainable Development Goals, including on climate change and biodiversity loss, and other global forest-related goals and commitments	The international arrangement on forests is strengthened in areas such as promoting cross-sectoral cooperation and catalysing technical and financial support to strengthen the capacity of Member States to implement sustainable forest management

Result 2: accelerating progress towards implementing the United Nations strategic plan for forests and achieving the global forest goals, including through partnerships

Programme performance in 2023 and target for 2025

- 9.117 The subprogramme's work contributed to accelerating the implementation of the United Nations strategic plan for forests through new joint initiatives being entered into with three member organizations of the Collaborative Partnership on Forests, which did not meet the planned target of two member organizations of the Collaborative Partnership on Forests, two regional and subregional entities and two stakeholders integrating the strategic plan into their workplans. The target was not met because regional and subregional entities and stakeholders had already undertaken numerous initiatives as part of their existing workplans.
- 9.118 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 9.28).

Table 9.28

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Member organizations of the Collaborative Partnership on Forests developed the Partnership's workplan for the period 2021–2024, which is aligned with the United Nations strategic plan for forests 2017–2030	Business and industry major group designated a new focal point to help to facilitate coordination and discussion on United Nations Forum on Forests-related issues with the private sector	Joint initiatives were signed to foster collaborative activities on forests and sustainable land management, conservation and sustainable use of forest biodiversity and sustainable management of tropical forests	2 joint initiatives among member organizations of the Collaborative Partnership on Forests, regional and subregional entities and stakeholders to accelerate implementation of the United Nations strategic plan for forests	3 joint initiatives to support reporting and data-sharing activities on the implementation of the United Nations strategic plan for forests

Result 3: increased reach of the United Nations Forum on Forests and contribution of forests to the 2030 Agenda

Proposed programme plan for 2025

- 9.119 The subprogramme implements the communications and outreach strategy of the United Nations strategic plan for forests through various activities, including statements, presentations and video messages at international events and developing engaging social media content for the International Day of Forests and sessions of the United Nations Forum on Forests. These activities promote awareness of how forests contribute to global sustainable development.

Lessons learned and planned change

- 9.120 The lesson for the subprogramme was that it could further enhance its outreach and communications strategy, both technically and substantively, to improve the utility of information provided to Member States. In applying the lesson, the subprogramme will redesign the substantive content and technical infrastructure of the website of the United Nations Forum on Forests and develop new and innovative communications products to raise awareness on the global forest goals and the contributions of forests to the 2030 Agenda.
- 9.121 Expected progress towards the objective is presented in the performance measure below (see table 9.29).

Table 9.29
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Member States have access to communications products with user-friendly design and functionality on issues related to forests and health, forest fires, and the contributions of forests to sustainable energy and livelihoods	Member States have access to best practices and relevant information through the redesigned website of the United Nations Forum on Forests, with an event calendar, a documents database and social media products	Member States exchange best practices and access new communications products to raise awareness on the social, economic and environmental benefits of forests

Deliverables

9.122 Table 9.30 lists all deliverables of the subprogramme.

Table 9.30
Subprogramme 8: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	8	8	8	8

7. Training events on sustainable forest management	1	1	1	1
Technical materials (number of materials)	7	8	7	7
8. Technical materials on sustainable forest management	3	3	3	3
9. Technical materials on contributions of forests to various issues, including forest-related Sustainable Development Goals	2	2	2	2
10. Technical materials on materials financing and development of national financing strategies	2	3	2	2

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
--------------------------	-----------------	----------------	-----------------	-----------------

C. Substantive deliverables

Consultation, advice and advocacy: advice on various issues related to forests.

Databases and substantive digital materials: database on clearing house mechanism.

D. Communication deliverables

Outreach programmes, special events and information materials: special events, including the International Day of Forests and events of the Collaborative Partnership on Forests; and fact sheets and policy briefs on sustainable forest management, forest financing and various other issues related to forests.

External and media relations: press releases and articles on the United Nations Forum on Forests and the International Day of Forests.

Subprogramme 9 Financing for sustainable development

Objective

- 9.123 The objective, to which this subprogramme contributes, is to advance the follow-up on and review of the implementation of the outcomes of the International Conferences on Financing for Development, including the Addis Ababa Action Agenda, and the delivery of the means of implementation of the 2030 Agenda.

Strategy

- 9.124 To contribute to the objective, the subprogramme will:
- (a) Coordinate the work and convene special events in connection with the Fourth International Conference on Financing for Development;
 - (b) Build on continuing analytical work in collaboration with partners in the Inter-Agency Task Force on Financing for Development and prepare the annual *Financing for Sustainable Development Report* and other reports to support Member State negotiations at the Economic and Social Council forum on financing for development follow-up, Second Committee deliberations and others;
 - (c) Scale up investment for the Sustainable Development Goals, provide concrete solutions to continue to scale up investment in sustainable development by building on the work of the Global Investors for Sustainable Development Alliance, and facilitate the dialogue on sustainable investment, including through the Sustainable Development Goals Investment Fair, which provides a platform for direct engagement between Member States and investors;
 - (d) Provide policy support to intergovernmental and expert processes and capacity-building to foster more inclusive and effective international tax cooperation and support Member States in enhancing their tax policies and administration, improve their domestic resource mobilization, address tax evasion, aggressive tax avoidance and illicit financial flows, and advance progress towards achieving the Sustainable Development Goals and climate action, with specific attention given to the least developed countries, landlocked developing countries and small island developing States;
 - (e) Enhance its support for the Development Cooperation Forum in its action-oriented and results-focused reviews of trends, progress and emerging issues in international development cooperation, with an emphasis on policies and practices in support of those with the fewest resources and the weakest capacities;
 - (f) Support countries in their design and implementation of integrated national financing frameworks, through the Integrated National Financing Framework Facility. The Facility,

launched by the Department jointly with the United Nations Development Programme and the Organisation for Economic Co-operation and Development in April 2022, brokers technical assistance, facilitates knowledge exchange and provides access to technical guidance on integrated national financing frameworks to implementing countries.

9.125 The above-mentioned work is expected to result in:

- (a) Policy and action on financing for sustainable development through strengthened analytical foundations for the outcomes of the Economic and Social Council forum on financing for development follow-up and Second Committee deliberations;
- (b) Countries designing and using integrated national financing frameworks, including actionable policy options, to mobilize financing for sustainable development;
- (c) The acceleration of the mobilization of resources for the Sustainable Development Goals, leading to greater investment opportunities with positive impacts, including in countries in special situations;
- (d) Improved solutions at the global, regional, national and local levels for strengthening tax cooperation and domestic resource mobilization and more effective implementation by Governments and other stakeholders of United Nations policy and practical guidance on tax matters;
- (e) Utilization by Governments and other stakeholders of policy guidance to enhance international development cooperation, for the effective implementation of the 2030 Agenda, the Addis Ababa Action Agenda, the Paris Agreement and the Sendai Framework for Disaster Risk Reduction 2015–2030.

Programme performance in 2023

Sustainable Development Goal stimulus facilitates long-term financing for Member States

9.126 The subprogramme supported the development of the Sustainable Development Goal stimulus, a set of proposals to mobilize an additional \$500 billion in long-term affordable financing, and continued analytical work on specific policy options for closing the finance divide. In February 2023, a detailed policy brief on the stimulus was published and the subprogramme organized a high-level event at the Sustainable Development Goals Summit.

9.127 Progress towards the objective is presented in the performance measure below (see table 9.31).

Table 9.31

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
–	Member States recognized that developing countries are faced with significantly higher borrowing costs, contributing to a great finance divide (General Assembly resolution 77/156)	Member States welcomed the Secretary-General's efforts to address the Sustainable Development Goal financing gap through the Sustainable Development Goal stimulus (General Assembly resolution 78/231). Member States also advanced new capital optimization measures of multilateral development banks and the rechannelling of special drawing rights through the International Monetary Fund

Planned results for 2025

Result 1: towards attracting sustainable investment by developing countries for the Sustainable Development Goals

Programme performance in 2023 and target for 2025

- 9.128 The subprogramme's work contributed to 14 developing countries participating in the Sustainable Development Goals Investment Fair and interacting with prospective investors on sustainable development investment opportunities, which exceeded the planned target of 12 developing countries.
- 9.129 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 9.32).

Table 9.32

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
8 developing countries participated in the Sustainable Development Goals Investment Fair	10 developing countries participated in the Sustainable Development Goals Investment Fair	14 developing countries participated in the Sustainable Development Goals Investment Fair, with presented investment projects of \$4,869 million	13 developing countries participate in the Sustainable Development Goals Investment Fair and interact with prospective investors	14 developing countries participate in the Sustainable Development Goals Investment Fair, with estimated presented investment projects of \$5,367 million
Private investors, such as the members of the Global Investors for Sustainable Development Alliance, welcomed the Fair as an opportunity to engage with Governments				
Investors followed up with some countries on specific projects				

Result 2: creditors and debtor countries agree on global challenges and policy solutions on debt, liquidity and fiscal space for investment in the Sustainable Development Goals

Programme performance in 2023 and target for 2025

- 9.130 The subprogramme's work contributed to the identification of relevant issues and priorities on debt and debt sustainability through the organization of dedicated expert meetings, which will also help inform future discussions of Member States and other stakeholders, which met the planned target.
- 9.131 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 9.33).

Table 9.33
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Member States and relevant partners in the United Nations system provided feedback and guidance on priority issues related to debt, liquidity and fiscal space to inform the development of policy dialogues	Policy solutions on debt, liquidity and fiscal space for investment in the Sustainable Development Goals discussed and/or agreed	Member States agree on concrete actions to advance policy solutions on debt, liquidity and fiscal space for investment in the Sustainable Development Goals, as part of an outcome document of the Fourth International Conference on Financing for Development

Result 3: strengthened engagement of Member States in the financing for development follow-up process to improve coherence and implementation of agreed outcomes

Proposed programme plan for 2025

9.132 The subprogramme supports Member States in the follow-up process of the Addis Ababa Action Agenda to address challenges related to financing for development, including through the annual Economic and Social Council forum on financing for development follow-up and the annual *Financing for Sustainable Development Report*.

Lessons learned and planned change

9.133 The lesson for the subprogramme was that strengthening engagement with all stakeholders and national Governments could help authorities meet their national financing challenges and contribute to broad awareness at the national level of global agreements on financing for development. In applying the lesson, the subprogramme will utilize the preparatory process for the Fourth International Conference on Financing for Development in 2025 and the follow-up process to strengthen engagement with all stakeholders.

9.134 Expected progress towards the objective is presented in the performance measure below (see figure 9.XII).

Figure 9.XII

Performance measure: number of countries participating in the intergovernmental follow-up process to the international conferences on financing for development

Deliverables

9.135 Table 9.34 lists all deliverables of the subprogramme.

Table 9.34

Subprogramme 9: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	39	59	36	43
1. Documents for the General Assembly	6	5	4	10
2. Documents for the Economic and Social Council	3	3	2	3
3. Documents for the Committee of Experts on International Cooperation in Tax Matters	30	51	30	30
Substantive services for meetings (number of three-hour meetings)	191	243	151	161
Meetings of:				
4. The General Assembly	10	10	10	10
5. The Economic and Social Council	30	30	20	20
6. The Committee of Experts on International Cooperation in Tax Matters	16	16	16	16
7. Subcommittees of the Committee of Experts on International Cooperation in Tax Matters	75	127	75	75
8. The Inter-Agency Task Force on Financing for Development	30	30	15	15
9. Experts on financing for sustainable development-related issues	30	30	15	15
10. Intergovernmental preparatory committee for the Fourth International Conference on Financing for Development	–	–	–	10
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	44	55	39	39
11. Training events on financing for development processes	2	2	2	2
12. Workshops on tax issues and domestic resource mobilization	35	46	35	35
13. Training events on interactive dialogues	2	2	–	–
14. Ministerial round tables	2	2	–	–
15. Seminars on financing for development, including interactive discussions with the participation of Governments and institutional and non-institutional stakeholders (civil society and the private sector)	3	3	2	2

Part IV International cooperation for development

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
Publications (number of publications)	2	1	1	–
16. <i>Financing for Sustainable Development Report</i> of the Inter-Agency Task Force on Financing for Development	1	1	1	–
17. <i>United Nations Manual for the Negotiation of Bilateral Tax Treaties between Developed and Developing Countries</i>	1	–	–	–
Technical materials (number of materials)	4	5	3	3
18. Building on Monterrey: selected policy issues on financing for development	1	1	1	1
19. Analytical studies on selected issues in development cooperation, including South-South cooperation, and an independent assessment of trends and progress in development cooperation	3	4	2	2

C. Substantive deliverables

Consultation, advice and advocacy: briefings to Member States; consultations on the work of the Group of Friends on Financing the Sustainable Development Goals; consultations on financing sustainable development and the Goals to civil society organizations, the private sector, including the Global Investors for Sustainable Development Alliance, academia, foundations and other entities of the United Nations system; and briefings/expert advice to Member States on sustainable development issues, including high-level bilateral consultations and intergovernmental meetings.

D. Communication deliverables

Outreach programmes, special events and information materials: Development Cooperation Forum outreach materials; and information kit for events on financing for sustainable development.

External and media relations: press releases on its annual work, including: Economic and Social Council forum on financing for development follow-up; quadrennial General Assembly high-level dialogue on financing for development; biennial Development Cooperation Forum high-level meeting; event on financing for sustainable development multi-stakeholder consultations on financing for development; work of the Committee of Experts on International Cooperation in Tax Matters; Sustainable Development Goals Investment Fair; launch of the *Financing for Sustainable Development Report*; and work of the Global Investors for Sustainable Development Alliance.

Digital platforms and multimedia content: Op-eds and blogs; websites of the Financing for Sustainable Development Office, the Development Cooperation Forum and the Committee of Experts on International Cooperation in Tax Matters, related digital platforms for capacity development activities, and website of the joint Department of Economic and Social Affairs/United Nations Capital Development Fund and United Nations Office for Project Services global capacity development initiative on infrastructure asset management; and the website of the Global Investors for Sustainable Development Alliance and the integrated national financing frameworks knowledge platform.

B. Proposed post and non-post resource requirements for 2025

Overview

9.136 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 9.35 to 9.37.

Table 9.35

^a Includes nine temporary posts (3 P-5, 2 P-4, 3 P-3 and 1 GS (OL)), which were approved pursuant to General Assembly resolutions [70/248](#) and [71/272](#).

9.137 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 9.38 to 9.40 and figure 9.XIII.

9.138 As reflected in tables 9.38 (1) and 9.39 (1), the overall resources proposed for 2025 amount to \$96,603,800 before recosting, reflecting a net decrease of \$51,900 (or 0.1 per cent) compared with the approved budget for 2024. Resource changes result from technical adjustments, and new and expanded mandates. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Distribution of proposed resources for 2025 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

9.139 As reflected in table 9.38 (1), resource changes reflect a net decrease of \$85,200, as follows:

- (a) **Subprogramme 3, Sustainable development.** The decrease of \$66,700 relates to the removal of non-recurrent provisions (consultants) approved for 2024, pursuant to General Assembly resolution [78/232](#) on the follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States;
- (b) **Subprogramme 4, Statistics.** The increase of \$523,500 relates to the higher provision at continuing vacancy rates for seven new posts (1 Chief of Section, Geospatial Information (P-5), 1 Geospatial Information Officer (P-4), 2 Geospatial Information Officers (P-3), 2 Associate Geospatial Information Officers (P-2) and 1 Programme Management Assistant (General Service (Other level)) established pursuant to General Assembly resolution [78/252](#), which were approved for 2024 at a 50 per cent vacancy rate, in line with the established practice;
- (c) **Subprogramme 5, Population.** The increase of \$77,700 relates to the higher provision at continuing vacancy rates for a new post of Data Engineer (P-3) established pursuant to General Assembly resolution [78/252](#), which was approved for 2024 at a 50 per cent vacancy rate, in line with the established practice;
- (d) **Subprogramme 9, Financing for sustainable development.** The decrease of \$619,700 relates to the removal of non-recurrent provisions (other staff costs, contractual services and general operating expenses) approved for 2024 pursuant to General Assembly resolution [78/230](#) on the promotion of inclusive and effective international tax cooperation at the United Nations.

New and expanded mandates

9.140 As reflected in table 9.38 (1), resource changes reflect an increase of \$33,300 under subprogramme 2, Inclusive social development, relating to non-recurrent provisions for the preparation, in collaboration with UN-Habitat, of a report on inclusive policies and programmes to address

homelessness, including in the aftermath of COVID-19, pursuant to General Assembly resolution [78/172](#). The resources would provide for a consultant to conduct focused research on challenges faced in the implementation of inclusive social development policies with a focus on disadvantaged social groups, such as Indigenous Peoples, older persons, persons with disabilities and young people, as well as providing recommendations on access for all to adequate, safe and affordable housing.

Extrabudgetary resources

- 9.141 As reflected in tables 9.38 (2) and 9.39 (2), extrabudgetary resources amount to \$101,612,500. The resources would complement regular budget resources and would be used mainly to provide for various substantive and capacity development activities. Extrabudgetary estimates also include resources in the amount of \$62,307,700 for the trust fund for the Junior Professional Officers Programme, which the Department administers (reflected under programme support).
- 9.142 Anticipated in-kind contributions will provide for donated right of use of premises for project offices with an estimated value of \$446,000 (\$245,000 under subprogramme 3, \$158,000 under subprogramme 4 and \$43,000 under subprogramme 7), and other services such as expert advice, use of training facilities and provision of equipment, with an estimated value of \$472,000 (\$127,000 under subprogramme 3 and \$345,000 under subprogramme 7).
- 9.143 The extrabudgetary resources under this section are subject to the oversight of the Under-Secretary-General for Economic and Social Affairs, who has delegated authority from the Secretary-General.

Policymaking organs

- 9.144 The resources proposed under this component would provide for the policymaking organs as shown in table 9.41.

Table 9.41
Policymaking organs
 (Thousands of United States dollars)

<i>Policymaking organ</i>	<i>Additional information</i>	<i>2024 approved</i>	<i>2025 estimate (before recosting)</i>
High-level political forum on sustainable development	Mandate: General Assembly resolutions 66/288 , 67/290 , 70/299 and 75/290 B Membership: All States Members of the United Nations and States members of the specialized agencies Number of sessions in 2025: 1 (annual session under the auspices of the Economic and Social Council)	448.8	400.0
Commission for Social Development	Mandate: Economic and Social Council resolutions 10 (II) , 1139 (XLI) , 1996/7 and 2016/6 Membership: 46 government officials Number of sessions in 2025: 1	136.3	136.3
Permanent Forum on Indigenous Issues	Mandate: Economic and Social Council resolution 2000/22 Membership: 16 experts Number of sessions in 2025: 1	236.1	236.1
Statistical Commission	Mandate: Economic and Social Council resolution 1566 (L), reaffirming its resolution 8 (I) , as amended by 8 (II) of 1946; and resolutions 2006/6, 2020/5 and 2022/3 Membership: 24 government officials Number of sessions in 2025: 1	70.8	140.0

Part IV International cooperation for development

<i>Policymaking organ</i>	<i>Additional information</i>	<i>2024 approved</i>	<i>2025 estimate (before recosting)</i>
Committee of Experts on Global Geospatial Information Management	Mandate: Economic and Social Council resolutions 2011/24, 2016/27 and 2022/24 Membership: experts from all Member States and experts from international organizations who participate as observers Number of sessions in 2025: 1	–	–
Commission on Population and Development	Mandate: Economic and Social Council resolutions 3 (III), 150 (VII) and 2016/25 and decision 1995/320, and General Assembly resolution 49/128 Membership: 47 government officials Number of sessions in 2025: 1	81.7	140.0
Committee for Development Policy	Mandate: Economic and Social Council resolutions 1998/46 and 2023/10 and General Assembly resolution 67/221 Membership: 24 experts serving in their personal capacity from the fields of economic development, social development and environmental protection Number of sessions in 2025: 1	230.5	230.5
Committee of Experts on Public Administration	Mandate: Economic and Social Council resolutions 2001/45 and 2003/60 Membership: 24 experts serving in their personal capacity from the interrelated fields of public economics, public administration and public finance Number of sessions in 2025: 1	223.0	223.0
United Nations Forum on Forests	Mandate: Economic and Social Council resolutions 2000/35 and 2015/33 and General Assembly resolution 71/285 Membership: 197 government officials Number of sessions in 2025: 1	67.4	67.4
Committee of Experts on International Cooperation in Tax Matters	Mandate: Economic and Social Council resolutions 1273 (XLIII), 2004/69 and 2017/2 and General Assembly resolution 69/313 Membership: 25 experts nominated by Governments and acting in their expert capacity Number of sessions in 2025: 2	526.5	447.8
Total		2 021.1	2 021.1

9.145 The proposed regular budget resources for 2025 amount to \$2,021,100 and reflect no change compared with the approved budget for 2024. Additional details on the distribution of the proposed resources for 2025 are reflected in table 9.42.

Executive direction and management

- 9.146 The Under-Secretary-General for Economic and Social Affairs is responsible for the overall management and administration of the Department in the effective implementation of its mandates and its approved programme of work, and the accountable use of the Department's human, financial and physical resources. He serves as the convener of the Executive Committee on Economic and Social Affairs; a member of the United Nations Sustainable Development Group; and Programme Manager of the United Nations Development Account, including capacity development activities. The Under-Secretary-General is assisted by the Assistant Secretary-General for Policy Coordination and the Assistant Secretary-General for Economic Development.
- 9.147 The Assistant Secretary-General for Policy Coordination supports the Under-Secretary-General by providing substantive policy advice on departmental support to intergovernmental processes, including the General Assembly, the Economic and Social Council and its subsidiary bodies, and the high-level political forum on sustainable development. The incumbent also supports the work of the United Nations Sustainable Development Group and the United Nations System Chief Executives Board for Coordination.
- 9.148 The Assistant Secretary-General for Economic Development serves as the principal economic adviser to the Under-Secretary-General and assists in providing thought leadership and guidance on the Department's policy research and analysis work, including on frontier and emerging issues. The incumbent also coordinates and reviews the publications of the Department, reports of the Secretary-General and other technical products that amplify and deliver the work of the Department on global development policy.
- 9.149 Furthermore, the Assistant Secretaries-General are assigned responsibility for the substantive oversight and coordination of specific subprogrammes, within the authority delegated by the Under-Secretary-General, as reflected in annex I.B on the proposed organizational structure and post distribution for 2025. This management configuration would assist the Department in managing its response to the increasing demands on its substantive programmes.
- 9.150 The Office of the Under-Secretary-General supports the senior leadership in the overall coordination and management of its programmes and resources, the implementation of Department-wide initiatives and the overall programming, monitoring and evaluation activities. It also facilitates the work of the Department's gender and disability inclusion focal points and is responsible for the review of legislative reports and flagship publications of the Department.
- 9.151 Within the Office of the Under-Secretary-General are the Strategic Planning and Communications Service and the Programme, Monitoring and Evaluation Unit. The Strategic Planning and Communications Service supports the Under-Secretary-General in advancing the Department's strategic direction, integration and policy coherence, including its collaborative work with other Secretariat entities in the areas of knowledge management, communications, websites, social and multimedia outreach, publishing and information technology. It supports the Department's engagement in the Secretary-General's Executive Committee and coordinating mechanisms or bodies and represents the Department in relevant Secretariat policy and normative bodies, including the Publications Board, the Information and Communications Technology Board and the United Nations Communications Group. It also supports the Department's editorial board and departmental strategic planning and communications networks, as well as the implementation of the Department's strategic communications framework.
- 9.152 The Programme, Monitoring and Evaluation Unit coordinates the preparation of the Department's annual programme plan and is responsible for the internal monitoring and evaluation of the Department's work. It supports evaluations and audits by oversight bodies. It also produces monitoring reports for senior management decision-making. The Unit operates independently from other operational and management functions within the Department.
- 9.153 In line with target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), the Department

integrates environmental management practices into its operations. The Department uses online platform tools and organizes meetings and workshops in a virtual or hybrid format, whenever possible. In 2025, the Department will continue to reduce its paper use and waste through the electronic distribution of documents and materials, increase the paperless conduct of meetings and increase its focus and efforts on the online readability of publications. Whenever supported by donors, the Department will offset the greenhouse gas emissions generated by air travel in connection with large-scale conferences. The Organization’s policy on avoiding single-use plastics at Department-organized events is strictly observed.

9.154 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 9.43. The travel compliance improved in 2023 compared to that of 2022, although advance planning has remained challenging. The Department has provided internal guidance on the advance booking policy, especially related to intergovernmental meetings, workshops and events it organizes. The late receipt of voluntary contributions and late nominations of non-staff travellers also contributed to a lower rate of compliance. The Department will continue its efforts to improve the compliance rate by, among other things, promoting advance planning for all Department events and working more closely with Governments on the nominations of representatives. In 2023, the Department continued to submit nearly all its documents within the prescribed timelines.

Table 9.43
Compliance rate
(Percentage)

	2021 actual	2022 actual	2023 actual	2024 planned	2025 planned
Timely submission of documentation	98	98	95	100	100
Air tickets purchased at least two weeks before the commencement of travel	41	48	60	100	100

9.155 The proposed regular budget resources for 2025 amount to \$5,417,800 and reflect no change compared with the approved budget for 2024. Additional details on the distribution of the proposed resources for 2025 are reflected in table 9.44 and figure 9.XIV.

Programme support

- 9.165 Programme support comprises the Executive Office and the Capacity Development Programme Management Office.
- 9.166 The Executive Office supports the Under-Secretary-General, as follows: (a) in his exercise of the delegation of authority to manage the human, financial and physical resources of the Department; (b) in the context of the monitoring and accountability framework; and (c) as his main interlocutor with the Department of Management Strategy, Policy and Compliance and the Department of Operational Support, including in relation to participation in focal point networks or committees in support of various management-related reform initiatives. The Executive Office also provides administrative support to other entities at Headquarters.
- 9.167 The Capacity Development Programme Management Office manages and coordinates the capacity development function of the Department by providing strategic guidance and coordination for the formulation and implementation of coherent and integrated capacity development activities to support Member States in translating the outcomes of major United Nations conferences and intergovernmental processes into national strategies and plans. The Office manages both regular and extrabudgetary resources. It also promotes and supports strategic cooperation and partnerships within the Secretariat and with the United Nations development system at large, including the resident coordinator system, to ensure more coherent and integrated support to the implementation of the 2030 Agenda for Sustainable Development and the Addis Ababa Action Agenda at the country level. The Office supports the Under-Secretary-General in his role as Programme Manager of the United Nations Development Account. It also manages the Junior Professional Officers Programme for the Secretariat and for the resident coordinator system.
- 9.168 The proposed regular budget resources for 2025 amount to \$5,452,800 and reflect no change compared with the approved budget for 2024. Additional details on the distribution of the proposed resources for 2025 are reflected in table 9.54 and figure 9.XXIV.

Annex I

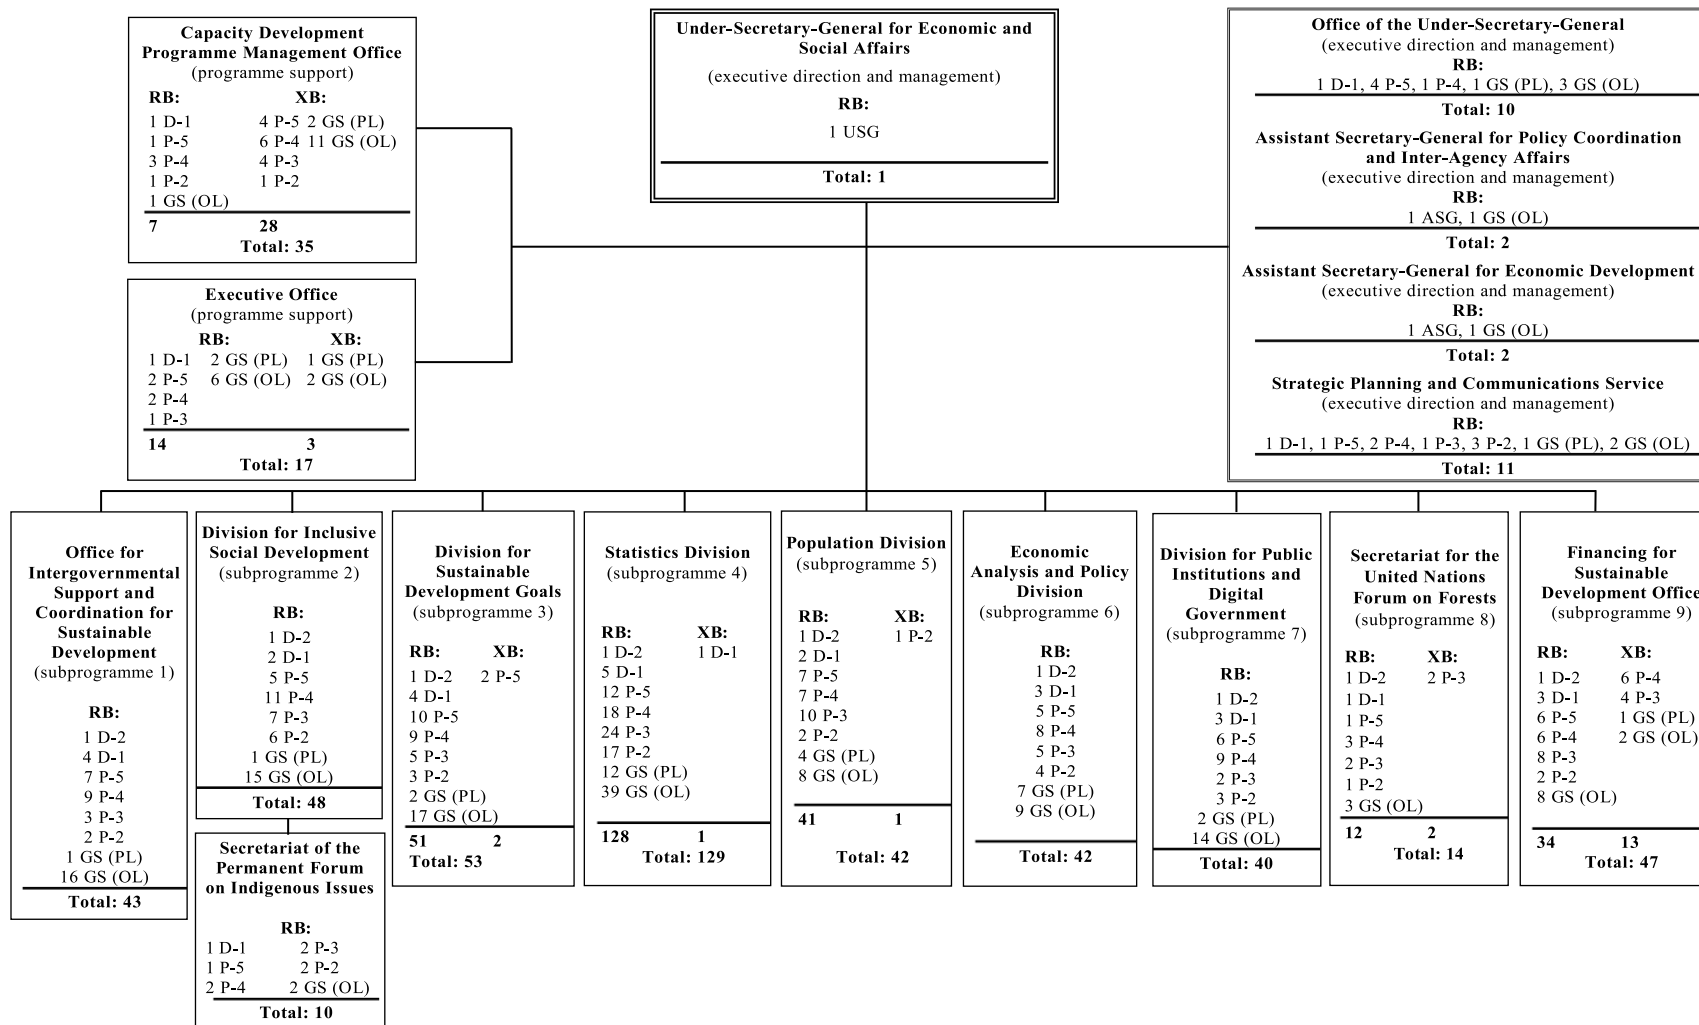

Organizational structure and post distribution for 2025

Two charts showing the organizational structure of the Department of Economic and Social Affairs are presented below. Chart A reproduces the approved structure for 2024 as contained in document [A/78/6 \(Sect. 9\)](#), while chart B presents the proposed structure for 2025.

Justification for the proposed changes

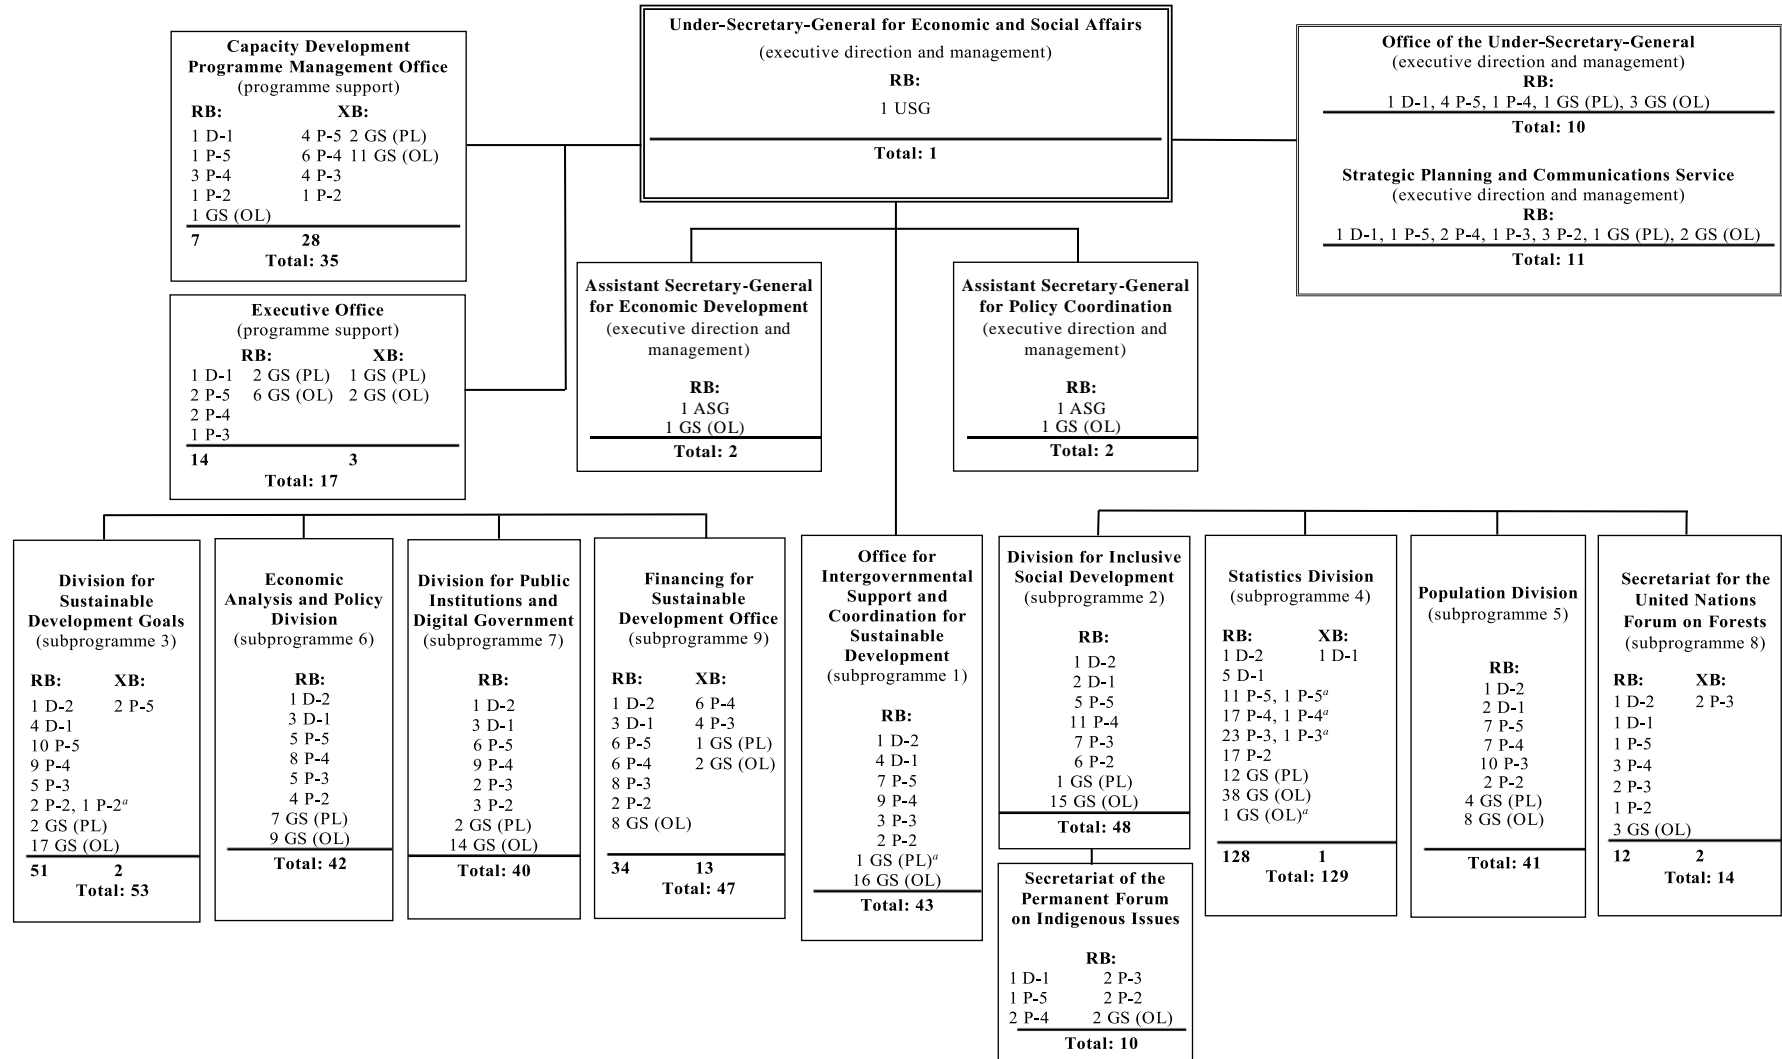

The proposed organizational structure and post distribution in chart B reflects changes in reporting lines. Under the new management configuration, directors of certain divisions would report to the Under-Secretary-General through the Assistant Secretaries-General, which would assist the Department in managing its response to the increasing demands placed on its substantive programmes.

A. Approved organizational structure and post distribution for 2024^a

^a Reflects updates in XB posts.

B. Proposed organizational structure and post distribution for 2025

Abbreviations: ASG, Assistant Secretary-General; GS (OL), General Service (Other level); GS (PL), General Service (Principal level); RB, regular budget; USG, Under-Secretary-General; XB, extrabudgetary.
^a Reassignment.

Annex II

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 1 Intergovernmental support and coordination for sustainable development	1	GS (PL)	Reassignment of 1 Senior Meetings Services Assistant as Senior Programme Management Assistant	The proposed reassignment is to better reflect the needs of the subprogramme and the functions carried out by the incumbent in the Office of the Director. There is growing need for programme management functions, especially in preparation for and in the implementation of and follow-up to major intergovernmental meetings, and in the planning, implementation and monitoring of the subprogramme's work programmes. Former functions of the post are more broadly undertaken by other support staff in the subprogramme. This change will ensure a more effective and efficient response to the needs of the Office as a whole and in support of the President of the Economic and Social Council.
Subprogramme 3 Sustainable development	1	P-2	Reassignment of 1 Associate Sustainable Development Officer as Associate Programme Management Officer	The proposed reassignment will address the growing needs to support the coordination of various major meetings, conferences and events organized by the subprogramme, including the preparatory and follow-up processes, in addition to recurrent administrative, oversight, resource mobilization, donor relations and programmatic tasks across the subprogramme. The incumbent would also coordinate the work of the interdepartmental task forces and the preparation of host country agreements. The former functions of the post have increasingly been undertaken by other posts in the branch.
Subprogramme 4 Statistics	1	P-5	Reassignment of 1 Senior Statistician as Senior Geospatial Information Officer	The proposed reassignments are intended to strengthen the application of geospatial information by Member States with related methodological approaches to address the growing need for the integration of geospatial information with statistics and other data. The P-5 provides the technical and managerial leadership for the subprogramme's work in the development of geostatistical methodological approaches and guidance, including for the disaggregation of data according to geography (undertaken by the P-4) and the standardization of geographical names and secretariat responsibilities for the United Nations Group of Experts on Geographical Names (undertaken by the P-3). Collectively, these posts aim to improve the availability and accessibility of quality, reliable and timely geospatial information for the measurement and monitoring of the 2030 Agenda for Sustainable Development, the Sustainable Development Goals and other global development agendas and goals. The proposed reassignment will ensure that the incumbents have the appropriate profiles, expertise and qualifications.
	1	P-4	Reassignment of 1 Statistician as Geospatial Information Officer	
	1	P-3	Reassignment of 1 Statistician as Geospatial Information Officer	
	1	GS (OL)	Reassignment of 1 Staff Assistant as Programme Management Assistant	The proposed reassignment reflects the changing needs of the subprogramme in supporting the planning, monitoring and coordination of its large and complex publication programme in the areas of official statistics, including undertaking related administrative arrangements for copy preparation, translation and printing. It will enable the subprogramme to ensure that the incumbent has the appropriate profile and qualifications.

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 10.1 The Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States is responsible for advocating, supporting, mobilizing, coordinating and reporting on the implementation of the programmes of action for the least developed countries, landlocked developing countries and small island developing States, as well as the achievement of other internationally agreed goals, including the Sustainable Development Goals. The mandate of the Office derives from the priorities established in relevant General Assembly resolutions and decisions, including resolution [56/227](#), whereby the Assembly decided to establish the Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States.
- 10.2 The Office's work is grounded in the three programmes of action, namely, resolution [69/15](#), whereby the General Assembly endorsed the small island developing States Accelerated Modalities of Action (SAMOA) Pathway and any subsequent programme of action for small island developing States endorsed by the Assembly; resolution [69/137](#), whereby the Assembly endorsed the Vienna Declaration and the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024 and any subsequent programme of action for landlocked developing countries endorsed by the Assembly; and resolution [76/258](#), whereby the Assembly endorsed the Programme of Action for the Least Developed Countries for the Decade 2022–2031. The 2030 Agenda for Sustainable Development, including its global follow-up and review processes, is integral and complementary to the three programmes of action.

Strategy and external factors for 2025

- 10.3 Following the adoption of the Doha Programme of Action for the Least Developed Countries, the central task ahead for the least developed countries and the international community is to enable its effective implementation in support of the 2030 Agenda. Implementation of the provisions of the Doha Programme of Action by the least developed countries and their development partners through the mobilization of commensurate resources and knowledge in support of accelerating their sustainable development and enhanced monitoring and accountability will be prioritized.
- 10.4 In 2025, landlocked developing countries and small island developing States and their development partners are expected to have embarked on their first year of implementation of their relevant new programmes of action. The Office will advocate for the renewed global partnerships for structural transformation and resilience-building to produce early concrete results addressing the special needs of these groups of countries.
- 10.5 In line with the request of the General Assembly made in its resolution [78/233](#), the Office will utilize its strategic position in dealing with the three groups of countries to respond, with enhanced complementarity and coherence, to new and emerging development issues of potential concern, in particular those of a regional or global nature. The Office will develop analysis and generate recommendations of possible strategies, policies and actions, as well as synergies, among the three groups of countries, in particular for adoption by the international community on key priority areas for these countries. With increased research, data and analytical capabilities, the Office will support countries with more timely data and analysis, including metrics on the monitoring and implementation of the programmes of action, with a view to responding to areas of slower or faster progress more quickly.

- 10.6 The Office will strengthen engagement both in the most vulnerable countries, as well as in partner countries and in regional and global organizations and forums. The Office will mobilize support and contribute to building consensus, with an increased focus on policy recommendations to overcome the shared challenges of the most vulnerable countries, for example, in the areas of access to sustainable energy and broadband, on the basis of cross-cutting research carried out by the Office. Links will be promoted in follow-up and review arrangements of all relevant United Nations conferences and processes, in particular the 2030 Agenda. The Office will enhance links and awareness of the progress made in implementation of the three programmes of action, with a view to sharing lessons learned and best practices among the three groups of countries. The Office will also mobilize resources to ensure that the least developed countries, landlocked developing countries and small island developing States have their voices heard in global deliberations. Resource mobilization efforts will also extend to and have an increased focus on joint and shared initiatives, which can amplify impact among the three groups of countries. Furthermore, representatives of the most vulnerable countries will benefit from capacity-building activities, peer learning and the exchange of best practices, all on thematic areas relevant to the Sustainable Development Goals and to building resilience to future crises.
- 10.7 With regard to cooperation with other entities at the global and regional levels, the Office will convene the inter-agency consultative groups for the least developed countries, landlocked developing countries and small island developing States. These groups will enable United Nations entities and other international organizations to exchange information on their work, strengthen coordination of their activities and mount joint inter-agency activities. At the national level, the Office will cooperate with the networks of national focal points that act as an interface between the global, regional and national processes. The national focal points will promote coherence and coordination on issues relevant to the three groups of countries and policy formulation, implementation, and follow-up and review of their programmes of action, the 2030 Agenda and other global frameworks.
- 10.8 With regard to inter-agency coordination and liaison, the Office will work closely with resident coordinators to promote integration of the programmes of action into the United Nations strategic plans and the United Nations Sustainable Development Cooperation Frameworks and to act as an interface with Member States on the ground supporting the mainstreaming of the programmes of action into national strategies.
- 10.9 With regard to the external factors, the overall plan for 2025 is based on the following planning assumptions:
- (a) The security and political situation in the least developed countries, landlocked developing countries and small island developing States and in their surrounding regions is conducive to the implementation of the three programmes of action;
 - (b) Continued international support measures in the areas of development finance, market access, technology and technical assistance are made available by development partners.
- 10.10 The Office will further explore the ways of cooperation, support and participation in the global efforts towards the implementation of the 2030 Agenda, with special attention given to the needs of those in vulnerable situations, women, young people, persons with disabilities and older persons.
- 10.11 The Office integrates a gender perspective into its operational activities, deliverables and results, as appropriate. For example, the Office will develop an updated gender equality strategy to further integrate gender equality and the empowerment of women into its work, including through additional training and capacity-building. In addition, as part of its monitoring and reporting work, the Office will include sex-disaggregated data and analysis across its reports.
- 10.12 In line with the United Nations Disability Inclusion Strategy, the Office will continue to mainstream the rights of persons with disabilities and disability inclusion into its programme of work through the implementation of its disability inclusion strategy and action plan. This will promote disability inclusion in the Office's monitoring, reporting and advocacy work, in accordance with its mandates.

Legislative mandates

- 10.13 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

56/227	Third United Nations Conference on the Least Developed Countries	75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
70/1	Transforming our world: the 2030 Agenda for Sustainable Development		

Subprogramme 1 Least developed countries

General Assembly resolutions

56/227	Third United Nations Conference on the Least Developed Countries	76/258	Doha Programme of Action for the Least Developed Countries
65/280	Programme of Action for the Least Developed Countries for the Decade 2011–2020	77/177; 78/233	Follow-up to the Fifth United Nations Conference on the Least Developed Countries

Meetings of:				
1. The groups of least developed countries, landlocked developing countries and small island developing States	4	1	–	1
2. The Fifth Committee	1	1	1	1
3. The Committee for Programme and Coordination	1	1	1	1
4. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
B. Generation and transfer of knowledge				
Publications (number of publications)	1	1	3	5
5. Thematic reports of the Office on challenges facing the least developed countries, landlocked developing countries and small island developing States, including shared challenges such as vulnerabilities to external shocks, access to sustainable energy and access to broadband services	1	1	3	5
C. Substantive deliverables				
Databases and substantive digital materials: databases, including on monitoring the implementation of the three programmes of action with related analytics and modelling results.				
D. Communication deliverables				
Outreach programmes, special events and information materials: strategic communications materials supporting global outreach campaigns in support of the delivery of three new programmes of action, including shared challenges for the three groups of countries and supporting common agendas such as the Sustainable Development Goals.				
External and media relations: press releases, media briefings and targeted interviews with select media for relevant milestones and events, including progress of United Nations initiatives to improve the structural issues for countries in special situations.				
Digital platforms and multimedia content: website of the Office, reflecting thematic priorities and events, showcasing research and analysis and tracking and reporting of the three programmes of action; and websites for the three conferences and their follow-up processes.				

Evaluation activities

- 10.15 An evaluation of the support for the Small Island Developing States Global Business Network, completed in 2023, has guided the proposed programme plan for 2025.
- 10.16 In response to the results of the evaluation referenced above, subprogramme 3 integrated its planning for the 2024 forum of the Small Island Developing States Global Business Network into the preparatory process for the fourth International Conference on Small Island Developing States, revitalized its communications strategy relating to the forum and established an advisory group that will guide the Global Business Network series in 2025 and beyond.
- 10.17 An evaluation of the support given by the Office to the network of small island developing States national focal points is planned for 2025.

Programme of work

Subprogramme 1 Least developed countries

Objective

- 10.18 The objective, to which this subprogramme contributes, is to strengthen policies to eradicate poverty in the least developed countries and accelerate structural transformation of their economies; and to ensure effective graduation from the least developed country category.

Strategy

- 10.19 To contribute to the objective, the subprogramme will:
- (a) Provide support to Member States in their intergovernmental processes relating to the priorities of the least developed countries, including by supporting the implementation of the Doha Programme of Action, including its deliverables, namely, an online university to support graduate and postgraduate university-level education in science, technology, engineering and mathematics, an investment support centre, a resilience-building mechanism, a Sustainable Graduation Support Facility and a system of food stockholding for the least developed countries on a regional and subregional basis, or alternative means, such as cash transfers, taking into account possible economic implications and risks;
 - (b) Prepare research and analytical materials relating to the six key focus areas of the Doha Programme of Action and facilitate knowledge exchange and peer learning on critical enablers to poverty eradication and structural transformation, including through mainstreaming a gender perspective;
 - (c) Strengthen its awareness-raising and advocacy work in favour of the least developed countries, including monitoring the road map for the accelerated implementation of the Doha Programme of Action, in partnership with the United Nations system, parliaments, civil society, the media, academia and foundations in focus areas of the Doha Programme of Action, in preparation for the midterm review of the Doha Programme of Action;
 - (d) Conduct advocacy activities to promote resource mobilization in the least developed countries, especially public and private financing, including innovative finance, for resilience-building;
 - (e) Lead the inter-agency task force on least developed country graduation, organize workshops and technical support on establishing consultative mechanisms with development partners and preparing smooth transition strategies, and facilitate peer learning between graduated and graduating countries;
 - (f) Monitor sectoral policy developments of the intergovernmental processes of relevant international and regional organizations, including multilateral development banks;
 - (g) Strengthen the capacity of national focal points of the least developed countries to implement and monitor the Doha Programme of Action, through annual meetings to share experiences and best practices, including through the application of a toolkit for mainstreaming the Doha Programme of Action and the Sustainable Development Goals into national development processes in collaboration with resident coordinators;
 - (h) Partner with the Technology Bank for the Least Developed Countries to strengthen science, technology and innovation capacity in least developed countries, including in graduated and graduating countries.
- 10.20 The above-mentioned work is expected to result in:
- (a) Least developed countries accelerating progress towards achieving the Sustainable Development Goals and achieving the focus areas of the Doha Programme of Action and other internationally agreed development goals;

- (b) Graduating countries making a smooth transition out of the least developed country category;
- (c) Stronger alignment of intergovernmental discussions with the priorities of least developed countries, reflecting a deeper understanding of their realities;
- (d) Greater accountability of relevant stakeholders in least developed countries and development partners, including governments, international organizations and civil society, as well as the private sector, in the implementation of the commitments of the Doha Programme of Action.

Programme performance in 2023

Partnerships to reduce the digital divide in least developed countries

- 10.21 The digital divide relating to broadband access has been increasing over the past decade, with a rate of 42 per cent for least developed countries for mobile broadband subscriptions – half the global average.¹ The central role of science, technology and innovation, including information and communications technologies for least developed countries, is recognized in the Doha Programme of Action. At the Fifth United Nations Conference on the Least Developed Countries, Partner2Connect, an initiative of the International Telecommunication Union and the Office, launched a campaign to secure pledges by various stakeholders to mobilize and announce new resources, partnerships and commitments to foster universal meaningful connectivity and sustainable digital transformation.
- 10.22 Progress towards the objective is presented in the performance measure below (see table 10.2).

Table 10.2
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	–	Of the 845 total pledges submitted as of the end of 2023, 261 (31 per cent) targeted at least 1 least developed country and were worth an estimated value of \$12.24 billion Moreover, 52 per cent of the pledges included women as one of their beneficiary groups

Planned results for 2025

Result 1: private sector plays an enhanced role in addressing vulnerabilities of least developed countries

Programme performance in 2023 and target for 2025

- 10.23 The subprogramme’s work contributed to the announcement of 15 partnerships between private sector entities, Member States and United Nations agencies across the five key thematic sectors of the Private Sector Forum, namely, sustainable energy, sustainable agriculture, digital connectivity, climate change and sustainable tourism, during the Forum at the Fifth United Nations Conference on the Least Developed Countries, which exceeded the planned target of 5.
- 10.24 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 10.3).

¹ See International Telecommunication Union. *Measuring Digital Development. Facts and Figures: Focus on Least Developed Countries* (Geneva, March 2023).

Table 10.3
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Investment promotion agencies strengthen capacity on foreign direct investment attraction and facilitation	Private sector entities participated in the Fifth United Nations Conference on the Least Developed Countries private sector advisory group, engaging in dialogue and announcing commitments to be made at the Conference in support of the implementation of the Doha Programme of Action	15 partnerships relating to the objectives of the Doha Programme of Action announced at the Private Sector Forum	5 partnerships relating to the objectives of the Doha Programme of Action implemented in least developed countries, including increased access by small and medium-sized enterprises to sustainable energy and broadband connectivity to create employment opportunities	5 additional partnerships relating to the objectives of the Doha Programme of Action implemented in least developed countries, including in the areas of sustainable development, such as sustainable tourism and agri-food industries

Result 2: improved tertiary education options in least developed countries through an online university for science, technology, engineering and mathematics education

Programme performance in 2023 and target for 2025

- 10.25 The subprogramme’s work contributed to consultations on the establishment of an online university, which did not meet the planned target of Member States considering options for establishing an online university. The target was not met because there were delays in the publication of the planned report of the Secretary-General.
- 10.26 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 10.4).

Table 10.4
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	Member States agree to include in the Doha Programme of Action a target to undertake feasibility studies to explore the possibility of establishing an online university or other equivalent platforms for least developed countries	Consultations with Member States and relevant United Nations entities on the possible establishment of an online university	Member States agree to a proposal to establish an online university dedicated to students from least developed countries in collaboration with partner organizations	An online university dedicated to students from least developed countries is operational

Result 3: a new food stockholding mechanism to reduce food insecurity in least developed countries

- 10.27 People living in poverty in least developed countries experience higher rates of food insecurity, the least developed countries experience food emergencies at higher rates than other countries and, as

of 2022, 22.1 per cent of their population was undernourished (see [A/78/112-E/2023/94](#)). To address food insecurity in these countries, the subprogramme prepared a report of the Secretary-General on food insecurity in the least developed countries ([A/77/291](#)), which contained a proposal for a dedicated food reserve system.

Lessons learned and planned change

- 10.28 The lesson for the subprogramme, informed by Member States’ requests for additional information on a system of food stockholding for the least developed countries, was that an assessment of existing initiatives and programmes on food security and the operational feasibility of a system of food stockholding would help to inform intergovernmental deliberations. In applying the lesson, the subprogramme will assess the operational requirements, stakeholder engagement, governance structures, financial mechanisms and logistical considerations to establish a food stockholding system that enables the procurement, storage and distribution of food stocks to support least developed countries during emergencies.
- 10.29 Expected progress towards the objective is presented in the performance measure below (see table 10.5).

Table 10.5
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	Doha Programme of Action for the least developed countries recognized the need to address severe food insecurities	Member States at the United Nations Food Systems Summit +2 Stocktaking Moment highlighted the urgency of establishing a food stockholding system for the least developed countries	Member States provide input to the conceptualization of a food stockholding system for the least developed countries	Agreement by Member States to establish a food stockholding system for the least developed countries

Deliverables

18. On issues relating to the least developed countries	8	9	8	8
19. Report on the implementation of the road map for accelerated implementation of the Doha Programme of Action for the Least Developed Countries, including its monitoring	–	–	–	1
20. Database for monitoring of the implementation of commitments of the Doha Programme of Action for the Least Developed Countries	–	–	–	1
C. Substantive deliverables				
Consultation, advice and advocacy: substantive advice to the group of 45 least developed countries on the implementation of the Doha Programme of Action for the Least Developed Countries; briefing to Member States on the work of the Office and the Technology Bank for the Least Developed Countries; advice and substantive support to the work of the Broadband Commission; advocacy for improved international support measures catered to least developed countries; and consultation through the Inter-Agency Consultative Group for the Least Developed Countries to mobilize enhanced support for least development countries, including enhanced smooth transition measures for least developed countries and participation in high-level meetings.				
D. Communication deliverables				
Outreach programmes, special events and information materials: promotional materials on the global outreach campaign for the monitoring of the Doha Programme of Action for the Least Developed Countries; and communications campaigns on upcoming graduations, the third Least Developed Countries Future Forum and ministerial meetings.				
External and media relations: press releases, press conferences and op-eds on issues relating to the least developed countries; information campaign (including videos, infographics and other social media material) on progress achieved in the Doha Programme of Action for the Least Developed Countries.				
Digital platforms and multimedia content: website of the midterm review of the Doha Programme of Action for the Least Developed Countries; and interactive graphics and visuals tailored for social media engagement.				

Subprogramme 2 Landlocked developing countries

Objective

- 10.31 The objective, to which this subprogramme contributes, is to strengthen policies and capacities to improve the connectivity of landlocked developing countries, with the aim of supporting their sustainable development, reduce their trade transaction costs, enhance their regional cooperation and increase their regional, subregional and global trade, and strengthen their institutions and social and environmental protection; and to increase structural transformation in landlocked developing countries for sustainable development.

Strategy

- 10.32 To contribute to the objective, the subprogramme will:
- (a) Provide support to Member States in their intergovernmental processes relating to the priorities of landlocked developing countries, including by supporting the implementation of a new programme of action for landlocked developing countries;
 - (b) Undertake research and analytical assessments to assist landlocked developing countries in enacting policies conducive to their developmental priorities in line of those contained in the new programme of action for landlocked developing countries;
 - (c) Carry out advocacy activities to mobilize international support for the implementation of the new programme of action for landlocked developing countries and other relevant agendas;
 - (d) Coordinate, monitor and assess progress made in relation to the new programme of action for landlocked developing countries.
- 10.33 The above-mentioned work is expected to result in:
- (a) Increased support towards landlocked developing countries from the international community to address the needs and challenges arising from their lack of direct access to the sea and transit constraints;
 - (b) Increased adoption and implementation by landlocked developing countries of initiatives to enhance transit, connectivity and trade facilitation;
 - (c) Landlocked developing countries devising, formulating and implementing policies that promote economic diversification, integration into global and regional value chains, and structural economic transformation;
 - (d) Strengthened social protection for all groups of population in landlocked developing countries, including through access to decent jobs.

Programme performance in 2023

Growth of e-commerce and women's entrepreneurship in Kazakhstan

- 10.34 The subprogramme collaborates closely with the International Think Tank for Landlocked Developing Countries to help to translate research into policy formulation and action. Kazakhstan has been supporting small and medium-sized enterprises to promote e-commerce, with support from the United Nations system, including the International Trade Centre, the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women), the United Nations Development Programme and the International Think Tank for Landlocked Developing Countries. The National Chamber of Entrepreneurs "Atameken", supported by the Ministry of Labour and Social Protection, the National Commission for Women's Affairs, Family and Demographic Policy, has rolled out women's entrepreneurship development centres to provide access to knowledge, finance and networks, as well as the tools and knowledge necessary to integrate businesses into e-commerce platforms.

10.35 Progress towards the objective is presented in the performance measure below (see table 10.7).

Table 10.7
Performance measure^a

2021 (actual)	2022 (actual)	2023 (actual)
3.6 per cent share of e-commerce in the total volume of retail trade in Kazakhstan	12.5 per cent ^b share of e-commerce in the total volume of retail trade (including marketplaces) in Kazakhstan 17 women’s entrepreneurship development centres launched in Kazakhstan	E-commerce sector is estimated to grow at approximately 20 per cent annually in Kazakhstan To date, approximately 9,000 women entrepreneurs in Kazakhstan received services and attended training programmes, such as courses on social media marketing, social entrepreneurship and marketplace businesses

^a 2022 data from the Agency for Strategic Planning and Reforms of the Republic of Kazakhstan, Bureau of National statistics.

^b The data for 2022 take into account marketplaces.

Planned results for 2025

Result 1: strengthened capacities of landlocked developing countries to achieve climate action and sustainable recovery from the COVID-19 pandemic

Programme performance in 2023 and target for 2025

- 10.36 The subprogramme’s work contributed to Member States identifying and agreeing on regionally focused action and commitments to accelerate climate action, including to build resilient and sustainable transport systems, which met the planned target.
- 10.37 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 10.8).

Table 10.8
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
The General Assembly adopted resolution 76/217 , in which it called for a third United Nations Conference on Landlocked Developing Countries, which would comprehensively review the Vienna Programme of Action	Member States called for the establishment of transport systems that were sustainable and resilient to the impacts of climate change and the COVID-19 pandemic, accelerated the energy transition and enabled climate-smart trade facilitation solutions (General Assembly resolution 77/246)	Member States identified and agreed on regionally focused action and commitments to accelerate climate action, including to build climate-resilient and sustainable transport systems	Member States agree on global action and commitments to support landlocked developing countries in implementing climate action activities to build climate-resilient transport systems in accordance with the new programme of action for landlocked developing countries	Member States implement new initiatives at the regional and subregional levels to build climate-resilient, sustainable and smart transit infrastructure and transport systems

Result 2: accelerated progress towards sustainable development in landlocked developing countries

Programme performance in 2023 and target for 2025

- 10.38 The subprogramme’s work contributed to three regional preparatory meetings that supported the identification of the priorities of landlocked developing countries as part of the preparations for the third United Nations Conference on the Landlocked Developing Countries, which met the planned target.
- 10.39 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 10.9).

Table 10.9
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
–	Landlocked developing countries were engaged to provide input into the preparations for the third United Nations Conference on Landlocked Developing Countries through meetings, events and reports	3 regional preparatory meetings held, which supported the identification of the priorities of landlocked developing countries as part of the preparations for the third United Nations Conference on the Landlocked Developing Countries	At least 2 landlocked developing countries initiate action to mainstream a new programme of action	10 additional landlocked developing countries initiate action to mainstream the new programme of action

Result 3: strategic financing for development initiatives to enhance landlocked developing countries’ economic resilience

Proposed programme plan for 2025

- 10.40 Access to finance in landlocked developing countries remains limited. In 2021, domestic credit provided to the private sector as a percentage of gross domestic product was 31.5 per cent, a decrease of 15 per cent, far below the world average of 145 per cent. Official development assistance, which is concentrated in a few landlocked countries, remains one of the key sources of external development finance (see [A/78/283](#)). To support landlocked developing countries, the subprogramme has prepared analytical work on financing for development for landlocked developing countries and includes this analysis as part of its advocacy and coordination work.

Lessons learned and planned change

- 10.41 The lesson for the subprogramme was that there was growing demand for new approaches to help to further leverage external financial resources in order to support structural transformation in landlocked developing countries. In applying the lesson, the subprogramme will help landlocked developing countries to develop new approaches to gain access to financing for structural transformation, in particular sustainable and resilient infrastructure. The subprogramme will also advocate and promote, at the global level, the priorities of landlocked developing countries for financing for development, including mobilizing foreign direct investment and official development assistance. The subprogramme will also prepare technical input, including analysis and proposals to enhance support measures to improve access to finance in the landlocked developing countries.
- 10.42 Expected progress towards the objective is presented in the performance measure below (see figure 10.I).

Figure 10.I
Performance measure: foreign direct investment inflows to landlocked developing countries (annual)
 (Millions of United States dollars)

Deliverables

10.43 Table 10.10 lists all deliverables of the subprogramme.

Table 10.10
Subprogramme 2: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	9	8	15	1
1. Report to the General Assembly, including on the implementation of the new programme of action for landlocked developing countries	1	1	1	1
2. Official documents for the intergovernmental preparatory committee for the third United Nations Conference on Landlocked Developing Countries	8	7	6	–
3. Official documents of the third United Nations Conference on Landlocked Developing Countries	–	–	8	–
Substantive services for meetings (number of three-hour meetings)	52	37	47	36
4. Meetings of the Second Committee of the General Assembly	15	12	15	13
5. Meetings of the high-level political forum on sustainable development of the Economic and Social Council	2	2	2	2
6. Annual ministerial meetings of the landlocked developing countries and consultations on outcomes thereof, and other ministerial meetings	10	8	10	8
7. Regional review meetings on the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024 and the new programme of action for the landlocked developing countries	3	3	–	3
8. Meetings of the intergovernmental preparatory committee for the third United Nations Conference on Landlocked Developing Countries	7	3	7	–
9. Meetings of the Group of Landlocked Developing Countries	14	8	12	8
10. Expert group meetings on thematic issues such as structural economic transformation, digitalization, financing for development, trade facilitation measures and climate-resilient transport systems	1	1	1	2

Part IV International cooperation for development

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	3	3	4	3
11. On the enhancement of the analytical capacity of the International Think Tank for Landlocked Developing Countries	1	1	1	1
12. On the enhancement of the role of the private sector in trade facilitation and structural transformation	1	1	1	1
13. On strengthening of the participation of landlocked developing countries in relevant regional and bilateral cooperation frameworks and their accession to international conventions, and corridor development	–	–	1	1
14. On coordination of the enhanced implementation of the road map for accelerated implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024	1	1	1	–
15. On estimating transport and trade costs and designing and implementing policies that promote connectivity and enhanced utilization of digital solutions for transport and trade facilitation for the achievement of the Sustainable Development Goals	–	–	–	1
Seminars, workshops and training events (number of days)	9	9	12	7
16. Round-table discussion on capacity-building	1	1	2	1
17. Workshop for national focal points of landlocked developing countries	1	1	2	1
18. Panel discussion on best practices and solutions to specific needs of landlocked developing countries	1	1	1	1
19. Training events covering energy, information and communications technology, infrastructure, Sustainable Development Goal 14, climate change and desertification	2	2	2	2
20. Events in preparation for the third United Nations Conference on Landlocked Developing Countries on thematic areas, including transit, trade facilitation, corridor development, connectivity, global value chains, climate change, water, desertification and road safety	4	4	3	–
21. Workshops on mainstreaming the new programme of action for landlocked developing countries and developing the road map and monitoring framework	–	–	2	2
Technical materials (number of materials)	4	4	5	4
22. On monitoring the implementation of the new programme of action for landlocked developing countries and the 2030 Agenda	2	1	2	1
23. On thematic development issues in landlocked developing countries	2	3	2	2
24. Guide on mainstreaming the new programme of action for landlocked developing countries	–	–	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: substantive advice to the Group of Landlocked Developing Countries; briefings to 32 landlocked developing countries, 34 transit countries and 28 development partners on the work of the Office; and side events promoting the implementation of the 2030 Agenda and the new programme of action for the landlocked developing countries.				
Databases and substantive digital materials: database of indicators for landlocked developing countries for the new programme of action for landlocked developing countries.				
D. Communication deliverables				
Outreach programmes, special events and information materials: promotional materials and global outreach campaign to raise awareness on priority issues, thematic agendas and events relevant to landlocked developing countries.				
External and media relations: press releases, including op-eds and press conferences on development issues relating to landlocked developing countries.				
Digital platforms and multimedia content: web pages relating to landlocked developing countries, including on the outcome of the third United Nations Conference on Landlocked Developing Countries, and multimedia content, including interactive graphics and videos.				

Subprogramme 3 Small island developing States

Objective

- 10.44 The objective, to which this subprogramme contributes is to increase sustainable development and economic, social and environmental resilience in small island developing States.

Strategy

- 10.45 To contribute to the objective, the subprogramme will:
- (a) Advocate for the special case of small island developing States in achieving sustainable development by engaging with development partners, international financial institutions and the private sector;
 - (b) Mobilize resources for small island developing States in priority areas, including through a targeted resource mobilization strategy and by developing tailored policy tools;
 - (c) Provide structured support through the Small Island Developing States Partnership Framework for the facilitation of collaborative partnerships, especially between small island developing States and the private sector;
 - (d) Strengthen coherence and coordination at the national, regional and global levels, including by providing more structured support to the small island developing States national focal points network and increasing coordination between United Nations entities supporting those States;
 - (e) Develop and strengthen the implementation frameworks for the outcomes of the fourth International Conference on Small Island Developing States.
- 10.46 The above-mentioned work is expected to result in:
- (a) Strengthened international support measures aimed at enabling small island developing States to implement the 2030 Agenda, the small island developing States programme of action, the Paris Agreement and other priorities of those States for sustainable development;
 - (b) Enhanced access to finance for small island developing States;
 - (c) Small island developing States devising, formulating and implementing policies that promote sustainable development and make progress towards the achievement of internationally agreed development goals.

Programme performance in 2023

Strengthened assessment of multidimensional vulnerabilities for small island developing States

- 10.47 Small island developing States remain a special case for sustainable development and have not achieved sustained high levels of economic growth, owing in part to their vulnerabilities to the ongoing negative impacts of environmental challenges and other external economic and financial shocks. To help to better assess the vulnerabilities of small island developing States, the subprogramme supported the ongoing development of a multidimensional vulnerability index by the High-level Panel on the Development of a Multidimensional Vulnerability Index for Small Island Developing States. The subprogramme also helped to convene leaders of small island developing States, development partners and international financial institution to consider how best multidimensional vulnerability could be reflected in existing practices and policies for debt sustainability and development support.
- 10.48 Progress towards the objective is presented in the performance measure below (see table 10.11).

Table 10.11
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	The General Assembly established the High-level Panel on the Development of a Multidimensional Vulnerability Index for Small Island Developing States	A pilot of the multidimensional vulnerability index was undertaken by the Caribbean Development Bank in accordance with the final report ^a and recommendations for the multidimensional vulnerability index

^a See United Nations, “High-level Panel on the Development of a Multidimensional Vulnerability Index: Final Report” (February 2024).

Planned results for 2025

Result 1: data leveraged for a new global framework for the sustainable development of small island developing States

Programme performance in 2023 and target for 2025

- 10.49 The subprogramme’s work contributed to the use of timely data and analysis on vulnerabilities to determine the global actions and commitments needed to implement the 2030 Agenda, which met the planned target.
- 10.50 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 10.12).

Table 10.12
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
The General Assembly adopted resolution 76/203, in which it called for the convening in 2024 of a fourth International Conference on Small Island Developing States, which would be aimed at assessing the ability of small island developing States to meet the 2030 Agenda and the Sustainable Development Goals	Small island developing States enhanced reporting on the implementation of the Samoa Pathway by using a monitoring and reporting framework, which allowed them to better assess and address gaps and progress in implementation	Small island developing States used timely data and analysis on vulnerabilities to determine the global actions and commitments needed to implement the 2030 Agenda	Small island developing States develop evidence-based policy recommendations and a set of concrete deliverables emanating from data and analysis from the monitoring and reporting framework to be included in a new programme of action and agenda on small island developing States	Small island developing States develop a monitoring and reporting framework for the new programme of action and agenda on small island developing States

Result 2: strengthened private sector partnerships to build resilience in small island developing States

Programme performance in 2023 and target for 2025

- 10.51 The subprogramme’s work contributed to five partnerships between small island developing States and the private sector developed in priority areas, including climate change mitigation and adaptation, resilient housing, renewable energy, sustainable transportation and water conservation, which met the planned target.
- 10.52 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 10.13).

Table 10.13
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Increased private sector engagement in a Small Island Developing States Global Business Network virtual forum on leveraging partnerships for the sustainable development of ocean energy in small island developing States	Strengthened private sector engagement at the Small Island Developing States Global Business Network forum, held in April 2022, with increased private sector participation, including the creation of a partnership to connect supply and demand of fish and prevent overfishing and waste through big data, thereby contributing towards the achievement of Sustainable Development Goal 14	5 partnerships between small island developing States and the private sector developed in priority areas in preparation for launch at the Small Island Developing States Global Business Network forum to be held in 2024	Small island developing States and private sector partnerships utilize a strengthened private sector engagement framework, agreed in the context of the new programme of action and agenda on small island developing States agenda, to maximize impact and align initiatives in priority areas and reduce implementation barriers for small island developing States using a simplified, robust and consistent approach to private sector engagement	10 partnerships between small island developing States and the private sector developed in priority areas agreed in the context of the new programme of action and agenda on small island developing States

Result 3: data-driven decisions to address structural vulnerabilities and resilience of small island developing States

Proposed programme plan for 2025

- 10.53 The General Assembly, in its resolution [78/232](#), recognized that there was an urgent need to assist small island developing States in strengthening their statistical offices and to provide enhanced support in developing national capacities for improved data collection and statistical analysis, including high-quality and disaggregated data. To help to develop national capacities, the subprogramme conducted consultations and analysis with a range of relevant stakeholders, development partners and financing institutions, and proposed the establishment of a global data hub with dedicated coordination and resourcing.

Lessons learned and planned change

- 10.54 The lesson for the subprogramme was that evidence to support access to finance, in particular for sustainable development and climate change, was often reconstructed and consolidated from wider data sets, including broader developing country categories and/or geographical groupings. In applying the lesson, the subprogramme will work closely with small island developing States and development partners to advance the development of a global data hub, with a focus on facilitating the collection, analysis and management of tailored and timely data to contribute to decision-making processes.
- 10.55 Expected progress towards the objective is presented in the performance measure below (see table 10.14).

Table 10.14
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
–	–	Government of Antigua and Barbuda decides to establish a centre of excellence that will include the small island developing States global data hub	The fourth International Conference on Small Island Developing States launches the centre of excellence	The small island developing States global data hub provides analytics, and the data are used by Member States to inform decision-making on resource allocation and development priorities

Deliverables

- 10.56 Table 10.15 lists all deliverables of the subprogramme.

Table 10.15
Subprogramme 3: deliverables for the period 2023–2025, by category and subcategory

Seminars, workshops and training events (number of days)	15	18	16	16
7. Seminars on the support from development partners to small island developing States for the achievement of the Sustainable Development Goals and implementation of the small island developing States programme of action	2	5	2	2
8. Seminars in support of the Alliance of Small Island States relating to the implementation of the small island developing States programme of action and the 2030 Agenda	2	4	4	4
9. Seminars with national focal points on the coordination of efforts to achieve and monitor the implementation of the small island developing States programme of action and the 2030 Agenda	4	2	3	2
10. Seminars on strengthening collaboration through joint efforts and activities in the United Nations system and other international organizations, including regional intergovernmental organizations of which the small island developing States are members	3	3	3	3
11. Seminars on private sector involvement in supporting implementation of the small island developing States programme of action	2	2	2	4
12. Seminars on the access of small island developing States to climate change-related finance for development goals	2	2	2	1
Publications (number of publications)	1	1	1	1
13. On mainstreaming the small island developing States programme of action and issues relating to small island developing States into the work of the United Nations system and enhancing the coherence of issues relating to small island developing States in United Nations processes	1	1	1	1
Technical materials (number of materials)	10	8	10	10
14. On implementing the Samoa Pathway	2	2	2	2
15. On international support provided to small island developing States for the achievement of the Sustainable Development Goals and implementation of the small island developing States programme of action	2	–	2	2
16. On matters relating to the financing, implementation and monitoring of the small island developing States programme of action and the 2030 Agenda	2	2	2	2
17. On issues relevant to the implementation of the 2030 Agenda in small island developing States	2	2	2	2
18. On mainstreaming the small island developing States programme of action and issues relating to small island developing States into the work of the United Nations system and enhancing the coherence of issues relating to small island developing States in United Nations processes	2	2	2	2

C. Substantive deliverables

Consultation, advice and advocacy: briefings to 38 Member States on the work of the Office; and advocacy in appropriate forums for the special case of small island developing States in achieving sustainable development.

D. Communication deliverables

Outreach programmes, special events and information materials: substantive events to provide support to 38 small island developing States; and campaigns on matters relating to small island developing States and sustainable development.

External and media relations: press releases and press appearances on issues relating to small island developing States, including relevant United Nations processes and activities.

Digital platforms and multimedia content: web pages, including updates on the small island developing States programme of action.

B. Proposed post and non-post resource requirements for 2025

Overview

10.57 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 10.16 to 10.18.

Table 10.16

10.58 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 10.19 to 10.21 and figure 10.II.

10.59 As reflected in tables 10.19 (1) and 10.20 (1), the overall resources proposed for 2025 amount to \$9,558,500 before recosting, reflecting a net increase of \$634,600 (or 7.1 per cent) compared with the approved budget for 2024. Resource changes result from technical adjustments, new and expanded mandates, and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

10.60 As shown in table 10.19 (1), resource changes reflect a net decrease of \$115,300, as follows:

- (a) **Executive direction and management.** The increase of \$38,600 under posts relates to the higher provision at continuing vacancy rates for one post (General service (Other level)) established in 2024 pursuant to General Assembly resolution [78/252](#), which was subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts;
- (b) **Subprogramme 1, Least developed countries.** The increase of \$316,300 under posts relates to the higher provision at continuing vacancy rates for five posts (1 P-5, 1 P-4, 1 P-3, 1 P-2 and 1 General Service (Principal level)) established in 2024 pursuant to General Assembly resolution [78/252](#), which were subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts;
- (c) **Subprogramme 2, Landlocked developing countries** (net decrease of \$302,500):
 - (i) The decrease of \$376,200 under non-posts relates to the removal of non-recurrent provisions for general temporary assistance, contractual services and supplies and materials associated with General Assembly resolution [77/246](#) on follow-up to the second United Nations Conference on Landlocked Developing Countries;
 - (ii) The increase of \$73,700 under posts relates to the higher provision at continuing vacancy rates for one post (P-4) established in 2024 pursuant to General Assembly resolution [78/252](#), which was subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts;
- (d) **Subprogramme 3, Small island developing States** (net decrease of \$167,700):
 - (i) The decrease of \$241,400 under non-posts relates to the removal of non-recurrent provisions for general temporary assistance, consultants and supplies and materials associated with General Assembly resolutions [77/245](#) and [78/232](#) on follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States;

- (ii) The increase of \$73,700 under posts relates to the higher provision at continuing vacancy rates for one post (P-4) established in 2024 pursuant to General Assembly resolution [78/252](#), which was subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts.

New and expanded mandates

10.61 As shown in table 10.19 (1), resource changes reflect an increase of \$749,900, as follows:

(a) **Executive direction and management** (increase of \$525,500):

- (i) The increase of \$443,000 under posts relates to the proposed establishment of one Economic Affairs Officer (P-4), one Data Analyst (P-3), one Programme Management Officer (P-3) and one Public Information Officer (P-3) pursuant to General Assembly resolution [78/233](#) on the follow-up to the Fifth United Nations Conference on the Least Developed Countries and the related recommendations of the Secretary-General contained in his report ([A/77/984](#)), as detailed in annex II to the present report;
- (ii) The increase of \$82,500 under non-posts would provide for travel of staff (\$50,000), contractual services (\$9,000), general operating expenses (\$5,000), supplies and materials (\$1,000) and furniture and equipment (\$17,500) pursuant to General Assembly resolution [78/233](#) on the follow-up to the Fifth United Nations Conference on the Least Developed Countries and the related recommendations of the Secretary-General contained in his report ([A/77/984](#));

(b) **Subprogramme 1, Least developed countries** (increase of \$224,400):

- (i) The increase of \$124,400 under posts relates to the proposed establishment of one post of Programme Management Officer (P-4) pursuant to General Assembly resolution [78/233](#) on the follow-up to the Fifth United Nations Conference on the Least Developed Countries and the related recommendations of the Secretary-General contained in his report ([A/77/984](#)), as detailed in annex II to the present report;
- (ii) The increase of \$100,000 under non-posts would provide for consultants (\$50,000) and experts (\$50,000) pursuant to General Assembly resolution [78/233](#) on the follow-up to the Fifth United Nations Conference on the Least Developed Countries and the related recommendations of the Secretary-General contained in his report ([A/77/984](#)).

Other changes

10.62 As shown in table 10.19 (1), resource changes reflect cost-neutral redeployments, as follows:

(a) **Executive direction and management** (increase of \$1,212,900):

- (i) The increase of \$1,102,500 under posts relates to the inward redeployment of one Chief of Service (D-1), one Senior Economic Affairs Officer (P-5), two Public Information Officers (P-4 and P-3), one Statistician (P-3) and one Staff Assistant (General Service (Other level)) from subprogramme 1, as detailed in annex II to the present report;
- (ii) The increase of \$110,400 under non-posts relates to the inward redeployment of provisions under travel of staff (\$36,900) and contractual services (\$73,500) associated with the redeployment of the Advocacy and Outreach Unit from subprogramme 1;

(b) **Subprogramme 1, Least developed countries.** The decrease of \$1,212,900 relates to:

- (i) The decrease of \$1,102,500 under posts relates to the outward redeployment of the six posts indicated in paragraph 10.62 (a) above, as detailed in annex II to the present report;
- (ii) The decrease of \$110,400 under non-posts relates to the outward redeployment of provisions under travel of staff (\$36,900) and contractual services (\$73,500) associated with the redeployment of the Advocacy and Outreach Unit to executive direction and management.

Extrabudgetary resources

- 10.63 As reflected in table 10.19 (2), extrabudgetary resources amount to \$2,453,000. The non-post resources would complement regular budget resources and would be used mainly to carry out activities relating to follow-up to the Fifth United Nations Conference on the Least Developed Countries, the third United Nations Conference on Landlocked Developing Countries and the fourth International Conference on Small Island Developing States.
- 10.64 The extrabudgetary resources under the present section are subject to the oversight of the Under-Secretary-General and High Representative, who has delegated authority from the Secretary-General.

Executive direction and management

- 10.65 The Under-Secretary-General and High Representative is responsible for the overall leadership and direction of the Office in the implementation of its mandates and approved programme of work. The High Representative engages in high-level consultations with Member States, organizations of the United Nations system, multilateral and regional financial institutions, the private sector, and civil society groups and academia, and supports the Economic and Social Council and the General Assembly in their reviews and assessments of progress achieved in the implementation of the programmes of action for the three groups of countries and the 2030 Agenda, as it relates to these countries.
- 10.66 The Office advises the Under-Secretary-General and High Representative on issues of policy and management; acts as a focal point for information on all aspects of the work of the Office and ensures that such information is disseminated internally and projected externally, as appropriate; and consults, negotiates and coordinates with other departments, offices, funds and programmes, as well as with non-United Nations entities, on matters of common concern. The Office is headed by a Director (D-2), who deputizes for and is accountable to the Under-Secretary-General and High Representative.
- 10.67 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and, in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Office is integrating environmental management practices into its operations. The Office will continue its ongoing dialogue with staff on environmental sustainability in the workplace, including through surveys with staff on sustainability efforts. This will include documenting lessons learned from the sustainability practices utilized at the conferences on landlocked developing countries and small island developing States to be held in 2024. The Office will continue to implement its environmental sustainability strategy and assess progress made to ensure that commitments were implemented in the subsequent year. For example, building on the Office’s 2024 environmental sustainability strategy, the CO₂ emissions from air travel will continue to be tracked so that the Office can make informed decisions about its emissions from air travel as a percentage of the total CO₂ emissions from United Nations entities reporting.
- 10.68 Information on the timely submission of documentation and advance booking for air travel is reflected in table 10.22. The Office will strengthen advance planning practices among staff and managers, including through quarterly travel plans and regular monitoring of progress. With regard to partners, the Office will engage with both meeting organizers and participants sponsored by the Office with a view to improving the timeliness of submission of their documentation. The Office will work closely with the Executive Office to further streamline the requirements for the issuance of travel authorizations, within the existing rules and regulations guiding official travel.

Part IV International cooperation for development

10.69 The proposed regular budget resources for 2025 amount to \$3,463,000 and reflect an increase of \$1,777,000 compared with the approved budget for 2024. The proposed increase is explained in paragraphs 10.60 (a), 10.61 (a) and 10.62 (a) above. Additional details on the distribution of the proposed resources for 2025 are reflected in table 10.23 and figure 10.III.

Annex I

Organizational structure and post distribution for 2025

Two charts showing the organizational structure of the Office are presented below. Chart A reproduces the approved structure as contained in [A/78/6 \(Sect. 10\)](#), while chart B presents the proposed structure for 2025.

Justification for the proposed changes

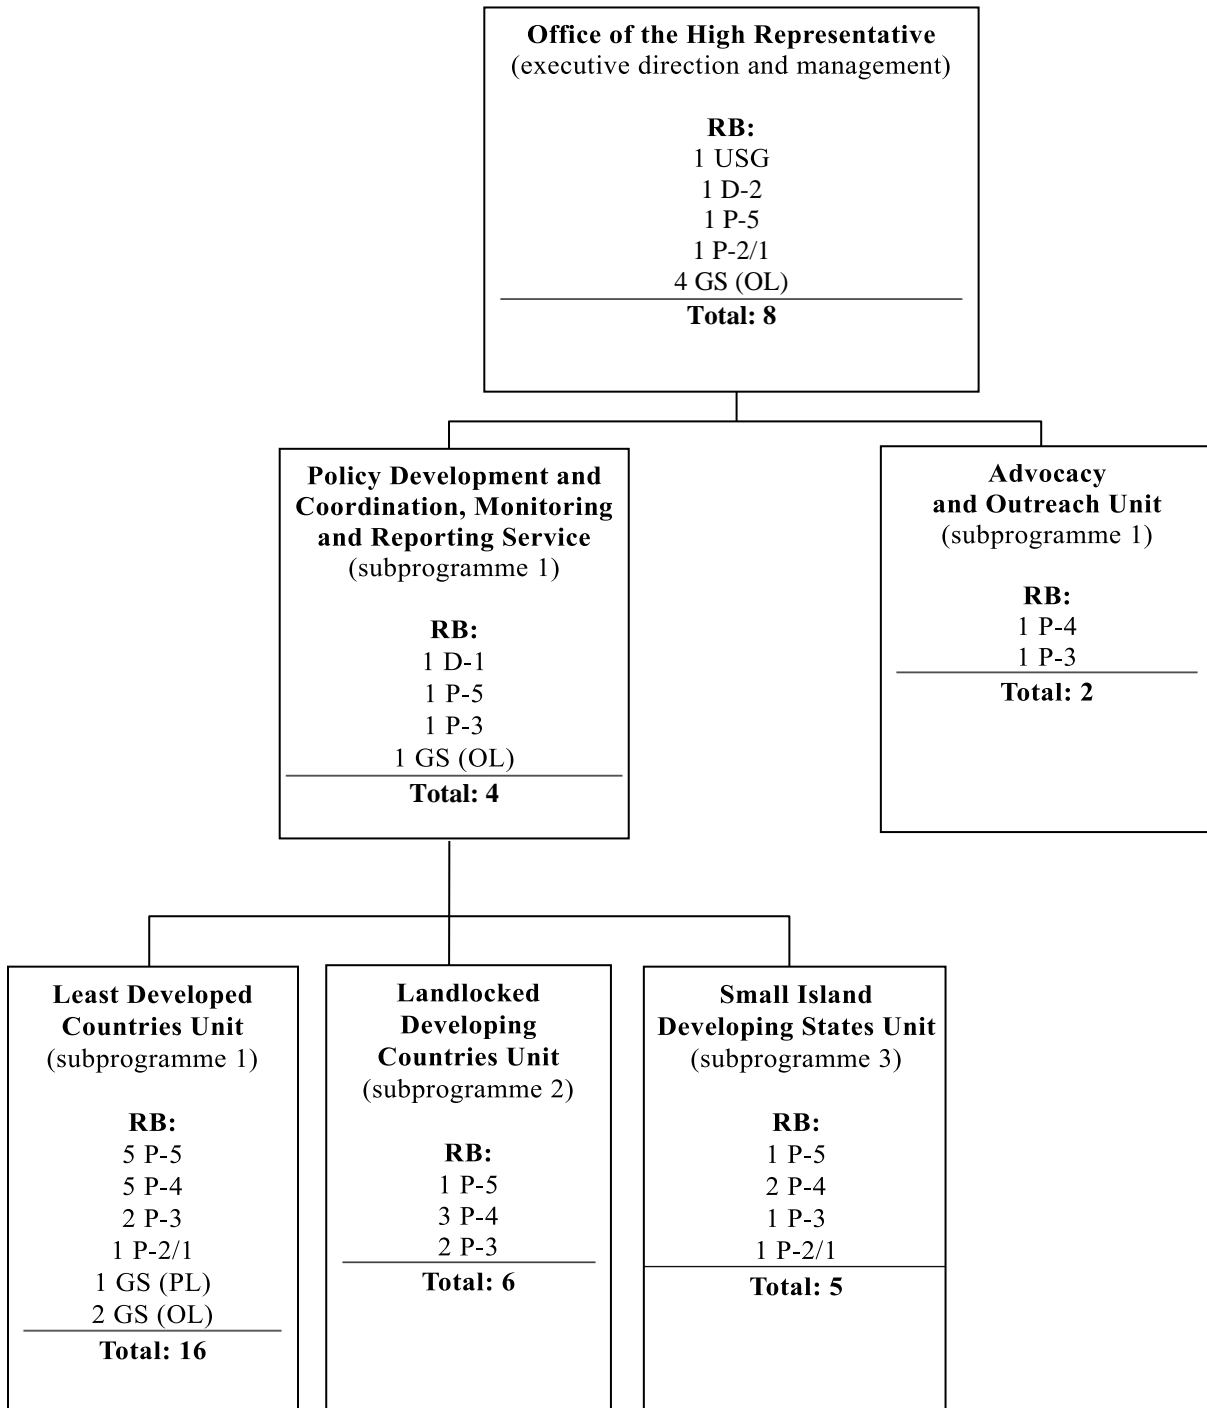

The proposed changes relate to a review of the Office's organizational structure to increase coherence and coordination in the implementation of the three programmes of action, to promote the research, analytical and data management capacity of the Office and to place the Policy Development and Coordination, Monitoring and Reporting Service and the Advocacy and Outreach Unit, pursuant to General Assembly resolution [78/233](#), in which the Assembly approved the proposal of the Secretary-General contained in his report ([A/77/984](#)).

To increase synergies in the implementation and monitoring of the three programmes of action, it is proposed that a Research and Analysis Section be created under executive direction and management as a dedicated capacity to provide policy advice on how to address challenges faced by the three groups of countries. The proposed Section would also provide data and analysis for all three groups of countries, enhancing synergies in the work in the Office. One post of Senior Economic Affairs Officer (P-5) and one post of Economic Affairs Officer (P-3) are proposed to be redeployed from subprogramme 1, Least developed countries, to the proposed Section. These redeployments would be enabled by the redistribution of functions within subprogramme 1, Least developed countries, and the management of cross-cutting issues by the new Section.

Reflecting increased demands to mainstream advocacy and outreach into all the activities of the Office, the Advocacy and Outreach Unit, comprising two posts of Public Information Officer (P-4 and P-3) is proposed for redeployment from subprogramme 1, Least developed countries, to executive direction and management. The review of functions determined that centralizing advocacy and communication capacities would increase effectiveness and synergies among work streams and optimize utilization of the existing capacities to support the three groups of countries through the three subprogrammes.

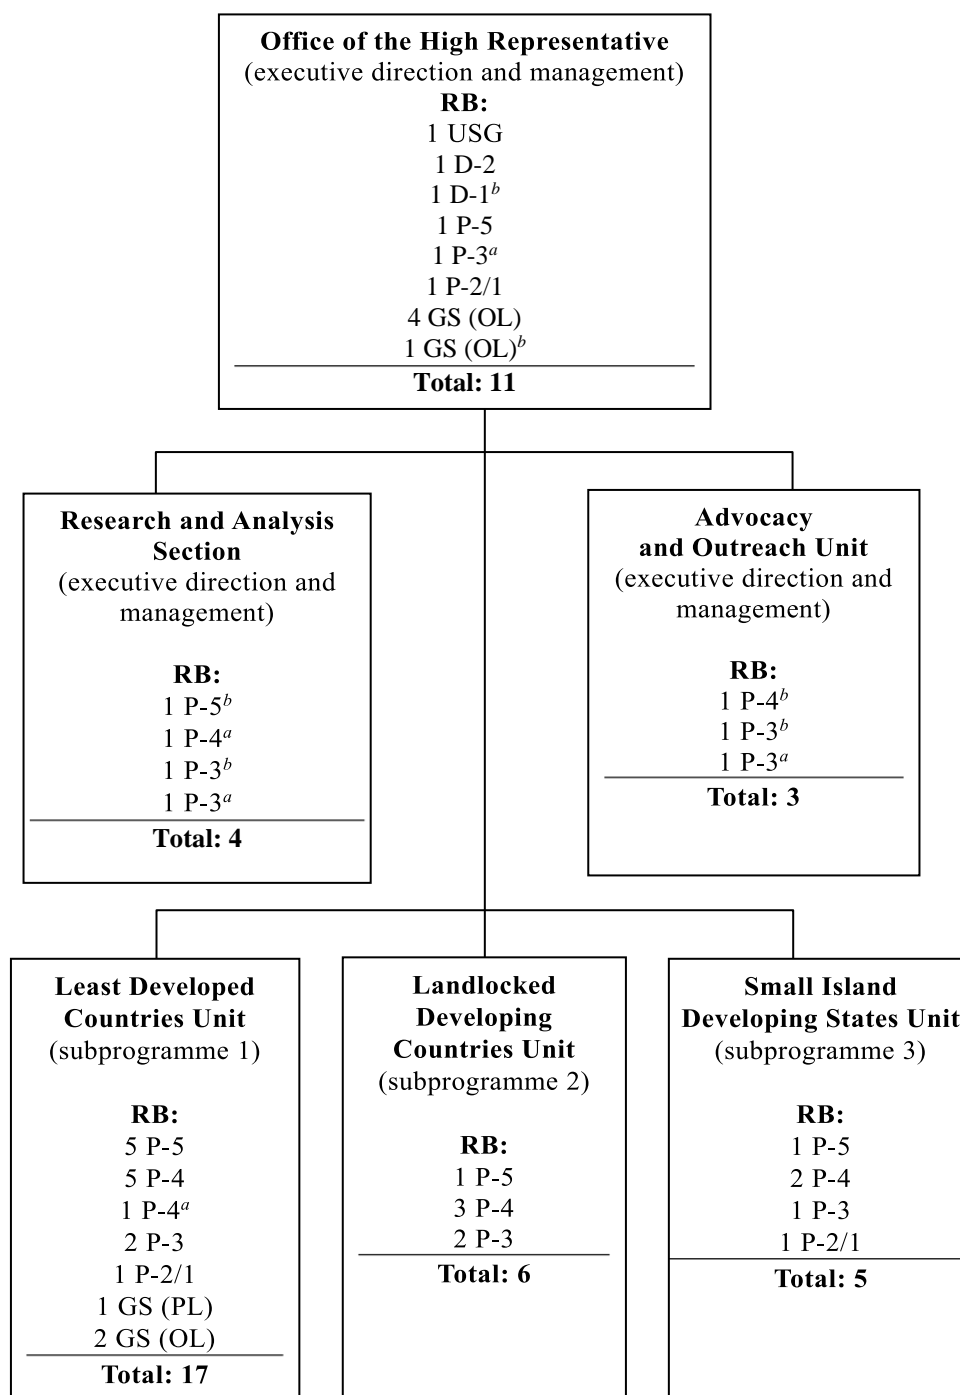

To better utilize the Office's strategic position to address the shared challenges and key development issues facing the three groups of countries and the increased demands for the Office's support to monitor the three programmes of action, it is proposed that oversight and assistance be integrated for all three subprogrammes within the Office. Specifically, it is proposed that the Chief of Service (D-1) and Staff Assistant (General Service (Other level)) be redeployed from subprogramme 1, Least developed countries, to the Office. The Chief of Service and Staff Assistant would continue to fulfil coordination and policy development functions and would expand efforts to mobilize support and contribute to building consensus, with an increased focus on policy recommendations to overcome the shared challenges of the three groups of countries. Each subprogramme would absorb functions relating to the monitoring and reporting of their relevant programmes of action. As a result, the Policy Development and Coordination, Monitoring and Reporting Service would be removed from the organizational chart and each subprogramme would report directly to senior leadership in the executive direction and management component.

Annex II

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Executive direction and management	1	P-4	Establishment of Economic Affairs Officer in the Research and Analysis Section	Pursuant to General Assembly resolution 78/233 , the proposed establishment relates to the recommendations of the Secretary-General contained in his report (A/77/984), including to conduct research and analytical work to facilitate science- and evidence-based decision-making. Given the complexity of the geographical and structural constraints that the three groups of countries are facing, together with the disproportionate impacts of new and emerging challenges, there continue to be growing demands for research and analytical work to respond to these challenges and to document and share lessons learned and best practices. The incumbent would perform research and analytical work on key priority areas for the three groups of countries and contribute to various reports and prepare policy briefs on emerging issues to strengthen policy advice provided by the Office to Member States.
Executive direction and management	1	P-3	Establishment of Data Analyst in the Research and Analysis Section	Pursuant to General Assembly resolution 78/233 , the proposed establishment relates to the recommendations of the Secretary-General contained in his report (A/77/984), including to conduct research and analytical work to facilitate science- and evidence-based decision-making. Specifically, there are increased demands for the Office to provide support to Member States to make better use of data for policy development and decision-making that would also address data capacity needs in line with the Data Strategy of the Secretary-General for Action by Everyone, Everywhere. The incumbent would provide data analysis for the monitoring of international policy developments and analytics relating to new and emerging challenges for the implementation of commitments in the three programmes of action. The incumbent would also collect, identify and communicate data, trends and patterns through data visualization to strengthen advocacy and communication to representatives and government officials.
Executive direction and management	1	P-3	Establishment of Programme Management Officer in the Office of the High Representative	Pursuant to General Assembly resolution 78/233 , the proposed establishment relates to the recommendations of the Secretary-General contained in his report (A/77/984), including to strengthen coordination, the management of trust funds and enabling coherent and consistent global support for the three groups of countries. The proposed establishment relates to the increasing demands for coordination among United Nations development system organizations, the inter-agency consultative groups and, given increased demands, coordination within the Office to enable senior management decision-making and provide strategic support and oversight in various areas, including monitoring and performance management and programme planning. The incumbent would contribute to the coordination of and technical support to group consultative processes, which have expanded considerably, as well as the monitoring of sectoral policy developments at intergovernmental processes of relevant

Part IV International cooperation for development

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Executive direction and management	1	P-3	Establishment of Public Information Officer in the Advocacy and Outreach Unit	<p>international and regional organizations. In terms of United Nations development system coordination, the incumbent would coordinate the development of operational guidelines for the United Nations system support provided to countries in conflict and post-conflict situations. The incumbent would also support the management and oversight of trust funds for the three groups of countries, the planning, monitoring and review of the work programme of the Office, the preparation of the proposed programme budget and performance reports, and the administration of human resources activities.</p> <p>Pursuant to General Assembly resolution 78/233, the proposed establishment relates to the recommendations of the Secretary-General contained in his report (A/77/984), including to enhance synergies and expand advocacy and outreach activities for the three groups of countries. In order to strengthen advocacy work relating to the effective and timely implementation of the three programmes of action and to communicate the enhanced analytical work on how to address shared challenges of the three groups of countries, the incumbent would prepare dedicated advocacy and communications materials, including statements, remarks to the press and speeches by the Under-Secretary-General, and support media relations for the Under-Secretary-General. The incumbent would help to develop and lead an advocacy strategy that is intended to encourage the adoption and use of the multidimensional vulnerability index and would develop communications campaigns to address funding needs and implementation support for the three programmes of action. The incumbent would help to develop regular communication materials for national representatives and technical audiences, including newsletters, information materials and progress updates on milestones and implementation of the three programmes of action, as well as relevant workshops, seminars and other activities at the global, regional and national levels that may be of interest to the Office's main constituencies.</p>
Subprogramme 1, Least developed countries	1	P-4	Establishment of Programme Management Officer in the Least Developed Countries Section	<p>Pursuant to General Assembly resolution 78/233, the proposed establishment relates to the recommendations of the Secretary-General contained in his report (A/77/984), including to address growing demands for the Office's assistance to least developed countries in mainstreaming the Doha Programme of Action into their national policies and programmes. The incumbent would support Member States in monitoring the implementation of the Doha Programme of Action at the national, regional and global levels to accelerate that implementation. The incumbent would support the follow-up of the Doha Programme of Action by the least developed countries at the global, sectoral and country levels, including further strengthening the network of national focal points of least developed countries and organizing and conducting workshops, seminars and other activities at the global, regional and national levels.</p>

Section 10 Least developed countries, landlocked developing countries and small island developing States

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 1, Least developed countries	(1)	D-1	Redeployment of Chief of Service, Senior Economic Affairs Officer, Public Information Officers, Statistician and Staff Assistant	The proposed redeployments relate to a review of the Office's organizational structure as explained in paragraphs 10.70 to 10.73 above. To increase synergies in the implementation and monitoring of the three programmes of action, it is proposed that a Research and Analysis Section be created under executive direction and management within the Office as a dedicated capacity to provide policy advice on how to address challenges faced by the three groups of countries. The proposed Section would also provide data and analysis for all three groups of countries, enhancing synergies in the work in the Office. One post of Senior Economic Affairs Officer (P-5) and one post of Economic Affairs Officer (P-3) are proposed to be redeployed from subprogramme 1, Least developed countries, into this new Section. These redeployments would be enabled by the redistribution of functions within subprogramme 1, Least developed countries, and the management of cross-cutting issues by the new Section. Reflecting increased demands to mainstream advocacy and outreach into all the activities of the Office, the Advocacy and Outreach Unit, comprising two posts of Public Information Officer (P-4 and P-3), is proposed for redeployment from subprogramme 1, Least developed countries, to executive direction and management. The review of functions determined that centralizing advocacy and communication capacities would increase effectiveness and synergies among workstreams and optimize utilization of the existing capacities to support the three groups of countries through the three subprogrammes. To better utilize the Office's strategic position to address the shared challenges and key development issues facing the three groups of countries, as well as increased demands for the Office's support to monitor the three programmes of action, it is proposed that oversight and assistance for all three subprogrammes be integrated within the Office. Specifically, it is proposed that the Chief of Service (D-1) and Staff Assistant (General Service (Other level)) be redeployed from subprogramme 1, Least developed countries, to the Office. The Chief of Service and Staff Assistant would continue to fulfil coordination and policy development functions and would expand efforts to mobilize support and contribute to building consensus, with an increased focus on policy recommendations to overcome the shared challenges of the three groups of countries. Each subprogramme would absorb functions relating to the monitoring and reporting of their relevant programmes of action.

*** In keeping with paragraph 10 of General Assembly resolution [77/267](#), the part consisting of the post and non-post resource requirements (part III) is submitted through the Advisory Committee on Administrative and Budgetary Questions for the consideration of the Assembly.

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 11.1 The Office of the Special Adviser on Africa supports the Secretary-General in ensuring a coherent and integrated approach to United Nations support for Africa; promoting greater coherence in the work of the United Nations system and the African Union in support of Agenda 2063; following up on the implementation of all relevant global summit and conference outcomes of the United Nations relating to Africa; coordinating and guiding the preparation of Africa-related reports and input; initiating reports on critical issues affecting Africa; monitoring the implementation of Sustainable Development Goal commitments made towards Africa's development; and coordinating global advocacy in support of the African Union's Agenda 2063: The Africa We Want. The Economic Commission for Africa (ECA) is responsible for promoting the economic and social development of its member States, fostering intraregional integration and promoting international cooperation for the development of Africa. ECA is mandated to operate at the regional and subregional levels to harness United Nations assets and bring them to bear on Africa's priorities. ECA places a special focus on collecting up-to-date and original regional statistics in order to ground its policy research and advocacy in clear objective evidence; promoting policy consensus; and providing capacity development and advisory services. The Department of Global Communications raises international awareness of the economic, political and social situation in Africa, as well as of the efforts made by Africa, the United Nations and the international community to promote the economic recovery and sustainable development of the region in pursuit of the goals of the New Partnership for Africa's Development (NEPAD) and the achievement of the Goals. The mandates of the Office, ECA and the Department derive from the priorities established in relevant resolutions and decisions, including General Assembly resolutions [32/197](#), [57/7](#), [57/300](#), [61/296](#), [66/293](#) and [78/244](#) and Economic and Social Council resolutions [671 \(11V\) A](#) and 1998/46.

Strategy and external factors for 2025

- 11.2 In 2024, African States will spend, on average, 17 per cent of revenue on debt repayment, while continued high interest rates will make the current model of borrowing to fund development prohibitive. In 2025, the programme will focus on promoting initiatives to enhance resilience at all levels, in particular through investment in institutional infrastructure and the development of capacities that enable African countries to effectively prevent and mitigate the impact of external shocks and address the root causes of debt unsustainability. To this end, the programme will continue to engage with partners and stakeholders to advance its new narrative on Africa – one that reflects and strengthens Africa's role as a key stakeholder and a vital player in the global arena; that brings to the global debate issues that are key for Africa's development, such as domestic resource mobilization, energy access and digitalization; and that is of Africa and from Africa, to be fully embraced within the United Nations and beyond.
- 11.3 The implementation of the programme's strategy is guided by the vision of an empowered Africa that drives its own development to fulfil its potential as a continent of hope, opportunities and prosperity, with the support of the international system. The programme will increase its data capacities and knowledge base, to feed advisory services, awareness-raising, communications and advocacy that mobilize the United Nations system, African Member States, international partners, civil society and the private sector at the global and regional levels with regard to the transformative vision of the African Union and in support of the joint implementation of the 2030 Agenda for Sustainable Development and Agenda 2063.
- 11.4 The Office, ECA and the Department of Global Communications will continue to promote the new narrative through coordinated and complementary action in policy analysis and innovation, research and development, advocacy, communications, global and regional coordination, monitoring and

evaluation and support for Member States. The strategic agenda, developed in consultation with the Group of African States and other stakeholders, continues to guide the programme activities in six cluster areas identified as key for Africa's development because of their multiplying impact: shifting the paradigm on financing for development; achieving sustainable development to deliver durable peace; governance, resilience and human capital; science, technology and innovation; industrialization, the demographic dividend and trade, with a focus on the African Continental Free Trade Area; and a balanced energy mix and climate adaptation. Considering the crucial role that young people play in the continent's development, special attention will be given to promoting youth-focused policies and proposals under each cluster area.

- 11.5 With regard to cooperation with other entities at the global, regional, national and local levels, the programme will continue to work closely with African Member States and African Union institutions as its main partners, in particular with the African Union Commission, the secretariat of the African Union Development Agency-NEPAD, the regional economic communities, the African Peer Review Mechanism and the African Capacity-Building Foundation, among others. In addition, the programme will continue to promote partnerships with an array of Member States, international organizations, civil society, the private sector, academia, think tanks and the African diaspora to enhance common approaches and synergies in their efforts to support Africa's development in the key areas identified in the programme's strategy.
- 11.6 With regard to inter-agency coordination and liaison, the programme will ensure strategic-level coordination among United Nations entities through the interdepartmental task force on African affairs by identifying priorities for building forward and building better, promoting results-based planning to develop the African Union-United Nations Framework for the Implementation of Agenda 2063 and the 2030 Agenda for Sustainable Development and monitoring the implementation of the agreed plans and priorities. The Regional Collaborative Platform for Africa will ensure operational-level coordination among United Nations entities in the field and with the resident coordinator system, bringing the areas of work where strategic guidance is needed, or gaps are identified to the attention of the task force and providing the data and information necessary for the identification of priorities and the monitoring of the work of the United Nations.
- 11.7 With regard to the external factors, the overall plan for 2025 is based on the following planning assumptions:
 - (a) African countries continue to guide their priorities towards implementing Agenda 2063;
 - (b) International partners continue to support Africa's sustainable development through financial contributions, technical support and policy frameworks that support African ownership and empowerment;
 - (c) The partnership between the United Nations and the African Union is further strengthened through the continued implementation of the Joint United Nations-African Union Framework for Enhanced Partnership in Peace and Security, the renewed approach to the African Union-United Nations Framework for the Implementation of Agenda 2063 and the 2030 Agenda for Sustainable Development, and the adoption of the African Union-United Nations Framework on Human Rights;
 - (d) International organizations and partners are committed to the implementation of multi-stakeholder projects and programmes in support of the 2030 Agenda, Agenda 2063, and the priorities of African countries;
 - (e) United Nations entities actively engage in the interdepartmental task force on African affairs and the Regional Collaborative Platform for Africa;
 - (f) External stakeholders and potential partners, including media organizations, academic institutions, civil society organizations and creative communities, continue to engage with the programme's priorities;
 - (g) Member States and partners continue to advocate for and find joint solutions to mitigate the impacts of external shocks on Africa.

- 11.8 The programme integrates a gender perspective into its operational activities, deliverables and results, as appropriate. Subprogramme 1 incorporates a gender perspective into its analytical and policy documents as well as its advocacy activities, with a specific focus on the relevance of issues relating to peace, security and development for the empowerment of women and girls. It actively participates in and co-organizes side events on gender equality and issues relating to the empowerment of women during the annual sessions of the Commission on the Status of Women. Subprogramme 2 integrates a gender perspective with respect to the development and delivery of United Nations support for the implementation of the priorities of the African Union, including the use of sex-disaggregated statistics, and addressing the effects of the coronavirus disease (COVID-19) on the employment of women and increase in domestic violence. Subprogramme 3 promotes gender equality and the empowerment of women by producing and disseminating communications products, through *Africa Renewal* platforms, that counter stereotypes and discrimination against women, and by promoting a balanced presence of women and men in all its multimedia products, promotional campaigns and events.
- 11.9 In line with the United Nations Disability Inclusion Strategy, the programme will promote analysis, policy recommendations and proposals that specifically foster the inclusion of persons with disabilities and will take the measures necessary to increase the accessibility of its products and events.

Legislative mandates

- 11.10 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

32/197	Restructuring of the economic and social sectors of the United Nations system	70/1	Transforming our world: the 2030 Agenda for Sustainable Development
57/2	United Nations Declaration on the New Partnership for Africa’s Development	71/254	Framework for a Renewed United Nations-African Union Partnership on Africa’s Integration and Development Agenda 2017–2027
57/7	Final review and appraisal of the United Nations New Agenda for the Development of Africa in the 1990s and support for the New Partnership for Africa’s Development	75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
57/300	Strengthening of the United Nations: an agenda for further change	76/236	Programme planning
61/296	Cooperation between the United Nations and the African Union	77/170	Ensuring access to affordable, reliable, sustainable and modern energy for all
63/1	Political declaration on Africa’s development needs	78/263	Promotion of durable peace through sustainable development in Africa
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)		

Security Council resolutions

1197 (1998)	2282 (2016)
2033 (2012)	2457 (2019)

Economic and Social Council resolutions

1998/46	Further measures for the restructuring and revitalization of the United Nations in the economic, social and related fields	2022/25	Progress in the implementation of General Assembly resolution 75/233 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system
2022/6	Social dimensions of the New Partnership for Africa’s Development		

**Subprogramme 1
Data and knowledge management for evidence-based policies and advocacy in support of
Agenda 2063**

General Assembly resolutions

53/92; 54/234; 57/296	The causes of conflict and the promotion of durable peace and sustainable development in Africa	74/302; 76/298	Implementation of the recommendations contained in the report of the Secretary-General on the causes of conflict and the promotion of durable peace and sustainable development in Africa
58/233; 78/262	New Partnership for Africa’s Development: progress in implementation and international support	75/327	Implementation of the recommendations contained in the report of the Secretary-General on the promotion of durable peace and sustainable development in Africa
66/293	A monitoring mechanism to review commitments made towards Africa’s development		

**Subprogramme 2
Regional coordination of United Nations support for the integrated implementation of the
2030 Agenda for Sustainable Development and Agenda 2063**

Economic and Social Council resolutions

671 (XXV) A	Establishment of an Economic Commission for Africa
-------------	--

**Subprogramme 3
Public information and awareness activities in support of Agenda 2063**

General Assembly resolutions

78/80 B	Questions relating to information: United Nations global communications policies and activities
---------	---

Deliverables

11.11 Table 11.1 lists all cross-cutting deliverables of the programme.

Table 11.1
Cross-cutting deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	4	3	4	4
Meetings of:				
1. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
2. The Committee for Programme and Coordination	1	1	1	1
3. The Fifth Committee	1	1	1	1
4. The Economic and Social Council on items related to Africa’s development	1	1	1	1
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	6	6	6	6
5. Africa Dialogue Series	5	5	5	5
6. Africa Day at the high-level political forum on sustainable development	1	1	1	1

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
Publications (number of publications)	1	1	1	1
7. Outcome document of the Africa Dialogue Series	1	1	1	1
Technical materials (number of materials)	1	3	3	3
8. Fact sheets and other technical materials informing discussions for the Africa Dialogue Series	1	3	3	3
D. Communication deliverables				
Digital platforms and multimedia content: one quarterly joint audio product on issues relating to Africa’s sustainable development.				

Evaluation activities

- 11.12 The final evaluation of the Office’s capacity-building project for Member States on the design and implementation of policies for the promotion of durable peace through sustainable development is planned for 2025.

Programme of work

Subprogramme 1

Data and knowledge management for evidence-based policies and advocacy in support of Agenda 2063

Objective

- 11.13 The objective, to which this subprogramme contributes, is to advance effective implementation of the 2030 Agenda and Agenda 2063 through coherent, integrated and effective United Nations system engagement, global advocacy and strategic partnership with African Member States and the African Union.

Strategy

- 11.14 To contribute to the objective, the subprogramme will:
 - (a) Act as the focal point for the African Union Commission and its agencies at Headquarters; support enhanced collaboration between the United Nations system and the African Union Commission, regional economic communities, the African Union Development Agency-NEPAD, the African Peer Review Mechanism and other African Union communities; and contribute to strengthening the implementation of the African Union-United Nations Framework for the Implementation of Agenda 2063 and the 2030 Agenda for Sustainable Development;
 - (b) Coordinate the interdepartmental task force on African affairs and monitor United Nations system support for Africa’s sustainable development to promote strategic planning and programming in the United Nations system in Africa in accordance with the priorities of the African Union and African Member States as enshrined in Agenda 2063 and its Second Ten-Year Implementation Plan;
 - (c) Perform horizon scanning and analyse emerging trends, challenges and opportunities in the areas of strategic focus of the programme, as well as developing policy proposals to maximize opportunities and minimize and mitigate identified risks, through the management of data and knowledge, and promote policy innovation initiatives that have the potential to act as multiplier interventions to support Africa’s sustainable development;

- (d) Assess commitments made toward Africa's development aligned with the 2030 Agenda and Agenda 2063, applying a cluster-based approach aimed at identifying challenges faced and, when appropriate, propose corrective measures;
- (e) Facilitate intergovernmental deliberations on issues relating to Africa's sustainable development and support African Member States in their participation in intergovernmental processes;
- (f) Develop and implement communication and global advocacy strategies in support of Agenda 2063, in coordination with subprogrammes 2 and 3;
- (g) Promote strategic partnerships with African Member States and African Union institutions, leveraging United Nations knowledge and capacities through technical cooperation with United Nations agencies, funds and programmes regarding flagship initiatives and projects;
- (h) Establish a fellowship programme for young African scholars and engage in new initiatives with partners to strengthen institutional capacities in policy analysis, design and monitoring.

11.15 The above-mentioned work is expected to result in:

- (a) Empowerment of African Member States to mobilize increased resources for Africa's development and maximize their impact through targeted data and evidence-based policies;
- (b) Strengthened cooperation between the United Nations system and the African Union and other African institutions, as well as increased complementarity of their activities in support of the implementation of the 2030 Agenda and Agenda 2063;
- (c) A more coherent and integrated approach by the United Nations system support for Africa to challenges affecting Africa's development that includes and addresses existing gaps and leverages opportunities through impact-focused priorities with a multiplying impact;
- (d) Stronger alignment of intergovernmental discussions with the priorities of African countries and the African Union, as well as increased integration of African perspectives into global debates and decisions;
- (e) Greater accountability of stakeholders in the implementation of commitments to Agenda 2063 and the 2030 Agenda;
- (f) Increased awareness and understanding of the international community of the perspective of the African Union and the realities and priorities of African countries.

Programme performance in 2023

Innovative financing solutions for durable peace and sustainable development

11.16 In 2022, 63 per cent of African countries were either at high risk or in debt distress, with collective public debt amounting to \$655.59 billion. This situation has severely limited fiscal space to utilize resources for sustainable development and essential public services. As funds are diverted to debt servicing, the ability to provide services effectively, inclusively and transparently is compromised, undermining State legitimacy, social cohesion and peace. To support African countries in facing this challenge, between 2021 and 2022 the subprogramme developed a holistic policy approach to school meals programming that went beyond the traditional focus on nutrition, health, gender equality and education. The expanded approach includes renewable energy, climate adaption and livelihood generation, which, when combined with efforts to strengthen domestic resource mobilization, can have a multiplying effect that creates fiscal space, promotes State presence and fosters trust in institutions. Building on this momentum, the subprogramme intensified advocacy efforts and, in 2023, collaborated with partners to position debt swaps as an innovative financing mechanism by redirecting debt servicing towards scaling up national school meal programmes, in order to foster peace, development and progress towards achieving the Sustainable Development Goals.

11.17 Progress towards the objective is presented in the performance measure below (see table 11.2).

Table 11.2
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
School feeding as a tool for peace and resilience building in communities affected by armed conflict leveraged through the “Pen for a Gun” campaign of the School Meals Coalition in collaboration with the Office	A notable increase in participation within the School Meals Coalition, from 23 to 29 African countries	Five requests from African States seeking policy support to develop their own domestic resource mobilization initiatives

Planned results for 2025

Result 1: action for a balanced energy mix in Africa to achieve the Sustainable Development Goals

Programme performance in 2023 and target for 2025

- 11.18 The subprogramme’s work contributed to an increased number of African States developing energy mix proposals to achieve energy access for all in Africa, with 5 countries having established national low-emission hydrogen production strategies and 18 countries engaged in the process of developing their own national strategies, which met the planned target.
- 11.19 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 11.3).

Table 11.3
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Member States adopted a global road map to achieve energy access for all by 2030	African Union member States adopted the African Common Position on Energy Access and Just Energy Transition	Five African countries (Algeria, Egypt, Morocco, Namibia and South Africa) established national low-emission hydrogen production strategies, while an additional 18 countries are in the process of developing their own	Member States make progress in identifying and accessing financing options for a balanced energy mix and climate adaptation priorities as outlined in their national development and universal energy access plan	African Member States actively seize financing opportunities by promoting energy efficiency measures, concurrently advancing in the utilization of their critical mineral resources for local sustainable development while making a bold contribution to global energy transition

Result 2: strong country systems for development, social cohesion and peace and stability in Africa
Programme performance in 2023 and target for 2025

- 11.20 The subprogramme’s work contributed to 26 African States adopting a whole-of-government approach to public sector digital transformation, which did not meet the planned target of 28 African States. It was not possible to assess whether the target was not met because most recent data available were from 2022, with the next data set expected in 2024.
- 11.21 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 11.I).

Figure 11.I
Performance measure: number of African States that have a whole-of-government approach to public sector digital transformation (cumulative)

Result 3: digital solutions to transform financial systems and manage debt in Africa
Proposed programme plan for 2025

- 11.22 The current financial global architecture, coupled with high interest rates, has led to high levels of indebtedness among African States that limits the fiscal space of these nations, hindering their ability to allocate resources to essential sectors and sustainable development initiatives. As identified in the subprogramme’s knowledge products, the digitalization of State services for revenue collection can create efficiency gains, reduce the compliance burden and broaden the tax base. Only some 60 per cent of African States have tax e-filing or digital customs systems in place, and the continent loses at least \$116 billion annually owing to inefficient domestic resource mobilization, such as redundant tax incentives and inefficiencies in public spending.

Lessons learned and planned change

- 11.23 The lesson for the subprogramme was the need to mobilize African States to adopt digital solutions for revenue collection. In applying the lesson, the subprogramme will foster collaboration and coordination among key stakeholders, including the African Union Commission, to establish a domestic resource mobilization coalition that will support countries on the continent in identifying improvements in revenue collection and spending processes using technology and digital solutions.
- 11.24 Expected progress towards the objective is presented in the performance measure below (see table 11.4).

Table 11.4
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
The Group of African States endorsed the Office’s proposal for strategic prioritization of domestic resource mobilization as a critical component of financing for development in Africa	ECA Conference of Ministers expressed concern that the continent’s debt vulnerabilities had been exacerbated by insufficient domestic resource mobilization (resolution 982 (LIV))	General Assembly adopted specific recommendations to advance domestic resource mobilization and unlock financing for accelerating the achievement of the Sustainable Development Goals (resolution 78/262)	African Union Commission establishes a domestic resource mobilization coalition that mobilizes African States to develop strategies to alleviate the continent’s debt distress and increase countries’ fiscal space	Domestic resource mobilization coalition members adopt a road map targeting inefficient public spending, inefficient tax incentives, trade mispricing and tax administration deficiencies, leveraging digital solutions to strengthen national domestic resource mobilization systems

Deliverables

11.25 Table 11.5 lists all deliverables of the subprogramme.

Table 11.5
Subprogramme 1: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	4	4	3	4
1. Report of the Secretary-General to the General Assembly on Africa’s development	1	1	1	1
2. Report of the Secretary-General to the General Assembly and the Security Council on the promotion of durable peace and sustainable development in Africa	1	1	1	1
3. Biennial report of the Secretary-General to the General Assembly on the review of the implementation of commitments towards Africa’s development	1	1	–	1
4. Report of the Secretary-General to the Committee for Programme and Coordination on the United Nations system support for Agenda 2063	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	3	3	3	3
5. Meetings of the General Assembly	3	3	3	3
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	–	–	–	1
6. Fellowship programme for young African scholars to enhance their capacity in policy research, analysis and advocacy	–	–	–	1
Seminars, workshops and training events (number of days)	10	12	12	12
7. Workshops on Africa’s sustainable development, peace and security	4	4	6	6
8. Seminars of the research network	6	8	6	6
Publications (number of publications)	6	6	20	22
9. On Africa’s sustainable development, including financing for development, promotion of durable peace, governance, resilience and human capital, science, technology and innovation, industrialization, and energy and climate action	6	6	20	22

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
Technical materials (number of materials)	30	30	11	11
10. On Africa’s sustainable development, including financing for development, promotion of durable peace, governance, resilience and human capital, science, technology and innovation, industrialization, and energy and climate action	30	30	10	10
11. Online training course on links between peace and development	–	–	1	1

C. Substantive deliverables

Consultation, advice and advocacy: consultations and strategic-level coordination with African Union institutions; consultations on an annual results-oriented workplan for the interdepartmental task force on African affairs; evidence-based and data-driven advice and policy proposals provided to United Nations leadership and African Member States, including monthly briefings focused on trends, foresight and policy analysis, as well as quarterly briefings and materials in support of the participation of African Member States in intergovernmental processes; and advocacy products focused on the prioritization of policy proposals aimed at supporting Africa’s transformational agenda, including panels, round tables and side events during the Economic and Social Council youth forum, the high-level political forum on sustainable development and other major United Nations conferences aimed at an audience of approximately 200 participants (government and academia) for each advocacy event, and at least 4 advocacy videos.

Databases and substantive digital materials: online knowledge repository with digital copies of the work of the Office of the Special Adviser on Africa in at least 4 official languages of the United Nations; United Nations monitoring mechanism database; data on United Nations action in Africa made available to complement the Office’s reporting mandate; database of African think tanks and non-governmental organizations; and online country dashboards for African members of the Security Council and the Peacebuilding Commission.

D. Communication deliverables

Outreach programmes, special events and information materials: awareness-raising events, including the Africa’s Youth Voices initiative; and outreach campaigns, including audiovisual materials on key issues affecting Africa’s sustainable development.

External and media relations: press releases, press conferences and media dialogues on issues relating to Africa’s sustainable development, peace and security and human rights in Africa.

Digital platforms and multimedia content: Office of the Special Adviser on Africa website and social media with updated content in at least 4 official languages of the United Nations; multimedia documents in all United Nations official languages; and communication and multimedia content that meet the full accessibility standards issued by the Office.

**Subprogramme 2
Regional coordination of United Nations support for the integrated
implementation of the 2030 Agenda for Sustainable Development and Agenda 2063**

Objective

- 11.26 The objective, to which this subprogramme contributes, is to accelerate the integrated implementation of Agenda 2063 and the 2030 Agenda through United Nations system-wide coherence and collaboration and to enhance capacities of African Union organs and agencies, in particular the African Union Commission, the African Union Development Agency-NEPAD and the regional economic communities, at the regional and subregional levels.

Strategy

- 11.27 To contribute to the objective, the subprogramme will:
 - (a) Conduct policy research and analysis on African Union priorities and transboundary issues relevant to Africa’s regional transformation and integration, and disseminate the findings across the five subregions of Africa;
 - (b) Provide technical assistance and advisory services within the framework of Agenda 2063 and the 2030 Agenda, taking into account the United Nations-African Union cooperation frameworks and the African Union strategic priorities, including the Second Ten-Year Implementation Plan;

- (c) Support the African Union Development Agency-NEPAD in the context of continental priorities in collaboration with subprogrammes 1 and 2, and build the capacity of subregional entities to formulate strategies for the integrated implementation of development priorities of regional economic communities and intergovernmental organizations in collaboration with ECA subprogrammes;
 - (d) Work under the architecture of the Regional Collaborative Platform for Africa, with the opportunity and issue-based coalitions, to promote coherent United Nations system-wide support for the African Union and for resident coordinators and United Nations country teams towards the realization of Agenda 2063 and the 2030 Agenda.
- 11.28 The above-mentioned work is expected to result in:
- (a) Increased and more effective United Nations support for the African Union and its development priorities as reflected in Agenda 2063;
 - (b) Development and implementation by Member States of their national development priorities, aligned with global and regional frameworks on sustainable development.

Programme performance in 2023

Strengthened United Nations-African Union collaboration to accelerate the integrated implementation of Agenda 2063 and Agenda 2030

- 11.29 Agenda 2063 is a shared strategic vision for inclusive growth and sustainable development for Africa to be realized over a period of 50 years. To translate the vision into concrete action and ensure effective and coordinated implementation, the African Union developed the First Ten-Year Implementation Plan covering the period 2014–2023. With the First Ten-Year Implementation Plan concluding in 2023, there was a need to conduct an evaluation to assess progress towards set goals, targets and indicators. As a core member of the African Union-United Nations technical working group on the preparation and monitoring of the First Ten-Year Implementation Plan, the subprogramme actively contributed to the evaluation process by participating through desk reviews of the assessment, analysis of national consultation reports, and the drafting of sections of the evaluation report on thematic focus areas of regional integration, macroeconomics and climate change, as well as the lessons learned from the First Ten-Year Implementation Plan. The key findings and recommendations from the evaluation of the First Ten-Year Implementation Plan were validated by the African Union Executive Council. Furthermore, the recommendations also informed the development of the Second Ten-Year Implementation Plan by the African Union Heads of State in February 2024.
- 11.30 Progress towards the objective is presented in the performance measure below (see table 11.6).

Table 11.6

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
The objectives, scope and methodology for the evaluation of the First Ten-Year Implementation Plan of Agenda 2063 endorsed by the African Union	The multi-stakeholder technical working group undertook data collection and analysis and prepared country reports	The recommendations from the evaluation of the First Ten-Year Implementation Plan validated by the African Union and informed the development of the Second Ten-Year Implementation Plan spanning the period 2024–2033

Planned results for 2025

Result 1: enhanced action by African countries on energy access and climate adaptation

Programme performance in 2023 and target for 2025

- 11.31 The subprogramme’s work contributed to the development of one additional regional strategy to promote energy access and climate adaptation for a cumulative total of eight, which exceeded the planned target of six.
- 11.32 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 11.II).

Figure 11.II
Performance measure: number of national and regional strategies developed to promote energy access and climate adaptation (cumulative)

Result 2: accelerated progress towards the 2030 Agenda and Agenda 2063 at the regional, subregional and national levels through an integrated approach

Programme performance in 2023 and target for 2025

- 11.33 The subprogramme’s work contributed to the adoption of three integrated initiatives at the regional level to accelerate progress towards the 2030 Agenda and Agenda 2063, which met the planned target.
- 11.34 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 11.III).

Figure 11.III
Performance measure: number of integrated initiatives adopted by national or subnational authorities or at the regional level to accelerate progress towards the 2030 Agenda and Agenda 2063 (cumulative)

Result 3: long-term strategies for debt management in Africa

Proposed programme plan for 2025

11.35 Since 2010, Africa's debt has increased by some 187 per cent, while gross domestic product (GDP) grew by only approximately 43 per cent over the same period. With 18 countries having a debt-to-GDP ratio of more than 70 per cent, most are either at risk of or already in debt distress. Debt repayment has overtaken spending on social services such as health and education and development, with most countries spending a greater proportion of their revenue (which are already low, at 16.6 per cent of GDP) on interest payments.

Lessons learned and planned change

11.36 The lesson for the subprogramme was the need to support ECA member States in developing longer-term strategies to manage debt, given that, in many countries, fiscal policy focuses primarily on short-term interventions to reduce fiscal deficit without sufficient consideration given to debt sustainability in the medium or long term. In applying the lesson, the subprogramme will provide policy advice and technical assistance to promote a more strategic approach to fiscal policy, guided by a longer-term strategy with debt targets that integrate the policy trade-offs between debt sustainability and development goals. The subprogramme will conduct research to assess debt servicing capacity and the impacts of debt on development, and hold policy dialogues and technical workshops, in partnership with the African Union and its agencies.

11.37 Expected progress towards the objective is presented in the performance measure below (see figure 11.IV).

Figure 11.IV

Performance measure: number of Economic Commission for Africa member States that develop longer-term strategies to manage debt in an integrated manner

Deliverables

11.38 Table 11.7 lists all deliverables of the subprogramme.

Table 11.7
Subprogramme 2: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	3	3	3	4
Reports on:				
1. United Nations support for the African Union and its NEPAD programme to the Conference of African Ministers of Finance, Planning and Economic Development	1	1	1	1
2. The annual session of the Regional Collaborative Platform for Africa (expert body)	1	1	1	1
3. The retreat of the Regional Collaborative Platform for Africa and joint secretariat (expert body)	1	1	1	2
Substantive services for meetings (number of three-hour meetings)	11	11	18	16
4. Meeting of the Conference of Ministers	1	1	1	1
5. Africa Regional Forum on Sustainable Development	1	1	1	1
6. Retreat of the Regional Collaborative Platform for Africa and joint secretariat	1	1	8	6
7. Meetings on capacity development and partnerships related to Agenda 2063 and the 2030 Agenda	8	8	8	8
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	–	2	1
8. On the African Union and its agencies including the African Union Development Agency-NEPAD	1	–	2	1
Seminars, workshops and training events (number of days)	8	2	4	9
9. Workshops relating to debt, climate and energy	8	2	4	9
Publications (number of publications)	5	2	4	4
10. Progress report of the Regional Collaborative Platform for Africa	1	1	1	1
11. Progress report of the African Union-United Nations frameworks and initiatives	1	1	1	–
12. On topics specific to the work of the Regional Collaborative Platform for Africa	1	–	–	–
13. On Agenda 2063 and the 2030 Agenda	1	–	1	–
14. On topics relating to African Union organs and agencies	1	–	1	–
15. On topics relating to Africa’s development issues regarding debt, energy and climate change	–	–	–	3
Technical materials (number of materials)	3	2	2	3
16. On African development issues, including debt, climate and energy	1	–	1	2
17. On implementation of Agenda 2063 and the 2030 Agenda	2	2	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services, upon request, relating to integrated implementation of Agenda 2063 and the 2030 Agenda for ECA member States, the African Union Commission, the African Union Development Agency-NEPAD and the six regional economic communities; and advocacy relating to capacity-building support for the African Union in the context of United Nations-African Union frameworks.				
D. Communication deliverables				
Outreach programmes, special events and information materials: pamphlets, booklets and celebrations and commemorations of special events and exhibits.				
Digital platforms and multimedia content: website with up-to-date content on the work of the subprogramme.				

Subprogramme 3 Public information and awareness activities in support of Agenda 2063

Objective

- 11.39 The objective, to which this subprogramme contributes, is to achieve the informed understanding and engagement of a global audience in support of the economic, political and social development of Africa.

Strategy

- 11.40 To contribute to the objective, the subprogramme will:
 - (a) Develop global comprehensive editorial plans on priority issues affecting Africa, including generating support in Africa and beyond for the African Union Development Agency-NEPAD, and the implementation of the Agenda 2063 and the 2030 Agenda, as well as in support for the work of subprogrammes 1 and 2 and their advocacy strategies. This is under the umbrella of the strategy of the Africa Section of the Department of Global Communications and in line with the global communications strategy;
 - (b) Produce external communications content, including through the *Africa Renewal* digital platforms, media advisories and other public information, for use by external media, both African and international, and provide external communications support to the Office;
 - (c) Produce or translate select content into languages such as French and Kiswahili.
- 11.41 The above-mentioned work is expected to result in enhanced awareness of key thematic issues of the African Union Development Agency-NEPAD and other issues relating to economic recovery and sustainable development in Africa.

Programme performance in 2023

Public learns about the challenges and opportunities for Angola’s sustainable development efforts

- 11.42 Transforming4Trade focuses on strategic pillars for socioeconomic development, including agriculture and the creative industries. The subprogramme provided coverage of the Transforming4Trade initiative in Angola in a new series, which was an opportunity to highlight United Nations support for Angola’s sustainable development efforts. Piloted in Angola under the Train for Trade II programme, the initiative is intended to help to reorient the country’s development policies and partnerships towards fostering its productive capacities and economic transformation. Coverage included a special series of 12 articles, one special newsletter edition and a dedicated webpage of the full series. Transforming4Trade has been a focus of coverage for the *Africa Renewal* platform, but the profiling of Angola as an example is new. The page received more than 4,000 views in French and English, and a special edition magazine was created in digital format and was distributed in English and Portuguese to stakeholders and opinion makers across Angola.
- 11.43 Progress towards the objective is presented in the performance measure below (see figure 11.V).

Figure 11.V

Performance measure: number of views of articles published on Angola’s Transforming4Trade initiative

Planned results for 2025

Result 1: amplified African voices in the public sphere on issues relating to climate change and energy

Programme performance in 2023 and target for 2025

- 11.44 The subprogramme’s work contributed to 10 African women experts cited in *Africa Renewal*, which did not meet the planned target of 14 African women experts. The target was not met owing to reduced capacity of the subprogramme, which limited its ability to generate additional digital content. The subprogramme is developing a pipeline of content to be published in 2024 and 2025.
- 11.45 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 11.VI).

Figure 11.VI

Performance measure: number of African women experts on climate and energy cited, published or interviewed in *Africa Renewal* (annual)

Result 2: increased awareness of the general public on peace and security issues in Africa

Programme performance in 2023 and target for 2025

- 11.46 The subprogramme’s work contributed to the publication of 25 articles with 9,170 page views and 446 audio plays, which did not meet the planned target of 3,500 plays. The target was not met owing to delays in the planned launch of a new website with the technology to host the content.
- 11.47 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 11.VII).

Figure 11.VII
Performance measure: number of plays of Africa Renewal audio stories on peace and security issues (annual)

Result 3: engagement of the general public on Africa’s debt burden and potential solutions

Proposed programme plan for 2025

11.48 Public awareness of issues relating to Africa’s debt burden is essential for fostering informed debates, promoting responsible governance and advocating for sustainable solutions to address debt challenges and support the continent’s development aspirations. The subprogramme will work in collaboration with subprogrammes 1 and 2 and the African Union to increase awareness of challenges and potential solutions to Africa’s debt challenge.

Lessons learned and planned change

11.49 The lesson for the subprogramme was the need to better identify and collaborate with contributors to broaden the reach and impact of the *Africa Renewal* platform and to tailor content for digital audiences. In applying the lesson, the subprogramme will focus on producing digital stories and content while leveraging an increasingly mobile and digital-led communication ecosphere across the continent, in order to increase awareness of the general public on Africa’s debt burden as a challenge in achieving a sustainable future. The subprogramme will also work to increase outreach to academic stakeholders and media partners to further the reach of the narrative regarding the potential and successes of economies across the continent and the challenges that they face to achieve them.

11.50 Expected progress towards the objective is presented in the performance measure below (see figure 11.VIII).

Figure 11.VIII
Performance measure: increased engagement of the general public on Africa’s debt burden and potential solutions (annual)

Deliverables

11.51 Table 11.8 lists all deliverables of the subprogramme.

Table 11.8
Subprogramme 3: deliverables for 2025, by category and subcategory

Category and subcategory

D. Communication deliverables

Outreach programmes, special events and information materials: partnerships with approximately 25 editors and writers at major media houses in Africa and other countries, education institutions, civil society organizations and creative communities to amplify *Africa Renewal* content for wider distribution and dissemination; 4 webinars with youth organizations; external communications products, including relating to the annual Africa Dialogue Series, the Commission on the Status of Women, the Economic and Social Council youth forum, the General Assembly and African Union flagship events; contributions to the work of the Regional Collaborative Platform for Africa and the interdepartmental task force on African affairs; and publicity in support of international, regional and local initiatives and campaigns that foster or have an impact on Africa’s economic and social development.

External and media relations: media round tables; content tailored to specific media outlets interested in Africa’s development for syndication or citation and in including relevant information on United Nations support for Africa in their own materials; and international, regional and local initiatives and campaigns that foster or affect Africa’s economic and social development; and public information material, including media advisories.

Digital platforms and multimedia content: digital products and written and audio content for *Africa Renewal* digital platforms, including the *Africa Renewal* website, *Africa Renewal* social media accounts, monthly curated newsletters and a mobile phone application.

B. Proposed post and non-post resource requirements for 2025

Overview

- 11.52 The General Assembly, in its resolution [76/245](#), endorsed the recommendation of the Advisory Committee on Administrative and Budgetary Questions in its report [A/76/7](#), to request the Secretary-General to review and report on the functioning of the reorganization of the Office at the seventy-ninth session of the Assembly. In addition, in line with Assembly resolution [77/262](#), the Office carried out a spending review in the context of the proposed programme budget for 2025.
- 11.53 It should be recalled that the Office embarked on a significant reform effort aimed at optimizing its mandate delivery. It adopted a three-pillar approach encompassing strategic planning, functional and structural reforms and enhancements in the area of human resources management. This endeavour has been characterized by a holistic approach aimed at addressing strategic, management, structural, capacity and work culture matters, as outlined below.
- 11.54 Strategic planning has been pivotal in shaping programme 9's direction and fostering alignment with Africa's development priorities. A strategic agenda was developed and adopted in December 2020, focused on six cluster¹ areas and underpinned by a results-based management approach. The strategic agenda has laid down a robust framework for planning and progress assessment that has been applied during annual planning workshops, facilitating collaborative goal-setting processes while promoting strategic alignment across units. This is evident across the programme budgets submitted from 2022 to 2025, which have consolidated a single programmatic focus for each new result across the three subprogrammes. Furthermore, the Office developed a value chain approach, coupled with a business workflow and a quality control system, which are steadily enhancing the delivery, output and quality of its knowledge products and initiatives. Since 2022, these elements have been consolidated into an annual results-based planning and budgeting exercise aligned with the programme budget cycle to ensure the optimization of resource allocation.
- 11.55 Functional and structural reforms have been instrumental in streamlining the Office's operations and maximizing its organizational effectiveness. The establishment of clear structures, reconfiguration of work units and reprofiling of some positions as submitted and approved through the 2022 programme budget have ensured the effective distribution of work and addressed shortcomings identified by the Office of Internal Oversight Services. In addition, the creation of the executive direction and management component has enhanced coordination and support services such as data, strategic communications, planning, budgeting, monitoring and evaluation, which have contributed to further optimizing programme delivery. In 2023, the Office adopted a communications and data strategy to lay a path for the development of those services, guided by best practices developed by the Department of Global Communications and the Office of Information and Communications Technology.
- 11.56 The enhancements in the area of human resources management, including linking individual workplans to the Office's programme of work and implementing a new performance evaluation mechanism, have underscored the criticality of human resources management for organizational success. To foster a transparent and objective performance management approach, planning and monitoring data from the Integrated Planning, Monitoring and Reporting application are used to complement the Inspira-based performance management cycle. This has been coupled with a comprehensive learning plan focused on building critical skills outlined in the United Nations 2.0 quintet of change, in particular with regard to data and policy analysis, which has contributed to increased skills development among staff.
- 11.57 The three reform pillars have not only led to reduced duplication and increased impact, but also increased productivity, thereby transforming the operational landscape of the Office. Regular programme delivery monitoring utilizing Umoja applications, including the Integrated Planning,

¹ Financing for development; peace and security; governance and human capital; science, technology and innovation; industrialization and the African Continental Free Trade Area; and energy and climate action.

Monitoring and Reporting application for delivery of outputs and Business Planning and Consolidation for budget consumption, has contributed to enhanced oversight and evidence-based decision-making and, in turn, has informed the programme budget development process. As presented in the programme budgets across 2023, 2024 and 2025, the Office has taken steps to realign planning assumptions on the basis of actual results and past budget consumption, aimed at optimizing resource use and enhancing expected outcomes.

- 11.58 With regard to the spending review, several measures have been put in place to optimize the use of existing resources and to review financial performance through the engagement of programme managers. To maintain ongoing coordination and oversight, quarterly meetings have been established to ensure coherence among subprogramme managers, while weekly meetings within each subprogramme ensure seamless coordination and supervision at the unit level. These frameworks facilitate oversight, reporting and corrective action by managers regarding programme implementation and budget allocation. They also serve as channels for sharing information on the annual programme plan and budget. Monthly updates on budget utilization and quarterly assessments of overall programme implementation are communicated to senior managers to support their decision-making processes. Elements of the current spending review have been integrated into these meeting structures and will continue as a good practice. Taking into account that staff capacities in the areas of planning, data and policy analysis have improved, the budget for consultants has been reduced and prioritized for strategic initiatives, such as the expected implementation in 2025 of technical components relating to the Office's data strategy. Similarly, the increased utilization of technological solutions such as software and the use of cloud-based applications for data processing have created new capacities within the Office, in particular concerning data collection and analysis. This results from a further review of the reform of the Office in response to the increased integration of the work between executive direction and management and the three subprogrammes. In particular, the provision of communications support to the programme offers an opportunity for staff reassignment, as in the case of one General Service (Other level) staff member who would be reassigned to assume the role as Graphic Design Assistant to the Strategic Management Unit while performing administrative functions in executive direction and management. The proposed reassignment would create synergies by allowing the establishment of two joint workstreams between executive direction and management and subprogramme 3 in support of the entire programme. In addition, the Office has maintained good practices through the application of lessons learned that emphasize the use of technology and digital solutions for everyday work, which has minimized the need to procure stationery and other office supplies, resulting in a reduction under office supplies and materials. Resources have been reorganized to cover the replacement of unserviceable equipment and furniture that have been assessed through annual equipment and software inventories. Furthermore, enhancements achieved in planning and organizing events by applying hybrid and online modalities using online conferencing technology have resulted in a reduction under experts and have increased the Office's reach to stakeholders through digital platforms. The reduction in experts under subprogramme 1 has enabled the Office to support the increased demand associated with the establishment of a domestic resource mobilization coalition and increased travel requirements under executive direction and management, while the increase in experts under subprogramme 2 to accelerate engagement with partners and experts is offset by the reduced requirements under contractual services owing to the agreed cost-sharing plan on related Regional Collaborative Platform activities. Notwithstanding the increased output of knowledge products, the Office managed to reduce its use of desktop publication and translation services, enabling further decreases under contractual services. In turn, the Office has leveraged these outputs for its knowledge broker and advisory functions, reinforcing in a positive manner a value-added programming approach.
- 11.59 The effects of this are evident when assessing data available through the Office's website, which demonstrate significant increases in engagement across three categories compared with 2022 and 2023 data: website users increased from 8,112 to 36,876; page views increased from 26,971 to 86,036; and the number of PDF downloads increased from 1,802 to 3,237. The increase in PDF downloads by 80 per cent, in particular, indicates a higher interest and engagement with the Office's

Section 11 United Nations system support for the African Union’s Agenda 2063: The Africa We Want

knowledge products, contributing significantly to its monitoring, coordination, advocacy and advisory functions. In developing the 2025 budget proposal, the Office has applied this planning assumption and has introduced new elements, such as policy innovation, collaboration with the African Peer Review Mechanism and the establishment of a fellowship for young Africans, which will further bolster and enhance the mandate delivery of the Office, both substantively and qualitatively.

11.60 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 11.9 to 11.11.

Table 11.9 Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

11.61 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 11.12 to 11.14 and figure 11.IX.

11.62 As shown in tables 11.12 (1) and 11.13 (1), the overall resources proposed for 2025 amount to \$10,235,700 before recosting, reflecting an increase of \$623,200 (or 6.5 per cent) compared with the approved budget for 2024. Resource changes result from new mandates. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Explanation of variances by factor, component and subprogramme

Overall resource changes

New and expanded mandates

- 11.63 As shown in table 11.12 (1), resource changes reflect an increase of \$623,200, pursuant to General Assembly resolution 78/263, whereby the Assembly requested the Secretary-General to present a proposal for the establishment of a fellowship for young Africans at United Nations Headquarters in New York to strengthen institutional capacities in policy analysis, design and monitoring, under the coordination of the Office of the Special Adviser on Africa; and to develop an initiative with the African Peer Review Mechanism on the strengthening of e-governance in Africa through policy

innovation and transformative technologies. In implementing these mandated activities, resources would be allocated to executive direction and management and subprogramme 1, as follows:

- (a) **Executive direction and management.** To support the fellowship programme for young Africans, an increase of \$493,200 would provide for: (i) monthly stipend, onboarding and repatriation travel, separation grant and medical insurance for a first cohort of 10 fellows during a six-month period from July to December 2025 under grants and contributions (\$312,300); and (ii) the establishment of two posts (1 P-2 and 1 General Service (Other level)) for management and overall support of the fellowship programme, including outreach and coordination efforts under the guidance of the Under-Secretary-General, considering the expected high volume of applicants under posts (\$142,100), as well as non-post resources associated with the new posts (\$8,800). Annex II to the present report provides detailed job description of the two posts. In addition, an increase of \$30,000 would cover staff travel in efforts to engage with the African Peer Review Mechanism and provide for high-level missions led by the Under-Secretary-General for the implementation of the initiative;
- (b) **Subprogramme 1, Data and knowledge management for evidence-based policies and advocacy in support of Agenda 2063.** An increase of \$130,000 would provide for the implementation of the initiative with the African Peer Review Mechanism, including: (i) experts (\$50,000) for travel of high-level African officials to regional workshops for the development of capacities in the Mechanism's support structure; (ii) travel of staff (\$30,000) for organizing the workshops and supporting the missions of the Under-Secretary-General in support of the Mechanism; and (iii) contractual services (\$50,000) for translation and interpretation services for the workshops.

Other changes

11.64 As shown in table 11.12 (1), resource changes reflect a net change of \$0, as follows:

- (a) **Executive direction and management.** The net increase of \$12,400 reflects an increase of \$18,400 under travel of staff, resulting from the proposed inward redeployment from subprogramme 1 to cover increased demands associated with the establishment of the domestic resource mobilization coalition and for executive advisory services, offset in part by a decrease of \$6,000 under consultants owing to an increased reliance on internal capacity;
- (b) **Subprogramme 1, Data and knowledge management for evidence-based policies and advocacy in support of Agenda 2063.** The net decrease of \$12,400 reflects a decrease of \$18,400 under travel of staff, resulting from the proposed outward redeployment to executive direction and management, as explained above, and a decrease of \$1,000 under supplies and materials, due to the increased use of digital resources, offset in part by an increase of \$7,000 under furniture and equipment to replace laptops that will expire in 2025.

Extrabudgetary resources

11.65 As reflected in table 11.12 (2), extrabudgetary resources amounting to \$611,000 would complement regular budget resources and would be used for non-post resources to sustain initiatives established in 2023 and 2024 through extrabudgetary resources, such as the online course on developing strategies for the promotion of durable peace through sustainable development interventions, engagement with African academics through the United Nations-Office of the Special Adviser on Africa academic conference and building a network to allow academics and policymakers to exchange and jointly develop knowledge products on issues of priority for the African continent.

11.66 The extrabudgetary resources under the present section are subject to the oversight of the Special Adviser on Africa on the basis of the delegated authority from the Secretary-General.

Executive direction and management

- 11.67 The executive direction and management component comprises the Office of the Under-Secretary-General and the Strategic Management Unit.
- 11.68 The main responsibilities of the executive direction and management component include:
- (a) To represent the programme and facilitate the interaction of the three subprogrammes with other entities and stakeholders;
 - (b) To contribute to and facilitate debate among Member States, in particular those in the Group of African States, on the strategic direction of programme 9;
 - (c) To develop a forward-looking strategy for the activities of programme 9 to respond to emerging and foreseeable priorities of African Member States and the African Union;
 - (d) To coordinate the joint planning and performance monitoring of programme 9 and to provide strategic guidance for the prioritization of issues within the programme;
 - (e) To provide strategic guidance for the development of policy for, and to provide direction for and ensure the implementation of, the programme of work of the Office, through continuous planning, monitoring and evaluation of subprogrammes performance;
 - (f) To promote transparency, cooperation, synergies and coherence among the three subprogrammes;
 - (g) To provide guidance for the mainstreaming of data analysis and management into the programme's activities;
 - (h) To manage all administrative issues regarding the functioning of the Office and to provide logistical and administrative support for subprogramme 1;
 - (i) To contribute to United Nations reform discussions, in relation to improving system-wide coherence in United Nations development work in Africa.
- 11.69 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Office is integrating environmental management practices into its operations. The Office will continue to reduce its carbon footprint by utilizing virtual platforms for strategic engagement and interaction with its stakeholders, as feasible, and by implementing measures to limit energy waste, recycling obsolete information technology equipment and raising staff awareness.
- 11.70 Information on the timely submission of documentation and advance booking for air travel is reflected in table 11.15. The lower compliance rate is due to the late receipt of documents for travel requests or participation as part of delegations of senior officials. The Office will continue to take measures to enable the timely submission of travel requests.

Table 11.15
Compliance rate

	2021 <i>actual</i>	2022 <i>actual</i>	2023 <i>actual</i>	2024 <i>planned</i>	2025 <i>planned</i>

- 11.71 The proposed regular budget resources for 2025 amount to \$2,566,800 and reflect an increase of \$505,600 compared with the approved budget for 2024. The proposed change is explained in paragraphs 11.63 (a) and 11.64 (a) above. Additional details on the distribution of the proposed resources for 2025 are reflected in table 11.16 and figure 11.X.

Annex II

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Executive direction and management	1	P-2	Establishment of 1 Associate Administrative Officer	The Associate Administrative Officer would be responsible for coordinating the fellowship programme, under the guidance of the Under-Secretary-General. In particular, the incumbent would be responsible for outreach and partnership management with: (a) United Nations entities, to identify and define fellowship opportunities in various departments; (b) donors, to raise additional extrabudgetary funds that support the expansion of the programme; (c) African Union institutions, to identify and define specific opportunities for the continuation of each fellow's tenure in the African Union; and (d) academic institutions, to promote the fellowship. The incumbent would also be responsible for: (a) the development of specific terms of reference for each fellowship; (b) the review of the suitability of applications and management of the administrative aspects of the selection of the fellows, and coordination of their placement with participating entities; (c) the design and coordination of the fellows' capacity development programme; (d) the review of the fellows' programme of work; (e) supporting the development of the Office's programme budget relating to the implementation of the fellowship; and (f) the review and approval of payment of stipends and other programme expenditure.
	1	GS (OL)	Establishment of 1 Programme Management Assistant	The Programme Management Assistant would be responsible for the overall support to the fellowship programme, including: (a) the publication of the fellowship opportunities; (b) the receipt of applications and review of eligibility criteria; (c) visa and travel arrangements; (d) management of the monthly payments of the stipend and entitlements; (e) support for the implementation of the fellows' programme of work, including assisting in research and collection and analysis of data, preparing data presentations and assisting in the finalization of reports; (f) the drafting of correspondence and management of communication regarding the coordination of the fellows' network; (g) the maintenance of personnel files on all fellows; (h) the monitoring of the use of funds and the implementation of the programme of work; and (i) the preparation of the quarterly and annual summary report on the implementation of the fellowship programme. The post would provide adequate support for managing the fellowship, in particular given the expected high volume of applicants.
	–	GS (OL)	Reassignment of 1 Administrative Assistant as Graphic Design Assistant	This proposal results from the review of the reform of the Office and responds to the increased integration of the work between executive direction and management and subprogramme 3 in the provision of communication support to the programme.

Abbreviation: GS (OL), General Service (Other level).

Overall orientation

Mandates and background

- 12.1 The United Nations Conference on Trade and Development (UNCTAD) is responsible for assisting developing countries in integrating beneficially into the global economy in support of inclusive, resilient and sustainable growth and development. This task is more critical than ever, in the light of multiple current crises and the highly regressive impacts left behind by the coronavirus disease (COVID-19) pandemic. The Bridgetown Covenant, the outcome document of the fifteenth quadrennial session of UNCTAD, contains calls for UNCTAD to counter the negative impact of the pandemic on the global economy and trade and to help developing countries to transform their economies through diversification, sustainability and resilience, to transform how development is financed, and to strengthen multilateralism. Special attention is called for the least developed countries, landlocked developing countries, small island developing States, African countries, other structurally weak, vulnerable and small economies, and countries in conflict and post-conflict situations, while also taking account of the challenges of middle-income countries and countries with economies in transition. The Covenant also contains a reaffirmation of the UNCTAD role as the focal point within the United Nations system for the integrated treatment of trade and development and interrelated issues in the areas of finance, technology, investment and sustainable development. It will also give account to a number of essential underlying issues for sustainable, inclusive and equitable growth and development, as mandated in the Bridgetown Covenant.

Strategy and external factors for 2025

- 12.2 The world faces multiple and cascading challenges: debt distress, high inflation and large increases in the cost of living, growing poverty and hunger, geopolitical tensions, armed conflicts and climate change. Therefore, fostering more inclusive and sustainable development and enhancing resilience to these challenges will continue to guide the work of UNCTAD, in accordance with the particular needs and challenges of the member States and the Bridgetown Covenant. In line with its mandate, UNCTAD will continue to rely on its three interrelated pillars of work: (a) conducting high-quality and evidence-based research and policy analysis that contribute to national, regional and international policies, with the aim of generating inclusive and sustainable development under the principle of leaving no one behind; (b) providing technical cooperation to developing countries on the basis of such analysis; and (c) bringing member States together through its intergovernmental machinery to build consensus on policies that allow developing countries to maximize the opportunities of globalization and economic integration, as well as to address cross-cutting economic, social and environmental challenges.
- 12.3 The challenges that countries face are multiple and interrelated. In particular, mounting debt in low-income, and also many middle-income, developing countries remains a major obstacle to development and the achievement of the Sustainable Development Goals. Servicing debt also constrains the ability of many developing countries to adapt to climate change and transform to low-emission economies. UNCTAD will thus continue addressing debt vulnerability and the high cost of debt, while also strengthening its support relating to how trade, investment and technology can offer means for transforming to low-emission economies. UNCTAD will remain committed to addressing interrelated issues essential to all countries in attaining sustainable and equitable growth and development, while being particularly mindful of the needs and priorities of developing countries. This requires extensive cross-fertilization and cooperation across the UNCTAD subprogrammes. UNCTAD will also address such interrelated issues through its work on South-South and triangular cooperation and regional integration.

- 12.4 In accordance with its mandate in the interrelated areas of trade and development, UNCTAD will support the implementation, monitoring and review of the 2030 Agenda for Sustainable Development and the relevant targets of the Sustainable Development Goals. UNCTAD is the custodian of nine Goal indicators at the global level. These indicators fall under Goals 9, 10, 12, 16 and 17 and cover topics related to trade, tariffs, development finance, debt, investment, illicit finance and enterprise sustainability. UNCTAD will continue to support member States to make progress not only towards the achievement of Goals 8, 9, 10 and 17, but also towards Goals 2, 5, 12, 14, 15 and 16, including by continuing to develop international standards and recommending methodologies for monitoring Goal indicators.
- 12.5 Alongside global agendas, UNCTAD will strive, in particular, to ensure the implementation of mandates reconfirmed and reinforced at its fifteenth session as outlined in the Bridgetown Covenant. UNCTAD will be guided by four major transformations, outlined in the document, to move to a more resilient, inclusive and sustainable world: transforming economies through diversification; transforming to a more sustainable and more resilient economy; transforming how development is financed; and transforming multilateralism. UNCTAD will also adapt to any mandate that is adopted at its sixteenth quadrennial session, to be held 2025.
- 12.6 The Bridgetown Covenant emphasized the threat of climate change and the need to decouple economic growth from environmental degradation and enhance climate resilience. UNCTAD will support the building of a new methodology for the treatment of development economics that more fully integrates inclusiveness, climate change and the environment into a new global trade, financial and policy framework, as highlighted in the Bridgetown Covenant. This work will focus on scaling up climate finance, reducing greenhouse gas emissions of the logistics of trade and global value chains, boosting sustainable investments and supporting a transition to a low-emission, competitive and climate-resilient and sustainable economy. UNCTAD will continue to promote and advance the issue of the integrated treatment of development economics in international forums, such as the annual sessions of the Conference of the Parties to the United Nations Framework Convention on Climate Change. UNCTAD will ensure organizational coherence and synergies on climate and the environment across subprogrammes through an established cross-divisional environment and climate change working group.
- 12.7 To support its member States and to promote structural transformation, as requested pursuant to the Bridgetown Covenant, UNCTAD will continue to support developing countries in making more accurate diagnostics and to inform policy choices by measuring productive capacities. UNCTAD will continue its work to make digitalization, a key driver for transforming economies, a force of inclusivity.
- 12.8 The UNCTAD Statistics Service will continue to provide timely and high-quality statistical information and indicators in the interrelated areas of trade and development. UNCTAD will treat data as an integrated and cross-cutting resource and ensure coordinated statistical capacity development at the organizational level. The Service will support developing countries in building their capacity to collect and compile data and measure progress in sustainable, inclusive and equitable trade, growth and development. The Service will strive to further develop its databases and make use of novel methods, as appropriate and requested, such as enhancing nowcasts through combining the power of artificial intelligence and official statistics, or using data collected and reported by countries of the South within their own framework to inform global debates on development support. The Service will continue to report on developments relating to the Goals by providing an update on the evolution of a selection of official indicators and complementary data and statistics and an update on progress in the development of new concepts and methodologies.
- 12.9 As requested in the Bridgetown Covenant, UNCTAD will continue to support countries, through technical cooperation, in addressing the challenges exacerbated or exposed by the pandemic and in building their resilience to future economic shocks by building productive capacities, develop the capacity of Governments to formulate and implement policies on financing for development, investment, international trade, science and technology and logistics, and support sustainable development in line with an updated technical cooperation strategy and toolkit.

- 12.10 With regard to cooperation with other entities at the global, regional, national and local levels, UNCTAD will continue to combine its expertise with the reach and in-country presence of partners. Regionally, UNCTAD will continue to work closely with partner organizations, such as the secretariat of the African Continental Free Trade Area through its Regional Office for Africa, as well as regional economic communities, business communities and strategic development partners, to foster regional economic integration and growth. In addition, UNCTAD will continue to foster cooperation with international financial institutions, multilateral development banks, the Organisation for Economic Co-operation and Development and the Group of 20 to contribute to international policy debates on trade, investment and finance.
- 12.11 With regard to inter-agency coordination and liaison, UNCTAD will continue to collaborate with resident coordinator offices, including through involvement in the preparation of common country assessments and United Nations Sustainable Development Cooperation Frameworks. UNCTAD will continue to work with the World Trade Organization (WTO) and the International Trade Centre (ITC) in a complementary manner to support developing countries in their efforts to be integrated into the multilateral trading system. As one of the five major institutional stakeholders of the financing for development follow-up process, UNCTAD will lead the inter-agency dialogue on monitoring and accountability of the means for the implementation of targets through the dedicated follow-up to the Addis Ababa Action Agenda commitments and participation in the Inter-Agency Task Force on Financing for Development. UNCTAD will continue to support the Inter-Agency and Expert Group on Sustainable Development Goal Indicators and lead the United Nations Inter-Agency Cluster on Trade and Productive Capacity in “delivering as one” operational activities at the country level. As a member of the United Nations inter-agency task team on science, technology and innovation for the Goals and as secretariat to the Commission on Science and Technology for Development, UNCTAD will continue to support the implementation of outcomes related to science, technology and innovation of the 2030 Agenda, including the Technology Facilitation Mechanism and the Technology Bank for the Least Developed Countries. As part of the Global Crisis Response Group on Food, Energy and Finance and similar mechanisms, UNCTAD will continue to provide critical data and analysis for fostering understanding of the economic consequences of armed conflicts and will help decision makers to develop strategies and mobilize solutions by working closely with United Nations system entities.
- 12.12 With regard to the external factors, the overall plan for 2025 is based on the following planning assumptions:
- (a) Up-to-date and accurate economic and financial information and data at the country and regional levels continue to be available and cooperation continues with relevant entities on the production of statistics;
 - (b) Extrabudgetary funding continues to be available for technical cooperation programmes, and conditions and capacities exist in member States to adopt and implement policies and strategies;
 - (c) There is political will to achieve consensus in intergovernmental meetings;
 - (d) Member states will adopt a new mandate for UNCTAD at its quadrennial session in 2025.
- 12.13 UNCTAD integrates a gender perspective in its operational activities, deliverables and results, as appropriate, and in line with the Bridgetown Covenant. It will continue to strengthen the capacity of member States to design and implement policies and establish institutions, frameworks and/or mechanisms that support women’s economic empowerment, economic security and rights, and enhance their economic and digital skills and opportunities. UNCTAD will continue to analyse the impact of armed conflict on gender equality and other emerging phenomena, and advocate for policy responses that are gender-sensitive. UNCTAD will expand its work on trade and sex-disaggregated statistics and on measuring the ways in which women and men participate in and benefit from trade. Lastly, organizational coherence and synergies across divisions will be further increased through the interdivisional committee that provides strategic guidance on the substantive work on gender equality and trade.

- 12.14 In line with the United Nations Disability Inclusion Strategy, UNCTAD will continue to incorporate disability inclusion considerations in the design and evaluation of technical cooperation projects. Operationally, access by delegates of member States and participants to UNCTAD meetings organized at the headquarters facilities is managed and ensured by the United Nations Office at Geneva, in line with the existing United Nations Secretariat policy and guidance on disability. For meetings serviced outside the duty station UNCTAD ensures that all venues and conference facilities are accessible to persons with disabilities.

Legislative mandates

- 12.15 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

1995 (XIX)	Establishment of the United Nations Conference on Trade and Development as an organ of the General Assembly	76/258	Doha Programme of Action for the Least Developed Countries
63/204	Report of the twelfth session of the United Nations Conference on Trade and Development	76/264 77/179	State of global food insecurity Implementation of the Third United Nations Decade for the Eradication of Poverty (2018–2027)
63/303	Outcome of the Conference on the World Financial and Economic Crisis and Its Impact on Development	78/134 78/135	International trade and development Unilateral economic measures as a means of political and economic coercion against developing countries
66/288	The future we want		
69/15	SIDS Accelerated Modalities of Action (SAMOA) Pathway	78/136	International financial system and development
69/137	Programme of Action for Landlocked Developing Countries for the Decade 2014–2024	78/140	Promotion of international cooperation to combat illicit financial flows and strengthen good practices on assets return to foster sustainable development
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)	78/151	Promoting sustainable consumption and production patterns for the implementation of the 2030 Agenda for Sustainable Development, building on Agenda 21
70/1	Transforming our world: the 2030 Agenda for Sustainable Development		
70/133	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly	78/162 78/163	Development cooperation with middle-income countries Follow-up to the second United Nations Conference on Landlocked Developing Countries
72/234	Women in development	78/167	South-South cooperation
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system	78/230 78/231	Promotion of inclusive and effective international tax cooperation at the United Nations Follow-up to and implementation of the outcomes of the International Conferences on Financing for Development
73/241	International migration and development		
73/245	Promotion of sustainable tourism, including ecotourism, for poverty eradication and environment protection	78/232	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States
73/291	Buenos Aires outcome document of the second High-level United Nations Conference on South-South Cooperation		
75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system		

Economic and Social Council resolutions

2021/30	Open-source technologies for sustainable development	2023/11	Mainstreaming a gender perspective into all policies and programmes in the United Nations system
2022/3	Ensuring that the work in the field of statistics and data is adaptive to the changing statistical and data ecosystem		

United Nations Conference on Trade and Development reports

TD/442, TD/442/Corr.1 and TD/442/Corr.2	Report of the United Nations Conference on Trade and Development on its twelfth session	TD/519/Add.2 and TD/519/Add.2/Corr.1	Report of the United Nations Conference on Trade and Development on its fourteenth session: Nairobi Maafikiano
TD/500/Add.1	Report of the United Nations Conference on Trade and Development on its thirteenth session: the Doha Mandate	TD/541/Add.2	Report of the United Nations Conference on Trade and Development on its fifteenth session: the Bridgetown Covenant

**Subprogramme 1
Globalization, interdependence and development**

General Assembly resolutions

66/188	Addressing excessive price volatility in food and related financial and commodity markets	77/22	Committee on the Exercise of the Inalienable Rights of the Palestinian People
72/227	Role of the United Nations in promoting development in the context of globalization and interdependence	77/174	Towards a New International Economic Order

2021/30	Open-source technologies for sustainable development		

**Subprogramme 5
Africa, least developed countries and special programmes**

General Assembly resolutions

67/221	Smooth transition for countries graduating from the list of least developed countries	74/15	Political Declaration of the High-level Midterm Review on the Implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024
68/18	Graduation of countries from the least developed country category		
68/225	Specific actions related to the particular needs and problems of landlocked developing countries: outcome of the International Ministerial Conference of Landlocked and Transit Developing Countries and Donor Countries and International Financial and Development Institutions on Transit Transport Cooperation	78/164 78/232	Implementation of the Third United Nations Decade for the Eradication of Poverty (2018–2027) Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States
74/3	Political declaration of the high-level meeting to review progress made in addressing the priorities of small island developing States through the implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway	78/233	Follow-up to the Fifth United Nations Conference on the Least Developed Countries

Economic and Social Council resolutions

2020/10	Report of the Committee for Development Policy on its twenty-second session	2022/8	Report of the Committee for Development Policy on its twenty-fourth session
2021/11	Report of the Committee for Development Policy on its twenty-third session	2023/10	Report of the Committee for Development Policy on its twenty-fifth session

2023/29 Doha Programme of Action for the Least Developed Countries for the decade 2022–2031

Deliverables

12.16 Table 12.1 lists all cross-cutting deliverables of the programme.

Table 12.1
Cross-cutting deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	10	10	10	10
1. Conference room paper for the Trade and Development Board	1	1	1	1
2. Report on the follow-up to the major United Nations conferences and summits in the areas of UNCTAD expertise	1	1	1	1
3. Report on matters requiring action by the Trade and Development Board in relation to the fifteenth session of UNCTAD	1	1	1	1
4. Conference room papers and working papers prepared for the Working Party on the Programme Plan and Programme Performance	4	4	4	4
5. Overview of the external evaluations of UNCTAD programmes and projects	1	1	1	1
6. Report on the external evaluation of an UNCTAD subprogramme	1	1	1	1
7. Review of the technical cooperation activities of UNCTAD and their financing	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	107	97	107	103
Meetings of:				
8. The Trade and Development Board, including annual, special and executive sessions of the Board and its subsidiary bodies	92	80	92	88
9. The Working Party on the Programme Plan and Programme Performance	12	14	12	12
10. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
11. The Fifth Committee	1	1	1	1
12. The Committee for Programme and Coordination	1	1	1	1
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	1	1	1
13. On statistics related to trade and development (such as measuring and tracking illicit financial flows)	1	1	1	1
Seminars, workshops and training events (number of days)	24	26	24	28
14. Seminars on topics to be determined by the Secretary-General of UNCTAD, in consultation with member States (e.g., ad hoc expert discussions)	3	3	3	3
15. Seminars, including a public symposium, with civil society and member States to generate and transfer knowledge in connection with the work programme of UNCTAD, subject to further consideration and decision by the Trade and Development Board	2	2	2	2
16. Seminar on topical trade and development issues (Raúl Prebisch lecture)	1	1	1	1
17. Seminar on topical international trade and development issues, such as multi-stakeholder dialogues	1	1	1	1
18. Seminars with UNCTAD special advisers and advocates	2	2	2	2
19. Seminar on the coordination of national development strategies oriented towards sustainable development (Cabinet meeting)	1	1	1	1

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
20. Workshops with civil society and youth, including networking events and online networking discussions	14	16	14	18
Publications (number of publications)	3	3	3	3
21. <i>UNCTAD Handbook of Statistics</i>	1	1	1	1
22. <i>SDG Pulse</i>	1	1	1	1
23. UNCTAD annual report	1	1	1	1
Technical materials (number of materials)	10	10	12	11
24. Policy briefs on trade and development issues	1	1	3	2
25. Reports on evaluations of United Nations Development Account projects and of external evaluations required by contribution agreements	7	7	5	5
26. Economic and maritime statistical country profiles	2	2	2	2
27. Statistical papers, including on international trade and development	–	–	2	2

C. Substantive deliverables

Databases and substantive digital materials: UNCTAD civil society database and civil society electronic alerts and UNCTAD Youth Network; UNCTAD statistical data centre; UNCTAD trade in services statistics production system; UNCTAD global data set of indicators on gender equality in trade.

Consultation, advice and advocacy: policy advice to policymakers for statistical capacity in the area of trade and development.

D. Communication deliverables

Outreach programmes, special events and information materials: “UNCTAD at a Glance”; press kits, media briefs and flyers for flagship publications; news briefs and opinion pieces; public information materials, including brochures and posters; and at least 10 specialized information sessions for students, delegates, academics and youth visiting UNCTAD and, upon request, in other locations, including online outreach.

External and media relations: around 10 press conferences, 25 press releases, 20 media alerts and information notes.

Digital platforms and multimedia content: UNCTAD website (more than 4.2 million sessions in 2022) and social media content (more than 500,000 followers, including 85,000 new followers in 2022), including podcasts and blogs about UNCTAD meetings, events and publications, including policy briefs.

Evaluation activities

- 12.17 The following evaluations completed in 2023 have guided the proposed programme plan for 2025:
- (a) UNCTAD subprogramme 2, Investment and enterprise;
 - (b) United Nations Development Account project 1819Y on defining, estimating and disseminating statistics on illicit financial flows in Africa;
 - (c) United Nations Development Account project 1819K on evidence-based and policy-coherent oceans economy and trade strategies;
 - (d) United Nations Development Account project 1819H on enabling policy frameworks for enterprise sustainability and Sustainable Development Goals reporting in Africa and Latin America;
 - (e) Enhanced Integrated Framework project: promoting gender-responsive trade policy in the least developed countries;
 - (f) Organisation of Eastern Caribbean States and European Union project: seizing the trade and business potential of blue biotrade products for promoting sustainable livelihoods and conservation of marine biodiversity in selected Organisation of Eastern Caribbean States countries;
 - (g) The UNCTAD–Kingdom of the Netherlands strategic partnership.

- 12.18 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2025. For example, in response to recommendations to further streamline monitoring and reporting mechanisms for more systematic data collection and analysis of medium- to long-term results, the Office of the Secretary-General has developed a new organizational-level results framework and is working closely with divisions on aligning indicators and reporting on results through the integrated planning, management and reporting tool. Subprogramme 2 has introduced an e-tool – the live implementation matrix for UNCTAD investment policy reviews – for beneficiary countries to report progress on the implementation of their investment policy review recommendations. In addition, all newly renewed agreements between UNCTAD and Entrepreneurship Development Programme (EMPRETEC) centres require periodic impact measurement and regular reporting to UNCTAD.
- 12.19 The following evaluations are planned for 2025:
- (a) Evaluation of subprogramme 4, Technology and logistics;
 - (b) Evaluation of subprogramme 5, Africa, least developed countries and special programmes;
 - (c) Five evaluations of completed projects covering various subprogrammes.

Programme of work

Subprogramme 1

Globalization, interdependence and development

Objective

- 12.20 The objective, to which this subprogramme contributes, is to advance inclusive and sustainable development, sustained growth, full employment and decent work for all through evidence-based economic policies and strategies at the national, regional and international levels and to achieve progress towards a durable solution to the debt problems of developing countries, as well as poverty eradication in developing countries, especially the least developed countries, including through North-South cooperation, complemented but not substituted by South-South and triangular cooperation.

Strategy

- 12.21 To contribute to the objective, the subprogramme will identify specific needs and measures arising from the interdependence of trade, finance, investment, technology and macroeconomic policies, from the point of view of their effects on development through the three pillars of work of UNCTAD referred to in paragraph 12.2 above. Specifically, the subprogramme will:
- (a) Support developing countries in their efforts to formulate development strategies and practical policy options and recommendations at all levels, including through technical cooperation, training and the dissemination of best practices;
 - (b) Promote cooperation at all levels of the interplay between successful development finance strategies, debt sustainability and effective debt management, in accordance with its mandate and complementing the work done by other relevant stakeholders;
 - (c) Focus on the challenges in short- and long-term debt sustainability in developing countries and sustainable domestic and international financial resource mobilization for development, which will help member States to make progress towards the achievement of Sustainable Development Goals 16 and 17;

- (d) Undertake research and analysis on trends and prospects for closer cooperation and integration among developing countries, in particular on specific ways in which South-South cooperation can enhance development effectiveness;
- (e) Provide technical assistance and research and analysis to support the Palestinian people, in line with paragraph 127 (bb) of the Bridgetown Covenant and responding to the request of the General Assembly in its resolutions [77/22](#), on the Committee on the Exercise of the Inalienable Rights of the Palestinian People, and [77/30](#), on assistance to the Palestinian people;
- (f) Analyse the relation between trade and development and the environment and propose sustainable development policies, in line with paragraph 75 of the Bridgetown Covenant, given that transforming to a more sustainable economy under the current climate trends requires enhancing the ability of countries and economies to adapt to higher temperatures, thus necessitating a better understanding of how trade and development will be affected by a warmer world.

12.22 The above-mentioned work is expected to result in:

- (a) Increased coherence between international economic rules, practices and processes and national policies and development strategies;
- (b) Strengthened linkages between economic and development policies and decision-making and improvements in the compilation and dissemination of the official statistics of member States;
- (c) Strengthened national capacities for effective debt management and an increased understanding at the international level of debt issues and debt sustainability;
- (d) Increased understanding by developing countries of the global economic environment and of policy choices for inclusive and sustained development;
- (e) Trade and development policies that are responsive to the challenges posed by climate change and the type of support and action needed.

Programme performance in 2023

Enhanced knowledge of key policy debates on climate and finance

12.23 The subprogramme continued to support the policymakers of developing countries in their efforts to design optimal adaptation and mitigation strategies to deal with the effects of climate change. In preparation for the twenty-eighth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, the subprogramme continued to support the development of the know-how and capacities of developing countries and their negotiators with regard to development finance, debt, macroeconomics and climate change issues. The subprogramme organized two workshops for climate finance negotiators from developing countries with the objective of connecting the topics of development, finance and climate change. These events informed the analytical papers on the loss and damage finance facility, the new collective quantified goal on climate finance and article 2, paragraph 1 (c), of the Paris Agreement, and furthered the discussions between negotiators. The papers focused on systemic challenges that developing countries disproportionately encounter in financing and achieving climate-resilient development and meeting the goals of the Paris Agreement.

12.24 Progress towards the objective is presented in the performance measure below (see table 12.2).

Table 12.2
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
The 2021 <i>Trade and Development Report</i> , which focused on climate adaptation and mitigation strategies, was used by developing country negotiators in their preparations for the twenty-sixth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change	Knowledge among developing country climate negotiators was increased ahead of the twenty-seventh session of the Conference of the Parties to the United Nations Framework Convention on Climate Change through targeted research on climate and debt, and just transition pathways	52 developing country negotiators on climate and finance issues were able to address their development and climate finance needs in their preparations for the twenty-eighth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change

Planned results for 2025

Result 1: increased agility in providing evidence-based and data-driven analysis to implement the 2030 Agenda for all, reflecting the challenges of member States

Programme performance in 2023 and target for 2025

- 12.25 The subprogramme’s work contributed to 187 member States benefiting from access to data through *SDG Pulse* and 75 per cent of the content in *SDG Pulse* being dynamic content with changing focus, which exceeded the planned target of 187 member States and 73 per cent.
- 12.26 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 12.I).

Figure 12.I

Performance measure: number of member States benefiting from the agile *SDG Pulse* with dynamic content, including on new data on Sustainable Development Goal indicators

Result 2: developing countries are equipped with policy proposals and measures to develop sustainable industrialization strategies to establish more resilient economies

Programme performance in 2023 and target for 2025

- 12.27 The subprogramme’s work contributed to the identification of sustainable value chains in one country, with two other countries having started the process, which did not meet the planned target of at least three countries identifying priority sustainable value chains, due to longer than anticipated process timelines.
- 12.28 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 12.3).

Table 12.3
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Consultations with an array of stakeholders on launching UNCTAD work on sustainable industrialization	Member States had access to a vast array of sustainable industrial policy options and ideas to mobilize resources to finance sustainable industrialization through the UNCTAD Division on Globalization and Development Strategies publication entitled “South-South cooperation for climate adaptation and sustainable development”	The Bolivarian Republic of Venezuela identified its priority sustainable value chains and Brazil and Honduras started the identification process and definition of the overall integration strategy to be pursued over the period 2024–2027	Consensus reached by a subgroup of Latin American countries on priority industrial policy measures to deploy at the regional level and at the domestic level to favour the development of sustainable regional value chains	At least two countries in Latin America are prepared and have the capacity to implement the priority industrial policies

Result 3: enhanced debt data transparency of developing countries

Proposed programme plan for 2025

- 12.29 The General Assembly, in its resolution [77/153](#), on external debt sustainability and development, underlined the importance of debt sustainability, debt transparency and effective debt management to the efforts to achieve the Sustainable Development Goals. The subprogramme has been focusing on promoting increased access to timely data related to public debt for citizens, academia and civil society, as well as the international community, to help inform discussions on public borrowing, including with regard to prioritization by governments and possible predatory loan practices.

Lessons learned and planned change

- 12.30 The lesson for the subprogramme was that demonstrable benefits of debt transparency, including use cases and studies, can help to promote the efficacy of enhancing debt transparency globally. In applying the lesson, the subprogramme will identify three pilot countries with which it will work on enhancing debt transparency through improved data collection and monitoring, and use these results to work on a global initiative in this area.

12.31 Expected progress towards the objective is presented in the performance measure below (see table 12.4).

Table 12.4
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	New approach to increase debt transparency available to member States	Informal discussions and consultations resulting in at least three countries expressing interest in being involved in the pilot initiative	At least three developing countries agree to participate in the pilot initiative Guidelines on the implementation of the initiative are available to the fiscal authorities of the three selected countries	Improved data collection, monitoring and transparency on public debt in three countries

Deliverables

12.32 Table 12.5 lists all deliverables of the subprogramme.

Table 12.5
Subprogramme 1: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	8	5	6	6
1. Reports for the General Assembly, including on external debt sustainability and development, and the economic cost of occupation for the Palestinian people	4	2	2	2
2. Reports for the Trade and Development Board, including on financing for development issues and on UNCTAD assistance to the Palestinian people, and the overview of the <i>Trade and Development Report</i>	2	2	2	2
3. Reports for the Trade and Development Commission and the Investment, Enterprise and Development Commission	1	0	1	1
4. Reports for the Intergovernmental Group of Experts on Financing for Development	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	18	16	19	18
Meetings of:				
5. The General Assembly (Second Committee) and the Economic and Social Council and its subsidiary bodies	4	2	4	4
6. The Trade and Development Board (annual and executive sessions)	3	3	3	3
7. The Working Party on the Programme Plan and Programme Performance	2	2	2	2
8. The Trade and Development Commission and related multi-year expert meetings	3	3	3	3
9. The Intergovernmental Group of Experts on Financing for Development	6	6	6	6
10. The Debt Management Conference	–	–	1	–

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	16	21	16	16
11. Enhancing public, private and/or international capacity related to assistance to the Palestinian people	1	1	1	1
12. Installation, update and maintenance of the Debt Management and Financial Analysis System	15	20	15	15
Seminars, workshops and training events (number of days)	150	219	142	142
13. Seminars and workshops for policymakers, including on formulating development strategies and policy recommendations; sovereign borrowing and lending; and globalization, trade and development	28	28	22	22
14. Seminars on inclusive growth and the Sustainable Development Goals, including ad hoc expert discussions on the interdependence between trade, finance, investment, technology and macroeconomic policies	7	6	5	5
15. Training events on Debt Management and Financial Analysis System for administrators and debt auditors from selected countries in recording debt data, reporting, debt statistics, debt analysis and debt auditing	115	185	115	115
Publications (number of publications)	8	5	6	6
16. <i>Trade and Development Report</i>	1	1	1	1
17. Studies on external debt, resource mobilization, illicit financial flows and their underlying activities, South-South cooperation, regional integration and Palestinian economic development	7	4	5	5
Technical materials (number of materials)	9	7	7	7
18. On macroeconomic, development, financing and debt, structural transformation and South-South cooperation issues	5	3	4	4
19. Debt Management and Financial Analysis System documentation and software	4	4	3	3
C. Substantive deliverables				
Consultation, advice and advocacy: policy advice to policymakers, including on domestic resource mobilization, structural transformation, growth policy (Group of 20), debt renegotiation at the Paris Club, financial instability and debt sustainability.				
Databases and substantive digital materials: UNCTAD financial database; world economic macro-level modellers database; financial stress and debt sustainability indicators.				
D. Communication deliverables				
Outreach programmes, special events and information materials: lectures and presentations on external debt, development finance and macroeconomic and development policy issues; newsletters and brochures on the Debt Management and Financial Analysis System and the Virtual Institute.				
External and media relations: press releases, press conferences and interviews, including on developing country debt and external financing, South-South cooperation and regional integration and assistance to the Palestinian people.				
Digital platforms and multimedia content: Debt Management and Financial Analysis System; Virtual Institute.				

Subprogramme 2 Investment and enterprise

Objective

- 12.33 The objective, to which this subprogramme contributes, is to advance inclusive growth and sustainable development through investment and enterprise development for productive capacity-building, economic diversification and job creation.

Strategy

12.34 To contribute to the objective, the subprogramme will:

- (a) Assist member States through research, policy analysis and technical assistance in designing and implementing policies to scale up mobilization of public and private finance and enhanced investment and entrepreneurship for sustainable development;
- (b) Monitor, assess and analyse regional and global trends and prospects in international investment and prepare the annual *World Investment Report* and other analytical publications on international investment for development;
- (c) Conduct reviews of national investment policies and backstop policy dialogue on the international investment agreement regime and support and design new international investment agreements that are better aligned with nationally and internationally agreed development objectives;
- (d) Provide policy advice to Governments on investment promotion, including on incentives in the context of the global tax reform implications for developing countries, and support with the implementation of business practices and investment facilitation for development agreements, including through digital government tools;
- (e) Promote innovative financing for the Sustainable Development Goals, including through stock exchanges and institutional funds, as well as incentives in the context of the global tax reform implications for developing countries;
- (f) Support the enhancement of the international competitiveness of member States' enterprises through advice on policies aimed at stimulating enterprise development, including mobilizing global efforts in financing and investment in micro-, small and medium-sized enterprises to support their sustainable development transformation, as well as by promoting best practices in corporate social responsibility, accounting and sustainability reporting;
- (g) Foster dialogue and an exchange of best practices related to investment and enterprise development issues through consensus-building mechanisms and the World Investment Forum;
- (h) Provide an assessment of the impact of multiple and cascading challenges on investment, global value chains and enterprise development, as well as policy advice, frameworks and tools for recovery;
- (i) The above-mentioned work will help member States to make progress towards achieving Goals 1, 4, 5, 8, 9, 10, 12, 13, 16 and 17.

12.35 The above-mentioned work is expected to result in:

- (a) Increased capacity of member States to close the gaps related to Sustainable Development Goal investment, especially with regard to climate change mitigation and adaptation, in particular for countries that are most vulnerable to the adverse impacts of climate change;
- (b) Improved ability of countries to leverage policies, innovations and tools, and to address key and emerging issues related to investment and investment policies that promote development, including on international investment agreements and their development dimension;
- (c) Member States collect, analyse and report on foreign direct investment and multinational enterprise data and formulate development-oriented investment policies;
- (d) Additional resources leveraged and channelled towards global investment development objectives and addressing concerns pertaining to "SDG washing" and "greenwashing";¹

¹ The terms "SDG washing" and "greenwashing" refer to products and strategies presented as sustainable without making a meaningful contribution to sustainable development, including the achievement of the Sustainable Development Goals.

- (e) Increased productive capacity, including through attracting investment capital, growing business linkages with multinational enterprises and participating in global and regional value chains;
- (f) Mitigation of the effect of multiple and cascading challenges on the ability of member States to attract and benefit from investment for development and in fostering private sector recovery.

Programme performance in 2023

Improved business, investment and trade climate

- 12.36 A conducive business, investment and trade environment is a prerequisite to sustainable development. The provision of information, transparent rules and regulations, and streamlined administrative procedures, among other measures, can help in the achievement of a conducive business, investment and trade environment. The subprogramme has developed digital government tools, such as information portals and online single windows, which contribute to enhancing transparency and access to trade and investment-related information and the regulation and simplification of administrative procedures.
- 12.37 Progress towards the objective is presented in the performance measure below (see figure 12.II).

Figure 12.II

Performance measure: number of United Nations Conference on Trade and Development trade and investment facilitation platforms used by member States (cumulative)

Planned results for 2025

Result 1: reignited investment policies in support of member States' COVID-19 recovery and sustainable development

Programme performance in 2023 and target for 2025

- 12.38 The subprogramme's work contributed to 82 per cent of beneficiaries having implemented recommendations emanating from the UNCTAD investment policy framework in support of COVID-19 recovery and sustainable development, including those pertaining to national and international investment policies and enterprise development policies, which exceeded the planned target of 80 per cent.
- 12.39 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 12.III).

Figure 12.III

Performance measure: percentage of beneficiaries that have implemented recommendations emanating from the United Nations Conference on Trade and Development investment policy framework in support of COVID-19 recovery and sustainable development (cumulative)

Result 2: investment financing strategies and tools to decouple economic growth from environmental degradation

Programme performance in 2023 and target for 2025

- 12.40 The subprogramme’s work contributed to 48 member States adopting United Nations Conference on Trade and Development investment financing strategies and tools in support of the attainment of the climate and environmental goals of the 2030 Agenda, which exceeded the planned target of 45 member States.
- 12.41 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 12.IV).

Figure 12.IV

Performance measure: number of member States adopting United Nations Conference on Trade and Development investment financing strategies and tools in support of the attainment of the climate and environmental goals of the 2030 Agenda (cumulative)

Result 3: accelerated Sustainable Development Goal investment

Proposed programme plan for 2025

- 12.42 At the midpoint of the 2030 Agenda, the investment gap across all Sustainable Development Goal sectors has increased from \$2.5 trillion in 2015 to about \$4 trillion annually, as also revealed by *World Investment Report 2023*.² The need to channel additional resources towards global development objectives will require promoting investment from all sources. To help promote broader investment, the subprogramme has supported member States in attracting and channelling foreign direct investment for the Goals through its action plan.

Lessons learned and planned change

- 12.43 The lesson for the subprogramme was that a comprehensive set of priority actions would help support the acceleration of Sustainable Development Goal investment, which required increased engagement from all investment-development stakeholders, including through national, regional and international alliances and partnerships. In applying the lesson, the subprogramme will provide stakeholders with priority actions, such as the reorientation of investment promotion strategies, the formulation of a new generation of international investment treaties and guarantees, innovative financing mechanisms and the reorientation of financial markets, along with options to sustain Goal investment in recurrent crises. The subprogramme will raise awareness of priority actions and stimulate the building of the capacity of all investment-development stakeholders to design and use priority policies, tools and instruments to accelerate Goal investment.
- 12.44 Expected progress towards the objective is presented in the performance measure below (see figure 12.V).

Figure 12.V

Performance measure: number of investment-development stakeholders that have adopted recommendations from the set of priority actions to accelerate investment in the Sustainable Development Goals (cumulative)

Deliverables

- 12.45 Table 12.6 lists all deliverables of the subprogramme.

Table 12.6
Subprogramme 2: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	8	6	9	8
Reports of:				
1. The Secretary-General to the General Assembly on investment and entrepreneurship for sustainable development	1	1	2	1
2. The sixteenth quadrennial session of UNCTAD on investment and enterprise for development	–	–	–	1
3. The Trade and Development Board on investment for development	1	1	1	1
4. The Investment, Enterprise and Development Commission and related expert meetings	4	–	4	3
5. The Intergovernmental Working Group of Experts on International Standards of Accounting and Reporting	2	4	2	2
Substantive services for meetings (number of three-hour meetings)	42	44	22	58
Meetings of:				
6. The Trade and Development Board	2	3	2	2
7. The sixteenth quadrennial session of UNCTAD, including preparatory meetings	–	–	–	20
8. The Working Party on the Programme Plan and Programme Performance	2	3	2	2
9. The Investment, Enterprise and Development Commission and related expert meetings	12	–	12	8
10. The Intergovernmental Working Group of Experts on International Standards of Accounting and Reporting	6	6	6	6
11. The World Investment Forum	20	32	–	20
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	67	68	72	67
12. On regional investment issues	3	4	3	3
13. On investment policy reviews	8	5	8	6
14. On policy options in investment for development	5	5	5	4
15. On special economic zones, including piloting Sustainable Development Goals model zones	2	2	2	2
16. On international investment regimes	10	10	10	10
17. On investment promotion and facilitation, including strengthening investment promotion agencies	3	2	3	3
18. On business facilitation initiatives	13	13	13	12
19. On enterprise development initiatives, including micro-, small and medium-sized enterprise and start-up financing and business linkages	3	4	3	3
20. On EMPRETEC	6	6	10	10
21. On accounting and reporting, with a particular focus on sustainability reporting	3	4	3	3
22. On the contribution of foreign direct investment to inclusive growth and the Sustainable Development Goals, including on climate change mitigation and adaptation for least developed countries, landlocked developing countries and small island developing States	5	5	5	6
23. On sustainable financing and investing, including by family business and institutional investors	6	8	7	5
Seminars, workshops and training events (number of days)	136	204	200	199
24. Seminars on foreign direct investment, its development dimension and the themes of the <i>World Investment Report</i>	12	14	12	12

Part IV International cooperation for development

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
25. Training events on best practices in national and international policies related to investment, including on taxation related to investment policy	4	5	5	5
26. Training events on investment policy reviews, follow-up and investment facilitation enhancement (national)	14	16	14	14
27. Training events on international investment statistics and survey methodologies	5	5	6	5
28. Ad hoc expert discussions on key issues in investment for development, including concerns about “greenwashing” and “SDG washing”	3	4	3	4
29. Training events on investment promotion and facilitation for policymakers, investment promotion officials and diplomats	10	38	30	10
30. Workshops on business facilitation procedures	–	22	–	20
31. Training events on the negotiation, implementation and reform of international investment agreements	15	21	15	15
32. Ad hoc expert discussions on investment policies for sustainable development	4	6	4	6
33. Training workshops on enterprise development policies and entrepreneurship	15	16	46	40
34. Training seminars on accounting and sustainability reporting	12	14	12	20
35. Workshops and seminars on responsible investment issues, including those related to intellectual property	30	25	40	35
36. Ad hoc expert discussions on the development of small and medium-sized enterprises and start-ups	6	9	6	6
37. Seminars on institutional investors and sustainable development	3	3	4	4
38. Ad hoc expert discussions on family businesses	3	6	3	3
Publications (number of publications)	22	23	19	18
39. <i>World Investment Report</i> and its overview	2	2	2	2
40. On investment issues for development, including the <i>Transnational Corporations Journal</i> , best practices and lessons learned in foreign direct investment in the least developed countries, and studies on responsible and sustainable investment	8	8	6	6
41. On investment policies for development, including <i>Investment Policy Reviews</i> and studies on policy options on investment for development	6	6	5	5
42. On investment promotion and facilitation, including on investing in Sustainable Development Goal sectors and Sustainable Development Goal model zones development	2	3	2	2
43. On enterprise development and entrepreneurship policy support	2	2	2	2
44. On the International Standards of Accounting and Reporting	2	2	2	1
Technical materials (number of materials)	15	17	17	16
45. <i>Global Investment Trends Monitor</i> (series), including the <i>Sustainable Development Goals Investment Trends Monitor</i>	4	4	4	3
46. <i>Global Investment Policy Monitor</i> (series)	3	2	3	3
47. Investment promotion and facilitation	2	–	2	2
48. On measures affecting international investment	2	2	2	2
49. International investment agreement issues notes	2	4	3	3
50. On responsible and sustainable investment, including intellectual property rights for development	1	3	1	2
51. On enterprise development and entrepreneurship policy support	1	2	2	1

C. Substantive deliverables

Consultation, advice and advocacy: policy advice to developing countries, including on policies to attract foreign direct investment; advice on statistics and international investment, including responsible investment; advice to all member States, upon request, on national policies and international investment agreements and sustainable development, as well as investment promotion and facilitation, intellectual property rights, entrepreneurship and enterprise development and business facilitation, with a focus on the most vulnerable, and on accounting and reporting standards; and advocacy and advisory services to some

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
--------------------------	-----------------	----------------	-----------------	-----------------

200 investment promotion agencies, over 5,000 special economic zones and other stakeholders in the global investment chain and some 50 EMPRETEC centres.

Databases and substantive digital materials: databases on foreign direct investment, national policies, international investment agreements and related databases; sustainable finance and gender equality databases.

D. Communication deliverables

External and media relations: International Standards of Accounting and Reporting updates, electronic EMPRETEC newsletters for more than 2,000 subscribers and newsletters, booklets and newsflashes on responsible investment; World Investment Forum report for more than 8,000 recipients; development and maintenance of the World Investment Network of over 18,000 recipients.

Digital platforms and multimedia content: Global Enterprise Registration portal; Investment Policy Hub; other digital platforms pertaining to investment and enterprise for development.

Subprogramme 3 International trade and commodities

Objective

- 12.46 The objective, to which this subprogramme contributes, is to ensure that international trade and commodities enable the economic diversification, sustainable and resilient economy and multilateralism transformations needed to create a more inclusive, resilient, sustainable and prosperous world through the participation of all member States.

Strategy

- 12.47 To contribute to the objective, the subprogramme will:
- (a) Support developing countries in fostering structural transformation through economic diversification towards a more sustainable and resilient economy;
 - (b) Enhance the participation of developing countries in the multilateral and regional trading systems, ensuring that developing countries’ participation in trade in goods and services works as a driver for inclusive and sustainable development;
 - (c) Support the adoption of, improvement in and enforcement of national and regional competition and consumer protection legislation, through best practices, guidelines and peer reviews;
 - (d) Strengthen the capacity of trade policymakers to make well-informed policy decisions through improved understanding of and transparency in international trade and trade policy trends and trade-related regulations, and build private sector capacities to cope with policy and market requirements;
 - (e) Foster the mainstreaming of gender equality into trade policies and build the capacity of member States through research findings, training workshops and policy dialogues to design and implement trade policies that allow women to benefit more from the opportunities arising from international trade;
 - (f) Contribute to research on international trade as an engine for development in the report of the Inter-Agency Task Force on Financing for Development, *The Sustainable Development Goals Report*, *World Tariff Profiles* and *World Economic Situation and Prospects*;
 - (g) Monitor and report on current trade trends and policies and their impact on inclusive, sustainable and resilient development to provide policy recommendations to member States;

- (h) Examine the effects of climate change in terms of trade on developing countries, and how environmental sustainability can promote global trade and inclusive development, including through trade policies facilitating global energy transition and supporting the competitiveness of developing countries in the production and trade of renewable and low-emission energy;
- (i) Support member States, through research, capacity-building activities and the fostering of policy dialogue, in their efforts to break away from commodity dependence and realize trade and economic diversification gains, including for critical minerals, by adding value to their commodities and strengthening non-commodity activities;
- (j) The above-mentioned work will help member States to make progress towards achieving Sustainable Development Goals 1, 2, 3, 5, 7, 8, 9, 12, 13, 14 and 17.

12.48 The above-mentioned work is expected to result in:

- (a) Enhanced understanding and policy response regarding current trends in the global economy, including ongoing environmental degradation, and improved ability of member States to benefit from international trade and foster the recovery of the trade sectors;
- (b) Member States designing and implementing trade-policy responses to climate change from a development perspective;
- (c) Member States identifying and addressing the trade barriers and supply-side obstacles that disproportionately affect women and girls;
- (d) Member States and the international community understanding and addressing the cost and market access impacts of non-tariff measures, as well as their beneficial use for inclusive and sustainable development policies;
- (e) Member States achieving positive development outcomes in relation to increased trade integration and activity;
- (f) Member States seizing opportunities emerging from commodity trade and enhanced international and regional cooperation;
- (g) Member States' increased adoption, revision and/or effective implementation of competition and consumer protection legislation and institutional frameworks;
- (h) Member States harnessing opportunities related to trade in environmentally sustainable products, and increasing capacities to assess the economic potential of the ocean, biodiversity and plastic substitutes-related sectors, and devising integrated sustainable use and trade action plans;
- (i) Member States creating an enabling environment for the promotion of services and the creative economy to leapfrog into new, high-growth sectors of the world economy;

Programme performance in 2023

Enhanced consumer product safety

12.49 The revised United Nations guidelines for consumer protection recognize the importance of protecting consumers from hazards to their health and safety, and address physical safety and standards for the safety and quality of consumer goods and services. The subprogramme, in response to requests from member States, established an informal working group on consumer product safety to facilitate information exchange and consultations to contribute to more consistent product quality and product variations between countries that do not have a negative impact on consumers. The activities of the working group led to the drafting and adoption of the first recommendation of UNCTAD on product safety, aimed at curbing the flow of unsafe products being traded internationally, which was approved by the eighth United Nations Conference to Review All Aspects of the Set of Multilaterally Agreed Equitable Principles and Rules for the Control of Restrictive

Business Practices. Following approval of the recommendation on preventing the cross-border distribution of known unsafe consumer products, UNCTAD prepared a note on modalities for implementing the recommendation (TD/B/C.1/CPLP/28).

12.50 Progress towards the objective is presented in the performance measure below (see table 12.7).

Table 12.7
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
Member States renewed the mandate of the working group on consumer product safety	Modalities for the implementation of the recommendations on preventing unsafe products from crossing borders were approved by member States	72 additional member States reported national measures and implemented initiatives on enhancing consumer product safety in their markets Reporting by member States on enhancing consumer product safety to the World Consumer Protection Map increased by 20 per cent, to 109 countries

Planned results for 2025

Result 1: integrated climate change dimension into the implementation of the African Continental Free Trade Area agreement at the national level

Programme performance in 2023 and target for 2025

- 12.51 The subprogramme’s work contributed to the development by 9 African countries of sustainable African Continental Free Trade Area implementation strategies and the establishment of two regional sustainable value chains, which did not meet the target of 10 African countries, due to a change in the number of countries participating in the planned activities.
- 12.52 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 12.8).

Table 12.8
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
The subprogramme identified several opportunities in the Agreement Establishing the African Continental Free Trade Area and relevant implementing protocols that have the potential to add the sustainability perspective of the African Continental Free Trade Area and	Detailed value chain analysis made available to member States, with 10 African countries selecting priority sectors for the development of competitive intraregional and continental sustainable value chains	Nine African countries developed sustainable African Continental Free Trade Area implementation strategies Two regional sustainable value chains were established	Ten African countries adopt sustainable value chain development plans as part of their African Continental Free Trade Area implementation strategies	A platform to share lessons learned and experiences in the implementation of sustainable value chain development plans is available to participating countries

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
boost BioTrade, and presented the African countries with options on how they can enhance the resilience of their trade to climate change through economic diversification and adaptation actions				

Result 2: enhanced policymaking to facilitate economic diversification through increased data capacities in services trade

Programme performance in 2023 and target for 2025

- 12.53 The subprogramme’s work contributed to the mapping of creative industries for Angola, with an emphasis on creative services, and a review of financial services policies for Uzbekistan, which met the planned target.
- 12.54 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 12.9).

Table 12.9
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Policymakers from Morocco and Paraguay have increased capacities to formulate national services trade policies in, inter alia, transport and logistics services	Member States benefit from the establishment of an open-ended and time-bound working group on data for services trade and development policies	Angola and Uzbekistan revised their services trade-related policies informed by better data collection and use	At least three additional countries adopt, revise or implement services trade-related policies informed by better data collection and use	At least four additional countries adopt, revise or implement services trade-related policies

Result 3: strengthened implementation of nationally determined contributions through trade policies by developing countries

Proposed programme plan for 2025

- 12.55 The subprogramme supports developing countries in better leveraging trade policies to reduce emissions and enhance their adaptation capacity, with a focus on the use of trade-related measures, including through the implementation of nationally determined contributions.

Lessons learned and planned change

- 12.56 The lesson for the subprogramme was that lack of data and policy-oriented research on the link between trade and climate change can limit the capacity of developing countries to scale up mitigation, adaptation and just energy transition actions. In applying the lesson, the subprogramme will undertake a nationally determined contribution mapping and develop an integrated methodology that takes into account multiple factors, such as the physical impacts of climate change, trade flows and the regulatory environment, and that can deliver better environmental outcomes. The subprogramme will develop a

new integrated approach and strategy to take into consideration trade, finance and climate-related measures in the design and implementation of nationally determined contributions.

12.57 Expected progress towards the objective is presented in the performance measure below (see table 12.10).

Table 12.10
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
<i>Trade and Environment Review 2021</i> was available to member States	–	Preliminary mapping of trade-related measures in nationally determined contributions, and a pilot analysis on fishing fleets and the energy transition, were available to member States	Recommendations on trade-related measures for reducing greenhouse gas emissions in nationally determined contributions are available to member States A framework for the increased use of trade measures in nationally determined contributions are available to member States	At least one pilot country increases the integration of trade policies in its nationally determined contributions Trade and development policy capacity of 100 decision makers and stakeholders is increased

Deliverables

12.58 Table 12.11 lists all deliverables of the subprogramme.

Table 12.11
Subprogramme 3: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	19	20	19	20
1. Reports to the General Assembly on international trade and development and world commodity trends and prospects	2	2	1	2
2. Reports on trends in trade and on trade regulations and sustainability standards and ad hoc reports on commodities trends and prospects for the Trade and Development Board	3	4	3	3
3. Background documentation for the Trade and Development Commission and for related expert meetings	4	5	6	6
4. Reports of the Intergovernmental Group of Experts on Competition Law and Policy and the Intergovernmental Group of Experts on Consumer Protection Law and Policy	10	9	9	9
Substantive services for meetings (number of three-hour meetings)	33	31	33	31
5. Meetings of the General Assembly (Second Committee)	2	2	2	2
6. Annual and executive sessions of the Trade and Development Board	2	3	2	2
7. Meetings of the Working Party on the Programme Plan and Programme Performance	2	4	2	2

Part IV International cooperation for development

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
8. Meetings of the annual sessions of the Trade and Development Commission and related expert meetings	16	11	16	14
9. Meetings of the annual sessions of the Intergovernmental Group of Experts on Competition Law and Policy and the Intergovernmental Group of Experts on Consumer Protection Law and Policy	10	10	10	10
10. Annual meeting of the Intergovernmental Forum on Mining, Minerals, Metals and Sustainable Development	1	1	1	1
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	20	27	20	20
11. On trade, a gender perspective and development	1	5	1	1
12. On assisting developing countries in acceding to WTO, on generalized and global systems of trade preferences, on services, regional and multilateral trading negotiations, on strengthening the creative economy, and on dispute settlement and commercial diplomacy	6	6	6	6
13. On competition and consumer protection laws and policies	4	4	4	3
14. On trade, the environment and development	4	4	4	4
15. On collecting, monitoring, reporting on and disseminating data on non-tariff measures, on formulating development-oriented trade policies, and on sustainability standards	2	8	3	4
16. On assistance to commodity-dependent countries in achieving greater diversification and value addition	3	–	2	2
Seminars, workshops and training events (number of days)	118	240	156	170
17. On the World Integrated Trade Solution, the Trade Analysis and Information System and non-tariff measures, and sustainability standards	17	49	27	31
18. On preferential trading arrangements, WTO accession, services policies and frameworks, emerging development challenges in the international trading system and trade, international trade negotiations, and the creative economy	27	49	39	44
19. On trade, a gender perspective and development	12	29	12	12
20. On trade, the environment and development	27	36	29	29
21. On competition and consumer protection laws and policies	22	48	27	33
22. On supporting commodity-dependent developing countries to formulate strategies and policies and harness development gains, and respond to the challenges and opportunities of commodity markets	5	5	14	10
23. On the changing international trade landscape and trade costs	1	2	1	3
24. On challenges and opportunities of international trade for the promotion of sustainable development	2	17	2	3
25. Ad hoc expert discussions on the role of competition law and policy, and on consumer protection law and policy	1	1	1	1
26. Geneva Trade and Development Workshop series, held jointly by UNCTAD, WTO, the University of Geneva and the Graduate Institute of International and Development Studies	4	4	4	4
Publications (number of publications)	35	32	26	17
27. On trade and the environment	6	9	4	4
28. On trade, a gender perspective and development	3	4	3	2
29. On trade, services, the international trading system and the creative economy	6	3	4	3
30. On trade trends and policy in the international context	9	5	8	3
31. On trade, market efficiency and consumer welfare and on competition and consumer protection policies	6	6	4	2

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
Technical materials (number of materials)	12	12	13	12
33. Reports on UNCTAD work on competition and consumer protection policies and on the Global Commodities Forum	2	2	2	2
34. Handbooks and policy briefs on classification of non-tariff measures, the Generalized System of Preferences and effective competition and/or consumer protection agencies	3	3	3	3
35. <i>Manual on Consumer Protection</i>	1	1	1	1
36. Model law on competition	1	1	1	1
37. On competition and consumer protection under the UNCTAD Research Partnership Platform	1	1	1	1
38. UNCTAD, WTO and ITC publication <i>World Tariff Profiles</i>	1	1	1	1
39. Trade-related aspects of the <i>Sustainable Development Goals Report</i>	1	1	1	1
40. United Nations Forum on Sustainability Standards	–	–	1	–
41. On topics in international trade negotiations	2	2	2	2

C. Substantive deliverables

Consultation, advice and advocacy: advice on trade-related decision-making to five member States and two regional South-South economic integration groupings; advice on integration into the global economy and participation in regional and multilateral trade agreements; advice on integration of trade concerns into national trade and services policies; consultation on cooperation and partnerships for inclusive growth and sustainable development; advice on trade and a gender perspective; advice on developing competition and consumer protection frameworks; consultation on trade and environment issues and creative economy potential for sustainable development.

Databases and substantive digital materials: World Integrated Trade Solution and Trade Analysis and Information System; online training courses on non-tariff measures for approximately 300 people and on negotiating regional trade agreements for trade in times of crisis and pandemic; a teaching package on trade and a gender perspective.

D. Communication deliverables

Outreach programmes, special events and information materials: multi-stakeholder meeting on commodities and development; BioTrade Congress; event on trade and a gender perspective; event on the creative economy; lectures and exhibits on issues related to the work of the subprogramme; newsletters on the Generalized System of Preferences and on UNCTAD work on competition and consumer protection; brochures and flyers on trade and a gender perspective and on commodity policy research and implementation and projects; booklets and fact sheets related to the work of the subprogramme.

External and media relations: press releases and op-ed pieces.

Digital platforms and multimedia content: interactive tools related to national competition and consumer protection laws, commercial diplomacy and dispute settlement; UNCTAD, WTO and ITC website on trade-related Sustainable Development Goals and indicators; electronic version of the model law on competition.

Subprogramme 4 Technology and logistics

Objective

- 12.59 The objective, to which this subprogramme contributes, is to harness innovation and technology, including e-commerce and the digital economy, improve trade logistics and increase human capacities for inclusive and sustainable trade and development in developing countries and economies in transition.

Strategy

- 12.60 To contribute to the objective, the subprogramme will:
- (a) Provide research and analysis and policy recommendations for capturing value in the digital economy and generating more inclusive outcomes, including through the flagship publication *Digital Economy Report*, and support developing countries in measuring e-commerce and the digital economy;

- (b) Foster and ensure that the interests of developing countries are identified and integrated into international policy dialogues on e-commerce and the digital economy, including through the Intergovernmental Group of Experts on E-commerce and the Digital Economy and UNCTAD eWeek;
- (c) Assist developing countries in systematically assessing the state of play and readiness to engage and integrate into the digital economy, through eTrade Readiness Assessments, e-commerce strategies and action plans, as well as by providing sustained support for their implementation, including through the eTrade Reform Tracker, to facilitate the coordination, monitoring and follow-up of national e-commerce policy reform actions;
- (d) Ensure that international debates on science, technology and innovation incorporate the perspectives and priorities of developing countries through the Commission on Science and Technology for Development and the Technology Facilitation Mechanism, among others;
- (e) Inform policies and deliberations on science, technology and innovation for development, especially on frontier technologies, through research and analysis, such as the flagship publication *Technology and Innovation Report* and other reports analysing policy options, including for the Inter-Agency Task Force on Financing for Development;
- (f) Develop knowledge of policymakers on various aspects of trade policies and interrelated issues of finance, investment and technology and sustainable development, and build capacities of member States in science, technology and innovation for development, including through science, technology and innovation policy reviews, technology assessment and foresight exercises;
- (g) Support implementation of trade facilitation reforms, in particular the WTO Agreement on Trade Facilitation, and enhance its support for the development and the implementation of appropriate legal and regulatory frameworks that reduce trade transaction costs, as well as supporting trade facilitation reforms and automation through the Automated System for Customs Data;
- (h) Provide technical assistance, data and policy recommendations and promote the sharing of best practices on the integration of developing countries into regional and global supply chains and transport networks, through the flagship publication *Review of Maritime Transport* and other research products, legislative frameworks and capacity-building, including the Training Development in the Field of International Trade (TrainForTrade) programme on port management;
- (i) Foster international policy dialogue on trade logistics issues, ensuring that the interests and specific challenges facing developing countries are addressed in relevant regional and international forums, and in this context continue to address specific trade logistics challenges affecting small island developing States and landlocked developing countries;
- (j) Mainstream the cross-cutting issue of gender equality and the empowerment of women and girls across the three pillars of the subprogramme, with a special focus on empowering women digital entrepreneurs and enhancing their digital skills and opportunities.

12.61 The above-mentioned work is expected to result in:

- (a) Improved capacity and policy formulation at the national, regional and global levels on e-commerce and digital economy for sustainable and inclusive development;
- (b) Improved coordination among Governments, together with development partners, civil society and the private sector, to implement policies on e-commerce and the digital economy that work for sustainable and inclusive development;
- (c) Improved knowledge and understanding of policy options by policymakers and international consensus on emerging challenges and opportunities in science, technology and innovation for sustainable and inclusive development, as well as increased capacity of policymakers to assess, analyse and formulate policies on key issues on the international economic agenda;
- (d) Member States implementing the outcomes of the World Summit on the Information Society and of the Technology Facilitation Mechanism;

- (e) Member States harnessing science, technology and innovation for their national development strategies;
- (f) Countries addressing key and emerging issues in trade logistics, including maritime transport policies and port management;
- (g) Member States implementing trade facilitation reforms, including the WTO Agreement on Trade Facilitation;
- (h) Enhanced capacity of member States to design and implement policies and action aimed at improving the efficiency of trade transactions, as well as the management of transport operations, including through the Automated System for Customs Data programme.

Programme performance in 2023

Enhanced food security of developing countries through satellite technology

- 12.62 Crop monitoring through Earth observation can enable better food security planning and sustainable agriculture. The CropWatch Innovative Cooperation Programme, implemented by the subprogramme in the context of the Commission on Science and Technology for Development, uses satellite data made available through partnerships to monitor crop conditions and integrates such data with other climate-related data on drought, pests and disease for better farm management. Algeria, Ghana, Mauritius, Nigeria, Zambia and Zimbabwe, among others, gained access to satellite data and remote-sensing technology and were trained to use it, allowing participating countries to better deal with food security issues and to increase harvests and, therefore, food supply.
- 12.63 Progress towards the objective is presented in the performance measure below (see figure 12.VI).

Figure 12.VI

Performance measure: number of developing countries using satellite data and remote-sensing monitoring systems in addition to manual agricultural surveys (cumulative)

Planned results for 2025

Result 1: simplified trade procedures through the Automated System for Customs Data Single Window

Programme performance in 2023 and target for 2025

- 12.64 The subprogramme’s work contributed to eight new border regulatory agencies and partner governmental agencies participating in and benefiting from the Automated System for Customs Data Single Window system, which met the planned target.
- 12.65 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 12.VII).

Figure 12.VII
Performance measure: number of new border regulatory agencies and partner governmental agencies participating in and benefiting from the Automated System for Customs Data Single Window system (cumulative)

Result 2: efficient and resilient port management in developing countries for their integration into regional and global supply chains

Programme performance in 2023 and target for 2025

- 12.66 The subprogramme’s work contributed to 12 port entities in developing countries adopting policy measures to improve resilience by enhancing the essential skills and capacities of 1,774 port practitioners from 134 port communities related to ports management during pandemics and disruptions, which exceeded the planned target of five port entities adopting such policy measures.
- 12.67 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 12.12).

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Increased essential skills and capacities of 809 port practitioners from 96 port communities related to ports management during pandemics and disruptions	Increased essential skills and capacities of 1,000 port practitioners from 112 port communities related to ports management during pandemics and disruptions	12 port entities in 12 countries (Bolivia (Plurinational State of), Cameroon, Ecuador, Ghana, Namibia, Pakistan, Philippines, Senegal, Solomon Islands, Somalia, Togo and United Republic of Tanzania) adopted policy measures to improve resilience by delivering more efficient port management in order to increase trade flows and by creating port networks	At least five additional port entities adopt policy measures to improve resilience resulting from increased essential skills and capacities of 1,200 port practitioners from 130 port communities related to ports management during pandemics and disruptions	At least 10 port entities adopted policy measures identified in the compendium on building port resilience against pandemics

Result 3: improved availability of digital economy statistics in developing countries

Proposed programme plan for 2025

12.68 Limited availability of statistics can diminish the ability of policymakers to establish benchmarks and monitor progress in their transformation to a digital economy, as well as to guide digital economy policy that works for development, and can hamper investment decisions by businesses. In responding to the needs of member States, the subprogramme supported national statistical offices or other competent authorities in better capturing, collecting and measuring digital economy-related data in areas such as enterprise surveys on the use of information and communications technology, online retail sales, business-to-consumer and business-to-business e-commerce, and cross-border digital trade, which can provide insights that cover a wider range of countries, especially developing countries.

Lessons learned and planned change

12.69 The lesson for the subprogramme was the importance of statistics to illustrating the diverse ways in which digital transformation is affecting countries at all stages of development, as well as the importance of better statistics on the value of e-commerce to understand its economic role and contributions to GDP, employment and development. In applying the lesson, the subprogramme will support the newly established task group on measuring e-commerce value, with the goal of developing international guidelines to be used for providing training at the regional and national levels to build the capacity of member States to produce relevant statistics.

12.70 Expected progress towards the objective is presented in the performance measure below (see table 12.13).

Table 12.13
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Establishment of the international task group on measuring e-commerce value	Member states participate in developing internationally agreed guidelines	At least two countries start using the internationally agreed guidelines

Deliverables

12.71 Table 12.14 lists all deliverables of the subprogramme.

Table 12.14
Subprogramme 4: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	20	15	18	20
1. Reports to the General Assembly on the outcomes of the World Summit on the Information Society, and on science and technology for development	2	2	1	3
2. Reports to the Commission on Science and Technology for Development and its intersessional panels	6	6	6	6
3. Background notes and reports for the Trade and Development Board	2	2	2	2
4. Note by the UNCTAD secretariat and reports for the Investment, Enterprise and Development Commission and related expert meetings on issues related to science, technology and innovation	2	1	2	1

Part IV International cooperation for development

45. Background notes for the multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals	1	1	1	1
46. Economic and maritime country profiles	1	1	1	1
47. Report of the UNCTAD TrainForTrade Advisory Group on Strengthening Training Capacity and Human Resource Development	–	–	1	1
48. Technical note on science, technology and innovation for development	1	1	1	1

C. Substantive deliverables

Consultation, advice and advocacy: UNCTAD eWeek; advisory services in the area of e-commerce and the digital economy; multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals; sessions of the UNCTAD TrainForTrade Advisory Group on Strengthening Training Capacity and Human Resource Development; policy advice on science, technology and innovation policies for development and consultations on policy and practical aspects of e-commerce and the digital economy, transport policies and international legal instrument standards and rules related to the facilitation of international trade, transport and transport security for port operators and the eTrade for All initiative.

Databases and substantive digital materials: UNCTAD platform for learning and capacity-building managed by the TrainForTrade programme, which trains approximately 1,500 beneficiaries per year; port performance statistics platform; online repository on national trade facilitation committees; Global Cyberlaw Tracker; online e-learning modules for the courses on key issues on the international economic agenda, for 200 users annually; online platform for sustainable freight transport; eTrade for All online platform; digital economy statistics in the UNCTADstat database.

D. Communication deliverables

Outreach programmes, special events and information materials: newsletters on the Automated System for Customs Data and eTrade for All for more than 3,000 subscribers; transport and trade facilitation newsletter for more than 6,000 recipients; newsletter on science, technology and innovation; brochures, flyers and information kits on the work of the subprogramme.

External and media relations: press releases, press briefings, interviews, press conferences and news items related to the issuance of major publications under the subprogramme and the organization of important events.

Digital platforms and multimedia content: TrainForTrade; Commission on Science and Technology for Development; Automated System for Customs Data and paragraph 166 of the Bangkok Plan of Action website; eTrade for All platform; online platforms for innovation policy learning.

Subprogramme 5

Africa, least developed countries and special programmes

Objective

- 12.72 The objective, to which this subprogramme contributes, is to enhance the effective integration of Africa, the least developed countries and other groups of countries in special situations (landlocked developing countries, small island developing States and other structurally weak, vulnerable and small economies) into the global economy through fostering sustainable structural transformation, reducing vulnerabilities and developing domestic productive capacities in the targeted groups.

Strategy

- 12.73 To contribute to the objective, the subprogramme will:
- (a) Carry out research and technical cooperation activities to diversify the exports, foster the productive capacities and explore the financing structures of the above-mentioned countries, including through contributions to reports of the Secretary-General to the General Assembly and the reports on the implementation and follow-up of relevant agendas and programmes of action;
 - (b) Implement technical cooperation programmes and develop strategic evidence- and policy-based options to promote sustainable structural economic transformation through productive capacity-building, diversification and support aimed at addressing vulnerability and building resilience, in particular for developing countries;
 - (c) Advocate consensus in the international development community regarding the policy measures that best address the sustainable development problems of least developed countries, small island developing States and landlocked developing countries, including at the multilateral level, through the identification of new policy approaches and methodologies, training and capacity-building workshops, as well as greater interaction with research institutes in least developed countries and with development partners;
 - (d) Strengthen efforts to provide domestic policy support and capacity-building to the targeted groups derived from its innovative research and analysis, development of analytical tools and technical support;
 - (e) Provide technical support to least developed countries that are either in the process of graduation or recently graduated from the least developed country category, including through the provision of General Assembly-mandated vulnerability profiles, as applicable, to ensure their graduation with momentum and a smooth transition towards their new status;
 - (f) Broaden its country-based technical support to include aspects such as national strategies for the development of productive capacities and structural economic transformation, regional trade integration, rules of origin, inequality, poverty and vulnerability, enhanced market access and preference utilization, value addition in strategic products and geographical indications;
 - (g) Support member States in addressing the socioeconomic impact of external shocks on economies in target countries, through research work and technical cooperation, in order to facilitate specific, data-driven policy design and implementation aimed at building resilience;
 - (h) Support African countries in addressing their special concerns and needs, including as articulated in the New Partnership for Africa's Development and in Agenda 2063: The Africa We Want;
 - (i) Support implementation by UNCTAD of the signed memorandum of understanding with the African Continental Free Trade Area secretariat, most notably through research, technical cooperation and targeted policy advice in the targeted areas;

- (j) Deliver training, capacity-building activities and ad hoc research on market access, the productive capacities index, trade preferences and rules of origin to support the WTO least developed countries group to identify and negotiate a common position for the relevant WTO committee meetings;
- (k) The above-mentioned work will help member States, in particular least developed countries and other groups of countries in special situations, to make progress towards the achievement of Sustainable Development Goals 9 and 17.

12.74 The above-mentioned work is expected to result in:

- (a) Enhanced role of productive capacities in fostering structural transformation for inclusive growth and development in beneficiary countries;
- (b) Enhanced capacity of member States to develop and implement policies and programmes to deepen domestic and regional markets and accelerate industrialization and socioeconomic transformation;
- (c) Improved development policy formulation and implementation capacities in countries with specific needs for more effective technical cooperation;
- (d) Enhanced implementation of the African Continental Free Trade Area by member States;
- (e) Greater participation by member States in multilateral forums dedicated to enhanced trade through transparent, predictable and simple rules of origin;
- (f) Improved development policy formulation, implementation and monitoring capacities of member States, including greater policy coherence, and capacities to account for current and future shocks, reduce exposure to external shocks and build resilience.

Programme performance in 2023

Increased intraregional trade in West Africa due to the convergence of the legal frameworks on transport, intermediation, transit and trade

12.75 The subprogramme facilitated the creation of ad hoc working groups within the national trade facilitation committees of Benin, Burkina Faso, the Niger and Togo to identify and reach consensus on a common legal framework for transport, intermediation, transit and trade to support increased intraregional trade. The subprogramme further supported the countries through the provision of in-depth analysis and targeted capacity-building activities, and facilitated the signing of the quadrilateral declaration on the convergence of the legal frameworks on transport, intermediation, transit and trade, enhancing the efficiency of the trade corridors linking these countries and facilitating socioeconomic growth and intraregional trade.

12.76 Progress towards the objective is presented in the performance measure below (see table 12.15).

Table 12.15
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
Ad hoc working groups created on transit and transport, with the participation of Benin, Burkina Faso and the Niger	The working groups on transit and transport of the national trade facilitation committees of Benin, Burkina Faso, the Niger and Togo agreed on the elements for the convergence of the legal framework for transport, intermediation, transit and trade	Quadrilateral declaration on the convergence of the legal frameworks on transport, intermediation, transit and trade signed by the ministers of trade and transport of Benin, Burkina Faso, the Niger and Togo

Planned results for 2025

Result 1: enhanced understanding of the challenges and opportunities to foster productive capacities and structural transformation in countries with special needs

Programme performance in 2023 and target for 2025

- 12.77 The subprogramme's work contributed to incorporating the findings of the national and regional productive capacities gap assessments into the vulnerability profiles of those countries found eligible for graduation from the least developed country category in 2021, which met the planned target.
- 12.78 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 12.16).

Table 12.16

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
The UNCTAD productive capacities index made available for all countries on a dedicated web portal, and the subprogramme developed a coherent structure for national and regional productive capacities gap assessments	National productive capacities gap assessments undertaken in six countries (Angola, Ethiopia, Haiti, Kenya, Nigeria and Zambia) Angola and the United Republic of Tanzania designed policies aimed at closing the productive capacity gaps at the domestic level, as indicated in their Common Country Assessments	National and regional productive capacities gap assessments used as input to the General Assembly-mandated vulnerability profiles of those countries found eligible for graduation from the least developed country category (Cambodia, Comoros, Djibouti, Senegal and Zambia)	At least three countries have access to comprehensive and holistic multi-year support programmes to address productive capacity gaps and domestic priorities Improvement of the productive capacities of Angola and the United Republic of Tanzania in areas targeted by the designed policies	Enhanced structural transformation of member States as proxied by performance on the productive capacities index

Result 2: least developed countries are able to graduate through the development of comprehensive strategies and policies for a graduation with momentum and beyond

Programme performance in 2023 and target for 2025

- 12.79 The subprogramme's work contributed to road maps to guide the transition towards graduation for Cambodia (jointly with the Ministry of Commerce), Senegal (jointly with the Ministry of the Economy, Planning and Cooperation) and Zambia (jointly with the Ministry of Finance and National Planning), which met the planned target.
- 12.80 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 12.17).

Table 12.17
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Least developed countries have access to analytical research on how to achieve “graduation with momentum” and fundamental concepts, including the identification of a quantitative evidence base and data sources	Least developed countries have access to policy guidance on the development of a strategy for “graduation with momentum”	Three least developed countries (Cambodia, Senegal and Zambia) that have qualified for graduation have taken steps towards the drafting of a strategy for “graduation with momentum”	At least two least developed countries use industrial policy more effectively to graduate with momentum	At least two least developed countries implement industrial policy measures as articulated in the vulnerability profile At least two least developed countries have engaged in new trade initiatives to adjust their trade policies as a result of graduation

Result 3: enhanced statistical capacity of least developed countries and other developing countries, to help embrace a paradigm shift in the formulation of holistic economic diversification policies

Proposed programme plan for 2025

12.81 To identify gaps in productive capacities and help with economic diversification, the subprogramme has developed benchmarking indices presented under the productive capacities index to identify specific needs and measure progress in structural transformation, as well as provided statistical training sessions to targeted national stakeholders. The subprogramme has also developed a web-based portal containing detailed data on the rate of utilization of the Generalized System of Preferences, allowing policymakers and firms to draw policy conclusions to make informed choices on trade policies and business practices.

Lessons learned and planned change

12.82 The lesson for the subprogramme was that strengthening the statistical capacity of national policymakers can help with obtaining national buy-in and ownership of national development strategies for economic diversification. In applying the lesson, the subprogramme will strengthen engagement with beneficiary countries to upgrade their statistical capacity and share revised methodological approaches to enable beneficiaries to use the productive capacities index more effectively in the implementation of national development strategies and holistic programmes. In addition, the subprogramme will enhance its support to the most vulnerable countries to develop forward-looking trade policies for regional and multilateral trade to ensure the successful implementation of regional trade initiatives, including the African Continental Free Trade Area and the Regional Comprehensive Economic Partnership, leveraging updated generalized system of preferences data.

12.83 Expected progress towards the objective is presented in the performance measure below (see table 12.18).

Table 12.18
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
First generation of the productive capacities index was made available to member States	Capacities of national statisticians in nine least developed countries (Bangladesh, Bhutan, Cambodia, Ethiopia, Kenya, Lao People's Democratic Republic, Nepal, Timor-Leste and Zambia) were enhanced on the use of the productive capacities index for policymaking and on the database on rates of utilization of the Generalized System of Preferences	Second generation of the productive capacities index was made available to member States	At least two least developed countries or other most vulnerable countries make reference to productive capacities, including the productive capacities index, in their national development strategies The updated database on rates of utilization of the Generalized System of Preferences and statistical training are available to member States	At least two least developed countries or other most vulnerable countries apply the statistical tools, including the productive capacities index, to monitor trade and development progress, contributing to structural economic transformation

Deliverables

12.84 Table 12.19 lists all deliverables of the subprogramme.

Table 12.19
Subprogramme 5: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	7	7	3	3
1. Reports for the Economic and Social Council, including on vulnerability profiles	5	5	1	1
2. Reports for the Trade and Development Board on UNCTAD-wide activities for least developed countries and UNCTAD-wide activities in favour of Africa	2	2	2	2
Substantive services for meetings (number of three-hour meetings)	9	9	8	8
3. Meetings of the General Assembly and the Economic and Social Council and its Committee for Development Policy	2	2	1	1
4. Annual and executive sessions of the Trade and Development Board	5	5	5	5
5. Meetings of the Working Party on the Programme Plan and Programme Performance	2	2	2	2
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	3	3	1
6. On trade, finance, transit and development to build national capacity	1	1	3	1
7. On the Enhanced Integrated Framework	1	2	–	–

Section 12 Trade and development

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
Seminars, workshops and training events (number of days)	26	48	30	50
Workshops:				
8. On trade issues relevant to least developed and African countries, including on duty-free and quota-free market access, diagnostic trade integration study and post-diagnostic trade integration study and trade activities under the Enhanced Integrated Framework and structural transformation and progress towards post-least developed country status	13	25	10	22
9. On the implementation of the new initiatives that will replace the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024 and the SIDS Accelerated Modalities of Action (SAMOA) Pathway, issues of thematic or sectoral relevance to landlocked developing countries, the Doha Programme of Action for the Least Developed Countries for the decade 2022–2031, national productive gap assessments and holistic development programmes, the agreed outcome of the Fifth United Nations Conference on the Least Developed Countries, and trade and poverty	10	17	14	20
10. On matters relevant to development in least developed countries and Africa	3	6	6	8
Publications (number of publications)	14	13	13	12
11. <i>The Least Developed Countries Report</i> and its overview	2	2	2	2
12. <i>The Economic Development in Africa Report</i> and its overview	2	2	2	2
13. Report on building and measuring productive capacities	3	3	1	1
14. Report on enhancing coherence between trade and industrial strategies for poverty alleviation in Africa and a special issues paper on Africa	2	2	2	1
15. Analytical studies on duty-free and quota-free market access and rules of origin	1	–	1	1
16. Lessons learned on geographical indications and related analysis for least developed countries	–	–	1	1
17. Sectoral, statistical and thematic issues of interest for developing countries: policy implications for fostering productive capacities and structural economic transformation and on the national productive capacities gap assessments	1	1	1	2
18. Research papers on economic development issues in least developed countries and Africa	3	3	3	2
Technical materials (number of materials)	8	9	5	7
19. Technical material on trade and poverty	2	1	2	1
20. Technical material on trade and development in vulnerable economies, including small island developing States	6	7	3	5
21. Technical material on transit, transport and trade facilitation	–	1	–	1

C. Substantive deliverables

Consultation, advice and advocacy: policy advice to ministries of trade, transport and planning on the new programme of action that will replace the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024 and to national statistical offices on measuring productive capacities for targeted groups of countries; advice on strategies for graduation with momentum for graduating and graduated least developed countries; advice on trade and development issues for small island developing States, landlocked developing countries and African countries; advice for least developed countries on trade issues relevant to them; consultations on UNCTAD activities related to the New Partnership for Africa’s Development; and consultations with United Nations partner agencies and African countries for the implementation of the Third Industrial Development Decade for Africa.

D. Communication deliverables

Outreach programmes, special events and information materials: lectures on issues related to least developed countries and African development, trade policy, globalization, trade development strategies and policy coherence for the benefit of member States, for a minimum of 100 participants; and policy briefs related flagship reports.

External and media relations: press releases, press conferences and interviews and opinion pieces on flagship reports and other topical research, including policy recommendations.

B. Proposed post and non-post resource requirements for 2025

Overview

12.85 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 12.20 to 12.22.

Table 12.20

^a Includes four temporary posts (1 Senior Economic Affairs Officer (P-5), 2 Economic Affairs Officers (P-4) and 1 Economic Affairs Officer (P-3)).

12.86 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 12.23 to 12.25 and figure 12.VIII.

12.87 As shown in tables 12.23 (1) and 12.24 (1), the overall resources proposed for 2025 amount to \$83,506,500 before recosting, reflecting a net decrease of \$82,900 (or 0.1 per cent) compared with the approved budget for 2024. Resource changes result from other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Explanation of variances by factor, component and subprogramme

Overall resource changes

Other changes

12.88 As shown in table 12.23 (1), resource changes reflect a net decrease of \$82,900, as follows:

- (a) **Subprogramme 1, Globalization, interdependence and development.** The net decrease of \$202,500 under posts relates to the proposed abolishment of one Documents Management Assistant (General Service (Other level)) and one Staff Assistant (General Service (Other level)), offset in part by the proposed establishment of one Economic Affairs Officer (P-3), as reflected in annex II;
- (b) **Programme support.** The increase of \$119,600 under general operating expenses relates to the higher anticipated requirements for: (i) the information and communications technology services provided by the United Nations Office at Geneva and the United Nations International Computing Centre reflecting increased digitalization efforts; and (ii) document reproduction-related services provided by the Department for General Assembly and Conference Management reflecting increased information dissemination and outreach activities.

Extrabudgetary resources

12.89 As reflected in tables 12.23 (2) and 12.24 (2), extrabudgetary resources amount to \$61,326,000. The resources would complement regular budget resources and would be used to provide for 15 posts (1 D-2, 1 P-5, 2 P-4, 2 P-3 and 9 General Service (Other level)) to perform mainly the administrative functions related to the extrabudgetary activities. In addition, non-post resources would be used to perform various technical cooperation activities, such as technical advisory services, training, workshops, seminars and field projects.

12.90 The extrabudgetary resources under the present section are subject to the oversight of UNCTAD, which has delegated authority from the Secretary-General of the United Nations.

Polymaking organs

12.91 The resources proposed under this component would provide for the polymaking organs as shown in table 12.26.

Table 12.26

Polymaking organs

(Thousands of United States dollars)

<i>Polymaking organ</i>	<i>Additional information</i>	<i>2024 approved</i>	<i>2025 estimate (before recosting)</i>

Executive direction and management

1. Executive direction and management

12.93 The Office of the Secretary-General of UNCTAD coordinates cross-cutting institutional processes, such as the systematic inclusion of gender equality aspects in all areas of the work of UNCTAD and reaching gender parity in staff. To that end, the Office of the Secretary-General will continue to

coordinate the Gender Task Force, which is chaired by the Deputy Secretary-General of UNCTAD and is mandated to improve and better coordinate gender mainstreaming activities, including by appointing, for each UNCTAD subprogramme, gender focal points whose responsibilities include reviewing and clearing trust fund project documents from a gender mainstreaming perspective. The Statistics Coordination Task Force, chaired by the Deputy Secretary-General of UNCTAD, which has the mandate to improve the coordination of statistical activities in UNCTAD and to exploit synergies, sets strategic priorities for UNCTAD statistics and coordinates statistical activities, including production, dissemination and capacity development.

- 12.94 In addition, the Office of the Secretary-General of UNCTAD undertakes communication and external relations activities, which include the planning and delivery of UNCTAD media outreach and external relations activities, web content management, civil society liaison and implementation of the communications strategy, including the production and dissemination of information and media products targeted to specific audiences. It also promotes cooperation and working relationships with civil society organizations, including non-governmental organizations (NGOs), trade unions, academia and intergovernmental organizations, and carries out fundraising and intergovernmental liaison activities in respect of civil society work.
- 12.95 Furthermore, the Office of the Secretary-General of UNCTAD coordinates and conducts evaluation activities that serve to ensure and enhance the quality and resonance of UNCTAD programmes and projects, by providing internal oversight, including oversight and management of external evaluations mandated by the Trade and Development Board, oversight and management of project evaluations funded by the United Nations Development Account and external evaluations required by contribution agreements, thus providing strategic support and advice to the management on oversight, self-assessments and self-evaluations.
- 12.96 Additionally, the work of enhancing outreach and promoting UNCTAD objectives at United Nations Headquarters and with relevant actors based in New York and Washington, D.C., including enhancing coordination with all United Nations system entities, funds and specialized programmes, diplomatic missions, the press corps, research institutions, NGOs and technical assistance agencies in the areas of trade, investment, technology and development, is undertaken by the liaison office in New York under the direct guidance of the Office of the Secretary-General of UNCTAD.
- 12.97 The Statistics Service is responsible for supporting the coordination, standardization and coherence of statistical activities throughout the organization and conducting independent quality assurance on UNCTAD statistics. The cross-organizational Service provides relevant and timely statistics and indicators on trade and development, cutting across the areas of work of UNCTAD, including the interrelated issues of finance, technology, transport, investment and sustainable development, for enhanced and data-driven research, analysis and policy action, and, by implementing the UNCTAD Statistics Quality Assurance Framework, aligning the organization's overall statistical requirements to enable better planning, more synergies and quality controls. The Service coordinates data and statistical activities in UNCTAD by developing methods, standards and tools for the collection, compilation, dissemination and use of high-quality statistics adhering to international standards. The Service also contributes to the development of national statistical capacity and global statistics, supports countries' efforts to strengthen their national statistical capacity and develops statistics with international collaboration on topics related to the UNCTAD mandate.
- 12.98 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), UNCTAD is integrating environmental management practices into its operations. UNCTAD will continue to reduce its carbon footprint by reviewing all air travel at the senior management level to ensure that all alternatives are considered, and substituting air travel through the use of information and communications tools whenever possible. As a non-resident entity housed within the premises of the United Nations Office at Geneva, the UNCTAD carbon footprint comprises exclusively air travel-related emissions.

Part IV International cooperation for development

12.99 Information on the timely submission of documentation and advance booking for air travel is reflected in table 12.28. UNCTAD will continue to make efforts to further increase the compliance rate, including by monitoring advance ticket purchase compliance in the Management Information System (UNCTAD management dashboard) and reporting to senior management once a month. The Mission Travel Portal, which identifies requests that are not compliant with the advance air ticket purchase policy and sends automated warnings to senior managers, is used by staff members to clear their travel requests with senior management before initiating travel requests in Umoja. In addition, UNCTAD continues to make efforts to raise awareness among staff members and to encourage early planning of meetings and conferences, whenever possible.

2. Memorandum of Understanding between the Russian Federation and the Secretariat of the United Nations on promoting Russian food products and fertilizers to the world markets

12.101 On 22 July 2022, the Secretary-General, as part of his efforts to address the recent increase in global food insecurity, signed a memorandum of understanding with the Russian Federation on promoting Russian food products and fertilizers to the world markets to facilitate the unimpeded access to the global markets of Russian food products and fertilizers, which are not subject to sanctions. This initiative, known as the Memorandum of Understanding between the Russian Federation and the Secretariat of the United Nations on promoting Russian food products and fertilizers to the world markets, is aimed at bringing stability to global food markets by facilitating global access to agricultural products, including fertilizers and raw materials required to produce fertilizers.

12.102 The Memorandum of Understanding is aimed at the following:

- (a) Continuation of commercial supplies of food and fertilizers from the Russian Federation to the countries in need of such products;
- (b) Continuation of efforts by the Secretariat of the United Nations to facilitate the transparent unimpeded access of food and fertilizers, including raw materials required to produce fertilizers (including ammonia), originating from the Russian Federation to the world market; under the initiative, the Russian Federation informs the Secretariat of any potential or existing impediments to such access that may arise in the sectors of finance, insurance and logistics;
- (c) Facilitation by the Russian Federation of the unimpeded export of food, sunflower oil and fertilizers from the Ukrainian ports.

12.103 To support the Memorandum of Understanding, UNCTAD leads the endeavour to engage with relevant authorities and the private sector to effectively exempt food products and fertilizers, including raw materials required to produce fertilizers (including ammonia), originating in the Russian Federation from measures imposed on the Russian Federation, based on the principle that those measures do not apply to food products and fertilizers.

Part IV International cooperation for development

- 12.104 UNCTAD undertakes in-scope requests from the Russian Federation and provides technical guidance to the Russian Federation and to Russian companies relating to trade facilitation in the context of the Memorandum of Understanding.
- 12.105 In this context, UNCTAD has established a task team to support the Memorandum of Understanding. Its activities include the following:
- (a) Establishment of channels for the mutual exchange of information between the Russian Federation and the Secretariat of the United Nations for the purposes of implementing the Memorandum of Understanding and informing the Secretariat on any impediments to the access of food and fertilizers originating from the Russian Federation to global markets;
 - (b) Facilitation of and support for the efforts of bilateral and multilateral sectoral working groups, involving relevant actors from the government and private sectors;
 - (c) On the basis of in-scope requests received from the Russian Federation, liaison with the private sector, including business associations, industry groups and companies, to address issues arising from non-sanctioned trade related to the Memorandum of Understanding.
- 12.106 The proposed regular budget resources for 2025 amount to \$2,645,500 and reflect no change compared with the approved budget for 2024. Additional details on the distribution of the proposed resources for 2025 are reflected in table 12.30 and figure 12.XI.

(Number of posts/thousands of United States dollars)

Programme support

12.112 Programme support is responsible for administrative activities that support the smooth work of the programme, including in the areas of human resources, finance and budget, programme planning, intergovernmental activities and technical cooperation.

12.113 The proposed regular budget resources for 2025 amount to \$14,169,000 and reflect an increase of \$119,600 compared with the approved budget for 2024. The proposed change is explained in paragraph 12.88 (b). Additional details on the distribution of the proposed resources for 2025 are reflected in table 12.36 and figure 12.XVII.

Organizational structure and post distribution for 2025

Abbreviations: ASG, Assistant Secretary-General; GS (OL), General Service (Other level); GS (PL), General Service (Principal level); GTA, general temporary assistance; RB, regular budget; USG, Under-Secretary-General; XB, extrabudgetary.

Annex II

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 1, Globalization, interdependence and development	(2)	GS (OL)	Abolishment of one Documents Management Assistant and one Staff Assistant	The proposed abolishment of two posts is related to the restructuring of responsibilities within the subprogramme and the automatization and digitalization of documents management-related processes.
Subprogramme 1, Globalization, interdependence and development	1	P-3	Establishment of one Economic Affairs Officer	The proposed establishment of one post is related to the strengthening of the UNCTAD programme of assistance to the Palestinian people, including relevant studies. It is proposed that one Economic Affairs Officer be established to be responsible for, and make contributions to, the technical, modelling and quantitative analysis carried out by the Assistance to the Palestinian People Unit. In addition, the Economic Affairs Officer would: (a) provide overall statistical support, including methodology identification, model-building, calibration, estimation and simulations, to the Unit; and (b) contribute to parliamentary and technical reports and documents, technical cooperation projects and the maintenance of the Unit's website.

Abbreviation: GS (OL), General Service (Other level).

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 13.1 The International Trade Centre (ITC) is responsible for the business aspects of trade development, as the joint technical cooperation agency of the United Nations and the World Trade Organization (WTO). The mandate derives from the priorities established by the contracting parties to the General Agreement on Tariffs and Trade (GATT) on 19 March 1964 and the General Assembly on 12 December 1967 (Assembly resolution [2297 \(XXII\)](#)). Since 1 January 1968, ITC has operated under the joint auspices of GATT/WTO and the United Nations. In its resolution 1819/LV of 9 August 1973, the Economic and Social Council reaffirmed the Centre's mandate as the focal point for technical assistance and cooperation activities for trade promotion within the United Nations system of assistance for developing countries.
- 13.2 In the context of the 2030 Agenda for Sustainable Development, Member States explicitly recognized trade as a key engine for sustainable and inclusive economic growth and poverty eradication, specifically through target 8.a of the Sustainable Development Goals, to increase Aid for Trade support, and targets 17.10 and 17.11 of the Goals, for an open, rules-based, transparent and fair trading system and a significant increase in exports from developing countries.
- 13.3 Against the backdrop of trade tensions and the severe negative impact on trade and development caused by the coronavirus disease (COVID-19) pandemic, the General Assembly, in its resolutions [78/134](#) and [77/160](#), reiterated this position for the target beneficiaries of ITC – micro-, small and medium-sized enterprises – which make up over 90 per cent of the world's businesses, account for over two thirds of employment and form the economic backbone of every community.

Programme of work

Subprogramme 6

Operational aspects of trade promotion and export development

Objective

- 13.4 The objective, to which ITC contributes, is to enhance inclusive and sustainable growth and development through trade and international business development for micro-, small and medium-sized enterprises in developing countries, especially the least developed countries, and countries with economies in transition, through increased business capacities of those enterprises to trade and through a conducive business environment and strengthened institutional ecosystems for those enterprises.

Strategy and external factors for 2025

- 13.5 To contribute to the objective, ITC will provide advisory services, training and awareness-building to enterprises, business support institutions and government agencies in areas that are key to the international competitiveness of micro-, small and medium-sized enterprises. In particular, ITC will:
- (a) Build enterprise-level capacities in the areas of market analysis, value addition, quality, e-commerce, marketing, access to finance and investment, climate resilience and environmental risk mitigation, including on how to sustain the resilience of micro-, small and medium-sized enterprises in the recovery from the COVID-19 pandemic;

- (b) Provide micro-, small and medium-sized enterprises with market knowledge and new market linkage opportunities, including through initiatives such as the Switch ON and FastTrackTech digital trade initiatives and the “Alliances for Action” initiative, which connect businesses to foreign markets and develop public-private partnerships in targeted value chains, strengthening existing and opening new trade channels;
- (c) Enable business transactions and investment for micro-, small and medium-sized enterprises, with a focus on growing local, regional, South-South and global value chains, working with women-owned businesses, youth entrepreneurs, refugees, internally displaced persons and artisan and farmer communities, including through the ITC SheTrades initiative, the Ye! (“young entrepreneurs”) community and the Refugee Empowerment through Markets Initiative;
- (d) Strengthen the governance, performance, advocacy capacities, quality and scope of services and interconnectedness of national, subnational and regional business support institutions and ecosystems, including trade and investment promotion agencies, chambers of commerce, sector associations, youth and women’s business groups, cooperatives, incubators and technical and vocational training providers;
- (e) Support policymakers in leading public-private dialogues and consensus-building and decision-making processes that foster the growth and internationalization of micro-, small and medium-sized enterprises, including through the promotion of the benefits of a universal, rules-based, open, predictable, inclusive, non-discriminatory and equitable multilateral trading system under WTO;
- (f) Scale up its comprehensive and globally accessible trade intelligence that addresses information and knowledge gaps, including databases, such as the ITC Sustainability Map and Market Access Map, and the SME Trade Academy digital learning platform.

13.6 The above-mentioned work is expected to result in:

- (a) Increased resilience of micro-, small and medium-sized enterprises to external shocks and their enhanced competitiveness, sustainable business practices and integration into regional and international value chains that generate business transactions, investments, sustainable jobs and higher incomes, especially for women, youth and persons in vulnerable situations;
- (b) Improved usefulness of services provided by business support institutions to micro-, small and medium-sized enterprises, including enhanced management and operational functioning of the service providers;
- (c) Better-informed government decision makers, with options for new or improved inclusive trade-related policies, strategies and regulatory frameworks that contribute to an enabling environment for micro-, small and medium-sized enterprises to participate in international trade;
- (d) Increased awareness among policymakers, business support organizations and businesses related to trade opportunities and challenges for micro-, small and medium-sized enterprises, market access conditions and sustainable business practices.

13.7 With regard to the external factors, the overall plan for 2025 is based on the following planning assumptions:

- (a) Extrabudgetary resources will remain stable;
- (b) Political, economic and social conditions in programming countries will remain conducive to development interventions;
- (c) International trade and investment conditions do not deteriorate significantly compared with 2024.

- 13.8 With regard to cooperation with other entities at the global, regional, national and local levels, ITC will maintain and develop partnerships with the private sector, civil society, academia and trade and development organizations to support market access and provide supplier programmes for micro-, small and medium-sized enterprises in order to advance the 2030 Agenda. ITC will focus on partnerships that contribute to the operationalization of the African Continental Free Trade Area, to scalable initiatives, especially for the least developed countries, small island developing States and landlocked developing countries, and to the implementation of WTO ministerial discussions and outcomes, including on digital trade, investment facilitation, women and trade, and micro-, small and medium-sized enterprises and trade.
- 13.9 With regard to inter-agency coordination and liaison, ITC will continue to coordinate with United Nations entities, including through membership in the United Nations Sustainable Development Group and United Nations regional and country teams. ITC will collaborate with the United Nations Conference on Trade and Development and WTO, and with other entities and initiatives, such as the United Nations Global Compact, the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women), the United Nations Capital Development Fund, the United Nations Development Programme, the Food and Agriculture Organization of the United Nations and the Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States.
- 13.10 ITC integrates a gender perspective in its operational activities, deliverables and results, as appropriate. ITC will mainstream gender equality and women's empowerment throughout its workstreams, including by catalysing reforms of government procurement frameworks to mainstream a gender perspective; changing how business support organizations and financial institutions serve women; strengthening the voice of women's organizations in the African Continental Free Trade Area; and serving more marginalized groups of women.
- 13.11 In line with the United Nations Disability Inclusion Strategy, ITC will address disability inclusion in its operational planning process and will focus on disability inclusion aspects in its results reporting.

Evaluation activities

- 13.12 The following evaluations completed in 2023 have guided the proposed programme plan for 2025:
- (a) 2023 annual evaluation synthesis report (meta-evaluation of the 2022 evaluation findings);
 - (b) Evaluation of the work of ITC on agricultural value chains;
 - (c) Sustainability review of the ITC programme on trade development strategies;
 - (d) Final evaluation of the United Kingdom Trade Partnerships Programme.
- 13.13 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2025. For example, the 2023 annual evaluation synthesis report found that most ITC interventions have positively contributed to Member States' national development objectives, in turn informing future approaches to maximize impact. Furthermore, partnerships and capacity-building activities have helped to ensure the sustainability of results, with opportunities for improvement in the area of country-level synergies, which will have an increased focus for 2025.
- 13.14 The following evaluations are planned for 2025:
- (a) 2025 annual evaluation synthesis report (meta-evaluation of the 2024 evaluation findings);
 - (b) One corporate-level evaluation;
 - (c) One evaluation of an ITC thematic area;
 - (d) One large project evaluation.

Programme performance in 2023

Countries reached new milestones in their journey towards accession to the multilateral trading system

- 13.15 WTO provides assistance to observers negotiating accession. To complement the work of WTO, ITC has a long-standing record of providing on-request, tailored in-country trade assistance and support to the WTO accession negotiations, including through integration of the perspectives of the private sector, especially micro-, small and medium-sized enterprises, for Member States to advance the multilateral trading system to facilitate economic growth and inclusive, sustainable development. In 2022, ITC and WTO jointly launched the inter-agency Coordination Group on Accessions-related Technical Assistance to facilitate information exchange. In 2023, ITC assisted policymakers in Iraq, Uzbekistan and, most recently, Timor-Leste in their accession process, including by raising the awareness of sector stakeholders about the WTO accession challenges and opportunities.
- 13.16 Progress towards the objective is presented in the performance measure below (see table 13.1).

Table 13.1

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
Iraq and the Sudan undertook preparations for the resumption of their respective WTO accession processes	Iraq submitted WTO accession documentation, such as a memorandum on its foreign trade regime and agriculture domestic support tables	Iraq drafted the initial offer on goods and services to advance the accession process Uzbekistan advanced the WTO accession process through two working party meetings to negotiate trade policy terms and to actively engage in bilateral market access negotiations, resulting in signed bilateral agreements on goods with several WTO members Timor-Leste submitted revised and translated legislation aligned with the WTO requirements

Planned results for 2025

Result 1: partnerships for enhanced trade and more resilient micro-, small and medium-sized enterprises in countries in conflict and post-conflict situations

Programme performance in 2023 and target for 2025

- 13.17 The Centre's work contributed to 1,126 micro-, small and medium-sized enterprises that improved their business operations or transacted trade, and 27 partners that were engaged in hard-to-reach areas in Iraq, which exceeded the planned target of 400 micro-, small and medium-sized enterprises and 23 partners.
- 13.18 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 13.1).

Figure 13.I
Performance measure: number of micro-, small and medium-sized enterprises that improved business or transacted trade, and partnerships for trade in conflict and post-conflict situations (cumulative)

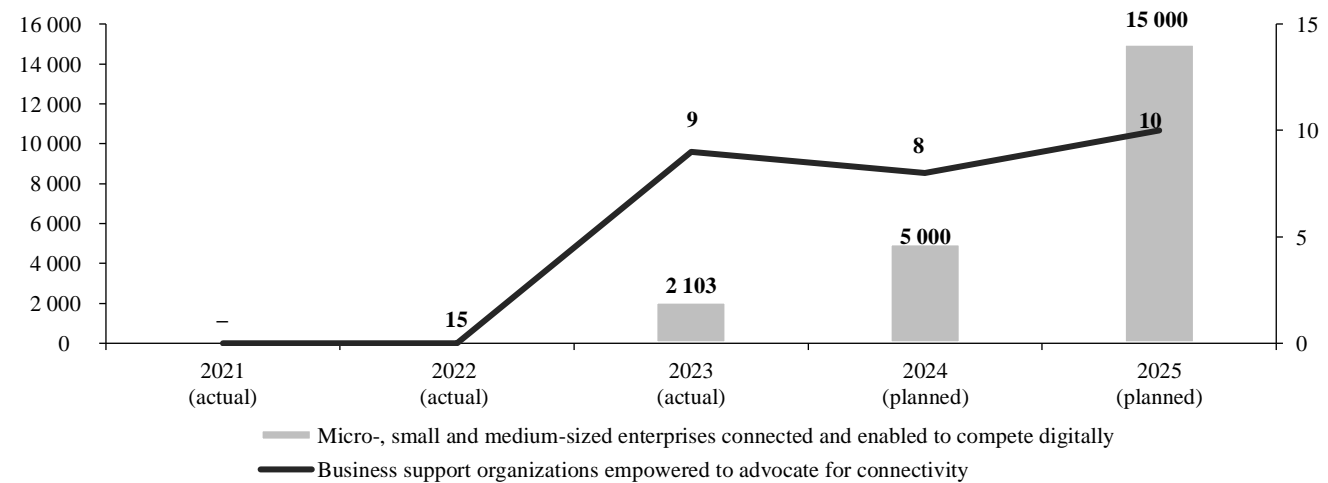

Result 2: strengthened digital trade capacity of micro-, small and medium-sized enterprises

Programme performance in 2023 and target for 2025

- 13.19 The Centre’s work contributed to 2,103 micro-, small and medium-sized enterprises connected and enabled to compete digitally, and 9 business support organizations empowered to advocate for connectivity, which exceeded the planned target of 300 micro-, small and medium-sized enterprises and 2 business support organizations.
- 13.20 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 13.II).

Figure 13.II
Performance measure: number of micro-, small and medium-sized enterprises enabled to digitally compete and number of business support organizations empowered to advocate for connectivity

Result 3: strengthened services provided by local business support organizations to small businesses to capitalize on the African Continental Free Trade Area

Proposed programme plan for 2025

13.21 The African Continental Free Trade Area aims to connect 1.3 billion people across Africa with a combined gross domestic product of \$3.4 trillion. However, most African businesses are still in need of capacity development for accessing the newly available market opportunities. To meet the new demands of small businesses for trade-related information, upskilling and advisory services within the African Continental Free Trade Area, ITC developed the One Trade Africa initiative, which surveyed African business support organizations and identified a significant demand to build or expand their Free Trade Area-related offering, including on market intelligence, training and advisory services for small businesses.

Lessons learned and planned change

13.22 The lesson for ITC was that, to reach a broader base of small businesses, it needed to strengthen the membership-based business support organizations as the key pillars of the African Continental Free Trade Area business ecosystem. In applying the lesson, ITC will help to improve the services of national and regional business support organizations through new awareness-raising activities, improved representation in policymaking, better connectedness and exchange of information with peer institutions through a new platform for business support organizations in the African Continental Free Trade Area, enhanced data dissemination through the African Trade Observatory and a new offering of Free Trade Area-focused export trainings for micro-, small and medium-sized enterprises.

13.23 Expected progress towards the objective is presented in the performance measure below (see figure 13.III).

Figure 13.III
Performance measure: number of business support organizations that improved their African Continental Free Trade Area-related services and number of small businesses served by those business support organizations (cumulative)

Legislative mandates

13.24 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to ITC.

General Assembly resolutions

---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Consultation, advice and advocacy: advice to policymakers, trade support institutions and enterprises to address the international competitiveness challenges for micro-, small and medium-sized enterprises in developing countries and countries with economies in transition, to facilitate public-private dialogue on improvements to the business environment and to ensure that trade supports inclusive and sustainable development; advisory services to disadvantaged groups among micro-, small and medium-sized enterprises, such as women- and youth-owned enterprises, on improving their productive capacity and market access; advisory and advocacy services for policymakers and business support institutions on how to consider the needs of micro-, small and medium-sized enterprises and disadvantaged groups in their service offer; and advocacy that allows for the systematic inclusion of such enterprises and disadvantaged groups in policy and strategy processes.

Databases and substantive digital materials: databases and other online tools to make global trade more transparent and facilitate market access and business and policy decisions. Databases cover trade flows, tariffs and non-tariff measures, export potential, procurement opportunities, rules of origin, private standards and knowledge on sustainable trade and youth and women entrepreneurship. They include the SheTrades database for over 48,000 active women entrepreneurs, “SheTrades Outlook”, the ITC “SME Trade Academy”, the Ye! community and platform for over 40,000 young entrepreneurs, the Benchmarking for Trade platform, the African Trade Observatory, the Quality for Trade platform, ecomConnect and the suite of trade intelligence tools (Market Access Map, Trade Map, Standards Map, Investment Map, Global Trade Helpdesk, Export Potential Map, Procurement Map, Trade Strategy Map, Sustainability Map and ePing).

D. Communication deliverables

Outreach programmes, special events and information materials: special events, including the World Export Development Forum, the Trade for Sustainable Development Forum, the world trade promotion organizations network conference and awards; Micro-, Small and Medium-sized Enterprises Day; the *International Trade Forum* digital magazine; newsletters and campaigns on trade-related subjects for over 18,000 recipients; and information materials and outreach, including on export strategy, trade support networks and capacities, entrepreneurship, skills and export development opportunities, world trade trends, the multilateral trading system, regional integration, technical regulations and standards for export, and trade and the Sustainable Development Goals.

Digital platforms and multimedia content: ITC website and social media accounts, engaging sustainable micro-, small and medium-sized enterprises and women and youth entrepreneurs.

Library services: on-demand services for ITC clients related to trade information.

B. Proposed post and non-post resource requirements for 2025

Overview

13.26 The proposed regular budget resources for 2025 are reflected in table 13.3.

Table 13.3

Overall United Nations grant to ITC: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2023 expenditure ^a	2024 approved	Changes			Total	Percentage	2025 estimate (before recosting)
			Technical adjustments	New/expanded mandates	Other			
Grants and contributions ^b	20 178.8	21 723.5	–	–	–	–	–	21 723.5
Total	20 178.8	21 723.5	–	–	–	–	–	21 723.5

^a At the time of reporting, the expenditures presented in this table and in subsequent tables are not final and may be subject to adjustments that could result in minor differences between the information contained in the present report and the financial statements to be published by 31 March 2024.

^b Represents the United Nations share of the ITC full regular budget disbursed as a grant.

- 13.27 The General Assembly, in section I of its resolution [59/276](#), endorsed the revised administrative arrangements for ITC as set out in the report of the Secretary-General ([A/59/405](#)). In conformity with those administrative arrangements, the regular budget of ITC is denominated in Swiss francs and is funded equally by the United Nations and WTO. The United Nations share of the ITC full regular budget is disbursed as a grant.
- 13.28 The grant proposed for 2025 amounts to \$21,723,500, before recosting, reflecting no change in the resource level compared with the approved appropriation for 2024. The full regular budget requirements of ITC amount to SwF 38,050,400 (before recosting), net of projected miscellaneous income of SwF 200,000. The United Nations grant remains at 50 per cent of the ITC full regular budget, or SwF 19,025,200. After applying an exchange rate of SwF 0.8758 to \$1.00, the United States dollar equivalent is \$21,723,500. The proposed level of resources provides for the full, efficient and effective implementation of mandates.
- 13.29 The General Assembly, in its resolution [77/267](#), decided to lift the trial period on the annual budget cycle and requested the Secretary-General to continue with the submission of the annual programme budget for the United Nations. WTO, however, maintains its biennial budget cycle. The difference in the budget cycles of the two parent organizations has implications on the administrative arrangements relating to the ITC budget. As in previous years, the present budget proposal for 2025 is put forward under an interim arrangement agreed with the WTO secretariat. The budget proposal for 2026 and onwards will be based on the updated administrative arrangements as approved by the General Assembly; in this context, the United Nations Secretariat and the WTO secretariat conducted a joint review of the administrative arrangements, the results of which are presented for the consideration of the General Assembly in annex II.
- 13.30 The total resource requirements for 2025 for ITC, comprising its full regular budget in Swiss francs and projected extrabudgetary resources in Swiss francs, are reflected in tables 13.4 and 13.5 and figure 13.IV. For increased clarity and transparency, details of ITC post resources to be provided for by the proposed grants from the United Nations and WTO are presented in tables 13.6 and 13.7 and annex I, notwithstanding that these posts are not part of the approved or proposed staffing table of the United Nations regular budget.

Part IV International cooperation for development

Figure 13.IV
Distribution of proposed resources for 2025 (before recosting): ITC full regular budget

(Number of posts/thousands of Swiss francs)

Extrabudgetary resources

- 13.31 As reflected in table 13.4 (2), extrabudgetary resources amount to SwF 91,959,000. The extrabudgetary resources would complement regular budget resources and would be used to provide for 20 posts (1 P-5, 3 P-4, 4 P-3, 1 P-2/1 and 11 General Service (Other level)) to perform functions such as human resources management, financial management, monitoring and evaluation, and information and communications technology functions, and similar activities related to the implementation of extrabudgetary projects. In addition, non-post resources, including project personnel, would be used to implement technical cooperation projects, complementing and leveraging the core expertise and global offering of ITC provided through regular budget resources, at the request of Member States. Initiatives aim to accelerate digital trade, environmentally sustainable trade and trade for women and youth and are committed to economically empowering women, youth and people in vulnerable situations, including people in poverty, refugees, internally displaced persons, persons with disabilities and other marginalized groups. ITC continues to negotiate with donors for the funding of large-scale integrated projects.
- 13.32 The extrabudgetary resources under the present section are subject to the oversight of ITC, in accordance with the delegation of authority by the Secretary-General, and their use is guided by the Financial Regulations and Rules of the United Nations.

Other information

- 13.33 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Centre will continue to integrate environmental management practices into its operations. ITC has been taking steps to reduce its greenhouse gas emissions for a number of years, and recent initiatives include a campaign to enhance ITC staff members' understanding on sustainable alternatives to plastic.
- 13.34 Information on the timely submission of documentation and advance booking for air travel is reflected in table 13.8. All ITC personnel receive a monthly newsletter containing compliance rates and the category of non-compliance justifications, as recorded in the enterprise resource planning system, by division, and all managers receive compliance rates on a weekly basis. In view of the reduction in the rate of advance booking for air travel experienced in 2023, the senior management team of ITC commenced a detailed review of the reasons and is planning to take additional steps,

Section 13 **International Trade Centre**

including better utilization of lessons learned during the COVID-19 pandemic, to improve the advance booking for air travel rate.

Table 13.8
Compliance rate
(Percentage)

Annex I

Organizational structure and post distribution for 2025

Note: ITC RB posts refer to ITC full regular budget posts, which are not part of the proposed United Nations regular budget staffing table. XB posts are funded through the special account for programme support costs. The total number of posts for 2025 remains unchanged compared with 2024: 160 funded from the ITC full regular budget and 20 from extrabudgetary sources.

Abbreviations: ASG, Assistant Secretary-General; GS (OL), General Service (Other level); ITC RB, International Trade Centre full regular budget; XB, extrabudgetary.

Annex II

Administrative arrangements for the International Trade Centre

I. Introduction

1. The International Trade Centre (ITC), a joint body of the United Nations Conference on Trade and Development (UNCTAD) and the World Trade Organization (WTO), operates, from an administrative point of view, on the basis of arrangements agreed upon in 1974 between the United Nations and the General Agreement on Tariffs and Trade, which were reviewed in 1998 and 1999. These unique arrangements have proven to be effective from a programme point of view, by helping to ensure coherence and avoidance of duplication in the activities of the three organizations, as confirmed by the review of technical cooperation activities, conducted within the framework of the reform of the United Nations (see [A/58/382](#)), and the inspection of programme management and administrative practices of the International Trade Centre UNCTAD/WTO (see [A/59/229](#)).

2. However, WTO and the United Nations have different budgetary processes, and the revised administrative arrangements, which were approved in 1999, did not completely address the unique situation of ITC within the overall budget procedures of each parent organization. Although there had been a general understanding that the revised administrative arrangements would avoid duplication of processes, this did not materialize fully. Instead, the arrangements resulted in a de facto duplication of some procedures and even in the creation of additional steps. This situation was documented in the report of the Secretary-General on the experience in applying the revised administrative arrangements approved by the General Assembly for the International Trade Centre (UNCTAD/WTO) in its decision 53/411 B ([A/C.5/57/14](#)). To address this situation, the administrative arrangements were updated in 2004 and the General Assembly, in section I of its resolution [59/276](#), endorsed the revised administrative arrangements for ITC as set out in the report of the Secretary-General on administrative arrangements for the International Trade Centre ([A/59/405](#)).

3. Following the 2004 revision to the administrative arrangements, other changes have taken place in the budgeting processes of both the United Nations and WTO, which provide an opportunity to streamline the current procedures while at the same time meeting the exigencies of programmatic decisions on the part of States Members of the United Nations and WTO members. The changes concern, in the case of the United Nations, the move from a biennial to an annual budget cycle and the presentation of the proposed programme plan and programme performance information and the resource requirements as an integrated budget document instead of in separate reports. In the case of WTO, the Committee on Budget, Finance and Administration decided in 2012 to streamline the number of budget documents produced, and decided that the ITC budget proposal would be solely prepared in the United Nations format with a cover note showing the budget in the WTO format. This approach provides the members of the Committee with detailed and timely budget information and avoids reproducing the same information in two budget documents: one in the United Nations format and another one in the WTO format. Other significant developments are the discontinuation of the biennial strategic framework and the simplification of the budget documents.

4. In the course of the review of the proposed programme budget of ITC for 2024 ([A/78/6](#) ([Sect. 13](#))), the General Assembly, in its resolution [78/252](#), endorsed the recommendation contained in paragraph IV.110 of the report of the Advisory Committee on Administrative and Budgetary Questions on the proposed programme budget for 2024 ([A/78/7](#)), in which the Advisory Committee looked forward to updated information regarding the results of a joint review of the administrative arrangements in the context of the proposed programme budget for 2025. The purpose of the present annex is to address that request and to consolidate all the changes that have occurred since the 2004 revision. The present annex, prepared in consultation with the secretariats of WTO and ITC, contains proposals designed to simplify the administrative arrangements while adapting them to recent changes in the budgetary processes of the United Nations, and aims to consolidate information on the administrative arrangements to facilitate the review by the governing bodies of both parent organizations and their application by the administrations of the three organizations concerned. The present annex is being submitted simultaneously to WTO.

II. Technical foundation for the existing administrative arrangements

5. The foundation on which the current administrative arrangements are based consists of the following:

- (a) ITC is subject to the Financial Regulations and Rules of the United Nations and the Staff Regulations and Rules of the United Nations;
- (b) The full regular budget of ITC is calculated in Swiss francs, and the ITC secretariat presents an annual budget to the General Assembly of the United Nations and a biennial budget to WTO. The United Nations share of the ITC full regular budget is disbursed as a grant. The proposed biennial budget to WTO will be based on twice the amount of the proposed annual budget to the General Assembly. A timeline of the review process for the full regular budget of ITC is presented in the schedule attached to the present annex;
- (c) ITC is subject to the oversight system of the United Nations, including the Office of Internal Oversight Services and the Board of Auditors;
- (d) The accounts of ITC, submitted in United States dollars, are reviewed and audited by the Board of Auditors;
- (e) Reports of the United Nations oversight bodies and the financial statements of ITC, which have been certified by the Controller of the United Nations, are provided to the General Assembly and the General Council of WTO;
- (f) The regular budget of ITC is financed in equal parts by the United Nations and WTO;
- (g) Budgetary information is provided simultaneously to the governing bodies of both parent organizations;
- (h) The budget of ITC is adjusted to reflect the impact of inflation and exchange rate variations in line with the recosting methodology of the United Nations regular budget as approved by the General Assembly. Results of the recosting exercise are presented to the General Council of WTO for consideration;
- (i) The extrabudgetary resources of ITC are subject to the oversight of ITC, in accordance with the delegation of authority by the Secretary-General, and their use is guided by the Financial Regulations and Rules of the United Nations and related administrative instructions.

6. The operations of ITC have been fully adapted to such conditions and operate well to the satisfaction of all parties concerned.

III. Presentation of budget documents

7. In line with General Assembly resolution [77/267](#), the proposed programme budget document consists of three parts: (a) part I: the plan outline, which endorses the long-term priorities and the objectives of the Organization; (b) part II: the programme plan for programmes and subprogrammes and programme performance information; and (c) part III: the post and non-post resource requirements for the programmes and subprogrammes. Parts I and II are submitted through the Committee for Programme and Coordination and part III is submitted through the Advisory Committee on Administrative and Budgetary Questions for the consideration of the General Assembly.

8. The ITC programme of work is reviewed annually by the Joint Advisory Group, the main intergovernmental advisory forum of ITC, which is open to members of UNCTAD and WTO. The WTO General Council and the UNCTAD Trade and Development Board review the report and recommendations of the Joint Advisory Group annually.

9. Taking into account the programmatic direction provided by the parent organizations and the Joint Advisory Group, ITC would continue to prepare and submit its proposed programme plan and programme performance information for the forthcoming budget year in the United Nations format.

10. The ITC full regular budget proposal in the United Nations format, containing the proposed programme plan and programme performance information, and the proposed resource requirements, with the information on the ITC full regular budget including post and non-post requirements, as an integrated budget document and with a cover note showing the budget in the WTO format, is submitted to the WTO General Council through the Committee on Budget, Finance and Administration. This approach provides WTO with detailed and timely budget information and avoids reproducing the same information in two budget documents: one in the United Nations format and another one in the WTO format.

IV. Conclusion and proposal

11. In the light of the above, the Secretary-General proposes the following arrangements:

(a) The arrangements that the full regular budget of ITC is financed in equal parts by the United Nations and WTO, that the United Nations regulations and rules and oversight mechanisms apply to ITC, that the ITC budget is calculated in Swiss francs, that both parent organizations are provided with the same budgetary information at the same time, and that oversight and financial reports are provided to WTO, are reconfirmed;

(b) The ITC proposed programme plan and programme performance information, and the proposed resource requirements, with the information on the ITC full regular budget including post and non-post requirements, as an integrated budget document, continue to be submitted for the consideration of the General Assembly, as follows:

(i) The part consisting of the programme plan and programme performance information continue to be submitted through the Committee for Programme and Coordination;

(ii) The part consisting of the proposed resource requirements, with the information on the ITC full regular budget including post and non-post requirements, continue to be submitted through the Advisory Committee on Administrative and Budgetary Questions;

(c) The ITC full regular budget proposal in the United Nations format, containing the proposed programme plan and programme performance information, and the proposed resource requirements, with the information on the ITC full regular budget including post and non-post requirements, as an integrated budget document and with a cover note showing the budget in the WTO format, is submitted to the WTO General Council through the Committee on Budget, Finance and Administration;

(d) The ITC full regular biennial budget proposal for the WTO biennium continues to be based on twice the annual amount proposed to the General Assembly of the United Nations, and updates relating to the second year of the biennium will be submitted to the WTO General Council for a midterm review of the ITC full regular biennial budget.

Schedule

Detailed timeline of the previously approved and proposed simplified arrangements for the review of the proposed programme budget of the International Trade Centre by the United Nations and the World Trade Organization

		<i>Previous timeline as approved in General Assembly resolution 59/276</i>	<i>Proposed timeline based on current arrangements</i>
Year 1 (e.g. 2023)	February		Submission of the ITC annual proposed programme plan and programme performance information to the General Assembly
	March		Submission of the ITC annual proposed programme budget to the General Assembly
	Spring	Submission of the strategic framework to the ITC Joint Advisory Group	
	April	Review by the Joint Advisory Group of the strategic framework	Review by the Joint Advisory Group of ITC activities and programme of work
	May		Review by the Committee for Programme and Coordination of the ITC annual proposed programme plan and programme performance information
	June	Review by the Committee for Programme and Coordination of the ITC strategic framework with Joint Advisory Group comments	Review by the Advisory Committee on Administrative and Budgetary Questions of the ITC annual proposed programme budget
		Review by the WTO Committee on Trade and Development of the Joint Advisory Group report, including comments on the strategic framework	Review by the UNCTAD Trade and Development Board of the Joint Advisory Group report on ITC activities and programme of work
		Review by the UNCTAD Trade and Development Board of the Joint Advisory Group report, including comments on the strategic framework	Review by the WTO Committee on Trade and Development and the WTO General Council of the Joint Advisory Group report on ITC activities and programme of work
		Review by the WTO General Council of the Committee on Trade and Development report	
	July		Submission of the ITC proposed programme budget for the biennium to WTO

Section 13 International Trade Centre

		<i>Previous timeline as approved in General Assembly resolution 59/276</i>	<i>Proposed timeline based on current arrangements</i>
	August		Review by the WTO Committee on Budget, Finance and Administration of the ITC proposed programme budget for the biennium
	September		
	October		Review by the Fifth Committee of the General Assembly of the ITC annual proposed programme budget
	November	Review by the General Assembly of the report of the Committee for Programme and Coordination	
	December		WTO General Council decision on the ITC proposed programme budget for the biennium General Assembly decision on the ITC annual proposed programme budget
Year 2 (e.g. 2024)	January		Submission of the ITC annual proposed programme plan and programme performance information to the General Assembly
	February	Submission of simplified budget document taking into account programmatic direction provided by the Joint Advisory Group, the General Assembly and the WTO General Council	Submission of the ITC annual proposed programme budget to the General Assembly
	April		Review by the Joint Advisory Group of ITC activities and programme of work
	May	Review of simplified budget document by the Advisory Committee on Administrative and Budgetary Questions WTO Committee on Budget, Finance and Administration takes note of United Nations simplified budget document and transmittal note from ITC	Review by the Committee for Programme and Coordination of the ITC annual proposed programme plan and programme performance information
	June	Review of report of the Advisory Committee on Administrative and Budgetary Questions by the General Assembly WTO General Council takes note of the report of the Committee on Budget, Finance and Administration	Review by the Advisory Committee on Administrative and Budgetary Questions of the ITC annual proposed programme budget Review by UNCTAD Trade and Development Board of Joint Advisory Group report on ITC activities and programme of work Review by the Committee on Trade and Development and the WTO General Council of the Joint Advisory Group report on ITC activities and programme of work

Part IV International cooperation for development

	<i>Previous timeline as approved in General Assembly resolution 59/276</i>	<i>Proposed timeline based on current arrangements</i>
September	Submission by ITC to the General Assembly and the WTO General Council of its proposed biennial budget for the following biennium	Midterm review of the ITC biennial budget by the WTO Committee on Budget, Finance and Administration and confirmation, including revised estimates, of second year budget for the biennium
October	Review of the ITC proposed budget by the Advisory Committee on Administrative and Budgetary Questions Review of the ITC proposed budget by the WTO Committee on Budget, Finance and Administration	Review by the Fifth Committee of the General Assembly of the ITC annual proposed programme budget WTO General Council decision on the changes to the ITC proposed budget for second year of the biennium
November–December	Review of the ITC proposed budget and the report of the Advisory Committee on Administrative and Budgetary Questions by the General Assembly and approval of the budget for the following biennium Review of recommendations of the WTO Committee on Budget, Finance and Administration by the WTO General Council for the following biennium	General Assembly decision on the ITC annual programme budget

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 14.1 The United Nations Environment Programme (UNEP) is responsible for leading and coordinating action on environmental matters within the United Nations system. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolution [2997 \(XXVII\)](#), and by the Governing Council of UNEP in its decision 19/1. That decision set out the Nairobi Declaration on the Role and Mandate of the United Nations Environment Programme, which the Assembly subsequently endorsed in 1997 in the annex to its resolution [S-19/2](#) and further reaffirmed in its resolutions [53/242](#), in 1999, and [66/288](#) and [67/213](#), in 2012. Member States recognize the importance of the environmental dimension to the successful implementation of the 2030 Agenda for Sustainable Development. Within its mandate, UNEP will support Member States by providing strategic direction towards the achievement of environmental sustainability, while contributing to a balanced integration of the economic, social and environmental dimensions of sustainable development. Acknowledging the integrated nature of the challenges that countries face, UNEP will play a critical role in catalysing the fulfilment of the commitments and action that drive transformational change for sustainable development.

Strategy and external factors for 2025

- 14.2 The medium-term strategy for the period 2022–2025 contains a vision of UNEP as supporting Member States in developing and implementing policies, strategies and programmes to strengthen the environmental dimension of the 2030 Agenda, but with a forward-looking 2050 perspective on planetary sustainability (see United Nations Environment Assembly decision 5/2). The strategy depends on recognition of the existence of the crises of climate change, biodiversity and nature loss, and pollution and waste, and outlines a set of transformative shifts to target the drivers of those crises. The strategy also maps out the actions needed to reshape consumption and production patterns towards more sustainable and equitable models that contribute to the UNEP vision for planetary sustainability, human health and well-being. The aim of the programme for 2025 is to focus on how UNEP can meet current and future expectations, while continuing to deliver on the promises made to Member States in 2012 through the United Nations Conference on Sustainable Development and its outcome document, entitled “The future we want” (General Assembly resolution [66/288](#)). It demonstrates the role of UNEP in supporting countries’ efforts to build their capacity to deliver on their environmental goals and commitments under international agreements.
- 14.3 Through the strategy, UNEP will address the crises of climate change, biodiversity and nature loss, and pollution and waste through transformative multi-stakeholder action that targets the root causes and drivers of the crises. The aims of the strategy are to enable the Programme to make a deeper and broader impact that can underpin positive social and economic outcomes, while reducing vulnerabilities in support of sustainable development. UNEP will continue to advocate for science to remain at the centre of all decision-making processes, including on emerging issues, and for improved global environmental governance, aligned closely with the multilateral environmental agreements for which it provides the secretariats and the direction set by the 2030 Agenda.
- 14.4 With regard to cooperation with other entities at the global, regional, subregional, national and local levels, UNEP will continue to raise ambitions and promote leadership through advocacy and a normative and standard-setting approach. It will support Member States through transformative strategic partnerships that deliver sustainable solutions, integrating health, education, poverty reduction, and economic and social well-being. Its partnerships with the secretariats of multilateral environmental agreements will remain pivotal to securing stronger synergies and enhancing the

impact of the work of the relevant parties. UNEP will encourage non-governmental stakeholders, including the private sector and the finance community, to increase investment in new and renewable sources of energy and improve environmental sustainability. Within the context of those partnerships, action will be aimed at making a broader impact in support of sustainable development, while strengthening the ability of countries to rapidly respond to the environmental impacts of disasters and armed conflicts.

- 14.5 With regard to inter-agency coordination and liaison, UNEP has the overall responsibility for leading and coordinating the response on environmental issues within the United Nations system. Through the United Nations Environment Management Group, UNEP will catalyse international action to enhance the coherence of environmental sustainability strategies and provide more visibility on partnership initiatives. UNEP will leverage the United Nations development system reform to continue to address the crises of climate change, biodiversity and nature loss, and pollution and waste, and enhance its guiding role, raise ambitions and accelerate and scale up progress during the decade of action to deliver the Sustainable Development Goals. It will continue to focus on ensuring that its work is reflected and embedded in the new generation of United Nations country teams and the reinvigorated resident coordinator system through engagement with the Development Coordination Office and to leverage its work and expertise at the regional, subregional and country levels. UNEP will also integrate the priorities of the multilateral environmental agreements into global follow-up and review processes, in particular the 2030 Agenda.
- 14.6 With regard to the external factors, the overall plan for 2025 is based on the following planning assumptions:
- (a) Member States and partners remain committed to the development and implementation of science-based environmental policies;
 - (b) The continued availability of extrabudgetary funding for the implementation of UNEP planned activities.
- 14.7 UNEP integrates a gender perspective into its operational activities, deliverables and results, as appropriate. It will work to fully implement Environment Assembly resolution 4/17 on promoting gender equality and the human rights and empowerment of women and girls in environmental governance and will continue to operationalize it in programme and project design and delivery. UNEP will support Member States in their achievement of Sustainable Development Goal 5 in the context of the environment, calling for women's full and effective participation and equal opportunities for leadership at all levels of environmental decision-making.
- 14.8 In line with the United Nations Disability Inclusion Strategy, UNEP will be attentive and responsive to the inclusion of persons with disabilities, including by raising awareness of their needs and concerns in its programme and project design and implementation and tailoring its projects to fit the conditions and needs of local communities. For example, addressing the concerns and needs of persons with disabilities will be emphasized when supporting climate change-related early warning systems or in projects that deal with environmental disasters and armed conflicts. UNEP will continue to reinforce the promotion and protection of the rights of persons with disabilities through its safeguard risk screening and mitigation procedure.

Legislative mandates

- 14.9 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

2997 (XXVII)	Institutional and financial arrangements for international environmental cooperation	75/322	New Partnership for Africa's Development: progress in implementation and international support
47/190	Report of the United Nations Conference on Environment and Development	76/128	International cooperation on humanitarian assistance in the field of natural disasters, from relief to development
S-19/2	Programme for the Further Implementation of Agenda 21	76/129	International Year of Sustainable Mountain Development, 2022
53/242	Report of the Secretary-General on environment and human settlements	76/201	Sustainable tourism and sustainable development in Central America
65/2	Outcome document of the High-level Review Meeting on the Implementation of the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States	76/224	Towards global partnerships: a principle-based approach to enhanced cooperation between the United Nations and all relevant partners
66/288	The future we want	76/298	Implementation of the recommendations contained in the report of the Secretary-General on the causes of conflict and the promotion of durable peace and sustainable development in Africa
67/213	Report of the Governing Council of the United Nations Environment Programme on its twelfth special session and the implementation of section IV.C, entitled "Environmental pillar in the context of sustainable development", of the outcome document of the United Nations Conference on Sustainable Development	77/158	International Year of Glaciers' Preservation, 2025
67/251	Change of the designation of the Governing Council of the United Nations Environment Programme	77/159	Enhancing the role of parliaments in accelerating the achievement of the Sustainable Development Goals
68/99	Strengthening of international cooperation and coordination of efforts to study, mitigate and minimize the consequences of the Chernobyl disaster	77/160	Entrepreneurship for sustainable development
68/215	Report of the Governing Council of the United Nations Environment Programme on its first universal session and the implementation of section IV.C, entitled "Environmental pillar in the context of sustainable development", of the outcome document of the United Nations Conference on Sustainable Development	77/161	Promoting zero-waste initiatives to advance the 2030 Agenda for Sustainable Development
70/1	Transforming our world: the 2030 Agenda for Sustainable Development	77/168	Report of the United Nations Environment Assembly of the United Nations Environment Programme
73/238	The role of the international community in the prevention of the radiation threat in Central Asia	78/25	Observance of environmental norms in the drafting and implementation of agreements on disarmament and arms control
74/216	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development	78/71	Effects of atomic radiation
75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system	78/119	Strengthening of the coordination of emergency humanitarian assistance of the United Nations
75/271	Nature knows no borders: transboundary cooperation – a key factor for biodiversity conservation, restoration and sustainable use	78/128	2025 United Nations Conference to Support the Implementation of Sustainable Development Goal 14: Conserve and sustainably use the oceans, seas and marine resources for sustainable development
		78/132	Information and communications technologies for sustainable development
		78/134	International trade and development
		78/136	International financial system and development
		78/137	External debt sustainability and development
		78/140	Promotion of international cooperation to combat illicit financial flows and strengthen good practices on assets return to foster sustainable development

Part IV International cooperation for development

78/141	Promoting investments for sustainable development	78/160	Science, technology and innovation for sustainable development
78/143	Oil slick on Lebanese shores	78/161	Culture and sustainable development
78/146	Cooperative measures to assess and increase awareness of environmental effects related to waste originating from chemical munitions dumped at sea	78/163	Follow-up to the second United Nations Conference on Landlocked Developing Countries
78/151	Promoting sustainable consumption and production patterns for the implementation of the 2030 Agenda for Sustainable Development, building on Agenda 21	78/179	Policies and programmes involving youth
78/152	Disaster risk reduction	78/198	The right to food
78/154	Implementation of the United Nations Convention to Combat Desertification in Those Countries Experiencing Serious Drought and/or Desertification, Particularly in Africa	78/231	Follow-up to and implementation of the outcomes of the International Conferences on Financing for Development
78/158	Combating sand and dust storms	78/232	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States
78/159	Strengthening cooperation for integrated coastal zone management for achieving sustainable development		

Governing Council of the United Nations Environment Programme decisions

SS.VIII/1, sect. II, 25/1, sect. II	Implementation of decision SS.VII/1 on international environmental governance: strengthening the scientific base of the United Nations Environment Programme	23/11	Gender equality in the field of the environment
		24/11	Intensified environmental education for achieving sustainable development
SS.XI/2	United Nations Environment Programme support for Haiti: strengthening environmental response in Haiti	26/15	Strengthening international cooperation on the environmental aspects of emergency response and preparedness
19/1	Nairobi Declaration on the Role and Mandate of the United Nations Environment Programme	27/2	Implementation of paragraph 88 of the outcome document of the United Nations Conference on Sustainable Development
23/7	Strengthening environmental emergency response and developing disaster prevention, preparedness, mitigation and early-warning systems in the aftermath of the Indian Ocean tsunami disaster	27/11	State of the environment and contribution of the United Nations Environment Programme to meeting substantive environmental challenges

United Nations Environment Assembly resolutions and decisions

1/1	Ministerial outcome document of the first session of the United Nations Environment Assembly of the United Nations Environment Programme	1/13	Implementation of Principle 10 of the Rio Declaration on Environment and Development
1/4	Science-policy interface	1/16	Management of trust funds and earmarked contributions
1/8	Ecosystems-based adaptation	1/17	Amendments to the Instrument for the Establishment of the Restructured Global Environment Facility
1/10	Different visions, approaches, models and tools to achieve environmental sustainability in the context of sustainable development and poverty eradication	2/2	Role and functions of the regional forums of ministers of the environment and environment authorities
1/11	Coordination across the United Nations system in the field of the environment, including the Environment Management Group	2/3	Investing in human capacity for sustainable development through environmental education and training
1/12	Relationship between the United Nations Environment Programme and multilateral environmental agreements	2/4	Role, functions and modalities for United Nations Environment Programme implementation of the SAMOA Pathway as a means of facilitating achievement of the Sustainable Development Goals

Section 14 Environment

2/5	Delivering on the 2030 Agenda for Sustainable Development	4/3	Sustainable mobility
2/6	Supporting the Paris Agreement	4/17	Promote gender equality, and the human rights and empowerment of women and girls in environmental governance
2/13	Sustainable management of natural capital for sustainable development and poverty eradication	4/18	Poverty-environment nexus
2/15	Protection of the environment in areas affected by armed conflict	4/20	Fifth Programme for the Development and Periodic Review of Environmental Law (Montevideo V): delivering for people and the planet
2/16	Mainstreaming of biodiversity for well-being		
2/17	Enhancing the work of the United Nations Environment Programme in facilitating cooperation, collaboration and synergies among biodiversity-related conventions	4/21	Implementation plan “Towards a pollution-free planet”
		4/22	Implementation and follow up of United Nations Environment Assembly resolutions
2/18	Relationship between the United Nations Environment Programme and the multilateral environmental agreements for which it provides the secretariat	4/23	Keeping the world environment under review: enhancing the United Nations Environment Programme science-policy interface and endorsement of the Global Environment Outlook
2/19	Midterm review of the fourth Programme for the Development and Periodic Review of Environmental Law (Montevideo Programme IV)	5/1	Animal welfare – environment – sustainable development nexus
		5/2	Sustainable nitrogen management
2/20	Proposed medium-term strategy for 2018–2021 and programme of work and budget for 2018–2019	5/3	Future of the Global Environment Outlook
		5/4	Sustainable lake management
2/24	Combating desertification, land degradation and drought and promoting sustainable pastoralism and rangelands	5/5	Nature-based solutions for supporting sustainable development
		5/6	Biodiversity and health
2/25	Application of Principle 10 of the Rio Declaration on Environment and Development in the Latin America and Caribbean Region	5/7	Sound management of chemicals and waste
		5/8	Science-policy panel to contribute further to the sound management of chemicals and waste and to prevent pollution
3/1	Pollution mitigation and control in areas affected by armed conflict or terrorism	5/9	Sustainable and resilient infrastructure
3/2	Pollution mitigation by mainstreaming biodiversity into key sectors	5/10	The environmental dimension of a sustainable, resilient and inclusive post-COVID-19 recovery
3/3	Contributions of the United Nations Environment Assembly to the high-level political forum on sustainable development	5/11	Enhancing circular economy as a contribution to achieving sustainable consumption and production
3/4	Environment and health	5/12	Environmental aspects of minerals and metals management
3/5	Investing in innovative environmental solutions for accelerating the implementation of the Sustainable Development Goals	5/13	Due regard to the principle of equitable geographical distribution, in accordance with paragraph 3 of Article 101 of the Charter of the United Nations
3/6	Managing soil pollution to achieve sustainable development		
3/8	Preventing and reducing air pollution to improve air quality globally	5/14	End plastic pollution: towards an international legally binding instrument
3/9	Eliminating exposure to lead paint and promoting environmentally sound management of waste lead-acid batteries	6/1	Circularity of a resilient and low-carbon sugar cane agro-industry
		6/2	Amendments to the Instrument for the Establishment of the Restructured Global Environment Facility
3/10	Addressing water pollution to protect and restore water-related ecosystems		
3/11	Implementation of paragraph 88 (a)–(h) of the outcome document of the United Nations Conference on Sustainable Development, entitled “The future we want”	6/3	Enhancing the role and viability of regional forums of environment ministers and United Nations Environment Programme regional offices in achieving multilateral cooperation in tackling environmental challenges

Part IV International cooperation for development

6/4	Promoting synergies, cooperation or collaboration for national implementation of multilateral environmental agreements and other relevant environmental instruments	6/11 6/12 6/13	Highly hazardous pesticides Environmental assistance and recovery in areas affected by armed conflict Effective and inclusive solutions for strengthening water policies to achieve sustainable development in the context of climate change, biodiversity loss and pollution
6/5	Environmental aspects of minerals and metals		
6/6	Fostering national action to address global environmental challenges through increased cooperation between the United Nations Environment Assembly, the United Nations Environment Programme and multilateral environmental agreements	6/14	Strengthening international efforts to combat desertification and land degradation, restore degraded land, promote land conservation and sustainable land management, contribute to land degradation neutrality and enhance drought resilience
6/7	Combating sand and dust storms		
6/8	Promoting sustainable lifestyles	6/15	Strengthening ocean efforts to tackle climate change, marine biodiversity loss and pollution
6/9	Sound management of chemicals and waste		
6/10	Promoting regional cooperation on air pollution to improve air quality globally		

**Subprogramme 1
Climate action***General Assembly resolutions*

69/225	Promotion of new and renewable sources of energy	78/153	Protection of global climate for present and future generations of humankind
73/230	Effective global response to address the impacts of the El Niño phenomenon	78/157	Ensuring access to affordable, reliable, sustainable and modern energy for all

Deliverables

14.10 Table 14.1 lists all cross-cutting deliverables of the programme.

Table 14.1
Cross-cutting deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Conference and secretariat services for meetings (number of three-hour meetings)	3	3	4	3
Meetings of:				
1. United Nations Environment Assembly	–	–	1	–
2. Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
3. Committee for Programme and Coordination	1	1	1	1
4. Fifth Committee	1	1	1	1
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	2	2	2
5. To assess environmental risks from disasters and armed conflicts	1	1	1	1
6. On institutional and legal frameworks to improve national and local preparedness to mitigate environmental risks from disasters and armed conflicts	1	1	1	1
Publications (number of publications)	3	3	2	3
7. On disaster risk reduction, preparedness assessments and road maps	2	2	1	2
8. UNEP annual report	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: advice to humanitarian and military actors on environmental footprint reduction; advice to 31 Member States, upon request, on the monitoring and implementation of strategies to enhance environmental risk reduction, environmental emergency response and environmental recovery and to make progress towards the achievement of the Sustainable Development Goals.				

Evaluation activities

- 14.11 The following evaluations completed in 2023 have guided the proposed programme plan for 2025:
- (a) Terminal evaluation of the UNEP inquiry into the design of a sustainable financial system;
 - (b) Evaluation of the implementation of the Partnership for Action on Green Economy inter-agency programme “Operational strategy 2016–2020”;
 - (c) Terminal evaluation of the UNEP Environment Management Group project (2018–2022). A further 18 evaluations of completed projects were also completed.
- 14.12 The results of the evaluations referenced above have been taken into account for the proposed programme plan for 2025. For example, findings and lessons learned concerning economic and financial drivers and programme sustainability have shaped the programmatic focus of UNEP on enhancing circular economy in such sectors and industries as energy, cooling, building and transport for climate mitigation; food and agriculture for nature-related gains; and the industries of mining, textiles, pharmaceuticals and plastics for pollution reduction. Moreover, the finance and economic transformations subprogramme will target the private sector, the finance community and youth as future development dealmakers and decision makers scaling up interventions through: (a) the UNEP Finance Initiative, which includes networks of banks and insurance companies; (b) the Partnership for Action on Green Economy, with specialization in economic and trade policies; and (c) the global network of sustainable consumption and production practitioners under the One Planet network.
- 14.13 The following evaluations are planned for 2025:
- (a) Subprogramme evaluation of climate action;

- (b) Subprogramme evaluation of chemicals and pollution action;
- (c) Evaluations of 20 projects nearing completion.

Programme of work

Subprogramme 1 Climate action

Objective

- 14.14 The objective, to which this subprogramme contributes, is to advance the transition of countries to low-emission economic development and increase their adaptation and resilience to climate change.

Strategy

- 14.15 To contribute to the objective, the subprogramme will:
- (a) Support Member States in the development of policies and standards to promote low-emission development plans and investment in clean energy and improve the global rate of energy efficiency;
 - (b) Support Member States in implementing gender-sensitive policies that achieve quantifiable social and environmental benefits, including through the reduction of greenhouse gas emissions from deforestation and forest degradation;
 - (c) Build the technical capacity of Member States to integrate ecosystem-based management into their national adaptation plans, put in place institutional arrangements to coordinate such plans and gain access to climate change adaptation finance for implementing such plans;
 - (d) Collaborate with the private sector in constructive and results-oriented partnerships that leverage climate finance and scale up the ambitions and impacts of climate action globally;
 - (e) Advocate and provide evidence and technical support for the use of climate strategies, such as a fiscal stimulus, in the context of sustainable recovery;
 - (f) Support Member States in making progress towards the achievement of Sustainable Development Goals 1, 5, 7, 11, 15 and 17.
- 14.16 The above-mentioned work is expected to result in:
- (a) Member States lowering their emissions of greenhouse gases and other pollutants by reducing energy intensity and demand in sectors such as lighting, appliances, equipment, buildings and transport;
 - (b) Member States increasingly capitalizing on investment opportunities that reduce greenhouse emissions from deforestation and forest degradation with adequate social and environmental safeguards;
 - (c) Member States increasingly capable of better institutionalizing, implementing and monitoring their national adaptation plans alongside efforts to deliver sustainable development;
 - (d) Member States making use of innovative models to enhance financing for sustainable investment and the dissemination of low-emission technologies that help to significantly reduce greenhouse gas emissions, promote access to energy and enhance productive energy use;
 - (e) Increased low-emission investment as a result of countries using climate strategies to guide investments.

Programme performance in 2023

Strengthened international ambition for sustainable cooling as an effective strategy to reduce greenhouse gas emissions and adapt to climate change

- 14.17 Greenhouse gas emissions in the cooling sector are predicted to more than double by 2050; therefore, taking measures to reduce the power consumption of cooling equipment could lead to a 60 per cent reduction of predicted 2050 total sectoral emissions.¹ Furthermore, with an estimated 2.5 billion people having no access to climate-friendly cooling solutions, over 1 billion people are at high risk of extreme heat.² The subprogramme, by leveraging the convening power of UNEP, providing scientific evidence and leading advocacy efforts, supported the adoption of the Global Cooling Pledge, which enables governments and non-State stakeholders to act on sustainable cooling in five areas: nature-based solutions; super-efficient appliances; food and vaccine cold chains; district cooling; and national cooling action plans.
- 14.18 Progress towards the objective is presented in the performance measure below (see table 14.2).

Table 14.2
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	–	68 countries signed on to the Global Cooling Pledge, which was launched at the twenty-eighth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, committing to reduction goals for cooling-related emissions

Planned results for 2025

Result 1: country reporting under the enhanced transparency framework of the Paris Agreement

Programme performance in 2023 and target for 2025

- 14.19 The subprogramme’s work contributed to 55 additional countries reporting under the enhanced transparency framework of the Paris Agreement, for a cumulative total of 146 countries, which exceeded the planned target of 116 countries.
- 14.20 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 14.I).

¹ See <https://www.unep.org/news-and-stories/press-release/key-measures-could-slash-predicted-2050-emissions-cooling-sector>.

² See <https://www.unep.org/news-and-stories/press-release/partners-announce-new-ambition-sustainable-cooling-cop28>.

Figure 14.I
Performance measure: number of countries reporting under the enhanced transparency framework of the Paris Agreement (cumulative)

Result 2: enhanced national early warning systems

Programme performance in 2023 and target for 2025

- 14.21 The subprogramme’s work contributed to an additional 13 countries establishing early warning systems, for a total of 25 countries, which exceeded the planned target of 18 countries.
- 14.22 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 14.II).

Figure 14.II
Performance measure: number of countries that have established early warning systems (cumulative)

Result 3: Member States develop national methane road maps and action plans

Proposed programme plan for 2025

- 14.23 UNEP supports governments as well as the private sector across the globe in leveraging credible data to target strategic mitigation actions and support science-based policy options to reduce methane emissions through the International Methane Emissions Observatory. In addition, the Climate and Clean Air Coalition to Reduce Short-lived Climate Pollutants offers technical advice to countries to

develop their national methane road maps and action plans. The subprogramme also supports these efforts through the synthesis and sharing of scientific data and provision of policy guidance.

Lessons learned and planned change

14.24 The lesson for the subprogramme was that there are additional opportunities to enhance the visibility of the importance of reducing methane emissions to help to address climate change. In applying the lesson, the subprogramme will leverage its convening power to create more public sector and private sector partnerships and will explicitly incorporate methane reduction into its strategy and accompanying narrative. In addition, it will work closely with the UNEP-convened Climate and Clean Air Coalition and the International Methane Emissions Observatory to foster collaboration on data transparency, foster science-policy uptake, and scale the action needed to address the methane emissions problem.

14.25 Expected progress towards the objective is presented in the performance measure below (see figure 14.III).

Figure 14.III

Performance measure: number of countries that have developed national methane road maps and action plans (cumulative)

Deliverables

14.26 Table 14.3 lists all deliverables of the subprogramme.

Table 14.3

Subprogramme 1: deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	3	7	3	3
1. On mitigation and adaptation technologies through the Climate Technology Centre and Network	3	7	3	3
Publications (number of publications)	6	9	6	6
2. On renewable energy, energy efficiency and the energy sector	3	1	3	3
3. On adaptation and resilience (assessments and tools)	3	8	3	3

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Consultation, advice and advocacy: advice to 20 countries on climate matters, including South-South cooperation, ecosystem-based adaptation, climate financing, the United Nations Framework Convention on Climate Change, short-lived climate pollutants, low-emission development, sustainable energy and energy efficiency, and the Warsaw Framework for REDD-plus.

D. Communication deliverables

Outreach programmes, special events and information materials: side events and goodwill ambassador outreach on climate-related matters, reaching an audience in excess of 1 million.

Digital platforms and multimedia platforms: content on social media platforms and web pages.

Subprogramme 2 Digital transformations in supporting environmental action

Objective

- 14.27 The objective, to which this subprogramme contributes, is to advance the use of data and analytics on environmental issues to allow more effective policies, decisions, actions and investments by Member States and the private sector towards the achievement of the targets of the Sustainable Development Goals related to climate, nature and pollution, and of relevant multilateral environmental agreements.

Strategy

- 14.28 To contribute to the objective, the subprogramme will support and scale up access to environmental information through an effectively governed and inclusive data architecture and digital ecosystem for the planet. Specifically, the subprogramme will:
- (a) Through its enabling role, digitize scientific knowledge and democratize its availability across the thematic subprogrammes of UNEP, using digital tools to enable, accelerate and amplify impact, as well as to bring more transparency to knowledge about the state of the planet;
 - (b) Initiate partnerships with public and private sector actors to harness data, digital technologies and computational sustainability, in order to help Member States to amplify and accelerate deeper structural transformations, with a view to driving markets, value chains, consumer behaviours and decision-making towards the achievement of environmental sustainability outcomes;
 - (c) Use integrated data sets and analysis, based on digital norms and governance frameworks, to produce actionable, real-time and predictive insights, enabling the automatic monitoring of global, national and local progress towards key targets of the Sustainable Development Goals related to climate, biodiversity and pollution and relevant internationally agreed frameworks, including multilateral environmental agreements;
 - (d) Work with Member States, the private sector and civil society to improve digital literacy and use digital platforms to enable further public participation in decision-making, open innovation and citizen science, helping to make progress towards achievement of the targets under Sustainable Development Goals 9, 16 and 17;
 - (e) Provide normative support, upon request, on closing the digital divide through the use of information and communications technologies procured in accordance with sustainability standards.

- 14.29 The above-mentioned work is expected to result in:
- (a) Increased capacity of Member States to monitor the world environmental situation through the adoption of a global data architecture, governance frameworks, safeguards and standards for environmental and climate data and related digital public goods;
 - (b) Improved ability of Member States to predict and address future environment-related risks through the development of big data platforms that can measure the increasing convergence of environmental and climate stress and disaster vulnerability over space and time and to provide predictive analytics and an early warning system;
 - (c) Accelerated adoption of low-carbon and low-emission behaviours, lifestyles and products by consumers and citizens, through increased greenhouse gas emissions transparency, digital eco-labelling and digital nudging, including through e-commerce platforms and digital games;
 - (d) Identification and scaled adoption of digital technologies by Member States to support the conservation, sustainable use and equitable benefit-sharing of biodiversity;
 - (e) Reduced environmental impacts, e-waste and greenhouse gas emissions arising from the procurement and installation of digital infrastructure used to bridge the digital divide.

Programme performance in 2023

Enhanced access to and utility of environmental data through the World Environment Situation Room platform

- 14.30 In 2023, the subprogramme conducted a comprehensive assessment of the World Environment Situation Room, particularly the data platform. The recommendations from the assessment will inform the upcoming redesign and rearchitecture of the platform, with a particular focus on integrating a user-centred design and the identification of user-driven use cases. The assessment underscored the importance of aligning the World Environment Situation Room data platform more closely with the evolving needs and preferences of its diverse user base with improved data visualization and analysis and enhanced search functionality.
- 14.31 Progress towards the objective is presented in the performance measure below (see table 14.4).

Table 14.4
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	–	3 new user-driven use cases available as a prototype in the World Environment Situation Room

Planned results for 2025

Result 1: increased multi-stakeholder engagement on digital environmental sustainability

Programme performance in 2023 and target for 2025

- 14.32 The subprogramme’s work contributed to the adoption of the action plan on digital environmental sustainability by stakeholders of the Coalition for Digital Environmental Sustainability, which met the planned target.
- 14.33 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 14.5).

Table 14.5
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	Development of an action plan on digital environmental sustainability by the Coalition for Digital Environmental Sustainability	Adoption of the action plan on digital environmental sustainability by Coalition for Digital Environmental Sustainability stakeholders	Adoption of 9 impact initiatives by stakeholders of the Coalition for Digital Environmental Sustainability based on the action plan	Delivery of core outcomes in 4 impact initiatives by stakeholders of the Coalition for Digital Environmental Sustainability based on the action plan

Result 2: increased effectiveness of data platforms

Programme performance in 2023 and target for 2025

- 14.34 The subprogramme’s work contributed to one additional digital regional platform in Latin America and the Caribbean integrated with the World Environment Situation Room, for a cumulative total of two digital regional platforms, which met the planned target.
- 14.35 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 14.IV).

Figure 14.IV

Performance measure: number of digital regional platforms integrated with the World Environment Situation Room (cumulative)

Result 3: increased interoperability of global environmental data

Proposed programme plan for 2025

- 14.36 As mandated in United Nations Environmental Assembly resolution 4/23, the subprogramme is working on the development of a long-term data strategy for environmental data that includes developing and implementing uniform protocols and standards for data collection, storage and reporting, ensuring consistency and comparability across different regions and sources.

Lessons learned and planned change

14.37 The lesson for the subprogramme, informed by discussions with Member States, was that a global environmental data strategy can help to promote environmental data standards, data quality and data governance. In applying the lesson, the subprogramme will create the strategy through broad consultations with governments, non-governmental organizations, academia, the private sector and civil society and establish partnerships on environmental data. By leveraging partnerships, the subprogramme will enhance the interoperability of environmental data and enable seamless data exchange and integration across various platforms. The subprogramme will also add data sets to the UNEP Data Catalogue, which is used by Member States for national environmental monitoring and reporting.

14.38 Expected progress towards the objective is presented in the performance measure below (see figure 14.V).

Figure 14.V

Performance measure: number of data partnerships which enhance interoperability of global environmental data (cumulative)

Deliverables

14.39 Table 14.6 lists all deliverables of the subprogramme.

Table 14.6

Subprogramme 2: deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>

Part IV International cooperation for development

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
5. Seminars and workshops on development and implementation of the environmental action plan for the Secretary-General’s Road Map for Digital Cooperation	6	2	6	6
Publications (number of publications)	4	2	4	4
6. On digital technologies to achieve climate neutrality and pollution-reduction	4	2	4	4
Technical materials (number of materials)	2	2	2	2
7. On minimizing the environmental, climate and e-waste footprint of the information and communications technology sector	2	2	2	2
C. Substantive deliverables				
Consultation, advice and advocacy: consultation with at least 100 Member States and other entities on the global environmental data strategy and integration methods for environmental data and analytics; advice to 15 Member States and stakeholders on strengthening the adoption of data and digital transformation to achieve national climate, nature and pollution targets; advice to more than 15 Member States and stakeholders on using digital platforms and tools to enhance public participation in decision-making, open innovation and citizen science.				
D. Communication deliverables				
Digital platforms and multimedia content: 6 digital platforms to support transparency, predictive analytics and risk identification; and thematic web page, social media, multimedia video and audio content.				
E. Enabling deliverables				
Information and communications technology: 6 digital applications and engagement platforms to support e-governance and enhance public participation in environmental monitoring, consensus-building, decision-making and digital transformation				

**Subprogramme 3
Nature action**

Objective

- 14.40 The objective, to which this subprogramme contributes, is to strengthen the capacity of countries to manage marine, freshwater and terrestrial ecosystems through an integrated approach for maintaining and restoring their biodiversity and long-term functioning and ensuring the supply of ecosystem goods and services.

Strategy

- 14.41 To contribute to the objective, the subprogramme will:
- (a) Advance cooperation with Member States, regional entities and other partners, including the United Nations Educational, Scientific and Cultural Organization and the Food and Agriculture Organization of the United Nations, to support education on sustainability by engaging with formal and non-formal education activities that shift knowledge, attitudes, behaviours and norms;
 - (b) Promote knowledge-sharing among countries and other non-governmental sectoral partners within the scope of existing transboundary cooperation frameworks, including the uptake and use of knowledge products, such as scenarios, spatial plans, trade-off analyses and ecosystem-based sectoral monitoring systems, disseminating publications and conducting normative work;
 - (c) Raise awareness on how to take into consideration nature and the ecosystem approach in public and private economic decision-making and provide technical advice, policy support and capacity-building to Member States on sustainable approaches to natural resource management and on biodiversity and health linkages among different sectors. In doing so, the subprogramme

will support Member States in making progress towards the achievement of Sustainable Development Goals 2, 3, 6, 12 to 15 and 17.

- 14.42 The above-mentioned work is expected to result in:
- (a) More coherent and cross-sectoral participation and cooperation among countries worldwide, including at the transboundary level, for the management and effective monitoring of nature;
 - (b) Youth-led action that addresses the indirect drivers of biodiversity loss and the degradation of nature;
 - (c) An enabling environment for embedding nature considerations into the financial and economic decision-making of public and private sector entities at multiple levels (global, regional, subregional and national) using a well-coordinated, whole-of-government approach that balances the demands of different sectors;
 - (d) Development of updated national plans for natural capital accounting by Member States;
 - (e) Enhanced capacity of Member States to manage and reduce risks to both human and ecosystem health and to integrate nature into national and international public health decision-making through science-based approaches.

Programme performance in 2023

Towards the implementation of Kunming-Montreal Global Biodiversity Framework

14.43 The Kunming-Montreal Global Biodiversity Framework of the Convention on Biological Diversity sets out the pathway to halt and reverse biodiversity loss, including four goals for 2050 and 23 targets for 2030. The subprogramme provided support to 69 developing countries in updating and aligning their national biodiversity strategies and action plans with the Global Biodiversity Framework. This included technical support through an inclusive whole-of-government process to: (a) conduct a rapid review of key thematic areas in the national biodiversity strategies and action plans; (b) assess gaps in existing data-monitoring systems and develop a plan for strengthening national monitoring systems; and (c) conduct an institutional review of current policies, institutions and existing finance mechanisms and tools associated with biodiversity for achieving coherence in the implementation of the Global Biodiversity Framework.

14.44 Progress towards the objective is presented in the performance measure below (see table 14.7).

Table 14.7
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
–	Countries adopted the Kunming-Montreal Global Biodiversity Framework of the Convention on Biological Diversity, with 69 countries committed to aligning their national biodiversity strategies and action plans	69 countries aligned their national biodiversity strategies and action plans with the Kunming-Montreal Global Biodiversity Framework of the Convention on Biological Diversity

Planned results for 2025

Result 1: enhanced conservation and restoration efforts of critical marine habitats

Programme performance in 2023 and target for 2025

- 14.45 The subprogramme’s work contributed to an additional 2 countries (Belize and the Philippines) enhancing restoration and conservation efforts of critical coastal ecosystems, for a cumulative total of 10 countries, which met the planned target.
- 14.46 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 14.VI).

Figure 14.VI
Performance measure: number of countries that enhanced restoration and conservation of critical coastal ecosystems (cumulative)

Result 2: finance sector commits itself to biodiversity target-setting

Programme performance in 2023 and target for 2025

- 14.47 The subprogramme’s work contributed to 21 additional financial institutions making commitments to setting portfolio-wide biodiversity targets, for a cumulative total of 325 financial institutions, which did not meet the planned target of 334 financial institutions. The target was not met because some financial institutions required more time to integrate biodiversity and ecosystem services considerations into their core practices.
- 14.48 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 14.VII).

Figure 14.VII

Performance measure: number of financial institutions that signed a commitment to set biodiversity targets to reduce their impacts on nature (cumulative)

Result 3: public sector institutions capture the economic contribution of biodiversity and ecosystem services in decision-making

Proposed programme plan for 2025

- 14.49 The subprogramme has been collaborating with public sector institutions to develop policies that promote maintenance and enhancement of ecosystem functions and services and sustainable use of biodiversity, including its contribution to sustainable livelihoods. The subprogramme provides technical advice to governments on capturing the economic valuation of biodiversity and ecosystem services into decision-making across sectors.

Lessons learned and planned change

- 14.50 The lesson for the subprogramme was that a structured approach to economic valuation of biodiversity and ecosystem services can help decision makers to recognize the wide range of benefits provided by ecosystems and biodiversity, demonstrate their economic and social values and capture those values in decision-making. In applying the lesson, the subprogramme will increase national ownership and promote multisectoral consultations and collaboration by engaging national research partners. The subprogramme will enhance policy relevance through engagement with government groups at all levels as well as multidisciplinary working groups at the country level in the process of adoption and implementation of policies that take into consideration the economic contribution of biodiversity and ecosystem services.
- 14.51 Expected progress towards the objective is presented in the performance measure below (see figure 14.VIII).

Figure 14.VIII

Performance measure: number of public sector institutions that capture the economic valuation of biodiversity and ecosystem services in their policies (cumulative)

Deliverables

14.52 Table 14.8 lists all deliverables of the subprogramme.

Table 14.8

Subprogramme 3: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	4	4	5	4
1. Meetings of the governing bodies for multilateral environmental agreements	4	4	5	4
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	2	3	3
2. On ecosystem services	2	2	3	3
Seminars, workshops and training events (number of days)	6	6	6	6
3. Seminars and training events on ecosystems management	6	6	6	6
Publications (number of publications)	10	10	7	7
4. On mainstreaming biodiversity in production sectors	2	2	2	2
5. On the knowledge, networks and funding available to influence public and private financial flows for conservation, management and sustainable use approaches, such as ecosystem-based approaches and nature-based solutions, to be implemented in a manner consistent with the relevant mandate	2	2	2	2
6. On marine and terrestrial ecosystems	4	4	2	2
7. On biodiversity and wildlife	2	2	1	1
Technical materials (number of materials)	4	4	4	6
8. On integrated ecosystem management (tools and methodologies)	2	2	2	3
9. On investing in nature (assessments, tools and methodologies)	2	2	2	3
C. Substantive deliverables				

Consultation, advice and advocacy: advice to Member States to implement the Kunming-Montreal Global Biodiversity Framework, supporting 138 countries participating in the early action support project to implement national biodiversity strategies and action plans.

D. Communication deliverables

Outreach programmes, special events and information materials: outreach campaigns on ecosystem-based approaches, sustainable management and use of natural resources and the United Nations Decade on Ecosystem Restoration.

**Subprogramme 4
Environmental governance**

Objective

- 14.53 The objective, to which this subprogramme contributes, is to ensure that countries achieve environmental policy coherence and abide by strong legal and institutional frameworks that increasingly implement environmental goals in the context of sustainable development at the global, regional and national levels.

Strategy

- 14.54 To contribute to the objective, the subprogramme will:
- (a) Facilitate relevant meetings and intergovernmental processes at the global, regional and national levels involving Governments, other United Nations entities, inter-agency mechanisms and regional ministerial forums through information management products, technical support and advisory services on environmental law and policy;
 - (b) Support the coherent implementation of the multilateral environmental agreements operating in similar clusters by strengthening national efforts to achieve global environmental targets and supporting parties in national reporting to related conventions, including to ease the national reporting load by promoting effective knowledge management across ministries and administrative units;
 - (c) Develop and disseminate innovative knowledge management tools and initiatives such as the United Nations Information Portal on Multilateral Environmental Agreements and the Programme for the Development and Periodic Review of Environmental Law (Montevideo Programme), supported by training, technical assistance and communication activities, including mainstreaming a gender perspective;
 - (d) Promote the uptake of environmentally sound practices across the United Nations system through the provision of policy advice and cooperate with United Nations country teams to mainstream lessons learned through the implementation of programmes, including replicating and scaling up interventions;
 - (e) In doing so, support Member States in making progress towards the achievement of Sustainable Development Goals, 1, 5, 16 and 17.
- 14.55 The above-mentioned work is expected to result in:
- (a) Increased efficiency and effectiveness of environmental policymaking processes leading to coherent and science-based policies, including through Member States' concerted action on international environmental issues;
 - (b) Improved governance and partnerships with major groups and stakeholders in the development of synergistic national programmes, as well as increased integration of the environment into national and subnational planning and budgeting processes on sustainable development.

Programme performance in 2023

Increased uptake of environmental priorities by countries

- 14.56 UNEP leveraged the United Nations system to strengthen support for Governments and national stakeholders in identifying and responding to national environmental challenges. UNEP provided data and analyses, as well as enhanced the capacities of United Nations country teams and national counterparts by providing guidance and integrated advisory services. The subprogramme has also supported the mainstreaming of biodiversity, pollution/waste and climate change into the common country analysis and the United Nations Sustainable Development Cooperation Frameworks, including the commitments included in the multilateral environmental agreements. In addition, the countries revised their goals monitoring and evaluation frameworks to improve capacity for environmental data collection for policy support and alignment across government levels.
- 14.57 Progress towards the objective is presented in the performance measure below (see figure 14.IX).

Figure 14.IX

Performance measure: number of countries integrating the environmental dimension of sustainable development into their plans (cumulative)

Planned results for 2025

Result 1: strengthened capacity to disrupt illegal waste trafficking in the Asia-Pacific region

Programme performance in 2023 and target for 2025

- 14.58 The subprogramme's work contributed to enhanced capacities of an additional 40 Member State representatives, for a cumulative total of 1,100 representatives, which met the planned target.
- 14.59 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 14.X).

Figure 14.X

Performance measure: number of Member State representatives in the Asia-Pacific region with enhanced capacities to address international trafficking of illegal waste (cumulative)

Result 2: strengthened development and implementation of environmental law at the international and national levels

Programme performance in 2023 and target for 2025

14.60 The subprogramme’s work contributed to an additional 9 countries drafting environmental legislation to address environmental goals, for a cumulative total of 54 countries, which met the planned target.

14.61 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 14.XI).

Figure 14.XI

Performance measure: number of countries that drafted environmental legislation to address environmental goals (cumulative)

Result 3: reduced production and consumption of hydrofluorocarbons through the implementation of the Kigali Amendment to the Montreal Protocol on Substances that Deplete the Ozone Layer

Proposed programme plan for 2025

14.62 The Kigali Amendment to the Montreal Protocol on Substances that Deplete the Ozone Layer is an international agreement to reduce the production and consumption of hydrofluorocarbons: with its global implementation it is estimated that as much as half a degree Celsius of warming will be avoided

by the end of the century.³ The subprogramme supports national ozone units in the development and implementation of hydrochlorofluorocarbons phaseout management plans and in creating Kigali implementation plans.

Lessons learned and planned change

14.63 The lesson for the subprogramme, informed by previous experience, was that economic feasibility analysis as well as robust scientific knowledge can help with informed decision-making, including through collaboration between scientists and policymakers to develop practical policy actions. In applying the lesson, the subprogramme will build on the extensive knowledge gained to date and strive to ensure that policymakers and other stakeholders have access not only to the most up-to-date scientific evidence on the consumption and production of hydrofluorocarbons but also to the available alternative solutions to their gradual reduction.

14.64 Expected progress towards the objective is presented in the performance measure below (see figure 14.XII).

Figure 14.XII

Performance measure: number of countries implementing the Kigali Amendment to the Montreal Protocol on Substances that Deplete the Ozone Layer (cumulative)

Deliverables

14.65 Table 14.9 lists all deliverables of the subprogramme.

Table 14.9

Subprogramme 4: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Conference and secretariat services for meetings (number of three-hour meetings)	40	40	40	50
1. Meetings of the Committee of Permanent Representatives on environmental law and governance	40	40	40	50
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	10	15	6	16
2. On environmental law development and support to mainstream environmental issues, the implementation of multilateral environmental agreements and the linkages between poverty and the environment	10	15	6	16

³ See <https://ozone.unep.org/system/files/documents/Scientific-Assessment-of-Ozone-Depletion-2022.pdf>.

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>

Publications (number of publications)	10	10	8	3
4. On environmental law (global)	10	10	8	3
C. Substantive deliverables				
Consultation, advice and advocacy: advice to approximately 25 Member States, upon request, on the monitoring and implementation of multilateral environmental agreements, legislative strategies and frameworks to counter environmental degradation resulting from climate change and crimes that affect the environment.				
Databases and substantive digital materials: 20 free online courses introducing different multilateral environmental agreements.				

Subprogramme 5 Chemicals and pollution action

Objective

- 14.66 The objective, to which this subprogramme contributes, is to advance the sound management of chemicals and waste and improve air quality at all levels in order to achieve a healthier environment and better health for all.

Strategy

- 14.67 To contribute to the objective, the subprogramme will:
- (a) Provide technical advice, policy support and capacity-building to Member States, the private sector and civil society, within the framework of relevant multilateral environmental agreements and the broader international chemicals and waste agenda, for enabling the development and implementation of policies, strategies, legislation and action plans on sound chemicals and waste management, including, but not limited to, mercury, persistent organic pollutants and lead, as well as on waste prevention and the sound management of electronic and other forms of waste;
 - (b) Provide technical and advisory support to Member States regarding the development and implementation of policies, strategies and mechanisms on the prevention and reduction of waste, and environmentally sound waste treatment and disposal of the waste, including in the context of disaster or conflict-related environmental emergencies;
 - (c) Support the reduction of pollution release, building institutional capacity for the development and use of air quality assessments with publicly accessible monitoring data and for the development of policies and legal, regulatory, financial and technical measures to reduce air, water, soil and ocean pollutants;
 - (d) In doing so, the subprogramme will help Member States to make progress towards the achievement of targets 6.3, 12.3, 12.4 and 14.1 of the Sustainable Development Goals.
- 14.68 The above-mentioned work is expected to result in:
- (a) An increased number of Member States developing or implementing policies, strategies, legislation or action plans that promote sound chemical and waste management and/or the implementation of multilateral environmental agreements and the existing framework on chemicals and waste;
 - (b) An increased number of Member States developing or implementing policies, strategies and mechanisms to prevent or reduce waste and ensure environmentally sound waste treatment or disposal, including in the context of disaster or armed conflict-related environmental emergencies;

- (c) An increased number of policy, regulatory, financial and technical measures developed to reduce pollution in air, water, soil and the ocean;
- (d) A reduction in the release of pollutants to the environment;
- (e) Enhanced action by the private sector and civil society on pollution prevention and control.

Programme performance in 2023

Improved waste management in Latin America and the Caribbean

- 14.69 Improving waste and wastewater management can help to reduce pollution that affects those in vulnerable situations. The subprogramme, with the Coalition for the Progressive Closure of Dumpsites in Latin America and the Caribbean, led the implementation of the road map for the closure of dumpsites, including resource mobilization, capacity development, and partnership building. The initiative was implemented in the Province of Santa Fe, Argentina, facilitating the design of a waste management baseline and the formulation of an operational plan for the closure of a dumpsite in the municipality of Calchaquí. In addition, a training programme on waste management was conducted for municipal government officers. UNEP also supported the design of a trust fund contributed by Peruvian stakeholders with the objective of supporting innovative organic waste initiatives contributing to the nationally determined contributions of Peru, and showcasing the economic, social and environmental benefits of organic waste management to communities, the Government and the private sector.
- 14.70 Progress towards the objective of shifting the practice of waste management towards zero waste globally is presented in the performance measure below (see figure 14.XIII).

Figure 14.XIII
Performance measure: number of countries implementing policies on the prevention and sound management of waste (cumulative)

Planned results for 2025

Result 1: reduced release of pollutants to the environment

Programme performance in 2023 and target for 2025

- 14.71 The subprogramme’s work contributed to the reduction of an additional 1,553 metric tons of mercury and persistent organic pollutants released to the environment, for a cumulative total of 2,798 metric tons of mercury and persistent organic pollutants, which exceeded the planned target of 2,250 metric tons.
- 14.72 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 14.XIV).

Figure 14.XIV

Performance measure: reduction in releases of pollutants to the environment (cumulative)

(Metric tons of persistent organic pollutants and mercury)

Result 2: policies and regulatory, financial and technical measures developed to reduce pollution

Programme performance in 2023 and target for 2025

- 14.73 The subprogramme’s work contributed to the development of an additional 40 policies and measures to reduce pollution, for a cumulative total of 114 policies and measures, which exceeded the planned target of 107 measures.
- 14.74 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 14.XV).

Figure 14.XV

Performance measure: number of policies and regulatory, financial and technical measures developed to reduce pollution in air, water, soil and the ocean (cumulative)

Result 3: adoption of circular economy policies and practices in high-impact sectors to reduce pollution

Proposed programme plan for 2025

- 14.75 In line with United Nations Environmental Assembly resolution 5/11, UNEP has developed actions to support the transformation of whole value chains, with a focus on increasing the sustainability of high-impact sectors.

Lessons learned and planned change

- 14.76 The lesson for the subprogramme was that shifting sector practices and achieving systemic changes can be enhanced through intensive engagement with regional and in-country players and partners, including the United Nations system, and demonstrating the benefit of concrete tools and measures. In applying the lesson, the subprogramme will leverage extended producer responsibility⁴ and related schemes as a means to drive engagement. The subprogramme will provide technical support in the form of advisory services on extended producer responsibility – initially focused on packaging and plastic products – to help to address the specific challenges faced by the requesting countries. This is in line with the Common Approach to Pollution, in particular its objective 9.⁵
- 14.77 Expected progress towards the objective is presented in the performance measure below (see figure 14.XVI).

⁴ According to the Organisation for Economic Co-operation and Development, extended producer responsibility schemes are organizational mechanisms for the prevention and management of waste that concern certain types of products and are based primarily on the polluter-pays principle. See also the definitions in the UNEP Law and Environment Assistance Platform (<https://leap.unep.org/en/taxonomy/term/5789>).

⁵ See https://unemg.org/wp-content/uploads/2024/02/UNEP_EMG_UN-system-common-approach-to-Pollution_Overview.pdf.

Figure 14.XVI

Performance measure: number of governments, including subnational governments, and producer responsibility organizations taking policy actions to advance extended producer responsibility and similar scheme development to prevent and reduce pollution (cumulative)

Deliverables

14.78 Table 14.10 lists all deliverables of the subprogramme.

Table 14.10

Subprogramme 5: deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	8	8	8	8
1. On the development of policies and legal, institutional or fiscal strategies and mechanisms for sound chemicals management	8	8	8	8
Seminars, workshops and training events (number of days)	8	8	8	10
2. Seminars and training events on the sound management of chemicals and waste	8	8	8	10
Publications (number of publications)	1	1	1	1
3. Global assessment of the state of and trends in laws, regulations and fiscal policies for sound chemicals and waste management	1	1	1	1
Technical materials (number of materials)	4	8	4	6
4. On status, trends and related risks and improvements in chemicals and waste management at various scales	2	5	2	3
5. On action plans related to air quality at various scales, in particular at the subnational, national and regional levels	2	3	2	3
Fact-finding, monitoring and investigation missions (number of missions)	4	5	4	4
6. Monitoring missions on the status and trends relating to chemicals management, waste management and air quality, including on marine litter and other forms of pollution	4	5	4	4
C. Substantive deliverables				
Consultation, advice and advocacy: advice to 3 countries and 5 entities of the private sector and civil society on pollution prevention and control.

---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

D. Communication deliverables

Outreach programmes, special events and information materials: outreach programmes, campaigns and information materials for Member States and stakeholders to increase awareness of pollution prevention and reduction in achieving the Sustainable Development Goals.

**Subprogramme 6
Finance and economic transformations**

Objective

- 14.79 The objective, to which this subprogramme contributes, is to advance the transition by countries and businesses to sustainable development through multiple pathways, including the uptake of green economy in the context of sustainable development and poverty eradication, the adoption of sustainable consumption and production patterns and the decoupling of economic activity from unsustainable resource use and environmental impact, while improving human well-being.

Strategy

- 14.80 To contribute to the objective, the subprogramme will:
- (a) Deliver country assessments, promote the uptake of policy planning and implementation tools and convene knowledge platforms that will enable policymakers and businesses to actively pursue sustainable pathways;
 - (b) Generate and disseminate knowledge through its extensive network of partners in the public and private sectors, including the financial sector, as well as civil society and academia;
 - (c) Promote sustainable patterns of consumption and production through policy recommendations on the green economy in the context of sustainable development and poverty eradication, on sustainable finance and on business practices and tools and knowledge that allow consumers to make informed choices, while considering issues related to generational and gender equality;
 - (d) Catalyse the alignment of finance and investment with sustainability objectives and policy priorities by developing or contributing to the norms for sustainable finance, providing the basis for standard-setting and promoting the role of private sustainable finance in complementing public finance;
 - (e) Support Governments and subnational governments in strengthening institutional capacities and implementing national development plans, policies and/or action plans; and support businesses adopting and implementing sustainable management and cleaner production practices, across value chains, helping Member States to make progress towards the achievement of targets under Goals 1, 4, 5, 7 to 9, 11 to 13 and 17;
 - (f) Strengthen the capacities of Member States and other stakeholders to integrate environmental sustainability and sustainable patterns of consumption and production into their decision-making approaches, including on sustainable finance, trade and infrastructure.
- 14.81 The above-mentioned work is expected to result in:
- (a) Integrated sustainable development pathways, including policies and frameworks on the green economy in the context of sustainable development and poverty eradication or on sustainable consumption and production, for improved resource efficiency and human well-being and reduced ecological and material footprints;

- (b) Improved environmental sustainability of private sector actors, including in the financial sector, in their core business practices and across their value chains, such as through sustainable investment and resource extraction, transformation and use, to create sustainable and more inclusive markets and economies;
- (c) Public, private and individual consumers having access to and increasingly demanding and consuming sustainable goods and services.

Programme performance in 2023

Countries adopted and implemented measures towards sustainable consumption and production

- 14.82 The Board of the 10-Year Framework of Programmes on Sustainable Consumption and Production adopted the Global Strategy for Sustainable Consumption and Production 2023–2030 in 2023, reiterating the need to shift towards a more sustainable approach to consumption and production.
- 14.83 Progress towards the objective is presented in the performance measure below (see figure 14.XVII).

Figure 14.XVII

Performance measure: number of countries adopting and implementing sustainable consumption and production frameworks, policies and action plans (cumulative)

Planned results for 2025

Result 1: enabling policies to advance environmental sustainability

Programme performance in 2023 and target for 2025

- 14.84 The subprogramme’s work contributed to the development of an additional 18 economic, finance, industry and trade policies, for a cumulative total of 92 policies, which did not meet the planned target of 97 policies. The target was not met due to shifts in priorities by some Member States that were being supported by the subprogramme.
- 14.85 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 14.XVIII).

Figure 14.XVIII
Performance measure: number of economic, finance, industry and trade policies adopted by Member States to enable sustainable transitions (cumulative)

Result 2: increased availability of sustainable insurance

Programme performance in 2023 and target for 2025

- 14.86 The subprogramme’s work contributed to an additional 27 insurance companies adopting the UNEP Finance Initiative Principles for Sustainable Insurance, for a cumulative total of 159 companies, which exceeded the planned target of 145 companies.
- 14.87 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 14.XIX).

Figure 14.XIX
Performance measure: number of insurance companies that adopted the Principles for Sustainable Insurance (cumulative)

Result 3: increased availability of tools and measures to transform choices and behaviour by governments, businesses and individual consumers for environmental sustainability

Proposed programme plan for 2025

- 14.88 UNEP, through the One Planet network programmes and other initiatives, has made efforts to shift markets and individual preferences to accelerate sustainable consumption and production.

Lessons learned and planned change

14.89 The lesson for the subprogramme, based on previous implementation experience, was that providing specific tools and measures can help to facilitate positive choices and behaviours by governments, businesses and consumers. In applying the lesson learned, the subprogramme will develop tools and measures concerning sustainable public procurement, consumer information, and sustainable lifestyles and education targeting businesses and consumers. The subprogramme will provide tailored stakeholder engagement strategies, build in-country/local ownership and have flexible and adaptable delivery models, including through building United Nations system-wide partnerships to scale up approaches, with a view to facilitating positive choices and behaviours to accelerate sustainable consumption and production.

14.90 Expected progress towards the objective is presented in the performance measure below (see figure 14.XX).

Figure 14.XX

Performance measure: number of consumer information and education tools and products that inform decision-making, choices and changes in behaviour towards sustainability (cumulative)

Deliverables

14.91 Table 14.11 lists all deliverables of the subprogramme.

---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Consultation, advice and advocacy: advice on sustainable lifestyles, resource efficiency, the green economy in the context of sustainable development and poverty eradication, sustainable consumption and production, and finance and economic transformations to 20 Member States; advocacy to 10 financial institutions on reporting using the Task Force on Nature-related Financial Disclosures guidelines; consultations on life cycle thinking tools to 4 governments; and 5 meetings of the 10-Year Framework of Programmes on Sustainable Consumption and Production Patterns and the One Planet network.

Databases and substantive digital materials: 1 mainstream life cycle assessment software product has incorporated the globally recommended life cycle impact assessment method; and 40 institutional investors join the Net-Zero Asset Owner Alliance.

D. Communication deliverables

Outreach programmes, special events and information materials: 1 side event of the 10-Year Framework of Programmes and the One Planet network at the 2025 high-level political forum on sustainable development; 1 outreach targeting economists of resident coordinator offices on the green economy in the context of sustainable development and poverty eradication; and 14 young people, 50 per cent of whom are young women and youth from vulnerable communities, invested in to lead environmental projects through the Young Champions of the Earth initiative.

**Subprogramme 7
Science policy**

Objective

- 14.92 The objective, to which this subprogramme contributes, is to strengthen the capacity of governments and non-government actors to access, generate and use quality environmental data and analysis and to sustain a strengthened science-policy interface that generates evidence-based environmental assessments, identifies emerging environmental issues and fosters relevant policy action at the global, regional and national levels, including for the achievement of the environment-related Sustainable Development Goals.

Strategy

- 14.93 To contribute to the objective, the subprogramme will:
 - (a) Review the world environmental situation and strengthen the interface between science and policymaking across the sustainable development agenda, including through collaboration with the Statistical Commission and the five regional commissions;
 - (b) Develop scientifically credible and unbiased data, information and knowledge and provide policy-relevant analysis and policy recommendations to catalyse and accelerate solutions and action for the environment, based on a continuous review of the global status of the environment and trends;
 - (c) Catalyse systematic and transformative shifts that can drive progress towards the aspirations of achieving the environmental dimension of the 2030 Agenda, through gender-sensitive partnerships across all geographical areas, involving Governments and non-governmental organizations, the business and scientific communities, and citizens;
 - (d) Pursue broad stakeholder engagement as a critical step in enhancing societal understanding, acceptance and uptake of its scientific analysis and serve as a knowledge broker that builds consensus on existing and emerging environmental issues through platforms and networks, such as the Science-Policy-Business Forum on the Environment, the International Resource Panel, the World Adaptation Science Programme and the One Planet network;
 - (e) Provide analytical research, increase awareness of the environmental dimension of sustainable development and build capacity to measure, monitor and report on progress, helping Member States

to integrate common methods for tracking and measuring the environment-related Sustainable Development Goals, including in their national processes, in particular, Goals 6, 12 to 15 and 17.

- 14.94 The above-mentioned work is expected to result in:
- (a) Increased production and use of scientific environmental data by Member States and other stakeholders;
 - (b) A more coherent approach to harmonizing country data, tracking progress and science-based environmental policymaking within and among countries;
 - (c) Increased capacity of Member States to measure progress towards achieving the Sustainable Development Goals and to increase policy coherence for the integration of national sustainable development plans and other internationally agreed environmental goals.

Programme performance in 2023

Enhanced national and regional environmental information and knowledge management

- 14.95 In 2023, the subprogramme undertook various initiatives that bolstered knowledge management efforts at the national and regional levels through its Global Environment Monitoring System network. In Kenya, the subprogramme’s Global Environment Monitoring System for Air supported the operationalization of the Open Data Management System, resulting in the deployment of 40 sensors monitoring air quality across the country. In addition, the Open Data Management System has operationalized air quality monitoring with data from 8 sensors in Addis Ababa, Ethiopia; 1 sensor in Rwanda; and 30 sensors in Uganda.
- 14.96 Progress towards the objective is presented in the performance measure below (see table 14.12).

Table 14.12
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
3 national reports on the current situation, gaps and lessons learned on sharing and using water and air quality data in support of urban planning, reporting and assessment processes were finalized in Nairobi	5 air quality monitoring sensor equipment were deployed across Kenya to monitor air pollution. This was in alignment with the road to the twenty-seventh session of the Conference of the Parties to the United Nations Framework Convention on Climate Change	Open Data Management System operationalized, including 40 sensors deployed to monitor air quality in Kenya, as well as 8 sensors in Addis Ababa, Ethiopia; 1 sensor in Rwanda; and 30 sensors in Uganda

Planned results for 2025

Result 1: increased use of environmental data and statistics for policy formulation

Programme performance in 2023 and target for 2025

- 14.97 The subprogramme’s work contributed to 15 additional countries using data and statistics on environmental trends and assessments for policy formulation, for a cumulative total of 53 countries, which exceeded the planned target of 50 countries.
- 14.98 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 14.XXI).

Figure 14.XXI
Performance measure: number of countries using data and statistics on environmental trends and assessments for policy formulation (cumulative)

Result 2: improved country-level monitoring of water quality

Programme performance in 2023 and target for 2025

- 14.99 The subprogramme’s work contributed to 1 additional country submitting quality-assured data on surface and groundwater quality to the Global Freshwater Quality Database, for a cumulative total of 14 countries, which met its planned target.
- 14.100 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 14.XXII).

Figure 14.XXII
Performance measure: number of countries that submit quality-assured data on surface and groundwater quality to the Global Freshwater Quality Database (cumulative)

Result 3: improved electronic waste (e-waste) monitoring and collection

Proposed programme plan for 2025

- 14.101 The subprogramme, with inter-agency partners, developed a subregional e-waste monitoring system that provides and analyses data and statistics showing trends in e-waste generation, collection and transboundary movement in Albania, Bosnia and Herzegovina, North Macedonia, Montenegro and Serbia, where e-waste collection rates average 27 per cent and there has been a 67 per cent increase in e-waste generation since 2010.

Lessons learned and planned change

14.102 The lesson for the subprogramme was that, due to the technicalities of this subject, expanding knowledge management and collaboration among e-waste experts and professionals and relevant United Nations system agencies can help to tailor training and target technical support to different stakeholders. In applying this lesson, the subprogramme will strengthen cooperation with the International Telecommunication Union, the United Nations Institute for Training and Research and other United Nations system agencies to provide a platform for e-waste experts and professionals to network and receive tailored training and technical assistance to meet their specific needs and develop their own e-waste data-collection systems adapted to their national contexts.

14.103 Expected progress towards the objective is presented in the performance measure below (see figure 14.XXIII).

Figure 14.XXIII

Performance measure: number of countries that have established an e-waste monitoring framework (cumulative)

Deliverables

C. Substantive deliverables

Consultation, advice and advocacy: consultation with some 25 Member States and stakeholders on methodology development and capacity development in data-collection methodologies relating to the Sustainable Development Goals; advice to at least 20 Member States and stakeholders on strengthening the science-policy interface; and advice to at least 25 Member States and stakeholders on implementing national environmental information systems.

D. Communication deliverables

Digital platforms and multimedia content: web pages, multimedia material and audio, video and social media content on the scientific work of UNEP to be utilized by Member States, stakeholders and the public.

B. Proposed post and non-post resource requirements for 2025

Overview

14.105 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 14.14 to 14.16.

Table 14.14

14.106 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 14.17 to 14.19 and figure 14.XXIV.

14.107 As shown in tables 14.17 (1) and 14.18 (1), the overall resources proposed for 2025 amount to \$22,094,300 before recosting, reflecting a net increase of \$104,100 (or 0.5 per cent) compared with the approved budget for 2024. Resource changes result from technical adjustments and new mandates. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

14.108 As shown in table 14.17 (1), resource changes reflect a net decrease of \$351,100, as follows:

- (a) **Executive direction and management.** The increase of \$104,100 relates to the higher provision at the continuing vacancy rate associated with the establishment of one post of Data Analyst (P-3) (\$60,700) and one post of Programme Management Assistant (General Service (Other level)) (\$43,400) in 2024 for the United Nations Scientific Committee on the Effects of Atomic Radiation pursuant to General Assembly resolution [78/119](#), which were subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts;
- (b) **Policymaking organs.** The decrease of \$455,200 relates to the removal of non-recurrent provisions associated with the sixth session of the United Nations Environment Assembly, held in 2024, pursuant to General Assembly resolutions [67/260](#) and [73/260](#) and Environment Assembly decision 5/4 that were approved for 2024.

New and expanded mandates

14.109 As reflected in table 14.17 (1), resource changes reflect an increase of \$455,200, as follows:

Policymaking organs. The increase of \$455,200 relates to additional requirements in support of the seventh session of the United Nations Environment Assembly, to be held in 2025, pursuant to General Assembly resolutions [67/260](#) and [73/260](#) and Environment Assembly decision 6/7. The requirements consist of other staff costs (\$201,800), hospitality (\$19,500), contractual services (\$43,600) and general operating expenses (\$190,300).

Extrabudgetary resources

14.110 As reflected in tables 14.17 (2) and 14.18 (2), extrabudgetary resources for UNEP amount to \$412,910,000. The resources would complement regular budget resources and would provide for 879 posts mainly to support and coordinate action on environmental matters within the United Nations system. In addition, non-post resources would be used mainly to implement the programme of work in line with the priorities and deliverables approved by the United Nations Environment Assembly.

14.111 As reflected in tables 14.17 (2) and 14.18 (2), extrabudgetary resources for the United Nations Scientific Committee on the Effects of Atomic Radiation are estimated at \$270,200 and would provide for one P-3 (\$177,400), as well as \$92,800 for non-post resources. These would complement regular budget resources and would be used to support and expedite the implementation of scientific evaluations of the Scientific Committee and to increase outreach and awareness of the Committee's findings. The estimated resource level for 2025 reflects a decrease of \$29,400 compared with 2024, due to reduced staffing requirements.

14.112 The extrabudgetary resources under the present section are subject to the oversight of the United Nations Environment Assembly.

Policymaking organs

14.113 The resources proposed under this component would provide for the policymaking organs as shown in table 14.20.

Section 14 Environment

Total		463.3	463.3

14.114 The proposed regular budget resources for 2025 amount to \$463,300 and reflect no change in the overall level of proposed resources compared with the approved budget for 2024. The proposed cost-neutral changes are explained in paragraphs 14.108 and 14.109. Additional details on the distribution of the proposed resources for 2025 are reflected in table 14.21 and figure 14.XXV.

Executive direction and management

14.115 The executive direction and management component comprises the Office of the Executive Director and the United Nations Scientific Committee on the Effects of Atomic Radiation. The proposed regular budget resources for 2025 amount to \$3,986,100 and reflect an increase of \$104,100 compared with the approved budget for 2024. The proposed change is explained in paragraph 14.108. Additional details on the distribution of the proposed resources for 2025 are reflected in table 14.22 and figure 14.XXVI.

Figure 14.XXVI
Executive direction and management: distribution of proposed resources for 2025 (before recosting)

(Number of posts/thousands of United States dollars)

Office of the Executive Director

- 14.116 The executive direction and management component comprises the Executive Office, the Governance Affairs Office and an independent Evaluation Office. The Executive Office provides executive and support services to the Executive Director, the Deputy Executive Director and other members of the UNEP senior management team. It provides guidance and policy clearance on all programmatic and administrative matters with the support of the Corporate Services and the Policy and Programme Divisions. The Executive Director, with the support of the Deputy Executive Director, provides the vision and direction for the work of UNEP in accordance with its legislative mandates and has overall responsibility for the management of UNEP resources.
- 14.117 The main responsibilities of the executive direction and management component include providing leadership and direction for UNEP to provide guidance on environmental issues within the United Nations system. The Executive Office will catalyse international action to bring about a coordinated response both within the United Nations system and between the United Nations and its partners.
- 14.118 The Evaluation Office is an independent unit reporting directly to the Executive Director. It is responsible for implementing the evaluation workplan by conducting and managing independent evaluations. It also provides analysis of findings and lessons for management.
- 14.119 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), UNEP is integrating environmental management practices into its operations. In 2025, UNEP will continue to look at waste problems, including hazardous waste.
- 14.120 The Sustainable United Nations facility of UNEP supports the United Nations system in implementing phase I of the Strategy for Sustainability Management in the United Nations System, 2020–2030: environmental sustainability in the area of management. The facility measures the progress in the reduction of the United Nations system’s environmental footprint and efforts to reduce it annually at the United Nations system-wide and entity levels. In 2025, UNEP will continue to assist United Nations entities in meeting the collective 2025 target to implement an environmental management system through the provision of advisory services, training and knowledge- and information-sharing.

Part IV International cooperation for development

- 14.121 In 2025, UNEP will continue to measure and report on its greenhouse gas emissions as well as its mitigation measures and will offset residual emissions through the clean development mechanism or its successor under article 6 of the Paris Agreement, the certified emission reductions from the United Nations Framework Convention on Climate Change.
- 14.122 Information on the timely submission of documentation and advance booking for air travel is reflected in table 14.23. UNEP continues to streamline its processes following the issuance of internal guidelines to all staff. A new travel portal was designed and launched in 2023 to proactively monitor travel submissions in an enhanced manner and ensure a prompt approval process.

Table 14.23
Compliance rate
(Percentage)

	2021 actual	2022 actual	2023 actual	2024 planned	2025 planned
Timely submission of documentation	100	100	100	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	42	50	67	100	100

- 14.123 The proposed regular budget resources for 2025 amount to \$2,859,600 and reflect no change compared with the approved budget for 2024. Additional details on the distribution of the proposed resources for 2025 are reflected in table 14.24 and figure 14.XXVII.

United Nations Scientific Committee on the Effects of Atomic Radiation

- 14.124 The General Assembly, by its resolution [913 \(X\)](#), established the United Nations Scientific Committee on the Effects of Atomic Radiation to undertake broad scientific evaluations on developing knowledge on sources of ionizing radiation and its effects on human health and the environment. Since 1955, the Committee has played an important role in improving international scientific understanding of levels of exposure to ionizing radiation and its health and environmental effects and setting the scientific basis for radiation protection worldwide. In its resolution [78/71](#), the General Assembly reaffirmed its decision to maintain the present functions and independent role of the Committee and strengthen the secretariat.
- 14.125 In the context of the 2030 Agenda, the work of the Scientific Committee contributes to the achievement of Sustainable Development Goal 3. Evaluations by the Committee are conducted on behalf of all States Members of the United Nations and are used to assess the levels, effects and risks of exposure from using radiation in areas such as medicine, research, education, agriculture and industry, including nuclear power production. The Committee’s scientific synthesis of the most up-to-date radiobiological and epidemiological knowledge is fundamental for the international radiation safety regime and underpins international standards for protecting workers, patients and the public from ionizing radiation. The findings of the Committee, for example annex D to its 2020/2021 report (evaluation of occupational exposure to ionizing radiation), also contribute to the achievement of Goals 14 and 15. The latter was particularly evident in annex B to the 2020/2021 report (levels and effects of radiation exposure due to the accident at the Fukushima Daiichi Nuclear Power Station: implications of information published since the 2013 report of the Committee). Through its work, the Committee also contributes to the achievement of Goal 17 by collaborating and maintaining long-term partnerships with national and international organizations such as the International Atomic Energy Agency, the World Health Organization, the Information System on Occupational Exposure, the International Labour Organization, the European Commission and the Nuclear Energy Agency of the Organisation for Economic Co-operation and Development.
- 14.126 The secretariat convenes and services the annual sessions of the Scientific Committee. The General Assembly welcomed the annual report ([A/78/46](#)) on the outcomes of the Committee’s seventieth session, held in Vienna from 19 to 23 June 2023, and the progress made on four ongoing scientific evaluations and preparation of the future programme of work (2025–2029).

- 14.127 In line with General Assembly resolution 78/71, the secretariat continues to maintain the online platform for the collection of data on public, medical and occupational exposure from Member States, with a view to facilitating the Committee’s regular evaluation and monitoring of trends in such exposures. By the end of 2023, 105 Member States had nominated national contact persons to participate in the Committee’s global survey on public exposure. The Committee’s ad hoc working group on sources and exposure, with the support of the secretariat, is also evaluating recently published data on occupational and medical exposures and maintaining dialogue and the network of nominated national contact persons.
- 14.128 In 2025, the Scientific Committee is planning to approve two scientific annexes, on epidemiological studies of radiation and cancer and on diseases of the circulatory system from radiation. It expects to review the progress made on scientific documents on nervous system effects of ionizing radiation, and effects on the eye, and initiate a new evaluation on the effects on the immune system. The secretariat will continue to support the implementation of the programme of work (2025–2029) and the new public information and outreach strategy for 2025–2029, expected to be approved by the Committee in May 2024.
- 14.129 The proposed regular budget resources for 2025 amount to \$1,126,500 and reflect an increase of \$104,100 compared with the approved budget for 2024. The proposed change is explained in paragraph 14.108. Additional details on the distribution of proposed resources for 2025 are reflected in table 14.25 and figure 14.XXVIII.

Programme support

- 14.137 The programme support component comprises the Corporate Services and the Policy and Programme Divisions. It aims to ensure efficient and effective development and delivery of the programmatic priorities of the medium-term strategy, underpinned by sound management and leadership practices with a reinforced accountability framework that clarifies roles and responsibilities. Programme management and support provide guidance on programme and project design, delivery and closure; governance of resources; corporate policy development and oversight; programme monitoring and reporting; building of staff knowledge and capacity; and the development of programme and resource management tools that support decision-making.
- 14.138 The main responsibilities of the programme support component include the strategic management of UNEP financial, human and information technology resources, ensuring alignment of the resources with programmatic needs and strategic objectives, such as gender balance in the workplace. The component works in close collaboration and coordination with the United Nations Office at Nairobi and its other United Nations service providers, including the United Nations Office at Geneva, in respect of accounting, payroll and payments, recruitment and staff services, staff development, network and other systems administration, information and communications technology, procurement and inventory management. The component also interacts with the United Nations Office at Nairobi in the areas of host country relations, buildings management, conference management, medical services, and security and safety.
- 14.139 In 2025, the component will continue with its strong engagement in keeping with its role of contributing towards the development of United Nations system-wide strategies on the environment.
- 14.140 The proposed regular budget resources for 2025 amount to \$959,700 and reflect no change compared with the approved budget for 2024. Additional details on the distribution of the proposed resources for 2025 are reflected in table 14.33 and figure 14.XXXVI.

Annex

Organizational structure and post distribution for 2025

Two charts showing the organizational structure of the United Nations Environment Programme (UNEP) are presented below. Chart A presents the proposed structure for 2025, while chart B reproduces the approved structure, as contained in document [A/78/6 \(Sect. 14\)](#).

Justification for the proposed changes

Climate Change Division

The UNEP medium-term strategy for 2022–2025 and current programme of work and budget focus on responding to interconnected challenges to achieve three interlinked and mutually reinforcing strategic objectives: climate stability; living in harmony with nature; and towards a pollution-free planet. The expected 2030 outcome of the climate action subprogramme of the medium-term strategy is that government and non-government development actions are compatible with the long-term mitigation and resilience goals of the Paris Agreement. The strategy also states that UNEP will continue to build a healthy, results-based and performance-driven organization and review its organizational design, including the allocation of management roles and responsibilities among its divisions and regional offices, to ensure solid alignment with the priorities outlined in the strategy.

The current structure of UNEP does not include a singular division responsible for the overall implementation of its climate change work. The Climate Change Division, for establishment pursuant to United Nations Environment Assembly resolution 6/13, will be established under subprogramme 1 and staffed by the transfer of personnel from other divisions within subprogramme 1.

The establishment of the Climate Change Division would provide dedicated capacity in this area and ensure coherence and proactive engagement with Member States and donors, and would signal that UNEP is adjusting its structure to deliver the responses that it advocates and to provide its contribution to addressing the interconnected challenges, and more specifically climate stability, in the most efficient way.

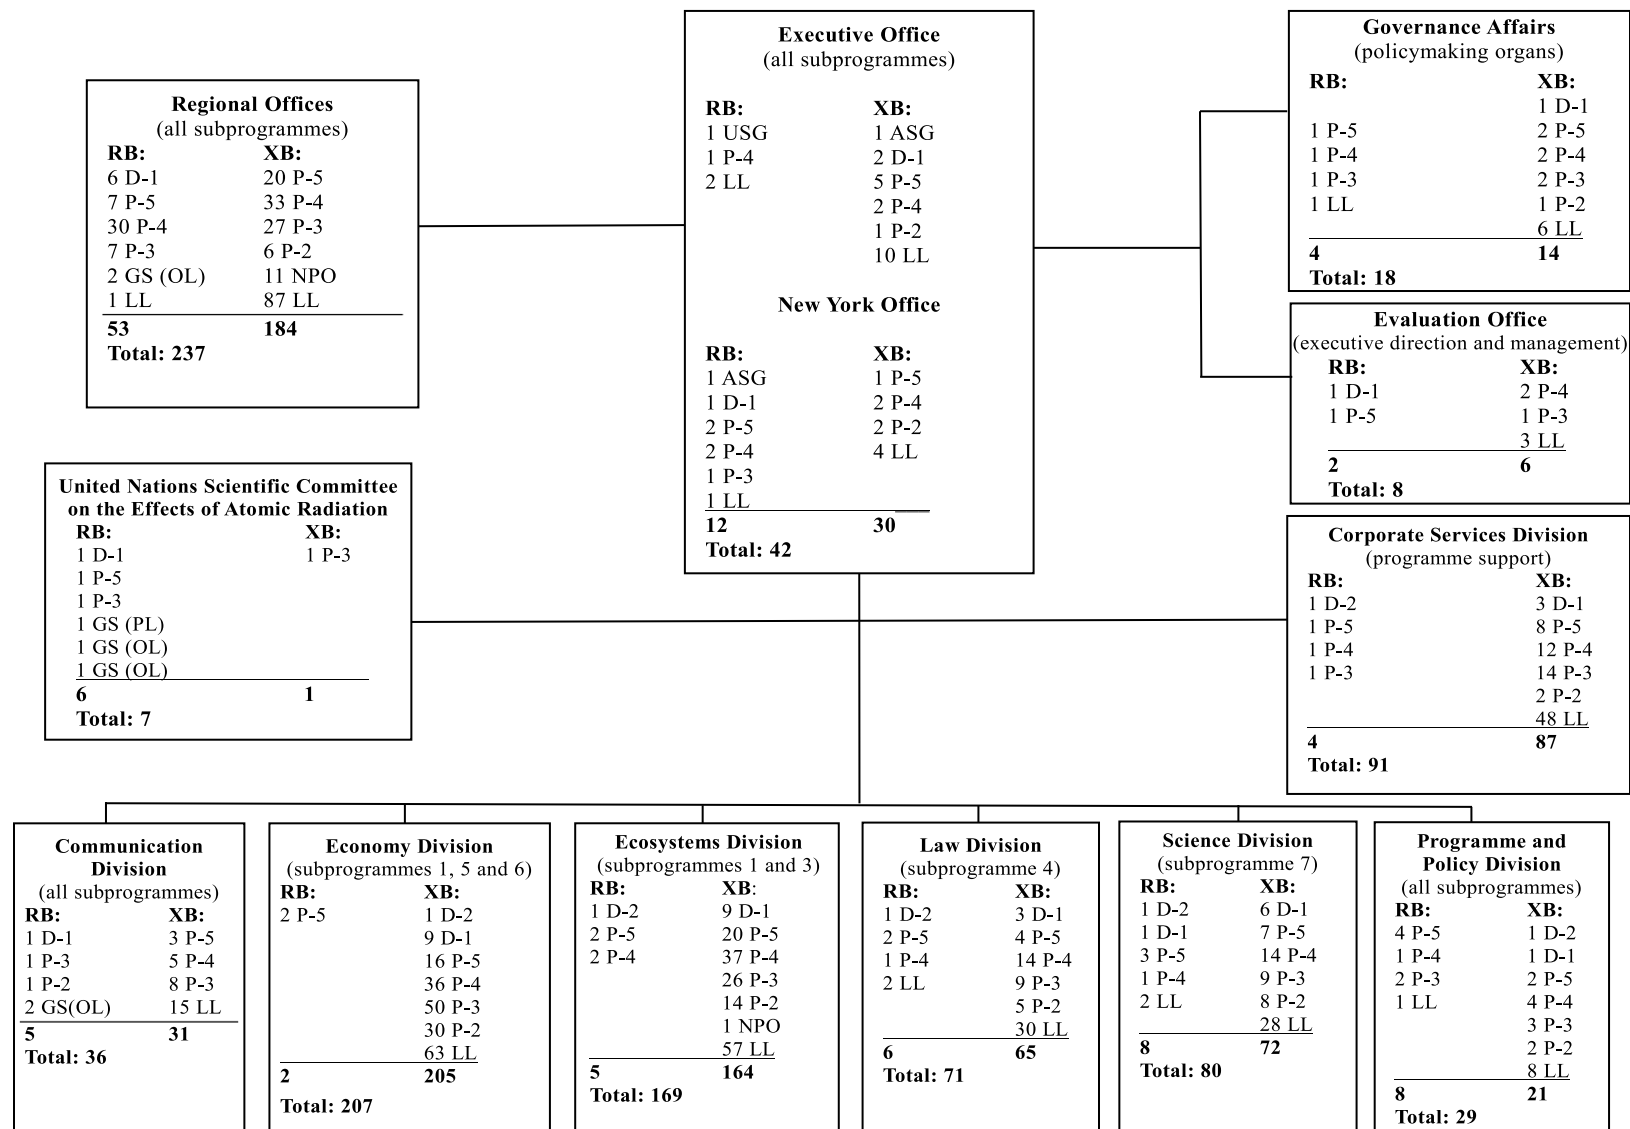

Industry and Economy Division (former Economy Division)

To reflect the growing importance of working with high-impact sectors of the economy to reduce climate, nature and pollution footprints, UNEP decided to include an explicit industry focus in the Division's name.

Early Warning and Assessment Division (former Science Division)

The role of the Science Division has been to keep the global environment under review by catalysing the best science capacity, evidence, knowledge and data to anticipate, recognize and evaluate the most critical environmental issues facing society. Integrating the system of knowledge assessment, early warning and monitoring of UNEP enables the assessment of environment risks and formulation of appropriate response options. It is for these reasons that UNEP decided to rename the Science Division as the Early Warning and Assessment Division.

B. Organizational structure and post distribution for 2024*

Abbreviations: ASG, Assistant Secretary-General; GS (OL), General Service (Other level); GS (PL), General Service (Principal level); LL, Local level; NPO, National Professional Officer; RB, regular budget; XB, extrabudgetary; USG, Under-Secretary-General.

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 15.1 The United Nations Human Settlements Programme (UN-Habitat) is a focal point for sustainable urbanization and human settlements in the United Nations system. It supports Member States in the development of sustainable cities and human settlements through its normative and operational work at the global, regional, national and local levels. UN-Habitat leads and coordinates the monitoring of and reporting on global progress in the implementation of the New Urban Agenda and Sustainable Development Goal 11. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolution 3327 (XXIX), by which the Assembly established the United Nations Habitat and Human Settlements Foundation, and resolution 32/162, by which the Assembly established the United Nations Centre for Human Settlements (Habitat). The Assembly, through its resolution 56/206, transformed it to the United Nations Human Settlements Programme (UN-Habitat), effective 1 January 2002. The Assembly, through its resolution 73/239, established a new governance structure for the Programme, consisting of the universal UN-Habitat Assembly, the 36-member Executive Board and the Committee of Permanent Representatives. The UN-Habitat Assembly adopted resolutions providing further guidance on the work of UN-Habitat at its first and second sessions, held in May 2019 and June 2023, respectively.
- 15.2 The Programme's support is aimed at developing the capacity at all levels of government and other key stakeholders to formulate and implement policies, plans and concrete activities for sustainable urban development. Such support is also provided through the implementation of projects under the regular programme of technical cooperation and the United Nations Development Account.

Strategy and external factors for 2025

- 15.3 UN-Habitat is operating in a world that will continue to urbanize over the next three decades. Some 90 per cent of urban growth is taking place in less developed regions, where unplanned growth is fuelling the expansion of informal settlements and slums, resulting in an increase in urban poverty, inequality and lack of adequate and affordable housing. In other parts of the world, many cities are experiencing negative growth and shrinking populations. Globally, over 1.6 billion people live in inadequate housing and over 1 billion live in slums and informal settlements.¹ Of significance to the programme of work are 281 million international migrants, most of whom live in urban areas, and 55 million internally displaced persons.²
- 15.4 Climate change and biodiversity loss, armed conflicts, growing inequalities and other natural and human-made disasters often converge in cities. Being prepared for and overcoming these challenges is critical for a better urban future. UN-Habitat will focus on pathways to transformative change and showcase examples of cities that reached a tipping point and turned the corner by instituting innovative policies and planning regimes.
- 15.5 Cities are hotspots for environmental challenges, accounting for 60 to 80 per cent of global energy consumption, 70 per cent of global greenhouse gas emissions and over 70 per cent of resource use.³ The urban poor suffer the worst consequences of disasters related to climate change and natural and human-made crises. UN-Habitat will support cities in reshaping urban planning solutions that are

³ International Energy Agency, *Empowering Cities for a Net Zero Future: Unlocking Resilient, Smart, Sustainable Urban Energy Systems* (2021).

more sustainable and integrated, that help overcome inequalities and that are supported by innovation and technology.

- 15.6 The deterioration of progress towards the Sustainable Development Goals and the Paris Agreement in the context of interrelated global crises calls for more transformative multilevel action. UN-Habitat will continue to build on its experience of implementing large-scale programmes and projects at the local, national and regional levels to guide technical cooperation work with a demonstrable impact. Through its flagship programmes, UN-Habitat will continue to fast-track integration between its normative and operational work, scaling up and accelerating the impact of the organization. In 2025, with its new strategic plan for the period 2026–2029 being finalized, UN-Habitat will prepare the transition of the flagship programmes listed below in line with the new plan:
- (a) “Sustainable Development Goals Cities”;
 - (b) “RISE-UP: resilient settlements for the urban poor”;
 - (c) “Inclusive cities: enhancing the positive impacts of urban migration”;
 - (d) “Inclusive, vibrant neighbourhoods and communities”;
 - (e) “People-centred smart cities”.
- 15.7 To better meet the needs of Member States and to engage a wider audience, UN-Habitat will continue to strengthen capacity-building initiatives, the digitization of tools and virtual e-learning programmes. In line with its capacity-building strategy for the implementation of the 2030 Agenda for Sustainable Development and the New Urban Agenda, UN-Habitat will focus on localizing the Sustainable Development Goals by identifying and addressing gaps in capacity.
- 15.8 In its catalytic role as a knowledge hub and partner convenor, UN-Habitat will carry out advocacy, communication and outreach activities and mobilize broad-based support for the implementation of the New Urban Agenda. It will operationalize a framework for stronger collaboration with universities and centres of knowledge and research, and continue to leverage advocacy and knowledge platforms, including the Urban Agenda Platform, the World Urban Campaign and key global events such as World Cleanup Day, International Day of Zero Waste, World Cities Day and World Habitat Day, regional ministerial conferences and the ministerial meeting on urbanization and climate change.
- 15.9 As a focal point for sustainable urbanization and human settlements, UN-Habitat will continue to monitor and report on global trends and provide evidence for policymaking, including through the enhanced use of technologies for data collection and analysis, visualization and management of information. It will expand the roll-out of the Global Urban Monitoring Framework and continue to support Member States and stakeholders in monitoring and reporting on the implementation of the New Urban Agenda, including as part of the reporting on the Sustainable Development Goals and towards other global agendas.
- 15.10 With regard to cooperation with other entities at the global, regional, national and local levels, UN-Habitat will continue its close cooperation with international and regional organizations, such as the Organisation for Economic Co-operation and Development, the World Bank, the European Union and regional development banks. UN-Habitat will maintain its focus on partnerships with local authorities, their associations and city networks, grass-roots organizations, foundations, international financial institutions, the private sector and academia to support municipal efforts in the localization of the Sustainable Development Goals and will continue to serve as the secretariat and co-chair of the Local2030 coalition.
- 15.11 With regard to inter-agency coordination and liaison, UN-Habitat will continue to collaborate with the Department of Economic and Social Affairs and the United Nations regional economic and social commissions and strengthen its strategic partnerships with other United Nations agencies, building on the United Nations system-wide strategy on sustainable urban development and agency-specific collaborative frameworks. UN-Habitat will also advance the goals of United Nations reform.

Regional focus will be articulated through the regional development cooperation platforms and issue-based coalitions. UN-Habitat will also deepen its collaboration with the Development Coordination Office to strengthen its impact on sustainable urbanization by working with the resident coordinator system on the common country assessments and United Nations Sustainable Development Cooperation Frameworks.

- 15.12 To pursue stronger integration of environmental sustainability and the protection of biodiversity into urban development, UN-Habitat will continue to strengthen its collaboration with the United Nations Environment Programme in serving as the secretariat for the Secretary General's Advisory Board of Eminent Persons on Zero Waste. It will collaborate with the Office of the United Nations High Commissioner for Refugees, the United Nations Development Programme, the International Organization for Migration, the United Nations Office for Disaster Risk Reduction, the World Food Programme and all relevant United Nations entities and international actors to integrate sustainable urban development into resilience, humanitarian response and urban recovery.
- 15.13 With regard to the external factors, the overall plan for 2025 is based on the following planning assumptions:
- (a) Adequate unearmarked extrabudgetary resources are available to implement the planned work and produce the deliverables;
 - (b) Countries remain committed to the New Urban Agenda and the 2030 Agenda for Sustainable Development;
 - (c) National and local governments continue to request policy advice and technical assistance from UN-Habitat in the development and implementation of their urban legislation, policies, plans and strategies;
 - (d) Urban indicators, data and information are used to formulate policies, with adequate mechanisms available for impact monitoring and performance assessments;
 - (e) Countries in which UN-Habitat delivers large programmes maintain political, economic and social conditions that allow for the implementation of programmes and projects.
- 15.14 UN-Habitat will continue to mainstream social inclusion to address cross-cutting issues relating to women and girls, older persons, persons with disabilities, children and young people. It will also continue to implement platforms and mechanisms to engage youth, such as the UN-Habitat Youth Advisory Board and the one-stop youth resource centres, and develop critical programmes in the areas of livelihoods, public space and climate change, such as the Youth 2030 Cities programme and the Young Gamechangers initiative.
- 15.15 UN-Habitat integrates a gender perspective in its operational activities, deliverables and results, as appropriate, including through its strategic results framework, gender policy and action plan. Furthermore, the Advisory Group on Gender Issues advises the Executive Director on how to promote gender equality and women's empowerment in sustainable urban development. UN-Habitat, in collaboration with UN-Women, will continue to support Member States with policy, legislation, planning and financing instruments to achieve integrated, inclusive and participatory results. For example, UN-Habitat will continue to promote land and housing policies that incorporate a gender perspective and improve tenure security for all, especially women.
- 15.16 In line with the United Nations Disability Inclusion Strategy, UN-Habitat will continue to work with its partners, including the World Blind Union and World Enabled, to integrate disability inclusion into its programmatic work. It will implement an action plan that ensures that disability inclusion is mainstreamed throughout the organization's work, highlight good practices and identify key areas that require capacity development, technical resources and assistance. The action plan will strengthen the established environmental and social safeguards framework that is applied to all projects.

Legislative mandates

15.17 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

3327 (XXIX)	Establishment of the United Nations Habitat and Human Settlements Foundation	76/137	Policies and programmes involving youth
34/114	Global report on human settlements and periodic reports on international cooperation and assistance on human settlements	76/140	Improvement of the situation of women and girls in rural areas
42/146	Realization of the right to adequate housing	76/141	Violence against women migrant workers
53/242	Report of the Secretary-General on environment and human settlements	76/183	Integrating sport into youth crime prevention and criminal justice strategies
S-25/2	Declaration on Cities and Other Human Settlements in the New Millennium	77/161	Promoting zero-waste initiatives to advance the 2030 Agenda for Sustainable Development
56/206	Strengthening the mandate and status of the Commission on Human Settlements and the status, role and functions of the United Nations Centre for Human Settlements (Habitat)	77/170	Ensuring access to affordable, reliable, sustainable and modern energy for all
70/1	Transforming our world: the 2030 Agenda for Sustainable Development	77/173	Implementation of the outcomes of the United Nations Conferences on Human Settlements and on Housing and Sustainable Urban Development and strengthening of the United Nations Human Settlements Programme (UN-Habitat)
71/256	New Urban Agenda	77/212	The right to development
71/327	The United Nations in global economic governance	77/286	World Sustainable Transport Day
72/234	Women in development	78/122	World Cleanup Day
74/237	Eradicating rural poverty to implement the 2030 Agenda for Sustainable Development	78/150	Achieving gender equality and empowering all women and girls for realizing all Sustainable Development Goals
75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system	78/149	The pivotal role of reliable and stable energy connectivity in driving sustainable development
76/136	Promoting social integration through social inclusion	78/172	Inclusive policies and programmes to address homelessness, including in the aftermath of the coronavirus disease (COVID-19)

UN-Habitat Assembly resolutions and decisions

1/2	United Nations System-Wide Guidelines on Safer Cities and Human Settlements	2/6	Localization of the Sustainable Development Goals
1/3	Enhancing capacity-building for the implementation of the New Urban Agenda and the urban dimension of the 2030 Agenda for Sustainable Development	2/7	Adequate housing for all
1/4	Achieving gender equality through the work of the United Nations Human Settlements Programme to support inclusive, safe, resilient and sustainable cities and human settlements	2/8	Urban planning and sustainable infrastructure
2/1	International guidelines on people-centred smart cities	2/9	Creation of a human settlements resilience framework for early warning, foresight, risk reduction, crisis response and post-crisis recovery and reconstruction
2/2	Accelerating the transformation of informal settlements and slums by 2030	2/10	Equitable financing and effective monitoring of the implementation of resolutions adopted by the United Nations Habitat Assembly
2/3	World Cleanup Day	Decision 1/3	Arrangements for the transition towards the new governance structure of the United Nations Human Settlements Programme
2/4	Biodiverse and resilient cities: mainstreaming biodiversity and ecosystem services into urban and territorial planning	Decision 2/1	Extension of the strategic plan for the period 2020–2023 until the year 2025
2/5	Enhancing the interlinkage between urbanization and climate change resilience	Decision 2/2	Dates of the resumed second session of the United Nations Habitat Assembly

Section 15 Human settlements

Decision 2/3	Term of office of the members of the Executive Board and the Bureau of the United Nations Habitat Assembly	Decision 2/4	Stakeholder engagement policy of the United Nations Human Settlements Programme
--------------	--	--------------	---

Executive Board decisions

2022/1	Status of the draft work programme of the United Nations Human Settlements Programme and the draft budget of the United Nations Habitat and Human Settlements Foundation for 2023, and financial, budgetary and administrative matters of the United Nations Human Settlements Programme	2023/2	Normative and operational activities of the United Nations Human Settlements Programme, including reporting on the programmatic activities of the Programme in 2022 and the implementation of subprogrammes, flagship programmes and technical cooperation activities
2022/5	Implementation of the strategic plan for the period 2020–2023; financial, budgetary and administrative matters of the United Nations Human Settlements Programme (UN-Habitat); report of the Joint Inspection Unit on the findings of its review of the management and administration of UN-Habitat; and draft work programme and budget for 2023	2023/5	Implementation of the normative and operational activities of UN-Habitat; reporting on the programmatic activities of the Programme in 2022; implementation of subprogrammes, flagship programmes and technical cooperation activities
		2023/6	Implementation of the outcomes of the second session of the UN-Habitat Assembly including preparation of the strategic plan for the period 2026–2029

Committee of Permanent Representatives recommendations

1/1	Implementation of the resolutions adopted by the United Nations Habitat Assembly at its first session, in May 2019	1/3	Quadrennial report of the Secretary-General on the implementation of the New Urban Agenda, the high-level meeting of the General Assembly to assess progress in the implementation of the New Urban Agenda, and the eleventh session of the World Urban Forum
1/2	Implementation of resolution 1/1 on the United Nations Human Settlements strategic plan for the period 2020–2023		

Governing Council resolutions

19/4	Cooperation between the United Nations Human Settlements Programme and the United Nations Environment Programme	23/4	Sustainable urban development through access to quality urban public spaces
19/11	Strengthening the United Nations Habitat and Human Settlements Foundation	23/8	Third United Nations conference on housing and sustainable urban development
20/6	Best practices, good policies and enabling legislation in support of sustainable urbanization and the attainment of internationally agreed development goals	23/10	Future activities by the United Nations Human Settlements Programme in urban economy and financial mechanisms for urban upgrading, housing and basic services for the urban poor
20/16	Enhancing the involvement of civil society in local governance	23/17	Sustainable urban development through expanding equitable access to land, housing, basic services and infrastructure
21/3	Guidelines on decentralization and strengthening of local authorities	24/2	Strengthening the work of the United Nations Human Settlements Programme on urban basic services
21/7	Sustainable public-private partnership incentives for attracting large-scale private-sector investment in low-income housing	24/5	Pursuing sustainable development through national urban policies
21/8	Africa fund/financing mechanism on slum prevention and upgrading	24/7	Making slums history: a worldwide challenge
21/9	Women’s land and property rights and access to finance	24/9	Inclusive national and local housing strategies to achieve the Global Housing Strategy paradigm shift
21/10	Strengthening the Habitat and Human Settlements Foundation: experimental financial mechanisms for pro-poor housing and infrastructure	24/11	Promoting sustainable urban development by creating improved economic opportunities for all, with special reference to youth and gender
22/9	South-South cooperation in human settlements	24/13	Country activities by the United Nations Human Settlements Programme
23/3	Support for pro-poor housing		

Part IV International cooperation for development

25/1	Contribution of the United Nations Human Settlements Programme to the post-2015 development agenda in order to promote sustainable urban development and human settlements	25/7 26/4 26/5	United Nations Human Settlements Programme governance reform Promoting safety in cities and human settlements Regional technical support on sustainable housing and urban development by regional consultative structures
25/2	Strengthening national ownership and operational capacity	26/6	World Urban Forum
25/6	International guidelines on urban and territorial planning	26/9	Human settlements development in the Occupied Palestinian Territory

Economic and Social Council resolutions

2003/62	Coordinated implementation of the Habitat Agenda	2022/7	Inclusive and resilient recovery from COVID-19 for sustainable livelihoods, well-being and dignity for all: eradicating poverty and hunger in all its forms and dimensions to achieve the 2030 Agenda
2017/24	Human settlements		
2020/7	Affordable housing and social protection systems for all to address homelessness	2022/18	Mainstreaming a gender perspective into all policies and programmes in the United Nations system

Subprogramme 1**Reduced spatial inequality and poverty in communities across the urban-rural continuum***General Assembly resolutions*

67/291	Sanitation for All	77/183	Eradicating rural poverty to implement the 2030 Agenda for Sustainable Development
69/213	Role of transport and transit corridors in ensuring international cooperation for sustainable development	78/148	Strengthening the links between all modes of transport to achieve the Sustainable Development Goals
74/299	Improving global road safety	78/172	Inclusive policies and programmes to address homelessness, including in the aftermath of the coronavirus disease (COVID-19)
75/212	United Nations Conference on the Midterm Comprehensive Review of the Implementation of the Objectives of the International Decade for Action, "Water for Sustainable Development", 2018–2028	78/206	The human rights to safe drinking water and sanitation
76/255	Integration of mainstream bicycling into public transportation systems for sustainable development		

Subprogramme 2**Enhanced shared prosperity of cities and regions***General Assembly resolutions*

77/211	The right to privacy in the digital age	78/160	Science, technology and innovation for sustainable development
78/132	Information and communications technologies for sustainable development		

Governing Council resolutions

**Subprogramme 3
Strengthened climate action and improved urban environment**

General Assembly resolutions

63/217	Natural disasters and vulnerability	77/162	Promoting sustainable consumption and production patterns for the implementation of the 2030 Agenda for Sustainable Development, building on Agenda 21
67/263	Reliable and stable transit of energy and its role in ensuring sustainable development and international cooperation	77/167	Implementation of the Convention on Biological Diversity and its contribution to sustainable development
73/228	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States	78/152	Disaster risk reduction
75/218	Implementation of the United Nations Convention to Combat Desertification in Those Countries Experiencing Serious Drought and/or Desertification, particularly in Africa	78/153	Protection of global climate for present and future generations of humankind
		78/157	Ensuring access to affordable, reliable, sustainable and modern energy for all

Governing Council resolutions

22/3	Cities and climate change
------	---------------------------

United Nations Environment Assembly of the United Nations Environment Programme resolutions

5/5	Nature-based solutions for supporting sustainable development
-----	---

**Subprogramme 4
Effective urban crisis prevention and response**

General Assembly resolutions

69/280	Strengthening emergency relief, rehabilitation and reconstruction in response to the devastating effects of the earthquake in Nepal	74/118	Strengthening of the coordination of emergency humanitarian assistance of the United Nations
69/283	Sendai Framework for Disaster Risk Reduction 2015–2030	76/214	Culture and sustainable development
73/230	Effective global response to address the impacts of the El Niño phenomenon	77/176	International migration and development
74/115	International cooperation on humanitarian assistance in the field of natural disasters, from relief to development	78/185	Assistance to refugees, returnees and displaced persons in Africa
		78/205	Protection of and assistance to internally displaced persons

Governing Council resolutions

20/17	Post-conflict, natural and human-made disaster assessment and reconstruction	26/2	Enhancing the role of UN-Habitat in urban crisis response
23/18	Natural disaster risk reduction, preparedness, prevention and mitigation as a contribution to sustainable urban development		

Deliverables

15.18 Table 15.1 lists all cross-cutting deliverables of the programme.

Table 15.1
Cross-cutting deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	–	1	–
1. Implementation of the outcome of the United Nations Conference on Housing and Sustainable Urban Development (Habitat III) and strengthening of the United Nations Human Settlements Programme (UN-Habitat): report of the Secretary-General	1	–	1	–
Substantive services for meetings (number of three-hour meetings)	29	34	15	30
Meetings of:				
2. The governing bodies (UN-Habitat Assembly, Executive Board and Committee of Permanent Representatives)	26	30	12	26
3. The Committee for Programme and Coordination	1	1	1	1
4. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
5. The Fifth Committee	1	1	1	1
6. The General Assembly on the review of the implementation of the New Urban Agenda	–	1	–	1
B. Generation and transfer of knowledge				
Publications (number of publications)	2	1	2	1
7. World Cities Report	1	–	1	–
8. UN-Habitat annual report	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: consultations with all Member States on resolutions of the General Assembly and of the Economic and Social Council; briefings to all Member States on sustainable development issues and processes.				
Databases and substantive digital materials: Global Urban Indicators database with approximately 2,700 users updated with new data for 114 urban-related indicators; Global Urban Monitoring Framework, an indicator framework to monitor the implementation of the quadrennial comprehensive policy review and progress towards achieving the Sustainable Development Goals; housing indicators platform.				
D. Communication deliverables				
Outreach programmes, special events and information materials: materials and flyers about UN-Habitat and ministerial meetings at the Conference of the Parties to the United Nations Framework Convention on Climate Change; materials and reports for the commemoration of international days and events, including Urban October.				
External and media relations: interviews and commentaries about UN-Habitat focus themes: housing, urban climate action, urban crisis response, Sustainable Development Goal localization and financing for local implementation of the Goals; articles and blogs about Sustainable Development Goal 11 and local action to achieve sustainable cities and communities.				
Digital platforms and multimedia content: Urban Agenda Platform; materials on housing, urban climate action, urban crisis response, Sustainable Development Goal localization and financing for local implementation of the Goals, social media materials for the UN-Habitat annual report, and online and social media materials for sustainable urban development topics at the General Assembly.				

Evaluation activities

- 15.19 The following evaluations completed in 2023 have guided the proposed programme plan for 2025:
- (a) Thematic evaluation by the Office of Internal Oversight Services of United Nations Secretariat support to the Sustainable Development Goals ([E/AC.51/2023/3](#));
 - (b) Evaluation conducted by UN-Habitat of the World Urban Forum programme for the period 2018–2023;
 - (c) Midterm or final evaluations conducted by UN-Habitat of 12 projects at the regional and country levels.

- 15.20 In response to the results of the evaluations referenced above, UN-Habitat has taken their outcomes and lessons learned into account for the proposed programme plan for 2025. Based on the recommendations of the evaluation of the Urban Pathways project, the project has been scaled up. The results and recommendations from the evaluation of outcomes and impacts of the World Urban Forum for the period 2018–2023 have fed into the programming of the next six-year programme cycle of the Forum.
- 15.21 The following evaluations to be conducted by UN-Habitat are planned for 2025:
- (a) Final evaluation of the UN-Habitat strategic plan for the period 2020–2025;
 - (b) Ten project and programme evaluations;
 - (c) Two thematic evaluations on issues related to gender equality and youth;
 - (d) One country programme evaluation.

Programme of work

Subprogramme 1

Reduced spatial inequality and poverty in communities across the urban-rural continuum

Objective

- 15.22 The objective, to which this subprogramme contributes, is to reduce inequality between and within communities and to reduce poverty in communities across the urban-rural continuum through increased and equal access to basic services, sustainable mobility, accessible and safe public space, increased and secure access to land, adequate and affordable housing and effective human settlements growth and regeneration.

Strategy

- 15.23 To contribute to the objective, the subprogramme will:
- (a) Develop standards, tools and guidelines for local and national governments, and engage them in policy dialogues, learning and best practices, in addition to capacity-building with regard to adequate housing, infrastructure, planning, water, sanitation, mobility, waste management and energy, localizing the Sustainable Development Goals and designing low-emission and climate-resilient actions;
 - (b) Provide technical support to Member States with policy, legislation, strategic planning and financing instruments to implement integrated, inclusive, low-emission, climate-resilient and gender-sensitive land and housing policies, strategies and action plans, and provide technical support to an intergovernmental expert working group on accelerating progress towards the universal achievement of adequate housing;
 - (c) Advocate for adequate, safe and affordable housing, a more integrated, comprehensive and inclusive approach to housing, including the prevention of unlawful forced evictions, and the implementation of sustainable building codes, regulations and certification tools;
 - (d) Provide technical assistance to national and local governments seeking to implement sustainable and inclusive urban transformation, expansion and regeneration, and support partner cities in institutionalizing urban regeneration and adequate housing through planning, policies and equitable solutions, in line with the International Guidelines on Urban and Territorial Planning and the principles of sustainable urbanization;

- (e) Support national and local governments in addressing structural inequalities, developing technical guidelines, scaling up access to basic and social services and infrastructure, sustainable mobility and safe public spaces, taking transformative actions targeting homelessness, slums and informal settlements, and putting the most vulnerable first, by co-producing programmes with a multilevel governance and partnership approach and initiating learning, innovations and long-term commitments towards inclusive and sustainable urbanization.
- 15.24 In doing so, the subprogramme will assist Member States in making progress towards achieving Sustainable Development Goals 1, 2, 5, 6, 7, 10, 11, 12, 14, 15 and 17.
- 15.25 The above-mentioned work is expected to result in:
- (a) Safer, more accessible and inclusive public spaces integrated into national and local urban policies and sectorial plans, with diverse stakeholders supporting the localization of transformative actions, in particular for the most vulnerable;
 - (b) Increased accessibility to low-emission, adequate and affordable housing, and strengthened capacities of policymakers, in particular local and regional governments, to implement sustainable transformative actions, including land governance systems, while leaving no one behind;
 - (c) Sustainable, integrated transformation and regeneration of urban areas into socially and economically inclusive and climate resilient neighbourhoods that offer improved quality of life to all, including improved access to basic services.

Programme performance in 2023

Integral urban operations in Central America for enhancing the quality of life in slums and informal settlements

- 15.26 UN-Habitat launched the Mesoamerica programme in Central America and the Dominican Republic, along with the Central American Social Integration Secretariat, as a contribution to post-pandemic recovery in the region. In 2023, a participatory spatial approach was applied that informed multisectoral projects within the framework of integral urban operations for enhancing the quality of life of people in informal settlements. The intervention is aimed at combating multidimensional poverty and spatial segregation through the generation of urban data, urban planning at the local level, capacity-building, advisory services to transform informal settlements, community participation and the identification of project financing. A project is currently being developed in seven slums in four countries (Costa Rica, El Salvador, Guatemala and Honduras), leading to improved quality of life and benefiting 29,500 people, who enjoy improved infrastructure, spaces and services in the selected neighbourhoods. With the support of local authorities, civil society, the private sector and academia, the programme's projects facilitated the participation of more than 2,000 people and trained another 2,256 people during more than 30 workshops in 2022 and 2023.
- 15.27 Progress towards the objective is presented in the performance measure below (see figure 15.I).

Figure 15.I
Performance measure: number of persons empowered by capacity-building and participatory activities in more than 30 workshops in Central America and the Dominican Republic (annual)

Planned results for 2025

Result 1: enhanced and expanded service delivery by local water and sanitation service providers

Programme performance in 2023 and target for 2025

- 15.28 The subprogramme’s work contributed to 50 local sanitation operators providing more inclusive sanitation services, which exceeded the planned target of 40 local sanitation operators.
- 15.29 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 15.II).

Figure 15.II
Performance measure: number of local sanitation operators providing more inclusive sanitation services (cumulative)

Result 2: inclusive cities and communities through urban regeneration

Programme performance in 2023 and target for 2025

- 15.30 The subprogramme’s work contributed to the adoption and implementation of urban and territorial renewal and regeneration initiatives in 32 partnering cities, which met the planned target.
- 15.31 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 15.III).

Figure 15.III
Performance measure: number of partner cities that have implemented urban and territorial regeneration initiatives (cumulative)

Result 3: cities and countries commit to providing adequate housing for all and addressing homelessness and housing exclusion

Proposed programme plan for 2025

- 15.32 With the rise of urbanization, demand for adequate housing has increased exponentially. Beyond four walls and a roof, adequate housing is a place to live in security and dignity, with safe and stable access to water and sanitation, transportation, employment, schools and other social services. The subprogramme has supported evidence-based frameworks, enhancing stakeholder engagement to facilitate adequate and sustainable housing models.

Lessons learned and planned change

- 15.33 The lesson for the subprogramme was the need to foster a more coordinated approach to achieving inclusive and sustainable housing systems that is anchored in strong implementation and monitoring mechanisms. In applying the lesson, the subprogramme will promote collaboration between governments, civil society and academia, as well as persons with lived experiences of homelessness and housing exclusion, to strengthen policies on homelessness and improve monitoring mechanisms. This will include data collection and analysis with an expanded set of indicators that enable monitoring of the implementation of efforts towards the realization of the right to adequate housing. The Housing for All knowledge platform will serve as a global hub for disseminating housing-related knowledge and showcasing success stories and best practices. The subprogramme will also support the development of governance guidelines and implementation tools to address inadequate housing for the most vulnerable, prevent spatial segregation and ensure socioeconomic integration. From 2024 onwards, work in Eastern Europe and Central Asia is being aimed at equipping cities to develop context-specific solutions aligned with national housing policies and promoting adequate housing.
- 15.34 Expected progress towards the objective is presented in the performance measure below (see figure 15.IV).

Figure 15.IV

Performance measure: number of partner cities and countries that have adopted strategies towards ending homelessness and ensuring sustainable access to adequate housing for all (cumulative)

Deliverables

15.35 Table 15.2 lists all deliverables for the subprogramme.

Table 15.2

Subprogramme 1: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	–	–
Report of the Secretary-General on inclusive social development policies and programmes to address homelessness	1	1	–	–
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	36	36	38	38
1. Projects on urban basic services: mobility, water and sanitation, energy and solid waste management and safe, inclusive and accessible public space	12	12	14	15
2. Projects on development of national and local policies on urban heritage, historical landscape and culture	1	1	1	1
3. Projects on housing, slum upgrading, innovative financing for housing and land readjustment and on integrated urban and territorial renewal and regeneration	8	8	9	9
4. Projects on land tenure security, land-based financing and implementation of the Secretary-General's guidance note on land and conflict	7	7	7	6
5. Projects on integrated urban and territorial planning and effective planning laws	6	6	5	6
6. Projects on urban monitoring, evidence-based policies for crime prevention and community safety and social cohesion in cities and human settlements	2	2	2	2
Seminars, workshops and training events (number of days)	53	53	57	59
7. Training sessions on urban basic services: mobility, water and sanitation, energy and solid waste management	20	20	23	25
8. Training sessions on slum upgrading, housing, heritage in urban development, regeneration and urban growth, urban design governance, public space, urban planning, design labs, crime prevention and urban safety	12	12	13	14

11. Training sessions on policy, planning and design, governance, legislation and finance and data collection	8	8	7	7
12. Training sessions on land and conflict and on land tenure, governance and financing; and expert group meetings on urban land governance	3	3	3	2
Publications (number of publications)	1	1	3	6
13. Publication on land tenure and land degradation	–	–	1	1
14. Publication on land governance, finance and territorial planning	–	–	1	2
15. Publication on affordable and sustainable housing, including homelessness and slum transformation	1	1	1	2
16. Global report on localizing the Sustainable Development Goals and the state of water and sanitation service providers	–	–	–	1
Technical materials (number of materials)	11	11	13	15
17. Compendium of policies, plans and good practices on urban planning, regeneration, heritage conservation and extension	1	2	1	1
18. Best practices, guides and case studies on increased and equal access to basic services, sustainable mobility and public space	2	1	3	4
19. Guide for land management and spatial plans for poverty reduction and spatial equality	1	5	1	1
20. Guidelines on the right to adequate housing and prevention of homelessness among those in vulnerable situations, including migrants	1	–	1	1
21. Guide series for innovative land, legal and financial mechanisms in relation to conservation and regeneration	1	–	1	1
22. Toolkits, housing profiles and technical guides for city leaders on planning, on managing and implementing affordable and sustainable housing and on slum upgrading programmes	2	2	2	3
23. Guides and tools to improve land management and tenure security	1	1	1	1
24. Guidelines and handbooks on slum upgrading solutions	2	–	2	2
25. Neighbourhood planning guidelines on participation and inclusive regeneration	–	–	1	1

C. Substantive deliverables

Consultation, advice and advocacy: technical advice to requesting Member States on monitoring and implementation of the New Urban Agenda, the Sustainable Development Goals and UN-Habitat Assembly resolutions; urban basic services and integrated inclusive slum upgrading; inclusive and integrated urban planning; the right to housing and tenure security for all, urban law reform and effective urban regeneration and growth management and urban land administration and management.

Databases and substantive digital materials: UrbanLex database; global knowledge platforms on adequate housing; digital materials on global commitments related to land, housing, urban basic services, mobility, energy, water and sanitation, solid waste management, air quality, climate change mitigation and adaptation and cultural heritage; African Clean Cities Platform and the Waste Wise Cities platform.

D. Communication deliverables

Outreach programmes, special events and information materials: networks, including the Global Network of Public Space; a dedicated housing campaign under the World Urban Campaign umbrella; Best Practices Awards; global initiative on transforming informal settlements and slums by 2030, and brochures, leaflets and spotlights on slum upgrading, urban regeneration, public space and housing, urban land governance and management, and urban basic services.

External and media relations: media kits, press releases, web stories and social media content on inclusive cities.

Digital platforms and multimedia content: video documentaries, infographics, webinars and open digital platforms on urban safety, heritage, regeneration and urban growth.

Subprogramme 2

Enhanced shared prosperity of cities and regions

Objective

- 15.36 The objective, to which this subprogramme contributes, is to enhance the shared prosperity of cities and regions through improved spatial connectivity and productivity, increased and equitably distributed locally generated revenue and expanded deployment of frontier technologies and innovation.

Strategy

- 15.37 To contribute to the objective, the subprogramme will:
- (a) Support Member States and other partners through the formulation of national urban policies and related legal, financial and implementation frameworks integrated into whole-of-government planning, policy and financing frameworks; knowledge transfer; capacity-building; and the development of tools on urban and rural territorial planning and design;
 - (b) Provide technical assistance, capacity-building and advisory services to cities on:
 - (i) Developing participatory and accountable budgeting approaches, optimizing local revenue systems through data collection and the development of municipal databases, and leveraging private sources of capital for sustainable urban development;
 - (ii) Effectively procuring, testing and implementing people-centred frontier technologies and innovations such as sensor networks, machine-to-machine communication, artificial intelligence, virtual and augmented reality, geographic information systems, remote sensing and big data processing and visualization;
 - (c) Build on the lessons learned from challenges to local revenue generation exposed by global risks to develop tailored policies and technical assistance, with a focus on effective local public financial management.
- 15.38 In doing so, the subprogramme will assist Member States in making progress towards Sustainable Development Goals 1, 8, 9, 10 and 11.
- 15.39 The above-mentioned work is expected to result in:
- (a) Balanced territorial development and better-connected human settlements while contributing to improved social inclusion, poverty reduction and climate action;
 - (b) Enactment by local authorities of institutional and legal reforms conducive to the generation of additional financial resources, including through public-private partnerships, land-based revenue and financing tools;
 - (c) Strengthened urban-level action to address inequalities and bridge social, spatial and digital divides.

Programme performance in 2023

Improved financial position of local and national governments to accelerate achievement of the Sustainable Development Goals

- 15.40 The subprogramme assisted local and national governments in mobilizing adequate funding or financing for local actions to achieve the Sustainable Development Goals. It did so by supporting cities in generating their own source revenue, improving local expenditure efficiency and optimizing financial management capacity. The financial position of local governments is determined by the

growth in various sources of revenue, debt management, expenditure commitments and the adoption of enhanced financial practices. The subprogramme also helped foster partnerships and distribute existing funding to where it can deliver the greatest impact. For instance, it launched the digitalization and creation of courses on its tools, in particular the rapid own-source revenue analysis tool, making it openly accessible to cities. In collaboration with the World Economic Forum, the subprogramme developed the Global Partnership for Local Investment, a platform for sharing best practice in public-private collaboration for sustainable urban development.

15.41 Progress towards the objective is presented in the performance measure below (see table 15.3).

**Table 15.3
Performance measure**

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
More than 10 local governments in more than five countries improved their financial position	More than 20 local governments in more than seven countries improved their financial position	More than 30 local governments in more than 10 countries improved their financial position
More than five national governments improved their financial position	More than 15 national governments improved their financial position	More than seven local and national governments improved their financial position

Planned results for 2025

Result 1: regional spatial development plans in Ethiopia for improved prosperity and balanced socioeconomic development

Programme performance in 2023 and target for 2025

15.42 The subprogramme’s work contributed to 9 regional authorities endorsing regional spatial development plans, which did not meet the planned target of 10 regional authorities. The target was not met due to the limited accessibility of some regions, which caused delays in logistical arrangements.

15.43 The objective and the target for 2025 are presented in the performance measure below (see table 15.4).

**Table 15.4
Performance measure**

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Regional authorities in Ethiopia support the conduct of local economic and spatial studies in 10 regions	Enhanced capacity of planning and economic development institutions in 10 regional states in Ethiopia on formulating and implementing regional spatial development plans	Regional authorities endorsed nine regional spatial development plans	Regional authorities endorse 10 regional spatial development plans	Regional authorities develop 12 regional spatial development plans

Result 2: voluntary local reviews to enhance the shared prosperity of cities and regions globally through Sustainable Development Goal localization

Programme performance 2023 and target for 2025

- 15.44 The subprogramme’s work contributed to the development and publication of 12 voluntary local reviews by local and regional governments with the subprogramme’s direct support, which exceeded the planned target of 10 such reviews, and to the monitoring of the development of 29 voluntary local reviews globally, which did not meet the planned target of 60 such reviews. The target was not met due to limited awareness and the competing priorities of local governments.
- 15.45 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 15.V).

Figure 15.V
Performance measure: number of voluntary local reviews prepared by local and regional governments (annual)

Result 3: digital transformation for sustainable urban development

Proposed programme plan for 2025

- 15.46 The subprogramme has been supporting cities in their digital transformation, including through a series of “playbooks” with guidance on the development of smart cities covering aspects such as digital public infrastructure, the co-creation of solutions and the centring of people in smart cities. In its resolution 2/1, the United Nations Habitat Assembly recognized the profound and dynamic impact that digitalization and smart cities are having on human settlements and human lives and requested UN-Habitat to develop international guidelines on people-centred smart cities.

Lessons learned and planned change

- 15.47 The lesson for the subprogramme was to leverage existing analysis and tools developed by the subprogramme to develop the international guidelines on people-centred smart cities. In applying the lesson, the subprogramme will build on its “playbooks” to formulate the guidelines and pilot their application in selected cities. Through the guidelines and piloting, the subprogramme will seek to provide a clear pathway on how cities can leverage smart solutions focusing on people-centred approaches.
- 15.48 Expected progress towards the objective is presented in the performance measure below (see table 15.5).

Table 15.5
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Five cities adopted people-centred smart city strategies	Thirty cities adopted people-centred smart city strategies	United Nations Habitat Assembly adopted resolution 2/1 Fifteen cities developed people-centred smart city strategies and plans	Twenty-five cities pilot strategies, plans and projects to inform the development of the international guidelines on people-centred smart cities	The international guidelines on people-centred smart cities are endorsed by the UN-Habitat Assembly

Deliverables

15.49 Table 15.6 lists all deliverables for the subprogramme.

Table 15.6
Subprogramme 2: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	29	29	27	27
1. Projects on spatial connectivity, urban policies and spatial frameworks, urban planning and design, urban-rural linkages and integrated territorial development	14	14	13	13
2. Projects on spatial productivity, local economic development, urban and municipal finance, financing urban basic services and infrastructure	7	7	6	6
3. Projects on best practices, centres of excellence, university partnerships, prosperity indices, frontier technologies and legal and governance frameworks for sustainable, inclusive and innovative development of cities and regions	8	8	8	8
Seminars, workshops and training events (number of days)	39	39	41	40
4. Training events and dialogues on spatial connectivity, urban planning and design, metropolitan planning, urban and rural linkages, action planning, urban and territorial planning and national urban policies	25	25	26	26
5. Training events and workshops on frontier technologies and innovation, best practices, legal and governance frameworks and prosperity indices for sustainable urban development and implementation of the New Urban Agenda and the Sustainable Development Goals	6	6	6	6
6. Training events and workshops on urban productivity, local economic development, urban and municipal finance, public financial management and local governance	8	8	9	8
Publications (number of publications)	2	2	2	2
7. National cities reports	2	2	2	2
Technical materials (number of materials)	11	11	12	12
8. Technical materials on spatial connectivity, urban planning and design, metropolitan planning, urban and rural linkages, action planning, urban and territorial planning, national urban policies and people-centred smart cities.	5	5	6	6
9. Technical materials on spatial productivity, local economic development, urban and municipal finance, financing urban basic services and infrastructure	3	3	3	3

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

10. Technical materials on frontier technologies and innovation, best practices, legal and governance frameworks and prosperity indices for sustainable urban development and implementation of the New Urban Agenda and the Sustainable Development Goals	3	3	3	3
--	---	---	---	---

C. Substantive deliverables

Consultation, advice and advocacy: advisory services to 20 Member States on national urban policy, urban-rural linkages, metropolitan development, territorial development, urban monitoring, financing sustainable urban development, smart cities and private-sector focused engagement frameworks.

Databases and substantive digital materials: national urban policy database comprising approximately 160 countries; compendium of urban-rural linkages case studies; global municipal database, comprising 50 countries and approximately 110 cities.

D. Communication deliverables

Outreach programmes, special events and information materials: brochures, leaflets, profiles and events on national urban policy, urban-rural linkages, metropolitan development, territorial development, urban monitoring, financing sustainable urban development, smart cities and private-sector focused engagement frameworks.

Digital platforms and multi-media content: content for social media.

Subprogramme 3 Strengthened climate action and improved urban environment

Objective

- 15.50 The objective, to which this subprogramme contributes, is strengthened climate action and improved urban environments through reducing greenhouse gas emissions and improving air quality, improving resource efficiency and protecting ecological assets, and the effective adaptation of communities and infrastructure to climate change.

Strategy

- 15.51 To contribute to the objective, the subprogramme will:
- (a) Provide technical support for the development of low-emission and climate-resilient cities and the integration of climate action into domains of sustainable urban development;
 - (b) Provide assistance on sustainable approaches to urban climate action to requesting Member States through innovative technologies, knowledge transfer, capacity-building, data and development of an evidence base, policy advice and peer-to-peer engagement in global and regional networks;
 - (c) Provide assistance to Member States on the integration of the urban dimension in nationally determined contributions, national adaptation plans and other national climate change policies, strategies and plans and support their implementation across all levels of governments;
 - (d) Promote solutions to environmental protection, renovation and restoration through the development of tools, guidelines and field projects;
 - (e) Provide assistance in the formulation of policy and legislation, urban planning and design, multilevel governance and financing instruments, including through its flagship programme entitled “RISE-UP: resilient settlements for the urban poor”, which focuses on mobilizing investments to address climate resilience issues affecting urban communities in vulnerable situations;
 - (f) Support the implementation of global adaptation initiatives, such as the National Adaptation Plan Global Support Programme and the Nationally Determined Contributions Partnership;

- 15.52 In doing so, the subprogramme will assist Member States in making progress towards achieving Sustainable Development Goals 1, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14 and 15.
- 15.53 The above-mentioned work is expected to result in:
- (a) Multidimensional climate action and urban environment planning by Member States and partner cities that reduces greenhouse gas emissions, builds climate resilience of urban systems and communities, preserves, regenerates and restores urban biodiversity and reduces air and water pollution;
 - (b) Mobilization of additional financial resources for adaptation to climate change at the national and subnational levels;
 - (c) Member States' nationally determined contributions and national climate adaptation plans incorporating urban dimensions;
 - (d) More climate- and pandemic-resilient cities, human settlements and communities.

Programme performance in 2023

Multilevel and urban climate action firmly anchored in global climate negotiations

- 15.54 The subprogramme has received a strong endorsement during the second session of the UN-Habitat Assembly. In its resolution 2/5, the Assembly requested UN-Habitat to strengthen its climate change-related work at the city and community level, encouraged Member States to expand multilevel climate action and encouraged the Executive Director to engage with Member States and relevant stakeholders to continue organizing meetings, following the organization of the ministerial meeting on urbanization and climate change. The subprogramme co-organized and co-chaired the first Local Climate Action Summit, along with the presidency of the twenty-eighth session of the United Nations Framework Convention on Climate Change and Bloomberg Philanthropies, which was attended by over 250 mayors and opened by the Secretary-General. The event highlighted the critical role of multilevel climate action. A notable outcome was the Coalition for High-Ambition Multilevel Partnerships for Climate Action pledge, signed by 72 national Governments, which committed themselves to include multilevel action in the outcomes of the twenty-eighth session and to collaborate with subnational governments and other relevant stakeholders for the 2025 revision of the nationally determined contributions. The second ministerial meeting on urbanization and climate change was the curtain-raiser of Multilevel Action, Urbanization and Built Environment/Transport Day. It was attended by over 1,000 participants, including 60 ministers and vice-ministers, of whom 47 made interventions, and 200 mayors and representatives of sub-national governments, as well as representatives of financial institutions and international and community organizations. The highlight was the dialogue series between mayors and ministers, who jointly pledged stronger collaboration in the spirit of multilevel climate action.
- 15.55 Progress towards the objective is presented in the performance measure below (see figure 15.VI).

Figure 15.VI

Performance measure: increased recognition by Member States of the importance of sustainable urban development in addressing climate change, as expressed by strong engagement in the ministerial meetings on urbanization and climate change held on the margins of the sessions of the Conference of the Parties to the United Nations Framework Convention on Climate Change (annual)

Planned results for 2025

Result 1: increased climate resilience of urban communities in Jordan and Lebanon

Programme performance in 2023 and target for 2025

- 15.56 The subprogramme’s work contributed to increased climate resilience of 100,052 community members in Jordan and Lebanon, which did not meet the planned target of 430,000 community members. The target was not met due to challenges experienced in the procurement of building materials.
- 15.57 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 15.VII).

Figure 15.VII

Performance measure: number of people in Jordan, Lebanon and the Syrian Arab Republic who have benefited from climate change adaptation actions identified through the master planning process (cumulative)

Result 2: conservation, management and sustainable use approaches, such as nature-based solutions and ecosystem-based approaches, to improve the livelihoods and resilience of urban poor communities

Programme performance in 2023 and target for 2025

- 15.58 The subprogramme’s work contributed to 32 towns and cities implementing conservation, management and sustainable use approaches, such as nature-based solutions and ecosystem-based approaches, which met the planned target.
- 15.59 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 15.VIII).

Figure 15.VIII
Performance measure: number of towns and cities implementing conservation, management and sustainable use approaches, such as nature-based solutions and ecosystem-based approaches (cumulative)

Result 3: nationally determined contributions increasingly contain urban content

Proposed programme plan for 2025

- 15.60 The subprogramme supports Member States in the enhancement of the urban content of their nationally determined contributions, as ambitious urban action is critical to achieving the mitigation and adaptation goals of the Paris Agreement. Since 2016, the subprogramme has monitored the urban content of those contributions. In 2020, UN-Habitat issued a guide on “Enhancing nationally determined contributions through urban climate action”. Subsequent monitoring reports were presented at the twenty-sixth through twenty-eighth sessions of the Conference of the Parties to the United Nations Framework Convention on Climate Change.

Lessons learned and planned change

- 15.61 The lesson for the subprogramme, based on its 2022 global review of urban climate action, was the need to update guidelines to support the inclusion of urban content in nationally determined contributions and develop more systematic and tailored support for parties, and that international monitoring of progress provides Member States with a scorecard which can help improve policies. In applying the lesson, the subprogramme will provide advisory support for integration and implementation of the urban dimension in nationally determined contributions, with a particular emphasis on the mandated revision of nationally determined contributions in 2025, and will promote the involvement of urban policymakers in national climate change policy development processes, as well as climate policymakers in national urban policy development processes. The subprogramme will also monitor the urban content of nationally determined contributions, provide in-depth analysis

of some of those contributions and expand its analysis to other key national climate policies, such as national adaptation plans.

15.62 Expected progress towards the objective is presented in the performance measure below (see figure 15.IX).

Figure 15.IX

Performance measure: nationally determined contributions with urban content (cumulative)

Deliverables

15.63 Table 15.7 lists all deliverables of the subprogramme.

Table 15.7

Subprogramme 3: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	22	22	28	37
1. Projects on improving urban air quality, the urban environment, climate change mitigation, and increased access to low-emission basic services, more sustainable infrastructure and buildings	2	2	4	5
2. Projects on policies, legal instruments, plans and strategies for better urban air quality, the urban environment, climate change mitigation and low-emission basic services and sustainable infrastructure and buildings	1	1	2	3
3. Projects on resilience-building and adaptation of communities and infrastructure to climate change, and disaster risk reduction	10	10	–	–
4. Projects on effective adaptation of communities and infrastructure to climate change, informed by participatory processes, assessments of local vulnerabilities and innovative data collection (i.e., remote sensing) and processing	6	6	16	18
5. Projects on policies, legal instruments, plans and strategies for strengthened resilience and effective adaptation of communities and infrastructure to climate change	–	–	4	5
6. Projects on urban environmental management and restoration, biodiversity protection, circular economy and ecosystem services	1	1	2	4

Part IV International cooperation for development

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
7. Projects on urban resource management and efficiency, including circular economy, efficient use of urban land, service provision and sustainable water and waste management, and promotion of cleaner energy and energy efficiency	2	2	2	2
Seminars, workshops and training events (number of days)	43	43	47	61
8. Training events for partners and those in vulnerable situations (e.g., in informal settlements) on climate change mitigation, air quality and low-emission basic services	10	10	12	15
9. Training events on effective adaptation of communities and infrastructure to climate change	25	25	30	35
10. Training events on sustainable city models and their application, sustainable infrastructure and urban planning	5	5	–	6
11. Training on environment and climate dimensions and Sustainable Development Goal monitoring in urban areas	3	3	–	–
12. Training events for national and local government partners and other urban stakeholders on urban environmental management, restoration and renovation, biodiversity protection, circular economy and ecosystem services.	–	–	5	5
Publications (number of publications)	3	3	4	6
13. Publications on climate change mitigation and air quality	1	1	2	2
14. Publications on effective adaptation of communities of slums and other urban communities in vulnerable situations in urban neighbourhoods, and infrastructure, to climate change	1	1	1	2
15. Publications on improved low-emission urban services and resource efficiency (e.g. focusing on technological innovation)	1	1	1	2
Technical materials (number of materials)	5	5	8	10
16. Technical materials on improved resource efficiency and protection of ecological assets, including sectoral materials	1	1	2	2
17. Technical materials on climate change mitigation and air quality	1	1	2	2
18. Technical materials on climate action, basic services or environment in human settlements	1	1	2	2
19. Technical materials on national, regional and local guidelines, plans, coordination mechanisms and strategies on climate action, the urban environment, ecosystems and biodiversity, ecological assets and ecosystem services	1	1	1	2
20. Technical materials on improved low-emission urban services, resource efficiency and (electric) mobility solutions and infrastructure (including monitoring)	1	1	1	2

C. Substantive deliverables

Consultation, advice and advocacy: advisory services to 20 Member States on reducing urban greenhouse gas emissions to achieve climate change mitigation and adaptation, improving air quality and low-emission urban services, improving resource efficiency and protecting ecological assets.

Databases and substantive digital materials: databases on urban climate- or environment-relevant subjects, and simulations, including a global database on the urban dimension of nationally determined contributions; urban climate resilience frameworks in Southern Africa, ecosystems-based adaptation solutions in South-East Asia, the Arab region and Latin America and the Caribbean and a toolbox for urban biodiversity solutions; e-mobility toolbox supporting the shift to electric mobility.

D. Communication deliverables

Outreach programmes, special events and information materials: brochures, campaign and events on greenhouse gas emissions and air quality, resource efficiency, protection of ecological assets and effective adaptation of communities and infrastructure to climate change.

External and media relations: press articles on climate action and the urban environment.

Digital platforms and multimedia content: websites and content for social media accounts; multimedia content on urban climate- or environment-relevant subjects.

Subprogramme 4

Effective urban crisis prevention and response

Objective

- 15.64 The objective, to which this subprogramme contributes, is to enhance urban crisis prevention and response and advance social integration and inclusive communities as well as improved living standards and the inclusion of migrants, refugees, internally displaced persons and returnees.

Strategy

- 15.65 To contribute to the objective, the subprogramme will:
- (a) Engage in-country comprehensive, participatory and inclusive operational programmes that respond to crises, establishing fit-for-purpose land administration aimed at the achievement of tenure security for all in crisis-affected areas, while supporting measures for national urban frameworks;
 - (b) Support Member States in adopting evidence-based recovery approaches, area-based approaches and community participatory processes while ensuring equitable representation;
 - (c) Build the capacity of national, regional and local actors to increase social cohesion, reduce discrimination in urban crisis situations and prevent disaster risk, including through foresight and early warning;
 - (d) Prioritize improved living standards and the inclusion of migrants, refugees, internally displaced persons and returnees by providing crisis-response expertise and supporting integrated urban development strategies for host communities and the displaced;
 - (e) Develop evidence-based local disaster risk reduction and resilience strategies and support their implementation in target cities and territories.
- 15.66 In doing so, the subprogramme will assist Member States in making progress towards achieving Sustainable Development Goals 1, 5, 8, 9, 10, 11, 13 and 16.
- 15.67 The above-mentioned work is expected to result in:
- (a) Increased community participation in crisis-affected areas in local decision-making related to recovery, thereby ensuring social inclusion;
 - (b) Increased number of cities offering secure tenure, sustainable basic services, adequate housing, safety and security for the displaced and host communities;
 - (c) Reduced multidimensional risks and increased protection for those in vulnerable situations in cities;
 - (d) Strengthened city-level infrastructure analysis and decision-making, with a focus on resilience, in particular in crisis settings.

Programme performance in 2023

Building urban climate resilience in South-Eastern Africa

- 15.68 Cities in South-East Africa faced increased vulnerability to natural disasters, in particular severe tropical storms and cyclones, which resulted in the destruction of numerous homes, significant casualties and more than 20,603 persons displaced across Madagascar, Malawi and Mozambique. Despite the strong commitment of national and local authorities to reducing vulnerabilities and addressing immediate needs, challenges persist in implementing risk-mitigation measures. The subprogramme has been building the resilience and adaptability of local communities through early

warning systems, conservation, management and sustainable use approaches, such as nature-based solutions and ecosystem-based approaches, as well as through the provision of emergency shelters and infrastructure reconstruction. In Madagascar, a safe haven in Morondava provided shelters for 200 people during severe Tropical Storm Cheneso. The subprogramme also constructed an elevated road, rebuilt three bridges and initiated the development of green spaces in urban areas and mangrove rehabilitation. Efforts are under way to promote and replicate successful resilience measures nationwide. In 2022, the project had reached 6.5 per cent of the city's total population (3,900 inhabitants out of 60,000). By its third year of implementation (2023), the project had reached 30 per cent of the city's population, benefiting 17,850 inhabitants. In Malawi, the subprogramme has been implementing and promoting disaster-proof techniques for safer schools, hospitals and housing. Two evacuation centres were built in Zomba. As of 2022, the project's activities had benefited 64 per cent of the total population, reaching 100,000 inhabitants out of 156,000. In 2023, the number of beneficiaries increased by 10,000, to a total of 71 per cent of the city's population. In Mozambique, the subprogramme has put in place early warning systems and provided 39,635 people in Chokwe with resilient basic services and infrastructure. Capacity-building initiatives have been undertaken to empower local communities in assessing and addressing challenges related to climate change. In 2022, the project reached 32 per cent of the city's total population (19,853 out of 61,666 inhabitants). By 2023, it had benefited a total of 39,635 inhabitants, or 64 per cent of the city's population.

15.69 Progress towards the objective is presented in the performance measure below (see figure 15.X).

Figure 15.X

Performance measure: number of persons targeted by the project benefiting from resilient basic services and infrastructure (cumulative)

Planned results for 2025

Result 1: strengthened urban recovery and resilience and improved access to basic services in the Syrian Arab Republic

Programme performance in 2023 and target for 2025

- 15.70 The subprogramme's work contributed to the rehabilitation of nine neighbourhoods and improved access to basic services in two cities in the Syrian Arab Republic, which met the planned target.
- 15.71 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 15.8).

Table 15.8
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Municipal authorities and local communities supported to develop neighbourhood action plans for nine neighbourhoods in two cities in the Syrian Arab Republic through joint participatory area-based planning	Improved physical access to seven neighbourhoods in four cities in the Syrian Arab Republic and 50 neighbourhood action plans developed by municipal authorities and local communities for the rehabilitation of water, sanitation and waste management services	Nine neighbourhoods rehabilitated and access to basic services improved in two cities in the Syrian Arab Republic	Neighbourhood action plans developed or updated in two cities. Five rehabilitated neighbourhoods and improved access to basic services in two cities in the Syrian Arab Republic	Neighbourhood action plans developed or updated in two cities, five neighbourhoods rehabilitated and access to basic services improved in two cities in the Syrian Arab Republic

Result 2: enhanced sustainable solutions to migration

Programme performance in 2023 and target for 2025

- 15.72 The subprogramme’s work contributed to the adoption of context-specific responses to urban migration by five countries, which met the planned target.
- 15.73 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 15.XI).

Figure 15.XI
Performance measure: number of countries adopting a context-specific response to urban migration and displacement (cumulative)

Result 3: sustainable integration of displaced communities in urban areas in Somalia

Proposed programme plan for 2025

15.74 Around 2.6 million people in Somalia face displacement due to drought, flooding and armed conflict, and gravitate towards cities that struggle to manage the influx. Urban areas receive newly displaced people, who spontaneously settle in informal settlements on largely private lands with a lack of tenure security, placing them at risk of forced eviction. The subprogramme supports local and national authorities in implementing durable solutions to address internal displacement challenges in Somalia, including by formalizing land tenure through title deeds to facilitate the integration of displaced communities.

Lessons learned and planned change

15.75 The lesson for the subprogramme was the need to integrate a development lens when formulating durable solutions to displacement. Apart from protection, food and shelter, internally displaced persons need longer-term solutions, including access to housing, basic services and income-generating activities. In applying the lesson, the subprogramme will support local governments, through its capacity-building and technical assistance, in addressing systemic governance challenges and opportunities and developing plans and land-related policies, with a focus on urban planning, tenure security and land governance. This support will enable local governments to manage rapid urban growth brought on by displacement and ensure the sustainable integration of displaced communities by creating an enabling environment for securing social infrastructure and basic services.

15.76 Expected progress towards the objective is presented in the performance measure below (see figure 15.XII).

Figure 15.XII
Performance measure: number of land title deeds issued in Somalia in support of integrating displaced communities (cumulative)

Deliverables

15.77 Table 15.9 lists all deliverables of the subprogramme.

7. Publication on improved living standards and inclusion of migrants, refugees and internally displaced persons	1	1	–	1
8. Publication on enhanced resilience of the built environment and infrastructure	1	1	–	–
Technical materials (number of materials)	6	6	7	7
9. Technical materials on enhanced social integration and cohesive communities	2	2	2	2
10. Technical materials on improved living standards and inclusion of migrants, refugees and internally displaced persons	2	2	3	3
11. Technical materials on enhanced resilience of the built environment and infrastructure	2	2	2	2
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services provided to five Member States on urban crisis mitigation and response and on enhancing urban resilience to multi-hazard threats, including impacts from ongoing conflicts, climate change and crises related to migration and displacement.				
Databases and substantive digital materials: urban migration indicators in the UN-Habitat Global Urban Monitoring Framework.				
D. Communication deliverables				
Outreach programmes, special events and information materials: brochures, leaflets and online awareness-raising and digital learning materials on social inclusion and the response to migration and displacement, urban recovery and reconstruction, risk reduction, and early warning systems and foresight.				
Digital platforms and multimedia content: content for social media accounts, blogs and websites related to the social and economic inclusion of migrants, refugees, internally displaced persons and returnees in urban crisis contexts; risk reduction and recovery in urban areas.				

B. Proposed post and non-post resource requirements for 2025

Overview

15.78 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 15.10 to 15.12.

Table 15.10

Overall: evolution of financial resources by object of expenditure

15.79 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 15.13 to 15.15 and figure 15.XIII.

15.80 As shown in tables 15.13 (1) and 15.15, the overall resources proposed for 2025 amount to \$13,081,200 before recosting, reflecting an increase of \$62,800 compared with the approved budget for 2024. Resource changes result from new and expanded mandates. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Figure 15.XIII
Distribution of proposed resources for 2025 (before recosting)

(Number of posts/thousands of United States dollars)

New and expanded mandates

15.81 As shown in table 15.13 (1), resource changes reflect an increase of \$62,800 under subprogramme 1, which provides for the resource requirements related to a report to the General Assembly on the progress achieved and remaining challenges in addressing homelessness requested by the Assembly in its resolution 78/172, entitled “Inclusive policies and programmes to address homelessness, including in the aftermath of the coronavirus disease (COVID-19)”.

Other changes

15.82 As shown in table 15.13 (1), the net effect of the proposed changes is cost-neutral and relates mainly to the operational requirements for travel projected for 2025. In particular, travel resources under subprogramme 4, Effective urban crisis prevention and response, are being redeployed from other subprogrammes to strengthen the participation of UN-Habitat in international conferences on strengthening the resilience of cities.

Policymaking organs

15.83 The resources proposed under this component would provide for the policymaking organs as shown in table 15.16.

Executive direction and management

15.85 The executive direction and management component comprises the Office of the Executive Director, the Office of the Deputy Executive Director, the Office of the Chief of Staff, liaison offices in New York, Brussels and Geneva, the Governing Bodies Secretariat, the Legal Unit, and the Independent Evaluation Unit. The Executive Director is also supported by the Office of the Principal Adviser, which undertakes special assignments.

15.86 The main responsibilities of the executive direction and management component include:

- (a) To provide overall direction, translating the vision of the Executive Director and the guidance from the Executive Board into the Programme's work priorities;
- (b) To foster relationships with Member States and keep abreast of the needs of the Executive Board, the Committee of Permanent Representatives, the UN-Habitat Assembly and stakeholders affiliated with the Economic and Social Council;
- (c) To coordinate the planning and ensure the implementation of the UN-Habitat strategic plan by ensuring the overall effectiveness of the Programme's organizational structure. It provides direction and alignment through the Executive Committee, which is chaired by the Executive Director, whom it assists in providing policy direction in order to ensure the effectiveness of the Programme;
- (d) To contribute, in close cooperation with other United Nations agencies, to discussions on, and the implementation of, United Nations reforms, in particular in relation to improving system-wide coherence in United Nations development work, with a special focus on sustainable urbanization;
- (e) To foster the mainstreaming of gender and disability inclusion into the four subprogrammes of UN-Habitat.

15.87 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, UN-Habitat is integrating environmental management practices into its operations. UN-Habitat will continue to incrementally improve the environmental management performance of its operations and facilities management in a number of

Section 15 Human settlements

ways, including, but not limited to, through increased use of virtual meetings and consolidation of office space at its headquarters and in field locations. Furthermore, UN-Habitat will gradually enhance the environmental management performance of its facilities through interior design strategies, including by using sustainable materials, energy-efficient lighting, fixtures and natural lighting solutions, and natural ventilation, as well as flexible and adaptive spaces. In 2023, in partnership with the Secretariat and in accordance with the United Nations Framework Convention on Climate Change, UN-Habitat completed the offset of its greenhouse gas emissions for 2022.

- 15.88 Information on the timely submission of parliamentary documentation and advance booking for air travel is reflected in table 15.18. In 2024, UN-Habitat is maintaining centralized monitoring and oversight of the timely purchase of air tickets, with exceptions requiring approval from the Office of the Executive Director.

- 15.89 The proposed regular budget resources for 2025 amount to \$1,914,700, reflecting an increase of \$300 compared with the approved budget for 2024. The proposed change is explained in paragraph 15.82. Additional details on the distribution of the proposed resources for 2025 are reflected in table 15.19 and figure 15.XV.

Programme of work

Subprogramme 1

Reduced spatial inequality and poverty in communities across the urban-rural continuum

15.90 The proposed regular budget resources for 2025 amount to \$2,182,600 and reflect an increase of \$65,000 compared with the approved budget for 2024. The proposed change is explained in paragraph 15.82. Additional details on the distribution of the proposed resources for 2025 are reflected in table 15.20 and figure 15.XVI.

Programme support

- 15.94 The programme support component comprises the Management Advisory and Compliance Service of UN-Habitat.
- 15.95 The main responsibilities of the programme support component include human resources management, budget and finance, information and communications technologies, and the oversight and internal controls and the operations support functions.
- 15.96 The proposed regular budget resources for 2025 amount to \$1,278,200 and reflect an increase of \$1,000 compared with the approved budget for 2024. The proposed change is explained in paragraph 15.82. Additional details on the distribution of the proposed resources for 2025 are reflected in table 15.24 and figure 15.XX.

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 16.1 The United Nations Office on Drugs and Crime (UNODC) is responsible for supporting Member States in making the world safer from drugs, crime, corruption and terrorism, with a view to promoting security and justice for all. The mandate derives from the priorities established in relevant United Nations conventions and General Assembly resolutions, including Assembly resolutions [45/179](#), [46/152](#) and [46/185 C](#). The work of the Office is grounded in a series of conventions and other international instruments for which the Office acts as guardian and advocate. They include the three international drug control conventions, the United Nations Convention against Corruption, the United Nations Convention against Transnational Organized Crime and the Protocols thereto, the 19 international conventions and protocols against terrorism and the United Nations standards and norms in crime prevention and criminal justice. The thematic focus areas of the Office include addressing and countering the world drug problem, preventing and countering transnational organized crime, preventing and countering corruption and economic crime, preventing and countering terrorism and crime prevention and criminal justice reform. UNODC support to Member States is undertaken by facilitating multilateral cooperation and partnerships, by delivering technical assistance, by expanding the evidence base and by developing the capacity of Governments to formulate and implement coherent policies to address these issues.

Strategy and external factors for 2025

- 16.2 As a United Nations entity whose mandate contributes to the three pillars of the United Nations, the Office supports Member States through three broad, interconnected and mutually supportive work streams:
- (a) Normative work, including policy, advocacy and legislative assistance to promote the ratification and implementation of the relevant international treaties and the provision of secretariat and substantive services to the treaty-based, governing and other Member State-driven bodies that help identify priorities, challenges, responses and commitments in relevant mandate areas relating to drugs, crime, corruption and terrorism;
 - (b) Research and policy support work to expand the evidence base and inform policymaking processes at the national, regional and global levels, through increased knowledge and understanding of drug and crime issues;
 - (c) Technical cooperation to enhance the capacity of Member States and other stakeholders to prevent and counter illicit drugs, crime, corruption, and terrorism at the local, national, regional and global levels through the Office's specialized assistance, expertise and extensive field presence.
- 16.3 In 2025, the work of the Office will continue to be guided by the UNODC Strategy 2021–2025, to help Member States identify solutions to respond to drug and crime challenges while addressing their interrelationship, strengthening good governance and building inclusive, equitable and resilient societies. UNODC will continue to make use of its strong field presence and thematic expertise to deepen cross-sectoral partnerships, promote cross-border cooperation and ensure systematic coordination across its mandates. The implementation of specific thematic and geographic strategies will guide the Office in better supporting Member States in addressing distinct priority emerging threats. Moreover, the Office will strengthen its capacity in cross-cutting areas, including promoting human rights, mainstreaming a gender perspective and empowering youth, in all its work.

- 16.4 With regard to cooperation with other entities, UNODC will continue to work closely with a large number of international and regional organizations and promote systematic South-South cooperation, enabling information exchange and expertise between countries that share similar challenges. Moreover, the Office will facilitate multi-stakeholder engagement in partnerships with civil society across all UNODC workstreams. Within these partnerships, particularly with academia, UNODC will promote an evidence-based analysis and understanding of the nature of the challenges faced by Member States and design coherent programmes and policies to make progress towards the implementation of the 2030 Agenda.
- 16.5 With regard to inter-agency coordination and liaison, UNODC will continue to coordinate and participate in all relevant groups linked to its mandate areas. It will continue to jointly implement projects on women's empowerment (United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women)); drug prevention, treatment and rehabilitation (World Health Organization (WHO)); corruption (United Nations Development Programme); terrorism prevention (Office of Counter-Terrorism of the Secretariat); access to justice for children (United Nations Children's Fund (UNICEF)); and measuring illicit financial flows (United Nations Conference on Trade and Development). The Office also remains an active co-sponsor of the Joint United Nations Programme on HIV/AIDS (UNAIDS).
- 16.6 With regard to external factors, the overall plan for 2025 is based on the following planning assumptions:
- (a) Member States recognize in their policies, programmes and budgets, that challenges related to security, justice, governance, and the rule of law must be addressed as part of an integrated effort to implement the 2030 Agenda;
 - (b) The United Nations system and other multilateral organizations highlight the importance of addressing issues under the UNODC mandate, to contribute to the implementation of the 2030 Agenda and other multilateral commitments in a holistic manner;
 - (c) Member States share real-time, statistical and operational data with the UNODC Research and Trend Analysis Branch and with their counterparts across borders;
 - (d) Extrabudgetary resources, including general-purpose funding for core functions, continue to be available.
- 16.7 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate. It will do so through the United Nations Office at Vienna/UNODC Strategy and Action Plan for Gender Equality and the Empowerment of Women (2022–2026), which continues to guide the Office's support to Member States. The Office will work with Member States to integrate a gender perspective throughout UNODC mandate areas and will support women's inclusion at the decision-making levels in all its programmatic work and promote the collection of sex-disaggregated data.
- 16.8 In line with the United Nations Disability Inclusion Strategy, the Office will continue to promote the inclusion of persons with disabilities throughout its work. Building upon lessons learned from previous action plans, the third iteration of the disability inclusion action plan (2025–2026) will be implemented. In 2025, UNODC will strengthen the twin-track approach on disability inclusion in technical assistance provided to Member States. Moreover, the Office will ensure that disability inclusion is mainstreamed in all UNODC evaluations.

Legislative mandates

- 16.9 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

Conventions and protocols

- Single Convention on Narcotic Drugs of 1961 as amended by the 1972 Protocol
- Convention on Psychotropic Substances of 1971
- United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances of 1988
- United Nations Convention against Transnational Organized Crime and the Protocols thereto
- Protocol to Prevent, Suppress and Punish Trafficking in Persons, Especially Women and Children, supplementing the United Nations Convention against Transnational Organized Crime
- Protocol against the Smuggling of Migrants by Land, Sea and Air, supplementing the United Nations Convention against Transnational Organized Crime
- Protocol against the Illicit Manufacturing of and Trafficking in Firearms, Their Parts and Components and Ammunition, supplementing the United Nations Convention against Transnational Organized Crime
- United Nations Convention against Corruption

General Assembly resolutions

S-20/2	Political Declaration	69/237	Building capacity for the evaluation of development activities at the country level
S-20/4	Measures to enhance international cooperation to counter the world drug problem	70/1	Transforming our world: the 2030 Agenda for Sustainable Development
34/180	Convention on the Elimination of All Forms of Discrimination against Women	70/182	International cooperation against the world drug problem
44/25	Convention on the Rights of the Child	70/177; 72/194	Technical assistance for implementing the international conventions and protocols related to counter-terrorism
45/179	Enhancement of the United Nations structure for drug abuse control	71/256	New Urban Agenda
46/104	United Nations International Drug Control Programme	72/197	Promoting the implementation of the United Nations Guiding Principles on Alternative Development and related commitments on alternative development and regional, interregional and international cooperation on development-oriented, balanced drug control policy addressing socioeconomic issues
48/12	Measures to strengthen international cooperation against the illicit production, sale, demand, traffic and distribution of narcotic drugs and psychotropic substances and related activities		
48/104	Declaration on the Elimination of Violence against Women		
49/168; 52/92	International action to combat drug abuse and illicit production and trafficking	73/164; 74/164	Combating intolerance, negative stereotyping, stigmatization, discrimination, incitement to violence and violence against persons, based on religion or belief
59/162	Follow-up on strengthening the systems of control over chemical precursors and preventing their diversion and trafficking	73/183	Enhancing the role of the Commission on Crime Prevention and Criminal Justice in contributing to the implementation of the 2030 Agenda for Sustainable Development
66/177	Strengthening international cooperation in combating the harmful effects of illicit financial flows resulting from criminal activities	73/185	The rule of law, crime prevention and criminal justice in the context of the Sustainable Development Goals
66/180; 68/186	Strengthening crime prevention and criminal justice responses to protect cultural property, especially with regard to its trafficking	74/143	Torture and other cruel, inhuman or degrading treatment or punishment
67/186	Strengthening the rule of law and the reform of criminal justice institutions, particularly in the areas related to the United Nations system-wide approach to fighting transnational organized crime and drug trafficking	74/175; 78/226	Technical assistance provided by the United Nations Office on Drugs and Crime related to counter-terrorism

Part IV International cooperation for development

74/253	Enhancing accessibility for persons with disabilities to conferences and meetings of the United Nations system	76/188	International cooperation to address and counter the world drug problem
75/90	The situation in Afghanistan	76/270	Interaction between the United Nations, national parliaments and the Inter-Parliamentary Union
75/158; 77/194	Trafficking in women and girls	77/20	Cooperation between the United Nations and the International Criminal Police Organization (INTERPOL)
75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system	77/219	Human rights in the administration of justice
75/311	Tackling illicit trafficking in wildlife	78/1	Political declaration of the high-level political forum on sustainable development convened under the auspices of the General Assembly
76/137	Policies and programmes involving youth	78/223	Follow-up to the Fourteenth United Nations Congress on Crime Prevention and Criminal Justice and preparations for the Fifteenth United Nations Congress on Crime Prevention and Criminal Justice
76/140; 78/181	Improvement of the situation of women and girls in rural areas		
76/141	Violence against women migrant workers		
76/146; 78/188	The girl child		
76/147	Rights of the child		
76/181	Fourteenth United Nations Congress on Crime Prevention and Criminal Justice		

Economic and Social Council resolutions and decisions

1946/9 (I)	Commission on Narcotic Drugs	2007/21	Information-gathering instrument in relation to United Nations standards and norms in crime prevention and criminal justice
1985/11	Cooperation for the control of illicit drug trafficking and drug abuse in the African region	2008/23	Protection against trafficking in cultural property
1987/34	Meeting of Heads of National Drug Law Enforcement Agencies, Latin America and Caribbean Region	2009/25	Improving the collection, reporting and analysis of data to enhance knowledge of trends in specific areas of crime
1991/38	Terms of reference of the Commission on Narcotic Drugs	2010/19	Crime prevention and criminal justice responses to protect cultural property, especially with regard to its trafficking
1993/40	Implementation of measures to prevent the diversion of precursor and essential chemicals to the illicit manufacture of narcotic drugs and psychotropic substances	2010/20; 2011/34	Support for the development and implementation of an integrated approach to programme development at the United Nations Office on Drugs and Crime
1997/41	Implementation of comprehensive measures to counter the illicit manufacture, trafficking and abuse of amphetamine-type substances and their precursors	2011/36; 2013/40	Crime prevention and criminal justice responses against illicit trafficking in endangered species of wild fauna and flora
1999/30	Review of the United Nations International Drug Control Programme: strengthening the United Nations machinery for international drug control within the scope of the existing international drug control treaties and in accordance with the basic principles of the Charter of the United Nations	2012/19	Strengthening international cooperation in combating transnational organized crime in all its forms and manifestations
2001/14	Prevention of diversion of precursors used in the illicit manufacture of synthetic drugs	2013/39	International cooperation in the prevention, investigation, prosecution and punishment of economic fraud and identity-related crime
2005/14	Model bilateral agreement on the sharing of confiscated proceeds of crime or property covered by the United Nations Convention against Transnational Organized Crime and the United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances of 1988	2013/42	United Nations Guiding Principles on Alternative Development
2006/23; 2007/22	Strengthening basic principles of judicial conduct	2019/23	Combating transnational organized crime and its links to illicit trafficking in precious metals and illegal mining, including by enhancing the security of supply chains of precious metals
		2021/7	Mainstreaming a gender perspective into all policies and programmes in the United Nations system

Section 16 International drug control, crime and terrorism prevention and criminal justice

2022/14	Strengthening national and international efforts, including with the private sector, to protect children from sexual exploitation and abuse	Decisions 2022/316	Improving the governance and financial situation of the United Nations Office on Drugs and Crime: extension of the mandate of the standing open-ended intergovernmental working group on improving the governance and financial situation of the United Nations Office on Drugs and Crime
Decision 2011/259	Joint meetings of the reconvened sessions of the Commission on Narcotic Drugs and the Commission on Crime Prevention and Criminal Justice	Decision 2022/317	Organization of the thematic discussions at future sessions of the Commission on Crime Prevention and Criminal Justice

Security Council resolutions

2370 (2017)	2482 (2019)
2462 (2019)	

Commission on Crime Prevention and Criminal Justice resolutions

21/3	Strengthening international cooperation to address the links that in some cases may exist between transnational organized criminal activities and terrorist activities	27/5 30/3	International cooperation against trafficking in cultural property Improving the governance and financial situation of the United Nations Office on Drugs and Crime: recommendations of the standing open-ended intergovernmental working group on improving the governance and financial situation of the United Nations Office on Drugs and Crime
24/2	Strengthening crime prevention and criminal justice responses with respect to trafficking in cultural property and other related offences		

Commission on Narcotic Drugs resolutions

44/14	Measures to promote the exchange of information on new patterns of drug use and on substances consumed	56/4	Enhancing international cooperation in the identification and reporting of new psychoactive substances
49/3	Strengthening systems for the control of precursor chemicals used in the manufacture of synthetic drugs	56/8	Promoting initiatives for the safe, secure and appropriate return for disposal of prescription drugs, in particular those containing narcotic drugs and psychotropic substances under international control
50/11	International cooperation in preventing the illegal distribution of internationally controlled licit substances via the Internet	56/10	Tools to improve data collection to monitor and evaluate the implementation of the Political Declaration and Plan of Action on International Cooperation towards an Integrated and Balanced Strategy to Counter the World Drug Problem
51/14	Promoting coordination and alignment of decisions between the Commission on Narcotic Drugs and the Programme Coordinating Board of the Joint United Nations Programme on HIV/AIDS		
53/11	Promoting the sharing of information on the potential abuse of and trafficking in synthetic cannabinoid receptor agonists	56/13	Precursors: raising awareness on the diversion in international trade of non-scheduled substances for use as alternatives to scheduled substances in the illicit manufacture of narcotic drugs and psychotropic substances
54/3	Ensuring the availability of reference and test samples of controlled substances at drug testing laboratories for scientific purposes	57/9	Enhancing international cooperation in the identification and reporting of new psychoactive substances and incidents involving such substances
54/8	Strengthening international cooperation and regulatory and institutional frameworks for the control of precursor chemicals used in the illicit manufacture of synthetic drugs	58/5	Supporting the collaboration of public health and justice authorities in pursuing alternative measures to conviction or punishment for appropriate drug-related offences of a minor nature
54/11	Improving the participatory role of civil society in addressing the world drug problem		
55/1	Promoting international cooperation in responding to the challenges posed by new psychoactive substances		

Part IV International cooperation for development

58/6	Strengthening international cooperation in preventing and combating illicit financial flows linked to drug trafficking, from the anti-money-laundering perspective	61/8	Enhancing and strengthening international and regional cooperation and domestic efforts to address the international threats posed by the non-medical use of synthetic opioids
58/7	Strengthening cooperation with the scientific community, including academia, and promoting scientific research in drug demand and supply reduction policies in order to find effective solutions to various aspects of the world drug problem	61/9	Protecting children from the illicit drug challenge
		62/2	Enhancing detection and identification capacity for synthetic drugs for non-medical use by increasing international collaboration
58/10	Promoting the use of the international electronic import and export authorization system for licit international trade in narcotic drugs and psychotropic substances	62/3; 63/5	Promoting alternative development as a development-oriented drug control strategy
		62/4	Advancing effective and innovative approaches, through national, regional and international action, to address the multifaceted challenges posed by the non-medical use of synthetic drugs, particularly synthetic opioids
58/11	Promoting international cooperation in responding to new psychoactive substances and amphetamine-type stimulants, including methamphetamine		
59/5	Mainstreaming a gender perspective in drug-related policies and programmes	62/5	Enhancing the capacity of Member States to adequately estimate and assess the need for internationally controlled substances for medical and scientific purposes
59/7	Promotion of proportionate sentencing for drug-related offences of an appropriate nature in implementing drug control policies		
59/8	Promotion of measures to target new psychoactive substances and amphetamine-type stimulants	63/1	Promoting efforts by Member States to address and counter the world drug problem, in particular supply reduction-related measures, through effective partnerships with private sector entities
60/4	Preventing and responding to the adverse health consequences and risks associated with the use of new psychoactive substances	63/2	Promoting and improving the collection and analysis of reliable and comparable data to strengthen balanced, integrated, comprehensive, multidisciplinary and scientific evidence-based responses to the world drug problem
60/5	Increasing international coordination relating to precursors and non-scheduled precursor chemicals used in the illicit manufacture of narcotic drugs and psychotropic substances	64/7	Improving the governance and financial situation of the United Nations Office on Drugs and Crime: recommendations of the standing open-ended intergovernmental working group on improving the governance and financial situation of the United Nations Office on Drugs and Crime
60/6	Intensifying coordination and cooperation among United Nations entities and relevant domestic sectors, including the health, education and criminal justice sectors, to address and counter the world drug problem		
60/9	Enhancing the capacity of law enforcement, border control and other relevant agencies to counter illicit drug trafficking through training	65/2	Strengthening international cooperation to address the links between illicit drug trafficking and illicit firearms trafficking
61/5	Promoting the implementation of the electronic International Import and Export Authorization System for licit trade in narcotic drugs and psychotropic substances	65/3	Intensifying efforts to address the diversion of non-scheduled chemicals frequently used in the illicit manufacture of drugs and the proliferation of designer precursors
		66/1	Preparations for the midterm review to be held during the sixty-seventh session of the Commission on Narcotic Drugs, in 2024

**Subprogramme 1
Countering transnational organized crime***General Assembly resolutions*

64/293	United Nations Global Plan of Action to Combat Trafficking in Persons	73/189; 77/236	Strengthening and promoting effective measures and international cooperation on organ donation and transplantation to prevent and combat trafficking in persons for the purpose of organ removal and trafficking in human organs
71/1	New York Declaration for Refugees and Migrants		

Section 16 International drug control, crime and terrorism prevention and criminal justice

74/173	Promoting technical assistance and capacity-building to strengthen national measures and international cooperation to combat cybercrime, including information-sharing	76/32; 77/80	Assistance to States for curbing the illicit traffic in small arms and light weapons and collecting them
74/176; 76/186; 78/228	Improving the coordination of efforts against trafficking in persons	76/72; 77/248	Oceans and the law of the sea
74/247; 75/282	Countering the use of information and communications technologies for criminal purposes	76/185	Preventing and combating crimes that affect the environment

60/262	Political Declaration on HIV/AIDS	74/20	Global health and foreign policy: an inclusive approach to strengthening health systems
65/277	Political Declaration on HIV and AIDS: Intensifying Our Efforts to Eliminate HIV and AIDS	75/284	Political Declaration on HIV and AIDS: Ending Inequalities and Getting on Track to End AIDS by 2030
70/266	Political Declaration on HIV and AIDS: On the Fast Track to Accelerating the Fight against HIV and to Ending the AIDS Epidemic by 2030	77/238	Addressing and countering the world drug problem through a comprehensive, integrated and balanced approach

Economic and Social Council resolutions and decisions

2003/32	Training in precursor control, countering money-laundering and drug abuse prevention	2005/28	Frequency of meetings of Heads of National Drug Law Enforcement Agencies, Europe
2003/36	Establishment of national networks to counter money-laundering in the framework of national and international drug control plans	2007/9	The need for a balance between demand for and supply of opiates used to meet medical and scientific needs
2004/35	Combating the spread of HIV/AIDS in criminal justice pretrial and correctional facilities	2013/11; 2015/2	Joint United Nations Programme on HIV/AIDS (UNAIDS)

Decision 2009/250 Proposed amendment to the Single Convention on Narcotic Drugs of 1961 as amended by the 1972 Protocol

Commission on Narcotic Drugs resolutions and decisions

49/4	Responding to the prevalence of HIV/AIDS and other blood-borne diseases among drug users	62/6	Promoting measures to prevent transmission of HIV attributable to drug use among women and for women who are exposed to risk factors associated with drug use, including by improving access to post-exposure prophylaxis
58/4	Promoting the implementation of the United Nations Guiding Principles on Alternative Development	62/7	Promoting measures to prevent and treat viral hepatitis C attributable to drug use
61/2	Strengthening efforts to prevent drug abuse in educational settings	63/4	Promoting the involvement of youth in drug prevention efforts
61/4	Promoting measures for the prevention of mother-to-child transmission of HIV, hepatitis B and C and syphilis among women who use drugs	64/3	Promoting scientific evidence-based, quality, affordable and comprehensive drug prevention, treatment, sustained recovery and related support services
61/6	Promoting the implementation of the United Nations Guiding Principles on Alternative Development and related commitments on alternative development and regional, interregional and international cooperation on development-oriented, balanced drug control policy addressing socioeconomic issues	64/5	Facilitating access to comprehensive, scientific evidence-based drug demand reduction services and related measures, including for people impacted by social marginalization
61/7	Addressing the specific needs of vulnerable members of society in response to the world drug problem	65/1	Promoting alternative development as a development-oriented drug control strategy, taking into account measures to protect the environment
61/11	Promoting non-stigmatizing attitudes to ensure the availability of access to and delivery of health, care and social services for drug users	65/4	Promoting comprehensive and scientific evidence-based early prevention
		66/4	Promoting alternative development as a development-oriented drug control strategy that is sustainable and inclusive

Commission on Narcotic Drugs statements and declarations

Ministerial Declaration on Strengthening Our Actions at the National, Regional and International Levels to Accelerate the Implementation of Our Joint Commitments to Address and Counter the World Drug Problem

Political Declaration and Plan of Action on International Cooperation towards an Integrated and Balanced Strategy to Counter the World Drug Problem

Joint Ministerial Statement of the 2014 high-level review by the Commission on Narcotic Drugs of the implementation by Member States of the Political Declaration and Plan of Action on International Cooperation towards an Integrated and Balanced Strategy to Counter the World Drug Problem

Commission on Crime Prevention and Criminal Justice resolutions

26/2 Ensuring access to measures for the prevention of mother-to-child transmission of HIV in prisons

**Subprogramme 3
Countering corruption**

General Assembly resolutions

S-32/1	Our common commitment to effectively addressing challenges and implementing measures to prevent and combat corruption and strengthen international cooperation	75/194; 77/235	Preventing and combating corrupt practices and the transfer of proceeds of corruption, facilitating asset recovery and returning such assets to legitimate owners, in particular to countries of origin, in accordance with the United Nations Convention against Corruption
--------	--	----------------	--

Conference of the States Parties to the United Nations Convention against Corruption resolutions and decisions

1/1; 2/1	Review of implementation	8/1	Strengthening of international cooperation on asset recovery and of the administration of frozen, seized and confiscated assets
1/4	Establishment of an intergovernmental working group on asset recovery		
1/5	Technical assistance	8/3	Promoting integrity in the public sector among States parties to the United Nations Convention against Corruption
2/3; 3/3	Asset recovery		
3/1	Review mechanism	8/4	Safeguarding sport from corruption
4/1	Mechanism for the Review of Implementation of the United Nations Convention against Corruption	8/5	Enhancing integrity by raising public awareness
4/2	Convening of open-ended intergovernmental expert meetings to enhance international cooperation	8/6	Implementation of international obligations to prevent and combat bribery as defined under the United Nations Convention against Corruption
4/4	International cooperation in asset recovery	8/7	Enhancing the effectiveness of anti-corruption bodies in fighting corruption
4/6	Non-governmental organizations and the Mechanism for the Review of Implementation of the United Nations Convention against Corruption	8/8; 9/6; 10/3	Follow-up to the Marrakech declaration on the prevention of corruption
5/6	Private sector	8/9	Strengthening asset recovery to support the 2030 Agenda for Sustainable Development
6/1	Continuation of the review of implementation of the United Nations Convention against Corruption	8/10	Measurement of corruption
6/2	Facilitating international cooperation in asset recovery and the return of proceeds of crime	8/12	Preventing and combating corruption as it relates to crimes that have an impact on the environment
6/3	Fostering effective asset recovery	8/13	Abu Dhabi declaration on enhancing collaboration between the supreme audit institutions and anti-corruption bodies to more effectively prevent and fight corruption
6/5	St. Petersburg statement on promoting public-private partnership in the prevention of and fight against corruption		
6/10	Education and training in the context of anti-corruption	8/14	Promoting good practices in relation to the role of national parliaments and other legislative bodies in preventing and combating corruption in all its forms
7/1	Strengthening mutual legal assistance for international cooperation and asset recovery	9/1	Sharm el-Sheikh declaration on strengthening international cooperation in the prevention of and fight against corruption during times of emergencies and crisis response and recovery
7/2	Preventing and combating corruption in all its forms more effectively, including, among others, when it involves vast quantities of assets, based on a comprehensive and multidisciplinary approach, in accordance with the United Nations Convention against Corruption	9/2	Our common commitment to effectively addressing challenges and implementing measures to prevent and combat corruption and strengthening international cooperation: follow-up to the special session of the General Assembly against corruption
7/3	Promoting technical assistance to support the effective implementation of the United Nations Convention against Corruption		
7/4	Enhancing synergies between relevant multilateral organizations responsible for review mechanisms in the field of anti-corruption	9/3	Follow-up to the Abu Dhabi declaration on enhancing collaboration between the supreme audit institutions and anti-corruption bodies to more effectively prevent and fight corruption, and the use of information and communications technologies
7/5	Promoting preventive measures against corruption		
7/7; 8/11	Strengthening the implementation of the United Nations Convention against Corruption in small island developing States	9/4	Strengthening the implementation of the United Nations Convention against Corruption at regional levels
7/8	Corruption in sport	9/5	Enhancing international anti-corruption law enforcement cooperation

Section 16 International drug control, crime and terrorism prevention and criminal justice

9/7	Enhancing the use of beneficial ownership information to facilitate the identification, recovery and return of proceeds of crime	10/9	Promoting transparency and integrity in public procurement in support of the 2030 Agenda for Sustainable Development
9/8	Promoting anti-corruption education, awareness-raising and training	10/10	Addressing the societal impacts of corruption
10/1	Atlanta 2023: promoting integrity, accountability and transparency in the fight against corruption	10/11	Follow-up to the Sharm el-Sheikh declaration on strengthening international cooperation in the prevention of and fight against corruption during times of emergencies and crisis response and recovery
10/2	Strengthening the implementation of the United Nations Convention against Corruption in small island developing States	10/12	Providing incentives for the private sector to adopt integrity measures to prevent and combat corruption
10/4	Methodologies and indicators for measuring corruption and the effectiveness of anti-corruption frameworks	Decision 7/1	Work of the subsidiary bodies established by the Conference
10/5	Measures to address corruption involving organized criminal groups	Decision 8/1	Extension of the second cycle of the Mechanism for the Review of Implementation of the United Nations Convention against Corruption
10/6	Enhancing the use of beneficial ownership information to strengthen asset recovery		
10/7	Promoting international cooperation in civil and administrative proceedings related to corruption as provided in the United Nations Convention against Corruption	Decision 10/2	Further extension of the second cycle of the Mechanism for the Review of Implementation of the United Nations Convention against Corruption
10/8	Protection of reporting persons

50/5	Identifying sources of precursors used in illicit drug manufacture	62/1	Strengthening international cooperation and comprehensive regulatory and institutional frameworks for the control of precursors used in the illicit manufacture of narcotic drugs and psychotropic substances
54/6	Promoting adequate availability of internationally controlled narcotic drugs and psychotropic substances for medical and scientific purposes while preventing their diversion and abuse	62/8	

Deliverables

16.10 Table 16.1 lists all cross-cutting deliverables of the programme.

Table 16.1
Cross-cutting deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	3	3	3	3
Meetings of:				
1. The Fifth Committee	1	1	1	1
2. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
3. The Committee for Programme and Coordination	1	1	1	1
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	2	2	2
4. On gender equality	1	1	1	1
5. On the independent evaluation function	1	1	1	1
Seminars, workshops and training events (number of days)	7	13	8	15
6. Food-for-thought conferences and side events on gender equality	7	7	8	7
7. Trainings for national counterparts on gender equality	–	4	–	6
8. Side events and conferences on topics related to evaluation	–	2	–	2
Technical materials (number of materials)	20	19	21	22
9. On topics related to gender equality	4	1	5	3
10. On evaluation (independent, joint and system-wide evaluations and synthesis studies)	15	17	15	16
11. On evaluation tools, methodologies and approaches and evaluation capacity development	1	1	1	3
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services in the fields of drug control, crime prevention, anti-corruption, and terrorism prevention and cooperation with Member States, intergovernmental organizations and civil society, as applicable; advocacy of drug control, crime prevention, anti-corruption and terrorism prevention issues with Member States and civil society.				
Databases and substantive digital materials: Unite Evaluations.				

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

D. Communication deliverables

Outreach programmes, special events and information materials: evaluation briefs (approximately 17) and trainings; speaking engagements with internal and external stakeholders, conferences, information dissemination, public awareness and representation of the Secretary-General at international events and forums, as appropriate.

Digital platforms and multimedia content: UNODC website and social media accounts.

Evaluation activities

- 16.11 The following independent evaluations and evaluative work completed in 2023 by the UNODC Independent Evaluation Section have guided the proposed programme plan for 2025:
 - (a) Seven in-depth evaluations, including one joint evaluation, on UNODC work on corruption, crimes affecting the environment, violence against children, nuclear terrorism, migrant smuggling and trafficking in persons, justice systems, and alternatives to imprisonment;
 - (b) Eight project evaluations of global, regional and country projects and programmes on transnational organized crime, corruption, terrorism, justice and prison management, the rule of law, and good governance;
 - (c) Two evaluations and syntheses on UNODC work in Eastern Africa and Mexico.
- 16.12 In response to the results of the evaluations referenced above, UNODC supported Member States in undertaking country-led evaluations and developed a successor programme on legal empowerment and aid delivery in Kenya, as well as a revised programming on counter-terrorism. UNODC also strengthened stakeholder engagement and partnerships for future system-wide efforts on evaluation, following requirements for evaluative evidence across individual entities. An evaluation and synthesis informed the development of a new regional framework in Eastern Africa. Evaluation capacity training courses for UNODC staff and the strengthening of projects in Mexico were implemented using Unite Evaluations. The related lessons learned will be used in 2025 to build national evaluation capacity across UNODC mandate areas.
- 16.13 The following evaluations are planned for 2025 (themes will be determined with Member States, UNODC senior management and project staff):
 - (a) Strategic and subprogramme evaluations;
 - (b) Evaluations at the programmatic, country, regional and project levels;
 - (c) Evaluations and syntheses at the thematic, regional or functional levels.

Programme of work

Subprogramme 1

Countering transnational organized crime

Objective

- 16.14 The objective, to which this subprogramme contributes, is to prevent and combat transnational organized crime and illicit trafficking.

Strategy

- 16.15 To contribute to the objective, the subprogramme will:
- (a) Promote adherence to and implementation of the international drug control conventions and the United Nations Convention against Transnational Organized Crime and the Protocols thereto, including by developing tools and providing targeted assistance to policymakers, legislators and criminal justice practitioners, as well as collecting and disseminating knowledge on organized crime;
 - (b) Support the Conference of the Parties to the United Nations Convention against Transnational Organized Crime, including the Mechanism for the Review of the Implementation of the Convention and the Protocols thereto, by assisting States parties in participating successfully in the review process, both as countries under review and reviewers;
 - (c) Provide technical assistance to Member States in preventing and countering transnational organized crime, including in its evolving and emerging forms, ranging from human trafficking, smuggling of migrants and trafficking in firearms to other forms of organized crime and trafficking, such as trafficking in cultural property and falsified medical products, crimes that affect the environment, the use of information and communications technologies for criminal purposes and money laundering related to such crimes;
 - (d) Promote international cooperation on transnational organized crime, by building the capacities of central authorities and other criminal justice actors in international cooperation in criminal matters and acting as a facilitator of mutual legal assistance requests through its support to international judicial cooperation networks and to individual Member States, particularly in trafficking cases as well as through global, regional and interregional initiatives;
 - (e) Provide support to Member States to strengthen border management, interdict contraband and develop post-seizure criminal justice cooperation along drug and other trafficking routes aimed at disrupting the organized crime groups behind them, involving, as appropriate, relevant international organizations, civil society, the private sector and other actors and actively promote the use of special investigative techniques against drug trafficking and in organized crime investigations.
- 16.16 The above-mentioned work is expected to result in:
- (a) Active and effective participation of States parties to the United Nations Convention against Transnational Organized Crime in the Mechanism for the Review of the Implementation of the Convention and the Protocols thereto and strengthened legislative and strategic frameworks to prevent and counter organized crime;
 - (b) Increased international cooperation and strengthened institutional and legislative capacity of Member States to detect, prevent, investigate and prosecute transnational organized crime and new and emerging crimes;
 - (c) Reduced trafficking in persons and smuggling of migrants, and trafficking in drugs, firearms and other contraband, through the dismantling of greater numbers of organized criminal groups.

Programme performance in 2023

Malaysia is better equipped to investigate virtual assets-enabled crimes

- 16.17 As documented by UNODC in its report published in 2020, in South-East Asia, an increasing use of information and communications technologies for criminal purposes by organized criminal groups, including the misuse of virtual assets, is an enabler of all forms of transnational crime. Blockchain analysis can provide crucial leads to detect and investigate organized criminal activity, including the identification of suspected individuals, affected States and criminal trends to obscure traceability, such as multiple node hopping and the use of cryptomixers. In 2023, the subprogramme contributed to strengthening the capacity of the Royal Malaysia Police to identify, trace and analyse virtual

assets-enabled criminal activity, cementing the capabilities of the cryptocurrency analysis laboratory to work independently and supporting other countries in the region.

16.18 Progress towards the objective is presented in the performance measure below (see table 16.2).

Table 16.2
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
Increased awareness among criminal justice practitioners in South-East Asia on emerging threats, including crimes enabled by specialized encrypted networks	Malaysia establishes the first cryptocurrency analysis laboratory in South-East Asia	The Royal Malaysia Police undertake investigations on the basis of specialized forensic analysis tools and processes
The Royal Malaysia Police are better equipped to conduct virtual assets and blockchain investigations through training and mentoring	The Royal Malaysia Police are equipped with specialized forensic equipment and tools	32 criminal analysis reports (90 per cent increase from 2021) developed independently, including international cases

Planned results for 2025

Result 1: strengthened implementation of the United Nations Convention against Transnational Organized Crime through participation in its Implementation Review Mechanism and enhancement of normative frameworks against organized crime

Programme performance in 2023 and target for 2025

16.19 The subprogramme’s work contributed to 162 States parties actively engaged in the review mechanism and 152 States with enhanced capacity to develop legislative and strategic frameworks against organized crime, which exceeded the planned targets of 140 and 110 States, respectively.

16.20 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 16.I).

Figure 16.I

Performance measure: number of States engaged in the Implementation Review Mechanism and with enhanced capacity to implement the United Nations Convention against Transnational Organized Crime (cumulative)

Result 2: increased cooperation between countries along human trafficking and migrant smuggling routes, especially countries of origin and transit countries, including through South-South cooperation

Programme performance in 2023 and target for 2025

- 16.21 The subprogramme’s work contributed to 15 South-South cooperation instances between countries along human trafficking and migrant smuggling routes, especially countries of origin and transit countries, which exceeded the planned targets of 12 instances.
- 16.22 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 16.II).

Figure 16.II
Performance measure: legal and operational cooperation instances among two or more beneficiary countries (annual)

Result 3: improved registration and traceability of firearms, parts, components and ammunition

Proposed programme plan for 2025

- 16.23 To effectively fight the illicit trafficking of firearms, proper recordkeeping systems are needed. Digitalized central databases not only increase the effectiveness of firearms control but also reduce the risks of theft and losses. The subprogramme developed goIFAR, a software for Member States consisting of a set of interrelated systems to improve the registration of firearms, parts, components and ammunition. The system monitors the movement of registered firearms at the national level, thus preventing diversion to the illegal market, and allows for the registration of seized firearms, facilitating the tracing of illicit firearms and analysis of trafficking trends.

Lessons learned and planned change

- 16.24 The lesson for the subprogramme was the need for country-specific and customizable national firearms recordkeeping systems to offer a functional system harmonized with national legislation that also allows for a level of standardization in firearms recordkeeping for possible exchanges between countries. In applying the lesson, the subprogramme will work with national and technical experts to further customize the functionalities of the software and adjust to specific national needs following piloting in selected countries.
- 16.25 Expected progress towards the objective and the target for 2025 are presented in the performance measure below (see table 16.3).

Table 16.3
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	The beta version of goIFAR undergoes internal and external review	Honduras and Senegal develop action plans to customize goIFAR	Honduras and Senegal adopt goIFAR Two additional countries develop action plans to customize goIFAR	Two additional countries adopt goIFAR

Deliverables

16.26 Table 16.4 lists all deliverables of the subprogramme.

Table 16.4
Subprogramme 1: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	68	27	42	32
1. Documents of the Conference of the Parties to the Convention against Transnational Organized Crime and the Protocols thereto and its working groups	34	21	32	32
2. Documents of the Ad Hoc Committee to Elaborate a Comprehensive International Convention on Countering the Use of Information and Communications Technologies for Criminal Purposes	34	6	10	–
Substantive services for meetings (number of three-hour meetings)	84	82	46	26
3. Meetings of the Conference of the Parties, including its working groups	26	20	26	26
4. Meetings of the Ad Hoc Committee to Elaborate a Comprehensive International Convention on Countering the Use of Information and Communications Technologies for Criminal Purposes	58	62	20	–
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	13	12	11	11
5. To prevent and combat transnational organized crime	3	2	2	2
6. To prevent and combat trafficking in illicit goods and strengthen border management	4	5	5	5
7. To prevent and combat trafficking in firearms and related crimes	1	1	1	1
8. To prevent and combat trafficking in persons and the smuggling of migrants	2	2	1	1
9. To prevent and combat the use of information and communications technologies for criminal purposes and money-laundering	3	2	2	2
Publications (number of publications)	3	9	5	10
10. On organized crime and illicit trafficking	3	9	5	10

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Consultation, advice and advocacy: advisory services on accession to the United Nations Convention against Transnational Organized Crime and the Protocols thereto for 15 remaining non-parties to those instruments; advisory services on legislative implementation of the instruments for 20 States parties; advocacy on the implementation of the instruments for all 191 States parties; advisory services for five Member States and the International Narcotics Control Board in relation to the three drug control conventions.

Databases and substantive digital materials: Sharing Electronic Resources and Laws on Crime (SHERLOC) platform, containing over 12,000 annotated legislative excerpts and more than 3,500 case summaries covering 15 crime types; e-learning course on cryptocurrencies.

**Subprogramme 2
A comprehensive and balanced approach to counter the world drug problem**

Objective

- 16.27 The objective, to which this subprogramme contributes, is to ensure comprehensive and balanced responses to the world drug problem through integrated demand reduction and related measures, supply reduction and related measures, and enhanced international cooperation.

Strategy

- 16.28 To contribute to the objective, the subprogramme will:
- (a) Promote comprehensive and balanced approaches to countering the world drug problem in full conformity with the purposes and principles of the Charter of the United Nations, the three international drug control conventions and in line with scientific evidence and assist Member States, upon request, in:
 - (i) Implementing the three international drug control conventions and all the international drug policy commitments to address and counter the world drug problem;
 - (ii) Establishing and/or expanding drug use prevention approaches and services, as well as drug dependence treatment, care and rehabilitation services and systems for people with drug use disorders;
 - (iii) Establishing and/or expanding HIV/AIDS prevention, treatment, and care and support services for people who use drugs, including people in prison and other custodial settings;
 - (iv) Establishing and/or expanding access to and availability of controlled substances for medical and scientific use;
 - (b) Support Member States' progress in each of the above-mentioned areas through advocacy, technical assistance, capacity-building, the provision of standards and operational guidelines based on science and evidence, and the development and dissemination of manuals, toolkits, reports and issue papers based on science and evidence;
 - (c) Assist Member States, upon request, by promoting sustainable livelihoods to reduce the illicit cultivation of drug crops through alternative development, including, where appropriate, preventive alternative development;
 - (d) In coordination with subprogramme 1, promote the exchange of criminal intelligence and encourage multilateral operations targeting transnational criminal organizations involved in drug trafficking and provide enhanced technical assistance in accordance with the principle of shared responsibility;

- (e) Build the capacity of national counterparts, at the request of Member States, to detect, interdict, investigate and prosecute drug-related offences, including the illicit cultivation, production, manufacturing and trafficking of narcotic drugs and psychotropic substances;
- (f) Facilitate the exchange of best practices and training curricula, methodologies and materials through the network of law enforcement training institutions, in coordination with subprogramme 1, helping Member States to make progress towards the achievement of Sustainable Development Goals 3, 4, 5, 10 and 16.

16.29 The above-mentioned work is expected to result in:

- (a) Increased access to quality health-care services that include scientific evidence-based interventions in the areas of drug abuse prevention, drug dependence treatment, HIV/AIDS prevention, treatment and care, and access to controlled substances, for medical and scientific use;
- (b) Increased resilience, quality of life and diversified, licit, sustainable income for families in rural areas affected by or at risk of illicit cultivation and production of and trafficking in narcotic drugs and psychotropic substances;
- (c) Reduced illicit supply of drugs through joint and coordinated work by law enforcement authorities to strengthen maritime, air and land border control, and to track and dismantle networks engaging in drug production, trafficking and distribution.

Programme performance in 2023

Member States in Latin America implement stronger health and development interventions in the context of addressing the world drug problem

16.30 The subprogramme supported Member States in improving their health and development responses to take into account international standards, including the following: (a) family-based prevention, ensuring the quality of drug treatment, care and rehabilitation services, including treatment for adolescents with drug use disorders and in mobile populations; (b) prevention of mother-to-child transmission of HIV in prison; (c) identifying opportunities for alternative development interventions, including for indigenous communities, in Bolivia (Plurinational State of), Colombia, Peru and, for the first time, the State of Guerrero in Mexico; and (d) policy dialogue on environmentally sound practices in the provision of sustainable livelihoods.

16.31 Progress towards the objective is presented in the performance measure below (see figure 16.III).

Figure 16.III

Performance measure: number of individuals in Latin America who benefited from better health and socioeconomic outcomes in the context of addressing the world drug problem (annual)

Planned results for 2025

Result 1: sustainable livelihoods through alternative development

Programme performance in 2023 and target for 2025

- 16.32 The subprogramme’s work contributed to developing a practical guide on alternative development and the environment, resulting in communities implementing alternative development initiatives that consider the environment and climate change, which met the planned target.
- 16.33 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 16.5).

Table 16.5
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Malongo signs a long-term agreement with the Vanmai Coffee Cooperative and issues the first payment to coffee growers in the Plurinational State of Bolivia and the Lao People’s Democratic Republic	Malongo signs a long-term agreement with a Colombian cooperative to export high-quality coffee to Europe Increased policy dialogue on environmentally sound practices in the provision of economic and environmentally sustainable livelihoods	Environmental considerations are mainstreamed in alternative development initiatives, following the launch of a practical guide on alternative development and the environment Malongo increases coffee exports from Bolivia (Plurinational State of), Colombia, the Lao People’s Democratic Republic and Myanmar Producers in the Lao People’s Democratic Republic sign an agreement with the fair-trade company Ethiquable, replicating the private-public model and expanding it to tea Tenth anniversary of the United Nations Guiding Principles on Alternative Development commemorated by taking stock and looking forward	Two additional countries affected by illicit crops design pilot alternative development projects New communities implement alternative development initiatives, with due consideration to addressing environmental issues and climate change The partnership model with Malongo is replicated with other fair trade-certified companies for the export of products	Local communities implement alternative development initiatives that simultaneously address economic, environmental and social sustainability Alternative development initiatives increased in response to the needs and priorities expressed by beneficiary countries and new countries

Result 2: Member States in South-East Asia implement stronger health and development interventions in the context of addressing the world drug problem

Programme performance in 2023 and target for 2025

- 16.34 The subprogramme's work contributed to strengthening 57 interventions in South-East Asia on drug prevention, treatment and care; HIV/AIDS prevention, treatment and care; alternative development and access to controlled substances for medical purposes, while preventing diversion and illicit use, which met the planned target.
- 16.35 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 16.IV).

Figure 16.IV

Performance measure: number of strengthened interventions on drugs and HIV/AIDS prevention, treatment, care and rehabilitation by Member States in South-East Asia (annual)

Result 3: Member States in sub-Saharan Africa implement stronger health and development interventions in the context of addressing the world drug problem

Proposed programme plan for 2025

- 16.36 The subprogramme works in sub-Saharan Africa to strengthen Member States' health and development responses to take into account international standards through the following: (a) family-based drug prevention; (b) improving the quality of drug treatment, care and rehabilitation, including providing services as alternatives to conviction or punishment; (c) supporting increased access to HIV services for people who use drugs and people in prisons; (d) strengthening interventions to address stigma and discrimination, including in health-care facilities and prison settings, to enhance the use of testing and treatment services; and (e) ensuring access to controlled medicines while preventing diversion and illicit drug use.

Lessons learned and planned change

- 16.37 The lesson for the subprogramme was that interventions are more effective if partnerships are integrated in national systems of health, drug control and development, given that close cooperation among different sectors can ensure more inclusive and holistic interventions, a more efficient use of resources and increased outreach for awareness-raising. In applying the lesson, the subprogramme will strive to build and support multisectoral partnerships among the health, law enforcement, justice, education and social welfare sectors, as well as among governmental agencies, community-based and non-governmental organizations, researchers, academia and the private sector.
- 16.38 Expected progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 16.V).

Figure 16.V
Performance measure: number of health and development responses of Member States in sub-Saharan Africa that take into account international standards (annual)

Deliverables

16.39 Table 16.6 lists all deliverables of the subprogramme.

Table 16.6
Subprogramme 2: deliverables for the period 2023–2025, by category and subcategory

10. On alternative development and sustainable livelihoods	1	1	1	1
Seminars, workshops and training events (number of days)	24	24	24	24
11. Training courses on drug control conventions and drug supply reduction	15	15	15	15
12. Training on drug demand reduction, HIV/AIDS and alternative development	9	9	9	9
Publications (number of publications)	3	3	3	3
13. On drug use prevention and treatment, and access to controlled substances	2	2	2	2
14. On HIV/AIDS prevention, treatment and care	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services on law enforcement and the implementation of the drug control conventions; substantive and technical advice on evidence-based drug prevention, treatment and care; HIV/AIDS prevention, treatment and care; access to controlled substances for medical and scientific use; and alternative development and sustainable livelihoods.				
D. Communication deliverables				
Outreach programmes, special events and information materials: social media campaigns and events on International Day against Drug Abuse and Illicit Trafficking, World Mental Health Day and World AIDS Day.				

^a For field and technical cooperation projects on drug supply reduction and publications thereon, please refer to deliverables B.6 and B.10 under table 16.4.

Subprogramme 3 Countering corruption

Objective

- 16.40 The objective, to which this subprogramme contributes, is to prevent and counter corruption through the effective implementation of the United Nations Convention against Corruption.

Strategy

- 16.41 To contribute to the objective, the subprogramme will:
- (a) Provide policy and legislative advice, build the capacities of relevant actors and facilitate the transfer of expertise in the areas of prevention, international cooperation, asset recovery, criminalization and law enforcement;
 - (b) Assist Member States, upon request, in strengthening public sector institutions and the role of civil society, parliamentarians, the private sector, academia, youth and the general public in the prevention of corruption, including by providing technical assistance to States in the follow-up to country reviews conducted under the Mechanism for the Review of Implementation of United Nations Convention against Corruption, as well as other types of technical assistance;
 - (c) Implement the mandates given by policymaking and treaty bodies, in particular the Conference of the States Parties to the Convention, its subsidiary bodies and other governing organs, and support related intergovernmental processes, including the follow-up to the special session of the General Assembly against corruption held in 2021;

- (d) Promote international cooperation regarding the investigation, prosecution and adjudication of corruption and related offences and provide technical assistance on the recovery of stolen assets, including through the Global Operational Network of Anti-Corruption Law Enforcement Authorities (GlobE Network) and the convening of expert group meetings;
- (e) Develop and disseminate knowledge products on the implementation of the Convention and assist States, upon request, in producing data and conducting statistical and analytical studies and research into corruption, including in collaboration with academia and other stakeholders, and further emphasize South-South cooperation and encourage the sharing of knowledge and good practices at the national and regional levels.

16.42 The above-mentioned work is expected to result in:

- (a) States parties participating actively and effectively in the Mechanism for the Review of Implementation of the United Nations Convention against Corruption;
- (b) States' legal, policy and institutional frameworks addressing corruption risks in line with the Convention;
- (c) States being able to systematically and in a timely manner trace, seize, freeze, confiscate and return assets stolen by officials through acts of corruption, within the framework of the Convention;
- (d) Anti-corruption practitioners and other stakeholders having and using the capacity to prevent and counter corruption;
- (e) Policymakers, practitioners and other stakeholders using evidence-based knowledge and tools on anti-corruption to inform decision-making;
- (f) Partners actively supporting and promoting implementation of the Convention in a coordinated effort.

Programme performance in 2023

States advance the fight against corruption through the Implementation Review Mechanism

16.43 The Convention's Implementation Review Mechanism has broken new ground in efforts to tackle corruption. Since its inception, States have learned from and helped each other to strengthen their anti-corruption frameworks, sharing good practices to promote whistle-blower protection, recover stolen assets, prevent money-laundering and engage the private sector and civil society in anti-corruption efforts. The subprogramme facilitates peer reviews by training governmental experts from States parties, supporting the country reviews and producing thematic reports on implementation trends and related identified technical assistance. The findings of the review process are encapsulated in the executive summaries, which highlight key recommendations, good practices and technical assistance needs identified during the review process. In particular, the recommendations on how to improve a State's response to corruption have become point of reference and benchmark for advancing effective anti-corruption measures. In many countries, action plans, anti-corruption strategies and legislation were initiated as a direct result of or in the context of the implementation reviews. In 2023, the subprogramme facilitated 21 executive summaries.

16.44 Progress towards the objective is presented in the performance measure below (see figure 16.VI).

Figure 16.VI
Performance measure: number of Member States that completed executive summaries in the framework of the Implementation Review Mechanism (annual)

Planned results for 2025

Result 1: enhanced cross-border cooperation between anti-corruption law enforcement authorities

Programme performance in 2023 and target for 2025

16.45 The subprogramme’s work contributed to the fostering of informal cross-border cooperation through information exchange between anti-corruption authorities through the Global Operational Network of Anti-Corruption Law Enforcement Authorities (GlobE Network), with 187 members from 105 countries, which exceeded the planned target of 80 countries.

16.46 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 16.VII).

Figure 16.VII
Performance measure: number of countries joining the Global Operational Network of Anti-Corruption Law Enforcement Authorities (cumulative)

Result 2: national anti-corruption institutions are strengthened

Programme performance in 2023 and target for 2025

- 16.47 The subprogramme’s work contributed to building the institutional capacities of 30 countries, which exceeded the planned targets of 14 countries.
- 16.48 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 16.VIII).

Figure 16.VIII
Performance measure: number of countries with strengthened anti-corruption institutions (annual)

Result 3: States’ use of beneficial ownership information in anti-corruption efforts strengthened

Proposed programme plan for 2025

- 16.49 Beneficial ownership transparency is a critical policy tool for combating corruption and tackling the misuse of legal structures to conceal the proceeds of corruption and other crimes. In December 2021, the Conference of the States Parties to the United Nations Convention against Corruption adopted its resolution 9/7, in which the Conference urged States parties to enhance the use of beneficial ownership to facilitate the identification, recovery and return of proceeds of crime. The subprogramme provides technical assistance and mentorship on beneficial ownership reforms.

Lessons learned and planned change

- 16.50 The lesson for the subprogramme was the need to address the strong demand for advisory services and technical assistance, both at the national level to collect and use beneficial ownership information and at the regional and international levels to share such information for law enforcement purposes. In applying the lesson, and drawing on previous experience, the subprogramme will provide mentorship and peer-learning opportunities and complement those with further practical guidance to build capacity at the national and international levels and expand partnerships with expertise in beneficial ownership transparency.
- 16.51 Expected progress towards the objective and the target for 2025 are presented in the performance measure below (see table 16.7).

Table 16.7
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
First beneficial ownership resolution adopted	Three countries strengthened their national frameworks for disclosing beneficial ownership information	11 countries enhance their knowledge base on beneficial ownership Second beneficial ownership resolution adopted	Five countries strengthen cooperation, information-sharing and peer-learning on beneficial ownership	Three countries develop policies and practices on beneficial ownership

Deliverables

16.52 Table 16.8 lists all deliverables of the subprogramme.

Table 16.8
Subprogramme 3: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned

---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Consultation, advice and advocacy: advisory services throughout the process of operating the Implementation Review Mechanism with regard to, inter alia, preparing the governmental experts for conducting country reviews, facilitating the completion and analysis of self-assessment checklist responses, conducting 20 country visits and drafting country review reports and executive summaries.

Databases and substantive digital materials: database of laws and jurisprudence, as well as other knowledge relevant to the implementation of the United Nations Convention against Corruption, including for issues related to asset recovery; database of competent authorities, asset recovery focal points and central authorities; the online anti-corruption portal “Tools and Resources for Anti-Corruption Knowledge” (TRACK); the GlobE Network portal; electronic tools and training materials on standards, policies, operational procedures and good practices in the implementation of the Convention by States parties.

**Subprogramme 4
Terrorism prevention**

Objective

- 16.53 The objective, to which this subprogramme contributes, is to strengthen a criminal justice regime against terrorism that is implemented by Member States in line with internationally agreed rule of law and obligations under relevant United Nations conventions and binding resolutions and the United Nations Global Counter-Terrorism Strategy.

Strategy

- 16.54 To contribute to the objective, the subprogramme will:
- (a) Provide normative and capacity-building support to prevent terrorism and violent extremism as and when conducive to terrorism, at the request of Member States, by initiating and supporting the development of cooperation frameworks with Member States at the national, regional and global levels, based on the strategic objectives of Member States and in line with internationally agreed rule of law and obligations under relevant United Nations conventions and binding resolutions;
 - (b) Implement projects in coordination and through integrated planning with partners, that support Governments with terrorism prevention, in particular the United Nations Global Counter-Terrorism Coordination Compact led by the United Nations Office of Counter-Terrorism and its working groups, helping Member States to make progress towards Sustainable Development Goals 5 and 16;
 - (c) Deliver counter-terrorism technical assistance tools and training activities to requesting Member States, in accordance with its mandate under resolutions of the General Assembly⁶ and the Security Council,⁷ as well as the United Nations Global Counter-Terrorism Strategy, adopted by the Assembly in 2006 in its resolution 60/288, and the biennial reviews of the Strategy.
- 16.55 The above-mentioned work is expected to result in:
- (a) Ratification by Member States of an increased number of international legal instruments against terrorism, and enactment and revision of domestic counter-terrorism legislation;
 - (b) Development by Member States of strategies, policies and action plans for preventing and combating terrorism;

⁶ See General Assembly resolutions 72/194, 72/284 and 74/175.

⁷ See Security Council resolution 2482 (2019) and previous related Council resolutions.

- (c) Effective criminal justice investigation, prosecution and adjudication of terrorism offences in line with the relevant international legal instruments and norms, relevant obligations of Member States in accordance with international legal instruments on human rights and good practices;
- (d) Increased national, regional and international cooperation, especially between criminal justice entities, to prevent and counter-terrorism;
- (e) Advanced implementation by Member States of the United Nations Global Counter Terrorism Strategy and relevant United Nations conventions and resolutions, through structural changes in their legal and criminal justice measures and internal functioning that are sustainable over time.

Programme performance in 2023

Recovery and reintegration of Iraqi victims of terrorism

- 16.56 Victims of terrorism require comprehensive support to help them address their trauma. This includes mechanisms, policies, laws and strategies to facilitate their recovery and reintegration into society, as well as legal assistance to support them in criminal justice proceedings to ensure that perpetrators are brought to justice. In partnership with civil society, the subprogramme supported Iraqi victims of terrorism. As part of those efforts, national authorities in Iraq identified legislative, procedural gaps and challenges related to the existing provisions for victims of terrorism to gain access to their rights within the national legal framework and mechanisms in place, as well as their role within criminal justice proceedings.
- 16.57 Progress towards the objective is presented in the performance measure below (see table 16.9).

Table 16.9

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
Victims and witnesses of terrorism have access to improved support services, namely, psychosocial and legal assistance	Victims of terrorism are supported in their reintegration into society through newly established support networks	Measures to improve services for victims of terrorism in Iraq advance, following the identification of legislative, procedural gaps and challenges related to victims' protection in criminal proceedings
Victims of terrorism receive support in criminal justice proceedings, including mechanisms regarding their legal aid and protection		

Planned results for 2025

Result 1: strengthened response to growing terrorism challenges in Central, West and South Asia

Programme performance in 2023 and target for 2025

- 16.58 The subprogramme's work contributed to Member States adopting measures to address terrorism, including detecting the movement of foreign terrorist fighters and supporting their prosecution, rehabilitation and reintegration.
- 16.59 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 16.10).

Table 16.10
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Member States reassess their counter-terrorism technical assistance needs following the Taliban takeover	Member States in Central Asia request and receive support to develop criminal justice measures and mechanisms to prevent and counter terrorism	Member States adopt measures to address terrorism, including detecting the movement of foreign terrorist fighters and supporting their prosecution, rehabilitation and reintegration	Member States report improved measures and mechanisms to prevent and counter terrorism	Member States enhance cooperation across borders, including the sharing of good practices

Result 2: increased institutional capacity of Member States to prevent and counter terrorism

Programme performance in 2023 and target for 2025

16.60 The subprogramme’s work contributed to building Member States’ counter-terrorism normative frameworks and policies and enhancing the skills and knowledge of 3,105 criminal justice officials to prevent and counter terrorism, which met the planned target.

16.61 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 16.IX).

Figure 16.IX

Performance measure: criminal justice officials developing the skills and knowledge to prevent and counter terrorism (annual)

Result 3: institutional change in Southern Africa to build strong and accountable criminal justice systems and counter terrorism

Proposed programme plan for 2025

16.62 To support countries in Southern Africa in addressing emerging terrorism challenges, the subprogramme works with requesting Member States to build strong and accountable criminal justice systems that are in line with relevant international standards on human rights in the administration of justice. In Mozambique, for instance, the subprogramme helped to establish a core

group of over 600 trained counter-terrorism officials and a national inter-agency network of counter-terrorism focal points.

Lessons learned and planned change

- 16.63 The lesson for the subprogramme was that effecting sustainable structural change requires efforts to ensure national ownership. In applying the lesson, the subprogramme will focus on supporting key national counterparts on the ground to apply and transfer to their peers the knowledge and skills gained through the subprogramme’s technical assistance. This approach will promote institutional capacity for more effective counter-terrorism measures and responses.
- 16.64 Expected progress towards the objective and the target for 2025 are presented in the performance measure below (see table 16.11).

Table 16.11
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Mozambique establishes a pool of counter-terrorism officials	Mozambique establishes the Central Cabinet against Transnational Organized Crime and a specialized team on counter-terrorism investigations within the National Criminal Investigation Service	Mozambique develops a framework for training and mentoring with the Mozambique Legal and Judicial Training Centre	One country supports the establishment of a counter-terrorism prosecutions unit	One country promotes and strengthens national policies and legal and institutional counter-terrorism frameworks

Deliverables

- 16.65 Table 16.12 lists all the deliverables of the subprogramme.

Table 16.12
Subprogramme 4: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	2	2
1. Report of the Secretary-General to the Commission on Crime Prevention and Criminal Justice	1	1	1	1
2. Report of the Secretary-General to the General Assembly	–	–	1	1
Substantive services for meetings (number of three-hour meetings)	24	45	5	18
3. Meetings of the General Assembly and its subsidiary bodies	2	1	2	1
4. Meetings of the Security Council and its subsidiary bodies	5	4	2	2
5. Biennial review of the United Nations Global Counter-Terrorism Strategy	4	25	–	–
6. Meetings of the Commission on Crime Prevention and Criminal Justice	13	15	1	15

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	1	1	1
7. Global Programme on Strengthening the Legal Regime against Terrorism	1	1	1	1
Publications (number of publications)	3	1	3	3
8. On specific thematic issues related to counter-terrorism	3	1	3	3

C. Substantive deliverables

Consultation, advice and advocacy: advisory services on legislative drafting and strategies and plans of action; consultation on the development of technical assistance plans; advisory services on the visits of the Counter-Terrorism Committee; advice to national training institutions; advice and advocacy related to the 19 international legal instruments.

Databases and substantive digital materials: SHERLOC counter-terrorism tools, including the database of national central authorities for counter-terrorism cases; and the online Counter-Terrorism Learning Platform.

D. Communication deliverables

Outreach programmes, special events and information materials: information kits in legal, criminal justice and related areas.

Digital platforms and multimedia content: website and social media accounts; dedicated communication campaigns for international days related to counter-terrorism matters.

Subprogramme 5 Justice

Objective

- 16.66 The objective, to which this subprogramme contributes, is to prevent crime and ensure more effective, fair, humane and accountable criminal justice systems as a basis for the rule of law and sustainable development.

Strategy

- 16.67 To contribute to the objective the subprogramme will:
- (a) Promote the application and facilitate the development of United Nations standards and norms in crime prevention and criminal justice through support to criminal justice reform and coordination with all relevant sectors in national criminal justice systems and all crime prevention and criminal justice reform actors;
 - (b) Provide assistance, upon request, to Member States' crime prevention and criminal justice actors by supporting Member States, upon request, with institution-building and providing capacity-building and technical advice in cooperation with other sectors, including education, health and social services, in the areas of: community and knowledge-based crime prevention to address risk factors and root causes of offending and reoffending; access to justice, including through policing with full respect for human rights, access to legal aid, alternatives to imprisonment and restorative justice; preparation, response and recovery from crisis; violence against women; violence against children; as well as penal and prison reform, including related to treatment of violent extremist⁸ prisoners, radicalization and social reintegration upon release;

⁸ The terms “violent extremist” and “violent extremism” refer to violent extremism as and when conducive to terrorism (see General Assembly resolution [77/237](#)).

- (c) Develop and disseminate practical tools, such as guidance notes, handbooks, training curricula and model legislation, and support crime prevention and criminal justice actors in applying these tools, and share studies, good practices and online resources;
 - (d) Incorporate cross-cutting issues related to: developments in the delivery of justice through the use of new technology; victims and witnesses; gender equality in the criminal justice system; and children in the criminal justice system.
- 16.68 In doing so, the subprogramme will help Member States to make progress towards achievement of the Sustainable Development Goals, in particular, Goals 5, 11 and 16.
- 16.69 The above-mentioned work is expected to result in:
- (a) Improved frequency and quality in application of alternatives to imprisonment in appropriate cases, effective and efficient prison management and humane treatment of prisoners and enhanced capacity of and coordination between justice actors to address excessive and arbitrary police and pretrial detention;
 - (b) Improved prosecution and adjudication of cases of violence against women and girls and improved prevention of and responses to violence against children;
 - (c) Increased equal access to justice for people in vulnerable situations and increased public trust in the justice system, including through nationwide legal aid services that are accessible to all and are tailored to the rights and needs of the population;
 - (d) Enhanced support for social reintegration of prisoners and prevention of recidivism;
 - (e) Prevention of victimization and creation of safer communities;
 - (f) Empowerment of women and girls within crime prevention and criminal justice programmes and systems;
 - (g) Continued functioning of criminal justice systems during health and other crises and reduced risk of violations of the rights of those affected disproportionately, in particular detainees, prisoners and victims of crime.

Programme performance in 2023

Criminal investigation processes improved through investigative interviewing

- 16.70 By adopting the Kyoto Declaration on Advancing Crime Prevention, Criminal Justice and the Rule of Law, which highlights the importance of non-coercive investigative methods, emphasizing their effectiveness, Member States committed to improving criminal investigation processes, encouraging the use of evidence-based interviewing methods and collaborating on international guidelines for non-coercive interviewing methods and procedural safeguards. The subprogramme contributed to the development of the Principles on Effective Interviewing for Investigations and Information-Gathering and a United Nations manual on effective interviewing to promote the “Méndez Principles”, which recognize the need for efficient criminal investigations that respect human rights and endorse investigative interviewing methods that safeguard human rights as the most effective tools for law enforcement in solving crimes. The subprogramme also developed three eLearning modules and three mini-modules on investigative interviewing within the framework of its Global eLearning Programme, which are available in Arabic, English, French, German, Russian and Spanish.
- 16.71 Progress towards the objective is presented in the performance measure below (see figure 16.X).

Figure 16.X
Performance measure: number of law enforcement officials equipped to conduct people-centred investigative interviewing (cumulative)

Planned results for 2025

Result 1: criminal justice systems mainstream a gender perspective in crime prevention and criminal justice reform

Programme performance in 2023 and target for 2025

- 16.72 The subprogramme’s work contributed to the integration of a gender perspective in crime prevention and criminal justice reform in 73 per cent of the Member States supported under the subprogramme, which met the planned target.
- 16.73 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 16.XI).

Figure 16.XI
Performance measure: Member States mainstreaming a gender perspective in crime prevention and criminal justice reform

(Percentage of Member States supported under the subprogramme)

Result 2: criminal justice institutions are effective and accessible**Programme performance in 2023 and target for 2025**

- 16.74 The subprogramme's work contributed to ensuring the operation of fair, effective, representative, transparent and accountable criminal justice institutions while promoting equal access to justice for all, particularly for people in vulnerable situations, through 5,300 criminal justice actors with strengthened capacities to provide more people-centred justice services, which met the planned target.
- 16.75 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 16.XII).

Figure 16.XII

Performance measure: criminal justice actors with strengthened capacities to provide more people-centred justice services (cumulative)**Result 3: crime prevention and criminal justice reform efforts with full respect for human rights****Proposed programme for 2025**

- 16.76 The subprogramme supports Member States in ensuring accessible, effective, fair, humane, transparent and accountable criminal justice systems, by integrating international standards for the protection and promotion of human rights within the criminal justice context, codified in the United Nations standards and norms in crime prevention and criminal justice.

Lessons learned and planned change

- 16.77 The lesson for the subprogramme was that adopting a unified approach, channelled through a single global programme, increases the effectiveness of technical assistance in the areas of access to justice, crime prevention, preventing and responding to violence against women and violence against children, and advancing penal and prison reform. In applying the lesson, the subprogramme will harness the model of a centralized global programme delivery and will evolve and expand to meet emerging needs and challenges and guide future efforts towards justice, safety and societal transformation, to yield more impactful results benefiting communities and societies at large.
- 16.78 Expected progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 16.XIII).

Figure 16.XIII

Performance measure: number of Member States undertaking crime prevention and criminal justice reform efforts with full respect for human rights (cumulative)

Deliverables

16.79 Table 16.13 below lists all deliverables of the subprogramme.

Table 16.13

Subprogramme 5: deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	2
1. Reports for the Commission on Crime Prevention and Criminal Justice	1	1	1	2
Substantive services for meetings (number of three-hour meetings)	1	1	1	1
2. Meetings of the Commission on Crime Prevention and Criminal Justice	1	1	1	1
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	5	5	4	4
3. To support Member States in the field of crime prevention and criminal justice	5	5	4	4
Seminars, workshops and training events (number of days)	40	40	80	80
4. Training courses, seminars and workshops on crime prevention and criminal justice	40	40	80	80
Publications (number of publications)	3	3	4	4
5. Guidance materials (e.g., handbooks, tools, studies)	3	3	4	4
Technical materials (number of materials)	20	20	20	20
6. E-learning modules	20	20	20	20
C. Substantive deliverables				
Consultation, advice and advocacy: substantive and technical advice on crime prevention and criminal justice to 70 Member States, relevant organizations and agencies, as well as 18 national and regional programmes; advice on best practices in crime prevention and criminal justice reform.				
D. Communication deliverables				
Outreach programmes, special events and information materials: campaigns to observe Nelson Mandela International Day; promotional materials on UNODC mandate areas in crime prevention and criminal justice; and fundraising initiatives and strategic partnerships with international organizations and civil society organizations.				

Subprogramme 6

Research, trend analysis and forensics

Objective

- 16.80 The objective, to which this subprogramme contributes, is to ensure that Member States have enhanced knowledge of trends on drugs and crime for effective scientific and evidence-based policy formulation and access to and use of quality forensic science data, information and tools in their efforts against drugs, crime and terrorism.

Strategy

- 16.81 To contribute to the objective, the subprogramme will:
- (a) Provide timely and accurate statistics and analyses of world drug and crime problems, with particular attention to specific manifestations of crime and its transnational dimensions through the production of global and thematic reports, an online monitoring platform and a data-sharing portal;
 - (b) Generate high-quality and relevant evidence through strengthened research capacity in the field and technical oversight at headquarters, including in coordination with the regional Centres of Excellence in Mexico and the Republic of Korea, and the national Centre of Excellence for Illicit Drug Supply Reduction in Brazil;
 - (c) Support countries through workshops, trainings, the provision of guidelines and other capacity-building efforts, in the collection of and reporting on data regarding drugs and crime, as required to monitor progress against certain Sustainable Development Goals and targets, in particular Goals 3, 15 and 16, as they relate to drug use, trafficking, illicit financial flows, justice, corruption, crime and crime-related violence;
 - (d) Build capacity of national statistical offices and other relevant national institutions, upon request, to produce, disseminate and analyse drug and crime data and statistics, and assist Member States, upon request, in identifying trends, emerging issues and priorities in drugs, crime and corruption;
 - (e) Provide technical assistance and expert advice to drug-testing laboratories, forensic institutions and Member States on forensics standard setting, early warning systems and the exchange of quality forensic data and services for policymaking and decision-making;
 - (f) Develop and disseminate forensic best practices guidelines and scientific-technical publications on drugs and crime;
 - (g) Provide scientific support to the three treaty bodies under the international drug conventions, namely the Commission on Narcotic Drugs, the International Narcotics Control Board and WHO.
- 16.82 The above-mentioned work is expected to result in:
- (a) Enhanced knowledge among Member States, the international community and other relevant stakeholders on formulating strategic responses to existing and emerging drugs and crime issues;
 - (b) Production and analysis of statistical data on trends by Member States, including trends in specific and emerging drugs and crime issues;
 - (c) Enhanced scientific and forensic capacity of law enforcement personnel, national drug testing and toxicology laboratories and forensic service providers in line with internationally accepted standards of performance.

Programme performance in 2023

Improved data reporting on Africa

16.83 Better data leads to stronger decision-making and policy formulation, enabling Member States and policymakers to gain essential insights on drugs and crime issues and facilitating the formulation of effective responses to address these challenges. African countries have been found to be underrepresented in global analyses owing to lack of available data. The subprogramme contributed to closing that data gap by organizing in-person workshops in Africa to train national officials on reporting drug-related data through the annual report questionnaire and the individual drug seizures tools. In 2023, the subprogramme's workshops were attended by more than 50 participants from 16 countries in West and Southern Africa, resulting in an increased number of Member States from the region reporting to UNODC-mandated data collections for the second consecutive year.

16.84 Progress towards the objective is presented in the performance measure below (see figure 16.XIV).

Figure 16.XIV

Performance measure: number of countries in Africa reporting data through the UNODC annual report questionnaire (annual)

Planned results for 2025

Result 1: timely information and evidence to prevent and combat smuggling of migrants and related crimes, and to protect the rights of people who are smuggled

Programme performance in 2023 and target for 2025

16.85 The subprogramme's work contributed to up-to-date evidence on the modus operandi of migrant smugglers, smuggling routes, financial aspects and abuses linked to migrant smuggling, by collecting data from 17 countries and attracting 10,500 visits on the web-based platforms, which exceeded the planned targets of 17 countries and 10,000 platform visits.

16.86 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 16.XV).

Figure 16.XV
Performance measure: number of countries covered by the United Nations Office on Drugs and Crime Observatory on Smuggling of Migrants (cumulative) and visits to the web-based platform (annual)

Result 2: safe handling and disposal of drugs and the precursor chemicals used in their illicit manufacture by Member States

Programme performance in 2023 and target for 2025

16.87 The subprogramme’s work contributed to two countries with national inter-agency disposal plans and 20 national experts with enhanced knowledge on the disposal of drugs and precursor chemicals in a safe, sustainable and environmentally friendly manner, which met the planned targets.

16.88 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 16.XVI).

Figure 16.XVI
Performance measure: number of countries with national disposal plans and personnel with enhanced knowledge on the disposal of drugs and precursor chemicals (annual)

Result 3: Member States drug testing and toxicology laboratories monitor their performance as part of quality assurance practices

Proposed programme plan for 2025

16.89 The UNODC laboratory implements a proficiency test (the international collaborative exercises) in the analysis and identification of drugs for national drug testing and toxicology laboratories. Participation in such tests is part of laboratory quality management and allows Member States to assess their own performance and take corrective action where needed. Currently, laboratories from approximately 90 countries and territories participate biannually.

Lessons learned and planned change

16.90 The lesson for the subprogramme was to encourage the continuous participation of laboratories in such proficiency tests. Continuous participation (defined as the completion of four successive rounds of the proficiency test) not only would help Member States to ensure the accuracy and reliability of testing procedures but also can help foster a culture of continuous improvement. In applying the lesson, the subprogramme will monitor the results of the proficiency test to inform the laboratory and scientific services provided by the subprogramme to enhance the scientific and forensic capacity of Member States and tailor services to their needs.

16.91 Expected progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 16.XVII).

Figure 16.XVII

Performance measure: number of forensic laboratories continuously participating in the UNODC drug analysis proficiency test (cumulative)

Deliverables

16.92 Table 16.14 lists all deliverables of the subprogramme.

Table 16.14

Subprogramme 6: deliverables for the period of 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	2	2	2	2
1. Report to the Commission on Narcotic Drugs on world drug abuse	1	1	1	1
2. Report to the Commission on Crime Prevention and Criminal Justice on world crime trends	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	2	2	2	2
3. Meeting of the Commission on Narcotic Drugs on world drug abuse	1	1	1	1

5. Workshops and training on drug control, crime prevention and forensics	10	10	10	10
Publications (number of publications)	10	10	10	10
6. Research publications on drug control and crime prevention	5	5	5	5
7. Forensic publications on drug control and crime prevention	4	4	4	4
8. Journals on narcotics, and crime and society	1	1	1	1
Technical materials (number of materials)	14	14	14	14
9. On the monitoring of illicit drug crops	5	5	5	5
10. On drug control and crime prevention	9	9	9	9
C. Substantive deliverables				
Consultation, advice and advocacy: approximately 35 briefings, and dissemination events to Governments, international, regional and national organizations, institutions and laboratories on drugs and crime statistics and on forensics.				
Databases and substantive digital materials: international statistics on crime and illicit drugs; online database of individual drug seizures for 40,000 users; early warning advisory on new psychoactive substances, 10,000 monthly sessions; United Nations Toolkit on Synthetic Drugs, 3,500 monthly sessions; UNODC Observatory on Smuggling of Migrants.				

Subprogramme 7

Policy support

Objective

- 16.93 The objective, to which this subprogramme contributes, is to advance institutional reform and strengthen policy and operational responses by Member States on drug control, crime prevention and criminal justice.

Strategy

- 16.94 To contribute to the objective, the subprogramme will:
- (a) Conduct dialogues with Member States, international organizations and private sector entities to mobilize resources and carry out targeted advocacy and communication activities in substantive areas such as combating transnational organized crime, trafficking in drugs and corruption;
 - (b) Provide assistance to headquarters and field-based offices related to supporting institutional reforms and ensuring policy coherence through strengthening policy dialogue and enhancing interdivisional coordination;

- (c) Further institutionalize a results-based management culture across UNODC by providing technical advice and quality oversight with a view to further strengthening transparency and accountability in UNODC interventions;
- (d) Undertake policy analysis and coordinate with other United Nations agencies on emerging and cross-cutting issues related to drugs, crime, corruption and terrorism, in particular promoting the Sustainable Development Goals and the empowerment of youth;
- (e) Strengthen the strategic engagement of non-governmental stakeholders in assisting Member States to prevent and combat corruption, crime and terrorism in support of the Sustainable Development Goals, as appropriate and as determined in relevant treaties.

16.95 The above-mentioned work is expected to result in:

- (a) Increased awareness and capacity of Member States to address the interlinked issues of drugs, crime, corruption and terrorism at the global, regional, national and local levels and these issues being reflected within broader national development efforts;
- (b) Promotion of participation of civil society on issues related to drugs, crime and corruption, as mandated in relevant conventions and policy instruments, and enhanced engagement between Member States, the private sector, academia and civil society;
- (c) Greater public awareness of issues related to drugs, crime, corruption and terrorism.

Programme performance in 2023

Kenya engages civil society in a review mechanism of the United Nations Convention on Transnational Organized Crime

16.96 In 2018, in its resolution 9/1, the Conference of the Parties to the United Nations Convention against Transnational Organized Crime adopted a review mechanism to enable the effective implementation of such instruments and to help States parties identify specific needs for technical assistance. The procedures and rules for the Review Mechanism provide for the broader engagement of relevant stakeholders, including from civil society, academia and the private sector. Such engagement, in the review process, requires a voluntarily solicitation by States parties. The subprogramme’s work contributed to the Kenya voluntary pilot initiative, which allowed the Government to establish a mechanism for coordination and engagement with non-governmental stakeholders – the Kenya Civil Society Alliance. Following the launch of the initiative, the Government of Kenya officially invited non-governmental stakeholders to participate in the completion of the self-assessment questionnaire, becoming the first country in Africa to host a voluntary pilot initiative and the first State party to engage non-governmental stakeholders in the review process.

16.97 Progress towards the objective is presented in the performance measure below (see table 16.15).

Table 16.15
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
Member States approached to host voluntary pilot initiatives and enable non-governmental stakeholder engagement in the United Nations Convention against Transnational Organized Crime review mechanism	Mexico and Pakistan launch voluntary pilot initiatives and establish civil society alliances	The Government of Kenya agrees to host a voluntary pilot initiative, the Kenya Civil Society Alliance is established, and non-governmental stakeholders are engaged in the review process

Planned results for 2025

Result 1: improved public awareness of issues surrounding drugs, crime, corruption and terrorism

Programme performance in 2023 and target for 2025

16.98 The subprogramme's work contributed to attracting a total number of 845,258 followers on UNODC corporate social media channels, which exceeded the planned target of 731,000 annual followers.

16.99 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 16.XVIII).

Figure 16.XVIII

Performance measure: number of followers on UNODC social media channels (annual)

Result 2: victims of trafficking in persons receive critical assistance for their social, physical and psychological recovery

Programme performance in 2023 and target for 2025

16.100 The subprogramme's work contributed to 10,500 direct beneficiaries receiving humanitarian, legal and psychological support and vocational training through specialized organizations, which met the planned target.

16.101 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 16.XIX).

Figure 16.XIX

Performance measure: number of direct beneficiaries that have received legal and financial assistance through specialized organizations (annual)

Result 3: young people engage meaningfully in decision-making processes on drugs, crime and corruption

Proposed programme plan for 2025

16.102 In 2022, the UNODC Youth Empowerment Accelerator (YEA!) Framework was launched, to ensure the meaningful engagement of young people across the programmatic work of UNODC. The subprogramme supports the implementation of the Framework through a community of practice, engaging young people through different networks and supporting actions to accelerate youth empowerment.

Lessons learned and planned change

16.103 The lesson for the subprogramme was that tokenistic involvement can hinder meaningful youth engagement and opportunities for young people. Meaningful youth engagement seeks to involve young people in all parts of the programme cycle, underscoring the notion of “nothing about us without us”. In applying the lesson, the subprogramme will ensure that young people are engaged in active partnership and open dialogue with the Office and will foster their inclusion in intergovernmental and decision-making forums.

16.104 Expected progress towards the objective and the target for 2025 are presented in the performance measure below (see table 16.16).

Table 16.16
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
First virtual Youth Forum alongside the Commission on Narcotic Drugs	First Youth Consultation alongside the eleventh Conference of the Parties to the Convention against Transnational Organized Crime	“Youth changemakers” held at the twentieth Conference of the States Parties to the United Nations Convention against Corruption	Youth engagement at the Commission on Crime Prevention and Criminal Justice	Regional Youth Consultations to support the fifteenth United Nations Congress on Crime Prevention and Criminal Justice

Deliverables

Outreach programmes, special events and information materials: global campaigns to observe the International Day against Drug Abuse and Illicit Trafficking, World Day against Trafficking in Persons and International Anti-Corruption Day; promotional materials on UNODC mandate areas; fundraising outreach and strategic partnerships with international financial institutions, international organizations and the private sector.				
External and media relations: press releases and events.				
Digital platforms and multimedia content: UNODC website and social media channels.				

**Subprogramme 8
Technical cooperation and field support**

Objective

- 16.106 The objective, to which this subprogramme contributes, is to strengthen Member State-owned programmes countering drugs, crime and terrorism.

Strategy

- 16.107 To contribute to the objective, the subprogramme will:
- (a) Provide policy advice, strategic guidance and coordination to all UNODC field offices for the development and implementation of integrated operational programmes and ensure their full implementation;
 - (b) Ensure operational accountability and programmatic efficiency, including by engaging in the development of business operational strategies and common back offices, monitoring risks and ensuring the inclusion of results-based management in the planning, monitoring and reporting of all UNODC field presences;
 - (c) Provide substantive, technical and policy advice through its field offices, according to their mandates and at the request of Member States, and ensure the inclusion of governance, security, and preventing and countering drugs, crime and terrorism with full respect for human rights in the implementation of joint United Nations programmes through technical assistance;
 - (d) Support the development of regional strategies and operational programmes promoting the joint pursuit of justice, public security and development that build on the normative and technical assistance of the Office, through policy dialogue and coordination, and by serving as a common platform for joint efforts with United Nations partners, international financial institutions, other multilateral bodies and civil society;
 - (e) Provide technical and legislative assistance among partner countries designed to foster full ownership by regional entities to support the establishment of South-South cooperation and interregional cooperation;

- (f) Provide targeted capacity-building to Member States to support the achievement of the Sustainable Development Goals, including through North-South, South-South and triangular cooperation.

16.108 This work is expected to result in:

- (a) Improved legal and policy responses and strengthened capacity of Member States to address the world drug problem, prevent and counter transnational organized crime, corruption and terrorism and promote justice and the rule of law and participate more effectively in joint initiatives, and cross-border and transnational cooperation;
- (b) Member States advancing in evidence-based and tailored programmes in priority areas of UNODC mandates, to support relevant Sustainable Development Goals based on contextual needs assessments;
- (c) Renewed cooperation and coherence with offices of the United Nations resident coordinators, other United Nations entities and regional Development Coordination Office desks under both development system and business operations reforms, thus enhancing the efficiency of support to Member States.

Programme performance in 2023

Enhanced fuel controls in the Galapagos, Ecuador, to disrupt maritime crime

16.109 In the Galapagos, Ecuador, effective maritime law enforcement to counter drug trafficking by sea and other maritime crimes is hindered by various challenges related to administrative controls and is compounded by limited analysis and exchange of information among law enforcers and the private sector. Furthermore, the ability of a variety of actors to stock fuel in the middle of the Pacific Ocean facilitates the expansion of criminal networks’ operations to Central America to deliver drugs or engage in illegal fishing. Following the delivery of technical assistance sessions on inter-institutional coordination against maritime crime in the Galapagos, held in 2022 and 2023, the Consejo de la Judicatura endorsed guidelines that contributed to strengthening administrative controls on fuel supply in the Galapagos as a tool to combat drug trafficking, other maritime crimes and criminal networks associated with it.

16.110 Progress towards the objective is presented in the performance measure below (see table 16.18).

Table 16.18
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
–	Law enforcement agencies in the Galapagos establish mechanisms to improve inter-institutional coordination in their response against fuel trafficking and maritime crime	Strengthened administrative controls on fuel supply through endorsement of inter-institutional guidelines for maritime law enforcement in the Galapagos

Planned results for 2025

Result 1: strengthened rule of law and protection of those who are vulnerable in small island developing States in the Pacific

Programme performance in 2023 and target for 2025

- 16.111 The subprogramme's work contributed to the enhanced capacity of and cooperation among small island developing States in the Pacific in the fight against corruption and transnational organized crime, through improved legal and policy frameworks and their active participation in the review mechanisms of the United Nations Convention against Transnational Organized Crime and the United Nations Convention against Corruption, which met the planned target.
- 16.112 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 16.19).

Table 16.19

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Common country analysis and cooperation frameworks of Fiji, Papua New Guinea and Samoa reflect UNODC mandates under Sustainable Development Goals 3, 16 and 17	Improved data collection systems on human trafficking in six small island developing States in the Pacific Enhanced South-South cooperation between 14 small island developing States in the Pacific	Small island developing States in the Pacific concluded the United Nations Convention against Corruption first and second cycles, started the first United Nations Convention against Transnational Organized Crime review, and began implementation of the action plan (Pacific road map for anti-corruption, or Teieniwa Vision)	Small island developing States in the Pacific have an increased evidence base on the threat of transnational organized crime and are better prepared to combat transnational organized crime (including crimes facilitated by the misuse of information and communications technologies) 14 small island developing States in the Pacific promote and strengthen the prevention of and fight against corruption, in line with the United Nations Convention against Corruption, and support implementation of the Pacific road map to address corruption in the region (the Teieniwa Vision)	The Teieniwa Vision becomes a standing item in the Pacific Island Leaders' Forum Summit agenda

Result 2: drug production and use are addressed through alternative livelihood and health services
Programme performance in 2023 and target for 2025

- 16.113 The subprogramme’s work contributed to 31,000 people (38 per cent women) receiving access to drug treatment and rehabilitation services, which exceeded the planned target of 20,000 people. The subprogramme’s work also contributed to 8,791 households benefiting from alternative development support, which did not meet the planned target of 15,000 households. The target was not met owing to the ban on female workers, which hindered the delivery of activities to women beneficiaries. To reach beneficiaries, the subprogramme provided women trainers with a *mahram*, a male relative accompanying them, and secured local exemptions for women workers where possible.
- 16.114 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 16.XX).

Figure 16.XX
Performance measure: beneficiaries in Afghanistan of United Nations Office on Drugs and Crime programmes on alternative development and prevention and treatment of drug use and drug use disorders (cumulative)

Result 3: navigating challenges to safety at sea through strengthened maritime safety management systems

Proposed programme plan for 2025

- 16.115 Maritime trade routes in the South Atlantic and Indian Oceans are linked by port facilities that face challenges with maritime enforcement, compliance with international standards for safety and security, and regional cooperation. The subprogramme’s work strengthened the safety of navigation in nine countries in the region and ensured the development and implementation of port security legislations and related compliance frameworks.

Lessons learned and planned change

- 16.116 The lesson for the subprogramme was the need to strengthen port security and maritime safety management systems, given that gaps in such systems can be exploited by transnational criminal organizations engaging in illicit trafficking, thus threatening safety of life at sea, coastal livelihoods and maritime environments. In applying the lesson, the subprogramme will work with competent national authorities in conducting daily patrolling, strengthening International Ship and Port Facility code compliance in additional ports and facilitating inter-institutional security meetings.
- 16.117 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 16.20).

Table 16.20
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Nine countries review/establish mechanisms to apply international regulations on maritime crime in domestic legislation	Enhanced regional coordination in the prosecution of maritime crime	Ports in nine countries start to conduct daily patrols and review their port facility security plans Protected radiata tortoises seized in Madagascar A new port control unit established in Maputo	Five ports become International Ship and Port Facility code compliant	At least one port in each of the nine countries assisted is International Ship and Port Facility code compliant

Deliverables

- 16.118 Table 16.21 lists all deliverables of the subprogramme.

Table 16.21
Subprogramme 8: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	13	13	13	13
1. Regional and country programmes on UNODC mandate areas	13	13	13	13
Technical materials (number of materials)	2	2	2	2
2. On Business Continuity, United Nations reform and the efficiency agenda	2	2	2	2
Seminars, workshops and training events (number of days)	13	13	13	13
3. Seminars on programme development and 2030 Agenda	13	13	13	13

C. Substantive deliverables

Consultation, advice and advocacy: advisory services through field office network for approximately 150 Member States and stakeholders on policies, strategies and cooperation frameworks, consultations with Member States and partners on strategic priorities and new programmes; and strategic and operational field support and substantive oversight services in UNODC mandate areas.

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

D. Communication deliverables

Outreach programmes, special events and information materials: national campaigns to observe the International Day against Drug Abuse and Illicit Trafficking, World Day against Trafficking in Persons, and the International Anti-Corruption Day; and fundraising outreach and partnerships with international financial institutions, international organizations and the private sector specifically focused on country or regional contexts.

Digital platforms and multimedia content: UNODC field offices websites.

E. Enabling deliverables

Safety and security: safety and security services to approximately 125 physical field office locations in 97 countries.

Subprogramme 9

Component 1: Provision of secretariat services and substantive support to the Commission on Narcotic Drugs, the Commission on Crime Prevention and Criminal Justice and the United Nations Congress on Crime Prevention and Criminal Justice

Objective

- 16.119 The objective, to which component 1 of this subprogramme contributes, is to ensure the effective and efficient functioning of the United Nations intergovernmental bodies dealing with issues relating to drugs, crime and terrorism, as well as the effective and efficient functioning of the standing open-ended intergovernmental working group on improving the governance and financial situation of UNODC and of the United Nations Congress on Crime Prevention and Criminal Justice in fulfilling their advisory roles.

Strategy

- 16.120 To contribute to the objective, the component will:
- (a) Provide substantive, technical and organizational services to the Commission on Narcotic Drugs and its five subsidiary bodies, to the Commission on Crime Prevention and Criminal Justice and to the United Nations congresses on crime prevention and criminal justice, including the follow-up to the Fourteenth Congress and the implementation of the provisions of its outcome document;
 - (b) Provide support to the standing open-ended intergovernmental working group on improving the governance and financial situation of UNODC by facilitating the preparations for and the organization of the formal and informal meetings of the working group.
- 16.121 The above-mentioned work is expected to result in:
- (a) Enhanced cooperation among Member States in accelerating the implementation of international drug policy commitments as well as comprehensive strategies for crime prevention towards social and economic development and integrated approaches to challenges faced by criminal justice systems;
 - (b) Enhanced understanding of Member States of governance and financial matters relating to UNODC;
 - (c) Increased participation by a broad and inclusive group of representatives.

Programme performance in 2023

Successful stocktaking of the progress made in implementing the international drug policy commitments

16.122 In the 2019 Ministerial Declaration on Strengthening Our Actions at the National, Regional and International Levels to Accelerate the Implementation of Our Joint Commitments to Address and Counter the World Drug Problem, Member States resolved to review the progress in implementing all international drug policy commitments in the Commission on Narcotic Drugs in 2029, with a midterm review in 2024. The component supported the preparations for the 2024 high-level review process. In particular, support was provided to the negotiations of the Commission at its sixty-sixth session, in March 2023, on the organizational arrangements of the high-level segment, resulting in the adoption of a modalities resolution by consensus. The component also led the organization of two rounds of intersessional thematic discussions – in October and December 2023 – which enabled the Commission to undertake a comprehensive stocktaking of the progress made in implementing the international drug policy commitments since 2019 and to better prepare for the 2024 midterm review.

16.123 Progress towards the objective is presented in the performance measure below (see figure 16.XXI).

Figure 16.XXI

Performance measure: Member States participating in the meetings of the Commission on Narcotic Drugs expressing full satisfaction with the quality and timeliness of technical and substantive services provided by the Secretariat to the Governing Bodies

(Percentage)

Planned results for 2025

Result 1: strengthened crime prevention, criminal justice and rule of law towards the achievement of the 2030 Agenda through the effective follow-up to the Kyoto Declaration

Programme performance in 2023 and target for 2025

16.124 The component's work contributed to 100 per cent of Member States participating in the meetings of the Commission on Crime Prevention and Criminal Justice expressing full satisfaction with the quality and timeliness of technical and substantive services provided by the Secretariat to the Governing Bodies, which exceeded the planned target of 80 per cent.

16.125 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 16.XXII).

Figure 16.XXII

Performance measure: Member States participating in the meetings of the Commission on Crime Prevention and Criminal Justice expressing full satisfaction with the quality and timeliness of technical and substantive services provided by the Secretariat to the Governing Bodies

(Percentage)

Result 2: accelerated implementation of international drug policy commitments to effectively address and counter the world drug problem

Programme performance in 2023 and target for 2025

16.126 The subprogramme’s work contributed to 97 per cent of Member States participating in the meetings of the Commission on Narcotic Drugs expressing full satisfaction with the quality and timeliness of technical and substantive services provided by the Secretariat to the Governing Bodies, which exceeded the planned targets of 85 per cent.

16.127 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 16.XXIII).

Figure 16.XXIII

Performance measure: Member States participating in the meetings of the Commission on Narcotic Drugs expressing full satisfaction with the quality and timeliness of technical and substantive services provided by the Secretariat to the Governing Bodies

(Percentage)

Result 3: strengthened implementation of international crime prevention and criminal justice policy commitments

Proposed programme plan for 2025

- 16.128 The Fifteenth United Nations Congress on Crime Prevention and Criminal Justice will be held in 2026, under the overarching theme “Accelerating crime prevention, criminal justice and the rule of law: Protecting people and planet and achieving the 2030 Agenda for Sustainable Development in the digital age”. The component supported the Commission on Crime Prevention and Criminal Justice, being the preparatory and follow-up body for the crime congresses, in negotiating a resolution on the organizational arrangements and the substantive agenda of the Fifteenth Congress. The component also supports the Commission on Crime Prevention and Criminal Justice in preparing relevant documentation for the 2026 Congress, and for the regional preparatory meetings to be held in 2025.

Lessons learned and planned change

- 16.129 The lesson for the subprogramme was that effective implementation of international policy commitments on crime prevention and criminal justice requires comprehensive and inclusive participation in the meetings by all Member States and other relevant stakeholders. In applying the lesson, the subprogramme will work to provide formats enabling comprehensive participation and meeting the needs of delegations.
- 16.130 Expected progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 16.XXIV).

Figure 16.XXIV

Performance measure: Member States participating in the meetings of the Commission on Crime Prevention and Criminal Justice expressing full satisfaction with the quality and timeliness of technical and substantive services provided by the Secretariat to the Governing Bodies

(Percentage)

Deliverables

- 16.131 Table 16.22 lists all deliverables of the component.

Table 16.22

Subprogramme 9, component 1: deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	66	72	69	92
1. Reports to the General Assembly on international cooperation to counter the world drug problem and on crime prevention and criminal justice, including reports on the United Nations congresses on crime prevention and criminal justice	5	4	5	4

15. Ad hoc expert groups related to the Commission on Narcotic Drugs	4	–	–	–
16. Regional preparatory meetings of the Fifteenth Crime Congress	–	–	–	30
B. Generation and transfer of knowledge				
Publications (number of publications)	5	4	5	5
17. On the manufacture of narcotic drugs and psychotropic substances and their precursors	1	1	1	1
18. Directory of competent national authorities under the international drug control treaties	1	1	1	1
19. Schedules and tables of the international drug control conventions	3	2	3	3
C. Substantive deliverables				
Consultation, advice and advocacy: substantive and technical advice to the Vienna-based Commissions, representatives of Member States, permanent missions in Vienna and other relevant stakeholders relating to the work of the Commissions; notes verbales as notifications under the international drug control treaties; advice on the follow-up to the mandates contained in the relevant resolutions and decisions adopted by the Commissions.				
Databases and substantive digital materials: database on the manufacture of narcotic drugs and psychotropic substances and their precursors; database on resolutions and decisions by the Commission on Narcotic Drugs and the Commission on Crime Prevention and Criminal Justice.				

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

D. Communication deliverables

Outreach programmes, special events and information materials: special events of the Commissions, including the launch of the annual World Drug Report.

Digital platforms and multimedia content: websites for the Commissions, the United Nations congresses on crime prevention and criminal justice, and the follow-up to the 2019 ministerial segment of the Commission on Narcotic Drugs; secure webpages for use by the Commission on Narcotic Drugs, the Commission on Crime Prevention and Criminal Justice and the standing open-ended intergovernmental working group on improving the governance and financial situation of UNODC; web stories and social media accounts highlighting key developments in the work of the Commissions.

Component 2: Provision of secretariat services and substantive support to the International Narcotics Control Board

Objective

- 16.132 The objective, to which component 2 of this subprogramme contributes, is to ensure the effective and efficient functioning of the International Narcotics Control Board in fulfilling its treaty-based mandate, through such measures as monitoring and promoting the full implementation of and full compliance with the three international drug control treaties and supporting Member States in implementing their treaty obligations.

Strategy

- 16.133 To contribute to the objective, the component will:
- (a) Provide independent secretariat services and substantive support to the International Narcotics Control Board, including ensuring that the Board is provided with advice on treaty implementation;
 - (b) Raise awareness of Governments and the international community about the implementation of the international drug control conventions, through the publication and dissemination of the treaty-mandated reports of the Board and on the need to develop and implement national drug control policies and regulatory control systems for narcotic drugs, psychotropic substances and precursor chemicals, helping Member States to make progress towards Sustainable Development Goals 3, 10, 11, and 16;
 - (c) Support Governments in meeting their treaty-based obligations for reporting to the Board, in monitoring the international movement of precursors and the illicit use of internationally controlled and non-scheduled precursors as well as equipment, and in promoting cooperation and the exchange of import and export authorizations, including through the International Narcotics Control Board learning programme and the International Import and Export Authorization System (I2ES), as well as information on licit and illicit activity, through electronic means such as the Pre-Export Notification Online system, the Pre-Export Notification Online Light system and the Precursors Incident Communication System, projects Prism and Cohesion and task force efforts; and support Governments in enhancing cooperation with relevant private sector entities, helping Member States to make progress towards Goals 3, 11, 16 and 17;
 - (d) Provide technical advice to the Board in assessing substances for scheduling recommendations under the 1988 Convention;
 - (e) Build the capacity of and enhance cooperation among law enforcement, customs, postal and other national agencies to ensure the availability of controlled substances for licit purposes and to safely detect and interdict controlled substances, new psychoactive substances and non-medical

synthetic opioids, through the Global Rapid Interdiction of Dangerous Substances programme, helping Member States to make progress towards Sustainable Development Goals 3, 16, and 17;

- (f) Raise awareness and provide training to relevant national authorities on:
 - (i) The implementation of the international drug control conventions;
 - (ii) Identifying and responding to changing patterns in trafficking in and abuse of controlled substances, new psychoactive substances and non-medical synthetic opioids;
 - (iii) The implementation of the simplified control measures for international trade in controlled substances during emergency situations.

16.134 The above-mentioned work is expected to result in:

- (a) Advancement of the Board's dialogue with Governments to promote implementation of the drug control conventions and the Board's recommendations and engagement on treaty-related matters;
- (b) Effective functioning of the international system for licit trade in controlled substances;
- (c) More accurate identification and reporting by Governments on their needs for and consumption of narcotic drugs and psychotropic substances for medical and scientific purposes;
- (d) Increased availability of controlled substances, with improved cooperation among Member States to ensure a balance between the supply of and demand for controlled substances;
- (e) Decreased availability of precursor chemicals and essential equipment for the illicit manufacture of drugs;
- (f) Reduction in trafficking in and misuse of internationally controlled substances and new psychoactive substances;
- (g) Improved response of Member States to emergency situations, and their impacts on the demand for and trafficking of new psychoactive substances and non-medical synthetic opioids;
- (h) Improved measures by Member States to respond to emergency situations requiring expedited trade in and humanitarian supply of controlled substances for medical purposes.

Programme performance in 2023

Member States acquire the knowledge to ensure adequate use of narcotic drugs and psychotropic substances for medical and scientific purposes, while preventing their diversion

16.135 The International Narcotics Control Board learning programme builds the capacity of Member States to ensure adequate access to internationally controlled substances and to further strengthen treaty implementation and treaty-mandated reporting. The capacity of Member States to implement the treaties has improved through the technical expertise and training tools provided by the component, including e-modules, regional training seminars, bilateral consultations and workshops on ensuring adequate availability of internationally controlled substances for medical and scientific purposes. In 2023, the component's work contributed to 154 countries and territories using the e-modules, and to the participation of Government officials in Latin America and the Caribbean, Eastern Europe and Central Asia in training events. Given the encouraging results yielded by the learning programme so far, the component aims to expand its coverage and involve more countries in the future.

16.136 Progress towards the objective is presented in the performance measure below (see figure 16.XXV).

Figure 16.XXV

Performance measure: number of countries and territories enrolled in International Narcotics Control Board e-learning modules (cumulative)

Planned results for 2025

Result 1: reduced availability of non-scheduled chemicals, designer precursors, materials and equipment used in illicit drug manufacture

Programme performance in 2023 and target for 2025

- 16.137 The component’s work contributed to the assessment of 18 substances for possible international scheduling, and to increased exchange of information by voluntary notifications of international shipments of non-scheduled chemicals through the new International Narcotics Control Board Pre-Export Notification Online Light platform, which met the planned target.
- 16.138 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 16.23).

Table 16.23
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Two global consultative meetings and side event of the Commission on Narcotic Drugs on non-scheduled chemicals	Catalogue of measures addressing non-scheduled chemicals available to Member States	18 chemicals assessed for possible international control	Member States make progress in engaging industry in preventing the proliferation of non-scheduled chemicals and the use of equipment for illicit drug manufacture	Member States engage with a wider range of industries identified through mapping exercises
Guidelines to Prevent and Investigate the Diversion of Materials and Equipment Essential for Illicit Drug Manufacture in the context of article 13 of the United Nations	International Narcotics Control Board guidance document on article 13 and equipment available to policymakers at the Commission on Narcotic Drugs	Increased exchange, through Pre-Export Notification Online Light, of information on non-scheduled chemicals, obtained by Member States through cooperation with industry		

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances of 1988 available in all official languages of the United Nations	Member States have increased awareness of various options and approaches to prevent equipment from being used in illicit drug manufacture and to increase operational use of article 13			

Result 2: relevant national industrial sectors proactively cooperate with competent national authorities in reducing the risk of exploitation by drug traffickers

Programme performance in 2023 and target for 2025

- 16.139 The component’s work contributed to two countries conducting national mapping exercises on the structure of industry sectors manufacturing and trading chemicals possibly used in illicit drug manufacture, which did not meet the planned target of three countries. The target was not met owing to challenges in securing the services of specialized experts to support the mapping exercises.
- 16.140 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 16.XXVI).

Figure 16.XXVI

Performance measure: number of countries that have conducted national industry mapping exercises (annual)

Result 3: reduced availability of highly potent new psychoactive substances and non-medical synthetic opioids

Proposed programme plan for 2025

- 16.141 Under the Global Rapid Interdiction of Dangerous Substances programme of the International Narcotics Control Board, the component assists Governments in addressing trafficking of highly potent and potentially fatal non-scheduled non-medical synthetic opioids and new psychoactive substances, as well as related chemicals. Through the Global Rapid Interdiction of Dangerous Substances programme, the component promotes secure real-time exchange of information and

operational cooperation, which has led to voluntary cooperation between Governments and the private sector to assist those industries vulnerable to exploitation by traffickers.

Lessons learned and planned change

- 16.142 The lesson for the component was realizing the importance of operational responses to identify best practices on addressing the trafficking of non-medical synthetic opioids, new psychoactive substances and related chemicals without hindering legitimate trade. In applying the lesson, the component will support Governments and private sector partners in generating information and intelligence related to emerging trends.
- 16.143 Expected progress towards the objective and the target for 2025 are presented in the performance measure below (see table 16.24).

Table 16.24
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Network of regional technical officers established	Law enforcement and regulatory officers use updated incident communication (Project Ion Incident Communication System) and analysis (Global Rapid Interdiction of Dangerous Substances Intelligence) tools	Member States have access to guidance for voluntary cooperation with e-commerce, express courier industry, freight forwarding industry and Internet-related services	25 Member States engage in voluntary cooperation with the private sector to prevent trafficking and marketing of new psychoactive substances and non-medical synthetic opioids	Member States increase the number of seizures of new psychoactive substances and non-medical synthetic opioids

Deliverables

- 16.144 Table 16.25 lists all deliverables of the component.

Table 16.25
Subprogramme 9, component 2: deliverables for the period 2023–2025, by category and subcategory

3. Reports on the supervision of the movement of narcotic drugs, psychotropic substances and precursor chemicals for licit purposes and on the supply of opiate raw materials and demand for opiates for medical and scientific purposes	8	8	8	8

Part IV International cooperation for development

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
4. Reports of the Committee on Finance and Administration and the Standing Committee on Estimates, and reports on intersessional developments, the implementation of decisions, and matters examined and decisions taken by the International Narcotics Control Board	11	12	11	11
5. Estimated requirements for narcotic drugs, assessments of requirements for psychotropic substances, and assessments of licit requirements for amphetamine-type stimulant precursors	6	6	6	6
6. Evaluation of overall treaty compliance by Governments, report on measures to ensure the execution of the international drug control treaties, reports on missions conducted by the International Narcotics Control Board, and specific studies on and evaluation of implementation by Member States of recommendations made by the Board	23	11	23	23
Substantive services for meetings (number of three-hour meetings)	98	124	98	98
Meetings of:				
7. The International Narcotics Control Board and its Standing Committee on Estimates	60	58	60	60
8. Ad hoc expert groups to advise the International Narcotics Control Board	18	6	18	18
9. The International Narcotics Control Board with Member States, international and regional organizations, the private sector and academia, as appropriate	20	60	20	20
Conference and secretariat services for meetings (number of three-hour meetings)	98	124	98	98
Meetings of:				
10. The International Narcotics Control Board and its Standing Committee on Estimates	60	58	60	60
11. Ad hoc expert groups to advise the International Narcotics Control Board	18	6	18	18
12. The International Narcotics Control Board with Member States, international and regional organizations, the private sector and academia, as appropriate	20	60	20	20
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	3	3	3	3
13. To support Government compliance with the international drug control conventions	3	3	3	3
Seminars, workshops and training events (number of days)	4	7	4	4
14. Training courses on compliance with drug control treaties and availability of internationally controlled substances for licit purposes while preventing diversion and abuse	4	7	4	4
Technical materials (number of materials)	96	96	96	96
15. Estimates and assessments of medical and scientific requirements for narcotic drugs and psychotropic substances	64	64	64	64
16. Forms for treaty-mandated reporting by Member States on narcotic drugs, psychotropic substances and precursor chemicals under the 1961, 1971 and 1988 Conventions and related Economic and Social Council resolutions, and annual update of the lists of narcotic drugs, psychotropic substances and precursor chemicals controlled under the three conventions	12	12	12	12
17. Tables of countries that require authorizations for the import of substances listed in Schedules III and IV of the 1971 Convention, and the special international surveillance list of non-scheduled chemicals	5	5	5	5
18. Training materials for national authorities on implementing the provisions of the three drug-control conventions	15	15	15	15
C. Substantive deliverables				
Consultation, advice and advocacy: substantive support to country missions of the International Narcotics Control Board to review implementation of the conventions and to make recommendations to Governments aimed at improving treaty adherence and implementation with a view to ensuring the availability of internationally controlled substances while preventing diversion, trafficking and abuse; consultations with Member States on the control of narcotic drugs, psychotropic substances and precursor chemicals, as well as on issues relating to non-scheduled chemicals, including designer precursors, equipment and materials used in illicit drug manufacture, and new psychoactive substances and synthetic opioids.				

Section 16 International drug control, crime and terrorism prevention and criminal justice

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

Databases and substantive digital materials: International Drug Control System Database used by the International Narcotics Control Board secretariat; International Import and Export Authorization System (I2ES), with 70 registered countries and territories; Pre-Export Notification Online and Pre-Export Notification Online Light systems, with 169 registered countries and territories; Precursors Incident Communication System, used by approximately 130 Governments; and Project Ion Incident Communication System and Global Rapid Interdiction of Dangerous Substances Intelligence, used by around 170 Governments.

D. Communication deliverables

Outreach programmes, special events and information materials: side events during intergovernmental meetings and meetings of the International Narcotics Control Board with Member States and civil society.

External and media relations: press releases and press conferences on activities of the International Narcotics Control Board; responses to media requests; statements by members of the Board at intergovernmental meetings; newsletters for Governments; and dissemination of recommendations and positions of the Board to decision-makers and the general public.

Digital platforms and multimedia content: website of the International Narcotics Control Board and institutional social media accounts; secure web pages for Board members and competent national authorities.

B. Proposed post and non-post resource requirements for 2025

Overview

16.145 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 16.26 to 16.27.

Table 16.26

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2023 expenditure	2024 approved	Changes					2025 estimate (before recosting)
			Technical adjustments	New/ expanded mandates	Other	Total	Percentage

16.146 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 16.29 to 16.31 and figure 16.XXVII.

16.147 As reflected in tables 16.29 (1) and 16.30 (1), the overall resources proposed for 2025 amount to \$23,868,100 before recosting, reflecting a net decrease of \$464,200 (or 1.9 per cent) compared with the approved budget for 2024. Resource changes result from technical adjustments and new and expanded mandates. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Figure 16.XXVII
Distribution of proposed resources for 2025 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

- 16.148 As reflected in tables 16.26 and 16.29 (1), resource changes reflect a net decrease of \$908,600 under subprogramme 1, related to the removal of one-time provisions under other staff costs (\$770,100), travel of staff (\$126,500) and contractual services (\$12,000) related to the non-recurrent resource requirements for the Ad Hoc Committee to Elaborate a Comprehensive International Convention on Countering the Use of Information and Communications Technologies for Criminal Purposes, approved pursuant to General Assembly resolution [75/282](#) and decision 78/549.

New and expanded mandates

- 16.149 The increase of \$444,400 under Policymaking organs, relates to the provisions under other staff costs (\$80,700), consultants (\$47,300), travel of representatives (\$199,300), travel of staff (\$82,300) and contractual services (\$34,800) with respect to new mandates relating to the support to the preparatory meetings in 2025 for the Fifteenth United Nations Congress on Crime Prevention and Criminal Justice, scheduled to be held in the United Arab Emirates in 2026, pursuant to Economic and Social Council resolution 155 C (VII) and General Assembly resolutions [415 \(V\)](#), [46/152](#), [56/119](#) and [78/223](#).

Other changes

- 16.150 As reflected in tables 16.26 and 16.29, the proposed changes are cost-neutral and reflect mainly an increase under other staff costs relating to normative, policy and inter-agency work to support the mechanisms of countering trafficking in persons and the smuggling of migrants. In addition, consultancy will be required to provide legislative support to States parties on the implementation of the three drug control conventions. The increase is offset in large part by a reduction in contractual services resulting from the lower number of copies of mandated publications being printed. Furthermore, as reflected in table 16.27, the redeployment of 1 P-4 Crime Prevention and Criminal Justice Officer under subprogramme 1 as well as the two reassignments, i.e. reassignment of 1 GS (OL) Finance and Budget Assistant to Programme Management Assistant under subprogramme 1 and 1 GS (OL) from Programme Management Assistant to Administrative Assistant under subprogramme 8, are cost neutral.

Extrabudgetary resources

- 16.151 As reflected in tables 16.29 (2) and 16.30 (2), extrabudgetary resources amount to \$408,923,800. The resources would complement regular budget resources and would be used mainly to provide for 826 posts (1 D-2, 11 D-1, 35 P-5, 176 P-4, 187 P-3, 39 P-2/1, 192 GS (OL), 10 GS (PL), 89 NPO, 86 LL). The resources, including non-post component, will be used mainly to carry out technical cooperation projects, at the request of Member States.
- 16.152 The extrabudgetary resources under the present section are subject to the oversight of the Commission on Narcotic Drugs and the Commission on Crime Prevention and Criminal Justice, pursuant to General Assembly resolutions [46/185 C](#) and [61/252](#), section XI.

Policymaking organs

- 16.153 The resources proposed under this component would provide for the policymaking organs as shown in table 16.32 below.

Table 16.32

Conference of the States Parties to the United Nations Convention against Corruption and its subsidiary bodies	Mandate: General Assembly resolution 58/4 , the United Nations Convention against Corruption, article 63, and rule 3 of the rules of procedure for the Conference Membership: 190 parties Number of sessions in 2025: 1	–	–
Total		838.9	1 283.3

16.154 The proposed regular budget resources for 2025 amount to \$1,283,300 and reflect an increase of \$444,400 compared with the approved budget for 2024. The proposed change is explained in paragraph 16.149. Additional details on the distribution of the proposed resources for 2025 are reflected in table 16.33.

Executive direction and management

- 16.155 The executive direction and management component comprises the Office of the Executive Director and the Independent Evaluation Section.
- 16.156 The Executive Director is responsible for coordinating and providing leadership for all United Nations drug control and crime prevention activities to ensure the coherence of actions within the programme and the coordination, complementarities and non-duplication of such activities across the United Nations system. In that capacity, the Executive Director participates in the work of the United Nations System Chief Executives Board for Coordination. The Executive Director acts on behalf of the Secretary-General in fulfilling the responsibility that devolves upon the Executive Director under the terms of international treaties and resolutions of United Nations organs relating to international drug control or crime prevention. The responsibilities are combined with those of the Director-General of the United Nations Office at Vienna. The Office of the Executive Director is integrated with that of the Director-General and is supported with resources from the regular budget under section 1, Overall policymaking, direction and coordination.
- 16.157 The functions of the Office of the Executive Director include: (a) to assist the Executive Director in the overall executive direction and management of UNODC; (b) to facilitate inter-office cooperation in the implementation of workplans and administrative matters; (c) to ensure the timely implementation of decisions and the coordination of inputs from all organizational units to the activities of the Office; and (d) to support the Executive Director in the overall leadership and coordination of the activities of UNODC with extensive research and substantive information to advise on issues of policy, resources and results management.
- 16.158 The Office of the Executive Director also coordinates cross-cutting institutional issues, such as the systematic inclusion of gender equality aspects in all areas of UNODC work and reaching gender parity in staff. The Gender Team in the Office of the Executive Director coordinates the implementation of the United Nations Office at Vienna/UNODC Strategy and Action Plan for Gender Equality and Empowerment of Women (2022–2026) to ensure delivery of United Nations commitments on gender equality and the empowerment of women, including Sustainable Development Goal 5, through activities, such as supporting field offices to contextualize gender

commitments to their setting, ensuring the institutional mechanisms on gender mainstreaming are efficient, raising awareness and providing capacity-building for personnel to further strengthen capacity on gender issues across the UNODC programme of work. The United Nations Office at Vienna and UNODC continue to recognize high-impact policies and programmes on gender issues through an annual Gender Award and have strengthened their efforts on male engagement to promote gender equality and women’s empowerment.

- 16.159 The Independent Evaluation Section provides evaluation-based knowledge for decision-making to the Executive Director and Member States. The Section delivers human rights-responsive and gender-sensitive independent evaluations, syntheses of evaluations and other oversight results, evaluation capacity development for internal and external stakeholders, as well as innovative information technology solutions for evaluation and knowledge management to foster accountability and learning. These are based on strong partnerships within and outside of the United Nations, and efficiencies and higher-level results are achieved by conducting joint and contributing to system-wide evaluations.
- 16.160 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the United Nations Office at Vienna and UNODC are integrating environmental management practices into their operations.
- 16.161 Information on the timely submission of documentation and advance booking for air travel is reflected in table 16.34. The low travel compliance rate in 2023 (30 per cent) was largely due to the late nomination of travellers, as well as late event planning, which resulted in the late booking of travel. Compliance rates continue to be monitored with the introduction of the new mission travel request application as well as awareness raising sessions with staff. Compliance with documentation deadlines remained at nearly 100 per cent.

Table 16.34
Compliance rate
(Percentage)

	Actual 2021	Actual 2022	Actual 2023	Planned 2024	Planned 2025
Timely submission of documentation	97	94	99	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	18	25	30	100	100

- 16.162 The proposed regular budget resources for 2025 amount to \$894,100 and reflect no change compared with the approved budget for 2024. Additional details on the distribution of the proposed resources for 2025 are reflected in table 16.35 and figure 16.XXVIII.

Annex I

Organizational structure and post distribution for 2025

Charts showing the organizational structure of the United Nations Office on Drugs and Crime (UNODC) are presented below. Section A of the present annex reproduces the approved organizational structure for 2024. Section B presents the proposed organizational structure for 2025.

Justification for the proposed changes

In line with UNODC Strategy 2021–2025, UNODC is proposing an internal realignment of the Research and Trend Analysis Branch to respond in a more agile and timely manner to research demands by internal and external stakeholders; to improve the uptake of UNODC research to increase its impact in strategic and policy discussions and decision-making within the UNODC remit and beyond, that is, with Member States, in the United Nations system and in other regional and international decision-making bodies. The new proposed structure is as follows:

(a) It is proposed that the Programme Development and Management Unit be converted to the Geospatial Analysis and Programme Delivery Section. The responsibilities of the Programme Development and Management Unit would include the development of new and/or joint research projects and the provision of programme management, publication and dissemination services. The Geospatial Analysis and Programme Delivery Section would have a broader scope of managing the human and financial resources of the Branch and covering the thematic research areas of crimes that affect the environment and illicit crop monitoring;

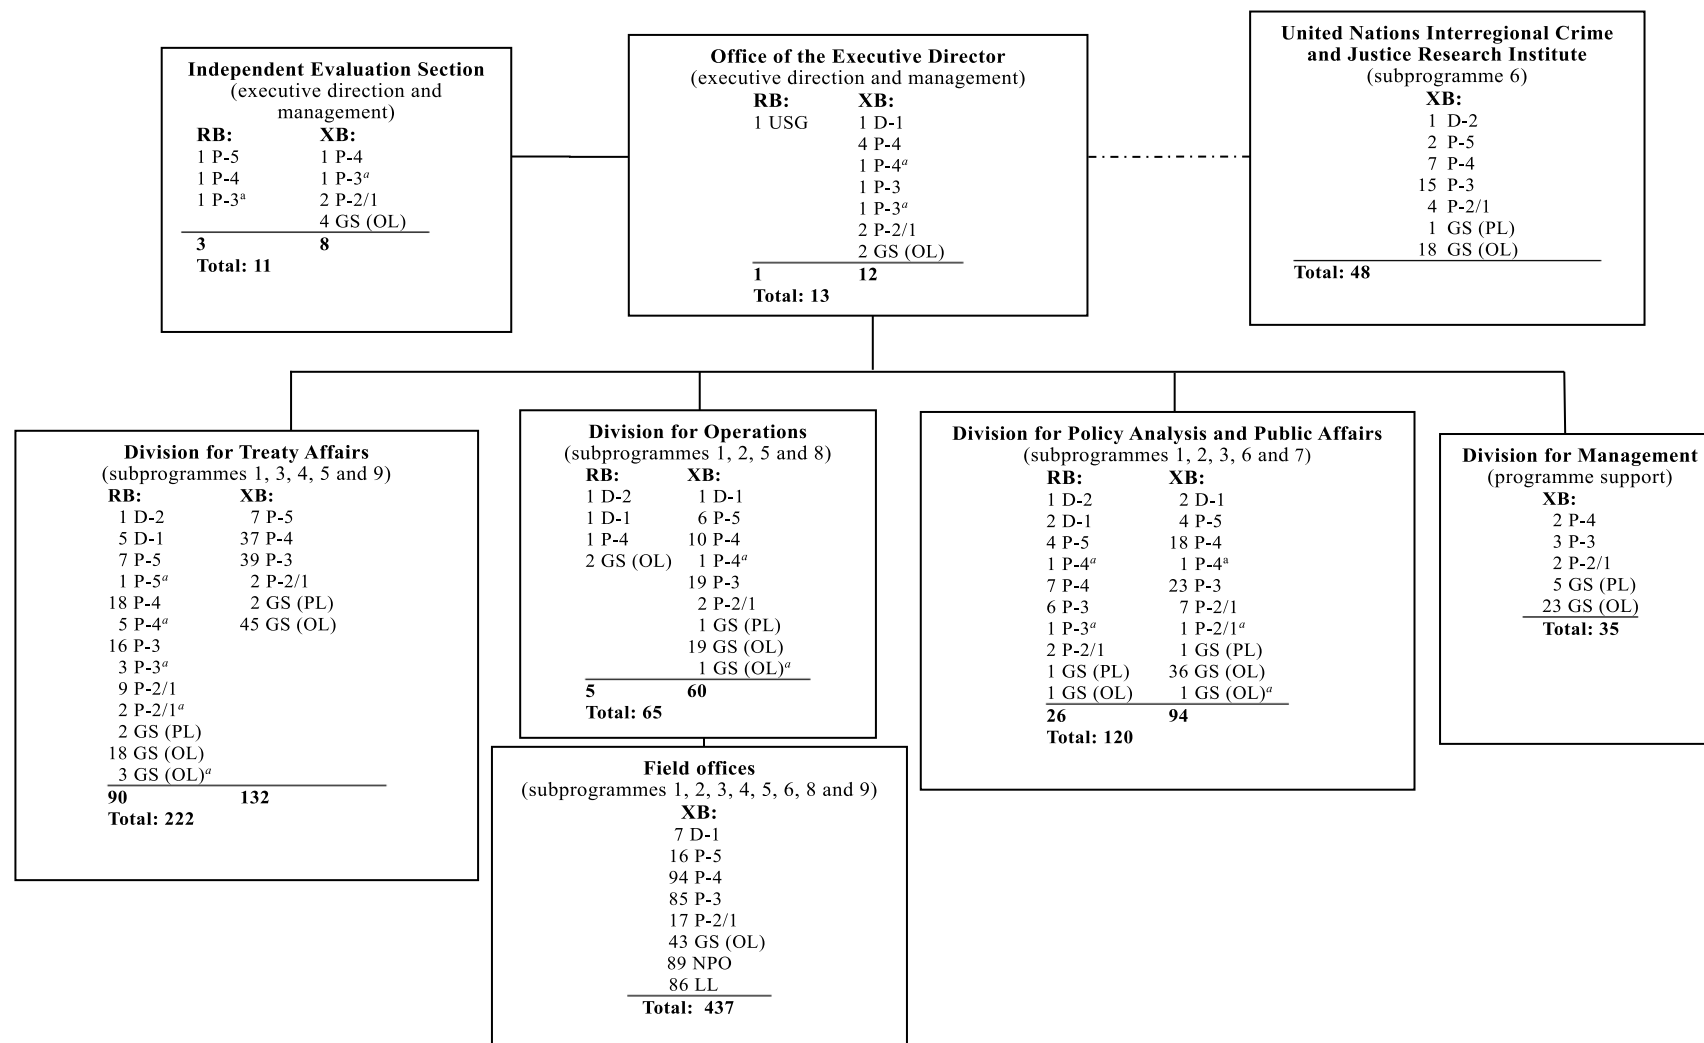

(b) It is proposed that the Data Development and Dissemination Section be renamed the Data, Analytics and Statistics Section to better reflect the analytical work of the Section. Its main function – of ensuring the availability, accessibility and quality of drugs and crime data and statistics and covering Sustainable Development Goal 16 in terms of homicide, access to justice and corruption measurement – would not change;

(c) It is proposed that the Drug Research Section be changed to the Research and Knowledge Production Section. The Drug Research Section's main focus has been conducting research on topics related to the drug phenomenon and to produce the best available knowledge on drug situation and trends; the focus of the Research and Knowledge Production Section would be wider and would include the coordination and provision of cross-thematic and cross-sectional guidance to concur consistent, impartial and quality research products across the Branch, and to cover the thematic areas of drugs and prisons;

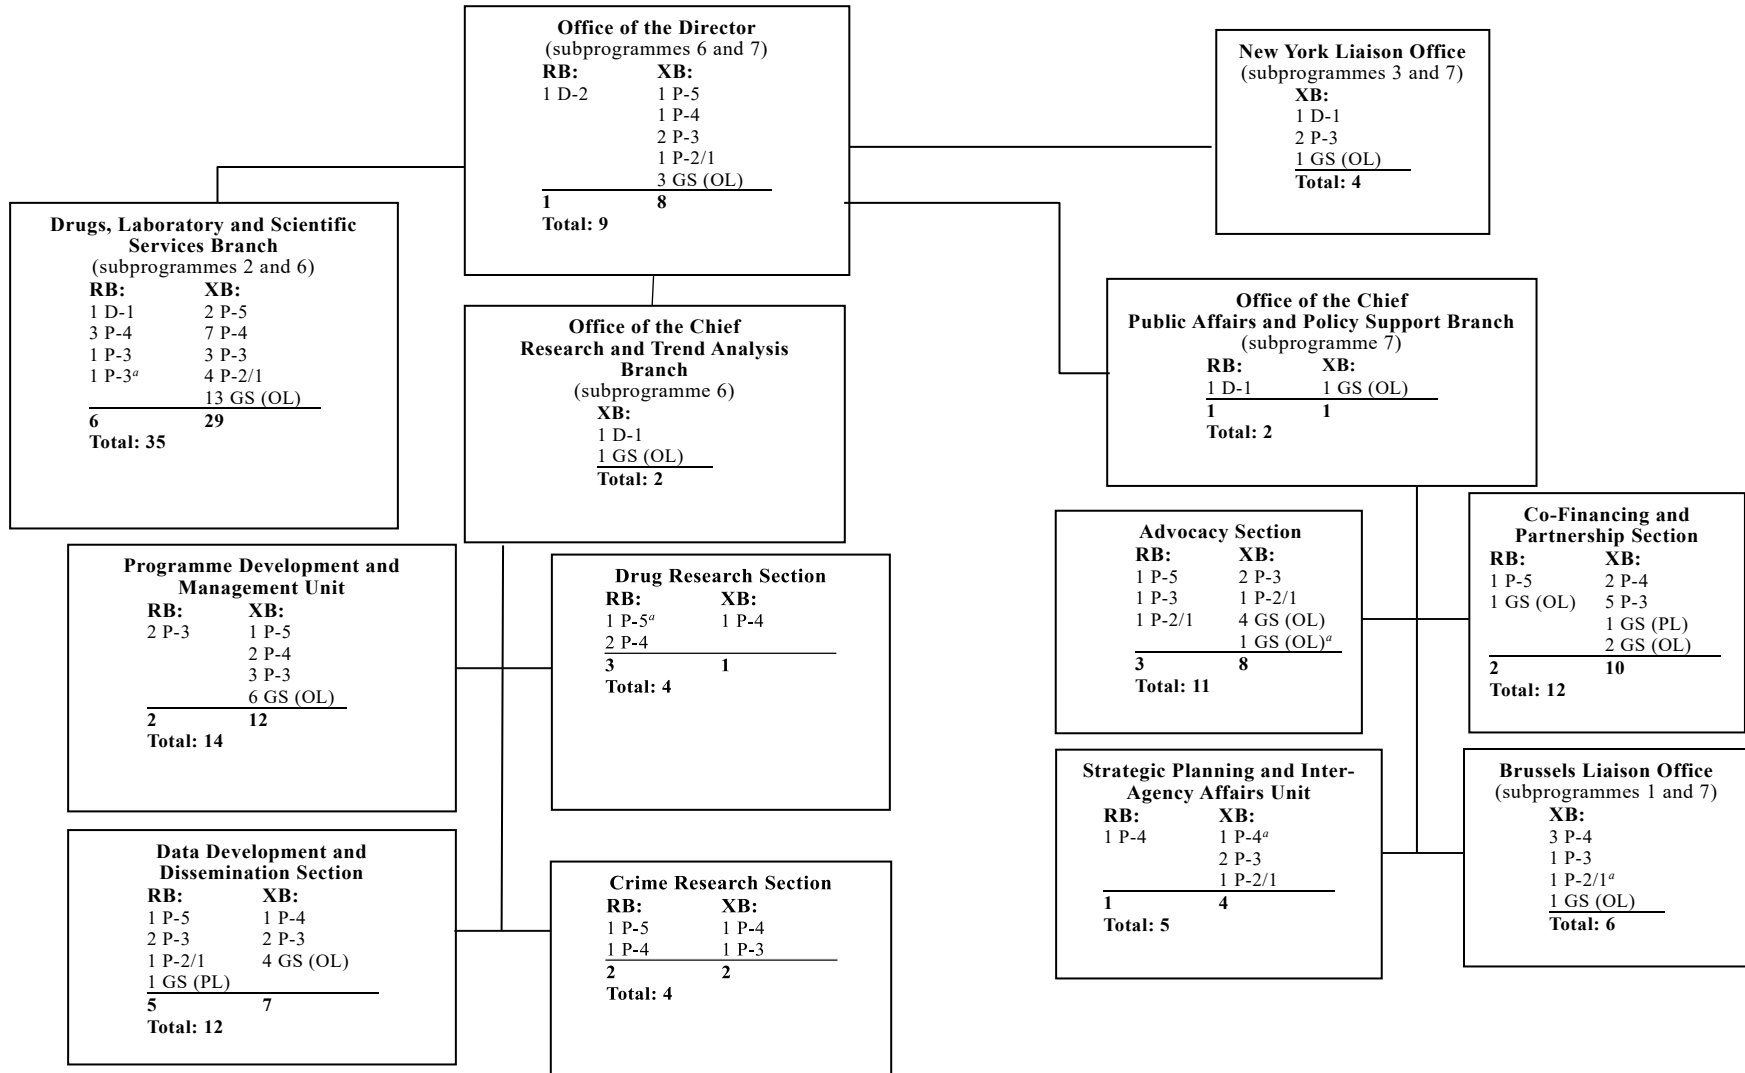

(d) It is proposed that the Crime Research Section be changed to the Research Innovation and Partnership Section. The Crime Research Section has been focusing on conducting research on topics related to different aspects of crime and criminal justice. The Research Innovation and Partnership Section would manage the Branch partnerships and connectivity to maximize impact and innovation and would cover the thematic areas of organized crime and cybercrime.

Annex II

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 1, Countering transnational organized crime	1	P-4	Redeployment of one Crime Prevention and Criminal Justice Officer	The proposed redeployment within the Organized Crime and Illicit Trafficking Branch from the Office of the Chief of the Organized Crime and Illicit Trafficking Branch to the Conference Support Section is related to the increased need to support strategic programming, policymaking by intergovernmental bodies, legal and technical assistance on enhancing the implementation of the United Nations Convention against Transnational Organized Crime and the Protocols thereto, including substantive support to the Treaty review mechanism. The redeployment would also enable the provision of increased substantive services to the Commission on Narcotic Drugs and its subsidiary bodies (Heads of National Drug Law Enforcement Agencies), as well as other strategic and programmatic tasks on the implementation of the Treaty. The cross-cutting nature of functions across sections within the Branch emphasizes the importance of aligning resources to best support key strategic objectives of the Branch.
Subprogramme 1, Countering transnational organized crime	1	GS (OL)	Reassignment of one Finance and Budget Assistant as Programme Management Assistant	The proposed reassignment from the Office of the Director of the Division for Treaty Affairs to the Human Trafficking and Migrant Smuggling Section is required to strengthen the finance management, budget, coordination and review of the work related to the intergovernmental process and normative aspects of the two Protocols supported by the Section, namely, the Protocol to Prevent, Suppress and Punish Trafficking in Persons, Especially Women and Children, supplementing the United Nations Convention against Transnational Organized Crime and the Protocol against the Smuggling of Migrants by Land, Sea and Air, supplementing the United Nations Convention against Transnational Organized Crime.
Subprogramme 8, Technical cooperation	1	GS (OL)	Reassignment of one Programme Management Assistant to Administrative Assistant	The proposed reassignment is related to the need to strengthen capacity in the Office of the Director of the Division for Operation in the areas of divisional financial management, human resources management and support functions related to strengthening compliance with established human resources rules and procedures. The change of job network from programme management to administration is related to the evolution of the functions of the post over time. Although the post is being proposed for reassignment across job networks, it will continue to assist in the programme administration, however with a stronger focus on financial management, budgeting, human resources management and programme implementation.

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 17.1 The United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) is responsible for supporting the achievement of gender equality and the empowerment of all women and girls as actors and beneficiaries of sustainable development, human rights, humanitarian action and peace and security. The mandate derives from the priorities established in relevant General Assembly, Economic and Social Council and Security Council resolutions, including General Assembly resolutions [64/289](#), in which the Assembly established UN-Women as a composite entity that functions as a secretariat, carries out operational activities at the country and regional levels, and leads, coordinates and promotes the accountability of the United Nations system in its work on gender equality and the empowerment of women; [70/1](#) on the 2030 Agenda for Sustainable Development, pursuant to which UN-Women supports systematic mainstreaming of a gender perspective in the implementation of the 2030 Agenda; [72/279](#) on the repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system; and [75/233](#) on the quadrennial comprehensive policy review of operational activities for development of the United Nations system, in which the Assembly called on the United Nations development system to enhance and accelerate gender mainstreaming through the full implementation of the System-wide Action Plan on Gender Equality and the Empowerment of Women, developed under the leadership of UN-Women.
- 17.2 The mandate of UN-Women endows it with a unique role and capacity to: (a) support the strengthening and development of global norms and standards, including with country-level experiences; (b) promote more effective coordination, coherence and gender mainstreaming across the United Nations system in support of commitments for gender equality and the empowerment of women; and (c) support Member States, upon request, to translate global norms and standards into legislation, policies and development plans as part of its operational activities. UN-Women also has a critical role in supporting the mobilization of civil society, the private sector and other relevant stakeholders, at all levels, in support of the implementation of the Beijing Declaration and Platform for Action and the gender-responsive implementation of the 2030 Agenda.

Strategy and external factors for 2025

- 17.3 The UN-Women strategic plan 2022–2025 guides the Entity’s activities and its strategic direction, objectives and approaches to support the efforts of Member States to accelerate the realization of gender equality and the empowerment of all women and girls, as well as the enjoyment of all human rights by women and girls (General Assembly resolution [76/142](#)).
- 17.4 The strategic plan is based on an extensive consultative process and draws from analysis of progress and persistent challenges, including recommendations from the 25-year review and appraisal of the implementation of the Beijing Declaration and Platform for Action, as well as lessons learned from the Entity’s first decade.
- 17.5 In 2025, UN-Women will continue its work on its established thematic impact areas: (a) governance and participation in public life; (b) women’s economic empowerment; (c) ending violence against women and girls; and (d) women and peace and security, humanitarian action and disaster risk reduction. UN-Women will continue to focus on integrated approaches to address the root causes of gender inequality and effect broader systems change by advancing seven systemic outcomes across the four thematic impact areas, given the interconnected nature of global challenges: (a) the strengthening of global normative frameworks and gender-responsive laws, policies and institutions; (b) financing for gender equality; (c) positive social norms, including by engaging men and boys;

(d) equitable access by women to services, goods and resources; (e) women's voices, leadership and agency; (f) the production, analysis and use of gender statistics, sex-disaggregated data, and knowledge; and (g) United Nations system coordination for gender equality and the empowerment of women.

- 17.6 UN-Women will continue to implement its programme by leveraging its normative support function, United Nations system coordination and operational activities, as mandated by its founding resolution, in an integrated and mutually reinforcing manner for transformative results.
- 17.7 UN-Women will continue to act as a knowledge hub to support gender mainstreaming and provide research and data analysis to inform policies, strategies and other interventions, and substantive and technical support and expertise to Member States upon request. It will continue to facilitate the mainstreaming of a gender perspective into intergovernmental norms and standards. It will also provide support to Member States, upon request, in implementing commitments to gender equality and the empowerment of women and girls through operational activities. UN-Women will continue to work in partnership with a range of actors and support, at the request of Member States, civil society, the private sector and other relevant stakeholders, for accelerated action for gender equality and the empowerment of women and girls.
- 17.8 UN-Women will continue to engage closely as a key partner in a repositioned United Nations development system, as it is a strong priority of the Under-Secretary-General/Executive Director to enhance the engagement of the Entity in that area. Thus, UN-Women will take full advantage of the repositioned United Nations development system opportunities for integrated, cost-effective support to partners. Furthermore, the Entity has placed and will continue to place business transformation at the heart of its organizational effectiveness and efficiency framework, creating a stronger culture of accountability and strengthening organizational performance management through a cascading internal management system to ensure that the organizational effectiveness and efficiency is a comprehensive management and leadership process to drive the implementation of the strategic plan.
- 17.9 With regard to inter-agency coordination and liaison, UN-Women will continue to comprehensively leverage its coordination mandate for gender equality and the empowerment of women. UN-Women will continue to enhance support for gender mainstreaming, including through inter-agency mechanisms, and the implementation of the United Nations System-wide Action Plan on Gender Equality and the Empowerment of Women and the United Nations country team System-wide Action Plan gender equality scorecard. With a view to working better together, UN-Women will continue to build strategic partnerships with United Nations entities, including through inter-agency mechanisms such as the Inter-Agency Standing Committee, which it joined as a full member in 2022, to deliver results for women and girls in a coordinated and coherent way. Further, the Entity will collaborate with other United Nations entities, including through the Inter-Agency and Expert Group on Sustainable Development Goal Indicators, providing a gender perspective on methodology development, monitoring and follow-up, as well as capacity development. UN-Women will also collaborate specifically with departments and offices of the Secretariat, including on issues related to women and peace and security, sexual violence in conflict, gender mainstreaming in peacekeeping operations and gender parity. UN-Women will continue its cooperation with and support to the Security Council, the Peacebuilding Commission and the Human Rights Council, as requested. UN-Women will continue to brief the Security Council, upon request, as well as provide secretariat services to the Security Council's Informal Expert Group on Women and Peace and Security.
- 17.10 Where it has a country presence, UN-Women will support the integration of a gender perspective in United Nations country team programming processes, including the United Nations Sustainable Development Cooperation Framework roll-out process, joint initiatives, collective advocacy and coordination to ensure a coherent system-wide approach in operational activities. UN-Women will continue to chair or co-chair the gender theme groups¹ of United Nations country teams and provide

¹ See <https://unsdg.un.org/resources/gender-theme-groups-standards-and-procedures>.

technical leadership for the implementation of the United Nations country team System-wide Action Plan gender equality scorecard and the United Nations country team gender equality marker.

- 17.11 With regard to the external factors, the overall plan for 2025 is based on the following planning assumptions:
- (a) The continued availability of voluntary contributions, which account for approximately 98 per cent of UN-Women resources;
 - (b) The commitment of Member States to advance gender equality and the empowerment of all women and girls, including by achieving consensus in relevant intergovernmental meetings;
 - (c) The commitment of Member States to adopt and implement laws, policies and strategies and create and maintain an enabling environment for civil society and women's organizations in their work for the promotion of gender equality and the empowerment of women and girls.
- 17.12 In line with the United Nations Disability Inclusion Strategy and the UN-Women global strategy on disability inclusion, the Entity will continue to contribute to accelerating the effective mainstreaming of disability inclusion in its institutional processes and programming, including mitigating measures to overcome any operational challenges. At the corporate level, UN-Women will continue to chair the United Nations Inter-agency Group on Gender Equality and Disability Inclusion. Where it has a country presence, UN-Women will support an intersectional approach to disability inclusion in United Nations country team programming processes, including joint initiatives, projects, collective advocacy and coordination to ensure a coherent system-wide approach in operational activities. Together with United Nations partners, including organizations of persons with disabilities, the Entity, within its mandate, will promote gender and disability inclusion work with persons with disabilities.

Legislative mandates

- 17.13 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to UN-Women.

General Assembly resolutions

34/180	Convention on the Elimination of All Forms of Discrimination against Women	72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system

4. The Committee for Programme and Coordination	1	1	1	1
5. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1

Evaluation activities

17.15 The following evaluations completed by UN-Women in 2023 have guided the proposed programme plan for 2025:

- (a) Evaluation on contribution to women's economic empowerment;
- (b) Evaluation on work on climate change;

- (c) Evaluation on support to civil society;
 - (d) Evaluation on support to gender statistics 2018–2022.
- 17.16 In response to the results of the evaluations referenced above, UN-Women refined its strategy to reflect a progressive global framework with a cross-sectoral approach and include a provision to review internal capacities to ensure adequacy of resources. For instance, the evaluation on women’s economic empowerment found that it would be helpful for UN-Women to continue supporting the global discourse and normative frameworks on women’s economic empowerment across sub-thematic areas. The evaluation of the Entity’s work on climate change examined future opportunities and potential partnerships to strengthen its work in this area. The recommendations of the evaluations inform strategic focus in these two areas and enhance internal organizational climate-related work.
- 17.17 The following evaluations are planned for 2025:
- (a) Evaluation of the gender equality accelerators of the UN-Women strategic plan 2022–2025;
 - (b) Synthesis of performance of UN-Women against the strategic plan.

Programme of work

Subprogramme 1

Intergovernmental support, coordination and strategic partnerships

Objective

- 17.18 The objective, to which this subprogramme contributes, is to strengthen the achievement of gender equality and the empowerment of all women and girls, including full enjoyment of their human rights.

Strategy

- 17.19 To contribute to the objective, the subprogramme will:
- (a) Support the normative processes of intergovernmental bodies, including the Commission on the Status of Women, by facilitating the exchange of good practices and lessons learned among Governments and other relevant stakeholders, including through meetings, the issuance of reports and the presentation of analyses and policy options that enable discussion on key gender equality issues;
 - (b) Lead, coordinate and promote the accountability of the United Nations system for gender equality and the empowerment of women, and gender mainstreaming. This includes providing expertise, advocacy, monitoring of the development of relevant tools and guidance and capacity-building within the United Nations system. Actions towards system-wide improvement of the status of women will also be undertaken;
 - (c) Develop strategic partnerships by enabling civil society actors and other stakeholders to contribute to relevant intergovernmental processes, including through information dissemination, the convening of stakeholders to share lessons learned and recommendations for actions and the provision of funding for attending capacity- and alliance-building opportunities.
- 17.20 In doing so, the subprogramme will assist Member States in their efforts to accelerate the implementation of the Beijing Declaration and Platform for Action, achieve Sustainable Development Goal 5 and systematically mainstream a gender perspective into the implementation of the 2030 Agenda.

- 17.21 The above-mentioned work is expected to result in:
- (a) A strengthened global normative framework and increased reflection of a gender perspective in the outcomes of intergovernmental processes;
 - (b) An enabling working environment to accelerate gender mainstreaming and gender parity goals in the United Nations system, leading to greater achievement of results towards gender equality;
 - (c) Enhanced cooperation among stakeholders and Governments on gender equality and the empowerment of women, as well as enhanced opportunities for stakeholders to present lessons learned and good practices in conjunction with intergovernmental processes, and the availability of a growing resource base.

Programme performance in 2023

Gender equality outcomes reflected in United Nations Sustainable Development Cooperation Frameworks

17.22 Gender mainstreaming, among other issues in common country analyses and United Nations Sustainable Development Cooperation Frameworks, can help align development efforts with national priorities and normative commitments and enable a focus on accelerated action to achieve the Sustainable Development Goals. The subprogramme helps build the capacity of the United Nations system, including by providing substantive technical input into the development of the Frameworks. In 2023, UN-Women, together with the United Nations System Staff College and other inter-agency partners, rolled out capacity development tools for United Nations country teams to ensure the effective integration of gender equality, among other issues, into the development of common country analyses and United Nations Sustainable Development Cooperation Frameworks. A free self-paced course was launched and a six-week online moderated course for United Nations staff was conducted, in which 77 participants from 40 countries participated.

17.23 Progress towards the objective is presented in the performance measure below (see table 17.2).

Table 17.2
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	50 per cent of all new United Nations Sustainable Development Cooperation Frameworks had a dedicated gender equality outcome	53 per cent of all new United Nations Sustainable Development Cooperation Frameworks had a dedicated gender equality outcome

Planned results for 2025

Result 1: youth as agents of change in the achievement of the Sustainable Development Goals

Programme performance in 2023 and target for 2025

- 17.24 The subprogramme’s work contributed to 4,134 young women and girls with strengthened capacities to contribute to relevant intergovernmental policy discussions and forums, which exceeded the planned target of 3,500 young women and girls.
- 17.25 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 17.1).

Figure 17.I

Performance measure: number of young women and girls with strengthened capacities to contribute to relevant intergovernmental policy discussions and forums (annual)

Result 2: leaving no women or girls with disabilities behind

Programme performance in 2023 and target for 2025

17.26 The subprogramme’s work contributed to 17 organizations of persons with disabilities collaborating and partnering with United Nations country offices to address the specific needs and demands of women and girls with disabilities, which exceeded the planned target of 16 organizations.

17.27 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 17.II).

Figure 17.II

Performance measure: number of organizations of persons with disabilities partnering with United Nations country offices to address the specific needs and demands of women and girls with disabilities (cumulative)

Result 3: strengthened global norms and standards on gender equality and the empowerment of all women and girls

Proposed programme plan for 2025

17.28 The subprogramme provides technical and substantive support to the Commission on the Status of Women, including leading the preparation of the reports of the Secretary-General on agreed priority themes, which inform the agreed conclusions adopted by the Commission.

Lessons learned and planned change

17.29 The lesson for the subprogramme was that there was increased demand among Member States to generate data and evidence to assess global progress on gender equality and the empowerment of women and girls in order to inform normative and policy outcomes by intergovernmental bodies. In applying the lesson, the subprogramme plans to expand the use of available data resources, which will help to strengthen the available evidence base, and will convene expert group meetings to review existing research and analyse policies and practices on agreed priority themes, particularly at the country level.

17.30 Expected progress towards the objective is presented in the performance measure below (see table 17.3).

Table 17.3
Performance measure

C. Substantive deliverables				
Consultation, advice and advocacy: cross-sectoral dialogues and ministerial round tables, with broad regional representation and participation; multi-stakeholder side events on gender equality and the empowerment of women in meetings, conferences and summits for an average of 100 participants per event; consultations on gender mainstreaming in an area in which gender considerations are absent or need strengthening, with at least 4 experts and representatives of Governments (per consultation).				
D. Communication deliverables				
Digital platforms and multimedia content: UN-Women website.				

**Subprogramme 2
Policy and programme activities**

Objective

- 17.32 The objective, to which this subprogramme contributes, is to enhance efforts in the elimination of discrimination against women and girls and the achievement of gender equality in, among other things, the fields of sustainable development, human rights and peace and security, including through enhanced accountability of the United Nations system.

Strategy

- 17.33 To contribute to the objective, the subprogramme will:
- (a) Serve as a global knowledge centre on gender equality and the empowerment of women, including in the areas of women and peace and security, ending violence against women, the economic empowerment of women, and gender-responsive governance, by undertaking and disseminating research, analysis and evaluation of trends, including on new and emerging issues and their impact on the situation of women;
 - (b) Provide advisory, technical and advocacy support, training and capacity development, including through field offices, to Member States, upon request, to advance the implementation of their commitments on gender equality and the empowerment of women, in line with their national priorities;
 - (c) Ensure the accountability of the United Nations system, including the United Nations country and regional teams and their gender theme groups, by offering guidance and through engagement in their work on gender equality and the empowerment of women.
- 17.34 In doing so, the subprogramme will assist Member States in their efforts to achieve Sustainable Development Goal 5 and in the systematic mainstreaming of a gender perspective in the implementation of the 2030 Agenda.

17.35 The above-mentioned work is expected to result in:

- (a) Policies and actions taken by national and regional bodies to implement United Nations instruments, standards and resolutions that contribute to gender equality and the empowerment of women, focusing on the Beijing Declaration and Platform for Action, the outcome of the twenty-third special session of the General Assembly and the Convention on the Elimination of All Forms of Discrimination against Women;
- (b) Increased capacity of Member States to implement, monitor and evaluate laws, policies and strategies that contribute to the achievement of gender equality and the empowerment of women and girls and the realization of their human rights (General Assembly resolution [76/142](#));
- (c) Improved ability of United Nations programmes to support more effectively Member States, at their request, in the implementation of commitments to eliminate discrimination against women and girls.

Programme performance in 2023

Strengthened global advocacy for political participation of women through an information portal on temporary special measures

17.36 Building on the Organization’s coordinated advocacy on temporary special measures, in 2023, UN-Women launched the United Nations Gender Quota Portal, the Organization’s first global information hub featuring information on electoral gender quotas worldwide, including the type of quota, electoral systems and targets. The compilation of global comparative information on temporary special measures and coordinated policy advice has informed country-level interventions.

17.37 Progress towards the objective is presented in the performance measure below (see table 17.5).

Table 17.5
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
–	–	<p>Access to the United Nations Gender Quota Portal with evidence-based information to strengthen policy and programmatic responses on women’s political participation</p> <p>In Kenya and Sierra Leone, advice and advocacy, including the support of UN-Women, were used to promote gender equality in government, including:</p> <ul style="list-style-type: none"> • The implementation in Kenya of the constitutional provision establishing that no more than two thirds of the members of an elected or appointed body could be of the same gender

2021 (actual)

2022 (actual)

2023 (actual)

- Sierra Leone passed the “Gender Equality and Women’s Empowerment Act”, which established a 30 per cent quota for women’s participation in government at all levels

Planned results for 2025

Result 1: towards women’s full and equal participation in political life

Programme performance in 2023 and target for 2025

- 17.38 The subprogramme’s work contributed to 70 legislative frameworks that promote gender balance in elections and decision-making institutions, which did not meet the planned target of 71 legislative frameworks. The target was not met because some legislative processes were protracted.
- 17.39 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 17.III).

Figure 17.III

Performance measure: number of legislative frameworks that promote gender balance in elections and decision-making institutions (cumulative)

Result 2: governments adopt policies and make investments to transform the care economy

Programme performance in 2023 and target for 2025

- 17.40 The subprogramme’s work contributed to 970 institutions benefiting from the support of UN-Women to improve the provision of essential services, goods and/or resources for women, which exceeded the planned target of 958 institutions.
- 17.41 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 17.IV).

Figure 17.IV

Performance measure: number of institutions benefiting from the support of the Entity to improve the provision of essential services, goods and/or resources for women (cumulative)

Result 3: governments implement fiscal policies and gender-responsive budgeting to promote gender equality²

Proposed programme plan for 2025

17.42 In line with intergovernmental outcomes and commitments, the subprogramme has provided policy guidance, technical support and capacity strengthening for countries to design and implement fiscal policies and gender-responsive budgeting in order to enable governments to strengthen the tracking, allocation and expenditure of public resources for gender equality.

Lessons learned and planned change

17.43 The lesson learned for the subprogramme was that knowledge and technical guidance could be further enhanced, particularly with regard to assessing gaps in financing and analysing direct and indirect taxes from a gender perspective to better support governments. In applying the lesson, the subprogramme will develop financing assessment methodologies for gender equality and provide technical support and capacity-building, upon request, to ministries of finance and other partners, on fiscal policies and gender-responsive budgeting.

17.44 Expected progress towards the objective is presented in the performance measure below (see table 17.6).

Table 17.6
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	853 partners have strengthened capacities for fiscal policies and gender-responsive budgeting to promote gender equality	An additional 950 partners have strengthened capacities for fiscal policies and gender-responsive budgeting to promote gender equality	An additional 1,050 partners have strengthened capacities for fiscal policies and gender-responsive budgeting to promote gender equality	An additional 1,200 partners have strengthened capacities for fiscal policies and gender-responsive budgeting to promote gender equality

---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Consultation, advice and advocacy: technical advice to Member States, at their request, and non-governmental organizations on access to financial markets and services for women, gender-responsive budgeting, gender-responsive development plans at the national and local levels, gender equality policies, strategies and action plans; technical advice to strengthen the role of national women’s machinery in the development, implementation and monitoring of gender equality policies, strategies and action plans; country-level advice and assistance on the implementation of the women and peace and security agenda to develop and implement national action plans; consultation on priority themes and issues in preparation for the session of the Commission on the Status of Women; technical advice to ministries of finance, planning and women’s affairs, at their request, on integrating a gender perspective into policies on macroeconomics, social protection systems, decent work and the care economy, environmental degradation and climate change to achieve the Sustainable Development Goals.

Databases and substantive digital materials: Global Database on Violence against Women.

D. Communication deliverables

Outreach programmes, special events and information materials: brochures and pamphlets on gender equality and for the promotion of the Commission on the Status of Women.

External and media relations: press releases on various topics related to women, including UN-Women publications.

Digital platforms and multimedia content: web platforms on financing for gender equality, the political participation of women, gender equality and HIV/AIDS and gender-responsive climate policies.^a

Library services: documentation of the institutional memory related to UN-Women.

^a See General Assembly resolution [76/300](#).

B. Proposed post and non-post resource requirements for 2025

Overview

17.46 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 17.8 to 17.10.

Table 17.8

17.47 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 17.11 to 17.13 and figure 17.V.

17.48 As shown in tables 17.11 (1) and 17.12 (1), the overall resources proposed for 2025 amount to \$10,976,100 before recosting, reflecting an increase of \$188,100 (or 1.7 per cent) compared with the approved budget for 2024. Resource changes result from new and expanded mandates, and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Explanation of variances by factor, component and subprogramme

Overall resource changes

New and expanded mandates

17.49 As shown in table 17.11 (1), resource changes reflect an increase of \$29,500, as follows:

Subprogramme 2, Policy and programme activities. The increase of \$29,500 relates to the non-recurrent provision under consultants associated with the oral statement by the Secretariat in connection with the request, contained in General Assembly resolution 78/150, to submit a new report to the Assembly at its eightieth session on mainstreaming a gender perspective in the implementation of the 2030 Agenda for Sustainable Development.

Other changes

17.50 As shown in table 17.11 (1), resource changes reflect a net increase of \$158,600, as follows:

Subprogramme 1, Intergovernmental support, coordination and strategic partnerships. The increase of \$158,600 relates to higher provisions under contractual services (\$104,200), other staff costs (\$29,400) and consultants (\$25,000) to effectively support the servicing of the annual sessions of the Commission on the Status of Women. Other staff costs relate to overtime for security officers to support the growing number of participants at the sessions; and contractual services and consultants would support enhanced accessibility, including sign interpretation services and accessible documents for the Commission's website, to respond to the growing requests from participants with disabilities.

Extrabudgetary resources

17.51 As reflected in tables 17.11 (2) and 17.12 (2), extrabudgetary resources amount to \$515,000,000. The resources would complement regular budget resources and would be used mainly to provide support for overall executive direction and management, including the planning, coordination, management and assessment of the programme of work and the strategic plan of UN-Women and the production of the programme's deliverables.

17.52 The extrabudgetary resources under the present section are subject to the oversight of the Executive Board of UN-Women.

Policymaking organs

17.53 The resources proposed under this component would provide for the policymaking organs as shown in table 17.14.

Table 17.14

Policymaking organs

(Thousands of United States dollars)

<i>Policymaking organ</i>	<i>Additional information</i>	<i>2024 approved</i>	<i>2025 estimate (before recosting)</i>
Commission on the Status of Women	Mandate: Economic and Social Council resolutions 11 (II), 76 (V), 304 (XI), 1983/27 and 1989/45 Membership: 45 government officials Number of sessions in 2025: 1 (sixty-ninth session)	127.3	127.3
Total		127.3	127.3

- 17.54 The proposed regular budget resources for 2025 amount to \$127,300 and reflect no change compared with the approved budget for 2024. Additional details on the distribution of the proposed resources for 2025 are reflected in table 17.15.

Total	69.5	127.3	–	–	–	–	–	127.3	

Executive direction and management

- 17.55 The executive direction and management component comprises the Office of the Under-Secretary-General/Executive Director and the Independent Evaluation and Audit Services.
- 17.56 The overall responsibilities of the executive direction and management component are to assist and support the Under-Secretary-General/Executive Director in the overall executive direction and management of UN-Women, including the planning, coordination, management and assessment of the programme of work of UN-Women; facilitation of inter-office cooperation; implementation of decisions; strategic policy support; and independent assurance and advice on UN-Women programmes, controls, business systems and processes.
- 17.57 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), UN-Women continues to integrate environmental management practices into its operations. In 2023, UN-Women continued to use its e-filing system and its PaperSmart tool, which enables delegations to download documents electronically and substantially reduces the printing of documents, while still allowing for printing at the request of delegations. In 2025, UN-Women will further enhance its use of videoconferencing and other online collaboration tools for meetings involving remote offices to help reduce travel.
- 17.58 Information on the timely submission of documentation and advance booking for air travel is reflected in table 17.16. Senior management is committed to the implementation of the advance purchasing and travel policy. In 2023, UN-Women observed a major decline in the reported travel compliance rate resulting from a surge in requests from Governments, civil society and other partners for UN-Women representatives to travel to participate in external events. Despite this, compliance rates reached a 31 per cent average by the fourth quarter. Management is committed to reinforcing the importance of adequate planning and advance purchasing of tickets to enhance compliance with the advance booking policy in 2024 and beyond.

Programme support

17.62 Responsibility for this area is vested in the Management and Administration Division, the Human Resources Division and, partially, the Strategy, Planning, Resources and Effectiveness Division of

Section 17 UN-Women

UN-Women. The Divisions assist the Under-Secretary-General/Executive Director in discharging responsibilities in the areas of finance and budget, administrative services, procurement and facilities management, information technology services, security, operational oversight and accountability, audit coordination and human resources. In addition, the Divisions provide administrative and operational support for the implementation of the programme activities of UN-Women.

17.63 The proposed regular budget resources for 2025 amount to \$734,600 and reflect no change compared with the approved budget for 2024. Additional details on the distribution of the proposed resources for 2025 are reflected in table 17.20 and figure 17.IX.

I. Economic Commission for Africa

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 18.1 The Economic Commission for Africa (ECA) is responsible for promoting the economic and social development of its members, fostering intraregional integration and promoting international cooperation for the development of Africa. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, and Economic and Social Council resolution 671 A (XXV).
- 18.2 ECA provides innovative solutions, together with demand-driven and tailor-made policy and technical advice, grounded in evidence, to its members and regional economic communities to strengthen their social and economic resilience and achieve the goals of the 2030 Agenda for Sustainable Development and Agenda 2063: The Africa We Want, of the African Union. ECA also works to build the capacity of its members to formulate and implement policies for sustainable development, including through the implementation of the regular programme for technical cooperation and United Nations Development Account projects.

Strategy and external factors for 2025

- 18.3 In 2025, ECA will concentrate on five strategic directions:
- (a) Deploying knowledge to support policymaking to drive the development agenda of Africa and foster infrastructure development, including in the areas of energy; technology, innovation and connectivity; and climate action and food security;
 - (b) Formulating policy options, including macroeconomic policies, to accelerate sustainable industrialization, economic diversification and job creation;
 - (c) Enhancing the mainstreaming of data and statistics and designing and implementing financing models and leveraging them for the development of human, physical and social infrastructure assets;
 - (d) Supporting deeper regional integration and the development of regional public goods, with a focus on social inclusion and considering synergies between the economic and social development programmes of Africa;
 - (e) Advocating a common position for Africa at the global level and developing regional responses as a contribution to global governance issues.
- 18.4 In pursuing these strategic directions, ECA will employ its convening function, through the provision of multilateral and multi-stakeholder platforms; its think-tank function, by conducting interdisciplinary research and the analysis of key challenges facing its members and Africa as a whole, while promoting peer learning and development; and its operational function, through the provision of direct policy advice and support to its members, including in cooperation with other entities of the United Nations system.
- 18.5 Following the launch of the second 10-year implementation plan of Agenda 2063 by the African Union, the Conference of African Ministers of Finance, Planning and Economic Development, at the fifty-sixth session of ECA, adopted resolutions 2024/2 and 2024/3, endorsing a realignment of the programme of work of ECA within its existing mandate to enable a greater focus on emerging

priorities for the continent. Accordingly, the updated structure is reflected in the proposed programme budget for 2025. Specifically, the changes are as follows:

- (a) Subprogramme 1: the renaming of the subprogramme from “Macroeconomic policy and governance” to “Macroeconomic policy, finance and governance”;
 - (b) Subprogramme 3: the discontinuation of current subprogramme 3, Private sector development and finance, and its activities integrated into subprogramme 1 and a new subprogramme 5, and the establishment in its place of a new subprogramme 3, Technology, innovation, connectivity and infrastructure development;
 - (c) Subprogramme 5: the discontinuation of current subprogramme 5, Technology, climate change and natural resources management, and its activities integrated into the new subprogramme 3 and a new subprogramme 5, and the establishment in its place of a new subprogramme 5, Climate, food security and natural resources, green and blue economy.
- 18.6 This realignment will enable ECA to provide more effective support to enable its members to address both current and emerging opportunities and challenges for inclusive and sustainable development.
- 18.7 With regard to cooperation with other entities, ECA will continue its close cooperation with the African Union Commission and will build upon its existing strategic partnerships with regional and subregional organizations, central banks, universities, think tanks and civil society and private sector organizations and forge new partnerships towards the fulfilment of the 2030 Agenda and Agenda 2063. Regarding South-South and triangular cooperation, ECA will leverage partnerships premised on the principle of enhancing complementarity and impact.
- 18.8 With regard to inter-agency coordination and liaison, ECA will work through the Regional Collaborative Platform for Africa and its opportunity and issue-based coalitions, and will enhance collaboration with regional United Nations entities, the Department of Economic and Social Affairs, the United Nations Conference on Trade and Development, resident coordinators and country teams.
- 18.9 With regard to the external factors, the overall plan for 2025 is based on the following planning assumptions:
- (a) Members of ECA and regional economic communities continue to cooperate among and between themselves for harmonized action, focusing on implementation of the 2030 Agenda and Agenda 2063 and operationalization of the African Continental Free Trade Area;
 - (b) The Africa Regional Forum for Sustainable Development, the Conference of African Ministers of Finance, Planning and Economic Development, and the subregional intergovernmental committees of experts and senior officials continue to provide policy advice to ECA on emerging priorities.
- 18.10 The Commission integrates a gender perspective in its operational activities, deliverables and results, as appropriate, by promoting further alignment and coherence between global, regional and national frameworks on gender equality and the empowerment of women and girls. Moreover, subprogramme 6 will provide technical support to the Commission’s other subprogrammes to integrate a gender perspective in their work.
- 18.11 In line with the United Nations Disability Inclusion Strategy, ECA will pursue the implementation of measures to ensure the inclusion of persons with disabilities, through its programme design, implementation and evaluation, including the provision of reasonable accommodation for conference and workshop participants.

Legislative mandates

- 18.12 The list below, which was reviewed in preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

57/2	United Nations Declaration on the New Partnership for Africa's Development	77/178	Promotion of sustainable and resilient tourism, including ecotourism, for poverty eradication and environment protection
58/220	Economic and technical cooperation among developing countries	77/180	Industrial development cooperation
61/234	Enhancing the role of the subregional offices of the Economic Commission for Africa	77/181	Women in development
64/215	Legal empowerment of the poor and eradication of poverty	77/189	Inclusive development for and with persons with disabilities
64/222	Nairobi outcome document of the High-level United Nations Conference on South-South Cooperation	77/223	Human rights and extreme poverty
66/130	Women and political participation	77/235	Preventing and combating corrupt practices and the transfer of proceeds of corruption, facilitating asset recovery and returning such assets to legitimate owners, in particular to countries of origin, in accordance with the United Nations Convention against Corruption
67/107	People's empowerment and development		
67/302	Cooperation between the United Nations and the African Union	77/270	New Partnership for Africa's Development: progress in implementation and international support
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development	77/331	Cooperation between the United Nations and the International Organization of la Francophonie
70/1	Transforming our world: the 2030 Agenda for Sustainable Development	77/334	Follow-up to the United Nations Conference on the Midterm Comprehensive Review of the Implementation of the Objectives of the International Decade for Action, "Water for Sustainable Development", 2018–2028
71/1	New York Declaration for Refugees and Migrants	78/1	Political declaration of the high-level political forum on sustainable development convened under the auspices of the General Assembly
71/212	Information and communications technologies for development	78/132	Information and communications technologies for sustainable development
73/195	Global Compact for Safe, Orderly and Regular Migration	78/134	International trade and development
75/228	Follow-up to the second United Nations Conference on Landlocked Developing Countries	78/136	International financial system and development
75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system	78/137	External debt sustainability and development
76/218	Implementation of the Third United Nations Decade for the Eradication of Poverty (2018–2027)	78/139	Financial inclusion for sustainable development
76/224	Towards global partnerships: a principle-based approach to enhance cooperation between the United Nations and all relevant partners	78/140	Promotion of international cooperation to combat illicit financial flows and strengthen good practices on assets return to foster sustainable development
76/258	Doha Programme of Action for the Least Developed Countries	78/141	Promoting investments for sustainable development
76/298	Implementation of the recommendations contained in the report of the Secretary-General on the causes of conflict and the promotion of durable peace and sustainable development in Africa	78/151	Promoting sustainable consumption and production patterns for the implementation of the 2030 Agenda for Sustainable Development, building on Agenda 21
77/160	Entrepreneurship for sustainable development	78/155	Implementation of the Convention on Biological Diversity and its contribution to sustainable development
77/169	Harmony with Nature	78/162	Development cooperation with middle-income countries
77/174	Towards a New International Economic Order	78/165	Eradicating rural poverty to implement the 2030 Agenda for Sustainable Development
77/175	Role of the United Nations in promoting development in the context of globalization and interdependence	78/167	South-South cooperation
77/176	International migration and development		

Part V Regional cooperation for development

78/174	Implementation of the outcome of the World Summit for Social Development and of the twenty-fourth special session of the General Assembly	78/232	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States
78/203	The right to development		
78/231	Follow-up to and implementation of the outcomes of the International Conferences on Financing for Development		

Economic and Social Council resolutions

671 A (XXV)	Establishment of an Economic Commission for Africa	2021/10	Socially just transition towards sustainable development: the role of digital technologies on social development and well-being of all
2014/5	Promoting empowerment of people in achieving poverty eradication, social integration and full employment and decent work for all	2023/3	Assessment of the progress made in the implementation of and follow-up to the outcomes of the World Summit on the Information Society

Economic Commission for Africa resolutions

748 (XXVIII)	Population, family and sustainable development	941 (XLIX)	Organization of an annual African regional review of progress in the implementation of the outcomes of the World Summit on Information Society
819 (XXXI)	Promotion of energy resources development and utilization in Africa		
822 (XXXI)	Implementation of the treaty establishing the African Economic Community: strengthening regional economic communities; rationalization and harmonization of the activities of regional and subregional communities	960 (LI)	Harnessing the potential of the African Continental Free Trade Area and creating fiscal space for jobs and economic diversification
		965 (LII)	Luxembourg Protocol to the Convention on International Interests in Mobile Equipment on Matters Specific to Railway Rolling Stock
862 (XLII)	Enhancing domestic resource mobilization	966 (LII)	Review of the intergovernmental structure of the Economic Commission for Africa pursuant to its resolution 943 (XLIX) and resolution 957 (LI)
874 (XLIII)	Strengthening the subregional offices of the United Nations Economic Commission for Africa		
907 (XLVI)	Industrialization for an emerging Africa	967 (LII)	Progress in the implementation of the Programme of Action for the Least Developed Countries for the Decade 2011–2020 and preparation for the Fifth United Nations Conference on the Least Developed Countries

8. On the African Union-United Nations Framework for the Implementation of Agenda 2063 and the 2030 Agenda	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: advocacy and advisory services on the African Union-United Nations Framework for the Implementation of Agenda 2063 and the 2030 Agenda.				
D. Communication deliverables				
Outreach programmes, special events and information materials: information materials on regional integration and emerging socioeconomic issues for awareness-raising with members of ECA.				

Evaluation activities

- 18.14 The following evaluations conducted by ECA and completed in 2023 have guided the proposed programme plan for 2025:
- (a) Evaluation of the African Institute for Economic Development and Planning strategic framework for the period 2019–2023;
 - (b) Evaluation of the project on the Africa Climate Resilient Investment Facility;
 - (c) Evaluation of the project entitled “Ten-step plan for safer road infrastructure”;
 - (d) Evaluation of the African Economic Conference series.
- 18.15 In response to the results of the evaluations referenced above, the Commission will strengthen internal communication on and outreach for its capacity-building and advocacy projects. Moreover, the recommendations from the evaluation of the African Institute for Economic Development and Planning will inform the design of the next strategic framework.
- 18.16 The following evaluations to be conducted by ECA are planned for 2025:
- (a) Evaluation of ECA subprogramme 7, component 3;
 - (b) Evaluation of ECA support towards integrated national financing frameworks and development planning;
 - (c) Evaluation of ECA support for infrastructure development through innovative financing, public-private partnerships and regional integration;
 - (d) Evaluation of ECA support in building the resilience of its members to climate change;
 - (e) Evaluation of ECA subregional joint sessions of the intergovernmental committees of senior officials and experts.

Programme of work

Subprogramme 1

Macroeconomic policy, finance and governance

Objective

- 18.17 The objective, to which this subprogramme contributes, is to achieve structural transformation and inclusive growth in Africa through strengthened and effective development planning, macroeconomic policy analysis, enhanced economic governance and management, and innovative public and private sector financing.

Strategy

- 18.18 To contribute to the objective, the subprogramme will:
- (a) Provide technical assistance, capacity-building and policy advice to members of ECA on:
 - (i) Tracking progress in the implementation of the 2030 Agenda, Agenda 2063 and the Doha Programme of Action for the Least Developed Countries, and designing, implementing and monitoring their national development plans;
 - (ii) Designing and implementing policy frameworks that promote transparency and accountability in public financial management, including debt management, and resource mobilization and allocation to build resilience to shocks;
 - (iii) Identifying priority growth sectors and promoting the development and implementation of initiatives to improve their competitiveness, attract investment and stimulate entrepreneurship;
 - (iv) Developing and deepening their domestic capital markets and developing innovative and sustainable financing solutions for mobilizing additional resources to meet development financing needs and increase financial resilience;
 - (b) Convene platforms for policy dialogue on matters related to macroeconomic policy, economic governance, financing and development planning, including the annual session of the Conference of African Ministers of Finance, Planning and Economic Development;
 - (c) Publish policy-relevant knowledge products underpinned by research and macroeconomic modelling tools and produce, upon request, forecasts with recommendations for responding to the impacts of external shocks.
- 18.19 The above-mentioned work is expected to result in:
- (a) More coordinated and integrated policy design and implementation by members of ECA;
 - (b) Accelerated and sustainable graduation of African countries from the least developed country category;
 - (c) Increased mobilization of resources and capital for development and investment in priority areas;
 - (d) Improved debt management and reduced debt vulnerabilities among members of ECA;
 - (e) A business climate that allows for improved access to markets and a diversified investor base with an increased appetite for domestic currency debt markets.

Programme performance in 2023

Improved tax policy and administration for the mobilization of public resources

- 18.20 Cooperation is indispensable for an equitable global tax system, and the framework convention requested by the General Assembly in its resolution [78/230](#) would provide for greater equity in the global tax system. This outcome came about as a result of support from the subprogramme pursuant to resolution 990 (LIV) of the Conference of African Ministers of Finance, Planning and Economic Development, in which the Conference requested the secretariat of ECA to work on tax-related matters. The subprogramme led negotiations to include the United Nations tax convention as a topic of discussion at the meeting of the African Union subcommittee on tax and illicit financial flows of the Specialized Technical Committee on Finance, Monetary Affairs, Economic Planning and Integration in June 2023, leading to the inclusion of the topic in the meeting of the Specialized Technical Committee in July 2023, with a view to preparing the Africa Group in New York to participate effectively in the discussions that led to the adoption of Assembly resolution [78/230](#). The subprogramme also drafted a technical paper and shared it with all members of ECA for their

consideration before the start of the Assembly. The subprogramme continues to conduct policy awareness and capacity-building work on the basis of the resolution.

18.21 Progress towards the objective is presented in the performance measure below (see table 18.2).

Table 18.2
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
Members of ECA began negotiations for an international tax convention	Members of ECA drafted a United Nations resolution on international tax cooperation	General Assembly adopted resolution 78/230 on inclusive tax cooperation

Planned results for 2025

Result 1: strengthened debt management for resilient recovery

Programme performance in 2023 and target for 2025

18.22 The subprogramme’s work contributed to the formulation and implementation of policies related to financial and debt management in three additional members of ECA (Ethiopia, Sierra Leone and Zambia), for a cumulative total of four members of ECA, which met the planned target.

18.23 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 18.I).

Figure 18.I

Performance measure: number of policy interventions related to financial and debt management developed or implemented (cumulative)

Result 2: enhanced economic governance and improved tax policy and administration for the mobilization of public resources

Programme performance in 2023 and target for 2025

18.24 The subprogramme’s work contributed to the implementation of recommendations on improved tax policy and administration by policymakers in Benin, which met the planned target.

18.25 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 18.II).

Figure 18.II
Performance measure: number of members of ECA implementing recommendations on improved tax policy and administration (cumulative)

Result 3: members of ECA apply innovative approaches to mobilize domestic resources and external private capital

18.26 Increasing transformative and sustainable growth requires innovative and affordable financing solutions. The prospects for mobilizing additional resources from domestic markets and exploiting untapped pockets of finance by better channelling domestic savings through appropriate financial products offer enormous potential. The subprogramme supports members of ECA in reducing financing risk, establishing a more effective policy and regulatory environment and building more sophisticated domestic capital markets.

Lessons learned and planned change

18.27 The lesson for the subprogramme was that capital market development requires a collaborative approach and long-term support for lasting impact. In applying the lesson, the subprogramme will foster close and direct working relationships with regulators and ministries of finance to develop innovative solutions for financing sustainable development and build new business models and modalities of financial services in the digital age.

18.28 Expected progress towards the objective is presented in the performance measure below (see table 18.3).

Table 18.3
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Improved understanding of capital markets and innovative financing among policymakers in four countries	First issuance of 8- and 10-year bonds in local currency in Angola	Uganda designed strategic plan and road map for the development of its local currency bond market Development of the first securities exchange in Ethiopia Strengthened governance and improved sovereign risk management in Guinea and Mauritania	Two members of ECA review the legal and regulatory framework of the money market to increase liquidity in their financial systems	Two members of ECA design a programme to develop their financial systems with a view to mobilizing additional resources

Deliverables

18.29 Table 18.4 lists all deliverables of the subprogramme.

Table 18.4

21. On market access and private sector financing, investment and partnerships	1	–	2	1
22. On purchase-agreement markets among African regulators and market stakeholders	–	1	2	1

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Consultation, advice and advocacy: advisory services to six members of ECA and regional bodies on emerging macroeconomic issues, development planning and economic governance issues.

D. Communication deliverables

Outreach programmes, special events and information materials: annual African Economic Conference (some 200 in-person participants, including policymakers, experts, researchers, private sector representatives and young people); Pan-African Conference on Illicit Financial Flows and Taxation (some 100 in-person participants).

Subprogramme 2 Regional integration and trade

Objective

- 18.30 The objective, to which this subprogramme contributes, is to strengthen regional cooperation and integration among members of ECA through increased trade flows, improved industrialization and increased investment.

Strategy

- 18.31 To contribute to the objective, the subprogramme will:
- (a) Provide advisory services and technical assistance to members of ECA on market access and business opportunities arising from the African Continental Free Trade Area to minimize potential adverse effects (such as import surges, dumping and customs revenue loss risks) in the context of the implementation of their national strategies, and multilateral and bilateral trade issues;
 - (b) Develop and disseminate knowledge products and provide technical assistance to identify opportunities for diversification, value addition and the development of manufacturing and industrial clusters for members of ECA in support of the Action Plan for the Accelerated Industrial Development of Africa, contributing to the achievement of Sustainable Development Goals 9 and 17;
 - (c) Provide training, with a particular focus on least developed countries, landlocked developing countries and regional economic communities, on the implementation of existing regional cooperation frameworks;
 - (d) Provide advisory services and technical assistance to members of ECA and regional economic communities on regional integration, national, regional and continental competition policies, intellectual property policies and measures for investment facilitation.
- 18.32 The above-mentioned work is expected to result in:
- (a) Countries implementing their respective strategies for the operationalization of the African Continental Free Trade Area;
 - (b) More coherent, coordinated and responsive interfaces between the African Continental Free Trade Area and the free trade areas and customs unions of the regional economic communities;
 - (c) More coherent trade and industrialization policies aligned with the 2030 Agenda and Agenda 2063;
 - (d) Accelerated industrialization and increased diversification of productive capacities and production patterns;

- (e) Reduced transaction risks and intermediation costs for members of ECA;
- (f) An improved business environment characterized by enhanced opportunities for private sector operators to leverage transboundary opportunities and improved market access conditions for African trade of goods and services, as well as the free movement of capital and people.

Programme performance in 2023

Finalization of a protocol on digital trade to leverage the benefits of an optimal business environment under the African Continental Free Trade Area

- 18.33 The protocol on digital trade to the Agreement Establishing the African Continental Free Trade Area will create an optimal business environment for digital trade and minimize barriers within and between countries. To address the challenges related to data governance and digital trade facilitation that emerged during the negotiations on the protocol, the subprogramme launched a training and research initiative on digital trade regulatory integration. Furthermore, 13 members of ECA received assistance to collect crucial data on digital trade integration and trade restrictions to digital services. The subprogramme also supported African Continental Free Trade Area negotiators and senior trade officials through a series of capacity-building activities. These interventions contributed to the finalization of the protocol.
- 18.34 Progress towards the objective is presented in the performance measure below (see table 18.5).

Table 18.5
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
15 members of ECA collected data on digital trade integration and trade restrictions to digital services to be able to design and negotiate a protocol on digital trade	An additional 26 members of ECA collected data on digital trade integration and trade restrictions to digital services	An additional 13 members of ECA collected data on digital trade integration and trade restrictions to digital services Members of ECA finalized a protocol on digital trade to establish common positions on digital trade, harmonize digital economy regulations and leverage the benefits of e-commerce

Planned results for 2025

Result 1: more inclusive and equitable development in the pharmaceutical sector

Programme performance in 2023 and target for 2025

- 18.35 The subprogramme’s work contributed to the implementation by 10 members of ECA of recommendations on inclusive and equitable development in the pharmaceutical sector, which did not meet the planned target of 20 members of ECA. The target was not met owing to the concentrated technical focus on the 10 pilot countries.
- 18.36 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 18.III).

Figure 18.III
Performance measure: number of members of ECA implementing recommendations on inclusive and equitable development in the pharmaceutical sector (cumulative)

Result 2: members of ECA implement priority areas of their strategies for the implementation of the Agreement Establishing the African Continental Free Trade Area related to industrialization

Programme performance in 2023 and target for 2025

18.37 The subprogramme’s work contributed to the implementation by seven additional members of ECA of the priority areas of their national strategies for the implementation of the Agreement Establishing the African Continental Free Trade Area, for a cumulative total of eight members (Burkina Faso, Côte d’Ivoire, Guinea, Mozambique, Namibia, Niger, Senegal and Togo), which exceeded the planned target of five members of ECA.

18.38 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 18.IV).

Figure 18.IV
Performance measure: number of members of ECA implementing the priority areas of their national strategies for the implementation of the Agreement Establishing the African Continental Free Trade Area related to industrialization (cumulative)

Result 3: sustainable trade strategies to mitigate the impact of climate change

Proposed programme plan for 2025

18.39 African countries need to balance efforts to achieve the goals of the African Continental Free Trade Area with the urgency of adapting to the effects of climate change. In response to limited studies on the potential environmental impacts of the Area, the subprogramme supported 20 countries in developing trade strategies to identify sustainable value chain opportunities and climate change

adaptation needs. In addition, the subprogramme proposed actions to promote competitive intra-African exports, value-added trade, regional value chain integration and climate resilience.
