Lessons learned and planned change

18.40 The lesson for the subprogramme was to continuously engage with and increase assistance to stakeholders on the expected impacts of adopting climate policies in Africa and how this relates to the operationalization of the African Continental Free Trade Area. In applying the lesson, the subprogramme will support negotiations on and the finalization and adoption of a protocol on climate change and trade and provide evidence-based recommendations on enhancing regional trade while mitigating and adapting to the impacts of climate change.

18.41 Expected progress towards the objective is presented in the performance measure below (see figure 18.V).

Figure 18.V

Performance measure: number of members of ECA adopting sustainable trade strategies that include considerations related to climate change (cumulative)

Deliverables

18.42 Table 18.6 lists all deliverables of the subprogramme.

Table 18.6

Subprogramme 2: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	2	3	2
1. Report for the Committee on Private Sector Development, Regional Integration, Trade, Infrastructure, Industry and Technology	–	1	1	1
2. Report on the status of implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024 for the Conference of African Ministers of Finance, Planning and Economic Development and updates on the status of international and intra-African trade for the Committee on Private Sector Development, Regional Integration, Trade, Infrastructure, Industry and Technology	1	1	2	1
Substantive services for meetings (number of three-hour meetings)	–	3	3	3
3. Meetings of the Committee on Private Sector Development, Regional Integration, Trade, Infrastructure, Industry and Technology	–	3	3	3

Part V Regional cooperation for development

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	5	6	7	4
4. On boosting intra-African trade by enhancing the capacity of members of ECA and regional economic communities to increase the African share of international trade	1	1	1	1
5. On inclusive and equitable African trade arrangements	1	–	1	–
6. On deepening African trade integration through effective implementation of the Agreement Establishing the African Continental Free Trade Area	–	1	1	–
7. Fellowship programme for enhancing the capacity of young African scholars in the areas of industrialization, investment, regional integration, trade and markets	1	1	1	1
8. On the trade model	1	1	1	1
9. On operationalization of the Agreement Establishing the African Continental Free Trade Area: strategic interventions in investment, services competition policy, digitalization, regional trade and integration	1	1	1	1
10. On the opportunities created by the African Continental Free Trade Area for the pooled procurement of essential drugs and products and local pharmaceutical production for the continent	–	1	1	–
Seminars, workshops and training events (number of days)	10	10	10	10
11. Training events on trade economics, regional integration and capacity-building for trade policy and structural transformation, aid for trade, basic and intermediate trade modelling and advanced trade modelling	10	10	10	10
Publications (number of publications)	3	3	3	2
12. Topical issue report on the second phase of the African Continental Free Trade Area negotiations	1	1	1	1
13. On assessing regional integration in Africa	1	1	1	–
14. On revisiting policy, legislation and institutions for industrial development in Africa	1	1	1	1
Technical materials (number of materials)	4	4	11	11
15. On investments	1	1	3	3
16. On topical international and intraregional trade issues	1	1	5	5
17. On the African Union integration agenda	1	1	1	1
18. On industrialization in Africa	1	1	2	2
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services to members of ECA and regional or subregional cooperation groups in the context of the New Partnership for Africa's Development and the Framework for a Renewed United Nations-African Union Partnership on Africa's Integration and Development Agenda 2017–2027; analytical advice for the implementation of the Vienna Programme of Action.				
Databases and substantive digital materials: observatory on regional integration in Africa; Africa Regional Integration Index; regional digital trade integration database; digital services trade restrictiveness database.				
D. Communication deliverables				
Outreach programmes, special events and information materials: information materials on regional integration and trade; information kits; high-level policy dialogue on trade.				
Digital platforms and multimedia content: content for the subprogramme's social media accounts on regional integration and trade.				

Subprogramme 3

Technology, innovation, connectivity and infrastructure development

Objective

- 18.43 The objective, to which this subprogramme contributes, is to advance inclusive growth, sustainable development and economic transformation in Africa through science, technology and innovation, improved connectivity and logistics, and infrastructure development.

Strategy

- 18.44 To contribute to the objective, the subprogramme will:
- (a) Conduct policy research and analysis on:
 - (i) Digital trends on the continent, the economic impacts of new and emerging technologies, and technology-driven solutions for sustainable development;
 - (ii) The state of energy, transport and information and communications technology infrastructure at the national and regional levels and the impact of logistics and connectivity on economic development;
 - (b) Provide technical assistance and advisory services to members of ECA, the African Union and its bodies, and subregional organizations on:
 - (i) The design and implementation of regulatory frameworks that promote digital systems and of policies related to technology and innovation, including principles for good digital identification;
 - (ii) The design and implementation of policies and strategies to bridge technological gaps and promote digital inclusivity and digital connectivity across the continent;
 - (iii) The implementation of the Programme for Infrastructure Development in Africa and design of regulatory frameworks to enhance private sector investment in infrastructure, while managing risk;
 - (iv) The development of transport infrastructure and services, including transport facilitation, norms and standards, regulations, road safety, and asset management, with a particular focus on the liberalization of intra-African air transport in the context of the Single African Air Transport Market and the digitalization of transport infrastructure;
 - (v) The development of infrastructure to improve energy access, advance market development and foster the transition to renewable sources of energy;
 - (c) Organize policy dialogues and foster collaboration between the public and private sector in the above-mentioned areas.
- 18.45 The above-mentioned work is expected to result in:
- (a) Improved research and development across the continent to identify local solutions to sustainable development challenges that leverage technology and innovation;
 - (b) Strengthened implementation of the principles for good digital identification, including security of information, to enable digital transformation, inclusive growth and development;
 - (c) Increased efficiency and safety of the African transport sector;
 - (d) Increased energy access and innovative financing for energy infrastructure;
 - (e) Increased private sector investment in new and emerging technologies and public infrastructure.

- 18.46 In doing so, the subprogramme will support members of ECA in making progress towards Sustainable Development Goals 1, 2, 3, 4, 5, 7, 8, 9, 10, 11, 13 and 17.

Planned result for 2025

Result 1: increased use of new technologies by members of ECA, reinforced by robust regulatory frameworks

Proposed programme plan for 2025

- 18.47 New and emerging technologies, such as artificial intelligence, have the potential to accelerate efforts to achieve the 2030 Agenda and Agenda 2063, provided that appropriate governance, regulation and safety standards are in place. ECA has received an increasing number of requests from members for support in harnessing emerging technologies for sustainable development. In 2022, in response to a request from the Congo, the subprogramme provided technical assistance for the establishment and operationalization of the African Research Centre for Artificial Intelligence. In 2023, upon request from transport corridor management authorities, ECA developed a methodology to monitor regional transport corridors in East Africa using geographic information systems and artificial intelligence, to enable informed decisions about infrastructure investments, capacity expansion and transport policy priorities.

Lessons learned and planned change

- 18.48 The lesson for the subprogramme was that targeted support, focused on critical sectors for the socioeconomic development of Africa, such as transport, can serve as a strategic lever for more widespread adoption of such emerging technologies as artificial intelligence. In applying the lesson, the subprogramme will, upon request, provide technical assistance to members of ECA and regional organizations in establishing appropriate regulatory and governance frameworks on the use of artificial intelligence, while also providing targeted support to national and regional authorities on using artificial intelligence to manage regional transport corridors.
- 18.49 Expected progress towards the objective is presented in the performance measure below (see table 18.7).

Table 18.7
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	African Research Centre for Artificial Intelligence established by the Congo	–	African Union Commission adopts the communication and information and communications technology component of the continental strategy on artificial intelligence	Two regional transport corridor authorities use data generated through artificial intelligence to manage their infrastructure assets

Deliverables

- 18.50 Table 18.8 lists all deliverables of the subprogramme.

Table 18.8

Subprogramme 3: deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	2	3	1	3
1. Report for the Committee on Private Sector Development, Regional Integration, Trade, Infrastructure, Industry and Technology	1	1	–	1
2. Report on new technologies and innovative solutions for the transformation of Africa and implementation of the Sustainable Development Goals for the Africa Regional Forum on Sustainable Development and the Conference of African Ministers of Finance, Planning and Economic Development and the Committee of Experts of the Economic Commission for Africa	1	1	1	1
3. Report on the implementation of the outcomes of the World Summit on the Information Society in Africa	–	1	–	1
Substantive services for meetings (number of three-hour meetings)	1	9	–	12
4. Meetings of the Committee on Private Sector Development, Regional Integration, Trade, Infrastructure, Industry and Technology	1	1	–	4
5. African Regional Science, Technology and Innovation Forum, in preparation for the high-level political forum on sustainable development	–	4	–	4
6. Africa World Summit on the Information Society review meeting	–	4	–	4
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	2	–	4
7. Public-private partnerships for financing the energy transition in Africa	–	–	–	1
8. On regulatory improvement to de-risk investment in the electricity market	–	–	–	1
9. On the establishment and operationalization of a digital technology centre	1	1	–	1
10. Fellowship programme for young African scholars on policy research, analysis and advocacy	–	1	–	1
Seminars, workshops and training events (number of days)	–	10	5	20
11. On regulatory analysis using the regulatory openness, attractiveness and readiness methodology and reform planning	–	10	5	3
12. Workshops on technology adoption	–	–	–	9
13. Workshop on a continental regulatory framework for private sector investment in the energy sector	–	–	–	4
14. Seminar on low-emission hydrogen	–	–	–	1
15. On digitalization and use of artificial intelligence in regional transport corridors in Africa	–	–	–	1
16. Regional training on the scaled adoption of electricity vehicles	–	–	–	2
Publications (number of publications)	3	3	4	3
17. On emerging issues and trends in new technologies and innovation in the context of sustainable development and poverty	2	2	3	2
18. On African science, technology and innovation	1	1	1	1
Technical materials (number of materials)	5	6	10	18
19. On energy access, for the high-level political forum on sustainable development	1	1	2	1
20. On the African transport policy programme	–	–	1	1
21. On road safety policies, strategies and action plans	–	2	3	2
22. On supporting regional railway infrastructure development in Africa	–	–	1	1
23. Methodology approach for the assessment of road corridors through the geographic information system and other digitalized tools	–	–	1	1

Part V Regional cooperation for development

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
24. Infographics on the African Continental Free Trade Area and demand for transport infrastructure and services	–	–	1	1
25. Infographics on the African strategic directions for the post-2020 Decade of Action for Road Safety	–	–	–	1
26. Documentation for meetings of the African Union and the African Union Development Agency in the areas of new technologies and innovation	1	–	1	1
27. On the continental framework for enhancing energy security in Africa	–	–	–	1
28. On the implementation of principles for good digital identification	3	3	–	2
29. Policy brief on low-emission hydrogen technology and application in Africa	–	–	–	2
30. Performance assessment of the Single African Air Transport Market	–	–	–	1
31. Regulatory readiness assessment for the electric vehicle market	–	–	–	3

C. Substantive deliverables

Consultation, advice and advocacy: advisory services to members of ECA on issues related to technology, innovation, connectivity and infrastructure development, including road safety, corridor management and use of digital tools, and digital identification.

D. Communication deliverables

Outreach programmes, special events and information materials: booklet on digital transformation and emerging technologies; booklet on energy infrastructure finance and development; brochures, newsletters, flyers, briefs and information kits on technology-related issues for members of ECA and implementing partners.

External and media relations: press releases, podcasts and videos on relevant issues.

Digital platforms and multimedia content: websites, social media and platforms on technology and infrastructure.

Subprogramme 4 Data and statistics

Objective

- 18.51 The objective, to which this subprogramme contributes, is to strengthen the production, dissemination and use of credible data, statistics and geospatial information at the national, regional and global levels for evidence-based policy and decision-making.

Strategy

- 18.52 To contribute to the objective, the subprogramme will:
- Support African national statistical systems in transforming their data governance and management methods by digitalizing the data collection, compilation and dissemination process for statistical areas, including censuses and civil registration systems, and provide technical assistance and training in the design and implementation of national strategies for the development of statistics and national spatial data infrastructure with related integrated geospatial information frameworks;
 - Maintain and regularly update databases that are accessible for public use, with available harmonized data, statistics and geospatial information disaggregated by location on such topics as African economies, demographics, social indicators, the environment and other statistics needed for monitoring and reporting on the implementation of the 2030 Agenda and Agenda 2063;
 - Provide training and make platforms available for the exchange of best practices among members of ECA and their respective statistical agencies;

- (d) Integrate policy advice and sustained capacity-building activities on data, statistics and geospatial information to support members of ECA in enhancing monitoring and reporting on the implementation of the 2030 Agenda and Agenda 2063;
- (e) Enhance communication and advocacy to members of ECA on the use of statistics and geospatial information.

18.53 The above-mentioned work is expected to result in:

- (a) Improved capacity, resilience and efficiency of national statistical systems, including the uptake of innovative tools and technologies to collect comparable statistics at various levels of disaggregation, and improved statistical operations, including the conduct of censuses and surveys and administrative data processing and analysis, and dissemination of timely data;
- (b) Improved uptake of geospatial information management, closer collaboration between components and stakeholders of the national spatial data infrastructures, and better integrated geospatial information frameworks;
- (c) Enhanced monitoring and reporting on the implementation of the 2030 Agenda and Agenda 2063.

Programme performance in 2023

Improvement in census undertakings as a result of digital applications

18.54 The implementation of digital censuses helped to mitigate challenges faced by African countries, including the impacts of the coronavirus disease (COVID-19), budgetary constraints and insecurities in some parts of the continent. The subprogramme developed digital applications that increased the operational efficiency of census undertakings and shortened the window for making the data available to about three months after the completion of fieldwork. These applications have improved the quality of census data and enhanced the potential for geospatial analysis. The tools deployed included electronic devices, digital field monitoring systems and systems for tracking issues in the field, digital census project management toolkits, and technologies for the dissemination of results. In 2023, the subprogramme supported three members of ECA (Namibia, Senegal and Zambia) in conducting digital censuses.

18.55 Progress towards the objective is presented in the performance measure below (see figure 18.VI).

Figure 18.VI

Performance measure: number of members of ECA improving the quality and timeliness of census undertakings through technological applications (cumulative)

Planned results for 2025

Result 1: towards digital transformation and modernization of statistical systems

Programme performance in 2023 and target for 2025

- 18.56 The subprogramme’s work contributed to the implementation by 3 additional members of ECA (Madagascar, Mozambique and Uganda) of the road map on digital transformation and modernized official statistics, for a cumulative total of 11, which exceeded the planned target of 5 members of ECA.
- 18.57 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 18.VII).

Figure 18.VII

Performance measure: number of members of ECA implementing the road map on digital transformation and modernized official statistics (cumulative)

Result 2: members of ECA produce and disseminate comparable economic statistics

Programme performance in 2023 and target for 2025

- 18.58 The subprogramme’s work contributed to the adoption and application by 5 additional members of ECA (Cameroon, Côte d’Ivoire, Egypt, Nigeria and Senegal) of the recommended international standards and methodology in economic statistics, for a cumulative total of 37, which did not meet the planned target of 39 members of ECA. The target was not met because the adoption and technical implementation of the 2008 System of National Accounts in the five members of ECA took considerable time owing to the prolonged research and global consultation phases, which prevented the subprogramme from supporting additional members.
- 18.59 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 18.VIII).

Figure 18.VIII

Performance measure: number of members of ECA having adopted and applied the recommended international standards and methodology (2008 System of National Accounts and extensions) in economic statistics (cumulative)

Result 3: progress towards integrated statistical and geospatial information frameworks

Proposed programme plan for 2025

- 18.60 The Global Statistical Geospatial Framework provides a standardized approach for integrating statistical and geospatial information, enabling a more comprehensive understanding of social, economic and environmental phenomena. The Global Statistical Geospatial Framework is anchored in the overarching United Nations Integrated Geospatial Information Framework, which provides the coordination and standards necessary to deliver integrated geospatial information. The subprogramme has been supporting members of ECA in applying the strategic pathways of the United Nations Integrated Geospatial Information Framework to improve their national statistical frameworks and address challenges in the collection, processing, analysis and dissemination of data.

Lessons learned and planned change

- 18.61 The lesson for the subprogramme was that countries need support in collecting data at the level of granularity required to conduct analyses for evidence-based policymaking and that methodologies for the integration of the United Nations Integrated Geospatial Information Framework need to be harmonized across countries. In applying the lesson, the subprogramme will support members of ECA in using emerging technologies to collect and map geospatial data at the subnational level, improving workflows for the collection of data, including by using volunteered geographic information on utilities and infrastructure in urban areas, and establishing a mechanism to standardize geographic reference coordinate systems to enable comparability within and between countries. These efforts will foster the integration of statistical and geospatial data and the universal availability of all data.
- 18.62 Expected progress towards the objective is presented in the performance measure below (see figure 18.IX).

Figure 18.IX

Performance measure: number of members of ECA applying at least one of the strategic pathways of the United Nations Integrated Geospatial Information Framework (cumulative)

Deliverables

18.63 Table 18.9 lists all deliverables of the subprogramme.

Table 18.9

Subprogramme 4: deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>

C. Substantive deliverables

Consultation, advice and advocacy: technical advice on civil registration and vital statistics, on the 2025 planned population and housing censuses for members of ECA and on Sustainable Development Goal indicators.

Advisory services to regional bodies on statistical coordination.

Technical advice to members of ECA on matters related to digitalization, statistical management and data science.

Technical advice to five members of ECA on geospatial-related matters.

Databases and substantive digital materials: ECA statistical data portal (ECAStats), providing data for members of ECA; geospatial databases (2), online applications, services and platforms (2); Africa GeoPortal.

D. Communication deliverables

Outreach programmes, special events and information materials: African Statistics Day; annual Africa Symposium on Statistical Development; dissemination of information through outreach programmes and mobile applications.

Subprogramme 5 Climate, food security and natural resources, green and blue economy

Objective

- 18.64 The objective, to which this subprogramme contributes, is to enhance climate resilience, achieve food security and advance inclusive and sustainable development by harnessing land, natural resources and the green and blue economies.

Strategy

- 18.65 To contribute to the objective, the subprogramme will:
- (a) Conduct policy research and analysis, and provide technical assistance and advisory services to members of ECA on:
 - (i) Extractives-led production linkages and the design and implementation of mineral policies, strategies and plans that consider health, environmental and social aspects and matters related to gender equality, in line with the principles of the Africa Mining Vision;
 - (ii) The circular economy,¹ the green economy in the context of sustainable development and poverty eradication, including the conduct of voluntary national and local reviews, and the blue economy, in line with the Africa Blue Economy Strategy of the African Union;
 - (iii) Climate resilience and disaster vulnerability of African economies, societies, ecosystems and agrifood systems and the integrated implementation of climate action;

¹ United Nations Environment Assembly resolution 5/11.

- (iv) Modelling of the economic impacts of climate change and private sector investments for the implementation of nationally determined contributions;
 - (v) Land governance, including policy and regulatory reforms for land tenure security, in particular for women and young people, and the use of the Framework and Guidelines on Land Policy in Africa and geographic information system-based tools to support decision-making regarding responsible land-based investments by the private sector;
 - (vi) Agriculture and food systems transformation, through financing, insurance and de-risking investment, youth and women entrepreneurship in agriculture, regional value chains, common agro-parks and agro-industrialization;
- (b) Provide technical advice to the African Union Commission, regional economic communities and intergovernmental organizations on sustainable development planning and policy formulation in the context of the second 10-year implementation plan of Agenda 2063;
 - (c) Convene peer-learning policy dialogues and regional consensus-building platforms and support African universities and research institutions in knowledge generation in the above-mentioned areas.

18.66 The above-mentioned work is expected to result in:

- (a) Sustainable diversified economies in African countries rich in natural resources;
- (b) Development of policies, strategies and plans in agriculture and natural resource sectors to enable the transition to environmentally sustainable and climate-resilient economies;
- (c) Improved competitiveness, productivity, value addition and trade in agricultural goods and services;
- (d) Resilient, inclusive and nutrition-oriented food systems;
- (e) Inclusive land-based investments in agriculture and other natural resource sectors, in accordance with the African Union guiding principles for large-scale land-based investments in Africa;
- (f) Improved land tenure security, in accordance with the African Union framework and guidelines on land policy in Africa.

Planned result for 2025

Result 1: members of ECA develop and implement national and regional policy and cooperation frameworks for the sustainable use of natural resources

Proposed programme plan for 2025

18.67 Africa has vast natural resources, including land, forests, fresh water and marine and mineral resources. The subprogramme supports members of ECA in the sustainable use of natural resources, including through technical assistance for food systems transformation and for value addition of minerals critical to the energy transition. The subprogramme is also supporting members in the development of carbon credit markets, and it produced the first regional carbon registry for the Congo Basin Climate Commission.

Lessons learned and planned change

18.68 The lesson for the subprogramme was that there is a need to meet the growing demand from members of ECA for policy support in carrying out national priorities in the use of natural resources for job creation, food security, economic growth and climate resilience. In applying the lesson, the subprogramme will expand its technical and substantive support and foster cooperation among requesting members and subregional organizations on the efficient use and value addition of natural resources for economic diversification and sustainable development.

18.69 Expected progress towards the objective is presented in the performance measure below (see figure 18.X).

Figure 18.X

Performance measure: number of policy frameworks adopted by members of ECA for the sustainable use of natural resources (cumulative)

Deliverables

18.70 Table 18.10 lists all deliverables of the subprogramme.

C. Substantive deliverables				
Consultation, advice and advocacy: advisory services to three members of ECA and two regional and subregional cooperation groups on the green and blue economies, climate resilience, land governance and agricultural transformation, on promoting agriculture-related insurance schemes to build resilience against climatic shocks and on developing frameworks for viable land taxation for enhanced domestic resource mobilization by members of ECA.				
D. Communication deliverables				
External and media relations: press releases, podcasts and videos related to the issuance of major publications and events.				
Digital platforms and multimedia content: websites, social media and platforms on the environment; social media posts for each major event, workshop, publication and policy brief; interactive map on large-scale land-based investments.				

Subprogramme 6 Gender equality and women’s empowerment

Objective

- 18.71 The objective, to which this subprogramme contributes, is to achieve gender equality and women’s empowerment in Africa, by accelerating the pace of implementation by members of ECA and their reporting on their global and regional commitments related to gender equality and the empowerment of women and girls and to enhance their implementation of policies and programmes for the empowerment of women and girls.

Strategy

- 18.72 To contribute to the objective, the subprogramme will:
- (a) Undertake policy research, provide technical advice and build capacity on issues relating to gender equality and women's empowerment;
 - (b) Promote women's economic empowerment, placing particular emphasis on digital transformation in the context of the African Union strategy on digital transformation and the preparatory process for the global digital compact;
 - (c) Provide technical support to members of ECA, including national machineries for gender equality and line ministries, on integrating a gender perspective into their sectoral development policies and programmes;
 - (d) Roll out the African Gender and Development Index and the Africa Gender Index, in collaboration with partners, in the remaining countries that have not yet implemented them, and provide technical support to members of ECA in measuring progress and reporting on the status of implementation of global and regional commitments on gender equality.
- 18.73 The above-mentioned work is expected to result in:
- (a) Strengthened integration of a gender perspective into planning, budgeting, financing and implementation of national policies and programmes;
 - (b) Improved understanding of and response by policymakers to global and regional frameworks on gender equality and women's empowerment, for the alignment of national development outcomes and the fulfilment of national commitments;
 - (c) Increased opportunities, greater economic empowerment and improved livelihoods for women and girls across Africa, through smart policies and tools designed to address existing and emerging discrepancies in gender equality.

Programme performance in 2023

Women and youth entrepreneurs benefited from the African Continental Free Trade Area

- 18.74 The largest free trade area in the world by membership, the African Continental Free Trade Area, creates a single market connecting 1.3 billion people across 54 countries with a gross domestic product of \$2.5 trillion by eliminating tariffs on 90 per cent of goods and removing non-tariff barriers to trade. Furthermore, the protocol on women and youth in trade to the Agreement Establishing the African Continental Free Trade Area is aimed at ensuring that the Area contributes to gender equality and youth empowerment.
- 18.75 The subprogramme has enabled women and young people from 15 members of ECA to benefit from increased exports and investments under the African Continental Free Trade Area by boosting the capacity of ECA members through masterclass programmes on investment and export readiness and by profiling women entrepreneurs for key stakeholders. The masterclass programmes provided essential knowledge and tools to enhance competitiveness and enable women entrepreneurs to seize opportunities in the continental market. In addition, the subprogramme created business linkages between interested buyers, continental business associations and networks of export- and investment-ready businesses led by women.
- 18.76 Progress towards the objective is presented in the performance measure below (see table 18.11).

Table 18.11
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	–	Taking advantage of the African Continental Free Trade Area, women and youth entrepreneurs from 15 members of ECA increased their exports and investments

Planned results for 2025

Result 1: members of ECA integrate a gender perspective into their sectoral policies

Programme performance in 2023 and target for 2025

- 18.77 The subprogramme’s work contributed to the integration by five members of ECA (Burundi, Lesotho, Mozambique, South Sudan and Zimbabwe) of a gender perspective into their sectoral policies and national development plans, which met the planned target.
- 18.78 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 18.12).

Table 18.12
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Increased capacity of three members of ECA to design gender-sensitive policies focused on the artisanal and small-scale mining sector and to inform policy and finance for nationally determined contribution plans	Increased capacity of five members of ECA (Ghana, Namibia, Nigeria, South Africa and Tunisia) to design gender-sensitive sectoral policies, including on women’s leadership Adoption of a common African position by members of ECA to integrate gender equality into the climate action agenda	Five members of ECA (Burundi, Lesotho, Mozambique, South Sudan and Zimbabwe) integrated a gender perspective into sectoral policies and national development plans	Five additional members of ECA integrate a gender perspective into their relevant sectoral policies, national development plans, legislation, public finance policies, fiscal plans and other policy tools and instruments	Three additional members of ECA integrate a gender perspective into their national development plans

Result 2: members of ECA measure, monitor and report on implementation of global and regional commitments on gender equality

Programme performance in 2023 and target for 2025

- 18.79 The subprogramme’s work contributed to the use by five members of ECA (Burundi, Lesotho, Mozambique, South Sudan and Zimbabwe) of the African Gender and Development Index to design,

report and monitor programmes and progress made in achieving selected targets for Sustainable Development Goal 5, which met the planned target.

18.80 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 18.13).

Table 18.13
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Availability of revised methodology to align the African Gender and Development Index with the 2030 Agenda	Two members of ECA employed the revised African Gender and Development Index to monitor and review their commitments to gender equality	Five members of ECA (Burundi, Lesotho, Mozambique, South Sudan and Zimbabwe) employed the African Gender and Development Index to design, report and monitor programmes and progress made in achieving selected targets for Sustainable Development Goal 5	Three members of ECA institutionalize the African Gender and Development Index into national statistical systems to enable them to monitor and report on progress made in achieving selected targets for Sustainable Development Goal 5	Three members of ECA incorporate the African Gender and Development Index into their monitoring and reporting systems for strengthened commitments to gender equality

Result 3: members of ECA integrate a gender perspective into fiscal policy

Proposed programme plan for 2025

18.81 A significant challenge facing African countries in making progress towards global and regional commitments related to gender equality and women’s empowerment is limited financing. The subprogramme, through its knowledge products, including its flagship African Women’s Reports, highlighted the investment needs to achieve gender equality and women’s empowerment and demonstrated the benefits of integrating a gender perspective into fiscal policies.

Lessons learned and planned change

18.82 The lesson for the subprogramme was that the strategic engagement of ministries of finance and planning is crucial for developing gender-sensitive fiscal policies. In applying the lesson, the subprogramme will convene high-level policy dialogues with ministries of finance and planning on integrating a gender perspective into fiscal policies and relevant frameworks and strengthen coordination between national machineries for gender equality and ministries of finance and planning to develop institutional mechanisms to more systematically integrate a gender perspective into policymaking processes.

18.83 Expected progress towards the objective is presented in the performance measure below (see table 18.14).

Table 18.14
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Increased knowledge of members of ECA on the investment needs for achieving Sustainable Development Goal 5	Five members of ECA take stock of the institutional mechanisms required for strengthening gender-sensitive fiscal policy	Five members of ECA establish a mechanism to better integrate a gender perspective into fiscal policies

Deliverables

18.84 Table 18.15 lists all deliverables of the subprogramme.

Table 18.15
Subprogramme 6: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	3	3	–	3

2. Final outcome report of the Committee on Social Policy, Poverty and Gender	1	1	–	1
Substantive services for meetings (number of three-hour meetings)	1	1	–	1
3. Biennial session of the Committee on Social Policy, Poverty and Gender	1	1	–	1
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	4	4	4	3
4. On mainstreaming a gender perspective in national plans, policies and programmes in countries that request technical advisory services	2	2	2	1
5. On supporting members of ECA in using the subprogramme’s measurement tools to report on their gender equality commitments	1	1	1	1
6. On supporting members of ECA in integrating a gender perspective into fiscal policy	–	–	–	1
7. On enhancing the capacity of members of ECA to address the gender digital divide and positively reimagine a gender perspective in the economic and digital transformation of African countries	1	1	1	–
Seminars, workshops and training events (number of days)	8	8	16	10
8. Workshop on the African Women’s Report	2	2	2	2
9. Training event on the African Gender and Development Index	4	4	4	4
10. Workshop on integrating a gender perspective into fiscal policy	–	–	–	2
11. Workshop on policies and programmes to address the gender digital divide	2	2	10	–
12. Customized capacity-building event for members of ECA on sectoral policies	–	–	–	2
Publications (number of publications)	1	1	–	2
13. African Women’s Report based on thematic and topical issues	1	1	–	1
14. Synthesis report on the 30-year review of the implementation of the Beijing Declaration and Platform for Action in Africa	–	–	–	1

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
Technical materials (number of materials)	2	2	3	2
15. Technical notes on the Africa Gender Index and the African Gender and Development Index	1	1	1	–
16. On climate change and gender equality and women’s empowerment in Africa	–	–	1	–
17. Briefing note on gaps and opportunities in integrating a gender perspective into fiscal policy	–	–	–	1
18. Policy brief on gender equality in the economic and digital transformation of African countries	1	1	1	–
19. Policy brief on integrating a gender perspective into relevant sectoral policies	–	–	–	1
C. Substantive deliverables				
Consultation, advice and advocacy: one special event on International Women’s Day (2025) and the 16 Days of Activism against Gender-based Violence campaign.				
D. Communication deliverables				
Digital platforms and multimedia content: the subprogramme’s knowledge platform accessed by at least 200 experts.				
External and media relations: two press releases on the subprogramme’s website after the hosting and organization of each event.				

Subprogramme 7 Subregional activities for development

Component 1 Subregional activities in North Africa

Objective

18.85 The objective, to which the component contributes, is to enhance the employment creation environment in North Africa through strengthened economic diversification, fiscal management, regional integration and a better recognition of migrant workers’ economic contributions.

Strategy

18.86 To contribute to the objective, the component will:

- (a) Develop evidence-based policies, strategies and reforms and provide technical assistance related to economic diversification, fiscal management and resilient and inclusive economies;
- (b) Provide advisory services and hold subregional consultations on the mobilization of domestic resources and the implementation of the Agreement Establishing the African Continental Free Trade Area, in partnership with ministries of trade and the African Union;
- (c) Provide technical assistance and training for selected African countries on migration data collection and analysis and evidence-based policy formulation to mainstream and leverage migrants’ economic contributions, through data collection and analysis;
- (d) Conduct research on challenges facing middle income countries in North Africa, in particular those relating to development and climate finance, human capital and employment creation in North Africa, with a focus on strategic areas such as digitalization and the green economy in the context of sustainable development and poverty eradication.

18.87 The above-mentioned work is expected to result in:

- (a) Adoption of evidence-based macroeconomic policies and structural reforms by members of ECA to improve fiscal space and enhance productive employment, redirecting resource allocations towards sectors that have a high potential for inclusive and sustainable development;

- (b) Policies and strategies that foster regional integration, enhance productivity and create new jobs in higher-skilled and sustainable sectors;
- (c) Development of evidence-based policies and actions by members of ECA that leverage the contributions of migrants to sustainable development.

Programme performance in 2023

North African countries and regional economic communities designing policies that foster regional integration and inclusive growth

- 18.88 In response to requests for technical and advisory support in order to implement the Agreement Establishing the African Continental Free Trade Area and realize its benefits, the component’s work contributed to the implementation by Mauritania in 2023 of a national strategy for the African Continental Free Trade Area by enhancing the country’s policy implementation capacity through workshops and training for government officials, experts and private sector representatives. The subprogramme also supported Algeria, Egypt, Libya, the Sudan and Tunisia in developing and implementing their African Continental Free Trade Area plans and the Arab Maghreb Union to develop its African Continental Free Trade Area strategy.
- 18.89 Expected progress towards the objective is presented in the performance measure below (see figure 18.XI).

Figure 18.XI

Performance measure: number of ECA members and regional economic communities designing policies to foster regional integration and inclusive growth (cumulative)

Planned results for 2025

Result 1: small and medium-sized enterprises as engines of sustainable development in North Africa

Programme performance in 2023 and target for 2025

- 18.90 The component’s work contributed to the design and implementation by the Agency for Investment and Export Development of Morocco of a programme to enhance the competitiveness of women-owned small and medium-sized enterprises, which met the planned target.
- 18.91 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 18.16).

Table 18.16
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
One country (Tunisia) received analysis and policy advice for strengthening the capacity of small and medium-sized enterprises, including through innovative sources of finance and environmentally sound practices	Strengthened job creation and export capabilities of policymakers from the Ministry of Trade and small and medium-sized enterprise owners in one country (Sudan)	The Agency for Investment and Export Development of Morocco designed and implemented a programme to enhance competitiveness of women-owned small and medium-sized enterprises	One additional country adopts innovative and sustainable policies and strategies for enhancing the competitiveness of small and medium-sized enterprises	One additional country adopts innovative and sustainable programmes or policies for enhancing the capacity of small and medium-sized enterprises

Result 2: developing evidence-based policies and actions that leverage migrants’ economic contributions

Programme performance in 2023 and target for 2025

- 18.92 The component’s work contributed to the development by two additional ECA members (Côte d’Ivoire and Zimbabwe) of evidence-based policies to leverage migrants’ economic contributions, which met the cumulative planned target of six members of ECA.
- 18.93 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 18.XII).

Figure 18.XII
Performance measure: number of countries developing evidence-based policies to leverage migrants’ economic contributions (cumulative)

Result 3: members of ECA mobilize finance for sustainable development

Proposed programme plan for 2025

- 18.94 High levels of public debt combined with increasing debt costs pose a key challenge in the North African subregion, as this not only constrains the fiscal space for governments but also impedes access to credit by private stakeholders, in particular small and medium-sized enterprises. To achieve

the 2030 Agenda and Agenda 2063, North African countries need to strengthen regulatory, policy and operational frameworks to mobilize domestic resources.

Lessons learned and planned change

18.95 The lesson for the component, based on its achievements in countries that had previously been supported, was that its tailored policy support and targeted capacity-building have been effective in enabling members of ECA to mobilize domestic resources. In applying the lesson, the component will build on its support thus far and provide technical advice and capacity-building to members of ECA focused on the use of digital solutions to broaden their tax base, reduce tax evasion and curb illicit financial flows, with a view to mobilizing resources for sustainable development.

18.96 Expected progress towards the objective is presented in the performance measure below (see table 18.17).

**Table 18.17
Performance measure**

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
–	The Sudan Taxation Chamber conducted training to strengthen the capacity of its institutions to collect revenues	Libya adopted tax collection principles and practices that led to a 60 per cent increase in revenues from stamp duties	One country implements measures to reduce tax evasion and illicit financial outflows	One country introduces an electronic taxation system

Deliverables

18.97 Table 18.18 lists all deliverables of the component.

**Table 18.18
Subprogramme 7, component 1: deliverables for the period 2023–2025, by category and subcategory**

C. Substantive deliverables

Consultations, advice and advocacy: advisory services to North African members of ECA or regional economic communities on regional integration for small and medium-sized enterprises, migration issues and finance.

D. Communication deliverables

Digital platforms and multimedia content: one knowledge management hub; three maintained platforms: content management system, collaborative space and customer relationship management of communities of practice.

External and media relations: press releases, newsletters, briefings and social media.

Component 2

Subregional activities in West Africa

Objective

- 18.98 The objective, to which this component contributes, is to advance inclusive development in West Africa through strengthening countries' capacity to integrate challenges related to demographic dynamics into their policies and planning processes and achieve regional integration.

Strategy

- 18.99 To contribute to the objective, the component will:
- (a) Provide knowledge, tools and policy recommendations on the acceleration of a demographic transition and related implications for sustainable development, including family dynamics, migration, health and mortality, ageing and living conditions, gender equality and the empowerment of women and girls, youth and sustainable peace and resilience in West Africa, among others;
 - (b) Engage in high-level policy dialogues and provide technical support and capacity-building to countries on regional integration issues, including the implementation of the Agreement Establishing the African Continental Free Trade Area, and also the development of budgeting frameworks that are sensitive to a demographic dividend with special emphasis on the empowerment of women and young people.
- 18.100 The above-mentioned work is expected to result in:
- (a) Demographic dividend dimensions mainstreamed in national planning and programming and budgeting systems and processes;
 - (b) Deepened regional economic and monetary integration through the operationalization of Vision 2050 of the Economic Community of West African States;
 - (c) Accelerated implementation of the 2030 Agenda and Agenda 2063 by members of ECA and regional organizations;
 - (d) Accelerated implementation of the Agreement Establishing the African Continental Free Trade Area in Africa, with women and young people empowered to seize the opportunities of the Agreement.

Programme performance in 2023

Strengthened national budgeting framework sensitive to the demographic dividend

- 18.101 The component strengthened national capacities in budgeting sensitive to the demographic dividend by working with Benin, Burkina Faso, the Niger, Senegal and Togo to estimate their demographic dividend monitoring index for the period 2001–2020 and aligning those countries with the restructured functional budget with a focus on the pillars of the demographic dividend. The component also worked with those countries to estimate and analyse budget elasticities that would inform the formulation of budget structures conducive to harnessing the demographic dividend. The component engaged with Senegal to integrate demographic dividend issues into its public investments programme for the period 2024–2026, which was presented to the national parliament.
- 18.102 Progress towards the objective is presented in the performance measure below (see figure 18.XIII).

Figure 18.XIII
Performance measure: number of members of ECA estimating the demographic dividend monitoring index and performing budget restructuring with a view to making effective use of a budgeting framework sensitive to the demographic dividend

Planned results for 2025

Result 1: developing and implementing a planning, programming and budgeting system that integrates the demographic dividend

Programme performance in 2023 and target for 2025

18.103 The subprogramme’s component’s work contributed to the adoption by an additional four members of ECA of planning, programming and budgeting systems that integrate a demographic dividend, making a cumulative total of five, which exceeded the planned target of four.

18.104 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 18.XIV).

Figure 18.XIV
Performance measure: number of members of ECA adopting a planning, programming and budgeting system that integrates a demographic dividend (cumulative)

Result 2: regional performance monitoring and accountability mechanism to monitor and report on progress in the implementation of the African Union road map on harnessing the demographic dividend through investments in youth

Programme performance in 2023 and target for 2025

- 18.105 The component's work contributed to the enhanced capacity of an additional 52 national officials in the use of demo-economics and planning tools, bringing the cumulative total to 207 national officials, which exceeded the cumulative planned target of 185 national officials.
- 18.106 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 18.XV).

Figure 18.XV

Performance measure: number of national officials acquiring enhanced capacity in demographic dynamics and policy implications and number of members of ECA establishing a performance monitoring and accountability mechanism for a demographic dividend (cumulative)

Result 3: members of ECA assess debt sustainability and develop longer-term fiscal strategies

Proposed programme plan for 2025

- 18.107 Dealing with external financing constraints has become a significant policy challenge for West African countries as all the economies of the subregion are, to varying extents, facing debt distress. The average inflation rate is estimated at 10–12 per cent, whereas the ratio of debt to gross domestic product is estimated at 55–60 per cent, with some countries running the risk of debt default.

Lessons learned and planned change.

- 18.108 The lesson for the component was the need to support countries in developing sound macroeconomic policies anchored in medium-term and long-term development planning to address structural macroeconomic challenges and minimize dependency on borrowing. In applying the lesson, the component will support members of ECA in assessing their debt sustainability and will design a macroeconomic model and framework to inform the formulation and implementation by members of ECA of longer-term strategies to address debt.
- 18.109 Expected progress towards the objective is presented in the performance measure below (see figure 18.XVI).

Figure 18.XVI
Performance measure: number of members of ECA developing longer-term fiscal strategies to address debt (cumulative)

Deliverables

18.110 Table 18.19 lists all deliverables of the component.

Table 18.19

C. Substantive deliverables				
Consultation, advice, and advocacy: advisory support to members of the Economic Community of West African States.				
D. Communication deliverables				
Outreach programmes, special events and information materials: events for parliamentary networks and events for the launch of flagship reports and related publications.				
External and media relations: press releases; quarterly newsletter (<i>Kakaki News</i>) and other communication materials to the media.				
Digital platforms and multimedia content: West African subregion-specific content for the ECA website.				
Library services: exhibition of ECA knowledge products through various channels and information on the ECA main repository.				

Component 3 Subregional activities in Central Africa

Objective

- 18.111 The objective, to which this component contributes, is to expand the manufacturing and high-value service sectors and increase the share of tradeable and manufactured goods in total exports, deepen regional value chains and improve the competitiveness and productivity of local economies in order to accelerate economic diversification and structural transformation in Central Africa.

Strategy

- 18.112 To contribute to the objective, the component will:
- (a) Provide technical assistance and advisory services to members of ECA in Central Africa on:
 - (i) Formulating and implementing national development plans and economic diversification strategies with a focus on intra-Central African trade and creating a business climate conducive to employment creation and resilient to external shocks;
 - (ii) Translating their national strategies for the implementation of the Agreement Establishing the African Continental Free Trade Area into specific and bankable projects, using market access information and trade opportunity data, with a particular focus on the agricultural, energy and pharmaceutical sectors;
 - (iii) Transforming transport corridors into development corridors, in line with the Central Africa consensual transport plan;
 - (iv) Developing information and communications technology infrastructure and regulatory frameworks required for the digital transition, including support for the establishment of technology innovation centres, in collaboration with the African Centre of Excellence on Digital Identity, Trade and Economy and subprogramme 4;
 - (v) Harmonizing trade instruments of the Economic Community of Central African States and the Central African Economic and Monetary Community and formulating a consolidated industrial development and economic diversification master plan for Central Africa;
 - (vi) Developing an ECA macro model in Central Africa, complemented by training in its use for national officials in relevant units, in collaboration with the Debt Management Facility of the World Bank and subprogramme 8;
 - (b) Collaborate with the private sector, subregional think tanks and regional economic communities in the above-mentioned areas;

- (c) Train members of ECA and United Nations country teams in the use of the ECA integrated planning and reporting toolkit.

18.113 The above-mentioned work is expected to result in:

- (a) Strengthened regional value chains and industrial clusters, integrated with local economies, and expanded manufacturing and high-value service sectors;
- (b) Increased share of intra-Central African trade in the subregion’s total trade;
- (c) Integration of the relevant economic diversification-related goals and targets of the 2030 Agenda and Agenda 2063 into national development strategies and plans, common country assessments and United Nations sustainable development cooperation frameworks;
- (d) Increased productivity of local firms, including adoption of new technologies;
- (e) Strengthened role of the private sector in economic diversification in Central Africa.

Programme performance in 2023

Validation by Cameroon of its National Plan for the Development of Economic and Environmental Accounting

18.114 The component supported the development of environmental-economic statistics in the subregion by actively raising stakeholders’ awareness and building their capacities in this field, including through its work with the United Nations country team. In Cameroon, the component worked in close collaboration with the National Statistics Office and provided technical assistance for the development of the National Plan for the Development of Economic and Environmental Accounting. The plan was validated following three workshops that brought together officials from the National Statistics Office, policymakers, other key stakeholders and members of the United Nations country team in Cameroon. The plan will soon be adopted at a national level. Countries in Central Africa are richly endowed with natural resources, which play a crucial role in their economic development. It is imperative to integrate these natural assets into their national economic accounts to accurately reflect their economic values and impacts. This is essential for informed decision-making, sustainable growth and effective governance.

18.115 Progress towards the objective is presented in the performance measure below (see table 18.20).

Table 18.20
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
Awareness-raising conducted in Cameroon and other central Africa countries on environmental-economic statistics and environmental accounting	Stakeholders in Central Africa made aware of environmental-economic statistics and environmental accounting	Cameroon validated its National Plan for the Development of Economic and Environmental Accounting, following three workshops attended by several sectoral administrations and key stakeholders, including members of the United Nations country team. This work raised interest among stakeholders and the Resident Coordinator Office and United Nations country team in Cameroon. Heads of United Nations agencies in Cameroon are now mobilized for joint implementation of the National Plan for the Development of Economic and Environmental Accounting

Planned results for 2025

Result 1: sustainable financing mobilized by mainstreaming natural capital in the national accounts

Programme performance in 2023 and target for 2025

- 18.116 The component's work contributed to the application by two countries (Cameroon and Gabon) of natural capital accounting methods in rebasing their national accounts, which did not meet the planned target of six countries. The target was not met because of the unexpected time required to undertake background technical work.
- 18.117 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 18.XVII).

Figure 18.XVII

Performance measure: number of countries applying natural capital accounting methods in rebasing their national accounts (cumulative)

Result 2: bankable projects implemented in support of inclusive and sustainable industrialization and economic diversification

Programme performance in 2023 and target for 2025

- 18.118 The subprogramme's work contributed to the development of three bankable projects on timber products in Cameroon; on batteries and electric vehicles in the Democratic Republic of the Congo and Zambia, and on nitrogen, phosphorous and potassium fertilizer in Republic of Congo, which met the planned target.
- 18.119 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 18.XVIII).

Figure 18.XVIII
Performance measure: number of bankable projects implemented in the Central African subregion (cumulative)

Result 3: members of ECA develop special economic zones for sustainable and inclusive economic diversification

Proposed programme plan for 2025

18.120 The establishment of special economic zones in Central Africa is a strategic initiative aimed at fostering economic growth and diversification, creating jobs and promoting regional integration. The component provides guidance, technical assistance and policy advocacy to support the development of new-generation special economic zones in Central Africa that focus on regional value chains and the fostering of good environmental and social practices.

Lessons learned and planned change.

18.121 The lesson for the component was that partnership with United Nations country teams is highly effective in promoting the industrialization and economic diversification agenda at the highest decision-making levels. In applying the lesson, the component will strengthen its collaboration with United Nations country teams and regional coordinator offices to support members of ECA in adding value to natural resources through the development of new-generation special economic zones. This will be achieved through joint projects on industrial clustering, technical workshops and advocacy of policies conducive to natural resource-based industrialization and economic diversification.

18.122 Expected progress towards the objective is presented in the performance measure below (see table 18.21).

Table 18.21
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Three members of ECA (Cameroon, Congo and Democratic Republic of the Congo) added value to their natural resources through the establishment of new-generation special economic zones	Three members of ECA assess their value chains for the development of new-generation special economic zones and foster the related partnerships	Two members of ECA conclude pre-feasibility studies for the development of new-generation special economic zones

Deliverables

18.123 Table 18.22 lists all deliverables of the component.

D. Communication deliverables				
Outreach programmes, special events and information materials: dissemination of information on economic diversification and change leadership in the subregion.				
Digital platforms and multimedia content: maintenance of at least seven websites, digital platforms and two communities of practice on economic diversification, industrialization and the Sustainable Development Goals.				

Component 4

Subregional activities in East Africa

Objective

- 18.124 The objective, to which this component contributes, is to achieve deeper regional integration in East Africa by advancing the operationalization of the African Continental Free Trade Area, increasing intraregional investments, harnessing the blue economy, and enhancing regional tourism.

Strategy

- 18.125 To contribute to the objective, the component will:
- (a) Provide support to countries and regional economic communities through knowledge production, technical assistance, capacity-building, and policy dialogues, on the development and effective implementation of their national and regional strategies for the implementation of the Agreement Establishing the African Continental Free Trade Area African Continental Free Trade Area, and the negotiation and arrangements concerning outstanding protocols and instruments on the Area;
 - (b) Foster the development of regional value chains in food and agriculture through value chain analyses and the dissemination of information to public and private sector stakeholders about investment opportunities;
 - (c) Build the capacity of the private sector, notably small and medium-sized enterprises, to take part in operationalizing the African Continental Free Trade Area, through information and awareness-raising workshops on the functionalities of the instruments and protocols of the Area and also on innovative sources of financing;
 - (d) Engage in policy dialogue and provide training to promote transboundary investments and cost-effective trade logistics, including the creation and use of digital platforms and commodity exchanges to reduce asymmetries of information;
 - (e) Convene a subregional forum on issues related to the blue economy, including its potential to diversify goods and services and to operationalize the African Continental Free Trade Area, assess the socioeconomic potential of the blue economy and conduct market analyses for small and medium-sized enterprises, while keeping in mind the need to protect natural resources;
 - (f) Support members of ECA in the development of national tourism strategies, in line with the recommendations set out in the African tourism strategy, and provide training on the production of high-quality tourism statistics in the subregion.
- 18.126 The above-mentioned work will help members of ECA to make progress towards the achievement of Sustainable Development Goals 5, 7, 8, 11, 12, 13, 14 and 17.
- 18.127 The above-mentioned work is expected to result in:
- (a) National development planning frameworks incorporating and amplifying blue economy policies and strategies;
 - (b) Standardized methodologies for tourism data collection and analysis in the subregion;
 - (c) Increased market diversification and economic resilience to external shocks, related in particular to the blue economy, the tourism sector and food-related value chains;
 - (d) Deeper regional integration and improved connectivity of landlocked countries;
 - (e) Higher levels of intraregional trade in goods and services;
 - (f) Harmonization of investment regimes and investment promotion strategies, and improved regulatory frameworks governing investment.

Programme performance in 2023

Opportunities unlocked by the Comoros for increased trade and export diversification through the ratification of the Agreement Establishing the African Continental Free Trade Area

- 18.128 Like many other African countries, the Comoros has huge untapped investment and export potential which can be leveraged through implementation of the Agreement Establishing the African Continental Free Trade Area. The full benefits of the African Continental Free Trade Area can only be realized, however, if it is ratified and implemented by all the countries of Africa. While nine States in East Africa ratified the agreement between 2018 and 2022, the Comoros required extra time to satisfy key stakeholders of the benefits to the country of the Area. In collaboration with the United Nations Development Programme, the component organized national consultations and awareness-raising workshops to discuss the benefits of the Area. The workshops held in the capital were attended by senior political leaders, including the President, the Speaker of Parliament, governors, cabinet ministers, members of parliament and representatives of the private sector. In addition, the component supported the Comoros in the formulation of the country's African Continental Free Trade Area strategy.
- 18.129 These interventions provided the required clarity and support, and the Comoros ratified the Agreement Establishing the African Continental Free Trade Area in February 2023. Following that ratification, the component also conducted an awareness-raising workshop and training on the protocols to the Agreement and policy tools such as the digital payment system, the African Trade Observatory and the non-tariff barriers reporting mechanism, which enhanced the capacity of the Comorian national technical committee on the African Continental Free Trade Area to coordinate implementation of the national strategy for the Area.
- 18.130 Progress towards the objective is presented in the performance measure below (see figure 18.XIX).

Figure 18.XIX

Performance measure: number of countries in East Africa ratifying the Agreement Establishing the African Continental Free Trade Area (cumulative)

Planned results for 2025

Result 1: designing and implementing policy frameworks on trade, the blue economy and tourism

Programme performance in 2023 and target for 2025

- 18.131 The component's work contributed to the design and implementation by three additional members of ECA (Burundi, Namibia, and Uganda) of policy and strategy frameworks in trade and tourism, which exceeded the planned target of two additional members of ECA implementing the frameworks.
- 18.132 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 18.23).

Table 18.23
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Two members of ECA with enhanced capacity to design policy frameworks in the areas of trade, the blue economy, and tourism	Enhanced capacity of one member of ECA (United Republic of Tanzania) to design a policy framework in trade and the blue economy Two members of ECA (Kenya and Rwanda) implemented policy and strategy frameworks in trade and tourism	Three additional members of ECA (Burundi, Namibia, and Uganda) implemented policy and strategy frameworks in trade, the blue economy, and tourism	One additional member of ECA implements policy and strategy frameworks in tourism	One additional member of ECA implements policy and strategy frameworks in tourism

Result 2: members of ECA shift from formulation to implementation of their African Continental Free Trade Area national strategies**Programme performance in 2023 and target for 2025**

- 18.133 The component's work contributed to the implementation by two additional members of ECA (Uganda and United Republic of Tanzania) of their national strategies on the Agreement Establishing the African Continental Free Trade Area, which exceeded the planned target of one additional country.
- 18.134 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 18.24).

Table 18.24
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Four out of fourteen countries (Burundi, Democratic Republic of the Congo, Kenya and Rwanda) and one regional economic community (East African Community) formulated African Continental Free Trade Area strategies	An additional three countries (Comoros, Somalia and South Sudan) and one regional economic community (Intergovernmental Authority on Development) formulated strategies for the implementation of the Agreement Establishing the African Continental Free Trade Area	Two additional countries (Uganda and United Republic of Tanzania) implemented their national strategies on the Agreement Establishing the African Continental Free Trade Area	One additional country implements its national strategy on the Agreement Establishing the African Continental Free Trade Area	One additional country implements its national strategy on the Agreement Establishing the African Continental Free Trade Area

Part V Regional cooperation for development

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
	Two out of fourteen countries (Kenya and Rwanda) started implementation of their national strategies on the Agreement Establishing the African Continental Free Trade Area			

Result 3: members of ECA and regional organizations develop investment promotion strategies

Proposed programme plan for 2025

18.135 To meet the demand for goods and services arising from operationalization of the African Continental Free Trade Area, East African countries need to increase their productive capacities and logistics facilities by scaling up investments. The component provides members of ECA with technical assistance and policy advice to develop national investment strategies focused on critical sectors, with a view to promoting trade and investment and enhancing competitiveness.

Lessons learned and planned change

18.136 The lesson for the component was that engagement with countries through policy dialogue backed by sound knowledge products can be effective in catalysing action to promote investments. In applying the lesson, the component will engage with national stakeholders using such means to develop strategies to foster investment in critical sectors, focused on creating an enabling environment through clear and transparent regulatory frameworks and investment incentives.

18.137 Expected progress towards the objective is presented in the performance measure below (see table 18.25).

Table 18.25
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
National development plan to guide investments developed by Djibouti	Northern Corridor Transit and Transport Coordination Authority developed	Tourism investment guide developed by Burundi	One regional economic community develops a strategic plan to promote investment	One member of ECA develops a national strategy for investment promotion
Economic diplomacy strategy to promote trade and investments developed by Rwanda	a strategic plan to guide investment			

Deliverables

18.138 Table 18.26 lists all deliverables of the component.

Component 5 Subregional activities in Southern Africa

Objective

- 18.139 The objective, to which this component contributes, is to deepen regional integration and strengthen capacities to achieve inclusive industrialization for the reduction of poverty and inequality in Southern Africa.

Strategy

- 18.140 To contribute to the objective, the component will:
- (a) Undertake policy research and analysis on inclusive and sustainable industrialization, regional integration and trade, private sector development, and poverty and inequality, provide technical assistance to members of ECA, regional economic communities and intergovernmental organizations and disseminate best practices at the subregional and national levels in Southern Africa;
 - (b) Develop and disseminate policy tools and guidelines for the promotion of inclusive and sustainable industrialization, including value addition, manufacturing and value chain development, at the national and subregional levels in Southern Africa;
 - (c) Support members of ECA in the implementation of Vision 2050 of the Southern African Development Community (SADC) and its regional indicative strategic development plan for 2020–2030, thereby contributing to the achievement of Sustainable Development Goals 1, 8, 9 and 10 and related goals of Agenda 2063;
 - (d) Collaborate with partners, including the African Union Southern Africa Regional Office, SADC, the Common Market for Eastern and Southern Africa (COMESA), the African Development Bank, the African Export-Import Bank, private sector associations and research institutions:
 - (i) To strengthen the capacities of members of ECA to advance inclusive and sustainable industrialization and regional integration through implementation of the SADC industrialization strategy and road map (2015–2063), the SADC Regional Energy Access Strategy and Action Plan (2020–2030), the COMESA industrial policy (2015–2030), the

African Continental Free Trade Area and the free trade areas of the regional economic communities;

- (ii) To provide technical support for the development of strategies and guidelines for the integration of considerations related to climate change into industrialization and trade policies in Southern Africa;
- (e) Build the capacities of members of ECA and the private sector:
 - (i) To address the challenges and opportunities of the green economy in the context of sustainable development and poverty eradication, and to increase productive capacities, in particular, given the situation of energy resource deficiency in the region and the impact of climate change on key sectors;
 - (ii) To address the impact of external shocks, by rolling out initiatives aimed at supporting their recovery and strengthening their resilience to future shocks;
 - (iii) To leverage digitalization, science, technology and innovation to facilitate growth, business development and enhanced productivity and competitiveness.

18.141 The above-mentioned work is expected to result in:

- (a) Enhanced implementation of the SADC Vision 2050 and indicative strategic plan, the SADC Industrialization Strategy and Roadmap and the COMESA industrial policy;
- (b) Economic diversification and transformation through value addition and the development of sustainable regional value chains, accelerated by transboundary industrial clusters, hubs and special economic zones in selected members of ECA;
- (c) Harmonization of national industrial policies with regional industrial frameworks and integration of considerations related to the environment and sustainability;
- (d) Accelerated implementation of the Agreement Establishing the African Continental Free Trade Area and the free trade agreements of the regional economic communities, increased intraregional trade in goods and services and enhanced regional integration in Southern Africa;
- (e) Increased resilience and competitiveness of the private sector and micro, small and medium-sized enterprises and enhanced participation in industry and trade in Southern Africa;
- (f) Evidence-based policy responses related to poverty, inequality and vulnerability situations in Southern Africa through informed analyses of trends and causal factors.

Programme performance in 2023

Inclusive industrialization in Southern Africa achieved through local content policy frameworks

18.142 Local content policies proved to be key to enhancing industrialization as they resulted in the increased use of local inputs and products in the production and provision of goods and services within domestic economies. Furthermore, they fostered business linkages in growth sectors and ensured the integration and participation of local enterprises, including micro, small and medium-sized enterprises, in industrialization and other economic activities. The component provided technical support to the Government of Zimbabwe in the development and adoption of its local content thresholds for the pharmaceuticals, fertilizers and packaging subsectors, as one of the key strategies for promoting industrialization and industrial growth and development in line with the country's national industrial development policy. Application of the local content thresholds enhanced the capacity of local private sector players, including micro, small and medium-sized enterprises, to tap into inherent economic potential across sectors to boost investment, beneficiation, value addition and the development of value chains. The thresholds progressively increased the share of locally sourced labour, goods, services and capital in the value chains of the three sectors.

18.143 Progress towards the objective is presented in the performance measure below (see table 18.27).

Table 18.27
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	National stakeholder consultative process on developing local content thresholds for the pharmaceutical, fertilizers and packaging subsectors of Zimbabwe	Local content thresholds in pharmaceuticals, fertilizers and packaging subsectors developed, adopted and launched by the Government of Zimbabwe

Planned results for 2025

Result 1: accelerating intraregional trade through the African Continental Free Trade Area in Southern Africa

Programme performance in 2023 and target for 2025

- 18.144 The component’s work contributed to the development by one additional country (Eswatini) of a national African Continental Free Trade Area strategy, which did not meet the cumulative planned target of eight countries. The target was not met owing to the need for more consultations with national stakeholders. The component’s work also contributed to the initiation by two additional countries (Mauritius and Namibia) of the implementation of their national African Continental Free Trade Area strategies, which exceeded the cumulative planned target of two countries.
- 18.145 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 18.XX).

Figure 18.XX

Performance measure: number of countries in Southern Africa developing and starting implementation of national strategies on the Agreement Establishing the African Continental Free Trade Area (cumulative)

Result 2: Southern African members of ECA revise and implement their national industrial policy frameworks in line with regional industrialization strategies

Programme performance in 2023 and target for 2025

- 18.146 The component’s work contributed to the revision by one additional country (Zimbabwe) of its national industrial policy, which met the planned target.
- 18.147 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 18.XXI).

Figure 18.XXI
Performance measure: number of Southern Africa members of ECA revising and implementing their national industrial policy frameworks in line with regional industrialization strategies (cumulative)

Result 3: accelerating the transition towards more sustainable economies in Southern Africa

Proposed programme plan for 2025

18.148 The component will support Southern African members of ECA in adapting to climate change and responding to its impacts on production, consumption and trade in goods and services.

Lessons learned and planned change

18.149 The lesson for the component was that sound analytical products, the adoption of multiple approaches to the technical delivery of programmes and continuous partnerships at all levels are critical to promoting the integration of considerations related to the environment and sustainability into national and regional trade and industrialization initiatives. In applying the lesson, the component will provide member States with analyses and technical assistance on identified areas of new priority development, such as sustainable industrialization and trade, resilient infrastructure, and renewable sources of energy to inform the formulation of policies for a transition to more sustainable economies.

18.150 Expected progress towards the objective is presented in the performance measure below (see figure 18.XXII).

Figure 18.XXII
Performance measure: number of policy interventions developed by countries and regional economic communities in Southern Africa to support the transition towards more sustainable economies (cumulative)

Deliverables

18.151 Table 18.28 lists all deliverables of the component.

Table 18.28

Subprogramme 7, component 5: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	4	4	4	4
1. Annual report on the work of ECA in Southern Africa	1	1	1	1
2. Report to the Intergovernmental Committee of Senior Officials and Experts for Southern Africa	1	1	1	1
3. Report on recent economic and social conditions in Southern Africa	1	1	1	1
4. Progress report on regional and international agendas and other special initiatives in Southern Africa	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	8	8	8	8
5. Annual session of the Intergovernmental Committee of Senior Officials and Experts for Southern Africa	8	8	8	8
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	2	2	2
6. On industrialization and regional integration in Southern Africa	1	1	1	–
7. On the green economy in the context of sustainable development and poverty reduction in Southern Africa	–	–	–	1
8. Fellowship programme for young African economists on inclusive industrialization and regional integration	1	1	1	1
Seminars, workshops, and training events (number of days)	6	6	6	6
9. Training event on regional integration in Southern Africa	2	2	2	–
10. Workshop on economic and social development in Southern Africa	2	2	2	2
11. Training event on inclusive and sustainable industrialization	2	2	2	2
12. Seminar on energy transition in Southern Africa	–	–	–	2
Publications (number of publications)	2	3	3	3
13. On regional integration in Southern Africa	1	1	1	1
14. On inclusive and sustainable industrialization in Southern Africa	1	1	1	1
15. On poverty and inequality in Southern Africa	–	1	1	–
16. On the green economy in the context of sustainable development and poverty reduction in Southern Africa	–	–	–	1
Technical materials (number of materials)	2	2	2	2
17. On industrialization and economic transformation in Southern Africa	1	1	1	1
18. On economic and social development	1	1	1	1
C. Substantive deliverables				
Consultation, advice, and advocacy: advisory services, upon request by members of ECA and regional economic communities, on inclusive industrialization, development of regional value chains and special economic zones, development of the private sector and micro, small and medium-sized enterprises and implementation of the African Continental Free Trade Area Agreement.				
Databases and substantive digital materials: database of economic and social statistics on the 11 members of ECA in Southern Africa.				
D. Communication deliverables				
Outreach programmes, special events, and information material: production and distribution of publications.				
Digital platforms and multimedia content: subprogramme’s website; content for social media accounts and communities of practice.				

Subprogramme 8 Economic development and planning

Objective

- 18.152 The objective, to which this subprogramme contributes, is to strengthen the development planning of African countries and to improve their capacity to formulate and manage effective public sector policies for structural transformation and sustainable development.

Strategy

- 18.153 To contribute to the objective, the subprogramme will:
- (a) Deliver training on sectoral, national and regional development and medium to long term planning to address the socioeconomic impact of emerging crises, based on updated content on risk-informed economic and social policy formulation and management;
 - (b) Promote peer learning and collaboration among African development planners through communities of practice and broaden access to the digitized knowledge repository of the African Institute for Economic Development and Planning;
 - (c) Enhance countries' capacity to monitor and evaluate the implementation of the 2030 Agenda and Agenda 2063, and of national development agendas;
 - (d) Foster knowledge generation, cross-fertilization and knowledge-sharing through research products, fellowship programmes, development seminars and high-level policy dialogues, and also through research networks spanning multiple African countries and bringing together universities, think tanks, United Nations country teams and regional stakeholders;
 - (e) Support the integration of a gender perspective and youth-related issues in all relevant public policies through capacity-building programmes that also consider issues such as social inclusion, entrepreneurship, employment, green economy in the context of sustainable development and poverty eradication, innovation and digital transformation.
- 18.154 The above-mentioned work is expected to result in:
- (a) Increased engagement of development planners and policymakers in policy management and development planning processes which take into account global developments and emerging risks, in support of structural transformation and the increased resilience of national economies to ensure sustainable development;
 - (b) More effective formulation, management and influencing of public policies by officials and other stakeholders;
 - (c) More inclusive approaches to the formulation of development policies by members of ECA, including through the formulation of macroeconomic and social protection policies.

Programme performance in 2023

Digital transformation of technical and vocational education and training

- 18.155 Technical and vocational education and training is a central pillar of sustainable and viable economic development. It contributes to the achievement of all 17 Sustainable Development Goals and thus promotes a lifestyle that is economically, socially and environmentally sustainable. The subprogramme, in collaboration with the United Nations Educational, Scientific and Cultural Organization and other agencies, and under the Pan-African Initiative for the Digital Transformation of Technical and Vocational Education and Training and Skills Development Systems in Africa, provided training to 243 participants, including practitioners and leaders in the field of technical and vocational education and training. The training enhanced beneficiaries' understanding of the digitalization of national systems for technical and vocational education and training and for skills

development and has equipped them with the knowledge to design policies and develop strategies for the integration of information and communications technology-based teaching and learning into technical and vocational education and training. As of the current time, a total of eight policies and strategies are being developed and implemented in Benin, Egypt, the Gambia, Liberia, Mali, the Niger, Nigeria, Senegal and Togo. Three have been completed.

18.156 Progress towards the objective is presented in the performance measure below (see table 18.29).

Table 18.29
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	Development of technical and vocational education and training digitalization strategies with dedicated national committees in the Gambia, Liberia, Mali and Senegal	Three technical and vocational education and training digitalization strategies and an implementation guide were prepared in the Gambia, Liberia and Mali Four members of ECA launched national technical and vocational education and training digitalization strategies (Benin, Egypt, Niger and Togo)

Planned results for 2025

Result 1: mainstreaming risk management into policy planning and development

Programme performance in 2023 and target for 2025

18.157 The subprogramme’s work contributed to the development of two new policies by members of ECA, a risk policy on housing and a cropland flood protection programme in the Niger and integrated risk management in the strategic plan and the quality management system in Lesotho, which met the planned target of five policies.

18.158 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 18.XXIII).

Figure 18.XXIII
Performance measure: number of policies developed by members of ECA that include integrated risk management (cumulative)

Result 2: members of ECA integrate social protection into development planning and economic analysis

Programme performance in 2023 and target for 2025

- 18.159 The subprogramme’s work contributed to progress towards the 2024 planned target, through the conduct of needs assessments to accelerate the integration of social protection into development planning and enhancement of the knowledge and practical skills of 287 officials in social policy.
- 18.160 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 18.XXIV).

Figure 18.XXIV

Performance measure: number of members of ECA whose development policies integrate social protection (annual)

Result 3: members of ECA develop a future-ready workforce

Proposed programme plan for 2025

- 18.161 Through its training programmes the subprogramme has reinforced the capacity of officials to build more inclusive and resilient economies, highlighting the need to shift from ad hoc responses when crises occur to a more proactive, systematic and integrated risk management in development planning processes. In the complex landscape of African development, the adoption of a future-ready approach to development planning is crucial: in other words, a strategic approach to ensure that planned interventions are well suited to future changes.

Lessons learned and planned change

- 18.162 The lesson for the subprogramme was that adopting a future-ready approach to development planning, alongside increased capacity support, can help to empower African countries to proactively address the dynamic evolution of their respective workforces. In applying this lesson, the subprogramme will foster a systematic and forward-thinking approach to the workforce landscape that enables decision makers to anticipate and prepare for change. It will support members of ECA in identifying the critical sectors and skills needed for a future-ready workforce, to enable them to develop comprehensive reskilling and upskilling programmes that cater to diverse sectors and ensure decent work for all.
- 18.163 Expected progress towards the objective is presented in the performance measure below (see figure 18.XXV).

Figure 18.XXV

Performance measure: number of ECA members having established reskilling and upskilling programmes (cumulative)

Deliverables

18.164 Table 18.30 lists all deliverables of the subprogramme.

Table 18.30

Subprogramme 8: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	1
1. Report to the Conference of African Ministers of Finance, Planning and Economic Development and the Committee of Experts of the Economic Commission for Africa	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	4	1	4	3
2. Statutory meetings of the Governing Council of the African Institute for Economic Development and Planning	2	1	2	2
3. Meetings of the Technical Advisory Committee of the Governing Council of the African Institute for Economic Development and Planning	2	–	2	1
Conference and secretariat services for meetings (number of three-hour meetings)	4	1	4	3
4. Meetings of the Governing Council of the African Institute for Economic Development and Planning	2	1	2	2
5. Meetings of the Technical Advisory Committee of the Governing Council of the African Institute for Economic Development and Planning	2	–	2	1
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	53	70	53	42
6. Projects to design and deliver a portfolio of training programmes (in English and French) on development planning and economic management, for senior and executive-level public officials from African countries	50	69	50	40
7. Projects to design and deliver master's degree programmes on industrial policy, development planning and natural resources governance for senior and executive-level public officials from African countries	1	–	1	1
8. Visiting research fellowships for policy researchers and African policy officials on development planning and economic management	2	1	2	1
Seminars, workshops and training events (number of days)	12	8	12	10
9. Seminars on development planning and economic management for African senior policymakers	12	8	12	10

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
Publications (number of publications)	4	–	4	2
10. On economic management and development planning	4	–	4	2
Technical materials (number of materials)	12	20	20	20
11. On economic management and development planning	12	20	20	20

C. Substantive deliverables

Consultation, advice and advocacy: advisory services to five members of ECA and three regional economic communities on economic management, development planning and capacity-building.

Databases and substantive digital materials: two communities of practice for African development planners.

D. Communication deliverables

Outreach programmes, special events and information materials: information kit for the African Institute for Economic Development and Planning high-level policy dialogues involving policymakers, the private sector and subject-matter experts on issues pertaining to African economic development and planning.

External outreach and media relations: strategic plan, training brochures, booklets, leaflets, kakemonos, banners and assorted accessories.

Library services: books, journals and other library materials on economic management and development planning in French and English.

Subprogramme 9 Poverty, inequality and social policy

Objective

- 18.165 The objective, to which this subprogramme contributes, is to eradicate extreme poverty and reduce inequality through ensuring that members of ECA have improved policies and strategies for social investment and productive urban job creation.

Strategy

- 18.166 To contribute to the objective, the subprogramme will:
- (a) Develop analytical knowledge, provide technical assistance, and promote regional dialogue and learning for members of ECA on designing national policies and strategies for the eradication of extreme poverty and provision of social protection to the most vulnerable;
 - (b) Generate knowledge, provide technical assistance to members of ECA and organize regional dialogue and learning on strategies to leverage migration for inclusive development in Africa;
 - (c) Develop analytical knowledge and provide technical assistance to members of ECA in the regional implementation and appraisal of global agreements, including the Global Compact for Safe, Orderly and Regular Migration, the Madrid International Plan of Action on Ageing, 2002, the Programme of Action of the International Conference on Population and Development, the Addis Ababa Declaration on Population and Development in Africa beyond 2014 and the New Urban Agenda;
 - (d) Enhance knowledge and skills of members of ECA through technical assistance and facilitating regional policy learning and dialogue to promote sustainable urbanization that enhances job creation, revenues and urban social protection.
- 18.167 The above-mentioned work is expected to result in:
- (a) Enhanced, evidence-based policy options for the provision of social protection for the economically vulnerable population;

- (b) Strengthened responses by members of ECA to address migration and population and development challenges and opportunities;
- (c) Increased prioritization of productive urban job creation in national development planning towards eradicating extreme poverty and reducing inequality;
- (d) Improved economic and financial recovery and resilience in African countries.

Programme performance in 2023

Namibia monitors the state of poverty, inequality and vulnerability to inform policies for social inclusion

- 18.168 For members of ECA to develop appropriate policies to effectively reduce poverty and inequality, up-to-date data are required. The most recent household income and expenditure survey was undertaken by Namibia in 2015. To assess poverty, inequality and vulnerability in the absence of recent household data in Namibia, the subprogramme conducted a study using the imputed elasticity methodology to generate fresh estimates in 2023. Findings of the study are informing the development of the forthcoming sixth national development plan of Namibia, which tackles poverty, inequality and unemployment. In addition, in response to requests from Ghana, Namibia, Uganda and the United Republic of Tanzania for capacity-building on the methodology for assessing and generating estimates on poverty, vulnerability and inequality in the absence of recent household data, the subprogramme conducted training on elasticity methodology and related tools for 14 policymakers from Namibia and 55 policymakers from the other three countries.
- 18.169 Progress towards the objective is presented in the performance measure below (see table 18.3 1).

Table 18.31

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	Namibia undertook to use elasticity methodology to conduct an assessment of and generate estimates on poverty, inequality and vulnerability in the absence of recent household data	Policymakers from Namibia utilized tools and methodology to assess and generate estimates on poverty, inequality and vulnerability following participation in capacity-building training Estimates on poverty, inequality and vulnerability generated to inform the development of the forthcoming sixth national development plan in Namibia

Planned results for 2025

Result 1: leveraging continental initiatives for promoting youth policies

Programme performance in 2023 and target for 2025

- 18.170 The subprogramme's work contributed to the design by two countries (Uganda and Zambia) of youth policies that leverage continental initiatives, which did not meet the planned target of four countries. The target was not met owing to operational constraints which impeded the provision of advisory services.

18.171 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 18.XXVI).

Figure 18.XXVI

Performance measure: number of countries engaged in designing youth policies that leverage continental initiatives (cumulative)

Result 2: local governments design resource mobilization policies for improved financial sustainability

Programme performance in 2023 and target for 2025

18.172 The subprogramme’s work contributed to the use by three additional cities (Lusaka, Maseru and Yaoundé) of the gross domestic product assessment framework with methodologies, tools, dimensions and indicators to measure the size of gross domestic product and fiscal performance of cities for a cumulative total of five cities, which met the planned target.

18.173 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 18.XXVII).

Figure 18.XXVII

Performance measure: number of cities that have assessed their fiscal performance as the evidence base for designing improved fiscal policies and planning (cumulative)

Result 3: improved social protection systems for the most vulnerable

Proposed programme plan for 2025

18.174 Social protection systems have the potential to significantly reduce inequality and improve social development. As levels of individual economic vulnerability are rising because of the impacts of global crises and shocks, social protection is playing an increasingly important role in ensuring the resilience

of the most vulnerable. In 2023, the subprogramme developed a framework for countries to measure the performance of social protection systems and identify those most in need of assistance.

Lessons learned and planned change

18.175 The lesson for the subprogramme was that development of social protection policy and strategy requires sustained interaction with core stakeholders at local and national levels in identifying, understanding and responding to poverty and vulnerability. In applying the lesson, the subprogramme will provide technical assistance to members of ECA through a chain of interventions, ranging from generating evidence on the existing state of social protection to the design of actual interventions for improved social protection systems. As groundwork, the subprogramme will support local and national authorities in assessing their social protection programmes and policies, to determine the priority areas and target groups for interventions.

18.176 Expected progress towards the objective is presented in the performance measure below (see figure 18.XXVIII).

Figure 18.XXVIII

Performance measure: number of members of ECA that have assessed their social protection systems (cumulative)

Deliverables

18.177 Table 18.32 lists all deliverables of the subprogramme.

Table 18.32

21. On migration	–	–	1	1
22. On social protection	–	–	–	1

C. Substantive deliverables

Consultation, advice, and advocacy: advice to national policymakers in seven selected members of ECA; advice for improved capacities in policy formulation, implementation and monitoring; policy dialogues for enhanced policy learning and exchange at the national and regional levels.

D. Communication deliverables

Outreach programmes, special events and information materials: brochures pertaining to the subprogramme's workshops and training programmes in social policy, and urbanization and development in two languages.

External and media relations: press and media releases on the role of cities and social policy in the development of Africa made available to at least 250 experts.

Digital platforms and multimedia content: digital platform and visual materials on voluntary local reviews, poverty and vulnerability and youth employment, among other issues.

Annex

Programme performance in 2023¹

Subprogramme 3

Private sector development and finance

De-risking and crowding in private investment in the electricity markets of Africa

- A.1 Regulation is crucial to the de-risking of energy investments. To this end, ECA identified the need to address three categories of regulatory barriers to investments in the energy sector (openness, attractiveness and readiness for private sector investment). The subprogramme carried out assessments of the regulatory environment of the electricity markets in 16 African countries, using the rigorous regulatory and de-risking methodology that it had developed. A high-level public-private policy dialogue was conducted in 2023 with members of ECA, leading to the further prioritization of regulatory reform on the continent. Furthermore, in collaboration with partners, the subprogramme developed special software to enhance the analytical and planning capacity of 20 national electricity regulatory authorities. Collaboration with the African Union Commission led to the development of a continental regulatory framework for the de-risking and crowding in of private investment in the electricity markets of Africa, based on the assessments of the regulatory environment in the 16 countries.
- A.2 Progress towards the objective is presented in the performance measure below (see table A.1).

Table A.1

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
Assessments concluded in 16 African countries on, first, their openness to the crowding in of scaled investment; second, the attractiveness of their national regulatory systems; and third, the readiness of their electricity markets	Regulatory analysis and planning software developed Continental regulatory framework to de-risk and crowd in private investment in the electricity markets of Africa developed and the Renewable Energy Solutions for Africa Foundation established	Continental framework adopted by the African ministers of transport and energy by way of the adoption of the Declaration of the Fourth Specialized Technical Committee on Transport, Transcontinental and Interregional Infrastructure, and Energy

Result 1: enhanced policies to improve the business environment

- A.3 The subprogramme's work contributed to the provision of support to two members of ECA in creating the continent's first common agro-park and developing its maize and dairy value chains, with a view to promoting economic diversification and industrialization, which did not meet the planned target of two members of ECA implementing policies in line with the outcomes of the meeting of the African Union Specialized Technical Committee on Agriculture, Rural Development, Water and Environment held in preparation for the United Nations Food Systems Summit. The target was not met owing to challenges in arranging joint validation by the participating countries.
- A.4 Progress towards the objective is presented in the performance measure below (see table A.2).

¹ As outlined in paragraph 18.5 above, the present annex reflects a realignment of the programme structure for 2025.

Table A.2
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)
African common position for the United Nations Food Systems Summit adopted by the African Union Commission	Twelve members of ECA (Cameroon, Democratic Republic of the Congo, Ghana, Guinea, Kenya, Malawi, Morocco, Namibia, Senegal, South Africa, Uganda and United Republic of Tanzania) designed policies or programmes to support land reforms	Two members of ECA developed reports to implement policies in line with the outcomes of the meeting of the African Union Specialized Technical Committee on Agriculture, Rural Development, Water and Environment held in preparation for the United Nations Food Systems Summit	Two additional members of ECA implement policies in line with the outcomes of the meeting of the African Union Specialized Technical Committee on Agriculture, Rural Development, Water and Environment held in preparation for the United Nations Food Systems Summit
Decision by the African Union Specialized Technical Committee on Agriculture, Rural Development, Water and Environment endorsing the position paper and outcome of the Summit	One member of ECA (Uganda) designed a programme to enhance policy reforms in food systems and agriculture value chains following technical assistance and consultations		
Regional dialogue organized on African food systems	One member of ECA (Uganda) designed a programme to enhance private sector investments in land and agriculture		
Global policy paper on the Food Systems Summit			

Result 2: increased commitment by members of ECA to liberalize air transport markets

A.5 The subprogramme’s work contributed to efforts by six countries (Cabo Verde, Cameroon, Ethiopia, Namibia, Rwanda and Senegal) to align their bilateral air transport agreement with the Yamoussoukro Decision on air transport liberalization, airport security and air safety in the regions of the Economic Community of West African States, which exceeded the planned target of three countries.

A.6 Progress towards the objective is presented in the performance measure below (see figure A.I).

Figure A.I
Number of countries aligning their bilateral air transport agreements with the Yamoussoukro Decision (cumulative)

Deliverables

A.7 Table A.3 lists all deliverables of the subprogramme.

Table A.3

Deliverables for the period 2023–2024, by category and subcategory

Subprogramme 5: technology, climate change and natural resources management

Programme performance in 2023

Digital identity systems transforming public services: automation of verification and payment of pensions using digital identity

A.8 In Kaduna State, Nigeria, the subprogramme has been working in close collaboration with the Kaduna State Government, through the Pension Bureau and the Residents Identity Management Agency, to implement a digital identity use case to simplify and digitalize the process of verification of pensioners. ECA developed an application for the Pension Bureau to replace the physical verification exercise that the state's pensioners – who number 14,894 – had to complete every 90 days. The application is currently undergoing beta testing. The new application will replace the

mandatory physical test, and can now be performed remotely on a mobile device using the national identity number and biometrics. Fingerprints are captured with the camera on the mobile device and then matched to the biometrics available at the state’s digital identity system, with the use of an application programming interface.

A.9 Progress towards the objective is presented in the performance measure below (see table A.4).

Table A.4
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	<p>Assessment and selection of feasible digital identity use cases to improve the public service</p> <p>The Ethiopian national identity agency generated 1.5 million digital identities with the support of ECA in the small-scale implementation of the Fayda platform</p>	<p>Fourteen use cases identified in seven government entities, and the Kaduna State Pension Bureau use case developed and operationalized</p>

Result 1: adoption of good digital identification framework principles for a sustainable and inclusive digital transformation

A.10 The subprogramme’s work contributed to the formulation by four additional members of ECA of policies to adopt new and emerging digital technologies, including good digital identification principles, for a cumulative total of eight members of ECA, which exceeded the planned target of six.

A.11 Progress towards the objective is presented in the performance measure below (see figure A.II).

Figure A.II
Performance measure: number of members of ECA formulating policies to adopt new and emerging digital technologies (cumulative)

Result 2: members of ECA develop inclusive, climate-resilient and sustainable economies

A.12 The subprogramme’s work contributed to the integration by one country (Niger) of climate resilience and the African Union Biodiversity Strategy and Action Plan into its national development policies and plans, which did not meet the planned target of two countries. The target was not met owing to logistical challenges which hindered implementation in the second country.

A.13 Progress towards the objective is presented in the performance measure below (see table A.5).

Table A.5
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)
Five countries revised their nationally determined contributions (Burkina Faso, Eswatini, Liberia, Namibia and Zimbabwe)	Three countries (Eswatini, Morocco and Zimbabwe) engaged with the private sector in the implementation of nationally determined contributions	One country (Niger) integrated climate resilience in its national development policies and plans	Four additional countries implement revised nationally determined contributions and promulgate low emissions development policies
Five national studies on private sector-led sustainable growth and job creation in Cameroon, Côte d'Ivoire, Kenya, South Africa and Zambia			

Deliverables

B. Proposed post and non-post resource requirements for 2025

Overview

18.178 As reflected in paragraph 18.5 above, changes have been proposed to the programmatic structure of ECA in three subprogrammes, in line with resolutions 2024/2 and 2024/3 of the Conference of African Ministers of Finance, Planning and Economic Development. It was proposed in those resolutions that the current subprogramme 3, Private sector development and finance, and subprogramme 5, Technology, climate and natural resources management, no longer be stand-alone subprogrammes, but that components from there be realigned with subprogramme 1, Macroeconomic policy, finance and governance, and that a new subprogramme 3, Technology, innovation, connectivity and infrastructure development, and a new subprogramme 5, Climate, food security and natural resources, green and blue economy, be established.

18.179 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 18.33 to 18.38.

^a Includes two temporary posts (1 P-3 and 1 National Professional Officer).

18.180 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 18.36 and 18.37 and figure 18.XXIX.

18.181 As shown in tables 18.36 (1) and 18.37 (1), the overall resources proposed for 2025 amount to \$93,572,400 before recosting, reflecting a decrease of \$1,127,600 (or 1.2 per cent) compared with the approved budget for 2024. Resource changes result from technical adjustments and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Note: The following abbreviations are used in tables and figures: GS (OL), General Service (Other level); LL, Local level; NPO, National Professional Officer; USG, Under-Secretary-General.

Figure 18.XXIX
Distribution of proposed resources for 2025 (before recosting)

(Number of posts/thousands of United States dollars)

Technical adjustments

18.182 As shown in table 18.36 (1), resource changes reflect a decrease of \$1,127,600, as follows:

- (a) **Programme support.** The decrease of \$1,127,600 under grants and contributions reflects the removal of non-recurrent requirements approved by the General Assembly for 2024 in its resolution [78/253](#) relating to the Africa Hall project. Resource requirements relating to the Africa Hall project will be presented to the Assembly later in 2024, during the main part of its seventy-ninth session.

Other changes

18.183 As shown in table 18.36 (1), the proposed cost-neutral resource changes reflect the redeployment of post and non-post resources from the two subprogrammes to be discontinued. The proposed resource changes are reflected under the following subprogrammes:

2024 programmatic structure (discontinued, realigned with other subprogrammes)

- (a) **Subprogramme 3, Private sector development and finance.** The decrease of \$3,357,600 reflects the outward redeployment of resources to subprogramme 1, Macroeconomic policy and governance, the new subprogramme 3, Technology, innovation, connectivity and infrastructure development, and the new subprogramme 5, Climate, food security and natural resources, green and blue economy, as follows:
- (i) A total of 18 posts (\$2,995,400), as detailed in annex II to the present report;
 - (ii) Non-post resources, including other staff costs (\$13,300), consultants (\$89,300), experts (\$152,500), travel of staff (\$36,700), contractual services (\$52,800) and general operating expenses (\$17,600);
- (b) **Subprogramme 5, Technology, climate and natural resources management.** The decrease of \$3,834,800 reflects the proposed outward redeployment of resources to the new subprogramme 3, Technology, innovation, connectivity and infrastructure development, and the new subprogramme 5, Climate, food security and natural resources, green and blue economy, as follows:
- (i) A total of 20 posts (\$3,098,000), as detailed in annex II;
 - (ii) Non-post resources, including other staff costs (\$149,500), consultants (\$106,000), experts (\$341,700), travel of staff (\$44,100), contractual services (\$58,800) and general operating expenses (\$36,700);

2025 programmatic structure

- (c) **Subprogramme 1, Macroeconomic policy, finance and governance.** The increase of \$770,100 reflects the proposed inward redeployment of resources from subprogramme 3, Private sector development and finance, as follows:
- (i) A total of 3 posts (1 P-5, 1 P-4 and 1 P-3) (\$650,600), as detailed in annex II;
 - (ii) Non-post resources, including other staff costs (\$12,900), consultants (\$71,800), travel of staff (\$9,500), contractual services (\$75,200) and general operating expenses (\$5,900), offset by an outward redeployment in experts (\$55,800);
- (d) **Subprogramme 3, Technology, innovation, connectivity and infrastructure development.** The increase of \$2,745,800 reflects the inward redeployment of resources from subprogramme 3, Private sector development and finance, and subprogramme 5, Technology, climate and natural resources management, as follows:
- (i) A total of 17 posts (\$2,449,800), as detailed in annex II;

- (ii) Non-post resources, including other staff costs (\$13,300), consultants (\$35,000), experts (\$177,700), travel of staff (\$35,000), contractual services (\$20,000) and general operating expenses (\$15,000);
- (e) **Subprogramme 5, Climate, food security and natural resources, green and blue economy.** The increase of \$3,676,500 reflects the inward redeployment of resources from subprogramme 3, Private sector development and finance, and subprogramme 5, Technology, climate and natural resources management, as follows:
 - (i) A total of 18 posts (\$2,993,000), as detailed in annex II;
 - (ii) Non-post resources, including other staff costs (\$130,000), consultants (\$90,000), experts (\$380,000), travel of staff (\$35,000), contractual services (\$18,500) and general operating expenses (\$30,000).

Extrabudgetary resources

- 18.184 As reflected in table 18.36 (2), extrabudgetary resources amount to \$22,233,500. The resources would complement regular budget resources and be used mainly to provide for financing technical cooperation activities to build the capacities of Member States in areas such as enhancing regional cooperation and integration through increased trade flows, implementation of the African Union digital trade architecture and the promotion of regional value chains.
- 18.185 The extrabudgetary resources under this section are subject to the oversight of the Executive Secretary of ECA, who has delegated authority from the Secretary-General.

Policymaking organs

- 18.186 The resources proposed under this component would provide for the policymaking organs as shown in table 18.39.

Table 18.39

**Executive direction and management**

- 18.188 The executive direction and management component comprises the Office of the Executive Secretary, the Office of the Deputy Executive Secretary (Programmes), the Office of the Deputy Executive Secretary (Programme Support), the Strategic Planning, Oversight and Results Division and Business Continuity.
- 18.189 The main responsibilities of the executive direction and management component are:
- (a) Maintaining and managing effective partnerships and collaborating with major African organizations;
 - (b) Ensuring that the development priorities and positions of Africa on critical issues are reflected at the global level;
 - (c) Determining the overall strategic direction and management of the ECA secretariat, ensuring the optimal use of resources in line with best practices and promoting environmental sustainability and disability inclusion.
- 18.190 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), ECA is integrating environmental management practices into its operations. In 2025, ECA will continue to reduce its greenhouse gas footprint and will maintain its greenhouse gas neutrality by offsetting its remaining footprint.
- 18.191 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 18.41. ECA is endeavouring to redouble its efforts to plan well in advance and raise the awareness of programme managers and Member State focal points on the importance of the early nomination of travellers and the policy regarding advance booking. In addition, ECA continues its corporate agreement with the airlines, which provides for extended ticketing time limits, thus mitigating the impact on the additional cost of late purchases. Similarly, the Commission will continue to work closely with managers and travel and logistics counterparts on early planning to improve compliance rates in 2024 and 2025.

Programme support

- 18.206 Programme support comprises the Division of Administration and the Publications, Conference and Knowledge Management Division.
- 18.207 The Division of Administration contributes to the effective implementation of the Commission’s mandate by providing administrative and financial support, and promotes compliance with United Nations regulations and rules, policies, and procedures. It encompasses the Office of the Director of Administration, the Human Resources Management Section, the United Nations Health-Care Centre, the Supply Chain Management Section, the Facilities Management Section and the Finance and Budget Section.
- 18.208 The Publications, Conference and Knowledge Management Division promotes the visibility and impact of the Commission’s work through its Conference Management Unit, Publications and

Part V Regional cooperation for development

Documentation Section, Knowledge Management Services Section and Information and Communications Technology Services Section. The Division promotes the visibility of ECA and its knowledge products through the communications and media relations activities and through the rendering of professional conference services to United Nations and non-United Nations entities.

18.209 The proposed regular budget resources for 2025 amount to \$36,036,300 and reflect a decrease of \$1,127,600 compared with the approved budget for 2024. The proposed change is explained in paragraph 18.182. Additional details on the distribution of the proposed resources for 2025 are reflected in table 18.56 and figure 18.XLV.

II. Regional Commissions New York Office

Proposed post and non-post resource requirements for 2025

Overview

- 18.210 The Regional Commissions New York Office is a joint office representing, coordinating and providing policy advice to the five regional commissions, namely, the Economic Commission for Africa, the Economic and Social Commission for Asia and the Pacific, the Economic Commission for Europe, the Economic Commission for Latin America and the Caribbean, and the Economic and Social Commission for Western Asia. It supports the regional commissions in the effective implementation of relevant legislative mandates at the regional level.
- 18.211 In pursuing its objective, the Office carries out three interlinked functions: (a) providing strategic policy advice and coordination support to the regional commissions on United Nations deliberations and global policy frameworks that have a bearing on their positioning and the implementation of their programmes; (b) representing the regional commissions in relevant intergovernmental and inter-agency mechanisms, with a view to informing decision-making from a regional perspective; and (c) communicating the work of the regional commissions with key stakeholders.
- 18.212 In 2023, the work of the Office contributed to more coherence and visibility to the regional commissions' joint policy work and events, greater uptake of their innovations and platforms, and the enrichment of intergovernmental deliberations on the regional aspects of sustainable development. The Office contributed to amplifying the regional commissions' voices in global policymaking, coordinating their contributions to system-wide initiatives, and facilitating links at the national and global levels to further increase the impact of their work.

Strategic coordination and policy advice

- 18.213 The Office provided policy advice and coordination support to the regional commissions on global policy frameworks and processes. It leveraged strategic opportunities during key global events, such as the Sustainable Development Goals Summit, the 2023 United Nations Water Conference, the Climate Ambition Summit, the High-level Dialogue on Financing for Development and the twenty-eighth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, to support coordination of the regional commissions' joint work in the areas of financing for development, climate action, critical energy transition minerals and transformative policy and investment pathways to deliver the Goals.
- 18.214 The Office supported and continued to advocate for the role of the regional commissions in the follow-up and review of the 2030 Agenda during the period leading up to the 2023 high-level political forum on sustainable development. This included supporting collaboration among the regional commissions on the joint report on country profiles titled "SDG progress and transformative pathways", consolidating and conveying the outcomes of the regional forums on sustainable development to the forum and the SDG Summit, and supporting the development of harmonized progress dashboards.
- 18.215 Working with the Coordinator, and in the context of the high-level political forum on sustainable development, the Office facilitated the contributions of the regional commissions to the thematic discussion on the Sustainable Development Goals under review, as well as the organization of the reporting session of the five Chairs of the Regional Forums on Sustainable Development. The Office also organized a voluntary national review lab on the margins of the 2023 forum on innovations and frontier technologies in support of voluntary national review preparation and achievement of the Goals. The event afforded space for cross-regional learning in the application of technologies and the scaling up of innovations in the renewed drive to accelerate achievement of the Goals.

- 18.216 Working closely with the regional commissions, the Office supported the preparation of a joint policy brief and dialogue on rethinking public debt policies for the Sustainable Development Goals, a joint input to the Secretary-General’s policy brief on the reform of the international financial architecture, a toolkit on critical energy transition materials for resident coordinators, and thematic side events on urban resilience, the water-food-energy-ecosystems nexus and financing the energy transition.
- 18.217 With a view to informing and influencing global policy debates, the Office provided strategic advice to the regional commissions in support of their participation in global platforms for joint policy formation and decision-making, notably the United Nations System Chief Executives Board for Coordination, the United Nations Sustainable Development Group and other inter-agency task teams such as the steering committee on the Sustainable Development Goals Summit. The Office serviced the biannual meetings of the Executive Secretaries with the Deputy Secretary-General, which ensured that the regional commissions effectively and coherently supported system-wide initiatives, including through the exchange of good practices.

Representation and communication

- 18.218 During the reporting period, the Office organized the annual dialogue of the Executive Secretaries with the Second Committee of the General Assembly on the theme “Catalysing transformative actions and integrated approaches to sustainable development: regional experiences to accelerate progress on the Sustainable Development Goals”. The dialogue featured presentations on challenges faced by the regions in accelerating Goal investment and transformative policy action promoted by the five regional commissions.
- 18.219 The Office prepared and introduced to the Economic and Social Council management segment the 2023 report of the Secretary-General on regional cooperation and presented the outcomes of the regional commissions’ intergovernmental sessions. It also facilitated preparation of the regional session during the 2023 Coordination Segment of the Council, providing a preview of the regional forums on sustainable development, and highlighted innovative initiatives to accelerate achievement of the Sustainable Development Goals. The Office also supported the regional commissions’ participation in the dialogue on the repositioning of the United Nations development system at the regional level during the 2023 operational activities for development segment of the Council, focusing on deploying regional assets to address cross-border and transboundary development priorities.
- 18.220 In pursuit of relevant mandates and in support of the priorities of the Economic and Social Council, the Office coordinated the effective contribution of the regional commissions to the preparation of high-level meetings in such areas as climate action, financing, taxation, science, technology and innovation, and governance.
- 18.221 During 2023, the Office actively contributed to the work of the Chief Executives Board’s High-level Committee on Programmes, in particular regarding the stock-taking on outcomes of the Sustainable Development Goals Summit and the ministerial meeting of the Summit of the Future and governance of artificial intelligence. In addition, the Office provided advisory support to the Coordinator and harmonized the positions of the regional commissions in the United Nations Sustainable Development Group. It also supported the Coordinator’s participation in the meetings of the Management Committee to advance internal reform and management-related initiatives. The Office also played a role in inter-agency task forces and working groups established for high-level events, including for the preparation of the Sustainable Development Goals Summit, the Summit of the Future and the working groups on United Nations engagement with the Group of 20.

Partnerships, outreach and advocacy

- 18.222 Key activities in that regard included the dissemination of a bimonthly newsletter highlighting events, publications and partnerships and the organization of briefings by the Executive Secretaries to permanent missions based in New York, notably to the Group of African States, the Group of Eastern European States and the United Nations Special Programme for the Economies of Central Asia countries.
- 18.223 In observance of the first World Sustainable Transport Day, in November 2023, the Office supported the preparation of a joint outreach publication, titled “Messages from the regional commissions on sustainable transport”, providing an overview of the work of the relevant regions and highlighting common messages and opportunities for action. The Office also contributed to the strengthening of collaboration between the regional commissions and various Secretariat departments.
- 18.224 In the context of the climate agenda, the Office continued to facilitate the coordinated engagement of the regional commissions with the high-level champions for climate action to advance the project pipeline developed in 2022. A special event held during the twenty-eighth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change took stock of progress made, with discussions on barriers and solutions for acceleration following that session.

Plans for 2025

- 18.225 The outcomes of the Summit of the Future, the fourth International Conference on Small Island Developing States, the third United Nations Conference on Landlocked Developing Countries and other global conferences scheduled for 2024, mandates from the General Assembly and the Economic and Social Council, preparations for the Fourth International Conference on Financing for Development and joint work of the regional commissions will inform the programme of work of the Office in 2025. The financing for development agenda, including advancing the Sustainable Development Goals stimulus, debt sustainability and international tax cooperation, as well as driving climate action in the regions, will remain the joint work of the regional commissions and will therefore also be key elements of the work of the Office.
- 18.226 In the follow-up to the 2023 Sustainable Development Goals Summit, the Office will provide policy advice and coordination support to the regional commissions on advancing transformative pathways for the Goals. The Office will also continue to support the follow-up and review of the 2030 Agenda, bringing regional innovations and best practices to global discussions and ensuring that outcomes of the regional forums feed into the high-level political forum on sustainable development.
- 18.227 As a follow-up to the Summit of the Future, the Office will provide support to the regional commissions on implementing relevant elements of A Pact for the Future, as agreed by Member States. The Office will also continue to serve as secretariat for the joint work of the regional commissions, supporting the identification of avenues for joint work and the exchange of good practices, strengthening links at the global level and advising on enhancing impacts at the regional and national levels. Building on the joint work of the regional commissions in 2024, including in areas such as financing for development and support for key transitions in energy, food systems, digital connectivity, jobs and social protection and climate change, the Office will also contribute to the advancement of the achievement of the Sustainable Development Goals across the five regions through the provision of advisory and coordination support.
- 18.228 The Office will continue to systematically convene and service regular dialogues among the regional commissions, including servicing the biannual meetings of the Deputy Secretary-General with the Executive Secretaries, with a view to enhancing internal coordination and ensuring coherent and effective support for global initiatives and processes, including for the Summit of the Future.
- 18.229 The Office will identify engagement and advocacy opportunities, coordinate effective participation of the regional commissions in inter-agency mechanisms, and leverage key 2025 moments such as the Fourth International Conference on Financing for Development, the third Ocean Conference,

Part V Regional cooperation for development

Beijing+30 and the thirtieth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change for strategic visibility and uptake of solutions and perspectives that foster sustainable development at the regional and national levels. It will also promote interregional cooperation through joint projects and the exchange of good practices.

- 18.230 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Office is integrating environmental management practices into its operations, in particular through the use of online tools, whenever possible, for facilitating collaboration among the regional commissions, including online meetings and digital communication materials. Other measures include adhering to the ban on single-use plastics, optimizing the use of natural light, turning off office equipment at the end of the workday and reducing paper use.
- 18.231 Information on the timely submission of documentation and advance booking for air travel is reflected in table 18.57. The Office will continue to monitor travel and logistics with a view towards achieving earlier planning and improvement in the compliance rates in 2024 and 2025.

Table 18.57
Compliance rate
(Percentage)

	2021 <i>actual</i>	2022 <i>actual</i>	2023 <i>actual</i>	2024 <i>planned</i>	2025 <i>planned</i>
Timely submission of documentation	100	100	67	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	100	–	67	100	100

- 18.232 The proposed regular budget resources for 2025 amount to \$778,600 and reflect no change compared with the approved budget for 2024. The proposed level of resources provides for the full, efficient and effective implementation of mandates. Additional details on the distribution of the proposed resources for 2025 are reflected in table 18.58 and figure 18.XLVI.

Annex I

Organizational structure and post distribution for 2025

Two charts showing the organizational structure of ECA are presented below. Chart A reproduces the approved structure as shown in [A/78/6 \(Sect. 18\)](#), while Chart B presents the proposed structure for 2025.

Justification for the proposed changes

Following the launch of the second 10-year implementation plan of the African Union Agenda 2063, at the fifty-sixth session of the Conference of African Ministers of Finance, Planning and Economic Development resolutions 2024/2 and 2024/3 were adopted, by which a realignment of the ECA programme of work was endorsed within its existing mandate to enable a greater focus on emerging priorities for the continent. This realignment will enable ECA to provide more effective support to enable its members to address both current and emerging opportunities and challenges for inclusive and sustainable development. Specifically, the changes are as follows:

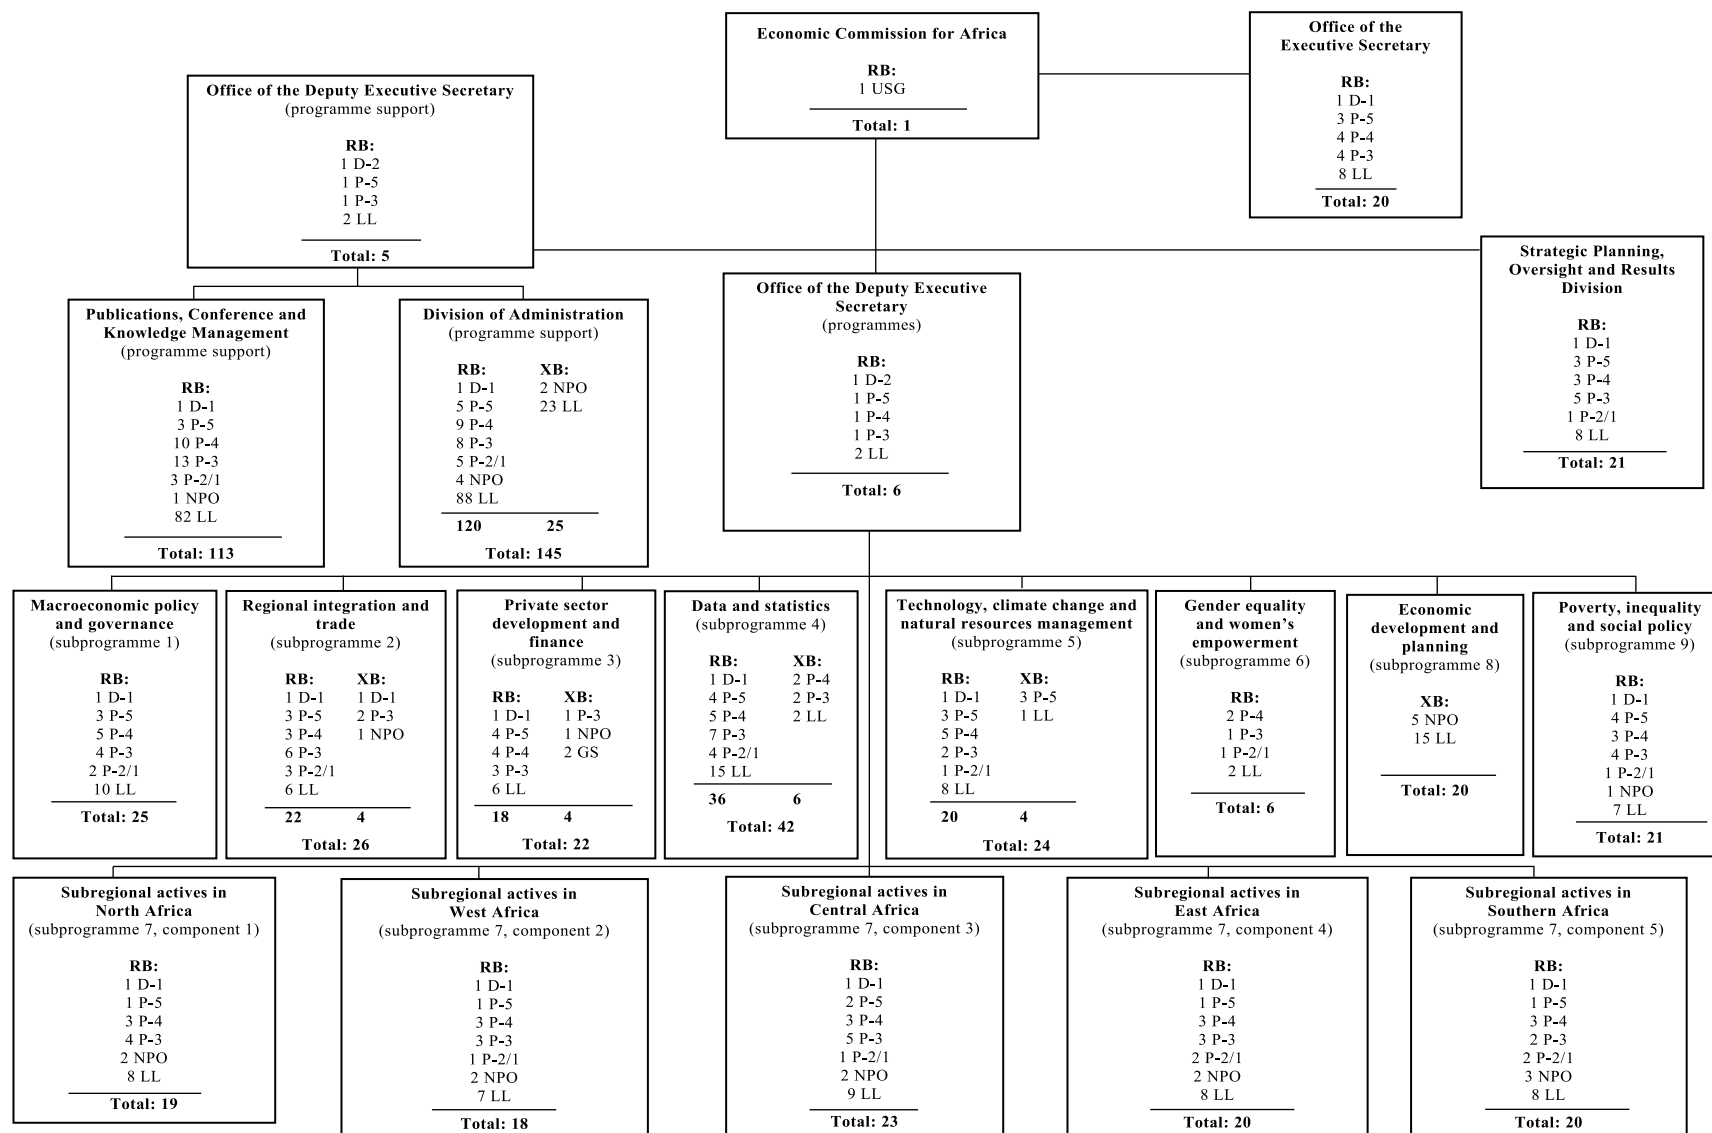

(a) Subprogramme 1: the renaming of the subprogramme from Macroeconomic policy and governance to Macroeconomic policy, finance and governance;

(b) Subprogramme 3: the discontinuance and realignment of current subprogramme 3, Private sector development and finance, with its activities integrated into subprogramme 1 and a new subprogramme 5; and the establishment in its place of a new subprogramme 3, Technology, innovation, connectivity and infrastructure development;

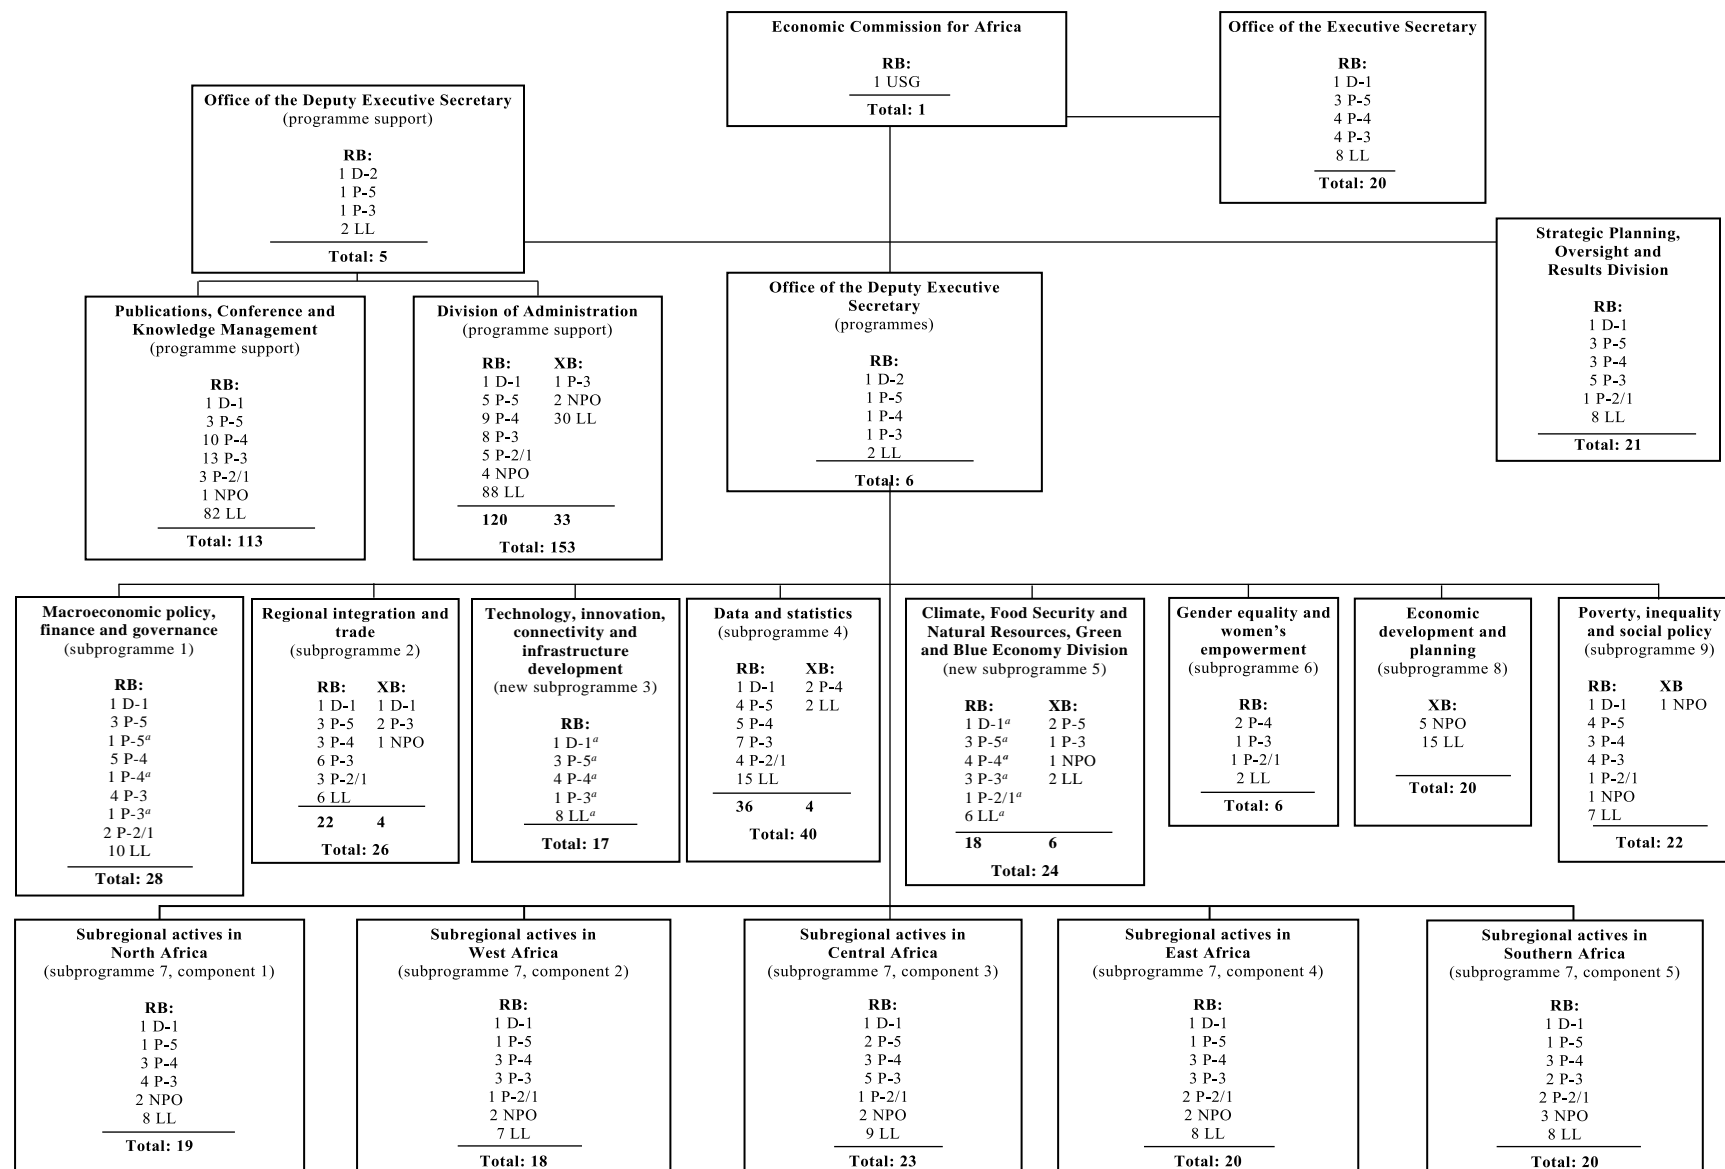

(c) Subprogramme 5: the discontinuance and realignment of current subprogramme 5, Technology, climate and natural resources management, with its activities integrated into the new subprogramme 3 and a new subprogramme 5; and the establishment in its place of a new subprogramme 5, Climate, food security and natural resources, green and blue economy.

Accordingly, chart II illustrates the outward redeployment of post resources from the current subprogrammes 3 and 5 to subprogramme 1 and the two new subprogrammes 3 and 5.

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 19.1 As the principal intergovernmental platform of the United Nations in the region, the Economic and Social Commission for Asia and the Pacific (ESCAP) assists its members and associate members in pursuing solutions for sustainable development. Its mandates derive from the priorities established in relevant resolutions and decisions of the General Assembly, the Economic and Social Council and the Economic and Social Commission for Asia and the Pacific. The Commission was established by Council resolution 37 (IV), and Council resolution 1895 (LVII) amended its mandate to include the social dimension of integrated development.
- 19.2 The work of ESCAP is also grounded in its resolution 79/1, by which the Commission reaffirmed its commitment to promoting multilateralism and international cooperation, and its resolution 78/1, in which the Commission stressed its leadership role in catalysing regional cooperation and supporting actions to confront regional, transboundary and common challenges faced by its membership.
- 19.3 Through its three core functions, namely, research and analysis, the facilitation of intergovernmental consensus-building and norm-setting, and capacity development, ESCAP supports the implementation of the 2030 Agenda for Sustainable Development. In fulfilling these functions, ESCAP is guided by General Assembly resolutions, including Assembly resolution 74/4, and the regional road map for implementing the 2030 Agenda in Asia and the Pacific, endorsed by the Commission in its resolution 73/9, which serve as reference frameworks.

Strategy and external factors for 2025

- 19.4 The Commission's overall programme strategy aims at the balanced integration of the economic, social and environmental dimensions to advance sustainable development in Asia and the Pacific. The strategy is implemented through the Commission's nine subprogrammes at the regional and subregional levels and addresses the needs and requests of its member States. In implementing its strategy, ESCAP accords priority to supporting countries in special situations, which constitute more than half its member States. It does so by mainstreaming the various programmes of action into the work of all subprogrammes to assist least developed countries, landlocked developing countries and small island developing States in attaining relevant goals and targets.
- 19.5 In the political declaration of the high-level political forum on sustainable development convened under the auspices of the General Assembly (Assembly resolution 78/1), United Nations Member States committed to bold, ambitious, accelerated, just and transformative actions, anchored in international solidarity and effective cooperation at all levels, and the promotion of a systemic shift towards a more inclusive, just, peaceful, resilient and sustainable world for people and planet, for present and future generations. In honouring this commitment and within its expertise, ESCAP will assist its member States in implementing the continuous, fundamental, transformative and urgent actions outlined in the political declaration.
- 19.6 Amid fiscal constraints, rising debt vulnerabilities and tight financial conditions, the scaling up of financing and the reprioritization of scarce capital are needed to bridge the financing gap towards achieving the Sustainable Development Goals in Asia and the Pacific. To assist member States on macroeconomic policies and debt distress matters, ESCAP will conduct research on long-term and development-oriented public debt sustainability assessments, domestic resource mobilization, affordable financing access for development and international cooperation on debt resolution, aiming at increasing investments in sustainable development. It will also convene meetings for member States and stakeholders in support of the 2030 Agenda, taking into account its midterm review and keeping in view the need to accelerate financing for poverty reduction and sustainable development.

Building on its research relevant to the achievement of the Goals, ESCAP will provide support for their means of implementation to member States, ensuring that such research and support are rooted in and linked to the 2030 Agenda.

- 19.7 To strengthen regional and subregional cooperation to accelerate climate action in Asia and the Pacific, ESCAP supports member States in enhancing cooperation efforts with a view to taking action to combat climate change and its impacts. In 2025, ESCAP will provide regional assessments, facilitate information-sharing and policy dialogues and extend technical support on policies for climate-resilient and environmentally sustainable development. It will foster collaboration across various sectors of the economy to address climate change, including by supporting regional cooperation on sustainable, low-emission and energy-efficient modes of transport. To this end, the Regional Action Programme for Sustainable Transport Development in Asia and the Pacific (2022–2026) serves as a framework to address the negative effects generated by freight transport, including greenhouse gas emissions, and provides the basis upon which ESCAP implements capacity-building projects to strengthen regional and interregional transport connectivity and promote the integration of the environmental aspects of international supply chains and the introduction of digital and intelligent transport systems.
- 19.8 Building on the midterm review of the Sendai Framework for Disaster Risk Reduction 2015–2030, ESCAP will support the implementation of the Framework by strengthening regional and subregional cooperation mechanisms to secure financing for resilience-building, including through the private sector. In response to member States' requests, ESCAP will facilitate policy dialogue on transformative adaptation, which protects lives, livelihoods and food, energy and other critical systems, taking a balanced and comprehensive disaster and climate risk management approach that includes the scaling up of innovations to address transboundary hazards. It will further develop a regional strategy to support the achievement of early warnings for all by 2027 by strengthening multi-hazard early warning systems in Asia and the Pacific in coordination with member States and relevant partners, as applicable. ESCAP will facilitate the enhancement of national capacities for disaster preparedness, adaptation and resilience through initiatives such as the Asia-Pacific Disaster Resilience Network, which utilizes digital and geospatial applications to share information, expertise, resources and good practices for the development of regional multi-hazard early warning systems.
- 19.9 ESCAP is committed to promoting cooperation among member States in the region to effectively implement Sustainable Development Goal 7 and other energy-related Goals. As an outcome of the third Asian and Pacific Energy Forum, ESCAP will conduct analytical studies on key energy trends and will compile and disseminate pertinent energy information and data, including through the Asia-Pacific Energy Portal, to facilitate informed intergovernmental discussions. Upon request, ESCAP will also assist member States in developing national road maps for the implementation of Goal 7 and in formulating and implementing their long-term strategies on sustainable energy transitions.
- 19.10 The role of trade is central to implementing efforts towards sustainable development. Therefore, ESCAP will focus on making trade in the Asia-Pacific region more competitive, sustainable and inclusive. This will involve expanding its analytical research, capacity-building and technical assistance efforts in relation to matters of common concern, including e-commerce and digital trade, trade digitalization, sustainability of trade, trade resilience in time of crises, graduation from least developed country status and trade agreements. Moreover, ESCAP will aim at enhancing cooperation on cross-border paperless trade, assisting member States in acceding to the Framework Agreement on Facilitation of Cross-border Paperless Trade in Asia and the Pacific.
- 19.11 Recognizing the important role of the private sector in the implementation of the 2030 Agenda, ESCAP will support member States in the promotion of enterprise and business innovation, in particular promoting inclusive and socially responsible businesses, women-led enterprises and disability-inclusive businesses, building the evidence base of effective policies and facilitating knowledge-sharing and regional cooperation on these agendas. It plans to engage the private sector through the ESCAP Sustainable Business Network and the Asia-Pacific Business Forum, which involves promoting internationally recognized principles and standards of responsible business conduct such as those contained in the United Nations Global Compact and other initiatives, as appropriate. It will also provide technical assistance and capacity-building to promote impact

investing and foreign direct investment for sustainable development to elevate the role of business in promoting gender equality, bridging the widening digital divide and addressing social and environmental considerations, including climate change.

- 19.12 Members and associate members of ESCAP recognized that the Asia-Pacific information superhighway initiative could be one of the useful regional platforms for the promotion of digital cooperation. ESCAP will build upon the outcomes of the ministerial conference on digital inclusion and transformation and foster digital cooperation among members to bridge the digital divide, providing digital skills training, enhancing digital connectivity, bolstering digital trust and security, sharing successful policies and practices and promoting inclusive digital economies and societies, as appropriate. Furthermore, ESCAP will mobilize the collaboration of member States in the digital transformation process, including under the framework of the Action Plan for Implementing the Asia-Pacific Information Superhighway Initiative, 2022–2026.
- 19.13 The Action Plan to Strengthen Regional Cooperation on Social Protection in Asia and the Pacific is the framework for member States on preventing poverty and reducing vulnerability through investment in inclusive national social protection systems that improve access to essential services, resources, human capital development, education, employment and decent jobs and strengthen health resilience. ESCAP is guided by the Action Plan in promoting the active participation of women in decision-making and in the design and implementation of social protection policies and programmes.
- 19.14 ESCAP is committed to tackling inequalities within and across countries to build peaceful, just and inclusive societies, to achieving gender equality and the empowerment of all women and girls, and to ensuring that persons with disabilities and population groups that are most at risk of being left behind actively participate in and equally benefit from sustainable development efforts. To advance the rights of persons with disabilities and accelerate the implementation of the 2030 Agenda and the Convention on the Rights of Persons with Disabilities, ESCAP will assist member States in the effective implementation of the Jakarta Declaration on the Asian and Pacific Decade of Persons with Disabilities, 2023–2032, as well as the Incheon Strategy to “Make the Right Real” for Persons with Disabilities in Asia and the Pacific and the Beijing Declaration, including the Action Plan to Accelerate the Implementation of the Incheon Strategy.
- 19.15 Data and statistics are enablers to facilitate the implementation of the 2030 Agenda. ESCAP will deepen its support related to the assessment of progress towards the Sustainable Development Goals and focus on guiding member States to implement complementary statistics relating to gross domestic product (GDP) that will measure inclusive and sustainable growth and prosperity. Priority will be given to assisting the decision-making of member States by strengthening the capacity of statistical departments to raise the visibility of population groups that are most at risk of being left behind in statistical data by disaggregating data, including by income, sex, age, race, ethnicity, migratory status, disability and geographical location, as well as other characteristics relevant in national contexts. Across all sectors, ESCAP will invest more in improving data collection, analysis and dissemination. Through its Regional Space Applications Programme for Sustainable Development, ESCAP will also facilitate the provision of high-resolution satellite imagery and big Earth data analytical tools for consistent natural disaster risk monitoring and reduction, with a focus on countries in special situations.
- 19.16 In 2025, the regional follow-up and review of the implementation of the 2030 Agenda through the Asia-Pacific Forum on Sustainable Development will be convened with member States, United Nations development system entities, other international and regional organizations, the private sector and civil society, as appropriate. The multi-stakeholder forum will inform the high-level political forum on sustainable development and follow up on the outcomes of the Summit of the Future.
- 19.17 With regard to cooperation with other entities at the global, regional, national and local levels, ESCAP implements its strategy in collaboration with global, regional and subregional intergovernmental bodies and international organizations, regional and local government associations, civil society networks and the private sector in an open and transparent manner. Building on its longstanding partnerships, ESCAP will collaborate with international, regional and subregional organizations, as appropriate. It will implement joint activities with international development banks and partner with research institutes, associations and other civil society organizations, as appropriate. ESCAP will also

proactively engage with its development partners to strategically implement its programme, including through North-South, South-South and triangular cooperation, as appropriate.

- 19.18 With regard to inter-agency coordination and liaison, ESCAP, in close coordination with the other regional commissions, will contribute to global analytical products and will implement joint projects under the Development Account. It also nurtures close ties with the Office of the High Representative for Least Developed Countries, Landlocked Developing Countries and Small Island Developing States to provide coordinated support to the countries in special situations in the region. The subregional offices of ESCAP serve as the main point of contact for resident coordinator offices and United Nations country teams and coordinate its contributions to common country assessments and United Nations Sustainable Development Cooperation Frameworks. At the regional level, ESCAP will provide secretariat services to the Regional Collaborative Platform for Asia and the Pacific, and its subprogrammes will support issue-based coalitions. ESCAP will continue to co-lead the issue-based coalition on raising ambitions on climate action with the United Nations Environment Programme, where its expertise, geared to help the achievement of Sustainable Development Goals 7 and 13 and the implementation of the Paris Agreement, is of specific relevance.
- 19.19 With regard to the external factors, the overall plan for 2025 is based on the following planning assumptions:
- (a) National Governments maintain and strengthen their commitment to the Commission as the principal intergovernmental platform in the region for leveraging regional cooperation to meet transboundary and common challenges;
 - (b) Governments and other stakeholders continue to collaborate with the Commission in undertaking the proposed programme activities with the necessary capacity and resources;
 - (c) Extrabudgetary funding for technical cooperation continues to be available.
- 19.20 ESCAP integrates a gender perspective in its operational activities, deliverables and results, as relevant and appropriate. Gender equality and the empowerment of women is a thematic area for subprogramme 6, while advancing the disaggregation of data, including disaggregation by sex, is a focus of subprogramme 7. In the 2025 programme plan, subprogrammes 2 and 5 to 7 specifically contribute results in this regard, while subprogrammes 2 to 4 and 6 to 9 mainstream gender equality and the empowerment of women in their respective strategies. In 2025, ESCAP will also continue to implement its gender equality policy and implementation plan to further anchor the achievements to date across its programme of work.
- 19.21 In line with the United Nations Disability Inclusion Strategy, ESCAP is committed to mainstreaming disability perspectives and ensuring the inclusion of persons with disabilities in all its work through its implementation of the ESCAP disability inclusion policy and its action plan. Subprogramme 6 incorporates disability-specific interventions to protect and empower persons with disabilities and, ultimately, to build disability-inclusive societies.

Legislative mandates

- 19.22 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

61/16	Strengthening of the Economic and Social Council	69/137	Programme of Action for Landlocked Developing Countries for the Decade 2014–2024
66/288	The future we want		
67/10	Cooperation between the United Nations and the Eurasian Economic Community	69/142	Realizing the Millennium Development Goals and other internationally agreed development goals for persons with disabilities towards 2015 and beyond
69/15	SIDS Accelerated Modalities of Action (SAMOA) Pathway		

Section 19 Economic and social development in Asia and the Pacific

69/277	Political declaration on strengthening cooperation between the United Nations and regional and subregional organizations	75/290 B	High-level political forum on sustainable development
69/283	Sendai Framework for Disaster Risk Reduction 2015–2030	76/224	Towards global partnerships: a principle-based approach to enhanced cooperation between the United Nations and all relevant partners
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)	76/258	Doha Programme of Action for the Least Developed Countries
70/1	Transforming our world: the 2030 Agenda for Sustainable Development	76/273	Enhancing accessibility for persons with disabilities to conferences and meetings of the United Nations system
70/170	Towards the full realization of an inclusive and accessible United Nations for persons with disabilities	76/296 77/12	Our ocean, our future, our responsibility
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system	77/18 77/21	Cooperation between the United Nations and the Association of Southeast Asian Nations Cooperation between the United Nations and the Organization of Islamic Cooperation Cooperation between the United Nations and the Organisation for Economic Co-operation and Development (OECD)
74/3	Political declaration of the high-level meeting to review progress made in addressing the priorities of small island developing States through the implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway	77/181 77/189	Women in development Inclusive development for and with persons with disabilities
74/4	Political declaration of the high-level political forum on sustainable development convened under the auspices of the General Assembly	77/223 77/323	Human rights and extreme poverty Extension of the preparatory period preceding the graduation of Solomon Islands from the least developed country category
74/15	Political Declaration of the High-level Midterm Review on the Implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024	77/330 77/332 77/338	Cooperation between the United Nations and the Economic Cooperation Organization Cooperation between the United Nations and the Pacific Islands Forum Cooperation between the United Nations and the Shanghai Cooperation Organization
74/297	Progress in the implementation of General Assembly resolution 71/243 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system	78/1	Political declaration of the high-level political forum on sustainable development convened under the auspices of the General Assembly
74/306	Comprehensive and coordinated response to the coronavirus disease (COVID-19) pandemic	78/69 78/144	Oceans and the law of the sea Agricultural technology for sustainable development
74/307	United response against global health threats: combating COVID-19	78/147	Central Asia facing environmental challenges: fostering regional solidarity for sustainable development and prosperity
75/90	The situation in Afghanistan		
75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system	78/151	Promoting sustainable consumption and production patterns for the implementation of the 2030 Agenda for Sustainable Development, building on Agenda 21
75/290 A	Review of the implementation of General Assembly resolution 72/305 on the strengthening of the Economic and Social Council	78/158 78/160	Combating sand and dust storms Science, technology and innovation for sustainable development
	Review of the implementation of General Assembly resolutions 67/290 on the format and organizational aspects of the high-level political forum on sustainable development and 70/299 on the follow-up and review of the 2030 Agenda for Sustainable Development at the global level	78/162 78/163	Development cooperation with middle-income countries Follow-up to the Second United Nations Conference on Landlocked Developing Countries
	Economic and Social Council	78/164	Implementation of the Third United Nations Decade for the Eradication of Poverty (2018–2027)

Part V Regional cooperation for development

78/165	Eradicating rural poverty to implement the 2030 Agenda for Sustainable Development	78/203	The right to development
78/166	Operational activities for development of the United Nations system	78/231	Follow-up to and implementation of the outcomes of the International Conferences on Financing for Development
78/167	South-South cooperation	78/232	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States
78/168	Agriculture development, food security and nutrition		
78/178	Promoting social integration through social inclusion		
78/189	Rights of Indigenous Peoples		
78/195	Implementation of the Convention on the Rights of Persons with Disabilities and the Optional Protocol thereto: situations of risk and humanitarian emergencies	78/233	Follow-up to the Fifth United Nations Conference on the Least Developed Countries
		78/259	International Day of Science, Technology and Innovation for the South

Economic and Social Council resolutions

37 (IV)	Economic Commission for Asia and the Far East	2023/10	Report of the Committee for Development Policy on its twenty-fifth session
1895 (LVII)	Change of name of the “Economic Commission for Asia and the Far East” to “Economic and Social Commission for Asia and the Pacific”	2023/11	Mainstreaming a gender perspective into all policies and programmes in the United Nations system
1998/46	Further measures for the restructuring and revitalization of the United Nations in the economic, social and related fields	2023/14	Creating full and productive employment and decent work for all as a way of overcoming inequalities to accelerate the recovery from the COVID-19 pandemic and the full implementation of the 2030 Agenda for Sustainable Development
2013/19	Conclusion of the work of the Commission on Sustainable Development		
2016/11	Committing to the effective implementation of the 2030 Agenda for Sustainable Development in Asia and the Pacific	2023/29	Doha Programme of Action for the Least Developed Countries for the decade 2022–2031
2018/5	Strategies for eradicating poverty to achieve sustainable development for all	2023/31	Progress in the implementation of General Assembly resolution 75/233 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system
2020/5	Strengthening coordination of the statistical programmes in the United Nations system		
2021/10	Socially just transition towards sustainable development: the role of digital technologies on social development and well-being of all	2023/33	Support to Non-Self-Governing Territories by the specialized agencies and international institutions associated with the United Nations
2022/11	A conference structure of the Economic and Social Commission for Asia and the Pacific to advance sustainable development		

Economic and Social Commission for Asia and the Pacific resolutions

66/1	Incheon Declaration	70/11	Implementing the outcome of the Asia-Pacific Forum on Sustainable Development
66/9	Full and effective implementation of the Beijing Platform for Action and its regional and global outcomes in the Asia-Pacific region	71/1	Restructuring the conference structure of the Commission to be fit for the evolving post-2015 development agenda
66/15	Strengthening of the evaluation function of the secretariat of the Commission	71/3	Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024
67/14	Cooperation between the Economic and Social Commission for Asia and the Pacific and other United Nations and regional and subregional organizations serving Asia and the Pacific	71/4	Implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway
68/8	Enhancing coordination within the United Nations system and cooperation with regional organizations for promoting regional development	72/6	Committing to the effective implementation of the 2030 Agenda for Sustainable Development in Asia and the Pacific

Section 19 Economic and social development in Asia and the Pacific

72/8	Fostering regional cooperation and partnerships to respond to the climate change challenge in the Asia-Pacific region	75/3	Advancing partnerships within and across regions for the sustainable development of Asia and the Pacific
72/9	Regional cooperation to promote the conservation and sustainable use of the oceans, seas and marine resources for sustainable development in Asia and the Pacific	75/4	Strengthening regional cooperation to tackle air pollution challenges in Asia and the Pacific
		75/9	Implementation of the Declaration on Navigating Policy with Data to Leave No One Behind
73/2	Strengthening the regional mechanism for the implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024	76/1	Strengthening cooperation to promote the conservation and sustainable use of the oceans, seas and marine resources for sustainable development in Asia and the Pacific
73/3	Advancing integrated and seamless connectivity for sustainable development in Asia and the Pacific	76/2	Regional cooperation to address the socioeconomic effects of pandemics and crises in Asia and the Pacific
73/5	Strengthening Asia-Pacific's support for the United Nations Conference to Support the Implementation of Sustainable Development Goal 14	77/1	Building back better from crises through regional cooperation in Asia and the Pacific
73/9	Regional road map for implementing the 2030 Agenda for Sustainable Development in Asia and the Pacific	78/1	Bangkok Declaration Commemorating the Seventy-fifth Anniversary of the Economic and Social Commission for Asia and the Pacific: A Common Agenda to Advance Sustainable Development in Asia and the Pacific
74/1	Supporting the smooth transition of the least developed countries in Asia and the Pacific towards a sustainable graduation		
74/6	Advancing disaster-related statistics in Asia and the Pacific	78/2	A conference structure of the Commission to advance sustainable development
74/10	Implementation of the Ministerial Declaration on Enhancing Regional Economic Cooperation and Integration to Support the Implementation of the 2030 Agenda in Asia and the Pacific	79/1	Accelerating climate action in Asia and the Pacific for sustainable development
		79/3	Supporting the sustainable development of least developed countries, landlocked developing countries and small island developing States in Asia and the Pacific
75/2	Committing to strengthening the links between national, regional and global follow-up to and review of the 2030 Agenda for Sustainable Development in Asia and the Pacific	79/4	Accelerating the implementation of the 2030 Agenda for Sustainable Development for a better future for all in Asia and the Pacific

Subprogramme 1**Macroeconomic policy, poverty reduction and financing for development***General Assembly resolutions*

78/136	International financial system and development	78/141	Promoting investments for sustainable development
78/137	External debt sustainability and development		

Economic and Social Commission for Asia and the Pacific resolutions

E/CN.11/63	Statistical and economic documentation work	71/5	Implementing the outcome of the Asia-Pacific High-level Consultation on Financing for Development
------------	---	------	---

Subprogramme 2**Trade, investment and innovation***General Assembly resolutions*

73/219; 78/134	International trade and development	77/160	Entrepreneurship for sustainable development
----------------	-------------------------------------	--------	--

Economic and Social Commission for Asia and the Pacific resolutions

68/3	Enabling paperless trade and the cross-border recognition of electronic data and documents for inclusive and sustainable intraregional trade facilitation	72/3 72/4	Statute of the Asian and Pacific Centre for Transfer of Technology Framework Agreement on Facilitation of Cross-border Paperless Trade in Asia and the Pacific
70/5	Strengthening regional cooperation and capacity for enhanced trade and investment in support of sustainable development	72/12	Harnessing science, technology and innovation for inclusive and sustainable development in Asia and the Pacific
70/6	Implementation of the decision of the Ad Hoc Intergovernmental Meeting on a Regional Arrangement for the Facilitation of Cross-border Paperless Trade	75/8	Advancing science, technology and innovation for the implementation of the 2030 Agenda for Sustainable Development in Asia and the Pacific

**Subprogramme 3
Transport**

General Assembly resolutions

69/213	Role of transport and transit corridors in ensuring international cooperation for sustainable development	76/294 77/286	Political declaration of the high-level meeting on improving global road safety World Sustainable Transport Day
70/197	Towards comprehensive cooperation among all modes of transport for promoting sustainable multimodal transit corridors	78/148	Strengthening the links between all modes of transport to achieve the Sustainable Development Goals
74/299	Improving global road safety		

Economic and Social Commission for Asia and the Pacific resolutions

70/7	Implementation of the Suva Declaration on Improving Maritime Transport and Related Services in the Pacific	72/5	Strengthening regional cooperation on transport connectivity for sustainable development in Asia and the Pacific
71/6	Maritime transport connectivity for sustainable development	74/2	Promotion of the regional framework for the planning, design, development and operation of dry ports of international importance
71/7	Adoption of the Regional Cooperation Framework for the Facilitation of International Railway Transport	74/3	Improving road safety in Asia and the Pacific for sustainable transport systems
71/8	Strengthening intraregional and interregional connectivity in Asia and the Pacific	78/3	Implementation of the Ministerial Declaration on Sustainable Transport Development in Asia and the Pacific

**Subprogramme 4
Environment and development**

General Assembly resolutions

71/222	International Decade for Action, “Water for Sustainable Development”, 2018–2028	77/334	Follow-up to the United Nations Conference on the Midterm Comprehensive Review of the Implementation of the Objectives of the International Decade for Action, “Water for Sustainable Development”, 2018–2028
71/256	New Urban Agenda		
74/212	International Day of Clean Air for blue skies		
75/212	United Nations Conference on the Midterm Comprehensive Review of the Implementation of the Objectives of the International Decade for Action, “Water for Sustainable Development”, 2018–2028	78/128	2025 United Nations Conference to Support the Implementation of Sustainable Development Goal 14: Conserve and sustainably use the oceans, seas, and marine resources for sustainable development
77/158	International Year of Glaciers’ Preservation, 2025	78/155	Implementation of the Convention on Biological Diversity and its contribution to sustainable development
77/169	Harmony with Nature		

Economic and Social Council resolution

2017/24 Human settlements

Economic and Social Commission for Asia and the Pacific resolutions

70/12	Strengthening efforts on human settlements and sustainable urban development for the Asia-Pacific region	79/2	Regional cooperation to accelerate climate action on oceans in Asia and the Pacific for sustainable development
71/9	Strengthening cooperation on sustainable management of water resources in Asia and the Pacific	79/6	Implementation of the Ministerial Declaration on Protecting Our Planet through Regional Cooperation and Solidarity in Asia and the Pacific
72/2	Statute of the Centre for Sustainable Agricultural Mechanization	79/7	Advancing regional cooperation for sustainable urban development and localization of the Sustainable Development Goals in Asia and the Pacific
74/4	Implementation of the Ministerial Declaration on Environment and Development for Asia and the Pacific, 2017		

**Subprogramme 5
Information and communications technology and disaster risk reduction and management**

General Assembly resolutions

70/125	Outcome document of the high-level meeting of the General Assembly on the overall review of the implementation of the outcomes of the World Summit on the Information Society	78/72	International cooperation in the peaceful uses of outer space
		78/120	International cooperation on humanitarian assistance in the field of natural disasters, from relief to development
77/289	Political declaration of the high-level meeting on the midterm review of the Sendai Framework for Disaster Risk Reduction 2015–2030	78/132	Information and communications technologies for sustainable development
		78/152	Disaster risk reduction

Economic and Social Council resolutions

2015/14	Strengthening of the coordination of emergency humanitarian assistance of the United Nations	2018/14	Strategic Framework on Geospatial Information and Services for Disasters
2015/31		2023/3	Assessment of the progress made in the implementation of and follow-up to the outcomes of the World Summit on the Information Society
2016/27	Strengthening institutional arrangements on geospatial information management		

Economic and Social Commission for Asia and the Pacific resolutions and decisions

61/6	Establishment of the Asian and Pacific Training Centre for Information and Communication Technology for Development	72/11	Advancing disaster-related statistics in Asia and the Pacific for implementation of internationally agreed development goals
71/11	Establishment of the Asian and Pacific centre for the development of disaster information management	73/7	Enhancing regional cooperation for the implementation of the Sendai Framework for Disaster Risk Reduction 2015–2030 in Asia and the Pacific
71/12	Strengthening regional mechanisms for the implementation of the Sendai Framework for Disaster Risk Reduction 2015–2030 in Asia and the Pacific	75/5	Implementation of the Ulaanbaatar Declaration of the 2018 Asian Ministerial Conference on Disaster Risk Reduction
72/7	Regional cooperation to combat sand and dust storms in Asia and the Pacific	75/6	Implementation of the Ministerial Declaration on Space Applications for Sustainable Development in Asia and the Pacific and the Asia-Pacific Plan of Action on Space Applications for Sustainable Development (2018–2030)
72/10	Regional review of the implementation of the World Summit on the Information Society action lines		

Part V Regional cooperation for development

75/7	Advancing the implementation of the Asia-Pacific Information Superhighway initiative through regional cooperation	79/9	Implementation of the Jakarta Ministerial Declaration on Space Applications for Sustainable Development in Asia and the Pacific
Decision 78/6	Report of the Governing Council of the Asian and Pacific Centre for the Development of Disaster Information Management	79/10	Promoting digital cooperation and inclusion through the Action Plan for Implementing the Asia-Pacific Information Superhighway Initiative, 2022–2026
79/8	Consideration of the modalities for the establishment of the United Nations special programme for the Aral Sea basin		

**Subprogramme 6
Social development***General Assembly resolutions*

49/128	Report of the International Conference on Population and Development	77/189	Inclusive development for and with persons with disabilities
65/234	Follow-up to the International Conference on Population and Development beyond 2014	77/193	Intensification of efforts to prevent and eliminate all forms of violence against women and girls: gender stereotypes and negative social norms
65/312	Outcome document of the High-level Meeting of the General Assembly on Youth: Dialogue and Mutual Understanding	78/174	Implementation of the outcome of the World Summit for Social Development and of the twenty-fourth special session of the General Assembly
68/4	Declaration of the High-level Dialogue on International Migration and Development		
73/195	Global Compact for Safe, Orderly and Regular Migration	78/176	Preparations for and observance of the thirtieth anniversary of the International Year of the Family
73/326	Format and organizational aspects of the international migration review forums	78/177	Follow-up to the Second World Assembly on Ageing
75/131	United Nations Decade of Healthy Ageing (2021–2030)	78/179	Policies and programmes involving youth
75/156	Strengthening national and international rapid response to the impact of the coronavirus disease (COVID-19) on women and girls	78/181	Improvement of the situation of women and girls in rural areas
75/157	Women and girls and the response to the coronavirus disease (COVID-19)	78/182	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly
75/226	International migration and development		
76/266	Progress Declaration of the International Migration Review Forum	78/211	Effective promotion of the Declaration on the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities

Economic and Social Council resolutions

2016/25	Future organization and methods of work of the Commission on Population and Development	2022/4	Future organization and methods of work of the Commission on the Status of Women
2017/12	Promoting the rights of persons with disabilities and strengthening the mainstreaming of disability in the implementation of the 2030 Agenda for Sustainable Development	2022/5	Thirtieth anniversary of the Fourth World Conference on Women
		2023/12	Future organization and methods of work of the Commission for Social Development
		2023/15	Fourth review and appraisal of the Madrid International Plan of Action on Ageing, 2002

Economic and Social Commission for Asia and the Pacific resolutions and decisions

C. Substantive deliverables				
Databases and substantive digital materials: Asia-Pacific Sustainable Development Goal partnership data portal containing more than 1,000 data sets on the Sustainable Development Goals.				
D. Communication deliverables				
Outreach programmes, special events and information materials: observance of United Nations international days, including United Nations Day; outreach programmes upon demand for the general public, including for academic organizations, for approximately 300 participants.				
External and media relations: press releases and op-ed articles on the work and activities of ESCAP; press conferences/press briefings and press interviews for publications and events.				
Digital platforms and multimedia content: multimedia promotional content, including videos and educational materials for major publications and events; blog posts for the ESCAP website and content for ESCAP social media accounts.				

Evaluation activities

- 19.24 The evaluation conducted by ESCAP of the Asian and Pacific Centre for Transfer of Technology, completed in 2023, has guided the proposed programme plan for 2025.
- 19.25 In response to the results of the evaluation referenced above, ESCAP will create new partnerships with various development institutions to secure funding to implement the priority initiatives of the Asian and Pacific Centre for Transfer of Technology. ESCAP will also enhance the accessibility, flexibility and cost-efficiency of its capacity-building initiatives by offering online training courses focused on technology transfer and commercialization. This strategic move will broaden the reach of the Centre’s capacity-building initiatives, making them more accessible to a more diverse and wider audience.

- 19.26 The following evaluations conducted by ESCAP are planned for 2025:
- (a) Evaluation of the Asian and Pacific Training Centre for Information and Communication Technology for Development;
 - (b) Evaluation of subprogramme 5: Information and communications technology and disaster risk reduction and management.

Programme of work

Subprogramme 1

Macroeconomic policy, poverty reduction and financing for development

Objective

- 19.27 The objective, to which this subprogramme contributes, is to strengthen the capacity of member States to achieve stable, inclusive and sustainable economic development in Asia and the Pacific.

Strategy

- 19.28 To contribute to the objective, the subprogramme will support member States, including countries in special situations, in transforming their economies in a manner that is consistent with the 2030 Agenda, contributing in particular to the achievement of Sustainable Development Goals 1, 8–10, 12 and 17, and promote a development approach that goes beyond the primary focus on economic growth. Specifically, the subprogramme will:
- (a) Support member States in exploring, adopting and mainstreaming economic development policies and financing strategies aligned with the achievement of the Goals, through methodologies developed through and policy recommendations emerging from knowledge products, technical advisory and capacity-building efforts and the facilitation of knowledge exchange and consensus-building among member States;
 - (b) Undertake research, advisory and capacity-building services on country-level policymaking and regional-level sharing of policy experiences, guided by the Committee on Macroeconomic Policy, Poverty Reduction and Financing for Development of the Commission and further supported through the Consultative Group on Financing Strategies for the Sustainable Development Goals;
 - (c) Undertake outreach and follow-up of the subprogramme's research and knowledge products through policy dialogues and closer cooperation of members of the Consultative Group, policy think tanks, resident coordinator offices and United Nations country teams to further integrate the subprogramme's research and capacity-building work;
 - (d) Provide substantive inputs to global and United Nations system-wide processes, task teams and publications coordinated by the Department of Economic and Social Affairs, and to United Nations system-wide initiatives, in particular on financing for development issues.
- 19.29 The above-mentioned work is expected to result in:
- (a) Evidence-based economic policies and development strategies for strengthened economic resilience, inclusive development and environmental sustainability;
 - (b) The strengthened ability of member States, in particular least developed countries, to mobilize and allocate financial resources for sustainable development, including by mainstreaming sustainable development into public and private financing;

- (c) The improved ability of member States to employ economic and financial policy levers to promote the transformation of their economies towards resilient, inclusive and sustainable development pathways.

Programme performance in 2023

Advancement of digital tax administration solutions in Pakistan

- 19.30 The digitalization of tax administration enables a modernized and more efficient tax administration and improves services for taxpayers. It can also contribute to a reduction in tax evasion and avoidance through enhanced monitoring and detection.
- 19.31 Upon direct request from the Federal Board of Revenue of Pakistan, the subprogramme provided technical support to its efforts to strengthen the tax administration of Pakistan through four digital tools: track and trace systems, e-withholding taxes, e-invoicing and point-of-sale systems. The support comprised an international conference on the digitalization of tax administration held in the Federal Board of Revenue headquarters in Islamabad in June 2023, an extensive technical report on the four areas of interest to the Board, with an overview of the Commission’s international and regional experience and detailed recommendations, and a technical training workshop for officials of the Board on data analysis tools to enhance tax compliance held at the Inland Revenue Service Academy in Lahore in October 2023.
- 19.32 Progress towards the objective is presented in the performance measure below (see table 19.2).

Table 19.2
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	Tax administration officials from Asia and the Pacific, including Pakistan, exchanged knowledge on the digitalization of tax administration in Asia and the Pacific to identify challenges and solutions	Federal Board of Revenue of Pakistan officials launched four key projects to digitalize the tax administration

Planned results for 2025

Result 1: strengthened financing for sustainable development, with a focus on innovative and emerging financing options in the Asia-Pacific region

Programme performance in 2023 and target for 2025

- 19.33 The subprogramme’s work contributed to three member States (Bhutan, Cambodia and Sri Lanka) implementing national strategies and policy initiatives to strengthen financing and resource mobilization and allocation for sustainable development, which met the planned target.
- 19.34 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 19.3).

Table 19.3
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
New policy initiatives or reforms by three member States (Bangladesh, Cambodia and Vanuatu) to strengthen financing and resource mobilization and allocation for sustainable development	New policy initiatives or reforms by three member States (Bangladesh, Bhutan and Cambodia) to strengthen financing and resource mobilization and allocation for sustainable development	New policy initiatives or national strategies by three member States (Bhutan, Cambodia and Sri Lanka) to strengthen financing and resource mobilization and allocation for sustainable development	New policy initiatives or reforms by three member States to strengthen financing and resource mobilization and allocation for sustainable development	New policy initiatives or reforms by three member States to strengthen financing and resource mobilization and allocation for sustainable development

Result 2: engagement of member States for evidence-based and forward-looking macroeconomic policymaking aligned with the Sustainable Development Goals

Programme performance in 2023 and target for 2025

- 19.35 The subprogramme’s work contributed to the relevant ministries of three member States (Cambodia, Mongolia and Sri Lanka) engaging on the organization of substantive macroeconomic policy dialogues on rethinking public debt, which met the planned target.
- 19.36 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 19.4).

Table 19.4
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
National policy dialogues on substantive macroeconomic policy involved policymakers as participants	National policy dialogues on substantive macroeconomic policy involved policymakers as participants	Relevant ministries of three member States (Cambodia, Mongolia and Sri Lanka) engaged on the organization of substantive macroeconomic policy dialogues on rethinking public debt	Relevant ministries of an increasing number of member States engage on the organization of substantive macroeconomic policy dialogues	Relevant ministries of three or more member States engage on the organization of substantive macroeconomic policy dialogues

Result 3: improved policymaking for macroeconomic and financing for development issues

Proposed programme plan for 2025

- 19.37 Based on its mandate to support macroeconomic policymaking and financing sustainable development, the subprogramme has provided in-depth analyses of global and regional trends and emerging challenges in these areas.

Lessons learned and planned change

- 19.38 The lesson for the subprogramme was that strengthening updates on the subprogramme’s policy research, monitoring the usage of its research products and interacting directly with policymakers could increase the policy impact of its analytical work. In applying the lesson, the subprogramme plans to make the content and presentation of its analytical products more user-friendly. Additional efforts will be made to disseminate the knowledge to policymakers and devise more detailed feedback and follow-up mechanisms regarding the usefulness and influence of its research products to policymakers.
- 19.39 Expected progress towards the objective is presented in the performance measure below (see table 19.5).

Table 19.5
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Member States accessed macroeconomic policy knowledge and recommendations through the ESCAP website	Member States benefited from updates on policy research through the Consultative Group on Financing Strategies for the Sustainable Development Goals	Policymakers engaged in interactive discussions with experts through policy dialogues on flagship publications	At least 60 per cent of policymakers acknowledge policy awareness on emerging macroeconomic and financing for development issues	At least 65 per cent of policymakers acknowledge strengthened policy awareness on emerging macroeconomic and financing for development issues

Deliverables

- 19.40 Table 19.6 lists all deliverables of the subprogramme.

Table 19.6

C. Substantive deliverables				
Consultation, advice and advocacy: side event on financing for development at the Economic and Social Council; Asia-Pacific side event at the fourth Financing for Development Summit; side event at the Conference of the Parties to the United Nations Framework Convention on Climate Change; side events at the Asia-Pacific Forum on Sustainable Development.				
D. Communication deliverables				
Outreach programmes, special events and information materials: presentations, videos, brochures and infographics on the <i>Economic and Social Survey of Asia and the Pacific</i> .				

Subprogramme 2 Trade, investment and innovation

Objective

- 19.41 The objective, to which this subprogramme contributes, is to strengthen the capacity of member States to implement policies and programmes that more effectively harness the potential of trade, investment, innovation, technology and enterprise development for inclusive and sustainable development and regional integration in Asia and the Pacific.

Strategy

- 19.42 To contribute to the objective, the subprogramme will:
- (a) Support member States in formulating and implementing policies and measures to promote and facilitate trade, investment, innovation and enterprise development in support of inclusive and sustainable development, with a specific focus on the needs of countries in special situations, including countries on the cusp of graduation from least developed country status;
 - (b) Build the capacity of member States, in cooperation with global and regional partners, such as the Asian Development Bank, the United Nations Conference on Trade and Development and the World Trade Organization, to negotiate and implement trade agreements aligned with the 2030 Agenda and to design and implement trade and investment facilitation policies and measures, including through the adoption of paperless trade systems;

- (c) Provide capacity-building in close cooperation with the Asian and Pacific Centre for Transfer of Technology, including workshops, training activities and policy advice; develop knowledge products on sustainable foreign direct investment (FDI), innovation, technology cooperation and transfer, emerging and frontier technologies, responsible and inclusive business, social enterprise, impact investment and innovative finance for women's entrepreneurship; and support member States in making progress towards the achievement of Sustainable Development Goals 3, 5–9, 11, 13 and 17;
- (d) Support member States in the areas of trade facilitation and support trade digitization, such as paperless and contactless trade, as appropriate, in particular to maintain trade flows of critical goods in times of global and regional crises;
- (e) Support member States in formulating policies for sustainable FDI, infrastructure financing and micro-, small and medium-sized enterprises, with a key focus on private sector engagement through the ESCAP Sustainable Business Network and on developing innovative financial and digital tools to support women entrepreneurs with a view to reducing vulnerabilities;
- (f) Support regional cooperation platforms and expand expert networks in the areas of trade, investment, technology, innovation and inclusive and sustainable business, including through public-private partnerships, for knowledge transfer and peer learning.

19.43 The above-mentioned work is expected to result in:

- (a) Reduced trade costs and increased participation and competitiveness of companies, especially micro-, small and medium-sized enterprises, in international trade;
- (b) The adoption by member States of more effective rules and procedures governing trade, leading to more efficient trade outcomes aligned with the Sustainable Development Goals;
- (c) The adoption by member States of policies and measures aimed at achieving more inclusive and sustainable outcomes of private sector activities, including public-private partnerships;
- (d) The integration of inclusive and sustainable practices into technology and innovation policies in the region;
- (e) The increased resilience of supply chains by enabling continued trade activities and using technology and innovation to mitigate the impact of crises.

Programme performance in 2023

Women entrepreneurs access financial services through innovative financing mechanisms

19.44 The International Finance Corporation estimates a gap of \$300 billion¹ worldwide in financing for formal, women-owned small businesses alone. Meanwhile more than 1 billion women still do not have access to formal financial systems and 70 per cent of women-owned small and medium-sized enterprises globally have inadequate or no access to financial services. In fact, women-owned and women-led companies secure, on average, 2 per cent of global venture capital investments² currently available.

19.45 From 2021 to 2023, the subprogramme has helped to address the gender-finance gap in Asia and the Pacific through the implementation of innovative financing mechanisms, with a strategic focus on supporting women entrepreneurs across the region. Under the Commission's initiative on catalysing women's entrepreneurship, women entrepreneurs, including those in least developed countries and small island developing States, accessed financing for their businesses. This was achieved through mechanisms that include fintech solutions, an investing fund and bonds which mainstream a gender perspective, the execution of two challenge funds, and the provision of credit guarantees.

¹ See www.ifc.org/content/dam/ifc/doc/mgrt/banking-on-women-bonds-factsheet-november-2015-rev.pdf.

² See www.unwomen.org/sites/default/files/2023-12/booklet-gender-finance-2023-en.pdf.

19.46 Progress towards the objective is presented in the performance measure below (see figure 19.I).

Figure 19.I

Performance measure: value of additional capital leveraged towards women’s entrepreneurship objectives (cumulative)

(United States dollars)

Planned results for 2025

Result 1: strengthened commitment of the private sector in support of the Sustainable Development Goals in Asia and the Pacific

Programme performance in 2023 and target for 2025

19.47 The subprogramme’s work contributed to 298 private sector organizations adopting the Asia-Pacific Green Deal for business, 93 of which were small and medium-sized enterprises, which met the planned target.

19.48 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 19.7).

Table 19.7

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
The private sector developed a draft of an Asia-Pacific Green Deal for businesses and gave its full support thereto	A total of 81 private sector organizations, including 33 small and medium-sized enterprises, adopted the Asia-Pacific Green Deal for Business	A total of 298 private sector organizations adopted the Asia-Pacific Green Deal for business, 93 of which were small and medium-sized enterprises	There is a further increase in the number of private sector organizations that sign a declaration on the Asia-Pacific Green Deal for Business, of which the majority are small and medium-sized enterprises	Private sector organizations start to track their emissions or other sustainability metrics, inter alia, by way of the Asia-Pacific Green Deal for Business digital platform

Result 2: enhanced policy measures to promote inclusive business for sustainable development
Programme performance in 2023 and target for 2025

- 19.49 The subprogramme’s work contributed to 1 member State (Viet Nam) implementing an inclusive business accreditation system, and 10 member States endorsing a plan of action for the promotion of inclusive business in the Association of Southeast Asian Nations (ASEAN) for 2023–2027, and issuing a declaration on promoting inclusive business models in ASEAN, which met the planned target.
- 19.50 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 19.8).

Table 19.8
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	Member States (Cambodia, Philippines and Viet Nam) implemented measures to promote inclusive businesses	Viet Nam implemented an inclusive business accreditation system 10 member States endorsed a plan of action for the promotion of inclusive business in ASEAN (2023–2027), and issued a declaration on promoting inclusive business models in ASEAN	Additional policy measures developed by member States to promote inclusive businesses	2 key policy measures to support the implementation of a plan of action for the promotion of inclusive business in ASEAN (2023–2027) designed: an ASEAN inclusive business accreditation system and a framework to monitor and evaluate the progress of the plan of action

Result 3: more sustainable and efficient trade processes through increased digital and sustainable trade facilitation measures

Proposed programme plan for 2025

- 19.51 The subprogramme has a long-standing programme on trade facilitation to help lower trade costs and enable countries to integrate into regional and global value chains, with a focus on supporting member States in implementing cross-border paperless trade processes, including through the implementation of the Framework Agreement on Facilitation of Cross-border Paperless Trade in Asia and the Pacific.

Lessons learned and planned change

- 19.52 The lesson for the subprogramme was that trade facilitation measures that can be tailored to various stakeholder groups can help maximize their contribution to inclusive and sustainable development. In applying the lesson, the subprogramme will support countries, particularly countries in special situations, to develop more inclusive and sustainable trade facilitation programmes. Research and capacity-building activities on trade facilitation will be undertaken to ensure that the needs of women traders, small and medium-sized enterprises and other disadvantaged populations are more fully taken into account, including in the implementation of cross-border paperless trade. The subprogramme will also implement awareness-raising and capacity-building activities to mitigate the environmental impact associated with trade procedures and to facilitate the sustainability of trade.
- 19.53 Expected progress towards the objective is presented in the performance measure below (see figure 19.II).

Figure 19.II
Performance measure: implementation rate of digital and sustainable trade facilitation measures in Asia and the Pacific (annual)

(Percentage)

23. Policy briefs on trade, investment, and innovation	4	4	3	3
24. Reports on trade facilitation and paperless trade implementation	1	1	1	1
25. <i>Asia-Pacific Tech Monitor</i>	4	4	4	4

C. Substantive deliverables

Consultation, advice and advocacy: advisory services on trade, investment, innovation, inclusive and sustainable business, technology cooperation and transfer, and emerging and frontier technologies; regional knowledge networks linking researchers, policymakers and practitioners in trade, investment, innovation and inclusive and sustainable business, including the Asia-Pacific Research and Training Network on Trade and the United Nations Network of Experts for Paperless Trade and Transport in Asia and the Pacific; advisory support for the task forces of the ESCAP Sustainable Business Network; side events on trade, investment and innovation at the Asia-Pacific Forum on Sustainable Development.

Databases and substantive digital materials: two online courses and databases on trade, investment and innovation; the comprehensive trade cost database; the Asia-Pacific Trade and Investment Agreements Database; trade performance indicators on non-tariff measures; the online Trade Intelligence and Negotiation Adviser.

D. Communication deliverables

Outreach programmes, special events and information materials: country fact sheets, multimedia materials and briefings on trade, investment, innovation and inclusive and sustainable business.

Subprogramme 3 Transport

Objective

- 19.55 The objective, to which this subprogramme contributes, is to achieve sustainable transport connectivity, logistics and mobility in the Asia-Pacific region.

Strategy

- 19.56 To contribute to the objective, the subprogramme will:
- Serve as the secretariat for the Intergovernmental Agreement on the Asian Highway Network, the Intergovernmental Agreement on the Trans-Asian Railway Network and the Intergovernmental Agreement on Dry Ports, and provide technical expertise to the intergovernmental deliberations of the relevant working groups, including on operational issues and issues of particular relevance to landlocked developing countries;
 - Provide technical assistance and conduct related research and analysis on land and maritime transport, with due consideration for the specific needs of landlocked developing countries and small island developing States, focusing on enhanced operational connectivity through

promoting knowledge products and best practices, including efficient operational arrangements and harmonized legal frameworks for multimodal transport, and facilitate systematic regional and, as appropriate, interregional dialogue to foster regional and interregional connectivity;

- (c) Facilitate the exchange of good practices on the utilization of new and emerging technologies, and support the wider deployment of smart transport systems through the development of a regional road map and by raising awareness through knowledge products and capacity development;
 - (d) Undertake policy advocacy and capacity-building in the areas of sustainable urban transport and low greenhouse gas emissions and logistics, including by promoting and facilitating an accelerated transition to electric mobility, clean and energy-efficient transport and environmentally friendly supply chains;
 - (e) Provide technical assistance in the areas of road safety and inclusive transport and mobility, including through a regional plan of action for road safety and regional guidelines addressing accessibility, to support reductions in poverty and inequality and promote inclusive transport for people with different travel requirements, including but not limited to women, children, older persons, low-income transport users, rural inhabitants and persons with disabilities.
- 19.57 These workstreams will support member States in making progress towards the achievement of Sustainable Development Goals 3, 7, 9, 11–13 and 17 and the objectives of the Regional Action Programme for Sustainable Transport Development in Asia and the Pacific (2022–2026).
- 19.58 The above-mentioned work is expected to result in:
- (a) A more sustainable, efficient and resilient transport infrastructure along the regional transport networks (Asian highways, trans-Asian railways and dry ports) and at maritime ports to support freight and, where appropriate, passenger operations that are affordable, safe, accessible and environmentally friendly;
 - (b) Enhanced regional land, maritime and interregional transport connectivity to preserve regional and interregional transport linkages and foster regional cooperation to support interregional and intraregional trade and people connectivity;
 - (c) The formulation and implementation of sustainable transport and mobility policy initiatives in member countries, including the planning and development of urban public transport systems, measures and mechanisms to promote the use of low-greenhouse-gas-emission transport and smart mobility approaches, and measures to improve transport safety and promote inclusive transport in the region.

Programme performance in 2023

Increased coverage of the regional land transport network in Asia and the Pacific

- 19.59 The subprogramme supports member States in the development of the regional land transport network. Greater network coverage helps improve the efficiency and resiliency of transport connectivity in the region while enabling more countries to enjoy the economic and social benefits of greater connectivity. Designating roads, rail routes and dry ports mentioned, respectively, in the Intergovernmental Agreements on the Asian Highway Network, on the Trans-Asian Railway Network and on Dry Ports, as part of regional transport corridors also helps countries consolidate international freight flows and reduce transport time and delays. It allows countries to benefit from economies of scale in their infrastructure investments, helping them cope with the growing demand for freight transport in Asia and the Pacific.
- 19.60 The coordinated development of the regional transport network is formalized by the Intergovernmental Agreements on the Asian Highway Network, on the Trans-Asian Railway Network and on Dry Ports. In 2023, the subprogramme provided logistical and substantive support to the Working Groups on the Asian Highway, on the Trans-Asian Railway Network and on Dry

Ports for the intergovernmental process of deliberations among parties to the Agreements and the adoption of a set of amendments expanding the coverage of their respective networks.

19.61 Progress towards the objective is presented in the performance measure below (see figure 19.III).

Figure 19.III

Performance measure: number of roads designated as Asian highways in Asia and the Pacific

Planned results for 2025

Result 1: leveraged regional transport network to address the environmental dimension of transport development and international supply chains

Programme performance in 2023 and target for 2025

19.62 The subprogramme’s work contributed to member States welcoming the set-up of an inventory of best practices for low emissions and resilient infrastructure along the Asian Highway Network to address the environmental dimension of transport development and operations, which met the planned target.

19.63 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 19.10).

Table 19.10

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Countries utilized the Working Groups on the Asian Highway, on the Trans-Asian Railway Network and on Dry Ports to discuss a regional approach towards enhancing the sustainability of freight transport, listing the environmental dimension of transport development among its priorities	Several member States (China, India, Russian Federation and Thailand) fulfilled their transport-related emission reduction commitments, including the development of long-term policies and road maps to accelerate the transition to electric mobility to support climate action (China, India and Thailand)	Member States welcomed the set-up of an inventory of best practices for low emissions and resilient infrastructure along the Asian Highway Network to address the environmental dimension of transport development and operations	Members of the existing intergovernmental working groups and initiatives introduce more ambitious policy measures to address the environmental dimension of freight transport operations	Member States implement low-emission transport measures

Result 2: enhanced policies for safe and inclusive transport and mobility

Programme performance in 2023 and target for 2025

- 19.64 The subprogramme’s work contributed to three member States (Bangladesh, Islamic Republic of Iran and Lao People’s Democratic Republic) formulating national road safety policies and initiatives to improve road safety, which met the planned target.
- 19.65 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 19.11).

Table 19.11
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
ESCAP member States agreed to include safe and inclusive transport in the Regional Action Programme for Sustainable Transport Development in Asia and the Pacific (2022–2026) as one of its three overarching objectives	The Regional Plan of Action for Asia and the Pacific for the Second Decade of Action for Road Safety 2021–2030 was welcomed by the Committee on Transport ESCAP member States contributed to the development of regional guidelines on enhancing social inclusion and innovations in urban transport systems in Asia-Pacific cities	Bangladesh, the Islamic Republic of Iran and the Lao People’s Democratic Republic formulated national road safety policies and initiatives to improve road safety	Three additional member States formulate national measures to reduce road traffic deaths and injuries by at least 50 per cent between 2021 and 2030	Three additional member States, including a least developed country, formulate national measures to reduce road traffic deaths and injuries by at least 50 per cent between 2021 and 2030

Result 3: increased efficiency and resilience of transport connectivity and logistics networks in Asia and the Pacific

Proposed programme plan for 2025

- 19.66 Increasing the efficiency and resilience of transport connectivity and logistics is one of the three objectives of the Regional Action Programme for Sustainable Transport Development in Asia and the Pacific (2022–2026). The subprogramme has been facilitating negotiations among parties within the context of the Intergovernmental Agreements on the Asian Highway Network, on the Trans-Asian Railway Network and on Dry Ports to further extend and upgrade the regional transport network.

Lessons learned and planned change

- 19.67 The lesson for the subprogramme was that parties to the Agreements could benefit from greater support on amending transport routes involving border-crossing points. In applying the lesson, the subprogramme will develop guidance materials to facilitate countries’ deliberations with regard to identifying the transboundary implications of proposed changes to the segments of transport networks. The subprogramme will provide timely consultations to the countries proposing new amendments to the Agreements.
- 19.68 Expected progress towards the objective is presented in the performance measure below (see table 19.12).

Table 19.12
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Member States confirmed that further development of the transport networks was necessary for greater connectivity in Asia and the Pacific	Member States proposed amendments to the coverage of the eight Asian Highway routes and eight Trans-Asian Railway routes	Member States adopted amendments to 5 Asian Highway routes and 2 Trans-Asian Railway routes	Increased consultations among the relevant member States on amendment proposals involving international border crossings	Member States consider the proposed amendments to the configuration of transport networks

Deliverables

19.69 Table 19.13 lists all deliverables of the subprogramme.

 Table 19.13
Subprogramme 3: deliverables for the period 2023–2025, by category and subcategory

Outreach programmes, special events and information materials: infographics on road safety for regional and global access.				

Subprogramme 4 Environment and development

Objective

- 19.70 The objective, to which this subprogramme contributes, is to enhance the environmental sustainability of development in a holistic and integrated manner and to improve human well-being in urban and rural environments through building the capacity of member States to strengthen integrated environmental policies and sustainable management of natural resources, realize inclusive and sustainable urban development and reduce pollution and waste.

Strategy

- 19.71 To contribute to the objective, the subprogramme will:
- (a) Support member States in the development of ambitious climate action policies and plans aligned with the Paris Agreement and the decisions adopted by the Commission and the Committee on Environment and Development, and support the implementation of these policies and plans at the regional, national, subnational and local levels;
 - (b) Review status and trends related to the common environment and the health impacts of environmental degradation in Asia and the Pacific, follow up on the outcomes of the Ministerial Declaration on Protecting Our Planet through Regional Cooperation and Solidarity in Asia and the Pacific, and provide technical support for integrated policies to promote and strengthen conservation, management and sustainable use approaches, such as nature-based solutions and ecosystem-based approaches, sustainable food systems, pollution management and participatory approaches in environmental matters, including through multi-stakeholder partnerships and engagement, including with youth and persons with disabilities, local communities and Indigenous Peoples, while taking into account a gender perspective;
 - (c) Promote regional cooperation, including through the operationalization of the Regional Action Programme on Air Pollution and the commemoration of the International Day of Clean Air for blue skies, to provide opportunities for partnership-building, dialogues and the exchange of best practices on air quality management, complemented by technical support to member States on the assessment of air quality, standards and data;
 - (d) Build the capacity of national, subnational and local officials to strengthen sustainable urban planning processes; provide technical and policy support for the local review and implementation of the Sustainable Development Goals; facilitate the adoption of urban resilience strategies, the application of people-centred smart city systems and the financing of climate-resilient urban infrastructure; and increase awareness of sustainable and inclusive

urban solutions, including issues related to socioeconomic development, the right to a clean, healthy and sustainable environment, resource consumption, infrastructure planning, air pollution, climate change and disaster risk reduction;

- (e) Support regional cooperation to protect ocean and marine ecosystems for sustainable development, including by coordinating the regional implementation of the United Nations Decade of Ocean Science for Sustainable Development, by, inter alia, providing participatory, multi-stakeholder dialogue platforms such as the Asia-Pacific Day for the Ocean, and by promoting the implementation of international conventions and region-wide initiatives, as appropriate.

19.72 The above-mentioned strategy will help support member States in their progress towards the achievement of Sustainable Development Goals 2, 3, 6, 11–15 and 17.

19.73 The above-mentioned work is expected to result in:

- (a) Enhanced action to address climate change through accelerating the implementation of the Paris Agreement and the Regional Action Programme on Air Pollution in Asia-Pacific countries;
- (b) Increased sustainability and resilience of communities and reduced negative impacts of urbanization;
- (c) Enhanced action to protect the environment and support the transition to conservation, management and sustainable use approaches, such as nature-based solutions and ecosystem-based approaches, especially healthy oceans and food systems;
- (d) Advancement of subregional frameworks to promote participatory approaches in environmental matters;
- (e) Sustainable, low-emission and climate-resilient development for countries graduating from least developed country status;
- (f) Strengthened and revitalized multilateral cooperation on environmental action.

Programme performance in 2023

Strengthened policies on climate action towards low emissions and net-zero targets at regional, national, subnational and local levels

19.74 A themed study on transitioning to a net-zero future was published in 2023 to support member States in accelerating climate action in Asia and the Pacific. In the study, the regional context of climate change was outlined and policies and actions that could be taken in various sectors of the economy to support the global climate agenda were identified. ESCAP resolution 79/1 was adopted by member States with the goal of increasing their commitments to reducing greenhouse gas emissions and achieving net-zero emissions by mid-century. A technical cooperation project was initiated with five countries with the aim of transitioning towards low emissions and resilient urban development. Direct technical support was mostly aimed at countries in special situations.

19.75 Progress towards the objective is presented in the performance measure below (see figure 19.IV).

Figure 19.IV
Performance measure: number of Asia-Pacific countries that benefited from the Commission’s guidance and support in developing policies on climate action aimed at achieving low emissions and net-zero targets (cumulative)

Planned results for 2025

Result 1: accelerated implementation of climate action

Programme performance in 2023 and target for 2025

- 19.76 The subprogramme’s work contributed to 24 Asia-Pacific countries developing long-term, low-carbon and low-emissions development strategies and 8 Asia-Pacific countries developing local climate and/or air pollution action plans, which exceeded the planned target of 10 and 5 countries, respectively.
- 19.77 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 19.V).

Figure 19.V
Performance measure: number of Asia-Pacific countries that develop local climate and/or air pollution action plans and long-term, low-carbon and low-emissions development and recovery strategies (cumulative)

Result 2: local governments localize the Sustainable Development Goals and contribute to national climate strategies

Programme performance in 2023 and target for 2025

- 19.78 The subprogramme’s work contributed to three cities developing voluntary local reviews and/or Sustainable Development Goal localization plans, applying the regional guidelines for voluntary local reviews developed by the subprogramme in 2020, including for cities in countries in special situations, which met the planned target.
- 19.79 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 19.VI).

Figure 19.VI
Performance measure: number of cities developing voluntary local reviews and/or Sustainable Development Goal localization plans with the direct support of the Commission (annual)

Result 3: member States in Asia and the Pacific increase cooperation to advance participatory approaches on environmental matters

Proposed programme plan for 2025

- 19.80 In the Ministerial Declaration on Protecting Our Planet through Regional Cooperation and Solidarity in Asia and the Pacific, member States reaffirmed that a clean, healthy and sustainable environment is important for sustainable development.

Lessons learned and planned change

- 19.81 The lesson for the subprogramme was that expanding the focus of its partnerships can help to promote participatory approaches in environmental matters in the region. In applying the lesson, the subprogramme plans to facilitate deliberations among member States, relevant ESCAP subprogrammes and other United Nations entities, as appropriate, to provide comprehensive, unified and coherent support. It will offer intraregional learning activities, providing a space for subregions to exchange lessons learned and best practices to promote participatory approaches in environmental matters.
- 19.82 Expected progress towards the objective is presented in the performance measure below (see table 19.14).

Table 19.14
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
A subregional dialogue enhanced the capacity of member States to mainstream participatory approaches in environmental matters	Member States agreed on institutional arrangements to strengthen participatory approaches	Member States enhanced subregional cooperation to promote participatory approaches	Member States consider modalities for promoting participatory approaches	Member States take steps to institutionalize modalities for participation

Deliverables

19.83 Table 19.15 lists all deliverables of the subprogramme.

Table 19.15
Subprogramme 4: deliverables for the period 2023–2025, by category and subcategory

27. On agricultural machinery	3	3	3	3

C. Substantive deliverables

Consultation, advice and advocacy: advisory services on environment and development; side events on environment and development at the Asia-Pacific Forum on Sustainable Development.

Databases and substantive digital materials: 16 e-learning courses on the environment and the implementation of the 2030 Agenda.

D. Communication deliverables

Outreach programmes, special events and information materials: information material on agricultural mechanization; the International Year of Glaciers' Preservation, the International Day of Clean Air for blue skies, World Cities Day, World Environment Day and World Habitat Day.

Subprogramme 5 Information and communications technology and disaster risk reduction and management

Objective

- 19.84 The objective, to which this subprogramme contributes, is to strengthen regional cooperation on information and communications technology (ICT), space technology applications and disaster risk reduction and management for resilient and sustainable development in Asia and the Pacific through the sharing of information and best practices.

Strategy

- 19.85 To contribute to the objective, the subprogramme will support member States in making progress towards the achievement of Sustainable Development Goals 1, 4, 5, 9–11, 13–15 and 17 by developing norms for secure and inclusive digital connectivity, geospatial data-sharing and disaster risk reduction and resilience-building, supported by policy analysis and evidence-based research. Specifically, the subprogramme will:
- Build capacity, especially of countries in special situations, in the above-mentioned areas, anchored in regional cooperation mechanisms that promote technical cooperation through the South-South and North-South modalities and are augmented by the programmes of the Asian and Pacific Training Centre for Information and Communication Technology for Development and the Asian and Pacific Centre for the Development of Disaster Information Management;

- (b) Promote regional policy dialogue, knowledge exchange and cooperation on transboundary challenges related to connectivity and disaster risks, including those related to major development challenges such as climate change;
- (c) Under the Action Plan for Implementing the Asia-Pacific Information Superhighway Initiative, 2022–2026, carry out studies on the digital divide, assess policy and regulatory frameworks and provide policy recommendations for inclusive digital transformation, supplemented by advocacy, networking and partnerships in support of regionally agreed frameworks;
- (d) Guided by the Jakarta Ministerial Declaration on Space Applications for Sustainable Development in Asia and the Pacific and the Asia-Pacific Plan of Action on Space Applications for Sustainable Development (2018–2030), assist member States in harnessing recent advances in space technology applications and geospatial data, facilitate timely and expanded access to space-derived geospatial data, pool expertise and resources at the regional and subregional levels, promote the sharing of knowledge and good practices and create synergies with other existing regional initiatives, as appropriate and upon their request;
- (e) Augment and leverage subregional and regional cooperation in disaster risk reduction, adaptation and climate-resilient pathways for action, including through the implementation of the activities of the Asia-Pacific Disaster Resilience Network and the ESCAP multi-donor trust fund for tsunami, disaster and climate preparedness, and disaster information management services provided by the Asian and Pacific Centre for the Development of Disaster Information Management, including the activities under the Regional Plan of Action on Sand and Dust Storms in Asia and the Pacific;
- (f) Further build the resilience of human and institutional capacity, in particular by providing assistance in the facilitation of inclusive use of digital solutions, such as the use of actionable disaster risk analytics and geospatial data applications and the provision of targeted solutions for the special needs of countries that face a high disaster risk.

19.86 The above-mentioned work is expected to result in:

- (a) The bridging of the digital divide, and the appropriate use of digital solutions for transformation;
- (b) Countries of the region applying a transformative adaptation approach to combat climate change in order to leave no one behind;
- (c) Enhanced applications by member States of integrated geospatial information to support transformative adaptation and accelerate the implementation of the Sustainable Development Goals.

Programme performance in 2023

Enhanced women's digital skills in Asia and the Pacific

19.87 The subprogramme developed the Women ICT Frontier Initiative programme to foster women's economic empowerment and thus create more inclusive and sustainable societies. The programme applies a gender-sensitive approach to innovation, technology and digital education and promotes women's entrepreneurship by strengthening the ICT capabilities of women entrepreneurs to enhance the productivity, growth and sustainability of their enterprises. Since its launch, the programme has been providing on-site training as well as e-learning courses in the local language of the beneficiaries, promoting accessibility and lifelong learning. Building new partnerships with various stakeholders further amplified the reach and impact of the programme across diverse sectors of society. The programme has been implemented in 22 countries and has reached various beneficiaries, including not only women entrepreneurs but also students, youth, older persons and persons with disabilities.

19.88 Progress towards the objective is presented in the performance measure below (see figure 19.VII).

Figure 19.VII
Performance measure: number of participants of the Women ICT Frontier Initiative with enhanced digital skills (cumulative)

Planned results for 2025

Result 1: augmented use of geospatial data for accelerating Sustainable Development Goal monitoring and implementation

Programme performance in 2023 and target for 2025

19.89 The subprogramme’s work contributed to the establishment of the Central Asia Drought Information System in Kyrgyzstan and the use of satellite data to improve air quality monitoring in the Philippines as part of the subprogramme’s effort to build capacities for integrating geospatial and sectoral data for monitoring and implementation of the Sustainable Development Goals, which met the planned target.

19.90 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 19.16).

Table 19.16
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Members and associate members gained access to training and tools to enhance the use of geospatial data	Three countries (Indonesia, Sri Lanka and Thailand) initiated policy actions or projects on integrating geospatial and sectoral data for monitoring and implementation of the Sustainable Development Goals	Kyrgyzstan established the Central Asia Drought Information System and the Philippines used satellite data to improve air quality monitoring	Increased availability of geospatial and sectoral data for tracking progress on the Sustainable Development Goals in two countries	Five countries, including at least three countries in special situations, capitalize on digitally driven geospatial applications to accelerate progress on the Sustainable Development Goals

Result 2: strengthened national and subregional frameworks on disaster risk reduction and climate adaptation

Programme performance in 2023 and target for 2025

- 19.91 The subprogramme’s work contributed to two subregional organizations (ASEAN and the Pacific Islands Forum Secretariat) and the Group of 20 adopting disaster risk reduction and climate adaptation frameworks in line with the Sendai Framework for Disaster Risk Reduction and supporting the Early Warnings for All initiative, which met the planned target.
- 19.92 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 19.17).

Table 19.17
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
ASEAN member countries translated the declaration into an action plan	Three countries (Indonesia, Lao People’s Democratic Republic and Thailand) translated the action plans into national strategies	Two subregional organizations (ASEAN and the Pacific Islands Forum Secretariat) and the Group of 20 adopted disaster risk reduction and climate adaptation frameworks in line with the Sendai Framework for Disaster Risk reduction and supported the Early Warnings for All initiative	Two additional subregional organizations adopt disaster risk reduction and climate adaptation frameworks and support the Early Warnings for All initiative	Three countries adopt national frameworks to make progress towards the Early Warnings for All initiative by 2027

Result 3: increased adoption of digitally driven innovations to enable transformative adaptation to climate change

Proposed programme plan for 2025

- 19.93 As reflected in the Sixth Assessment Report of the Intergovernmental Panel on Climate Change, Asia and the Pacific is exposed to complex disaster risks that are forecast to increase under all climate warming scenarios. Digitally driven innovations are expected to be positive enablers for transformative adaptation to climate change.

Lessons learned and planned change

- 19.94 The lesson for the subprogramme was that its technical- and capacity-building could be further optimized by leveraging accessible, cost-efficient, scalable and interoperable technologies. In applying the lesson, the subprogramme will implement approaches that can be rapidly scaled, and customized, as appropriate. Through South-South cooperation and partnerships, the subprogramme will increasingly deploy massive open online courses and relevant technology applications, integrate data delivery and provide policy support on data governance.
- 19.95 Expected progress towards the objective is presented in the performance measure below (see table 19.18).

Table 19.18
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Member States gained access to disaster risk data analytics	All ESCAP subregions gained access to downscaled climate scenario data through the ESCAP Risk and Resilience Portal	Member States accessed an updated version of disaster risk data analytics	Two countries make progress in achieving transformative adaptation in agriculture or the energy sector	Two additional countries make progress in achieving transformative adaptation in agriculture or the energy sector

Deliverables

19.96 Table 19.19 lists all deliverables of the subprogramme.

C. Substantive deliverables

Consultation, advice and advocacy: advisory services for working groups on disaster risk reduction and resilience, including the Issue-Based Coalition on Building Resilience; advice to the task forces of the ESCAP Sustainable Business Network; advice for committees and consultations with organizations on issues related to disaster risk reduction, space applications and ICT; briefing notes on digital development for senior government officials from ICT-related ministries and agencies; and advice on data governance for risk-informed development.

Databases and substantive digital materials: ESCAP Risk and Resilience Portal; digital materials on space technology applications for regional and global access; geospatial practices database and dashboard with 50 new data entries and 10 institutional users; digital material for the development and management of disaster information databases and spatial data infrastructure; two new e-learning courses of the Asian and Pacific Training Centre for Information and Communication Technology for Development and guidance on impact-based forecasting and early warning.

D. Communication deliverables

Outreach programmes, special events and information materials: International Day of Science, Technology and Innovation for the South.

Digital platforms and multimedia content: multimedia training content on disaster information management.

Subprogramme 6 Social development

Objective

- 19.97 The objective, to which this subprogramme contributes, is to realize inclusive and equitable societies that protect, empower and leave no one behind in Asia and the Pacific, with a focus on population and development, social protection, disability, and gender equality and the empowerment of women.

Strategy

- 19.98 To contribute to the objective, the subprogramme will bring together Governments on critical issues related to social development in the region and inform these intergovernmental processes through analysis and by drawing upon the complementary strengths of ESCAP through its regional convening power and the capacity of United Nations agencies, funds and programmes to support national implementation to advance the Sustainable Development Goals. Specifically, the subprogramme will:
- (a) Support Governments in the continued implementation of the Programme of Action of the International Conference on Population and Development, the Madrid International Plan of

- Action on Ageing and the Global Compact for Safe, Orderly and Regular Migration by strengthening the evidence base with regard to population and development issues, with a focus on ageing, migration and population dynamics, poverty reduction and leaving no one behind;
- (b) Facilitate the monitoring of the implementation of the Asian and Pacific Ministerial Declaration on Population and Development through the framework that was endorsed at the sixth session of the Committee on Social Development;
 - (c) Provide support to member States in identifying the population groups that are at the highest risk of being left behind through its Leave No One Behind methodology, analytical reports and capacity-building;
 - (d) In line with the Action Plan to Strengthen Regional Cooperation on Social Protection in Asia and the Pacific, consolidate national progress and experiences related to extending social protection coverage in periodic progress reports; develop a regional platform for member States to share good practices; and provide new and innovative analytical tools and products, as well as capacity-development tools and training sessions to Governments;
 - (e) Conduct research and analysis and provide capacity-building support to member States on building disability-inclusive societies, guided by the Convention on the Rights of Persons with Disabilities, the Incheon Strategy to “Make the Right Real” for Persons with Disabilities in Asia and the Pacific, and the Jakarta Declaration on the Asian and Pacific Decade of Persons with Disabilities, 2023–2032, and support other subprogrammes in mainstreaming disability inclusion;
 - (f) Follow up on the outcomes of the Asia-Pacific regional review of the implementation of the Beijing Declaration and Platform for Action by supporting Governments in accelerating the implementation of the Beijing Declaration and Platform for Action;
 - (g) Provide technical assistance in developing policies in the context of economic empowerment and entrepreneurship for women and support other subprogrammes in mainstreaming a gender perspective;
 - (h) Provide knowledge products, seminars and technical advice on addressing women’s unpaid care burden and designing strategies and policy initiatives to improve the care economy.
- 19.99 The above-mentioned work will help support member States in their progress towards the achievement of Sustainable Development Goals 1, 3, 4, 5, 8, 10, 11 and 17.
- 19.100 The above-mentioned work is expected to result in:
- (a) The development of regional frameworks for social development;
 - (b) The development of responsive policies and programmes in the domain of population dynamics and social development;
 - (c) Enhanced skills and knowledge to enable countries to design and implement inclusive social protection policies, including to address the impact of rapid demographic transitions and climate change;
 - (d) Improved national policies and strategies to advance gender equality and women’s empowerment, including through measures to improve the care economy and reduce women’s unpaid care burden;
 - (e) Improved national policies and programmes in support of disability-inclusive development.

Programme performance in 2023

Inclusive population and development policy interventions in Asia and the Pacific

- 19.101 To support the implementation of the Programme of Action of the International Conference on Population and Development in Asia and the Pacific, and of the commitments contained in the Asian and Pacific Ministerial Declaration on Population and Development, the ESCAP Committee on Social Development, at its sixth session, endorsed a region-specific indicator framework, based on

the Sustainable Development Goals, developed by ESCAP and the United Nations Population Fund. In preparation for the Seventh Asian and Pacific Population Conference, the subprogramme used the indicator framework, as well as a survey, to enhance the capacities of government agencies and civil society organizations in 33 countries to assess, and subsequently revise and develop, policies and strategies on population and development.

19.102 Progress towards the objective is presented in the performance measure below (see table 19.20).

**Table 19.20
Performance measure**

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
Two member States (Papua New Guinea and Timor-Leste) integrated ESCAP analytical tools into the development of government policies and strategies on population and development	Ten member States assessed policies and strategies on population and development through consultations with ESCAP and United Nations partners	Thirty-one member States assessed progress on the implementation of the Asian and Pacific Ministerial Declaration on Population and Development and subsequently identified priorities for further action

Planned results for 2025

Result 1: strengthened national policies and programmes to promote the rights of, and advance the empowerment of, persons with disabilities, including women with disabilities

Programme performance in 2023 and target for 2025

19.103 The subprogramme’s work contributed to three member States (Cambodia, China and Maldives) adopting and implementing policies and programmes to empower persons with disabilities, which met the planned target.

19.104 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 19.21).

**Table 19.21
Performance measure**

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Two ESCAP member States developed and implemented evidence-informed inclusive policies to support persons with disabilities	Bhutan, the Lao People’s Democratic Republic and the Philippines adopted and implemented policies and programmes to empower persons with disabilities	Cambodia, China and Maldives adopted and implemented policies and programmes to empower persons with disabilities	Three ESCAP member States further strengthen their policy frameworks on disability-inclusive development, in particular in the areas of employment, social protection and accessibility	Three ESCAP member States, including a country in a special situation, address disability inclusion in policy frameworks in line with priority areas of Jakarta Declaration on the Asian and Pacific Decade of Persons with Disabilities, 2023–2032

Result 2: advancement of data and guidance for inclusive and evidence-based policy design and implementation to reduce inequality of opportunity and leave no one behind

Programme performance in 2023 and target for 2025

- 19.105 The subprogramme’s work contributed to four member States (Cambodia, Fiji, Maldives and Mongolia) generating their own data and evidence to inform inclusive policies using the Leaving No One Behind platform, which exceeded the planned target of three member States.
- 19.106 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 19.22).

Table 19.22
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
An online and interactive Leaving No One Behind platform was made available for member States to identify the furthest behind groups in relation to 15 Sustainable Development Goal indicators covering nine Goals in more than 25 countries across Asia and the Pacific	Five ESCAP member States (Mongolia, Philippines, Tonga, Turkmenistan and Tuvalu) conducted national training sessions to enhance understanding and use of the Leaving No One Behind platform	Cambodia, Fiji, Maldives and Mongolia generated their own data and evidence to inform inclusive policies using the Leaving No One Behind platform	Twenty per cent of ESCAP member States that commit to voluntary national reviews in 2024 use data and evidence generated by the Leaving No One Behind platform to inform inclusive policies	Six ESCAP member States that produce policy documents in 2025 use data and evidence generated by the Leaving No One Behind platform to inform inclusive policies

Result 3: member States develop policy measures on valuing and investing in the care economy

Proposed programme plan for 2025

- 19.107 The subprogramme has supported member States in accelerating the implementation of target 5.4 of the Sustainable Development Goals, including through the development of a framework for valuing unpaid care and domestic work and investing in and strengthening the care economy.

Lessons learned and planned change

- 19.108 The lesson for the subprogramme was that the comprehensive nature of the care economy would benefit from increasing engagement with relevant line ministries using a multisectoral approach. In applying this lesson, the subprogramme will partner with stakeholders across government to comprehensively assess the value of and design policy measures for investing in the care economy. The subprogramme plans to work with several countries providing advisory services in support of the development of policy initiatives and the adoption of policy measures on the care economy and will develop a policy toolkit for action on the care economy to assist Governments.
- 19.109 Expected progress towards the objective is presented in the performance measure below (see table 19.23).

Table 19.23
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
ASEAN countries adopted a subregional framework on the care economy	Cambodia and the Philippines developed strategies on new care economy policy initiatives	Cambodia, China and the Philippines convened national consultations on the care economy	One member State develops a policy initiative on the care economy	Two member States adopt policy measures on the care economy

Deliverables

C. Substantive deliverables

Consultation, advice and advocacy: advisory services for working groups on issues related to social development, including the Issue-Based Coalition on Inclusion and Empowerment; side events on social development at the Asia-Pacific Forum on Sustainable Development.

Databases and substantive digital materials: online databases and resource facilities on social development for regional and global access.

D. Communication deliverables

Outreach programmes, special events and information materials: International Women’s Day; International Day of Older Persons; International Day of Persons with Disabilities; International Day of Care and Support.

Subprogramme 7 Statistics

Objective

- 19.111 The objective, to which this subprogramme contributes, is to improve the availability, accessibility and use of quality data and official statistics in support of sustainable development in Asia and the Pacific.

Strategy

- 19.112 To contribute to the objective, the subprogramme will:
- (a) Support statistical development in the region, regional cooperation and the formulation of regional positions to advance official statistics in line with existing commitments, including “Advancing official statistics for the 2030 Agenda for Sustainable Development: a collective vision and framework for action by the Asia-Pacific statistical community”, the Declaration on Navigating Policy with Data to Leave No One Behind and the Ministerial Declaration on Building a More Resilient Future with Inclusive Civil Registration and Vital Statistics;
 - (b) Provide technical assistance, training and capacity-building support, in collaboration with the Statistical Institute for Asia and the Pacific:
 - (i) To enhance national statistical capacities to produce, disseminate and communicate statistical products and services, including but not limited to gender-sensitive and

sex-disaggregated data and statistics, with an emphasis on those countries left further behind, such as the least developed countries and small island developing States;

- (ii) To modernize national statistical systems and empower national statistical offices in the region to benefit from the data sources generated by the various components of national data ecosystems, including administrative data and big data produced and owned by other governmental agencies and the private sector;
 - (c) Provide statistical products and services, such as the *Asia and the Pacific SDG Progress Report* and the Asia-Pacific Sustainable Development Goals Gateway, that make regional data and official statistics accessible to assess progress in the Asia-Pacific region towards achieving the Sustainable Development Goals;
 - (d) Develop and support the production of knowledge products in the form of research papers, working papers, statistics briefs and blogs to raise awareness of and share knowledge and experience relating to official statistics;
 - (e) Promote cooperation and facilitate consensus-building among member States, regional entities and other partners working in data and statistics through regional and country-specific initiatives. This includes, among other things, advancing the Declaration on Navigating Policy with Data to Leave No One Behind, data governance and gender mainstreaming in cooperation with member States and development partners, which will constitute the foundation for enhanced statistical capacity in Asia and the Pacific;
 - (f) Expand its work to transform national statistical systems so that they are resilient to future shocks like the COVID-19 pandemic, including through virtual platforms and innovations in statistical production processes, which promote cooperation and consensus-building.
- 19.113 The above-mentioned work is expected to result in:
- (a) The improved availability, accessibility and use of quality data and official statistics in support of sustainable development in Asia and the Pacific;
 - (b) The improved capacity of national statistical systems to review progress in the implementation of the 2030 Agenda;
 - (c) Increased use of statistics in evidence-based decision making across the Asia-Pacific region.

Programme performance in 2023

Big data sources and tools for improved quality of official statistics

- 19.114 In line with the decision of the ESCAP Committee on Statistics at its seventh session to feature big data for official statistics in its future work with a focus on sharing country experiences, the subprogramme set up a community of practice for data integration. The Asia-Pacific Data Integration Community of Practice has provided a forum for the sharing of country experiences by member States and international experts on various aspects of big data cutting across areas related to economic, financial, social, environment, population and gender statistics.
- 19.115 The subprogramme also strengthened the capacity of national statistical systems to develop and use new big data sources, including geospatial data and mobile phone records. To that end, the subprogramme developed guides on using earth observation data for official statistics. In 2023, two Asia-Pacific stats cafés focused on the use of big data and an online seminar on innovations in the production of economic statistics were organized by the subprogramme. In addition, the Statistical Institute for Asia and the Pacific conducted a face-to-face course on big data, as well as e-learning courses on machine learning and advanced data visualization, which helped to build the capacity of national statistical offices to use big data sources in official statistics.
- 19.116 Progress towards the objective is presented in the performance measure below (see figure 19.VIII).

Figure 19.VIII

Performance measure: number of countries engaged in the Asia-Pacific Data Integration Community of Practice (cumulative)

Planned results for 2025

Result 1: enhanced capacity of Asia-Pacific national statistical systems to measure development progress beyond economic growth

Programme performance in 2023 and target for 2025

- 19.117 The subprogramme's work contributed to 11 countries (Bangladesh, Bhutan, Fiji, Malaysia, Mongolia, Nepal, Palau, Philippines, Samoa, Sri Lanka and Türkiye) demonstrating an enhanced capacity of national statistical systems to measure development progress beyond GDP, including on ocean accounts, ecosystem accounts, forestry accounts, disaster-related statistics, climate change and environmental statistics, which met the planned target.
- 19.118 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 19.25).

Table 19.25

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Thirteen countries demonstrated enhanced capacity of national statistical systems to measure development progress beyond GDP	Ten countries (Bangladesh, Cambodia, Kyrgyzstan, Lao People's Democratic Republic, Mongolia, Nepal, Palau, Samoa, Thailand and Uzbekistan) enhanced capacities to measure development progress beyond GDP, including on sustainability, well-being and the environment	Bangladesh, Bhutan, Fiji, Malaysia, Mongolia, Nepal, Palau, Philippines, Samoa, Sri Lanka, and Türkiye demonstrated enhanced capacities to measure development progress beyond GDP, including on sustainability, well-being and the environment	Twelve countries have enhanced capacities to measure development progress beyond GDP	Thirteen countries have enhanced capacities to measure development progress beyond GDP

Result 2: national statistical systems advance the mainstreaming of a gender perspective

Programme performance in 2023 and target for 2025

- 19.119 The subprogramme’s work contributed towards two national statistical systems (Cambodia and Mongolia) applying gender mainstreaming in their statistical work, notably on the relationship between the environment and gender mainstreaming, which exceeded the planned target of one national statistical system.
- 19.120 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 19.26).

Table 19.26
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Statistical training courses for Asia-Pacific countries integrated a gender perspective	Government statisticians from 35 countries attended training courses on how to integrate a gender perspective in statistics	Cambodia and Mongolia undertook steps towards gender mainstreaming in their statistical work	Two national statistical systems apply gender mainstreaming in their statistical work	Three national statistical systems apply gender mainstreaming in their statistical work

Result 3: improved data governance by national statistical offices across Asia and the Pacific

Proposed programme plan for 2025

- 19.121 The emergence of new data sources and data providers highlights the increasing importance of repositioning national statistical offices from their traditional role of data producer to one of data steward, managing a national data ecosystem.

Lessons learned and planned change

- 19.122 The lesson for the subprogramme was that, for complex issues, such as data governance, shifting its engagement with national statistical offices to interactive events would provide an environment in which all countries could contribute and learn from each other. In applying the lesson, the subprogramme will apply a range of world café-style sessions, alongside formal presentations, in its planned expert exchanges. The subprogramme also plans to expand and promote the compendium of data governance practices in the Asia-Pacific region to collect good practices.
- 19.123 Expected progress towards the objective is presented in the performance measure below (see table 19.27).

Table 19.27
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	The ESCAP Committee on Statistics, at its eighth session, decided to feature data governance in its future work, with an emphasis on sharing country experiences and facilitating the provision of technical assistance	ESCAP, at its seventy-ninth session, endorsed the revised focus of the Committee on Statistics	Ten member States contribute to a compendium of country data governance practices, helping countries to address data governance challenges	Five member States take steps to address data governance challenges and contribute to a compendium of country data governance practices

Deliverables

19.124 Table 19.28 lists all deliverables of the subprogramme.

Table 19.28

Subprogramme 7: deliverables for the period 2023–2025, by category and subcategory

Technical materials (number of materials)	2	3	2	2
17. On a variety of official statistics topics	2	3	2	2
C. Substantive deliverables				
Consultation, advice and advocacy: advisory support for subregional networks on official social, economic and environmental statistics; side events on statistics at the Asia-Pacific Forum on Sustainable Development.				
Databases and substantive digital materials: ESCAP statistical database accessible at the regional and global levels; database on statistical training materials and resources.				

Subprogramme 8

Subregional activities for development

Component 1

Subregional activities for development in the Pacific

Objective

- 19.125 The objective, to which component 1 of the subprogramme contributes, is to strengthen regional cooperation and integration for sustainable development, in line with the subregional priorities of the Pacific, which include building resilience against natural disasters and climate change to reduce vulnerabilities and to improve socioeconomic conditions.

Strategy

- 19.126 To contribute to the objective, the component will be guided by the new global programme of action for the sustainable development of small island developing States and the Doha Programme of Action for the Least Developed Countries. In particular, it will:
- (a) Provide subregional and in-country capacity development support in identifying and valuing ecosystem goods and services for the sustainable management of resources and using data standards under the Global Ocean Accounts Partnership, in cooperation with subprogrammes 4 and 7;
 - (b) Provide technical assistance to member States and create knowledge-exchange opportunities between member States and civil society to develop nationally appropriate indicator frameworks and promote women's economic empowerment, social protection and disability policies, in cooperation with subprogramme 6;
 - (c) Provide technical assistance and advisory services with regard to addressing the socioeconomic challenges of the subregion and devising appropriate recovery responses through national frameworks for Sustainable Development Goal financing and regional cooperation on transboundary issues, in line with the outcomes of relevant assessments;
 - (d) Organize annual meetings and facilitate dialogues on sustainable development, including a subregional forum on sustainable development, among government officials, civil society, experts and other stakeholders, and on the sharing of information on subregional implementation efforts;
 - (e) Promote coordination with and collaboration among subregional intergovernmental organizations and member States for an effective representation of subregional perspectives at regional and global consultations, and provide implementation support for the Commission's subprogrammes relating to the subregion's priorities;
 - (f) Advance the Pacific Road Map for Sustainable Development and serve as the focal point for the Commission's engagement with the resident coordinator system and United Nations country teams, including through substantive assistance in the implementation of the United Nations Sustainable Development Cooperation Frameworks, in particular with regard to the transboundary dimensions of sustainable development, and assist country-level programming by providing subregional perspectives and access to regional networks and facilitating South-South and triangular cooperation;
 - (g) Strengthen coordination with the Pacific Islands Forum Secretariat and other agencies of the Council of Regional Organizations of the Pacific to deliver the 2050 Strategy for the Blue Pacific Continent in line with the 2030 Agenda.
- 19.127 The above-mentioned work is expected to result in:
- (a) Improved data availability for evidence-based policymaking on climate-resilient, sustainable development;

- (b) Strengthened capacity of member States to implement and monitor the 2030 Agenda while ensuring that no one is left behind and that development activities address socioeconomic conditions and reach people in vulnerable situations;
- (c) Stronger subregional cooperation to address transboundary issues;
- (d) Advanced inclusive economic development in the Pacific subregion.

Programme performance in 2023

Pacific small island developing States advance the priorities of the SIDS Accelerated Modalities of Action (SAMOA) Pathway

- 19.128 To conduct the subregional review of the Samoa Pathway in the Pacific, the component developed a regional review paper on Pacific small island developing States and, jointly with the Department of Economic and Social Affairs, a 10-year progress assessment to assist in the identification of new and emerging priorities, challenges and opportunities for the sustainable development of such States. The component organized three consultations with experts, policymakers and academia to review the ideas and recommendations contained in these analytical papers. Along with the regional review, the component also developed five substantive documents, including technical materials and a scenario analysis for Pacific policymakers to identify key priorities for the post-Samoa Pathway action plan until 2034.
- 19.129 Progress towards the objective is presented in the performance measure below (see table 19.29).

Table 19.29
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
–	Pacific members and associate members of ESCAP used an indicator framework to assess progress against the Samoa Pathway at the sixth Pacific Forum on Sustainable Development	Pacific members and associate members of ESCAP adopted the Nuku’alofa outcome document, which serves to strengthen solution-focused approaches for achieving sustainable development

Planned results for 2025

Result 1: Pacific small island developing States strengthen regional cooperation in addressing transboundary issues and building resilience

Programme performance in 2023 and target for 2025

- 19.130 The component’s work contributed to two additional member States (Kiribati and Vanuatu) formulating a national strategy to address climate- and disaster-related resilience and reduce vulnerabilities, which aligned with regional priorities, which exceeded the planned target.
- 19.131 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 19.30).

Table 19.30
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Pacific island countries considered the development of a regional strategy to address the regional priorities on climate- and disaster-related resilience and reduce vulnerabilities	One member State (Tuvalu) formulated a national strategy to address climate- and disaster-related resilience and reduce vulnerabilities, which aligned with regional priorities	Kiribati and Vanuatu formulated a national strategy to address climate- and disaster-related resilience and reduce vulnerabilities, which aligned with regional priorities	An increased number of Pacific member States join agreed regional frameworks to address transboundary issues related to climate and disaster resilience	Pacific small island developing States align subregional frameworks on climate- and disaster-related resilience with existing Asia-Pacific regional frameworks

Result 2: advancing implementation of the 2050 Strategy for the Blue Pacific Continent for Pacific small island developing States

Programme performance in 2023 and target for 2025

- 19.132 The component’s work contributed to Pacific small island developing States developing and adopting a regional framework/plan for three of the thematic areas (resources and economic development; climate change and disasters; technology and connectivity) of the 2050 Strategy for the Blue Pacific Continent, including a regional framework on the Pacific Road Map for Economic Development, which exceeded the planned target.
- 19.133 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 19.31).

Table 19.31
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	Pacific Islands Forum leaders endorsed the 2050 Strategy for the Blue Pacific Continent	Pacific small island developing States developed and adopted a regional framework/plan for three of the thematic areas of the 2050 Strategy for the Blue Pacific Continent, including a regional framework on the Pacific Road Map for Economic Development	Pacific small island developing States commence implementation of the regional framework/plan as endorsed by Pacific Islands Forum leaders	Pacific small island developing States agree on modalities for assessing progress in the thematic areas

Result 3: pathways to mainstream the new global programme of action for the sustainable development of small island developing States into national development strategies

Proposed programme plan for 2025

- 19.134 The component organized consultations, including through the Pacific Forum on Sustainable Development, to identify new and emerging priorities of Pacific small island developing States.

Lessons learned and planned change

19.135 The lesson for the component was that it could further improve the utility of its technical support to countries through strengthened analytics and policy assessment of different global, regional and subregional strategies, programmes of action and frameworks. In applying the lesson, the component will strengthen technical collaboration with the Pacific Islands Forum Secretariat, the four resident coordinator offices in the Pacific and other relevant subregional development partners to mainstream the new and emerging priorities of Pacific small island developing States. It will develop technical materials and provide advisory services to assist member States in formulating policies and strategies to define clear pathways for implementing key priorities of the new global programme of action for the sustainable development of small island developing States within the subregion.

19.136 Expected progress towards the objective is presented in the performance measure below (see table 19.32).

Table 19.32
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Pacific members and associate members agreed on subregional challenges and priorities	Pacific members and associate members support the adoption of the outcome document of the fourth International Conference on Small Island Developing States	Three countries identify pathways to mainstream the new global programme of action for the sustainable development of small island developing States

Deliverables

19.137 Table 19.33 lists all deliverables of the component.

Table 19.33
Component 1: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	1
1. Report for the Commission	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	8	8	8	8
Meetings of:				
2. Expert groups on policy and programme options to address emerging sustainable development issues in the Pacific	4	4	4	4
3. The Pacific Forum on Sustainable Development	4	4	4	4
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	5	2	2
4. On institutional programmatic priorities of ESCAP in the Pacific	1	1	1	1
5. On economic and social development	1	4	1	1

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>

Technical materials (number of materials)	1	1	1	1
7. On regional cooperation and sustainable development in the Pacific	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: expert advice to member States in the subregion to strengthen regional cooperation and integration for sustainable development and to build resilience against natural disasters and climate change to reduce vulnerabilities and improve socioeconomic conditions.				
D. Communication deliverables				
Outreach programmes, special events and information materials: newsletter with updates related to the Sustainable Development Goals in the Pacific.				

Component 2 Subregional activities for development in East and North-East Asia

Objective

- 19.138 The objective, to which component 2 of the subprogramme contributes, is to strengthen regional cooperation for sustainable development, in line with the subregional priorities of East and North-East Asia, which includes sustainable connectivity, environmental sustainability and innovation for inclusive and resilient societies.

Strategy

- 19.139 To contribute to the objective, the component will:
- (a) Facilitate multisectoral dialogues and promote knowledge-sharing among member States on sustainable development, environmental sustainability, trade, transport, energy and ICT connectivity, as well as on emerging technologies and their deployment in priority sectors, through regional and subregional platforms, including the North-East Asian Subregional Programme for Environmental Cooperation, the North-East Asia Clean Air Partnership and the North-East Asia Regional Power Interconnection and Cooperation Forum;
 - (b) Support the implementation of a road map for sustainable power connectivity and promote intergovernmental processes for sustainable connectivity, environmental sustainability and innovation in East and North-East Asia;
 - (c) Develop knowledge products and foster peer-to-peer exchanges on inclusive science, technology and innovation policies and programmes with a focus on people in vulnerable situations, including on ageing societies, disaster resilience and gender equality in the technology industry;
 - (d) Identify and promote innovative approaches to facilitate cross-border connectivity, where applicable, such as contactless cross-border trade and transport solutions, and cross-border data exchanges between railway and customs authorities, with a particular focus on Mongolia as the only landlocked developing country in North-East Asia;
 - (e) Build the capacity of member States on the above-mentioned focus areas and promote coordination with and collaboration among subregional intergovernmental organizations and member States for an effective representation of subregional perspectives at regional and global consultations, as appropriate;

- (f) Provide implementation support for the Commission's subprogrammes relating to the subregion's priorities and serve as the focal point for the Commission's engagement with the resident coordinator system and United Nations country teams, including through substantive assistance with regard to preparing common country assessments and United Nations Sustainable Development Cooperation Frameworks, in particular with regard to the transboundary dimensions of sustainable development, and assist country-level programming by providing subregional perspectives and access to regional networks and facilitating South-South and triangular cooperation.
- 19.140 These workstreams will help member States make progress towards the achievement of Sustainable Development Goals 3, 5, 7, 9–11, 13–15 and 17.
- 19.141 The above-mentioned work is expected to result in:
- (a) Policy coherence and coordination of connectivity initiatives among member States, for example, with regard to trade and transport facilitation;
 - (b) Coordinated actions among stakeholders and Governments to counter common environmental challenges, including air pollution, and to promote low greenhouse gas emissions;
 - (c) Improved use of science, technology and innovation in building inclusive and resilient societies in the subregion, including resilience to natural and human-caused disasters;
 - (d) More effective formulation and implementation of policies and strategies consistent with the 2030 Agenda, including through the North-East Asia Multi-stakeholder Forums on the Sustainable Development Goals;
 - (e) Enhanced collaboration among Governments, the United Nations, subregional organizations and other stakeholders to address priority challenges in the subregion, as appropriate.

Programme performance in 2023

Strengthened city stakeholder engagement and local-level partnerships on climate action in East and North-East Asia

- 19.142 Globally, cities are responsible for 70 per cent of global greenhouse gas emissions, but they also have the potential to drive transformative change in addressing climate change and achieving global climate goals.
- 19.143 The component, since 2021, has contributed to accelerating local-level stakeholder engagement on climate action in East and North-East Asia by bringing representatives of cities, citizens, city networks, academia, civil society and the private sector to the International Forum on Low-Carbon Cities and the Forum on Carbon Neutrality Goals of China, Japan and the Republic of Korea, among others. Through these platforms, various local stakeholders shared challenges and opportunities related to promoting city-led climate action and exchanged their knowledge and experiences in designing and implementing policies and local initiatives to reduce greenhouse gas emissions. The component also strengthened youth engagement in local climate action, inviting youth representatives on various platforms, and organized the 2023 Incheon International Education Forum.
- 19.144 Progress towards the objective is presented in the performance measure below (see figure 19.IX).

Figure 19.IX

Performance measure: number of organizations globally that participated in climate action initiatives and forums organized by the component

Planned results for 2025

Result 1: enhanced multilateral and multi-stakeholder cooperation for climate action in East and North-East Asia

Programme performance in 2023 and target for 2025

- 19.145 The component’s work contributed to member States assessing the work programmes of the North-East Asian Subregional Programme for Environmental Cooperation related to climate action and approving the activity plans, including the subregional approach to desertification and land degradation, which met the planned target.
- 19.146 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 19.34).

Table 19.34
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
The first International Forum on Low-carbon Cities convened governments, international organizations, regional city networks, academia and research institutions to advance multi-stakeholder cooperation on climate action	Government officials and other stakeholders engaged in subregional cooperation on climate action in East and North-East Asia	Member States assessed the work programmes of the North-East Asian Subregional Programme for Environmental Cooperation related to climate action and approved the activity plans, including the subregional approach to desertification and land degradation	Member States increase joint activities on environmental conservation and climate action in the subregion	Member States adopt the North-East Asian Subregional Programme for Environmental Cooperation strategic plan for 2026–2030, which serves as a basis for the coordination of joint activities on climate action in East and North-East Asia

Result 2: strengthened collaboration for monitoring and addressing air pollution in East and North-East Asia

Programme performance in 2023 and target for 2025

- 19.147 The component’s work contributed to the collaboration of member States in addressing air pollution through the engagement of their experts in the collaborative initiatives of the North-East Asia Clean Air Partnership, which met the planned target.
- 19.148 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 19.35).

Table 19.35
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
The Science and Policy Committee of the North-East Asia Clean Air Partnership recommended joint activities under the workplan	Member States approved the plan to publish a policy analysis report on air pollution in 2023 and organize two policy dialogues by 2024	Member States collaborated in addressing air pollution through the engagement of their experts in the collaborative initiatives of the North-East Asia Clean Air Partnership	Two joint activities of member States on addressing air pollution are approved or initiated	The North-East Asia Clean Air Partnership workplan for 2026–2030 reflects strengthened collaboration for monitoring and addressing air pollution in East and North-East Asia

Result 3: efficient management of cross-border railway transport and transit

Proposed programme plan for 2025

- 19.149 The component has supported member States in strengthening cross-sectoral policy coordination between the trade and transport sectors through policy dialogues and capacity-building activities related to effective economic corridor management.

Lessons learned and planned change

- 19.150 The lesson for the component was that there were opportunities to support the increased adoption of cross-border paperless trade measures with a focus on cross-border electronic information exchange. In applying the lesson, the component will provide capacity-building to strengthen countries’ readiness for undertaking paperless transit and transport operations. In cooperation with subprogrammes 2 and 3, it further plans to support the implementation of the Framework Agreement on Facilitation of Cross-border Paperless Trade in Asia and the Pacific and address the gaps in institutional coordination and cooperation mechanisms related to efficient cross-border transport and transit.
- 19.151 Expected progress towards the objective is presented in the performance measure below (see table 19.36).

Table 19.36
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
China acceded to the Framework Agreement on Facilitation of Cross-border Paperless Trade in Asia and the Pacific	Mongolia and the Republic of Korea acceded to the Framework Agreement on Facilitation of Cross-border Paperless Trade in Asia and the Pacific	The Russian Federation acceded to the Framework Agreement on Facilitation of Cross-border Paperless Trade in Asia and the Pacific Member States adopted guiding principles on electronic information exchange among railways and control authorities	Mongolia strengthens its readiness to undertake paperless transit and transport operations	National officials increasingly adopt electronic information exchange for more efficient cross-border railway transport and transit in North-East Asia

Deliverables

19.152 Table 19.37 lists all deliverables of the component.

Table 19.37
Component 2: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned

Outreach programmes, special events and information materials: newsletters, infographics and side activities on major events on sustainable connectivity, environmental sustainability and innovation for inclusive and resilient societies.				

Component 3

Subregional activities for development in North and Central Asia

Objective

- 19.153 The objective, to which component 3 of the subprogramme contributes, is to strengthen regional cooperation and integration for sustainable development, in line with the subregional priorities of North and Central Asia, including sustainable connectivity, economic transformation, and social inclusion and resilience, and through follow-up and review of the 2030 Agenda.

Strategy

- 19.154 To contribute to the objective, the component will:
- (a) Provide secretariat support to and coordinate the seven thematic working groups of the United Nations Special Programme for the Economies of Central Asia to ensure that priorities emanating from the Governing Council and the Economic Forum of the Special Programme regarding trade facilitation, innovation and technology, transport, energy and digital connectivity, innovative financing and investment tools and environmental sustainability are incorporated into their workplans, and that discussions held in the working groups contribute to the deliberations of the Governing Council and the Economic Forum;
 - (b) Coordinate high-level dialogues and working meetings to support landlocked developing countries in the implementation of their priorities and the programme of action for landlocked developing countries;
 - (c) Support member States in the implementation of the 2030 Agenda by providing policy advice and technical assistance on subregional connectivity, women’s economic empowerment, and climate change mitigation and adaptation strategies, helping member States make progress towards achieving Goals 9, 10 and 13;
 - (d) Organize annual meetings and facilitate dialogues on sustainable development, including a subregional forum on sustainable development, among government officials, civil society, experts and other stakeholders, and on the exchange of information on subregional implementation efforts, helping member States review progress towards achieving the Sustainable Development Goals, including Goal 17;
 - (e) Support voluntary national review processes at the request of member States, including the voluntary national review twinning programme, and build human and institutional capacity for sustainable and resilient development, in line with the 2030 Agenda;

- (f) Further support cooperation with subregional intergovernmental organizations and institutions such as the Shanghai Cooperation Organization, the Economic Cooperation Organization, the Eurasian Economic Commission and the Eurasian Development Bank for an effective representation of subregional perspectives at regional and global consultations;
- (g) Provide implementation support for the Commission's subprogrammes relating to the subregion's priorities and serve as the focal point for the Commission's engagement with the resident coordinator system and United Nations country teams, including through substantive assistance in preparing common country assessments and United Nations Sustainable Development Cooperation Frameworks, in particular with regard to the transboundary dimensions of sustainable development, and assist country-level programming by providing subregional perspectives and access to regional networks and facilitating South-South and triangular cooperation.

19.155 The above-mentioned work is expected to result in:

- (a) Enhanced application by member States of, evidence-based solutions for, and strengthened subregional cooperation on, programmes to improve trade and transport facilitation as well as energy and digital connectivity;
- (b) The adoption of policy options for economic transformation in the subregion;
- (c) Increased knowledge-sharing in cooperation with intergovernmental organizations and bodies;
- (d) Increased skills and knowledge on digital connectivity and digital transformation in the subregion as a driver to achieve the 2030 Agenda.

Programme performance in 2023

Strengthened sustainable subregional connectivity

19.156 The component supported the discussion among countries of North and Central Asia on technical and institutional capacity gaps in the use of new technologies and digital transformation for enhancing the efficiency and resilience of railway and intermodal transport. Building on the outcomes of the discussion, the component and subprogramme 3 co-organized an expert group to identify priority areas of cooperation on the digital transformation of railway and multimodal transport in the subregion and delivered a capacity-building workshop on transport digitalization. To further enhance subregional connectivity, the component provided technical support to five landlocked developing countries in formulating article 5, on the digitalization of land transport, of the Agreement on Strengthening the Interconnectedness of Land Transport in Central Asia.

19.157 Progress towards the objective is presented in the performance measure below (see table 19.38).

Table 19.38

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
Kazakhstan and Uzbekistan initiated measures to enhance subregional connectivity	Member States considered options relating to the operating modalities of the digital solutions centre in Kazakhstan Uzbekistan developed a concept on the thematic scope of the regional centre for the development of transport and communication interconnection with the support of ESCAP	Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan and Uzbekistan signed the Agreement on Strengthening the Interconnectedness of Land Transport in Central Asia

Planned results for 2025

Result 1: enhanced subregional cooperation on the use of new technologies for improving railway operational performance

Programme performance in 2023 and target for 2025

- 19.158 The component’s work contributed to policymakers adopting article 5, on the digitalization of land transport, of the Agreement on Strengthening the Interconnectedness of Land Transport in Central Asia at the fifth consultative meeting of the Heads of State of Central Asia, which met the planned target.
- 19.159 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 19.39).

Table 19.39
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Available data on border crossings indicated 39 per cent of transit time in trans-Eurasian transportation was related to customs clearance and documentation formalities	92 per cent of policymakers from Uzbekistan and Azerbaijan reported an increase in awareness of new technologies to increase the efficiency of rail transport	Policymakers adopted article 5, on the digitalization of land transport, of the Agreement on Strengthening the Interconnectedness of Land Transport in Central Asia at the fifth consultative meeting of the Heads of State of Central Asia	Policymakers review and align railway operation standards for the further implementation of digital transformation for resilient and competitive railway operation	Policymakers of at least one member State implement practical measures on the implementation of policy guidelines and recommendations on the digital transformation of land transport operations, including railway transport

Result 2: landlocked developing countries advance the implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024 and the new programme of action beyond 2024

Programme performance in 2023 and target for 2025

- 19.160 The component’s work contributed to strengthening the dialogue among landlocked developing countries and the International Think Tank for Landlocked Developing Countries on progress and challenges related to implementing the Vienna Programme of Action, which met the planned target.
- 19.161 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 19.40).

Table 19.40
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	Landlocked developing countries in the subregion agreed to strengthen collaboration in developing transport and transit corridors, facilitating energy transit and promoting digital inclusion	Dialogue was strengthened among landlocked developing countries and the International Think Tank for Landlocked Developing Countries on progress and challenges related to implementing the Vienna Programme of Action	Four countries in the subregion report progress towards reaching the targets of the Vienna Programme of Action	Policymakers from landlocked developing countries in the subregion have increased awareness of the priority areas of cooperation on the digital transformation of railway and multimodal transport in the subregion beyond 2024

Result 3: strengthened cooperation instruments of the United Nations Special Programme for the Economies of Central Asia

Proposed programme plan for 2025

19.162 The component has supported countries participating in the United Nations Special Programme for the Economies of Central Asia in strengthening cooperation in areas such as transport, logistics, energy, and information and communication technologies and fostering peer learning exchanges among and beyond countries of North and Central Asia.

Lessons learned and planned change

19.163 The lesson for the component was that providing mechanisms to share best practices among participating countries can further enhance subregional cooperation. In applying the lesson, the component will leverage the expertise from ESCAP subprogrammes and the Economic Commission for Europe to support the open deliberations among countries participating in the Special Programme on their initiatives for institutional and organizational adjustments to increase the Special Programme’s effectiveness, as well as on the strategic issues pertaining to economic cooperation within the subregion. It will organize capacity-building activities to promote better alignment and compliance with relevant international legal instruments, norms, guidelines, standards and recommendations.

19.164 Expected progress towards the objective is presented in the performance measure below (see table 19.41).

Table 19.41
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Countries participating in the United Nations Special Programme for the Economies of Central Asia established an expert group to draft the terms of reference and modalities of a secretariat for special programmes	The Almaty Declaration was adopted	Countries participating in the United Nations Special Programme for the Economies of Central Asia established a Special Programme fund in the United Nations multi-partner trust fund format	Countries participating in the United Nations Special Programme for the Economies of Central Asia consider strategic directions for further increasing economic cooperation in the subregion	The financial stability of the United Nations Special Programme for the Economies of Central Asia to implement activities is enhanced

Deliverables

19.165 Table 19.42 lists all deliverables of the component.

Component 4

Subregional activities for development in South and South-West Asia

Objective

- 19.166 The objective, to which component 4 of the subprogramme contributes, is to strengthen regional cooperation and integration for sustainable development, in line with the subregional priorities of South and South-West Asia, including sustainable connectivity, women's economic empowerment and the sustainable graduation of the least developed countries.

Strategy

- 19.167 To contribute to the objective, the component will:
- (a) Provide tailored analytical support, policy advice and technical assistance, and facilitate knowledge exchange and dialogues for member States and other stakeholders, on transboundary or common development priorities, in particular for landlocked developing countries, small island developing States and least developed countries, such as connectivity for economic corridors, disaster risk resilience, energy transition, women's economic empowerment and disability inclusion;
 - (b) Convene subregional consultations on the Sustainable Development Goals, including through the South and South-West Asia Network on the Sustainable Development Goals, to facilitate the sharing of good practices and the articulation of subregional perspectives that contribute to the relevant ESCAP knowledge products and forums, such as the Asia-Pacific Forum on Sustainable Development and the high-level political forum on sustainable development;
 - (c) Collaborate with subregional intergovernmental organizations for the coordination and mutual leveraging of subregional initiatives and facilitate ESCAP communication with the respective secretariats;
 - (d) Serve as the focal point for the Commission's engagement with the resident coordinator system and United Nations country teams, including through substantive assistance in preparing common country assessments and United Nations Sustainable Development Cooperation Frameworks, in particular with regard to the transboundary dimensions of sustainable development, and assist country-level programming by providing subregional perspectives, access to regional networks and facilitating South-South and triangular cooperation;
 - (e) Forge partnerships with other development partners, and private sector and civil society organizations in common areas of work, for enhanced impact in supporting member States towards their achievement of the Goals;
 - (f) Deepen linkages and synergies with other ESCAP subprogrammes and components in common areas of work, for enhanced harmonization and coherence in the delivery of assistance to member States.
- 19.168 The above-mentioned work will help member States make progress towards achieving Goals 1, 5, 7–10, 12, 13 and 17.
- 19.169 The above-mentioned work is expected to result in:
- (a) Enhanced connectivity in the subregion, especially for people in landlocked developing countries and least developed countries;
 - (b) Strengthened capacity of member States, especially least developed countries, landlocked developing countries and small island developing States, to reduce the risk of disasters, including those induced by climate change;

- (c) Enhanced design and implementation of policies and subregional cooperation by member States on the transition to sustainable energy accessible to people in remote areas and in marginalized situations in South and South-West Asia;
- (d) The exchange of experiences and best practices between governments, civil society, academia/think tanks, the private sector, United Nations agencies, subregional organizations and other international organizations and financial institutions to bridge knowledge gaps for addressing the Sustainable Development Goals.

Programme performance in 2023

Enhanced deliberations among the Group of 20 countries on trade and investment, energy transition and disaster risk reduction

19.170 In support of the Group of 20 and its presidency, which was held by India for 2023, the component coordinated the technical inputs of subprogrammes 2, 5 and 9 with the Government of India and the United Nations country team to channel the expertise of ESCAP on trade and investment, energy transition and disaster risk reduction to the thematic working groups of the Group of 20. Technical contributions on issues such as trade logistics, early warning and transnational power system connectivity to accelerate energy transition thus informed the Group of 20 New Delhi Leaders’ Declaration.

19.171 Progress towards the objective is presented in the performance measure below (see table 19.43).

Table 19.43
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
–	–	States members of the Group of 20 adopted recommendations on trade and investment, energy transition and disaster risk reduction

Planned results for 2025

Result 1: increased integration of disaster risk-related analysis in national and local planning in countries of South and South-West Asia

Programme performance in 2023 and target for 2025

19.172 The component’s work contributed to policymakers from India and Maldives using customized planning tools, techniques and guidelines to facilitate the undertaking of disaster risk-related analyses for national and local planning purposes, which met the planned target.

19.173 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 19.44).

Table 19.44
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Evidence-based approaches to disaster risk reduction and climate change adaptation are not yet institutionalized and operationalized in a practical manner	Disaster management authorities in Maldives identified existing gaps in disaster risk management through the use of customized planning tools, database development and data collection	Policymakers from India and Maldives used customized planning tools, techniques and guidelines to facilitate the undertaking of disaster risk-related analyses for national and local planning purposes	Enhanced peer learning on improving disaster risk resilience is enabled by two countries in South Asia sharing their expertise in undertaking disaster risk-related analyses for planning purposes with other countries in South and South-West Asia	Two more countries in the region use customized planning tools, techniques and guidelines to facilitate the undertaking of disaster risk-related analyses for national and local planning purposes

Result 2: improved flow of goods and services at border crossing points in Eastern South Asia

Programme performance in 2023 and target for 2025

- 19.174 The component’s work contributed to four member States (Bangladesh, Bhutan, India and Nepal) and one subregional organization (Bay of Bengal Initiative for Multi-Sectoral Technical and Economic Cooperation) expressing interest in working jointly to improve the transboundary flow of goods and services at border crossing points between north-east India and Bangladesh, which exceeded the planned target.
- 19.175 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 19.45).

Table 19.45
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	The flow of goods and services at border crossing points in Eastern South Asia is hampered due to limited transboundary connectivity in transport, energy, ICT and supply chains in those localities	Bangladesh, Bhutan, India, Nepal and one subregional organization (Bay of Bengal Initiative for Multi-Sectoral Technical and Economic Cooperation) expressed interest in working jointly to improve the transboundary flow of goods and services at border crossing points between north-east India and Bangladesh	Stakeholders of at least one border crossing point in Eastern South Asia reach a shared understanding of the bottlenecks to be mitigated for enhanced transboundary connectivity and the flow of goods and services	Bottlenecks at two border crossing points in Eastern South Asia are reduced, in tandem with an increase in the flow of goods and services across these points

Result 3: accelerated transition to sustainable energy

Proposed programme plan for 2025

19.176 To support the promotion of sustainable energy policies in South and South-West Asia, the component, in coordination with subprogramme 9, developed a paper on energy connectivity in Eastern South Asia and a multi-country study on integrated straw management to reduce air pollution and greenhouse gas emissions.

Lessons learned and planned change

19.177 The lesson for the component was that there is an increasing demand for advisory services related to the subregion’s available hydropower resources and other renewable energy use to advance the transition to sustainable energy. In applying the lesson, the component will conduct workshops on sustainable energy with relevant national and local governments and facilitate deliberations on the policy priorities of the sustainable energy transition. It will provide technical assistance in the development of action plans to identify and operationalize priorities and strategies for the adoption of sustainable energy policies.

19.178 Expected progress towards the objective is presented in the performance measure below (see table 19.46).

Table 19.46
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Member States endorsed the regional road map on power system connectivity Nepal issued a Goal 7 road map	Bhutan and Pakistan issued Goal 7 road maps	The Lao People’s Democratic Republic, Malaysia, Singapore and Thailand shared their experience on cross-border electricity trading with Bangladesh, Bhutan, India and Nepal	Two countries in the subregion identify policy priorities on the sustainable energy transition	Two countries in the subregion draft action plans on the sustainable energy transition

Deliverables

19.179 Table 19.47 lists all deliverables of the component.

Table 19.47
Component 4: deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	1
1. Report for the Commission	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	6	5	4	4
Meetings of:				
2. Expert groups on policy and programme options to address emerging sustainable development issues in South and South-West Asia	2	–	–	–
3. The South and South-West Asia Forum on the Sustainable Development Goals	4	5	4	4

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	2	1	–
4. On institutional programmatic priorities of ESCAP in South and South-West Asia	2	2	1	–
Seminars, workshops and training events (number of days)	2	3	2	2
5. On thematic areas related to sustainable development	2	3	2	2
Technical materials (number of materials)	5	5	5	5
6. Development paper series on economic and social development	5	5	5	5
C. Substantive deliverables				
Consultation, advice and advocacy: expert advice to member States of the subregion in implementing the 2030 Agenda and promoting regional economic cooperation and integration.				
D. Communication deliverables				
Outreach programmes, special events and information materials: a newsletter related to the Sustainable Development Goals in South and South-West Asia.				

Component 5 Subregional activities for development in South-East Asia

Objective

- 19.180 The objective, to which component 5 of the subprogramme contributes, is to strengthen regional cooperation and integration for sustainable development, in line with the subregional priorities of South-East Asia, including sustainable connectivity, inclusive and equitable societies, the efficient management of natural resources and resilient development.

Strategy

- 19.181 To contribute to the objective, the component will:
- (a) Coordinate high-level dialogues and working meetings to support the implementation of the Plan of Action to Implement the Joint Declaration on Comprehensive Partnership between the Association of Southeast Asian Nations and the United Nations (2021–2025), as well as the complementarities road map for the period 2020–2025;
 - (b) Create knowledge products, in collaboration with relevant subprogrammes, on regional and subregional perspectives on global issues for member States in South-East Asia;
 - (c) Further expand cooperation with ASEAN through increased engagement with the ASEAN secretariat and relevant sectoral bodies and committees, as appropriate, and on initiatives to achieve the Sustainable Development Goals and subregional goals, including through support for the implementation of the ASEAN Comprehensive Recovery Framework;
 - (d) Promote coordination with and collaboration among subregional intergovernmental organizations and member States for an effective representation of subregional perspectives at regional and global consultations;
 - (e) Further develop partnerships and cooperation with civil society organizations in support of people in vulnerable situations to enhance synergy and effective participation at the subregional Sustainable Development Goals forum and raise awareness of the Goals among youth through a collaboration with the Association of Pacific Rim Universities in mutual areas of interest;

- (f) Provide implementation support for the Commission's subprogrammes relating to the subregion's priorities, serve as the focal point for the Commission's engagement with the resident coordinator system and United Nations country teams, including through substantive assistance in preparing common country assessments and United Nations Sustainable Development Cooperation Frameworks, in particular with regard to the transboundary dimensions of sustainable development, and assist country-level programming by providing subregional perspectives and access to regional networks and facilitating South-South and triangular cooperation;
 - (g) Support coordination among the various agencies and partners, with a focus on sustainable investment and finance, inclusive and equitable societies, the efficient management of natural resources and resilient development, while ensuring synergy in the implementation of the processes;
 - (h) Support countries in special situations in the subregion in implementing their relevant programmes of action.
- 19.182 The above-mentioned work will help support member States in their progress towards the achievement of Goals 3, 5, 9, 10, 13 and 17.
- 19.183 The above-mentioned work is expected to result in:
- (a) An enhanced policy environment to support inclusive business and investment for sustainable development in the subregion;
 - (b) Fairer and more equitable access to social protection, especially for those most vulnerable, such as women, youth, older persons and persons with disabilities, and strengthened disability statistics, ageing and disability policies and social protection floor costing;
 - (c) The improved coordination and coherence of technical assistance provided under the ASEAN Comprehensive Recovery Framework in the subregion.

Programme performance in 2023

Engaging youth for innovative solutions towards achieving the Sustainable Development Goals in South-East Asia

- 19.184 Young people bring unique perspectives and ideas to addressing socioeconomic challenges and advocating for the Sustainable Development Goals.
- 19.185 In collaboration with the United Nations Resident Coordinator Office in Thailand, the South-East Asia Sustainable Development Goals Youth Dialogue was organized during the ninth session of the Asia-Pacific Forum on Sustainable Development, in 2022. This marked the first effort of the component to include youth in an inclusive policy dialogue. In 2023, at the tenth session of the Asia-Pacific Forum on Sustainable Development, the component continued its youth engagement, collaborating with the Rural Revitalization, Youth and Social Entrepreneurship Platform. This collaboration focused on engaging young social entrepreneurs to discuss innovations for rural revitalization and accelerate the achievement of the Sustainable Development Goals. The component also engaged student representatives from the Association of Pacific Rim Universities, highlighting commitments to sustainability issues and advancing the implementation of the Goals through collaborative education initiatives.
- 19.186 Progress towards the objective is presented in the performance measure below (see table 19.48).

Table 19.48
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
ASEAN member States launched the implementation of the ASEAN Work Plan on Youth 2021–2025	First engagement of youth from South-East Asia at the ninth Asia-Pacific Forum on Sustainable Development	Student representatives and young social entrepreneurs addressed sustainability issues at the Asia-Pacific Forum on Sustainable Development

Planned results for 2025

Result 1: increased use of innovative financing policies and instruments to achieve the Sustainable Development Goals

Programme performance in 2023 and target for 2025

- 19.187 The component’s work contributed to member States advancing the drafting of an overarching framework to guide the development of a sustainable finance ecosystem in the subregion to facilitate innovative financing mechanisms in the subregion, which met the planned target.
- 19.188 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 19.49).

Table 19.49
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Member States agreed to further study the use of sustainable and Sustainable Development Goal-linked bonds as an instrument to address post-COVID-19 financing needs and achieve the 2030 Agenda	Consensus is achieved among member States on using Sustainable Development Goal-linked bonds as an instrument to catalyse energy investment opportunities to address post-COVID-19 financing needs and achieve the 2030 Agenda	Member States advanced the drafting of an overarching framework to guide the development of a sustainable finance ecosystem in the subregion	Member States adopt guidelines on sustainable environmental finance that will facilitate innovative financing mechanisms towards climate mitigation and adaptation	Member States translate the guidelines on sustainable environmental finance into national policies or directives to support innovative financing mechanisms for climate mitigation and adaptation

Result 2: improved sustainable foreign direct investment strategies in the subregion

Programme performance in 2023 and target for 2025

- 19.189 The component’s work contributed to 80 per cent of member States reporting an increase in capacity to promote sustainable FDI in the subregion, which met the planned target.
- 19.190 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 19.50).

Table 19.50
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
The ASEAN Coordinating Committee on Investment, the ASEAN secretariat and member States organized a session on sustainable investment at the fifth South-East Asia Multi-stakeholder Forum on the Implementation of the Sustainable Development Goals to kickstart the discussion on subregional sustainable FDI	Member States in the subregion agreed to promote intraregional sustainable FDI as a means for inclusive recovery and development	Eighty per cent of member States reported an increase in capacity to promote sustainable FDI in the subregion	One member State in the subregion develops a national strategy to attract sustainable FDI	One additional member State in the subregion develops a national strategy to attract sustainable FDI

Result 3: aligned investment policies and regulations for the achievement of the Sustainable Development Goals

Proposed programme plan for 2025

19.191 The component organized a forum to explore investment opportunities aimed at strengthening the subregion as a sustainable private investment hub to support the recovery from the COVID-19 pandemic and accelerate progress towards achieving the Sustainable Development Goals in the subregion.

Lessons learned and planned change

19.192 The lesson for the component was that focusing technical advice on the alignment of investment policies among countries in the subregion can help create a conducive investment environment for investors to expand their business in the subregion. In applying the lesson, the component will invite policymakers from relevant ministries, including those responsible for investment, trade and finance, to a series of capacity-development activities aimed at identifying steps that facilitate the alignment of investment policies across the subregion. It will also provide advisory services and develop technical materials to support member States in aligning national regulations to promote investment opportunities within the subregion.

19.193 Expected progress towards the objective is presented in the performance measure below (see table 19.51).

Table 19.51
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Member States agreed to develop a subregional action plan on sustainable investment to accelerate the implementation of the Sustainable Development Goals	Member States adopt a subregional action plan on sustainable investment to accelerate the achievement of the Sustainable Development Goals	Member States align their investment policies with the investment priorities of the subregional action plan on sustainable investment

Deliverables

19.194 Table 19.52 lists all deliverables of the component.

Table 19.52
Component 5: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	1
1. Report for the Commission	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	9	6	9	9
Meetings of:				
2. Expert groups on policy and programme options to address emerging sustainable development issues in South-East Asia	2	1	2	2
3. The South-East Asia Multi-stakeholder Forum on the Implementation of the Sustainable Development Goals	4	4	4	4
4. ASEAN member States, the ASEAN secretariat and the ASEAN sectoral working groups on sustainable development in South-East Asia	3	1	3	3
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	–	1	1
5. On institutional programmatic priorities of ESCAP in South-East Asia	1	–	1	1
Seminars, workshops and training events (number of days)	2	2	2	–
6. On the implementation of the Plan of Action to Implement the Joint Declaration on Comprehensive Partnership between the Association of Southeast Asian Nations and the United Nations (2021–2025)	1	1	1	–
7. On the implementation of sustainable FDI indicators	1	1	1	–
Technical materials (number of materials)	1	1	1	1
8. On the implementation of the Plan of Action to Implement the Joint Declaration on Comprehensive Partnership between the Association of Southeast Asian Nations and the United Nations (2021–2025)	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: consultations and advisory support to the subregional member States on sustainable connectivity, inclusive and equitable societies, the efficient management of natural resources and resilient development; advocacy with member States on the subregional findings of the Commission’s publications; side events at the Commission session; side events at the Asia-Pacific Forum on Sustainable Development.				

Subprogramme 9

Energy

Objective

- 19.195 The objective, to which this subprogramme contributes, is to ensure access to affordable, reliable, sustainable and modern energy for all in Asia and the Pacific by enhancing member States' capacity for energy access, renewable energy, energy efficiency and energy connectivity.

Strategy

- 19.196 To contribute to the objective, the subprogramme will enhance the evidence base for the achievement of Sustainable Development Goal 7 and Goals with interlinkages to it, and support member States in progressing towards Goal 7. Specifically, the subprogramme will:
- (a) Facilitate intergovernmental dialogue and develop and disseminate evidence-based policy recommendations and guidance related to expanding access to modern energy, growing the share of renewable sources of energy in the energy mix, adopting energy efficient technologies and approaches, and increasing energy connectivity;
 - (b) Provide capacity-building activities focused on facilitating planning and policy development for achieving Goal 7, including in least developed countries, based on local contexts and in alignment with national priorities, in cooperation with resident coordinator offices to leverage institutional resources and ensure the efficiency of work programme implementation;
 - (c) Produce and contribute to the development of knowledge products focused on broadening understanding of the benefits and implications of energy connectivity for energy security and resilience, affordability and sustainability;
 - (d) Provide access to up-to-date data, policy information and energy infrastructure maps through the Asia Pacific Energy Portal and other knowledge platforms;
 - (e) Provide support through the development and implementation of road maps and plans (Goal 7 road maps, the regional road map on power system connectivity and national cooling action plans), as applicable, and by promoting the use of modelling and policy planning tools and methodologies;
 - (f) Focus capacity-building efforts on the acceleration of progress towards Goal 7 targets and emissions reductions, in particular access to clean cooking fuels and technologies; sustainable cooling; the sustainability of supply chains for minerals, materials and technologies critical for energy transition; cleaner use of fossil fuels; and energy connectivity, with a special emphasis on countries in special situations;
 - (g) Mainstream a gender perspective by facilitating dialogue and producing knowledge products that include the energy system's impacts on women and highlight their contribution to a sustainable energy transition, working jointly with subprogramme 6.
- 19.197 The above-mentioned work is expected to result in:
- (a) The adoption of evidence-based policies, strategies and plans to increase energy access, energy efficiency and the use of renewable sources of energy and enabling technologies at the national and subnational levels;
 - (b) Improved capacity to implement policies for the transition to renewable sources of energy, environmentally sound energy technologies and net-zero emissions goals, targets and ambitions;
 - (c) Increased capacity of policymakers and regulators to plan and implement power system connectivity initiatives that enable the scaling up of renewable energies;

- (d) Greater recognition among policymakers of a gender perspective in the sustainable energy transition, including the potential for women to accelerate progress.

Programme performance in 2023

Enhanced commitment to sustainably manage minerals and materials critical for the energy transition

- 19.198 The subprogramme developed a study to consider challenges to extractive industries related to sustainable development, in particular the extraction and processing of critical raw materials and their broader socioeconomic implications. It also organized two policy dialogues on critical raw materials to examine the implications of the energy transition on demand for such materials. The subprogramme further organized the Asian and Pacific Energy Forum, at which member States discussed key issues in the study and recognized the need for the sustainable management of value chains of minerals critical for the energy transition. In addition, the subprogramme provided support to ASEAN to develop a set of principles to sustainably manage the extraction of minerals.
- 19.199 Progress towards the objective is presented in the performance measure below (see table 19.53).

Table 19.53

Performance measure:

2021 (actual)	2022 (actual)	2023 (actual)
–	–	At the Third Asian and Pacific Energy Forum, energy ministers and other high-level representatives of the members and associate members of ESCAP adopted the Ministerial Declaration on Building a Secure, Sustainable and Interconnected Energy Future for Asia and the Pacific, in which they acknowledged that certain minerals, materials and technologies are critical for energy transitions and that there is a need to maintain reliable, responsible and sustainable supply chains of such minerals and materials

Planned results for 2025

Result 1: evidence-based strategies for increasing sustainable power system connectivity

Programme performance in 2023 and target for 2025

- 19.200 The subprogramme's work contributed to ESCAP member States analysing gaps in policies, regulations and standards in each subregion, which met the planned target.
- 19.201 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 19.54).

Table 19.54
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
The Committee on Energy endorsed the regional road map on power system connectivity at its third session, and the Commission endorsed it at its seventy-seventh session	ESCAP member States provided updates on connectivity activities on a voluntary basis at meetings of the Expert Working Group on Energy Connectivity Time frames for achieving the road map milestones have been met or are under development	ESCAP member States analysed gaps in policies, regulations and standards in each subregion	At least one subregion demonstrates progress on establishing multilateral power trading	At the Committee on Energy, member States consider endorsement of the principles for enabling sustainable power system connectivity and a regional grid master plan At least one new grid interconnection agreement is signed

Result 2: increased ambition of national commitments by member States towards modern and clean energy in support of Goal 7

Programme performance in 2023 and target for 2025

- 19.202 The subprogramme’s work contributed to member States agreeing on accelerated Sustainable Development Goal 7 actions in the areas of energy access, energy efficiency and renewable energy in support of the 2030 Agenda and the Paris Agreement under the ministerial declaration adopted by ESCAP member States at the Third Asian and Pacific Energy Forum, in October 2023, which met the planned target.
- 19.203 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 19.55).

Table 19.55
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
At the Committee on Energy, member States announced commitments to increasing energy access, energy efficiency and renewable capacity	Member States provided updates on the development of sustainable energy policies at meetings of the Expert Working Group on Universal Access to Modern Energy Services, Renewable Energy, Energy Efficiency and Cleaner Use of Fossil Fuels	Member States agreed on accelerated Sustainable Development Goal 7 actions in the areas of energy access, energy efficiency and renewable energy, in support of the 2030 Agenda and the Paris Agreement under the ministerial declaration adopted by ESCAP member States at the Third Asian and Pacific Energy Forum, in October 2023	Member States announce more ambitious national commitments to increase the share of energy from renewable sources, and to adopt advanced energy efficiency and enhance access to electricity and clean cooking technologies, research, technology and investments in clean energy	Member States in Asia and the Pacific announce commitments to close gaps on achieving Sustainable Development Goal 7 targets

Result 3: countries adopt national cooling action plans

Proposed programme plan for 2025

19.204 The cooling sector is a significant driver of rising electricity demand and contributes to greenhouse gas emissions. Member States are committed to action in this sector, including through the Global Cooling Pledge.³ The subprogramme has supported the development of a national cooling action plan methodology and has provided technical support to member States to develop comprehensive national cooling action plans, which include multisectoral cooling demand assessments, recommendations for advancing sustainable passive and active cooling, and pathways to integrate comprehensive action to reduce cooling-related energy consumption and emissions.

Lessons learned and planned change

19.205 The lesson for the subprogramme was that coordination and cooperation between ESCAP and United Nations implementing partners and stakeholders could be further improved to ensure that timely institutional and organizational agreements are put in place and activities effectively delivered without duplication. In applying the lesson, the subprogramme plans to deliver capacity-building activities, working with the United Nations Environment Programme, United Nations country teams and resident coordinators on assessing the met and unmet needs of the cooling sector and the impacts of policy interventions under various development scenarios. Alignment and synergies with nationally determined contributions, Sustainable Development Goal 7 and national policies and programmes will be pursued to build on the existing knowledge and experience base, while working to achieve national energy and emissions-related objectives.

19.206 Expected progress towards the objective is presented in the performance measure below (see figure 19.X).

Figure 19.X

Performance measure: number of national cooling action plans issued by member States (cumulative)

Deliverables

19.207 Table 19.56 lists all deliverables of the subprogramme.

³ The Global Cooling Pledge was launched at the twenty-eighth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change (see www.unep.org/resources/report/global-cooling-pledge).

Table 19.56

^a Includes four temporary posts (three P-4 and one P-3) that were approved pursuant to General Assembly resolution [71/272](#).

19.209 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 19.60 to 19.62 and figure 19.XI.

19.210 As shown in tables 19.60 (1) and 19.61 (1), the overall resources proposed for 2025 amount to \$56,563,500 before recosting, reflecting a net decrease of \$253,600 (or 0.4 per cent) compared with the approved budget for 2024. Resource changes result from technical adjustments and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

19.211 As reflected in table 19.60 (1), resource changes reflect a net decrease of \$174,400 under programme support related to the removal of non-recurrent requirements of \$253,600 approved by the General

Assembly for 2024 in its resolution [78/253](#) on the seismic mitigation retrofit and life-cycle replacements project at ESCAP; offset in part by an increase of \$79,200 in post costs under programme support relating to the higher provision for the continuing vacancy rate for the P-3 post established in 2024 pursuant to Assembly resolution [78/252](#), which was subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts. Resource requirements relating to the seismic mitigation project at ESCAP will be reflected in the report of the Secretary-General on the seismic mitigation retrofit and life-cycle replacements project at ESCAP premises in Bangkok, which will be prepared later in the year for the consideration of the Assembly during the main part of its seventy-ninth session.

Other changes

19.212 As reflected in table 19.60 (1), resource changes reflect a net decrease of \$79,200. The breakdown of changes is as follows:

- (a) **Executive direction and management.** The net decrease of \$200 is due to a decrease in requirements for experts (\$500) owing to a reduction in the number of experts required for expert groups on least developed countries, landlocked developing countries and small island developing States, and for travel of staff (\$800) owing to the reduced number of days required to engage with member States in support of the implementation of the 2030 Agenda for Sustainable Development, offset in part by an increase in requirements for contractual services (\$1,100) due to an increase in requirements for external printing and substantive editing services for the annual theme study and *Asia-Pacific Sustainable Development* journals;
- (b) **Subprogramme 1, Macroeconomic policy, poverty reduction and financing for development.** The net decrease of \$12,300 relates mainly to decreased requirements under experts (\$9,700) and consultants (\$12,100) owing to a decrease in the number of expert groups and related consultancy services for financing for development, offset in part by an increase in contractual services (\$9,500) owing to the planned publication of the *Financing for Development in Asia and the Pacific* series;
- (c) **Subprogramme 2, Trade, investment and innovation.** The net increase of \$17,600 under non-post resources relates mainly to increased requirements under experts (\$5,900) owing to increased requirements for experts for the expert group related to trade, investment and innovation and under contractual services (\$12,000) as a result of a new publication entitled *Asia-Pacific Trade and Investment Report*, offset in part by a decrease under consultants (\$300) owing to the planned engagement of consultants who are at a more junior level;
- (d) **Subprogramme 3, Transport.** The net decrease of \$6,600 under non-post resources relates mainly to decreased requirements under contractual services (\$14,800) owing to the elimination of a publication on transport development in Asia and the Pacific and under consultants (\$600) owing to the reduced number of days of consultancy required for transport connectivity and logistics, offset in part by an increase in experts (\$8,800) owing to an increase in the number of experts required for expert groups on transport connectivity and logistics;
- (e) **Subprogramme 4, Environment and development.** The net decrease of \$1,900 under non-post resources relates mainly to decreased requirements under consultants (\$2,500) due to the reduced number of days of consultancy required for the implementation of internationally agreed agendas related to the environment and development and under contractual services (\$400) owing to the decrease in costs required to print publications on the environment and development, offset in part by an increase in experts (\$1,000) owing to an increase in the number of experts required for the implementation of internationally agreed agendas related to the environment and development and to sustainable and resilient cities in the Asia-Pacific region;
- (f) **Subprogramme 5, Information and communications technology and disaster risk reduction and management.** The net decrease of \$12,400 under non-post resources relates mainly to decreased requirements under experts (\$9,700) and consultants (\$3,700) owing to a reduction in the number of experts and the number of days of consultancy required for space

applications and the Asia-Pacific information superhighway, offset in part by an increase in contractual services (\$1,000) owing to a new publication on disaster information management;

- (g) **Subprogramme 7, Statistics.** The net decrease of \$2,500 under non-post resources relates mainly to decreased requirements under consultants (\$3,700) owing to a reduction in the number of days of consultancy required on the use of non-traditional and complementary data sources in official statistics and under contractual services (\$700) owing to reduced requirements for the visual design of the publication entitled *Asia and the Pacific SDG Progress Report 2025* and advocacy materials, offset in part by an increase under experts (\$1,900) owing to an increase in the number of experts required on the use of non-traditional and complementary data sources in official statistics and on strengthening national statistical systems for enhanced quality and trust in official statistics;
- (h) **Subprogramme 8, component 1, Subregional activities for development in the Pacific.** The net increase of \$4,100 under non-post resources relates mainly to increased requirements under experts (\$1,900) owing to an increase in the number of experts required for policy and programme options to address emerging sustainable development issues in the Pacific, under travel of staff (\$3,600) owing to an increase in the cost of travel and under contractual services (\$26,100) as a result of a change in payment modality for Internet services from general operating expenses to contractual services, offset in part by a decrease under general operating expenses (\$27,000) owing to a change in payment modality for Internet services from general operating expenses to contractual services and under furniture and equipment (\$500) owing to decreased demand for office furniture and equipment replacement;
- (i) **Subprogramme 8, component 2, Subregional activities for development in East and North-East Asia.** The net decrease of \$1,300 under non-post resources relates mainly to decreased requirements under consultants (\$6,100) owing to zero requirements in 2025 for consultancy and the use of those funds to meet increased requirements under experts, under contractual services (\$3,300) owing to the elimination of a publication on digital literacy among older persons in North-East Asia and under furniture and equipment (\$800) owing to a reduction in the requirements for other equipment, offset in part by an increase under experts (\$1,800) owing to an increase in the number of experts required for policy and programme options to address emerging economic and social development issues in East and North-East Asia, under travel of staff (\$1,000) owing to an increase in the cost of travel and under general operating expenses (\$6,100) as a result of an expected increase in the costs of communications and utilities and the rental of furniture and equipment;
- (j) **Subprogramme 8, component 3, Subregional activities for development in North and Central Asia.** The net increase of \$4,700 under non-post resources relates mainly to increased requirements under experts (\$4,000) owing to an increase in the number of experts required for policy and programme options to address emerging economic and social development issues in North and Central Asia and under travel of staff (\$700) owing to an increase in the number of days of travel required to engage with member States to support them in the implementation of the 2030 Agenda in North and Central Asia;
- (k) **Subprogramme 9, Energy.** The net increase of \$10,600 in non-post resources relates mainly to increased requirements under experts (\$5,900) owing to an increase in the number of experts required for universal access to modern energy services, renewable energy, energy efficiency and the cleaner use of fossil fuels and under contractual services (\$12,300) owing to a new publication on regional trends on energy for sustainable development, offset in part by a decrease in consultants (\$7,600) owing to a decrease in the number of days of consultancy required in relation to energy transition and cross-border power connectivity;
- (l) **Programme support.** The net decrease of \$79,000 in non-post resources is mainly due to reduced requirements under contractual services (\$340,800) owing mainly to the migration to cloud services, which means that end-of-life replacement of physical servers is no longer needed, the decommissioning of virtual desktop infrastructure, and the outward redeployment of funds to general operating expenses where actual expenditure is incurred for some outsourced

services, in accordance with experience from past years. The decrease is offset in part by an increase under general operating expenses (\$101,100) owing mainly to the fact that migration to cloud services will increase communication costs and Internet services and to the inward redeployment of funds from contractual services for some outsourced services; under supplies and materials (\$9,900) owing mainly to increased requirements for Cisco and other information technology spare parts; under furniture and equipment (\$147,700) owing mainly to the replacement of new switches to enable cloud-based remote management (including cloud-based dashboards, the remote monitoring of Internet bandwidth performance and enhanced cybersecurity protection in subregional offices), requirements related to the Microsoft Office 365 E3 phone systems add-on for 600 users, the replacement of mobile phones, the renovation of a learning centre (including the purchase of furniture), the maintenance/repair/replacement of catering equipment and the enhancement of catering venues; and under travel of staff (\$3,100) owing to increased requirements in support of the programme of work.

Extrabudgetary resources

- 19.213 As reflected in tables 19.60 (2) and 19.61 (2), extrabudgetary resources amount to \$23,130,500. The resources would complement regular budget resources and would be used mainly to provide for 116 posts (3 D-1, 4 P-5, 15 P-4, 14 P-3, 1 P-2, 8 NPO and 71 LL) to perform mainly the functions of providing technical expertise and management and administrative support for technical cooperation projects and the office operations of ESCAP. In addition, non-post resources would be used for research in emerging areas, the preparation of knowledge products to inform deliberations of member States, the development of institutional and individual capacities of policymakers and the technical staff of governments for the implementation of regionally agreed frameworks and the facilitation of South-South and triangular exchanges in line with the Commission’s mandates.
- 19.214 The extrabudgetary resources under this section are subject to the oversight of the secretariat of ESCAP, which has delegated authority from the Secretary-General.

Policymaking organs

- 19.215 Table 19.63 provides information on the standing intergovernmental organs and related resource requirements under the regular budget.

**Executive direction and management**

- 19.217 Executive direction and management is led by the Office of the Executive Secretary and supported by the Section on Sustainable Development and Countries in Special Situations. The Office provides overall policy direction and management to the secretariat to support member States through the provision of strategic analyses, policy options and capacity-building activities. The efforts are aimed at addressing key development challenges through the provision of innovative solutions for equitable and inclusive economic prosperity, social progress and environmental sustainability across Asia and the Pacific. Emerging issues in the regional development agenda will be identified, and regional concerns and priorities will be articulated at the global level.
- 19.218 The Office of the Executive Secretary provides guidance to divisions, subregional offices and regional institutes on the implementation of the ESCAP programme of work and on ensuring its accountability. It also provides direction on the mainstreaming of policies and strategies relating to gender equality and the empowerment of women, as well as on disability inclusion, across the programme of work and to programme support units.
- 19.219 The Office of the Executive Secretary provides overall direction and management with respect to the preparation of the annual theme study and the organization of the annual session of the Commission, an inclusive intergovernmental platform for regional cooperation. It also guides the implementation of reforms to the ESCAP conference structure pursuant to Commission resolution

- 78/2, the strengthening of organizational effectiveness and results-based management, and the implementation of United Nations system-wide change management and reform initiatives.
- 19.220 The Office of the Executive Secretary also provides overall direction to programme support units in ensuring gender-sensitive and disability-inclusive programme planning and financial and human resources management, as well as accountability systems. Every effort will be made to advance gender parity.
- 19.221 The Section on Sustainable Development and Countries in Special Situations supports the accelerated implementation of the 2030 Agenda in the least developed countries, landlocked developing countries and small island developing States. The Section takes a concerted approach to mainstreaming the issues faced by these groups of countries in the overall programme of work, monitors the implementation of the programmes of action for these countries and provides strategic analyses to address key development challenges. It also guides the organization of the Asia-Pacific Forum on Sustainable Development as the multi-stakeholder platform through which to discuss, review and follow up on regional priorities and needs for sustainable development.
- 19.222 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), as well as with the Secretary-General's bulletin on the environmental policy for the United Nations Secretariat ([ST/SGB/2019/7](#)), the Office is integrating environmental management practices into its operations. In 2023, ESCAP continued its energy efficiency efforts through its daily Earth Hour campaign, through which office lights were automatically switched off during the lunch break, and improvements and adjustments to facilities management systems. As part of the second cycle of the Commission's environmental management system, the roll-out of the system to its subregional offices and regional institutes began in 2022 and all offices completed their own specific action plans in 2023. ESCAP achieved an energy efficiency improvement of 35 per cent compared with 2016 – its reference environmental baseline year. The energy efficiency improvements are equivalent to well over 10,000 tons of carbon dioxide over the seven years since the launch of the ESCAP environmental management system. With regard to the continuation of its sustainable energy efforts, ESCAP has been purchasing international renewable energy certificates to source 100 per cent of its energy consumption from solar energy produced locally in Thailand for four consecutive years (2020–2023), confirming the achievement of the United Nations Secretariat 2030 targets that have been met since 2020. Also in 2023, ESCAP continued its waste prevention and management efforts and achieved high rates of waste recycling (expected figures for 2023 are approximately 70 per cent, which represents a 43 per cent increase from the 2016 baseline year). Efforts included the continuation of the compound-wide ban on all main single-use catering items and the establishment of a new waste management system that boosted recycling (centralized recycling bins, a new waste sorting area and organic waste composting). In addition, a 48 per cent reduction in the use of fresh water, attributable to reduced occupancy and improved water management, was recorded. In 2023, many ESCAP meetings were conducted in a hybrid format, which positively contributed to the organization's efforts to reduce its air travel footprint (a 34 per cent reduction in 2023). With the expansion of the digitalization of processes and remote working modalities, a reduction in printing of approximately 80 per cent was achieved in 2023.
- 19.223 ESCAP will have achieved climate neutrality in its 2023 operations by procuring certified carbon emission reduction credits required for 2023 by June 2024, using extrabudgetary resources. In 2024, the Office will continue to reduce its carbon footprint through the established environmental management system and continue to expand the system in order to facilitate its regional efforts to ensure comprehensive, systematic and monitored environmental management across the organization. The system will target energy, waste, water, sustainable meetings and travel and will address staff awareness as a cross-cutting issue for all the identified environmental issues. It should be noted that, although ESCAP reduction trends were already in place and yielding positive environmental results before the COVID-19 pandemic, the levels of progress reached to date in some

of the targeted areas may not be sustainable at the same level in the long term if building occupancy rates and air travel increase.

- 19.224 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 19.65. The advance purchase compliance rate continued to improve, from 59 per cent in 2022 to 67 per cent in 2023: staff travel compliance was 75 per cent, while planning and securing nominations for non-staff participants in meetings still posed challenges and resulted in a compliance rate of 64 per cent. However, both rates were much improved from those in 2022, which were 71.6 per cent and 52.6 per cent, respectively. ESCAP continues to implement measures to improve the compliance rate, which include regular monitoring of its advance purchase compliance report, the issuance of quarterly advance purchase compliance reports to its senior management and travel approvers and bilateral consultations with respective divisions and offices to discuss their travel planning.

Table 19.65
Compliance rate
(Percentage)

	<i>Actual 2021</i>	<i>Actual 2022</i>	<i>Actual 2023</i>	<i>Planned 2024</i>	<i>Planned 2025</i>
Timely submission of documentation	93	89	95	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	39	59	67	100	100

- 19.225 The proposed regular budget resources for 2025 amount to \$4,173,800 and reflect a decrease of \$200 compared with the approved budget for 2024. The proposed decrease is explained in paragraph 19.212 (a). Additional details on the distribution of the proposed resources for 2025 are reflected in table 19.66 and figure 19.XIII.

Programme support

19.240 The programme support component assists in the implementation of the substantive programme of work of ESCAP at its headquarters in Bangkok, as well as at its subregional offices. Specifically, programme support includes:

- (a) The Strategy and Programme Management Division, which focuses on improving the relevance and impact of the work of ESCAP through its functions related to strategic programme planning, management and budgeting, technical cooperation and resource mobilization, monitoring and evaluation, and partnerships, in particular collaboration with development partners;
- (b) The Division of Administration, which focuses on improving operational support, including leveraging development reform by working with United Nations entities locally and in the region, as well as streamlining global administrative processes and mainstreaming measures deployed during the pandemic, through its functions related to financial resources management, human resources management, information and communications technology management, mail services, travel, conference management (including events management, in particular at the United Nations Conference Centre in Bangkok) and host country relation services, as well as procurement, facilities management, and commercial and general services;
- (c) The Communications and Knowledge Management Section, which focuses on disseminating outreach materials to increase the accessibility and visibility of the analytical, normative and capacity-building work of ESCAP through its communication, knowledge management and information/library services. This includes media relations, social media content, web content management, exhibitions, promotional material, management of the publications programme, the purchase and management of subscriptions to electronic resources, databases and online publications, the preservation of institutional memory and the digitization of official documents, publications and records;
- (d) The Conference and Documentation Services Section, which enables and facilitates multilingual communication among stakeholders, partners and member States through its mandate of providing interpretation, translation, editorial and text processing services, including documentation management, reproduction and printing, as well as the leveraging of language-related information technology and computer-assisted translation tools.

Part V Regional cooperation for development

19.241 The proposed regular budget resources for 2025 amount to \$21,685,500 and reflect a decrease of \$253,400 compared with the approved budget for 2024. The proposed decrease is explained in paragraph 19.212 (l). Additional details on the distribution of the proposed resources for 2025 are reflected in table 19.80 and figure 19.XXVII.

Annex I

Organizational structure and post distribution for 2025

Abbreviations: LL, Local level; NPO, National Professional Officer; RB, regular budget; USG, Under-Secretary-General; XB, extrabudgetary.

^a Reassignment of one Associate Human Resources Officer as Associate Conference Services Officer.

Annex II

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Programme support	1	P-2	Reassignment of 1 Associate Human Resources Officer as Associate Conference Services Officer	The reassignment is associated with the strategic internal realignment within the Division of Administration, which would move a P-3 Administrative Officer from the Conference Management Unit to the Human Resources Management Section, and reassign a P-2 Associate Human Resources Officer to the Conference Management Unit as an Associate Conference Services Officer, in order to meet the operational needs of each office and strengthen the services provided to member States in meetings and conferences.

Organizational structure and post distribution for 2025	75

*** In keeping with paragraph 10 of General Assembly resolution [77/267](#), the part consisting of the post and non-post resource requirements (part III) is submitted through the Advisory Committee on Administrative and Budgetary Questions for the consideration of the Assembly.

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 20.1 The Economic Commission for Europe (ECE) is responsible for facilitating economic integration and cooperation among its member States and promoting sustainable development and economic prosperity in the ECE region. The mandate derives from the priorities established in relevant General Assembly and Economic and Social Council resolutions and decisions, including on the workplan on reform of ECE and the outcome of the review of the 2005 reform of ECE (resolutions 2006/38 and 2013/1, respectively), and Council resolution 36 (IV). ECE provides a regional intergovernmental platform to promote sustained economic growth and the sustainable use of natural resources, protect the environment, advance sustainable transport and mobility, strengthen the capacity for measuring sustainable development, foster innovation, competitiveness and public-private partnerships, accelerate trade and economic integration, improve access to affordable and clean energy, ensure the sustainable management of forests, build urban sustainability and address the implications of demographic trends.

Strategy and external factors for 2025

- 20.2 ECE works to promote regional cooperation and integration as a means of achieving sustainable development in the ECE region. Its intergovernmental bodies, which comprise the Commission and its sectoral committees, provide the foundation for ECE support for national Governments and other stakeholders in advancing the achievement of the Sustainable Development Goals. By convening the annual Regional Forum on Sustainable Development, ECE also provides a region-wide multi-stakeholder platform for the follow-up and review of the Goals, focusing on peer learning and the exchange of practical solutions for achieving sustainable development. The work of ECE is aligned with the Addis Ababa Action Agenda of the Third International Conference on Financing for Development, the Vienna Declaration and the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024 and the New Urban Agenda. Our Common Agenda and any future commitments assumed by member States in this context, including the ones to be integrated into A Pact for the Future that would be adopted at the Summit of the Future, would guide the ECE agenda in accelerating the implementation of existing agreements, including the achievement of the Goals.
- 20.3 The strategy of the programme is based on the implementation of core interlinked functions that are consistent with the legislative mandates of ECE, namely, policy dialogue, normative work and technical cooperation. In line with the principles of the reform of the United Nations development system at the regional level, in implementing its strategy in 2025 ECE will provide a neutral platform for policy dialogue to address multi-country, transboundary and regional economic and environmental issues among its 56 member States, with a specific focus on both central and local authorities, as well as other stakeholders, including civil society, youth representatives, academia and the business community. The normative work of the programme will focus on the development and implementation of international legal instruments, norms and standards in areas critical to sustainable development, and on the identification and dissemination of best practices within and outside the region. Through technical cooperation in its areas of expertise, the programme will provide demand-driven specialized and integrated policy advice, and capacity-building aimed at expanding the use by countries in the region of ECE normative work, facilitate the achievement of the internationally agreed development goals at the country level and achieve multiplier effects by targeting cross-border issues.
- 20.4 The strategy of the programme will be achieved through an integrated approach to sustainable development, which builds on synergies and the results-oriented work of its eight subprogrammes. Identifying and exploiting cross-sectoral synergies of the 2030 Agenda for Sustainable Development and engaging multiple actors for joint action has been critical to accelerating progress in achieving

the Sustainable Development Goals and will remain key in the future work of ECE. To that end, ECE will continue to leverage its integrated approach by providing multisectoral policy advice and capacity-building through cross-sectoral collaboration among the eight subprogrammes of the secretariat, the intergovernmental architecture and the broad expert community of the Commission. The designation of a high-level theme for the biannual Commission session is an important vehicle in this regard. In 2025, ECE will have completed its two-years focus on the theme “Digital and green transformations for sustainable development in the ECE region”, selected for the seventieth session of the Commission, and will start delving into and collaborating on the new cross-cutting theme to be adopted for the seventy-first session.

- 20.5 In 2025, the programme will continue to provide support to its member States in addressing the economic and environmental challenges of achieving the Sustainable Development Goals, with a focus on the transition areas with significant catalytic and multiplier effects across the Goals that align to ECE mandated work areas, including energy, food systems, digital and green transformations, climate change, biodiversity loss and pollution. ECE will actively contribute to the decade of action for the Goals in the ECE region, with an enhanced focus on localizing the Goals, and will follow up on the outcomes of the 2023 Sustainable Development Goals Summit and of the 2024 Summit of the Future, as applicable.
- 20.6 With regard to cooperation with other entities at the global, regional, national and local levels, ECE will build on its close cooperation with international and regional organizations and other regional actors to exchange knowledge, develop joint initiatives and enhance collective impact. Partnerships with the private sector and civil society organizations, think tanks and the academic sector will be strengthened to facilitate ECE policy dialogue and normative work and to engage them in the implementation of the 2030 Agenda by member States.
- 20.7 With regard to inter-agency coordination and liaison, ECE will continue to play a key role in coordinating regional United Nations system entities. ECE will continue to co-lead the Regional Collaborative Platform for Europe and Central Asia and work as part of the secretariat servicing the platform, working to further promote joint action and synergies among United Nations regional entities and their partners in addressing regional, cross-cutting policy issues, offering integrated policy advice and providing regional perspectives at the global level. This work will build on continued strategic partnerships and joint initiatives, programmes and projects established by ECE with other United Nations entities and international financial institutions. ECE will actively engage in issue-based coalitions aimed at facilitating concerted action among various United Nations entities and partners at the operational level. Cooperation with other regional commissions will be pursued through joint initiatives, programmes and projects to maximize synergies for institutional coordination, expertise and knowledge management for best results. The United Nations Special Programme for the Economies of Central Asia, implemented jointly by ECE and the Economic and Social Commission for Asia and the Pacific, will serve as the major framework for cooperation with other relevant stakeholders in Central Asia. At the country level, ECE will work closely with the resident coordinators and United Nations country teams in the ECE region to facilitate the implementation of joint programmes and projects in response to country demands. ECE will also continue its active engagement as part of these country teams through the United Nations Sustainable Development Cooperation Frameworks by contributing to their planning, monitoring and implementation through common country analyses and participation in joint workplans and results groups. The programme will also promote interregional (including South-South) and triangular cooperation.
- 20.8 With regard to the external factors, the overall plan for 2025 is based on the following planning assumptions:
 - (a) Member States continue to guide ECE intergovernmental processes, support the work of ECE and give high priority to regional and subregional cooperation and integration, with a view to achieving sustainable development;
 - (b) All relevant stakeholders at the national level have the political will to cooperate in implementing ECE legal instruments, norms and standards;
 - (c) Voluntary resources continue to be available.

- 20.9 ECE integrates a gender perspective into its operational activities, deliverables and results, as appropriate, to support member States in the achievement of Sustainable Development Goal 5 and targets of the Goals relating to gender equality and women’s empowerment. Guided by its policy on gender equality and the empowerment of women, all ECE subprogrammes will commit themselves to taking concrete action with measurable outputs in the 2025 ECE action plan on mainstreaming a gender perspective into the Commission’s normative work and further promoting the participation of women in all meetings and workshops. All ECE technical cooperation projects will be assessed against their impact on gender equality.
- 20.10 In line with the United Nations Disability Inclusion Strategy, ECE will mainstream disability inclusion into its operational activities, deliverables and results, as appropriate. In line with its annual disability inclusion action plan, ECE will advance disability inclusion in the relevant normative instruments and good practices, as well as its programmes and projects.

Legislative mandates

- 20.11 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

66/288	The future we want	74/4	Political declaration of the high-level political forum on sustainable development convened under the auspices of the General Assembly
67/10	Cooperation between the United Nations and the Eurasian Economic Community		
67/290	Format and organizational aspects of the high-level political forum on sustainable development	74/15	Political Declaration of the High-level Midterm Review on the Implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024
69/137	Programme of Action for Landlocked Developing Countries for the Decade 2014–2024	74/122	Implementation of the outcome of the World Summit for Social Development and of the twenty-fourth special session of the General Assembly
69/213	Role of transport and transit corridors in ensuring international cooperation for sustainable development	74/128	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly
69/277	Political declaration on strengthening cooperation between the United Nations and regional and subregional organizations		
69/283	Sendai Framework for Disaster Risk Reduction 2015–2030	74/144	Implementation of the Convention on the Rights of Persons with Disabilities and the Optional Protocol thereto: accessibility
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development	74/216	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development
70/1	Transforming our world: the 2030 Agenda for Sustainable Development		
70/217; 73/243; 76/217; 77/246; 78/163	Follow-up to the second United Nations Conference on Landlocked Developing Countries	74/231; 78/162	Development cooperation with middle-income countries
71/16	Cooperation between the United Nations and the Economic Cooperation Organization	74/271	Progress towards an accountability system in the United Nations Secretariat
71/256	New Urban Agenda	74/297	Progress in the implementation of General Assembly resolution 71/243 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system		
73/10	Cooperation between the United Nations and the Central European Initiative	75/8; 77/15	Cooperation between the United Nations and the Organization for Democracy and Economic Development – GUAM
73/195	Global Compact for Safe, Orderly and Regular Migration	75/9; 77/16	Cooperation between the United Nations and the Commonwealth of Independent States

Part V Regional cooperation for development

75/12	Cooperation between the United Nations and the Black Sea Economic Cooperation Organization	75/290 B	Review of the implementation of General Assembly resolution 72/305 on the strengthening of the Economic and Social Council
75/213; 76/202; 77/162	Promoting sustainable consumption and production patterns for the implementation of the 2030 Agenda for Sustainable Development, building on Agenda 21		Review of the implementation of General Assembly resolutions 67/290 on the format and organizational aspects of the high-level political forum on sustainable development and 70/299 on the follow-up and review of the 2030 Agenda for Sustainable Development at the global level
75/216; 76/204	Disaster risk reduction		
75/221	Ensuring access to affordable, reliable, sustainable and modern energy for all		
75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system	75/324	High-level political forum on sustainable development
75/290 A	Review of the implementation of General Assembly resolution 72/305 on the strengthening of the Economic and Social Council	77/21	Cooperation between the United Nations and the Organisation for Economic Co-operation and Development
	Review of the implementation of General Assembly resolutions 67/290 on the format and organizational aspects of the high-level political forum on sustainable development and 70/299 on the follow-up and review of the 2030 Agenda for Sustainable Development at the global level	77/173	Implementation of the outcomes of the United Nations Conferences on Human Settlements and on Housing and Sustainable Urban Development and strengthening of the United Nations Human Settlements Programme
	Economic and Social Council	77/181	Women in development
		78/166	Operational activities for development of the United Nations system
		78/167	South-South cooperation

Economic and Social Council resolutions

36 (IV)	Economic Commission for Europe	2023/4	Science, technology and innovation for development
1998/46	Further measures for the restructuring and revitalization of the United Nations in the economic, social and related fields	2023/11	Mainstreaming a gender perspective into all policies and programmes in the United Nations system
2006/38	Workplan on reform of the Economic Commission for Europe and revised terms of reference of the Commission	2023/31	Progress in the implementation of General Assembly resolution 75/233 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system
2013/1	Outcome of the review of the 2005 reform of the Economic Commission for Europe		

Economic Commission for Europe decisions

A (64)	The work of the Economic Commission for Europe	B (70)	Digital and green transformations in support of the sustainable development in the region of the Economic Commission for Europe
A (65)	Outcome of the review of the 2005 reform of ECE	C (70)	Promotion of circular economy and the sustainable use of natural resources
A (66)	Endorsement of the High-level statement on the post-2015 development agenda and expected SDGs in the ECE region	D (70)	Extension of the mandate of the Regional Forum on Sustainable Development
A (70)	Economic and social effects of Russia's aggression against Ukraine		

**Subprogramme 1
Environment***General Assembly resolutions*

2994 (XXVII)	United Nations Conference on the Human Environment	62/68	Consideration of prevention of transboundary harm from hazardous activities and allocation of loss in the case of such harm
47/193	Observance of World Day for Water		

Section 20 Economic development in Europe

64/200	International Strategy for Disaster Reduction	73/226	Midterm comprehensive review of the implementation of the International Decade for Action, “Water for Sustainable Development”, 2018–2028
67/291	Sanitation for All		
69/172	Human rights in the administration of justice		The role of the international community in the prevention of the radiation threat in Central Asia
69/235	Industrial development cooperation	73/238	
70/169	The human right to safe drinking water and sanitation		
71/222	International Decade for Action, “Water for Sustainable Development”, 2018–2028	75/212; 77/334	United Nations Conference on the Midterm Comprehensive Review of the Implementation of the Objectives of the International Decade for Action, “Water for Sustainable Development”, 2018–2028; and Follow-up
71/313	Work of the Statistical Commission pertaining to the 2030 Agenda for Sustainable Development		
72/222	Education for sustainable development in the framework of the 2030 Agenda for Sustainable Development		

Economic and Social Council resolution

2023/21	Implementation of the rapid response mechanism for the protection of environmental defenders under the Convention on Access to Information, Public Participation in Decision-making and Access to Justice in Environmental Matters (Aarhus Convention)
---------	--

Economic Commission for Europe decisions

CEP/AC.13/2005/2	Report of the high-level meeting of environment and education ministries (2005) adopting the ECE strategy for education for sustainable development	ECE/BATUMI. CONF/2016/2/Add.1	Declaration: “Greener, cleaner, smarter!” by ministers of the region of ECE, report of the eighth Environment for Europe Ministerial Conference, 2016
ECE/BELGRADE. CONF/2007/4/Add.1	Statement on education for sustainable development by the ministers of education and of the environment of the ECE region adopted at the joint session on education for development of the sixth Ministerial Conference, entitled “Environment for Europe”, 2007	ECE/BATUMI. CONF/2016/2/Add.2	Batumi ministerial statement on education for sustainable development adopted by the high-level meeting of education and environment ministries of the region of ECE, report of the eighth Environment for Europe Ministerial Conference, 2016
ECE/AC.21/2021/2- EUCHP2018924/ 4.3.2	Report of the High-level Meeting on Transport, Health and Environment and of the special session of the Steering Committee of the Transport, Health and Environment Pan-European Programme	ECE/NICOSIA. CONF/2022/2/Add.1	Ministerial declaration of the ninth Environment for Europe Ministerial Conference
ECE/ASTANA. CONF/2011/2/Add.1	Declaration: “Save water, grow green!” by ministers of the region of ECE, report of the seventh Ministerial Conference, entitled “Environment for Europe”, 2011	ECE/NICOSIA. CONF/2022/2/Add.2	Nicosia ministerial statement on education for sustainable development adopted by the high-level meeting of education and environment ministries of the region of ECE, report of the ninth Environment for Europe Ministerial Conference, 2022

Relevant decisions of the governing bodies of the multilateral environmental agreements of the Economic Commission for Europe

ECE/EB.AIR/154 and Add.1	Report of the Executive Body for the Convention on Long-range Transboundary Air Pollution on its forty-third session	ECE/MP.PP/2021/2 and Add.1	Report of the Meeting of the Parties to the Convention on Access to Information, Public Participation in Decision-making and Access to Justice in Environmental Matters on its seventh session
ECE/MP.PRTR/ 2021/6 and Add.1	Report of the Meeting of the Parties to the Protocol on Pollutant Release and Transfer Registers to the Convention on Access to Information, Public Participation in Decision-making and Access to Justice in Environmental Matters on its fourth session		

Part V Regional cooperation for development

ECE/MP.PP/2021/16-ECE/MP.PRTR/2021/2 and Add.1	Report of the Joint High-level Segment of the seventh session of the Meeting of the Parties to the Convention on Access to Information, Public Participation in Decision-making and Access to Justice in Environmental Matters and of the fourth session of the Meeting of the Parties to the Protocol on Pollutant Release and Transfer Registers, and the Geneva Declaration on Environmental Democracy for Sustainable, Inclusive and Resilient Development, adopted by the two Meetings of the Parties	ECE/MPEIA/27-ECE/MP.EIA/SEA/11 and Add.1	Report of the Meeting of the Parties to the Convention on Environmental Impact Assessment in a Transboundary Context and of the Meeting of the Parties to the Convention on Environmental Impact Assessment in a Transboundary Context serving as the Meeting of the Parties to the Protocol on Strategic Environmental Assessment on their intermediary sessions
ECE/MP.EIA/23-ECE/MP.EIA/SEA/7 and Add.1, Add.2 and Add.3	Report of the Meeting of the Parties to the Convention on Environmental Impact Assessment in a Transboundary Context on its seventh session, and the Meeting of the Parties to the Convention on Environmental Impact Assessment in a Transboundary Context serving as the Meeting of the Parties to the Protocol on Strategic Environmental Assessment on its third session	ECE/CP.TEIA/44 and Add.1	Report of the Conference of the Parties to the Convention on the Transboundary Effects of Industrial Accidents on its twelfth meeting
		ECE/MP.WAT/63 and Add.1 and Add.2	Report of the Meeting of the Parties to the Convention on the Protection and Use of Transboundary Watercourses and International Lakes on its ninth session
		ECE/MP.WH/19 and Add.1 and Add.2	Report of the Meeting of the Parties to the Protocol on Water and Health to the Convention on the Protection and Use of Transboundary Watercourses and International Lakes on its fifth session

Subprogramme 2 Transport

General Assembly resolutions

58/9	Global road safety crisis	76/255	Integration of mainstream bicycling into public transportation systems for sustainable development
68/269; 72/271; 74/299	Improving global road safety		
70/197	Towards comprehensive cooperation among all modes of transport for promoting sustainable multimodal transit corridors	77/286 77/330	World Sustainable Transport Day Cooperation between the United Nations and the Economic Cooperation Organization
72/212; 78/148	Strengthening the links between all modes of transport to achieve the Sustainable Development Goals	78/149	The pivotal role of reliable and stable energy connectivity in driving sustainable development

Economic and Social Council resolutions

1999/65	Reconfiguration of the Committee of Experts on the Transport of Dangerous Goods into a Committee of Experts on the Transport of Dangerous Goods and on the Globally Harmonized System of Classification and Labelling of Chemicals	2022/2 2023/5	Revised terms of reference of the Inland Transport Committee of the Economic Commission for Europe Work of the Committee of Experts on the Transport of Dangerous Goods and on the Globally Harmonized System of Classification and Labelling of Chemicals
2013/7	Europe-Africa fixed link through the Strait of Gibraltar		

Economic Commission for Europe decisions

ECE/AC.21/2014/2	Report of the High-level Meeting on Transport, Health and Environment on its fourth session	ECE/TRANS/274; ECE/TRANS/288; ECE/TRANS/294; ECE/TRANS/304; ECE/TRANS/316; ECE/TRANS/328	
ECE/TRANS/224; ECE/TRANS/236; ECE/TRANS/240 and Corr.1; ECE/TRANS/248; ECE/TRANS/254; ECE/TRANS/270;	Report of the Inland Transport Committee (seventy-fourth to eighty-fifth sessions)	B (66) K (70)	Endorsement of the Geneva Charter on Sustainable Housing Matters related to sustainable transport and mobility

Decisions of the treaty bodies of United Nations transport agreements

E/ECE/TRANS/ 505/Rev.3	1958 Agreement Concerning the Adoption of Harmonized Technical United Nations Regulations for Wheeled Vehicles, Equipment and Parts which can be Fitted and/or be Used on Wheeled Vehicles and the Conditions for Reciprocal Recognition of Approvals Granted on the Basis of these United Nations Regulations	ECE/TRANS/ WP.30/AC.2/147 and Corr.1	Report of the Administrative Committee for the TIR Convention 1975 on its seventy-second session
ECE/RCTE/CONF/4	1997 Agreement concerning the adoption of uniform conditions for periodical technical inspections of wheeled vehicles and the reciprocal recognition of such inspections	ECE/TRANS/ WP.30/AC.2/157	Report of the Administrative Committee for the TIR Convention 1975 on its seventy-seventh session (February 2022): AC.2, in line with annex 11, article 5, adopted the eTIR concepts and the eTIR functional specifications, including the amendments adopted by TIB at its first session. This provides a complete legal and technical basis for those countries that are willing to implement the eTIR procedure
ECE/TRANS/132	1998 Agreement concerning the establishment of global technical regulations for wheeled vehicles, equipment and parts which can be fitted and/or used on wheeled vehicles	ECE/TRANS/ WP.30/AC.2/TIB/2	Report of the Technical Implementation Body (TIB) of the Administrative Committee for the TIR Convention, 1975, on its first session: TIB for eTIR implementation, adopted version 4.3 of the eTIR technical specifications and confirmed their alignment with version 4.3 of the eTIR concepts and the eTIR functional specifications
ECE/TRANS/ ADN/CONF/ 10/Add.1	European Agreement concerning the International Carriage of Dangerous Goods by Inland Waterways		
ECE/TRANS/ WP.30/AC.2/125	Report of the Administrative Committee for the TIR Convention 1975 on its sixty-first session		

**Subprogramme 3
Statistics**

General Assembly resolutions

68/261	Fundamental Principles of Official Statistics	71/313	Work of the Statistical Commission pertaining to the 2030 Agenda for Sustainable Development
69/282	World Statistics Day		

Economic and Social Council resolutions and decisions

2006/6	Strengthening statistical capacity	2022/3	Ensuring that the work in the field of statistics and data is adaptive to the changing statistical and data ecosystem (paras. 4 and 9–10)
2015/10	2020 World Population and Housing Census Programme		
2016/27	Strengthening institutional arrangements on geospatial information management	2023/325	Report of the Statistical Commission on its fifty-fourth session (Statistical Commission decisions 54/101: Global indicator framework for SDGs and targets of the 2030 Agenda; 54/106: Economic statistics; 54/107: National accounts; 54/108: Business and trade statistics; 54/109: Regional statistical development; 54/110: Environmental-economic accounting; 54/111: Fundamental Principles of Official Statistics; 54/113: Statistical capacity development; 54/116: Big data; 54/117: Price statistics; 54/118: Integration of statistical and geospatial information; 54/119: Data stewardship)
2019/210	Report of the Statistical Commission on its fiftieth session (Statistical Commission decision 50/116: Disaster-related statistics)		
2020/5	Strengthening coordination of the statistical programmes in the United Nations system		
2021/7	Mainstreaming a gender perspective into all policies and programmes in the United Nations system		
2021/224	Report of the Statistical Commission on its fifty-second session (Statistical Commission decisions 52/109 Migration statistics; 52/114 Household surveys)		

**Subprogramme 4
Economic cooperation and integration**

General Assembly resolutions

76/213	Science, technology and innovation for sustainable development	77/155	Promoting investments for sustainable development
76/224	Towards global partnerships: a principle-based approach to enhanced cooperation between the United Nations and all relevant partners	77/320	Impact of rapid technological change on the achievement of the Sustainable Development Goals and targets
77/150	Information and communication technologies for sustainable development		

**Subprogramme 5
Sustainable energy**

General Assembly resolutions

69/225	Promotion of new and renewable sources of energy	72/224	Ensuring access to affordable, reliable, sustainable and modern energy for all
70/213	Science, technology and innovation for development		

Economic and Social Council resolutions and decisions

1997/226	United Nations International Framework Classification for Energy Reserves/Resources: Solid Fuels and Mineral Commodities	2023/18	Best Practice Guidance for Effective Management of Coal Mine Methane at National Level: Monitoring, Reporting, Verification and Mitigation
2004/233	United Nations Framework Classification for Fossil Energy and Mineral Resources	2023/19	United Nations Resource Management System Principles and Requirements
2011/222	Best Practice Guidance for Effective Methane Drainage and Use in Coal Mines	2023/20	Request to strengthen the role of the secretariat of the Economic Commission for Europe in supporting member States in building resilient energy systems and modernizing resource management systems
2021/249	Best Practice Guidance for Effective Methane Recovery and Use from Abandoned Coal Mines		
2021/250	Updated United Nations Framework Classification for Resources		

Economic Commission for Europe decisions

E (79)	Building resilient energy systems	F (70)	Decision to study finance for energy-related climate change activities in the region of the Economic Commission for Europe, particularly related to critical raw materials
--------	-----------------------------------	--------	--

**Subprogramme 6
Trade**

General Assembly resolutions

75/211	Entrepreneurship for sustainable development	76/200	Agricultural technology for sustainable development
75/231	Industrial development cooperation	76/222	Agriculture development, food security and nutrition

Economic and Social Council resolutions and decisions

1991/76	Promotion of interregional cooperation in the area of international trade facilitation	1997/225	Economic Commission for Europe Recommendation 25, entitled "Use of the UN/EDIFACT Standard"
---------	--	----------	---

**Subprogramme 7
Forests and the forest industry**

General Assembly resolutions

62/98	Non-legally binding instrument on all types of forests	75/219	Implementation of the Convention on Biological Diversity and its contribution to sustainable development
67/200	International Day of Forests		
71/285	United Nations strategic plan for forests 2017–2030	76/223	Natural plant fibres and sustainable development
71/286	United Nations forest instrument	77/170	Ensuring access to affordable, reliable, sustainable and modern energy for all
73/284	United Nations Decade on Ecosystem Restoration (2021–2030)	77/186	Agriculture development, food security and nutrition

Economic and Social Council resolutions

2015/33	International arrangement on forests beyond 2015	2020/14	Outcome of the fifteenth session of the United Nations Forum on Forests
2017/4	United Nations strategic plan for forests 2017–2030 and quadrennial programme of work of the United Nations Forum on Forests for the period 2017–2020	2021/6	Programme of work of the United Nations Forum on Forests for the period 2022–2024

**Subprogramme 8
Housing, land management and population**

General Assembly resolutions

65/234	Follow-up to the International Conference on Population and Development beyond 2014	76/133	Inclusive policies and programmes to address homelessness, including in the aftermath of the coronavirus disease (COVID-19)
70/107	International cooperation on humanitarian assistance in the field of natural disasters, from relief to development	77/190	Follow-up to the Second World Assembly on Ageing
75/131	United Nations Decade of Healthy Ageing (2021–2030)		

Economic and Social Council resolutions and decisions

2014/239	Report of the Commission on Population and Development on its forty-seventh session and provisional agenda for its forty-eighth session (Commission on Population and Development resolution 2014/1, Assessment of the status of implementation of the Programme of Action of the International Conference on Population and Development)	2020/7	Affordable housing and social protection systems for all to address homelessness
		2020/8	Modalities for the fourth review and appraisal of the Madrid International Plan of Action on Ageing, 2002
		2020/19	Change of name and revised terms of reference of the Working Group on Ageing of the Economic Commission for Europe
2016/25	Future organization and methods of work of the Commission on Population and Development	2023/15	Fourth review and appraisal of the Madrid International Plan of Action on Ageing, 2002

Human Rights Council resolutions

48/3, 54/13	Human rights of older persons
-------------	-------------------------------

Economic Commission for Europe decisions

ECE/AC.23/2002/2/Rev.6	Regional Implementation Strategy for the Madrid International Plan of Action on Ageing, 2002	ECE/HBP/190	Report of the Committee on Housing and Land Management on its seventy-eighth session (Geneva Ministerial Declaration on Sustainable Housing and Urban Development)

Deliverables

20.12 Table 20.1 lists the cross-cutting deliverables of the programme.

Table 20.1

Cross-cutting deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	60	33	27	40
1. The Economic Commission for Europe	13	10	–	13
2. Regional Forum on Sustainable Development for the region of the Economic Commission for Europe	2	2	2	2
3. The ECE Executive Committee	45	21	25	25
Substantive services for meetings (number of three-hour meetings)	26	24	18	26
4. The Economic Commission for Europe	4	4	–	4
5. Regional Forum on Sustainable Development for the region of the Economic Commission for Europe	3	4	3	3
6. The ECE Executive Committee	10	6	6	10
7. The Working Group on Gender and Sustainable Development Goals of the United Nations Special Programme for the Economies of Central Asia	2	2	2	2
8. The Fifth Committee	1	1	1	1
9. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
10. The Committee for Programme and Coordination	1	1	1	1
11. The Regional Collaborative Platform	4	5	4	4
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	20	–	20	–
12. Capacity-building seminars on advancement of gender equality for government officials	20	–	20	–
Publications (number of publications)	2	1	2	2
13. On gender equality and sustainable development	1	–	1	1
14. ECE annual report	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: advice to and consultations with member States and United Nations country teams to facilitate implementation of the United Nations Sustainable Development Cooperation Framework process in the programme countries in the region.				

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

D. Communication deliverables

Outreach programmes, special events and information materials: promotional materials; information materials for United Nations Road Safety Fund advocacy campaign and awareness-raising material; and films on ECE activities.

External and media relations: ECE weekly newsletter; and news, approximately 200 press releases and news per year; 2 press conferences on ECE activities.

Digital platforms and multimedia content: ECE website; ECE Executive Committee, the gender equality and the technical cooperation activities websites; and news on ECE activities on four social media platforms.

Evaluation activities

- 20.13 The following evaluations completed in 2023 have guided the proposed programme plan for 2025:
 - (a) Office of Internal Oversight Services evaluation of ECE subprogrammes 4 and 6;
 - (b) Office of Internal Oversight Services Secretariat-wide evaluations of Secretariat entities’ contribution to the Sustainable Development Goals, and on strengthening the role of evaluation and the application of evaluation findings on programme design, delivery and policy directives for 2020–2021;
 - (c) Programme-level evaluation conducted by ECE on the role of ECE to support implementation of the 2030 Agenda, in the context of the United Nations development system reform.
- 20.14 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2025. For example, ECE is furthering the implementation of results-based management through improved identification of performance indicators, clearer articulation of roles and responsibilities, and reporting that better emphasizes the benefits of collaboration with other United Nations development system entities. ECE is also strengthening its technical cooperation approach by better monitoring and prioritizing member States’ requests for assistance and is sustaining its cross-sectoral approach by promoting collaborations among its subprogrammes and with other United Nations organizations, for example, on the high-level theme adopted by the Commission.
- 20.15 A programme-level evaluation of ECE data use and information management approaches is planned for 2025.

Programme of work

Subprogramme 1

Environment

Objective

- 20.16 The objective, to which the subprogramme contributes, is to improve environmental governance and performance for safeguarding the environment and health.

Strategy

- 20.17 To contribute to the objective, the subprogramme will:
 - (a) Support the implementation of outcomes of global and regional summits and conferences, and support and promote the implementation by countries of the ECE multilateral environmental agreements, contributing to achieving mainly Goals 3, 6, 9, 11 to 13 and 15 to 17, through the core interlinked functions of international policy dialogue, normative work, capacity-building

and the dissemination of good practices and lessons learned in the areas of air quality, water, industrial safety, public participation, impact assessment, environmental monitoring and assessment, environmental performance, education for sustainable development, and the mainstreaming of environmental concerns into other dimensions of sustainable development;

- (b) Support and promote the implementation of the ECE policy tools, including the ECE Environmental Performance Review Programme, contributing to achieving mainly Goals 6, 11 to 13 and 15; the ECE Environmental Monitoring and Assessment Programme, contributing to achieving mainly Goal 17; the ECE strategy for education for sustainable development, contributing to achieving Goals 4, 12 and 13; and the Transport, Health and Environment Pan-European Programme, contributing to achieving mainly Goals 3, 11, 13 and 17;
- (c) Support and promote the sharing of information (e.g., through the Shared Environmental Information System), experiences and good practices in the ECE region;
- (d) Promote synergies among ECE multilateral environmental agreements;
- (e) Conduct environmental performance reviews, assisting countries in the implementation of the recommendations from those reviews, and monitor the impact of the recommendations on national policies;
- (f) Using a country needs-based approach, support countries, with a focus on the Caucasus, Central Asia and Eastern and South-Eastern Europe, in environmental policymaking, monitoring, assessment and management, including by providing an intergovernmental decision-making platform, organizing capacity-building activities and providing advisory services;
- (g) Work with interested non-ECE countries, including those wishing to join the multilateral environmental agreements that are open to global accession;
- (h) Support member States in addressing emerging issues related to the work of the subprogramme, including those resulting from international and regional processes by, among others, providing advisory support, developing policy packages and/or recommendations and supporting countries in the development of region-wide approaches to such emerging issues (e.g., on sustainable infrastructure), including ensuring effective and inclusive access to information, public participation in decision-making and access to justice.

20.18 The above-mentioned work is expected to result in:

- (a) Improved environmental governance and performance by member States;
- (b) Strengthened integration of environmental concerns into member States' sectoral policies;
- (c) More effective development and implementation of environmental legislation and policy by member States;
- (d) Improved response to environmental challenges by member States;
- (e) Enhanced cross-border cooperation between countries and effective international and national cooperation;
- (f) Strengthened implementation of ECE multilateral environmental commitments and increased geographical coverage.

Programme performance in 2023

Increased number of United Nations Member States becoming parties to the Convention on the Protection and Use of Transboundary Watercourses and International Lakes (Water Convention)

20.19 The Water Convention was originally negotiated as a regional framework for transboundary water cooperation for the pan-European region. Since March 2016, with the operationalization of the amendments to articles 25 and 26 of its text, the Convention is open to accession by all United Nations Member States. By acceding to the Convention, these countries introduced into their

national legislation key rules and principles, such as pollution prevention or sustainable water allocation, which ensure the sustainable management of water resources and pave the way to peaceful cooperation on shared waters. Several concrete actions were taken by new parties, such as initiating cooperation on shared groundwaters and the development of implementation plans. The ECE work on supporting the acceleration of the Convention’s universalization also contributed to the impact of the 2023 United Nations Water Conference by catalysing action on water cooperation.

20.20 Progress towards the objective is presented in the performance measure below (see figure 20.I).

Figure 20.I

Performance measure: number of new parties to the Water Convention (annual)

Planned results for 2025

Result 1: strengthened industrial safety governance in Eastern and South-Eastern Europe, the Caucasus and Central Asia

20.21 The subprogramme’s work contributed to sustaining national policy dialogues in Serbia, including through the organization of a stakeholder consultation and support for the development of the national programme for industrial safety. The target of sustaining national policy dialogues on industrial safety in five Central Asian countries was not met owing to the termination of a project to launch the national policy dialogues on industrial safety and the lack of a follow-up project for their implementation. However, interinstitutional working groups on tailings safety and the prevention of accidental water pollution were formally established in two Central Asian countries in January 2022 (Kazakhstan) and October 2022 (Tajikistan), and both countries organized the second meetings of their working groups on 15 March 2023 in Astana and 4 April 2023 in Dushanbe. Uzbekistan also organized a meeting on 27 April 2023, with ECE support, to consider the establishment of a similar working group in its country.

20.22 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 20.2).

Table 20.2

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Serbia established a national policy dialogue steering committee	Serbian national policy dialogue meeting addressed issues of national	National policy dialogues were sustained and implemented by Serbia	National policy dialogues are sustained and implemented by Serbia	Action plan for the implementation of the national programme on

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Central Asian countries reviewed industrial safety legislation to align with the Convention's requirements	concern, involving relevant authorities Finalization of review of industrial safety legislation to align with the Convention's requirements	Interinstitutional working groups were sustained in Kazakhstan and Tajikistan	Serbia finalizes the national programme on industrial safety	industrial safety in Serbia developed Interinstitutional working groups are sustained and meetings held in at least two Central Asian countries

Result 2: increased number of United Nations Member States becoming parties to multilateral environmental agreements serviced by the Economic Commission for Europe

- 20.23 The subprogramme's work contributed to 602 United Nations Member States becoming parties to multilateral environmental agreements serviced by ECE, which exceeded the planned target of 593 parties.
- 20.24 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 20.II).

Figure 20.II
Performance measure: number of parties to multilateral environmental agreements serviced by the Economic Commission for Europe (cumulative)

Result 3: modernized database on pollutants to enable responsive fact-based decisions

Proposed programme plan for 2025

- 20.25 Digital modernization of the pollutant release and transfer registers, governed by the Protocol on Pollutant Release and Transfer Registers, as a comprehensive database for decision-making and reporting for various processes is needed for effective policy decisions. The subprogramme strengthened the capacity of member States with regard to international and national reporting obligations, including advisory support, the preparation of materials and thematic events. Those efforts led to the recognition by member States of the pressing need to integrate data on different emissions into a single portal within a wider information system covering environmental, social and economic data.

Lessons learned and planned change

- 20.26 The lesson for the subprogramme was that pollution-related databases could be better integrated to improve the utility of the data. In applying the lesson, the subprogramme will support preparation of a draft decision to integrate databases using technological advances and guidance to integrate pollutant release and transfer registers with other systems. The subprogramme will provide technical

assistance to enhance decision-making on pollution prevention, impact assessments, sustainability and a circular economy.

20.27 Expected progress is presented in the performance measure below (see table 20.3).

**Table 20.3
Performance measure**

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
–	Background material on modernizing pollutant release and transfer registers considered by the Working Group of the Parties to the Protocol on Pollutant Release and Transfer Registers	Draft decision on modernizing pollutant release and transfer registers agreed by the Protocol's Bureau	Draft decision on modernizing pollutant release and transfer registers approved by the Working Group of the Parties to the Protocol on Pollutant Release and Transfer Registers	Meeting of the Parties to the Protocol adopts a decision on modernizing pollutant release and transfer registers

Deliverables

20.28 Table 20.4 lists all deliverables of the subprogramme.

**Table 20.4

19. Progress reports and performance reviews on environmental issues	4	2	7	2
20. Multilateral environmental agreements administered by the subprogramme	1	–	1	–
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services for some 100 government officials and other stakeholders of States participating in the United Nations Special Programme for the Economies of Central Asia on water, energy and other environmental issues.				
D. Communication deliverables				
Outreach programmes, special events and information materials: environmental performance review highlights and a brochure on assistance and cooperation programme under the Convention on the Transboundary Effects of Industrial Accidents to facilitate broad dissemination of key messages and recommendations in the reviewed countries.				
External and media relations: press releases on environmental issues.				
Digital platforms and multimedia content: website of the subprogramme.				

Subprogramme 2 Transport

Objective

- 20.29 The objective, to which the subprogramme contributes, is to advance an intraregionally and interregionally sustainable inland transport (road, rail, inland waterway and intermodality) system by making it safer, cleaner, more efficient, more inclusive and more affordable, both for freight transport and people's mobility.

Strategy

- 20.30 To contribute to the objective, the subprogramme will:
- (a) Service the Inland Transport Committee and its 21 working parties and 13 administrative committees, as well as the Committee of Experts on the Transport of Dangerous Goods and on the Globally Harmonized System of Classification and Labelling of Chemicals and more than 50 formal and informal expert networks;
 - (b) Administer the international regulatory framework for inland transport, which includes 61 United Nations legal instruments on safety, pollution, efficiency, multimodality and effectiveness (normative function) and ensure that the Committee's regulatory functions are up to date with current technologies and transport innovations – such as intelligent transport systems, autonomous vehicles, digitization of customs and transport documents, and electric vehicles – and all legal instruments are open to all United Nations Member States, as appropriate, by developing new and updating existing legal instruments, as necessary, including maintaining the database of international regulatory frameworks for inland transport;
 - (c) Provide an intergovernmental policy dialogue platform at the annual sessions of the Inland Transport Committee to review emerging challenges and emergency situations; support consensus-building during the Committee's events in favour of regional and interregional connectivity, and climate change mitigation and adaptation, among other matters, including through the adoption of strategies, action plans, high-level statements or resolutions on harmonized actions by member States and contracting parties in order to enable the full implementation of the Committee's mandate;
 - (d) Analyse and provide technical assistance and capacity-building on accession to and implementation of legal instruments, at the request of member States and contracting parties within and beyond the ECE region;
 - (e) Facilitate global improvements in road safety, through policy dialogue at Committee meetings, and by contributing to the work of the Special Envoy of the Secretary-General for Road Safety and the operation of the United Nations Road Safety Fund, in cooperation with other international organizations, and provide capacity-building and advisory assistance with regard to promoting legal instruments, calls for proposals and other related activities, as appropriate;
 - (f) Support the efforts of member States to respond to and recover from emergency situations, including pandemics, and foster the functioning and development of national, regional and international inclusive transport systems and the implementation of the sustainable development agenda;
 - (g) Promote knowledge-sharing and cooperation among Governments and key stakeholders, raise awareness of emerging issues and best responses, contribute to the improved monitoring and measuring of the Sustainable Development Goals, facilitate the adaptation of legally binding instruments and frameworks to new realities, and prepare new guidance materials.
- 20.31 The above-mentioned work is expected to contribute to the achievement of Sustainable Development Goals 3, 5, 6 to 9 and 11 to 13 and result in:
- (a) Improvements in sustainable mobility, and in monitoring and measuring the Goals;
 - (b) Improvements in inland transport, leading to safer, cleaner, more efficient, more inclusive and more affordable multimodal systems for contracting parties to the United Nations inland transport conventions;
 - (c) Enhanced efforts towards net-zero emissions by 2050, guided by a strategy for reducing greenhouse gas emissions in inland transport to be adopted by the Committee in February 2024;
 - (d) More efficient and resilient cross-border flows of goods and people regionally and globally;

- (e) Enhanced intergovernmental cooperation in emergency situations and minimized disruptions to the continued implementation and updating of United Nations inland transport conventions.

Programme performance in 2023

Increased accession to legal instruments for the digitalization of transport and border-crossing procedures

- 20.32 In response to inland transportation challenges in border crossing that arose during the coronavirus disease (COVID-19) pandemic, the subprogramme intensified efforts to digitalize applications of relevant legal instruments and developed tools and applications to further promote accessions. Specifically, it: (a) interconnected the eTIR international system with customs systems of five countries and completed the gap analysis for three others; (b) prepared high-level architecture, concepts and functional specifications for future eCMR operations; (c) defined high-level architecture for the digitalization of the *carnet de passages en douane* (eCPD); (d) developed the International Transport Infrastructure Observatory; (e) developed Sustainable Inland Transport Connectivity Indicators; and (f) continued to develop the e-learning platform LearnITC that was launched in 2022 to promote understanding of the United Nations inland transport legal instruments and their digitization.
- 20.33 Progress towards the objective is presented in the performance measure below (see table 20.5).

Table 20.5
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
164 accessions (cumulative) by Member States to legal instruments for the digitalization of transport and border-crossing procedures	166 accessions (cumulative) to legal instruments for the digitalization of transport and border-crossing procedures	170 accessions (cumulative) to legal instruments for the digitalization of transport and border-crossing procedures
	44 countries enrolled in LearnITC platform and 123 users registered on the platform	79 countries enrolled in the LearnITC platform and 330 users registered on the platform

Note: Accessions to the Convention on the Contract for the International Carriage of Goods by Road, eCMR and the Customs Convention on the International Transport of Goods under Cover of TIR Carnets (cumulative). Countries enrolled include the number of countries with at least one user enrolled in one or more e-courses; users include the number of persons registered on the LearnITC platform.

Planned results for 2025

Result 1: enhanced regulatory framework for sustainable inland transport systems

Programme performance in 2023 and target for 2025

- 20.34 The subprogramme’s work contributed to 1,834 contracting parties to United Nations legal instruments on transport administered by ECE, which exceeded the planned target of 1,813.
- 20.35 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 20.III).

Figure 20.III
Performance measure: number of contracting parties to United Nations legal instruments on transport administered by the Economic Commission for Europe (cumulative)

Result 2: increased number of new and updated legal instruments strengthening the capacity of United Nations Member States to address climate change

Programme performance in 2023 and target for 2025

- 20.36 The subprogramme’s work contributed to 23 updates to the existing legal instruments on vehicle regulations and one new legal instrument, which entered into force in 2023, which did not meet the planned target of 28 owing to a change in the methodology in which contracting parties requested rationalizing amendments for more regulatory continuity and robustness and bundling them on a fixed basis rather than discussing them individually at every session (ECE/TRANS/WP.29/GRPE/86/Rev.1, paras. 18–19). While with the new methodology the number of amendments is lower, each amendment may include multiple updates and can be considered more comprehensive.
- 20.37 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 20.IV).

Figure 20.IV
Performance measure: number of new and updated United Nations legal instruments under ECE purview, entering into force annually and improving the climate performance of the transport sector (cumulative)^a

^a The figure reflects data since the 2015 Paris Agreement.

Result 3: increased accessions to core road safety conventions as an initial step to contribute to fewer worldwide road accident fatalities and injuries

Proposed programme plan for 2025

20.38 In 2020, the General Assembly proclaimed the Second Decade of Action for Road Safety 2021–2030, aiming to reduce road traffic deaths and injuries by at least 50 per cent from 2021 to 2030 (see Assembly resolution [74/299](#)). The subprogramme's work contributed to 486 contracting parties to the eight core United Nations road safety conventions, which is the prerequisite initial step to supporting countries in building road safety systems.

Lessons learned and planned change

20.39 The lesson for the subprogramme was that scattered accessions to the conventions do not always contribute to effective national road safety systems. In applying the lesson, the subprogramme will strengthen the provision of guidance on national road safety systems and intraregional and interregional assistance to support full accessions to all core road safety conventions and their subsequent implementation.

20.40 Expected progress towards the objective is presented in the performance measure below (see figure 20.V).

Figure 20.V

Performance measure: number of contracting parties to core United Nations road safety conventions and number of events during which member States share challenges and good practices on road safety convention implementation (cumulative)

Deliverables

20.41 Table 20.6 lists all deliverables of the subprogramme.

15. On statistics	1	1	1	1
16. On border crossing facilitation	-	1	1	1
Technical materials (number of materials)	1	2	2	2
17. Recommendations for performance evaluation of automated driving systems	-	1	1	1
18. Transport statistics – country profiles	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services for contracting parties of United Nations transport conventions administered by ECE on legal instruments relating to inland transport, facilitation of transport, border crossing, road safety, vehicle construction, and transport of dangerous goods and other special cargo.				
Databases and substantive digital materials: the International TIR Data Bank for users from more than 70 contracting parties of the TIR Convention; TIR and eTIR portals; the eTIR international system; the International Transport Infrastructure Observatory; the Sustainable Inland Transport Connectivity Indicators online user platform; the inventory of standards on inland water infrastructure; inventory of existing European Agreement on Main International Railway Lines and European Agreement on Important International Combined Transport Lines and Related Installations standards and parameters; databases on transport statistics, road traffic accidents, transport of dangerous goods, transport of perishable foodstuffs, urban transport and transport and environment; Rail Security Observatory; digitized signs and signals (E-CoRSS) under the Convention on Road Signs and Signals; and smart and sustainable connectivity e-learning platform.				
D. Communication deliverables				
Outreach programmes, special events and information materials: information materials, including brochures on legal instruments and activities of the subprogramme for global and regional access.				
External and media relations: press releases for the subprogramme.				
Digital platforms and multimedia content: LearnITC and other digital platforms and multimedia content on sustainable transport and mobility; and website of the subprogramme.				

Subprogramme 3 Statistics

Objective

- 20.42 The objective, to which the subprogramme contributes, is to advance official statistics at the national and international levels for evidence-based policymaking and assessing progress towards achieving the Sustainable Development Goals and to ensure the coordination of statistical activities in the ECE region under the Conference of European Statisticians.

Strategy

- 20.43 The strategy of the subprogramme is guided by the priorities and needs of member States and is based on the core interlinked functions: the streamlining of international statistical work in the ECE region through policy dialogue; methodological work to develop and promote guidelines and recommendations to enhance the quality of statistics; and the statistical capacity development of ECE member States with less developed statistical systems.
- 20.44 To contribute to the objective, the subprogramme will:
- (a) Promote in-depth statistical dialogue at the Conference of European Statisticians and expert meetings;
 - (b) Launch regional and country-specific initiatives related to methodological work to develop and disseminate statistical models, guidelines and recommendations to enhance the quality of statistics, to support modernization of national statistical offices and their changing role to become data stewards, and to promote the use of official statistics;
 - (c) Maintain and develop the ECE statistical database;
 - (d) Establish and strengthen partnerships between geospatial experts and statisticians to support the integration of statistical and geospatial information, in cooperation with statistical departments of other regional entities, as well as international specialized agencies active in the region;
 - (e) Facilitate the exchange of experiences and good practices in population and housing censuses, price statistics and environment statistics, including adaptations that occurred during COVID-19 restrictions allowing for improved timeliness and granularity of official statistics;
 - (f) Provide support to countries in planning and conducting their census and developing their statistical capacity, including cross-cutting topics such as statistics for the Sustainable Development Goals, statistical legislation, data collection, integration and dissemination, and human resource management.
- 20.45 The above-mentioned work is expected to result in:
- (a) Improved statistical methodology and capacity of member States to measure and monitor the Sustainable Development Goals;
 - (b) Member States using innovative and efficient approaches to conducting censuses that result in the improved cost-efficiency, coverage, accuracy, comparability and timeliness of dissemination of the census results;
 - (c) Improved capacity by member States to provide the statistics necessary to develop evidence-based policies to manage their post-pandemic recovery.

Programme performance in 2023

Improved measurement of economic globalization and of the activities of multinational enterprise groups

- 20.46 Economic globalization and the activities of multinational enterprise groups play a significant role in national economies. Measuring economic globalization and multinational enterprise activities is a challenge facing producers of official statistics. To this end, the subprogramme has developed recommendations and guidelines to assist countries in measuring economic globalization: the “Impact of globalization on national accounts” (2011); the “Guide to measuring global production” (2015); and the *Guide to Sharing Economic Data in Official Statistics* (2020). The subprogramme has also promoted the establishment in national statistical offices of specialized units responsible for multinational enterprise groups, so-called “large cases units”, to account for their activities more consistently across national and international economic statistics and to improve the measurement of economic globalization and of the activities of multinational enterprise groups.
- 20.47 Progress towards the objective is presented in the performance measure below (see figure 20.VI).

Figure 20.VI

Performance measure: number of countries that have established large cases units (cumulative)

Planned results for 2025

Result 1: increased number of countries collaborating on developing and using machine learning techniques for the production of official statistics

Programme performance in 2023 and target for 2025

- 20.48 The subprogramme’s work contributed to 42 member States actively collaborating in developing and using machine learning techniques for the production of official statistics, which exceeded the planned target of 33 member States.
- 20.49 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 20.VII).

Figure 20.VII

Performance measure: number of member States actively collaborating in developing and using machine learning techniques for the production of official statistics (cumulative)

Result 2: improved environmental statistics and indicators in the Economic Commission for Europe region

Programme performance in 2023 and target for 2025

- 20.50 The subprogramme's work contributed to 25 member States actively improving environmental statistics and indicators through the Joint Task Force on Environmental Statistics and Indicators, which met the planned target.
- 20.51 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 20.VIII).

Figure 20.VIII

Performance measure: number of countries improving environmental statistics and indicators through the Joint Task Force on Environmental Statistics and Indicators (annual)

Result 3: Economic Commission for Europe statistical database for improved research and decision-making

Proposed programme plan for 2025

- 20.52 The ECE statistical database provides key economic indicators, population figures, and statistics on gender equality and migration. ECE helps member States to enhance the international comparability and quality of national statistics and facilitates access to policy-relevant numbers in the statistical database for all member States. In 2022, the subprogramme developed a new statistical data portal, which offers user-friendly access to data, with a focus on data visualizations.

Lessons learned and planned change

- 20.53 The lesson for the subprogramme was that further visualization of data and developing data stories could help to reach wider audiences and improve user satisfaction. In applying the lesson, the subprogramme will conduct regular surveys to gather insights into what enhancements to data visualization would be most useful and will prioritize improvements based on feedback.
- 20.54 Expected progress towards the objective is presented in the performance measure below (see figure 20.IX).

Figure 20.IX

Performance measure: number of downloads from the Economic Commission for Europe statistical database (annual)

Notes: The increase of downloads from 2021 to 2023 is understood as exceptionally high because of the launch and expansion of a new Sustainable Development Goals section of the database. No such expansion is foreseen for 2024 and 2025, and this is reflected in the values forecasted for those years.

Deliverables

- 20.55 Table 20.7 lists all deliverables of the subprogramme.

Table 20.7

Subprogramme 3: deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	81	75	69	69
1. Documentation for the Conference of European Statisticians	43	43	43	43
2. Documentation for groups of experts on statistical issues	38	32	26	26
Substantive services for meetings (number of three-hour meetings)	85	83	85	85
3. Meetings of the Conference of European Statisticians and its Bureau	13	13	13	13
4. Meetings of groups of experts on statistical issues	72	70	72	72
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	1	1	–
5. On social and economic statistics	1	1	1	–
Seminars, workshops and training events (number of days)	6	6	6	7
6. Workshops on social and economic statistics	3	3	3	4

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
7. Workshops on innovating statistical production	3	3	3	3
Publications (number of publications)	7	6	7	7
8. On topics covering multiple statistical areas, including social, environmental and economic statistics	7	6	7	7

C. Substantive deliverables

Consultation, advice and advocacy: advisory services for more than 100 government officials and other stakeholders of up to 4 programme countries in the ECE region on economic, social, demographic and environment statistics, statistics for the Sustainable Development Goals, geospatial statistics and institutional issues and modernization of official statistics.

Databases and substantive digital materials: Maintaining 5 ECE data domains.

D. Communication deliverables

External and media relations: articles for the “UNECE Weekly” and “EnvStats” newsletters for regional access.

Digital platforms and multimedia content: interactive digital workspaces (wikis, including the ECE census wiki); and website of the subprogramme.

Subprogramme 4 Economic cooperation and integration

Objective

- 20.56 The objective, to which the subprogramme contributes, is to strengthen policies on innovation, competitiveness and public-private partnerships in the ECE region.

Strategy

- 20.57 The strategy of the subprogramme is based on the implementation of three core interlinked functions in the subprogramme’s two areas of work (innovation and competitiveness policies; and public-private partnerships): international policy dialogue; normative and analytical work; and capacity-building and the sharing of best practices and lessons learned.
- 20.58 To contribute to the objective, the subprogramme will:
- (a) Support member States in creating a conducive business environment by developing good practices to inform innovation policy reforms in order to drive sustainable development, including through on-demand analyses of national innovation systems, policies and institutions; and through capacity-building workshops and seminars at the national and subregional levels;
 - (b) Build the capacity of member States in creating regulatory frameworks and public-private partnership project pipelines that can help to close the Sustainable Development Goals infrastructure financing gap, including through:
 - (i) The promotion of innovative modalities of financing, development and management of critical infrastructure;
 - (ii) The development of international guidelines and standards to design public-private partnership projects and legal and regulatory frameworks;
 - (iii) The use, on-demand, of a methodology to evaluate and score public-private partnership projects in support of sustainable development;

- (iv) Cooperation with multilateral platforms for sustainable infrastructure (including SOURCE);¹
 - (c) Focus some of its policy dialogues, analyses and recommendations, standards, and capacity-building on addressing economic challenges through innovation policies and public-private partnership infrastructure projects that can facilitate innovation and develop infrastructure to make economies more resilient and sustainable.
- 20.59 This work will help member States to make progress towards achieving Sustainable Development Goals 8, 9, 12 and 17 and contribute to enhancing the sustainable use of natural resources, and digital and green transformations for sustainable development.
- 20.60 The above-mentioned work is expected to result in:
- (a) Improved innovation-related policies and institutions in member States for sustainable development;
 - (b) The improved design and operation of public-private partnerships by member States that contribute to sustainable development and lead to more sustainable projects.

Programme performance in 2023

United Nations programme countries in the Economic Commission for Europe region have improved their national policies in support of innovation for sustainable development

- 20.61 Innovation efforts of programme countries in the ECE region have been constrained by a lack of effective supporting policies. The subprogramme has supported programme countries in the ECE region (upon request) with in-depth analyses of their national innovation policies, resulting in detailed recommendations for policy reforms, and with tailored training programmes building the capacity of policymakers for implementing reforms.
- 20.62 Progress towards the objective is presented in the performance measure below (see figure 20.X).

Figure 20.X

Performance measure: number of programme countries in the Economic Commission for Europe region having implemented innovation policy reforms with Commission support (cumulative)

¹ SOURCE is the multilateral platform for sustainable infrastructure.

Planned results for 2025

Result 1: Improved capacity of member States in the development of infrastructure projects in support of the Sustainable Development Goals and the circular economy

Programme performance in 2023 and target for 2025

- 20.63 The subprogramme's work contributed to 320 policymakers from member States using the ECE standards and guidelines on public-private partnership for the Sustainable Development Goals, which exceeded the planned target of 300 policymakers.
- 20.64 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 20.XI).

Figure 20.XI

Performance measure: number of policymakers from member States that have used the ECE standards and guidelines on public-private partnership for the Sustainable Development Goals to identify and prepare infrastructure projects aligned with the Goals and the circular economy and the sustainable use of natural resources (cumulative)

Result 2: member States implement transformative innovation² policies and good practices for sustainable development

Programme performance in 2023 and target for 2025

- 20.65 The subprogramme's work contributed to improving the evidence base for policymaking and to increasing the capacity of policymakers to promote transformative innovation, as demonstrated by member States endorsing 10 additional good practices on transformative innovation policy, which met the planned target.
- 20.66 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 20.8).

² Economic Commission for Europe (ECE), "Report of the ECE Committee on Innovation, Competitiveness and Public-Private Partnerships on its fifteenth session" (ECE/CECI/2022/2, paras. 57 and 69 (Decision 2022 – 5.2)).

Table 20.8
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Member States endorsed good practices on innovation policies for the circular economy transformation, and noted the need for more policy learning	Member States endorsed the establishment of an ECE transformative innovation network of innovation agencies	Member States endorse an additional 10 good practices on transformative innovation policy	At least 3 member States implement policies and good practices to stimulate transformative innovation for sustainable development	At least 3 additional member States implement policies and good practices to stimulate transformative innovation for sustainable development

Result 3: more public-private partnership infrastructure projects assessed as compliant with the Sustainable Development Goals

Proposed programme plan for 2025

20.67 Scaling up investment in public infrastructure and mobilizing private sector finance and expertise can help to implement the 2030 Agenda. The subprogramme has developed a public-private partnership and infrastructure evaluation and rating system, a methodology for assessing infrastructure public-private partnerships on their contributions to sustainable development. The subprogramme is training policymakers and practitioners on using this methodology for self-assessments of public-private partnership projects, including in landlocked developing countries in Central Asia, as called for in the Vienna Programme of Action. The assessments reveal the degree to which proposed projects contribute to increased access and equity, climate resilience, environmental sustainability, economic effectiveness, replicability and stakeholder engagement. The results provide important insights into sustainability gaps and help to improve project proposals. Project proposals assessed to date have covered both economic and social infrastructure.

Lessons learned and planned change

20.68 The lesson for the subprogramme was that a thorough self-assessment took public-private partnership units up to 40 hours, generating delays in project implementation. In applying the lesson, the subprogramme will offer to public-private partnership units additional technical assistance, with the aim of cutting the assessment time by 75 per cent.

20.69 Expected progress towards the objective is presented in the performance measure below (see figure 20.XII).

Figure 20.XII

Performance measure: number of public-private partnership infrastructure projects assessed as Sustainable Development Goal-compliant using the public-private partnership and infrastructure evaluation and rating system methodology (cumulative)

Deliverables

20.70 Table 20.9 lists all deliverables of the subprogramme.

Table 20.9

Subprogramme 4: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies:				
Parliamentary documentation (number of documents)	18	18	18	18
1. Documentation for the Committee on Innovation, Competitiveness and Public-Private Partnerships and its subsidiary bodies	18	18	18	18
Substantive services for meetings (number of three-hour meetings)	19	20	19	19
2. Meetings of the Committee on Innovation, Competitiveness and Public-Private Partnerships and its subsidiary bodies	18	19	18	18

Fact-finding, monitoring and investigation missions (number of missions)	3	1	3	3
10. Fact-finding missions for Innovation for Sustainable Development Reviews and public-private partnership needs assessments	3	1	3	3

C. Substantive deliverables:

Consultation, advice and advocacy: advisory services under the Working Party on Public-Private Partnership and the Team of Specialists on Innovation and Competitiveness Policies reaching 30 government ministries and agencies and stakeholder entities.

Databases and substantive digital materials: database of public-private partnership case studies from approximately 15 member States.

D. Communication deliverables:

External and media relations: press releases and launch events for the above publications for regional, subregional and national access.

Digital platforms and multimedia content: website of the subprogramme.

Subprogramme 5 Sustainable energy

Objective

- 20.71 The objective, to which the subprogramme contributes, is to ensure secure access to affordable, reliable, sustainable and modern energy for all and to reduce greenhouse gas emissions and the carbon footprint of the energy sector in the region.

Strategy

- 20.72 To contribute to the objective, the subprogramme will support international policy dialogue and cooperation among Governments, energy industries and other stakeholders to foster sustainable energy development; develop and deploy ECE policy recommendations, norms, standards, guidelines and tools on energy-related issues; and provide capacity-building and assistance to member States, at their request, through training programmes, advisory services and technical cooperation projects. Through its work, the subprogramme will contribute to ECE work on cross-sectoral collaboration areas and priorities relating to the circular economy. Specifically, the subprogramme will:
- (a) Further develop normative instruments (e.g., best practices and principles), awareness-raising campaigns and the deployment of ECE tools through workshops, seminars and technical projects to help member States to meet their commitments to the 2030 Agenda and the Paris Agreement with regard to reducing their environmental footprint related to energy, accelerating the deep transformation of the energy sector to meet future needs, ensuring the sustainable management of resources and assessing options to ensure energy for sustainable development;
 - (b) Promote policy dialogue and cooperation among member States, regional entities and other partners on sustainable energy issues;
 - (c) Provide technical assistance and guidance on energy transitions in the context of sustainable development, disseminate best practices and improve information-sharing;
 - (d) Promote collaboration among private and public stakeholders that are key to implementing national and regional policies, including with regard to normative instruments and their deployment and dissemination;
 - (e) Coordinate and promote efforts related to energy resilience across the ECE region and to provide an ECE platform on resilient energy systems for inclusive dialogue;

- (f) Explore and increase understanding on energy-related climate financing in the ECE region, including policies and mechanisms for increasing financing for low- and zero-carbon technologies, the critical raw materials needed for low-carbon and low-emissions transformations and sustainable infrastructure projects;
- (g) Support countries across the ECE region in applying the United Nations Framework Classification for Resources and the United Nations Resource Management System to assure sustainable development of their natural resources, including critical raw materials;
- (h) Support ECE member States in enhancing their understanding of the benefits of low- and zero-carbon technology interplay for more resilient energy systems across the ECE region;
- (i) Support ECE member States in broadening and accelerating the deployment of energy efficiency measures across buildings, industry, transport and other end-use sectors while embracing sector-wide digitalization;
- (j) Support and guide ECE member States in their efforts to accurately measure and report methane emissions from the energy sector and the related extractive industries, and to effectively mitigate those emissions by detecting and repairing leaks from the installed infrastructure and by capturing and destroying or utilizing gas from active and abandoned coal mines;
- (k) Explore the notion of “just transition”, being an integrated approach to sustainable development, which brings together social progress, environmental protection and economic success into a framework of democratic governance; and increase ECE member States’ understanding of that concept and its complexity and improve their capacity to plan and implement transformation strategies in accordance with its principles.

20.73 The above-mentioned work is expected to contribute to the achievement of Sustainable Development Goals 7, 12 and 13 and result in:

- (a) More effective integration of sustainable energy across national policies and normative frameworks in support of the 2030 Agenda and the Paris Agreement;
- (b) Enhanced dialogue and cooperation among energy actors to boost transformational investment in the energy sector and, consequently, accelerate the modernization of the energy system to meet countries’ sustainable development and climate commitments;
- (c) Improved access of member States to frameworks and tools required for integrated and sustainable resource management that aid the progress towards a more circular economy and contribute to the food-water-energy nexus;
- (d) Improvement in the performance of buildings from a health perspective (e.g., temperatures, comfort, effective air intake and recycling filters), which will improve the protection and resilience of populations;
- (e) Increased understanding and implementation of climate-friendly policies and mechanisms by member States, which are aimed at addressing issues such as financing for low- and zero-carbon technologies and sustainable infrastructure, and critical raw materials needed for such transformations;
- (f) Improved capacity of ECE member States to design and implement policies setting up effective mechanisms for accurate measurement and reporting of methane emissions from the energy sector and the related extractive industries, as well as for their effective mitigation;
- (g) Improved understanding of a “just transition” concept and increased capacity of ECE member States for its effective application of national energy transition strategies, at the planning and implementation stages.

Programme performance in 2023

Global application of the United Nations Resource Management System to help member States to manage natural resources sustainably

- 20.74 Balancing resource use and conservation can be enhanced through innovation. The subprogramme supported the development of the United Nations Resource Management System to help member States to balance economic development, environmental sustainability and social responsibility. The System's principles and requirements were developed by the subprogramme and case studies and workshops were undertaken. The subprogramme enhanced member States' capacity to use the System through the development and dissemination of policy and technical briefs and the provision of technical support for its application.
- 20.75 Progress towards the objective is presented in the performance measure below (see table 20.10).

Table 20.10

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
Draft of the United Nations Resource Management System available	United Nations Resource Management System made available	Economic and Social Council endorsed the United Nations Resource Management System for global application United Kingdom of Great Britain and Northern Ireland tested the application of the United Nations Resource Management System for critical transition minerals

Planned results for 2025

Result 1: digitalization of the energy sector as an enabler of a circular economy and the sustainable use of natural resources

Programme performance in 2023 and target for 2025

- 20.76 The subprogramme's work contributed to the development of national case studies from two member States and the application of ECE recommendations on digitalization of the energy sector to them, which met the planned target.
- 20.77 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 20.XIII).

Figure 20.XIII
Performance measure: number of member States applying Economic Commission for Europe recommendations on digitalization by developing national case studies (cumulative)

Result 2: enhanced resilience of energy systems in the Economic Commission for Europe region

Programme performance in 2023 and target for 2025

20.78 The subprogramme’s work contributed to the application by three member States of mechanisms developed by ECE to enhance the resilience of energy systems and progress towards the attainment of the targets of Sustainable Development Goal 7, which met the planned target.

20.79 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 20.XIV).

Figure 20.XIV
Performance measure: number of member States using Economic Commission for Europe mechanisms to enhance the resilience of energy systems in the Economic Commission for Europe region (cumulative)

Result 3: more sustainable and resilient natural resource management based on the United Nations Framework Classification for Resources

Proposed programme plan for 2025

20.80 The subprogramme provides technical assistance to member States to implement the United Nations Framework Classification for Resources for national resource management strategies and policies and to assess critical raw materials for the energy transition.

Lessons learned and planned change

- 20.81 The lesson learned for the subprogramme was the United Nations Framework Classification for Resources could be more responsive to changing demands and expectations of member States, other stakeholders and regional contexts. In applying the lesson, the subprogramme will organize workshops and dialogues, tailor its approach to various regions and sectors in collaboration with United Nations country teams, and engage with International Centres of Excellence on Sustainable Resource Management.
- 20.82 Expected progress towards the objective is presented in the performance measure below (see table 20.11).

**Table 20.11
Performance measure**

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
International Centre of Excellence on Sustainable Resource Management established in the Russian Federation to deploy the United Nations Framework Classification for Resources in Eurasia	International Centre of Excellence on Sustainable Resource Management established in Mexico to deploy the United Nations Framework Classification for Resources in Latin America	United Nations Framework Classification for Resources included in European Union’s Critical Raw Materials Act	Two additional International Centres of Excellence on Sustainable Resource Management established	Five additional countries adopt the United Nations Framework Classification for Resources guidelines
Economic and Social Council endorsed the United Nations Framework Classification for Resources for global application	African Union Heads of State endorsed adoption of the United Nations Framework Classification for Resources and United Nations Resource Management System as African Minerals and Energy Resources Classification and Management System	One bridging document between the United Nations Framework Classification for Resources and Russia’s petroleum classification updated and endorsed	Five countries adopt the United Nations Framework Classification for Resources guidelines	Ten Member States provide input to the United Nations Framework Classification for Resources knowledge hub
	Two bridging documents between the United Nations Framework Classification for Resources and China’s mineral and petroleum classifications developed and endorsed			

Deliverables

20.83 Table 20.12 lists all deliverables of the subprogramme.

Subprogramme 6 Trade

Objective

- 20.84 The objective, to which the subprogramme contributes, is to strengthen trade facilitation and electronic business, regulatory cooperation and standardization policies, agricultural quality standards and trade-related economic cooperation in the ECE region and beyond.

Strategy

- 20.85 The strategy of the subprogramme is to support international policy dialogue on reducing regulatory and procedural barriers to trade, including those caused by cumbersome trade procedures and paperwork, by differences in trade procedures, standards and documents, or by divergent regulatory approaches and product standards; to facilitate the development of standards and recommendations in the areas of trade facilitation and e-business, agricultural quality standards and regulatory cooperation; and to provide capacity-building and enable the sharing of best practices and lessons learned.
- 20.86 To contribute to the objective, the subprogramme will:
- (a) Promote simple, transparent and effective processes for global trade through its normative work to develop standards and recommendations in the areas of trade facilitation and electronic business;
 - (b) Facilitate international policy dialogue on establishing digital trading environments and on compliance with the multilateral trading system requirements, including the dissemination of standards, recommendations and guidelines;
 - (c) Promote the circular economy and the sustainable use of natural resources, sustainable and resilient value chains and the enhanced traceability of supply chains (e.g., minimizing waste and maximizing the use of natural resources towards the circular economy) through studies, policy dialogues and technology-based pilot initiatives such as blockchain-based traceability for textile value chains;
 - (d) Strengthen regulatory cooperation and promote standards and best practices in regulatory frameworks, risk management, conformity assessment and market surveillance to facilitate a predictable and harmonized regulatory environment;
 - (e) Provide practical ways forward for standards bodies wishing to mainstream a gender perspective into standards. The subprogramme will further support capacity-building and dissemination on the use of standards and regulatory cooperation, notably with its standards for the Sustainable Development Goals portal (<https://standards4sdgs.unecce.org/>) and its initiative on education on standards (<https://learnqi.unecce.org/>);
 - (f) Promote up-to-date agricultural quality standards and explanatory guidelines through its normative work and promote awareness of food loss reduction through policy dialogues, partnerships with international organizations and technology-based initiatives to address food loss and waste;
 - (g) Identify regulatory and procedural barriers to trade and assist Governments in setting action-oriented recommendations for implementing the instruments developed by the subprogramme through analytical evidence-based studies;
 - (h) Deepen its international policy dialogue, normative, technical assistance and capacity-building activities on the digitalization of trade processes in order to support a sustainable and resilient recovery.

- 20.87 The above-mentioned work is expected to contribute to the achievement of Sustainable Development Goals 2, 5, 8, 9, 12 and 17 and to result in:
- (a) Increased implementation of simplified trade processes, and the digitalization of member States’ trading environments, leading to greater productivity;
 - (b) Increased transparency and traceability of the value chains and reduction of waste, promoting sustainable consumption and production patterns;
 - (c) Increased uptake of international standards by countries to enable the implementation of internationally harmonized regulatory processes;
 - (d) Improved gender equality in trade through the increased participation of women traders;
 - (e) Enhanced digitalization of trade procedures (e.g., progress towards the adoption of trade-related digital services such as Single Window) to support public and private sectors’ efforts in member States to facilitate trade.

Programme performance in 2023

Economic Commission for Europe agricultural quality standards enhance trade and preserves the livelihood of farmers

20.88 Under its Working Party on Agricultural Quality Standards, ECE sets internationally agreed commercial quality standards for fresh fruit and vegetables, dried fruit and nuts, meat, egg, seed potatoes and cut flowers. The standards are used by traders and retail chains, enabling them to order with confidence, by authorities to check against rules and by producers to improve production and reach new markets. Between 2021 and 2023, several new standards were adopted, including those at the request of stakeholders in Central Asia. A 2022 a joint ECE/Organisation for Economic Co-operation and Development study found conclusive evidence of a positive impact of new or revised ECE agricultural quality standards on the trade in fresh fruit and vegetables. In 2023, the European Union updated its legislation on marketing standards for fresh fruit and vegetables, retaining the dynamic link (harmonization) with ECE standards. This means that, in European Union countries, ECE standards are mandatory for the 10 most traded fresh fruit and vegetables, corresponding to some 33 per cent of European Union imports of fresh and dried fruits, vegetables and nuts.

20.89 Progress towards the objective is presented in the performance measure below (see figure 20.XV).

Figure 20.XV

Performance measure: number of Economic Commission for Europe agricultural quality standards adopted

Planned results for 2025

Result 1: increased facilitation of agricultural trade through the adoption of agricultural quality and electronic business standards in Economic Commission for Europe member States

Programme performance in 2023 and target for 2025

- 20.90 The subprogramme's work contributed to 37 ECE member States fully or partially implementing the Commission's standard for "electronic application and issuance of electronic sanitary and phytosanitary certificates", which exceeded the planned target of 28.
- 20.91 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 20.XVI).

Figure 20.XVI

Performance measure: number of Economic Commission for Europe member States fully or partially implementing the Commission's standard for "electronic application and issuance of electronic sanitary and phytosanitary certificates"^a (cumulative)

^a The data for 2022 are based on past progress as reflected in the survey conducted in 2021, given that the data are captured every two years through the United Nations Global Survey on Digital and Sustainable Trade Facilitation.

Result 2: mainstreaming a gender perspective into standards development organizations

Programme performance in 2023 and target for 2025

- 20.92 The subprogramme's work contributed to 83 standards development organizations that have committed themselves to implementing the ECE Declaration for Gender Responsive Standards and Standards Development, which exceeded the planned target of 80.
- 20.93 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 20.XVII).

Figure 20.XVII

Performance measure: number of standards development organizations that have committed themselves to implementing the Economic Commission for Europe Declaration for Gender Responsive Standards and Standards Development (cumulative)

Result 3: enhanced digitalization of trade

Proposed programme plan for 2025

- 20.94 Facilitating trade through increased digitalization of trade processes such as the simplification and dematerialization of trade processes, the adoption and harmonization of international standards and guidelines and the promotion of interoperable digital systems are a priority of the subprogramme. To date, the United Nations Centre for Trade Facilitation and Electronic Business has produced more than 40 policy recommendations on trade facilitation, 400 electronic business standards, and several training and guidance materials, which are available freely to the global trading community. This normative work, along with policy guidance, technical assistance and capacity-building activities, are geared towards greater digitalization of trade to help to facilitate trade, reduce the cost of trading and, in turn, increase competitiveness.

Lessons learned and planned change

- 20.95 The lesson for the subprogramme was that there was a growing demand to integrate cross-cutting themes, such as digitalization, a circular economy and resource efficiency, into trade-related work. For example, electronic traceability systems will increasingly be used to provide proof of the origin, content and sustainability of traded goods. In applying the lesson, the subprogramme will expand work on cross-cutting issues, with a focus on the minerals, textiles and agri-food sectors. For example, the ECE Team of Specialists on Environmental, Social and Governance Traceability of Sustainable Value Chains in the Circular Economy will develop digital standards for product circularity data and for environmental, social and governance traceability in critical minerals.
- 20.96 Expected progress towards the objective is presented in the performance measure below (see figure 20.XVIII).

Figure 20.XVIII
Performance measure: average implementation rate of trade facilitation measures in the Economic Commission for Europe region

(Percentage)

Deliverables

20.97 Table 20.13 lists all deliverables of the subprogramme.

Table 20.13

Subprogramme 6: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	108	111	107	102
1. The Steering Committee on Trade Capacity and Standards	10	11	13	13

5. The Steering Committee on Trade Capacity and Standards and its Bureau	4	4	7	4
6. The Working Party on Regulatory Cooperation and Standardization Policies, its Bureau and related expert bodies	13	21	13	13
7. The Working Party on Agricultural Quality Standards and its specialized sections	26	26	26	26
8. The United Nations Centre for Trade Facilitation and Electronic Business	53	53	53	53
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	4	3	5	5
9. On enhancing usage and uptake of standards for sustainable development, gender equality and the empowerment of women and girls	–	–	1	1
10. On food loss reduction in agriculture supply chains	1	–	1	1
11. On trade facilitation	3	3	3	3

Section 20 Economic development in Europe

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
Seminars, workshops and training events (number of days)	14	17	18	18
12. Workshops for policymakers and experts in low- and middle-income countries in the ECE region on trade procedures, supply chain management, conformity assessment and market surveillance, and women’s entrepreneurship	2	4	6	6
13. Seminars for standardization and inspection agencies and other stakeholders in transition economies and developing countries in the ECE region or beyond on ECE agricultural quality standards	6	6	3	3
14. Seminars for policymakers and experts in countries with economies in transition and developing countries in the ECE region or beyond on support for the implementation of trade-related standards, recommendations and guidelines	6	7	9	9
Publications (number of publications)	10	7	11	9
15. On regulatory and procedural barriers to trade in a country to be decided	1	1	1	1
16. On trade standard guidance in the following areas: quality infrastructure, risk management, education and sustainable development	1	1	2	2
17. On mainstreaming a gender perspective into standards	3	2	2	1
18. On agricultural trade, supply chains and food loss and waste	–	–	1	1
19. On trade facilitation recommendations, standards and strategies	5	3	5	4
Technical materials (number of materials)	8	10	8	8
20. Guidelines on cross-border trade	1	1	1	1
21. Training material and guidelines on trade standards and/or regulatory cooperation	2	2	2	2
22. Standards and guidelines on agricultural quality	4	4	4	4
23. Training material on trade facilitation and electronic business	1	3	1	1
Fact-finding, monitoring and investigating missions (number of missions)	3	3	3	3
24. Fact-finding missions on trade facilitation and electronic business, agricultural quality standards, regulatory cooperation and standardization, and regulatory and procedural barriers to trade	3	3	3	3

C. Substantive deliverables

Consultation, advice and advocacy: advisory services to government officials and other stakeholders in at least 10 ECE member States on trade facilitation and electronic business, agricultural quality standards, regulatory cooperation and standardization, and regulatory and procedural barriers to trade.

Databases and substantive digital materials: databases for e-business standards and codes.

D. Communication deliverables

Outreach programmes, special events and information materials: booklets, promotional materials, fact sheets and information brochures reaching at least all programme countries in the ECE region and for more than 1,000 public and private sector experts.

External and media relations: press releases, publication launch events and articles in external newsletters intended for government officials and experts working on trade.

Digital platforms and multimedia content: website of the subprogramme.

**Subprogramme 7
Forests and the forest industry**

Objective

20.98 The objective, to which the subprogramme contributes, is to strengthen the sustainable management of trees and forests and enhance the contribution of forests and forest products to sustainable development, climate action and biodiversity in the ECE region.

Strategy

- 20.99 The strategy of the subprogramme is based on the implementation of core interlinked functions, namely, analytical and normative work, international policy dialogue, capacity-building and communication.
- 20.100 To contribute to the objective, the subprogramme will:
- (a) Promote cooperation for sustainable forest management, forest landscape restoration, sustainable use of forest products and services, linkages between sustainable food systems and forests, and urban and peri-urban forestry;
 - (b) Collect, validate and disseminate information, research and analysis related to sustainable forest management and the sustainable production and consumption of wood products, including wood energy;
 - (c) Facilitate exchange of national and subnational experiences and best practices and monitor progress on achieving sustainable forest management, which will help member States to measure progress towards achieving the relevant Sustainable Development Goals and the United Nations strategic plan for forests 2017–2030;
 - (d) Organize capacity-building seminars and webinars and prepare dedicated publications on the forest sector and wood energy, including on crisis response and solutions for more resilient economies.
- 20.101 The subprogramme will carry out its work in partnership with the Food and Agriculture Organization of the United Nations and other relevant organizations and processes.
- 20.102 The above-mentioned work is expected to contribute to the achievement of Sustainable Development Goals 7, 11–13 and 15 and result in:
- (a) The ability of ECE member States to sustainably manage healthy forest ecosystems to provide important ecosystem goods and services to benefit society, including climate mitigation and adaptation;
 - (b) Increased and more efficient use by ECE member States of sustainable forest products that contribute to the circular economy and sustainable use of natural resources;
 - (c) The integration of forest resources and products into planning and recovery from economic, health and environmental shocks, to increase the resilience of member States and their most vulnerable persons.

Programme performance in 2023

Increased access to knowledge for evidence-based policymaking for management of forests and the forest industry

- 20.103 Communicating effectively within and outside the forest and forest products sector can help to promote evidence-based decision-making for sustainable management of the forest sector and forest industry. The subprogramme has strengthened the dissemination of information resulting from the implementation of the programme of work, developing a diverse set of communication products to enhance the subprogramme's capacity to reach stakeholders in the sector, including policymakers and experts and the general public. This has included policy briefs, press releases, a quarterly information billboard, videos and podcasts, among other formats. Efforts to amplify the outreach of the subprogramme's work also include actively engaging on social media channels and the Forest Information Billboard.
- 20.104 Progress towards the objective is presented in the performance measure below (see figure 20.XIX).

Figure 20.XIX
Performance measure: social media reach (cumulative)
 (Number of impressions across social media platforms managed by the subprogramme)

Planned results for 2025

Result 1: enhanced accessibility and timeliness of sustainable forest management information and improved monitoring of the impact of increased wood use in a circular economy

Programme performance in 2023 and target for 2025

- 20.105 The subprogramme’s work contributed to 16,880 views by 5,541 users, which exceeded both the planned target of 6,000 views and of 2,500 users.
- 20.106 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 20.XX).

Figure 20.XX
Performance measure: number of public users and number of views of up-to-date data on sustainable forest management from the INForest platform that is accessible to persons with disabilities (cumulative)

Result 2: cities and towns commit themselves to expanding sustainable urban and peri-urban forest cover

Programme performance in 2023 and target for 2025

- 20.107 The subprogramme's work contributed to a cumulative total of 82 cities from 31 countries that made pledges and commitments to increasing sustainable urban tree and forest cover, which exceeded the planned target of 75 cities and met the planned target of 31 countries.
- 20.108 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 20.XXI).

Figure 20.XXI

Performance measure: number of cities and towns making pledges and commitments to increasing sustainable urban tree and forest cover (cumulative)

Result 3: evidence-based planning and action for the sustainable production and consumption of forest products

Proposed programme plan for 2025

- 20.109 Sustainably produced wood is a global commodity used widely for many products. ECE member States account for approximately 40 per cent of global forest resources and more than 60 percent of wood harvested globally for wood products manufacturing (excluding wood energy).³ The subprogramme contributes to increased access to forest products information by collecting data annually from member States on their production, trade and consumption of wood and wood-based products and developing technical and policy-oriented reports and assessments.

Lessons learned and planned change

- 20.110 The lesson for the subprogramme was that there was a strong demand for timely information on forest products from within the forest industry and that there were knowledge and awareness gaps outside of the forest sector and industry such as the role that forest products could play in meeting Sustainable Development Goal 12. In applying the lesson, the subprogramme will provide information on forest products, including tailored formats to enhance outreach.
- 20.111 Expected progress towards the objective is presented in the performance measure below (see figure 20.XXII).

³ See United Nations, Economic Commission for Europe, and Food and Agriculture Organization of the United Nations, *Forest Products Annual Market Review 2022–2023* (Geneva, 2023).

Figure 20.XXII

Performance measure: number of assessments of wood-based commodities, regarding their production, trade and consumption, and number of member States that report the use of information from these assessments (cumulative)

Deliverables

20.112 Table 20.14 lists all deliverables of the subprogramme.

Table 20.14

Subprogramme 7: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned

---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Consultation, advice and advocacy: advisory services, forest policy dialogues at the request of countries and support for forest policy issues, for up to 3 member States.

Databases and substantive digital materials: ECE region databases on forest policies and institutions; forest products; production, consumption, removals and trade, including prices; and wood energy for global access; ECE regional databases on forest resources and forest ownership.

D. Communication deliverables

Outreach programmes, special events and information materials: events celebrating the International Day of Forests; brochures and information materials on various forest-related topics; and presentations at round tables and international forest-related events.

External and media relations: press releases for the subprogramme; and Forest Information Billboard newsletter.

Digital platforms and multimedia content: website of the subprogramme; social media accounts; and videos and other media on forest-related topics.

Subprogramme 8 Housing, land management and population

Objective

- 20.113 The objective, to which the subprogramme contributes, is to strengthen member State-owned and city-level programmes and policies promoting decent, adequate, affordable, energy-efficient and healthy housing for all, smart sustainable cities, sustainable urban development and land management, and to advance evidence-based population and social cohesion policies.

Strategy

- 20.114 The subprogramme comprises two components: (a) housing and land management; and (b) population.
- 20.115 The strategy of the subprogramme is based on the implementation of the core interlinked functions, namely, international policy dialogue, normative work and capacity-building and the sharing of best practices and lessons learned in all areas of the subprogramme's work.
- 20.116 To contribute to the objective, the housing and land management component of the subprogramme will:
- (a) Support member States' national, regional and local governments and other key stakeholders in the review of progress in achieving Sustainable Development Goals 3, 5, 7, 9, 11 and 12, and build their capacities for the implementation of measures to accelerate achieving the Goals through technical assistance projects, thematic studies, training, exchange of experiences and best practices and policy advice on: affordable climate-neutral and decent housing for all; housing finance; smart sustainable cities, digitalization in cities and innovative financial mechanisms for cities; land administration and management, including informal settlements; and urban strategies and programmes that integrate climate change measures and promote the climate neutrality of buildings;
 - (b) Support local governments in the development of the evidence-based policies on sustainable housing and urban development through the application of the ECE/International Telecommunication Union key performance indicators on smart sustainable cities, indicators on urban economic resilience and the United Nations system-wide urban monitoring framework; and in the preparation of smart sustainable cities profiles and Sustainable Development Goals voluntary local reviews based on the assessments of achievement of the Goals;

- (c) Provide assistance to national and local governments in the development of evidence-based urban and housing policies through the preparation of country profiles on urban development, housing and land management;
 - (d) Support the strengthening of the capacities of national Governments and local ones in the design, implementation and monitoring of urban resilience plans and sustainable urban infrastructure development projects, including those that provide support to the most vulnerable persons, especially those in informal settlements;
 - (e) Promote multi-stakeholder partnerships and innovative financing instruments to unlock further financing and partnerships for the implementation of these plans and projects, in collaboration with the Geneva United Nations Charter Centres of Excellence;
 - (f) Subject to approval by the ECE Executive Committee, organize the fifth Forum of Mayors to discuss the challenges for sustainable housing and urban development.
- 20.117 To contribute to the objective, the population component of the subprogramme will:
- (a) Continue to facilitate cooperation among member States, regional agencies and other partners;
 - (b) Support national and regional review and follow-up activities to assess progress in implementing the Madrid International Plan of Action on Ageing and its Regional Implementation Strategy by providing a platform for intergovernmental policy debate on matters related to mainstreaming ageing, and facilitate communication with a wider network of experts and non-governmental organizations;
 - (c) Coordinate data collection on ageing indicators, including intergenerational and sex-disaggregated data, as well as policy-oriented research on ageing and intergenerational and gender relations, to support evidence-based policymaking and the monitoring of the implementation of the Madrid International Plan of Action on Ageing and its Regional Implementation Strategy;
 - (d) Support the development of national capacities for policy formulation through policy discussions, policy briefs and the showcasing of good practices from member States.
- 20.118 The above-mentioned work in the area of housing and land management is expected to contribute to the achievement of Sustainable Development Goal 11 and, to a lesser extent, Goals 3, 5, 7, 9 and 12, and result in:
- (a) Improved national and local policies for housing affordability, adequacy and accessibility for all; the energy efficiency and climate neutrality of buildings; and sustainable and resilient urban development;
 - (b) Increased capacity of national and local governments for the development of housing and urban development policies and programmes, which integrate the concepts of the 2030 Agenda, the Geneva UN Charter on Sustainable Housing and relevant best practices, including those developed and shared by the Geneva UN Charter Centres of Excellence, and the action plan titled *Place and Life in the ECE – A Regional Action Plan 2030: Tackling Challenges from the COVID-19 Pandemic, Climate and Housing Emergencies in the Region, City, Neighbourhood and Homes*;
 - (c) Improved understanding by city authorities of their socioeconomic development priorities through the preparation of smart sustainable cities profiles and voluntary local reviews of the achievement of the Sustainable Development Goals, based on the revised guidelines for the development of voluntary local reviews in the ECE region and using ECE/International Telecommunication Union key performance indicators for smart sustainable cities, urban economic resilience indicators and a United Nations system-wide urban monitoring framework;
 - (d) Increased capacity of land administration authorities to develop national land administration and management systems based on thematic studies and capacity-building activities in land administration and management;

- (e) More effective local urban development and housing policies and related resilience plans, in particular for people living in informal settlements.
- 20.119 The above-mentioned work in the area of population is expected to contribute to the achievement of Sustainable Development Goals 1, 3–5, 8, 10, 11, 16 and 17 and result in:
- (a) Demonstrated progress by member States in mainstreaming ageing across all policy fields and governance levels;
 - (b) Enhanced capacities of member States in mainstreaming ageing across all policy fields and governance levels;
 - (c) Policy approaches adopted by member States that advance the rights and dignity of older persons and their contribution to a sustainable and inclusive society for all ages.

Programme performance in 2023

Enhanced city-to-city cooperation and multilevel governance to strengthen cooperation with national Governments to address city-level challenges

- 20.120 To address pressing urban challenges such as urban sprawl, air pollution, a lack of affordable and decent housing urban infrastructure, and extreme weather events, cities can exchange experiences and best practices and cooperate with one other and with their national Governments through multilevel governance approaches.
- 20.121 Following an independent evaluation requested by member States, ECE created the Forum of Mayors as a formal subsidiary body of the Commission, a team of specialists to promote both city-to-city and local government-to-national Government cooperation.
- 20.122 Progress towards the objective is presented in the performance measure below (see table 20.15).

Table 20.15
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
–	Second Forum of Mayors brought together 250 participants, including leaders from 44 cities, and resulted in increased city-to-city cooperation to address city-level challenges	Third Forum of Mayors brought together 300 participants, including leaders from 61 cities, and resulted in enhanced city-to-city cooperation and multilevel governance to strengthen cooperation with the national Governments to address city-level challenges

Planned results for 2025

Result 1: acceleration of the city-level implementation of the Sustainable Development Goals

Programme performance in 2023 and target for 2025

- 20.123 The subprogramme’s work contributed to the development of the smart sustainable cities profile for Almaty, Kazakhstan, and Ålesund, Asker, Bærum, Rana and Trondheim, (Norway, using evidence-based approaches, which met the planned target.
- 20.124 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 20.16).

Table 20.16
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Two smart sustainable cities profiles (for Hrodna, Belarus, and Bishkek, Kyrgyzstan) using evidence-based approaches developed	Two smart sustainable cities profile (for Tbilisi, Georgia, and Podgorica, Montenegro) and one smart sustainable country/city profile (for San Marino and its cities) developed using evidence-based approaches	Six smart sustainable cities profile using evidence-based approaches developed	Four additional country/city profiles and smart sustainable city profiles and voluntary local reviews using evidence-based approaches developed Two cities implementing the recommendations contained in the profiles and voluntary local reviews	One additional country/city profile/voluntary local review using evidence-based approaches developed Four cities implementing recommendations contained in the profiles and voluntary local reviews

Result 2: acceleration of the city-level implementation of best practices in housing and land management and urban development

Programme performance in 2023 and target for 2025

- 20.125 The subprogramme’s work contributed to the implementation of one country profile for Albania (as requested by the Government, the profile combined a country-wide analysis with cities’ analysis), which met the planned target.
- 20.126 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 20.17).

Table 20.17
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	<i>Place and Life in the ECE – A Regional Action Plan 2030: Tackling Challenges from the COVID-19 Pandemic, Climate and Housing Emergencies in the Region, City, Neighbourhood and Homes</i> adopted by member States	One country profile (Albania) implemented recommendations contained in the thematic policy briefs and guidelines on housing, land management and urban development	Two countries/cities implementing recommendations contained in the thematic policy briefs and guidelines on housing, land management and urban development	Four countries/cities implementing recommendations contained in the thematic policy briefs and guidelines on housing, land management and urban development

Result 3: more age-sensitive and inclusive policies to respond to the opportunities and challenges of individual and population ageing

Proposed programme plan for 2025

20.127 The demographic transition to population ageing calls for societal adaptation. The subprogramme has been working with countries to develop and monitor ageing-related policies aligned with the Madrid International Plan of Action on Ageing and its regional implementation strategy across its diverse activities.

Lessons learned and planned change

20.128 The lesson for the subprogramme was that enhanced information-sharing on ageing-related policies was needed. In applying the lesson, the subprogramme will develop a database to facilitate the sharing of good practices across the ECE region. It will contribute to monitoring the implementation of the Madrid International Plan of Action on Ageing and its regional implementation strategy and provide an important information resource supporting countries in mainstreaming ageing, adjusting to demographic change while mainstreaming a gender perspective, and creating an environment that is conducive to the full realization of the individual and societal potential of longevity.

20.129 Expected progress towards the objective is presented in the performance measure below (see table 20.18).

Table 20.18
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	Development of an ageing policies database was included in the programme of work of the Standing Working Group on Ageing	Member States agreed on the scope and design of the ageing policies database	Ageing policies database is accessible	At least 15 member States share ageing-related policy updates for inclusion in the ageing policies database

Deliverables

20.130 Table 20.19 lists all deliverables of the subprogramme.

16. Toolkit and training course material on mainstreaming ageing	2	2	1	1
Fact-finding, monitoring and investigation missions (number of missions)	2	2	2	2
17. Fact-finding missions for policymakers in preparation for and follow-up to the country profiles on urban development, housing and land management	1	1	1	1
18. Fact-finding missions to develop national capacities in designing and implementing ageing-related policies and programmes	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services for up to 4 countries regarding the country profiles on urban development, housing, land management; “generations and gender programme” advocacy to support evidence-based policymaking; and advisory services for government officials and other stakeholders to develop national capacities in designing and implementing ageing-related policies and programmes.				
Databases and substantive digital materials: ageing indicators data set for global access and database on ageing-related policies.				
D. Communication deliverables				
Outreach programmes, special events and information materials: booklets and fact sheets.				
External and media relations: press releases and social media posts.				
Digital platforms and multimedia content: websites of the subprogramme and Active Ageing Index wiki.				

B. Proposed post and non-post resource requirements for 2025

Overview

- 20.131 As a part of its 2025 budget submission, ECE undertook a spending review in line with paragraph 20 of General Assembly resolution 77/262. Detailed staffing tables along with the related organigramme featuring the reporting lines of all staff have been reviewed by all subprogramme managers, accompanied by justifications for the continuing need for each position, including any updates to functions, as appropriate, in line with the approved programme of work. The workforce review has been further enriched with detailed information for each subprogramme regarding current composition across a number of dimensions, including the distribution of staff per grade, the projected retirements by level and by year up through 2050, and current vacancy rates by count and by level in order to comprehensively review the changing nature of the workforce and identify any current or future opportunities to optimize or enhance organizational structures. The review also involved an analysis of opportunities to strengthen future skill requirements, including in areas such as data analytics and management, digital transformation, strategic communications, innovation, strategic foresight and behavioural science, in order to fully consider and reflect, if appropriate, these requirements in the underlying job descriptions. While the spending review did not lead to proposed changes in the distribution or grades of existing posts, the results of the spending review will enable ECE to improve the existing post profiles to become more effective in delivering mandates in the future by rejuvenating the workforce through the use of retirement projections and strengthening workforce capabilities in the aforementioned areas.
- 20.132 ECE encountered limited opportunities to leverage greater efficiencies in its non-post budget, given that the majority of non-post resources are dedicated to the basic support costs of the organization, such as corporate email accounts and software licence packages, as well as equipment such as laptops and monitors for staff. Given the non-discretionary nature of these costs, there was little room to seek further improvements or optimize utilization when the resources are only sufficient to provide for these basic requirements. While subprogramme managers conducted a review of consumption against their non-post budgets for the past five years, the analysis resulted in minimal changes to resource distribution. Of note, a number of subprogrammes placed renewed emphasis on the importance of face-to-face meetings with member States, and proposed the redeployment of resources from experts or consultants to the travel of staff. Furthermore, due to the relatively small nature of non-post resources, ECE programme managers across all subprogrammes reiterated that they regularly seek to collaborate, plan and align events across ECE subprogrammes as well as with external partner entities, including United Nations common system organizations. This includes leveraging support from partners wherever possible. In addition, other measures for increased efficiency, such as arranging meetings in a back-to-back manner or merging meetings wherever appropriate or feasible to make the most efficient use of resources by reducing costs in terms of travel and number of meeting days, while at the same time seeking to maximize participation, are regularly pursued by ECE programme managers. In addition, in efforts to reduce electronic information purchasing costs, under programme support, resources are proposed to be redeployed from supplies and materials to general operating expenses related to library-related subscription fees for the United Nations System Electronic Information Acquisition Consortium.
- 20.133 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 20.20 to 20.22.

20.134 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 20.23 to 20.25 and figure 20.XXIII.

20.135 As reflected in tables 20.23 (1) and 20.24 (1), the overall net resources for 2025 amount to \$40,039,100 before recosting, reflecting a net increase of \$168,700 (or 0.4 per cent) compared with the approved budget for 2024. Resource changes result from technical adjustments. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Distribution of proposed resources for 2025 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

20.136 As reflected in table 20.23 (1), resource changes reflect a net increase of \$168,700, as follows:

- (a) **Executive direction and management.** The decrease relates to the removal of non-recurrent non-post provisions under consultants (\$21,000) for the advance preparation of analytical reference materials (in 2024) for the seventy-first session of the Commission, to be held in 2025, in accordance with General Assembly resolution [62/225](#) and paragraph 9 of annex I to Economic and Social Council resolution 2006/38;
- (b) **Subprogramme 7, Forests and the forest industry.** The increase of \$96,800 relates to the higher provision at continuing vacancy rates for the Data Analyst (P-3) post established in 2024 pursuant to the General Assembly resolution [78/252](#), which was subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts;
- (c) **Programme support.** The net increase of \$92,900 reflects the increase of \$96,800 relating to the higher provision at continuing vacancy rates for the Management and Programme Analyst (P-3) post established in 2024 pursuant to the General Assembly resolution [78/252](#), which was subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts, and the decrease of \$3,900 under furniture and equipment relating to the discontinuation of the one-time provision for equipment approved for 2024, which is not required for 2025.

Extrabudgetary resources

20.137 As reflected in tables 20.23 (2) and 20.24 (2), extrabudgetary resources amount to \$24,735,500. The resources would complement regular budget resources and would be used mainly to provide for 57 posts (1 D-1, 2 P-5, 12 P-4, 21 P-3, 6 P-2, 15 GS (OL)) to perform mainly the functions required to deliver technical cooperation projects and activities approved by ECE governing bodies. In addition,

non-post resources would be used for capacity building and technical support in relation to the ECE programme of work.

- 20.138 The extrabudgetary resources under the present section are subject to the oversight of the Executive Committee of ECE and the governing bodies of the conventions.

Executive direction and management

- 20.139 The executive direction and management component comprises the Office of the Executive Secretary, the Sustainable Development Unit and the Information Unit. It also includes the Programme Management Unit, which falls under the Programme Management and Support Services Division.

- 20.140 The overall responsibilities of the executive direction and management component include the following functions:

- (a) To facilitate the debate among member States on the strategic direction of ECE and to develop a forward-looking strategy for adjusting ECE activities to respond to emerging and foreseeable priorities of its member States;
- (b) To provide guidance and direction for the work of the ECE secretariat, and to promote transparency and interdivisional cooperation;
- (c) To service meetings of the Commission and its Executive Committee and ensure the follow-up to their decisions;
- (d) To provide guidance and overall coordination of ECE programme management and evaluation, including under technical cooperation, and to promote the application of evaluation findings to the subprogrammes' work;
- (e) To undertake regional policy reviews relating to major cross-sectoral issues, in particular sustainable development, gender, and the 2030 Agenda and its Sustainable Development Goals;
- (f) To contribute to increasing the visibility of ECE and to raising the awareness and use of ECE products through the dissemination of information about its activities;
- (g) To promote synergies and cooperation with other United Nations entities active in the ECE region, including with the resident coordinator system at the country level and the United Nations Sustainable Development Group for Europe and Central Asia at the regional level;
- (h) To foster and mainstream a gender perspective and disability inclusion into ECE subprogrammes;
- (i) To ensure effective financial, human and information and communications technology (ICT) resources management, as well as the implementation of recommendations of oversight bodies and internal controls.

- 20.141 The Office of the Executive Secretary, which includes the Executive Secretary, the Deputy Executive Secretary and the Secretary of the Commission, has the overall responsibility for providing policy guidance and leadership in the ECE secretariat, including the coordination of the work of the Commission; overseeing and developing relations with Governments; coordination with the United Nations Secretariat; reporting to the General Assembly and the Economic and Social Council; overseeing and developing relations with other United Nations entities and with non-United Nations organizations, civil society and non-governmental organizations; and mainstreaming a gender perspective across all subprogrammes through the development and implementation of the ECE gender policy and action plan and the gender parity strategy.

- 20.142 The Programme Management Unit, under the Programme Management and Support Services Division, provides guidance and ensures overall coordination of ECE programme management (planning, monitoring, reporting and evaluation). The Unit also ensures the follow-up to and

implementation of the recommendations of United Nations oversight bodies, promotes synergies between the normative and operational work of ECE and provides guidance and overall coordination of technical cooperation. The Unit coordinates with other regional commissions and United Nations entities on programmatic and technical cooperation issues in support of the resident coordinator system countries within the ECE region.

- 20.143 The Sustainable Development Unit provides policy advice, analysis and advocacy on cross-cutting issues relating to the implementation of, follow-up on and review of the 2030 Agenda, in partnership with other United Nations entities and stakeholders, as relevant. The Unit convenes the annual Regional Forum on Sustainable Development for the ECE region, in cooperation with the entities of the regional United Nations system, providing the regional contribution to the global follow-up on and review of the 2030 Agenda. It plays a leading role in carrying out the functions of the regional collaborative platform, which gathers the heads of the regional offices for Europe and Central Asia of the United Nations entities. The Unit leads the internal work on the alignment of ECE activities with the Sustainable Development Goals through a cross-cutting approach.
- 20.144 The Information Unit is responsible for implementing the ECE information strategy aimed at raising awareness and mobilizing support for the work of ECE. The Unit manages ECE relations with the media, ensures the Commission's presence on social media and provides related monitoring and analysis. It advises the Executive Secretary, senior managers and the staff of ECE on outreach and advocacy.
- 20.145 In 2025, the executive direction and management component will coordinate the planning of the ECE programme of work leading towards the 2025 session and ensure monitoring of progress towards achieving planned results. The 2025 annual exchange on evaluation will foster the use of evaluation results to improve programme planning and internal processes, which will be documented in the 2024 annual report on evaluation presented to the Executive Committee. To improve data quality and use, the component will guide and support, in cooperation with substantive divisions, the operationalization of the Data Strategy of the Secretary-General for Action by Everyone, Everywhere, based on the ECE ICT strategy and substantive divisions' related action plans. The component will support the United Nations reform implementation and accelerated action for implementing the 2030 Agenda and the outcomes of the 2023 Sustainable Development Goals Summit and of the 2024 Summit of the Future, as applicable, by improving system-wide coherence and coordination of programme delivery at the regional and country levels. This will be done, among others, through the facilitation of the implementation of the 2025 workplan of the Regional Collaborative Platform for Europe and Central Asia, ensuring a successful meeting of the Regional Forum on Sustainable Development for the ECE Region and continuing active engagement in the 17 programme countries in partnership with resident coordinator offices and United Nations country teams, including in the preparation of United Nations Sustainable Development Cooperation Frameworks, to be signed in 2025. Structured around the Goals, the 2024 technical cooperation report, to be presented to the Executive Committee, will include all the technical assistance provided to member States. The component will also continue to foster and mainstream a gender perspective by coordinating the implementation of the ECE gender action plan for 2025–2026, which will continue to act as the primary vehicle for implementation of the ECE policy for gender equality and the empowerment of women (2021–2025). In line with the United Nations Disability Inclusion Strategy, executive direction and management will continue to mainstream disability inclusion into ECE work, by reporting on the implementation of the ECE disability inclusion action plan for 2024 and planning for 2026.
- 20.146 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), ECE is integrating environmental management practices into its operations. ECE will continue to collaborate with the United Nations Office at Geneva on sustainability reporting and will highlight its sustainable practices in its formal reports.

Part V Regional cooperation for development

20.147 Information on the timely submission of documentation and advance booking for air travel is reflected in table 20.26. The compliance rate of 96 per cent in 2023 for the timely submission of documentation relates to ECE meetings organized through the Division of Conference Management of the United Nations Office at Geneva and marks a slight decrease compared with the prior period. The compliance rate of 67 per cent for air tickets purchased at least two weeks before the commencement of travel relates to all travel requests, including of staff, experts and consultants, and participants, the latter funded exclusively through extrabudgetary resources, processed by ECE in 2023 through the Travel and Logistics Unit of the United Nations Office at Geneva, and represents an increase when compared with 2022. ECE will continue to work closely with the travel and logistics counterparts on early planning to improve compliance rates in 2024 and 2025.

Table 20.26
Compliance rate
(Percentage)

	<i>Actual 2021</i>	<i>Actual 2022</i>	<i>Actual 2023</i>	<i>Planned 2024</i>	<i>Planned 2025</i>
Timely submission of documentation	94	98	96	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	51	52	67	100	100

20.148 The proposed regular budget resources for 2025 amount to \$5,109,300 and reflect a decrease of \$21,000 compared with the approved budget for 2024. The proposed decrease is explained in paragraph 20.136 (a) above. Additional details on the distribution of the proposed resources for 2025 are reflected in table 20.27 and figure 20.XXIV.

Programme support

20.157 The Programme Management and Support Services Division carries out activities related to programme planning, oversight, technical cooperation support, administration and common services such as budget and financial management, human resource management and information systems management and technology services for ECE. It also ensures compliance with organizational policies in these areas and liaises with Headquarters and the United Nations Office at Geneva, the designated service provider for ECE. The Division comprises the Office of the Director, which manages all aspects of programme planning, oversight and administration; the Programme Management Unit, under executive direction and management (explained in paragraph 20.142 above); and the Executive Office, which oversees and manages all aspects of administration, budget, finance, human resources and information systems.

20.158 The proposed regular budget resources for 2025 amount to \$3,565,600 and reflect an increase of \$92,900 compared with the approved budget for 2024. The proposed increase is explained in paragraph 20.136 (c) above. Additional details on the distribution of the proposed resources for 2025 are reflected in table 20.36 and figure 20.XXXIII.

*** In keeping with paragraph 10 of General Assembly resolution [77/267](#), the part consisting of the post and non-post resource requirements (part III) is submitted through the Advisory Committee on Administrative and Budgetary Questions for the consideration of the Assembly.

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 21.1 The Economic Commission for Latin America and the Caribbean (ECLAC) is responsible for fostering the economic, social and environmentally sustainable development of Latin America and the Caribbean through international cooperation, by undertaking applied research and evidence-based comparative analysis of development processes, by providing normative and operational capacity development, and by providing normative and operational capacity-building, technical cooperation and advisory services in support of regional development efforts. The mandate for the programme derives from the priorities established in relevant General Assembly resolutions and decisions, as well as Economic and Social Council resolution 106 (VI), by which the Council established the Commission for the purpose of contributing to, and coordinating action towards, the economic and social development of the region and reinforcing economic relationships among the countries of Latin America and the Caribbean and with other regions of the world. In 1996, pursuant to ECLAC resolution 553 (XXVI), the Commission decided, inter alia, to collaborate with member States in the comprehensive analysis of development processes geared towards the design, monitoring and evaluation of public policies and the resulting provision of operational services in the fields of specialized information, advisory services, training and support for regional and international cooperation and coordination. The support delivered by the Commission to member States is also provided through the regular programme of technical cooperation, Development Account projects and extrabudgetary projects and programmes.

Strategy and external factors for 2025

- 21.2 The Commission will continue to support the development pillar of the United Nations, to foster economic integration at the subregional and regional levels, to support member States in the implementation of the 2030 Agenda for Sustainable Development and the Sustainable Development Goals, as well as the implementation of the international agreements stemming from the major summits and conferences in the development field, and to facilitate sustainable development by helping to bridge economic, social and environmental gaps within and among countries of the region, as well as with other regions of the world.
- 21.3 The achievement of the 2030 Agenda and the Goals in Latin American and Caribbean countries has been hampered by global instability and changing globalization trends, as well as technological changes that are transforming the production paradigm. These challenges are compounded by difficulties and uncertainties related to the environment (climate change and biodiversity loss), social issues (health, employment, education, food security, water supply and energy security) and the increase in the cost of living, all of which contribute to worsening poverty and inequality. A more ambitious approach is needed to drive the structural transformations required to resume and sustain the path towards the fulfilment of the 2030 Agenda and the Goals.
- 21.4 To address these challenges, ECLAC will continue to offer its value proposition to member States by combining its three main functions: the think tank and thought leadership role in performing analytical, normative and knowledge management work; the convening role through its intergovernmental platforms and subsidiary bodies; and the operational role by providing technical cooperation, peer learning, and advisory and capacity-building services, anchored in data and evidence-based analysis and understanding of the realities of the region. The Commission will continue to foster a multisectoral approach to development and to give a voice to countries in special situations, such as the one least developed country in the region, landlocked developing countries, Caribbean small island developing States and middle-income countries, which constitute most of the Latin American and Caribbean economies.

- 21.5 At the thirty-ninth session of the Commission, held in Buenos Aires, ECLAC presented to its member States the document *Towards Transformation of the Development Model in Latin America and the Caribbean: Production, Inclusion and Sustainability*, which considers the complex conditions that pose significant challenges to accelerating growth, addressing high inflation and boosting investment. The document also makes policy recommendations for advancing towards a more productive, inclusive and sustainable development model.
- 21.6 To continue strengthening ECLAC support to member States in their efforts to implement the 2030 Agenda, changes are proposed to subprogramme 2, Production and innovation, and subprogramme 8, Natural resources. In Latin American and Caribbean countries, the agriculture sector faces the productive development challenge of increasing productivity and production to meet the growing demand for food while addressing the impacts of climate change and biodiversity degradation and loss, and the need to ensure food security. Except for some small island developing States in the Caribbean, the region is well positioned to produce food. However, overexploitation of the biological natural resources that sustain agricultural production and the failure to properly account for the environmental impacts of production often result in their degradation. New production models and the reform of agrifood systems are needed to address these challenges. Furthermore, given the close relationship between the agriculture sector and manufacturing industries and services, there are opportunities, such as the incorporation of digital technologies, to formulate productive development policies that take into consideration productive chains which can generate greater added value. In this regard, it is proposed that sustainable agriculture be included as a subject area in subprogramme 2, which would allow for the establishment of more comprehensive productive development agendas addressing the challenges faced by this sector and foster increases in productivity, employment and economic growth.
- 21.7 Biodiversity loss and degradation can be associated with climate change. Therefore, their impacts on resources such as water and energy (droughts, floods, pollution, greenhouse gas emissions, and soil and ecosystem destruction), as well as proposals to address them, should be connected. In this regard, and under subprogramme 8, Natural resources, it is proposed that biodiversity be included in the water and energy subject area, to support the consideration of more coherent policies for the management of biodiversity, water and energy resources.
- 21.8 The Commission will continue to offer its intergovernmental architecture for consensus-building and regional dialogues, to analyse the key means of implementation of the 2030 Agenda and share experiences in this area, and will continue to perform its role as technical secretariat for ECLAC subsidiary bodies and intergovernmental meetings. ECLAC will continue to provide integrated and comprehensive follow-up to world summits from a regional perspective, by coordinating the region's approach to the implementation of the 2030 Agenda. It will also continue to act as the secretariat of the Forum of the Countries of Latin America and the Caribbean on Sustainable Development, supporting the follow-up and review process of the implementation of the 2030 Agenda at the regional level, and the reporting by the Forum to the high-level political forum on sustainable development at the global level, thereby linking the national, regional and global dimensions of the process.
- 21.9 ECLAC will continue to work closely with the Governments of the region and other stakeholders (such as the business community, academia and civil society) to reinforce linkages between national experiences and regional perspectives, comparability and exchange of good practices, and to provide effective technical cooperation services for transboundary issues. Lastly, the Commission will continue its close coordination and collaboration with United Nations agencies, funds and programmes in the region, as well as the resident coordinator system, including through the Regional Collaborative Platform for Latin America and the Caribbean.
- 21.10 ECLAC will also continue to collaborate with the Bretton Woods institutions, in particular the International Monetary Fund and the World Bank, and with other inter-American and Ibero-American organizations and other relevant organizations, such as the Organization of American States, the Inter-American Development Bank, the Ibero-American General Secretariat and the Development Bank of Latin America and the Caribbean. ECLAC will reinforce its close cooperation with various subregional integration mechanisms and strengthen its collaboration with private sector associations, non-governmental and civil society organizations, think tanks and academia to encourage policy

dialogue and engage them in the implementation of the 2030 Agenda, which is primarily driven by member States. The Commission will continue its active participation to foster substantive global coordination among all participating entities in the United Nations Sustainable Development Group.

- 21.11 ECLAC will continue to enhance its bilateral and multilateral collaboration with cooperation partners within and outside the United Nations system, to strengthen its strategic partnerships and mobilize additional extrabudgetary resources to enhance the implementation of the programme of work and maximize its impact in beneficiary countries and at the regional level. The Commission will consolidate development partners' trust and confidence by undertaking strategic dialogues with them on a regular basis, ensuring the efficient delivery of mandates, showing concrete achievements and providing comprehensive information on the use of their contributions.
- 21.12 The Commission's overall strategy for achieving the objectives of the programme is structured around 13 interdependent and complementary subprogrammes that are to be implemented using a multidisciplinary and integrated approach. The present proposed programme budget is also aimed at being responsive to the priorities, policy needs and emerging challenges of member States against a backdrop of increasing challenges and uncertainties.
- 21.13 With regard to the external factors, the overall plan for 2025 is based on the following planning assumptions:
- (a) The international community continues to be committed to implementing the 2030 Agenda and achieving the Sustainable Development Goals and to sustaining coordinated multilateral actions to secure a transformative recovery;
 - (b) The countries of Latin America and the Caribbean continue to support and attach high priority to multilateralism, regional and subregional cooperation, integration and the gradual convergence of integration schemes with a view to broadening the opportunities for achieving economic, social and environmentally sustainable development;
 - (c) The regional and international communities support the member States of ECLAC and respond to their specific needs and concerns.
- 21.14 The Commission integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For instance, result 3 of subprogramme 5 reflects the importance of making advances in the production of gender statistics on time use and unpaid care work to inform the design of policies relating to care. The Commission will continue to ensure that gender focal points (see General Assembly resolution [78/182](#)) are consulted in programme formulation and that gender analysis (see Assembly resolution [77/181](#)) is integrated into all areas under the Commission's mandate.
- 21.15 In line with the United Nations Disability Inclusion Strategy and the ECLAC Disability Inclusion Strategy 2021–2025, the Commission is implementing inclusive and comprehensive measures regarding accessibility, security and improvements in audiovisual technology in conference rooms, and reasonable adaptation of office spaces and furniture to facilitate the full participation of persons with disabilities in the daily work of the Commission, with a view to further advancing their inclusion.

Legislative mandates

- 21.16 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

55/2	United Nations Millennium Declaration	60/1	2005 World Summit Outcome
58/269	Strengthening of the United Nations: an agenda for further change	60/4	Global Agenda for Dialogue among Civilizations
59/57	A Fair Globalization: Creating Opportunities for All – report of the World Commission on the Social Dimension of Globalization	63/199	International Labour Organization Declaration on Social Justice for a Fair Globalization
		63/260	Development-related activities

Part V Regional cooperation for development

64/172; 66/155; 68/158; 71/192; 73/166; 75/182; 77/212; 78/203	The right to development	67/148; 69/151; 70/133; 74/128; 76/142; 78/182	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly
64/200; 70/204 64/222	International Strategy for Disaster Reduction Nairobi outcome document of the High-level United Nations Conference on South-South Cooperation	67/164; 69/183; 71/186; 73/163; 75/175	Human rights and extreme poverty
64/289 65/1	System-wide coherence Keeping the promise: united to achieve the Millennium Development Goals	67/205; 75/214; 77/163	Towards the sustainable development of the Caribbean Sea for present and future generations
66/71	International cooperation in the peaceful uses of outer space	67/207	Follow-up to and implementation of the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States
66/84	Implementation of the Declaration on the Granting of Independence to Colonial Countries and Peoples by the specialized agencies and the international institutions associated with the United Nations	67/215; 69/225	Promotion of new and renewable sources of energy
66/125; 73/141; 75/151	Implementation of the outcome of the World Summit for Social Development and of the twenty-fourth special session of the General Assembly	67/217; 73/240; 75/225; 77/174	Towards a New International Economic Order
66/157	Strengthening United Nations action in the field of human rights through the promotion of international cooperation and the importance of non-selectivity, impartiality and objectivity	67/218 67/226; 71/243; 75/233	Promoting transparency, participation and accountability in fiscal policies Quadrennial comprehensive policy review of operational activities for development of the United Nations system
66/161; 70/159; 71/197	Globalization and its impact on the full enjoyment of all human rights	67/230; 69/202 68/1	The role of the United Nations in promoting a new global human order Review of the implementation of General Assembly resolution 61/16 on the strengthening of the Economic and Social Council
66/165; 68/180	Protection of and assistance to internally displaced persons	68/4	Declaration of the High-level Dialogue on International Migration and Development
66/166; 70/166	Effective promotion of the Declaration on the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities	68/6	Outcome document of the special event to follow up efforts made towards achieving the Millennium Development Goals
66/172; 68/179; 70/147; 74/148; 76/172; 78/217	Protection of migrants	68/134; 69/146; 71/164; 74/125; 75/152; 76/138; 77/190; 78/177	Follow-up to the Second World Assembly on Ageing
66/200; 71/228; 75/217; 76/205; 77/165	Protection of global climate for present and future generations of humankind	68/151	Global efforts for the total elimination of racism, racial discrimination, xenophobia and related intolerance and the comprehensive implementation of and follow-up to the Durban Declaration and Programme of Action
66/210; 70/211; 77/175	Role of the United Nations in promoting development in the context of globalization and interdependence	68/160; 70/153	Enhancement of international cooperation in the field of human rights
66/213	Fourth United Nations Conference on the Least Developed Countries	68/192; 70/179	Improving the coordination of efforts against trafficking in persons
66/216; 70/219; 77/181	Women in development	68/198	Information and communications technologies for development
66/217; 68/228; 72/235	Human resources development	68/201; 73/220; 75/204; 76/192; 77/152	International financial system and development
66/288	The future we want	68/202; 71/216; 72/204; 73/221; 75/205; 76/193; 77/153; 78/137	External debt sustainability and development
67/12; 75/14; 77/117	Cooperation between the United Nations and the Latin American and Caribbean Economic System		
67/140	Realizing the Millennium Development Goals and other internationally agreed development goals for persons with disabilities towards 2015 and beyond

Deliverables

21.17 Table 21.1 lists all cross-cutting deliverables of the programme.

Table 21.1

Cross-cutting deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	3	3	5	3
1. Draft of the programme of work of the ECLAC system	1	1	1	1
2. Report on the activities of the Commission	1	1	1	1
3. Report on the session of the Commission	–	–	1	–
4. Report on the Forum of the Countries of Latin America and the Caribbean on Sustainable Development	1	1	1	1
5. Main substantive document to be discussed at the session of the Commission	–	–	1	–
Substantive services for meetings (number of three-hour meetings)	19	19	32	19
Meetings of:				
6. The Commission	–	–	15	–
7. The Committee of the Whole	2	2	–	2
8. The Forum of the Countries of Latin America and the Caribbean on Sustainable Development	10	10	10	10
9. The Regional Collaborative Platform	2	2	2	2
10. The Committee for Programme and Coordination	1	1	1	1
11. The Advisory Committee on Administrative and Budgetary Questions	2	2	2	2
12. The Fifth Committee	2	2	2	2
B. Generation and transfer of knowledge				
Publications (number of publications)	5	5	5	5
13. <i>CEPAL Review</i>	3	3	3	3
14. On the implementation of the 2030 Agenda for Sustainable Development and the Sustainable Development Goals in Latin America and the Caribbean	1	1	1	1
15. On the joint activities with agencies, funds and programmes with a presence in the region	1	1	1	1
D. Communication deliverables				
Outreach programmes, special events and information materials: booklets, fact sheets, wall charts and information kits; the <i>ECLAC Notes</i> electronic newsletter; and public information materials related to events and special observances.				
External and media relations: tours of ECLAC premises; photographic coverage of meetings and activities, and audiovisual products on the work of ECLAC; press conferences and media events for flagship publications and other relevant documents; press releases and interviews with United Nations/ECLAC spokespersons by national and international news media.				
Digital platforms and multimedia content: regional inter-agency knowledge and data platform on the implementation of the Sustainable Development Goals; ECLAC digital repository; and social media campaigns.				

Evaluation activities

21.18 The following evaluations completed in 2023 have guided the proposed programme plan for 2025:

- (a) Office of Internal Oversight Services evaluation of Secretariat support for the Goals;
- (b) Midterm evaluation of the gender mainstreaming strategy of ECLAC;
- (c) Evaluations of projects on road safety in Brazil and Argentina (subprogramme 1) and on value chain development for deeper integration of East Asia and Latin America (subprogramme 1).

- 21.19 In response to the results of the evaluations referenced above, ECLAC will report on results achieved with support activities for the Goals in its annual report of activities. ECLAC will take steps to mainstream a gender perspective more systematically throughout its programme of work in line with the findings of the evaluation. ECLAC will also take into account the recommendations regarding value chains to better support participation in global and regional value chains, as articulated under subprogramme 1.
- 21.20 The following evaluations are planned for 2025:
- (a) Evaluation of projects on the Regional Agreement on Access to Information, Public Participation and Justice in Environmental Matters in Latin America and the Caribbean (subprogramme 7);
 - (b) Evaluation on road safety in Colombia (subprogramme 1).

Programme of work

Subprogramme 1

International trade, integration and infrastructure

Objective

- 21.21 The objective, to which this subprogramme contributes, is to advance sustainable development and strengthen the role of Latin America and the Caribbean in international trade and the global economy by deepening regional integration and enhancing logistics and infrastructure.

Strategy

- 21.22 To contribute to the objective, the subprogramme will:
- (a) Support the capacities of member States to face new challenges, such as digital trade and services, participation in global and regional value chains, the reduction of their dependency on the export of primary products, the internationalization of small and medium-sized enterprises, trade facilitation, new public and private standards, environmental sustainability and emerging issues in the area of trade infrastructure, by conducting analyses at the country and regional levels, thus helping member States to make progress towards the achievement of Goals 8, 9 and 12;
 - (b) Assist member States in the development and review of logistics policies at the national, subregional and transboundary levels, and provide policy recommendations and technical assistance to monitor the economic infrastructure gap and investment in the region;
 - (c) Disseminate new policy options and promote the exchange of good practices in logistics and transport infrastructure operations, with a particular focus on landlocked developing countries and other member States with special needs, taking into consideration the outcomes of the third United Nations Conference on Landlocked Developing Countries and the fourth International Conference on Small Island Developing States, thus helping member States to make progress towards the achievement of target 17.11 of the Goals;
 - (d) Seek to mainstream the balance among efficiency, resilience and sustainability as a pillar for logistics infrastructure policies and support the implementation of policies that increase the share of industrialized goods in the exports of Latin American and Caribbean countries, thus helping member States to make progress towards the achievement of Goal 9.
- 21.23 The above-mentioned work is expected to result in:
- (a) National policies that promote more sustained, inclusive and sustainable economic growth through sustainable consumption and production patterns;

- (b) The formulation and negotiation of trade policies by countries and implementation and administration of trade agreements at the bilateral, regional, plurilateral and multilateral levels, while ensuring special and differentiated treatment for developing countries;
- (c) More effective participation by countries in the region in global and regional value chains, including through reduced logistics overcost and increased sustainable trade.

Programme performance in 2023

Improved speed management in Argentina

- 21.24 The subprogramme has been supporting Argentina on issues related to road safety, including through the provision of analysis and recommendations on the management of speed limits, and the strengthening of capacities and the sharing of best practices. Following the participation of Argentinian national authorities and stakeholders in a regional conference on best practices and innovations in speed management, a guide on best practices in speed management was published in 2022, together with a sensitization and education campaign about speed as a main risk factor in road fatalities and serious injuries. The National Road Safety Agency committed to pilot programmes proposed by ECLAC, and the support delivered by the subprogramme contributed to the design, modification and implementation of measures for speed management on urban and rural roads.
- 21.25 Progress towards the objective is presented in the performance measure below (see table 21.2).

Table 21.2
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
–	Two of the three supported municipalities installed speed enforcement radars	The Argentinian municipal governments involved in the project committed to implement road safety interventions based on best practices Argentinian municipal governments experienced a 38 per cent decrease in speeding and a 75 per cent decrease in traffic accidents in three years

Planned results for 2025

Result 1: improved capacity of member States to identify key economic sectors for sustainable recovery from the COVID-19 pandemic

Programme performance in 2023 and target for 2025

- 21.26 The subprogramme’s work contributed to the capacity of five additional national or regional institutions being improved, which met the planned target.
- 21.27 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 21.I).

Figure 21.I

Performance measure: number of Latin American and Caribbean national or regional institutions with improved capacity to identify vulnerable, resilient and potential sectors in the recovery from the pandemic (cumulative)

Result 2: member States promote the participation of small and medium-sized enterprises in cross-border e-commerce

Programme performance in 2023 and target for 2025

- 21.28 The subprogramme’s work contributed to three additional national institutions implementing new policy measures, which met the planned target.
- 21.29 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 21.II).

Figure 21.II

Performance measure: number of Latin American and Caribbean national institutions implementing new policy measures to foster the digital transformation of small and medium-sized enterprises and their participation in cross-border e-commerce (cumulative)

Result 3: improved coordination of policies on sustainable and resilient food trade, transport systems and logistics for better regional food security

Proposed programme plan for 2025

- 21.30 To address challenges related to the availability and affordability of food, it is crucial to develop sustainable and resilient food trade, transport systems and logistics, for which greater coordination among line ministries to support net food importer countries is required. In this regard, the subprogramme has promoted the exchange of experiences between authorities and experts on strengthening the multilateral trading system, on how to avoid the emergence of rules and regulations

on existing and new trade agreements that could affect agrifood trade, and on the increase in intraregional food trade.

Lessons learned and planned change

- 21.31 A lesson for the subprogramme was that coordination among line ministries, as well as with other stakeholders and actors involved at the national and the regional levels, can be further strengthened to improve food security strategies. In applying the lesson, the subprogramme will increase the participation of actors to exchange best practices and to facilitate their interaction, dialogue and policy coordination.
- 21.32 Expected progress towards the objective is presented in the performance measure below (see table 21.3).

Table 21.3
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	Countries of the region proposed to establish a regional working group to support the implementation of a regional food security plan	Countries of the region agreed on strategic issues to improve coordination in agrifood trade	Countries identify gaps and opportunities regarding international food trade, transport systems and logistics	Countries develop policy measures to strengthen transport and logistics systems aimed at building more resilient food supply

Deliverables

- 21.33 Table 21.4 lists all deliverables of the subprogramme.

Table 21.4
Subprogramme 1: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	1	1	1
1. Provision of infrastructure and logistics services that promote economic efficiency, social equality and environmental sustainability, and increasing the integration of physical infrastructure in the region	1	1	1	1
Seminars, workshops and training events (number of days)	8	8	8	8
2. Workshops and seminars on the relationship between regional trade policy and the attainment of the Sustainable Development Goals; comparative strategies for deepening regional value chains; new challenges in the region related to resilient infrastructure policies; links between trade and other public policies in the light of developments in the global economy and international trade; and cooperation and trade facilitation initiatives in the region	8	8	8	8
Publications (number of publications)	20	20	20	19
3. <i>International Trade Outlook for Latin America and the Caribbean</i>	1	1	1	1
4. On economic relations with the United States of America; capital flows to the region; emerging trade; and financial issues in the global economy and the implementation of the Sustainable Development Goals in Latin America and the Caribbean	8	8	8	7

6. <i>Bulletin on the Facilitation of Transport and Trade in Latin America and the Caribbean</i>	6	6	6	6
7. On international trade in goods in Latin America and the Caribbean	4	4	4	4
C. Substantive deliverables				
Consultation, advice and advocacy: advice to member States, upon request, on value chains, trade policy, integration, sustainable logistics, mobility and infrastructure policies, and social and sustainability issues.				
Databases and substantive digital materials: databases on trade data and disputes, including the Interactive Graphic System for International Trade Data, bond issuance, spreads and credit ratings, the Maritime and Logistics Profile of Latin America and the Caribbean data tool, and other data on infrastructure services.				
D. Communication deliverables				
Outreach programmes, special events and information materials: <i>CEPAL News</i> newsletter.				

Subprogramme 2 Production and innovation

Objective

- 21.34 The objective, to which this subprogramme contributes, is to enhance the diversification and structural transformation of productive structures through investment, innovation and the diffusion of new technology and to strengthen linkages and networks between firms.

Strategy

- 21.35 To contribute to the objective, the subprogramme will:
- (a) Promote policy advocacy and the exchange of experiences and best practices with respect to the dynamics of productive development among stakeholders at the regional, national and local levels through meetings, seminars and virtual forums, including the provision of technical cooperation services, such as specific training courses and workshops;
 - (b) Focus on the integration of innovation and new, low-carbon and low-emission technologies in production processes with an emphasis on technology convergence (that is, the integration of the Internet of things, 5G, big data, artificial intelligence, information technology, cognitive science, nanotechnology and biotechnologies) and new manufacturing processes (e.g. the Industrial Internet and biomanufacturing); on capacity-building in convergent technologies; and on mainstreaming a gender perspective on structural change, for example, with regard to productivity, digital and employment gaps;
 - (c) Conduct economic analyses along with applied research on the basis of the generation, processing and analysis of information and indicators in various databases, disseminate the result of those studies and submit policy recommendations to governments, regional bodies and other relevant stakeholders;
 - (d) Facilitate the connection of micro-, small and medium-sized enterprises with larger firms that use advanced technologies so as to integrate them into the process of learning and competition in dynamic foreign and domestic markets and increase the dissemination of technology;
 - (e) Analyse and measure the impact of foreign direct investment so as to devise productive development policies that will have positive effects on learning and the diversification of the

production and export structures; and provide technical assistance, upon request by member States, on the assessment, development and implementation of productive development policies and strategies, thus contributing to the attainment of Goal 9;

- (f) Continue to provide its analysis of firms and sectors in the region and further support member States in mitigating fragilities and imbalances in the productive structure of the region, with particular attention given to the digitalization of the productive sector;
- (g) Conduct analyses and applied research on issues relevant to productive diversification and the sustainability and social inclusiveness of agriculture and bioeconomy development;
- (h) Promote the coherence, integration and coordination of national and regional policies and institutions in agricultural development and provide technical assistance on issues related to sustainable agriculture, bioeconomy development and sustainable use of genetic resources, helping member States to make progress towards the achievement of Goals 2, 8, 9, 12, 13, 14 and 15.

21.36 The above-mentioned work is expected to result in:

- (a) The design and implementation of productive development and technology policies by governments and regulators aimed at diversifying the productive structure and building capacities in Latin American and Caribbean countries;
- (b) The incorporation of innovation and new convergent technologies into production processes;
- (c) The design and implementation of policies by governments and regulators that heighten local innovation and adaptation, helping to leverage the potential of foreign direct investment;
- (d) Member States moving towards more sustainable patterns of consumption and production;
- (e) A diversification process associated with the creation of new opportunities for formal jobs and productivity growth;
- (f) Increased resilience of the productive sectors through a significant increase in the digitalization of firms in the region, including micro-, small and medium-sized enterprises;
- (g) The incorporation of new concepts and technologies in the design and implementation of evidence-based bioeconomy- and digitization-related policies and strategies for sustainable and inclusive agriculture, food systems and rural development;
- (h) The design and implementation of productive and technology policies in agriculture and bioeconomy aimed at diversifying the productive structure and increasing value addition.

Programme performance in 2023

Increased availability of statistical information for the design of digital policies in Latin America and the Caribbean

21.37 Measuring the evolution of digital transformation is essential to carry out diagnoses and develop public policies to achieve a greater use of digital technologies to foster productive development. The subprogramme developed and launched the Digital Development Observatory, which is an important upgrade of the Regional Broadband Observatory that served as a regional reference on digital connectivity issues. This new tool allows access to comparative and detailed information on indicators, data and elements that measure the degree of the digital development of the Latin American and Caribbean countries, contributing to informing decision-making, as well as to informing the discussions among countries of the region regarding the Digital Agenda for Latin America and the Caribbean.

Table 21.5
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
Countries had access to 15 comparative statistical indicators regarding connectivity and digital infrastructure	Countries had access to 18 comparative statistical indicators regarding connectivity and digital infrastructure	Countries had access to new comparative statistical information in 12 areas and 81 indicators regarding digital economy topics, which were included in the Digital Agenda for Latin America and the Caribbean and monitored through the Digital Development Observatory

Planned results for 2025

Result 1: policies to accelerate digital transformation

Programme performance in 2023 and target for 2025

- 21.38 The subprogramme’s work contributed to the development of one additional public policy, which met the planned target.
- 21.39 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 21.III).

Figure 21.III

Performance measure: number of new policies to accelerate digital transformation (cumulative)

Result 2: improved policies to promote productive development in Latin America and the Caribbean

Programme performance in 2023 and target for 2025

- 21.40 The subprogramme’s work contributed to two additional policy measures, which met the planned target.
- 21.41 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 21.IV).

Figure 21.IV

Performance measure: number of policy measures implemented by government institutions to promote productive development in areas related to business strategies, investment and territorial economic development (cumulative)

Result 3: increased and enhanced cluster initiatives and other territorial productive articulation initiatives

Proposed programme plan for 2025

21.42 The adoption of an associative approach based on the collaboration of actors from the private and public sectors, academia and civil society has shown success in addressing the processes of sophistication and productive diversification that are required to promote a model of sustainable and inclusive development. To systematize the information related to the numerous experiences in the region where this approach has been adopted, the subprogramme has promoted the development of a digital platform to georeference programmes and initiatives, disseminate good practices, facilitate training and professional exchanges, and foster joint projects.

Lessons learned and planned change

21.43 The lesson for the subprogramme was that the growing cross-cutting nature of issues related to digital transformation and productive development requires greater coordination between different public sector institutions from different sectors and different levels (national, regional and municipal). In applying the lesson, the subprogramme will facilitate coordination using its convening power and through the organization of seminars and workshops to foster dialogue.

21.44 Expected progress towards the objective is presented in the performance measure below (see figure 21.V).

Figure 21.V

Performance measure: number of new policy measures adopted by productive development governmental institutions aimed at promoting cluster initiatives or other territorial productive articulation initiatives (cumulative)

Deliverables

21.45 Table 21.6 lists all deliverables of the subprogramme.

Table 21.6

Subprogramme 2: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	6	–	6	6
1. Meetings of the Conference on Science, Innovation and Information and Communications Technologies of ECLAC	6	–	–	6
2. Preparatory meetings of the Conference on Science, Innovation and Information and Communications Technologies of ECLAC	–	–	6	–
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	1	1	2
3. On the region's production structure, foreign direct investment, new and emerging technologies and policy; and on issues related to agriculture	1	1	1	2
Seminars, workshops and training events (number of days)	48	48	47	54
4. Training and seminars on foreign direct investment and small and medium-sized enterprises, new and emerging technologies and productive structure diversification; and on productive development in agriculture, the bioeconomy and the rural economy	7	7	6	9
5. Training courses on innovation policy management and economies of the region	35	35	35	35
6. Meeting of experts to analyse recent structural changes, study the trends and progress of the digital economy, and examine recent trends in the behaviour of economic agents in sectors and countries in the region; and meeting of experts to analyse productive development policies for sustainable agriculture, sustainable food systems, the bioeconomy or digitalization in agriculture	6	6	6	10
Publications (number of publications)	7	7	7	11
7. <i>The Outlook for Agriculture and Rural Development in the Americas</i>	–	–	–	1
8. <i>Foreign Direct Investment in Latin America and the Caribbean</i>	1	1	1	1
9. <i>Outlook of Productive Development Policies in Latin America and the Caribbean</i>	–	–	–	1
10. Position document for the Conference on Science, Innovation and Information and Communications Technologies	–	–	–	1
11. On the production structure of the region, foreign investment, industrial policies, digital technologies and innovation; and on structural, social, institutional or environmental challenges in agriculture	5	5	5	6
12. On technological, productive or trade performance in Argentina	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: advice to member States, upon request, on policies and strategies for productive development and competitiveness, sustainable agriculture, sustainable food systems, bioeconomy, and digitalization in agriculture; public-private partnerships; foreign direct investment; small and medium-sized enterprises; and innovation systems and new and emerging technologies.				
Databases and substantive digital materials: databases on economic activity in specific sectors; software for the analysis of the competitiveness of nations; statistical information on the main economic agents in the region.				

Subprogramme 3

Macroeconomic policies and growth

Objective

- 21.46 The objective, to which this subprogramme contributes, is to foster sustainable and inclusive growth in Latin America and the Caribbean by strengthening the capacity of policymakers and other stakeholders in the region to analyse current and emerging macroeconomic and development finance issues and to evaluate, design and implement development-centred macroeconomic and development financing policies that incorporate a gender perspective and are based on comparative policy analysis.

Strategy

- 21.47 To contribute to the objective, the subprogramme will:
- (a) Prepare the annual *Economic Survey of Latin America and the Caribbean*, the *Preliminary Overview of the Economies of Latin America and the Caribbean*, the *Fiscal Panorama of Latin America and the Caribbean* and other reports focusing on Latin America and the Caribbean to support member States in responding to current and emerging macroeconomic and financing for development trends;
 - (b) Conduct applied policy analysis to support member States in the evaluation and formulation of macroeconomic and financing for development policies that promote equitable economic growth in line with the Goals;
 - (c) Facilitate South-South interaction of policymakers and dialogue with regional and international organizations through seminars, including the annual Regional Seminar on Fiscal Policy, and through workshops on macroeconomic and financing for development policies;
 - (d) Foster the establishment and operation of networks of key stakeholders, including policymakers, academics, private sector analysts, members of civil society organizations and the public at large, to enable regional discussion of key macroeconomic and financing for development issues;
 - (e) Provide technical cooperation and advisory services, upon request, in the areas of macroeconomic, labour and financing for development policies.
- 21.48 These workstreams will help member States to make progress towards achieving all of the Goals, with a particular emphasis on Goals 8, 10, 16 and 17.
- 21.49 The above-mentioned work is expected to result in:
- (a) Enhanced analysis of current and emerging macroeconomic and development finance issues by policymakers and other stakeholders in the region;
 - (b) Strengthened evaluation, design and implementation by policymakers of macroeconomic and development financing policies that mainstream a gender perspective and are based on comparative policy analysis.

Programme performance in 2023

Increased coordination of Latin American and Caribbean countries to build regional positions for international tax cooperation

- 21.50 The undertaking of changes in international tax cooperation may affect domestic resource mobilization, and new tax regulations developed in international forums do not necessarily address the concerns of the countries of the region. In this regard, Colombia, with the support of Brazil and Chile, created a regional platform for tax cooperation in Latin America and the Caribbean (Plataforma Regional de Cooperación Tributaria para América Latina y el Caribe) to find common

ground and build regional positions on the matter, coordinate efforts and exchange country experiences. The subprogramme supported the creation of the platform, in its capacity as technical secretariat, providing technical assistance to Colombia to develop the governance structure and coordinating the platform’s working groups.

21.51 Progress towards the objective is presented in the performance measure below (see table 21.7).

Table 21.7
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
Countries of the region identified the need to have coordination mechanisms to advocate for their interests and priorities in international tax policy forums	–	The regional platform for tax cooperation in Latin America and the Caribbean (Plataforma Regional de Cooperación Tributaria para América Latina y el Caribe) was presented by Colombia at the thirty-fifth Regional Seminar on Fiscal Policy and a charter was opened for signature at the First Latin American and Caribbean Summit for an Inclusive, Sustainable and Equitable Global Tax Order

Planned results for 2025

Result 1: fiscal, financial and employment policies for a transformative recovery

Programme performance in 2023 and target for 2025

21.52 The subprogramme’s work contributed to two additional official documents including references to the subprogramme’s analysis and policy recommendations, which met the planned target.

21.53 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 21.VI).

Figure 21.VI
Performance measure: number of references to the subprogramme analysis and policy recommendations in official documents (cumulative)

Result 2: strengthened resource mobilization to support sustainable development and the achievement of the Sustainable Development Goals in Latin America and the Caribbean

Programme performance in 2023 and target for 2025

- 21.54 The subprogramme’s work contributed to one additional national resource mobilization policy, which met the planned target.
- 21.55 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 21.VII).

Figure 21.VII
Performance measure: resource mobilization policies and strategies to support sustainable development and the achievement of the Sustainable Development Goals (cumulative)

Result 3: macroeconomic and financing for development policies for economic growth, investment, fiscal sustainability and climate resilience

Proposed programme plan for 2025

- 21.56 Economic growth in the region is slowing and returning to the low levels of the 2010s. During the period 2014–2023, the average regional gross domestic product growth rate per year was 0.8 per cent, lower than the 2 per cent average growth rate of the 1980s. The impact of climate change may further reduce economic growth unless proactive measures are taken to build resilience.¹ However, policy space to undertake front-loaded investment programmes is limited. The subprogramme is leveraging its knowledge products and forums to help countries to analyse economic growth, investment and climate change and to formulate and implement national macroeconomic and financing for development plans, strategies and policies.

Lessons learned and planned change

- 21.57 The lesson for the subprogramme was that there was high demand from member States for analysis of specific policy issues coupled with technical workshops to inform their analysis and formulation of macroeconomic and financing for development policies. In applying the lesson, the subprogramme will strengthen the synergies between its knowledge products and technical workshops to support member States in this regard.
- 21.58 Expected progress towards the objective is presented in the performance measure below (see figure 21.VIII).

¹ Intergovernmental Panel on Climate Change, *Climate Change 2023: Synthesis Report. Contribution of Working Groups I, II and III to the Sixth Assessment Report of the Intergovernmental Panel on Climate Change* (Geneva, 2023).

Figure 21.VIII

C. Substantive deliverables				
Consultation, advice and advocacy: advice to member States, upon request, on macroeconomic, fiscal and monetary policy analysis and formulation, macroeconomic analysis and systems for monitoring economic development, and on the design and implementation of financing for development schemes and policies geared towards financial and productive development and/or social protection; technical cooperation services, upon request, in the fields of social policy, equality and structural change in Uruguay; technical cooperation services to public agencies of Colombia, at their request.				
Databases and substantive digital materials: statistical information for policymakers, academia and private sector analysts on economic, monetary and financial variables for countries in the region; statistical data sets covering government operations, public debt, tax revenue and revenue from non-renewable natural resources.				

Subprogramme 4

Social development and equality

Objective

- 21.60 The objective, to which this subprogramme contributes, is to improve the overall well-being of the people of the region and achieve greater social and economic equality in line with the 2030 Agenda and with full respect for human rights.

Strategy

- 21.61 To contribute to the objective, the subprogramme will focus on the following priority areas: addressing the multiple dimensions of poverty, inequality and well-being; bridging gaps in well-being and tackling inequalities; ensuring access to universal, comprehensive and sustainable social protection; promoting social and labour inclusion policies; coordinating social, economic and environmental policies; and promoting health, pensions and educational policies as key elements of inclusive social development and improving the capacity of social policy to adapt to new and emerging challenges related to such topics as demographic transition, migration, changes in the world of employment, new technologies, pandemics and climate change. In implementing these priorities, the subprogramme will:
- (a) Support countries in implementing the Regional Agenda for Inclusive Social Development, in line with the outcomes and agreements reached at the Regional Conference on Social Development in Latin America and the Caribbean, by conducting applied research, generating analyses, disseminating results, providing training and advisory services and formulating policy recommendations, as well as by promoting policy dialogue for inclusive social development among policymakers, academics, members of civil society organizations and other stakeholders and by facilitating the exchange of experiences and good practices;
 - (b) Assist countries with capacity-building and technical cooperation in the design, implementation, monitoring and evaluation of strategies, policies and programmes. Research and advisory services will emphasize, in particular, social protection systems with full respect for human rights, taking an equality-oriented and sustainable approach; the protection and promotion of the rights of population groups subjected to discrimination and exclusion; social investment; and education and public health systems, thus helping member States to make progress towards the achievement of Goals 1, 2, 3, 4, 8, 10 and 16;
 - (c) Assist governments in tackling the socioeconomic consequences of crises through advisory services and knowledge-sharing activities in affected social policy areas.
- 21.62 The above-mentioned work is expected to result in:
- (a) Deeper understanding by policymakers of the structural social challenges and disparities that characterize the region;
 - (b) Measures and public policies promoting greater social and economic equality and overall well-being of the people of the region;
 - (c) Expanded and improved social protection systems that take into consideration the social impacts that arise from crises, emerging challenges and catastrophic events and the need to build greater resilience over time.

Programme performance in 2023

Improved decision-making and reduced information gaps to monitor inclusive social development in countries of the Pacific Alliance²

- 21.63 The countries of the Pacific Alliance (Chile, Colombia, Mexico and Peru) require relevant information to monitor policies on inclusive social development in order to reduce existing gaps in data on poverty reduction, inequalities and education access, among other social issues. Since 2021, to provide accurate and relevant information to assist national authorities in their decision-making process and to strengthen social institutional frameworks, the subprogramme has been delivering technical assistance to the four countries to build an observatory on social development policies, to select data sets and to identify relevant statistics on inclusive social development. The Observatory of Social Development of the Pacific Alliance was launched in 2023 to disseminate information, analysis and collective knowledge.
- 21.64 Progress towards the objective is presented in the performance measure below (see table 21.9).

Table 21.9
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
Countries of the Pacific Alliance identified gaps in information for monitoring policies on inclusive social development	Countries of the Pacific Alliance defined indicators and the selection of data sets to implement an observatory of social development policies	The Observatory of Social Development of the Pacific Alliance was launched to support member States in taking informed decisions and monitoring social policies

Planned results for 2025

Result 1: more resilient social protection systems

Programme performance in 2023 and target for 2025

- 21.65 The subprogramme’s work contributed to three national institutions with improved capacities, which met the planned target.
- 21.66 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 21.IX).

Figure 21.IX
Performance measure: number of national institutions with improved capacities to ensure social protection during periods of crisis (annual)

² See <https://alianzapacifico.net/en/what-is-the-pacific-alliance/>.

Result 2: strengthened comprehensive and universal social protection systems

Programme performance in 2023 and target for 2025

- 21.67 The subprogramme’s work contributed to 18 countries reaffirming their commitment to achieve universal and comprehensive social protection systems, which met the planned target.
- 21.68 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 21.10).

Table 21.10
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
–	Countries agreed on the importance of addressing social protection gaps to achieve universal and comprehensive social protection systems	Resolution 5 (V) of the Regional Conference on Social Development in Latin America and the Caribbean adopted by 18 countries, in which they reaffirmed their commitment to achieve universal and comprehensive social protection systems	Countries identify obstacles and challenges to achieving universal and comprehensive social protection systems	Countries draft strategies or programmes to achieve universal social protection systems

Result 3: expanding social protection systems to include informal and independent workers

Proposed programme plan for 2025

- 21.69 In Latin America and the Caribbean, 20 per cent of the population have no access to social protection,³ and approximately 49 per cent of workers are informal.⁴ The technological transformation has translated into changes in labour demand, and available information on digital platform workers shows their limited access to social protection.⁵ The subprogramme has sensitized member States on the importance of strengthening social protection systems to incorporate the excluded population and has delivered technical assistance to strengthen national capacities in the design and implementation of policies aiming at more universal and sustainable social protection systems.

Lessons learned and planned change

- 21.70 The lesson for the subprogramme was that the use of face-to-face modalities to deliver technical assistance is highly valued by member States as it enables this support to be better tailored to take into consideration country-specific needs. In applying the lesson, the subprogramme will strive to increase the provision of face-to-face workshops and training activities.
- 21.71 Expected progress towards the objective is presented in the performance measure below (see figure 21.X).

³ *The Future of Social Protection in the Midst of a Protracted Social Crisis in Latin America: Advancing towards Universal, Comprehensive, Sustainable and Resilient Systems*, ECLAC Social Policy series, No. 246 (United Nations publication, 2024).

10. On social development policies; and on analytical and methodological proposals to foster the universal implementation of social policies, including on social protection, and enhance their impact on equality gaps, to enhance intersectoral and inter-institutional cooperation and increase the effectiveness and efficiency of social policies	2	2	1	–
C. Substantive deliverables				
Consultation, advice and advocacy: advice to member States, upon request, on social policies for equality, social investment and policies; analytical and methodological proposals to enhance intersectoral and inter-institutional cooperation aimed at improving effectiveness and efficiency; and design, implementation and evaluation of social policies for the needs of the most vulnerable.				
Databases and substantive digital materials: Observatory on Social Development in Latin America and the Caribbean, which includes databases on social development, young people, non-contributory social protection, social institutions and regional commitments.				
D. Communication deliverables				
Digital platforms and multimedia content: knowledge management tools, including on the strengthening of the Latin American and Caribbean Network on Social Development; and infographics or other material to disseminate research findings and policy recommendations.				

Subprogramme 5 Gender equality and women’s autonomy

Objective

- 21.73 The objective, to which this subprogramme contributes, is to strengthen gender equality and women’s autonomy in sustainable development strategies of the Latin American and Caribbean countries.

Strategy

- 21.74 To contribute to the objective, the subprogramme will:
- (a) Produce knowledge and develop gender statistics and indicators, expanding the scope and improving the quality of data and indicators available from the Gender Equality Observatory for Latin America and the Caribbean;
 - (b) Provide technical support to mainstream a gender perspective in the work of the Statistical Conference of the Americas of ECLAC and its working groups;
 - (c) Provide technical assistance to the countries in the region in developing policies to promote gender equality, and strengthen the capacities of national mechanisms for the advancement of women as well as those of national statistical offices;
 - (d) Foster increased dissemination of publications and research findings among policymakers and other relevant stakeholders. Particular attention will be devoted to the economic autonomy of women in an integrated framework, connected to physical autonomy and to decision-making autonomy.
- 21.75 The above-mentioned work is expected to result in:
- (a) Enhanced production of gender statistics by national statistical offices;
 - (b) Strengthened capacities of member States in building policies for gender equality along with the implementation of the 2030 Agenda;
 - (c) Advancement of gender equality across the region.

Programme performance in 2023

Increased knowledge to measure gender-based violence and advance gender equality

21.76 According to official statistics, available through the ECLAC Gender Equality Observatory for Latin America and the Caribbean, in 2022 more than 4,050 women were victims of femicide/feminicide. The subprogramme, in partnership with the United Nations Development Programme, the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) and the Latin American Council of Social Sciences, has been delivering a specialized course on measuring gender-based violence against women, including femicide/feminicide. This course has been highly demanded by government officials and other stakeholders and, as a result, 436 national officers and other stakeholders have received a high-level diploma to better inform policymaking in the measurement of gender-based violence against women.

21.77 Progress towards the objective is presented in the performance measure below (see figure 21.XI).

Figure 21.XI

Performance measure: number of national governmental officials and other stakeholders receiving a high-level diploma to better inform policymaking in the measurement of gender-based violence against women (annual)

Planned results for 2025

Result 1: enhanced public policies related to the legal framework for care in the countries of the region

Programme performance in 2023 and target for 2025

21.78 The subprogramme's work contributed to the development of normative frameworks related to care, which met the planned target.

21.79 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 21.12).

Table 21.12
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Peru approved a ministerial resolution that defined care work and established the bases for a national care system	Enhanced public policies related to the legal framework of care At the fifteenth session of the Regional Conference on Women in Latin America and the Caribbean, member States adopted the Buenos Aires Commitment, in which they agreed to take steps towards a care society in the countries of the region	Brazil established an interministerial working group to develop proposals for a national care policy and a national care plan	Based on georeferenced information, countries strengthen and mainstream a gender perspective into the design of care-related policies	As an outcome of the sixteenth session of the Regional Conference on Women in Latin America and the Caribbean, countries agree on proposals for the political, economic, social, cultural and environmental transformations required to advance the care society and gender equality

Result 2: increased use of new technologies and digital tools to design, implement and monitor care policies

Programme performance in 2023 and target for 2025

- 21.80 The subprogramme’s work contributed to one additional government using new technologies for the design and implementation of care policies, which met the planned target.
- 21.81 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 21.XII).

Figure 21.XII

Performance measure: number of national or subnational governments that use new technologies for the design and implementation of care policies (cumulative)

Result 3: advances in the production of gender statistics on time use and unpaid care work

Proposed programme plan for 2025

21.82 Given that the burden of unpaid care and domestic work falls disproportionately on women,⁶ time-use measurements are critical to recognize and analyse gender inequality. The subprogramme has been supporting countries of the region in developing and updating time-use statistics, which are published by the ECLAC Gender Equality Observatory for Latin America and the Caribbean, to inform the design of policies that promote gender equality.

Lessons learned and planned change

21.83 The lesson for the subprogramme was that improvements in the collection and analysis of time-use statistics require close collaboration between national statistical offices and the machineries for the advancement of women. In applying the lesson, the subprogramme will disseminate the ECLAC methodological guide on time-use measurements and the methodological guide for mainstreaming a gender perspective into statistical production and provide technical assistance to countries that are in the process of updating their time-use data measurements, upon request.

21.84 Expected progress towards the objective is presented in the performance measure below (see table 21.13).

Table 21.13
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
16 countries of the region published time-use statistics	Countries of the region agreed to create a community of practice to advance time-use measurements	The community of practice for measuring the care society was launched within the framework of the Statistical Conference of the Americas	Two countries carry out time-use surveys	Five countries update time-use data between 2021 and 2025, which contributes to strengthening indicator 5.4.1 of the Sustainable Development Goals

Deliverables

21.85 Table 21.14 lists all deliverables of the subprogramme.

Table 21.14
Subprogramme 5: deliverables for the period 2023–2025, by category and subcategory

6. Gender Equality Observatory for Latin America and the Caribbean studies and series on gender analysis, including on gender mainstreaming policies, the economic and physical autonomy of women and poverty from a gender perspective	5	5	5	4
7. For the sixteenth session of the Regional Conference on Women in Latin America and the Caribbean	–	–	–	1
C. Substantive deliverables				
Consultation, advice and advocacy: advice to member States, upon request, on matters relating to the fulfilment of regional and international agreements on gender equality.				
Databases and substantive digital materials: Gender Equality Observatory for Latin America and the Caribbean; gender statistics with data from household and time-use surveys and other sources.				

Subprogramme 6 Population and development

Objective

21.86 The objective, to which this subprogramme contributes, is to fully integrate population issues into development planning, policies and programmes of the countries of Latin America and the Caribbean.

Strategy

21.87 To contribute to the objective, the subprogramme will:

- (a) Provide national and local institutions with training on demographic analysis, population estimates and projections; generate knowledge on population and demographic trends in the region to underpin evidence-based policymaking and improve the use of census data, vital statistics and surveys through the generation of data and the development of procedures, computer programmes and information systems; and, in the context of the regional implementation of the 2030 Agenda, help member States to make progress towards the achievement of Goals 1, 3, 5, 7, 10 and 17;
- (b) Provide technical support in the follow-up to international agreements, including the Framework of Action for the follow-up to the Programme of Action of the International Conference on Population and Development beyond 2014, the Montevideo Consensus on Population and Development, the Madrid International Plan of Action on Ageing, 2002, and the Global Compact for Safe, Orderly and Regular Migration, with gender-sensitive, disability and ethnic analysis, and in the follow-up of the population-related targets of the 2030 Agenda;
- (c) Provide technical assistance in the planning, design, implementation and dissemination of population and housing censuses and in the inclusion of a sociodemographic perspective in public policies design and implementation at the national and local levels, and organize

workshops and seminars to facilitate South-South cooperation, networking and the sharing of successful experiences;

- (d) Conduct and disseminate applied research and analysis on key issues, such as population ageing, adolescent fertility, persons with disabilities, international migration, Indigenous Peoples, Afrodescendent populations and the socioeconomic impact of demographic transition, including recommendations on how to reduce inequalities;
- (e) Play a leading role for the region in the United Nations Network on Migration and in other networks relevant to population issues, such as the National Transfer Accounts network.

21.88 The above-mentioned work is expected to result in:

- (a) Enhanced monitoring of population trends by local and national authorities;
- (b) Increased use of demographic analysis, population estimates and other evidence for policymaking.

Programme performance in 2023

Countries follow up on the implementation of the regional agreement on population and development

21.89 In 2023, the subprogramme organized the fifth meeting of the Presiding Officers of the Regional Conference on Population and Development, and the special session to commemorate 10 years of the Montevideo Consensus on Population and Development, the regional road map for the promotion of the rights of the population within the framework of sustainable development. The 29 participating countries reaffirmed their commitment to the Montevideo Consensus, and throughout the year 22 countries prepared national voluntary reports on the results achieved, based on an operational guide prepared by the subprogramme and with inputs from different sectoral ministries and civil society.

21.90 Progress towards the objective is presented in the performance measure below (see figure 21.XIII).

Figure 21.XIII

Performance measure: number of national voluntary reports on the implementation of the Montevideo Consensus on Population and Development (annual)

Planned results for 2025

Result 1: innovative approaches to conducting censuses

Programme performance in 2023 and target for 2025

21.91 The subprogramme’s work contributed to the incorporation of technological innovations in two censuses processes, which met the planned target.

21.92 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 21.15).

Table 21.15
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Bolivia (Plurinational State of), Cuba, the Dominican Republic, Honduras and Paraguay evaluated the incorporation of innovative approaches	Argentina, Brazil, Costa Rica, the Dominican Republic and Ecuador carried out their censuses in 2022, incorporating innovative approaches	Panama applied innovations in the capture and processing of data Uruguay used web self-census and innovated in the methods for the management and control of the census operation	Countries that carried out their censuses in 2023 incorporate innovative approaches in the dissemination of the results Countries that carry out their censuses in 2024 incorporate innovative approaches	Countries that carried out their censuses in 2024 incorporate innovative approaches in the dissemination of the results

Result 2: countries of the region analyse the impact of population ageing on inclusive and sustainable economic growth using national transfer accounts

Programme performance in 2023 and target for 2025

- 21.93 The subprogramme contributed to seven countries analysing the impact of population ageing on inclusive and sustainable economic growth using national transfer accounts, which met the planned target.
- 21.94 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 21.16).

Table 21.16
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
10 countries developed national studies based on national transfer accounts	Colombia and Jamaica developed national studies based on national transfer accounts Colombia updated its national transfer account estimates	Guatemala published a study on national transfer accounts Representatives of Brazil, Colombia, Costa Rica, Guatemala, Jamaica and Mexico participated in technical discussions on the impact of changes in population growth and age structures on macroeconomic performance and gender and generational equality	Four countries produce updated national transfer accounts and conduct studies to examine inequalities between socioeconomic groups	Two additional countries produce updated national transfer accounts and conduct studies to examine inequalities between socioeconomic groups

Result 3: strengthened demographic analysis for public policy

Proposed programme plan for 2025

- 21.95 Sociodemographic data and their analysis support the follow-up and implementation of the 2030 Agenda. In 2023, the subprogramme delivered training courses on the measurement of Sustainable

Development Goal indicators using census data and on the use of the REDATAM software, which is publicly available free of charge, and a six-month online regional specialization course on demographic analysis for sustainable development.

Lessons learned and planned change

- 21.96 The lesson for the subprogramme was that online courses are an effective way to reach national officials who cannot participate in in-person training. In applying the lesson, the subprogramme will evaluate the experience of the 2023 online course and adapt and update its curriculum to offer every two years an improved course aimed at strengthening demographic analysis at the national level.
- 21.97 Expected progress towards the objective is presented in the performance measure below (see figure 21.XIV).

Figure 21.XIV

Performance measure: number of participants from institutions in the region certified in demographic analysis for sustainable development (cumulative)

Deliverables

- 21.98 Table 21.17 lists all deliverables of the subprogramme.

Table 21.17

Subprogramme 6: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned

11. On population projection and censuses	1	1	1	1
12. On ageing and development and on REDATAM ^a	2	2	2	2

C. Substantive deliverables

Consultation, advice and advocacy: advice to member States, upon request, on population and development, including REDATAM-related computer applications, population and housing censuses and data collection, demographic analysis and methodologies for population projections and estimates; on the incorporation of sociodemographic variables into development policies, programmes and projects, with a gender perspective and considering specific groups; and on the implementation of the Montevideo Consensus on Population and Development and the Regional Strategy for the Implementation in Latin America and the Caribbean of the Madrid International Plan of Action on Ageing, the 2030 Agenda for Sustainable Development and the Global Compact for Safe, Orderly and Regular Migration; advocacy at intergovernmental forums in the region on population and development issues.

Databases and substantive digital materials: guidelines on the production of demographic estimates and population projections at the national and subnational levels; a regional databank of censuses on population and housing, and vital statistics; databases on demographic trends and population projections, spatial distribution and urbanization; databases on Indigenous Peoples and peoples of African descent and on maternity and migration; REDATAM software for the processing, analysis and dissemination of census data; and a platform to follow up on the implementation of the Montevideo Consensus on Population and Development.

D. Communication deliverables

Digital platforms and multimedia content: subprogramme’s pages on the ECLAC website.

^a REDATAM is an acronym that stands for “retrieval of data for small areas by microcomputer”. REDATAM+SP (abbreviated R+SP) is the most recent version of the fourth generation of the software. It can be used in English, Portuguese or Spanish.

Subprogramme 7 Sustainable development and human settlements

Objective

- 21.99 The objective, to which this subprogramme contributes, is to ensure the integration and due consideration of environmental, climate and urban management concerns and opportunities in policymaking and policy implementation, with a rights-based approach and ensuring that no one is left behind.

Strategy

- 21.100 To contribute to the objective, the subprogramme will:
- (a) Enhance knowledge of the region’s economic, social and environmental profiles and continue to convene and involve national and subnational governments, academic institutions, civil society and other stakeholders to foster participatory decision-making;
 - (b) Assess the advances made by countries in integrating sustainability criteria into public policies, including monitoring the implementation of principle 10 of the Rio Declaration on

Environment and Development, as established in the Regional Agreement on Access to Information, Public Participation and Justice in Environmental Matters in Latin America and the Caribbean (Escazú Agreement), and providing support to the Forum of the Countries of Latin America and the Caribbean on Sustainable Development;

- (c) Strengthen national capacities to design and implement public policies for the sustainability of human settlements and the implementation of the 2030 Agenda, the New Urban Agenda, the nationally determined contributions under the Paris Agreement and the decisions taken within the framework of the Conference of the Parties to the United Nations Framework Convention on Climate Change;
- (d) Conduct the above-mentioned activities through research, resulting in the publication of studies, the organization of expert group meetings, seminars and workshops, and the provision of technical assistance to member States, upon request, helping member States to make progress towards the achievement of Goals 11, 12, 13, 15 and 16;
- (e) Promote the creation of networks with a wide range of stakeholders in the environmental, economic and social sectors relevant to sustainable development, including government institutions, academia, civil society organizations, private sector representatives and relevant sectoral bodies.

21.101 The above-mentioned work is expected to result in:

- (a) Better-designed policies for sustainable development and environmental performance, policies to address the economics of climate change and policies that support sustainable and inclusive human settlements;
- (b) Sustainable development and climate change criteria effectively mainstreamed into more areas of government;
- (c) The design of guidelines for the implementation of economic plans towards a low-carbon, low-emission and more resilient economy that creates more employment and economic well-being.

Programme performance in 2023

Transformative strategies for land planning, financing and regulatory frameworks

21.102 Since 2022, the subprogramme has been providing technical support to Cuba on issues related to land planning, financing, regulatory frameworks and the urban economy. The subprogramme organized several technical workshops and trainings to develop instruments to be included in secondary legislation, involving the Ministry of Finance, national institutions responsible for urban planning and housing, academia and local urban development entities, which were attended by more than 100 participants at the policymaking and technical levels. Concrete plans on urban financing and planning were drafted and discussed with high-level national authorities as well as a working group. These plans also provided elements for the secondary legislation on instruments for financing and planning of land, adapted to the national context.

21.103 Progress towards the objective is presented in the performance measure below (see table 21.18).

Table 21.18

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	The first law on urban planning in Cuba was approved by the National Assembly, including general dispositions on financing and value capture	Two action plans on urban financing and land planning (at the national and local levels) were designed and validated with the working group and national authorities

Planned results for 2025

Result 1: progress towards financial systems that address the challenge of climate change and support the implementation of the 2030 Agenda and the Sustainable Development Goals

Programme performance in 2023 and target for 2025

- 21.104 The subprogramme's work contributed to the development of policy instruments that incorporate climate change criteria into financial systems, which met the planned target.
- 21.105 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 21.19).

Table 21.19

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Countries in the region increased awareness of the need to incorporate climate change considerations into financial systems	Central Bank of Mexico developed models to analyse the impact of climate change under different macroeconomic scenarios	Costa Rica and the Dominican Republic developed policy instruments to incorporate climate change criteria into the financial systems	Two additional countries develop strategies or policy instruments to incorporate climate change criteria and tools into the financial system	One additional country develops strategies or policy instruments to incorporate climate change criteria and tools into the financial system

Result 2: national implementation plans aimed at strengthening environmental access rights

Programme performance in 2023 and target for 2025

- 21.106 The subprogramme's work contributed to two implementation plans being put in place, which met the planned target.
- 21.107 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 21.XV).

Figure 21.XV

Performance measure: number of national implementation plans on environmental access rights in place (cumulative)

Result 3: development of strategies on circular economy for better environmental performance

Proposed programme plan for 2025

21.108 The subprogramme has been providing technical support to the development of comprehensive approaches, policies, methodologies and metrics for enhancing circular economy. During 2023, technical support was provided to Uruguay for the development of a national strategy on circular economy.

Lessons learned and planned change

21.109 The lesson for the subprogramme was the importance of identifying specific contributions of circular economy both at the national and regional levels to improve the regional level of circularity. In applying the lesson, the subprogramme will adapt its technical support to take into consideration national and regional specificities in the formulation and design of national regulatory and financial instruments for enhancing circular economy.

21.110 Expected progress towards the objective is presented in the performance measure below (see table 21.20).

Table 21.20
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Uruguay adopted a national strategy on circular economy	Two additional countries in the region adopt national regulatory and financial instruments for a circular economy	Two additional countries in the region adopt national regulatory and financial instruments for a circular economy

Deliverables

21.111 Table 21.21 lists all deliverables of the subprogramme.

Table 21.21
Subprogramme 7: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	21	21	21	21
1. Meetings of the General Assembly of Ministers and High-level Authorities of the Housing and Urban Development Sector in Latin America and the Caribbean	6	6	6	6
2. Meetings to strengthen regional cooperation and implementation on topics under the Escazú Agreement	6	6	6	6
3. Sessions of the Conference of the Parties to the Escazú Agreement	9	9	9	9
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	1	1	2
4. On adaptation to climate change and mitigation of its impact; and sustainable cities	1	1	1	2

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
Seminars, workshops and training events (number of days)	8	9	9	9
5. Meetings of experts on policies for sustainable development of human settlements and climate change; climate change mitigation and adaptation; the Conference of the Parties to the United Nations Framework Convention on Climate Change; environmental and urban dimensions of the 2030 Agenda; and experiences in implementing policies related to sustainable development in the region	4	4	4	4
6. Training courses on sustainable development and/or environmental economics; climate change mitigation and adaptation assessment and policies; human settlement issues; and strategies for the implementation of the intended nationally determined contributions	4	5	5	5
Publications (number of publications)	9	9	8	8
7. On topics including climate change, sustainable development, the environmental impact of public policies, instruments for the reduction and control of greenhouse gases, low-carbon and low-emission economies, sustainable recovery policies, urban areas, the circular economy and sustainable consumption and production patterns, the integration of public policies for sustainable development and institution-building, the implementation of the New Urban Agenda with a gender perspective, and greenhouse gas emissions and related public policies	9	9	8	8
C. Substantive deliverables				
Consultation, advice and advocacy: advice to member States, upon request, on environmental public policies related to sustainable development and urban sustainability, risk reduction and adaptation to climate change, and strengthening national capacities.				
Databases and substantive digital materials: inputs for the General Assembly of Ministers and High-level Authorities of the Housing and Urban Development Sector in Latin America and the Caribbean; and databases on sustainable development, climate change and urban issues.				

Subprogramme 8 Natural resources

Objective

- 21.112 The objective, to which this subprogramme contributes, is to improve the governance and enhance the sustainable use and exploitation of natural resources in Latin America and the Caribbean, focusing on water resources management, affordable, inclusive and clean energy, extractive resources efficiency and biodiversity.

Strategy

- 21.113 To contribute to the objective, the subprogramme will:
- (a) Support countries of the region in the design of policies related to the energy transition, including greater participation of renewable sources of energy and increased energy efficiency, and to the water sustainable management transition, helping member States to make progress towards the achievement of Goals 6 and 7;
 - (b) Carry out studies on the governance of fossil and mineral resources (extractive resources), taking into consideration issues and challenges relating to the collection and use of resource rents, material efficiency and decoupling, helping member States to make progress towards the achievement of Goal 12;
 - (c) Provide technical assistance and support multi-stakeholder dialogue, within the framework of more sustainable governance of the extractive industries, focusing on critical minerals for the energy transition to make progress towards the achievement of Goal 13;

- (d) Reinforce the coherence, integration and coordination of national and regional biodiversity policies and provide technical assistance, upon request, to member States on issues related to conservation and sustainable use of biodiversity, helping member States to make progress towards the achievement of Goals 14 and 15.

21.114 The above-mentioned work is expected to result in:

- (a) Improved management of clean and affordable energy and water;
- (b) Better conservation and sustainable use of biodiversity;
- (c) More sustainable extractive industries.

Programme performance in 2023

Towards sustainable lithium exploitation with more added value in member countries of the Permanent Technical Dialogue Forum on Lithium Innovation, Technological Development and Value Addition

21.115 Following the approval by the Permanent Technical Dialogue Forum on Lithium Innovation, Technological Development and Value Addition of the “lithium triangle” countries of its biennial action plan, during 2023 the subprogramme supported implementation of the action plan. Two technical studies were carried out and two virtual technological surveillance workshops were organized, bringing together experts in the extraction, refining and value addition of lithium. In addition, the subprogramme developed a virtual course, attended by technical representatives from the four member countries, and organized three face-to-face workshops and technical tours to field operations related to lithium in Chile, Argentina and the Plurinational State of Bolivia, which provided the opportunity to exchange experiences and technical knowledge.

21.116 Progress towards the objective is presented in the performance measure below (see table 21.22).

Table 21.22
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
Countries of the region proposed the creation of a regional forum on the exploitation of lithium	The Permanent Technical Dialogue Forum on Lithium Innovation, Technological Development and Value Addition of the “lithium triangle” countries was created	Mexico joined the Forum as a member and all four countries participated in the implementation of the biennial action plan

Planned results for 2025

Result 1: countries in the region adopt initiatives aimed at water management transition

Programme performance in 2023 and target for 2025

- 21.117 The subprogramme’s work contributed to the development of one initiative for the adoption of circular economy approaches in wastewater treatment plants, which met the planned target.
- 21.118 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 21.XVI).

Figure 21.XVI
Performance measure: number of initiatives developed by countries in the region to implement more sustainable and inclusive water governance and management systems (cumulative)

Result 2: digitalization in agriculture

Programme performance in 2023 and target for 2025

- 21.119 The subprogramme’s work contributed to two initiatives to support digital agriculture based on low-cost solutions and the coordination of public and private actors, which met the planned target.
- 21.120 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 21.XVII).

Figure 21.XVII
Performance measure: number of initiatives implemented by countries in the region to support digital agriculture based on low-cost solutions and the coordination of public and private actors (cumulative)

Result 3: countries in the region supply critical minerals for the energy transition with increased economic, social and environmental sustainability

Proposed programme plan for 2025

- 21.121 Latin America and the Caribbean has significant levels of reserves and production of minerals critical for the energy transition, such as lithium and copper. The subprogramme has been providing technical support to the countries of the region on topics such as governance, regulatory and fiscal frameworks, and on to how to address socioeconomic and environmental impacts.

Lessons learned and planned change

- 21.122 The lesson for the subprogramme was that technical support for the exchange of experiences and knowledge regarding critical materials among countries of the region could be improved through

comprehensive approaches to the sustainability of the mining industry. In applying the lesson, the subprogramme will promote dialogues, the exchange of experiences and the generation of knowledge, and will support the implementation of policies to promote a more economically, socially and environmentally sustainable supply of critical minerals for the energy transition.

21.123 Expected progress towards the objective is presented in the performance measure below (see figure 21.XVIII).

Figure 21.XVIII

Performance measure: number of new initiatives developed by countries in the region to promote the sustainable supply of critical minerals (cumulative)

Deliverables

21.124 Table 21.23 lists all deliverables of the subprogramme.

Table 21.23

Subprogramme 8: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	3	3	3	2
1. On energy, natural resources governance, the interlinkages between water, energy and food and non-renewable natural resources; water and energy transitions; environmental sustainability; agrifood systems; and bioeconomy, ecosystem-based solutions and biodiversity	3	3	3	2
Seminars, workshops and training events (number of days)	17	17	22	17
2. Meetings of experts on sustainable water and energy management; public policies linked to the governance of natural and extractive resources; environmental sustainability; agrifood systems; digitalization in agriculture and associated value chains; and bioeconomy, ecosystem-based solutions and biodiversity	8	8	10	8
3. Training and courses for public officials on agriculture, bioeconomy, ecosystem-based solutions and biodiversity, water, renewable energy, the management of natural and non-renewable resources and sustainable and inclusive energy transition	9	9	12	9
Publications (number of publications)	9	9	10	6
4. <i>Natural Resources and Development in Latin America and the Caribbean</i>	–	–	1	–
5. <i>The Outlook for Agriculture and Rural Development in the Americas: A Perspective on Latin America and the Caribbean</i>	1	1	–	–

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
6. On issues relating to water resources and the interlinkages with other sectors; energy integration; governance of natural resources and the environment; natural resources and development; extractive industries; environmental sustainability; agrifood systems; bioeconomy, ecosystem-based solutions and biodiversity; and effects of technology and digitalization on agriculture value chains	8	8	9	6
Technical materials (number of materials)	1	1	1	1
7. Bulletin on natural resources for sustainable development in Latin America and the Caribbean	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: advice to member States, upon request, on natural resources, on the design and implementation of policies and strategies for sustainable agricultural and rural development and bioeconomy, and in areas related to water, energy and non-renewable natural resources.				

Subprogramme 9 Planning and public management for development

Objective

- 21.125 The objective, to which this subprogramme contributes, is to enhance planning and public management processes in the region for the advancement of equitable and sustainable development.

Strategy

- 21.126 To contribute to the objective, the subprogramme will:
- (a) Promote the application of new methodologies, instruments and conceptual frameworks to strengthen capacities of government officials in the whole cycle of public management, including foresight, strategic and territorial planning, digital and open government, and monitoring and evaluation of plans and public policies for participatory planning and public management, while fostering high-quality public investment and strong linkages between development and sector-based plans and budgets;
 - (b) Encourage cooperation, peer-to-peer learning, innovation and the sharing of experiences and good practices in planning and public management through the provision of technical cooperation services and training and by conducting applied research, helping countries in the region to make progress towards the achievement of Goals 5, 11, 13, 16 and 17;
 - (c) Enhance regional capacities for building institutional resilience to cope with challenges posed by internal and external crises produced by natural disasters and/or human activities, such as pandemics, climate change impacts, social and political disruption and economic shocks.
- 21.127 The above-mentioned work is expected to result in:
- (a) Effective, inclusive, smart and strategic institutions and planning processes that prioritize comprehensive development through medium- and long-term visions;
 - (b) Reduced structural gaps by enhancing citizens' participation, deliberation and accountability, and the strengthening of territorial governance, planning and management in public policy processes;
 - (c) Strengthened capacities in Latin American and Caribbean institutions to withstand deep disruption and ensure continuity of basic services while enhancing preparedness and responsive, adaptive and transformational institutional capacities, including digital solutions, at both the national and subnational levels.

Programme performance in 2023

Panama develops a proposal for a national strategy for regional development to 2050 to close territorial gaps

- 21.128 Since 2021, the subprogramme has been providing technical assistance to Panama to strengthen national capacities for planning, including the creation of a national planning institute, as well as technical cooperation to support the formulation of a national strategy for territorial development, including the definition of pillars, objectives and strategic lines of action.
- 21.129 Progress towards the objective is presented in the performance measure below (see table 21.24).

Table 21.24
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
Panama established the Territorial Development Directorate in the Ministry of Economy and Finance	The Ministry of Economy and Finance started the development of a national strategy for territorial development	A proposal for a national strategy for territorial development was submitted for the consideration of the President of Panama

Planned results for 2025

Result 1: strengthened foresight capacities in national planning systems

Programme performance in 2023 and target for 2025

- 21.130 The subprogramme’s work contributed to strengthening foresight capacities in the national planning systems of two additional countries, which met the planned target.
- 21.131 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 21.XIX).

Figure 21.XIX
Performance measure: number of countries with strengthened foresight capacities (cumulative)

Result 2: member States develop more efficient, collaborative and participatory public policies

Programme performance in 2023 and target for 2025

- 21.132 The subprogramme’s work contributed to the implementation of participatory planning processes in one additional country, which met the planned target.

21.133 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 21.25).

**Table 21.25
Performance measure**

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Planning authorities gained access to methodologies and lessons learned to move towards facilitating effective and meaningful citizen participation in planning and public management	Planning authorities in Nuevo León, Mexico, made advancements in the co-creation of public policies by government together with civil society As part of a midterm review of the state’s development plan, planning authorities of Guanajuato, Mexico, identified recommendations for improving public participation in future planning processes	Argentina implemented participatory planning processes in Catamarca, Salta and Jujuy Provinces for the sustainable management of mineral resources	One additional country formulates or implements participatory public policies or participatory planning processes	One additional country formulates or implements participatory public policies or participatory planning processes

Result 3: integrated development policies to build more resilient territories to accelerate the implementation of the 2030 Agenda

Proposed programme plan for 2025

21.134 The subprogramme has been supporting countries of the region on issues related to territorial development and planning, and has developed a conceptual and theoretical framework and a toolbox for the elaboration of integrated territorial development policies.

Lessons learned and planned change

21.135 The lesson for the subprogramme was that flexible approaches to address the institutional, economic and social context of each country and territory are important to tailor to the local context the technical assistance delivered by the subprogramme. In applying the lesson, the subprogramme will adopt more flexible and context-based approaches to take into consideration specific institutional, economic and social contexts in the provision of technical assistance for the development of more integrated public policies.

21.136 Expected progress towards the objective is presented in the performance measure below (see table 21.26).

Table 21.26
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	A toolbox for the elaboration of integrated territorial development policies was piloted and applied by Costa Rica, the Dominican Republic and Panama	At least one additional country assesses an integrated approach to territorial development when designing public policies	At least two countries develop integrated development policies at the regional or national levels to build more resilient territories

Deliverables

21.137 Table 21.27 lists all deliverables of the subprogramme.

Table 21.27
Subprogramme 9: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings, per entity/theme)	6	12	6	6
1. Meetings of the Regional Council for Planning	6	6	–	6
2. Meetings of the Presiding Officers of the Regional Council for Planning	–	6	6	–
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	1	1	1
3. On development planning and public management for development	1	1	1	1
Seminars, workshops and training events (number of days)	53	53	53	53
4. Training courses on public management systems and practices, budgeting, evaluation and public investment; foresight and scenario planning techniques; multiscale and territorial governance, planning and management; planning, public value and public administration/management in cross-cutting and emerging issues; and public policies and programmes	50	50	50	50
5. Meetings of experts on foresight and planning; evaluation of public policies and programmes; multiscale and territorial governance; planning and development systems and institutions; and public value, public administration and open government policies	3	3	3	3
Publications (number of publications)	5	5	5	6
6. On planning and public management for development	5	5	5	5
7. Position document for the Regional Council for Planning of the Latin American and Caribbean Institute for Economic and Social Planning	–	–	–	1
Technical materials (number of materials)	1	1	1	1
8. On planning and public management for development	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: advice to member States, upon request, on the strengthening of planning for development systems and institutions and integrated public management systems and practices, public policies and programmes, project formulation and evaluation, national systems for public investment, foresight for development, multilevel governance and planning, mainstreaming of a gender perspective and open government; and on assessing progress towards better planning, budgeting and implementation of government policies.				
Databases and substantive digital materials: Regional Observatory of Planning for Development in Latin America and the Caribbean; technical manuals and software that support training (in situ and e-learning) and technical assistance activities; and databases on planning and public management for development in Latin America and the Caribbean.				

Subprogramme 10 Statistics

Objective

- 21.138 The objective, to which this subprogramme contributes, is to improve the production, dissemination and use of statistics for evidence-based decision-making in the region.

Strategy

- 21.139 To contribute to the objective, the subprogramme will:
- (a) Deliver technical assistance, training courses and seminars related to: the development of basic statistics and institutional coordination mechanisms in areas of national accounts, economic and price statistics; environmental and climate change and disaster risk reduction statistics; poverty and inequality measurement, household survey design and integration of data sources; integration of statistical and geospatial information systems; development of digital platforms and data portals to disseminate official statistics; and national coordination mechanisms for the follow-up and review of the Sustainable Development Goals;
 - (b) Compile and harmonize statistical indicators and geospatial data from selected primary data sources, including household surveys, economic surveys and other non-traditional data sources, to produce regionally relevant economic, environmental and social statistics and indicators;
 - (c) Develop and maintain the ECLAC statistical data portal (CEPALSTAT) and geospatial data portal (CEPALGEO) and other regional statistical dissemination platforms, as well as the *Statistical Yearbook for Latin America and the Caribbean* and other publications;
 - (d) Provide secretariat services to the Statistical Conference of the Americas and its various working groups, ensuring the production of methodological outputs to be presented at the thirteenth meeting of the Conference;
 - (e) Encourage the use of administrative records and non-traditional data sources and the adoption of new methodologies for the integration of different data sources.
- 21.140 The above-mentioned work is expected to result in:
- (a) Production of reliable economic, social and environmental statistics and new indicators in emerging areas and the improvement of non-traditional sources of information;
 - (b) Increased availability of regionally comparable data, required as a benchmark for regional statistical development;
 - (c) Greater regional coordination, leading to increased use of statistics at the regional and national levels;
 - (d) Increased production of geospatial statistics and indicators.

Programme performance in 2023

Interoperable geospatial data platforms within national statistical offices to disseminate official statistics

- 21.141 New geospatial data technologies can enhance the dissemination of official statistics through online platforms, facilitating access to georeferenced statistical data to inform decision-making. The subprogramme supported national statistical offices in the implementation of statistical “geoportals” equipped with tools and functionalities that allow interoperability between statistical and geospatial

databanks using open standards. Through digital maps, national statistical offices were able to disseminate data generated by different sources, such as population and housing censuses, agricultural censuses, household surveys and economic surveys, as well as a wide range of statistical indicators. The technological developments implemented enable interoperability and integration with other layers of geospatial information maintained by public actors and non-governmental sectors at the country level.

21.142 Progress towards the objective is presented in the performance measure below (see figure 21.XX).

Figure 21.XX

Performance measure: number of countries in which national statistical offices implemented statistical geoportals with interoperability and open standards (annual)

Planned results for 2025

Result 1: increased capacities to produce disaggregated Sustainable Development Goal indicators to leave no one behind

Programme performance in 2023 and target for 2025

21.143 The subprogramme’s work contributed to 290 trained practitioners with improved capacity to apply small area estimation techniques, which exceeded the planned target of 70.

21.144 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 21.XXI).

Figure 21.XXI

Performance measure: number of national trained practitioners with improved capacity to apply small area estimation techniques to produce disaggregated statistics (cumulative)

Result 2: improved data collection on prices to better inform policymaking

Programme performance in 2023 and target for 2025

- 21.145 The subprogramme’s work contributed to two additional countries having coordinated consumer price index and International Comparison Program data collection activities, which exceeded the planned target of one.
- 21.146 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 21.XXII).

Figure 21.XXII

Performance measure: number of Latin American and Caribbean countries with coordinated consumer price index and International Comparison Program data collection activities (cumulative)

Result 3: increased implementation of the United Nations Integrated Geospatial Information Framework at the national level

Proposed programme plan for 2025

- 21.147 Geospatial information is increasingly used to inform decision-making and policy formulation. The United Nations Integrated Geospatial Information Framework, developed by the Committee of Experts on Global Geospatial Information Management, provides guidance in matters related to governance, policies, financing, data, innovation, standards, alliances, training and communication of geospatial information. In its capacity as technical secretariat of the Committee of Experts for the region, the subprogramme has been supporting countries in the implementation of the guidelines provided by the Integrated Geospatial Information Framework, delivering workshops and promoting their incorporation into plans and strategies.

Lessons learned and planned change

- 21.148 The lesson for the subprogramme was that countries can benefit from the use of the Integrated Geospatial Information Framework to conduct a national diagnosis and to develop action plans or road maps on geospatial information management. In applying the lesson, the subprogramme will, upon request, support countries of the region in the implementation of the Framework towards the elaboration of effective strategies and plans on geospatial information.
- 21.149 Expected progress towards the objective is presented in the performance measure below (see figure 21.XXIII).

Figure 21.XXIII

Performance measure: number of Latin American and Caribbean countries having taken actions to implement the United Nations Integrated Geospatial Information Framework (cumulative)

Deliverables

21.150 Table 21.28 lists all deliverables of the subprogramme.

Table 21.28

Subprogramme 10: deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies

---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Consultation, advice and advocacy: advice to member States, upon request, on environment, climate change and disaster statistics and indicators; economic statistics; household surveys, poverty, inequality and other social statistics; geospatial information; and follow-up of the 2030 Agenda.

Databases and substantive digital materials: the statistical information system and databases (CEPALSTAT) for 800,000 annual visits; the household survey database (BADEHOG); and the economic survey database (BADECON).

Subprogramme 11 Subregional activities in Central America, Cuba, the Dominican Republic, Haiti and Mexico

Objective

- 21.151 The objective, to which this subprogramme contributes, is to improve the formulation of evidence-based public policies in the economic, social and environmental fields in the countries in the subregion.

Strategy

- 21.152 To contribute to the objective, the subprogramme will support the implementation of national development agendas and strategic reforms towards generating economic and social impacts, and social compacts for equality benefiting those in vulnerable situations in the countries of Central America, Cuba, the Dominican Republic, Haiti and Mexico. Special emphasis will be placed on economic and social development, international trade, industry and integration, agriculture, food security and rural development, energy and natural resources, and climate change, thus helping member States to make progress towards the achievement of Goals 1, 2, 7, 8, 10, 13 and 17. Specifically, the subprogramme will:
- (a) Undertake analytical work to foster the generation, dissemination and implementation of innovative and sound approaches to address the subregion’s development challenges and build national and subregional capacities to formulate more integrated and coherent policies, taking into full consideration the different national contexts in the subregion;
 - (b) Strengthen its multisectoral and interdisciplinary approach by maintaining and updating relevant databases and developing quantitative and qualitative analytical models;
 - (c) Provide training activities, advisory services and fellowships, as well as organize and promote forums in the areas of economic, social and environmental public policies.
- 21.153 The above-mentioned work is expected to result in the design, implementation and evaluation of effective public policies, including those focused on fiscal matters, trade and integration, energy, agriculture, food security, social protection and climate change.

Programme performance in 2023

Public policies for care systems designed in the subregion

- 21.154 The subprogramme has delivered technical assistance to support countries of the subregion in the design of public policies for care systems in view of population ageing and the increased participation of women in the labour market. As part of a multi-year technical assistance programme to Cuba on care and ageing, a workshop and field visits were organized in Mexico for Cuban officials on the design, implementation and evaluation of care systems. As a result, in November 2023 the “Integral system of care for life in Cuba” was presented in the Council of Ministers and to the Human Rights Council. Technical support was also delivered to El Salvador for the elaboration of a public and territorially-

focused strategy to strengthen the integral care system in the metropolitan area of San Salvador, with a gender perspective, including the development of indicators to better monitor the demand for care.

21.155 Progress towards the objective is presented in the performance measure below (see figure 21.XXIV).

Figure 21.XXIV

Performance measure: number of public policy instruments designed for care systems (annual)

Planned results for 2025

Result 1: strengthened technical capacities of national and regional institutions to design better public policies for development focused on the role of the State

Programme performance in 2023 and target for 2025

21.156 The subprogramme’s work contributed to three public institutions strengthening technical capacities to design public policies for development, which met the planned target.

21.157 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 21.XXV).

Figure 21.XXV

Performance measure: number of public institutions with strengthened technical capacity to design public policies for development focused on the role of the State (annual)

Result 2: increased contribution by subregional integration institutions to policy design on economic issues

Programme performance in 2023 and target for 2025

21.158 The subprogramme’s work contributed to one regional integration institution having access to technical knowledge, which met the planned target.

21.159 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 21.29).

Table 21.29
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	Executive Secretariat of the Council of Ministers of Finance of Central America, Panama and the Dominican Republic started developing technical tools on specialized economic issues, such as fiscal policy and public debt	Central American Integration System had access to technical knowledge for the formulation of policy recommendations on paperless cross-border trade	One regional integration institution has installed capacities to formulate national economic forecasts and policy analysis	One regional integration institution organizes technical events to formulate economic policy analysis

Result 3: accelerated implementation of the Sustainable Development Goals by addressing structural gaps

Proposed programme plan for 2025

21.160 To help address structural gaps, the subprogramme has conducted analysis on policies that have an impact on Indigenous people in Mexico; gaps in access to education and health in Guatemala; and the effectiveness of public expenditure and social protection policies in several countries of the subregion.

Lessons learned and planned change

21.161 The lesson for the subprogramme was that for the design of policies, it is important to take into consideration not only the local and territorial dynamics, but also the different elements that have an impact on the poorest and the most vulnerable. In applying the lesson, the subprogramme will work with all relevant institutions and stakeholders in the design and implementation of policies to close structural gaps in order to accelerate implementation of the Sustainable Development Goals.

21.162 Expected progress towards the objective is presented in the performance measure below (see table 21.30).

Table 21.30
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	–	Governments have access to specialized instruments, studies and data on structural gaps	At least one country in the subregion has initiated a process to integrate analysis on structural gaps into its policies

Deliverables

21.163 Table 21.31 lists all deliverables of the subprogramme.

Table 21.31

Subprogramme 11: deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	2	2	1

8. On social indicators	–	–	–	1
C. Substantive deliverables				
Consultation, advice and advocacy: advice to member States, upon request, on macroeconomic and macroprudential policies, the 2030 Agenda, social development issues, sectoral policy, energy and climate change, international trade and integration.				
Databases and substantive digital materials: databases on economic statistics and national accounts, social indicators, the agricultural sector and food security, trade integration, the hydrocarbon and electricity sectors and climate change in the subregion.				

Subprogramme 12 Subregional activities in the Caribbean

Objective

21.164 The objective, to which this subprogramme contributes, is to strengthen the sustainable development process in the Caribbean in the economic, social and environmental dimensions, and to enhance the subregion's cooperation with Latin America.

Strategy

21.165 To contribute to the objective, the subprogramme will:

- (a) Engage ECLAC member States, regional and extraregional entities and other partners in subregional and country-specific initiatives and convene high-level intergovernmental and technical meetings related to the follow-up to global and regional initiatives and conferences,

including the 2030 Agenda and the Goals, and explore and articulate strategies for and approaches towards sustainable development based on applied research and empirical and conceptual frameworks of analysis;

- (b) Support Caribbean countries in the development of evidence-based policies that promote sustainable development, helping member States to make progress towards the achievement of Goals 3, 4, 5, 8, 9, 10, 11, 12, 13, 14, 15 and 17;
- (c) Undertake research and analysis on emerging issues and challenges facing the Caribbean;
- (d) Build the capacities of development practitioners and decision makers in designing and implementing resilience-building measures for sustainable development that are inclusive of the special situation of women and persons with disabilities, in close cooperation with United Nations entities and Caribbean development partners.

21.166 The above-mentioned work is expected to result in:

- (a) Increased effective subregional and regional engagement and consensus, functional cooperation and enhanced political advocacy on issues critical to the development of the Caribbean;
- (b) Advancement of the implementation of national and subregional strategies and programmes.

Programme performance in 2023

Moving towards a free trade agreement between Belize and Mexico

21.167 The subprogramme has delivered technical support to Belize to identify areas of opportunity to increase its exports to Mexico and the economic activity of related economic sectors. In addition to the technical support provided both face-to-face and virtually, the subprogramme developed a dynamic computable general equilibrium model of the goods-producing sectors of the economy of Belize, which is being used by national authorities to better analyse the impact of a possible trade agreement on these specific sectors.

21.168 Progress towards the objective is presented in the performance measure below (see table 21.32).

Table 21.32

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
–	–	Belize used the dynamic computable general equilibrium model to assess and analyse the impact of a free trade agreement with Mexico on the goods-producing sectors of its economy

Planned results for 2025

Result 1: sourcing and leveraging financing for development through innovative instruments and mechanisms

Programme performance in 2023 and target for 2025

21.169 The subprogramme's work contributed to the finalization of the Articles of Agreement for the establishment of the Caribbean Resilience Fund, which did not meet the planned target of one Caribbean country initiating a debt swap/debt restructuring with creditors and/or private investors. The target was not met due to delays in the procedural and governance-related decision-making,

which slowed the consideration and adoption of the Articles of Agreement and progress towards the establishment of the Caribbean Resilience Fund.

21.170 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 21.33).

Table 21.33
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Endorsement of the structure, operation and governance of the Caribbean Resilience Fund by key stakeholders	Agreement on the establishment of the Caribbean Resilience Fund	Articles of Agreement for the establishment of the Caribbean Resilience Fund finalized	At least one additional Caribbean country has initiated a debt swap/debt restructuring with creditors and/or private investors	At least one additional Caribbean country has initiated a debt swap/debt restructuring with creditors and/or private investors

Result 2: gender-sensitive policies on paid and unpaid work in the Caribbean better informed through time-use surveys

Programme performance in 2023 and target for 2025

21.171 The subprogramme’s work contributed to two countries incorporating time-use modules in their labour force surveys, which exceeded the planned target of one country.

21.172 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 21.34).

Table 21.34
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	Dominica, Jamaica and Trinidad and Tobago incorporated time-use modules in their labour force survey and/or population and housing censuses	Grenada and Saint Lucia incorporated time-use modules in their labour force surveys	At least one additional Caribbean country carries out a time-use survey as part of its population and housing census or labour force survey	At least one additional Caribbean country carries out a time-use survey as part of its population and housing census or labour force survey

Result 3: digital inclusion in the Caribbean

Proposed programme plan for 2025

21.173 The subprogramme has been supporting countries of the subregion in their efforts to adopt digital technologies to promote digital inclusion. Recently, the subprogramme organized a workshop on measuring the digital society for digital inclusion.

Lessons learned and planned change

21.174 The lesson for the subprogramme was that technical support delivered to Caribbean countries could contribute to further aligning policies on the digital transformation at the subregional level with

national priorities. In applying the lesson, the subprogramme will increase the generation of synergies between its applied research and the organization of workshops and training activities and provide technical support to countries in the subregion in the development of relevant and specific indicators, including data disaggregated by demographic groups, to inform decision-making and make advances in digital inclusion.

21.175 Expected progress towards the objective is presented in the performance measure below (see table 21.35).

Table 21.35
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Caribbean countries endorsed the need for the development of metrics to facilitate action on digital inclusion	Caribbean countries agree on the subregional priorities and indicators as a mechanism to measure the digital society and advance digital inclusion in the Caribbean	At least one Caribbean country has incorporated the subregional priorities and indicators into its national statistical and data collection framework

Deliverables

21.176 Table 21.36 lists all deliverables of the subprogramme.

Table 21.36
Subprogramme 12: deliverables for the period 2023–2025, by category and subcategory

12. On issues related to economic development, ICT for development, statistics, social development, environmental development, and disaster risk reduction and resilience-building in the Caribbean	4	2	4	4
13. <i>FOCUS</i> magazine	4	3	4	4
C. Substantive deliverables				
Consultation, advice and advocacy: advice to member States, upon request, on ICT for development, economic policies and integration, gender equality and social, population and environmental development, disaster preparedness and risk reduction, and statistics and statistical development.				
Databases and substantive digital materials: database on statistical indicators; and database on science and technology.				
D. Communication deliverables				
Outreach programmes, special events and information materials: <i>The Hummingbird</i> newsletter; and community outreach events.				
External and media relations: news items; media events; and television and radio interviews.				
Digital platforms and multimedia content: ECLAC Caribbean website and social media pages.				
Library services: information requests; library catalogue; interlibrary loans and services; and book displays (virtual).				

Subprogramme 13 Support for regional and subregional integration and cooperation processes and organizations

Objective

- 21.177 The objective, to which this subprogramme contributes, is to enhance regional and subregional integration processes in order to foster their convergence and the participation of the region through common positions in interregional and global political dialogues in support of the 2030 Agenda.

Strategy

- 21.178 To contribute to the objective, the subprogramme will:
- Promote coordination and cooperation among member States and associate members, subregional and regional entities, the resident coordinator system, United Nations agencies, funds and programmes, the private sector, civil society organizations (including the business community), academic institutions, extraregional stakeholders and other third parties through technical, logistical and substantive contributions to subregional and regional initiatives;
 - Support the development of joint regional positions in multilateral forums and global conferences in connection with important events, such as the meetings of the Community of Latin American and Caribbean States, the Central American Integration System, the Southern Common Market, the Pacific Alliance, the Caribbean Community, the Association of Caribbean States, the Organization of Eastern Caribbean States and other integration mechanisms that will report to the Forum of the Countries of Latin America and the Caribbean on Sustainable Development;

- (c) Develop activities to strengthen subregional and regional organizations, by fostering coordination, cooperation, complementarity and synergies, and by supporting political dialogues with multiple stakeholders when the participation of ECLAC is required;
- (d) Foster dialogue and cooperation through South-South, North-South, triangular, bilateral and multilateral cooperation initiatives, and specifically the Regional Conference on South-South Cooperation in Latin America and the Caribbean;
- (e) Support member States in capacity-building, and assessment – including using the ECLAC damage and loss assessment methodology – of the economic, social and environmental impacts of disasters, in line with the priorities of the Sendai Framework for Disaster Risk Reduction 2015–2030;
- (f) Provide technical cooperation and advisory services, upon request, and training activities;
- (g) Promote the sharing of knowledge and experiences to support the achievement of sustainable development, as well as promote discussions on shared targets, mainstreaming a gender perspective and in line with the Caribbean First strategy of the Commission;
- (h) Promote multilateral cooperation, in the context of integration schemes and organizations in the region, and help the region to make progress towards the achievement of the Goals, in particular Goals 16 and 17.

21.179 The above-mentioned work is expected to result in:

- (a) Reduced regional asymmetries and increased South-South and triangular cooperation initiatives, including subregional integration processes and the region's strategic positioning at the global level;
- (b) Common positions of the countries of the region in support of the implementation of the 2030 Agenda.

Programme performance in 2023

A strengthened institutional framework for international cooperation in Ecuador

21.180 Since 2022, the subprogramme has delivered technical support to the Ministry of Foreign Affairs and Human Mobility of Ecuador to strengthen the institutional mechanisms for the management of international cooperation, through the provision of technical analysis and recommendations. This technical support contributed to the elaboration of a proposal to create an agency or a vice-ministry of international cooperation.

21.181 Progress towards the objective is presented in the performance measure below (see table 21.37).

Table 21.37

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	–	A proposal to create an agency or a vice-ministry of international cooperation was presented by the Ministry of Foreign Affairs and Human Mobility to the President of Ecuador for consideration and as input for the preparation of the preliminary draft of the decree to be presented to the National Assembly

Planned results for 2025

Result 1: strong regional and subregional participation of intergovernmental integration schemes and organizations in the region in support of the recovery from the pandemic in line with the 2030 Agenda

Programme performance in 2023 and target for 2025

- 21.182 The subprogramme's work contributed to the participation of 35 regional and subregional intergovernmental integration schemes and organizations in the Forum of the Countries of Latin America and the Caribbean on Sustainable Development, which met the planned target.
- 21.183 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 21.XXVI).

Figure 21.XXVI

Performance measure: number of regional and subregional intergovernmental integration schemes and organizations participating in the Forum of the Countries of Latin America and the Caribbean on Sustainable Development (annual)

Result 2: strengthened South-South cooperation as an instrument of regional integration in line with the 2030 Agenda

Programme performance in 2023 and target for 2025

- 21.184 The subprogramme's work contributed to 14 regional and subregional intergovernmental integration schemes and multilateral organizations participating in the first session of the Regional Conference on South-South Cooperation of Latin America and the Caribbean, which exceeded the planned target of 5.
- 21.185 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 21.XXVII).

Figure 21.XXVII

Performance measure: number of regional and subregional intergovernmental integration schemes and multilateral organizations participating in the meetings of the Regional Conference on South-South Cooperation of Latin America and the Caribbean and those of its Presiding Officers (annual)

Result 3: strengthened multi-stakeholder initiatives in South-South and triangular cooperation

Proposed programme plan for 2025

21.186 During the first session of the Regional Conference on South-South Cooperation in Latin America and the Caribbean, ECLAC member States identified areas for coordination, cooperation and synergies, such as the urgency to address the vulnerabilities that are linked to development challenges, with a renewed agreement for international development cooperation.

Lessons learned and planned change

21.187 The lesson for the subprogramme was that the inclusion of different stakeholders in the discussions contributed to identifying areas for cooperation and joint coordinated work, to align positions and mobilize resources. In applying the lesson, the subprogramme will strengthen civil society and private sector participation in South-South and triangular projects and initiatives.

21.188 Expected progress towards the objective is presented in the performance measure below (see table 21.38).

Table 21.38

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Countries exchanged experiences and discussed challenges for innovative and coordinated work with cooperation agencies, non-governmental actors, the private sector and development banks on cross-cutting regional issues	Countries have access to systematized information on multi-stakeholder South-South cooperation initiatives in which social organizations and the private sector have participated	Countries identify areas of coordination, cooperation and synergies for work with the private sector and civil society

Deliverables

21.189 Table 21.39 lists all deliverables of the subprogramme.

Table 21.39

Subprogramme 13: deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>

^a Includes three temporary posts (1 P-4 and 2 P-3) that were approved pursuant to General Assembly resolution 71/272.

21.191 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 21.43 to 21.45 and figure 21.XXVIII.

21.192 As shown in tables 21.43 (1) and 21.44 (1), the overall resources proposed for 2025 amount to \$63,870,900 before recosting, reflecting a net decrease of \$493,300 (or 0.8 per cent) compared with the approved budget for 2024. Resource changes result from technical adjustments and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Figure 21.XXVIII
Distribution of proposed resources for 2025 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

21.193 As shown in table 21.43 (1), resource changes reflect a decrease of \$475,100 in grants and contributions under programme support, which relates to the removal of non-recurrent requirements for the North Building renovation project at the Economic Commission for Latin America and the Caribbean in Santiago, approved in General Assembly resolution [78/253](#) (sect. XVIII).

Other changes

21.194 As shown in tables 21.43 (1) and 21.44 (1), resource changes reflect a net decrease of \$18,200, as follows:

- (a) **Subprogramme 1, International trade, integration and infrastructure.** The net increase of \$204,100 relates to:
 - (i) The inward redeployment of one post of Senior Economic Affairs Officer (P-5) from subprogramme 3, Macroeconomic policies and growth, as detailed in annex II (increase of \$222,300);
 - (ii) The redeployment of one post of Economic Affairs Officer (P-3) from the liaison office in Washington, D.C., to ECLAC headquarters in Santiago, as detailed in annex II (decrease of \$18,200);
- (b) **Subprogramme 2, Production and innovation.** The increase of \$658,500 relates to the inward redeployment of one post of Senior Economic Affairs Officer (P-5), one post of Economic Affairs Officer (P-4), one post of Economic Affairs Officer (P-3) and one post of Associate Economic Affairs Officer (P-2) from subprogramme 8, Natural resources, as detailed in annex II;
- (c) **Subprogramme 3, Macroeconomic policies and growth.** The decrease of \$222,300 relates to the outward redeployment of one post of Senior Economic Affairs Officer (P-5) to subprogramme 1, International trade, integration and infrastructure, as detailed in annex II;

- (d) **Subprogramme 7, Sustainable development and human settlements.** The net increase of \$25,600 relates to:
- (i) The inward redeployment of one post of Economic Affairs Officer (P-4) from subprogramme 9, Planning and public management for development, as detailed in annex II (increase of \$178,300);
 - (ii) The outward redeployment of one post of Economic Affairs Officer (P-3) to subprogramme 9, Planning and public management for development, as detailed in annex II (decrease of \$152,700);
- (e) **Subprogramme 8, Natural resources.** The decrease of \$658,500 relates to the outward redeployment of one post of Senior Economic Affairs Officer (P-5), one post of Economic Affairs Officer (P-4), one post of Economic Affairs Officer (P-3) and one post of Associate Economic Affairs Officer (P-2) to subprogramme 2, Production and innovation, as detailed in annex II;
- (f) **Subprogramme 9, Planning and public management for development.** The net decrease of \$25,600 relates to:
- (i) The inward redeployment of one post of Economic Affairs Officer (P-3) from subprogramme 7, Sustainable development and human settlements, as detailed in annex II (increase of \$152,700);
 - (ii) The outward redeployment of one post of Economic Affairs Officer (P-4) to subprogramme 7, Sustainable development and human settlements, as detailed in annex II (decrease of \$178,300).

Extrabudgetary resources

- 21.195 As reflected in tables 21.43 (2) and 21.44 (2), extrabudgetary resources amount to \$12,196,900. These resources would complement regular budget resources and would be used mainly to provide for 53 posts (1 D-1, 1 P-3 and 51 Local level) to support activities under the programme of work, such as capacity-building and advisory and technical cooperation services for ECLAC member States and institutions of the region in areas relating to sustainable development and economic, social and environmental matters. In addition, non-post resources would be used for field projects, online and on-site training courses, applied research training and seminars and workshops in cooperation with governmental entities and academic, non-governmental, regional and subregional institutions. The goal of these activities is to foster cooperation, peer-to-peer learning, networking and sharing of best practices at the national, subregional and regional levels.
- 21.196 The extrabudgetary resources under the present section are subject to the oversight of the secretariat of ECLAC, which has delegated authority from the Secretary-General.

Policymaking organs

- 21.197 The resources proposed under this component would provide for the policymaking organs as shown in table 21.46.

(Thousands of United States dollars)

Executive direction and management

21.199 The executive direction and management component comprises the Office of the Executive Secretary, the Programme Planning and Operations Division and the Public Information Unit.

21.200 Executive direction and management, headed by the Executive Secretary, is responsible for the overall direction, supervision and management of ECLAC in the implementation of its mandates and its approved programme of work. The Executive Secretary is assisted by the Deputy Executive Secretary.

21.201 The Office of the Executive Secretary oversees the coordination of regional efforts and progress reports on the implementation of the 2030 Agenda for Sustainable Development, the Sustainable Development Goals and the Addis Ababa Action Agenda, among other relevant intergovernmental agreements across Latin America and the Caribbean. It is also responsible for the report on the Forum

of the Countries of Latin America and the Caribbean on Sustainable Development, convened under the auspices of ECLAC. In addition, it ensures the integration of cross-cutting issues, such as gender mainstreaming, disability inclusion and sustainability, across the Commission's subprogrammes and programme support activities. The Office also harmonizes the ECLAC programme of work with other funds, programmes and specialized agencies of the United Nations system in the region. It includes the Office of the Secretary of the Commission, which handles political relations and protocol with the Governments and authorities of ECLAC member States and provides logistical support for the Commission's intergovernmental meetings.

- 21.202 The Programme Planning and Operations Division provides overall coordination, guidance and advice to the ECLAC subprogramme managers and ECLAC management in drafting the Commission's programme of work and coordinates the reporting on the implementation of its activities. The Division also coordinates the elaboration of the annual proposed programme budget, oversees the execution of the programme of work and reports on the implementation of the ECLAC evaluation plan.
- 21.203 The Public Information Unit works in close coordination with the Department of Global Communications of the Secretariat to conduct public information activities relating to the United Nations system and ECLAC, including organizing press conferences and issuing press releases, producing and disseminating booklets and information kits about the work of ECLAC and the United Nations and conducting campaigns, including through social media.
- 21.204 In accordance with the 2030 Agenda, in particular target 12.6 of the Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), ECLAC has integrated environmental management practices and mainstreamed environmental sustainability initiatives into its operations and management approach. A comprehensive phased environmental plan to further realize longer-term benefits for the sustainable operations of the Commission is foreseen as part of its capital investment plan. ECLAC will continue to strengthen these efforts and align its operations with the strategy for sustainability management in the United Nations system, 2020–2030 ([CEB/2019/1/Add.1](#)), as well as with its host countries' environmental policies.
- 21.205 Information on the timely submission of documentation and advance booking for air travel is reflected in table 21.48. The compliance rate reflects the impact of operational adjustments to provide travel services to the 26 resident coordinator offices and United Nations agencies, funds and programmes in the region, resulting in a significantly increased workload, as well as the challenges associated with the limited availability of connections and flight routes in the region. These factors require an enhanced level of coordination in the travel planning process. ECLAC will monitor the performance of contracted travel agencies and further optimize associated workflows based on lessons learned.

Table 21.48

Compliance rate

(Percentage)

	2021 <i>actual</i>	2022 <i>actual</i>	2023 <i>actual</i>	2024 <i>planned</i>	2025 <i>planned</i>

Air tickets purchased at least two weeks before the commencement of travel	36	36	44	100	100

- 21.206 The proposed regular budget resources for 2025 amount to \$4,075,600 and reflect no change compared with the approved budget for 2024. Additional details on the distribution of the proposed resources for 2025 are reflected in table 21.49 and figure 21.XXX.

Subprogramme 1

International trade, integration and infrastructure

21.207 The proposed regular budget resources for 2025 amount to \$3,816,600 and reflect a net increase of \$204,100 compared with the approved budget for 2024. The proposed change is explained in paragraph 21.194. Additional details on the distribution of the proposed resources for 2025 are reflected in table 21.50 and figure 21.XXXI.

Programme support

21.220 The programme support component comprises the Division of Administration, the Documents and Publications Division, the Human Resources Section, the Library, the Conference Services Unit, and the Project Management Unit, which assists the implementation of the substantive programme of work of ECLAC in the ECLAC headquarters in Santiago; the two ECLAC subregional headquarters, in Mexico City, serving the Central American subregion, and in Port of Spain, serving the Caribbean region; ECLAC national offices in Buenos Aires, Brasília, Bogotá and Montevideo; and the ECLAC liaison office in Washington, D.C.

21.221 The main responsibilities of the programme support component include:

- (a) Conference services, for meetings of ECLAC intergovernmental bodies and special events;

- (b) Documentation and publication services, including planning, editing and translation, text processing, printing and distribution of documents and publications;
- (c) Library services that provide access to resources and information services to both ECLAC staff members and external users;
- (d) Technical cooperation, including the management of activities that complement those funded from the regular budget. This also includes the application of research findings to the provision of advisory services and training activities for the benefit of ECLAC member States;
- (e) Common services related to administration, human resources management, financial management, ICT services and general support.

21.222 The proposed regular budget resources for 2025 amount to \$20,425,700 and reflect a net decrease of \$475,100 compared with the approved budget for 2024. The proposed change is explained in paragraph 21.193. Additional details on the distribution of the proposed resources for 2025 are reflected in table 21.63 and figure 21.XLIV.

Annex I

Organizational structure and post distribution for 2025

Abbreviations: GS (OL), General Service (Other level); LL, Local level; NPO, National Professional Officer; RB, regular budget; USG, Under-Secretary-General; XB, extrabudgetary.

^a Includes the Office of the Secretary of the Commission of the Economic Commission for Latin America and the Caribbean.

^b Includes the ECLAC liaison office in Washington, D.C., and the ECLAC national offices in Buenos Aires, Bogotá, Brasília and Montevideo. Within these offices, seven RB posts (1 P-5, 1 P-4, 1 P-3 and 4 GS (OL)) are part of subprogramme 1, and eight RB posts (1 P-5, 2 P-4, 1 P-3 and 4 LL) are part of subprogramme 3.

^c Redeployment.

Annex II

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 1, International trade, integration and infrastructure	–	P-3	Redeployment (geographical) of one Economic Affairs Officer from the liaison office in Washington, D.C., to Santiago headquarters	The proposed redeployment (geographical) is aimed at strengthening the analysis of the economic prospects, and related data, regarding international trade, in order to enhance the support provided by the Commission to member States towards increased regional integration in Latin America and the Caribbean and greater integration of the region in international trade. The proposed redeployment (geographical) is enabled by the redistribution of functions which the proposed Senior Economic Affairs Officer (P-5) in the ECLAC liaison office would fulfil and expand.
Subprogramme 3, Macroeconomic policies and growth	(1)	P-5	Redeployment of one Senior Economic Affairs Officer	The streamlining and redistribution of functions within subprogramme 3, Macroeconomic policies and growth, would enable the strengthening of the liaison office in Washington, D.C., and would provide additional capacity to strengthen the analysis of the international economic landscape, as well as its related data, to better assess its impact in the countries of Latin America and the Caribbean. The Senior Economic Affairs Officer would also strengthen the role of the ECLAC liaison office with regard to the various international organizations situated in Washington, D.C., enhancing advocacy to address Latin American and Caribbean countries' development needs and challenges.
Subprogramme 1, International trade, integration and infrastructure (liaison office in Washington, D.C.)	1	P-5		
Subprogramme 7, Sustainable development and human settlements	(1)	P-3	Redeployment of one Economic Affairs Officer	The proposed redeployment is aimed at strengthening economic perspectives related to climate change and climate mitigation to increase the resilience of governments (local, regional and national) as part of the support delivered by the Commission to member States through subprogramme 9, Planning and public management for development. The proposed redeployment will enable direct support for the Economic Affairs Officer (P-4) in this growing demand area and is proposed in parallel with the redeployment of that post from subprogramme 9, Planning and public management for development, as explained below.
Subprogramme 9, Planning and public management for development	1	P-3		
Subprogramme 8, Natural resources	(1)	P-5	Redeployment of one Senior Economic Affairs Officer, two Economic Affairs Officers and one Associate Economic Affairs Officer	The proposed redeployments are related to the inclusion of the area of sustainable agriculture in subprogramme 2, Production and innovation, in order to strengthen the support delivered to member States to establish more comprehensive development policies to address the challenges faced by the agricultural sector, in particular the adoption of digital technologies to foster increases in productivity, employment and economic growth. In addition, through the provision of technical assistance, these redeployments would facilitate synergies and complementarities between the agricultural sector and manufacturing industries, generating opportunities for harmonization and coordination of regional policies and institutions. Subprogramme 8, Natural resources,
	(1)	P-4		
	(1)	P-3		
	(1)	P-2/1		
Subprogramme 2, Production and innovation	1	P-5		
	1	P-4		
	1	P-3		
	1	P-2/1		

Part V Regional cooperation for development

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 9, Planning and public management for development	(1)	P-4	Redeployment of Economic Affairs Officer	will include biodiversity in the water and energy subject area, reflecting the association between biodiversity loss and degradation and climate change, and the impact on resources such as water and energy. This adjustment will support more coherent policies for the management of biodiversity, water and energy resources. The management of issues related to the biodiversity area will be absorbed by a redistribution of functions within the energy and water unit in Subprogramme 8, Natural resources.
Subprogramme 7, Sustainable development and human settlements	1	P-4		The proposed redeployment, which is proposed in parallel to the proposed redeployment of one Economic Affairs Officer (P-3), would strengthen the economic perspective on issues related to climate change adaptation and mitigation actions and policies to support online courses delivered by the Latin American and Caribbean Institute for Economic and Social Planning (subprogramme 7, Sustainable development and human settlements) to national officers from member States.

A. Proposed programme plan for 2025 and programme performance for 2023

Overall orientation

Mandates and background

- 22.1 The Economic and Social Commission for Western Asia (ESCWA) is responsible for promoting inclusive and sustainable development in the Arab region. The mandate derives from the priorities established in relevant General Assembly and Economic and Social Council resolutions and decisions, including Council resolution 1818 (LV) establishing the Commission and resolution 1985/69 amending its terms of reference to emphasize its social functions. At the seventh special session of the Commission, member States welcomed the request by Djibouti to join the Commission. The recommendation was endorsed by the Council through its resolution [2023/22](#).
- 22.2 The horizon for implementing the 2030 Agenda for Sustainable Development is fast approaching, yet progress made in achieving its Goals within the region remains uneven. Development gains are jeopardized by: conflict, political instability and social unrest; governance, social and economic challenges; and the impact of the changing climate on ecosystems. At the recent Sustainable Development Goals Summit, member States reiterated their commitment to achieving the Goals, which can be done with support tailored to national development trajectories and priorities. Guided by universal principles and rights, as well as its own mandates, ESCWA is uniquely positioned to leverage its expertise, toolkit and partnerships in support of jointly owned development solutions and outcomes in the Arab region, including for the five Arab least developed countries.

Strategy and external factors for 2025

- 22.3 The Commission's programme of work for 2025 remains aligned with its mandates and centred around: defining evidence-based, novel policy options, underpinned by analysis, and expanding and consolidating its suite of interactive, data-driven modelling and policy simulation tools and knowledge repositories; providing technical advice and enhancing capacities, including through peer-to-peer exchanges and promoting South-South and interregional collaboration; leveraging its convening role to promote inclusive dialogue at the national, subregional and regional levels and forge consensus around viable development solutions; and advocating for whole-of-government and whole-of-society approaches to accelerate progress towards achieving the Goals and reaching their targets, while championing the perspective of the Arab region through a global lens. ESCWA will focus on high-impact interventions, aimed at boosting the potential for delivering results with a multiplier effect and mainstreaming the particular needs of women, young people, older persons and persons with disabilities for more inclusive and equitable development outcomes. Its support will remain tailored to the diverse and specific challenges of least developed and middle-income countries and countries in conflict and will remain aligned with the commitments of the Doha Programme of Action for the Least Developed Countries for the decade 2022–2031.
- 22.4 Thematically, the Commission will focus on such areas as: climate action and the sustainable management of natural resources; the transition to new and renewable sources of energy and sustainable food systems; multidimensional poverty reduction and inclusive social protection; social and gender justice and improved access to labour markets, as part of the commitment to leave no one behind; macroeconomic, fiscal and trade policies, regional integration, competitiveness of the business environment and opportunities for small and medium-sized enterprises; financing for development and sustainable debt management; information technology and statistics as a means of improving the availability and accessibility of evidence and the transparency and accessibility of public institutions; innovation and digital transformation; and governance, the assessment and mitigation of transboundary risks, including conflict, and boosting the effectiveness and efficiency of public administration.

- 22.5 With regard to cooperation with other entities, in addition to sustaining its strategic engagement with intergovernmental organizations, such as the League of Arab States (LAS) and the Organisation for Economic Co-operation and Development (OECD) Development Assistance Committee, and financial institutions, including the Islamic Development Bank (IsDB), the Commission will promote South-South and triangular cooperation and further enhance its outreach to academic institutions and think tanks, including through the established Academic Network for Development Dialogue platform, civil society organizations and the private sector. It will also promote a whole-of-government approach and pursue new partnership opportunities to expand the range of its support to member States, including by securing access to innovation, new technologies and financing.
- 22.6 With regard to inter-agency coordination and liaison, the Commission will continue to implement the Secretary-General's reform agenda, as approved by the General Assembly in its resolution [72/279](#). As co-coordinator of the regional collaborative platform and its subsidiary issue-based coalitions, ESCWA will work with the Development Coordination Office and resident coordinator offices of the United Nations, United Nations country teams, the World Bank, the United Nations Conference on Trade and Development (UNCTAD) and the United Nations Industrial Development Organization, to ensure that any support to member States is relevant, timely and effective and fully aligned with the commitments outlined in national United Nations Sustainable Development Cooperation Frameworks, while avoiding gaps and duplication of interventions.
- 22.7 With regard to external factors, the overall plan for 2025 is based on the following planning assumptions:
- (a) The global, regional and national development and political landscapes remain conducive for ESCWA to provide policy advice and technical support;
 - (b) All Member States remain committed to collaboration on transboundary issues;
 - (c) Development partners remain engaged and interested in joint initiatives and projects;
 - (d) The operational environment is not hindered by safety and security concerns emerging from natural disasters, political and social instability or conflict.
- 22.8 ESCWA integrates a gender perspective in its activities, deliverables and results, as appropriate, including by supporting member States in developing inclusive, gender-sensitive policy frameworks to tackle a wide range of social and economic issues and in enhancing the capacity of national actors and institutions on gender and social justice, as part of the global accountability framework for gender equality, in line with Economic and Social Council resolution [2023/11](#).
- 22.9 In line with the United Nations Disability Inclusion Strategy, ESCWA will continue to make policy recommendations available to member States and advocate in favour of the adoption of national frameworks that promote greater inclusion and empowerment of persons with disabilities, including enhanced access to labour markets and basic social services.
- 22.10 The Commission's programme of work also incorporates the unique needs of young people and older persons, underscoring their inclusion and empowerment as vital conditions for inclusive sustainable development, by enhancing their access to employment opportunities and their understanding of the principles of, and interest in, actively contributing to the implementation of the 2030 Agenda.

Legislative mandates

- 22.11 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme:

General Assembly resolutions

68/196	United Nations Guiding Principles on Alternative Development	78/76	Work of the Special Committee to Investigate Israeli Practices Affecting the Human rights of the Palestinian People and Other Arabs of the Occupied Territories
69/277	Political declaration on strengthening cooperation between the United Nations and regional and subregional organizations	78/77	The occupied Syrian Golan
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development	78/133	Promoting creative economy for sustainable development
70/1	Transforming our world: the 2030 Agenda for Sustainable Development	78/136	International financial system and development
70/204	International Strategy for Disaster Reduction	78/137	External debt sustainability and development
71/313	Work of the Statistical Commission pertaining to the 2030 Agenda for Sustainable Development	78/141	Promoting investments for sustainable development
71/327	The United Nations in global economic governance	78/156	Education for sustainable development in the framework of the 2030 Agenda for Sustainable Development
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system	78/161	Culture and sustainable development
		78/162	Development cooperation with middle-income countries
		78/165	Eradicating rural poverty to implement the 2030 Agenda for Sustainable Development
75/228	Follow-up to the second United Nations Conference on Landlocked Developing Countries	78/166	Operational activities for development of the United Nations system
76/258	Doha Programme of Action for the Least Developed Countries	78/167	South-South cooperation
		78/182	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly
77/189	Inclusive development for and with persons with disabilities		
78/1	Political declaration of the high-level political forum on sustainable development convened under the auspices of the General Assembly	78/203	The right to development
		78/231	Follow-up to and implementation of the outcomes of the International Conferences on Financing for Development
78/11	The Syrian Golan		
78/74	Assistance to Palestine refugees		
78/75	Palestine refugees' properties and their revenues	78/233	Follow-up to the Fifth United Nations Conference on the Least Developed Countries

Economic and Social Council resolutions

1818 (LV)	Establishment of an Economic Commission for Western Asia	2016/10	Economic and Social Commission for Western Asia strategy and plan of action on the 2030 Agenda for Sustainable Development
1985/69	Amendment of the terms of reference of the Economic Commission for Western Asia: change of name of the Commission	2017/7	Work of the Statistical Commission pertaining to the 2030 Agenda for Sustainable Development
2011/5	The role of the United Nations system in implementing the internationally agreed goals and commitments in regard to gender equality and the empowerment of women	2020/5	Strengthening coordination of the statistical programmes in the United Nations system
2014/36	Redesignation of the Technical Committee of the Economic and Social Commission for Western Asia as the Executive Committee and amendment of its terms of reference	2021/3	New strategic vision of the Economic and Social Commission for Western Asia
		2023/14	Creating full and productive employment and decent work for all as a way of overcoming inequalities to accelerate the recovery from the COVID-19 pandemic and the full implementation of the 2030 Agenda for Sustainable Development
2015/10	2020 World Population and Housing Census Programme		

Part V Regional cooperation for development

2023/22	Admission of Djibouti to membership in the Economic and Social Commission for Western Asia	2023/35	Situation of and assistance to Palestinian women
2023/29	Doha Programme of Action for the Least Developed Countries for the decade 2022–2031		
2023/31	Progress in the implementation of General Assembly resolution 75/233 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system		

Economic and Social Commission for Western Asia ministerial declarations and resolutions

Tunis Declaration on Social Justice in the Arab Region (2014)	331 (XXX)	Comprehensive approaches to technical cooperation in response to member States' emerging needs
Doha Declaration on the Implementation of the 2030 Agenda for Sustainable Development (2016)		
Beirut Consensus on Technology for Sustainable Development in the Arab Region (2018)	342 (XXXI)	Adoption of the session reports of the subsidiary bodies of the Economic and Social Commission for Western Asia
Beirut Consensus on Financing for Development (2018)		
Arab Declaration on Progress in Implementation of the Beijing Declaration and Platform for Action after 25 Years (2019)	343 (XXXI)	Proposed programme plan of the Economic and Social Commission for Western Asia for 2025
286 (XXV) Gender statistics for equality and empowerment of women	335 (S-VI)	Programme Plan of the Economic and Social Commission for Western Asia for 2021
296 (XXVI) Enhancing public sector institutions and resources to attain national development goals	337 (S-VII)	Request from Djibouti for membership of the Economic and Social Commission for Western Asia

**Subprogramme 1
Climate change and natural resource sustainability***General Assembly resolutions*

69/283	Sendai Framework for Disaster Risk Reduction 2015–2030	77/334	Follow-up to the United Nations Conference on the Midterm Comprehensive Review of the Implementation of the Objectives of the International Decade for Action, "Water for Sustainable Development", 2018–2028
73/226	Midterm comprehensive review of the implementation of the International Decade for Action "Water for Sustainable Development", 2018–2028		
75/212	United Nations Conference on the Midterm Comprehensive Review of the Implementation of the Objectives of the International Decade for Action, "Water for Sustainable Development", 2018–2028	78/143 78/144 78/149	Oil slick on Lebanese shores Agricultural technology for sustainable development The pivotal role of reliable and stable energy connectivity in driving sustainable development
75/271	Nature knows no borders: transboundary cooperation – a key factor for biodiversity conservation, restoration and sustainable use	78/151	Promoting sustainable consumption and production patterns for the implementation of the 2030 Agenda for Sustainable Development, building on Agenda 21
75/280	International meeting entitled "Stockholm+50: a healthy planet for the prosperity of all – our responsibility, our opportunity"	78/152 78/153	Disaster risk reduction Protection of global climate for present and future generations of humankind
77/282	Building global resilience and promoting sustainable development through regional and interregional infrastructure connectivity	78/154	Implementation of the United Nations Convention to Combat Desertification in Those Countries Experiencing Serious Drought and/or Desertification, Particularly in Africa
77/320	Impact of rapid technological change on the achievement of the Sustainable Development Goals		

Section 22 Economic and social development in Western Asia

78/155	Implementation of the Convention on Biological Diversity and its contribution to sustainable development	78/159	Strengthening cooperation for integrated coastal zone management for achieving sustainable development
78/157	Ensuring access to affordable, reliable, sustainable and modern energy for all	78/168	Agriculture development, food security and nutrition
78/158	Combating sand and dust storms		

Economic and Social Commission for Western Asia resolutions

281 (XXV)	Addressing climate change issues in the Arab region	329 (XXX)	Establishment of the Arab centre for climate change policies in the Arab region
305 (XXVII)	Sustainable development in the region and follow-up and implementation of the decisions of the Rio+20 Conference	339 (S-VII)	Establishment of a centre for advancing carbon emissions reduction under the Commission

11. Report on system-wide annual results	1	1	–	1
12. Report on megatrends (artificial intelligence)	–	–	–	1
C. Substantive deliverables				
Databases and substantive digital materials: the Manara and ESCWA Learn platforms.				
D. Communication deliverables				
Outreach programmes, special events and information materials: newsletters; celebrations of International Women’s Day, International Day of Persons with Disabilities and World Environmental Day; brochures, leaflets, posters, social media assets and other promotional material on ESCWA activities for the Arab Forum for Sustainable Development and the Arab Forum on Equality; and awareness-raising activities with universities and visitors on the work of the United Nations and ESCWA.				
External and media relations: press conferences, interviews and briefings by the Executive Secretary and other senior officials; ESCWA live television broadcasting services; press releases and media coverage on ESCWA activities and meetings; networking with influencers and prominent media figures to increase the visibility of the Commission’s work.				
Digital platforms and multimedia content: videos and other visual content on ESCWA activities and daily ESCWA news on the ESCWA website and social media accounts; ESCWApod (podcast series).				

Evaluation activities

22.13 The following evaluations completed in 2023 have guided the proposed programme plan for 2025:

- (a) Evaluation conducted by ESCWA of its data strategy;
- (b) Independent review of the ESCWA executive management support function.

- 22.14 In response to the results of the evaluations referenced above, ESCWA will enhance its approach to the roll-out of policy simulation tools, by further aligning its information and communications technology functions and strengthening their strategic positioning in the Commission.
- 22.15 The following evaluations, to be conducted by ESCWA, are planned for 2025:
- (a) Evaluation of ESCWA reform and its new operational model;
 - (b) Evaluation of one of the Commission's six subprogrammes.

Programme of work

Subprogramme 1

Climate change and natural resource sustainability

Objective

- 22.16 The objective, to which this subprogramme contributes, is to advance climate action and integrated and sustainable policies in the areas of water, energy and food security.

Strategy

- 22.17 To contribute to the objective, the subprogramme will:
- (a) Deploy in-house expertise and collaborate with experts to analyse and assess the impact of trends and challenges; develop data-driven modelling platforms; and disseminate knowledge products pertaining to such issues as the transboundary management of natural resources (including water, land and soil), biodiversity, extractive industries and the transition to cleaner energy, food security, the transition to a circular economy, climate adaptation and mitigation, pathways to reducing climate vulnerability and financing for climate- and resilience-related interventions;
 - (b) Provide technical and policy advice and expertise to member States and strengthen capacities at the regional, national and sectoral levels to use the evidence and tools to identify and operationalize immediate, medium- and long-term solutions; mainstream climate- and natural resource management-related considerations into national development plans and budgets; and identify opportunities for financing climate change action and adaptation;
 - (c) Convene intergovernmental platforms and technical bodies to facilitate cross-sectoral dialogue, consensus-building and peer-to-peer exchanges between policymakers and practitioners, experts, civil society and other development partners from within and outside the region, in order to promote cooperation and coordination and foster consensus aimed at the development of national, transboundary and regional normative frameworks on: the sustainable management of natural resources; sustainable production and consumption pathways to a circular economy; access to affordable and sustainable sources of energy; and the resilience of individuals and livelihoods;
 - (d) Advocate with national Governments, regional intergovernmental bodies and relevant stakeholders, including through support for integrated, regional reporting and monitoring of progress made with regard to specific Sustainable Development Goal targets; promote joint solutions and harmonization of positions; and leverage partnerships in support of implementation and financing of such commitments;
 - (e) Through the centre for advancing emissions reduction, foster opportunities for regional collaboration to accelerate reduction of emissions and facilitate implementation of the circular

carbon economy as a key component for addressing emissions management towards more sustainable and equitable development.¹

- 22.18 The above-mentioned work is expected to result in:
- (a) The adoption by member States of national policy frameworks and regional agreements related to climate action and natural resources sustainability, reduced emissions, the transition to sustainable energy and resilient food systems supported by sustainable agriculture;
 - (b) Strengthened cooperation on issues outlined in paragraph 22.17, supported by inclusive networks and participatory coordination mechanisms.

Programme performance in 2023

Arab member States are better equipped to access climate finance for water action

- 22.19 Through the midterm comprehensive review of the International Decade for Action, “Water for Sustainable Development”, 2018–2028, climate financing for the water sector was identified as a priority accelerator for the realization of the 2030 Agenda. In response, the subprogramme, jointly with LAS, IsDB, the Green Climate Fund, the Food and Agriculture Organization of the United Nations (FAO) and the Government of Sweden launched the Arab Initiative for Mobilizing Climate Finance for Water. Recognizing the close interlinkages between water and climate change, and the vital role that public finance plays in providing other essential and catalysing resources, the initiative was focused on developing regional capacity to mobilize funding for water action under changing climate conditions. Concurrently, in order to foster understanding among national stakeholders and support access to and the mobilization of climate finance for water for individual member States, the subprogramme analysed climate finance data for water flows and needs in the region.
- 22.20 Progress towards the objective is presented in the performance measure below (see table 22.2).

Table 22.2
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
Shortfall in financing is identified as a key factor impeding progress on water security	Member States identified climate finance for water as a priority accelerator for the Water Action Decade and the 2030 Agenda	5 member States (Egypt, Jordan, Lebanon, Saudi Arabia and Tunisia) presented their water and climate commitments to potential donors and multilateral development banks and climate funds at the Arab Forum for Mobilizing Climate Finance for Water

¹ See ESCWA resolution 339 (S-VII), on the establishment of a centre for advancing carbon emissions reduction under the Commission.

Planned results for 2025

Result 1: increased use of regional knowledge platforms for informed climate action

Programme performance in 2023 and target for 2025

- 22.21 The subprogramme's work contributed to at least 18,894 visits to the regional knowledge platforms and at least 1,321 downloads, which did not meet the planned target of 31,000 visits and 29,000 downloads. Changes made to the governance structures of the platforms in 2023 resulted in limited access to usage data.
- 22.22 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 22.1).

Figure 22.1

Performance measure: number of visits to the regional knowledge platforms and number of downloads (annual)

Result 2: sustainable transition to new and renewable sources of energy underpinned by a transformed extractive industries sector

Programme performance in 2023 and target for 2025

- 22.23 The subprogramme's work contributed to member States having access to knowledge and evidence on the role of minerals and raw materials in supporting the energy transition in the region and to the exchange of expertise and good practices and the coordination of national actions at the regional level through the regional expert group on extractive industries and at the Middle East and North Africa Climate Week 2023, which met the planned target.
- 22.24 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 22.3).

Table 22.3
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Regional group of experts on extractive industries was established	Member States had access to information on extractive industries in the Arab region	Member States gained access to a suite of knowledge products and evidence on the role of minerals and raw materials in supporting the energy transition in the Arab region	Member States formulate national policy frameworks in support of transforming the extractive energy sector with a view towards a transition to affordable, reliable, sustainable and modern energy systems	2 member States implement policy recommendations and best practices for the sustainable production of critical raw materials
	Strategic framework and roadmap for enabling a just, inclusive, equitable and secure transition of the energy sector, based on the circular carbon economy framework, was developed for one member State (Kuwait)	Member States exchanged expertise and good practices and coordinated national actions at the regional level through the regional expert group on extractive industries, as well as a dedicated platform at the Middle East and North Africa Climate Week 2023		

Result 3: transitioning to sustainable food systems

Proposed programme plan for 2025

22.25 Over 50 million people in the region suffer from undernourishment. If no measures are adopted to transition to sustainable production and consumption, this number will grow. Recognizing the importance of sustainable food systems, the Arab Organization for Agricultural Development of LAS committed to developing and adopting a regional food security and agriculture strategy. In 2023, the subprogramme, in collaboration with FAO, developed a regional tool for assessing food security.

Lessons learned and planned change

22.26 The lesson for the subprogramme was that assessing food security alone was insufficient to inform policymaking on equitable access to food and that sustainability of natural resources, such as water and land, and production and consumption patterns were equally critical factors. In applying the lesson, the subprogramme will collaborate with partners on the development of a methodology and tool for comprehensive assessments of food systems and their sustainability, with a focus on outputs and environmental impact. It will also promote the exchange of knowledge and best practices and develop national capacities to apply the tool. The resulting evidence and policy recommendations related to agriculture and food production, including sustainable use of land and water resources, will enable member States to embark on and complete such a transition.

22.27 Expected progress towards the objective is presented in the performance measure below (see table 22.4).

Table 22.4
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
–	–	Member States gained access to a regional tool for assessing food security	1 member State assesses its national food systems	1 member State develops a framework for transitioning to sustainable food systems

Deliverables

22.28 Table 22.5 lists all deliverables of the subprogramme.

Table 22.5
Subprogramme 1: deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies

13. The Centre for advancing emissions reduction	–	–	1	1
14. The Regional Initiative for the Assessment of the Impact of Climate Change on Water Resources and Socio-Economic Vulnerability in the Arab Region (RICCAR)	1	1	1	1
15. The Arab Integrated Water Resources Management Network (AWARENET)	1	1	1	1
16. On increasing the resilience of both displaced persons and host communities to climate change-related water challenges in Jordan and Lebanon	1	1	–	1
17. The Regional Initiative on Water Scarcity for the Near East and North Africa (climate change and groundwater)	–	–	–	1
18. The Mashreq Waters Knowledge Series	1	1	–	1
19. The Regional Initiative for Promoting Small-Scale Renewable Energy Applications in Rural Areas of the Arab Region (REGEND)	1	1	–	1
Seminars, workshops and training events (number of days)	–	2	–	7
20. Seminars and workshops on topics related to climate change and sustainable natural resources management	–	2	–	7
Publications (number of publications)	2	1	1	2
21. On topics related to climate action and sustainable natural resource management	2	1	1	2
Technical materials (number of materials)	6	8	8	7
22. On topics related to climate action and sustainable natural resource management	6	8	8	8

C. Substantive deliverables

Consultation, advice and advocacy: substantive advice and input to standing and ad hoc expert groups on such issues as: the environment; water (security) and groundwater; energy; agriculture, food security, sustainable consumption and production and the circular economy; climate change, energy management and extractive industries.

Databases and substantive digital materials: RICCAR regional knowledge hub on climate change and water; groundwater knowledge platform; e-learning on food systems monitoring frameworks and on REGEND.

D. Communication deliverables

Outreach programmes, special events and information materials: briefs, fact sheets and booklets on topics identified in paragraph 22.17 (a) of the present report; side events at major meetings and global and regional events; and webinars for at least 2,000 stakeholders.

**Subprogramme 2
Gender justice, population and inclusive development**

Objective

- 22.29 The objective, to which this subprogramme contributes, is to achieve equitable and inclusive social development and reduced inequality, poverty and unemployment in line with the principle of leaving no one behind.

Strategy

- 22.30 To contribute to the objective, the subprogramme will:
- (a) Develop knowledge products and policy options and solutions, underpinned by analysis of trends, challenges and international norms, on a wide range of issues pertaining to social

inclusion and protection, social and gender justice; poverty reduction, labour market needs, migration and the socioeconomic participation and empowerment of women, young people, older persons and persons with disabilities, especially those in vulnerable situations;

- (b) Support mandated reviews using global commitments and agreements as benchmarks; provide technical and policy advice; and strengthen national capacities to assess existing policy and legislative frameworks, to identify and operationalize viable legislation and solutions and to mainstream the reduction of inequalities and the equal participation, protection and specific needs of those in vulnerable situations into national development plans and budgets;
- (c) Enhance existing and develop new methodologies and interactive tools for the simulation and analysis of policy options and their impacts on inclusive development trajectories;
- (d) Engage member States and development stakeholders in dialogue to advocate in favour of the adoption of policy solutions and to forge consensus on issues outlined in paragraph 22.30 (a), while promoting South-South collaboration and peer learning.

22.31 The above-mentioned work is expected to result in:

- (a) National policy frameworks and strategies adopted by member States to address structural inequalities and promote social justice and greater social inclusion, socioeconomic empowerment and participation of women, young people, older persons, persons with disabilities and migrants, especially those in vulnerable situations;
- (b) Enhanced coverage of peoples of the region, in particular persons in vulnerable situations, by social protection and poverty eradication programmes and their improved access to decent and equitable employment opportunities.

Programme performance in 2023

Legislation on the care economy boosts gender parity and the economic empowerment of women in Lebanon

22.32 The care economy is crucial for the achievement of social justice, but has not been considered a priority in the region, where labour participation by women remains one of the lowest in the world. This perspective shifted during the coronavirus disease (COVID-19) pandemic, which had a disproportionate impact on caregivers, the majority of whom were women. To support member States, the subprogramme developed country-specific recommendations for the enhancement of legal frameworks, underpinned by best practices and situational analysis. In Lebanon, the subprogramme also engaged with line ministries, which resulted in two new laws anchored in recognition of the care economy as a pillar of the economic empowerment of women. In addition, to raise awareness and elevate the discussion to the regional level, two training workshops were conducted for the relevant subcommittee of the ESCWA Committee on Women.

22.33 Progress towards the objective is presented in the performance measure below (see table 22.6).

Table 22.6

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
Lawmakers in Arab member States gained access to policy recommendations and knowledge on interlinkages between care economies and gender parity	National dialogue on the care economy, gender parity and the economic empowerment of women was established in one member State (Lebanon)	1 member State (Lebanon) developed two new laws, anchored in recognition of the care economy as a pillar of the economic empowerment of women

Planned results for 2025

Result 1: increased effectiveness and efficiency of social protection systems in the Arab region

Programme performance in 2023 and target for 2025

- 22.34 The subprogramme’s work contributed to two member States (Tunisia and Yemen) identifying enhancements required to improve the efficiency and effectiveness of their social protection systems, which met the planned target.
- 22.35 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 22.7).

Table 22.7
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
179 people (66 men and 113 women) from 17 member States were trained on tools to increase the inclusiveness of social protection systems	Civil servants and professionals from three member States (Egypt, Jordan and Mauritania) trained on the social protection programme rapid assessment framework tool to increase inclusiveness of social protection systems	2 member States (Tunisia and Yemen) identified enhancements required to improve the efficiency and effectiveness of their social protection systems	2 member States adopt measures to enhance the efficiency and effectiveness of their social protection systems	2 additional member States adopt measures to enhance the efficiency and effectiveness of their social protection systems
1 member State (Jordan) analysed the inclusiveness of its social protection systems	2 member States (Egypt and Jordan) identified enhancements required to improve the efficiency and effectiveness of their social protection systems, in particular those related to effective coverage of currently excluded groups			

Result 2: skills-focused approaches to boost access to employment opportunities

Programme performance in 2023 and target for 2025

- 22.36 The subprogramme’s work contributed to policymakers in 11 member States (Bahrain, Egypt, Iraq, Jordan, Kuwait, Lebanon, Libya, Oman, Qatar, Saudi Arabia and United Arab Emirates) gaining

access to evidence on factors affecting job markets (skill sets in demand, inclusiveness and other factors), which met the planned target.

22.37 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 22.8).

**Table 22.8
Performance measure**

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Prototype of the artificial intelligence-based skills-to-jobs matching portal was piloted by 1 member State (Qatar)	Working-age populations in 4 member States (Jordan, Kuwait, Lebanon and Qatar) were able to identify job opportunities based on their skills through the artificial intelligence-based Skills Monitor portal	Policymakers in 11 member States gained access to evidence on factors affecting the job market (skillsets in demand, inclusiveness)	At least 10 academic institutions in the Arab region use the Skills Monitor as part of their career-planning support to graduates	2 member States develop policy frameworks aimed at boosting access to labour market

Result 3: member States adopt multidimensional approach to poverty reduction

Proposed programme plan for 2025

22.38 One in four people in the region are living in poverty. To eradicate it, poverty reduction strategies need to go beyond income levels to tackle all of its drivers, including education, employment, health, housing, safety and security. Building on the Multidimensional Poverty Index methodology, the subprogramme developed the Multidimensional Poverty Index Assist Tool, a policy tool that enables States to assess key drivers of poverty and simulate poverty reduction strategies.

Lessons learned and planned change

22.39 The lesson for the subprogramme was that, although some factors affecting poverty levels are regional, a one-size-fits-all approach cannot be applied across all member States, due to variations in the extent to which the different factors affect national poverty levels. In applying the lesson, the subprogramme will engage with relevant ministries in member States and with United Nations country teams to tailor the index to national contexts and enhance their capacity to apply the Assist Tool. It will promote the incorporation of consideration of the specific needs of women, young people, persons with disabilities and older persons into national multidimensional poverty indices. Subsequently, the subprogramme will support member States in using the index and the tool to develop national policy frameworks for reducing poverty in all its forms.

22.40 Expected progress towards the objective is presented in the performance measure below (see table 22.9).

Table 22.9
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
The Multidimensional Poverty Index and Assist Tool were available to member States	1 member State (State of Palestine) piloted a nationalized multidimensional poverty index	2 member States (Iraq and Somalia) adopted a nationalized multidimensional poverty index as a poverty analysis tool	2 additional member States use a nationalized multidimensional poverty index and the Assist Tool to assess drivers of poverty, including inequalities and exclusion	2 member States develop policy frameworks and/or strategies for the eradication of poverty

Deliverables

22.41 Table 22.10 lists all deliverables of the subprogramme.

Table 22.10
Subprogramme 2: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies

14. Multidimensional poverty and social protection	6	5	6	6
15. Migration	4	–	2	2
Publications (number of publications)	10	10	2	3
16. On the realization of human rights for women; social protection; poverty; inequality; the future of work; and migration	10	10	2	3
Technical materials (number of materials)	16	20	22	20
17. On the realization of human rights for women; social protection; poverty; inequality; the future of work; and migration	16	20	22	20

C. Substantive deliverables

Consultation, advice and advocacy: meetings of standing and ad hoc expert groups on violence against women; women and peace and security; economic empowerment of women; social protection; poverty; inequality; fiscal policy; informality and the labour market; the future of work; urban development; disability; migration; ageing and youth; and other related issues.

Databases and substantive digital materials: the social protection programme rapid assessment framework; ESCWA Skills Monitor; and virtual portal on gender justice and equality in law in the Arab region.

D. Communication deliverables

Outreach programmes, special events and information materials: campaign and promotional material and closing ceremony for the 16 Days of Activism against Gender-Based Violence event;^a materials on violence against women; information graphs on key results of publications and expert group meetings; advocacy campaigns on the International Day of Older Persons, International Migrants Day and International Day of Persons with Disabilities.

External and media relations: commentaries on violence against women and on the economic empowerment of women.

^a See General Assembly resolution [77/193](#).

Subprogramme 3 Shared economic prosperity

Objective

- 22.42 The objective, to which this subprogramme contributes, is to achieve equitable economic growth, amplify regional interconnectedness and integration, and advance the effective implementation of the Addis Ababa Action Agenda of the Third International Conference on Financing for Development in support of the 2030 Agenda.

Strategy

- 22.43 To contribute to the objective, the subprogramme will:
- (a) Develop and make available knowledge products and evidence for policymaking related to: trade, logistics and transport, including regional integration; development planning, from a behavioural perspective; economic diversification and macroeconomic stability; debt sustainability and fiscal policies, as a means of enhancing investment in sustainable development priorities; and financing for development, including integrated national financing frameworks, to enhance the efficiency of public spending on national development priorities;
 - (b) Enhance existing and develop new interactive and data-driven policy simulation tools pertaining to trade flows, taxation, debt optimization, social expenditure, the impact of gendered policies on economies, contextualized economic modelling and other related issues; and promote the application of modern technologies (blockchain) to facilitate trade and logistics;

- (c) Make policy advice and technical expertise available to its member States and strengthen capacities to deploy behavioural insights and modelling and impact simulation tools in support of decision-making and policy development processes aimed at providing immediate, medium- and long-term solutions to national development challenges in the areas identified in paragraph 22.43 (a);
- (d) Promote collaboration, coordination and the exchange of good practices; and foster consensus on priorities and joint initiatives aimed at improving regional integration, facilitating trade, promoting innovative debt solutions and securing funding for sustainable development initiatives.

22.44 The above-mentioned work is expected to result in:

- (a) Evidence-backed development planning; member States adopting policy frameworks to tackle structural economic challenges; improved debt management and sustainability; enhanced equity, efficiency and effectiveness of public expenditure; new trade opportunities and economic diversification, including an enhanced operational environment for small and medium-sized enterprises; and the creation of fiscal space for social investment and expanded basic social services;
- (b) Increased contributions by small and medium-sized enterprises to national and regional economies and greater economic participation and empowerment by individuals, including those in vulnerable situations.

Programme performance in 2023

Egypt develops the first Arab integrated national financing strategy

22.45 Following the request by the Government of Egypt for support with developing an integrated national financing strategy, the subprogramme conducted 30 assessments, relying on the Commission’s policy and financing simulation tools. The analysis made it possible to discern financing inequalities, fiscal space constraints and funding shortfalls, which informed inclusive national discussions on opportunities, challenges and innovative approaches to financing national sustainable development commitments. Concurrently, ESCWA tools have been integrated into the guidance for global integrated national financing frameworks and supported “deep-dive” country analyses that enabled member States to define pathways for accelerated implementation of the 2030 Agenda.

22.46 Progress towards the objective is presented in the performance measure below (see table 22.11).

Table 22.11
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
1 member State (Egypt) requested support with the development of its integrated national financing strategy for the Sustainable Development Goals	2 member States (Egypt and Jordan) gained access to in-depth assessments of national development financing tools	1 member State (Egypt) developed the first integrated national financing strategy in the region

Planned results for 2025

Result 1: improved effectiveness of economic policies from a gender perspective

Programme performance in 2023 and target for 2025

- 22.47 The subprogramme’s work contributed to one member State (United Arab Emirates) strengthening its Global Gender Gap Index ranking from 120th to 68th position, which met the planned target.
- 22.48 In addition, the subprogramme contributed to one member State (Morocco) increasing its Index score from 0.598 to 0.624.
- 22.49 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 22.12).

Table 22.12
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Global Gender Gap Index scores of member States ranged between 0.492 and 0.716, compared with the global score of 0.677	2 member States (Morocco and United Arab Emirates) developed new policies to improve the economic participation of women	1 member State (United Arab Emirates) improved its Global Gender Gap Index ranking	Arab policymakers have access to a tool and the capacity deploy it to simulate the broader impact of policies geared towards gender equality on national economies	Improved Global Gender Gap Index score of 1 additional member State

Result 2: contextualized economic modelling informs development of economic, social and trade policies

Programme performance in 2023 and target for 2025

- 22.50 The subprogramme’s work contributed to three member States (Mauritania, Oman and United Arab Emirates) applying computable general equilibrium models, which did not meet the planned target of four additional member States using those models. The target was not met because the subprogramme’s work in support of the fourth member State was slower than expected, due to the worsening security situation.
- 22.51 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 22.13).

Table 22.13
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Pilot web-based computable general equilibrium model used by Jordan	2 member States (State of Palestine and Yemen) used national computable general equilibrium models	Three additional member States (Mauritania, Oman and United Arab Emirates) used computable general equilibrium models	Three additional member States use computable general equilibrium models	Two additional member States use computable general equilibrium models

Result 3: enhanced debt sustainability for increased investment in sustainable development priorities

Proposed programme plan for 2025

22.52 The COVID-19 pandemic, global inflationary pressures, rising interest rates and geopolitical uncertainty further exacerbated gaps in resources available for development priorities and debt sustainability. Public debt in the Arab region increased sharply over the past decade, to nearly half the regional gross domestic product, exerting significant fiscal stress on both Arab middle-income countries and the Arab least developed countries. The subprogramme has supported member States in the design and operationalization of debt swap for climate action and in the achievement of the Sustainable Development Goals and debt optimization initiatives.

Lessons learned and planned change

22.53 The lesson learned for the subprogramme was that the support provided to member States must be tailored to national financial structures and processes and must promote knowledge-sharing and peer-learning among practitioners. In applying the lesson, the subprogramme will further enhance its suite of knowledge products and develop standardized tools, contextualized to national needs, for sustainable debt management and optimization. It will also enhance capacities to deploy tools and make platforms available for peer-to-peer exchanges within the region and beyond.

22.54 Expected progress towards the objective is presented in the performance measure below (see table 22.14).

Table 22.14
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Member States gained access to regional tools for monitoring innovative financing solutions and improving debt sustainability	A regional network of debt management practitioners and experts was established	Member States gained access to regional and country-specific analyses on debt optimization and innovative debt solutions	2 member States have access and capacity to deploy the tool to optimize debt and identify innovative and sustainable debt financing strategies	2 member States develop innovative and sustainable debt financing strategies

Deliverables

22.55 Table 22.15 lists all deliverables of the subprogramme.

Table 22.15
Subprogramme 3: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned

Seminars, workshops and training events (number of days)	–	–	8	8
12. Seminars and workshops on transport and logistics, economic modelling and the use of policy simulators	–	–	8	8
Publications (number of publications)	2	2	2	1
13. On issues related to economic development	2	1	2	1
Technical materials (number of materials)	20	20	22	20
14. On public finance and inclusive fiscal policy, including in low- and middle-income countries; trade and industrial policy; trade facilitation; transport connectivity and logistics; the productive capacity of Arab least developed countries; illicit financial flows; financing for development and climate action	20	20	22	20
C. Substantive deliverables				
Consultation, advice and advocacy: consultations of expert groups on public finance and inclusive fiscal policy, including in low- and middle-income countries; trade and industrial policy; trade facilitation; transport connectivity and logistics; productive capacity of Arab least developed countries; illicit financial flows; financing for development and climate action; and strategic advice to the United Nations Road Safety Fund Steering Committee.				
Databases and substantive digital materials: the Arab Trade Gateway; a Sustainable Development Goals financing resources knowledge portal; a financing for development gateway and data analytics; a Sustainable Development Goal costing calculator for the Arab region; a dynamic financing for development simulator; national computable general equilibrium models; and a social expenditure monitor tool.				
D. Communication deliverables				
Outreach programmes, special events and information materials: side event at the Arab Forum for Sustainable Development.				

Subprogramme 4 Statistics, the information society and technology

Objective

- 22.56 The objective, to which this subprogramme contributes, is to strengthen the development of official statistical frameworks, improve the quality and availability of statistics and advance the information society by accelerating the integration of technology and innovation for sustainable development in the Arab region.

Strategy

- 22.57 To contribute to the objective, the subprogramme will:
- (a) Enhance the capacity of national statistical offices for the implementation of and adaptation to evolving international statistical standards, methodologies and best practices; and promote the complementary use of innovative data sources and geostatistical data;
 - (b) Provide policymakers and practitioners in member States with policy recommendations, underpinned by analysis of challenges and opportunities stemming from the emergence of technologies pertinent to modernizing statistical systems, enhancing digital government and e-accessibility and accelerating inclusive digital transformation;
 - (c) Enhance national capacities to produce and use quality statistics and data, including gender and disability statistics, for evidence-based policymaking related to social and economic development, technology and innovation and digital transformation; and provide technical expertise in support of the adoption of policy frameworks, statistical methodologies and strategies to harness emerging technologies and innovative solutions for sustainable development, in line with national plans and priorities;
 - (d) Convene intergovernmental and technical forums to foster consensus and facilitate dialogue and exchanges between policymakers and practitioners, experts, civil society, the private sector and other stakeholders, in order to incentivize investments in data and technology and promote cooperation, partnerships and coordination so as to increase value created from statistic, geospatially enabled data, digitization and emerging technologies, in support of the 2030 Agenda.
- 22.58 The above-mentioned work is expected to result in:
- (a) Improved availability of official statistics, compliant with international statistical principles, and of geospatially and location-enabled non-traditional data, as well as Sustainable Development Goal data, and their use by member States and development partners for evidence-based decision-making and policymaking;
 - (b) ESCWA member States adopting sound national and regional policy frameworks and deploying emerging technologies and innovation for digital transformation, digital accessibility, enhanced engagement by public institutions and citizens in decision-making, thereby enabling socioeconomic development.

Programme performance in 2023

Arab member States adopt a harmonized consumer price index

- 22.59 While national consumer price indices do not account for inflation trends and fluctuations in the cost of goods and services at the subregional and regional levels, those trends and fluctuations are equally important for economic integration and trade. The subprogramme developed a harmonized consumer price index based on a uniform basket of goods and services, aimed at facilitating cross-border comparisons of inflation and ensuring consistency in assessments of regional and subregional economic convergence. In addition to providing vital evidence for domestic macroeconomic policies, the index was designed to promote Arab-wide policy decisions, in particular those related to trade and cross-border economies. Subsequently, the subprogramme developed a tool for the establishment of national indices and built the capacity of national statistical offices to use it. Concurrently, a regional index was made available to the 10 member States that are also members of the Gulf Cooperation Council, along with indices for Council and non-Council subregions.
- 22.60 Progress towards the objective is presented in the performance measure below (see table 22.16).

Table 22.16
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
Standardized methodology for cross-border and regional comparisons of inflation and consistent assessments of consumer prices (harmonized consumer price index) was developed	The index was piloted in 6 member States (Egypt, Iraq, Jordan, Morocco, State of Palestine and Sudan)	10 member States (Bahrain, Egypt, Iraq, Jordan, Kuwait, Morocco, Oman, Qatar, State of Palestine and Sudan) use the index to support evidence-based decision-making and policymaking in relation to national and cross-border economies and trade

Planned results for 2025

Result 1: advancement of digital development assessments and strategies at the national and regional levels in the Arab region

Programme performance in 2023 and target for 2025

- 22.61 The subprogramme’s work contributed to two additional member States (Algeria and Egypt) completing biennial national digital development reviews, for a total of 12 member States having undertaken such reviews, and to one additional member State (State of Palestine) developing a national digital development strategy, which met the planned target.
- 22.62 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 22.II).

Figure 22.II

Performance measure: number of member States having undertaken biennial national digital development reviews and designed digital development strategies (cumulative)

Result 2: Arab policymakers gain access to on-demand, reliable evidence enabled by artificial intelligence and geospatial capacities

Programme performance in 2023 and target for 2025

- 22.63 The subprogramme’s work contributed to the launch of the United Nations Arab Region Data and Policy Support Hub,² which met the planned target.

² Available at <https://data.as-rcp.org>.

22.64 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 22.17).

Table 22.17
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Member States gained access to 8 interactive policy simulation tools	Member States gained access to additional national, regional and global (statistical and non-statistical) data sets	Member States gained access to a centralized regional data management and analytics platform (United Nations Arab Region Data and Policy Support Hub)	Member States generate evidence and simulate policy options and related impacts through at least 5 artificial intelligence- and geospatial-enabled interactive tools	Member States have access to national data and policy dashboards through a one-stop shop for evidence-based policymaking

Result 3: geostatistical evidence enhances decision-making and development planning in the Arab region

Proposed programme plan for 2025

22.65 Leaving no one behind requires data on the “what”, the “when” and the “where”. Statistical data tend to address the “what” and the “when”. Geospatial data address the “where”. To better target policies and development plans, decision-makers require access to evidence that is granular enough to highlight location-specific needs and challenges. In response, national statistical offices in the region began to transition from national to district and city statistics, but few have access to or the capacity to use modern technologies, including satellite imagery and Earth observation. To address that gap, the subprogramme operationalized a geostatistical laboratory to consolidate and extend geostatistical information, available through open data sources, for synthesis, analysis and visualization of statistics.

Lessons learned and planned change

22.66 The lesson for the subprogramme was that enhancing the available statistical data with geostatistical information would enhance member States’ ability to develop targeted and localized development solutions. In applying the lesson, the subprogramme will collate and reconcile various layers of geostatistical information and make it available through a smart search engine, leveraging machine learning and enabling multidimensional analysis of indicators related to society, the economy and the environment. Concurrently, the subprogramme will build the capacity of national statistical offices to use the geospatial data sets for the production and dissemination of enhanced evidence for policymaking and development planning in the region.

22.67 Expected progress towards the objective is presented in the performance measure below (see table 22.18).

Table 22.18
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	Geostatistical laboratory for the Arab region was established	All member States gained access to an initial 12 layers of geostatistical information 2 member States (Jordan and Lebanon) initiated pilot projects to enhance their statistical data sets with geospatial information	All member States have access to an additional 12 layers of geostatistical information, in particular those related to climate and environment	2 national statistical offices in the Arab region produce geostatistical datasets

Deliverables

22.68 Table 22.19 lists all deliverables of the subprogramme.

Table 22.19
Subprogramme 4: deliverables for the period 2023–2025, by category and subcategory

Publications (number of publications)	4	4	2	3
13. On statistics and indicators; non-traditional data sources; national accounts; monitoring of and follow-up on the 2030 Agenda; digital development; and technology and innovation for sustainable development	4	4	2	3
Technical materials (number of materials)	7	13	6	6
14. On statistics and indicators; non-traditional data sources; national accounts; monitoring of and follow-up on the 2030 Agenda; digital development; and technology and innovation for sustainable development	6	12	6	6
15. Development and testing of a methodology to identify clear and accurate baselines for national targets and relevant indicators	1	1	–	–
C. Substantive deliverables				
Consultation, advice and advocacy: meetings of experts on digital development; regulation and legislation to promote the information society; Internet governance; frontier technologies; entrepreneurship; technology transfer; innovation; and other issues related to technology for development.				
Databases and substantive digital materials: ESCWA Online Statistical Information System, ESCWA data portal; Sustainable Development Goals database; country profiles; and ESCWA data ecosystem.				
D. Communication deliverables				
Outreach programmes, special events and information materials: an annual statistics newsletter; and a technology bulletin.				

Subprogramme 5 2030 Agenda and SDG coordination

Objective

- 22.69 The objective, to which this subprogramme contributes, is to accelerate progress towards sustainable development in the Arab region in line with the 2030 Agenda and to advance intraregional collaboration and a multi-stakeholder approach to key regional and subregional sustainable development issues.

Strategy

- 22.70 To contribute to the objective, the subprogramme will:
- (a) Advocate in favour of the principles of the 2030 Agenda, in particular the commitment to leave no one behind and the people-centred approach to development; and leverage partnerships with the private sector (including financial institutions), intergovernmental and non-governmental organizations, civil society and academic institutions and think tanks, to promote a whole-of-government and whole-of-society approach;
 - (b) Develop and disseminate knowledge products, underpinned by the analysis of member States' progress towards the implementation of the 2030 Agenda and its principles, and promote

transformative development solutions for accelerating inclusive sustainable development in the region;

- (c) Convene, and ensure ongoing support for and follow-up on, various platforms, in connection with the Arab Forum for Sustainable Development, in order to facilitate multi-stakeholder engagement and dialogue and peer-to-peer exchanges, foster consensus on sustainable development priorities and actions, promote sub-, inter- and intraregional (South-South) and triangular collaboration and coordination and support cross-sectoral cooperation and alignment of national development priorities and plans with both the 2030 Agenda and the resources available for their implementation;
- (d) Enhance capacities to conduct integrated monitoring and reporting, at the local, national and regional levels, of the progress made on specific Sustainable Development Goal targets, including by building national and institutional capacity to conduct voluntary national reviews; compile and disseminate policy recommendations; ensure that the region's perspective is reflected through the global lens; and foster cross-sectoral coordination of the Commission's support for member States' efforts to achieve the Goals.

22.71 The above-mentioned work is expected to result in:

- (a) An enhanced commitment to the principles of the 2030 Agenda by policymakers and practitioners, regional intergovernmental organizations, the private sector (including financial institutions), academic institutions and think tanks and civil society organizations in the Arab region;
- (b) The adoption by member States and development stakeholders of a more participatory, whole-of-government and whole-of-society approach to the realization of and follow-up on Sustainable Development Goal priorities and related actions;
- (c) The improved utilization by member States and development stakeholders of available dialogue and advocacy platforms as a means of promoting consensus, peer-to-peer learning and coordination at the national, sub-, intra- and interregional and global levels and of mobilizing sustained, targeted financing for the accelerated implementation of the 2030 Agenda.

Programme performance in 2023

Investment opportunities for catalysing progress on the Sustainable Development Goals to 2030

22.72 In preparation for the 2023 Sustainable Development Goals Summit, all Member States were urged to submit national commitments to catalyse the timely achievement of the Goals. To support ESCWA member States in this endeavour, the subprogramme prepared deep-dive analysis reports for three countries (Egypt, Jordan and Oman). The reports contained summaries of progress achieved to date, simulations of the costs of achieving the Goals according to national priorities and the estimated funding that could be secured through a menu of policy reforms, including tax reforms, trade policies, social spending efficiencies and improvements to the business environment. Taking into consideration interlinkages among the Goals, the subprogramme coordinated inputs across ESCWA to propose, for each of the three countries, investment opportunities that will have multiplier effects on the achievement of the Goals and, by extension, will result in spending efficiencies that can be used to finance other development initiatives. The subprogramme also worked with the relevant United Nations country teams to support the formulation of national Summit commitments.

22.73 Progress towards the objective is presented in the performance measure below (see table 22.20).

Table 22.20
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	–	2 member States (Egypt and Jordan) delivered on their national commitments to catalyse the achievement of the Sustainable Development Goals by 2030 1 additional member State (Oman) benefited from foresight analysis and support to identify investment opportunities for catalysing progress on the Goals

Planned results for 2025

Result 1: improved voluntary national review process through formalized intraregional and interregional peer learning

Programme performance in 2023 and target for 2025

- 22.74 The subprogramme’s work contributed to two additional member States (State of Palestine and Yemen) benefiting from peer learning in the context of voluntary national reviews, which met the planned target.
- 22.75 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 22.21).

Table 22.21
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Member States benefit from the first peer-learning activity on methodological issues of reporting on the 2030 Agenda	2 member States (Oman and Syrian Arab Republic) engaged in a twinning exercise (pilot voluntary national review peer-learning initiative) to discuss solutions to challenges and identify best practices throughout the voluntary national review process	2 additional member States (State of Palestine and Yemen) benefited from peer-learning approaches to voluntary national reviews (twinning and issue-based focus groups)	2 more member States apply voluntary national reviews peer-learning approaches (twinning and issue-based focus groups)	All member States exchange best practices on conducting voluntary national reviews from within and outside the region

Result 2: university graduates play part in a whole-of-society, principled approach to achieving the Sustainable Development Goals

Programme performance in 2023 and target for 2025

- 22.76 The subprogramme’s work contributed to the Artificial Intelligence, Data Science and Computing Hub at the American University of Beirut in Lebanon committing to incorporating the shared principles and commitments of the Sustainable Development Goals into its programmes, which met the planned target.
- 22.77 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 22.22).

Table 22.22
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Systematic dialogue between ESCWA and academia was established, promoting academic institutions’ participation in Sustainable Development Goal-related discussions	Goal-focused research by Arab academic institutions contributed to regional and national dialogues on implementing the 2030 Agenda	1 university faculty in a member State (the Artificial Intelligence, Data Science and Computing Hub at the American University of Beirut in Lebanon) committed to incorporating the shared principles and commitments of the Goals into its programmes	2 academic institutions in the Arab region incorporate the shared principles and commitments of the Goals into their programmes	Academic institutions in at least 4 member States use <i>The ESCWA Stories</i> series to promote the principles of the 2030 Agenda among young people

Result 3: increased private sector investment in regional and national sustainable development priorities

Proposed programme plan for 2025

- 22.78 Private sector engagement in development initiatives within the Arab region remains limited and uncoordinated. The subprogramme analysed opportunities for and organized dialogue on enhancing the role of the private sector in delivering on the Sustainable Development Goals in the region. It also provided technical support to the Union of Arab Banks on its commitment to mobilize up to \$1 trillion in Goal-related financing by 2030.

Lessons learned and planned change

- 22.79 The lesson for the subprogramme was that, in order to secure scaled-up private sector investments in regional and national sustainable development priorities, increased dialogue between member States and the private sector is required, to enhance the alignment of private sector governance models, operating practices and disclosure requirements with sustainable development objectives. In applying the lesson, the subprogramme will support member States in establishing a regional dialogue with private sector leaders, through the formation of a coalition of Arab business leaders for sustainable development and engagement with the Union of Arab Banks, to promote consensus on investable sustainable development priorities and on modalities under which the private sector could contribute to those priorities. Having secured a regional-level commitment, the subprogramme

will facilitate such dialogues at the country level, with the aim of boosting resources available for the acceleration of progress made on identified national Sustainable Development Goal priorities.

22.80 Expected progress towards the objective is presented in the performance measure below (see table 22.23).

Table 22.23

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	The Union of Arab Banks committed to mobilizing up to \$1 trillion in Sustainable Development Goal-related financing by 2030	Member States and private sector leaders engage in a regional dialogue on support for and financing of Goal priorities	1 member State and private sector representatives jointly agree on a set of sustainable development priorities for private sector contributions

Deliverables

22.81 Table 22.24 lists all deliverables of the subprogramme.

Table 22.24

Databases and substantive digital materials: SDG Knowledge and Learning platform.				

Subprogramme 6

Governance and conflict prevention

Objective

- 22.82 The objective, to which this subprogramme contributes, is to advance just, peaceful and inclusive societies, especially for people living under occupation or in conflict or post-conflict settings; to improve governance and strengthen effective, efficient and accountable public institutions; and to enhance service delivery.

Strategy

- 22.83 To contribute to the objective, the subprogramme will:
- (a) Develop and make available evidence and policy recommendations to member States and relevant stakeholders aimed at addressing challenges and using opportunities to accelerate human development and focused on: mitigating the impact of conflict and occupation on the capacity to achieve the Sustainable Development Goals and transboundary risks; improving governance and institutional capacities to deliver basic services and respond to shocks; strengthening regional cooperation on governance and public administration; and boosting the competitiveness of the business environment, including consumer protection mechanisms;
 - (b) Provide technical expertise, methodologies and tools and enhance capacities to identify and operationalize immediate, medium- and long-term solutions, aimed at: lowering risks associated with emerging socioeconomic, environmental and governance challenges and potential shocks; enhancing risk-informed national policymaking and development planning, as well as the transparency, accessibility and efficiency of State-run services; and improving the effectiveness of competition and consumer protection;
 - (c) Foster consensus on the priorities and actions required to minimize the impact of conflict and any risks and sudden shocks, inter alia, on the ability of member States to advance their national development agendas;
 - (d) Support the five Arab least developed countries, within the framework of the Doha Programme of Action for 2022–2031, in enhancing their institutional capacities for achieving the 2030 Agenda and graduating from the least developed country category;
 - (e) Enhance the capabilities of Palestinian institutions to mitigate the impact of the Israeli occupation on service delivery and social and economic development, including decreasing the asymmetric dependency of the Palestinian economy.
- 22.84 The above-mentioned work is expected to result in:
- (a) Improved understanding and prevention of development challenges and risks, including conflict, and mitigation of their impact on national development trajectories;
 - (b) More effective public institutions, in particular in the five Arab least developed countries, and their enhanced ability to deliver basic services in a manner that is transparent, accessible and inclusive;
 - (c) The operationalization of a contextualized, people-centred approach to development planning and policymaking;
 - (d) A more competitive business environment and more effective consumer protection.

Programme performance in 2023

Risk-informed policymaking and development planning in Libya

- 22.85 Despite the multidimensional crises affecting many Arab States, institutional mechanisms for risk prevention and management are weak or inexistant. In 2021, nine member States (Iraq, Jordan, Lebanon, Libya, State of Palestine, Somalia, Sudan, Syrian Arab Republic and Yemen) requested that the subprogramme, in cooperation with LAS,³ enhance national capacities for risk-informed policymaking and reporting. In response, the subprogramme developed a conceptual framework for quantifying risk and established an Arab risk monitor, through which the drivers of high vulnerability and low resilience are identified, which are now available to member States. In addition, the subprogramme designed a risk-informed policymaking training module, which was rolled out to civil servants in Libya, resulting in the establishment of a national risk team and the operationalization of a proactive approach to addressing current challenges and to improving resilience to shocks, as an inherent part of national policymaking and development planning processes.
- 22.86 Progress towards the objective is presented in the performance measure below (see table 22.25).

Table 22.25
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
9 member States (Iraq, Jordan, Lebanon, Libya, State of Palestine, Somalia, Sudan, Syrian Arab Republic and Yemen) requested support to enhance their capacity in risk-informed policymaking and development planning	Member States gained access to the ESCWA Arab risk monitor to identify drivers of high vulnerability and low resilience	1 member State (Libya) established a national risk team and operationalized a proactive and risk-informed approach in its national policymaking and development planning to address current challenges and improve resilience to shocks

Planned results for 2025

Result 1: policymakers determine development challenges at the national level

Programme performance in 2023 and target for 2025

- 22.87 The subprogramme’s work contributed to three member States (Egypt, Lebanon and Yemen) applying the development challenges index methodology to conduct national assessments and producing national human development challenges reports, which met the planned target.
- 22.88 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 22.26).

³ The subcommittee to support the attainment of the Sustainable Development Goals in Arab countries affected by conflict is a subsidiary body of the LAS Committee on Sustainable Development.

Table 22.26
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Countries used global indices, such as the human development index, to evaluate the effectiveness of their national development plans	Member States gained access to a toolkit that made it possible to assess the impact of improvements in specific dimensions and indicators on overall performance on the global development challenges index and a tool that allowed them to design and tailor their own national development challenges indices	3 member States (Egypt, Lebanon and Yemen) developed national assessments and national human development challenges reports, on the basis of findings from the global development challenges index	Civil servants in at least 3 member States use national development challenges indices and integrate those indices into national development planning processes	Member States have access to regional assessments of transformational growth challenges to development

Result 2: improved consumer protection in the Arab region

Programme performance in 2023 and target for 2025

- 22.89 The subprogramme’s work contributed to the publication of *The Arab Business Legislative Frameworks* report series and online country profiles, in which recommendations are outlined for improving national consumer protection frameworks, which met the planned target. In addition, member States gained access to the Arab Legislation Portal, comprising information on existing consumer protection laws and regulations.
- 22.90 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 22.27).

Table 22.27
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Second Joint ESCWA–UNCTAD–OECD Competition Forum for the Arab Region was attended by 16 member States	All 20 Arab member States participated in the third Competition Forum for the Arab Region	Arab policymakers gained access to recommendations on how to improve national consumer protection frameworks	Member States exchange knowledge and good practices on consumer protection	1 additional member State establishes or reforms its consumer protection laws or enforcement procedures
3 member States (Kuwait, Oman and Saudi Arabia) implemented new legislation on competition	1 member State (Lebanon) introduced competition legislation and one additional member State (Kuwait) introduced further legislation on competition	Arab member States gained access to the Arab Legislation Portal, comprising information on existing consumer protection laws and regulations	2 member States establish or reform their consumer protection laws	

Section 22 Economic and social development in Western Asia

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
	1 member State (Oman) expanded its dedicated competition authority			

Result 3: modernization of public administration systems for effective and transparent public governance and socioeconomic development

Proposed programme plan for 2025

22.91 The region continues to face numerous complex and systemic challenges in terms of public governance, with significant opportunities for building institutional resilience and improving the effectiveness of public administration and of reform and development plans. The subprogramme’s normative and capacity-building activities to date have been focused on integrating the principles of effective governance into public administration systems and on identifying challenges and gaps in institutional capacity and public governance, including in States affected by conflict and in least developed countries.

Lessons learned and planned change

22.92 The lesson for the subprogramme was that improving the effectiveness, transparency and accountability of national institutions required the provision of advice on proven means of strengthening the public governance culture, the latter being often available through peer-to-peer experience-sharing. In applying the lesson, the subprogramme will enhance the provision of its technical assistance to, and promote the exchange of knowledge and best practices among, member States, at both the regional and global levels, on reforming and modernizing public administration and on enhancing the effectiveness, accountability and responsiveness of Arab public institutions for greater policy coherence, effectiveness and transparency measures, as a means of eradicating corruption in the public sector.

22.93 Expected progress towards the objective is presented in the performance measure below (see table 22.28).

Table 22.28
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Member States receive advice on workable solutions to systemic challenges facing their public administration systems for more effective public service delivery	1 member State develops transparency measures to combat corruption in the public sector	1 member State introduces reforms to modernize its public administration system

Deliverables

22.94 Table 22.29 lists all deliverables of the subprogramme.

Table 22.29

Subprogramme 6: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	2	2	2
1. Note by the Secretary-General on the economic and social repercussions of the Israeli occupation on the living conditions of the Palestinian people in the Occupied Palestinian Territory, including East Jerusalem, and the Arab population in the occupied Syrian Golan to the General Assembly and the Economic and Social Council	1	1	1	1
2. Report to the ESCWA ministerial session on the social and economic impact of the Israeli occupation: thematic focus	–	1	1	1
Substantive services for meetings (number of three-hour meetings)	4	6	–	4
3. High-level meeting of LAS, the Arab Administrative Development Organization and ESCWA (joint)	4	6	–	4
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	4	4	4	3
4. Country-specific and regional projects (Arab least developed countries, Libya, State of Palestine and Yemen)	4	4	4	3

^a Includes four temporary posts (1 P-4, 2 P-3 and 1 Local level), which were approved pursuant to General Assembly resolution 71/272 A.

22.96 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 22.33 to 22.35 and figure 22.III.

22.97 As shown in tables 22.33 (1) and 22.34 (1), the overall resources proposed for 2025 amount to \$50,146,300 before recosting, reflecting cost-neutral changes compared with the approved budget for 2024. Resource changes result from other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Explanation of variances by factor, component and subprogramme

Overall resource changes

Other changes

22.98 As reflected in table 22.33 (1), resource changes reflect cost-neutral changes, as follows:

- (a) **Policymaking organs.** The increase of \$20,200 relates mainly to the anticipated augmentation in the number of experts taking part in policymaking organs, reflecting increased commitment by ESCWA to advancing initiatives on issues such as social development, water resources and energy;

- (b) **Executive direction and management.** The net increase of \$2,274,100 relates mainly to the proposed establishment of the Decision Support and Data Science Division, entailing the following:
- (i) The inward redeployment of nine posts, including:
 - a. One Data Analysis Assistant (Local level) post from subprogramme 1, Climate change and natural resource sustainability;
 - b. Eight posts (1 P-4, 1 P-2 and 6 Local level) from programme support;
 - (ii) The reassignment of two posts, as follows:
 - a. One Electronic Engineering Technician (Local level) post in programme support as Information Systems Assistant in executive direction and management;
 - b. One Chief of Section, Economic Affairs (P-5) post in subprogramme 4, Statistics, the information society and technology, as Chief of Section, Information Management in executive direction and management (total increase under post resources of \$1,314,100), as reflected in annex II;
 - (iii) The inward redeployment of requirements under other staff costs (\$415,600), contractual services (\$623,700) and travel of staff (\$27,400) to consolidate and reinforce the capacity for designing, developing and maintaining specialized data solutions for member States under the component. Justification for the proposed establishment of the Decision Support and Data Science Division is provided in annex I;

The aforementioned increases are offset in part by reduced requirements under:

 - (iv) Experts (\$38,000), reflecting the anticipated streamlining of activities into interrelated events and back-to-back meetings;
 - (v) Consultants (\$20,900), reflecting the leveraging of technology solutions, such as data analytics, artificial intelligence and collaborative platforms, to streamline processes and decision-making;
 - (vi) Furniture and equipment (\$47,800), reflecting the anticipated reduction in requirements for maintenance of the disaster recovery and business continuity infrastructure;
 - (c) **Subprogramme 1, Climate change and natural resource sustainability.** The decrease of \$202,600 relates to: (i) the outward redeployment of one Data Analysis Assistant (Local level) post (\$78,800), as reflected in annex II; and (ii) reduced requirements under experts (\$46,400), travel of staff (\$22,600) and contractual services (\$54,800), reflecting the anticipated streamlining of activities into interrelated events and back-to-back meetings;
 - (d) **Subprogramme 2, Gender justice, population and inclusive development.** The net decrease of \$53,200 relates to the decreased requirements under experts (\$169,900), reflecting the anticipated streamlining of activities into interrelated events and back-to-back meetings, and the anticipated streamlining of publications into joint flagship publications on various topics relating to gender and social justice; offset in part by the increased requirements under other staff costs (\$14,000), consultants (\$31,900) and contractual services (\$70,800), reflecting higher anticipated needs for enhanced, customized technical and policy tools on gender and social justice, poverty reduction and social protection and their subsequent transfer to member States through capacity-building activities at the national and regional levels;
 - (e) **Subprogramme 3, Shared economic prosperity.** The decrease of \$108,600 relates to the reduced requirements under experts (\$99,700) and travel of staff (\$8,900), reflecting the anticipated streamlining of activities into interrelated events and back-to-back meetings;
 - (f) **Subprogramme 4, Statistics, the information society and technology.** The decrease of \$538,600 relates to: (i) the proposed reassignment of one Chief of Section, Economic Affairs (P-5) post in subprogramme 4 as Chief of Section, Information Management in executive

direction and management (\$273,800), as reflected in annex II; and (ii) the outward redeployment of the requirements under other staff costs (\$118,000), travel of staff (\$11,400) and contractual services (\$135,400) to consolidate the capacity for designing, developing and maintaining specialized data solutions for member States under executive direction and management, in order to support the work of the Decision Support and Data Science Division, which is proposed to be established under executive direction and management;

- (g) **Subprogramme 5, 2030 Agenda and SDG coordination.** The increase of \$163,500 under contractual services relates to the anticipated increase in the requirements for the *ESCWA Stories* projects at the national and regional levels;
- (h) **Subprogramme 6, Governance and conflict prevention.** The increase of \$56,800 relates to the anticipated increase in requirements under other staff costs (\$58,800), reflecting the need to strengthen the capacity to design, develop and maintain specialized data solutions for member States, offset in part by reduced requirements under travel of staff (\$2,000), reflecting the anticipated streamlining of travel activities;
- (i) **Programme support.** The net decrease of \$1,611,600 relates to:
 - (i) The outward redeployment of eight posts (1 P-4, 1 P-2 and 6 Local level) (\$961,500) and the reassignment of one Electronic Engineering Technician (Local level) post in programme support as Information Systems Assistant in executive direction and management, as reflected in annex II;
 - (ii) The outward redeployment of the requirements under other staff costs (\$167,200) and contractual services (\$350,200) to consolidate the capacity for designing, developing and maintaining specialized data solutions for member States under executive direction and management, in order to support the work of the Decision Support and Data Science Division, which is proposed to be established under executive direction and management;
 - (iii) Reduced requirements under general operating expenses (\$591,000), reflecting the anticipated decrease in the energy use in the ESCWA building, including through the optimization of the heating, ventilation and air conditioning systems and the adoption of energy-efficient lighting and smart building management systems;

The aforementioned decreases are offset in part by increased requirements under:

 - (iv) Travel of staff (\$17,400), reflecting an anticipated increase in the number of participants in training courses and workshops to build capacity on business continuity and risk management and on innovative artificial intelligence tools to optimize the impact of the programme support function;
 - (v) Furniture and equipment (\$440,900), reflecting the anticipated increase in the requirements for the office automation equipment, including the licences for the software tools for data compilation and analysis to facilitate the provision of specialized data solutions for member States.

Extrabudgetary resources

- 22.99 As reflected in tables 22.33 (2) and 22.34 (2), the extrabudgetary resources of \$12,566,000 would provide for 51 posts (1 D-1, 2 P-5, 6 P-4, 6 P-3, 4 National Professional Officer and 32 Local level) to perform various functions, including in the areas of economic development, sustainable development, administration and coordination. Additionally, non-post resources would be used to bolster data and information capabilities, particularly in decision support and data science, and to establish portals and platforms relating to the Sustainable Development Goals to support the Arab region's digital revolution. Moreover, these resources will enhance initiatives such as those for integrated water resources management, the sustainable energy transition, social protection reform in Egypt, poverty reduction efforts, support for economic planning in Lebanon, and technical assistance and capacity-building in the Syrian Arab Republic and Oman.

Section 22 Economic and social development in Western Asia

22.100 The authority to oversee the use of extrabudgetary resources rests with the secretariat of ESCWA, which has delegated authority from the Secretary-General.

Policymaking organs

22.101 The resources proposed under this component would provide for the policymaking organs as shown in table 22.36.

Table 22.36

Executive direction and management

- 22.103 The Office of the Executive Secretary is responsible for coordinating and providing overall leadership, policy direction and management of the ESCWA secretariat to support member States, in collaboration with other entities of the United Nations system, with strategic analysis, policy guidelines and capacity-building activities to address key development challenges and issues and to implement innovative solutions for region-wide equitable and inclusive economic prosperity, social progress and environmental sustainability. The Office provides leadership and policy orientation and establishes criteria to coordinate follow-up in the region on implementing the 2030 Agenda for Sustainable Development and the Addis Ababa Action Agenda of the International Conference on Financing for Development, and the mainstreaming of cross-cutting issues, such as gender equality and the empowerment of women, and sustainability perspectives, throughout ESCWA substantive programmes.
- 22.104 The role of ESCWA in supporting evidence-based policymaking and innovation, together with its commitment to the Secretary-General’s strategies on data and new technologies, will ensure that the Arab region is not only a beneficiary of the digital revolution but also an active contributor to the global dialogue on sustainable development through technology. The Decision Support and Data Science Division will provide foresight and analysis of regional and global trends, and evidence pertaining to sustainable development, necessary for informed policymaking, and will bolster innovation and the roll-out of ICT solutions in support of member States and the Commission’s programme delivery, including through coordination across its six subprogrammes.
- 22.105 The Office reinforces policy consistency and coherence, and promotes effective collaboration and coordination, both within the ESCWA secretariat and among United Nations entities and development partners involved in addressing regional development issues, inter alia, through the Regional Coordination Mechanism for Arab States. It also strengthens cooperation and coordination with international and regional intergovernmental and non-governmental organizations, especially LAS and its subsidiary bodies.
- 22.106 The Strategy, Planning, Accountability, Results and Knowledge Section will continue to promote dynamism and innovation in the ESCWA business model and medium-term strategy and to act as a focal point for the annual results framework and related applications in Umoja. The Section will continue to be the basis for organizational learning processes, focusing on accountability and on the

attainment of results, and ensuring the operational excellence of ESCWA through risk reduction and change management processes. The Section will continue to manage the broader knowledge and dissemination processes of ESCWA.

- 22.107 The Resource Mobilization and Partnerships Section will continue to strengthen relationships with funding agencies and donors; maintain up-to-date regional and global donor mapping; coordinate and support project development, budgeting and fundraising; support and track implementation of extrabudgetary projects; assist ESCWA cluster leaders in building and enhancing institutional partnerships (regional and global); support cluster leaders' relationships with civil society and non-State actors and partners; and develop and negotiate legally binding partnerships and donor agreements.
- 22.108 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Commission integrates environmental management practices into its operations. In 2025, the Commission expects to reduce its carbon footprint further through the optimization of the heating, ventilation and air conditioning systems and the adoption of energy-efficient lighting and smart building management systems.
- 22.109 Information on the timely submission of documentation and advance booking for air travel is reflected in table 22.38. ESCWA has made efforts to raise awareness among staff of the requirement to comply with the advance purchase guidance and, in this context, has put in place a procedure whereby travel requests not compliant with the advance booking policy have to be cleared by the Office of the Executive Secretary to hold project managers accountable for the late travel-related submissions. The Commission will continue to pursue efforts to achieve its targets in 2025.

Table 22.38
Compliance rate
(Percentage)

	2021 actual	2022 actual	2023 actual	2024 planned	2025 planned
Timely submission of documentation	55	70	88	100	100
Air tickets purchased at least two weeks before the commencement of travel	65	57	60	100	100

- 22.110 The proposed regular budget resources for 2025 amount to \$8,335,900 and reflect an increase of \$2,274,100 compared with the approved budget for 2024. The proposed change is explained in paragraph 22.98 (b). Additional details on the distribution of the proposed resources for 2025 are reflected in table 22.39 and figure 22.V.

Programme of work

Subprogramme 1

Climate change and natural resource sustainability

22.111 The proposed regular budget resources for 2025 amount to \$4,216,600 and reflect a decrease of \$202,600 compared with the approved budget for 2024. The proposed change is explained in paragraph 22.98 (c). Additional details on the distribution of the proposed resources for 2025 are reflected in table 22.40 and figure 22.VI.

Programme support

- 22.117 Programme support comprises the Resource Management and Service Development Division. The component will continue to provide timely, effective and efficient administrative and logistical support to implement the Commission’s programme of work.
- 22.118 The proposed regular budget resources for 2025 amount to \$16,099,600 and reflect a decrease of \$1,611,600 compared with the approved budget for 2024. The proposed change is explained in paragraph 22.98 (i). Additional details on the distribution of the proposed resources for 2025 are reflected in table 22.46 and figure 22.XII.

Annex I

Organizational structure and post distribution for 2025

Two charts showing the organizational structure of ESCWA are presented below. Chart A reproduces the approved organizational structure for 2024 as contained in document [A/78/6 \(Sect. 22\)](#). Chart B presents the proposed organizational structure for 2025.

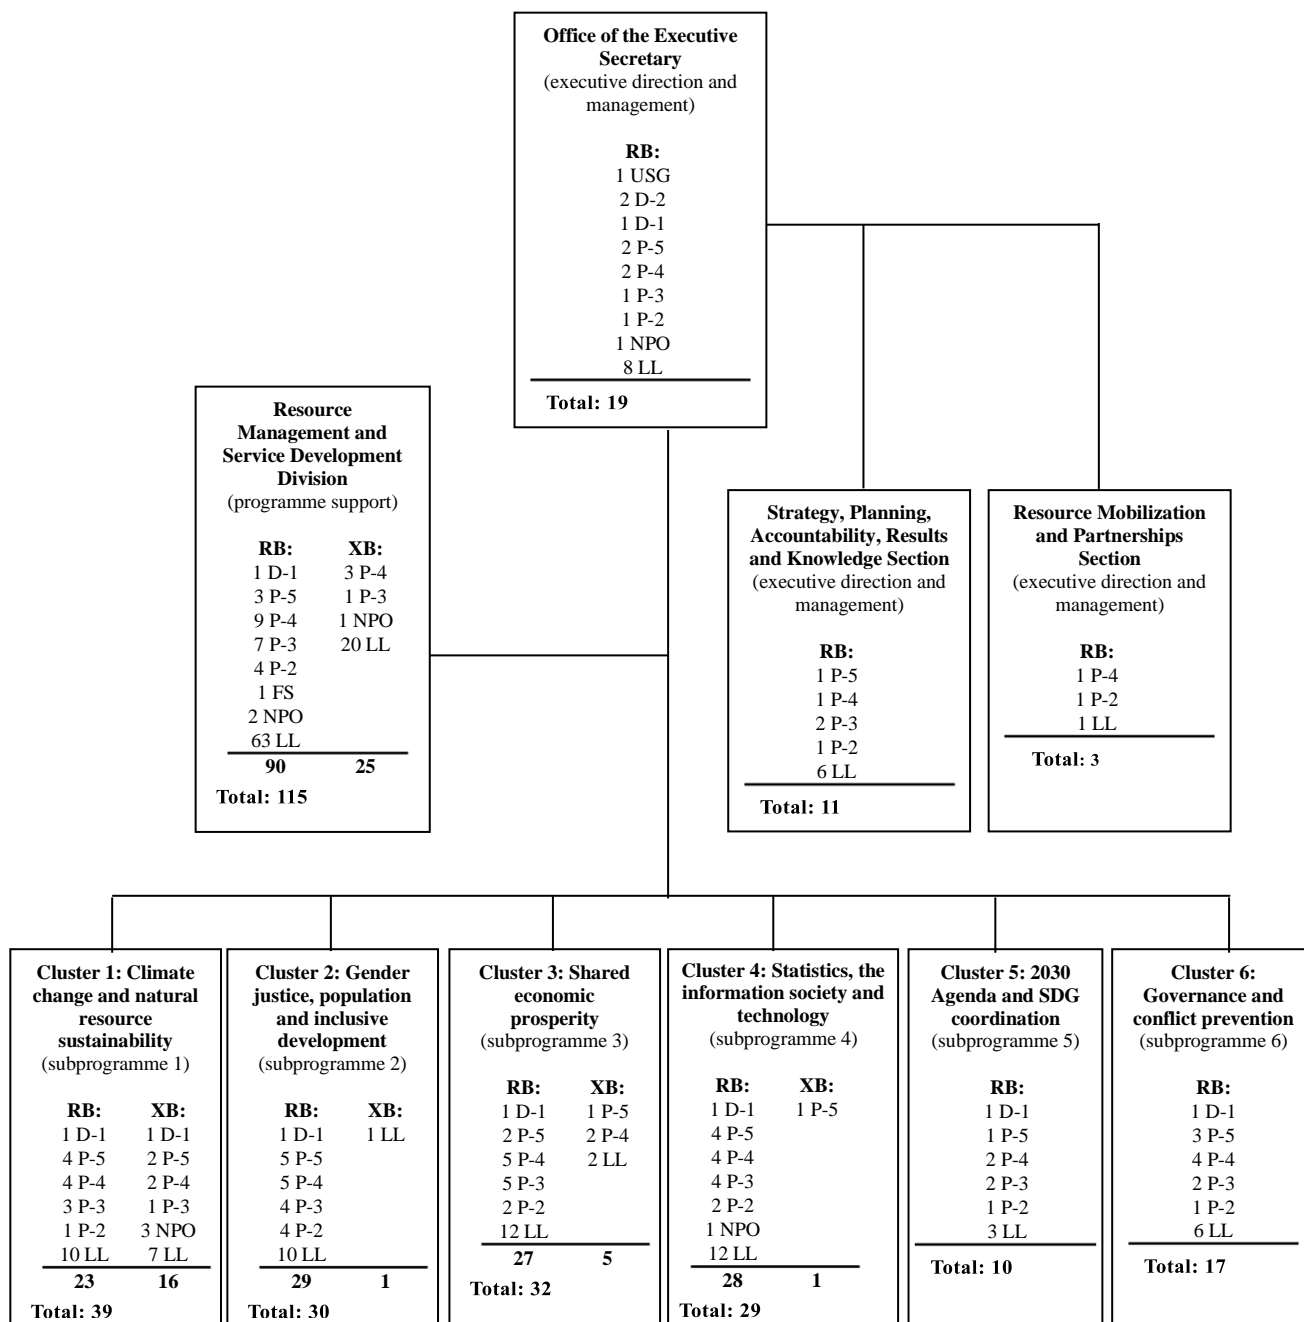

Justification for the proposed changes

Building on the decision of member States (ESCWA resolution 335 (S-VI) of 21 December 2019) in relation to the endorsement of the proposed reforms to the structure of the Commission, as referred to in paragraph 21 of document [E/ESCWA/S-6/14](#), and to enable the implementation and operationalization of the Secretary-General's strategies on data and new technologies, the ESCWA Decision Support and Data Science Unit – initially established under subprogramme 4, Statistics, the information society and technology – will be consolidated with the established information and communications technology (ICT) capacity as the Decision Support and Data Science Division under the executive direction and management component. This consolidation is expected to catalyse the implementation by ESCWA of the Secretary-General's strategy on data, which calls for “a modern United Nations system, rejuvenated by a forward-thinking culture and empowered by cutting-edge skills fit for the twenty-first century” through “a powerful fusion of data, innovation, digital, foresight and behavioural science expertise”. This will also improve the ability of the Commission to provide foresight and analysis of regional and global trends, and evidence pertaining to sustainable development, necessary for informed evidence-based and data-driven policymaking, and to bolster innovation and the roll-out of modern ICT solutions in support of member States and the Commission's programme delivery, including through coordination across its six subprogrammes.

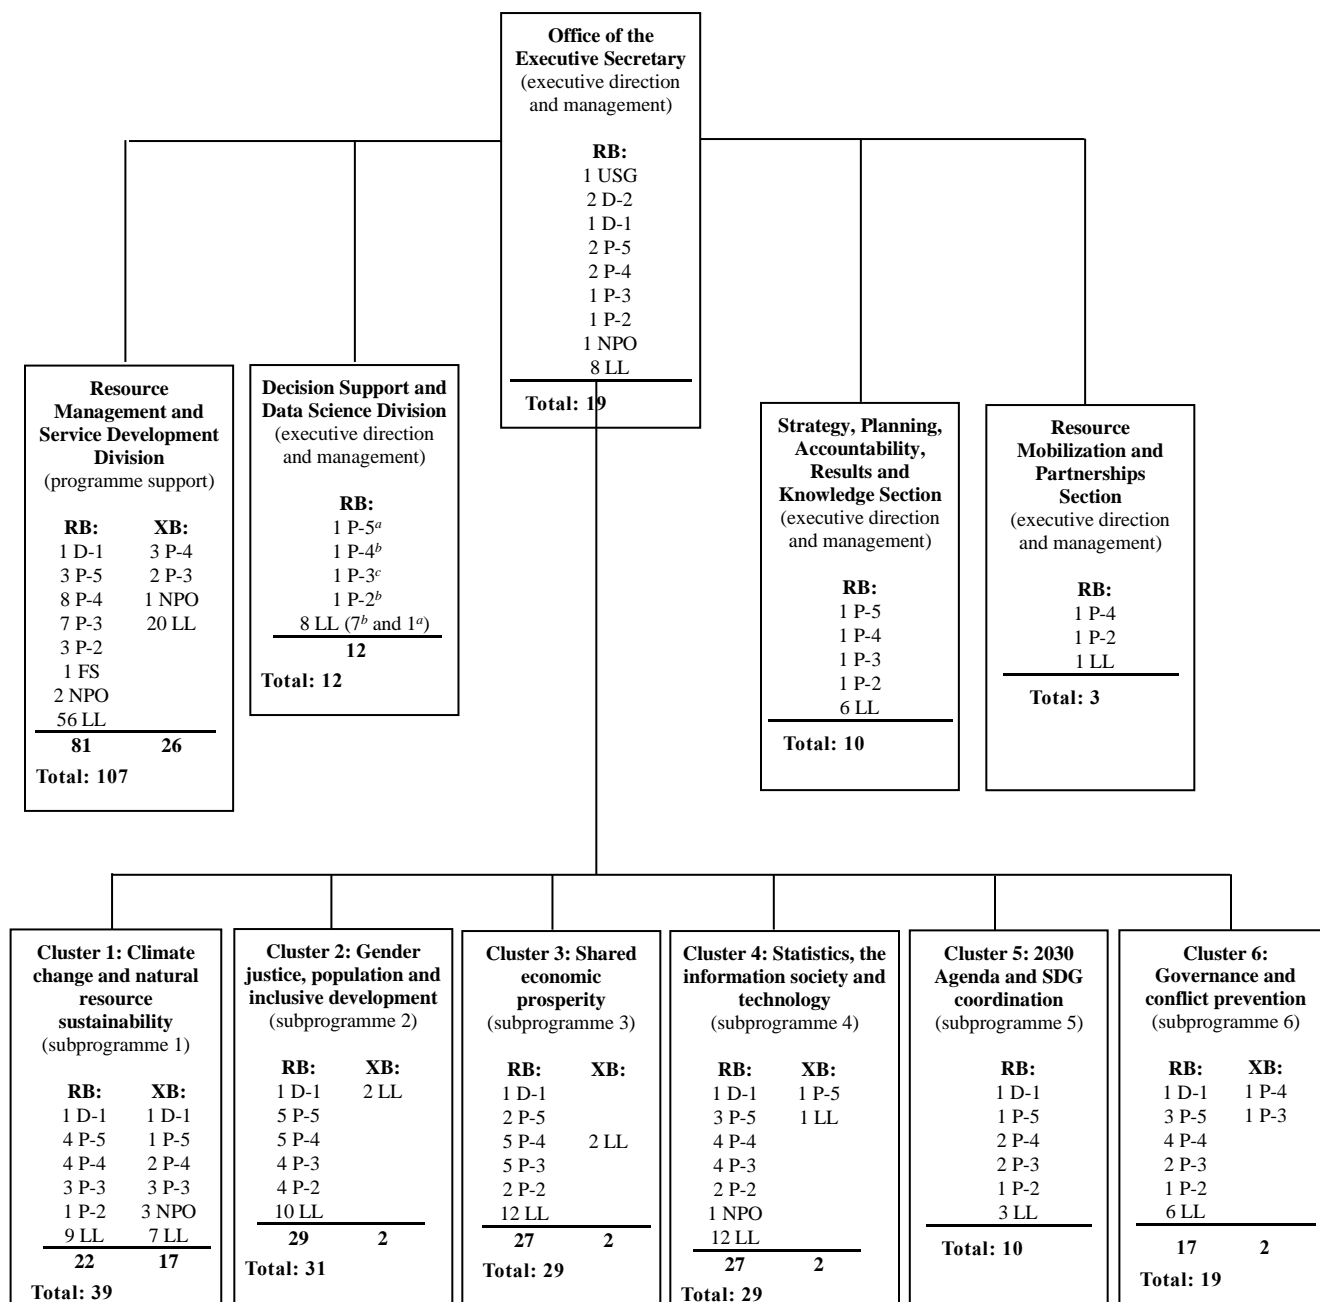

This strategic consolidation aims to position ESCWA as a leader in aligning with the evolving vision outlined by the Secretary-General. It ensures the organization's sustained relevance and impact in the field of data-driven initiatives and innovation, facilitating the development and enhancement of digital guidance and customized policy recommendation tools.

The role of ESCWA in supporting evidence-based policymaking and innovation, together with its commitment to the principles outlined in the Secretary-General's strategies on data and new technologies, will ensure that the Arab region is not only a beneficiary of the digital revolution but also an active contributor to the global dialogue on sustainable development through technology. This strategic consolidation underscores the Commission's vision of becoming a pioneering entity within the United Nations system, dedicated to bolstering its support to member States and the United Nations family at large by leveraging data science and technology to address the complex challenges facing the region and the world.

A. Approved organizational structure and post distribution for 2024

Annex II

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Executive direction and management	–	P-3	Redeployment of 1 Data Scientist post within executive direction and management	The proposed inward redeployment of 9 posts relates to the proposed establishment of the Decision Support and Data Science Division in line with the ESCWA strategic vision to enhance data and information capabilities to effectively contribute to and leverage advancements in the dynamic landscape of data and information strategy. In addition, the proposed redeployments would catalyse the implementation by the Commission of the Secretary-General's strategy on data, which calls for "a modern United Nations system, empowered by cutting-edge skills fit for the twenty-first century" through "a powerful fusion of data, innovation, digital, foresight and behavioural science expertise".
	1	LL	Redeployment of 1 Data Analysis Assistant post from subprogramme 1	
	1	P-4	Redeployment of 8 posts from programme support	See above reason for redeployments.
	1	P-2	(1 Information Systems Officer,	
	6	LL	1 Associate Information Systems Officer, 2 Senior Information Systems Assistants, 2 Information Systems Assistants, 1 Data Analysis Assistant and 1 Information Technology Assistant)	
	1	P-5	Reassignment of 1 Chief of Section, Economic Affairs post in subprogramme 4 as Chief of Section, Information Management in executive direction and management	The proposed reassignment is related to the need to strengthen the information and data management and analysis capacity of the Commission. The Chief of Section, Information Management would lead the Decision Support and Data Science Division under executive direction and management
	1	LL	Reassignment of 1 Electronic Engineering Technician post in programme support as Information Systems Assistant in executive direction and management	The proposed reassignment is related to the need to strengthen the information and data management and analysis capacity of the Commission. The Information Systems Assistant would strengthen the capacity for the development of new applications and portals, including interactive policy simulation platforms and artificial intelligence tools, and address data-related requests by member States.

Section 22 Economic and social development in Western Asia

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>

* [A/79/50](#).

** In keeping with paragraph 10 of resolution [77/267](#), the part consisting of the post and non-post resource requirements is submitted through the Advisory Committee on Administrative and Budgetary Questions for the consideration of the General Assembly.

Overview

Overall orientation

- 23.1 The regular programme of technical cooperation, established by the General Assembly in its resolution 58 (I) in 1946, serves to support developing countries, least developed countries, countries with economies in transition and countries emerging from conflict in their capacity development efforts. These efforts are geared towards the implementation of the 2030 Agenda for Sustainable Development, including the achievement of the Sustainable Development Goals and other internationally agreed development goals, and the outcomes of related United Nations conferences and summits. The programme's broad objective is to support and advance processes aimed at developing the capacity of Governments, through both individuals and institutions, to formulate and implement policies for sustainable economic and social development. The sharing of experiences across countries and regions, South-South cooperation, the use of national expertise from the beneficiary countries to the extent possible and the building of knowledge networks to facilitate continued exchange and assistance and promote sustainability are characteristic of the programme.
- 23.2 The programme enables the Secretariat to offer Member States access to the diverse global and regional specialized development expertise and knowledge readily available within the programme's implementing entities: the Department of Economic and Social Affairs, the five regional commissions (Economic Commission for Africa (ECA), Economic and Social Commission for Asia and the Pacific (ESCAP), Economic Commission for Europe (ECE), Economic Commission for Latin America and the Caribbean (ECLAC) and Economic and Social Commission for Western Asia (ESCWA)), the United Nations Conference on Trade and Development (UNCTAD), the United Nations Office on Drugs and Crime (UNODC), the United Nations Human Settlements Programme (UN-Habitat), the Office for the Coordination of Humanitarian Affairs and the Office of the United Nations High Commissioner for Human Rights (OHCHR).
- 23.3 The capacity development activities of the implementing entities draw substantively from their normative and analytical work and respond to the policy guidance and programmes of action agreed by Member States through the intergovernmental mechanisms. This enables developing countries to benefit from both the knowledge acquired through that work and from the experiences of various geographical regions, allowing for the sharing and exchange of innovative and good practices. Of equal importance is the contribution that the capacity development work brings to the normative and analytical activities and, ultimately, to the support provided to the intergovernmental dialogue.
- 23.4 The defining features of the programme are that it is demand-driven, quick to respond and of a short-term nature, responding to an expressed need by Member States for capacity development support. At the same time, in order to ensure that services complement and are aligned with the overall and mandated strategic priorities of the implementing entities, they cannot be delivered solely on an ad hoc basis, but rather must be part of more strategic programmatic approaches on the basis of a thorough understanding and appreciation of national needs.
- 23.5 Member States have recognized that part of the implementation of the 2030 Agenda is the adoption of new, transformative and innovative approaches to integrate sustainability into national development planning, policies, budgets, law, institutions and monitoring and accountability frameworks. Doing so will require considerable individual, institutional, analytical and statistical capacities to address the complexity and cross-cutting nature of the sustainable development challenges in a coherent and integrated fashion. While countries have made important strides in some of these areas, the challenges remain enormous. For this reason, capacity development is a central requirement to advancing the implementation of the 2030 Agenda and the Addis Ababa Action Agenda of the Third International Conference on Financing for Development and the outcome of the upcoming Fourth International Conference.
- 23.6 The devastating effect of the coronavirus disease (COVID-19) pandemic challenged hard-won development gains and hampered progress towards achieving the Sustainable Development Goals. The world is facing interlinked global food, energy, financial and climate crises that threaten the economies

of many developing countries. The agile modality of the programme allows the implementing entities, when applicable, to support Member States in designing response measures to mitigate the adverse effects of the various crises for a sustainable and inclusive recovery. The programme will, among others, provide policy advice, facilitate the exchange of information, scientific knowledge and best practices and provide capacity development while increasingly adopting new and innovative approaches, including virtual training sessions, meetings and advisory services.

- 23.7 The programme will support countries in strengthening their resilience to external shocks and global crises leading to rising food prices, rising energy prices and tightening financial conditions, with dramatic implications for social cohesion, financial systems and global peace and security.
- 23.8 While the programme cannot address the many facets of these ongoing global challenges, the strategic use of the programme's resources facilitates quick responses and initial support by implementing entities and is complementary to other development funds, including the United Nations Development Account and extrabudgetary resources, which optimizes the programme's impact through strengthened links and follow-through.
- 23.9 Global and regional entities of the Secretariat implementing activities under the programme coordinate those activities through established internal mechanisms. The Executive Committee on Economic and Social Affairs, the main focus of which is the harmonization of its members' programmes, helps to achieve a rational division of labour and complementarity between the global and regional entities by promoting programmatic coordination and identifying synergies for operational work. At another level, the engagement of implementing entities within the United Nations Sustainable Development Group brings about greater awareness by a larger group of entities of the specific expertise and operational strengths available in the United Nations system, thereby increasing potential cooperation to implement projects and undertake operational work at the country level and improving system-wide coherence in the context of relevant country processes and cooperation frameworks.

Coordination with the resident coordinator system and other partners

- 23.10 The implementing entities of the programme are all non-resident agencies. Accordingly, they engage with the resident coordinator and resident agencies to maximize the impact of country-level development work. Such cooperation enables access to up-to-date information on national development priorities and better positioning in the broader development cooperation environment. For resident agencies, it enables access to the knowledge and expertise of non-resident agencies. This cooperation can include joint programming, including through the common country analysis, the United Nations Sustainable Development Cooperation Framework and the poverty reduction strategy paper process, as well as joint needs assessments, joint workplans and, where appropriate, joint fundraising.
- 23.11 Many non-resident agencies have entered into institutional cooperation agreements with resident agencies, often in the form of memorandums of understanding. Some resident coordinators have a dedicated liaison officer to engage with non-resident agencies. There has been improvement in non-resident agency/resident agency cooperation in terms of better communication and coordination, including through increased awareness of one other's mandates, participation in knowledge networking and better advance planning by the non-resident agencies when undertaking country missions by engaging directly with the resident coordination offices and resident agencies on country-level work. The development and adoption of the standard operating procedures for countries wishing to adopt the "delivering as one" approach is an important milestone in providing concrete, flexible solutions for United Nations country teams that are in line with the reform agenda, as formulated in the resolution on the quadrennial comprehensive policy review.
- 23.12 Cooperation with partners within the broader development assistance community, including the Bretton Woods institutions, the Organisation for Economic Co-operation and Development (OECD), regional development banks and other regional organizations will continue to be pursued as partners work together to align with and improve coherence of development priorities among country clusters (least developed countries/landlocked developing countries/small island developing States), within regional and subregional groupings, and at the country level for greater impact of the programme's activities in the field.

Objective and strategy

- 23.13 The overarching objective that guides the programming of the resources allocated to individual entities under the programme and the overall strategy and criteria followed for implementation are as follows:
- (a) **Objective.** The objective to which each subprogramme of the entities of the regular programme of technical cooperation contributes can be found in the relevant fascicle of the proposed programme plan for 2025 (A/79/6), for each implementing entity;
 - (b) **Strategy.** The strategy consists of:
 - (i) Responding to the requests of Governments for urgent advice on policy-related issues;
 - (ii) Providing Governments with specific advice on sectoral matters relevant to their development strategies and programmes;
 - (iii) Assisting Governments in the formulation or evaluation of programmes and projects leading to the enhancement of national programmes;
 - (iv) Developing networks of experts and practitioners in the relevant sectoral areas to facilitate information-sharing, synergies and potential collaboration, especially through information and communications technology (ICT), workshops and seminars;
 - (c) **Criteria.** The following criteria are relevant to all implementing entities of the programme:
 - (i) Activities should be responsive primarily to the requests of developing countries and be of a short-term nature (i.e., conceived and implemented within less than two calendar years); longer-term initiatives that require a phased approach and that build on knowledge acquired through previous interventions may continue, pending the mobilization of external resources; regular programme of technical cooperation requests may also lead to United Nations Development Account projects, in order to provide longer-term and sustainable support to the countries;
 - (ii) Activities should fall within one of the main work areas of the implementing entity as mandated by its governing body, and the entity should play a demonstrable leadership role in normative and analytical functions relating to the activities;
 - (iii) Activities should build capacity in developing countries, including for meeting treaty and related normative obligations and, through the sharing of experience gained at the country level, enrich the analytical functions of the implementing entity for the benefit of all Member States;
 - (iv) Activities that aid in the preparation of specialized components of a country's development strategy or that help to prepare requests for larger-scale funding from other sources are encouraged.
- 23.14 In line with General Assembly resolution [2514 \(XXIV\)](#) and Economic and Social Council resolution [1434 \(XLVII\)](#), activities financed under the present budget section will continue to focus on short-term advisory services, training and field projects, as outlined below. Activities will be based on needs expressed by Member States and by regional and subregional cooperation groups, either at the request of a State or as guided by the intergovernmental process, bearing in mind the criteria set forth for the purposes and uses of the programme.

Short-term advisory services

- 23.15 Advisory services ensure the provision of high-level technical expertise, the transfer of knowledge from global and regional entities to Governments on policy-related issues and development strategies and the formulation, assessment or evaluation of projects and programmes. The core of the programme is built around regional and interregional advisers who are specialists in both capacity development and in the substantive knowledge of the subprogramme. These advisers represent the critical interface between the countries and the implementing entities, facilitating country-level

access to the expertise of the Organization. Advisory services may also be provided by national consultants, supported by the implementing entity, or any other member of staff tasked with programming funds of the regular programme of technical cooperation. Services may be provided through an advisory mission, involving travel to the target country or by virtual or hybrid means. Advisory services may lead to the formulation of technical cooperation projects, implemented either by a Government or in partnership with a United Nations entity. Advisory services may also lead to United Nations Development Account projects, providing a natural platform to pursue longer-term and sustainable support to the countries.

- 23.16 To ensure that the pool of interregional and regional advisers represents the highest calibre of technical skills and knowledge, all implementing entities of the programme have committed themselves to reviewing their advisory capacities so as to be able to replace advisers, as needed, to ensure that they have the best skills and knowledge to respond to the changing needs of Member States.
- 23.17 In line with past intergovernmental guidance, the implementing entities have taken steps to utilize complementary resources for the provision of advisory services, including the recruitment of short-term advisers who respond to very specific, distinct assignments of a limited duration, as well as consultancy assignments, in which national and regional expertise are drawn upon, in particular when addressing issues that are country-specific and for which expert knowledge of national or regional issues is fundamental in ensuring the most relevant and targeted support. The entities also rely on national or regional institutions, in particular in the context of national workshops, which ensures the transfer of local knowledge and expertise and promotes local follow-up actions.

Field projects

- 23.18 Field projects provide a link between research and analysis that is based on implementation experiences and provide opportunities to test-drive policy or other normative recommendations on a small scale in which the impact can be gauged quickly and closely. The projects are designed in response to demands by Member States regarding a clearly articulated need, while simultaneously reflecting programmatic and subprogramme goals. They are longer-term initiatives and are often supplemented by extrabudgetary resources or the United Nations Development Account in order to scale up their activities. Such projects may be country-based but can also be interregional or subregional.

Training

- 23.19 Training is aimed at building knowledge and skills that will contribute to strengthening national capacity for policy development and the effective implementation of national policies. Training is often conducted through seminars and workshops, as well as through the provision of short-term fellowships, which foster peer-to-peer opportunities for learning. The exchange of good practices and South-South cooperation are fostered consistently. The main consideration guiding the training conducted under the programme is that the topics should play a catalytic role in the development process and should contribute to linking local needs and conditions with the follow-up of major conferences. Even where the organizing entity is a global one, the participation of the relevant regional commissions is encouraged in the interest of sustainability and continued regional support after the event.
- 23.20 Training is undertaken in response to an identified capacity gap in one or more countries and at the request of Member States. Interregional advisers, staff and/or consultants may lead and participate in seminars and workshops by developing training modules, facilitating discussions and providing hands-on training. Training can be held virtually, in person or through hybrid means. Seminars and workshops are held at the subnational, national and regional levels.

Alignment and complementarity of the regular programme of technical cooperation and the United Nations Development Account

- 23.21 Implementing entities have used the complementarity of the activities of the regular programme of technical cooperation and the United Nations Development Account, as well as extrabudgetary resources, to create multiplier effects that contribute to longer-term sustained development results.

Initial support funded by the regular programme is followed through often by developing projects by the Development Account and extrabudgetary resources. For example, advisory missions undertaken under the regular programme of technical cooperation may lead to the establishment of Development Account projects that provide a natural platform to pursue longer-term and sustainable support to countries. This serves to enhance the multiplier effects that contribute to longer-term, sustained impact.

Status of internal assessment

- 23.22 Considering the decentralized nature of the regular programme of technical cooperation, each implementing entity assesses the results of its regular programme activities and conducts periodic evaluations. The implementing entities agreed to engage the support of an independent consultant for the preparation of the ninth progress report, covering 2023. The report is expected to be finalized by June 2024 and will provide information on, among others: (a) results achieved; (b) links between the regular programme, the United Nations Development Account, extrabudgetary resources and the resident coordinator system; (c) the programme's outreach; and (d) the programme's delivery modalities. The activities will be reported on the basis of agreed common reporting standards.

Office of Internal Oversight Services evaluation of section 23

- 23.23 In response to recommendations made by the Advisory Committee on Administrative and Budgetary Questions in paragraphs V.103, V.111 and V.112 of its report on the proposed programme budget for 2023 (A/77/7) and endorsed by the General Assembly in its resolution 77/262, the Office of Internal Oversight Services undertook an evaluation of the regular programme of technical cooperation in 2023 on its relevance, effectiveness, efficiency and coherence to enhancing Member States' capacity to formulate and implement national development policies, strategies and laws. The evaluation report¹ was published as a programme manager's report in February 2024.
- 23.24 It was found that, through the regular programme of technical cooperation, implementing entity technical cooperation support contributed substantially to Member States' capacity development and policymaking, and that implementing entities were highly responsive to Member States' needs. It was also found that the unique flexibility of the regular programme of technical cooperation enabled implementing entities to deploy their normative tools and advice in response to Member States' technical cooperation requests, often in a catalytic manner. The Office of Internal Oversight Services also made recommendations, accepted by management, to improve the sharing of good practices among implementing entities, improving internal guidelines, improving communication with the Department of Management Strategy, Policy and Compliance, and evaluating regular programme of technical cooperation contributions to outcomes.

Overview of resources for the regular budget

- 23.25 As shown in tables 23.1 and 23.2 and figures 23.I and 23.II, the overall resources proposed for 2025 amount to \$48,241,700 before recosting, reflecting an increase of \$2,000,000, or 4.3 per cent, compared with the approved budget for 2024. Resource changes result from other changes. The overall increase takes into account anticipated additional requests for support in specific areas, including in the context of continuing recovery from the impact of the COVID-19 pandemic, and increased efforts towards the implementation of the 2030 Agenda. In response to the anticipated increase in the volume of requests for assistance from Member States, all implementing entities would provide additional support to Member States. For example, the Department of Economic and Social Affairs expects to support countries in increasing their capacity to submit timely monthly and annual trade data and ECA expects to respond to a greater number of requests for technical assistance and advisory services throughout the region, in order to support policymaking to drive Africa's development agendas.
- 23.26 The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Thousands of United States dollars)

I. Sectoral advisory services

1. Economic and social affairs

A. Programmatic activities delivered through the regular programme of technical cooperation

23.27 The assistance to Member States provided by the Department of Economic and Social Affairs through the regular programme of technical cooperation leverages the Department's multidisciplinary expertise and mandates on economic, social and environmental issues to support the implementation of the 2030 Agenda through the following subprogrammes: subprogramme 2, Inclusive social development; subprogramme 3, Sustainable development; subprogramme 4, Statistics; subprogramme 5, Population; subprogramme 6, Economic analysis and policy; subprogramme 7, Public institutions and digital government; subprogramme 8, Sustainable forest management; and subprogramme 9, Financing for sustainable development.

23.28 In implementing these responses, the regular programme of technical cooperation contributes to the objectives and planned results of the subprogrammes and complements the strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2025 (A/79/6 (Sect. 9)).

Outreach and dissemination of guidelines to Member States on the opportunities for assistance through the regular programme of technical cooperation

23.29 The Department leverages various channels to promote the regular programme of technical cooperation. Its website provides information on its projects, approach and funding modalities and houses an interactive map and audiovisual material. Targeted engagement with government officials takes place in the context of intergovernmental meetings, conferences and workshops. Given the demand-driven nature of this programme, raising awareness of the Department's offerings for Member States is integral for all communications.

- 23.30 The Department also builds on its convening power at international conferences such as the annual high-level political forum on sustainable development, the multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals and the Economic and Social Council partnership forum, to engage with Member States on issues and solutions to advance the 2030 Agenda and to highlight the role of the Department as a thought leader and source of strategic foresight and capacity-building through the promotion of major publications and key policy recommendations covering the three pillars of sustainable development: economic, social and environmental. These efforts are often availed by Member States through direct requests from their capitals, permanent missions or through the resident coordinator offices.
- 23.31 The Department's Digital Learning Centre is a curated repository of the Department's digital capacity-building portfolio, which includes self-paced courses and microlearning and is open to anyone interested in learning together with the experts. The Department sees digital engagement and connecting with stakeholders through the platform as a privilege that allows the Department to overcome time and space restrictions and offer its content to a much larger audience.

Complementarity with the resident coordinator system

- 23.32 All country-level interventions, including activities funded by the regular programme of technical cooperation, are governed by the new departmental policy for country-level support in the context of the resident coordination system and related standard operating procedures for country-level engagement, adopted in May 2023 and May 2020, respectively. In line with this new guidance, the country-level interventions of the Department are expected to be aligned with and contribute to the national priorities and objectives outlined in the United Nations Sustainable Development Cooperation Framework. Country-level activities are expected to be complementary to ongoing United Nations efforts at the regional and national levels and address needs that cannot be fulfilled by United Nations regional entities and/or the United Nations country team. In line with the General Assembly's vision for the new resident coordinator system, the Department's country-level activities are designed in close collaboration with the resident coordinators and the United Nations country teams to meet Member States' requests for stronger United Nations policy at the country level to support the implementation of the 2030 Agenda. Collaboration with the resident coordinator system, including in the formulation and implementation of the Cooperation Framework, has provided opportunities to the Department for partnerships and joint work with other United Nations entities for the implementation of specific Cooperation Framework outcomes.

Review of high-level positions at headquarters duty stations (Department of Economic and Social Affairs)

- 23.33 In response to the recommendation of the Advisory Committee endorsed by the General Assembly in its resolution [77/262](#), the Department launched a management reform of regular programme of technical cooperation, including of general temporary assistance positions. This reform is intended to ensure a more strategic use of interregional adviser resources to maximize the impact of the regular programme of technical cooperation to meet the growing needs of Member States and serve the growing number of developing countries. The role, level, duration and number of interregional adviser positions will be adjusted to this new approach, codified in a new departmental policy and guidelines for recruitment of general temporary assistance positions, for the use of the regular programme of technical cooperation. The goal is to identify possible modalities that might reduce the need for interregional advisers in the long run without negatively affecting the Department's ability to effectively address the needs of Member States. The Department will continue to monitor closely Member States' need for support relating to the achievement of the Sustainable Development Goals to ensure that regular programme of technical cooperation resources continue to be responsive to and effectively address their requests and priorities.

Response provided to Member States' requests for support in 2023**An interdisciplinary look at implementation of the Sustainable Development****Goals – the *Global Sustainable Development Report***

(Result 1 of subprogramme 3 (A/79/6 (Sect. 9)))

- 23.34 In 2023, subprogramme 3, Sustainable development, provided support to Member States on a variety of topics towards the implementation of the 2030 Agenda, including on effective national-to-local achievement of the Sustainable Development Goals through voluntary local reviews, initiatives to drive achievement of the Goals such as multi-stakeholder partnerships, and national science, technology and innovation for the Goals road maps. The subprogramme has organized virtual global events, regional events on the margins of the regional forums on the Goals and hands-on national training workshops in response to requests from Member States to enhance the capacity of local and national governments to advance achievement of the Goals through localization and monitoring of progress through the preparation of voluntary local reviews. This work supported localization processes for the Goals in Argentina, Bolivia (Plurinational State of), the Gambia, Ghana, Honduras, Mozambique, Paraguay, South Africa and Zimbabwe, with added (largely virtual) participation by experts from the relevant United Nations regional commissions, UN-Habitat, OECD, United Cities and Local Governments, and mayors and planning experts from other developing countries.
- 23.35 The above-mentioned work contributed to strengthened integrated planning for achievement of the Sustainable Development Goals through improved horizontal coordination across sectors and vertical coordination across levels of government. The planning applies the insights and recommendations of the 2023 *Global Sustainable Development Report* focusing on localizing the global calls for action to support transformative achievement of the Goals. This work contributed to result 1 of subprogramme 3, and the related performance measure (see table 23.3), in the proposed programme budget for 2025 (A/79/6 (Sect. 9)).

		action to support transformative implementation in different contexts		

Expected response to anticipated requests for support in 2025

Increased engagement with trade statistics
(Result 1 of subprogramme 4 (A/79/6 (Sect. 9)))

- 23.36 In 2025, subprogramme 4, Statistics, will focus on assisting countries in increasing their capacity to submit timely monthly and annual trade data by providing the following: (a) technical advice on methodological issues for the production of trade statistics; (b) capacity-building on innovation of trade statistics methods; (c) training of statisticians on trade data processing techniques; (d) development of training materials and e-learning courses for trade statistics; and (e) providing tools and associated training for the production of new and improved trade indicators. This will be achieved, in part, through the conduct of training workshops and the development of e-learning materials as part of regular programme of technical cooperation activities.
- 23.37 The subprogramme will pursue its capacity development goals and objectives by working closely with United Nations country teams and resident coordinators, United Nations regional commissions and other partners in the United Nations system, building on complementarity and boosting the capacity of developing countries to produce high-quality statistics to effectively measure the implementation of the 2030 Agenda.
- 23.38 The expected response in 2025 would contribute to an increase in the number of countries that submit timely trade data, which is reflected in result 1 of subprogramme 4, and the related performance measure (see figure 23.III), in the proposed programme budget for 2025 (A/79/6 (Sect. 9)).

Figure 23.III
Performance measure: number of countries that submitted timely trade data

UNdata modernization: a single entry point for authoritative statistical data from the United Nations system

(Result 3 of subprogramme 4 (A/79/6 (Sect. 9)))

- 23.39 Subprogramme 4 will focus on the modernization of the UNdata portal and on assisting countries in: (a) providing technical advice on methodological issues in the transmission and dissemination of statistical data; (b) capacity-building on developing and maintaining Statistical Data and Metadata Exchange-compliant data collection and distribution systems; and (c) providing tools and associated training for client-oriented dissemination of statistics.
- 23.40 The training workshops organized through the regular programme of technical cooperation programme and technical assistance hotlines will be a significant contribution to supporting the increase in countries' capacity to maintain such data collection and distribution systems and adhere to data transmission standards. The expected response from these activities will contribute to an increase in users, such as policymakers, being able to gain access to high-quality country data through the UNdata portal and national data portals, which is reflected in result 3 of subprogramme 4, and the related performance measure (see figure 23.IV), in the proposed programme budget for 2025 (A/79/6 (Sect. 9)).

Figure 23.IV

Performance measure: average number of UNdata user sessions per month

Towards attracting sustainable investment by developing countries for the Sustainable Development Goals

(Result 1 of subprogramme 9 (A/79/6 (Sect. 9)))

- 23.41 In 2025, subprogramme 9, will support meaningful engagement of at least 14 developing countries in the Sustainable Development Goals Investment Fair platform, as well as their enhanced readiness to present investment-ready projects having an expected value of \$5.4 billion for consideration by investors. Responses to anticipated requests are expected to include both global and country-level interventions involving the provision of technical advice to and training of actors on employing knowledge tools to support the assessment of pre-investment phase projects that can advance the Sustainable Development Goals. The Department will convene workshops, global public-private partnership-building events and South-South peer exchanges, with specific attention given to countries in special situations. This will be supported by evidence-based analysis to inform deliberations between policymakers and discussions with investors.
- 23.42 The Department is also expecting further requests for capacity development support on infrastructure asset management, especially from Asia and the Pacific and Africa (Middle East and North Africa region and sub-Saharan Africa), and on international development cooperation (Latin America and the Caribbean and the Middle East and North Africa region). Requests for infrastructure asset management support are likely to increase owing to new requirements of the International Monetary Fund and multilateral development banks for developing countries to introduce national registries

for infrastructure assets as a prerequisite for further technical assistance on public financial management reforms. The expected response would contribute to result 1 of subprogramme 9, and the related performance measure (see table 23.4), in the proposed programme budget for 2025 (A/79/6 (Sect. 9)).

Table 23.4

Other	1.4	–	–	–	–
Total	9 888.8	10 806.4	350.5	3.2	11 156.9

23.43 The proposed regular budget resources for 2025 amount to \$11,156,900 before recosting, reflecting an increase of \$350,500, or 3.2 per cent, compared with the approved budget for 2024. The proposed increase is attributable to increases under consultants (\$545,400), travel of staff (\$373,000), contractual services (\$463,600), general operating expenses (\$116,700), furniture and equipment (\$14,500) and grants and contributions (\$423,400), offset by a decrease under other staff costs (\$1,586,100), in line with expected requests from Member States in 2025, including to advise, build capacity and deliver training on statistical data, collection and distribution, as well as infrastructure asset management.

2. Trade and development

A. Programmatic activities delivered through the regular programme of technical cooperation

23.44 The activities under trade and development are implemented by UNCTAD. The programmatic activities are implemented under all subprogrammes of UNCTAD.

23.45 In implementing these activities, the regular programme of technical cooperation contributes to the objectives and expected results of the above subprogrammes and complements their strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2025 (A/79/6 (Sect. 12)).

Outreach and dissemination of guidelines to Member States on the opportunities for assistance through the regular programme of technical cooperation

23.46 To raise awareness of the opportunities for developing countries to benefit from assistance offered through the regular programme of technical cooperation, UNCTAD disseminates notifications on various training offerings, in addition to face-to-face meetings with government officials, including permanent representatives from developing countries, in the context of intergovernmental meetings, conferences and various capacity-building events organized by the entity. This is coupled with regular and close communication with the permanent missions to the United Nations based in Geneva with respect to the processes involved in the nominations of capital-based policymakers for regional

courses on key issues on the international economic agenda (the “paragraph 166” course), on the one hand, and the selection of topics for short courses, on the other. UNCTAD outreach and dissemination efforts also include the use of newsletters and dedicated online platforms, especially with regard to its activities to support developing countries to build their readiness to engage in and benefit from e-commerce and digital trade. In 2023, the etradeforall.org online platform maintained a robust performance, with more than 50,000 visitors annually, and 11 of the top 20 countries with the most visitors were developing countries.

Response provided to Member States’ requests for support in 2023

Improved availability of digital economy statistics in developing countries

(Result 3 of subprogramme 4 (A/79/6 (Sect. 12)))

- 23.47 Subprogramme 4, Technology and logistics, contributes to harnessing innovation and technology, including e-commerce and the digital economy, improving trade logistics and increasing human capacity for inclusive and sustainable trade and development in developing countries and economies in transition. In 2023, the subprogramme continued its engagement with developing countries on assessing the state of play of their e-commerce enabling environment through eTrade Readiness Assessments and assisting them in the development of e-commerce strategies to serve as road maps of how e-commerce could support their strategic development goals. Four Readiness Assessments were completed in 2023, for Ghana, Mauritania, Mongolia and Peru, and four more were started, for Algeria, Timor-Leste, Trinidad and Tobago and Zimbabwe. The development of national e-commerce strategies building on existing Readiness Assessments was undertaken in Côte d’Ivoire and Fiji. The regular programme for technical cooperation contributed to the development of the Readiness Assessment for Algeria and the e-commerce strategy for Côte d’Ivoire. In Algeria, the Readiness Assessment is intended to increase the awareness and understanding of government officials of the bottlenecks and opportunities to the development of the e-commerce system through a review of seven policy areas, namely, e-commerce strategy formulation, ICT infrastructure, payment solutions, trade facilitation and logistics, legal and regulatory frameworks, skills development, and access to financing. The Readiness Assessment report provides recommendations for addressing constraints and identifies potential development partners for their implementation. In Côte d’Ivoire, building on the Readiness Assessment completed in 2021, the e-commerce strategy development project is intended to deliver a national strategy, resulting in enhanced awareness of the policy and regulatory reforms necessary to support inclusive e-commerce development, and of the pathways for their implementation. Through an implementation support mechanism, UNCTAD continued to foster synergies among development partners, facilitate access to e-commerce capacity-building development solutions and monitor progress on the implementation of Readiness Assessment recommendations in partner countries. The third review, which was released in November 2023, in time for the UNCTAD eWeek, confirmed previous trends and uncovered novel insights regarding the implementation processes of e-commerce policy actions and the role of the Readiness Assessments, while also singling out the urgent need to bolster the capabilities of nascent governance arrangements to fast-track implementation.
- 23.48 The above-mentioned work contributed to the result of improved availability of digital economy statistics in developing countries, which is reflected in result 3 of subprogramme 4, and the related performance measure (see table 23.7), in the proposed programme budget for 2025 (A/79/6 (Sect. 12)).

Table 23.7

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Establishment of the international task group on measuring e-commerce value	Member States participate in developing internationally agreed guidelines	At least 2 countries started using the internationally agreed guidelines

Expected response to anticipated requests for support in 2025**Developing countries are equipped with policy proposals and measures to develop sustainable industrialization strategies to establish more resilient economies**

(Result 2 of subprogramme 1 (A/79/6 (Sect. 12)))

Enhanced policymaking to facilitate economic diversification through increased data capacities in services trade

(Result 2 of subprogramme 3 (A/79/6 (Sect. 12)))

- 23.49 In response to an anticipated and an actual increase in the volume of requests for assistance from Member States, UNCTAD will continue to support developing countries in building their readiness to engage in and benefit from e-commerce and digital trade. UNCTAD has received new requests for technical cooperation with the development and/or implementation of e-commerce strategies, including from Kenya, Mauritania, Mongolia and Tunisia. In addition, all subprogrammes are expected to continue to support government officials and policy practitioners in developing countries on key issues on the international economic agenda, with a view to increasing their capacity to build more effective and integrated policy responses to a changing global economy, as mandated in paragraph 166 of the Bangkok Plan of Action and subsequently reconfirmed in the Sao Paulo Consensus, the Doha Programme of Action for the Least Developed Countries and the Nairobi Maafikiano of 2016. It was recognized in the Bridgetown Covenant, the most recent outcome document of the fifteenth session of UNCTAD, held in 2021, that the activities under paragraph 166 of the Bangkok Plan of Action were of great importance and utility and should be continued.
- 23.50 In this regard, UNCTAD will continue to provide its flagship “paragraph 166” course on key issues on the international economic agenda for policymakers, Geneva-based delegates and other stakeholders from developing and transition economies. The course would continue to be based on the development perspective of UNCTAD and focus on the links between trade, finance, investment, technology, logistics and macroeconomic policies in the context of major economic trends and debates in multilateral forums, but also focusing on recovery and resilience in its overall curricula.
- 23.51 More specifically, the subprogrammes will:
- (a) Continue to address in the curriculum the challenges that developing economies face, including coping with the economic consequences of crises and building resilience and response to shocks;
 - (b) Develop the modules of the capacity-building programme focusing on development, development policies and the role of international trade and finance in a globalized world; harnessing benefits from trade and changing dynamics in the multilateral trading system, as well as trade logistics, regional trade agreements and the digital economy; and enhancing the productive capacity of developing countries through foreign direct investment, enterprise development and science, technology and innovation;
 - (c) Roll out three regional courses in three of the five developing regions, covering Latin America and the Caribbean, (to be held in Buenos Aires), the Middle East and North Africa (to be held in Cairo) and Eastern Europe (to be held in Skopje). These courses will be tailored to the specific requirements of each region;
- 23.52 The response would complement the planned work of all UNCTAD subprogrammes to be undertaken through the regular budget of section 12 to further enhance the capacity of policymakers to formulate policies and provide advisory services in the context of major economic trends and debates in multilateral forums, emphasizing various approaches that countries have taken to derive maximum development gains.
- 23.53 The expected response in 2025 would contribute to results under all five subprogrammes, including to developing countries being equipped with policy proposals and measures to develop sustainable industrialization strategies to establish more resilient economies, which is reflected in result 2 of subprogramme 1, and the related performance measure (see table 23.8); to consensus reached by a subgroup of Latin American countries on priority industrial policy measures to deploy at the regional

level and at the domestic level to favour the development of sustainable regional value chains; and to enhanced policymaking capacities to facilitate economic diversification through increased data capacities in services trade, which is reflected in result 2 of subprogramme 3, and the related performance measure (see table 23.9), in the proposed programme budget for 2025 ([A/79/6 \(Sect. 12\)](#)).

**Table 23.8
Performance measure**

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Consultations with an array of stakeholders on launching UNCTAD work on sustainable industrialization	Member States have access to a vast array of sustainable industrial policy options and ideas to mobilize resources to finance sustainable industrialization through the UNCTAD Division on Globalization and Development Strategies publication entitled “South-South cooperation for climate adaptation and sustainable development”	The Bolivarian Republic of Venezuela identified its priority sustainable value chains and Brazil and Honduras started the identification process and definition of the overall integration strategy to be pursued over the period 2024–2027	Consensus reached by a subgroup of Latin American countries on priority industrial policy measures to deploy at the regional level and at the domestic level to favour the development of sustainable regional value chains	At least 2 countries in Latin America are prepared and have the capacity to implement the priority industrial policies

**Table 23.9
Performance measure**

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Policymakers from Morocco and Paraguay have increased capacities to formulate national services trade policies in, inter alia, transport and logistics services	Member States benefit from the establishment of an open-ended and time-bound working group on data for services trade and development policies	Angola and Uzbekistan revised their services trade-related policies informed by better data collection and use	At least 3 additional countries adopt, revise or implement services trade-related policies informed by better data collection and use	At least 4 additional countries adopt, revise or implement services trade-related policies

B. Deliverables

Table 23.10

United Nations Conference on Trade and Development: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	46	50	51	51

C. Proposed non-post resource requirements for 2025

Table 23.11

Financial resources by object of expenditure

(Thousands of United States dollars)

	2023 expenditure	2024 approved	Changes		2025 estimate (before recosting)
			Total	Percentage	
Other staff costs	1 322.3	1 365.3	38.5	2.8	1 403.8
Consultants	91.6	–	–	–	–
Experts	21.9	–	–	–	–
Travel of staff	214.3	298.7	17.5	5.9	316.2
Contractual services	18.8	–	–	–	–
General operating expenses	125.8	–	–	–	–
Supplies and materials	4.4	–	–	–	–
Furniture and equipment	42.2	–	–	–	–
Grants and contributions	150.5	477.6	13.5	2.8	491.1
Other	2.3	–	–	–	–
Total	1 994.1	2 141.6	69.5	3.2	2 211.1

23.54 The proposed regular budget resources for 2025 amount to \$2,211,100 before recosting, reflecting an increase of \$69,500, or 3.2 per cent, compared with the approved budget for 2024. The increases under other staff costs (\$38,500), travel of staff (\$17,500) and grants and contributions (\$13,500) will allow UNCTAD to respond to anticipated requests from Member States, including for advice on and support for the development of sustainable industrialization strategies, and to build their readiness to engage in e-commerce and digital trade.

3. Human settlements

Programmatic activities delivered through the regular programme of technical cooperation

23.55 The activities under human settlements are implemented by UN-Habitat, through all four subprogrammes, contributing to their objectives and expected results and complementing their relevant strategies and deliverables. Over the period of the strategic plan for the period 2020–2025, activities under the regular programme of technical cooperation include:

- (a) Responses provided to Member States' requests for support;

- (b) Short-term advisory services on strategically selected, high-priority issues;
 - (c) The identification, development and launch of innovative and illustrative cooperation programmes;
 - (d) Specialized support to the implementation, monitoring and replication of such cooperation programmes.
- 23.56 The aim is to support Governments and partners in the implementation of the New Urban Agenda and the human settlements dimension of other multilateral agreements, such as the Sustainable Development Goals (with a focus on Goal 11), with a stronger focus on crisis-affected countries. UN-Habitat supports Member States in the development of sustainable cities and human settlements through its normative and operational work at all levels. In implementing such activities, the regular programme of technical cooperation contributes to the objectives and expected results of the subprogrammes and complements their relevant strategies and deliverables, which can be found in the relevant paragraphs of the programme budget for 2025 ([A/79/6 \(Sect. 15\)](#)).

Outreach and dissemination of guidelines to Member States on the opportunities for assistance through the regular programme of technical cooperation

- 23.57 UN-Habitat raises awareness of opportunities for countries to gain access to assistance with meetings, workshops and seminars with government officials and in the context of intergovernmental meetings, conducts initial assessments of needs and attempts to match them with in-house expertise, and seeks to integrate long-term requests with relevant flagship programmes.

Response provided to Member States' requests for support in 2023

- 23.58 In 2023, UN-Habitat responded to requests on sustainable urban development from a wide range of regions, countries and locations. It developed a comprehensive set of digitized tools in the areas of urban planning, governance and municipal finance, including applications based on the Global Urban Monitoring Framework, which were piloted in Bolivia (Plurinational State of), Malaysia, Tunisia and Zambia. The application of methodology and tools for cities were provided to a broad range of cities, including tools adopted in 10 cities in Ghana, and were promoted, among others, in Costa Rica and Türkiye. UN-Habitat also supported the establishment of technical hubs in Bolivia (Plurinational State of), Colombia, Costa Rica, Ghana, Morocco, Portugal, Tunisia and Türkiye, as well as in Kosovo,² and sought to complementarily apply the methodology and tools to specific thematic contexts at key events, including women's leadership at the Commission on the Status of Women and sport as a driver of Sustainable Development Goals localization at the Sustainable Development Goals Summit.
- 23.59 UN-Habitat's technical cooperation with Azerbaijan resulted in the "2023 Azerbaijan Urban Week", including the second National Urban Forum, the first Organization of Turkic States ministerial meeting on housing and sustainable urbanization and the global observance of the 2023 World Habitat Day in Baku. Consequently, this furthered demand by countries from the wider region. Aiming to incentivize cities to accelerate the achievement of the Sustainable Development Goals and New Urban Agenda implementation, UN-Habitat and the Shanghai municipal government co-launched the Global Award for Sustainable Development in Cities ("Shanghai Award") in October 2023 on World Cities Day, awarded to five cities from countries in Africa, Latin America and Asia-Pacific (Australia, Brazil, China, Malaysia and Uganda) at events at which more than 400 participants from more than 30 countries participated. The Shanghai Manual for 2023 was also launched, providing 24 best practice cases and policy recommendations from 14 countries across 6 regions.

² All references to Kosovo should be understood within the context of Security Council resolution [1244 \(1999\)](#).

Voluntary local reviews to enhance the shared prosperity of cities and regions globally through Sustainable Development Goals localization

(Result 2 of subprogramme 2 (A/79/6 (Sect. 15)))

- 23.60 The regular programme of technical cooperation, along with the United Nations Development Account, allowed UN-Habitat to cooperate in joint regional initiatives in Eastern Europe and Central Asia with various United Nations partners; with the United Nations Environment Programme on nature-based solutions to address urban air pollution and sustainable urban mobility; and with ECE in the preparation of voluntary local reviews for selected urban areas in the region. UN-Habitat also supports the implementation of the Secretary-General’s Action Agenda on Internal Displacement, emphasizing the urban dimension of displacement, with a focus on Burkina Faso, Colombia, Iraq and Somalia.
- 23.61 UN-Habitat’s work contributed to the development of 12 voluntary local reviews, which exceeded the planned target of 10 such reviews. This work also contributed to the development of 29 voluntary local reviews globally, which did not meet the planned target of 60 such reviews but nevertheless generated interest in voluntary local reviews for urban development planning through a regional initiative in four cities in Eastern Europe and Central Asia (Nis, Serbia, Tbilisi, Bishkek and Dushanbe). This is reflected in result 2 of subprogramme 2, and the related performance measure (see figure 23.V), in the proposed programme budget for 2025 (A/79/6 (Sect. 15)).

Figure 23.V
Performance measure: number of voluntary local reviews prepared by local and regional governments (annual)

Expected response to anticipated requests for support in 2025

Voluntary local reviews to enhance shared prosperity of cities and regions globally through Sustainable Development Goals localization

(Result 2 of subprogramme 2 (A/79/6 (Sect. 15)))

- 23.62 For 2025, Member States are expected to increase requests for technical advisory services on integrated programming, resulting in more transformative action that allows countries and cities to accelerate their achievement of the urban dimensions of the Sustainable Development Goals and the implementation of those dimensions in the New Urban Agenda and other global agendas as set forth in the decade of action to deliver the Goals. The localization of the Goals, housing, and climate and urban crisis response in

selected countries in sub-Saharan Africa, the Middle East and North Africa, Central and South-East Asia, Latin America and the Caribbean, and Eastern Europe will be a specific focus.

23.63 In response to the anticipated requests in 2025, UN-Habitat will continue to support result 2 of subprogramme 2, as referenced in the section above on 2023 results, by undertaking the following activities:

- (a) Providing technical advisory services, in particular to countries in the Eastern Europe and Central Asia regions, alongside the establishment of subregional presences;
- (b) Providing technical advisory services in response to urban crisis situations, focusing on preparedness, response, recovery and reconstruction, risk reduction and resilience, including on identifying solutions to urban displacement;
- (c) Providing technical advisory services to least developed countries, landlocked developing countries and small island developing States on climate adaptation and access to adequate housing;
- (d) Providing capacity-building support to least developed countries, landlocked developing countries and small island developing States, including in identifying capacity gaps and developing capacity-building strategies in support of implementing the New Urban Agenda and the achievement of the Sustainable Development Goals;
- (e) Providing technical advisory services and knowledge exchange for supporting countries of the Association of Southeast Asian Nations and landlocked developing countries in the south Caucasus and Central Asia in achieving the Sustainable Development Goals and implementing the New Urban Agenda;
- (f) Promoting technical cooperation and knowledge exchange among regions, including through the Shanghai Award for 2025, the Shanghai Adapted Index and Shanghai Manual for 2025.

23.64 The expected response in 2025 would contribute to the implementation of the outcomes of the urban dimensions of the 2030 Agenda and the New Urban Agenda, which is reflected in result 2 of subprogramme 2, and the related performance measure (see figure 23.V), in the proposed programme budget for 2025 (A/79/6 (Sect. 15)).

Deliverables

Table 23.12

United Nations Human Settlements Programme: deliverables for the period 2023–2025, by category and subcategory

	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	28	32	28	28

C. Proposed non-post resource requirements for 2025

Table 23.13
Financial resources by object of expenditure

	2023 expenditure	2024 approved	Changes		2025 estimate (before recosting)
			Total	Percentage	
Other staff costs	752.6	1 008.0	46.7	4.6	1 054.7
Consultants	125.7	192.0	–	–	192.0
Travel of staff	84.9	95.0	–	–	95.0
Contractual services	43.5	111.2	–	–	111.2
General operating expenses	32.1	26.2	–	–	26.2
Supplies and materials	53.1	0.7	–	–	0.7
Furniture and equipment	6.8	7.2	–	–	7.2
Grants and contributions	(45.9)	–	–	–	–
Total	1 052.8	1 440.3	46.7	3.2	1 487.0

- 23.65 The proposed regular budget resources for 2025 amount to \$1,487,000 before recosting, reflecting an increase of \$46,700, or 3.2 per cent, compared with the approved budget for 2024. The proposed increase under other staff costs (\$46,700) will enable UN-Habitat to respond to additional requests from Member States in 2025, including to advise on the achievement of the urban dimensions of the Sustainable Development Goals and the New Urban Agenda.

4. International drug control, crime and terrorism prevention and criminal justice

A. Programmatic activities delivered through the regular programme of technical cooperation

- 23.66 The activities under this sector are implemented by UNODC under subprogramme 8, Technical cooperation and field support, and contribute to the objectives and expected results of all subprogrammes. Expected results are implemented in close coordination with the UNODC field office network, which complements the subprogrammes' relevant strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2025 (A/79/6 (Sect. 16)).
- 23.67 In 2023, the strategic priority of strengthening work with young people in Africa was identified in order to implement the cross-cutting commitment to youth empowerment in the UNODC strategy for the period 2021–2025 and the Strategic Vision for Africa 2030. In response, in 2024 UNODC placed a new Regional Adviser on Youth Programming and Mainstreaming based in Pretoria because this region has the least ongoing activities for and with young people and a great need for UNODC support. The Regional Adviser will provide policy advice, partnership-building, fundraising and development of holistic youth programmes or initiatives that span across UNODC mandates.

Outreach and dissemination of guidelines to Member States on the opportunities for assistance through the regular programme of technical cooperation

- 23.68 The outreach and dissemination of guidelines to Member States are provided through regular dialogues with national counterparts; national campaigns to observe the International Day against Drug Abuse and Illicit Trafficking, World Day against Trafficking in Persons and International Anti-Corruption Day; and fundraising initiatives and strategic partnerships with regional and international stakeholders. UNODC also liaises with United Nations country team members to

discuss pending requests for regular programme of technical cooperation support and devise coordinated approaches to Member States’ needs.

Responses provided to Member States’ requests for support in 2023

Enhanced fuel controls in the Galapagos, Ecuador, to disrupt maritime crime

(Programme performance in 2023 of subprogramme 8 (A/79/6 (Sect. 16)))

- 23.69 UNODC receives a number of requests from Member States, in a broad range of areas covering the entirety of the Office’s mandate. UNODC supports policy advice and technical capacity annually through two interregional advisers’ full-time work and missions and a number of field projects that are devised to support specific action. As an example of the 23 field initiatives funded by the regular programme of technical cooperation in 2023, UNODC received a request to support the Government of Ecuador and the relevant agencies in responding to the challenges hindering effective maritime law enforcement in the Galapagos, Ecuador. The Office provided targeted technical assistance aimed at enhancing interinstitutional coordination against maritime crime. Through two technical assistance sessions, held in 2022 and 2023, UNODC facilitated discussions and knowledge-sharing among relevant stakeholders to address inadequacies in administrative controls and information exchange. This work contributed to strengthen administrative controls on fuel supply in the Galapagos, thereby disrupting the operations of criminal networks involved in drug trafficking and other maritime crimes. In addition, tracking the sex-disaggregated data (e.g., 6 women of 12 total participants) highlighted the inclusivity and gender sensitivity of the training initiative.
- 23.70 The above-mentioned work contributed to disrupting maritime crime in the region and ensuring the protection of its unique marine ecosystem and the safety of local communities to assess the threat posed by fuel trafficking and maritime crime in the Galapagos through operational and legal analysis and an endorsement of interinstitutional guidelines for maritime law enforcement coordination by the Consejo de la Judicatura, which is reflected in the program performance in 2023, and the related performance measure (see table 23.14), in the proposed programme budget for 2025 (A/79/6 (Sect. 16)).

Table 23.14
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
–	Law enforcement agencies in the Galapagos establish mechanisms to improve interinstitutional coordination in their response against fuel trafficking and maritime crime	Strengthened administrative controls on fuel supply through endorsement of interinstitutional guidelines for maritime law enforcement in the Galapagos

Expected response to anticipated requests for support in 2025

Navigating challenges to safety at sea through strengthened maritime safety management systems

(Result 3 of subprogramme 8 (A/79/6 (Sect. 16)))

- 23.71 For 2025, UNODC expects to receive an increasing number of requests from Member States across a number of themes. In response, it plans to contribute, through policy advice and technical support to developing countries, countries in transition and post-conflict countries, to: (a) acceding to and implementing international instruments on drug and crime control; (b) strengthening and reforming Member States’ criminal justice systems in line with norms, standards and existing good practices; (c) supporting the development of the capacity of national counterparts in the areas of drug control and addressing organized crime, terrorism prevention and criminal justice; and (d) developing new youth-focused projects and programmes in all UNODC mandate areas at the country, subregional and regional levels. In this regard, UNODC will arrange technical workshops and deliver training to

criminal justice practitioners, policymakers and professionals in specialized areas, hold expert group meetings, and undertake strategic missions and assessments on a specific country or thematic needs with the aim of engaging in the subsequent design of upscaled, longer-term technical assistance programmes. Through regular programme of technical cooperation funds, UNODC will focus on least developed countries, landlocked developing countries and small island developing States, as well as on vulnerable groups and fragile States’ crises.

- 23.72 As a concrete example, UNODC will work, among others, on maritime enforcement. In fact, maritime trade routes in the South Atlantic and the Indian Oceans are linked by port facilities that face challenges with regard to maritime enforcement, compliance with international standards for safety and security, and regional cooperation. The subprogramme’s work strengthened the safety of navigation in nine countries in the region and ensured the development and implementation of port security legislations and related compliance frameworks. The expected response in 2025 would contribute to results under all subprogrammes concerned, among others, to increase international cooperation and strengthen the institutional and legislative capacity of Member States to detect, prevent, investigate and prosecute transnational organized crime and new and emerging crimes. The capacity-building activities will enable competent national authorities to conduct daily patrolling, strengthen International Ship and Port Facility Security Code compliance in additional ports and facilitate inter-agency security meetings. Expected deliverables are: (a) a reduced volume of substandard vessels posing threats to seafarers and to the economies of coastal States; (b) five ports in the region become Code-compliant; and (c) at least one port in each target country becomes Code-compliant.
- 23.73 The expected response in 2025 would contribute to strengthened port security and maritime safety management systems, which is reflected in result 3 of subprogramme 8, and the related performance measure (see table 23.15), in the proposed programme budget for 2025 (A/79/6 (Sect. 16)).

Table 23.15
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
9 countries review/establish mechanisms to domesticate international regulations on maritime crime in domestic legislation	Enhanced regional coordination in the prosecution of maritime crime	Ports in 9 countries start conducting daily patrols and review their port facility security plans Protected radiata tortoises seized in Madagascar A new port control unit established in Maputo	9 ports become International Ship and Port Facility Security Code-compliant	At least 1 port in each of the 9 countries assisted is International Ship and Port Facility Security Code-compliant

- 23.74 In line with recently developed regular programme of technical cooperation standard reporting guidelines, the performance measure will be the number of technical workshops and training sessions delivered to criminal justice practitioners, policymakers and professionals in specialized areas with sex-disaggregated data and the contribution by UNODC to the development of new policies, law, national plans and strategies. In particular, the expected response in 2025 would contribute to increased international cooperation and strengthened institutional and legislative capacity of Member States to detect, prevent, investigate and prosecute transnational organized crime and new and emerging crimes, thereby enhancing maritime safety, security and compliance with international standards in the South Atlantic and Indian Ocean regions. This work will bolster regional cooperation, reduce transnational organized crime and safeguard the economies and welfare of coastal States and seafarers.

Efforts to ensure complementarity with the resident coordinator system

23.75 UNODC has aligned with the resident coordinator system to deliver a coherent, effective, efficient and accountable response in accordance with national needs and priorities in country settings and the implementation of the country-level chapter of the management and accountability framework. As of January 2024, UNODC supported 150 countries and territories through United Nations Sustainable Development Cooperation Frameworks or the common country analysis. UNODC is present in 97 countries and territories and without a physical presence in 53 others. It contributes to strengthening system-wide analysis, planning and reporting through Cooperation Frameworks and regional collaborative platforms.

B. Deliverables

Table 23.16
United Nations Office on Drugs and Crime: deliverables for the period 2023–2025, by category and subcategory

	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	25	23	25	18

C. Proposed non-post resource requirements for 2025

Table 23.17
Financial resources by object of expenditure
 (Thousands of United States dollars)

	<i>2023 expenditure</i>	<i>2024 approved</i>	<i>Changes</i>		<i>2025 estimate (before recosting)</i>
			<i>Total</i>	<i>Percentage</i>	
Other staff costs	345.2	745.0	–	–	745.0
Consultants	168.0	69.9	–	–	69.9
Travel of staff	84.2	64.0	–	–	64.0
Contractual services	148.2	131.4	38.7	29.5	170.1
General operating expenses	48.5	4.1	–	–	4.1
Supplies and materials	1.3	–	–	–	–
Furniture and equipment	39.9	–	–	–	–
Grants and contributions	90.2	175.1	–	–	175.1
Other	1.5	–	–	–	–
Total	927.1	1 189.5	38.7	3.3	1 228.2

23.76 The proposed regular budget resources for 2025 amount to \$1,228,200 before recosting, reflecting an increase of \$38,700, or 3.3 per cent, compared with the approved budget for 2024. The increase in contractual services would provide for additional capacity-building support required in the delivery of technical assistance as a result of the growing number of requests by Member States.

5. Human rights

A. Programmatic activities delivered through the regular programme of technical cooperation

- 23.77 The activities under human rights are implemented by OHCHR and will contribute to building and strengthening national, subregional and regional capacity and structures to address implementation gaps for the protection and promotion of all human rights.
- 23.78 The expected results are implemented under subprogramme 1, Human rights mainstreaming, right to development, and research and analysis, and subprogramme 3, Advisory services, technical cooperation, and field activities. The regular programme of technical cooperation contributes to the objectives and expected results of these subprogrammes and complements their relevant strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2025 (A/79/6 (Sect. 24)).
- 23.79 In 2025, regular programme of technical cooperation-funded activities will enhance Member States' capacity to formulate and implement national development policies, national plans, strategies and laws to address implementation gaps for the protection and promotion of all human rights. They will also be intended to promote the sharing and exchange of knowledge and practices across geographical regions, focusing on providing technical assistance to Member States, at their request, in: (a) enhancing the awareness, knowledge and skills of policymakers and public officials, as well as of regional and subregional organizations, on international human rights standards and mechanisms and on the human rights implications of their work; (b) adopting laws that establish national human rights institutions or strengthen their capacity; (c) enhancing cooperation among Governments, national human rights institutions and non-governmental organizations within their relevant regions in addressing human rights issues that require a regional approach and initiative; and (d) advancing the integration of human rights, including the right to development, into development processes, with a focus on supporting Member States in their efforts to achieve the Sustainable Development Goals and in contributions to be made by the United Nations in the field.
- 23.80 OHCHR, through regular programme of technical cooperation interventions at the national, subregional and regional levels in the form of advisory services, through global, regional and national technical cooperation projects, through conferences, seminars, workshops and group training, and through fellowships and partnerships, will pursue its technical assistance objectives by working closely with the national and regional human rights structures, civil society and other stakeholders, and the United Nations country teams and other partners for effective coordination, building on complementarity.
- 23.81 Priority will continue for the needs of least developed countries, small island developing States, countries emerging from conflict and other countries with special needs, such as post-conflict or landlocked developing countries, placing the principles of equality, non-discrimination and participation at the centre of OHCHR activities, with special attention given to marginalized groups. Emphasis will also be placed on assistance for operationalizing the commitment to leaving no one behind, as well as on economic and social rights and the Secretary-General's call for a new social contract.

Outreach and dissemination of guidelines to Member States on the opportunities for assistance through the regular programme of technical cooperation

- 23.82 The subprogrammes receive requests for support through word of mouth and face-to-face meetings with government officials from Member States. Outreach takes place in the context of intergovernmental meetings, meetings with government officials, national human rights institutions and civil society in countries where OHCHR has a field presence, as well as through capacity-building activities, including conferences, workshops and wider consultations. These informal settings allow for an initial assessment of country needs and attempts at matching them with in-house expertise.

Response provided to Member States' requests for support in 2023**Towards implementation by Member States of recommendations emanating from international human rights mechanisms**

(Result 2 of subprogramme 3 ([A/79/6 \(Sect. 24\)](#)))

- 23.83 In 2023, OHCHR engagement in sub-programme 1 resulted in the strengthening of the integration of human rights and human rights-based approaches into the common country analysis and the United Nations Sustainable Development Cooperation Framework, including development plans and policies, such as economic policies, aimed at achieving the 2030 Agenda at the country level.
- 23.84 With regard to the common country analysis and the United Nations Sustainable Development Cooperation Framework processes, OHCHR provided operational advice, research, and analytical and programmatic content to the socioeconomic sections of the analysis, including the political economy and social inclusion dimensions, resulting in new Cooperation Frameworks for Angola, Malawi, Lesotho and Mauritius referring to the enhancement of human rights.
- 23.85 With regard to the strengthened and sustained capacities of United Nations staff to assist resident coordinator offices, United Nations country teams and Governments in mainstreaming human rights and leave no one behind and gender equality and women's empowerment guiding principles, OHCHR organized a training-of-trainers session, which resulted in training for the United Nations country team in Nepal, in Guinea-Bissau for the National School of Administration and for staff from resident coordinator offices and United Nations country teams in the eight African countries designing a new United Nations Sustainable Development Cooperation Framework.
- 23.86 OHCHR contributed to the 2023 knowledge exchange on approaches and tools for the 2023 voluntary national reviews, organized by the Department of Economic and Social Affairs, by presenting the publication titled "Human rights and voluntary national reviews: operational common approach guidance note". OHCHR also co-organized, with the University for Peace, an online workshop on mainstreaming the right to development in voluntary national review reporting for realizing the Sustainable Development Goals. The 149 participants from 60 countries strengthened their capacity to work towards operationalizing the right to development in implementing the 2030 Agenda.
- 23.87 In 2023, the subprogrammes' work continued to provide advisory services and deliver technical cooperation activities to least developed countries and small island developing States to enhance their capacity to implement recommendations emanating from international human rights mechanisms. For example, the Caribbean capacity-building workshop on treaty body reporting and the strengthening of the national mechanisms for implementation, reporting and follow-up in October 2023 strengthened the understanding and commitment of government representatives from 13 Caribbean countries to establish and strengthen those mechanisms and gain access to the national recommendation tracking database, and increased compliance with reporting obligations to treaty bodies, which is reflected in result 2 of subprogramme 3, and the related performance measure (see figure 23.VI), in the proposed programme budget for 2025 ([A/79/6 \(Sect. 24\)](#)).

Figure 23.VI
Performance measure: number of least developed countries and small island developing States that implement recommendations emanating from international human rights mechanisms (cumulative)

Expected response to anticipated requests for support in 2025

Strengthened effectiveness of national human rights institutions in line with the Paris Principles (Result 3 of subprogramme 3 (A/79/6 (Sect. 24)))

- 23.88 In 2025, OHCHR will continue to respond to requests linked to subprogramme 1 on human rights mainstreaming, right to development and research and analysis, to sustain efforts towards addressing implementation gaps for the protection and promotion of all human rights, including as regards the implementation of the 2030 Agenda, its Sustainable Development Goals and the principle of leaving no one behind.
- 23.89 Lastly, subprogramme 3 will continue to provide Member States and stakeholders in all regions with advisory services and technical cooperation programmes to establish or strengthen the effectiveness of national human rights institutions, in accordance with the principles relating to the status of national institutions for the promotion and protection of human rights (Paris Principles). The expected response would contribute to the advancement of the promotion and the protection of the effective enjoyment by all of all human rights, through enhanced capacity-building, including assistance to requesting States, which would be demonstrated by an increased number of national human rights institutions established or strengthened with the subprogramme’s support, which is reflected in result 3 in subprogramme 3, and the related performance measure (see figure 23.VII), in the proposed programme budget for 2025 (A/79/6 (Sect. 24)).

Figure 23.VII
Performance measure: number of national human rights institutions established or strengthened in line with the Paris Principles (cumulative)

Grants and contributions	492.5	1 130.7	–	–	1 130.7
Other	2.9	–	–	–	–
Total	2 676.9	2 895.7	93.9	3.2	2 989.6

23.90 The proposed regular budget resources for 2025 amount to \$2,989,600 before recosting, reflecting an increase of \$93,900, or 3.2 per cent, compared with the approved budget for 2024. The proposed increase under general operating expenses (\$93,900) is intended to address the increasing number of requests from Member States worldwide to facilitate remote participation to enhance inclusivity and accessibility for meeting and workshop participants unable to attend meetings in person, thereby improving the regular programme of technical cooperation's technical cooperation assistance.

6. Humanitarian assistance**A. Programmatic activities delivered through the regular programme of technical cooperation**

23.91 The activities under humanitarian assistance are implemented by the Office for the Coordination of Humanitarian Affairs under all four subprogrammes. In implementing these activities, the regular programme of technical cooperation contributes to the objectives and expected results of the above subprogrammes and complements their relevant strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2025 ([A/79/6 \(Sect. 27\)](#)).

Outreach and dissemination of guidelines to Member States on the opportunities for assistance through the regular programme of technical cooperation

23.92 In 2024, the first Global Learning Forum was held, drawing on a report of one year of learning from the flagship initiative countries, in which the resident and humanitarian coordinators of the four pilot countries (Colombia, the Niger, the Philippines and South Sudan), partners and donors came together to take stock of the approach and discuss lessons learned and persistent challenges across the various contexts.

Response provided to Member States’ requests for support in 2023

Addressing emerging risks in the humanitarian operating environment
(Result 2 of subprogramme 1 ([A/79/6 \(Sect. 27\)](#)))

23.93 The subprogramme’s work contributed to the identification of gaps in the protection of the humanitarian system against risks associated with the use of ICT and availability of operational guidance on data responsibility in humanitarian action, which covers principles and recommended action to ensure the safe, ethical and effective management of personal and non-personal data at all levels of the humanitarian system, as reflected in result 2 of subprogramme 1, and the related performance measure (see table 23.20), in the proposed programme budget ([A/79/6 \(Sect. 27\)](#)).

Table 23.20
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Increased availability of information and use of strategic technologies by humanitarian actors	Member States and the humanitarian community discuss risks associated with the use of ICT	Gaps identified in the protection of the humanitarian operating environment against risks associated with the use of ICT Operational guidance on data responsibility in humanitarian action available to humanitarian community	Humanitarian community begins to develop collective solutions to address gaps in the protection of the humanitarian operating environment against risks associated with the use of ICT	Humanitarian community begins to implement collective solutions to address gaps in the protecting the humanitarian operating environment against risks associated with the use of ICT

Expected response to anticipated requests for support in 2025

Increased engagement of communities in humanitarian response to effectively address their needs
(Result 3 of subprogramme 1 ([A/79/6 \(Sect. 27\)](#)))

23.94 In 2025, efforts to enhance disaster response preparedness will continue, leveraging the collaborative successes of 2023, including in the Latin America and the Caribbean, Africa and Asia and the Pacific regions. It is expected that more requests for data, documented evidence and lessons of best practices will be received from Member States.

23.95 A significant focus will be placed on strengthening the capacity and methodologies of Governments, non-governmental organizations and the private sector across these areas. The objective is to improve their collaborative effectiveness during the critical initial phases of disasters. This will be

achieved through continued strengthening of the rapid-response capacities through standardized and improved response methodologies. For 2025, the Regional Consultative Group on Humanitarian Civil-Military Coordination for Asia and the Pacific will bring together humanitarian actors, local organizations, government officials and military actors involved in disaster preparedness and response in the region to share lessons learned and best practices.

- 23.96 These concerted efforts will refine international disaster response mechanisms, such as those developed by the International Search and Rescue Advisory Group and the United Nations Disaster Assessment and Coordination Team, making them more versatile and applicable to various disaster situations.
- 23.97 The expected response in 2025 would contribute to crisis-affected people receiving humanitarian assistance in the immediate aftermath of a catastrophe as emergency responders become equipped with the skills and capacity to deploy and respond to sudden-onset emergencies, which is reflected in result 3 of subprogramme 1, and the related performance measure (see table 23.21), in the proposed programme budget for 2025 (A/79/6 (Sect. 27)).

Table 23.21
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Stakeholders in the humanitarian system, including Governments, partners and communities in 4 countries (Colombia, the Niger, the Philippines and South Sudan) commence pilot initiative for community-centric coordination and response structures	Increased active listening approaches adopted in pilot countries	Increased community participation and local actors' engagement in the design and implementation of humanitarian coordination and response structures, including financing, with a view to assessing practices for further scaling and replicating for other contexts

B. Deliverables

Other	1.0	–	–	–	–
Total	672.0	824.5	26.8	3.3	851.3

23.98 The proposed regular budget resources for 2025 amount to \$851,300 before recosting, reflecting an increase of \$26,800, or 3.3 per cent, compared with the approved budget for 2024. The increase (\$26,800) under furniture and equipment is to purchase emergency ICT equipment for locations with limited or no connectivity, in support of anticipated requests for assistance from Member States.

II. Regional and subregional advisory services

7. Economic and social development in Africa

A. Programmatic activities delivered through the regular programme of technical cooperation

23.99 The activities under economic and social development in Africa are implemented by ECA, through all subprogrammes, and are used to support African countries in their capacity development efforts and technical advisory services.

23.100 In implementing these activities, the regular programme of technical cooperation contributes to the objectives and expected results of the subprogrammes and complements their relevant strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2025 (A/79/6 (Sect. 18)).

Response provided to member States' requests for support in 2023

23.101 In 2023, ECA received a number of requests from member States to strengthen their capacity to mobilize domestic resources through effective debt management and development of domestic capital markets. The ability of Governments to mobilize domestic resources to meet financing needs is central to the achievement of the Sustainable Development Goals and Agenda 2063 of the African Union: The Africa We Want. To support them, subprogramme 1 convened peer learning workshops for policymakers from Ethiopia, Sierra Leone, South Africa, the Sudan and Zambia to facilitate experience-sharing among States in debt management strategies and capacity-building in debt statistics compilation for effective debt restructuring. Subprogramme 3 supported the capacity-building of policymakers from line ministries, central banks and development financial institutions in sovereign ratings and assessments of the country's readiness for a sovereign credit rating exercise.

Subprogramme 5 supported the Sustainable Debt Coalition initiative in advocating for the comprehensive reform of the global sovereign debt architecture to help developing countries to achieve their climate commitments.

Expected additional requests for support from Member States for 2025

- 23.102 In response to an anticipated increase in the volume of requests for assistance from Member States, in the context of the realignment of its programme of work ECA would provide additional support alongside the main areas of focus: macroeconomic policies and development financing; regional integration, economic diversification and sustainable industrialization; infrastructure development, including energy; technology, innovation and connectivity; and climate action and food security as enablers of the 2030 Agenda and Agenda 2063, in the context of the second 10-year implementation plan of Agenda 2063 launched at the thirty-seventh ordinary session of the Assembly of Heads of State and Government of the African Union, in February 2024. ECA will address emerging challenges and opportunities in Africa through, primarily, upscaling its work on land and agriculture transformation aimed at improving food security, and increasing investment in climate action for enhanced resilience and innovative financing tools and economic governance instruments to boost domestic resource mobilization, as well as address debt management. It will also seek the enhanced mainstreaming of data and statistics and the improved integration of social dimensions towards strengthening links between social and economic development programmes.

Efforts to ensure complementarity with the resident coordinator system

- 23.103 ECA has developed and endorsed a strategy towards enhancing close collaboration with the resident coordinator system at all levels, including the regional, subregional and national levels, encompassing all sources of funding, including the regular programme of technical cooperation. While designing their project proposals, subprogrammes have to meet several strategic criteria as defined in internal guidelines and templates updated on an annual basis and follow annual reporting templates and recommendations emanating from United Nations Headquarters-based budget and administrative committees. One of these criteria is related to the consultation and sustained collaboration with the resident coordinator system while implementing projects in the framework of beneficiary country United Nations Sustainable Development Cooperation Frameworks, which will be demonstrated and evidenced during reporting.
- 23.104 ECA also collaborates with the resident coordinator system and United Nations country teams, including on regular programme of technical cooperation projects through the Regional Collaborative Platform, in which the resident coordinators request support through the Regional Collaborative Platform joint secretariat and relevant opportunity/initiative-based coalitions are deployed to provide the requested support. At this regional level, ECA works closely with the Africa office of the Development Coordination Office in planning this type of support. In addition, the ECA subregional offices, which serve as non-resident members of the United Nations country teams in their relevant regions, contribute to the work of the United Nations country teams, including on the development of common country analyses, United Nations Sustainable Development Cooperation Frameworks and technical advisory services, some of which is funded under the regular programme of technical cooperation. Leveraging on its strength in convening a wide range of stakeholders on Africa's development priorities, ECA further engage resident coordinators in the planning, organization and delivery of its intergovernmental regional platforms such as the Africa Regional Forum on Sustainable Development.

Review of high-level positions at headquarters duty stations

- 23.105 The main function of interregional advisers is to provide technical expertise, facilitate the transfer of knowledge from global deliberations and the most recent analytical work to Governments and institutions, and contribute to the formulation, assessment and/or evaluation of national and subregional policies, strategies, programmes and projects of Member States and regional economic communities, upon their request. The specific roles, functions and areas of expertise are reflected in

the job descriptions and terms of reference and are classified at the appropriate level. Any new appointments and extensions of appointments of interregional advisers are subject to the review and approval of the head of entity and onward processing by the human resources and the budget sections. The specific focus of each of these positions evolves over time in line with the ECA strategic focus areas, shifting Member State priorities and regional trends.

Outreach and dissemination of guidelines to member States on the opportunities for assistance through the regular programme of technical cooperation

- 23.106 ECA leveraged various communication channels to raise awareness and promote the regular programme of technical cooperation. A total of 34 outreach activities were undertaken, reaching 43 member States. ECA builds on its convening power through intergovernmental meetings, conferences and workshops, for example, the African Regional Forum on Sustainable Development, the annual Africa Climate Resilience Investment Summit and the Conference on Land Policy in Africa, to raise awareness of regular programme of technical cooperation opportunities.

Response provided to Member States' requests for support in 2023

Improvement in census undertakings as a result of digital applications (Programme performance in 2023 of subprogramme 4 (A/79/6 (Sect. 18)))

- 23.107 In 2023, ECA provided a response focused on the use of digital solutions to conduct national censuses in Burundi, Namibia and Senegal. In these countries, as is the case on most of the African continent, the quality and timeliness of population and housing census data continue to be a challenge. In addition, the cost of national censuses is a debilitating factor for many member States in terms of being able to conduct regular censuses to ensure up to-date population and housing statistics for national decision-making. Census data are central to, among other uses, national planning, effective resource allocation and service delivery, and provide vital information for the monitoring of and reporting on the Sustainable Development Goals. Therefore, ensuring the high quality, timeliness and frequency of national census data is a crucial factor in national development.
- 23.108 In response, ECA supported member States in strengthening capacity in census-mapping, geospatial data management and the development of geocoding schemes for the geospatial analysis of census data. ECA provided advisory services in census planning, questionnaire design and field management towards the implementation of censuses. It also supported the deployment of mobile technology for the collection of census and survey data, resulting in enhanced data quality and augmented efficiency in data production. Burundi, Namibia and Senegal were able to conduct their censuses and disseminate official statistics in a record time of approximately 4 months, compared with a continental average of 18 months. The utilization of resulting data and statistics is essential for any development intervention and tailor-made policymaking, hence the need to further upscale such support to other African countries, with a view to enhancing contributions of United Nations Development Account projects such as strengthening capacity for evidence-based social protection policies for responding to the triple global crisis in fuel, food and finance.
- 23.109 The above-mentioned work contributed to member States improving the quality and timeliness of census undertakings through technological applications, reflected in the section on programme performance in 2023 under subprogramme 4, and the related performance measure (see figure 23.VIII), in the proposed programme budget for 2025 (A/79/6 (Sect. 18)).

Figure 23.VIII
Performance measure: number of members of the Economic Commission for Africa improving the quality and timeliness of census undertakings through technological applications (cumulative)

Expected response to anticipated requests for support in 2025

Southern African members of the Economic Commission for Africa revise and implement their national industrial policy frameworks in line with regional industrialization strategies (Result 2 of component 5 of subprogramme 7 (A/79/6 (Sect. 18)))

- 23.110 Subprogramme 7, component 5, supports 11 countries, namely, Angola, Botswana, Eswatini, Lesotho, Malawi, Mauritius, Mozambique, Namibia, South Africa, Zambia and Zimbabwe. In pursuit of its mandate to deepen regional integration and strengthen capacities to achieve inclusive and sustainable industrialization for the reduction in poverty and inequality in the Southern Africa subregion, the subprogramme provides technical support to ECA member States, regional economic communities (Common Market for Eastern and Southern Africa and Southern African Development Community) and other intergovernmental organizations in enhancing their capacity to formulate and implement policies, strategies, and high-impact subregional initiatives in support of regional integration and inclusive and sustainable industrialization. Furthermore, the subprogramme collaborates with the African Union's Southern Africa regional office and other development organizations and United Nations entities to strengthen the capacities of member States to advance inclusive and sustainable development through implementation of the Southern African Development Community industrialization strategy and road map (2015–2063) and industrial policy (2015–2030).
- 23.111 ECA receives many requests for technical support from Member States on, among others, the review and formulation of national industrial policies and ensuring harmonization and alignment with regional policy frameworks on industrialization; the formulation of local content frameworks as strategies to enhance the participation of local enterprises in industrialization; interventions to develop special economic zones and industrial parks; and the development of regional value chains. For example, the subprogramme has, recently and upon request, supported Malawi (in 2022) and Zimbabwe (in 2023) in reviewing and developing their national industrial policies. Furthermore, the subprogramme also assisted Zimbabwe, in 2023, in developing its local content thresholds for the pharmaceutical, fertilizer and packaging subsectors as one of the key strategies for promoting industrialization and industrial growth in line with the country's newly formulated national industrial policy. The local content thresholds enhanced the capacity of local private sector players, including micro-, small and medium-sized enterprises, in Zimbabwe to tap into inherent economic potential across sectors to boost investment, beneficiation, value addition and the development of value chains. The thresholds would progressively increase the share of locally sourced labour, goods,

services and capital in the value chains of the three subsectors. These interventions were carried out within the framework of a United Nations Development Account project on innovative approaches towards entrepreneurship and private sector development to promote trade and inclusive industrialization in Southern Africa.

- 23.112 In response to the anticipated increased number of requests for support in 2025, the subprogramme will provide technical assistance and advisory services to more countries in Southern Africa, assisting them in aligning and harmonizing their national policies with regional policy frameworks to support industrial development in the subregion and assist them in stimulating an export diversification strategy through value addition and manufacturing, with the aim of increasing the share of manufacturing value added in gross domestic product.
- 23.113 The anticipated support would lead to national industrial policies harmonized and aligned with regional industrialization frameworks for improved industrial competitiveness of the southern Africa subregion. This would further result in economic diversification and transformation through value addition and the development of regional value chains, accelerated by transboundary industrial clusters, hubs and special economic zones in selected members of ECA, as well as enhanced capacities of local private sector actors, including micro-, small and medium-sized enterprises, to participate in industrial activities and in national and regional value chains.
- 23.114 The expected response in 2025 would contribute to enhancing the capacity of an increased number Southern Africa members of ECA to revise and implement their national industrial policy frameworks in alignment with regional industrialization strategies, which is reflected in result 2 of component 5 of subprogramme 7, and the related performance measure (see figure 23.IX), in the proposed programme budget for 2025 (A/79/6 (Sect. 18)).

Figure 23.IX
Performance measure: number of Southern Africa members of the Economic Commission for Africa that revise and implement their national industrial policy frameworks in alignment with regional industrialization strategies (cumulative)

B. Deliverables

Table 23.24

Grants and contributions	1 722.7	3 599.8	299.7	8.3	3 899.5
Other	(2.5)	–	–	–	–
Total	9 203.1	9 840.3	819.2	8.3	10 659.5

23.115 The proposed regular budget resources for 2025 amount to \$10,659,500 before recosting, reflecting an increase of \$819,200, or 8.3 per cent, compared with the approved budget in 2024. The increase under other staff costs (\$307,200), consultants (\$139,300), travel of staff (\$35,700), contractual services (\$37,300) and grants and contributions (\$299,700) would enable ECA to respond to anticipated additional requests for technical assistance and advice from member States in 2025 relating to the 2030 Agenda and Agenda 2063, given the context of the second 10-year implementation plan of Agenda 2063, launched in February 2024.

8. Economic and social development in Asia and the Pacific

A. Programmatic activities delivered through the regular programme of technical cooperation

23.116 The activities under economic and social development in Asia and the Pacific are implemented by ESCAP under all nine subprogrammes.

- 23.117 In response to an anticipated increase in the volume of requests for assistance from member States, ESCAP would provide additional funds for advisory services in response to continued demand from member States in Asia-Pacific for technical cooperation assistance and tailored services, including in the areas of climate finance, official statistics and environment statistics, with an emphasis on the advisory function to member States and intergovernmental organizations.
- 23.118 In implementing these activities, the regular programme of technical cooperation contributes to the objectives and expected results of the above subprogrammes and complements their relevant strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget report for 2025 ([A/79/6 \(Sect. 19\)](#)).

Outreach and dissemination of guidelines to Member States on the opportunities for assistance through the regular programme of technical cooperation

- 23.119 The secretariat of ESCAP continues to enhance awareness of the opportunities for technical assistance and services that the programme offers, upon request, in particular through: (a) official documentation of intergovernmental meetings, conferences, other events and forums and related public information; (b) regular briefing of the Advisory Committee of Permanent Representatives and Other Representatives Designated by Members of the Commission; (c) bilateral meetings of the Executive Secretary with senior officials and permanent representatives of member States; (d) official missions and advisory services of ESCAP senior management and other staff; and (e) official correspondence addressed to seats of Government relating to advisory and other technical assistance offerings available to member States upon request.

Response provided to member States' requests for support in 2023

More sustainable and efficient trade processes through increased digital and sustainable trade facilitation measures
(Result 3 of subprogramme 2 ([A/79/6 \(Sect. 19\)](#)))

- 23.120 In 2023, subprogramme 2, Trade, investment and innovation, responded to requests from member States to build capacity for trade negotiations. For example, ESCAP delivered a training workshop for officials in Mongolia on e-commerce-related negotiations, digital trade provisions and chapters in preferential trade agreements. The workshop included training on the use of the ESCAP online Trade Intelligence and Negotiation Adviser. The training sessions will ultimately be consolidated into an online course to be made available to all other interested stakeholders from the Asia-Pacific region starting in 2024. Several other online training sessions were also conducted in 2023, including on climate-smart trade and investment for sustainable development and on using the Trade Intelligence and Negotiation Adviser, with certificates of completion issued for participants in 11 countries in South-East and South Asia. Following specific requests from development partners, including the Central Asia Regional Economic Cooperation Programme and the Asia Development Bank, member States from the North and Central Asian subregion benefited from several training sessions on trade negotiations, including on using the Trade Intelligence and Negotiation Adviser.
- 23.121 The above-mentioned work contributed to more sustainable and efficient trade processes through increased digital and sustainable trade facilitation and the related performance measure of the implementation rate of digital and sustainable trade facilitation measures in Asia and the Pacific, which is reflected in result 3 of subprogramme 2, and the related performance measure (see figure 23.X), in the proposed programme budget for 2025 ([A/79/6 \(Sect. 19\)](#)).

Figure 23.X
Performance measure: implementation rate of digital and sustainable trade facilitation measures in Asia and the Pacific (annual)

(Percentage)

Expected response to anticipated requests for support in 2025

Strengthened financing for sustainable development, with a focus on innovative and emerging financing options in the Asia-Pacific region

(Result 1 of subprogramme 1 ([A/79/6 \(Sect. 19\)](#)))

Improved policymaking for macroeconomic and financing for development issues

(Result 3 of subprogramme 1 ([A/79/6 \(Sect. 19\)](#)))

- 23.122 At the fourth session of the Committee on Macroeconomic Policy, Poverty Reduction and Financing for Development, held from 1 to 3 November 2023, note was taken of the key findings contained in the ESCAP report titled *Sustainable Finance: Bridging the Gap in Asia and the Pacific* and recommended that ESCAP continue to provide capacity-building support and promote peer-to-peer learning and the sharing of experiences among member States in the areas of sustainable finance and public debt. Accordingly, subprogramme 1 focuses on providing country-level technical assistance for policymakers to identify enabling factors that can accelerate sustainable financing, which includes financing the energy transition, and to help to close investment gaps. In 2025, requests to support policy research in financing options and modalities for the energy transition, peer-learning activities and country-level training workshops are expected to increase. This would build on the work implemented in 2024 on addressing the challenges of financing the energy transition and strengthening green bond frameworks in the Asia-Pacific region, which is being delivered to Indonesia, the Philippines and Viet Nam.
- 23.123 Additional requests are also expected from a few countries in South-East and Central Asia in the area of financing climate action. The expected results complement activities being delivered under the sixteenth tranche of the United Nations Development Account, on catalysing climate finance and investment while ensuring debt sustainability in Asia-Pacific countries in special situations, including in Bhutan, Cambodia, Fiji and Mongolia. These achievements will also contribute to results 1 and 3 of subprogramme 1.
- 23.124 The expected response in 2025, to be delivered in particular through policy research, peer-learning activities and country-level training workshops, would contribute to strengthened financing for sustainable development, with a focus on innovative and emerging financing options in the Asia-Pacific region, which is reflected in result 1 of subprogramme 1, and the related performance measure (see table 23.26), in the programme budget for 2025 ([A/79/6 \(Sect. 19\)](#)), and improved policymaking for macroeconomic and financing for development issues, which is reflected in result 3 of subprogramme 1, and the related performance measure (see table 23.27), in the proposed programme budget for 2025 ([A/79/6 \(Sect. 19\)](#)).

Table 23.26
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
New policy initiatives or reforms by 3 Member States (Bangladesh, Cambodia and Vanuatu) to strengthen financing and resource mobilization and allocation for sustainable development	New policy initiatives or reforms by 3 Member States (Bangladesh, Bhutan and Cambodia) to strengthen financing and resource mobilization and allocation for sustainable development	New policy initiatives or national strategies by 3 Member States (Bhutan, Cambodia and Sri Lanka) to strengthen financing and resource mobilization and allocation for sustainable development	New policy initiatives or reforms by 3 Member States to strengthen financing and resource mobilization and allocation for sustainable development	New policy initiatives or reforms by 3 Member States to strengthen financing and resource mobilization and allocation for sustainable development

Table 23.27
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Member States accessed macroeconomic policy knowledge and recommendations through the ESCAP website	Member States benefited from updates on policy research through the Consultative Group on Financing Strategies for the Sustainable Development Goals	Policymakers engaged in interactive discussions with experts through policy dialogues on flagship publications	At least 60 per cent of policymakers acknowledge policy awareness on emerging macroeconomic and financing for development issues	At least 65 per cent of policymakers acknowledge strengthened policy awareness on emerging macroeconomic and financing for development issues

Augmented use of geospatial data for accelerating Sustainable Development Goal monitoring and implementation

(Result 1 of subprogramme 5 (A/79/6 (Sect. 19)))

Increased adoption of digitally driven innovations to enable transformative adaptation to climate change

(Result 3 of subprogramme 5 (A/79/6 (Sect. 19)))

- 23.125 Following the eightieth session of ESCAP, convened in 2024 under the theme of leveraging digital innovation for sustainable development in Asia and the Pacific, subprogramme 5, Information and communication technology and disaster risk reduction, will deliver technical assistance, upon request, to strengthen the capacity of countries to develop and deploy innovative digital solutions in support of sustainable development.
- 23.126 In 2025, subprogramme 5 is expected to receive requests for strengthening national frameworks on disaster risk reduction and climate adaptation from small island developing States in the Pacific subregion that would build on the work undertaken in 2024 in the Hindu Kush Himalaya and the Mekong subregions. In response to those requests, the subprogramme will roll out interventions to strengthen early warning systems through improved disaster risk data analytics in line with the Sendai Framework for Disaster Risk Reduction 2015–2030 and in support of the Early Warnings for

All initiative of the United Nations. It will further build digital skills for geospatial data analysis and interpretation in developing countries, upon request, to ensure that all countries are able to benefit from the applications of digital technologies. The subprogramme will also support countries in integrating digital technologies and innovations with traditional space applications to further geospatial information applications and to facilitate the regional sharing of related good practices, in line with ESCAP resolution [E/ESCAP/RES/79/9](#).

23.127 Given that digital connectivity is an important precondition for undertaking the work described above, subprogramme 5 is expected to continue to receive requests for strengthening national capacities on digital connectivity, digital technologies and applications, and digital data. The subprogramme will respond to these by implementing capacity-building and information-sharing activities under the Asia-Pacific information superhighway.

23.128 The expected response in 2025 would contribute to the augmented use of geospatial data for Sustainable Development Goal monitoring and achievement under result 1 of subprogramme 5, and the related performance measure (see table 23.28), in the proposed programme budget for 2025 ([A/79/6 \(Sect. 19\)](#)), and the increased adoption of digitally driven innovations to enable transformative adaptation to climate change, and the related performance measure (see table 23.29), under result 3 of subprogramme 5, in the proposed programme budget for 2025 ([A/79/6 \(Sect. 19\)](#)).

Table 23.28
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Members and associate members gained access to training and tools to enhance the use of geospatial data	3 countries (Indonesia, Sri Lanka and Thailand) initiated policy actions or projects on integrating geospatial and sectoral data for monitoring and implementation of the Sustainable Development Goals	Kyrgyzstan established the Central Asia Drought Information System and the Philippines the use of satellite data to improve air quality monitoring	Increased availability of geospatial and sectoral data for tracking progress on the Sustainable Development Goals in 2 countries	5 countries, including at least 2 countries in special situations, capitalize on digitally driven geospatial applications to accelerate progress on the Sustainable Development Goals

Table 23.29
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Members States gained access to disaster risk data analytics	All ESCAP subregions gained access to downscaled climate scenario data through the ESCAP Risk and Resilience Portal	Members States access an updated version of disaster risk data analytics	2 countries make progress in achieving transformative adaptation in agriculture or the energy sector	2 additional countries make progress in achieving transformative adaptation in agriculture or the energy sector

B. Deliverables

Table 23.30

Economic and Social Commission for Asia and the Pacific: deliverables for the period 2023–2025, by category and subcategory

	2023 planned	2023 actual	2024 planned	2025 planned
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	140	246	150	155

C. Proposed non-post resource requirements for 2025

Table 23.31

Financial resources by object of expenditure

(Thousands of United States dollars)

	2023 expenditure	2024 approved	Changes		2025 estimate (before recosting)
			Total	Percentage	
Other staff costs	884.5	883.1	154.9	17.5	1 038.0
Consultants	1 302.9	1 362.3	(26.2)	(1.9)	1 336.1
Travel of representatives	4.1	–	–	–	–
Travel of staff	454.3	458.8	–	–	458.8
Contractual services	329.4	598.6	–	–	598.6

Furniture and equipment	1.0	–	–	–	–
Grants and contributions	702.7	461.6	–	–	461.6
Other	1.6	–	–	–	–
Total	3 788.2	3 968.3	128.7	3.2	4 097.0

- 23.129 The proposed regular budget resources for 2025 amount to \$4,097,000 before recosting, reflecting an increase of \$128,700, or 3.2 per cent, compared with the approved budget for 2024. The proposed increase under other staff costs (\$154,900) is to provide additional regional advisory services in response to anticipated increased demand from member States in the Asia-Pacific region for technical cooperation assistance and tailored services, including in the areas of climate finance, official statistics and environment statistics, with an emphasis on the advisory function to member States, taking into account existing subregional and intergovernmental frameworks such as those under the Association of Southeast Asian Nations and in the northern Pacific subregion on capacity development in support of implementation of the 2030 Agenda, the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Paris Agreement. This increase would be offset by a decrease under consultants (\$26,200), in line with expected requests from member States in 2025.

9. Economic development in Europe

A. Programmatic activities delivered through the regular programme of technical cooperation

- 23.130 The activities under economic development in Europe are implemented by ECE in support of programme 17 under all ECE subprogrammes.
- 23.131 Technical cooperation activities are focused on the United Nations programme countries in the ECE region, where the Commission is a signatory of the United Nations Sustainable Development Cooperation Framework. ECE technical cooperation is intended to strengthen national capacities to accede to and implement the Commission's international legal instruments, norms and standards. The activities promote regional, subregional and transboundary cooperation and support Governments in accelerating the implementation and the achievement, respectively, of the 2030 Agenda and the Sustainable Development Goals.
- 23.132 In 2025, ECE will provide technical advice and policy options to Governments in the areas of environmental governance, transport and connectivity, statistics, public-private partnerships, innovation, sustainable energy, trade, forestry, urban development and population. Sectoral and cross-sectoral advisory services, training and field projects within ECE mandate and expertise areas will continue to be delivered in response to demands from member States.
- 23.133 In line with its technical cooperation strategy, ECE will continue to work closely with the resident coordinators and United Nations country teams in the United Nations programme countries. ECE technical cooperation activities funded from the regular programme of technical cooperation complement the United Nations Development Account projects and integrate the six transitions in its interventions.³ Cross-sectoral activities include digitalization, circular economy, green transformation, sustainable urban solutions, sustainable mobility and connectivity. Technical cooperation activities also integrate South-South cooperation and a peer learning component in order to share experience on various capacity development approaches and policy options that could be replicated in and outside of the region.
- 23.134 In response to an anticipated increase in the volume of requests for assistance from member States, ECE would provide additional advisory services in cooperation with relevant partners.
- 23.135 In implementing these activities, the regular programme of technical cooperation contributes to the objectives and expected results of the above subprogrammes and complements their relevant strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2025 (A/79/6 (Sect. 20)).

Outreach and dissemination of guidelines to member States on the opportunities for assistance through the regular programme of technical cooperation

- 23.136 ECE consistently strengthens its outreach efforts to provide information on technical cooperation opportunities for the United Nations programme countries in the ECE region through meetings with government officials in the context of intergovernmental sessions, briefings and meetings with permanent missions to the United Nations based in Geneva, workshops, advisory missions, regular meetings with the resident coordinators and United Nations country teams, and participation in the United Nations Sustainable Development Cooperation Framework processes.
- 23.137 Some examples include the following: (a) targeted presentations at regular intergovernmental sessions for policymakers to promote multilateral environmental agreements, United Nations transport-related legal instruments and other ECE norms, tools and standards; (b) discussion on technical cooperation needs at the annual high-level seminar on capacity development for heads of national statistical offices in programme countries in the ECE region and through the Regional

³ The transitions are food systems, energy access and affordability, digital connectivity, education; jobs and social protection, and climate change, biodiversity loss and pollution.

Coordination Group on Data and Statistics for Europe and Central Asia; (c) briefings for permanent missions to the United Nations based in Geneva on sustainable energy; (d) participation in regional and subregional platforms such as the European Union-Central Asia working group on the environment, the United Nations Special Programme for the Economies of Central Asia, the inter-State commission on sustainable development and annual meetings of the Special Programme for the Economies of Central Asia thematic working groups, organized jointly by ECE and ESCAP; (e) meetings of the Issue-based Coalition on Environment and Climate Change and outreach to the offices of resident coordinators and United Nations country teams on integrating the environment and climate change into the United Nations Sustainable Development Cooperation Frameworks; and (f) regular briefings for the resident coordinators and country teams on ongoing and planned technical cooperation portfolios, including the participation of ECE regional advisers in country teams and relevant Cooperation Framework results group meetings.

- 23.138 Regular discussions with the resident coordinators and country teams contribute to identifying areas for partnerships and joint programming as an important means of awareness-raising and leveraging funding through such instruments as the Joint Sustainable Development Goals Fund. ECE coordinates its technical cooperation portfolio with other United Nations organizations to ensure synergies and complementarities with national and subregional intervention and to build essential partnerships to multiply the impact and sustainability of ECE technical cooperation interventions.

Response provided to member States' requests for support in 2023

Increased number of United Nations Member States becoming parties to multilateral environmental agreements serviced by the Economic Commission for Europe

(Result 2 of subprogramme 1 ([A/79/6 \(Sect. 20\)](#)))

Increased number of countries collaborating on developing and using machine learning techniques for the production of official statistics

(Result 1 of subprogramme 3 ([A/79/6 \(Sect. 20\)](#)))

- 23.139 In 2023, ECE focused its technical cooperation on delivering integrated policy and capacity-building responses to facilitate transboundary cooperation, enhance connectivity, strengthen data and statistics systems, support green transformation and digitalization, and respond to emerging needs and mounting challenges in the region.
- 23.140 ECE delivered several assessments to improve national capacities in the areas of environment and statistics (subprogramme 1, Environment, and subprogramme 3, Statistics). In Uzbekistan, ECE supported the country in preparing a national state of the environment report, which provided an analysis of environmental issues and trends using the drivers-pressures-state-impacts-responses framework methodology to draw connections between the state of the environment and drivers and pressures on the environment. The report improved overall public accessibility of environmental data and, by making the data on the environment available, fostered public participation in environmental decision-making, helping the country to accede to the Aarhus Convention. The global assessments of the national statistical systems of Georgia and Kazakhstan reviewed the national statistical systems in terms of their compliance with internationally agreed methodologies, international quality frameworks and adequacy of resources. Assessments noted progress made and plans considered to make further improvements. The recommendations were subsequently used to prepare the development plans for the national statistical systems in both countries and serve as a guide for multilateral and bilateral assistance.
- 23.141 The above-mentioned work contributed to an increased number of United Nations Member States becoming parties to multilateral environmental agreements serviced by ECE, which is reflected in result 2 of subprogramme 1, and the related performance measure (see figure 23.XI), and the increased number of countries collaborating on developing and using machine learning techniques for the production of official statistics, which is reflected in result 1 of subprogramme 3, and the related performance measure (see figure 23.XII), in the proposed programme budget for 2025 ([A/79/6 \(Sect. 20\)](#)).

Figure 23.XI
Performance measure: number of parties to multilateral environmental agreements serviced by the Economic Commission for Europe (cumulative)

Figure 23.XII
Performance measure: number of member States actively collaborating in developing and using machine learning techniques for the production of official statistics (cumulative)

Expected response to anticipated requests for support in 2025

Enhanced regulatory framework for sustainable inland transport systems

(Result 1 of subprogramme 2 ([A/79/6 \(Sect. 20\)](#)))

More public-private partnership infrastructure projects assessed as compliant with the Sustainable Development Goals

(Result 3 of subprogramme 4 ([A/79/6 \(Sect. 20\)](#)))

Enhanced resilience of energy systems in the Economic Commission for Europe region

(Result 2 of subprogramme 5 ([A/79/6 \(Sect. 20\)](#)))

Increased facilitation of agricultural trade through the adoption of agricultural quality and electronic business standards in Economic Commission for Europe member States

(Result 1 of subprogramme 6 ([A/79/6 \(Sect. 20\)](#)))

Evidence-based planning and action for the sustainable production and consumption of forest products

(Result 3 of subprogramme 7 ([A/79/6 \(Sect. 20\)](#)))

Acceleration of the city-level implementation of best practices in housing and land management and urban development

(Result 2 of subprogramme 8 (A/79/6 (Sect. 20)))

More age-sensitive and inclusive policies to respond to the opportunities and challenges of individual and population ageing

(Result 3 of subprogramme 8 (A/79/6 (Sect. 20)))

- 23.142 In response to anticipated requests in 2025, ECE subprogrammes will: (a) support the ratification and implementation of ECE international norms and standards; (b) address specific national and transboundary challenges; (c) improve connectivity; and (d) build economic and environmental resilience, including through the platform provided by the United Nations Special Programme for the Economies of Central Asia.
- 23.143 ECE subprogrammes, more specifically, will focus on:
- (a) Supporting Tajikistan's accession to the Industrial Accidents Convention;
 - (b) Supporting the establishment of an interinstitutional working group on tailing safety and the prevention of accidental water pollution in Uzbekistan, based on the results in Kazakhstan and Tajikistan;
 - (c) Enhancing capacities of South-Eastern Europe, the Caucasus and Central Asia member States in terms of efficient implementation of the United Nations transport legal instruments with the aim of deploying digitalized transport services and improving national road safety systems;
 - (d) Strengthening the capacities of national statistical systems in programme countries, including by supporting the implementation of the recommendations stemming from global assessments of national statistical systems;
 - (e) Supporting institutional structures for innovation and technology in the United Nations programme countries and building an enabling environment for public-private partnerships;
 - (f) Providing capacity-building and analytical support, with a focus on the digitalization of the energy sector, on the enhanced resilience of energy systems and on more sustainable and resilient natural resource management based on United Nations Framework Classification for Resources, for countries of Central Asia and the Caucasus;
 - (g) Strengthening the capacity of the Central Asia, Caucasus, western Balkans and Eastern Europe regions to implement the United Nations Centre for Trade Facilitation and Electronic Business standards for the digitalization of multimodal data and document exchange, which will help to speed up information flows along cross-border trade and transport corridors and improve the efficiency of international trade and transport in the region;
 - (h) Supporting the sustainable consumption and production of forest products, sustainable forest management and urban and peri-urban forestry in countries of Eastern and South-East Europe;
 - (i) Supporting national and local governments in Central Asia and South-Eastern Europe in the development of evidence-based urban and housing policies through the preparation of a country profile on urban development, housing and land management and/or in the preparation of smart sustainable cities profiles or Sustainable Development Goal voluntary local reviews;
 - (j) Developing road maps for mainstreaming ageing into United Nations programme countries.
- 23.144 The expected response would contribute to results under all subprogrammes, including, for example, an enhanced regulatory framework for sustainable inland transport systems, which is reflected in result 1 of subprogramme 2, and the related performance measure (see figure 23.XIII); more public-private partnership infrastructure projects assessed as compliant with the Sustainable Development Goals, which is reflected in result 3 of subprogramme 4, and the related performance measure (see figure 23.XIV); the enhanced resilience of energy systems in the ECE region, which is reflected in result 2 of subprogramme 5, and the related performance measure (see figure 23.XV); the increased

facilitation of agricultural trade through the adoption of agricultural quality and electronic business standards in Economic Commission for Europe member States, which is reflected in result 1 of subprogramme 6, and the related performance measures (see figure 23.XVI); evidence-based planning and action for the sustainable production and consumption of forest products, which is reflected in result 3 of subprogramme 7, and the related performance measure (see figure 23.XVII); the acceleration of the city-level implementation of best practices in housing and land management and urban development, which is reflected in result 2 in subprogramme 8, and the related performance measure (see table 23.32); and more age-sensitive and inclusive policies to respond to the opportunities and challenges of individual and population ageing, which is reflected in result 3 of subprogramme 8, and the related performance measure (see table 23.33) of the proposed programme budget for 2025 (A/79/6 (Sect. 20)).

Grants and contributions	135.5	331.3	30.4	9.2	361.7
Other	1.3	–	–	–	–
Total	2 536.8	2 688.2	87.2	3.2	2 775.4

23.145 The proposed regular budget resources for 2025 amount to \$2,775,400 before recosting, reflecting an increase of \$87,200, or 3.2 per cent, compared with the approved budget level for 2024. The proposed increases under consultants (\$38,200), travel of staff (\$18,600) and grants and contributions (\$30,400) are to provide regional advisory services in response to the increasing requests for technical cooperation anticipated to be received from member States in the ECE region to implement the 2030 Agenda.

10. Economic and social development in Latin America and the Caribbean**A. Programmatic activities delivered through the regular programme of technical cooperation**

23.146 The activities under economic and social development in Latin American and the Caribbean are implemented by ECLAC through the following subprogrammes: 1, International trade, integration and infrastructure; 2, Production and innovation; 3, Macroeconomic policies and growth; 4, Social development and equality; 6, Population and development; 7, Sustainable development and human settlements; 8, Natural resources; 10, Statistics; 11, Subregional activities in Central America, Cuba, the Dominican Republic, Haiti and Mexico, and; 12, Subregional activities in the Caribbean.

- 23.147 In implementing these activities, the regular programme of technical cooperation contributes to the objectives and expected results of the above subprogrammes and complements their relevant strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2025 (A/79/6 (Sect. 21)).

Outreach and dissemination of guidelines to member States on the opportunities for assistance through the regular programme of technical cooperation

- 23.148 In line with the demand-driven nature of the regular programme of technical cooperation, ECLAC raises awareness of the opportunities for Latin American and Caribbean countries to gain access to technical support from regular programme of technical cooperation resources through outreach and notifications and announcements on various ECLAC training offerings, and face-to-face meetings with government officials, including permanent representatives, of the countries of the region, in the context of intergovernmental meetings, conferences, seminars, workshops and various capacity-building events organized by the entity. These informal settings are better suited for an initial assessment of country needs and an attempt at matching them with in-house expertise.

Efforts to ensure complementarity with the resident coordinator system

- 23.149 The work of ECLAC is aligned closely with the resident coordinator system, through whose offices ECLAC receives enquiries for support from member States. After internal revision, ECLAC determines the most appropriate subprogramme(s) to provide support to the member States, also taking into consideration the mandates entrusted to the Commission.

Response provided to member States' requests for support in 2023

Increased coordination of Latin America and Caribbean countries to build regional positions for international tax cooperation

(Programme performance in 2023 of subprogramme 3 (A/79/6 (Sect. 21)))

- 23.150 In 2023, subprogramme 3, Macroeconomic policies and growth, contributed to fostering suitable and inclusive growth in Latin America and the Caribbean by strengthening the capacity of policymakers and other stakeholders in the region to analyse current and emerging macroeconomic and development finance issues and to evaluate, design and implement development-centred macroeconomic and development for financing policies that incorporate a gender perspective and are based on a comparative analysis. In Latin American and Caribbean countries, the deteriorating global macroeconomic and financial environment has put pressure on public debt, which remains at high levels.
- 23.151 In this regard, ECLAC continued to receive requests to support countries of the region in addressing challenges relating to fiscal policy and tax systems in the region. In particular, in 2023 advisory services were delivered by ECLAC, in its capacity as technical secretariat of the Regional Tax Cooperation Platform for Latin America and the Caribbean, to Colombia to support the creation of the Platform and to develop the governance structure and coordinate the Platform's working groups. This technical support contributed to the approval by ministers and high-level officials from 16 countries from the region of the instrument establishing the governance of the Platform at the First Latin American and Caribbean Summit for an Inclusive, Sustainable and Equitable Global Tax Order, held in Cartagena, Colombia, in July 2023.
- 23.152 The above-mentioned work contributed to the increased coordination of Latin America and Caribbean countries to build regional positions for international tax cooperation, which is reflected in the 2023 performance of subprogramme 3, and the related performance measure (see table 23.36), in the proposed programme budget for 2025 (A/79/6 (Sect. 21)).

Table 23.36
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
Countries of the region identify the need to have coordination mechanisms to advocate for their interests and priorities in international tax policy forums	–	The regional platform for tax cooperation in Latin America and the Caribbean (Plataforma Regional de Cooperación Tributaria para América Latina y el Caribe) was presented by Colombia at the thirty-fifth Regional Seminar on Fiscal Policy and a charter was opened for signature at the First Summit for an Inclusive, Sustainable and Equitable Global Tax Order

Expected response to anticipated requests for support in 2025

Increased and enhanced cluster initiatives and other territorial productive articulation initiatives

(Result 3 of subprogramme 2 ([A/79/6 \(Sect. 21\)](#)))

- 23.153 In 2025, subprogramme 2, Production and innovation, will continue to support national officials and government authorities from countries of Latin America and the Caribbean in enhancing the diversification and structural transformation of productive structures through investment, innovation and the diffusion of new technology and in strengthening links and networks among firms. In line with the growing cross-cutting nature of issues relating to digital transformation and productive development, the subprogramme has been providing technical assistance to line ministries, industrial associations and other public sector institutions to foster greater coordination not only among various sectors, but also among various levels (national, regional and municipal). In addition, the subprogramme has been supporting public sector institutions in advancing associative approaches on the basis of collaboration of actors from the private and public sectors, academia and civil society, given that these approaches have demonstrated success in addressing the processes of sophistication and productive diversification that are required to promote a model of sustainable and inclusive development. The subprogramme is planning to facilitate coordination using its convening power and through the organization of seminars and workshops to foster dialogue.
- 23.154 In response to the anticipated requests in 2025, the subprogramme will: (a) tailor its advisory services to better respond to the needs of the countries of the region providing updated information, analysis, and policy recommendations; and (b) provide technical assistance and support knowledge dissemination and the sharing of best practices through expert meetings, seminars and workshops.
- 23.155 The expected response in 2025 would contribute to the increased capacity of member States to develop policy measures aimed at promoting cluster or other productive articulation initiatives, which is reflected in result 3 of subprogramme 2, and the related performance measure (see figure 23.XVIII), in the proposed programme budget for 2025 ([A/79/6 \(Sect. 21\)](#)).

Figure 23.XVIII

Performance measure: number of new policy measures adopted by productive development governmental institutions aimed at promoting cluster initiatives or other territorial productive articulation initiatives (cumulative)

Expanding social protection systems to include informal and independent workers
(Result 3 of subprogramme 4 (A/79/6 (Sect. 21)))

- 23.156 In 2025, subprogramme 4, Social development and equality, will continue to support countries of Latin American and the Caribbean in improving the overall well-being of the people of the region and in achieving greater social and economic equality in line with the 2030 Agenda and with full respect for human rights. The subprogramme has been working with various Governments of the region in recent years with the aim of raising the awareness member States on the importance of strengthening social protection systems to incorporate the excluded population, given that technological transformation has translated into changes in labour demand and that available information on digital platform workers shows their limited access to social protection.
- 23.157 In response to the anticipated requests in 2025 the subprogramme will: (a) assist countries in capacity-building and technical cooperation in the design, implementation, monitoring and evaluation of strategies, policies and programmes; (b) promote policy dialogue for inclusive social development among policymakers, academics, members of civil society organizations and other stakeholders and facilitate the exchange of experiences and good practices; and (c) provide capacity-building activities and technical assistance through training and expert meetings, seminars and workshops.
- 23.158 The expected response in 2025 would contribute to the increased number of national policies or strategies that include actions for the expansion of social protection measures oriented to informal and independent workers, which is reflected in result 3 of subprogramme 4, and the related performance measure (see figure 23.XIX), in the proposed programme budget for 2025 (A/79/6 (Sect. 21)).

Figure 23.XIX

Performance measure: number of national policies or strategies that include actions for the expansion of social protection measures oriented to informal and independent workers (cumulative)

Countries in the region supply critical minerals for the energy transition with increased economic, social and environmental sustainability
(Result 3 of subprogramme 8 (A/79/6 (Sect. 21)))

- 23.159 In 2025, subprogramme 8, Natural resources, will continue to support countries of the region in improving the governance and enhancing the sustainable use and exploitation of natural resources in Latin America and the Caribbean, focusing on water resources management, affordable, inclusive, and clean energy, extractive resources efficiency and biodiversity. The subprogramme is planning to promote dialogues, the exchange of experiences and the generation of knowledge, and support the implementation of policies to promote a more economically, socially and environmentally sustainable supply of critical minerals for the energy transition.
- 23.160 In response to the anticipated requests in 2025, the subprogramme will: (a) support countries of the region in the design of policies relating to the energy transition, including greater participation of renewable sources of energy and increased energy efficiency, and to the sustainable management of water transition; and (b) advisory services and technical assistance to support multi-stakeholder dialogue, within the framework of more sustainable governance of the extractive industries, focusing on critical minerals for the energy transition.
- 23.161 The expected response in 2025 would contribute to an increased number of new initiatives developed by countries in the region to promote the sustainable supply of critical minerals, which is reflected in result 3 of subprogramme 8, and the related performance measure (see figure 23.XX), in the proposed programme budget for 2025 (A/79/6 (Sect. 21)).

Figure 23.XX

Performance measure: number of new initiatives developed by countries in the region to promote the sustainable supply of critical minerals (cumulative)

Table 23.38

Financial resources by object of expenditure

(Thousands of United States dollars)

	2023 expenditure	2024 approved	Changes		2025 estimate (before recosting)
			Total	Percentage	
Other staff costs	2 756.8	3 052.0	–	–	3 052.0
Consultants	939.8	835.2	–	–	835.2
Experts	4.3	–	–	–	–
Travel of staff	379.4	380.4	–	–	380.4
Contractual services	–	–	174.4	–	174.4
General operating expenses	0.2	–	–	–	–
Grants and contributions	945.7	1 110.1	–	–	1 110.1
Other	3.3	–	–	–	–
Total	5 029.4	5 377.7	174.4	3.2	5 552.1

- 23.162 The proposed regular budget resources for 2025 amount to \$5,552,100 before recosting, reflecting an increase of \$174,400 or 3.2 per cent, compared with the approved budget for 2024. The proposed increase under contractual services (\$174,400) is to provide support in the preparation of substantive content for training courses and capacity-building workshops and the adaptation of course materials to virtual settings, in line with anticipated requests from member States in 2025.

11. Economic and social development in Western Asia

A. Programmatic activities delivered through the regular programme of technical cooperation

- 23.163 The activities under economic and social development in Western Asia are implemented by ESCWA, under subprogramme 1, Climate change and natural resource sustainability; subprogramme 2, Gender justice, population and inclusive development; subprogramme 3, Shared economic prosperity; subprogramme 4, Statistics, the information society and technology; subprogramme 5, 2030 Agenda and Sustainable Development Goal coordination; and subprogramme 6, Governance and conflict prevention.
- 23.164 ESCWA is mandated to promote inclusive and sustainable socioeconomic development in the Arab region. While the region holds all the human capital and resources vital for achieving shared prosperity and a dignified life for all its peoples, social, economic, and environmental challenges and conflict continue to have adverse impact on its progress towards the achievement of the 2030 Agenda. Within the mandates entrusted in it, ESCWA is uniquely positioned to support national and regional efforts in this regard, through generating evidence, convening dialogue around key development issues and providing policy advice and building Governments' capacities through the regular programme of technical cooperation. ESCWA will therefore continue to ensure complementarity between the regular programme of technical cooperation and the programme plan implemented through the regular budget, as well as United Nations Development Account and extrabudgetary activities. Staff, regional advisers and consultants will operate jointly to provide technical assistance on the basis of knowledge products and consensus built under the regular programme plan, and through experience accumulated in technical cooperation activities.
- 23.165 In response to an anticipated increase in the volume of requests for assistance from member States in 2025, ESCWA would provide additional capacity-building activities and advisory services, with a focus on the newest member States that are also least developed countries, namely, Djibouti and Somalia. Additional requests are also anticipated from other least developed countries, such as Mauritania and Yemen, and countries in conflict or under occupation, namely, Libya, the Sudan and the Syrian Arab Republic, as well as the State of Palestine. Such an increase is witnessed year on year in the total number of regular programme of technical cooperation requests received since 2020. The fact that half of ESCWA member States are least developed countries and/or undergoing/affected by conflict renders in-person assistance costly (some regions within those countries are not always accessible nor safe), albeit necessary owing to a lack of Internet infrastructure and equipment needed for remote services. Such activities will require additional funding.
- 23.166 In implementing these activities, the regular programme of technical cooperation contributes to the objectives and expected results of the above subprogrammes and complements their relevant strategies and deliverables, which can be found in the relevant paragraphs of the proposed budget report for 2025 ([A/79/6 \(Sect. 22\)](#)).

Outreach and dissemination of guidelines to member States on the opportunities for assistance through the regular programme of technical cooperation

- 23.167 Outreach on the regular programme of technical cooperation is undertaken through several formal and informal channels. In December 2023, ESCWA organized the annual meeting of its technical cooperation network, composed of national technical cooperation focal points in member States, to discuss their priorities and needs, highlight modes of regular programme of technical cooperation

delivery and means of requesting assistance, and present an overview of the main technical cooperation interventions in member States in 2023. Throughout the year, ESCWA also placed a discussion of regular programme of technical cooperation on the agendas of all formal policy dialogues held with member States in the context of intergovernmental committees, namely, the committees on social development, women, energy, water resources, trade policies, and transport and logistics. ESCWA presented sectoral reports to those committees on its technical cooperation activities in their fields.

- 23.168 In 2023, the Executive Secretary of ESCWA led five outreach visits to various member States to advance the regular programme of technical cooperation assistance provided to them. Less formal outreach channels were also activated throughout the year: staff from the various subprogrammes organized briefings or participated in meetings to showcase ESCWA technical cooperation services, contributing to some 45 outreach activities, including conferences, meetings and seminars on technical cooperation services that ESCWA renders in all areas of its work.

Response provided to member States' requests for support in 2023

Advancement of digital development assessments and strategies at the national and regional level in the Arab region

(Result 1 of subprogramme 4 (A/79/6 (Sect. 22)))

- 23.169 Throughout 2023, ESCWA received and responded to 30 requests on advancing digital transformation in the Arab region. The support, provided through a combination of advisory services and capacity-building activities, included Arab least developed countries such as Mauritania, Somalia and the Sudan; countries in conflict or affected by it such as Jordan, Libya and the Syrian Arab Republic, as well as the State of Palestine; or middle- and high-income countries such as Morocco and the United Arab Emirates.
- 23.170 The support also covered various aspects of the digital transformation agenda, including the formulation of strategies and policy frameworks in areas such as cybersecurity, accessibility, e-participation and digital transformation. Advisory services were also provided in accelerating digital transformation in specific sectors, such as the education sector. Support was further provided in improving the regulatory environments of member States in areas such as the Internet of things, and for establishing a telecommunications regulatory authority and an e-registration platforms for small and medium-sized enterprises.
- 23.171 To complement assistance under the regular programme of technical cooperation, ESCWA has leveraged a number of related United Nations Development Account projects, namely, on strengthening the capacity of small and medium-sized enterprises and government entities that support small and medium-sized enterprises in the Arab region, on establishing effective relationships between innovation actors in the Arab region to expand the science-policy nexus in support of the 2030 Agenda, and on blockchains for facilitating trade and enhancing competitiveness implemented under subprogrammes 3 and 4, to support member States, including Jordan, Oman and Syrian Arab Republic, which are three of the countries that requested technical assistance under the regular programme of technical cooperation to improve their e-registration systems and review some of their technology frameworks and regulations.
- 23.172 The above-mentioned work contributed to member States adopting sound national policy frameworks deploying emerging technologies and innovation for digital transformation, digital accessibility, enhanced public institutions and citizen engagement in decision-making, and enabling socioeconomic development, an expected result under result 1 of subprogramme 4, and the related performance measure (see figure XXI), which is reflected in the proposed programme budget for 2025 (A/79/6 (Sect. 22)).

Figure 23.XXI

Performance measure: number of member States that undertook biennial national digital development reviews and design digital development strategies (cumulative)

Expected response to anticipated requests for support in 2025

Arab policymakers gain access to on-demand, reliable evidence enabled by artificial intelligence and geospatial capacities

(Result 2 of subprogramme 4 (A/79/6 (Sect. 22)))

- 23.173 ESCWA member States are increasingly requesting from ESCWA the means to improve evidence-based policymaking and development planning underpinned by analysis on the basis of an ESCWA suite of interactive, data-driven modelling and policy simulation tools and knowledge repositories. This work cuts across all the ESCWA subprogrammes.
- 23.174 One of the artificial intelligence and data-driven tools developed by ESCWA is the Index Simulator for Policymakers in the Arab Region. The tool is intended to support decision-making processes by providing an easy-to-use platform to simulate the potential impact of specific policies on national rankings in a large selection of international indicators. The Simulator assists in identifying effective and efficient policies and measures that could be implemented in the short, medium and long terms to enhance countries' ranking and to have an impact on socioeconomic development on the national level. It forms part of the United Nations Arab Region Data and Policy Support Hub of ESCWA, which leverages the important role of evidence-based policies and data in advancing the achievement of the Sustainable Development Goals. To date, support has been provided to Jordan, Morocco, Tunisia and the Syrian Arab Republic in using the Simulator, through advisory services to customize the tool to the national priorities of each country, and capacity-building to train policymakers on the tool.
- 23.175 In 2025, further development of the tool and requests for using it are expected. This work will also be complemented by the United Nations Development Account project on dynamic simulators to address ranking deficiencies of international indices platforms in the Arab region, which will provide additional capacity-building for member States to use the tool.
- 23.176 The expected response in 2025 would contribute to result 2 of subprogramme 4, and the related performance measure (see table 23.39), in the proposed programme budget for 2025 (A/79/6 (Sect. 22)).

Table 23.39
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Member States gained access to 8 interactive policy simulation tools	Member States gained access to additional national, regional and global (statistical and non-statistical) data sets	Member States gained access to a centralized, regional data management and analytics platform (United Nations Arab Region Data and Policy Support hub)	Member States generate evidence and simulate policy options and related impacts through at least 5 artificial intelligence- and geospatial-enabled interactive tools	Member States have access to national data and policy dashboards through a one-stop shop for evidence-based policymaking

Contextualised economic modelling informs development of economic, social and trade policies

(Result 2 of subprogramme 3 (A/79/6 (Sect. 22)))

- 23.177 To further support the above objective of improving policymaking in its member States, ESCWA is making available evidence-based policymaking tools relating to trade, which are a means of enhancing investment in sustainable development priorities. ESCWA has developed a modelling tool for trade policy simulations, linking tariffs and other trade costs to a range of indicators, including foreign direct investment flows, greenhouse gas emissions, and movements and stocks of migrants and remittances. In that regard, support has been provided to Oman and the United Arab Emirates to have them benefit from its trade model it and tailor it to their needs, and it is expected that more countries will make such requests through 2025. This support will be complemented by advisory services and training for national statistical offices to provide the required national data and, for ministries of trade and economy, to tailor the model to their specific needs and use cases.
- 23.178 The expected response in 2025 would contribute to result 2 of subprogramme 3 and the related performance measure (see table 23.40), bearing in mind that the trade tool is part of the computable general equilibrium modelling tools, in the proposed programme budget 2025 (A/79/6 (Sect. 22)).

Table 23.40
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Pilot web-based computable general equilibrium model used by Jordan	2 national computable general equilibrium models used by Yemen, as well as the State of Palestine	3 member States (Mauritania, Oman and United Arab Emirates) used computable general equilibrium models	3 additional member States use computable general equilibrium models	2 additional member States use computable general equilibrium models

Improved consumer protection in the Arab region

(Result 2 of subprogramme 6 (A/79/6 (Sect. 22)))

- 23.179 Member States are also seeking to improve economic governance and strengthen public institutions, in particular in the two key areas of consumer protection and competition. ESCWA has been working to improve the regulatory frameworks of member States by carrying out analytical work on the Arab business legislative frameworks and producing country profiles, outlining policy recommendations for improving national consumer protection frameworks. It also developed the Arab Legislation

Section 23 Regular programme of technical cooperation

Portal, comprising information on existing consumer protection laws and regulations. Coupled with that analytical work, it sought to foster regional consensus in those two areas by establishing annual competition and consumer protection forums.

23.180 These efforts have generated requests under the regular programme of technical cooperation from Kuwait, Lebanon, Oman and Saudi Arabia. In 2025, it is expected that more requests will be received to support member States in building human and institutional capacities and in formulating national plans and strategies for consumer protection and competition. It is also expected that more support will be sought in strengthening the regulatory environment in these two areas, which would include support in establishing new institutions and formulating legislation in line with international best practices.

23.181 The expected response in 2025 would contribute to result 2 of subprogramme 6, and the related performance measure (see table 23.41), as reflected in the proposed programme budget for 2025 (A/79/6 (Sect. 22)).

**Table 23.41
Performance measure**

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Second joint ESCWA-UNCTAD-OECD Competition Forum for the Arab Region is attended by 16 member States	All 20 Arab member States participated in the third Competition Forum for the Arab Region	Arab policymakers gained access to recommendations on how to improve national consumer protection frameworks	Member States exchange knowledge and good practices on consumer protection	1 additional member State establishes or reforms its consumer protection laws or enforcement procedures
3 member States (Kuwait, Oman and Saudi Arabia) implemented new legislation on competition	1 member State (Lebanon) introduced competition legislation and 1 additional member State (Kuwait) introduced further legislation on competition 1 member State (Oman) expanded its dedicated competition authority	Arab member States gained access to the Arab Legislation Portal, comprising information on existing consumer protection laws and regulations	2 member States establish or reform their consumer protection laws

Seminars, workshops and training events (number of days)	82	82	190	190

C. Proposed non-post resource requirements for 2025

Table 23.43

Financial resources by object of expenditure

(Thousands of United States dollars)

	2023 expenditure	2024 approved	Changes		2025 estimate (before recosting)
			Total	Percentage	
Other staff costs	3 481.0	3 276.7	164.4	5.0	3 441.1
Consultants	622.7	216.5	–	–	216.5
Travel of staff	261.3	234.7	–	–	234.7
Contractual services	285.7	31.3	–	–	31.3
General operating expenses	89.2	–	–	–	–
Supplies and materials	0.9	–	–	–	–
Grants and contributions	374.0	1 310	–	–	1 310
Total	5 114.8	5 069.2	164.4	3.2	5 233.6

23.182 The proposed regular budget resources for 2025 amount to \$5,233,600 before recosting, reflecting an increase of \$164,400, or 3.2 per cent, compared with the approved budget for 2024. The proposed increase in other staff costs would provide additional support to least developed countries (including the newest members, Djibouti and Somalia), including additional capacity development activities in the countries that suffer from political instability and conflict, which pose additional capacity challenges, in line with anticipated requests from member States.

I. Office of the United Nations High Commissioner for Human Rights

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 24.1 The United Nations human rights programme is responsible for the promotion, protection, enjoyment and full realization, by all people, of all human rights. The mandate derives from the provisions of the Charter of the United Nations; the Universal Declaration of Human Rights and international human rights treaties; the Vienna Declaration and Programme of Action, including its principles and recommendations subsequently endorsed by the General Assembly in its resolution [48/121](#); General Assembly resolution [48/141](#), by which the Assembly established the post of the United Nations High Commissioner for Human Rights; the outcomes of relevant United Nations conferences and summits, including General Assembly resolution [70/1](#), entitled “Transforming our world: the 2030 Agenda for Sustainable Development”; and other relevant General Assembly and Human Rights Council resolutions and decisions. In addition to international human rights law, the programme is also guided by international humanitarian law, as applicable.
- 24.2 The programme is guided by the principles of universality, objectivity, impartiality, indivisibility and non-selectivity in removing obstacles to the full realization of all human rights and in preventing the continuation of human rights violations, including with relevant parties. The programme has a role in supporting the implementation by Member States of the 2030 Agenda, making development equitable, sustainable and responsive to the needs of people, including in relation to conflict prevention and resolution.
- 24.3 The programme falls under the leadership of the High Commissioner, who is entrusted with the principal responsibility for the human rights activities of the Organization, under the direction and authority of the Secretary-General and within the framework of the overall competence, authority and decisions of the General Assembly and the Human Rights Council.

Strategy and external factors for 2025

- 24.4 In a global context affected by threats to the enjoyment of human rights by all, the Office of the United Nations High Commissioner for Human Rights (OHCHR) will continue to support the human rights mechanisms and to assist States in their efforts to comply with their human rights obligations. Increased support for and collaboration in matters regarding human rights will be provided to requesting Member States through mutually agreed bilateral frameworks. Emphasis will be placed on highlighting the importance of human rights in international and national agendas; sustaining social development and social justice (as defined in General Assembly resolution [62/10](#)) and countering discrimination on all grounds; advancing the rights of children and women; raising awareness of human rights; responding to the needs of the vulnerable for protection; and addressing situations of international concern as identified by the Human Rights Council and other relevant United Nations bodies.
- 24.5 The Office will continue to engage with Member States and all relevant actors to assist them in their efforts to promote and protect human rights, through the provision of technical assistance, support to human rights bodies and mechanisms and, where appropriate, the establishment of country presences. Strengthened and consolidated organizational support will be provided to the Human Rights Council and its subsidiary bodies and mechanisms, the universal periodic review, the special procedures, the Human Rights Council Advisory Committee and the complaint procedure, as well as

other relevant United Nations bodies. The United Nations treaty bodies will continue to be provided with services, support and advice.

- 24.6 With regard to cooperation with other entities at the global and regional levels, OHCHR will use multi-stakeholder partnerships to support countries in the implementation of the Sustainable Development Goals and its transformative promise of leaving no one behind. The Office will continue to engage with a wide range of stakeholders, including civil society actors, such as non-governmental organizations (NGOs). It will also continue to help victims of human rights violations by managing the humanitarian funds that provide financial assistance for support services, such as rehabilitation and redress for victims of torture and slavery.
- 24.7 With regard to inter-agency coordination and liaison, OHCHR will continue to engage with the United Nations development system both through participation in inter-agency forums and cooperation with United Nations country teams on the ground. It will also continue to cooperate with missions with a human rights component supported by the Department of Political and Peacebuilding Affairs and the Department of Peace Operations of the Secretariat, as well as with the Peacebuilding Support Office. It will also continue its collaboration with all the United Nations agencies and programmes in crisis situations, such as humanitarian emergencies.
- 24.8 With regard to the external factors, the plan for 2025 is based on the following planning assumptions:
- (a) There is political will on the part of States to work with the programme;
 - (b) Extrabudgetary resources will continue to be provided for the programme.
- 24.9 The programme integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, Subprogramme 2 will deliver capacity-building activities on the follow-up to treaty body recommendations, including those related to the Convention on the Elimination of All Forms of Discrimination against Women.
- 24.10 In line with the United Nations Disability Inclusion Strategy, OHCHR will integrate disability inclusion in its operational activities, deliverables and results, as appropriate. For example, subprogramme 1 will provide expert advice on the development of standards on strengthening national human rights promotion and protection capacities as they relate to persons with disabilities.

Legislative mandates

- 24.11 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.¹

General Assembly resolutions

47/135	Declaration on the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities	57/300; 58/269	Strengthening of the United Nations: an agenda for further change
48/121	World Conference on Human Rights	60/1	2005 World Summit Outcome
48/141	High Commissioner for the promotion and protection of all human rights	61/159	Composition of the staff of the Office of the United Nations High Commissioner for Human Rights
55/2	United Nations Millennium Declaration	61/166	Promotion of equitable and mutually respectful dialogue on human rights
56/266	Comprehensive implementation of and follow-up to the World Conference against Racism, Racial Discrimination, Xenophobia and Related Intolerance	62/134	Eliminating rape and other forms of sexual violence in all their manifestations, including in conflict and related situations

¹ The list of mandates includes resolutions adopted at the fifty-second session of the Human Rights Council. In accordance with current practice, planned activities and associated resource requirements will be presented in the report of the Secretary-General on revised estimates resulting from resolutions and decisions adopted by the Council, as applicable.

Section 24 Human rights

65/1	Keeping the promise: united to achieve the Millennium Development Goals	73/157; 75/169; 76/149; 77/204; 78/190	Combating glorification of Nazism, neo-Nazism and other practices that contribute to fuelling contemporary forms of racism, racial discrimination, xenophobia and related intolerance
65/312	Outcome document of the High-level Meeting of the General Assembly on Youth: Dialogue and Mutual Understanding		
66/3	United against racism, racial discrimination, xenophobia and related intolerance	73/159; 75/171; 76/151; 77/206; 78/191	Use of mercenaries as a means of violating human rights and impeding the exercise of the right of peoples to self-determination
66/288	The future we want	73/168; 75/180; 76/159; 77/213; 78/199	Enhancement of international cooperation in the field of human rights
67/1	Declaration of the high-level meeting of the General Assembly on the rule of law at the national and international levels	73/169; 75/178; 76/165; 77/215; 78/196	Promotion of a democratic and equitable international order
67/144	Intensification of efforts to eliminate all forms of violence against women	74/132; 78/186	Report of the Human Rights Council
68/134; 77/190; 78/177	Follow-up to the Second World Assembly on Ageing	74/143; 77/209	Torture and other cruel, inhuman or degrading treatment or punishment
68/165	Right to the truth		
68/181	Promotion of the Declaration on the Right and Responsibility of Individuals, Groups and Organs of Society to Promote and Protect Universally Recognized Human Rights and Fundamental Freedoms: protecting women human rights defenders	74/144	Implementation of the Convention on the Rights of Persons with Disabilities and the Optional Protocol thereto: accessibility
70/1	Transforming our world: the 2030 Agenda for Sustainable Development	74/147; 76/169; 78/210	Terrorism and human rights
70/133; 76/142	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly	74/148; 76/172; 78/217	Protection of migrants
70/262	Review of the United Nations peacebuilding architecture	74/149; 75/179; 76/166; 77/217; 78/198	The right to food
71/167; 75/158; 77/194	Trafficking in women and girls	75/161; 77/193	Intensification of efforts to prevent and eliminate all forms of violence against women and girls: gender stereotypes and negative social norms
71/189	Declaration on the Right to Peace	75/175; 77/223	Human rights and extreme poverty
72/140; 74/123; 76/130; 78/171	Persons with albinism	75/176; 77/211	The right to privacy in the digital age
72/149; 74/127; 76/141; 78/180	Violence against women migrant workers	75/181; 76/161; 77/214; 78/202	Human rights and unilateral coercive measures
72/170; 74/159; 76/162; 78/201	Human rights and cultural diversity	75/182; 76/163; 77/212; 78/203	The right to development
72/171; 76/164; 78/197	Strengthening United Nations action in the field of human rights through the promotion of international cooperation and the importance of non-selectivity, impartiality and objectivity	75/188; 76/156; 77/221; 78/212	Freedom of religion or belief
72/178; 74/141; 76/153; 78/206	The human rights to safe drinking water and sanitation	75/189; 77/218	Extrajudicial, summary or arbitrary executions
72/182; 74/160; 76/167; 78/205	Protection of and assistance to internally displaced persons	75/237; 76/226; 77/205; 78/234	A global call for concrete action for the elimination of racism, racial discrimination, xenophobia and related intolerance and the comprehensive implementation of and follow-up to the Durban Declaration and Programme of Action
72/245; 73/155; 74/133; 76/147; 78/187	Rights of the child	75/314	Establishment of the Permanent Forum of People of African Descent
73/156; 75/168; 76/148; 77/203; 78/189	Rights of Indigenous Peoples	76/154	Implementation of the Convention on the Rights of Persons with Disabilities and the Optional Protocol thereto: participation
		76/158; 78/207	International Convention for the Protection of All Persons from Enforced Disappearance

Part VI Human rights and humanitarian affairs

76/168; 78/211	Effective promotion of the Declaration on the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities	78/193	Universal realization of the right of peoples to self-determination
		78/213	Promotion and protection of human rights in the context of digital technologies
77/317	International Day of Care and Support		
77/318	Promoting interreligious and intercultural dialogue and tolerance in countering hate speech

Deliverables

24.12 Table 24.1 lists all cross-cutting deliverables of the programme.

Table 24.1

Cross-cutting deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	2	2	2	2
1. Reports to the General Assembly	1	1	1	1
2. Reports to the Human Rights Council	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	34	34	34	34
Meetings of:				
3. The Committee for Programme and Coordination	1	1	1	1
4. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
5. The General Assembly (Third and Fifth Committees)	32	32	32	32
B. Generation and transfer of knowledge				
Fact-finding, monitoring and investigation missions (number of missions)	6	12	6	3
6. Commissions of inquiry	6	12	6	3
C. Substantive deliverables				
Good offices: engagement with government officials.				
D. Communication deliverables				
Outreach programmes, special events and information materials: booklets, pamphlets, fact sheets, wallcharts and information kits; programme’s website and presence on social media.				

Evaluation activities

- 24.13 The following evaluations completed in 2023 have guided the proposed programme plan for 2025:
- (a) Office of Internal Oversight Services thematic evaluation of United Nations Secretariat support to the Sustainable Development Goals;
 - (b) Evaluation of seven country programmes or projects at the field level.
- 24.14 In response to the results of the evaluations referenced above, OHCHR has reviewed its internal programming guidance to articulate its contribution to supporting Governments in achieving the Sustainable Development Goals more clearly.
- 24.15 The following evaluations are planned for 2025:
- (a) One thematic evaluation of a global cross-cutting issue or programme;
 - (b) Five country programmes or project evaluations.

Programme of work

Subprogramme 1

Human rights mainstreaming, right to development, and research and analysis

(a) Human rights mainstreaming

Objective

- 24.16 The objective, to which this subprogramme contributes, is to advance the promotion and protection of all human rights through strengthened integration of all human rights into areas of work of the United Nations system.

Strategy

- 24.17 To contribute to the objective, the subprogramme will:
- (a) Lead cooperation within the United Nations system for the integration of human rights into United Nations programmes and activities;
 - (b) Promote the practical integration of human rights into development programmes, ensuring consistency and mutual reinforcement between United Nations-supported development activities and country engagement strategies that are jointly agreed upon with the Member States;
 - (c) Contribute to developing the capability and knowledge of the United Nations system regarding relevant human rights issues through training and advice, taking into account disability and mainstreaming a gender perspective;
 - (d) Develop methodological tools to facilitate the practical integration of human rights into United Nations policies, programmes and activities and, where appropriate, the advancement of the practical application of approaches to that end.
- 24.18 The above-mentioned work is expected to result in:
- (a) The United Nations system further integrating human rights into its respective programmes and activities;
 - (b) Member States, pursuant to their request for support, building and strengthening national human rights promotion and protection capacities.

Programme performance in 2023

Renewed approach to transitional justice in the United Nations system

- 24.19 OHCHR collaborated with the Executive Office of the Secretary-General to renew the United Nations' approach to transitional justice. Global emerging trends and demands were assessed to this end. The initiative led to the development of a guidance note which serves as a first stop resource for the United Nations system to support transitional justice efforts, aligned with United Nations support to broader agendas such as sustaining peace and development. The note defines transitional justice as a strategic tool for redress, addressing justice gaps and contributing to just and inclusive societies in countries with armed conflict, repression and human rights violations legacies.
- 24.20 Progress towards the objective is presented in the performance measure below (see table 24.2).

Table 24.2
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	–	Availability of the Secretary-General’s guidance note on Transitional Justice: A Strategic Tool for People, Prevention and Peace and a dedicated webpage

Planned results for 2025

Result 1: enhanced awareness and knowledge of Member States and key stakeholders on the right to take part in the conduct of public affairs

Programme performance in 2023 and target for 2025

- 24.21 The subprogramme’s work contributed to the increased capacity of parliamentarians and national authorities regarding the protection and promotion of human rights in electoral contexts and constitutional processes through the wide dissemination of a toolkit, which met the planned target.
- 24.22 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 24.3).

Table 24.3
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Enhanced awareness of Member States on the right to participate in public affairs, including through <i>Human rights and Elections: A Handbook on International Human Rights Standards on Elections</i> and other publications	Elaboration by OHCHR and the Inter-Parliamentary Union of a self-assessment toolkit, addressed to parliamentarians, on the right to participate in public affairs and on constitutional processes	Increased capacity of parliamentarians and national authorities with regard to the protection and promotion of human rights in electoral contexts and constitutional processes through the wide dissemination of the toolkit	Parliamentarians and national authorities participate in the protection and promotion of human rights in electoral contexts and constitutional processes with the support of capacity-building initiatives	Increased participation by parliamentarians and national authorities in the protection and promotion of human rights in electoral contexts and constitutional processes

Result 2: Increased understanding of the challenges for the protection and promotion of the human rights of future generations

Programme performance in 2023 and target for 2025

- 24.23 The subprogramme’s work contributed to inter-agency coordination and human rights analysis for the discussion on the challenges for the protection and promotion of the human rights of future generations, in preparation for the intergovernmental Summit of the Future in 2024, meeting the planned target for 2023.
- 24.24 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 24.4).

Table 24.4
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	Strengthened cooperation with United Nations system entities to enhance a shared understanding of human rights and implications of the elements paper for the Declaration on Future Generations	Inter-agency coordination and human rights analysis is enhanced, to support the intergovernmental negotiations for the development of the Declaration on Future Generations in preparation for the Summit of the Future in 2024	Contributions to the discussions on the human rights challenges of future generations, in preparation for the intergovernmental Summit of the Future	The protection and promotion of human rights informs agreed follow-up to the Summit of the Future, as applicable

Result 3: International human rights standards on economic, social and cultural rights are integrated into the development of State budgets

Proposed programme plan for 2025

24.25 Budgeting can help advance human rights and the Sustainable Development Goals. Upon request, the subprogramme supports States in their budgeting processes, including through budget analyses with a focus on mitigating the adverse effects on the protection of the human rights.

Lessons learned and planned change

24.26 The lesson for the subprogramme was that budget analyses can assist the identification of areas needing increased allocations to protect economic, social and cultural rights. Integrating international human rights standards can help with budget transparency, community participation and accountability. In applying the lesson, the subprogramme will assist States, upon request, to integrate international human rights standards into their budget processes and the identification of areas where budget allocations could be used to advance and protect economic, social and cultural rights.

24.27 Expected progress towards the objective is presented in the performance measure below (see table 24.5).

Table 24.5
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	–	Member States have access to tools to support integration of international human rights standards into budget processes	Member States, pursuant to their request for support, integrate international human rights standards related to economic, social and cultural rights in budget processes

Deliverables

24.28 Table 24.6 lists all deliverables of the subprogramme.

Table 24.6

5. On strengthening national protection systems, areas of human rights protection, institution-building, education and compilation of best practices on the integration of human rights aspects into United Nations policies and programmes	10	10	10	10
C. Substantive deliverables				
Consultation, advice and advocacy: advice to United Nations entities and to Member States, at their request, on the development of standards on strengthening national human rights promotion and protection capacities; integration of human rights aspects into relevant areas.				

(b) Right to development

Objective

24.29 The objective, to which this subprogramme contributes, is to advance the promotion and protection of the effective enjoyment by all of all human rights through the effective realization of the right to development.

Strategy

24.30 To contribute to the objective, the subprogramme will pursue a multidimensional strategy. The subprogramme will:

- (a) Enhance awareness, knowledge and understanding about the content and importance of the right to development and identify obstacles at the international, regional and national levels through increased engagement, research, advocacy and information and educational activities;
- (b) Promote the realization of the right to development across the human rights programme and encourage relevant bodies of the United Nations system, as well as funds and specialized agencies, to integrate the right to development into their work and increase focus on its practical implementation;
- (c) Strengthen partnerships and collaboration with Member States, development agencies and international development, financial and trade institutions, and civil society, including NGOs and the private sector;

- (d) Encourage the promotion of the right to development in global development partnerships for the implementation by Member States of the 2030 Agenda, and most specifically Sustainable Development Goal 17, through cooperation and collaboration, advocacy, networking and technical advice, and the establishment of partnerships, and in keeping with existing mandates;
 - (e) Provide substantive support to the Human Rights Council and its subsidiary mechanisms related to the right to development, including the Working Group on the Right to Development, the Expert Mechanism on the Right to Development and the Human Rights Council biennial panel on the right to development;
 - (f) Promote the implementation of the right to development by providing requesting States with technical assistance to formulate national development strategies, such as poverty reduction strategy papers, Sustainable Development Goal strategies and the United Nations Sustainable Development Cooperation Frameworks, taking into account the full respect of human rights.
- 24.31 The above-mentioned work is expected to result in the integration of the promotion and protection of the right to development in global partnerships for development and policies and operational activities of relevant actors at all levels.

Programme performance in 2023

Integration of the promotion and protection of the right to development into African trade and investment policies

- 24.32 The subprogramme helps integrate the right to development through the provision of guidance and tools, technical advice and capacity-building at global, regional and national levels, upon request, including ex-ante human rights impact assessments of trade agreements. In 2022 and 2023, the subprogramme organized a series of workshops, panel discussions and briefings with representatives from Member States, civil society, national human rights institutions and the private sector on the integration of the promotion and protection of the right to development into trade and investment.
- 24.33 Progress towards the objective is presented in the performance measure below (see table 24.7).

Table 24.7

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	–	The African Commission on Human and Peoples' Rights adopted a resolution on human rights mainstreaming into trade. African Continental Free Trade Area Protocol of women and youth in trade was informed by an ex-ante human rights impact assessment

Planned results for 2025

Result 1: Working Group on the Right to Development and Expert Mechanism on the Right to Development inform intergovernmental deliberations on the right to development

Programme performance in 2023 and target for 2025

- 24.34 The subprogramme's work contributed to 468 participants engaging with the Working Group on the Right to Development and the Expert Mechanism on the Right to Development, which exceeded the planned target of 400 participants.

24.35 Progress towards the objective and the target for 2025² are presented in the performance measure below (see figure 24.I).

Figure 24.I

Performance measure: engagement with the Working Group on the Right to Development and the Expert Mechanism on the Right to Development (annual)

(Number of participants)

Result 2: increased participation in the Social Forum

Programme performance in 2023 and target for 2025

24.36 The subprogramme’s work contributed to increasing and diversifying the participation at the Social Forum, reaching 692 participants from 102 countries, including representatives from 167 civil society organizations, which exceeded the planned target of 551 participants.

24.37 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 24.II).

Figure 24.II

Performance measure: number of participants attending the Social Forum of the Human Rights Council (annual)

² The 2025 target has been adjusted downwards reflecting the end of hybrid and virtual modalities of official meetings of the Working Group on the Right to Development and the Expert Mechanism on the Right to Development.

Result 3: Anti-corruption policies and practices to address the negative impact of corruption on the enjoyment of human rights

Proposed programme plan for 2025

- 24.38 The subprogramme has been supporting efforts of Member States, upon request, to address the negative impact of corruption on the enjoyment of human rights.

Lessons learned and planned change

- 24.39 The lesson for the subprogramme was that there are increasing opportunities to engage and support the identification of gaps and assisting States parties, upon request, in this area. In applying the lesson, the subprogramme will provide context-specific analysis and policy advice to enhance the capacities of States and other stakeholders to develop anti-corruption policies and practices to address the negative impact of corruption on the enjoyment of human rights and to strengthen engagement of United Nations country teams to programming on anti-corruption efforts and human rights.
- 24.40 Expected progress towards the objective is presented in the performance measure below (see table 24.8).

Table 24.8

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Increased awareness of the nexus between corruption and human rights in accordance with Human Rights Council resolution 53/17	Member States have access to guidance on developing anti-corruption policies and practices to address the negative impact of corruption on the enjoyment of human rights	States, pursuant to their request for support, develop anti-corruption policies and practices to address the negative impact of corruption on the enjoyment of human rights United Nations country teams strengthened their programmes on anti-corruption and human rights

Deliverables

- 24.41 Table 24.9 lists all deliverables of the subprogramme.

Table 24.9

Subprogramme 1 (b): deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	13	13	13	12
1. Reports to the General Assembly	2	2	1	1
2. Reports and pre-sessional documents to the Human Rights Council, including on the right to development, the Social Forum, the Working Group on the Right to Development and the Expert Mechanism on the Right to Development	11	11	12	11
Substantive services for meetings (number of three-hour meetings)	30	29	31	29
Meetings of:				
3. The Human Rights Council: thematic plenary panels on the right to development, good governance and climate change	4	3	3	3
4. The Social Forum	4	4	4	4

7. Methodological tools and training material on the right to development	8	8	8	8
8. Research and analysis papers on the right to development	4	4	4	4
C. Substantive deliverables				
Consultation, advice and advocacy: expert advice to Member States, at their request, United Nations entities and others on the promotion of human rights, including on the development of related standards and implementation of the right to development.				
D. Communication deliverables				
Outreach programmes, special events and information materials: information products on the right to development, including in national development strategies.				

(c) Research and analysis

Objective

24.42 The objective, to which this subprogramme contributes, is to advance the promotion and protection of the effective enjoyment by all of all human rights through increased knowledge, awareness and understanding.

Strategy

24.43 To contribute to the objective, the subprogramme will:

- (a) Enhance the research and analysis of human rights issues, as well as the development and application of expertise in areas such as the elimination of all forms of discrimination, racism, including its contemporary forms, racial discrimination, xenophobia and related intolerance; the rule of law, democracy and good governance; the integration of human rights into counter-terrorism and anti-trafficking measures, and the implementation of the Sustainable Development Goals and poverty reduction strategies and programmes; and the protection of human rights in the context of the fight against terrorism and business activities;

- (b) Advocate for the indivisibility, interdependence and interrelatedness of all human rights, through research, policy-oriented analysis, support to standard-setting, advocacy, the compilation of best practices and improved knowledge management; the provision of specialized human rights reference services; the development of methodologies, operational guidelines and tools; capacity-building and international cooperation; and the development and delivery of human rights training and activities, for example within the framework of the World Programme for Human Rights Education;
 - (c) Further develop and strengthen substantive and methodological human rights expertise to support effective engagement with countries and with global and national-level partnerships, and lead efforts within the United Nations system to meet current human rights challenges;
 - (d) Provide advice and assistance to requesting States, the United Nations system, civil society, the media and national human rights institutions in their efforts to overcome human rights implementation gaps, promote inclusion and protect rights holders, through technical cooperation, advocacy, training, policy development, analysis and advice to partners at all levels;
 - (e) Follow up and implement the Durban Declaration and Programme of Action, the outcome document of the Durban Review Conference and related declarations, and the programme of activities for the implementation of the International Decade for People of African Descent (2015–2024).
- 24.44 The above-mentioned work is expected to result in enhanced knowledge, awareness and understanding of human rights issues.

Programme performance in 2023

Impact of casualty recording on the promotion and protection of human rights

- 24.45 In 2023, the subprogramme led research and analysis and distilled good practices on casualty recording and its impact on the promotion and protection of human rights ([A/HRC/53/48](#)), drawing also on the work of the programme at country-level. Building on the 2019 guidance note,³ the subprogramme provided support to establish casualty recording systems and maximize the use of the data and analysis. The data gathered helped to identify patterns of harm, shedding light on behaviours that have the most adverse effect on human rights and guiding responses.
- 24.46 Progress towards the objective is presented in the performance measure below (see table 24.10).

Table 24.10

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	The United Nations inter-agency working group on explosive weapons in populated areas adopted the political declaration stressing the importance of casualty recording in the protection of civilians ⁴	Casualty recording impacted on the promotion and protection of the rights to life, health, education and effective remedy; and the adoption of measures to enhance access to food, protection of vulnerable populations, prevention, accountability, political engagement and freedom of movement in several country contexts (A/HRC/53/48)

³ Office of the United Nations High Commissioner for Human Rights, Guidance on Casualty Recording (United Nations publication, Sales No. E.20.XIV.1).

⁴ Political Declaration on Strengthening the Protection of Civilians from the Humanitarian Consequences arising from the use of Explosive Weapons in Populated Areas, para. 1.8.

Planned results for 2025

Result 1: advance racial justice and equality, particularly for Africans and people of African descent⁵

Programme performance in 2023 and target for 2025

- 24.47 The subprogramme’s work contributed to enhanced capacities of States and others, in particular people of African descent and their organizations, to enable progress towards transformative change for racial justice and equality, including through the establishment of networks of organizations of people of African descent and the development of a note to support implementation of the right to participate in public affairs for people of African descent, which met the planned target for 2023.
- 24.48 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 24.11).

Table 24.11
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
<p>Twenty-nine consultations on systemic racism, held online with individuals from a range of sectors, mostly people of African descent</p> <p>Human Rights Council considered the report of the High Commissioner (A/HRC/47/53) and the annex thereto entitled “Four-Point Agenda towards Transformative Change for Racial Justice and Equality”, and adopted resolution 47/21</p>	<p>Human Rights Council considered the first report of the International Independent Expert Mechanism (A/HRC/51/55) and the High Commissioner’s report (A/HRC/51/53) in an enhanced interactive dialogue, which included the participation of directly affected individuals and communities, including victims and their families</p> <p>The International Independent Expert Mechanism held its first session. The Mechanism and OHCHR held several consultations, which had a large participation of people of African descent</p>	<p>Enhanced capacities of States and other stakeholders, in particular people of African descent and their organizations, to support implementation of the right to participate in public affairs for people of African descent</p>	<p>Greater country-level engagement by States and other stakeholders, in particular people of African descent and their organizations, towards transformative change for racial justice and equity</p>	<p>States and other stakeholders, particularly people of African descent and their organizations, take steps to advance racial justice and equality.</p>

⁵ Human Rights Council resolution 47/21.

Result 2: promoting and protecting economic, social and cultural rights within the context of addressing inequalities in the recovery from the coronavirus disease (COVID-19) pandemic

Programme performance in 2023 and target for 2025

- 24.49 The subprogramme’s work contributed to Member States considering a report on access to vaccines and medicines, identifying areas where change is needed, such as the pricing of essential medicines and the impact of pharmaceutical innovation system on access, which met the planned target for 2023.
- 24.50 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 24.12).

Table 24.12
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
The General Assembly, in its resolution 76/162 , requested the Secretary-General to prepare a report on human rights and cultural diversity	The Human Rights Council, in its resolution 50/13 , identified challenges in ensuring access to medicines, vaccines and other health products identified by the Human Rights Council Human rights group established within the United Nations Inter-Agency Task Force on the Prevention and Control of Non-communicable Diseases	Member States considered a report on access to medicines and therapies and rare diseases, and guidance on mental health, human rights and legislation	Member States have access to guidance to address access to medicines, vaccines and other health products in the context of the right of everyone to the highest attainable standard of physical and mental health, as recognized in the International Covenant on Economic, Social and Cultural Rights	Member States and other stakeholders have access to best practices in supporting States to respect, promote and fulfil economic, social and cultural rights, based on a report by the High Commissioner mandated by Human rights Council resolution 54/22

Result 3: Young human rights defenders from Indigenous, minority and people of African descent communities deepen their understanding of human rights

Proposed programme plan for 2025

- 24.51 The subprogramme provides human rights defenders from Indigenous, minority and people of African descent communities with opportunities to deepen their understanding of international human rights law, as first-hand exposure to human rights mechanisms, through a dedicated Fellowship Programme.

Lessons learned and planned change

- 24.52 The lesson for the subprogramme was that in-person preparatory training sessions for each linguistic group, in collaboration with partner universities, helped foster effective engagement during the training sessions, enhancing cultural sensitivity and awareness and promoting cross-cultural communication. In applying the lesson, the subprogramme will deepen its partnership with universities and the holding of in-person training sessions and preparatory sessions, in several languages. The subprogramme will also strengthen alumni networks, mentoring and job-training opportunities for fellows.

24.53 Expected progress towards the objective is presented in the performance measure below (see figure 24.III).

Figure 24.III

Performance measure: Number of fellows participating in training programmes for people of African descent, Indigenous Peoples and minorities (annual)

Deliverables

Consultation, advice and advocacy: expert advice to Member States, United Nations entities, special rapporteurs and independent experts of the Human Rights Council, and other stakeholders, including on the development of related standards.				
D. Communication deliverables				
Outreach programmes, special events and information materials: information products on global and national advocacy related to women's rights, racial discrimination, Indigenous Peoples and the administration of justice.				
Library services: publications, training and educational materials on human rights and translations of the Universal Declaration of Human Rights.				

Subprogramme 2 Supporting human rights treaty bodies

Objective

- 24.55 The objective, to which this subprogramme contributes, is to advance the promotion and protection of the effective enjoyment of all human rights by all, in particular through support and advice to the human rights treaty bodies and by increasing awareness among national and international actors of the international human rights treaties and the work of treaty bodies.

Strategy

- 24.56 To contribute to the objective, the subprogramme will:
- Provide support and advice for the review of State reports; the conduct of inquiries and country visits, where provided for in the treaty or upon request of States; early warning and urgent action procedures and the processing of individual complaints, urgent actions and inter-State complaints; visits to places of deprivation of liberty, as well as assistance and advice to the national preventive mechanisms; and the preparation of general comments;
 - Support the efforts of treaty bodies to improve and enhance their working methods;
 - Engage with Member States, national human rights institutions, United Nations agencies, NGOs and other actors to enhance awareness, knowledge and understanding of the treaty bodies' work and outputs, and to promote ratification of international human rights treaties;
 - Facilitate the use of videoconferencing and webcasting to improve the accessibility and visibility of the treaty bodies, when feasible;
 - Support States parties, upon request, in building their capacity to implement their treaty obligations as well as in the preparation and timely submission of their national reports;
 - Support States, upon request, in establishing or strengthening national mechanisms for reporting and follow-up through the exchange of experiences and good practices;

- (g) Assist treaty bodies in their efforts to address reprisals when they occur, and in their responses to claims and acts of intimidation or reprisals against individuals and groups for their contribution to the work of the human rights treaty bodies.

24.57 The above-mentioned work is expected to result in:

- (a) Efficient and effective functioning of the treaty bodies;
- (b) Enhanced cooperation of stakeholders at all levels with treaty bodies in accordance with their working methods and mandates.

Programme performance in 2023

Increased number of ratifications of international human rights treaties

24.58 As part of the Human Rights 75 initiative, the subprogramme launched a campaign that contributed to 16 new ratifications in 2023, as well as pledges from 23 States for 43 additional ratifications. Through regional and cross-regional conferences, workshops and side events, the subprogramme contributed to enhancing knowledge of the content of the instruments and States’ obligations thereunder and facilitated exchanges of experiences between States. The campaign paid particular focus to the Optional Protocol to the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment and the roles of national preventive mechanisms on the twentieth anniversary of its adoption.

24.59 Progress towards the objective is presented in the performance measure below (see figure 24.IV).

Figure 24.IV

Performance measure: number of international human rights treaties ratified (annual)

Planned results for 2025

Result 1: capacity of States parties to engage with treaty bodies strengthened

Programme performance in 2023 and target for 2025

24.60 The subprogramme’s work contributed to the establishment or strengthening of 58 national mechanisms for reporting and follow-up, which exceeded the target of 57.

24.61 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 24.V).

Figure 24.V
Performance measure: number of national mechanisms for reporting and follow-up with treaty bodies (cumulative)

Result 2: enhanced participation of delegates in reviews by treaty bodies of reports of States parties

Programme performance in 2023 and target for 2025

- 24.62 The subprogramme’s work contributed to 166 hybrid/virtual meetings with interpretation, which did not meet the planned target of 266. The target was not met as there was a return to in-person meetings of treaty bodies, except for those specifically mandated, such as the official dialogues with State party delegations, as mandated by the General Assembly in paragraph 23 of its resolution [68/268](#).
- 24.63 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 24.VI).

Figure 24.VI
Performance measure: number of hybrid meetings of treaty bodies with interpretation (annual)

Result 3: increased international cooperation to support national mechanisms for implementation, reporting and follow-up

Proposed programme plan for 2025

- 24.64 National mechanisms for implementation, reporting and follow-up enable States to manage their engagement with human rights mechanisms. The subprogramme supports the establishment and strengthening of those mechanisms through capacity-building activities, as a follow up to Human Rights Council resolution [51/33](#).

Lessons learned and planned change

- 24.65 The lesson for the subprogramme was that peer-to-peer learning can enable capacity-building in relation to national mechanisms for implementation, reporting and follow-up. In applying the lesson, the subprogramme will facilitate international cooperation and sharing of good practices to support those national mechanisms. The subprogramme will also establish a network of national mechanisms, a virtual knowledge hub and organize peer-learning activities.
- 24.66 Expected progress towards the objective is presented in the performance measure below (see figure 24.VII).

Figure 24.VII

Performance measure: number of countries that have shared practices on implementation, reporting and follow up to the international human rights mechanisms through the knowledge hub (annual)

Deliverables

- 24.67 Table 24.14 lists all deliverables of the subprogramme.

33. Training courses on reporting, individual communications, country visits and/or follow-up of treaty body recommendations to States parties	120	185	150	150
Technical materials (number of materials)	1	2	2	1
34. Treaty-specific guides	1	2	2	1
C. Substantive deliverables				
Consultation, advice and advocacy: consultations and advocacy on legal instruments on the international human rights system with Member States, United Nations entities and other stakeholders; consultation and advice on the establishment and/or strengthening of national mechanisms for reporting and follow-up to the human rights treaty bodies; briefings to newly elected mandates holders of the Committees and new members of the Boards of Trustees of the humanitarian trust funds.				
Databases and substantive digital materials: the Universal Human Rights Index, with over 170,000 observations and recommendations made by international human rights mechanisms; treaty body jurisprudence databases; knowledge hub on national mechanisms on reporting and follow-up; the national recommendations tracking database.				
D. Communication deliverables				
Outreach programmes, special events and information materials: informational brochures on the activities of the treaty bodies, the capacity-building programme and the humanitarian trust funds, as well as the Special Fund established by the Optional Protocol to the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment.				

Subprogramme 3 Advisory services, technical cooperation and field activities

Objective

- 24.68 The objective, to which this subprogramme contributes, is to advance the promotion and protection of the effective enjoyment by all of all human rights, through enhanced capacity-building, including through assistance to requesting States.

Strategy

- 24.69 To contribute to the objective, the subprogramme will:
- (a) Provide States, upon their request, and stakeholders at the national level with human rights legal advice, education, awareness-raising and training through mutually agreed advisory services and technical cooperation programmes, including in the implementation of the recommendations to which States have agreed in the universal periodic review process;
 - (b) Improve cooperation within the United Nations system for the protection and promotion of human rights, through joint activities, the deployment of human rights officers, interaction with OHCHR programmes in the field and relevant United Nations human rights mechanisms;
 - (c) Continue to deploy human rights observers and fact-finding missions, including in humanitarian emergencies, at the request of an affected country or as mandated by the relevant United Nations legislative bodies;

- (d) Assist the Human Rights Council and its mechanisms, as well as other policymaking bodies and the treaty bodies, in preparing for and following up on their dialogue with countries and ensure the efficient and effective functioning of thematic and country-specific special procedures by following human rights developments.
- 24.70 The above-mentioned work is expected to result in:
- (a) Enhanced national capacities to translate international human rights obligations into effective laws, regulations and policies and meet the challenges to the full realization of human rights;
- (b) Enhanced capacity of United Nations country teams, field presences, peacekeeping operations and peacebuilding activities to assist requesting countries in their efforts to develop national human rights protection systems, guided, inter alia, by the recommendations of the international human rights mechanisms;
- (c) Prevention of the continuation of human rights violations, including in situations of large-scale crisis.

Programme performance in 2023

Member States and other stakeholders make pledges to promote and protect human rights.

- 24.71 The subprogramme supported the organization of four national dialogues, 84 national consultations, three regional hubs and five regional dialogues in commemoration of the seventy-fifth anniversary of the Universal Declaration of Human Rights and the thirtieth anniversary of the Vienna Declaration and the Programme of Action.
- 24.72 Human Rights 75 provided an opportunity to raise awareness and reflect on achievements, best practices and challenges regarding the promotion and protection of human rights. Member States and other stakeholders made concrete pledges to promote and protect human rights. The initiative culminated in a high-level event held in Geneva on 11 and 12 December 2023, attended by representatives of 150 countries, including 74 high-level dignitaries, with online regional hubs connected virtually.
- 24.73 Progress towards the objective is presented in the performance measure below (see table 24.15).

Table 24.15

Performance measure: number of pledges to promote and protect human rights made by Member States and other stakeholders, in the context of the Human Rights 75 initiative,

2021 (actual)	2022 (actual)	2023 (actual)
–	–	514 pledges from States and 263 pledges from other stakeholders to promote and protect human rights were made in the context of Human Rights 75

Planned results for 2025

Result 1: enhanced capacity of Member States to reduce inequalities

Programme performance in 2023 and target for 2025

- 24.74 The subprogramme's work contributed to 81 Member States taking action to enhance legislation and policies that integrate economic, social and cultural rights, which met the planned target of 81.

24.75 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 24.VIII).

Figure 24.VIII
Performance measure: number of Member States that took action to enhance legislation and policies that integrate economic, social and cultural rights (cumulative)

Result 2: towards implementation by Member States of recommendations emanating from international human rights mechanisms

Programme performance in 2023 and target for 2025

24.76 The subprogramme’s work contributed to 62 Member States improving their reporting to the human rights mechanisms and the implementation of their recommendations, which exceeded the planned target of 60.

24.77 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 24.IX).

Figure 24.IX
Performance measure: number of least developed countries and small island developing States that implement recommendations emanating from international human rights mechanisms (cumulative)

Result 3: strengthened effectiveness of national human rights institutions in line with the Paris Principles

Proposed programme plan for 2025

24.78 The subprogramme provides Member States and stakeholders in all regions with advisory services and technical cooperation programmes to establish or strengthen the effectiveness of national human

rights institutions, in accordance resolution 78/204 and the principles relating to the status of national institutions for the promotion and protection of human rights (the Paris Principles).

Lessons learned and planned change

- 24.79 The lesson for the subprogramme was that direct engagement with national human rights institutions, at their request, could further advance human rights at the national level. In applying the lesson, the subprogramme will provide capacity-building and technical cooperation aimed at enhancing their capacities and increasing their compliance with international human rights standards and obligations.
- 24.80 Expected progress towards the objective is presented in the performance measure below (see figure 24.X).

Figure 24.X

Performance measure: number of national human rights institutions established or strengthened in line with the Paris Principles (cumulative)

Deliverables

24.81 Table 24.16 lists all deliverables of the subprogramme.

Table 24.16

Subprogramme 3: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	69	68	70	70
Reports to:				
1. The General Assembly	14	14	14	14
2. The Human Rights Council	54	53	55	55
3. The General Assembly by the Special Committee to Investigate Israeli Practices	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	85	106	113	110
Meetings of:				
4. The Human Rights Council related to country mandates, technical cooperation, and commissions of inquiry and fact-finding missions	62	83	90	87

B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	213	183	240	215
9. On technical cooperation and substantive human rights support, upon request, on economic, civil, cultural, social and political rights	98	88	130	100
10. On national and regional technical cooperation in the area of human rights	115	95	110	115
Seminars, workshops and training events (number of days)	267	284	260	290
11. Training events on various human rights themes for Governments, national human rights institutions and civil society	267	284	260	290
Fact-finding, monitoring and investigation missions (number of missions)	6	20	9	20
12. Country-specific fact-finding missions	6	20	9	20
Humanitarian assistance missions (number of missions)	–	1	–	3
13. Humanitarian assistance missions	–	1	–	3
C. Substantive deliverables				
Consultation, advice and advocacy: consultations on human rights with Member States, national human rights institutions and civil society; assistance to special rapporteurs and independent experts of the Human Rights Council (country mandates); technical support and substantive and secretariat services for country-specific missions; monitoring, technical support and substantive services to human rights components in peace missions, including preparing inputs on the human rights situation mandated by the Security Council; substantive advice related to human rights challenges in humanitarian operations.				
Databases and substantive digital materials: databases on geographic human rights information, including the human rights case database, a secure information exchange platform in support of the commissions of inquiry and fact-finding missions.				
D. Communication deliverables				
External and media relations: press releases and media briefings by country mandate holders and the High Commissioner.				

**Subprogramme 4
Supporting the Human Rights Council, its subsidiary bodies and mechanisms**

Objective

- 24.82 The objective, to which this subprogramme contributes, is to advance the promotion and protection of the effective enjoyment by all of all human rights, by providing strengthened support and advice to the Human Rights Council and its subsidiary bodies and mechanisms, including the Human Rights Council Advisory Committee, the special procedures, the universal periodic review and the complaint procedure.

Strategy

- 24.83 To contribute to the objective, the subprogramme will:
- (a) Research and develop analytical information and knowledge in support of the thematic special procedures and the universal periodic review mechanism to enhance their effectiveness;
 - (b) Support and provide thematic expertise for fact-finding missions and special procedure mandate holders' country visits, including through enhanced cooperation within the programme, the analysis of gaps in the implementation of international human rights instruments, the promotion of observance for international human rights standards and the provision of timely advice for addressing gross and systematic violations of human rights;

- (c) Support the international human rights mechanisms in their efforts to promote the implementation of the 2030 Agenda in accordance with States' human rights obligations;
- (d) Disseminate knowledge of the conclusions, recommendations and other outcomes of the universal periodic review, as well as the findings and methodology of the thematic special procedures, and improve coordination among mandate holders and other mechanisms of the human rights machinery;
- (e) Support partnerships and reinforce dialogue and cooperation with Governments, national human rights institutions, civil society organizations, victims, United Nations agencies and programmes and the United Nations human rights machinery and cooperating policymaking bodies, including to support follow-up to the findings and recommendations of the special procedure mandate holders and the outcomes of the universal periodic review;
- (f) Provide assistance to States within the universal periodic review framework.

24.84 The above-mentioned work is expected to result in:

- (a) Enhanced and effective functioning of the Human Rights Council and its subsidiary bodies and mechanisms, including more effective deliberations and decision-making processes;
- (b) Enhanced cooperation at all levels with stakeholders that can benefit from and/or contribute to the work of the Human Rights Council and its subsidiary bodies and mechanisms.

Programme performance in 2023

Increased engagement at the Forum on Business and Human Rights

- 24.85 Over 140 countries participated in the twelfth edition of the annual Forum on Business and Human Rights. The session focused on the Guiding Principles on Business and Human Rights and the different ways the Guiding Principles can be implemented. Over 200 speakers from diverse groups and sectors took the floor, for the first time with international sign language and closed captioning for persons with different disabilities. Through research, discussions, experience-sharing and collaboration, the Forum supported Member States and the private sector to better understand their responsibilities and duties, and supported human rights defenders, grass-roots community leaders and civil society activists to better understand potential claims and remedies.
- 24.86 Progress towards the objective is presented in the performance measure below (see figure 24.XI).

Figure 24.XI
Performance measure: number of sessions and registered participants for the Forum on Business and Human Rights (annual)

Planned results for 2025

Result 1: enhanced engagement of parliamentarians in the universal periodic review

Programme performance in 2023 and target for 2025

- 24.87 The subprogramme’s work contributed to 87 parliamentarians with increased knowledge on engagement with the Human Rights Council and its universal periodic review, which exceeded the planned target of 80 parliamentarians.
- 24.88 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 24.XII).

Figure 24.XII
Performance measure: number of parliamentarians with increased knowledge on engagement with the Human Rights Council and its universal periodic review (annual)

Result 2: enhanced participation of the least developed countries and small island developing States in the Human Rights Council

Programme performance in 2023 and target for 2025

- 24.89 The subprogramme's work contributed to 41 delegates from least developed countries and small island developing States participating in Human Rights Council sessions, which exceeded the planned target of 38 delegates.
- 24.90 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 24.XIII).

Figure 24.XIII

Performance measure: number of delegates from least developed countries and small island developing States participating in Human Rights Council sessions (annual)

Result 3: enhanced contribution of national human rights institutions to the universal periodic review mechanism

Proposed programme plan for 2025

- 24.91 In line with General Assembly and Human Rights Council resolutions, the stakeholders' report under the universal periodic review includes a section dedicated to contributions from national human rights institutions accredited in full compliance with the Paris Principles. The subprogramme works with national human rights institutions, in close cooperation with the Global Alliance of National Human Rights Institutions, to encourage and support their active participation in the universal periodic review through virtual pre-session briefings, including exchanges of experiences among national human rights institutions and workshops to discuss their role in the implementation of the outcomes of the reviews.

Lessons learned and planned change

- 24.92 The lesson for the subprogramme was that regular briefing sessions, combined with regular sharing of information on timelines and modalities, as well as on-demand bilateral meetings, can enhance the participation and contribution of national human rights institutions. In applying the lesson, the subprogramme will expand the practice of regular pre-session briefings and will replicate such practice at the regional level.
- 24.93 Expected progress towards the objective is presented in the performance measure below (see figure 24.XIV).

Figure 24.XIV

Performance measure: number of written and oral submissions made by national human rights institutions during the universal periodic review (annual)

Deliverables

24.94 Table 24.17 lists all deliverables of the subprogramme.

24. Statistical report on the Human Rights Council	3	3	3	3
25. Monthly lists of communications	12	12	12	12
C. Substantive deliverables				
Consultation, advice and advocacy: consultations with members and observers of the Council; briefings to Member States and United Nations entities on procedural issues relating to the Council and its subsidiary bodies, mechanisms and working groups; briefings by the Secretary of the Council to NGOs; communications by special rapporteurs, independent experts and working groups mandated by policymaking bodies on behalf of alleged victims of human rights violations.				
D. Communication deliverables				
External and media relations: press releases on the work of the Human Rights Council, its subsidiary bodies and mechanisms.				
Digital platforms and multimedia content: web pages on the work of the Human Rights Council, its subsidiary bodies and mechanisms.				

B. Proposed post and non-post resource requirements for 2025

Overview

24.95 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 24.18 to 24.20. OHCHR carried out a spending review pursuant to paragraph 20 of General Assembly resolution 77/262, as part of its proposed budget exercise for 2025. The spending review was integrated into other mandated reviews that were aimed at determining the optimal level and types of resources required to implement the mandates of OHCHR, as set out in the programme plan for 2025. The results of the reviews are included under new and expanded mandates in table 24.18 and discussed further in paragraphs 24.99 to 24.104.

24.96 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 24.21 to 24.23 and figure 24.XV.

24.97 As shown in tables 24.21 (1) and 24.23, the overall resources proposed for 2025 amount to \$229,104,000 before recosting, reflecting a net increase of \$36,581,600 (or 19.0 per cent) compared with the approved budget for 2024. Resource changes result from technical adjustments and new and expanded mandates. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Overall resource changes

Technical adjustments

24.98 As shown in table 24.21 (1), resource changes reflect a net increase of \$28,599,900, as follows:

- (a) **Policymaking organs** (decrease of \$6,000). The decrease of \$6,000 under contractual services relates to the removal of non-recurrent provisions associated with Human Rights Council resolution 51/3 that were approved for 2024 and are no longer required in 2025;
- (b) **Executive direction and management** (increase of \$377,000). The net increase of \$377,000 comprises: (i) a decrease of \$95,100 under other staff costs (\$78,400) and contractual services (\$16,700), relating to the removal of non-recurrent provisions associated with Human Rights

Council resolution [52/19](#) that were approved for 2024 and are no longer required in 2025; and (ii) an increase of \$472,100, which relates to the higher provision at continuing vacancy rates for 1 Documents Management Officer (P-4), 1 Human Rights Officer (P-3), 2 Public Information Officers (P-3) and 2 Documents Management Assistants (General Service (Other level)) established in 2024 pursuant to General Assembly resolution [78/252](#), which were subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts;

- (c) **Subprogramme 1, Human rights mainstreaming, right to development, and research and analysis** (decrease of \$1,403,800). The net decrease of \$1,403,800 comprises: (i) a decrease of \$5,676,000 under other staff costs (\$3,835,900), consultants (\$52,200), travel of representatives (\$428,400), travel of staff (\$106,600), contractual services (\$52,300), general operating expenses (\$119,000), furniture and equipment (\$82,400) and grants and contributions (\$999,200), relating to the removal of non-recurrent provisions associated with new and expanded mandates approved for 2024 pursuant to Human Rights Council resolutions from its fifty-second to fifty-fifth sessions that were approved for 2024 and are no longer required in 2025; (ii) an increase of \$341,300 under other staff costs (\$112,100), travel of representatives (\$51,500), travel of staff (\$21,100), contractual services (\$11,600), general operating expenses (\$12,600) and grants and contributions (\$132,400), relating to the consolidation of resources to implement mandates of the Council pursuant to paragraph 7 of General Assembly resolution [78/252](#), in which the Assembly endorsed the recommendation of the Advisory Committee on Administrative and Budgetary Questions contained in paragraph VI.48 of its report on the proposed programme budget for 2024 ([A/78/7](#)); and (iii) an increase of \$3,930,900 under posts, which relates to the higher provision at continuing vacancy rates for 1 Senior Human Rights Officers (P-5), 21 Human Rights Officers (P-4), 1 Information Systems Officer (P-3), 10 Human Rights Officers (P-3), 2 Associate Programme Management Officers (P-2), 10 Associate Human Rights Officers (P-2), 2 Programme Management Assistants (General Service (Other level)) and 2 Administrative Assistants (General Service (Other level)) established in 2024 pursuant to Assembly resolutions [78/253](#) and [78/234](#), which were subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts;
- (d) **Subprogramme 2, Supporting human rights treaty bodies** (increase of \$481,600). The net increase of \$481,600 comprises: (i) a decrease of \$294,800 under other staff costs (\$143,200), travel of representatives (\$29,400), contractual services (\$4,400) and grants and contributions (\$117,800), relating to the removal of non-recurrent provisions associated with Human Rights Council resolution [51/33](#) that were approved for 2024 and are no longer required in 2025; and (ii) an increase of \$776,400 under posts, which relates to the higher provision at continuing vacancy rates for 8 Human Rights Officers (P-3), 1 Information Management Officer (P-3) and 1 Programme Management Assistant (General Service (Other level)) established in 2024 pursuant to General Assembly resolution [78/252](#), which were subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts;
- (e) **Subprogramme 3, Advisory services, technical cooperation and field activities** (increase of \$27,900,500). The net increase of \$27,900,500 comprises: (i) a decrease of \$2,160,300 under other staff costs (\$1,057,100), travel of staff (\$195,600), contractual services (\$333,700), general operating expenses (\$50,500), supplies and materials (\$8,900), furniture and equipment (\$402,400) and grants and contributions (\$112,100), relating to the removal of non-recurrent provisions associated with new and expanded mandates approved for 2024 pursuant to Human Rights Council resolutions from its fifty-second to fifty-fifth sessions that were approved for 2024 and are no longer required in 2025; (ii) an increase of \$28,466,300 under other staff costs (\$21,766,100), consultants (\$587,700), travel of representatives (\$820,800), travel of staff (\$1,208,500), contractual services (\$1,317,300), general operating expenses (\$1,769,200), supplies and materials (\$68,700), furniture and equipment (\$253,100) and grants and contributions (\$674,900), relating to the consolidation of resources to implement mandates of the Council pursuant to operative paragraph 7 of General Assembly resolution [78/252](#), in which

the Assembly endorsed the recommendation of the Advisory Committee on Administrative and Budgetary Questions contained in paragraph VI.48 of its report on the proposed programme budget for 2024 (A/78/7); and (iii) an increase of \$1,594,500 under posts, which relates to the higher provision at continuing vacancy rates for 1 Senior Human Rights Officer (P-5), 5 Human Rights Officers (P-4), 1 Information Management Officer (P-4), 1 Security Coordination Officer (P-3), 1 Information Management Officer (P-3), 4 Human Rights Officers (P-3), 1 Finance Officer (P-3), 6 Human Rights Officers (National Professional Officer, level C), 1 Associate Administrative Officer (National Professional Officer, level B), 1 Associate Human Rights Officer (National Professional Officer, level B), 1 Associate Information Management Officer (National Professional Officer, level B), 1 Programme Management Assistant (General Service (Other level)), 2 Administrative Assistants (General Service (Other level)), 1 Information Management Assistant (General Service (Other level)) and 1 Driver (General Service (Other level)) established in 2024 pursuant to the Assembly resolutions 78/252, 78/253 and 78/235, which were subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts;

- (f) **Subprogramme 4, Supporting the Human Rights Council, its subsidiary bodies and mechanisms** (increase of \$792,100). The increase of \$792,100 under posts relates to the higher provision at continuing vacancy rates for 2 Human Rights Officers (P-4), 1 Human Rights Officer (P-3), 6 Associate Human Rights Officers (P-2), 1 Programme Management Assistant (General Service (Other level)) and 1 Team Assistant (General Service (Other level)) established in 2024 pursuant to General Assembly resolution 78/252, which were subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts;
- (g) **Programme support** (increase of \$458,500). The increase of \$458,500 under posts relates to the higher provision at continuing vacancy rates for 2 Administrative Officers (P-3), 2 Security Coordination Officers (P-3) and 2 Programme Management Assistants (General Service (Other level)) established in 2024 pursuant to General Assembly resolution 78/252, which were subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts.

New and expanded mandates

24.99 As shown in table 24.21 (1), resource changes reflect an increase of \$7,981,700, representing an increase of \$2,475,600, relating to requirements arising from resolutions and decisions from the Human Rights Council and a net increase of \$5,506,100 relating to General Assembly resolution 78/252, including mandates to conduct a review of posts and positions, a comprehensive proposal for core capacity and a spending review by the Office. The distribution across the subprogrammes is as follows:

- (a) **Executive direction and management** (increase of \$317,000). The increase of \$317,000 under posts reflects the proposed establishment of 2 posts, namely, 1 Senior Programme Management Officer (P-5), 1 Programme Management Officer (P-4), and the upward reclassification of 1 Chief of Staff (P-5 to D-1) and 1 Speechwriter to Senior Speechwriter (P-4 to P-5), as the outcome of the review of substantive posts. Further information about the review of substantive posts and positions is provided in paragraphs 24.100 to 24.102 and details are provided in annex II to the present report;
- (b) **Subprogramme 1, Human rights mainstreaming, right to development, and research and analysis** (increase of \$2,552,300). The increase of \$2,552,300 comprises: (i) an increase under posts (\$416,700), which reflects the establishment of 4 posts (1 Human Rights Officer (P-4), 2 Human Rights Officers (P-3) and 1 Associate Human Rights Officer (P-2)) relating to the establishment of a core capacity for substantive posts (further information about the core capacity is provided in paragraphs 24.100 to 24.102 and details are provided in annex II); (ii) an increase under other staff costs (\$1,339,900), consultants (\$218,200), travel of representatives (\$136,200), travel of staff (\$66,100), contractual services (\$47,700), general operating expenses (\$8,200), furniture and equipment (\$15,400) and grants and contributions (\$303,900),

Section 24 Human rights

relating to requirements for Human Rights Council resolutions and General Assembly resolutions 75/314 and 76/226. A breakdown by mandate is provided in table 24.24; and (iii) an increase under contractual services (\$10,000), which is part of the spending review to reflect the need for expertise to support the Office's digital shift, offset by a corresponding decrease under other staff costs (\$10,000), to be achieved through improved workforce management methods;

Total	1 339 900	218 200	136 200	66 100	47 700	8 200	15 400	303 900	2 135 600

- (c) **Subprogramme 3, Advisory services, technical cooperation and field activities** (increase of \$4,164,400). The net increase of \$4,164,400 comprises: (i) an increase under posts (\$4,077,000), which relates to the establishment of 36 posts (6 D-1, 1 P-4, 1 P-3, 10 P-2 and 18 National Professional Officer), the conversion of 6 posts from extrabudgetary to regular budget funding (3 P-5 and 3 P-3) and the redeployment of 2 posts (D-1) from Geneva to Bangkok and to Panama City as a result of the spending review and substantive review of posts (further information on the review of substantive posts is provided in paragraphs 24.100 to 24.102 below and details are provided in annex II); (ii) an increase of \$229,400 under

consultants (\$49,200) and grants and contributions (\$180,200), relating to requirements for Human Rights Council resolution [52/15](#); (iii) a decrease of \$142,000 under non-post resources, which reflects the outcome of the review, and comprises reductions under other staff costs (\$67,000) and general operating expenses (\$75,000) (further information on the review of posts and the related non-post resources is provided in paragraphs 24.100 to 24.102 below and details are provided in annex II); and (iv) cost-neutral redeployments to contractual services (\$190,000) and furniture and equipment (\$200,000) from other staff costs (\$190,000) and supplies and materials (\$200,000), to reflect the need for expertise to support the Office's digital shift for improved workforce management methods, which is part of the spending review;

- (d) **Subprogramme 4, Supporting the Human Rights Council and its subsidiary bodies** (decrease of \$8,400). The decrease of \$8,400 comprises a decrease of \$372,200 under other staff costs, offset in part by an increase of \$186,200 under posts that reflects the establishment of 1 Human Rights Officer (P-3) and 1 Programme Management Assistant (General Service (Other level) and by an increase of \$177,600 under other staff costs, which are required to implement Human Rights Council resolution [52/26](#) (further information about the core capacity is provided in paragraphs 24.100 to 24.102 below, and details of the posts are provided in annex II);
- (e) **Programme support** (increase of \$956,400). The increase under posts (\$956,400) relates to the establishment of 9 posts (2 P-4, 6 P-3 and 1 P-2), as detailed in paragraph 24.102 below and in annex II.

Review of posts and general temporary assistance positions

- 24.100 In the report on the proposed programme budget for 2024 ([A/78/6 \(Sect. 24\)](#)), the OHCHR proposal for bolstering its capacity to effectively address human rights challenges and fulfil its mandates is outlined. The first of two phases of a comprehensive proposal aimed at optimizing operations and addressing operational gaps, through improved and more strategic resource planning and utilization, was presented. A commitment was made to continue to review the resource requirements and funding arrangements and to include phase two of the proposal in the proposed programme budget for 2025.
- 24.101 In its review of the proposed programme budget for 2024, the Advisory Committee on Administrative and Budgetary Questions recommended a review of substantive posts and general temporary assistance positions to eliminate duplication and ensure cost-effective implementation of mandates ([A/78/7](#), para. VI.55, and [A/78/7/Add.39](#), para. 35). It also recommended an expanded proposal for a comprehensive core capacity for administrative resource and general temporary assistance positions ([A/78/7/Add.39](#), para. 36), and to conduct a spending review (*ibid.*, para. 48). The General Assembly endorsed the recommendations by the Advisory Committee in its resolutions [78/252](#) and [78/253](#).
- 24.102 The outcome of the above addresses the operational model and resources as follows:
- (a) **Strengthened programme management and evaluation.** This would enable OHCHR to better manage and utilize resources across the programme, including by continuously tracking progress and managing risks and opportunities, ensuring programme alignment with overall mandate and strategy, and evaluating effectiveness. This approach would not only enhance accountability and transparency, but also ensure more cost-effective implementation over time of all mandates. This proposal would require the establishment of seven posts (1 Programme Management Officer (P-4) in Geneva under executive direction and management and 6 Programme Management Officers (National Professional Officer), in field locations, under subprogramme 3) to plan, implement and monitor the programme implementation and risks. Further details about these posts are provided in annex II;
 - (b) **Strengthened Executive Office functions for coordination, communication and promotion of a diverse and inclusive workplace.** This would enhance coordination across workstreams, headquarters and field locations and would provide oversight and support, including strategic

communications. Strengthening the capacity in the area of diversity and inclusiveness would bring about a more diverse and inclusive workforce and working environment at OHCHR. This proposal would require the reclassification of two posts, namely, a Chief of Staff (P-5 to D-1) and a Speechwriter to Senior Speechwriter (P-4 to P-5), and the establishment of a Senior Programme Management Officer (P-5) in Geneva, to promote a diverse and inclusive workplace, working also in collaboration with key departments and entities in Geneva. Through this proposal, OHCHR would have access to a wide range of skills, expertise and perspectives, enable informed and innovative solutions, and foster complementarity and improved decision-making. Further details about these posts are provided in annex II;

- (c) **Rationalized support for human rights inquiries.** This would be realized through strengthening capacity, together with combining operations and existing resources and posts in the Emergency Response Section into a single branch, thereby enabling more effective and efficient efforts to prevent and end human rights violations and abuses. This proposal would lead to more timely support in mandate implementation, while eliminating redundancy of efforts, and would require the establishment of four posts: 1 Chief of Branch (D-1), 1 Human Rights Officer (P-4), 1 Human Rights Officer (P-3) and 1 Associate Human Rights Officer (P-2) in Geneva, under subprogramme 3. Further details about these posts are provided in annex II;
- (d) **Effective implementation through regional presences.** This proposed realignment takes into account numbers, grades and locations of posts and general temporary assistance positions and capacities, in the light of the acute complexity and scope of leadership responsibilities at the regional level, in order to more effectively deliver on the significant increase in requests for technical assistance from Member States, in particular by building national capacities and reducing costs over time of providing this support from OHCHR headquarters. The proposal would require 32 additional regular posts through establishment or conversion: 5 Representatives, Human Rights (D-1, establishment), 3 Senior Human Rights Officers (P-5, conversion), 3 Human Rights Officers (P-3, conversion), 9 Associate Human Rights Officers (P-2, establishment), 6 Human Rights Officers (National Professional Officer, establishment) and 6 Administrative Officers (National Professional Officer, establishment) in regional offices. The proposal also makes use of existing resources through the redeployment of two existing posts of Chief of Service (D-1) from Geneva to the Bangkok and Panama City regional offices;
- (e) **Core capacity enhancement.** This would establish a robust core capacity to manage a number of existing and future mandates more efficiently, aligning with the recommendations of the Advisory Committee (A/78/7, para. VI.55, and A/78/7/Add.39, para. 36), to implement a core capacity in full (following the limited core capacity proposal in the proposed programme budget for 2024) and review general temporary assistance positions to eliminate duplication and ensure cost-effectiveness. By further improving on its core capacity, OHCHR would streamline its operations, reduce fragmented resource requests, thereby meeting Member States' demands for increased transparency, and enhance its ability to respond effectively to evolving human rights challenges. This proposal would require the establishment of 15 posts, 6 of a programmatic nature under programme of work, and 9 of an administrative support nature under programme support:
 - (i) **Programmatic.** 1 Human Rights Officer (P-4), 2 Human Rights Officers (P-3) and 1 Associate Human Rights Officer (P-2) in subprogramme 1 and 1 Human Rights Officer (P-3) and 1 Assistant (General Service (Other level)) in subprogramme 4, to research and draft reports and studies, plan and organize workshops and discussion panels and provide related logistical support;
 - (ii) **Administrative support.** 1 Finance Officer (P-4) and 1 Associate Finance Officer (P-2) to support budget formulation, financial planning, implementation and reporting to senior management, including consultations with the intergovernmental bodies; 2 Administrative Officers (P-3), 1 relating to supporting enterprise resource planning initiatives, including

preparing and delivering training, access role provisioning and monitoring, risk management and monitoring of system and user performance, and 1 to manage OHCHR assets and equipment; 1 Security Officer (P-3) to provide security support for missions by the treaty bodies and the special procedures; 2 Human Resources Officers (P-3) to provide legal support to staff, workforce planning and performance monitoring on key human resources indicators; 1 Information Technology Officer (P-4) to manage OHCHR global information technology service operations and to coordinate information technology support activities across headquarters and all field offices; and 1 Information Systems Officer (P-3) to develop and maintain information systems, such as virtual hubs and knowledge bases, in support of Human Rights Council mandates.

- 24.103 Further details about these posts are provided in annex II. The increased costs related to these additional post requirements would be offset in part by reduced requirements for national staff salaries for the OHCHR office in Cambodia (\$67,000), following the completion of the restructuring of the office, and general operating expenses (\$75,000), reflecting the provision of free office space by the host country for the Subregional Centre for Human Rights and Democracy in Central Africa.
- 24.104 The above proposals for optimizing the staffing structure are the outcome of a comprehensive assessment of functions, comprising also an overall spending review that further identified redeployments across non-post resources, driven mainly by a shift in requirements due to the Organization's shift towards the increased use of digital working methods, as follows:
- (a) Increases under consultants, contractual services and furniture and equipment. Notwithstanding OHCHR efforts to reduce its reliance on consultancy and contractual services, these increases represent requirements relating to the shift by the Office towards improved working methods supported by digital technologies and information systems. This is expected to increase effectiveness once implemented, reflect time-limited needs for specific expertise in integration, technology and data, reflect increase requirements for software services and time-limited systems development, and reflect additional needs for information technology equipment, including software licences. As part of the spending review, OHCHR will continue to review the requirements in this area in future budgets, ensuring an optimal balance between external expertise and in-house capacity of the Office;
 - (b) The above increases are proposed to be offset by reductions under other staff costs, realized through improved planning and utilization of general temporary assistance, namely, through combining individual part-time or temporary positions, made available through improved analytics and workforce planning, and supplies and materials owing to expected reduced requirements for office supplies from the shift to more digital working methods.

Other assessed resources

- 24.105 As reflected in tables 24.21 (2) and 24.22 (2), other assessed resources amount to \$2,503,300, including eight posts and two general temporary assistance positions. The resources would complement regular budget resources and provide for the requirements indicated in report [A/78/746](#).

Extrabudgetary resources

- 24.106 As reflected in tables 24.21 (3) and 24.22 (3), extrabudgetary resources amount to \$294,010,700. The resources would complement regular budget resources and would be used mainly to provide for 1,348 posts (6 D-1, 70 P-5, 204 P-4, 291 P-3, 43 P-2, 353 National Professional Officer, 9 General Service (Principal level) and 372 General Service (Other level)) to perform mainly the functions of supporting research and analysis for developing conceptual links between human rights and development; the work for the United Nations Voluntary Fund for Victims of Torture, the United Nations voluntary trust fund on contemporary forms of slavery and the United Nations Special Fund established pursuant to the Optional Protocol to the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment, as well as the work of the treaty bodies; and activities relating to the overall executive direction and management of OHCHR, including planning, monitoring and evaluation, external outreach services and the New York office. In addition, non-post

resources would be used for supporting the majority of the Office’s work undertaken in the field at more than 100 locations worldwide, the work of the three trust funds established by the Human Rights Council (Voluntary Fund for Participation in the Universal Periodic Review, Voluntary Fund for Financial and Technical Assistance in the Implementation of the Universal Periodic Review and Voluntary Technical Assistance Trust Fund to Support the Participation of Least Developed Countries and Small Island Developing States in the work of the Human Rights Council), and the work of the special procedures mandates. The Programme Support and Management Services is also provided extrabudgetary resources to complement its service delivery capacity in all OHCHR locations around the world.

- 24.107 The Office receives both cash and in-kind contributions, which complement regular budget resources. Anticipated in-kind contributions would provide for rent-free premises with an estimated value of \$569,300 and the provision of an armoured vehicle and running costs with an estimated value of \$55,700.
- 24.108 The extrabudgetary resources for this entity are subject to the oversight of the High Commissioner of Human Rights as head of entity of OHCHR, in accordance with the delegation of authority by the Secretary-General.

Policymaking organs

- 24.109 The resources proposed under this component would provide for the policymaking organs as shown in table 24.25.

Table 24.25
Policymaking organs
 (Thousands of United States dollars)

<i>Policymaking organ</i>	<i>Additional information</i>	<i>2024 approved</i>	<i>2025 estimate (before recosting)</i>
Human Rights Committee	Mandate: article 28 of the International Covenant on Civil and Political Rights, adopted by the General Assembly in its resolution 2200 (XXI) Membership: 18 experts Number of sessions in 2025: 3	1 821.5	1 821.5
Committee against Torture	Mandate: article 17 of the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment, adopted by the General Assembly in its resolution 39/46 , annex Membership: 10 experts Number of sessions in 2025: 3	806.4	806.4
Committee on the Rights of the Child	Mandate: article 43 of the Convention on the Rights of the Child, adopted by the General Assembly in its resolution 44/25 , annex Membership: 18 experts Number of sessions in 2025: 3	1 333.7	1 333.7

Subcommittee on Prevention of Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment	Mandate: article 1 of the Optional Protocol to the Convention against Torture, adopted by the General Assembly in its resolution 57/199 Membership: 25 experts Number of sessions in 2025: 3	1 327.9	1 327.9
Committee on the Elimination of Racial Discrimination	Mandate: article 8 of the International Convention on the Elimination of All Forms of Racial Discrimination, adopted by the General Assembly in its resolution 2106 A (XX) Membership: 18 experts Number of sessions in 2025: 3	1 099.3	1 099.3
Committee on the Rights of Persons with Disabilities	Mandate: article 34 of the Convention on the Rights of Persons with Disabilities, adopted by the General Assembly in its resolution 61/106 Membership: 18 experts Number of sessions in 2025: 2	1 528.7	1 528.7
Committee on Enforced Disappearances	Mandate: article 29 of the Convention on Enforced Disappearances, adopted by the General Assembly in its resolution 61/177 Membership: 10 experts Number of sessions in 2025: 2	576.6	576.6
Chairs of the human rights treaty bodies	Mandate: General Assembly resolution 49/178 Membership: 10 experts Number of sessions in 2025: 1	89.2	89.2
Special Committee to Investigate Israeli Practices Affecting the Human Rights of the Palestinian People and Other Arabs of the Occupied Territories	Mandate: General Assembly resolution 2443 (XXIII) Membership: 3 Member States Number of sessions in 2025: 1	96.4	96.4
Human Rights Council	Mandate: General Assembly resolution 60/251 Membership: 47 government officials Number of sessions in 2025: 3	262.3	262.3
Human Rights Council Advisory Committee	Mandate: Paragraph 6 of General Assembly resolution 60/251 Membership: 18 experts Number of sessions in 2025: 2	401.1	395.1
Office of the President of the Human Rights Council	Mandate: Human Rights Council decision 17/118	604.6	604.6
Total		12.781.3	12.775.3

24.110 The proposed regular budget resources for 2025 amount to \$12,775,300 and reflect a decrease of \$6,000 compared with the approved budget for 2024. The proposed change is explained in paragraph 24.98 (a) above. Additional details on the distribution of the proposed resources for 2025 are reflected in table 24.26 and figure 24.XVI.

Executive direction and management

- 24.111 The executive direction and management component comprises the Executive Office of the United Nations High Commissioner for Human Rights, the Policy, Planning, Monitoring and Evaluation Service, the External Outreach Service and the New York Office.
- 24.112 The High Commissioner is the United Nations official with principal responsibility for United Nations human rights activities, in accordance with the mandate entrusted to the High Commissioner by the General Assembly in its resolution 48/141. The High Commissioner advises the Secretary-General on the policies of the United Nations concerning human rights and is responsible for coordinating human rights activities throughout the United Nations system and for rationalizing, adapting, strengthening and streamlining the United Nations system in the area of human rights, with a view to improving its efficiency and effectiveness.

- 24.113 The High Commissioner provides overall executive direction, management, policy guidance and leadership for the implementation of the United Nations human rights programme.
- 24.114 The Deputy High Commissioner assists the High Commissioner in the overall direction and management of OHCHR. In addition, the Deputy’s responsibilities include the supervision of OHCHR divisions in support of the High Commissioner and the supervision of OHCHR-wide functions centralized in executive direction and management and programme support. The Assistant Secretary-General, the head of the New York Office, allows for participation at the appropriate level in executive decision-making processes and ensures principal-level representation and access to high-level policy discussions, improving the overall efficiency and effectiveness of OHCHR.
- 24.115 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, OHCHR is integrating environmental management practices into its operations. In 2019, OHCHR achieved full “carbon-neutral” status. The Office, including its field presences, continued to reduce its greenhouse gas emissions by digitizing work processes, encouraging “soft commuting”, measuring annual electricity use at headquarters and increasing the use of desktop conferencing to reduce travel.
- 24.116 Information on the timely submission of documentation and advance booking for air travel is reflected in table 24.27. OHCHR continues to use the available work-processing data to monitor and manage compliance with the advance purchase of tickets for air travel policy. Similarly, OHCHR will increase its efforts to raise awareness among staff of the requirement to improve the timeliness of submission of its documents.

Table 24.27

- 24.117 The proposed regular budget resources for 2025 amount to \$10,285,300 and reflect a net increase of \$694,000 compared with the approved budget for 2024. The proposed change is explained in paragraphs 24.98 and 24.99 above. Additional details on the distribution of the proposed resources for 2025 are reflected in table 24.28 and figure 24.XVII.

Programme support

24.122 In order for OHCHR to implement in full its mandate at both headquarters and its more than 100 field presences, Programme Support and Management Services provides support in the form of budgeting and financial management; recruitment and human resources management; safety and security, procurement, asset management and general logistical support for field activities; travel and information technology; and staff development and training. This includes support for staff members and members of intergovernmental and expert bodies, as well as for special rapporteurs, special representatives and independent experts, and the management of premises; and information management and technology support, including technical development and operational maintenance of the OHCHR websites, specialized databases and other systems.

24.123 The proposed regular budget resources for 2025 amount to \$7,267,100 and reflect an increase of \$1,414,900 compared with the approved budget for 2024. The proposed change is explained in paragraphs 24.98 and 24.99 above. Additional details on the distribution of the proposed resources for 2025 are reflected in table 24.33 and figure 24.XXII.

II. Committee on Missing Persons in Cyprus

- 24.124 The Committee on Missing Persons in Cyprus was established in 1981 by agreement between the Greek Cypriot and Turkish Cypriot communities in Cyprus under the auspices of the United Nations. The tripartite Committee is composed of two members appointed by the leaders of the two Cypriot communities and a third member (United Nations member) selected by the International Committee of the Red Cross and appointed by the Secretary-General.
- 24.125 The overall objective of the Committee is to ascertain the fate of 2,002 persons reported missing following intercommunal fighting (1963–1964), as well as the events of July 1974. In addition, following an agreement between the leaders of both Cypriot communities, the Committee has been entrusted with a new role as of 2006: to investigate and excavate unknown burial sites, to recover and identify the remains of missing persons and then to hand them over to their families across the island for dignified burials. As of the end of January 2024, the Committee had exhumed 1,202 persons and identified and returned the remains of 1,044 missing persons to their families, or 52.1 per cent of all missing persons in Cyprus. As time passes, the Committee has increased its efforts to locate more burial sites by hiring and training new investigators and investing in modern technologies.
- 24.126 The role of the United Nations member in the Committee is threefold: (a) mediation between the two Cypriot members and their authorities; (b) fundraising for the Committee’s operational budget (3.2 million euros in 2024); and (c) co-management of Committee’s operations. The United Nations is responsible only for the expenses of the third member, the third member’s Special Assistant and Administrative Assistant and the miscellaneous operating expenses of the office of the third member. The provisions in the proposed programme budget for 2025 reflect continuity in the Committee’s activities.
- 24.127 On the basis of existing information regarding suspected burial sites, the project is expected to continue at the current level of activity for at least another four to five years. It is assumed that, even with a solution to the Cyprus problem, the involvement of the United Nations in the work of the Committee would likely need to continue for several years to come.
- 24.128 While the Committee’s scientific and technical operations are financed under a separate budget (using funds that were raised by the Committee and are financially managed by the United Nations Development Programme), the United Nations budget covers the three core responsibilities of the office of the third member listed above.
- 24.129 As the Committee’s secretariat, the office of the third member follows up on the implementation of all Committee decisions and leads the Committee project’s operational coordination. The office of the third member is accountable to the Department of Political and Peacebuilding Affairs of the United Nations Secretariat. In Cyprus, the third member also works in close consultation with the Special Representative of the Secretary-General. The office of the third member ensures the smooth running of the bicomunal component of the Committee project that employs more than 100 locally recruited Greek Cypriot and Turkish Cypriot scientists. An international forensic group and the International Committee of the Red Cross act as quality control mechanisms for the Committee laboratory staff members.
- 24.130 The proposed regular budget resources for 2025 amount to \$656,400 and reflect no change in the level of resources compared with the amount approved for 2024. Additional details are reflected in table 24.34; the amount under other staff costs include three general temporary assistance positions (1 D-1, 1 P-4 and 1 General Service (Other level)). The proposed level of resources provides for the full, efficient and effective implementation of the mandate.

III. Independent Institution on Missing Persons in the Syrian Arab Republic

- 24.131 On 29 June 2023, the General Assembly adopted its resolution [77/301](#), in which it decided to establish the Independent Institution on Missing Persons in the Syrian Arab Republic.
- 24.132 The Independent Institution is mandated to clarify the fate and whereabouts of all missing persons in the Syrian Arab Republic and to provide adequate support to victims, survivors and the families of those missing, in close cooperation and complementarity with all relevant actors.
- 24.133 As required in resolution [77/301](#), the Independent Institution shall ensure the full and meaningful participation and representation of victims, survivors and families of missing persons in the Syrian Arab Republic in its operationalization and work and that it shall engage with women's organizations and other civil society organizations in a regular and sustained manner. The Independent Institution shall apply a victim- and survivor-centred approach, shall be inclusive of families and shall be guided by principles and fundamental features of gender inclusivity, non-discrimination, "do no harm", independence, impartiality, transparency and confidentiality of sources and information. It shall be guided by a presumption of life and adhere to operational standards of complementarity and non-duplication, sustainability and accessibility, adopting and applying a multidisciplinary approach to its work.
- 24.134 Pursuant to resolution [77/301](#), on 1 December 2023 the Secretary-General submitted a report on the implementation of the resolution ([A/78/627](#)), in which he outlined the steps already taken and those further envisaged towards the start-up, establishment and full functioning of the Independent Institution and described the process of the development of the terms of reference of the Institution. Guided by the principles contained in the terms of reference by which the choice of the seat of the Independent Institution was to be based, Geneva was chosen as the seat of the Institution.
- 24.135 The Independent Institution is established on the basis of a phased approach: an initial staffing structure was created in 2024 to commence the Institution's initial core functions effective 1 April 2024; the staffing structure will be expanded in 2025 to include the number and level of posts required for the Institution to operationalize its mandate in full.
- 24.136 The Independent Institution has the following working methods:
- (a) Following a victim/survivor-centric and rights-based approach that is fully accessible to families, the Independent Institution shall adopt and implement procedures, policies and protocols that are easily understandable, in accordance with best practices, and take into account a gender-sensitive approach and respect the "do no harm" principle, in order to implement its mandate;
 - (b) The Independent Institution shall develop a set of policies and procedures addressing specifically the purposes, ways and means of engagement and participation of victims, survivors and families with the Independent Institution;
 - (c) The Independent Institution shall design and implement a comprehensive outreach strategy to inform potential persons coming within its mandate, their families and other relevant actors of its work, its activities and the progress made in fulfilling its mandate. This shall include a specific component directed at the victims, survivors and families;
 - (d) The Independent Institution shall put in place review processes to adapt its working methods over time, in the light of experience and the views of persons affected by the work of the Independent Institution;
 - (e) The Independent Institution shall take appropriate measures to respect and to ensure respect for the confidentiality, privacy, interests and personal circumstances of victims, survivors and families, including age, sex, gender and health;

- (f) The Independent Institution shall develop a specific policy to ensure the comprehensive integration of protective approaches to mental health approaches and psychosocial support into its work, including for its staff;
 - (g) The Independent Institution shall adopt procedures and methods of work regarding the establishment of a protection component for victims, survivors and families, so as to ensure due protection and support for victims, survivors and families and any other persons who cooperate with the Independent Institution;
 - (h) The Independent Institution shall ensure that its working methods adequately balance the need to provide families with access to the relevant information and data relating to cases of family members and the principles of confidentiality, protection, privacy, safety and security of information and data, while ensuring effective cooperation with other relevant actors.
- 24.137 To implement its mandate, the Independent Institution would consist of the following organizational units:
- (a) **Executive Office:** the Executive Office, under the direction of the Head of the Independent Institution, would provide overall strategic, leadership and management guidance to the Independent Institution. It would approve, implement and evaluate the Independent Institution's policies, procedures, methods of work and activities. Specifically, the Office would oversee the management of and provide strategic guidance to the Search and Data Analysis, Victim Participation and Support, and Administrative Services Sections. It would provide overall direction and supervision to the sections responsible for the secure implementation of the mandate and ensure the full and meaningful participation and representation of victims, survivors and families, as well as engagement with women's organizations and other civil society organizations. The Office would also engage with the Advisory Board, composed of Syrian and international independent experts, including representatives of victims, survivors and families, on its programmes and operations. The Office would maintain relations with Governments and all relevant actors, including specialist international agencies, other United Nations entities, international organizations, regional and national institutions, victims', survivors' and family associations, non-governmental organizations and the private sector. It would also oversee the conclusion of agreements with Member States, United Nations entities, international organizations and other entities to ensure their cooperation with the Independent Institution;
 - (b) **Search and Data Analysis Section:** the Search and Data Analysis Section would play a role in formulating and implementing a strategy that would align with the Independent Institution's strategic goals. It would be responsible for developing and executing a comprehensive search plan, collaborating closely with various stakeholders, especially families, and leveraging advanced technologies. It would actively map entities possessing information on missing persons in the Syrian Arab Republic and those with unique capabilities in technology and information retrieval within the context of victims, survivors and missing persons. The Section would engage in structural and contextual analysis of data and information, consulting with key partners, including victims, survivors and families, to inform the Independent Institution's search plan. It would be committed to advocating for the release of those arbitrarily detained and coordinating the return of human remains to families. As the institutional custodian, it would be tasked with the collection, preservation, security, archiving and accessibility of all pertinent information within the scope of the Independent Institution's mandate. It would also support the Victim Participation and Support Section by undertaking individual search activities, information collection and coordination with external service providers;
 - (c) **Victim Participation and Support Section:** the Victim Participation and Support Section would be responsible for delivering the support aspect of the Independent Institution's mandate and would be responsible for ensuring the meaningful participation of victims, survivors and families and engaging with women's organizations and other civil society organizations in day-to-day operations. While such participation would be a cross-cutting principle across the entire

Independent Institution, including the Executive Office and the Search and Data Analysis Section, staff in the Victim Participation and Support Section would be the main group interacting with families of the missing and receiving and registering cases. The Victim Participation and Support Section would support the Search and Data Analysis Section by directing families to the latter and assisting in their interactions to ensure respect and cultural sensitivity. It would collaborate with the Victims' Advocate in the Executive Office to receive and implement advice to ensure that all programmes are responsive to families' rights and needs. It would manage and maintain a referral network to which it would direct families, updating the network's records regularly and maintaining strong communications with its members. The Section would provide legal support to families interacting with the Independent Institution, including awareness-raising and support with regard to the issuance of necessary documentation. Staff in the Section would be involved in the Independent Institution's engagement with family associations, as well as other civil society organizations, including through the Independent Institution's Advisory Board, the non-governmental organizations platform, ad hoc means of participation and outreach and communications activities. The Section would also be responsible for translating and interpreting from Arabic to English and vice versa, including official documents, reports, briefings, meetings and interviews. The Syrian Arab Republic is an Arabic-speaking country and, given the mandate to apply a victim- and survivor-centred approach, it would be essential that documents, reports and briefings be available in both English and Arabic;

- (d) **Administrative Services Section:** the Administrative Services Section would provide administrative support services to the Independent Institution in the areas of financial management, including the preparation of budgets and the monitoring of expenditure; human resources management, including the recruitment and administration of staff; and general services, including travel, procurement and logistics. In addition to these core responsibilities, the Section would play a pivotal role in maintaining a robust framework for audit, internal control and risk management, designed to safeguard the integrity and operational effectiveness of the Independent Institution. By ensuring that duties are segregated according to United Nations financial regulations, the Section would significantly mitigate risks and enhances the Institution's accountability mechanisms. These practices would not only protect the integrity of the Institution, but also ensure that its resources are managed effectively, aligning with the overarching goal of achieving its mandate in the most efficient and transparent manner possible;
- (e) **Advisory Board (pro bono):** the Independent Institution would include a pro bono Advisory Board composed of nine Syrian and international independent experts, sitting in their personal capacities, including representatives of victims, survivors and families, who would meet regularly to provide confidential views and advice to the Head of the Independent Institution on its programmes and operations.

24.138 For the purpose of the mandate clarifying the fate and whereabouts of missing persons, the Independent Institution shall carry out a range of activities in 2025, including but not limited to the following:

- (a) Map actors that hold or may hold relevant information or data on missing persons in the Syrian Arab Republic or that carry out activities relevant to its mandate, with due consideration given for the type of information or data, the gender dimension and other disaggregation criteria, as well as protection concerns;
- (b) Design an information and data management system capable of integrating and disaggregating relevant information and data, ensuring, in particular, full recording and respect for informed consent, privacy and applicable confidentiality interests in relation to providers of information and data and, as appropriate, to individuals to whom such information and data relate;
- (c) Formulate systems and procedures to consider and address protection and/or security concerns of any person coming in contact with the Independent Institution;

- (d) Devise and implement processes and safeguards necessary to avoid retraumatization and to provide easy procedures for victims, survivors and families to gain access to relevant information and data;
 - (e) Put in place appropriate procedures and systems to register cases of missing persons, whether new cases or cases previously reported to other authorities or institutions;
 - (f) Design and implement a comprehensive search plan, in coordination with relevant actors, in particular families, and making use of all available technologies, which covers key elements such as consolidation of information and data on missing persons, including mapping and ways to seek the identification and protection of mass graves; objective criteria for prioritization; and appropriate referrals to rely on existing capacities and processes, in particular with respect to forensic work;
 - (g) Conclude necessary cooperation agreements with relevant actors, including to facilitate the exchange of information and data and to refer specific activities and tasks to other entities, in order to fully inform the search plan of the Independent Institution;
 - (h) Undertake structural and contextual analyses of information and data, in consultation with relevant partners, including victims, survivors and families, in order to inform the search plan of the Independent Institution;
 - (i) Adopt procedures to seek and facilitate the reunification of missing persons determined to be alive with their families, including regarding encouraging and facilitating the release of persons arbitrarily deprived of liberty;
 - (j) Adopt all measures and procedures feasible to carry out the work of identification of missing persons determined to have died and to seek and facilitate the prompt return of available human remains to their families, including through referrals to relevant actors;
 - (k) Design and implement appropriate systems for the long-term preservation and archiving of relevant information and data relating to missing persons in the Syrian Arab Republic in the best interests of victims, survivors and families, taking into account relevant interests and international best practices in this area, including to duly secure and protect the full integrity of the archives of the Independent Institution and associated information and data.
- 24.139 For the purpose of the mandate providing support to victims, survivors and families of those missing, the Independent Institution shall carry out a range of activities in 2025, including but not limited to the following:
- (a) Map the needs of families, in close consultation with them, in particular with families who contacted or registered a case with the Independent Institution, as well as with other relevant stakeholders, including civil society organizations;
 - (b) Undertake a mapping of all existing relevant actors, international and national, as well as an analysis of the forms of support that they already provide, to identify strengths and gaps, ensuring complementarity and non-duplication;
 - (c) Design an efficient, practical, accessible and transparent system of referrals for support, including through the participation of families, to existing services by relevant actors, to ensure the complementarity of its work;
 - (d) Ensure that cooperation agreements negotiated with relevant actors are informed by these mapping processes to include the possibility to refer cases for the forms of support that the Independent Institution may not itself be able to best provide;
 - (e) Set up clear protocols on eligibility of persons to receive various forms of support from the Independent Institution;
 - (f) Make arrangements to provide appropriate support to families, including psychosocial and legal support, and refer them to other existing actors for complementary forms of support;

Section 24 Human rights

- (g) Identify means, including through coordination with other actors, to support families requiring necessary documentation, including certificates regarding the status of the missing person, taking into account the degree to which such documentation may help them to better enjoy other relevant rights, including, for example, rights to education, housing, land and other property;
 - (h) Convene regular meetings with actors providing forms of support to families in order to refine cooperation and coordination, avoiding duplication and overlap, and to procure views on enhancing best practices and identifying and addressing operational challenges.
- 24.140 The Secretary-General shall report annually to the General Assembly on the activities of the Independent Institution, as it requested in its resolution [77/301](#). This reporting shall be undertaken in consultation with the Head of the Independent Institution.
- 24.141 The Head of the Independent Institution shall also ensure that its outreach strategy includes regular reporting, communication and updates on the activities of the Institution, in particular for families.
- 24.142 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 24.35 to 24.37.

24.143 Additional details on the distribution of the proposed resources for 2025 are reflected in table 24.38 and figure 24.XXIII.

24.144 As shown in table 24.38, the overall resources proposed for 2025 amount to \$11,311,000 before recosting, reflecting a net increase of \$8,343,800 (or 281.2 per cent) compared with the approved budget for 2024. Resource changes result from technical adjustments and new and expanded mandates. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Number of posts/thousands of United States dollars)

Explanation of variances by factor

Overall resource changes

Technical adjustments

24.145 As shown in table 24.38, resource changes reflect a net increase of \$3,387,200. The increase of \$3,409,600 under posts relates to the higher provision for the entire 2025 budget period, at continuing vacancy rates for the 28 posts (1 Assistant Secretary-General, 1 D-1, 3 P-5, 7 P-4, 9 P-3, 4 P-2, 1 General Service (Principal level) and 2 General Service (Other level)) established in 2024 for nine months, pursuant to the General Assembly resolution [78/273](#), which were subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts. The decrease of \$22,400 under non-post resources relates to the removal of non-recurrent provisions associated with the purchase of 28 mobile phones that were approved for 2024 and are not required in 2025.

New and expanded mandates

24.146 As shown in table 24.38, resource changes reflect an increase of \$4,956,600, as part of the build-up of the Independent Institution to its full operational capacity in 2025, as follows:

- (a) An increase of \$2,266,700 under posts for the establishment of 23 posts (3 P-4, 11 P-3, 4 P-2 and 5 General Service (Other level)), subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts;
- (b) An increase of \$498,200 under other staff costs that would provide for general temporary assistance for peak workload periods, parental leave and extended sick leave;
- (c) An increase of \$98,700 under consultants that would provide for a consultancy on the website and social media platforms to establish and maintain a robust online presence through a user-centric website and active social media outreach utilizing advanced skills in digital communication and platform-specific algorithms to maximize reach and engagement, a consultancy on communication visuals to create specialized visual content employing expertise in graphic design and visual storytelling to convey the Independent Institution’s mandate and impact effectively to its audience, and a consultancy on the implementation of a secure and

effective information technology infrastructure that meets the specific needs of handling sensitive data within the “do not harm” framework;

- (d) An increase of \$253,000 under travel of staff that would provide for staff travel to countries in the Middle East and North Africa and Europe regions to undertake interviews and meet with Syrian families, to conduct data collection with civil society actors and for the Head of the Independent Institution to engage with civil society partners and Member States;
- (e) An increase of \$904,000 under contractual services that would provide for data-processing services for a robust and secure management of operational data, geospatial and forensic services to equip the Independent Institution with satellite imagery analysis to enhance investigative capabilities with precise location data and forensic support, digital infrastructure services for the creation and maintenance of a comprehensive web presence and the deployment of cloud-based project management tools, interpretation services for the necessary language support during field missions, technical and language training, and cost-recovery services charged by the United Nations Office at Geneva as the main service provider for managed desktop environment packages and desk packages, enterprise applications, hosting services, professional services for data and analytics, and printing services;
- (f) An increase of \$455,800 under general operating expenses that would provide for the rental of premises at the United Nations Office at Geneva, the rental of meeting rooms during meetings at the Office and in field missions, and cost-recovery services (e.g., human resources, financial, procurement, travel, medical and mobile subscription) charged by the Office as the main service provider;
- (g) An increase of \$9,200 under supplies and materials that would provide for specialized digital libraries and subscriptions and office supplies that facilitate the day-to-day functioning of the Independent Institution;
- (h) An increase of \$220,100 under furniture and equipment that would provide for the purchase of 23 mobile phones for new staff members in 2025 to enhance information security and protect staff from secondary trauma, the purchase of investigation-specific mobile phones, one-time equipment for office security systems and document destruction and data sanitization to safeguard operational activities and enhance the security protocols, office equipment such as data safes and lockers for the auditable and secure storage of sensitive assets, on-premises data-processing infrastructure and machines for handling sensitive data securely and efficiently, software licences to enhance document management, ensure data security, enable remote connectivity, conduct detailed data analysis and facilitate effective communications, and provisions for the acquisition and replacement of office automation equipment;
- (i) An increase of \$250,900 under grants and contributions that would provide for the travel of participants to a consultation meeting within the Middle East and North Africa region, strengthening the Independent Institution’s engagement with local civil society actors and ensuring that ground-level insights are incorporated into its operations, travel of women participants to a targeted consultative meeting within the Middle East and North Africa region to support the Institution’s commitment to gender inclusivity in its operations, and travel of victims to Geneva to meet with the Institution’s staff members, following the Institution’s victim-centred approach.

Other information

- 24.147 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), the Independent Institution will integrate environmental sustainability practices into its operations. The Independent Institution will be prioritizing environmentally sustainable practices within its operations, in particular in discussions

Section 24 **Human rights**

with service providers regarding its premises. While the Independent Institution may not manage its own buildings, it will actively advocate for the implementation of energy-efficient heating systems, the installation of motion detectors to optimize electricity usage, and the avoidance of chemical products that could harm the surrounding biodiversity. Through these focused discussions and strategic choices, the Independent Institution will aim to ensure that its environmental impact is minimized, reflecting its commitment to responsible environmental stewardship within the constraints of its operational context.

24.148 Information on the timely submission of documentation and advance booking for air travel is reflected in table 24.39. The Independent Institution will ensure that missions and other travel are being planned well in advance and all travel is scheduled to comply with the target rate. Similarly, the Independent Institution plans to emphasize early planning and regular monitoring, which would contribute to the timely submission of its documents.

Annex I

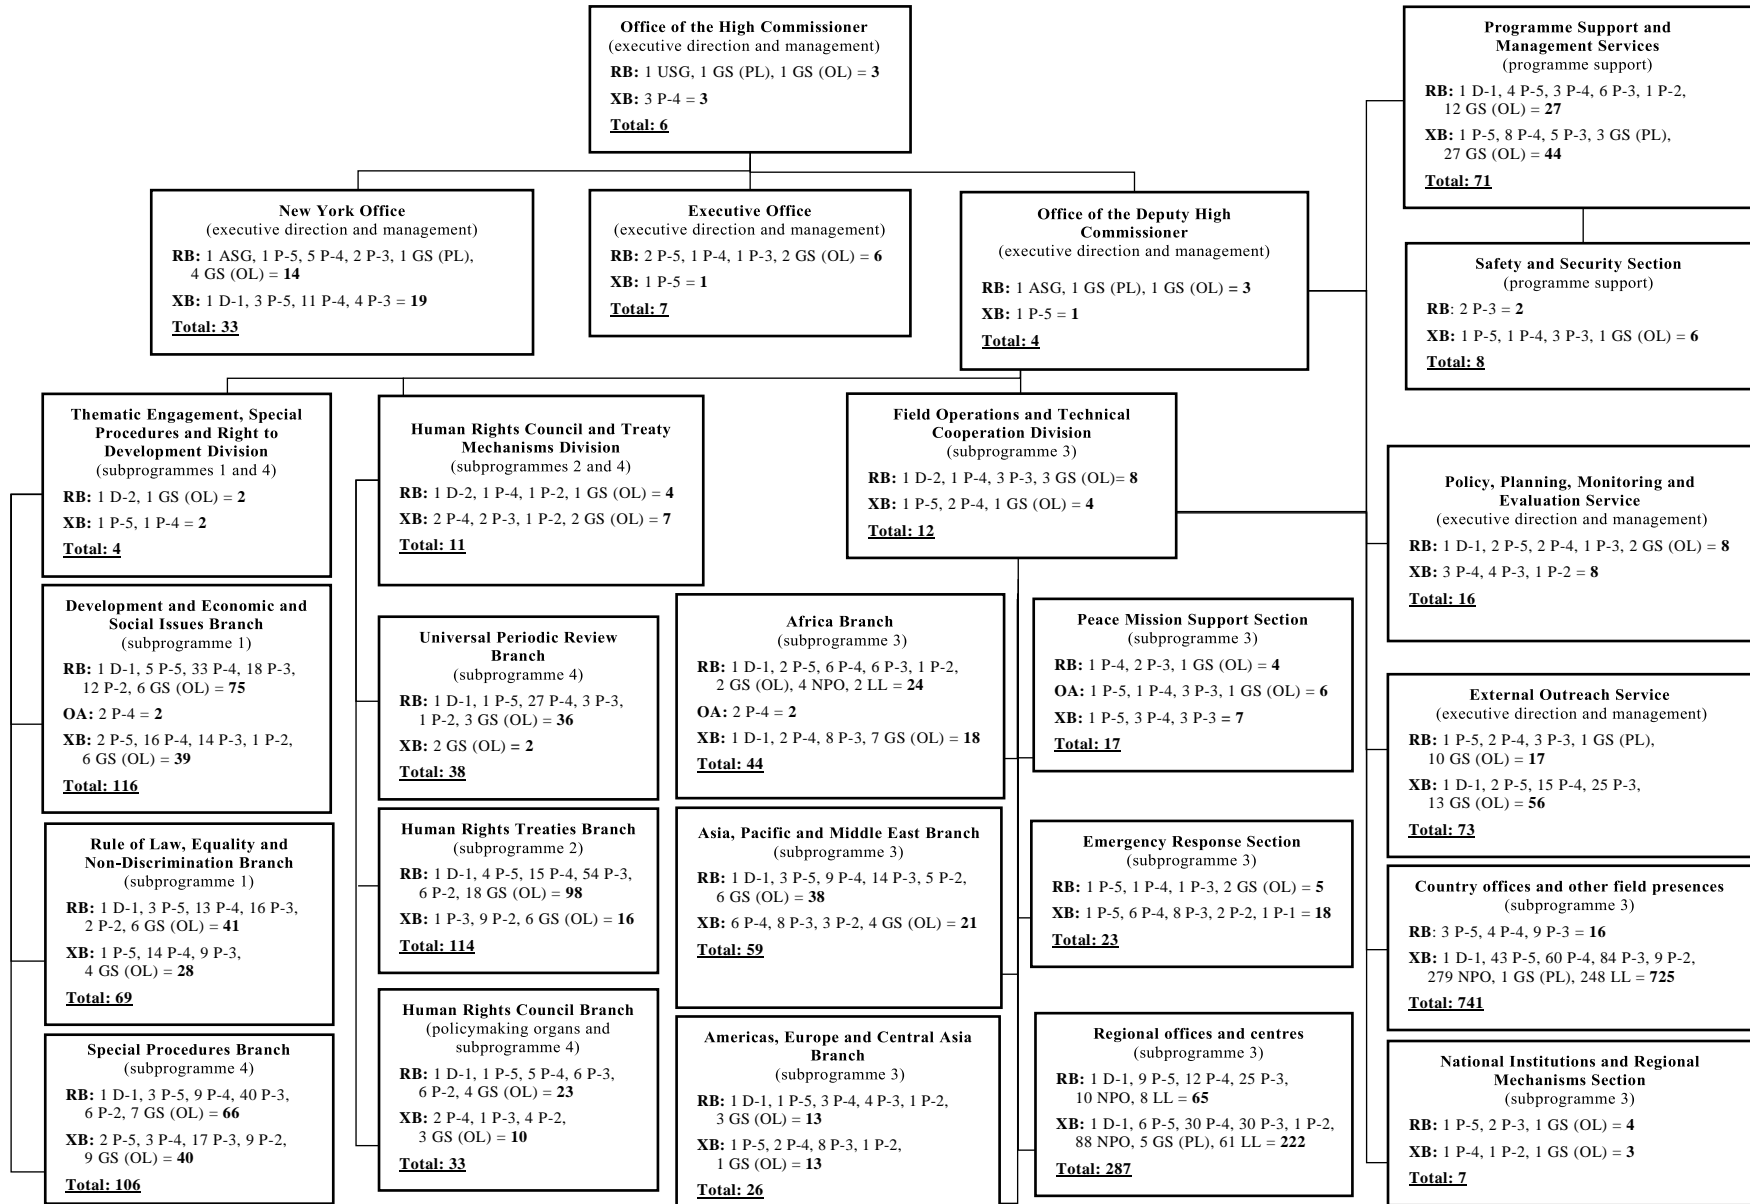

Organizational structure and post distribution for 2025

Two charts showing the organizational structure of the Office of the United Nations High Commissioner for Human Rights are presented below. Chart A reproduces the approved organizational structure and post distribution for 2024, as contained in document [A/78/6 \(Sect. 24\)](#), while chart B presents the proposed organizational structure and post distribution for 2025.

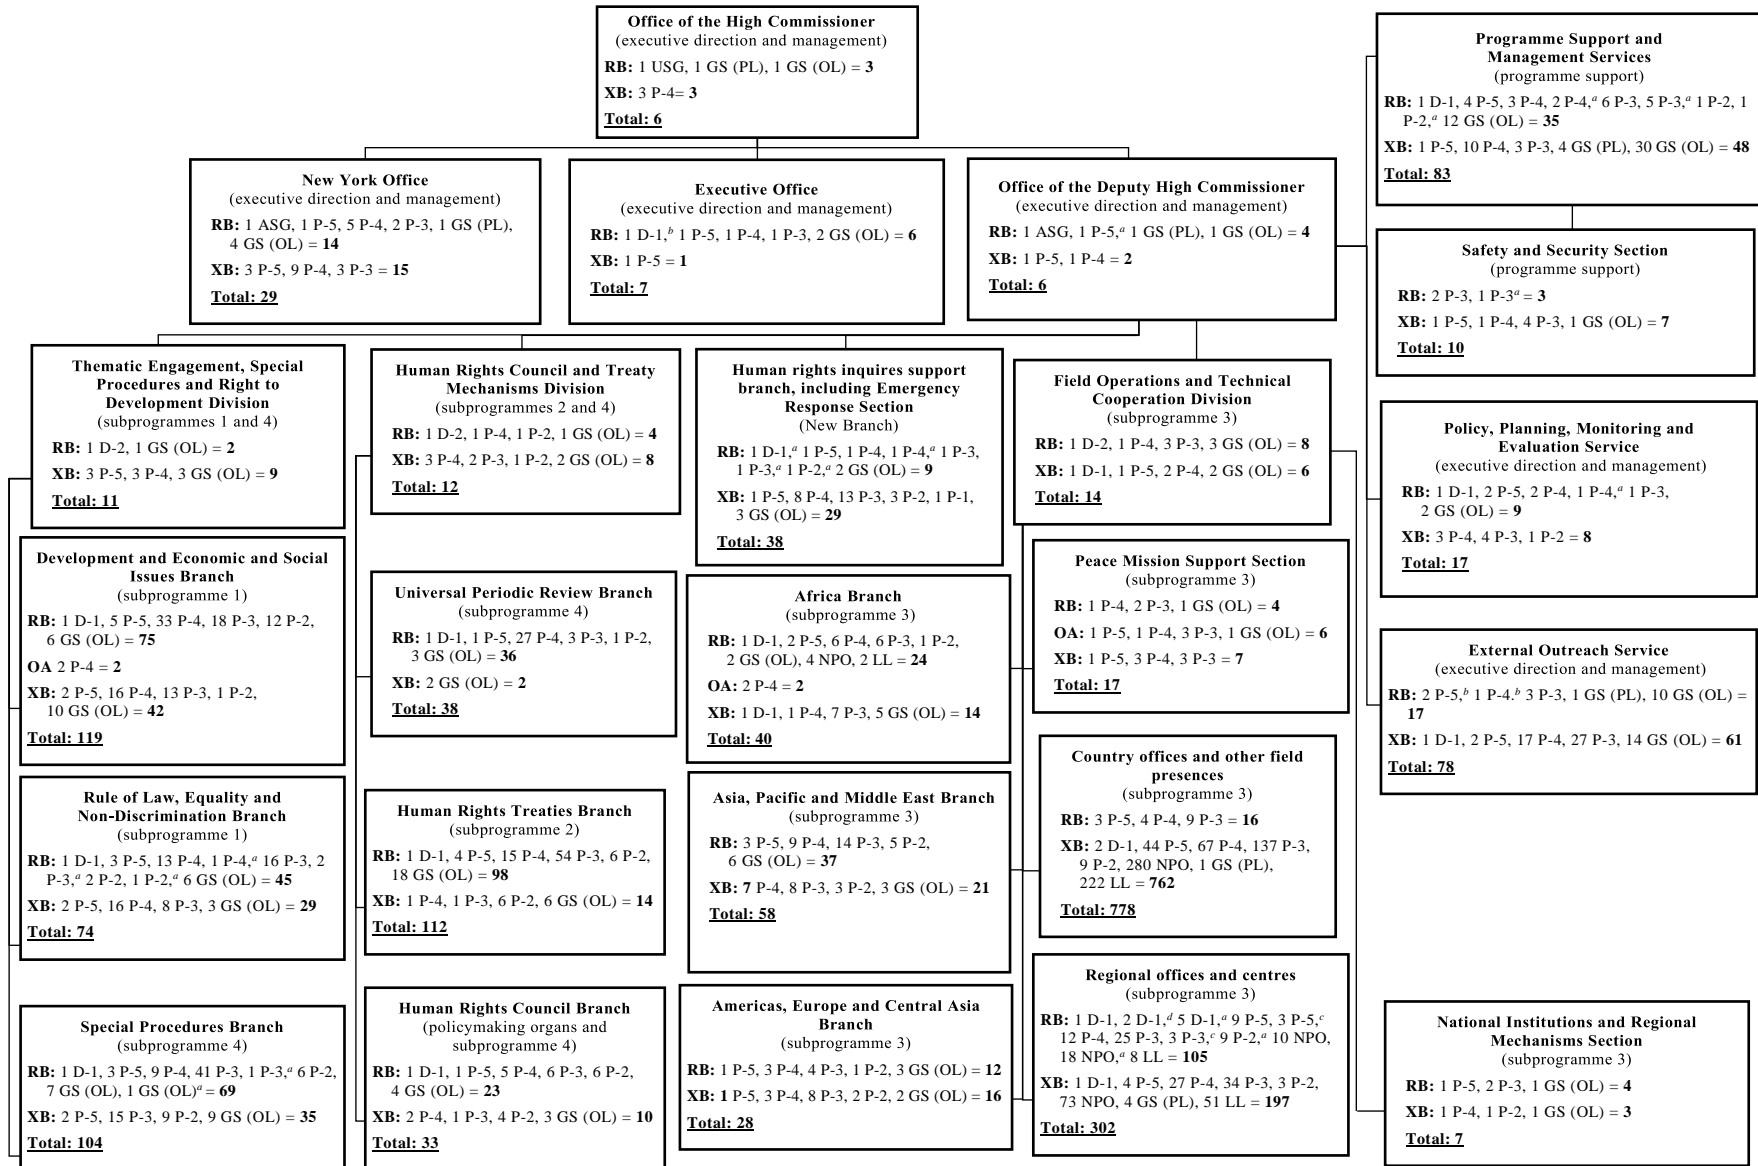

Justification for the proposed changes

The proposed new human rights inquiries support branch would include the Emergency Response Section and would provide dedicated core capacity for an integrated, coherent and consistent approach for providing comprehensive support to the full range of investigative work undertaken to support the High Commissioner's mandate. The new branch would consolidate organizational capacities to deliver, guide and provide rapid support for human rights investigative work.

Annex II

A. Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Executive direction and management	1 (1)	D-1 P-5	Reclassification of Chief of Staff	Other changes: strengthened and integrated executive office function An integrated Executive Office function would encompass Office of the United Nations Human Rights Commissioner for Human Rights (OHCHR) Geneva headquarters and support for the Assistant Secretary-General for Human Rights at the OHCHR office in New York. This new structure would extend the Chief of Staff's oversight and coordination responsibilities considerably, which results in the reclassification of an existing P-5 post of Chief of Staff to the D-1 level to reflect the additional shared functions and management of resources geared to better serve senior leadership. Additional support would also be necessary with respect to the strategic communications, in which an existing P-4 post of Speechwriter is to be reclassified to the P-5 level to reflect the growing demands on senior leadership to speak to the United Nations human rights promotion and protection activities.
	1 (1)	P-5 P-4	Reclassification of Speechwriter to Senior Speechwriter	
	1	P-5	Establishment of Senior Programme Management Officer	
	1	P-4	Establishment of Programme Management officer	New/expanded mandates: strengthened programme management and evaluation The incumbent would support programme delivery for the human rights mechanisms, engagement at the regional and country levels, thematic work, and management, administration, and communications for the entirety of the global operations. The request entails the establishment of a P-4 post at OHCHR headquarters to ensure coordination of the additional programme management capacity at the regional level and support the alignment to OHCHR strategic planning, monitoring and evaluation processes and risk management.
Subprogramme 1 Human rights mainstreaming, right to development, and research and analysis	1	P-4	Establishment of Human Rights Officer	New/expanded mandates: core capacity enhancement
	2	P-3	Establishment of Human Rights Officer	The incumbents would support the implementation of thematic mandates of the Human Rights Council through the provision of recurrent non-specialized expertise to prepare guidelines, hold consultations, conduct comprehensive studies, prepare standard/panel/summary reports and assist in the administrative and logistical aspect of meetings
	1	P-2	Establishment of Associate Human Rights Officer	

Section 24 Human rights

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 3 Advisory services, technical cooperation and field activities	1	D-1	Establishment of Chief of Service, Human Rights	and workshops. The proposal for core capacity enhancement is intended to ensure cost-effectiveness and achieve efficiency gains through the reduction in duplicative functions and work.
	1	P-4	Establishment of Human Rights Officer	New/expanded mandates: rationalized support for human rights Inquiries The incumbents would ensure accountability for victims of human rights violations and abuses by monitoring, investigating and documenting efforts, engaging with Governments, conducting public reporting and advocacy efforts, and supporting independent United Nations investigative mechanisms approved through the Human Rights Council to contribute more effectively to criminal accountability at the national, regional and international levels. The additional resources would support more integrated, coherent and consistent approaches to accountability, through the provision of comprehensive backing to the broadening range of investigative work increasingly requested by Member States.
	1	P-3	Establishment of Human Rights Officer	
	1	P-2	Establishment of Associate Human Rights Officer	
	5	D-1	Establishment of Principal Human Rights Officer	
	2	D-1	Redeployment of Chief of Service Human Rights	New/expanded mandates: effective implementation through regional presences The incumbents would provide the following assistance for all OHCHR presences in the regions: oversight and coordination functions; strategic and programmatic support; regional level strategy, mechanism support and follow-up for national human rights institutions and other government actors; engagement with regional partners and stakeholders; support with external actors and partnerships; programme management; and administrative support. Global needs for the promotion and protection of human rights radically surpass the capacity of OHCHR to provide such support. The proposal includes the redeployment of two existing D-1 posts of Chief of Service, Human Rights, from headquarters to Bangkok and Panama City and the conversion of 3 extrabudgetary Senior Human Rights Officers (P-5) and 3 extrabudgetary Human Rights Officers (P-3) for the OHCHR regional presence in Addis Ababa, Beirut and Pretoria.
	3	P-5	Conversion of Senior Human Rights Officer	
	3	P-3	Conversion of Human Rights Officer	
	9	P-2	Establishment of Associate Human Rights Officer	
	6	NPO	Establishment of Human Rights Officer	
6	NPO	Establishment of Administration Officer		
6	NPO	Establishment of Programme Management Officer	New/expanded mandates: strengthened programme management and evaluation The 6 NPO posts would support programme delivery for the human rights mechanisms, engagement at the regional and country levels, thematic work, and management, administration, and communications for the entirety of the global operations.	

Part VI Human rights and humanitarian affairs

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 4 Supporting the Human Rights Council, its subsidiary bodies and mechanisms	1	P-3	Establishment of Human Rights Officer	New/expanded mandates: core capacity enhancement
	1	GS (OL)	Establishment of Programme Management Assistant	The incumbent would support the implementation of thematic mandates of the Human Rights Council through the provision of recurrent non-specialized expertise to prepare guidelines, hold consultations, conduct comprehensive studies, prepare standard/panel/summary reports and assist in the administrative and logistical aspect of meetings and workshops. The proposal for core capacity enhancement is intended to ensure cost-effectiveness and achieve efficiency gains through the reduction in duplicative functions and work.
Programme support	1	P-4	Establishment of Finance Officer	New/expanded mandates: core capacity enhancement (finance) The incumbent would support budget formulation, budget implementation and reporting to the senior management for all OHCHR regular budget accounts, including the mandates approved by the Human Rights Council, and the related consultations with the intergovernmental bodies.
	1	P-4	Establishment of Information Technology Officer	New/expanded mandates: core capacity enhancement (information management and technology) The incumbent would provide information system support to the regional and field presences and form the capacity to support the development of applications for the universal periodic review, treaty bodies and investigative mechanisms.
	2	P-3	Establishment of Administrative Officer	New/expanded mandates: core capacity enhancement (administration) The incumbent would align enterprise resource planning initiatives with organizational objectives and strategic oversight, risk management and monitoring of system and user performance, and manage OHCHR property, plant and equipment.
	2	P-3	Establishment of Human Resources Officer	New/expanded mandates: core capacity enhancement (human resources) The incumbent would provide legal support to staff on conduct, discipline and other matters; workforce planning to identify current and future staffing requirements; and the monitoring of performance on key human resources indicators.
	1	P-3	Establishment of Information Systems Officer	New/expanded mandates: core capacity enhancement (information management and technology) The incumbent would provide information system support to the regional and field presences and form the capacity to support the development of applications for the universal periodic review, treaty bodies and investigative mechanisms.

Section 24 Human rights

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
	1	P-3	Establishment of Security Coordination Officer	New/expanded mandates: core capacity enhancement (safety and security) The incumbent would provide security support for the missions of various treaty body in the United Nations human rights system and the special procedures of the Human Rights Council.
	1	P-2	Establishment of Associate Finance and Budget Officer	New/expanded mandates: core capacity enhancement (finance) The incumbent would support the budget formulation, budget implementation and reporting to the senior management for all OHCHR regular budget accounts, including the mandates approved by the Human Rights Council, and the related consultations with the intergovernmental bodies.

B. Summary of proposed post changes for the Independent Institution on Missing Persons in the Syrian Arab Republic

<i>Office</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Executive Office	1	P-4	Establishment of 1 Human Rights Officer	New/expanded mandates The Human Rights Officer would fulfil the role of Gender Adviser and would advise the Head, the Deputy Head and the Independent Institution's staff on matters relating to gender inclusivity and mainstreaming in all aspects of the work of the Independent Institution.
	1	P-4	Establishment of 1 Security Coordination Officer	New/expanded mandates The Security Coordination Officer would serve as the Independent Institution's security coordinator/adviser, responsible for developing and implementing a comprehensive security framework. In addition, the Security Coordination Officer would identify and promote security best practices, conduct staff briefings on security measures, provide pre-travel briefings on country situations, and support the safety and security of staff and the Independent Institution's activities during missions, accompanying staff members to the field, as required. The role would include maintaining the security reporting system, in particular incident reports, and ensuring timely notification to appropriate staff members. The Security Coordination Officer would develop and deliver security awareness training programmes, enhancing the overall security posture of the Independent Institution.

Part VI Human rights and humanitarian affairs

<i>Office</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
	1	GS (OL)	Establishment of 1 Staff Assistant	New/expanded mandates The Staff Assistant would support the Executive Office by managing a wide array of administrative tasks and ensuring the efficient operation of the Deputy Head's schedule and priorities.
Search and Data Analysis Section	1	P-3	Establishment of 1 Human Rights Officer	New/expanded mandates The Human Rights Officer would be responsible primarily for all source analyses and working with the Investigator in conducting information collection. The role would have a focus on interviews, the contextual analysis of events and the formulation of lines of investigation for individual and collective searches. The Human Rights Officer would be responsible for drafting policies, methodologies and protocols in relation to search components of the mandate, including with respect to interviewing, search priorities, criteria for initiating searches and protection of victims and witnesses.
	1	P-3	Establishment of 1 Data Analyst	New/expanded mandates The Data Analyst would coordinate, lead and carry out analytical work relating to search objectives of the Independent Institution, including contextual analysis and individual search analysis. The Data Analyst would assist in populating analytical systems and identifying projects to output high value analytical products leveraging the Independent Institution's technical infrastructure, and would contribute to searching reports and assessing recommendations to victims on the basis of probabilistic models.
	1	P-3	Establishment of 1 Data Scientist	New/expanded mandates The Data Scientist would implement technical solutions in the areas of process automation, applied artificial intelligence within investigative and analytical processes, the development and deployment of training models, and the testing and integration of innovative search technology into enterprise architecture both on premises and in cloud environments. The primary objective of the Data Scientist would be to use artificial intelligence to scale the capacity of the Independent Institution. The secondary objective would be to leverage new technology to make inaccessible data increasingly findable to the Independent Institution's search activities.
	1	P-3	Establishment of 1 Information Management Officer	New/expanded mandates The Information Management Officer, with a specialization in geospatial analysis, would operationalize investigative and analytical processes across all data types. The Information Management Officer would design and operationalize search activities,

Section 24 Human rights

<i>Office</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
				design and document sophisticated technical programmes for the importing of information, design and train others on review protocols, and deploy to assist in data collection activities, where necessary.
	1	P-3	Establishment of 1 Information Systems Officer	<p>New/expanded mandates</p> <p>The Information Systems Officer would be responsible for supporting bespoke information technology systems relied upon by the Independent Institution to fulfil its mandate. This would include requirements-gathering, project management and communication in a multi-stakeholder environment. The Information Systems Officer would maintain the Independent Institution’s software standards with the Architecture Review Board and coordinate software acquisition and renewal across various procurement pipelines. The role would maintain asset inventory, coordinate access requests and support tier 1 and information security tasks, as directed.</p>
	1	P-2	Establishment of 1 Associate Information Management Officer	<p>New/expanded mandates</p> <p>The Associate Information Management Officer would assist in operationalizing investigative and analytical processes across all data types and would participate in search activities. The Associate Information Management Officer would execute technical programmes for the importing of information, design and train others on review protocols, and deploy to assist in data collection activities, where necessary. The Associate Information Management Officer would identify and execute collection activities.</p>
	1	P-2	Establishment of 1 Associate Human Rights Officer	<p>New/expanded mandates</p> <p>The Associate Human Rights Officer would implement primarily operational priorities of the Investigator and the Human Rights Officer (P-3), including all source analysis tasks, contextual analysis, individual and collective searches, and collection activities, including interviews. The Associate Human Rights Officer would update and maintain analytical systems and prepare analytical products to support investigative activities and would assist in the preparation of policies, methodologies and protocols in relation to search components of the mandate.</p>
	1	GS (OL)	Establishment of 1 Programme Assistant	<p>New/expanded mandates</p> <p>The Programme Assistant would assist in the implementation of the Section’s workplans, project management, contract management, scheduling and technology support, as well as in the documentation and knowledge development needs of the Section.</p>

Part VI Human rights and humanitarian affairs

<i>Office</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Victim Participation and Support Section	3	P-3	Establishment of 3 Human Rights Officers	<p>New/expanded mandates</p> <p>The Human Rights Officers would conduct outreach and awareness-raising activities with victim and survivor communities, civil society and other relevant partners such as United Nations agencies and diplomatic missions in Jordan, Lebanon and Türkiye, with one Human Rights Officer assigned for each country. The Human Rights Officers would support victims and families in registering cases of missing persons. The Human Rights Officers would engage with families of missing persons to assess their needs and provide regular updates on their cases; map needs specific to the geographical location; and identify relevant service providers and effective referral pathways. In addition, the Human Rights Officers would support interaction between victims and survivors in their assigned countries and relevant staff of the Independent Institution, where necessary, and would undertake missions to the assigned countries and conduct field visits to liaise with victims, survivors and civil society in various geographical regions of these countries.</p>
	1	P-3	Establishment of 1 Human Rights Officer	<p>New/expanded mandates</p> <p>The Human Rights Officer would maintain a substantive focus on victim protection. Drawing on existing best practice, the Human Rights Officer would formulate short- and long-term support strategies for victims and design a tailored, gender-competent victim protection policy to identify and mitigate potential harms to family members and other victims that may arise owing to their interaction with the Institution. The Human Rights Officer would conduct interventions for individual victims' protection needs and ensure secure and accurate recordkeeping, and contribute to communications material regarding the protection of victims, ensuring that victims' expectations are appropriately managed.</p>
	1	P-3	Establishment of 1 Psychologist	<p>New/expanded mandates</p> <p>The Psychologist would develop trauma-informed, culturally sensitive, age-appropriate and gender-competent guidelines for the Independent Institution's interactions with victims. The Psychologist would design and deliver individual and group assessments and interventions to support victims' mental health during their interaction with the Independent Institution, adopting a transformative and victim-centred approach. The Psychologist would also map gaps in the provision of mental health support services and develop recommendations to address them. The Psychologist would also ensure that the staff of the Independent Institution are made aware of and have access to the United Nations staff mental health support services.</p>

Section 24 Human rights

<i>Office</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
	1	P-3	Establishment of 1 Legal Officer	<p>New/expanded mandates</p> <p>The Legal Officer would be responsible for designing and delivering appropriate legal support activities for victims, survivors and families of missing persons in the various country contexts where they reside, and for designing and delivering culturally and geographically appropriate legal awareness activities to assist family members and other victims in the legal impact of missing persons. In collaboration with the Human Rights Officer working as Gender Adviser, the Legal Officer would ensure that all legal support is designed and delivered with gender competence and with attention to legal consequences that are particularly gendered. The Legal Officer would also work closely with the Legal Officer in the Executive Office for close alignment on all matters relating to applicable legal frameworks and standards.</p>
	1	P-2	Establishment of 1 Associate Human Rights Officer	<p>New/expanded mandates</p> <p>The Associate Human Rights Officer would contribute to implementing information-gathering and registration plans, integrating a gender perspective into processes and outcomes, and utilizing tools for data collection and processing. The Associate Human Rights Officer would conduct interviews with families of missing persons and other victims in the Syrian Arab Republic to assess their needs and provide regular updates on their cases. The Associate Human Rights Officer would contribute to plans for victim protection and identify effective referral pathways.</p>
	1	P-2	Establishment of 1 Associate Translator, Arabic	<p>New/expanded mandates</p> <p>The Associate Translator would contribute to managing the language support services and translating and interpreting from Arabic to English and vice versa. Through the functions of the post, the Associate Translator would contribute to the meaningful participation and representation of victims, survivors and the families of missing persons in the Syrian Arab Republic in the operationalization and work of the Independent Institution.</p>
	1	GS (OL)	Establishment of 1 Programme Assistant	<p>New/expanded mandates</p> <p>The Programme Assistant would support the operational needs of the Section. This role would involve organizing outreach and awareness-raising activities with victims, survivors and their families, as well as with civil society and relevant partners such as United Nations agencies. The Programme Assistant would help to facilitate the registration of cases of missing persons and</p>

Part VI Human rights and humanitarian affairs

<i>Office</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Administrative Services Section	1	P-4	Establishment of 1 Administrative Officer	would assist in the preservation and verification of case files and would maintain respectful and regular communication with victims and their families to provide updates on their cases. New/expanded mandates The Administrative Officer would serve as the chief of the Administrative Services Section and would provide senior management with advice on a broad spectrum of administrative services. As the coordinator of the Independent Institution's programme budget, performance reports and human resources functions, the Administrative Officer would ensure that all action adheres to operational procedures and standards. Acting as the lead financial officer, this role would involve guiding strategic business and resource planning and serving as the focal point for responding to audit queries. Furthermore, the Administrative Officer would be tasked with managing the staff of the Administrative Services Section and would be charged with implementing and overseeing the Independent Institution's internal controls and enterprise risk management frameworks.
	1	GS (OL)	Establishment of 1 Finance and Budget Assistant	New/expanded mandates The Finance and Budget Assistant would assist in the preparation of budget proposals, monitor budget execution and liaise with the United Nations Office at Geneva service provider for the processing of financial transactions. The Finance and Budget Assistant would also play a crucial role in ensuring compliance with financial policies and procedures, assisting in financial analysis and reporting, and supporting the overall financial management and accountability within the Section.
	1	GS (OL)	Establishment of 1 Administrative Assistant	New/expanded mandates The Administrative Assistant would support a wide range of administrative functions within the Section. The Administrative Assistant would assist the Independent Institution in defining procurement needs and creating the low value purchase orders and would play a vital role in logistics operations and the support of field missions, workshops and travel arrangements for participants and stakeholders. The Administrative Assistant would also contribute to the enhancement of the Section's internal controls and support the implementation of the enterprise risk management frameworks.

Abbreviation: GS (OL), General Service (Other level); NPO, National Professional Officer.

3. Paragraph 24.97For the existing text *substitute*

- 24.97 As shown in tables 24.21 (1) and 24.23, the overall resources proposed for 2025 amount to \$228,242,800 before recosting, reflecting a net increase of \$35,720,400 (or 18.6 per cent) compared with the approved budget for 2024. Resource changes result from technical adjustments and new and expanded mandates. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Overall orientation

Mandates and background

- 25.1 The Office of the United Nations High Commissioner for Refugees (UNHCR) is responsible for leading and coordinating international action for the protection of refugees and the search for solutions to their plight. Its mandate derives from relevant General Assembly resolutions and decisions, including resolutions 319 A (IV), by which the Assembly established the Office, and 428 (V), which sets out its statute. In addition, the international legal basis for the protection of refugees finds its principal expression in the Convention relating to the Status of Refugees of 1951 and the Protocol relating to the Status of Refugees of 1967. UNHCR also has responsibilities for stateless persons pursuant to paragraph 6 (A) (ii) of its statute and article I (A) (2) of the 1951 Convention with regard to refugees who are stateless, as well as to various Assembly resolutions, including resolutions 3274 (XXIX) and 31/36 in relation to the Convention relating to the Status of Stateless Persons of 1954 and the Convention on the Reduction of Statelessness of 1961. Over the years, the mandate of UNHCR has been extended to other groups through various Assembly resolutions. UNHCR provides protection and assistance to internally displaced persons, working in cooperation with the Under-Secretary-General for Humanitarian Affairs and Emergency Relief Coordinator and in the context of the collaborative response of the United Nations system, as well as with the consent of the State concerned.

Programme of work

International protection, durable solutions and assistance to refugees

Objective

- 25.2 The objective, to which this programme contributes, is to ensure international protection for refugees and other persons of concern¹ and to achieve durable solutions to their plight, in cooperation with States and other organizations, without discrimination.

Strategy and external factors for 2025

- 25.3 To contribute to the objective, UNHCR will, in close cooperation with national and local authorities, partners in the United Nations system, non-governmental organizations, the private sector, academia, other persons of concern and other relevant stakeholders:
- (a) Advocate adherence by States to relevant international and regional instruments, including the refugee and statelessness conventions;
 - (b) Swiftly respond to new humanitarian crises, including in conflict-affected areas, by providing humanitarian assistance, such as cash-based assistance, core relief items and shelter materials, as well as by monitoring and addressing protection risks and needs;
 - (c) Advance work towards the attainment of durable solutions to displacement by influencing broader development agendas, and advocate and support measures that foster inclusion, including on educational opportunities, and access to formal economies and the labour market;

¹ Other persons of concern include asylum-seekers, refugee returnees, stateless persons and internally displaced persons.

- (d) Support implementation of the Global Compact on Refugees, advocate greater financial support for refugee host countries and communities, follow up on pledges made at the 2023 Global Refugee Forum and redouble efforts to expand international cooperation and burden- and responsibility-sharing;
 - (e) Promote adequate and proper reception conditions for asylum-seekers and provide effective assistance, focusing on women and children and the needs of the most vulnerable;
 - (f) Raise awareness of protection principles and refugee law, and provide training for government officials and partners;
 - (g) Enhance protection and assistance for internally displaced persons under the Inter-Agency Standing Committee coordination system, in line with relevant General Assembly resolutions, including [76/167](#);
 - (h) Advocate for the prevention and reduction of statelessness, and the protection of stateless persons, including by promoting accession to the relevant international instruments to facilitate the acquisition or confirmation of nationality by stateless persons;
 - (i) Analyse risk factors in humanitarian crises and maintain preparedness to respond to emergencies with agility.
- 25.4 By promoting inclusive and comprehensive approaches, UNHCR will contribute to the relevant goals contained in the 2030 Agenda for Sustainable Development, ensuring that refugees and other persons of concern are not left behind in development processes ([A/AC.96/74/5](#), para. 54 and table I.16).
- 25.5 The above-mentioned work is expected to result in:
- (a) Significant advances in the response to refugee situations through more predictable and equitable burden- and responsibility-sharing and through a multi-stakeholder approach, consistent with the Global Compact on Refugees;
 - (b) Strengthened national asylum systems that are compliant with international legal standards;
 - (c) The advancement of solutions for forcibly displaced people, fostered by inclusion and through safe and sustainable returns when possible;
 - (d) Reinforced solutions for stateless people, resulting in previously stateless individuals acquiring or confirming nationality;
 - (e) Improved access to protection and assistance for refugees and asylum-seekers through registration.
- 25.6 With regard to external factors, the plan for 2025 is based on the following assumptions:
- (a) Security conditions shall allow UNHCR to carry out its programmes;
 - (b) Humanitarian access will be granted in most countries, enabling UNHCR to respond to urgent protection and assistance needs;
 - (c) States and the international community at large will remain committed to contributing to and supporting implementation of the Global Compact on Refugees, including pledges made at the Global Refugee Forum;
 - (d) Asylum space and policies will not further restrict admissions in some countries;
 - (e) Voluntary funding from donors will match the budgeted needs to respond effectively and adequately to situations of forced displacement and statelessness;
- 25.7 With regard to cooperation with other entities at the global, regional, national and local levels, UNHCR will continue to engage a wide range of partners in programme delivery. UNHCR will strengthen partnerships with local actors, regional organizations, organizations led by refugees and persons of concern, development actors and international financial institutions to advance the localization agenda and the inclusion of displaced populations in United Nations programmes and

in national humanitarian and development policies and plans. UNHCR will continue to design its multi-channel feedback and response mechanisms in consultation with displaced and stateless people, and support measures that have a significant effect on the socioeconomic inclusion of displaced people.² The Office will continue to invest in private-sector partnerships, including to secure strategic long-term support. UNHCR and its partners will continue to apply preventive and preparedness measures to minimize the impacts of climate change on displaced people to enhance their resilience.

- 25.8 With regard to inter-agency coordination and liaison, UNHCR will continue to cooperate closely with resident coordinators and humanitarian coordinators to ensure that overarching protection and solutions strategies remain inclusive. UNHCR will engage actively in relevant United Nations forums, including the Inter-Agency Standing Committee and the United Nations System Chief Executives Board for Coordination. Through its Institutional Plan on Solutions to Internal Displacement,³ and in close coordination with the Office of the Special Adviser on Solutions to Internal Displacement, UNHCR will step up its engagement in situations of internal displacement.
- 25.9 UNHCR integrates a gender perspective in its operational activities, deliverables and results, as appropriate. UNHCR will remain fully committed to a non-discriminatory approach. Specifically, UNHCR will strive to strengthen gender equality, including by preventing, mitigating and responding to gender-based violence and violence against children, including sexual violence. It will ensure that survivors have access to health care, psychosocial support, safe shelter and legal aid, while strengthening community engagement and prioritizing awareness-raising activities.
- 25.10 In line with the United Nations Disability Inclusion Strategy, UNHCR will work with a global network of persons of concern who are living with disabilities, in collaboration with relevant organizations. UNHCR will advocate that their disability considerations be taken into account in the context of international protection and promote their equal access to social protection schemes.

Evaluation activities

- 25.11 The following evaluations completed in 2023 have guided the proposed programme plan for 2025:
- (a) UNHCR engagement with humanitarian-development cooperation;
 - (b) UNHCR engagement in situations of internal displacement;
 - (c) Evaluations of UNHCR emergency responses in various countries;
 - (d) Evaluation of strategies of various countries.
- 25.12 In response to the results of the relevant evaluations referenced above, UNHCR has embedded key learning outcomes in its engagement in situations of internal displacement. For example, country strategy evaluations directly fed into the development of multi-year strategies in a number of countries. Findings across the evaluations are influencing organizational efforts in several areas, including results-based management, the development of workforce learning materials, communications with affected populations and advocacy. UNHCR will continue to play a key role in the United Nations Evaluation Group, supporting the development of additional norms and standards for evaluation and the further professionalization of the function across the system.
- 25.13 The following evaluations are planned for 2025:
- (a) Prevention and response to gender-based violence;
 - (b) Climate action;
 - (c) Economic inclusion for urban refugees;

² See www.unhcr.org/media/global-survey-livelihoods-and-economic-inclusion-report-december-2023.

³ See www.unhcr.org/sites/default/files/2023-05/UNHCR%20IDP%20Solutions%20Institutional%20Plan.%20April%202023%20%281%29.pdf.

- (d) Evaluations of UNHCR emergency responses;
- (e) Evaluation of strategies of selected countries.

Programme performance in 2023

Increased commitment to respond to humanitarian crises

25.14 The second Global Refugee Forum took place in December 2023. As the world's largest international gathering on refugees, it was designed to support the practical implementation of the objectives set out in the Global Compact on Refugees. It was co-hosted by the Government of Switzerland and UNHCR, and co-convened by UNHCR and the Governments of Colombia, France, Japan, Jordan and Uganda. Over 4,000 participants from 168 countries attended, including over 300 refugee delegates. The Forum saw over 1,600 pledges made to support refugees and their host communities, including 43 multi-partner commitments led by Governments. Pledges are commitments by States and other stakeholders, including refugees, that advance the objectives of the Global Compact on Refugees. Pledges include places for resettlement and complementary pathways for admission to third countries, as well as financial, material or technical assistance and other actions that States take on, such as policies and practices, to promote refugee inclusion. UNHCR also facilitated the matching of pledges made at the first Global Refugee Forum by host countries with those made by donors and other actors, to provide the financial, material and technical assistance required for their implementation. UNHCR maintained and supported the Global Compact on Refugees digital platform, including the pledges dashboard.

25.15 Progress towards the objective is presented in the performance measure below (see figure 25.I).

Figure 25.I

Performance measure: number of pledges to support refugees and their host communities (annual)

Planned results for 2025

Result 1: solutions through resettlement provided for refugees at risk

Programme performance in 2023 and target for 2025

25.16 The programme's work contributed to more than 96,000 refugees departing for resettlement, a 64 per cent increase compared with 2022, which did not meet the planned target of 100,000 resettled refugees. The target was not met owing to multiple factors, including overstretched capacity and logistical limitations, as well as changed priorities among resettlement States.

25.17 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 25.II).

Figure 25.II
Performance measure: number of resettled refugees^a

^a The target relates to the number of refugees who depart for resettlement to third countries through UNHCR-facilitated assistance.

Result 2: enhanced inclusion of displaced people through digital cash payments

Programme performance in 2023 and target for 2025

- 25.18 The programme’s work contributed to 36 per cent of displaced people receiving cash assistance through their own bank or mobile money accounts, which exceeded the planned target of 35 per cent.
- 25.19 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 25.III).

Figure 25.III
Performance measure: percentage of forcibly displaced who are recipients of cash assistance through their own bank or mobile money accounts (annual)

Result 3: increased prevalence of national and local partners in refugee response plans globally

Proposed programme plan for 2025

- 25.20 Refugee response plans align with the national strategies and support host Governments to plan and coordinate refugee response in multiple contexts. In line with the Global Compact on Refugees, the plans pursue a “whole-of-society” approach and reflect the robust engagement of diverse partners. Between 2016 and 2023, UNHCR coordinated between 5 and 8 regional refugee response plans per year, together with more than 7,000 partners in a total of 72 refugee-hosting countries.

Lessons learned and planned change

- 25.21 The main lesson learned for the programme was that a range of local, national and international operational partners, including local and national non-governmental organizations, faith-based organizations, refugee-led and women-led organizations, and host communities participating in regional refugee response plans, can help to ensure a more comprehensive response to refugee situations. They play an instrumental role in raising awareness and engaging local communities to support the refugee response plans. They would complement and strengthen support provided by international partners in the development and implementation of refugee response plans. In applying the lesson, UNHCR will work to expand the number of community-based and local organizations to ensure that they can contribute to and benefit from the coordination, advocacy and resource mobilization resulting from the regional refugee response plans. The programme will facilitate and support the development of localized responses and actions with an emphasis on partnerships with local communities.
- 25.22 Expected progress towards the objective is presented in the performance measure below (see figure 25.IV).

Figure 25.IV

Performance measure: percentage of local and national operational partners in refugee response plans globally (as a proportion of all partners)**Legislative mandates**

- 25.23 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the Office.

General Assembly resolutions

319 A (IV)	Refugees and stateless persons	50/152; 73/151;	Office of the United Nations High Commissioner for Refugees
428 (V)	Statute of the Office of the United Nations High Commissioner for Refugees	75/163; 76/143; 77/198; 78/184	
538 B (VI)	Assistance to and protection of refugees	58/153	Implementing actions proposed by the United Nations High Commissioner for Refugees to strengthen the capacity of his Office to carry out its mandate
1166 (XII)	International assistance to refugees within the mandate of the United Nations High Commissioner for Refugees		
46/108; 78/185	Assistance to refugees, returnees and displaced persons in Africa	70/1	Transforming our world: the 2030 Agenda for Sustainable Development
		78/205	Protection of and assistance to internally displaced persons

Conventions and conference declarations

Convention relating to the Status of Refugees, of 1951, and Protocol relating to the Status of Refugees, of 1967	Cartagena Declaration on Refugees, 1984
Convention relating to the Status of Stateless Persons, 1954	Convention on the Rights of the Child, 1989
Convention on the Reduction of Statelessness, 1961	San José Declaration on Refugees and Displaced Persons, 1994
Organization of African Unity Convention Governing the Specific Aspects of Refugee Problems in Africa, 1969	African Union Convention for the Protection and Assistance of Internally Displaced Persons in Africa, 2009

Deliverables

Humanitarian assistance missions (number of missions)	50	143	75	130
23. Humanitarian assistance missions undertaken by the UNHCR senior executive team	50	143	75	130

C. Substantive deliverables

Consultation, advice and advocacy: consultation and advice to Member States on the establishment of national legal and administrative frameworks in line with protection standards; dialogues and consultations with partners, non-governmental organizations, the private sector and Governments.

Direct service delivery: biometric registration for some 27 million refugees and asylum-seekers; cash assistance for some 10 million people across operations; the provision of shelter-related relief items for at least 500,000 people; protection services for approximately 13 million people; legal aid to facilitate acquiring of nationality or having it confirmed; essential health-care services for displaced people and comprehensive health care for women and girls; and at least 70 per cent of UNHCR operations have complaint and feedback mechanisms in place.

D. Communication deliverables

Outreach programmes, special events and information materials: global communications milestones such as World Refugee Day; the Nansen Refugee Award, an annual event recognizing individuals and organizations for their outstanding work for forcibly displaced and stateless people; the UNHCR global campaign to end statelessness; communications on thematic priorities such as durable solutions, climate action, solidarity and inclusion.

External and media relations: media and communications partnerships and media coverage on thematic areas, such as emergencies, climate action and the right to seek safety; awareness raising by over 90 global, regional and national Goodwill Ambassadors and high-profile supporters.

Digital platforms and multimedia content: approximately 30 stories that are co-led or co-produced with forcibly displaced and stateless people; UNHCR websites and UNHCR social media platforms.

B. Proposed post and non-post resource requirements for 2025

Overview

- 25.25 As part of its proposed programme budget exercise for 2025, UNHCR conducted a spending review pursuant to paragraph 20 of General Assembly resolution [77/262](#). In accordance with article 20 of its Statute, unless the General Assembly decides otherwise, no expenditure, other than administrative expenditures relating to the functioning of the Office of the High Commissioner, shall be borne on the budget of the United Nations, and all other expenditures relating to the activities of the High Commissioner shall be financed by voluntary contributions. The UNHCR regular budget approved for 2024 amounts to \$47,175,700, representing 0.4 per cent of its overall budget estimates of \$10,621,668,300 for the same period.
- 25.26 The regular budget of UNHCR covers management and administrative expenditure and is reflected under two objects of expenditure: (a) posts, which would cover the cost of the Under-Secretary-General and Assistant Secretary-General posts in the staffing table; and (b) grants and contributions, which would cover a portion of the overall administrative expenditure of UNCHR. The provision of funds to UNHCR in the form of a grant rather than as post and non-post resources was initiated in the biennium 2002–2003 and was designed to simplify the UNHCR budgetary process. A review of the lump-sum arrangement and the lessons learned over the bienniums 2002–2003, 2004–2005 and 2006–2007 were reported to the General Assembly in 2008 (see [A/63/537](#)). The Assembly, in section VII of its resolution [63/263](#), endorsed the maintenance of the lump-sum arrangement for the funding of UNHCR in future budget presentations of the proposed programme budget, as recommended by the Advisory Committee on Administrative and Budgetary Questions ([A/63/616](#), para. 10).
- 25.27 The spending review covered the experience of the current arrangements of the regular budget contribution of UNHCR to its administrative expenditure, which is detailed in paragraphs 25.34 to 25.47 of the present report. No changes are proposed to the current arrangements following the outcome of the review and on the basis of the previous General Assembly decisions taken on the level of UNHCR regular budget resources.
- 25.28 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 25.2 to 25.4.

Table 25.2

25.29 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 25.5 to 25.7 and figure 25.V.

25.30 As shown in tables 25.5 (1) and 25.6 (1), the overall resources proposed for 2025 amount to \$47,175,700 before recosting, reflecting no change compared with the approved budget for 2024. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

25.31 As reflected in tables 25.5 (2) and 25.6 (2), extrabudgetary resources are estimated at \$10,574,492,600. The resources are based on the UNHCR annual programme budget for 2024 (A/AC.96/74/5), approved by the Executive Committee of UNHCR at its plenary session held in October 2023. The 2024 amount has been used as an estimate for 2025, pending the completion of the UNHCR annual planning exercise for 2025 in the second quarter of 2024.

- 25.32 Anticipated in-kind contributions with an estimated value of \$120,000,000, comprising goods to be distributed to beneficiaries, premises, utilities, transport and personnel provided free of charge, are anticipated for 2025.
- 25.33 The extrabudgetary resources under the present section are subject to the oversight of the UNHCR Executive Committee, a subsidiary organ of the General Assembly.

Spending review

Background

- 25.34 The Statute of UNHCR was adopted by the General Assembly on 14 December 1950 as an annex to Assembly resolution 428 (V). In accordance with article 20 of the Statute, unless the General Assembly decides otherwise, no expenditure, other than administrative expenditures relating to the functioning of the Office of the High Commissioner, shall be borne on the budget of the United Nations, and all other expenditures relating to the activities of the High Commissioner shall be financed by voluntary contributions. While the Statute does not define what is meant by “administrative expenditures”, the term, based on a definition proposed by the Advisory Committee on Administrative and Budgetary Questions in its first report to the General Assembly at its seventh session,⁴ has been interpreted to mean expenses other than operational expenses and their related management costs. UNHCR reports its management and administration costs as a separate cost category defined as costs incurred at headquarters that relate to functions that are critical to the leadership and management of the organization, such as executive direction, evaluation and oversight, information technology, human resources, and finance and administration.
- 25.35 In its resolution 58/270 of 23 December 2003, the General Assembly requested the Secretary-General to submit at its fifty-ninth session a proposal for the progressive implementation of article 20 of the Statute, with a view to its full implementation. The Secretary-General submitted his report (A/59/294, of 24 August 2004), wherein he proposed that the regular budget of the United Nations cover 50.8 per cent of the management and administration costs of UNHCR, through increases of non-post administrative resources over the subsequent bienniums. The 50.8 per cent was calculated on the basis of the ratio between the number of posts financed from the regular budget (220) and the total management and administration posts (433) in the 2002–2003 budget.
- 25.36 The General Assembly, in section III of its resolution 59/276 requested the Secretary-General to include in the programme budget proposals for progressive increases for contributions from the regular budget to the Office with a view to the full implementation of article 20 of the Statute of the Office and to report on the progress made to the General Assembly at its sixtieth session in the context of the proposed programme budget for the biennium 2006–2007, while recognizing that the percentage of 50.8 does not represent a ceiling. Subsequently, the Secretary-General made proposals for increases in the regular budget share in context of the budgets for the bienniums 2006–2007 to 2012–2013.
- 25.37 Table 25.8 below shows the regular budget share of UNHCR management and administrative costs compared with the overall expenditure of UNHCR in that area. Since the 2012–2013 biennium, the relative share of the regular budget funding of UNHCR management and administrative costs has declined progressively from 38.2 per cent (2012–2013 biennium) to 23.8 per cent in 2024, as reflected in table 25.8. This is primarily the result of the increase in the management and administrative component that supports the expanding programme of work that is financed by extrabudgetary resources, which has not been accompanied by a commensurate increase in the regular budget grant, and also the result of reductions applied under the regular budget in previous years.

⁴ *Official Records of the General Assembly, Seventh Session, Supplement No. 7 (A/2157)*, part three.

Table 25.8
Evolution of the regular budget share of UNHCR management and administrative costs

(Thousands of United States dollars)

Regular budget as percentage of total management and administration expenditure/budget	37.4	38.2	33.0	28.2	27.8	23.6	21.9	21.8	23.1	23.8

^a At the time of reporting, the expenditure presented in this table and in subsequent tables is not final and may be subject to adjustments that could result in minor differences between the information contained in the present report and the financial statements to be published by 31 March 2024.

^b Approved budget.

25.38 In its resolution [70/247](#), the General Assembly requested the Secretary-General to review the level of regular budget funding in the light of the growth in the administrative budget of UNHCR. In paragraph VI.29 of its report [A/72/7](#), the Advisory Committee on Administrative and Budgetary Questions recommended that the General Assembly request the Secretary-General to conduct, without delay, the review of the level of regular budget funding, as requested by the Assembly in paragraph 85 of resolution [70/247](#), with the results thereof to be presented no later than in the context of the proposed programme budget for the biennium 2020–2021. The recommendation was not endorsed by the General Assembly, in paragraph 142 of its resolution [72/261](#), adopted on 24 December 2017.

25.39 The Secretariat has taken into consideration General Assembly resolution [72/261](#), being to date the latest guidance from the Assembly specifically on the matter of the full implementation of article 20 of the statute of UNHCR. Accordingly, no changes have been proposed to the budget for grants and contributions, with the only changes being to the amount year-on-year related to recosting.

Optimization of the grant arrangement.

25.40 The spending review focused on the use of the grant over a five-year period, between 2019 and 2023. Table 25.9 below contains details of regular budget expenditure, including regular budget expenditure as a percentage of the overall management and administrative-related expenditure of UNHCR.

Table 25.9
United Nations regular budget as a share of UNHCR management and administrative costs

(Thousands of United States dollars)

<i>Description</i>	<i>2019</i>	<i>2020</i>	<i>2021</i>	<i>2022</i>	<i>2023^a</i>
Posts	661.9	682.1	688.1	676.0	730.4

UNHCR management and administrative expenditure	164 001.3	170 050.2	196 513.5	193 524.0	193 524.0
Share of expenditure covered by the regular budget (percentage)	26.4	23.6	21.9	21.8	23.1

^a Expenditure is provisional.

25.41 As reflected in table 25.9, the results show that expenditure related to the 218 posts, which averaged \$38.4 million annually, remained stable, with fluctuations reflecting cost variations and vacancies due in part to the rotation policy of UNHCR whereby staff members are expected to rotate after the required number of years at a duty station, which results in some vacancies.

25.42 Furthermore, while the amount provided under the grant represents the equivalent of 218 posts and non-post resources, the composition of the grant, including the grade and number of the temporary posts and the distribution of resources, is managed by UNHCR to support its management and administration activities. Accordingly, expenditure related to the 218 posts is first committed with any remaining funds covering other costs in support of its management and administration activities, as reflected in table 25.9.

25.43 Tables 25.10 and 25.11 below contain information on the grade, division and functional roles of the 218 posts funded from the regular budget grant. The 218 posts represent 29.5 per cent of the total number of 740 posts of UNHCR that fall under management and administration.

Table 25.10
Posts (by grade) funded from the regular budget, 2019–2024

Division of Strategic Planning and Results	Strategic planning/budgeting/implementing partner management	–	–	–	21	21	24
Total		218	218	218	218	218	218

- 25.44 The results show that the distribution of the 218 posts has been maintained within the core management and administration functions of UNHCR and the distribution by grade has remained stable, with adjustments reflecting changes in the operational requirements of UNHCR.
- 25.45 The 218 posts cover management and administration functions in the core areas of executive direction, information systems and telecommunications, human resources, finance and administration, external relations, as well as oversight and strategic planning. Those functions by nature do not vary significantly year on year and are critical to enabling effective mandate delivery by UNHCR. The composition of the posts represents the optimal use of regular budget resources, in accordance with article 20 of the Statute. While the planning for 2025 budget is ongoing and will be finalized in the second quarter of 2024, the post configuration is not expected to change significantly.
- 25.46 The grant arrangement has been well suited to the activities of UNHCR, as it enables the Office to manage its resources while ensuring transparency and respecting the limits of an overall approved grant amount. The arrangement removes the complexities associated with the different enterprise resource planning systems used by the United Nations and UNHCR, as well as the different account structures.
- 25.47 On the basis of the review, including the recommendations made by the General Assembly in its resolution [72/261](#), the Secretary-General proposes no changes to the current arrangements, and any adjustments to the grant up to the level of 50.8 per cent would depend on the General Assembly's decisions on the matter.

Executive direction and management

- 25.48 The High Commissioner (Under-Secretary-General), who is elected by the General Assembly on the nomination of the Secretary-General, provides the overall direction, supervision and management of activities. The functions of the High Commissioner are set out in the annex to the statute of UNHCR. In discharging these responsibilities, the High Commissioner is assisted by a Deputy High Commissioner (Assistant Secretary-General).
- 25.49 The executive direction and management component comprises the Executive Office, the Governance Service, the Evaluation Service, the Inspector General's Office, the Ethics Office, the UNHCR Liaison Office in New York and the Global Data Service. Reporting to the Deputy High Commissioner, and also part of executive direction and management are Enterprise Risk Management, the Ombudsman's Office, the Legal Affairs Service, the Innovation Service and the Transformation and Change Service.
- 25.50 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, UNHCR is continuing its efforts to increase the use of sustainable energy in its operations.
- 25.51 UNHCR has set a goal of reducing its greenhouse gas emissions by 30 per cent by 2025. To that end, data collection systems have been installed in 420 of the 429 offices worldwide to enable remote monitoring of electricity consumption and the resulting greenhouse gas emissions. In 2024, UNHCR aims to convert 15 of its most carbon-emitting offices to clean energy and a further 10 by 2025. Satellite-based data tracking systems have been installed on 79 per cent of vehicles to monitor their emissions, with the aim of increasing this to 85 per cent by 2025. The UNHCR global fleet includes 17 electric vehicles in use in Ethiopia, India, Jordan, Kenya and Nepal, and 85 hybrid vehicles in 27 countries.
- 25.52 Information on the timely submission of documentation and advance booking for air travel is reflected in table 25.12.
- 25.53 The 2023 compliance rate for advance travel planning was 20 per cent, reflecting progress compared with previous years. That figure must be considered in the context of the UNHCR mandate, which frequently necessitates the deployment of staff to respond to urgent humanitarian needs, posing challenges for advance travel planning. It is also noteworthy that significant milestones were achieved in optimizing travel activities in 2023, marked by the deployment of a new enterprise resource planning system. That initiative is expected to streamline the approval process, reducing approval times and ultimately benefiting advance booking. Those optimization efforts will continue in 2024, accompanied by new awareness initiatives emphasizing the importance of advance travel planning.

Table 25.12

Compliance rate

(Percentage)

	2021 <i>actual</i>	2022 <i>actual</i>	2023 <i>actual</i>	2024 <i>planned</i>	2025 <i>planned</i>
Timely submission of documentation	100	90	85	100	100
Air tickets purchased at least two weeks before the commencement of travel	16	16	20 ^a	100	100

^a The calculation of the compliance rate does not account for the last three months of 2023, which is the transitional phase between two enterprise resource planning systems, during which cutover procedures were applied and the compliance rate could not be assessed.

- 25.54 The proposed regular budget resources for 2025 amount to \$755,000 and reflect no change compared with the approved budget for 2024. Additional details on the distribution of the proposed resources for 2025 are reflected in table 25.13.

Table 25.13

Programme of work

- 25.55 In accordance with article 20 of the UNHCR statute, the Office of the High Commissioner is financed under the budget of the United Nations. Unless the General Assembly decides otherwise, no expenditure other than administrative expenditures relating to the functioning of the Office of the High Commissioner shall be borne on the budget of United Nations. All other expenditure relating to the activities of the High Commissioner shall be financed by voluntary contributions. Accordingly, no regular budget resources are estimated under the programme of work component.

Programme support

- 25.56 The programme support component includes divisions at headquarters, regional bureaus and some parts of country programmes that, to varying extents, develop, formulate, direct and administer programmes, as well as provide programme evaluation and oversight. They also discharge functions with regard to information technology, financial management, human resources management and administration.
- 25.57 The proposed regular budget resources for 2025 amount to \$46,420,700 and reflect no change compared with the approved budget for 2024. Additional details on the distribution of the proposed resources for 2025 are reflected in table 25.14.
- 25.58 The provision of a grant for the administrative expenditure of the Office rather than as post and non-post resources was initiated in the biennium 2002–2003 (A/56/6 (Sect. 23), para. 23.20) to simplify the work of the Office by eliminating the need for separate administrative procedures in respect of a portion of its administrative posts. It was subject to review after three bienniums. The results of a review of the lump-sum arrangement and the lessons learned from the review of the full three bienniums of 2002–2003, 2004–2005 and 2006–2007 were reported to the General Assembly at its sixty-third session, in 2008 (see A/63/537). The Assembly, in section VII of its resolution 63/263, endorsed the maintenance of the lump-sum arrangement for the funding of UNHCR in future budget presentations of the proposed programme budget, as recommended by the Advisory Committee on Administrative and Budgetary Questions (A/63/616, para. 10).

Overall orientation

Mandates and background

- 26.1 The United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA) is responsible for providing assistance and protection to Palestine refugees. The mandate derives from the priorities established in relevant General Assembly resolutions, including resolution 302 (IV) of 1949, by which the Agency was established. Since starting operations in 1950, UNRWA has adapted its programmes to meet the increasingly complex needs of Palestine refugees and provide them with a measure of protection, relief and stability amid chronic uncertainty in the region.

Strategy and external factors for 2025

- 26.2 The mission of UNRWA is to help Palestine refugees achieve their full potential in human development under the difficult circumstances in which they live. In line with that mission, the Agency works towards six programmatic objectives within its strategic plan for the period 2023–2028: (a) Palestine refugees are protected through the realization of their rights under international law; (b) Palestine refugees lead healthy lives; (c) Palestine refugees complete inclusive and equitable quality basic education; (d) Palestine refugees have improved livelihood opportunities; (e) Palestine refugees are able to meet their basic human needs of shelter, water and sanitation; and (f) the most vulnerable Palestine refugees have access to effective social assistance.
- 26.3 UNRWA aims to achieve its mission by maintaining and improving the provision of education, health, relief and social services, livelihoods, including microfinance assistance, infrastructure and camp improvement and protection for the benefit of approximately 6 million registered Palestine refugees in Gaza, Jordan, Lebanon, the Syrian Arab Republic and the West Bank, including East Jerusalem. The latest conflict in Gaza, which began in October 2023, has had a significant impact on Agency operations and, consequently, the results recorded in the present report. Since the start of the conflict, UNRWA has assumed a critical and central role in the provision of emergency food supplies, water, fuel, shelter, primary health care and psychosocial support to the vast majority of the local population (both refugees and non-refugees). The Agency is also the backbone of the operations of the entire humanitarian community in Gaza, due to its extensive presence and logistical capacity on the ground. While UNRWA remains indispensable in the provision of basic services to Palestine refugees in Gaza, the scale and nature of Agency services in Gaza in 2025 remain unknown. A significant proportion of UNRWA installations have been hit by strikes, damaged or destroyed or, due to necessity, are currently inhabited by approximately 1 million internally displaced persons who have taken shelter in them, adding an additional layer of complexity to Agency operations. UNRWA will continue to take a flexible approach to its operations in Gaza, guided by the evolving humanitarian needs of the local population, prevailing security conditions, import restrictions and the capacity of other humanitarian actors to assume responsibility for support that the Agency has exceptionally taken on in these exceptional and unprecedented circumstances during the conflict.
- 26.4 Following the onset of the conflict, regular UNRWA operations in Gaza were suspended or adapted from October 2023 to cater for emergency interventions, as noted above. As such, the 2023 actual performance with regard to results under the six subprogrammes includes the latest available data for Gaza, collected prior to the suspension of regular Agency operations there. Targets for 2024 and 2025, including estimates for deliverables, are predicated on the assumption of regular Agency operations resuming in Gaza. The resumption of these operations will, however, require transitional periods.
- 26.5 With regard to cooperation with other entities at the global, regional, national and local levels, the Agency will maintain and strengthen a wide range of partnerships that reflect its commitment to Sustainable Development Goal 17, including with host and donor Governments, non-governmental

organizations, UNRWA national committees and the private sector, which assist the Agency in delivering its mandate.

- 26.6 With regard to inter-agency coordination and liaison, UNRWA will maintain and expand partnerships with other United Nations entities. Many of these partnerships, such as those with the United Nations Educational, Scientific and Cultural Organization and the World Health Organization (WHO), date to the Agency's founding in 1949. Inter-agency partners have helped to establish norms for UNRWA education and health programming and will continue to furnish strategic assistance. The Agency will also continue to work closely with the World Food Programme and the United Nations Children's Fund to extend food and nutritional assistance in Gaza, as well as with United Nations country teams and their member entities in its fields of operation to improve efficiencies, including through agreements on shared services.
- 26.7 With regard to the external factors, UNRWA considered applicable risks identified in its risk register and, accordingly, the overall plan for 2025 is based on the following planning assumptions:
- (a) Instability and, in some cases, unrest and armed conflict will characterize the macroenvironment throughout the year;
 - (b) Armed conflict will not spread beyond the areas where hostilities are currently taking place to other UNRWA fields of operation;
 - (c) Demand for Agency emergency assistance and core services will increase;
 - (d) Sufficient supplies will be admitted into Gaza to sustain the Agency's humanitarian, early recovery and regular operations;
 - (e) The provision of humanitarian, early recovery and regular services in Gaza will be challenged by damage to UNRWA installations and basic infrastructure, as well as displacement and trauma affecting many Agency staff in this field of operations;
 - (f) Security-related movement restrictions in the occupied Palestinian territory will not increase further;
 - (g) Hostility towards and prejudice against Palestine refugees in host communities, where this exists, will not increase;
 - (h) Enrolled populations in UNRWA schools will not increase beyond projections based on historical trends;
 - (i) UNRWA can raise sufficient funds.
- 26.8 UNRWA integrates a gender perspective in its operations, deliverables and results, as appropriate. For example, survivors of sexual and gender-based violence will receive support from UNRWA social workers. In addition, women and men and girls and boys will have equal access to primary health care, and all Palestine refugee children and young people will enjoy, on a non-discriminatory basis, an equal opportunity to learn in Agency schools. Women will be supported in developing their full potential through equal access to technical, vocational and higher education in UNRWA institutions. UNRWA will ensure that shelters rehabilitated for Palestine refugees incorporate sex-segregated rooms, where required, and will promote the right of women to own and control property. Social transfers will be targeted to vulnerable segments of the Palestine refugee population, including female-headed households.
- 26.9 In line with the United Nations Disability Inclusion Strategy, UNRWA will, across all fields of operation: (a) reconstruct and rehabilitate Agency installations, especially health centres, schools and vocational training centres, to make them accessible to persons with disabilities; (b) conduct health screening for Palestine refugee infants and children to identify and extend support for those with disabilities; (c) support the inclusion of students with disabilities in the UNRWA education system, including through the use of accessible technology, in line with the Agency's inclusive education approach; and (d) conduct awareness-raising activities to reduce stigma and foster inclusion at the household and community levels for Palestine refugees with disabilities.

Legislative mandates

26.10 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

302 (IV); 78/74	Assistance to Palestine refugees	70/1	Transforming our world: the 2030 Agenda for Sustainable Development
3331 B (XXIX)	United Nations Relief and Works Agency for Palestine Refugees in the Near East	74/84	Persons displaced as a result of the June 1967 and subsequent hostilities
65/272	Report of the Secretary-General on the strengthening of the management capacity of the United Nations Relief and Works Agency for Palestine Refugees in the Near East	77/122; 78/73	Operations of the United Nations Relief and Works Agency for Palestine Refugees in the Near East

Deliverables

26.11 Table 26.1 lists all cross-cutting deliverables of the programme.

Table 26.1

Cross-cutting deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	5	5	5	5
Meetings of the:				
1. Advisory Committee on Administrative and Budgetary Questions	2	2	2	2
2. Committee for Programme and Coordination	1	1	1	1
3. Fourth Committee	1	1	1	1
4. Fifth Committee	1	1	1	1
B. Generation and transfer of knowledge				
Publications (number of publications)	1	1	1	1
5. Report of the Commissioner-General of the United Nations Relief and Works Agency for Palestine Refugees in the Near East	1	1	1	1

Evaluation activities

26.12 The following evaluations completed in 2023 by UNRWA have guided the proposed programme plan for 2025:

- (a) Evaluation of the gender equality strategy for the period 2016–2022;
- (b) Evaluation of the UNRWA emergency appeals for the occupied Palestinian territory and the Syrian regional crisis for the period 2016–2021;
- (c) Evaluation of UNRWA support to vulnerable children in Gaza for the period 2015–2021.

26.13 In response to the results of the evaluation of the gender equality strategy, UNRWA has prioritized increased engagement with Palestine refugee men in its work on promoting gender equality and the empowerment of women and girls.

26.14 The following evaluations to be conducted by the Agency are planned for 2025:

- (a) Midterm evaluation of the UNRWA strategic plan for the period 2023–2028;

- (b) Evaluation of mental health and psychosocial support;
- (c) Evaluation of the UNRWA resource mobilization and outreach strategy.

Programme of work

Subprogramme 1

Palestine refugees are protected through the realization of their rights under international law

Objective

- 26.15 The objective, to which this subprogramme contributes, is to ensure that Palestine refugees are protected through the realization of their rights under international law.

Strategy

- 26.16 To contribute to the objective, the subprogramme will:
- (a) Systematically mainstream cross-cutting issues that contribute to addressing protection risks and vulnerability, including gender, disability and age, across all UNRWA systems, processes, methodologies, programming and service delivery;
 - (b) Strengthen the protection of vulnerable and at-risk groups by monitoring and documenting protection incidents and trends, engaging community members in support of self-protection and providing access to medical, legal and/or psychosocial counselling and services for survivors of protection violations, either directly or through referrals to external partners;
 - (c) Advocate for the respect, protection and fulfilment of the rights of Palestine refugees under international law by engaging in evidence-based private and public advocacy with duty bearers, relevant external actors and other United Nations entities, including engagement with international human rights mechanisms, in accordance with resolution [78/73](#);
 - (d) Ensure that UNRWA services are equally accessible to Palestine refugee women and girls, provide a holistic range of programming, including reproductive and maternal health services, skills development and livelihood support for women and girls and gender-responsive education services, and advocate with duty bearers to ensure the safety of women and girls.
- 26.17 The above-mentioned work is expected to result in:
- (a) Safe and dignified access to UNRWA services for all Palestine refugees, including persons with disabilities, older persons, women and girls, undocumented married women and girls and households headed by women, children and persons with disabilities;
 - (b) Support for meeting the protection needs of Palestine refugees, in particular the most vulnerable and at-risk groups and individuals;
 - (c) Respect for the rights of Palestine refugees under international law, creating a better protection environment;
 - (d) Empowerment of Palestine refugee women and girls and their access to services that contribute to gender equality.

Programme performance in 2023

Palestine refugee women's and girls' empowerment and access to services that contribute to gender equality increased

- 26.18 Advancing gender equality is not only critical for the equal enjoyment of human rights by all, but also an indispensable prerequisite for advancing human development. The subprogramme advances gender equality by ensuring that services are equally accessible to and inclusive of women, men, girls and boys, and directly address their needs and priorities, in particular those of the most vulnerable, such as female-headed households and women and girls with disabilities. A holistic range of programming is offered, including: (a) comprehensive information and services relating to reproductive health rights, maternal health and the prevention and treatment of sexually transmitted diseases; (b) an expanded clinical care service for survivors of gender-based violence; (c) an inclusive educational approach to ensure that Palestine refugee girls complete free, equitable and quality elementary and preparatory education; (d) technical and vocational education and training and microfinance products to economically empower women; and (e) prioritized access to shelter rehabilitation support for women-headed households. Advocacy is also conducted with duty bearers to ensure that the safety of women and girls is improved in the Agency's areas of operation.
- 26.19 Progress towards the objective is presented in the performance measure below (see figure 26.I).

Figure 26.I

Performance measure: percentage of female recipients of Agency services (annual)

Planned results for 2025

Result 1: mental health and psychosocial issues among Palestine refugees addressed

Programme performance in 2023 and target for 2025

- 26.20 The subprogramme's work contributed to 98.6 per cent of Palestine refugees identified as having mental health and psychosocial issues receiving assistance, which did not meet the planned target of 100 per cent. The target was not met in part due to social stigma, which may have led some patients in need of mental health and psychosocial services to decline assistance.
- 26.21 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 26.II).

Figure 26.II
Performance measure: percentage of Palestine refugees identified as having mental health and psychosocial issues receiving assistance (annual)

Result 2: protection of the most vulnerable Palestine refugees enhanced

Programme performance in 2023 and target for 2025

- 26.22 The subprogramme’s work contributed to social work interventions for 5,876 Palestine refugees, which exceeded the planned target of 5,100 Palestine refugees.
- 26.23 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 26.III).

Figure 26.III
Performance measure: number of Palestine refugees who benefited from the Agency’s social work interventions (annual)

Result 3: safety and dignity of Palestine refugees accessing the Agency’s services is increased

Proposed programme plan for 2025

- 26.24 As a direct provider of basic services to Palestine refugees, UNRWA recognizes its obligation to ensure that all those using these services can do so in safety and dignity. The subprogramme will achieve this by systematically mainstreaming cross-cutting protection issues that mitigate risk and vulnerability across its systems, processes and methodologies.

Lessons learned and planned change

- 26.25 The lesson for the subprogramme was that standardized reporting structures and processes enhance the implementation rate of protection alignment review recommendations. In applying the lesson, the subprogramme will enhance efforts, through training and technical support, to ensure that:

(a) all personnel understand who is at risk and the consequences associated with inaction; (b) all personnel have the capacity to design and deliver services that incorporate protection principles; and (c) UNRWA systems are better aligned to harmonize the collection, analysis and use of data to monitor access, identify risk, strengthen understanding of vulnerabilities and inform programming. The efficacy of these efforts will be gauged through the implementation of biennial internal protection alignment reviews and quarterly integrated assessments of installations.

26.26 Expected progress towards the objective is presented in the performance measure below (see figure 26.IV).

Figure 26.IV

Performance measure: percentage of protection alignment review recommendations fully implemented by field offices¹

Deliverables

26.27 Table 26.2 lists all deliverables of the subprogramme.

Table 26.2

Subprogramme 1: deliverables for 2025, by category and subcategory

Category and subcategory

C. Substantive deliverables

Consultation, advice and advocacy: meetings, briefings and formal written interventions to advocate for the protection of the rights of Palestine refugees.

Direct service delivery: legal counselling, legal information and/or referrals to legal service providers; counselling, medical services and social support for Palestine refugees; multiple submissions to the international human rights system.

Subprogramme 2 Palestine refugees lead healthy lives

Objective

26.28 The objective, to which this subprogramme contributes, is to ensure that Palestine refugees lead healthy lives.

¹ The 2021 and 2022 actual performance figures relate to the percentage of protection alignment review recommendations fully implemented during the 2019–2022 cycle of recommendations. The 2023 actual performance figure and 2024 and 2025 planned targets relate to the percentage of recommendations fully implemented and planned to be fully implemented in the 2023–2025 cycle of recommendations.

Strategy

- 26.29 To contribute to the objective, the subprogramme will:
- Address the maternal and child health-care needs of Palestine refugees through the systematic delivery of preconception, prenatal and postnatal care, family-planning services, childhood immunization, child growth nutrition, and monitoring and screening for disabilities;
 - Control the status of non-communicable diseases and mental health issues through disease surveillance and health promotion and prevention interventions and referrals;
 - Control the status of communicable diseases by strengthening surveillance and response capacity and participating in host Governments' mass immunization campaigns;
 - Provide safe, quality and people-centred health care using the family health team model in increasingly accessible UNRWA health centres.
- 26.30 The above-mentioned work is expected to result in:
- Improved maternal and child health among Palestine refugees;
 - Improved control status of non-communicable diseases and mental health;
 - Improved control status of communicable diseases and the prevention and control of infectious diseases;
 - Safe access to quality primary, secondary and tertiary health services for Palestine refugees.

Programme performance in 2023

Vaccine-preventable disease outbreaks averted within Palestine refugee communities

- 26.31 Immunization is a crucial component of basic health care, providing protection against preventable and life-threatening diseases in childhood. The Expanded Programme on Immunization, introduced by WHO in 1974, is aimed at enhancing and extending global immunization efforts. UNRWA adopted the Programme in 1979, aligning it with host country immunization programmes. The subprogramme currently vaccinates Palestine refugee children against tuberculosis, diphtheria, pertussis, tetanus, polio, measles, mumps, rubella, hepatitis (A and B), rotavirus and pneumococcal disease. The vaccine coverage for Palestine refugees enrolled in Agency health centres has exceeded the WHO 95 per cent global target for the past two decades. The subprogramme maintains this success by: (a) ensuring a consistent supply of vaccines; (b) adhering to an appointment system for vaccinations; (c) continually following up with patients who miss their appointments; and (d) participating in campaigns to educate parents and encourage them to have their children immunized.
- 26.32 Progress towards the objective is presented in the performance measure below (see figure 26.V).

Figure 26.V

Performance measure: percentage of 18-month-old children who have received all booster vaccines

Planned results for 2025

Result 1: the health of expectant mothers safeguarded

Programme performance in 2023 and target for 2025

- 26.33 The subprogramme's work contributed to a maternal mortality rate of 19.6 deaths per 100,000 live births for women under UNRWA care, which exceeded the planned target of 20 deaths.
- 26.34 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 26.VI).

Figure 26.VI

Performance measure: maternal mortality rate of women under the Agency's care per 100,000 live births (annual)

Result 2: the health of Palestine refugees suffering from non-communicable diseases improved

Programme performance in 2023 and target for 2025

- 26.35 The subprogramme's work contributed to 36 per cent of patients with diabetes mellitus enrolled in UNRWA health centres whose condition remained under control, which exceeded the planned target of 35 per cent.
- 26.36 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 26.VII).

Figure 26.VII

Performance measure: percentage of patients with diabetes mellitus enrolled in the Agency's health centres whose condition is under control (annual)

Result 3: access to preconception care and reproductive planning services for Palestine refugees is improved

Proposed programme plan for 2025

- 26.37 Preconception care is the provision of medical, behavioural and social health interventions to women and couples before conception occurs, with the aim of reducing factors that could contribute to poor maternal and child health outcomes. The subprogramme has provided preconception care and reproductive planning to Palestine refugees enrolled in UNRWA health centres since 2010, which consists of six main components: health promotion; counselling; screening; periodic risk assessments; intervention and follow-up; and regular folic acid supplementation. Couples receive reproductive planning advice to address the potential harm associated with pregnancies that are too frequent, too early or too late, and guidance on preparing for a pregnancy that promotes good health. In addition, women under care are assessed for risk factors, including hypertension, diabetes, anaemia and oral health diseases, and are provided with medical care, where relevant.

Lessons learned and planned change

- 26.38 The lesson for the subprogramme was that health personnel are reluctant to initiate a discussion on sensitive topics, such as family planning, with young individuals before marriage, which has an impact on their approach to addressing preconception care. In applying the lesson, the subprogramme will consult with Agency health staff to determine the best approaches to ensure that young individuals receive effective preconception care prior to marriage while respecting cultural norms. These approaches will be shared through peer information exchanges and incorporated into refresher training for health personnel that will be conducted in 2025.
- 26.39 Expected progress towards the objective is presented in the performance measure below (see figure 26.VIII).

Figure 26.VIII

Performance measure: percentage of women with birth intervals of less than 36 months

Deliverables

- 26.40 Table 26.3 lists all deliverables of the subprogramme.

Table 26.3

Subprogramme 2: deliverables for 2025, by category and subcategory

Category and subcategory

C. Substantive deliverables

Direct service delivery: approximately 7.5 million primary health-care consultations; some 90,000 mental health and psychosocial support consultations.

**Subprogramme 3
Palestine refugees complete inclusive and equitable quality basic education**

Objective

- 26.41 The objective, to which this subprogramme contributes, is to ensure that Palestine refugees complete inclusive and equitable quality basic education.

Strategy

- 26.42 To contribute to the objective, the subprogramme will:
- (a) Enhance the professionalization of teachers through continuous professional development and career progression opportunities;
 - (b) Ensure that teaching approaches and learning materials used in UNRWA schools develop students' skills and competencies, including higher-order thinking skills;
 - (c) Monitor student performance, ensure safe and violence-free learning environments, facilitate parent engagement and promote inclusive recreational and extracurricular activities;
 - (d) Ensure that students identified as having a disability receive support to meet their specific needs, assist individuals identified as experiencing a protection risk and progressively construct or upgrade existing schools.
- 26.43 The above-mentioned work is expected to result in:
- (a) Improved learning outcomes and critical thinking skills for Palestine refugee girls and boys;
 - (b) A safe and inclusive learning environment for Palestine refugee boys and girls that ensures their well-being.

Programme performance in 2023

Teaching quality for Palestine refugee students reinforced

- 26.44 Teachers are the Agency's single most important educational resource; they are central to the provision of quality education and at the heart of the Agency's educational system. The subprogramme has strengthened its investment in its teachers in recent years through continuous professional development opportunities. These have been aimed at maximizing the effectiveness of student learning by helping teachers develop new skills, gain insights and stay current with the latest innovations in their field of work. The subprogramme runs a number of large-scale, recurrent professional development schemes, including the school-based teacher development programme, which is aimed at current elementary and preparatory teachers, and the learning for the future programme, which is aimed at school principals and their deputies. Both programmes draw on international and contextualized best practices in blended learning.
- 26.45 Progress towards the objective is presented in the performance measure below (see figure 26.IX).

Figure 26.IX

Performance measure: number of Agency teachers enrolled in the continuous professional development programme who successfully completed the programme in the past 12 months (cumulative)

Planned results for 2025

Result 1: student dropout rates reduced

Programme performance in 2023 and target for 2025

26.46 The subprogramme’s work contributed to a reduction in the annual dropout rates for students enrolled in UNRWA elementary and preparatory education of 0.93 per cent and 2.31 per cent, respectively, which exceeded the planned target of 1.25 per cent for elementary and 2.84 per cent for preparatory education.

26.47 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 26.X).

Figure 26.X

Performance measure: annual dropout rates for Agency elementary and preparatory education

Result 2: learning loss recovered

Programme performance in 2023 and target for 2025

26.48 The subprogramme’s work contributed to the development and implementation of learning recovery plans and to teachers and students starting to use digital learning methods, especially during emergencies and for afterschool learning, which met the planned target.

26.49 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 26.4).

Table 26.4
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
In-person teaching is gradually reintroduced in UNRWA schools	In-person teaching is resumed in all UNRWA schools	Learning recovery plans are developed and implemented	Assessment of learning outcome tests demonstrate closure of the learning gap	Results of the assessment of learning outcome tests are analysed
Students take assessment of learning outcome tests	Students take catch-up classes	Teachers and students start to use digital learning methods during emergencies and for afterschool learning		Learning recovery plans are revised based on the test results
Additional vulnerable students receive tablets and Internet bundles				

Result 3: safety and inclusiveness of the learning environment for students in Agency schools increased

Proposed programme plan for 2025

26.50 The physical learning environment is an important enabler in ensuring quality, inclusive and equitable education and can have a profound impact on student and educator outcomes. For students, school design can affect health, access for those with disabilities, and behavioural and overall learning performance. For educators, the physical environment can affect commitment, effort and retention rates. To enhance the physical environment in Agency schools, the subprogramme constructs, reconstructs or upgrades them on a rolling basis. All constructed, reconstructed and upgraded schools are designed to meet Agency protection and safety standards, with enhancements to ensure physical accessibility for all students and staff, as well as improved safety, including through strengthened structural integrity and fire safety measures. Gender-sensitive enhancements are also implemented, including the separation of lower grades from upper grades and the provision of internal toilets.

Lessons learned and planned change

26.51 The lesson for the subprogramme was that, while all newly constructed schools incorporate gender-sensitive and disability-inclusive design standards, the large number of Agency schools, combined with demographic pressures and underresourcing, means that a number of older buildings are not physically accessible for persons with disabilities and/or lack gender-sensitive features. In applying the lesson, the subprogramme will prioritize upgrades in schools that do not meet protection design standards.

26.52 Expected progress towards the objective is presented in the performance measure below (see figure 26.XI).

Figure 26.XI
Performance measure: percentage of schools run by the Agency that meet its protection design standards (annual)

Deliverables

26.53 Table 26.5 lists all deliverables of the subprogramme.

Table 26.5
Subprogramme 3: deliverables for 2025, by category and subcategory

Category and subcategory

C. Substantive deliverables

Direct service delivery: education services provided to some 550,000 students through approximately 700 schools.

Subprogramme 4 Palestine refugees have improved livelihood opportunities

Objective

26.54 The objective, to which this subprogramme contributes, is to ensure that Palestine refugees have improved livelihood opportunities.

Strategy

26.55 To contribute to the objective, the subprogramme will:

- (a) Provide financial services, including diversified loan products, covering businesses, consumption and housing needs, to low-income Palestine refugees, women and young people through a network of microfinance branches;
- (b) Create employment opportunities for Palestine refugees through infrastructure and construction interventions in camps;
- (c) Provide quality and market-relevant technical and vocational education and training at UNRWA vocational training centres and education science facilities for degree-level teacher education in the West Bank, including East Jerusalem, and Jordan, focusing on vulnerable young people, including those whose families are recipients under the Agency’s social safety net programme;
- (d) Continue its higher education scholarship programme for young Palestine refugees.

- 26.56 The above-mentioned work is expected to result in:
- (a) Improved livelihood capacities of Palestine refugees;
 - (b) Improved income generation and work opportunities for Palestine refugees, especially women and young people, facilitating self-sustainability.

Programme performance in 2023

Quality of Palestine refugee youth employment opportunities improved

- 26.57 Access to higher education is limited for many Palestine refugees because of their difficult socioeconomic situation. This narrows their employment opportunities and chances to improve their living conditions. The subprogramme provides university scholarships each year to young Palestine refugees who excel academically but would otherwise be unable to afford tertiary education. The subprogramme’s scholarships contribute towards the development of a highly skilled workforce. Past university scholarship holders have gone on to hold key positions in UNRWA and host countries, contributing to the social and economic development of the region. Scholarships are awarded for study in a wide range of fields across the sciences, social sciences and liberal arts, as well as for longer-term courses of study, such as engineering and medicine. Awards are granted according to academic merit and socioeconomic status. They are renewed on an annual basis after the satisfactory completion of each year, until students obtain their first university degree.
- 26.58 Progress towards the objective is presented in the performance measure below (see figure 26.XII).

Figure 26.XII
Performance measure: number of students receiving tertiary education scholarships from the Agency who successfully complete their courses (cumulative)

Planned results for 2025

Result 1: employability of Palestine refugees improved

Programme performance in 2023 and target for 2025

- 26.59 The subprogramme’s work contributed to the employability skills of 6,921 refugees being enhanced by camp improvement planning processes, which did not meet the planned target of 7,497 refugees. The target was not met due to the suspension of camp improvement planning in Gaza following the onset of the humanitarian crisis in October 2023.
- 26.60 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 26.XIII).

Figure 26.XIII
Performance measure: number of refugees whose employability skills were enhanced by the camp improvement planning process (cumulative)

Result 2: improved access for Palestine refugees to highly skilled professions

Programme performance in 2023 and target for 2025

- 26.61 The subprogramme’s work contributed to 90 per cent of Education Science Faculty and Faculty of Educational Sciences and Arts graduates employed or continuing their studies within one year of graduation, which met the planned target.
- 26.62 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 26.XIV).

Figure 26.XIV
Performance measure: percentage of Education Science Faculty and Faculty of Educational Sciences and Arts graduates employed or continuing their studies within one year of graduation (annual)

Result 3: private sector employment opportunities created

Proposed programme plan for 2025

- 26.63 Palestine refugees face a number of constraints in building sustainable livelihoods. Despite refugees having strong human capital as a result of the educational and health structures provided by UNRWA and host authorities, the majority do not have access to the full range of assets – social, natural, physical and financial capital – required for sustainable livelihoods. The subprogramme extends credit and complementary financial services to entrepreneurs and small-business owners in all fields of operation, except Lebanon. These services help create and sustain jobs, decrease unemployment, reduce poverty and provide income-generating and asset-building opportunities for Palestine refugees and other poor and marginal groups. Dedicated microfinance loan products, including the

microenterprise credit, microenterprise credit plus, start-your-business loan and Palestine refugee business loan, are extended, aimed at women and youth entrepreneurs, and contribute to their economic empowerment.

Lessons learned and planned change

26.64 The lesson for the subprogramme was the need to constantly adapt lending products to clients’ changing needs in the light of events in recent years that have had a significant impact on the economic climate. In applying the lesson, the subprogramme will institutionalize additional mechanisms to solicit more regular client feedback on the relevancy of loan products and emerging client needs.

26.65 Expected progress towards the objective is presented in the performance measure below (see figure 26.XV).

Figure 26.XV

Performance measure: number of additional jobs created by microfinance client enterprises (annual)

Deliverables

26.66 Table 26.6 lists all deliverables of the subprogramme.

Table 26.6

Subprogramme 4: deliverables for 2025, by category and subcategory

Category and subcategory

C. Substantive deliverables

Direct service delivery: issuance of microfinance loans valued at approximately \$47 million; approximately 8,000 students enrolled in technical and vocational education and training; some 2,470 job placements created as full-time equivalents.^a

^a Full-time equivalents are the number of full-time equivalent jobs, defined as total hours worked divided by average actual hours worked in full-time jobs.

**Subprogramme 5
Palestine refugees are able to meet their basic human needs of shelter, water and sanitation**

Objective

26.67 The objective, to which this subprogramme contributes, is to ensure that Palestine refugees are able to meet their basic human needs of shelter, water and sanitation.

Strategy

- 26.68 To contribute to the objective, the subprogramme will:
- Provide adequate and safe shelters for Palestine refugees living in camps through the rehabilitation of substandard shelters for the most vulnerable;
 - Provide Palestine refugees living in camps with effective environmental health services, including equitable and sufficient water for their basic needs, storm water drainage systems, solid waste collection and sewerage systems.
- 26.69 The above-mentioned work is expected to result in:
- Improved living conditions whereby Palestine refugees and their families can live in dignity in an adequate and safe built environment in camps;
 - Improved environmental health and infrastructure services, including access to safe drinking water, sanitation, drainage, electricity and waste disposal, for Palestine refugees living in camps.

Programme performance in 2023

Environmental health in Palestine refugee camps improved

- 26.70 The density of housing and severe levels of overcrowding in many Palestine refugee camps have increased the amount of solid waste, insufficient disposal of which can create unsanitary conditions. In turn, these conditions can lead to outbreaks of vector-borne diseases. Although responsibility for the provision of public services in camps resides with host authorities, the subprogramme supports Palestine refugee access to basic sanitation through solid waste management services, including street cleaning and the collection and disposal of household waste. Collected waste is disposed of in municipal landfill sites. In addition to the collection and disposal of waste, the subprogramme also conducts regular campaigns in camps to promote waste reduction, reuse and recycling.
- 26.71 Progress towards the objective is presented in the performance measure below (see figure 26.XVI).

Figure 26.XVI

Performance measure: percentage of solid waste collected and disposed of on a regular basis (annual)

(Percentage)

Planned results for 2025

Result 1: sanitation in Palestine refugee camps enhanced

Programme performance in 2023 and target for 2025

- 26.72 The subprogramme's work contributed to 94.6 percent of shelters in camps being connected to official sewerage networks, which met the planned target.

26.73 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 26.XVII).

Figure 26.XVII

Performance measure: percentage of shelters in camps connected to official sewerage networks (cumulative)

Result 2: living conditions of camp residents improved

Programme performance in 2023 and target for 2025

26.74 The subprogramme’s work contributed to 283,215 refugees benefiting from the implementation of camp improvement plans, which exceeded the planned target of 245,054 refugees.

26.75 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 26.XVIII).

Figure 26.XVIII

Performance measure: number of refugees benefiting from the implementation of camp improvement plans (cumulative)

Result 3: safety and dignity of Palestine refugees living in camps improved

Proposed programme plan for 2025

26.76 Over several decades, the 58 official Palestine refugee camps in Gaza, Jordan, Lebanon, the Syrian Arab Republic and the West Bank, including East Jerusalem, have transformed from temporary “tent cities” into hypercongested masses of multistorey buildings marked by high concentrations of poverty and extreme overcrowding. Adequate housing is fundamental to the human dignity, health and psychosocial well-being of Palestine refugees, yet, in many camps, shelters contain asbestos roofing and are poorly ventilated, damp, overcrowded and unsuitable for persons with disabilities. The subprogramme assesses

and rehabilitates substandard shelters in Palestine refugee camps, on the basis of an assessment process that evaluates applicants’ socioeconomic conditions and physical safety, and the environmental health of the structures they inhabit. To maximize beneficiary ownership of works undertaken and to reduce costs, the subprogramme promotes a self-help approach through which families are engaged in the rehabilitation of their own homes, under the technical supervision of UNRWA engineers.

Lessons learned and planned change

- 26.77 The lesson for the subprogramme was that the criteria employed to prioritize shelter rehabilitation applications need to be redefined in the light of the increasing number of vulnerable and poor families whose substandard shelters need rehabilitation. In applying the lesson, the subprogramme will revise the assessment criteria it uses to determine the prioritization of works to give top priority to shelters that are structurally unsafe and hazardous. All registered Palestine refugees living in substandard shelters will remain eligible to submit applications for UNRWA shelter rehabilitation.
- 26.78 Expected progress towards the objective is presented in the performance measure below (see figure 26.XIX).

Figure 26.XIX

Performance measure: percentage of substandard shelters repaired or reconstructed (cumulative)

Deliverables

- 26.79 Table 26.7 lists all deliverables of the subprogramme.

C. Substantive deliverables

Direct service delivery: rehabilitation of 500 substandard shelters for Palestine refugees residing in camps.

Subprogramme 6

The most vulnerable Palestine refugees have access to effective social assistance

Objective

- 26.80 The objective, to which this subprogramme contributes, is to ensure that the most vulnerable Palestine refugees have access to effective social assistance.

Strategy

- 26.81 To contribute to the objective, the subprogramme will:
- (a) Distribute cash-based and in-kind social transfers to the most vulnerable Palestine refugees, at risk of poverty and food insecurity;
 - (b) Provide preferential access to vocational training opportunities and subsidization of secondary and tertiary health-care costs to Palestine refugees in need, including households headed by women, older persons and persons with disabilities.
- 26.82 The above-mentioned work is expected to result in the alleviation of poverty and food insecurity among the most vulnerable Palestine refugees in the face of economic hardship and restricted household income.

Programme performance in 2023

Access for the most vulnerable to employment opportunities

- 26.83 Across UNRWA fields of operation, there exists a range of structural barriers that inhibit the integration of Palestine refugees into labour markets, leading to high unemployment rates and the predominance of employment in low-paying and/or low-skilled informal jobs. These conditions, in turn, leave many Palestine refugees trapped in an inescapable cycle of poverty. The subprogramme provides Palestine refugee youth with technical and vocational education and training to ensure that they have the necessary skills and knowledge to find decent work. Through eight vocational training centres, the subprogramme provides a range of courses, including: (a) one- and two-year trade (vocational) courses for students who have completed preparatory education; and (b) two-year semi-professional courses for students who have completed secondary education. As well as offering a range of specializations in response to local market needs, such programming also equips students with soft skills and provides career guidance and placements to enhance their employability. The most vulnerable Palestine refugees are prioritized for admission.
- 26.84 Progress towards the objective is presented in the performance measure below (see figure 26.XX).

Figure 26.XX

Performance measure: number of social safety net programme students graduating from technical and vocational education and training courses (cumulative)

Planned result for 2025

Result 1: abject poverty and food insecurity among the most vulnerable Palestine refugees mitigated

Programme performance in 2023 and target for 2025

- 26.85 The subprogramme's work contributed to 333,328 vulnerable Palestine refugees, including 144,280 refugees in Lebanon, receiving social transfers and supplementary cash assistance, which exceeded the planned target of 325,143 vulnerable Palestine refugees who received social transfers, including 134,700 vulnerable Palestine refugees in Lebanon who received supplementary cash assistance.
- 26.86 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 26.XXI).

Figure 26.XXI

Performance measure: number of vulnerable Palestine refugees who received social transfers and supplementary cash assistance (annual)

Result 2: access to affordable hospital care ensured

Proposed programme plan for 2025

- 26.87 In the West Bank, including East Jerusalem, and Jordan, Palestine refugees have access to effective host government hospitalization care. In some fields of operation, such as Lebanon and the Syrian Arab Republic, hospitalization care is prohibitively expensive, leaving the most vulnerable with a choice of either incurring significant personal debt or deferring potentially life-saving treatment. The subprogramme provides access to hospital care at heavily subsidized rates in governmental, private and non-governmental organization hospitals for the most vulnerable Palestine refugees. In 2023, the Agency supported over 49,000 hospital admissions.

Lessons learned and planned change

- 26.88 The lesson for the subprogramme was that it needed to control costs incurred by the Agency in the light of an increasing number of vulnerable Palestine refugees and high inflation rates in all fields of operation. In applying the lesson, the subprogramme will finalize the roll-out of the hospitalization management system, which will allow for better monitoring and analysis of hospitalization data and facilitate timely corrective action, where necessary, to contain expenditure.

26.89 Expected progress towards the objective is presented in the performance measure below (see figure 26.XXII).

Figure 26.XXII

Performance measure: number of the most vulnerable Palestine refugees receiving subsidized hospital care (annual)

Deliverables

26.92 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 26.12 to 26.14 and figure 26.XXIII.

26.93 As shown in tables 26.12 (1) and 26.13 (1), the overall resources proposed for 2025 amount to \$73,928,800 before recosting, reflecting a net increase of \$2,385,800 (or 3.3 per cent) compared with the approved budget for 2024. Resource changes result from other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

26.94 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), UNRWA is integrating environmental management practices into its operations. In 2023, work commenced on the implementation of an environmental sustainability policy that articulates the Agency’s commitment in this area and outlines overarching principles that guide the mainstreaming of such considerations into all UNRWA interventions. The policy aligns the Agency’s environmental sustainability efforts with the goals of the 2030 Agenda, United Nations development system reforms and international agreements on climate change and environmental protection and is anchored in the UNRWA strategic plan for 2023-2028, which posits environmental sustainability as a cross-cutting Agency priority. The policy is complemented by: (a) an environmental and social management framework which mandates the incorporation of environmental and social sustainability principles into all UNRWA construction, rehabilitation and camp improvement works; (b) practical measures to reduce the Agency’s environmental footprint, including, for example, the retrofitting of UNRWA installations with energy-efficient lighting, the introduction of electric and hybrid vehicles in its fleet, the expanded use of local recycling solutions and the launch of an initiative to phase out single-use plastics in Agency premises; and (c) ongoing negotiations with donor partners to expand decarbonization of the Agency’s electricity supply through the installation of solar energy systems.

Explanation of variances by factor, component and subprogramme

Overall resource changes

Other changes

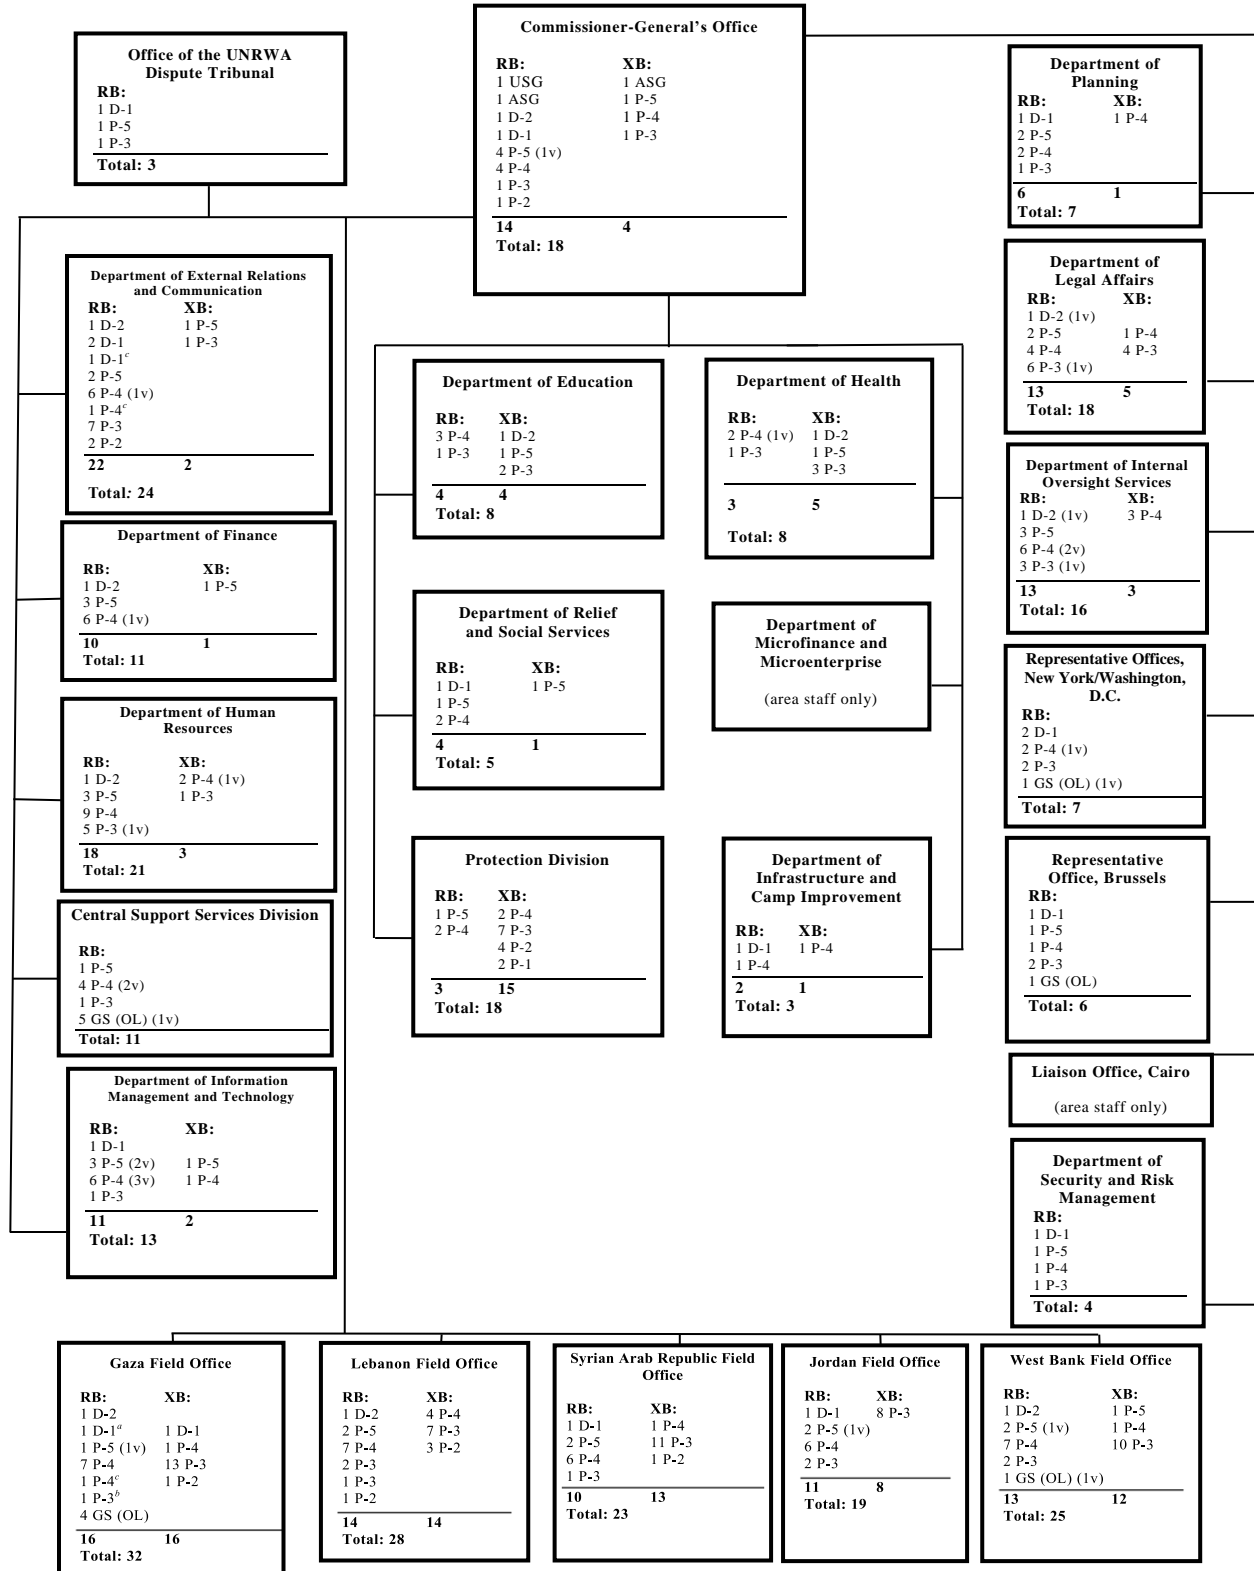

- 26.95 As shown in table 26.12 (1), resource changes reflect an increase of \$2,385,800, as follows:
- (a) An increase of \$185,800 under post relates to the strengthening of the management of the Agency's operations in Gaza, as follows: (i) the proposed establishment of one additional post at the P-4 level in the Gaza Field Office; (ii) the proposed upward reclassification of the post of Deputy Director of Operations in the Gaza Field Office from the P-5 to the D-1 level; and (iii) the proposed redeployment of a P-3 post from Amman to the Gaza Field Office. Additional information is provided in annex II;
 - (b) An increase of \$2,200,000 in non-post, under grants and contributions, is proposed to support the Agency's increased expenses for operational costs related to executive and administrative management functions. The proposed additional resources would be used for: (i) repairs of structural damages to buildings used by the executive management and administrative staff resulting from the conflict in Gaza; (ii) initial activities and configuration (including licensing and subscription, business process re-engineering, data cleansing and data warehousing) of the new enterprise resource planning solution selected to replace the solution currently in use at the Agency, which will no longer be technically supported beyond 2026; and (iii) strengthening information and communications technology security to ensure protection from increased cyberthreats resulting from the conflict in Gaza.

Extrabudgetary resources

- 26.96 As reflected in tables 26.12 (2), extrabudgetary resources amount to \$997,477,700 and would be used mainly to provide for continued humanitarian support and aid to Palestine refugees.
- 26.97 The extrabudgetary resources under the present section are subject to the oversight of the Commissioner-General of UNRWA, who is advised and assisted by an Advisory Commission and who has delegated authority from the Secretary-General.

Annex I

Organizational structure and post distribution for 2025

Note: Regular budget – 223 approved international positions. Extrabudgetary – 110 extrabudgetary international posts that are funded through extrabudgetary resources.

Abbreviations: ASG, Assistant Secretary-General; GS (OL), General Service (Other level); RB, regular budget; USG, Under-Secretary-General; v, vacant; XB, extrabudgetary resources.

^a Post reclassification.

^b Post redeployment.

^c New post.

Annex II

Summary of proposed post changes, by component and subprogramme

<i>Action</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Reclassification		+ D-1 - P-5	Deputy Director of Operations, Gaza Field Office	The Gaza Field Office is the largest field of operations of the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA), with 290,000 children in UNRWA schools, over 1 million medical consultations in 22 health centres per quarter and food assistance for over 1 million Palestine refugees. The scope of programmatic responsibility of the post encompasses all fields of UNRWA programmes, including education, health, relief and social services, infrastructure and camp improvement, as well as microfinance. In view of the increased level of emergency and humanitarian operations in Gaza, which the Agency expects to continue for years to come owing to the extent of the crisis, it is proposed to upgrade the post of Deputy Director of Operations from the P-5 to the D-1 level. Such a heightened level of humanitarian operations requires oversight of the involvement of many of the Agency's programmes and operational units, as well as cooperation with other agencies, funds and programmes, including the World Food Programme, the World Health Organization, the United Nations Development Programme and the United Nations Office for Project Services. In addition, the incumbent will be responsible for providing support and advice to the Director of the Gaza Field Office in implementing the Agency's plan for comprehensive programme and management reform.
Establishment	1	P-4	Procurement Officer, Gaza Field Office	The nature of the current humanitarian operations, as well as the recovery and reconstruction efforts needed once the conflict abates, would require the Gaza Field Office to have a dedicated Procurement Officer to lead on procurement planning, both local and, if required, international procurement, contract management and contract administration of items procured to support UNRWA beneficiaries in Gaza. Such items include food, medicines and non-food items such as construction materials and supplies, as well as services. The procurement and logistics duties in the Gaza Field Office are currently combined under one function, but owing to the magnitude of work required given the current emergency and humanitarian response and eventual recovery, the post would be needed to oversee all procurement activities assigned to the Field Office and to ensure compliance with Agency-wide procurement standards and procedures.

Section 26 **Palestine refugees**

<i>Action</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Redeployment (geographical)	1	P-3	Data Analyst from Amman to the Gaza Field Office	An assessment of the entire security workforce concerning information and communications technology security threats across the Agency has determined that there is a significant gap in security at the Gaza Field Office as a result of the ongoing conflict in Gaza. It is therefore proposed to redeploy a post of Data Analyst from Amman to Gaza in support of UNRWA operations carried out by the Gaza Field Office.

I. Office for the Coordination of Humanitarian Affairs

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 27.1 The mandate is derived from the priorities established in relevant General Assembly resolutions and decisions, including resolution [46/182](#), in which the Assembly set out the guiding principles of humanitarian response and affirmed the leadership role of the Secretary-General to ensure better preparation and effective response to natural disasters and complex emergencies. This mandate has been confirmed and consolidated through the normative developments of various resolutions over the past 33 years. The Office for the Coordination of Humanitarian Affairs is responsible for ensuring the timely, coherent, coordinated and principled response of the international community to natural disasters and complex emergencies and for facilitating the transition from emergency relief to rehabilitation and sustainable development. With 299 million people in need of humanitarian assistance in 2024 and extreme poverty and hunger on the rise, owing to the compounded effects of emerging and prolonged armed conflicts and the crisis of climate change, ensuring well-coordinated and principled humanitarian assistance by the international community remains as important as ever.

Strategy and external factors for 2025

- 27.2 In 2023, several compounding shocks created a further rise in vulnerability worldwide, with 333 million people experiencing food insecurity, the largest world food crisis in modern history. In addition, forced displacement continued to increase, with 114 million people, or 1.4 per cent of the global population, displaced. Armed conflicts continued to take a heavy toll on civilians, and the crisis of climate change exacerbated humanitarian needs.
- 27.3 In the face of these challenges, the Office will continue to enhance the coordination and effective and efficient delivery of humanitarian assistance, together with humanitarian organizations. The Office will continue to develop and promote a common policy on humanitarian issues for the United Nations system and its partners; coordinate response to humanitarian emergencies; mobilize United Nations capacity to expedite the provision of humanitarian assistance; strengthen anticipatory approaches and early warning early action systems; advocate and contribute to better preparedness for more timely humanitarian assistance in emergencies; advocate on humanitarian issues; and strengthen the analysis and availability of timely information on emergencies and natural disasters, in accordance with its mandate. The Office will also support the mobilization of resources to enable a timely and effective response to new or rapidly deteriorating humanitarian emergencies.
- 27.4 With regard to cooperation with other entities at the global, regional, national and local levels, the Office will continue to work with national and local governments, affected communities and other stakeholders, including regional disaster management and response organizations, other regional and subregional organizations, private sector actors and first responders to promote principled, timely and effective humanitarian responses.
- 27.5 With regard to inter-agency coordination and liaison, the Office will continue, through the Inter-Agency Standing Committee and its subsidiary bodies, to coordinate the development of guidance for the humanitarian system, including on operations policy development and advocacy and supporting implementation of the Secretary-General's action agenda on internal displacement. The Office will provide and manage global platforms, such as the United Nations Disaster Assessment and Coordination Team mechanism and the International Search and Rescue Advisory Group, to pool resources and facilitate a coordinated response to humanitarian crises. The Office will also collaborate closely with the Development Coordination Office and United Nations

agencies, funds and programmes, at both the Headquarters and country levels throughout the humanitarian programme cycle. This will enable effective and consistent system-wide response strategies that meet the humanitarian needs of people in vulnerable situations and minimize the duplication and gaps in response efforts. The Office's country, regional and liaison offices are strategically located to work with governments and assist in humanitarian preparedness and response.

- 27.6 With regard to the external factors, the overall plan for 2025 is based on the following planning assumptions:
- (a) Natural disasters will continue to increase in frequency and magnitude, owing, among others, to the adverse effects of the crisis of climate change;
 - (b) The impact of the global economic contraction, compounded by the impacts of natural disasters and armed conflicts, will continue to be felt and will increase the vulnerability of people;
 - (c) Humanitarian needs and funding requirements will remain relatively high.
- 27.7 The Office integrates a gender perspective into its operational activities, deliverables and results, as appropriate. In 2025, the Office will strive to address protection issues, including violence affecting women and girls, through its advocacy, resource mobilization and programming. Women's participation and leadership in humanitarian decision-making will also remain a key priority.
- 27.8 The Office advances United Nations system-wide commitments on protection from sexual exploitation and abuse and sexual harassment. The Under-Secretary-General for Humanitarian Affairs and Emergency Relief Coordinator, as Chair of the Inter-Agency Standing Committee, leads and promotes Committee efforts that are aimed at ensuring that people caught up in crises feel safe and respected and can gain access to the protection and assistance that they need. The Office will promote system-wide commitments to ensure that the affected population and aid workers engaged in the delivery of humanitarian assistance are protected from sexual harassment and abuse.
- 27.9 In line with the United Nations Disability Inclusion Strategy, the Office will work to make humanitarian programming and responses more inclusive of persons with disabilities, in particular by ensuring that their needs are reflected in humanitarian data.

Legislative mandates

- 27.10 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

46/182 ; 76/124 ; 77/28 ; 78/119	Strengthening of the coordination of humanitarian emergency assistance of the United Nations	69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)

Deliverables

27.11 Table 27.1 lists all cross-cutting deliverables of the programme.

Table 27.1

Cross-cutting deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	3	3	3	3
Meetings of:				
1. The Fifth Committee	1	1	1	1
2. The Committee for Programme and Coordination	1	1	1	1
3. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1

Evaluation activities

- 27.12 The following evaluations completed in 2023 have guided the proposed programme plan for 2025.
- (a) Office of Internal Oversight Services evaluation of subprogramme 2;
 - (b) Inter-agency evaluation of the coronavirus disease (COVID-19) humanitarian response, conducted by the Office.
- 27.13 In response to the results of the evaluations referenced above, the Office will focus on strengthening the quality and effectiveness of humanitarian responses, including the engagement with affected communities in the planning and implementation of humanitarian assistance, enhancements to the participation and

capacity-building of local organizations, and collaboration between humanitarian and development efforts. The Office is also in the process of simplifying the humanitarian programme cycle, with a view to effectively using resources and allowing for the testing of people-centred coordination models.

- 27.14 The following evaluations are planned for 2025:
- (a) An inter-agency, joint evaluation of the humanitarian system-wide scale-up activations;
 - (b) Office of Internal Oversight Services evaluation of one of the Office's subprogrammes.

Programme of work

Subprogramme 1 Policy and analysis

Objective

- 27.15 The objective, to which this subprogramme contributes, is to improve the strategic and operational coherence of humanitarian response.

Strategy

- 27.16 To contribute to the objective, the subprogramme will:
- (a) Identify emerging humanitarian trends to support the comprehensive, authoritative and evidence-based assessment of global humanitarian needs and analyse challenges and opportunities for humanitarian policy and programme development;
 - (b) Identify policy and programmatic solutions, best practices and innovative and emerging technologies to be applied in the humanitarian field and take steps to increase the preparedness and operational readiness of national disaster managers and humanitarian organizations.
- 27.17 The above-mentioned work is expected to result in:
- (a) Humanitarian assistance that addresses evolving challenges and reduces the gap between humanitarian needs and response capacity;
 - (b) A humanitarian system that remains relevant and adapts to the ever-changing operational environment;
 - (c) Humanitarian actors applying innovative solutions in humanitarian operations.

Programme performance in 2023

A total of 82 countries and 43 organizations make political declaration on climate, relief, recovery and peace at the twenty-eighth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change

- 27.18 The subprogramme helped to advance humanitarian priorities at the twenty-eighth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change by advocating for increased financing for building the resilience of the most vulnerable. Throughout the conference, the subprogramme advanced humanitarian perspectives on the adverse effects of climate change on advocacy, financing and humanitarian operations. The political declaration on climate, relief, recovery and peace made by 82 Governments and 43 organizations at the session marked the first instance in which a United Nations climate conference recognized the need to build climate resilience in highly vulnerable countries, in particular those threatened or affected by armed conflict or facing severe humanitarian needs.
- 27.19 Progress towards the objective is presented in the performance measure below (see table 27.2).

Table 27.2
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	–	<p>82 countries and 43 organizations make political declaration on climate, relief, recovery and peace at the twenty-eighth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change</p> <p>The declaration marked the first instance in which a United Nations climate conference recognized the need to build climate resilience in vulnerable countries facing severe humanitarian needs</p>

Planned results for 2025

Result 1: strengthened humanitarian assistance to address the growing impacts of the adverse effects of climate change

Programme performance in 2023 and target for 2025

- 27.20 The subprogramme’s work contributed to the formulation of a draft road map on humanitarian assistance in disasters relating to climate change and to the operationalization of the loss and damage fund, which met the planned target.
- 27.21 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 27.3).

Table 27.3
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Increased awareness by stakeholders of the growing crisis of climate change and its impact on the humanitarian crisis	Policies and strategies were developed by various stakeholders to adapt humanitarian action to the growing urgency of the crisis of climate change, for example, the call by the Inter-Agency Standing Committee for increased investment in building resilience and adaptation for the most vulnerable and worst affected, and concrete action and increased finance to avert, minimize and address losses and damages	<p>Road map for adapting humanitarian assistance to climate change developed</p> <p>Operationalization of loss and damage fund</p>	Humanitarian policies and strategies in 4 specific country contexts that contribute to community resilience, including resilience to adverse effects of climate change	Humanitarian policies and strategies in 7 specific country contexts that contribute to community resilience, including resilience to adverse effects of climate change

Result 2: addressing emerging risks in the humanitarian operating environment

Programme performance in 2023 and target for 2025

- 27.22 The subprogramme’s work contributed to the identification of gaps in the protection of the humanitarian system against risks associated with the use of information and communications technology (ICT) and the availability of operational guidance on data responsibility in humanitarian action, which covers principles and recommended action to ensure the safe, ethical and effective management of personal and non-personal data at all levels of the humanitarian system, which met the planned target.
- 27.23 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 27.4).

Table 27.4
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Increased availability of information and use of strategic technologies by humanitarian actors	Member States and the humanitarian community discuss risks associated with the use of ICT	Gaps identified in the protection of the humanitarian operating environment against risks associated with the use of ICT Operational guidance on data responsibility in humanitarian action available to humanitarian community	Humanitarian community begins to develop collective solutions to address gaps in the protection of the humanitarian operating environment against risks associated with the use of ICT	Humanitarian community begins to implement collective solutions to address gaps in the protecting the humanitarian operating environment against risks associated with the use of ICT

Result 3: increased engagement of communities in humanitarian response to effectively address their needs

- 27.24 Humanitarian emergencies are becoming more frequent, complex and protracted. At the same time, the humanitarian operating environment is becoming more resource-constrained, uncertain and complex.

Lessons learned and planned change

- 27.25 The lesson for the subprogramme, in the present environment, was the need to maximize the effectiveness and efficiency of humanitarian response and coordination activities, in particular by engaging with and facilitating the participation of the affected communities and local actors. In applying the lesson, the subprogramme will implement a pilot initiative to promote more holistic, people-centred and community-driven humanitarian responses, through systematic engagement with national and local authorities and communities, to localize humanitarian decision-making, identify financing at local levels, empower local partners and place the resilience of communities at the centre of humanitarian programming.
- 27.26 Expected progress towards the objective is presented in the performance measure below (see table 27.5).

Table 27.5
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Stakeholders in the humanitarian system, including governments, partners and communities in four countries (Colombia, the Niger, the Philippines, and South Sudan), commence pilot initiative for community-centric coordination and response structures	Increased active listening approaches adopted in pilot countries	Increased community participation and local actors' engagement in the design and implementation of humanitarian coordination and response structures, including financing, with a view to assessing practices for further scaling and replicating for other contexts

Deliverables

Subprogramme 2 Coordination of humanitarian action and emergency response

Objective

- 27.28 The objective, to which this subprogramme contributes, is to ensure a coherent, effective and timely humanitarian response to reduce and alleviate human suffering in natural disasters and complex emergencies.

Strategy

- 27.29 To contribute to the objective, the subprogramme will:
- (a) Maintain an effective coordination system to convene humanitarian actors and support senior humanitarian leadership at the global level and in countries affected by natural disasters and complex emergencies, by coordinating timely and objective multisectoral assessments and analyses of humanitarian needs; supporting response planning; and programming and monitoring the provision of assistance to people in need during and in the aftermath of emergencies;
 - (b) Promote the delivery of principled humanitarian assistance and coordinate resource mobilization efforts to reduce funding gaps that hamper humanitarian operations, including through effective partnerships with humanitarian actors, Member States, regional organizations and civil society, and the effective management and disbursement of funding from humanitarian pooled funds;
 - (c) Increase the use of anticipatory approaches and early warning early action systems to prevent and reduce human suffering, especially to disasters relating to the crisis of climate change;
 - (d) Strengthen links between humanitarian assistance and efforts to support resilience, early recovery and development to reduce the needs and vulnerabilities of affected people, ensuring that sex-, age- and disability-oriented data are taken into account in all aspects of the response.
- 27.30 The above-mentioned work is expected to result in:
- (a) Improved prioritization of humanitarian needs, based on informed and timely decision-making by humanitarian actors;
 - (b) Reduced duplication of response interventions and reduced gaps in humanitarian response;
 - (c) An adequately funded international humanitarian system, to respond to increasingly frequent natural disasters and complex emergencies.

Programme performance in 2023

Reaching people in need in increasingly challenging humanitarian contexts

27.31 The subprogramme helped humanitarian partners in Member States to organize responses through 27 country humanitarian response plans and 9 regional plans, on the basis of a common understanding of the specific humanitarian contexts, which enabled collective and coordinated responses. Of all the people targeted by plans at the country level, humanitarian partners reached 128 million people with at least one form of assistance. Critical assistance was delivered to reduce food insecurity and avoid an escalation to famine; 119.5 million people received food, cash and voucher assistance. Feedback mechanisms were used by 19 million people, who shared their concerns, questions and complaints, ensuring that the voices of people in need and affected communities were heard within humanitarian planning and response. Effective collaboration between humanitarians and private sector actors continued: those actors supported humanitarian response in at least 15 crises in 2023, reaching more than 7.8 million people. However, 2023 was the first year since 2010 when humanitarian funding declined compared with the previous year. If this trend continues, this will have the potential to further limit the reach of humanitarian response.

27.32 Progress towards the objective is presented in the performance measure below (see figure 27.I).

Figure 27.I

Performance measure: number of people receiving at least one form of humanitarian assistance, and number of humanitarian response plans (annual)

Planned results for 2025

Result 1: increased use of anticipatory approaches and early warning early action systems

Programme performance in 2023 and target for 2025

27.33 The subprogramme's work contributed to an expansion of the scope of the anticipatory approaches in 10 countries based on lessons learned from disasters relating to climate change and the piloting of anticipatory approaches for cholera in the Democratic Republic of the Congo, which met the planned target.

27.34 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 27.7).

Table 27.7
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Central Emergency Response Fund-supported early action is reviewed, and lessons learned for anticipatory approaches	Increased use of anticipatory approaches by Member States, for floods in Bangladesh, Chad, Nepal and South Sudan, as well as for droughts in Burkina Faso, Ethiopia, the Niger and Somalia	Increased use of anticipatory approaches by Member States, for disasters relating to climate change in Bangladesh, El Salvador, Fiji, Guatemala, Honduras, Nicaragua, the Niger, the Philippines and Yemen, and for cholera in the Democratic Republic of Congo	Anticipatory approaches are used by humanitarian actors in 15 countries to predict and respond to the humanitarian impact of predictable hazards	Anticipatory approaches are used by humanitarian actors in 18 countries to predict and respond to the humanitarian impact of predictable hazards

Result 2: transforming humanitarian programming to improve the delivery of aid to people in need

Programme performance in 2023 and target for 2025

- 27.35 The subprogramme’s work contributed to the revision of the humanitarian programme cycle, including by integrating a new joint intersectoral analysis framework, which met the planned target.
- 27.36 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 27.8).

Table 27.8
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	Humanitarian programme cycle facilitation package for 2023, with initial tips on flexibility and streamlining narratives available to the humanitarian community	Revised humanitarian programme available to the humanitarian community, including a new joint intersectoral analysis framework and consolidated cross-cutting guidance as elements of the broader humanitarian programme cycle reform	75 per cent of humanitarian country operations report simplified, shorter humanitarian programme cycle processes and improved ability to focus on delivery of humanitarian assistance	85 per cent of humanitarian country operations report simplified, shorter humanitarian programme cycle and improved ability to focus on delivery of humanitarian assistance

Result 3: increased participation of local and national actors in humanitarian coordination mechanisms

Proposed programme plan for 2025

27.37 Crises-affected people, communities and local actors are seeking ways to influence the type of assistance that they receive and how it is provided. The subprogramme will examine how the coordinated planning processes and coordination mechanisms can be further improved to strengthen the participation of local and national actors in humanitarian action.

Lessons learned and planned change

27.38 The lesson for the subprogramme was that, as the humanitarian system continues to adapt to complex challenges, it must respond to the needs and priorities of affected people and support local actors more effectively and efficiently, to enable them to lead responses and reinforce resilience. In applying the lesson, the subprogramme will work with country offices to support the structured and consistent participation of local and national actors in humanitarian coordination mechanisms.

27.39 Expected progress towards the objective is presented in the performance measure below (see figure 27.II).

Figure 27.II

Performance measure: countries with local and national actors participating in humanitarian coordination mechanisms^a

(Percentage)

^a Baseline for 2023 is based on most recent data collected through the annual coordination survey.

Deliverables

27.40 Table 27.9 lists all deliverables of the subprogramme.

Table 27.9

Subprogramme 2: deliverables for the period 2023–2025 by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	4	5	4	4
1. Report to the General Assembly on the Central Emergency Response Fund	1	1	1	1
2. High-level pledging events on the provision of international assistance to countries affected by humanitarian emergencies	3	4	3	3
Substantive services for meetings (number of three-hour meetings)	2	2	2	2
3. High-level meetings and side events of the General Assembly on the provision of international assistance to countries affected by humanitarian emergencies	2	2	2	2
B. Generation and transfer of knowledge				
Seminars, workshops, and training events (number of days)	2	1	–	1
4. Workshops on international humanitarian law and other emerging issues for resident coordinators/humanitarian coordinators	2	1	–	1
C. Substantive deliverables				
Consultation, advice and advocacy: briefings to the Security Council on specific complex emergency situations; informal consultations with more than 50 Member States on specific emergency situations and the financing of humanitarian requirements; consolidated inter-agency appeals for more than 60 countries and regions affected by humanitarian emergencies; consultations with humanitarian organizations in more than 60 countries on operations, policies and coordination arrangements; and consultations with Member States, regional organizations and the private sector on common humanitarian action.				
Databases and substantive digital materials: monitoring mechanisms in support of operational partners (e.g., financial tracking systems).				
D. Communication deliverables				
Outreach programmes, special events and information materials: meetings and special events on specific complex emergency situations; quarterly donor briefings on humanitarian financing; the Central Emergency Response Fund annual report; consolidated annual report on country-based pooled funds; and Global Humanitarian Overview.				
Digital platforms and multimedia content: Central Emergency Response Fund data hub.				
E. Enabling deliverables				
Administration: grant delivery allocations to United Nations humanitarian agencies and the International Organization for Migration from the Central Emergency Response Fund for new and protracted emergencies; allocation of grants from the country-based pool funds; and monitoring the humanitarian relief consignments of the United Nations humanitarian agencies and their implementing partners.				

Subprogramme 3

Emergency support services

Objective

- 27.41 The objective, to which this subprogramme contributes, is to expedite international humanitarian assistance to victims of emergencies and natural disasters.

Strategy

- 27.42 To contribute to the objective, the subprogramme will:
- (a) Provide effective and well-coordinated operational response support to disaster-affected States and continue to coordinate and support humanitarian actors to prepare for, plan, deliver and monitor the humanitarian response through the humanitarian programme cycle;

- (b) Strengthen the capacities of Member State mechanisms for emergency response through the management of various technical response services, including the United Nations Disaster Assessment and Coordination Team mechanism, the International Search and Rescue Advisory Group system, the environmental emergency response mechanism of the Joint Environment Unit of the United Nations Environment Programme and the Office for the Coordination of Humanitarian Affairs, as well as through the provision of training, guidance and technical support, including a continued focus on effective facilitation and functioning of inter-cluster coordination groups and their associated subgroups, and on the role and capacity of local responders;
- (c) Promote collaboration with various partner organizations, including the private sector, through the Connecting Business initiative, which is managed jointly by the Office and the United Nations Development Programme, and United Nations humanitarian civil-military coordination and humanitarian negotiation services; and by continuing to conduct courses and training sessions and meeting regularly with partners through focal points in regional and country offices;
- (d) Standardize and improve operational procedures for international urban search and rescue teams through the International Search and Rescue Advisory Group and activate and coordinate rapid response coordination platforms, such as the virtual On-Site Operations Coordination Centre and the Global Disaster Alert and Response Coordination System, as well as provide near real-time alerts on natural disasters around the world and tools to facilitate response coordination.

27.43 The above-mentioned work is expected to result in:

- (a) Enhanced response capacity of local, regional and international responders for natural disasters;
- (b) More efficient and timely mobilization and deployment of emergency response services;
- (c) Improved effectiveness and prioritization of preparedness and response of the national emergency management authorities in disaster-prone countries, ensuring that assistance and protection reach the people who need it most;
- (d) More effective operational engagement by humanitarian organizations with both local and international private sectors before, during and after emergencies. This will ensure that private sector contributions are well coordinated and recognized and that humanitarian interventions contribute to longer-term development goals.

Programme performance in 2023

Member States are enabled to provide rapid response to sudden-onset and complex emergencies

- 27.44 In 2023, the subprogramme responded to sudden-onset and complex emergencies and supported emergency preparedness in nine countries: Cabo Verde, Chile, Ghana, Libya, Morocco, Peru, the Syrian Arab Republic, Türkiye and Zambia, through the utilization of its United Nations Disaster Assessment and Coordination teams and systems.
- 27.45 Following the devastating earthquakes in Türkiye in February 2023, the United Nations Disaster Assessment and Coordination system promptly deployed a team of more than 100 experts to provide support to the Government and the United Nations system. This has been the largest United Nations Disaster Assessment and Coordination deployment to date. The International Search and Rescue Advisory Group coordinated its largest search and rescue mission to date, mobilizing 87 per cent of the Group's classified teams globally, to respond to the earthquakes in the Syrian Arab Republic and Türkiye. The deployment, comprising more than 12,000 responders from 90 countries resulted in the rescue of more than 300 people.
- 27.46 In addition, at the request of the affected Government for assistance, the United Nations Environment Programme and Joint Environment Unit responded to environmental emergencies arising from sudden-onset and complex emergencies, including in the Democratic Republic of the Congo, Mauritius and Ukraine.

27.47 Progress towards the objective is presented in the performance measure below (see figure 27.III).

Figure 27.III

Performance measure: United Nations Disaster Assessment and Coordination teams mobilized and dispatched to the affected country within 48 hours of receiving a request for international assistance (annual)

(Percentage)

Planned results for 2025

Result 1: crisis-affected people received emergency humanitarian assistance in the immediate aftermath of a catastrophe

Programme performance in 2023 and target for 2025

27.48 The subprogramme’s work contributed to 438 emergency responders equipped with the skills and capacity to deploy and respond to sudden-onset emergencies, which exceeded the planned target of 110 emergency responders.

27.49 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 27.IV).

Figure 27.IV

Performance measure: number of emergency responders trained in United Nations Disaster Assessment and Coordination Team and United Nations humanitarian civil-military Coordination, to deploy and respond to sudden-onset emergencies (annual)

Result 2: engagement of all actors to improve access for the most vulnerable to humanitarian assistance and protection

Programme performance in 2023 and target for 2025

- 27.50 The subprogramme's work contributed to improved access for the most vulnerable to humanitarian assistance and protection through engagement and negotiation with relevant actors and stakeholders to help to ease access constraints in six contexts, which exceeded the planned target of five contexts.
- 27.51 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 27.V).

Figure 27.V

Performance measure: number of contexts in which interlocutors with influence on humanitarian access engage in diplomacy and negotiations (annual)

Result 3: enhanced partnership with the private sector in collective humanitarian action

Proposed programme plan for 2025

- 27.52 As the world continues to see more severe and frequent disasters, the crucial role that the private sector plays in disaster management has become more apparent. The Connecting Business initiative engages the private sector strategically before, during and after emergencies, increasing the scale and effectiveness of the response and recovery in a coordinated manner. Since the initiative's launch at the World Humanitarian Summit in May 2016, its member networks have responded to 132 crises, mobilized \$91 million and assisted more than 23 million people in need.

Lessons learned and planned change

- 27.53 The lesson for the subprogramme was that a global network of private sector humanitarian partners was more effectively established and administered by staff based in the applicable regions rather than centrally, given that the development of relationships to support public-private collaboration often depended on local knowledge. In applying the lesson, the subprogramme will strengthen the regional offices' capacity to identify new private sector partners, improve local coordination and establish additional local private sector networks.
- 27.54 Expected progress towards the objective is presented in the performance measure below (see figure 27.VI).

Figure 27.VI
Performance measure: number of Connecting Business initiative-supported local private sector networks that respond to crises (cumulative)

Deliverables

27.55 Table 27.10 lists all deliverables of the subprogramme.

Table 27.10

Humanitarian assistance missions (number of missions)	13	31	13	17
4. United Nations humanitarian civil-military coordination support missions	6	21	6	10
5. United Nations Disaster Assessment and Coordination Team missions (subject to occurrence of disasters and at the request of disaster-affected governments or humanitarian country teams)	7	10	7	7
C. Substantive deliverables				
Consultation, advice, and advocacy: diplomacy and engagement with Member States and key stakeholders to facilitate humanitarian access; and advisory services to 70 key stakeholders and Member States on rapid response coordination, including United Nations humanitarian civil-military coordination and integrating environmental considerations into humanitarian response.				
Databases and substantive digital materials: guidance, tools and handbooks on humanitarian coordination response services; electronic tools relating to rapid response and humanitarian coordination; and roster for humanitarian coordinators and operational partners.				
D. Communication deliverables				
Outreach programmes, special events and information materials: annual partnership and outreach events, and special meetings to facilitate collaboration and interoperability among 2,500 stakeholders, including humanitarian responders, governments, donors, military, civil society and the private sector; and guidance materials on emergency response services annually.				
Digital platforms and multimedia content: websites for technical humanitarian response services and private sector contribution trackers.				

Subprogramme 4 Humanitarian emergency information and advocacy

Objective

- 27.56 The objective, to which this subprogramme contributes, is to ensure effective advocacy for humanitarian principles and knowledge-sharing in serving populations affected by disasters and emergencies.

Strategy

- 27.57 To contribute to the objective, the subprogramme will:
- (a) Intensify its efforts to raise public awareness of international humanitarian law through targeted communications, clear and accessible messages and proactive media engagement;
 - (b) Produce and improve its analytical information products, including digital products and services.
- 27.58 The above-mentioned work is expected to result in:
- (a) Increased respect for international humanitarian law to enhance the protection of affected people and improved unhindered access to humanitarian assistance;
 - (b) Improved humanitarian decisions based on more timely and accurate information on humanitarian crises, including intersectoral analysis of the humanitarian situation and its severity and needs.

Programme performance in 2023

Humanitarian actors provide more timely and tailored support to countries in need

- 27.59 In a humanitarian emergency, it is crucial to ensure that the humanitarian community has access to relevant information. This facilitates a comprehensive understanding of the situation and supports informed decision-making, which are essential for effective response efforts. In 2023, the subprogramme completed the transition of the Office's humanitarian coordination platform from HumanitarianResponse.info to ReliefWeb Response, a new specialized digital service launched in 2022 to provide an authoritative source of information in new and existing humanitarian operations. The platform is integrated strongly with existing ReliefWeb services and leverages ReliefWeb content management expertise and technology to ensure that humanitarians can share, find and reuse critical information quickly and efficiently. Humanitarian partners on the ground can upload and moderate content to match the needs of the humanitarian or emergency response in the country. At the end of 2023, the platform contained live operations, with humanitarian actors able to utilize the platform to provide more efficient, responsive and targeted humanitarian assistance.
- 27.60 Progress towards the objective is presented in the performance measure below (see table 27.11).

Table 27.11

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	–	ReliefWeb Response facilitates situational understanding and decision-making, with 18.1 million users in 56 humanitarian operations

Planned results for 2025

Result 1: strengthened disaster risk analysis for humanitarian response

Programme performance in 2023 and target for 2025

- 27.61 The subprogramme's work contributed to 34 countries with strengthened risk analysis capacities for humanitarian response, which did not meet the planned target of 38 countries. The target was not met owing to the time required for assessing and integrating new anticipatory approaches and early warning and early action systems into operations.
- 27.62 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 27.VII).

Figure 27.VII

Performance measure: number of countries with strengthened risk analysis capacities for humanitarian response (cumulative)

Result 2: strengthened advocacy for an adequate response to humanitarian situations

Programme performance in 2023 and target for 2025

- 27.63 The subprogramme's work contributed to strengthening advocacy for adequate response to humanitarian crises, with \$5 billion pledged through high-level pledging conferences on the Horn of Africa, the Sudan and Yemen, which met the planned target.
- 27.64 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 27.12).

Table 27.12

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
\$6 billion pledged through the virtual high-level pledging event for the humanitarian situation in Yemen and the fifth Brussels Conference on Supporting the Future of Syria and the Region	\$9.9 billion pledged through the sixth Brussels Conference on Supporting the Future of Syria and the Region, the Ukraine flash appeal and the high-level pledging conference on Afghanistan	\$5 billion pledged through high-level pledging conferences on the Horn of Africa, the Sudan and Yemen	Pledges enable adequate response to humanitarian situations	Pledges enable adequate response to humanitarian situations

Result 3: reliable network and connectivity services for humanitarian responders

Proposed programme plan for 2025

27.65 Having reliable network and connectivity services is vital for successful humanitarian action. In crisis situations, efficient communication and information exchange are key to assessing needs, coordinating assistance and delivering timely responses. Reliable connectivity ensures that humanitarian workers can maintain contact with one other and with affected communities, gain access to and share critical data, and manage resources effectively. The subprogramme operates in locations classified as hard-to-reach areas. Such areas have difficulties in gaining access to stable and reliable Internet connectivity, as well as personnel to support its ICT infrastructure, and stable power supply.

Lessons learned and planned change

27.66 The lesson for the subprogramme was the importance of identifying suitable approaches for the locations lacking proper ICT infrastructure. The subprogramme evaluated various approaches to ensure adequate connectivity through a pilot programme in emergency contexts. In applying the lesson, the subprogramme will provide tailored and ready-to-deploy kits for connectivity in such locations. This stock is composed of mainly quick-to-deploy kits for Internet access through satellite and solar panel systems for an independent power source. Using solar power or generators will help to ensure connectivity, notwithstanding disruptions in power supply within a country.

27.67 Expected progress towards the objective is presented in the performance measure below (see figure 27.VIII).

Figure 27.VIII

Performance measure: number of quick-to-deploy kits used by humanitarian responders in crises-affected locations (cumulative)

Deliverables

27.68 Table 27.13 lists all deliverables of the subprogramme.

Table 27.13

Subprogramme 4: deliverables for 2025, by category and subcategory

Category and subcategory

C. Substantive deliverables

Advocacy: shared public advocacy with humanitarian partners, including a humanitarian advocacy and communications group to strengthen consistency in messaging.

Databases and substantive digital materials: field guides, maps and other reference information for more than 1,000 humanitarian operational partners; and information management, shared data standards for information exchange in the humanitarian community, databases and electronic tools, including the International Search and Rescue Advisory Group urban search and rescue directory and common risk and vulnerability assessment methodologies and tools.

D. Communication deliverables

Outreach programmes, special events and information materials: information materials on coordination of humanitarian action; and World Humanitarian Day campaign on protection of humanitarian workers.

External and media relations: daily media updates to United Nations accredited correspondents through the noon briefing in New York and twice-weekly Palais des Nations briefings in Geneva; at least 12 on-the-record and background media briefings for global media outlets and two dozen interviews to advocate assistance for people caught in humanitarian crises, to reach decision-making audiences in donor countries and countries with humanitarian situations; and comprehensive communications for the launch of the Global Humanitarian Overview (annual consolidated appeals), in support of the Central Emergency Response Fund, and of pledging conferences for large humanitarian crises.

Digital platforms and multimedia content: humanitarian community digital platforms, such as ReliefWeb, ReliefWeb Response and Humanitarian Data Exchange; guidance and templates on various reporting products for humanitarian organizations and Member States, including situation reports and humanitarian snapshots; and video, social media and other multimedia content on humanitarian issues, international humanitarian law, international human rights law, humanitarian principles, protection of civilians, specific emergency situations and resource mobilization.

E. Enabling deliverables

Information and communications technology: global information and communications technology and product support for collaboration services; and information and communications technology for emergency response and business continuity services, business intelligence and data analysis services.

B. Proposed post and non-post resource requirements for 2025

Overview

- 27.69 Pursuant to paragraph 20 of General Assembly resolution [77/262](#), the Office carried out a spending review as part of its proposed budget exercise for 2025. With the engagement of all programme managers, a review was carried out for each subprogramme and component of the Office, including an in-depth analysis of the most recent post complement and functional profiles and non-post resource requirements and distribution, with a view to determining the optimal level and distribution of resources required to implement the mandates of the Office and to achieve results.
- 27.70 Over the past five years, the Office's continuing¹ regular budget resources (amounting to an annual average of \$14.7 million) represented 5 per cent of the Office's overall budgetary requirements. The remaining 95 per cent was funded from voluntary contributions (amounting to an annual average of \$328.5 million). With regard to posts, the Office has maintained 71 established regular budget-funded posts (1 Under-Secretary-General, 1 Assistant Secretary-General, 3 D-2, 3 D-1, 11 P-5, 16 P-4, 14 P-3, 5 P-2/1, 2 General Service (Principal level) and 15 General Service (Other level)) over the past five years, which, on average, represent 3 per cent of the Office's staffing capacity, with the remaining 97 per cent (an annual average of 2,137 posts) funded from extrabudgetary resources.
- 27.71 The majority of the Office's continuing regular budget resources fall under posts (89 per cent) and non-post resources account for the remaining 11 per cent. A review of the Office's 71 posts, including its current distribution, in which the majority (56 posts) support the Office's programme of work, indicated that the current level and distribution continued to be required. Accordingly, no changes are proposed to the current complement of approved posts for 2024.
- 27.72 With regard to non-post resources, the spending review resulted in a redistribution of resources across various objects of expenditure, under the programme support component, as follows:
- (a) Redeployment of \$30,000 from general operating expenses (\$15,000) and furniture and equipment (\$15,000) to contractual services to cover the costs of upgrading staff skills to enhance the work of the Office in support of Member States. Areas of training would include strengthening awareness on misinformation, disinformation and hate, building modern data and digital expertise to improve data collection, governance and digitally enable solutions, instilling strategic foresight and behavioural science to navigate change and make better choices and decisions, and managing staff health and well-being in stressful work settings. Taking into account prior expenditure experience, resources from general operating expenditure under communications (\$8,000) and miscellaneous services (\$7,000) and furniture and equipment under office automation equipment (\$15,000) would be redeployed to contractual services under training and retraining (\$30,000) to fund the above training activities;
 - (b) Redeployment of \$195,400 from general operating expenditure to contractual services to reflect the posting of expenditure relating to communications under contractual services, which resulted in overexpenditure under contractual services for the past three years.
- 27.73 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 27.14 to 27.16.

¹ Regular budget resources of a continuing nature that are not time-bound. In the context of the Office, the spending review excluded resources to support the Black Sea Initiative, the United Nations Monitoring Mechanism for the Syrian Arab Republic and for Ebola prevention that were time-bound.

27.74 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 27.17 to 27.19 and figure 27.IX.

27.75 As shown in tables 27.17 (1) and 27.18 (1), the overall resources proposed for 2025 amount to \$17,805,000 before recosting, reflecting a net decrease of \$9,330,800 (or 34.4 per cent) compared with the approved budget for 2024. Resource changes result from other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Distribution of proposed resources for 2025 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

27.76 As shown in table 27.17 (1), resource changes reflect a net decrease of \$9,330,800, as follows:

Technical adjustments

- (a) **Executive direction and management (decrease of \$11,084,500).** The proposed decrease reflects:
 - (i) The decrease of \$2,447,000 relating to the removal of all requirements to support the United Nations Monitoring Mechanism for the Syrian Arab Republic, following the non-renewal of the mandate by the Security Council beyond 10 July 2023. The amounts fall under other staff costs (\$2,107,600), travel of staff (\$132,500), contractual services (\$13,800), general operating expenses (\$99,900), supplies and materials (\$31,500) and furniture and equipment (\$61,700);
 - (ii) The decrease of \$8,637,500 relating to the removal of all requirements to support the Black Sea Initiative support office, following the non-renewal of the Initiative beyond 17 July 2023. The amounts fall under other staff costs (\$4,467,700), hospitality (\$3,400), consultants (\$54,100), travel of staff (\$262,400), contractual services (\$132,700), general operating expenses (\$58,900), supplies and materials (\$35,400), furniture and equipment (\$164,400) and grants and contributions (\$3,458,500).

Other changes

- 27.77 (a) **Subprogramme 2, Coordination of humanitarian action and emergency response (increase of \$1,753,700).** The increase of \$1,753,700 relates to requirements for the monitoring of all humanitarian relief consignments of the United Nations humanitarian agencies and their implementing partners to the north-west of the Syrian Arab Republic. The requirements take into account the continued requirements for the monitoring of all humanitarian relief consignments as supported by the General Assembly in its resolution 78/222. The requirements would provide for:

- (i) Other staff costs: the increase of \$1,336,500 would cover the costs of 10 general temporary positions and 3 United Nations Volunteers that would undertake the monitoring of all humanitarian relief consignments of the United Nations humanitarian agencies and their implementing partners to the north-west of the Syrian Arab Republic. The 13 positions include 1 Humanitarian Affairs Officer (P-4), 1 Humanitarian Affairs Liaison Officer (P-4), 1 Humanitarian Affairs Officer (P-3), 2 Associate Humanitarian Affairs (Inspection) Officers (P-2), 1 Senior Liaison Officer (National Professional Officer), 1 Administrative Associate (Local level), 3 Drivers (Local level) and 3 Associate Inspection Officers (International United Nations Volunteer);
- (ii) Travel of staff: the increase of \$198,400 would provide for travel of staff within the region to conduct coordination meetings with the Government of Türkiye, the monitoring of cross-border operations, and consultations with Headquarters and other stakeholders on the implementation of the mandate;
- (iii) Contractual services: the increase of \$37,000 would provide for translation and interpretation services, software licence fees, car rentals, conference event management and public information production costs;
- (iv) General operating expenses: the increase of \$119,300 would provide for communications and information technology services and the rental of furniture and equipment to support the operations;
- (v) Supplies and materials: the increase of \$62,500 would provide for operational equipment supplies, including maps and flags, public information, and stationery and office supplies.

Extrabudgetary resources

- 27.78 As reflected in tables 27.17 (2) and 27.18 (2), extrabudgetary resources (including in-kind) amount to \$360,888,900. The resources would complement regular budget resources and would be used mainly to provide for 2,245 posts (36 D-1, 100 P-5, 290 P-4, 333 P-3, 28 P-2, 664 National Professional Officer, 8 General Service (Principal level), 101 General Service (Other level) and 685 (Local level)) and non-post resources, and would be used mainly to support the coordination and delivery of humanitarian assistance.
- 27.79 The extrabudgetary resources under the present section are subject to the oversight of the Office, which has delegated authority from the Secretary-General.

Executive direction and management

- 27.80 The executive direction and management component of the Office for the Coordination of Humanitarian Affairs comprises the Office of the Under-Secretary-General for Humanitarian Affairs and Emergency Relief Coordinator and the Office of the Assistant Secretary-General and Deputy Emergency Relief Coordinator. The Office of the Under-Secretary-General oversees the Internally Displaced Persons Unit, the Strategic Communication Branch and the climate team. The Office of the Assistant Secretary-General oversees the new planning and performance branch (which includes the activities of the Evaluation and Oversight Section, the People and Culture Section and the Strategic Planning, Performance Monitoring and Risk Management Section), the Policy Branch, the Operations and Advocacy Division, the Coordination Division, the Information Management Branch, the Executive Office, the Gender Unit, the Regional, Field and Disaster Response Adviser offices and the Financing and Partnerships Division.

- 27.81 The overall responsibilities of the executive direction and management component include the following:
- (a) Provide overall direction, management and policy guidance to the offices in New York and Geneva and in the field, including leadership in the coordination of the overall response of the international community to disasters and humanitarian emergencies;
 - (b) Undertake humanitarian diplomacy with Governments of affected countries, including the facilitation of access to emergency areas for the rapid delivery of humanitarian assistance;
 - (c) Provide oversight of the humanitarian coordination leadership in the field, as well as management of the field operations;
 - (d) Lead on the humanitarian finances and resource mobilization functions, manage the emergency services on behalf of the United Nations system and coordinate with Member States, donors and partners;
 - (e) Facilitate the work of the Inter-Agency Standing Committee in relation to policy development and advocacy in the humanitarian sector;
 - (f) Act as the main adviser to the Secretary-General on humanitarian issues and cooperate closely with other United Nations offices in the planning and coordination of United Nations humanitarian assistance activities in crisis situations;
 - (g) Assist the Coordinator of the Executive Committee on Humanitarian Affairs in providing the overall direction, management and supervision of the offices in New York and Geneva, as well as in supporting Office for the Coordination of Humanitarian Affairs coordination in the field;
 - (h) Interact with Member States, intergovernmental organizations, non-governmental organizations and operational humanitarian agencies, as well as departments of the Secretariat whose responsibilities encompass peacekeeping, political and economic activities, to facilitate joint responses, where applicable;
 - (i) Serve as Chair of the Inter-Agency Standing Committee Working Group and act on behalf of the Emergency Relief Coordinator in his/her absence;
 - (j) Provide strategic advice on issues relating to internally displaced persons and engage with relevant partners to drive the implementation of the Secretary General's action agenda on internal displacement, including through membership in the Steering Group on Internal Displacement Solutions and co-chairing of the GP2.0 multi-stakeholder global platform on internal displacement;
 - (k) Manage and coordinate internal evaluations of the Office for the Coordination of Humanitarian Affairs and inter-agency evaluations, provide secretariat services and chair the Inter-agency Humanitarian Evaluation steering group and coordinate external oversight to ensure organization compliance with audits and evaluation recommendations;
 - (l) Coordinate and lead the work of the Office on gender equality in humanitarian action and the response to gender-based violence in emergencies, strengthen capacities and provide technical guidance, support and training on gender, including through the gender community of practice, influence improved gender analysis and support the Office's work on integrating a gender perspective into every stage of the humanitarian programme cycle;
 - (m) Foster a kind and respectful organizational culture, through strategic and meaningful efforts in diversity and inclusion, learning and staff development and welfare;
 - (n) Provide guidance on and oversee the strategic planning and prioritization of activities of the offices at Headquarters and in the field, organizational risk management, business continuity planning and performance monitoring.
- 27.82 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability

information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Office is integrating environmental management practices into its operations. As part of its environmental management system, the Office is developing an environment and climate action strategy, a policy and an information and analysis dashboard. Country-level initiatives include waste management processes that promote recycling, reduction in the use of single-use plastics and continuous guidance to countries on conducting environmental impact assessments in humanitarian action and integrating environmental and climate considerations into programming.

- 27.83 In 2025, the Office will systematically measure and report on environmental performance through the implementation of its environmental management system. The Office will map its programmatic and operational environmental impacts, work to reduce adverse environmental impacts and maintain climate neutrality through a variety of initiatives. Such initiatives include increasing its use of videoconference and remote meeting options, consistently reviewing its vehicle fleet to ensure that replacements are made only if required and moving to shared facilities when safe, practical and in line with the humanitarian principles, in order to reduce its environmental footprint.
- 27.84 Information on the timely submission of documentation and advance booking for air travel is reflected in table 27.20. Managers are asked to implement preventive and corrective measures. Compliance rates are monitored and statistics and trends are distributed to managers on a quarterly basis. In 2025, the Office will continue to implement measures to improve the compliance rate for air tickets, including: (a) advance planning and nomination of travellers; (b) onboarding of staff in advance with contingencies in place (e.g., advance request for visas); and (c) undertaking communication to staff and managers to raise awareness of the requirement. In 2023, the Office continued to submit nearly all its documents within the prescribed timelines.

Table 27.20
Compliance rate
(Percentage)

	2021 actual	2022 actual	2023 actual	2024 planned	2025 planned
Timely submission of documentation	100	100	98	100	100
Air tickets purchased at least two weeks before the commencement of travel	16	21.7	26	100	100

- 27.85 The proposed regular budget resources for 2025 amount to \$2,026,100 and reflect a decrease of \$11,084,500 compared with the approved budget for 2024. The proposed change is explained in paragraph 27.76 (a) above. Additional details on the distribution of the proposed resources for 2025 are reflected in table 27.21 and figure 27.X.

Programme support

- 27.90 The programme support component comprises the Executive Office, the Human Resources Section, the Procurement, Asset Management and Logistics Section, the Legal and Travel Units and the Budget and Finance Section.
- 27.91 The main responsibilities of the programme support component include: (a) overseeing the financial, human resources, procurement of goods and services and general administrative aspects of the Office and providing guidance on administrative matters; (b) supporting senior management in formulating policies and instructions, including financial management, workforce planning and staff rostering; (c) coordinating departmental programme budgets and presentations to legislative bodies; (d) continuing to focus on workforce and succession planning, as well as career and staff development, in line with the human resources strategy and the staff strategy; (e) improving financial monitoring and projections of funding requirements for future budgets, managing and effectively utilizing resources, capturing and sharing field information and ensuring the accurate and timely reporting of financial transactions; and (f) focusing on enhancing the service orientation and client focus of administrative support under programme support.
- 27.92 The proposed regular budget resources for 2025 amount to \$1,818,500 and reflect cost-neutral changes that result from the spending review as explained in paragraph 27.72 above. Additional

details on the distribution of the proposed resources for 2025 are reflected in table 27.26 and figure 27.XV.

II. United Nations Office for Disaster Risk Reduction

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 27.93 The United Nations Office for Disaster Risk Reduction is the focal point in the United Nations system for the coordination of disaster reduction and ensuring synergies among the disaster reduction activities of the United Nations system and regional organizations and activities in socioeconomic and humanitarian fields. It provides a data-driven and people-centred approach to supporting Governments and stakeholders in identifying, reporting on and reducing existing and emerging disaster risks, with the aim of ensuring that no one is left behind in implementing the Sendai Framework for Disaster Risk Reduction 2015–2030. The mandate derives from the priorities established in General Assembly resolutions and decisions, including resolutions [42/169](#), [54/219](#), [56/195](#) and [77/164](#), as well as the Sendai Declaration and the Sendai Framework adopted by the Assembly in its resolution [69/283](#).
- 27.94 The General Assembly, in its resolution [69/283](#), tasked the Office with supporting the implementation, follow-up and review of the Sendai Framework. The Assembly, in its resolution [77/289](#), adopted the political declaration of the high-level meeting on the midterm review of the Sendai Framework for Disaster Risk Reduction 2015–2030, which reaffirmed the importance of effective implementation of the Sendai Framework. The Office's programme plan aligns with the outcomes of the midterm review of the implementation of the Sendai Framework. To implement its mandate, in line with its strategic framework for the period 2022–2025, the Office supports regional, national and local implementation of the Sendai Framework, strengthens global monitoring and analysis of disaster risk, catalyses action for risk reduction and resilience by countries and stakeholders, and promotes effective risk communication, advocacy and knowledge management.

Programme of work

Objective

- 27.95 The objective, to which this programme contributes, is to substantially reduce disaster risk and losses in lives, livelihoods and health and in the economic, physical, social, cultural and environmental assets of persons, businesses, communities and countries.

Strategy and external factors for 2025

- 27.96 To contribute to the objective, the Office will:
- Provide guidance to Member States and stakeholders on implementing the Sendai Framework and accelerating the implementation of disaster risk reduction action through the production and dissemination of knowledge resources and best practices and the provision of capacity development and assistance at the regional, national and local levels;
 - Work closely with Member States and stakeholders to follow up on General Assembly resolution [77/289](#) on the political declaration of the high-level meeting on the midterm review of the Sendai Framework for Disaster Risk Reduction 2015–2030, with a strengthened focus on the four priority areas identified by Member States;

- (c) Provide support to Member States for reporting on the global targets of the Sendai Framework and for the related indicators of the Sustainable Development Goals using the Framework monitoring system;
- (d) Co-lead the Early Warnings for All initiative, together with the World Meteorological Organization, and lead on the planning and implementation of the initiative's pillar 1 focusing on risk knowledge and management, in line with target (g) of the Sendai Framework;
- (e) Support Member States and other development stakeholders in strengthening the integration of climate change and disaster risk reduction into relevant strategies and policies across and within sectors, including by delivering evidence-based advocacy initiatives with clear calls to action to invest in disaster risk reduction and climate change adaptation and raise public awareness on the importance of such initiatives;
- (f) Work with practitioners and experts around the world to strengthen awareness and understanding of existing and emerging disaster risks, including the impacts of climate change, biodiversity loss, environmental degradation and unplanned and rapid urbanization, as well as technological hazards and risks, and assist local and national governments and regional organizations in applying new risk information and analysis in their decision-making;
- (g) Advise Member States in identifying gaps in public spending on disaster risk reduction and ensuring that disaster risk reduction is mainstreamed into public budgeting, financial planning, expenditure, investment and procurement processes in all relevant sectors and at all levels of government, and that integrated national financing frameworks are risk-informed;
- (h) Support Member States in strengthening disaster risk reduction policies and programmes in the least developed countries, landlocked developing countries, small island developing States and in humanitarian contexts, through the provision of focused assistance in overcoming the challenges, constraints and gaps that they continue to face.

27.97 The above-mentioned work is expected to result in:

- (a) Improved management and decision-making at the local, national and regional levels regarding current and future disaster risks through an evidence-based understanding of the multi-hazard risk landscape, enabling risk-informed policies, plans, regulatory frameworks and investment that align with the Sendai Framework and the 2030 Agenda for Sustainable Development;
- (b) Increased accountability for and commitment to implementing the Sendai Framework;
- (c) Multi-sector and inclusive disaster risk reduction interventions that address the needs of the most vulnerable, thereby contributing to leaving no one behind.

27.98 With regard to the external factors, the overall plan for 2025 is based on the following planning assumptions:

- (a) Disasters will continue to increase in frequency and magnitude owing to, among others, the adverse effects of climate change, necessitating the integration of disaster risk reduction and climate action to reduce the impact of disasters;
- (b) Socioeconomic disparities and political tensions have the potential to deepen vulnerabilities of people living in the most disaster-prone countries, necessitating policies, plans, regulatory frameworks and investment decisions based on an accessible and evidence-based understanding of risks;
- (c) The risk of damage and losses from disasters will remain high for the least developed countries, landlocked developing countries and small island developing States, necessitating an increase in early warning coverage and support to adequately prepare for and respond to disasters.

27.99 With regard to cooperation with other entities at the global, regional, national and local levels, the Office will organize the eighth session of the Global Platform for Disaster Risk Reduction, in Switzerland in 2025. The Platform will provide Member States and non-State actors a global forum

for assessing and discussing progress on and challenges in the implementation of the Sendai Framework. It is expected to provide an important platform for taking stock of progress made in implementing the recommendations of the midterm review document.

- 27.100 It is recognized in the Sendai Framework that, while States have the overall responsibility for reducing disaster risk, it is a shared responsibility between Governments and relevant stakeholders. Therefore, cooperation with stakeholders, including science and academia, the media, the private sector and civil society, will support an all-of-society approach to disaster risk reduction. The Office will support private sector coordination efforts with national and local governments and strengthening micro-, small and medium-sized enterprises' resilience to disasters. The Office will continue to work through the Office's stakeholder engagement mechanism and other region-specific mechanisms to promote inclusive and coherent implementation of the Sendai Framework and risk-informed development that leaves no one behind. The Office will also emphasize cooperation at the local level by promoting disaster resilience-building in cities.
- 27.101 With regard to inter-agency coordination and liaison, as Chair of the Senior Leadership Group on Disaster Risk Reduction for Resilience and as co-lead of the Early Warnings for All initiative, the Office will align efforts and promote synergies within the United Nations system on interventions relating to disaster risk reduction and early warning systems. It will strengthen collaboration across disaster risk reduction, development and humanitarian planning, taking into account climate change information. At the technical level, the Office will strengthen coordination within the United Nations system by convening the United Nations Disaster Risk Reduction Focal Points' Group and leading the risk knowledge and management pillar of the Early Warnings for All executive action plan for the period 2023–2027. The Office will further contribute to the Climate Risk and Early Warning Systems initiative, a mechanism that funds the least developed countries and small island developing States for risk-informed early warning services, implemented jointly with the World Meteorological Organization and the World Bank. In accordance with General Assembly decision 78/546, the Office will also host the secretariat for the Santiago network for averting, minimizing and addressing loss and damage associated with the adverse effects of climate change.
- 27.102 The Office integrates a gender perspective into its operational activities, deliverables and results, as appropriate. In line with the Sendai Framework, the Office will work to promote the full, equal and effective participation and leadership of women in the design, management, resourcing and implementation of gender-sensitive disaster risk reduction policies, plans and programmes, and enable Governments to better incorporate a gender perspective into national risk reduction strategies, early warning systems, climate adaptation and resilience-building.
- 27.103 Noting the United Nations Disability Inclusion Strategy and recognizing that disasters and the consequent disruption to physical, social, economic and environmental networks and support systems disproportionately affect persons living with disabilities and their families, the Office will increase advocacy on disability-inclusive disaster risk reduction and ensure the participation of persons with disability stakeholder groups in processes that set the global and regional disaster risk reduction agendas, with the active involvement of its regional offices. The Office will support States parties' efforts to implement the Convention on the Rights of Persons with Disabilities. Emphasis will be placed on supporting Member States in ensuring that persons living with disabilities and their needs are included in the implementation of the Sendai Framework and its expected results, goal and targets, including through the availability of disaggregated data.

Evaluation activities

- 27.104 An evaluation of the Sendai Framework monitor, conducted by the Office and completed in 2023, has guided the proposed programme plan for 2025.
- 27.105 In response to the results of the evaluation referenced above, the Office will enhance and strengthen the disaster data network with a focus on official disaster statistics, including through the operationalization of a new tracking system for hazardous events and disaster loss and damage. The

system will expand data availability, access and the user interface and further strengthen coordination at the national and local levels. Emphasis will be placed on generating and disseminating data disaggregated by sex, age, income, disability and hazard types. The Office will continue to support national Governments in better reporting and applying the collected data for policy development and implementation.

- 27.106 An evaluation to be conducted by the Office on the Making Cities Resilient 2030 programme is planned for 2025.

Programme performance in 2023

Member States and stakeholders reaffirm their commitment to the full implementation of the Sendai Framework towards disaster risk reduction

- 27.107 Member States and stakeholders conducted the midterm review of the implementation of the Sendai Framework for Disaster Risk Reduction 2015–2030 and took stock of progress made and challenges faced during the first seven years of the implementation of the Sendai Framework. The Office provided guidance and identified key thematic areas for the review. It also formulated important questions to guide the review and identified relevant partners and stakeholders for global, regional and national consultations, taking into consideration relevant thematic and emerging issues. Throughout 2022 and 2023, Member and observer States produced 72 voluntary national reports. The review also drew from 7 regional reports, 14 thematic studies, contributions from 28 United Nations system entities, interventions from 7 additional United Nations entities through the Senior Leadership Group on Disaster Risk Reduction for Resilience and contributions from 25 major groups, organizations associated with stakeholder engagement mechanisms or observers to the General Assembly. These contributions are an indication of Member States' and other stakeholders' increased commitment to accelerating the implementation of the Sendai Framework. Furthermore, by providing insights into the implementation of the Sendai Framework in varied national contexts, the reports contributed to shaping the overall midterm review and its resulting recommendations.
- 27.108 The General Assembly, in its resolution [77/289](#), adopted the political declaration of the high-level meeting on the midterm review of the Sendai Framework for Disaster Risk Reduction 2015–2030, which, among others, contains calls for Member States and stakeholders to promote a disaster risk-informed approach to sustainable development at the local, national, regional and global levels and to accelerate progress on integrating disaster risk reduction into policies, programmes and investment at all levels.
- 27.109 Progress towards the objective is presented in the performance measure below (see figure 27.XVI).

Figure 27.XVI
Performance measure: number of voluntary national reports on the implementation of the Sendai Framework produced by Member and observer States (cumulative)

Planned results for 2025

Result 1: national policymakers integrated innovation, good practices and evidence-based risk reduction into their decision-making processes

Programme performance in 2023 and target for 2025

27.110 The subprogramme’s work contributed to 35 countries integrating climate change data and analysis to develop and implement disaster risk reduction strategies and plans, which did not meet the planned target of 40 countries. The target was not met owing to the need for further intersectoral coordination to integrate climate change data and analysis into disaster risk reduction strategies.

27.111 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 27.XVII).

Figure 27.XVII
Performance measure: number of countries integrating climate change data and analysis to develop and/or implement disaster risk reduction strategies and plans (cumulative)

Result 2: accelerated achievement of the Sendai Framework with countries using relevant information and analysis to reduce risks and inform development decisions

Programme performance in 2023 and target for 2025

- 27.112 The subprogramme’s work contributed to seven countries developing multi-hazard risk profiles, which did not meet the planned target of eight countries. The target was not met owing to delays experienced in one target country.
- 27.113 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 27.XVIII).

Figure 27.XVIII

Performance measure: number of countries having developed multi-hazard risk profiles (cumulative)

Result 3: strengthened inclusive multi-hazard early warning systems that reach the most vulnerable

Proposed programme plan for 2025

- 27.114 People-centred, multi-hazard and multisectoral forecasting and early warning systems help to minimize the impact of disasters on people, assets and livelihoods by triggering early action that is well prepared and tested. The General Assembly, in its resolution [77/289](#), expressed deep concern that coverage of and accessibility to multi-hazard early warning systems remained inadequate in all countries and emphasized the need to urgently extend the reach of multi-hazard early warning systems everywhere, especially in developing countries and in particular in least developed countries, small island developing States, landlocked developing countries and African countries.

Lessons learned and planned change

- 27.115 The lesson for the programme was the need to enhance Member States’ risk knowledge and integrate it into inclusive, accessible and effective early warning systems, with a focus on small island developing States, least developed countries and landlocked developing countries. In applying the lesson, the programme will support activities focused on strengthening the production, access, dissemination and use of risk information, fostering stronger stakeholder coordination, promoting innovation and empowering decision makers and communities to understand, identify and respond to risks.
- 27.116 Expected progress towards the objective is presented in the performance measure below (see figure 27.XIX).

Figure 27.XIX

Performance measure: number of small island developing States, least developed countries and landlocked developing countries that have accessible, understandable, usable and relevant disaster risk information and assessment available to the people at the national and local levels^a

^a Based on national reporting against target G5 of the Sendai Framework monitor.

Legislative mandates

27.117 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

54/219	International Decade for Natural Disaster Reduction: successor arrangements	74/15	Political Declaration of the High-level Midterm Review on the Implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024
56/195 ; 64/200	International Strategy for Disaster Reduction		
69/283	Sendai Framework for Disaster Risk Reduction 2015–2030		
70/203	World Tsunami Awareness Day	76/258	Doha Programme of Action for Least Developed Countries
72/218 ; 73/231 ; 74/218 ; 75/216 ; 76/204 ; 77/164 ; 78/152	Disaster risk reduction	77/29 ; 78/120	International cooperation on humanitarian assistance in the field of natural disasters, from relief to development
74/3	Political declaration of the high-level meeting to review progress made in addressing the priorities of small island developing States through the implementation of the Small Island Developing States (SIDS) Accelerated Modalities of Action (SAMOA) Pathway	77/289	Political declaration of the high-level meeting on the midterm review of the Sendai Framework for Disaster Risk Reduction 2015–2030
74/4 ; 78/1	Political declaration of the high-level political forum on sustainable development convened under the auspices of the General Assembly	78/3	Political declaration of the General Assembly high-level Meeting on pandemic prevention, preparedness and response

Economic and Social Council resolutions and intergovernmental agreed conclusions

2018/14	Strategic Framework on Geospatial Information and Services for Disasters	priority theme “Achieving gender equality and the empowerment of all women and girls in the context of climate change, environmental and disaster risk reduction policies and programmes”

Deliverables

27.118 Table 27.27 lists all deliverables of the programme.

Table 27.27

Deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	2	2	1	1
1. Report to the General Assembly on the implementation of the Sendai Framework for Disaster Risk Reduction 2015–2030	1	1	1	1
2. Report of the midterm review of the Sendai Framework – main findings and recommendations	1	1	–	–
Substantive services for meetings (number of three-hour meetings)	8	20	2	2
3. Provision of substantive and technical support to General Assembly (Second Committee) resolution negotiations on disaster risk reduction (annual)	1	4	1	1
4. Provision of substantive and technical support to General Assembly negotiations on the political declaration of the midterm review of the Sendai Framework	1	7	–	–
5. Provision of substantive and technical support to General Assembly resolution negotiations on building global resilience through regional and interregional infrastructure connectivity	1	2	–	–
6. General Assembly plenary (Second Committee), agenda item on Sustainable development: disaster risk reduction	1	1	1	1
7. General Assembly plenary, high-level meeting on the midterm review of the Sendai Framework	4	6	–	–
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	30	33	35	30
8. National, regional, and interregional projects related to the implementation of the Sendai Framework	30	33	35	30
Seminars, workshops and training events (number of days)	330	345	330	150
9. Training events on disaster risk reduction planning and implementation and monitoring of the Sendai Framework for regional, national and local capacity development	330	345	330	150
Publications (number of publications)	4	4	3	5
10. Global Assessment Report on Disaster Risk Reduction and Global Assessment Report special reports	1	1	1	1
11. United Nations Office for Disaster Risk Reduction annual report	1	1	1	1
12. United Nations Office for Disaster Risk Reduction biennial work programme and strategic framework	1	1	–	2
13. United Nations Plan of Action on Disaster Risk Reduction for Resilience: Towards a Risk-informed and Integrated Approach to Sustainable Development (progress report)	1	1	1	1
Technical materials (number of materials)	22	23	23	23
14. On the monitoring and implementation of the Sendai Framework	15	15	15	15

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
15. On the application of risk knowledge	6	7	6	7
16. Technical contributions to outcome documents of the regional and global platforms	1	1	2	1

C. Substantive deliverables

Consultation, advice and advocacy: advocacy through high-level engagement of key audiences and decision makers; advice and support on risk information and analysis to 100 countries; advisory services for risk governance capacities of 18 regional and subregional intergovernmental organizations; and advocacy with and technical advice to Member States to integrate disaster risk reduction into intergovernmental deliberations and policy decisions at the General Assembly and the Economic and Social Council, including the coordination segment, the Commission on the Status of Women, the forum on financing for development follow-up and the high-level political forum for sustainable development, as well as into the United Nations Framework Convention on Climate Change.

Databases and substantive digital materials: the Sendai Framework monitor, used by 175 Member States for monitoring and reporting on progress against Framework targets and related Sustainable Development Goal targets and indicators; the Sendai Framework voluntary commitments online platform, with more than 175 voluntary commitments; and disaster loss databases complying with the Framework requirements, covering 120 countries and territories.

D. Communication deliverables

Outreach programmes, special events and informative materials: high-level global and regional meetings on disaster risk reduction; World Tsunami Awareness Day events; International Day for Disaster Reduction events; newsletters and notes verbales on Sendai Framework monitoring; communications campaigns on inclusive disaster risk reduction and the Early Warnings for All initiative; and increased capacity of media, institutional actors and communities to communicate about risk effectively.

External and media relations: press releases, op-eds and press coverage; and media briefings on community risk and reporting on disaster risk reduction.

Digital platforms and multimedia content: PreventionWeb, the online knowledge platform for disaster risk reduction; and web stories, posts and videos for social media.

B. Proposed post and non-post resource requirements for 2025

Overview

- 27.119 The United Nations Office for Disaster Risk Reduction carried out a spending review pursuant to paragraph 20 of General Assembly resolution 77/262 as part of its proposed budget formulation process for 2025. With the engagement of programme managers, the review included an analysis of the post and non-post resource types, with a view to optimizing the use of resources and drawing lessons learned towards effective and efficient mandate implementation. The regular budget post component provides for one D-1 post and the associated common services costs and, pursuant to Assembly resolution 52/12 B, a grant out to United Nations Development Programme to support operational activities for natural disaster mitigation, prevention and preparedness.
- 27.120 Over the past five years, the Office's regular budget resources (an annual average of \$1.4 million) represents 3 per cent of its overall budgetary requirements. The remaining 97 per cent is funded from voluntary contributions (an annual average of \$44.5 million). With regard to posts, the Office has maintained 1 D-1 post over the past five years, which, on average, represents 1 per cent of its staffing capacity, with the remaining 99 per cent (an annual average of 118 posts) funded from extrabudgetary resources.
- 27.121 The review highlighted the continued need for the D-1 post to lead the preparation of reports to intergovernmental bodies, the integration of disaster risk reduction policies through cooperation with the United Nations resident coordinator system and United Nations country teams, and the identification of opportunities for partnerships and coordination with and among key partners.
- 27.122 The review also considered the non-post resources that support the management and administration of operational activities relating to capacity-building for disaster mitigation, prevention and preparedness as mandated by the General Assembly in its resolution 52/12 B. No changes are proposed to the current arrangements following the outcome of the review.
- 27.123 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 27.28 to 27.30.

27.124 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 27.31 to 27.33 and figure 27.XX.

27.125 As shown in tables 27.31 (1) and 27.32 (1), the overall resources proposed for 2025 amount to \$1,605,200 before recosting, reflecting no change compared with the approved budget for 2024. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

- 27.126 As reflected in tables 27.31 (2) and 27.32 (2), extrabudgetary resources amount to \$64,880,200. The resources would complement regular budget resources and would be used to provide for 126 posts (1 Assistant Secretary-General, 1 D-2, 3 D-1, 12 P-5, 30 P-4, 35 P-3, 2 P-2, 10 National Professional Officer, 2 General Service (Principal level) and 30 General Service (Other level)) and non-post resources to support the implementation, follow-up and review of the Sendai Framework for Disaster Risk Reduction 2015–2030 and to provide technical assistance, capacity development, coordination and policy guidance on the implementation of the Sendai Framework at the global, regional, national and local levels.
- 27.127 The extrabudgetary resources under the present section are subject to the oversight of the Special Representative of the Secretary-General for Disaster Risk Reduction, who has delegated authority from the Secretary-General.

Annex I

Organizational structure and post distribution for 2025

Three charts showing the organizational structure of the Office for the Coordination of Humanitarian Affairs are presented below. Chart A reproduces the approved organizational structure for 2024, as contained in document [A/78/6 \(Sect. 27\)](#). Charts B and C present the proposed organizational structure for 2025 for the Office for the Coordination of Humanitarian Affairs and the United Nations Office for Disaster Risk Reduction, respectively.

Justification for the proposed changes

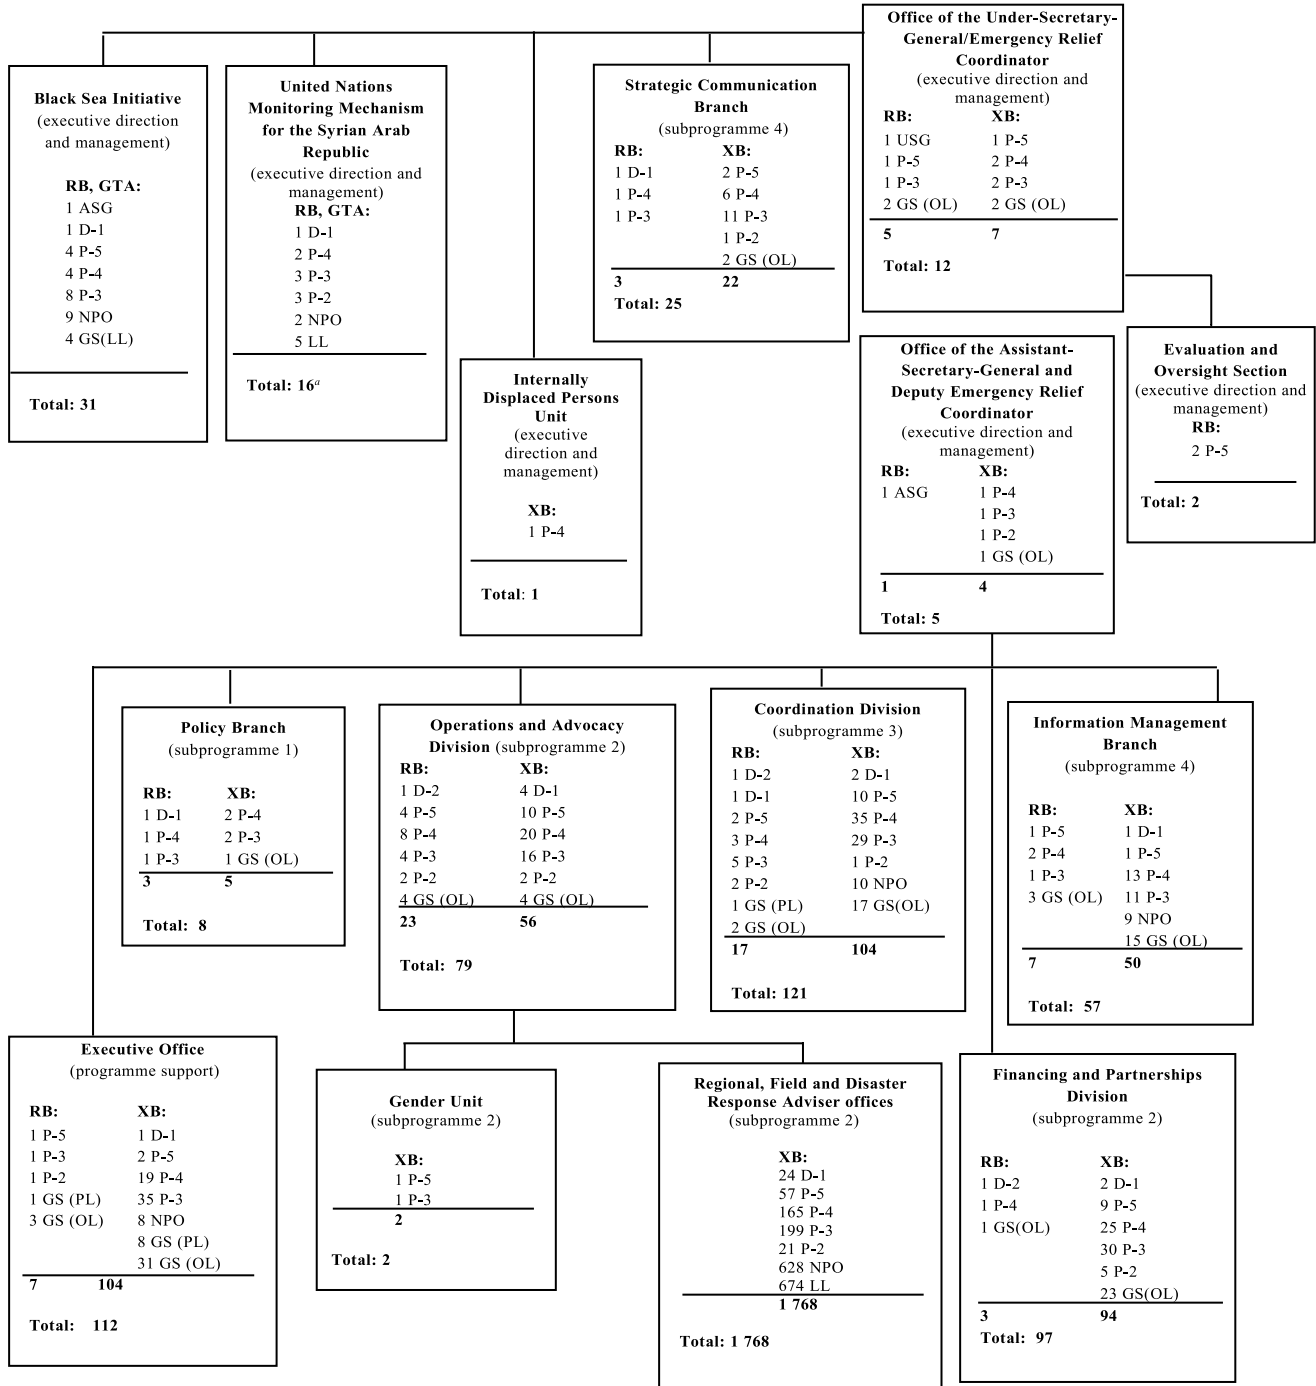

Executive direction and management. The organizational chart reflects the removal of the Black Sea Initiative support office and the United Nations Monitoring Mechanism for the Syrian Arab Republic, as explained in paragraphs 27.76 and 277 above.

Planning and performance branch. With increasing levels of need and crisis complexity globally, the Office for the Coordination of Humanitarian Affairs is supporting Member States through the coordination of humanitarian responses in more than 30 countries. The lives of nearly 300 million people depend on the timeliness and effectiveness of these responses. It is therefore crucial that the Office remain visibly accountable and focused on learning and results.

The Office for the Coordination of Humanitarian Affairs plans to create a new planning and performance branch under executive direction and management, which would incorporate the performance monitoring, evaluation, oversight and learning functions and would include existing regular budget-funded posts and the redeployment of extrabudgetary funded posts from the Executive Office. This would ensure an independent line of strategic management for those functions to strengthen the Office's executive direction and governance.

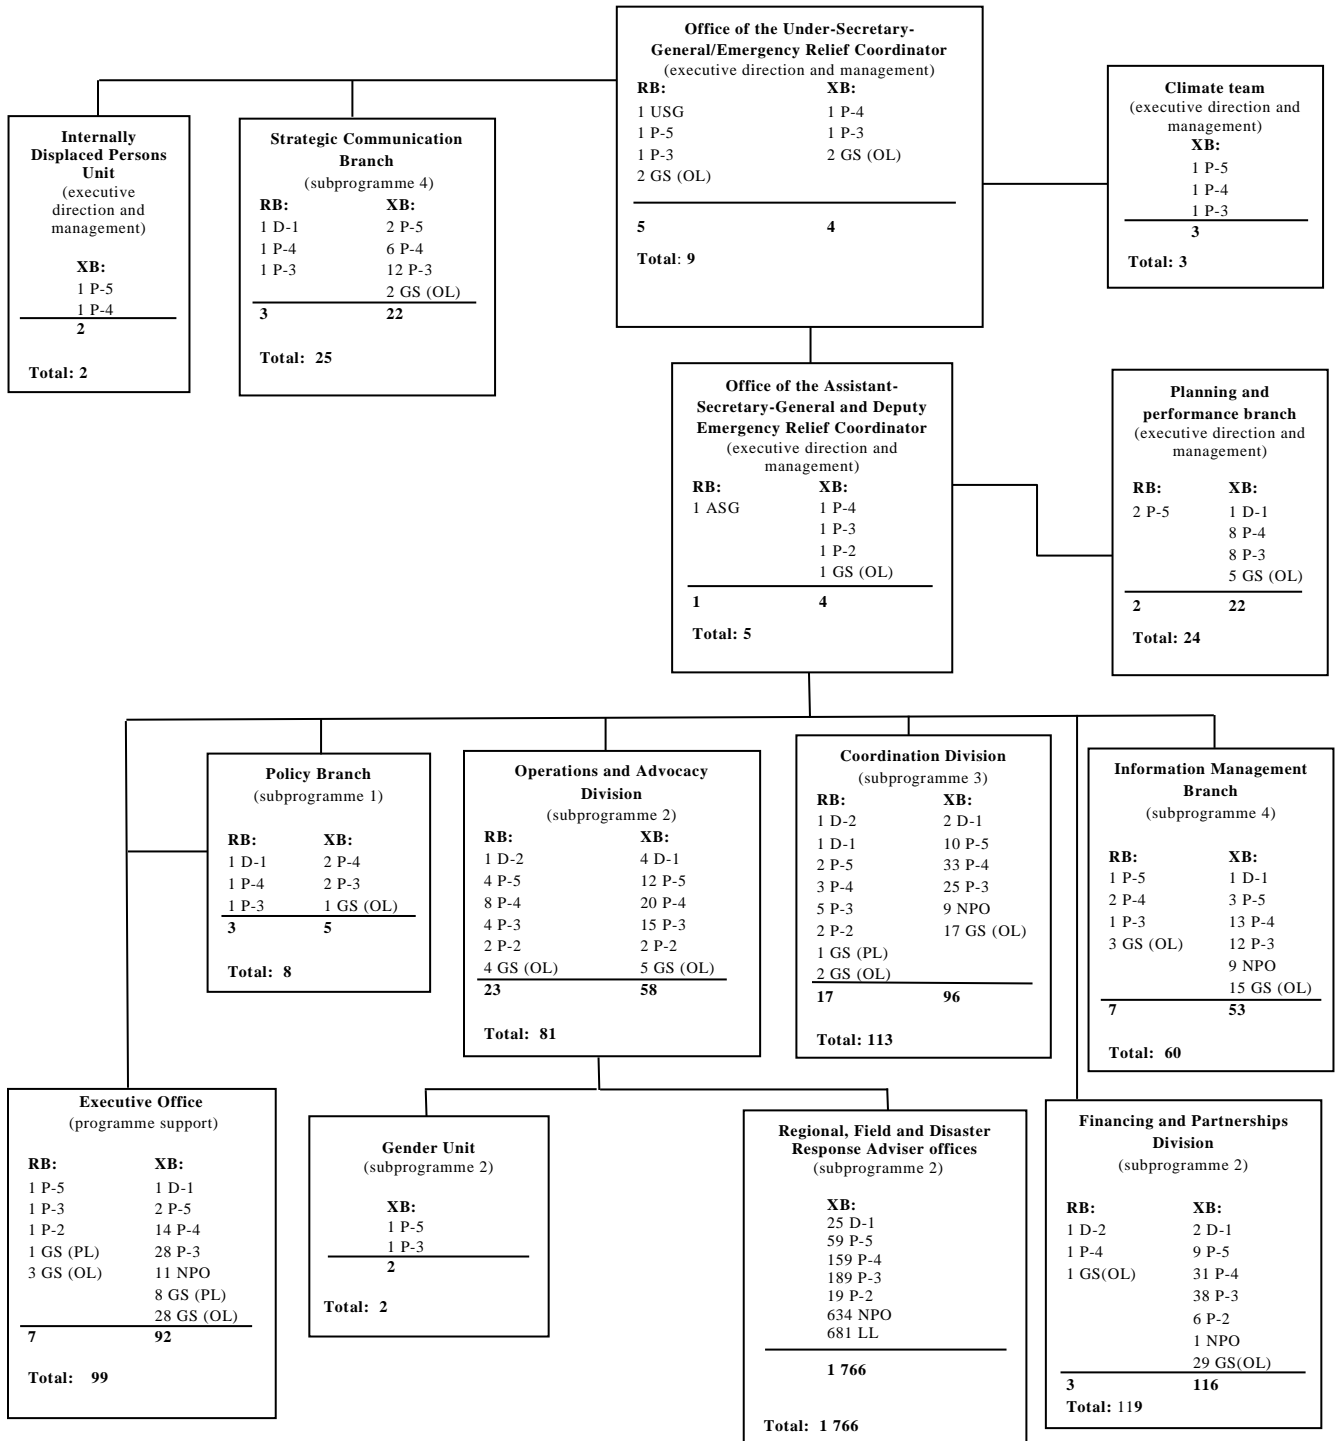

Climate team. the Office plans to create a climate team to catalyse, coordinate and support the delivery by the Office for the Coordination of Humanitarian Affairs of its commitments in the strategic plan relating to climate change, with a focus on three priority areas: finance, advocacy and operations. The climate team would, among others, support the development of humanitarian financing instruments that enable a timely and adequate response to climate-related crises and promote investment to build climate resilience in contexts of high humanitarian need. In order to facilitate its role in bringing together various functions within the Office, the reporting line of the climate team is to the Office of the Under-Secretary-General for Humanitarian Affairs and Emergency Relief Coordinator.

A. Office of the Coordination of Humanitarian Affairs: approved organizational structure and post distribution for 2024

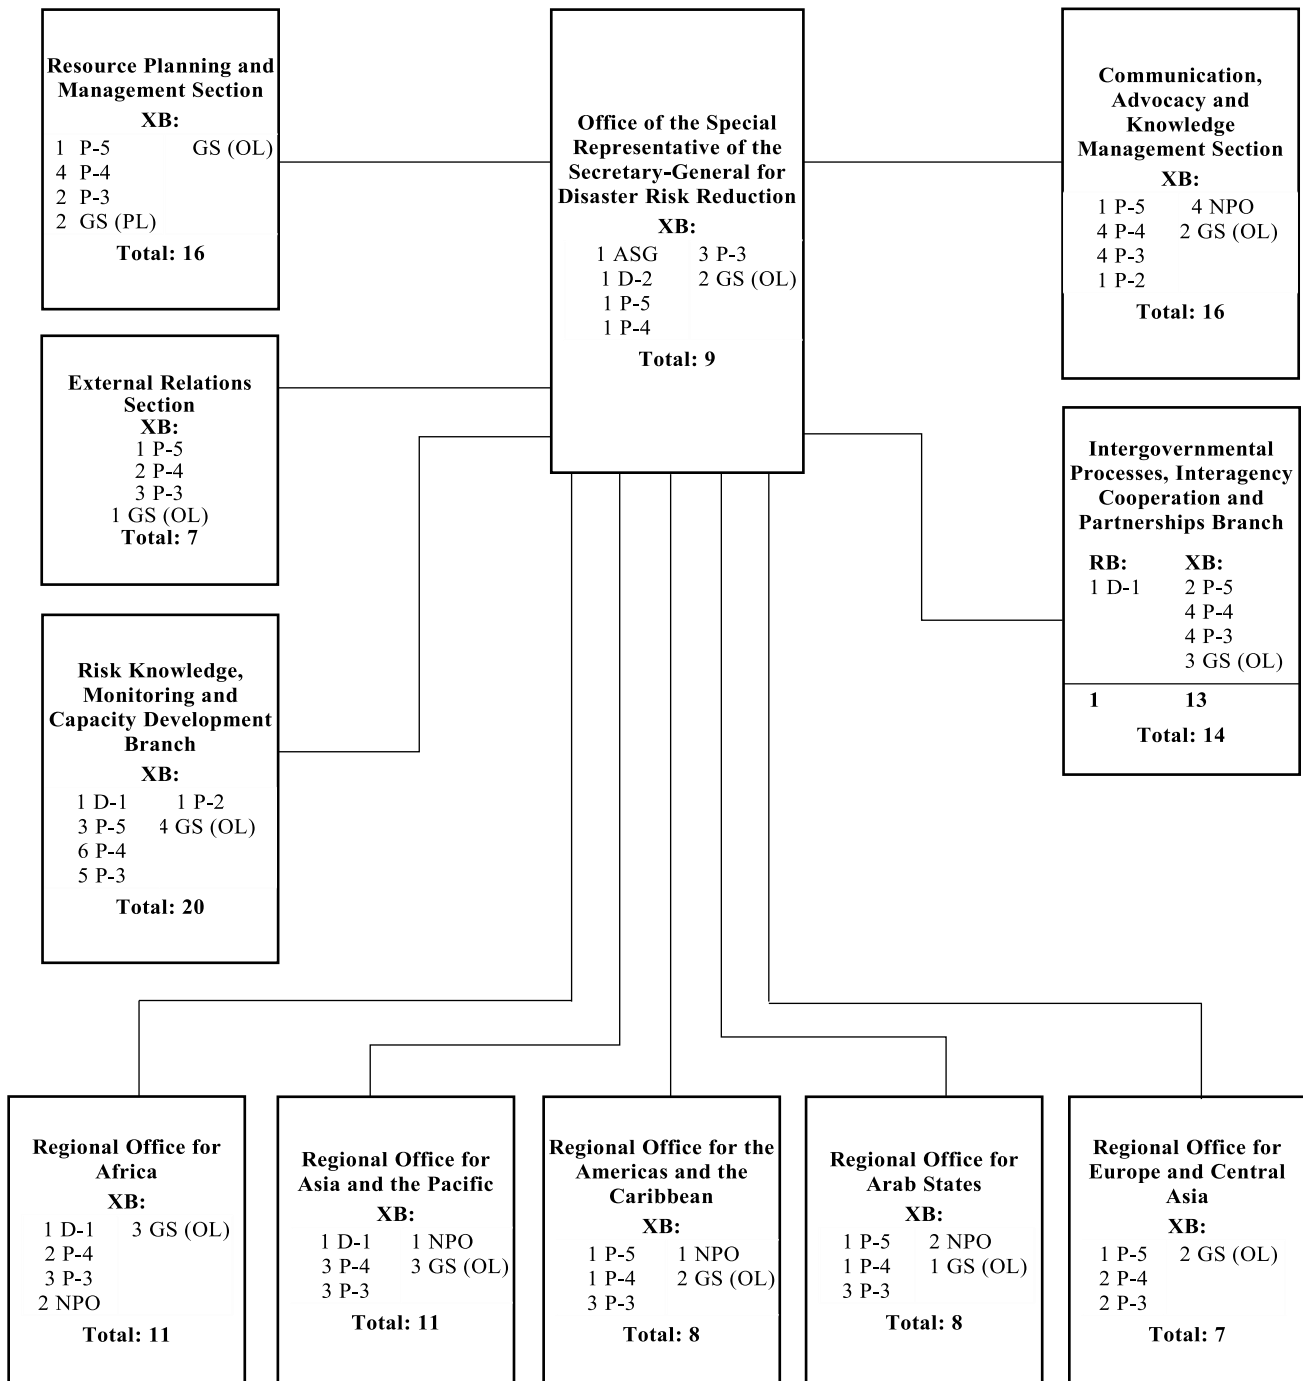

^a Excluding three United Nations Volunteers.

B. Office of the Coordination of Humanitarian Affairs: proposed organizational structure and post distribution for 2025

C. United Nations Office for Disaster Risk Reduction: organizational structure and post distribution for 2025

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 28.1 The Department of Global Communications is responsible for communicating to the world the ideals and work of the United Nations; interacting and partnering with diverse audiences; and building support for the purposes and principles enshrined in the Charter of the United Nations. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolutions [13 \(I\)](#), [76/268](#) on multilingualism and [78/80](#) A and B on questions relating to information. The Department will leverage the power of communications to tell the United Nations story to global audiences in multiple languages and platforms in order to mobilize action in support of the United Nations agenda.

Strategy and external factors for 2025

- 28.2 The overall programme plan for 2025 reflects the Department's strategy to strengthen support for the work and purposes of the United Nations by engaging with audiences and encouraging them to act, through impactful storytelling and a focus on solutions. The Department takes the following core approaches in its work: strategic planning by identifying communications goals and target audiences; maintaining close working relationships with stakeholders, offices of the Secretariat, entities of the United Nations system and other key partners; enhancing audience reach through multilingualism and the parity of all six official languages in the preparation of news and communications products, including content on United Nations websites and social media accounts; targeted use of social and digital media to deliver information directly and instantaneously to key audiences; and using rigorous evaluation tools and processes to measure the impact of campaigns in order to improve the Department's work.
- 28.3 The Department, through its subprogrammes, delivers strategic communications campaigns to engage and inspire target audiences. It works through a global network of United Nations information centres, integrated with United Nations resident coordinator offices, to reach local audiences and provide content for global platforms. It produces accurate, objective and balanced multilingual news and communications products that convey authoritative information and solutions-based stories. It advocates on priority issues with Member States, civil society, academia, the media, young people and other partners. The Department contributes to the observance of international days and celebrations established by the General Assembly.
- 28.4 The Department also provides services to delegates and staff, including through the Dag Hammarskjöld Library, and promotes knowledge-sharing and internal communication by way of iSeek, the United Nations intranet.
- 28.5 The Department continues to put accuracy, timeliness and trustworthiness at the centre of its work. In an age when misinformation, disinformation, information manipulation and hatred are disseminated to sow bigotry, promote discrimination and undermine civil discourse, United Nations communications, including crisis communications, serve as a source of reliable information.
- 28.6 The Department will lead and coordinate crisis communications by identifying crises and emerging reputational risks, strengthening the United Nations response through aligned messaging and mitigating risk by developing guidance on crisis communications.
- 28.7 With regard to cooperation with other entities at the global, regional, national and local levels, the Department will leverage partnerships with an array of partners, including from civil society, academia, the media and the private sector, to enhance its ability to target and deliver information to an even wider community, with a focus on young people around the world.

- 28.8 With regard to inter-agency coordination and liaison, the Department will continue to strengthen the coordination of communications across the United Nations system, including through United Nations communications groups at the country and regional levels. Coordination will also be strengthened through the integration of United Nations information centres with resident coordinator offices, in line with the implementation of the United Nations development system reform. The Department’s field staff serve as communications officers and advisers to resident coordinators and work under their direct supervision. As part of the integration process, the Information Centres Service will continue its work with the Development Coordination Office to provide strategic communications support to resident coordinators in countries without an information centre presence to ensure the Department’s reach.
- 28.9 With regard to the external factors, the overall plan for 2025 is based on the following planning assumptions:
- (a) All stakeholders and partners fulfil their responsibilities and obligations under service agreements and partnerships;
 - (b) Access by target audiences to programmes, products and services is not limited by communications technology, security or infrastructure conditions.
- 28.10 The Department integrates a gender perspective in its operational activities, deliverables and results, as appropriate. The strategic communications guidance of the Department mainstreams a gender perspective into the work of the Department as a matter of practice. For example, the Department will promote the balanced presence of women and men, as well as a multidimensional representation and portrayal of women and men, in all its products, campaigns, events and activities.
- 28.11 In line with the United Nations Disability Inclusion Strategy, the Department will use its network of focal points to help to develop a common and coordinated approach to the implementation of relevant General Assembly mandates and to making United Nations services and activities accessible for persons with disabilities. The focal points will provide communications support to the Strategy, including by setting accessibility standards for United Nations websites.

Legislative mandates

- 28.12 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

13 (I)	Organization of the Secretariat	62/122	Permanent memorial to and remembrance of the victims of slavery and the transatlantic slave trade
168 (II)	United Nations Day		
423 (V)	Human Rights Day	64/13	Nelson Mandela International Day
32/40 B	Question of Palestine	76/68	Follow-up to the Declaration and Programme of Action on a Culture of Peace
35/201	Annual Reham Al-Farra Memorial Journalists’ Fellowship Programme	76/268	Multilingualism
36/67	International Year of Peace and International Day of Peace	77/24	Special information programme on the question of Palestine of the Department of Global Communications of the Secretariat
54/134	International Day for the Elimination of Violence against Women	77/87	United Nations Disarmament Information Programme
57/7	Final review and appraisal of the United Nations New Agenda for the Development of Africa in the 1990s and support for the New Partnership for Africa’s Development	78/80 A	Questions relating to information: information in the service of humanity
57/129	International Day of United Nations Peacekeepers	78/80 B	Questions relating to information: United Nations global communications policies and activities
60/7	Holocaust remembrance		
60/225	Assistance to survivors of the 1994 genocide in Rwanda, particularly orphans, widows and victims of sexual violence	78/100	Dissemination of information on decolonization

Section 28 Global communications

78/163	Follow-up to the Second United Nations Conference on Landlocked Developing Countries	78/233	Follow-up to the Fifth United Nations Conference on the Least Developed Countries
78/182	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly	78/234	A global call for concrete action for the elimination of racism, racial discrimination, xenophobia and related intolerance and the comprehensive implementation of and follow-up to the Durban Declaration and Programme of Action

Deliverables

28.13 Table 28.1 lists all cross-cutting deliverables of the programme.

Programme of work

**Subprogramme 1
Campaigns and country operations services**

Objective

28.14 The objective, to which this subprogramme contributes, is to mobilize audiences and strengthen support for the work, principles and purposes of the United Nations.

Strategy

28.15 To contribute to the objective, the subprogramme will:

- (a) Deliver communications campaigns related to United Nations priorities, including sustainable development, climate change, peace and security and human rights, directed by the global communications strategy for the United Nations and facilitated through a variety of communications tools, including audience-targeted messaging, issue-focused content and inspiring stories;
- (b) Promote strategic communications priorities of the United Nations through its information centres by developing multimedia content that supports targeted and localized messages and communications campaigns;
- (c) Provide strategic and crisis communications guidance to resident coordinator offices and United Nations country teams in their relevant regions;

- (d) Devise strategic guidance on countering misinformation, disinformation and information manipulation and develop and promote content to counter false narratives and build confidence among global audiences.

28.16 The above-mentioned work is expected to result in:

- (a) Increased knowledge and engagement of target audiences around the globe, and further action in support of United Nations priorities;
- (b) Global reach of communications campaigns available in the languages and on the platforms used by audiences, thus ensuring greater impact.

Programme performance in 2023

Inspiring action across the globe through communications in 159 languages

28.17 Whether by undertaking innovative approaches to communications or using more traditional means, United Nations information centres have achieved their greatest impact by engaging audiences in national or local languages. In 2023, information centres worked in 153 local languages, sign languages and Braille, in addition to the six official languages of the United Nations, to promote greater public understanding and inspire action on United Nations priority issues. For instance, the information centre in Pakistan, along with the resident coordinator office and the United Nations country team, engaged more than 1,200 Pakistani local leaders in conducting dialogues on the Sustainable Development Goals not only in Pashto, Sindhi and Urdu, but also in Balochi, Brahui, Dari, English, Hindko, Punjabi and Saraiki.

28.18 To commemorate the seventy-fifth anniversary of the Universal Declaration of Human Rights, the global network of United Nations information centres translated the Declaration into 13 local languages. The information centre in Trinidad and Tobago, which services the Caribbean, produced the first-ever translations of the Declaration in Jamaican Patois (Patwa) and Saint Lucian Creole (Kwéyòl). In Zambia, the information centre facilitated the production and conversion of the summary of the United Nations Sustainable Development Cooperation Framework 2023–2027 for Zambia into Braille. The finalized Braille document was launched in November 2023, together with a sign language video and audio versions of the Framework, and translations in seven Zambian languages. These examples represent just a fraction of the communications activities conducted by United Nations information centres across the world.

28.19 Progress towards the objective is presented in the performance measure below (see figure 28.I).

Figure 28.I

Performance measure: number of languages in which United Nations information centres produced or translated materials (cumulative)

Planned results for 2025

Result 1: increased engagement with global audience on United Nations priority themes

Programme performance in 2023 and target for 2025

- 28.20 The subprogramme's work contributed to gaining a total of 70 million followers across social media channels and languages, which exceeded the planned target of 63 million followers.
- 28.21 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 28.II).

Figure 28.II

Performance measure: number of social media followers across platforms

(Millions)

Result 2: increased public engagement with the global peace and security agenda

Programme performance in 2023 and target for 2025

- 28.22 The subprogramme's work contributed to progress towards the launch of a new peace and security website in 2024, which is intended to serve as an information gateway to United Nations peace efforts, from prevention and mediation to peacebuilding. In 2023, stakeholders, including the Departments of Political and Peacebuilding Affairs and Peace Operations and the Office of Disarmament Affairs, were consulted on substantive issues to prepare content for the website. Various strategic communication tools, including an audience survey of university students, were used to understand the interests and expectations of a younger target audience.
- 28.23 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 28.III).

Figure 28.III
Performance measure: views of United Nations website on peace and security issues

(Thousands)

Result 3: increased action on the 2030 Agenda for Sustainable Development

Proposed programme plan for 2025

28.24 The 2023 Sustainable Development Goals Summit marked the beginning of a new phase of accelerated progress towards the Sustainable Development Goals. With the 2030 deadline approaching, this will be a moment for reinvigorated public engagement to support transformative and accelerated commitments and ensure that no one is left behind. The subprogramme launched the ActNow campaign for climate action in 2018 to engage audiences on steps that can be taken to curb emissions and preserve the environment. Users can log and track their actions through the ActNow mobile phone application.

Lessons learned and planned change

28.25 The lesson for the subprogramme was that interactive engagement through mobile phone applications can be effective in inspiring individual action and mobilizing support for global priorities. By the end of 2022, 10 million climate actions had been logged through the ActNow application. In applying the lesson, the subprogramme will expand the ActNow campaign in the lead up to the Sustainable Development Goals Summit to cover all of the Goals. This will allow users to choose and track their actions towards achieving the Goals and learn about sustainable development topics in interactive ways through activities such as quizzes and group challenges. The subprogramme will also engage in digital outreach through United Nations platforms, expand its circle of supporters of the Goals and strengthen media partnerships. These efforts will help to showcase the 2030 Agenda as the overarching road map for achieving sustainable development and highlight the urgent need to act to realize its vision.

28.26 Expected progress towards the objective is presented in the performance measure below (see figure 28.IV).

Figure 28.IV

Performance measure: number of individual actions logged through the ActNow campaign (cumulative)

(Millions)

Deliverables

28.27 Table 28.2 lists all deliverables of the subprogramme.

Table 28.2

Subprogramme 1: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	1
1. Report for the General Assembly on the dissemination of information on decolonization	1	1	1	1
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	26	24	26	26
2. Training programme for Palestinian broadcasters and journalists	24	24	24	24
3. International Media Seminar on Peace in the Middle East	2	–	2	2
D. Communication deliverables				
Outreach programmes, special events and information materials: communications campaigns and strategic outreach events and programmes through the Department’s field offices reaching local audiences, including lectures, exhibits and the organization of more than 100 Model United Nations conferences on priority issues or special observances of the United Nations, with specific target audiences (e.g. civil society, young people, academia, Governments and the private sector) and working in some 124 languages.				
External and media relations: press conferences, briefings and panel discussions on United Nations priorities, activities, events, publications, reports and outcomes of negotiations or other United Nations activities; media outreach, including media interviews and/or placement of opinion articles; strategic partnerships with education institutions, the media, civil society, the private sector, the creative community and other partners; and radio and television programmes.				
Digital platforms and multimedia content: flagship and other social media accounts, campaigns and multilingual websites managed by United Nations information centres.				

Subprogramme 2 News services

Objective

28.28 The objective, to which this subprogramme contributes, is to mobilize audiences and strengthen support for the work, principles and purposes of the United Nations.

Strategy

- 28.29 To contribute to the objective, the subprogramme will:
- Provide the timely delivery of accurate, impartial, comprehensive, balanced, coherent and objective news and information;
 - Produce customized news and information materials (textual, audiovisual and photographic);
 - Provide services to the media and other consumers, including through the use of the newest web-based and mobile distribution platforms, with an overall emphasis on multilingualism from the planning stage.
- 28.30 The above-mentioned work is expected to result in increased public awareness of and engagement with the United Nations through access to more user-friendly and diversified content and a broader range of options available to audiences, from traditional to social media.

Programme performance in 2023

Increased usage of UNifeed video by digital media organizations covering global crises

- 28.31 UNifeed, a service managed by the subprogramme, provides broadcasters with raw source video footage of broadcast quality on a range of global issues from entities across the United Nations system. This footage covers topics such as climate change, peacekeeping and humanitarian emergencies, as well as economic and social conditions and sustainable development. During 2023, over 2,500 major news broadcasters and other news organizations continued to use UNifeed packages, especially during crises.
- 28.32 In September 2023, the subprogramme diversified its monitoring capacity to allow the tracking of UNifeed content usage by online platforms and has since measured a noticeable increase in the use of UNifeed video. As news audiences increasingly move to online media platforms, the subprogramme will look for opportunities to increase usage of UNifeed video by online media organizations.
- 28.33 Progress towards the objective is presented in the performance measure below (see figure 28.V).

Figure 28.V

Performance measure: number of times UNifeed videos have been used by broadcasters or online media platforms (annual)

Planned results for 2025

Result 1: increased access to United Nations News

Programme performance in 2023 and target for 2025

- 28.34 The subprogramme's work contributed to increased access to the redesigned United Nations News website, with 28.3 million users in 2023, which did not meet the planned target of 34 million users. The target was not met owing to a confluence of factors, including the end of the coronavirus disease (COVID-19) pandemic as a global public health emergency (a topic which drove significant audience reach in 2022), as well as shifts in user preferences towards more visual and interactive content.
- 28.35 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 28.VI).

Figure 28.VI

Performance measure: increased access to the redesigned United Nations News website (annual)

(Millions of users)

Result 2: increased global audience for the United Nations Web TV platform in the six official languages

Programme performance in 2023 and target for 2025

- 28.36 The subprogramme's work contributed to 80 million minutes of watch time on the United Nations Web TV platform in 2023, which exceeded the planned target of 78 million minutes. In 2023, United Nations Web TV became available in Arabic, Chinese, French, Russian and Spanish, ensuring that users can engage with content in any of the six official languages of the United Nations.
- 28.37 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 28.VII).

Figure 28.VII
Performance measure: watch time on United Nations Web TV platform

(Millions of minutes)

Result 3: deeper engagement of audiences through live-blogging tools and formats

Programme performance in 2023 and target for 2025

28.38 When news breaks and major world events unfold, audiences frequently turn to and follow online channels to get the latest updates. Social media platforms have until recently provided the ideal channel for online audiences to remain informed. However, recent trends in online publishing have favoured live-blog style coverage, providing audiences with access to real-time, up-to-the-minute news and information from trusted, branded, media outlets. In 2023, the subprogramme piloted live-blogging exercises and experimented with different technical approaches, including for the high-level debate of the seventy-eighth session of the General Assembly and the twenty-eighth Conference of the Parties to the United Nations Framework Convention on Climate Change in the United Arab Emirates in 2023.

Lessons learned and planned change

28.39 The lesson for the subprogramme was that, on average, web pages containing live blogs experienced a higher number of views per user and a higher engagement time. In applying the lesson, the subprogramme will expand its coverage of newsworthy events using the live-blog format, with a view to increasing online audience engagement.

28.40 Progress towards the objective is presented in the performance measure below (see figure 28.VIII).

Figure 28.VIII
Performance measure: audience engagement time on live blogs (annual)

(Total time spent on page: hours.minutes)

Deliverables

28.41 Table 28.3 lists all deliverables of the subprogramme.

Table 28.3

Subprogramme 2: deliverables for 2025, by category and subcategory

Category and subcategory

D. Communication deliverables

External and media relations: accreditation of and services to 5,300 members of the media (including 1,100 long-term grounds passes, 2,200 temporary passes and 2,200 requests for media passes from Member States); covering United Nations meetings and issuing press releases in the six official languages; coverage of intergovernmental meetings; online publication and distribution of speeches and statements of the Secretary-General and the Deputy Secretary-General and transcripts of press encounters of the Secretary-General; and photo coverage of meetings of key intergovernmental bodies and activities of the Secretary-General, the Deputy Secretary-General and the President of the General Assembly.

Digital platforms and multimedia content: daily multimedia content – audio, video and text – in the six official languages and three non-official languages (Hindi, Kiswahili and Portuguese) disseminated through multiple platforms and channels, including online and on social media, and through partnerships with external media organizations; the core United Nations website (including the home page), 215 United Nations observances and major global campaigns in the six official languages; assistance to United Nations entities in the multilingual aspects of their websites (54 websites); live television coverage, including live streams, and the posting of on-demand webcasts of intergovernmental meetings and other newsworthy events taking place at Headquarters, including the Sustainable Development Goals Studio; and provision of audiovisual library services to delegates, media outlets and others.

Subprogramme 3 Outreach and knowledge services

Objective

28.42 The objective, to which this subprogramme contributes, is to mobilize audiences and strengthen support for the work, principles and purposes of the United Nations.

Strategy

28.43 To contribute to the objective, the subprogramme will:

- (a) Engage in advocacy with a broad and international range of academic institutions, students and educators, the creative community and civil society;
- (b) Organize briefing programmes, special events, guided tours and interactive workshops, and engage with organizers of Model United Nations conferences;
- (c) Organize outreach and education programmes on the Holocaust and the transatlantic slave trade and create publications, research guides and exhibits on the same priorities, with a special focus on young people;
- (d) Develop communications materials, visual identities and branding in support of United Nations priorities;
- (e) Develop and maintain strategic partnerships with the entertainment, advertising and publishing industries, major sports and international events and institutions of higher education and research, targeting young people in particular;
- (f) Work with partners to develop multilingual and effective educational resources and programmes, campaigns, projects and events to inspire and encourage action for the 2030 Agenda for Sustainable Development;
- (g) Facilitate knowledge-sharing and the preservation of United Nations information resources for internal and external audiences.

28.44 The above-mentioned work is expected to result in:

- (a) A better understanding of the principles and purposes of the United Nations and the mobilization of young people and student participation in local, regional or national political, non-governmental and intergovernmental processes;
- (b) Increased mobilization of youth and student activity to advance the achievement of the Sustainable Development Goals and foster a new generation of leaders committed to the principles and values of the United Nations;
- (c) Increased access to United Nations documentation and information by Member States, United Nations staff around the world, research institutions, young people, schools and the general public for improved engagement, awareness and decision-making.

Programme performance in 2023

Public returns to the United Nations in New York

28.45 Following several years when public access to the United Nations in New York was restricted because of COVID-19, the subprogramme saw the public returning to visit Headquarters in 2023: the number of visitors touring Headquarters nearly reached pre-pandemic levels. The positive outcome is largely due to the portfolio of languages offered for guided tours in 2023 (the six official languages of the United Nations, as well as German, Greek, Hebrew, Italian, Japanese, Korean, Pashto, Portuguese and Urdu) and the range of thematic tours offered throughout the year, covering black history; women’s contributions to United Nations work on peace and security and human rights and development; the architecture and art at United Nations Headquarters; and a dedicated children’s tour.

28.46 Progress towards the objective is presented in the performance measure below (see figure 28.IX).

Figure 28.IX

Performance measure: number of visitors at the United Nations in New York (annual)

Planned results for 2025

Result 1: increased engagement and action for the Sustainable Development Goals through the global football community

Proposed programme plan for 2023

28.47 The subprogramme’s work contributed to a total of 270 football-related organizations joining the United Nations “Football for the Goals” initiative, which exceeded the planned target of 25.

28.48 Progress towards the objective and the target for the target for 2025 are presented in the performance measure below (see figure 28.X).

Figure 28.X

Performance measure: number of partner entities engaged in the United Nations “Football for the Goals” initiative (cumulative)

Result 2: increased communication and advocacy regarding the Sustainable Development Goals

Programme performance in 2023 and target for 2025

28.49 The subprogramme’s work contributed to the participation of 70 macro influencers with a combined reach of 450 million followers in communications and advocacy efforts with regard to the Sustainable Development Goals, which exceeded the planned target of 50 macro influencers and 400 million combined followers.

28.50 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 28.XI).

Figure 28.XI

Performance measure: number of macro influencers engaged and combined number of followers (annual)

Result 3: young journalists gain access and insight into the work of the United Nations

Proposed programme plan for 2025

28.51 The annual Reham Al-Farra Memorial Journalists' Fellowship Programme provides a unique opportunity for young working journalists from developing countries and countries with economies in transition to cover the opening of the General Assembly for their news outlets. Fellows attend special briefings, interview senior officials, engage with international media outlets and exchange ideas with colleagues from around the world. Through the Programme, journalists can gain a better understanding of the work of the United Nations, enabling them to produce responsible and nuanced reporting on global issues in their communities. In 2023, after four years, the Programme returned to an in-person format.

Lessons learned and planned change

28.52 The lesson for the subprogramme was that while virtual versions of the Programme enabled broader participation, the in-person format delivered a more meaningful and impactful experience for journalists. It provided more opportunities to interact directly with representatives of Member States and United Nations officials and led to an increase in the number of news stories produced by the fellows. In applying the lesson, the subprogramme will strive to hold the Programme in person and to create additional opportunities for interactions with a wide range of internal and external entities.

28.53 Expected progress towards the objective is presented in the performance measure below (see figure 28.XII).

Figure 28.XII

Performance measure: number of young journalists participating in the Programme and number of news stories produced by fellows (annual)

Deliverables

28.54 Table 28.4 lists all deliverables of the subprogramme.

Table 28.4

Subprogramme 3: deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	4	4	4	4
1. Reports for the General Assembly on questions of information and on the activities of the Department: strategic communications services, news services and outreach and knowledge services	4	4	4	4
Substantive services for meetings (number of three-hour meetings)	20	15	20	20
2. Meetings of the Committee on Information	20	15	20	20
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	361	447	370	370
3. Workshops on intergovernmental engagements for non-governmental organizations and orientation programme for newly associated non-governmental organizations	40	53	40	40
4. Training event on Dag Hammarskjöld Library services and training courses for iSeek content creators, editors and focal points	300	353	300	300
5. Training event on journalism as part of Reham Al-Farra Memorial Journalists' Fellowship Programme	21	41	30	30
C. Substantive deliverables				
Consultation, advice and advocacy: guidance and expert advice to the Model United Nations; and conferences on subjects such as slavery and the transatlantic slave trade and Holocaust remembrance.				
D. Communication deliverables				
Outreach programmes, special events and information materials: partnerships with civil society, academic institutions and other entities; educational and promotional materials, such as <i>UN Chronicle</i> ; responses to public enquiries; exhibits at United Nations Headquarters and online; multilingual guided tours; outreach programme with prominent personalities, including Messengers of Peace and other celebrities; special events and observances of selected commemorative days and years; Creative Community Outreach Initiative to feature the United Nations or a United Nations issue in a film, television or theatre product; and graphic design products in support of United Nations branding, and communication campaigns.				
External and media relations: press conferences and press releases to announce new outreach partnerships and special events; and exhibit openings.				
Digital platforms and multimedia content: iSeek; e-DeleGATE; shop.un.org ; and United Nations Development Business.				
Library services: a secure digital United Nations central repository (United Nations Digital Library) in the six official languages; online library products for the Library's global public, loan and related services and the provision of direct and targeted research to representatives of Member States; management of the United Nations System Electronic Information Acquisition Consortium and the United Nations Depository Library Programme; and curation of diverse library content.				

B. Proposed post and non-post resource requirements for 2025

Overview

28.55 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 28.5 to 28.7.

Table 28.5

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

28.56 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 28.8 to 28.10 and figure 28.XIII.

28.57 As shown in tables 28.8 (1) and 28.9 (1), the overall resources proposed for 2025 amount to \$118,031,100 before recosting, reflecting a net increase of \$114,400 (or 0.1 per cent) compared with the approved budget for 2024. Resource changes result from technical adjustments and new and expanded mandates. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

28.58 As shown in table 28.8 (1), resource changes reflect a decrease of \$123,500, as follows:

- (a) **Subprogramme 2, News services** (decrease of \$98,600). The decrease of \$98,600 relates to the removal of non-recurrent provisions under other staff costs (\$22,500) and contractual services (\$76,100) for webcasting and public information services that are no longer required in 2025, and that were approved pursuant to General Assembly resolutions [76/232](#), [76/307](#), [77/246](#), [77/249](#) and [77/250](#);
- (b) **Programme support** (decrease of \$24,900). The decrease of \$24,900 relates to the removal of non-recurrent provisions under furniture and equipment associated with the acquisition of

office automation equipment required for newly established general temporary assistance positions that were approved for 2024, pursuant to Assembly resolution [78/252](#).

New and expanded mandates

- 28.59 As shown in table 28.8 (1), resource changes reflect an increase of \$237,900, as follows:
- (a) **Subprogramme 1, Campaigns and country operations services** (increase of \$214,800). The increase relates to:
 - (i) Non-post resources under contractual services of \$29,800, relating to webcasting services, pursuant to General Assembly resolutions [78/20](#) and [78/238](#);
 - (ii) Non-post resources totalling \$100,000 (under contractual services of \$40,000 and under supplies and materials of \$60,000), relating to the translation of promotional products, the coordination of communications work and promotional activities across the United Nations information centre network for the Fifteenth United Nations Congress on Crime Prevention and Criminal Justice, pursuant to Assembly resolution [78/223](#);
 - (iii) Non-post resources totalling \$85,000 (under contractual services of \$45,000 and under supplies and materials of \$40,000), relating to the translation of promotional products, the creation of videos, the creation of digital and branding assets and promotional activities across the United Nations information centre network for the fourth International Conference on Financing for Development, pursuant to Assembly resolution [78/271](#);
 - (b) **Subprogramme 2, News services** (increase of \$23,100). The increase relates to non-post resources under contractual services, relating to webcasting services, pursuant to Assembly resolutions [78/271](#), [78/47](#) and [77/335](#).

Other assessed resources

- 28.60 As reflected in tables 28.8 (2) and 28.9 (2), other assessed resources amount to \$868,300. The resources would complement regular budget resources and provide for the requirements indicated in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2024 to 30 June 2025 ([A/78/746](#)).

Extrabudgetary resources

- 28.61 As reflected in tables 28.8 (3) and 28.9 (3), extrabudgetary resources amount to \$15,415,500. The resources would complement regular budget resources and would be used to provide for seven posts (1 P-3 and 6 GS (OL)) and non-post resources that would be used to support the Department's capacity-development work; support specific communications campaigns at Headquarters and in the field; support multimedia and operational activities in Hindi; provide webcast and website support activities; and conduct activities in support of United Nations Development Business, United Nations Academic Impact and United Nations System Electronic Information Acquisition Consortium programmes, and the United Nations presence at Expo 2025 in Osaka, Japan.
- 28.62 The extrabudgetary resources under the present section are subject to the oversight of the Department, which has delegated authority from the Secretary-General.

Executive direction and management

- 28.63 The executive direction and management component comprises the Office of the Under-Secretary-General.
- 28.64 The main responsibilities of the executive direction and management component include:
- (a) The overall direction and strategic management of United Nations communications in the implementation of the Department's mandates and its approved programme of work, both at Headquarters and in the field;

- (b) The establishment of departmental strategy, policies and guidelines, while dealing with specific policy and management issues and problems;
 - (c) The administrative, financial and personnel management of the Department;
 - (d) The direction of liaison functions performed by the Department with regard to intergovernmental bodies, such as the Committee on Information, and with the United Nations Communications Group;
 - (e) Oversight of crisis communications and reputation management, convening relevant United Nations entities and partners within crisis cells to align approaches and messaging, and providing crisis communications policy, guidance and training;
 - (f) The establishment of United Nations communications priorities, identifying opportunities to communicate about these within a congested media landscape, and providing coordination across the United Nations system by strengthening the United Nations Communications Group, including at the country level through United Nations information centres and the resident coordinator system;
 - (g) The promotion of information integrity in public information, including the monitoring and analysis of, and response to, digital content hostile to the United Nations, its staff and operations.
- 28.65 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), the Department is integrating environmental management practices into its operations. The Department will, where feasible and effective, continue to make all official documentation, publications, brochures, and communications and advocacy materials available online, rather than in print, in order to reduce its carbon footprint and save energy. It will also continue to adopt a range of sustainability practices, including reducing the photocopying and printing of internal documents, and will promote videoconferencing, in order to reduce the travel undertaken, where possible. The Department will also continue to support internal and external communications on United Nations system sustainability efforts and will encourage staff to join the ActNow campaign and other Secretariat initiatives focused on individual action related to climate change and sustainability.
- 28.66 Information on the timely submission of documentation and advance booking for air travel is reflected in table 28.11. With regard to the advance booking for air travel, the Department has implemented the requirement for the traveller to request approval from the Under-Secretary-General for Global Communications for cases that do not comply with the policy and to provide a reason for the delayed request and justification for travel. In addition, the Department closely reviews the exceptions sought and regularly sends communications to directors, managers and staff to raise awareness of the policy requirement and the importance of minimizing the instances of exceptions.

Table 28.11

Compliance rate

(Percentage)

	2021 <i>actual</i>	2022 <i>actual</i>	2023 <i>actual</i>	2024 <i>planned</i>	2025 <i>planned</i>

Overview

Mandates and background

- 29.1 The overall purpose of section 29, Management and support services, the responsibility for which is vested in the Department of Management Strategy, Policy and Compliance, the Department of Operational Support, the Office of Information and Communications Technology and the administrative services of the United Nations Office at Geneva, the United Nations Office at Vienna and the United Nations Office at Nairobi, is to enhance the accountability and efficiency of the Organization in managing its resources in four broad management areas, namely, finance, human resources, information and communications technology and support services, including procurement and infrastructure; to provide support services to the intergovernmental processes of the Organization; to secure financing for the mandated programmes and activities of the Secretariat; and to support the implementation of those programmes and activities.
- 29.2 The departments and offices under section 29 derive their mandates and guidance from relevant articles of the Charter of the United Nations, specifically Articles 8, 17, 97, 100 and 101, as well as the Financial Regulations and Rules of the United Nations; the Staff Regulations and Rules of the United Nations; the Regulations and Rules Governing Programme Planning, the Programme Aspects of the Budget, the Monitoring of Implementation and the Methods of Evaluation; and General Assembly resolutions as included in the relevant components.
- 29.3 Details on the composition of the deliverables proposed under section 29, together with their specific objectives, planned results and the related resource requirements, are contained in subsections 29A to 29F.
- 29.4 Summaries of the overall resource requirements for section 29 are set out in the table below.

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 29A.1 The Department of Management Strategy, Policy and Compliance is responsible for policy leadership in all management areas through the provision of a clear, integrated global management strategy and policy framework and through strengthened monitoring, evaluation and accountability mechanisms. The Department is also responsible, jointly with the Department of Operational Support, for managing the activities of the Office of Information and Communications Technology. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolutions [72/266 A](#), [72/266 B](#), [72/254](#) and [73/281](#). The Department plays an integral role in realizing the Secretary-General's new management paradigm, with an emphasis on transparency, accountability and decision-making that is closer to points of delivery.

Strategy and external factors for 2025

- 29A.2 The strategy for 2025 includes continuing to advance the management paradigm through an integrated approach, with four already existing interlinked pillars: the enterprise resource planning solution; programme planning, finance and budget; human resources; and business transformation and accountability. Addressing racism and racial discrimination has emerged as the fifth pillar. The Department will:
- (a) Commit to new internal ways of working, including through the formulation of holistic policies and approaches that foster the achievement of tangible results, including through renewed investment in technology and a commitment to continuous improvement;
 - (b) Strengthen the Organization's resilience, including its preparedness to maintain business continuity in emergencies and to continually adapt to changing environments, risks and opportunities;
 - (c) Drive results-based management policies and practices into the daily functioning and culture of the Organization, together with an integrated cycle of planning, risk and performance management, and evaluation;
 - (d) Foster greater transparency and accountability to engender greater credibility and trust in the capabilities of the United Nations as an organization, by both the Member States and the people whom it serves;
 - (e) Enhance data analysis and reporting capabilities that enable real-time, user-friendly access to data to support informed decision-making and improved management of risks to achieve the objectives of the United Nations;
 - (f) Create a collaborative and inclusive environment through integrated solutions and strategic partnerships throughout the United Nations system;
 - (g) Work towards the implementation of a dynamic human resources strategy that fosters greater workforce diversity, supports managers in finding the right people, provides a strengthened learning framework, supports the development of new competencies, talents and strengthened multilingualism, ensures a civil and safe work environment and promotes a culture of continuous learning, innovation and improvement to actively build a better United Nations;
 - (h) Address racism and racial discrimination more directly and effectively in the Secretariat by encouraging reporting, enhancing accountability, monitoring and transparency, and periodically reporting on progress in addressing the issue and on efforts towards racial diversity, equity and inclusion.

- 29A.3 The Department will continue to provide leadership in the development and delivery of integrated organizational management strategies, policies and models supporting a decentralized, field-focused paradigm in which managers are empowered through the enhanced delegation of authority framework. It will liaise with Member States and other external entities on management-related issues and foster coordination within the Secretariat, as well as with the funds, programmes and specialized agencies of the United Nations system, to build partnerships and promote best practices.
- 29A.4 Having laid the foundation for greater decentralization, the main challenge will continue to be to accelerate the culture shift required to implement in full the new management paradigm of increased delegation of authority, transparency and accountability and a culture of continuous learning.
- 29A.5 The Department will continue to enable business transformation that leverages current and future trends in enterprise resource planning solutions. The Umoja solution and its accompanying business intelligence framework will allow the Department to respond to organizational requirements for better and more timely decision-making, enhanced accountability systems and the rapid adoption of newly identified best practices, as well as strengthened support for real-time data access, augmented and predictive analytics and planning and monitoring capabilities.
- 29A.6 With regard to cooperation with other entities, the Department will continue to support and work closely with all entities of the Secretariat and build partnerships, internally within the Secretariat and externally with the United Nations system, to find inclusive responses to challenges and develop innovative business models that cater to the evolving and specific requirements of each entity, with an emphasis on the field.
- 29A.7 With regard to inter-agency coordination and liaison, the Department will represent the Secretary-General in inter-agency coordination mechanisms, including the High-level Committee on Management of the United Nations System Chief Executives Board for Coordination.
- 29A.8 With regard to the external factors, the Department considered applicable risks identified in its risk register, and, accordingly, the overall plan for 2025 is based on the planning assumption that all stakeholders will extend their full cooperation and support to the Department in implementing its mandates.
- 29A.9 The Department integrates a gender perspective into its operational activities, deliverables and results, as appropriate. The Department will play a leadership role in driving the Secretary-General's system-wide strategy on the future of work and continues to support efforts to achieve gender parity and address sexual harassment in the workplace. Furthermore, the Department will work towards the equitable geographical distribution of Member States in the Secretariat workforce and prioritize the integration of environmental sustainability and resilience management into the strategies, policies and compliance and reporting frameworks of the Organization. Through its policy leadership in these interconnected fields, the Department will foster a change in culture at all levels of the Secretariat.
- 29A.10 In line with the United Nations Disability Inclusion Strategy, the Department will continue to elevate awareness of disability inclusion within it and support entities by mainstreaming disability inclusion into human resources strategy and policy, in particular in the areas of leadership, inclusiveness and organizational culture, which are core areas of the Strategy.

Legislative mandates

- 29A.11 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

52/12 A and B	Renewing the United Nations: a programme for reform	58/280	Review of duplication, complexity and bureaucracy in United Nations administrative processes and procedures 2005 World Summit Outcome
58/269	Strengthening of the United Nations: an agenda for further change	60/1	

61/245	Comprehensive review of governance and oversight within the United Nations and its funds, programmes and specialized agencies	78/244 78/252	Programme planning Questions relating to the proposed programme budget for 2024
72/266 A and B; 73/281 77/267	Shifting the management paradigm in the United Nations Shifting the management paradigm in the United Nations: review of changes to the budgetary cycle	78/253	Special subjects relating to the proposed programme budget for 2024

Subprogramme 1

Enterprise resource planning solution, services to the Fifth Committee of the General Assembly and to the Committee for Programme and Coordination, and management advisory services

Component 1

Enterprise resource planning solution

General Assembly resolutions

60/260	Investing in the United Nations for a stronger Organization worldwide	63/262	Information and communications technology, enterprise resource planning, and security, disaster recovery and business continuity
60/283	Investing in the United Nations for a stronger Organization worldwide: detailed report		

Component 2

Services to the Fifth Committee of the General Assembly and to the Committee for Programme and Coordination

Charter of the United Nations

Chap. IV, Art. 17 Functions and powers of the General Assembly

General Assembly resolution

45/248 B, sect. VI Questions relating to the programme budget for the biennium 1990–1991

Economic and Social Council resolution

920 (XXXIV) Special Committee on coordination with particular emphasis on the United Nations Development Decade

Component 3

Management advisory services

General Assembly resolutions

69/273	Procurement	77/260	Administration of justice at the United Nations
72/219	Protection of global climate for present and future generations of humankind	76/246 B	Special subjects relating to the programme budget for 2022

Subprogramme 2

Programme planning, finance and budget

Component 1

Finance

General Assembly resolutions

60/283	Investing in the United Nations for a stronger Organization worldwide: detailed report	77/2	Scale of assessments for the apportionment of the expenses of the United Nations: requests under Article 19 of the Charter
76/272	Improving the financial situation of the United Nations	78/242	Financial reports and audited financial statements, and reports of the Board of Auditors

**Component 2
Field operations finance**

General Assembly resolutions

60/283	Investing in the United Nations for a stronger Organization worldwide: detailed report	76/239	Scale of assessments for the apportionment of the expenses of United Nations peacekeeping operations
73/307	Improving the financial situation of the United Nations	78/242	Financial reports and audited financial statements, and reports of the Board of Auditors

**Component 3
Programme planning and budgeting**

General Assembly resolutions

2617 (XXIV)	Study of the nature of the increases in the level of expenditure in the United Nations regular budget	42/211	Implementation of General Assembly resolution 41/213
41/213; 60/254	Review of the efficiency of the administrative and financial functioning of the United Nations	55/231	Results-based budgeting

**Subprogramme 3
Human resources**

General Assembly resolutions

52/252	Revisions to article I of the Staff Regulations and chapter I of the 100 series of the Staff Rules of the United Nations	61/274	Comprehensive proposal on appropriate incentives to retain staff of the International Criminal Tribunal for Rwanda and the International Tribunal for the Former Yugoslavia
58/144	Improvement of the status of women in the United Nations system		
61/262	Conditions of service and compensation for officials other than Secretariat officials: members of the International Court of Justice and judges and ad litem judges of the International Tribunal for the Former Yugoslavia and the International Criminal Tribunal for Rwanda	63/271 68/265 71/263; 72/254; 77/278 74/254 75/245 A; 77/256 78/275	Amendments to the Staff Regulations Mobility framework Human resources management Seconded active-duty military and police personnel United Nations common system Amendments to the Staff Regulations and Rules

**Subprogramme 4
Business transformation and accountability**

General Assembly resolutions

59/272	Review of the implementation of General Assembly resolutions 48/218 B and 54/244	63/276	Accountability framework, enterprise risk management and internal control framework and results-based management framework
61/245	Comprehensive review of governance and oversight within the United Nations and its funds, programmes and specialized agencies	64/259 70/255	Towards an accountability system in the United Nations Secretariat Progress towards an accountability system in the United Nations Secretariat

**Subprogramme 5
Addressing racism in the workplace**

General Assembly resolution

76/271	Addressing racism and promoting dignity for all in the United Nations Secretariat
--------	---

Deliverables

29A.12 Table 29A.1 lists all cross-cutting deliverables of the programme.

Table 29A.1

Cross-cutting deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	10	18	10	10
Meetings of:				
1. The Fifth Committee of the General Assembly	4	9	4	4
2. The Special Committee on Peacekeeping Operations	1	1	1	1
3. The Advisory Committee on Administrative and Budgetary Questions	4	6	4	4
4. The Committee for Programme and Coordination	1	2	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: consultation with Member States on matters relating to the work of the Department.				
D. Communication deliverables				
Outreach programmes, special events and information materials: information and engagement events; articles and videos; and newsletters.				
Digital platforms and multimedia content: websites and social media accounts of the Department.				
E. Enabling deliverables				
Administration: 6 meetings of the Management Client Board and 2 meetings of the Arts Committee.				

Evaluation activities

29A.13 An evaluation on the efficacy of the Management Client Board by the Department of Management Strategy, Policy and Compliance and the Department of Operational Support was completed in 2023. The results of the evaluation and final report were shared with the Board and are being used to inform future planning of the activities of the Board.

29A.14 A joint evaluation by the Department of Management Strategy, Policy and Compliance, the Department of Operational Support and the Office of Information and Communications Technology on information and communications technology security, which is to begin in 2024, will continue and be completed in 2025.

Programme of work

Subprogramme 1

Enterprise resource planning solution, services to the Fifth Committee of the General Assembly and to the Committee for Programme and Coordination, and management advisory services

Component 1

Enterprise resource planning solution

Objective

29A.15 The objective, to which this component contributes, is to improve the management of the Organization's resources for its work in line with mandates.

Strategy

29A.16 To contribute to the objective, the component will:

- (a) Support business transformation in the areas of programme planning, programme management, the monitoring of programme delivery, and data and business analytics by harmonizing processes and practices and using modern technology;
- (b) Support the Organization by building on its business intelligence platforms to support access to real-time data, augmented and predictive analytics, including machine learning and natural language processing, and planning capabilities;
- (c) Support, monitor and upgrade the Umoja system to meet evolving business needs through continuous improvements directed by the business and work with business areas, to translate requirements into integrated functional solutions that are built, whenever possible, through out-of-the-box solutions that have sustainable road maps and meet Umoja architectural standards.

29A.17 The above-mentioned work is expected to result in:

- (a) A more efficient and transparent management of the Organization's financial, human and physical resources;
- (b) Effective and timely decision-making by management informed by advanced analytics;
- (c) Rapid adoption and application of newly identified best practices by the Organization;
- (d) The continued effective operation of the Organization and of flexible working arrangements, given that Umoja functionality will underpin the Organization's work.

Programme performance in 2023

Advanced analytics made available to Member States and staff

29A.18 Umoja Analytics enables internal and external stakeholders, including Member States, to gain access to richer data with greater ease of use and sophistication. In 2023, the component deployed the United Nations Secretariat workforce portal to all Member States. Additional features that provide more information on letters of assist and death and disability claims were added to the Member States uniformed capabilities support portal. In addition, Umoja self-service analytics was rolled out to all Secretariat entities. The component trained more than 1,200 users in the new tool to enable staff to gain access to data and create visualizations without relying on technical experts.

29A.19 Progress towards the objective is presented in the performance measure below (see table 29A.2).

Table 29A.2

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
–	–	<p>Approximately 900 Member State users have access to Secretariat data through Umoja Analytics</p> <p>Secretariat staff have access to Umoja self-service analytics. Users trained by the component developed tailored dashboards</p>

Planned results for 2025

Result 1: improved stability, security and user experience in Umoja

Programme performance in 2023 and target for 2025

- 29A.20 The component work contributed to users benefiting from improved stability and security in Umoja through the Umoja upgrade activities relating to SAP ERP 6.0 enhancement package 8, such as the completion of unit testing and product integration testing, which met the planned target.
- 29A.21 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29A.3).

Table 29A.3
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Document management upgrade, reporting solutions upgrades, increased security through Azure authentication, reinforced disaster recovery mechanisms and additional software upgrades	Umoja Change Board endorsed the detailed project plan for the implementation of enhancement package 8 Multi-factor authentication and regular upgrades ensuring resilience to security threats enabled strengthened security for the Umoja application	Users benefited from improved stability and security in Umoja, enabled through completed upgrade activities	All users will continue to benefit through implemented upgrades, including enhancement package 8 and related software dependencies	Users benefit from implemented upgrades that protect digital assets and improve the widespread availability of Umoja

Result 2: digital transformation and innovations through Umoja for more effective decision-making

Programme performance in 2023 and target for 2025

- 29A.22 The component’s work contributed to the availability of additional innovative features and enhancements driven by business needs, including a digital staff data certification application that provides staff with the ability to update and validate their data through employee self-service in Umoja, which met the planned target.
- 29A.23 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29A.4).

Table 29A.4
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
The enterprise risk management module was available to six pilot entities to enable the further realization of benefits of the Secretary-General's reform strategy and the Secretary-General's statement of internal control	<p>Improvements to the financial statement process related to after-service health insurance, including system enhancements to enable the migration into Umoja of locally recruited former staff participating in after-service health insurance under the medical insurance plan</p> <p>The process control module was available to further support the Secretary-General's initiative to implement the statement of internal control, an important milestone towards achieving accountability for results</p>	Availability of digital staff data certification application	Availability of additional innovative features and enhancements driven by business needs and based on the most recent technology road maps, contributing to an effective functioning of the Organization's business processes	Improved user experience through Umoja user experience 2.0, resulting in an intuitive application for staff and Member States

Result 3: data-driven actionable insights through NextGen Analytics

Proposed programme plan for 2025

29A.24 The subprogramme develops and deploys Member State portals using near real-time data, such as in the United Nations Secretariat Workforce Portal and the Uniformed Capabilities Support Portal, in addition to several enterprise dashboards and reports for programme managers and self-service analytics for Secretariat users at large through Umoja Analytics.

Lessons learned and planned change

29A.25 The lesson for the component was that there were substantial opportunities for enhancing decision-making by leveraging data more effectively. In applying the lesson, the component will roll out NextGen features of Umoja Analytics such as planning analytics, predictive analytics and augmented analytics, which will benefit and support Member States and Secretariat users in improving data-driven decision-making in areas such as management of liquidity, geographical distribution of staff, gender parity and workforce planning for future capability needs. This planned development will further empower users to gain access to data seamlessly and gain actionable insights through interactive visualizations to support effective mandate delivery.

29A.26 Expected progress towards the objective is presented in the performance measure below (see table 29A.5).

Table 29A.5
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	–	Pilot availability of advanced features provided by NextGen Umoja Analytics	Users utilize NextGen Umoja Analytics for improved data-driven decision-making

Deliverables

29A.27 Table 29A.6 lists all deliverables of the component.

Table 29A.6
Subprogramme 1, component 1: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	1
1. Progress report on the status of the functioning and development of the enterprise resource planning system	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	3	3	3	3
2. Meetings of the Fifth Committee of the General Assembly	2	2	2	2
3. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
E. Enabling deliverables				
Administration: consultations with client groups, through the governance mechanisms and informally, on continuous improvements in the system to meet their business needs; Umoja Change Board meetings and informal exchanges; meetings with the Management Committee, Management Client Board and Information and Communications Technology Steering Committee; global information sessions for Secretariat staff; approximately 12 release notes on changes to Umoja; and approximately 6 internal broadcasts, including news articles on Umoja upgrades.				
Information and communications technology: the Umoja system and service desk tier 3 support.				

Component 2 Services to the Fifth Committee of the General Assembly and to the Committee for Programme and Coordination

Objective

29A.28 The objective, to which this component contributes, is to facilitate effective and efficient deliberations and decision-making by the Fifth Committee of the General Assembly and the Committee for Programme and Coordination.

Strategy

29A.29 To contribute to the objective, the component will:

- (a) Improve communication on organizational and procedural aspects of meetings;

(b) Enhance substantive, technical and secretariat support to the Member States and other participants in the meetings.

29A.30 The above-mentioned work is expected to result in the smooth conduct of meetings of the intergovernmental bodies serviced.

Programme performance in 2023

Members of the Fifth Committee and the Committee for Programme and Coordination continue to receive timely information and services

29A.31 In 2023, the component continued to leverage tools available, in particular in Fifth Committee Place and CPC Place in the e-deleGATE platform, to improve the servicing of both bodies. This included the continued use of modules on the platform and the testing of new modules for possible use in 2024. The component has also increased the information available in these two places in response to requests received from members. This includes access to information relating to candidatures and the results of elections and appointments as soon as they became available to the Secretariat.

29A.32 Progress towards the objective is presented in the performance measure below (see figure 29A.I).

Figure 29A.I

Performance measure: Member States' delegates who were either "very satisfied" or "satisfied" regarding the content of Fifth Committee Place or CPC Place

(Percentage)

Planned results for 2025

Result 1: enhanced accessibility of election- and appointment-related information to Member States

Programme performance in 2023 and target for 2025

29A.33 The component's work contributed to a 93.2 per cent satisfaction rate of Fifth Committee members with the election- and appointment-related information available to Member States, which met the planned target.

29A.34 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29A.7).

Table 29A.7
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Informal feedback and observations received from Member States	An 87.9 per cent satisfaction rate of Fifth Committee members on the election- and appointment-related information available to Member States	A 93.2 per cent satisfaction rate of Fifth Committee members with the election- and appointment-related information available to Member States	Maintained positive feedback on the availability of election- and appointment-related information	Maintained positive feedback on the availability of election- and appointment-related information

Result 2: improved access to effective advice on rules, procedures, precedence, practice and working methods**Programme performance in 2023 and target for 2025**

29A.35 The subprogramme's work contributed to 92 per cent positive feedback from Fifth Committee members and 97 per cent positive feedback from Committee for Programme and Coordination members on the accessibility of the component's staff and the effectiveness of the services provided, including advice on rules, procedures, precedence, practice and working methods of the Committees, which met the planned target.

29A.36 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29A.8).

Table 29A.8
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	Positive survey results on the accessibility of the component's staff and the effectiveness of the services provided	Positive survey results on the accessibility of the component's staff and the effectiveness of the services provided	Maintained positive survey results on the accessibility of the component's staff and the effectiveness of the services provided	Maintained positive survey results on the accessibility of the component's staff and the effectiveness of the services provided
	Fifth Committee of the General Assembly: 100 per cent	Fifth Committee of the General Assembly: 92 per cent		
	Committee for Programme and Coordination: 94 per cent	Committee for Programme and Coordination: 97 per cent		

Result 3: improved access to information, including pre-sessional information, for members of the Fifth Committee and the Committee for Programme and Coordination**Proposed programme plan for 2025**

29A.37 The Fifth Committee and the Committee for Programme and Coordination have a high volume of items that they must consider during the limited time available for the sessions. Improved access to

information on the agenda items and on the availability of documentation is provided to assist members in planning and undertaking preparatory work.

Lessons learned and planned change

- 29A.38 The lesson for the component, on the basis of feedback received, was that members wanted to obtain, for planning purposes, information on what agenda items and reports would be taken up as early as possible and when those documents would become available. In applying the lesson, the component, informed by a review of the ways and means by which information was being made available to members, will make information more accessible, including by providing early information and identifying additional tools to facilitate easy access by members.
- 29A.39 Expected progress towards the objective is presented in the performance measure below (see table 29A.9).

Table 29A.9
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Positive survey results on the availability of preparatory and reference material	Maintained positive survey results on the availability of preparatory and reference material	Maintained positive survey results on the availability of preparatory and reference material
		Fifth Committee of the General Assembly: 100 per cent		
		Committee for Programme and Coordination: 100 per cent		

Deliverables

- 29A.40 Table 29A.10 lists all deliverables of the component.

Table 29A.10
Subprogramme 1, component 2: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	247	239	247	232
1. Notes on the programme of work of the Fifth Committee of the General Assembly	125	128	125	125
2. Notes on the status of documentation of the Fifth Committee of the General Assembly	40	20	40	25
3. Procedural notes for the Chair of the Fifth Committee of the General Assembly	40	46	40	40
4. Notes on the programme of the work of the Committee for Programme and Coordination	20	24	20	20
5. Notes on the status of documentation of the Committee for Programme and Coordination	2	2	2	2
6. Procedural notes for the Chair of the Committee for Programme and Coordination	20	19	20	20
Conference and secretariat services for meetings (number of three-hour meetings)	200	181	200	200
7. Meetings of the Fifth Committee of the General Assembly	160	137	160	160

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
8. Meetings of the Committee for Programme and Coordination	40	44	40	40

D. Communication deliverables

Digital platforms and multimedia content: websites of the Fifth Committee of the General Assembly and the Committee for Programme and Coordination; and updates of information on e-deleGATE.

E. Enabling deliverables

Consultation, advice and advocacy: advice to 15 Bureau members; consultation and advice to approximately 100 coordinators; and response to queries from and provision of advice to individual delegations on historical proceedings of the 2 Committees.

Component 3 Management advisory services

Objective

29A.41 The objective, to which this component contributes, is to advance the transparency of administrative decision-making, fairness, integrity and the resilience of the Organization to deliver on its mandates.

Strategy

29A.42 To contribute to the objective, the component will:

- (a) Strengthen the Organization’s resilience, including its preparedness to maintain business continuity in emergencies and to continually adapt to changing environments, risks and opportunities;
- (b) Improve the overall quality of the acquisition process and reflect those improvements in substantive policy and guidance-related recommendations, including through the use of data analytics;
- (c) Objectively analyse the facts presented in requests for a management evaluation vis-à-vis the legal framework of the Staff Regulations and Rules of the United Nations and provide the requesting staff member with a reasoned, comprehensive evaluation conveying the basis for the recommendation of the Management Advice and Evaluation Section on the case.

29A.43 The above-mentioned work is expected to result in:

- (a) A more resilient, agile and sustainable Organization and an innovative and thriving workforce that delivers results;
- (b) An Organization better prepared for complex and long-term emergencies;
- (c) A strengthened acquisition and asset disposal process;
- (d) The early resolution of disputes that arise from decisions taken in the Administration on a staff member’s employment;
- (e) Greater staff awareness of the internal justice system.

Programme performance in 2023

Timely resolution of disputes from management evaluation requests relating to mission drawdown

29A.44 The drawdown of the United Nations Multidimensional Integrated Stabilization Mission in Mali created an urgency in 2023 for the component to apply lessons learned from previous drawdown

exercises in processing management evaluation requests. In 2023, the component initiated preparation as soon as the impending start of the Mission's drawdown had been communicated; conducted more robust communication with clients regarding the retention of staff in accordance with the Organization's legal framework enabling improved retention efforts; and increased coordination and scenario planning with counterparts in the Department of Operational Support and the Office of Human Resources, which resulted in an improved management evaluation request resolution rate.

29A.45 Progress towards the objective is presented in the performance measure below (see table 29A.11).

Table 29A.11

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
63 per cent of management evaluation requests relating to field mission closure finalized within the prescribed time frame	–	80 per cent of cases relating to field mission closure finalized within the prescribed time frame

Planned results for 2025**Result 1: recommendations of the Headquarters Committee on Contracts accepted by the delegated officials****Programme performance in 2023 and target for 2025**

29A.46 The component's work contributed to 99 per cent of recommendations accepted by the delegated officials, which exceeded the planned target.

29A.47 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 29A.II).

Figure 29A.II

Performance measure: percentage of recommendations accepted by the delegated officials**Result 2: early resolution of staff-related disputes without proceeding to litigation****Programme performance in 2023 and target for 2025**

29A.48 The component's work contributed to 82 per cent of cases subject to management evaluation not proceeding to litigation, which exceeded the planned target of 65 per cent.

29A.49 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29A.12).

Table 29A.12
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
85 per cent of cases submitted for management evaluation did not proceed to the United Nations Dispute Tribunal for formal litigation	71 per cent of cases submitted for management evaluation did not proceed to the United Nations Dispute Tribunal for formal litigation	82 per cent of cases submitted for management evaluation did not proceed to the United Nations Dispute Tribunal for formal litigation	More than 65 per cent of cases result in an early resolution of staff-related disputes and prevention of unnecessary litigation	More than 65 per cent of cases result in an early resolution of staff-related disputes and prevention of unnecessary litigation

Result 3: organizational resilience management system is institutionalized in United Nations system organizations

Proposed programme plan for 2025

29A.50 The United Nations organizational resilience management system is composed of seven core elements, ranging from information and communications technology resilience to emergency medical support. With such a broad range of functions and an even broader range of possible emergency situations, the system’s working group members, comprising representatives across the United Nations system, rely heavily on the sharing of information and lessons learned with one another. The component facilitates this information exchange by organizing meetings of the working group and by sharing related policies and practices through an online repository that it developed in 2023.

Lessons learned and planned change

29A.51 The lesson for the component was that the working group members could benefit from spending more time sharing the best practices and lessons learned with one another and less time having outside experts speak at their meetings and develop guidance materials. In applying the lesson, the component will offer more opportunities for working group members to learn from one another.

29A.52 Expected progress towards the objective is presented in the performance measure below (see table 29A.13).

Table 29A.13
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Online organizational resilience management system repository available to enhance information-sharing	United Nations system organizations adopt new practices relating to the organizational resilience management system	United Nations system organizations adopt additional new practices relating to the organizational resilience management system

Deliverables

29A.53 Table 29A.14 lists all deliverables of the component.

Table 29A.14

Subprogramme 1, component 3: deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	–	–	–	1
1. Progress report on the implementation of the organizational resilience management system for consideration by the General Assembly	–	–	–	1
Substantive services for meetings (number of three-hour meetings)	–	–	–	2
2. Meetings of the Fifth Committee of the General Assembly	–	–	–	1
3. Meetings of the Advisory Committee on Administrative and Budgetary Questions	–	–	–	1
E. Enabling deliverables				
Administration: administration of and support for the Management Advice and Evaluation Section’s case management system; training and guidance for members of the 31 local committees on contracts and 35 local property survey boards; and administration and maintenance of online learning tools for local committees on contracts and local property survey boards, and provision of related training and guidance.				
Internal justice and oversight: recommendations on requests for management evaluation of contested administrative decisions; responses to requests for suspension of action in cases involving separation from service of staff members; substantive and technical servicing of the Headquarters Committee on Contracts and the provision of recommendations on proposed procurement awards to the corresponding officials; substantive and technical servicing of the Headquarters Property Survey Board and the provision of recommendations on proposed disposal actions to the corresponding officials; reports on the functioning of the local committees on contracts and local property survey boards; and annual reporting to the United Nations Environment Programme on Secretariat-wide environmental sustainability performance.				

Subprogramme 2 Programme planning, finance and budget

Component 1 Finance

Objective

29A.54 The objective, to which this component contributes, is to secure the financing of the Organization’s expenses, pursuant to Article 17 of the Charter of the United Nations, and to ensure sound, effective and efficient integrated financial management of and reporting on United Nations resources, supported by a strong internal control environment.

Strategy

29A.55 To contribute to the objective, the component will:

- (a) Ensure the proper application of the Financial Regulations and Rules of the United Nations, adapt policies relating to financial matters in response to emerging issues and continue to strengthen the system of internal controls in support of the prudent management of resources in the context of the decentralized delegation of authority framework;
- (b) Provide effective support to the Committee on Contributions, ensure the timely issuance of assessments, continue to provide up-to-date information on the status of assessed contributions

and closely monitor and forecast the collection of assessments and manage cash outflows on the basis of liquidity forecasts;

- (c) Prepare International Public Sector Accounting Standards (IPSAS)-compliant financial statements for the Organization, focusing on transparency, by incorporating a financial discussion and an analysis statement, as well as ensuring that all entities are appropriately guided in year-end requirements for the preparation of financial statements and are supported in the establishment, management and reporting of the extrabudgetary funds of the Organization;
- (d) Manage financial risks through sound investment management, global cash management and global banking management;
- (e) Coordinate and manage the group health and life insurance programmes and provide services to the Advisory Board on Compensation Claims and the United Nations Claims Board, and administer the related compensation payments;
- (f) Provide governance of master data to ensure the integrity, standardization and harmonization of data across the enterprise resource planning system and the other enterprise systems of the Organization;
- (g) Provide procedures, guidance and support for Umoja finance processes to ensure effective and efficient financial management.

29A.56 The above-mentioned work is expected to result in:

- (a) Prudent financial management of the resources entrusted to the Secretariat;
- (b) A strengthened system of internal controls that supports better programme performance management and compliance with the regulatory framework;
- (c) Increased transparency and simplification of financial processes and reporting;
- (d) Better positioning of the Organization to respond to external shocks.

Programme performance in 2023

Increased visibility of the status of contributions for Member States through the contributions portal

29A.57 Following the launch of the status of contributions portal in 2010 and the migration to Umoja in 2020, in 2023 the component began to further improve the Member States contributions portal. The current online platform contains comprehensive and up-to-date financial data extracted from Umoja on the status of contributions assessed to Member States.

29A.58 Progress towards the objective is presented in the performance measure below (see table 29A.15).

Table 29A.15
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
–	–	Timely and comprehensive information on status of contributions accessible to Member States

Planned results for 2025

Result 1: strengthened regulatory framework to improve accountability across United Nations operations

Programme performance in 2023 and target for 2025

- 29A.59 The component's work contributed to positive feedback in the context of the self-assessment questionnaire and assurance statement on the functioning of the internal control framework and its impact on the effective and efficient delivery of mandates and the issuance of the third iteration of the statement on internal control for 2022 operations, which met the planned target. The planned target of positive feedback on the impact of the revised policy on the effective management of financial resources was not met because revisions to key policy instruments were in progress and additional time was needed before conducting a survey of the impact resulting from such revised instruments.
- 29A.60 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29A.16).

Table 29A.16

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Identification and prioritization for streamlining and updating financial policy instruments	Positive feedback on the functioning of the internal control framework and its impact on the effective and efficient delivery of mandates	Positive feedback on the functioning of the internal control framework and its impact on the effective and efficient delivery of mandates	Strengthened management of financial resources through harmonization and implementation of financial policies	Strengthened management of financial resources through continuous revisions to financial policy instruments

Result 2: Finance Knowledge Gateway: an integrated digital platform and United Nations global community for Umoja finance users

Programme performance in 2023 and target for 2025

- 29A.61 The component's work contributed to 2,404 visits to the Finance Knowledge Gateway platform, which exceeded the planned target of 2,279.
- 29A.62 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 29A.III).

Figure 29A.III
Performance measure: increased use of the Finance Knowledge Gateway platform to resolve finance-related issues

(Number of site visits to the Finance Knowledge Gateway platform)

Result 3: improved client experience with United Nations global payment systems

Proposed programme plan for 2025

29A.63 Recognizing the evolving global payments landscape, the United Nations Treasury is committed to optimizing financial operations. The component provides support to United Nations funds, programmes and Member States with respect to diverse payment methods and cross-currency transactions.

Lessons learned and planned change

29A.64 The lesson for the component was the importance of adapting to emerging financial technologies and optimizing processes for increased efficiency. In applying the lesson, the component will leverage innovative solutions to streamline global banking relationships. This includes an emphasis on the integration of local cashiers into a round-the-clock organizational capacity. Moreover, the introduction of debit cards and digital wallets will be strategically implemented to augment accessibility and convenience, thereby reducing the reliance on traditional cash for official transactions.

29A.65 Expected progress towards the objective is presented in the performance measure below (see figure 29A.IV).

Figure 29A.IV
Performance measure: number of individual clients using debit cards and digital wallets as a preferred mode of payment

Deliverables

29A.66 Table 29A.17 lists all deliverables of the component.

Table 29A.17

Subprogramme 2, component 1: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	11	11	11	12
1. Annual financial reports to the General Assembly	2	2	2	2
2. Reports on multi-year payment plans and the financial situation of the United Nations to the General Assembly	3	3	3	3
3. Report on improving the financial situation of the United Nations to the General Assembly	–	–	–	1
4. Financial statements on United Nations peacekeeping and non-peacekeeping operations to the General Assembly	6	6	6	6
Substantive services for meetings (number of three-hour meetings)	22	22	22	22
5. Meetings of the Fifth Committee of the General Assembly	18	18	18	18
6. Meetings of the Investment Committee	4	4	4	4
Conference and secretariat services for meetings (number of three-hour meetings)	20	15	31	20
7. Meetings of the Committee on Contributions	20	15	31	20
B. Generation and transfer of knowledge				
Seminars, workshops, fellowships and training events (number of days)	20	20	20	20
8. Medical insurance plan training events, information sessions and workshops	20	20	20	20
Technical materials (number of materials)	825	862	780	855
9. Monthly reports on the status of contributions	12	12	12	12
10. Documents on the assessment of the contributions of Member States to the United Nations	13	14	13	13
11. Donor financial reports	800	836	755	830
C. Substantive deliverables				
Consultation, advice and advocacy: advice to approximately 40 donors on voluntary contribution financial agreements; and ad hoc information on the scale of assessments, peacekeeping financing and the status of contributions.				
E. Enabling deliverables				
Administration:				
Advice to departments and offices on the application of the Financial Regulations and Rules of the United Nations, accounting and financial matters and related systems; advice on IPSAS compliance to the United Nations finance community; monitoring and support for global bank reconciliation processes and global physical and intangible assets analysis, accounting and reporting support; global finance Umoja production support for integrated finance processes, including managing and testing Umoja enterprise resource planning system updates; Umoja finance operational guidance on the Finance Knowledge Gateway, including training materials and videos; processing of approximately 19,000 United Nations Development Programme transactions relating to service clearing accounts; financial management support for the Development Coordination Office and the United Nations Office for Partnerships; and United Nations System Chief Executives Board for Coordination reporting frameworks.				
Assessment calculations for contributions of Member States for the regular budget, peacekeeping operations and the international tribunals; and calculations for credits for peacekeeping operations.				
Guidance on the interpretation of the Financial Regulations and Rules and financial management policies, procedures and guideline instruments; advice on the interpretation of the delegation of authority framework (finance-related); issuance of the statement of internal control and 3 technical documents, guidance and advocacy on the internal control framework and consultations with the Internal Control Advisory Group; roll-out of the Umoja process control module to offices and departments; workshop on cross-cutting analysis on the implementation of internal controls in peacekeeping and non-peacekeeping operations; advice to Member States and United Nations offices on the management of extrabudgetary resources; accounting policies and associated corporate guidance, practices and procedures; 5 workshops on financial matters for chief finance officers and 68 chief administrative officers; reports on cases of fraud and presumptive fraud to the Board of Auditors (twice a year); Umoja finance process documents; maintenance of Umoja finance master data; and Umoja financial help desk and user access provisioning requests for finance roles in Umoja.				

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

Manage bank accounts worldwide, including bank account signatory panels; banking arrangements and contracts; payments for the house bank accounts; records of incoming funds; cash requirements in various currencies; database on banking details of vendors, staff and Member States; management of pooled investments; monthly United Nations operational rates of exchange for 153 currencies; Umoja finance processes; financial applications; SWIFT and global payment data; substantive support for departments on business analysis; health and life insurance policies and related activities; processing of compensation claims under Appendix D to the Staff Rules and the United Nations Claims Board, including payment of benefits; approximately 700 investment settlements; and approximately 5,000 foreign exchange transactions.

Component 2 Field operations finance

Objective

- 29A.67 The objective, to which this component contributes, is to ensure effective and efficient deliberations by Member States on the results to which the field and other Secretariat entities contribute, and on the resources required for the work of those entities in line with their mandates, and to ensure the effective and efficient management of resources.

Strategy

- 29A.68 To contribute to the objective, the component will provide strategic guidance on budgeting and financial stewardship and develop policies, methodologies and tools in that regard, in particular:
- (a) Provide strategic guidance on financial management and financing issues, especially on cross-cutting initiatives affecting field operations, including guidance on formulating human resources requirements, corporate initiatives, financial strength and liquidity and strengthening of internal controls, and timely, high-quality, simplified and action-oriented responses to managers in the field; monitor the liquidity of individual special accounts; and oversee cash-flow and operating reserves for field operations;
 - (b) Provide strategic guidance on global property management and real estate services, including oversight of major construction projects and long-term capital planning;
 - (c) Provide expert advice and guidance on property management and review financial data for accurate recording and for compliance with IPSAS and the established property management performance framework for Secretariat entities, and ensure the central supervision of projects, including by incorporating risk management principles and lessons learned in decision-making.
- 29A.69 The above-mentioned work is expected to result in client entities effectively and efficiently managing their resources within the approved levels, with improved accuracy in forecasts and proposals.

Programme performance in 2023

Improved accuracy of property records enabled through the quality assurance programme

- 29A.70 In 2023, the component updated the quality check dashboard with additional checks relating to equipment and write-off to improve data quality. These efforts contributed to improving the quality of data throughout the end-to-end supply chain, addressing issues in upstream processes and reducing inconsistencies in asset, equipment and inventory records in downstream processes.
- 29A.71 Progress towards the objective is presented in the performance measure below (see table 29A.18).

Table 29A.18
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
Quality assurance programme for assets, equipment, inventory and write-off and disposal processes available for Secretariat entities	Entities utilize the enhanced property management framework of policy, self-assessment and quality assurance measures to strengthen the stewardship of and accountability for United Nations property	Entities consistently employ performance management reviews and data quality assessments to enhance data quality within Umoja to support informed decision-making regarding the acquisition, utilization and disposal of United Nations property

Result 1: independent risk management for global United Nations capital construction projects
Programme performance in 2023 and target for 2025

29A.72 The component’s work contributed to a 97 per cent budget confidence level for the ongoing global United Nations construction project at the United Nations Office at Nairobi, which exceeded the planned target of 60 per cent. The targeted level of budget confidence for projects at the Economic Commission for Africa (60 per cent), the Economic and Social Commission for Asia and the Pacific (60 per cent) and the Economic Commission for Latin America and the Caribbean (50 per cent) were not met owing mainly to difficulties in the solicitation of the main contractor and global supply chain disruptions, which had an impact on the project implementations and related cost confidence levels.

29A.73 Progress towards the objective is presented in the performance measure below (see figure 29A.V). No performance measures are presented for 2025 because the projects are scheduled for completion in 2024.

Figure 29A.V
Performance measure: budget confidence levels for ongoing global United Nations construction projects
(Percentage)

Result 2: smooth deliberations of legislative bodies on special political missions facilitated through proactive servicing

Programme performance in 2023 and target for 2025

- 29A.74 The component’s work contributed to increased clarity and depth of the budget information available to legislative bodies, which met the planned target.
- 29A.75 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29A.19).

Table 29A.19
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Increased amount of written information provided to the Fifth Committee to respond to increased interest	First informal pre-session briefing held for members of the Fifth Committee ahead of the introduction of the budgets of special political missions, contributing to increased ability of legislative bodies to analyse evolving trends in the budgets of special political missions	Increased clarity and depth of the budget information available to legislative bodies	Legislative bodies have access to more timely and richer analysis and data to facilitate smooth deliberations on special political missions	Legislative bodies receive focused, timely information to facilitate smooth deliberations on special political missions

Result 3: coordination and exchanges towards synergy and standardization in facilities management

Proposed programme plan for 2025

- 29A.76 The component engages regularly with facilities managers in offices away from Headquarters and regional commissions to share practices and experiences regarding facilities management.

Lessons learned and planned change

- 29A.77 The lesson for the component was that established mechanisms and frequent exchange among facilities managers were important ways for the identification of good practices and the sharing of experiences. In applying the lesson, the component will ramp up its work in the coordination and organization of experience-sharing forums such as the Inter-Agency Network of Facilities Managers and other real estate and facilities management working groups.
- 29A.78 Expected progress towards the objective is presented in the performance measure below (see table 29A.20).

Table 29A.20
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	–	Meeting of the Inter-Agency Network of Facilities Managers to collect good practices and show opportunities for synergy and standardization in facilities management	Promulgation of good practices and frequent exchanges contribute to synergy and standardization, and showcases opportunities for improved efficiency and effectiveness in facilities management

Deliverables

29A.79 Table 29A.21 lists all deliverables of the component.

Table 29A.21
Subprogramme 2, component 2: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	41	40	41	39
1. Reports to the General Assembly on the proposed budget and budget performance of United Nations peacekeeping operations	22	22	22	21
2. Report to the General Assembly on the updated financial position of closed peacekeeping missions	1	1	1	1
3. Reports to the General Assembly on the final disposition of assets and final performance of peacekeeping missions in liquidation	1	–	1	–
4. Reports to the General Assembly on the administrative and budgetary aspects of the financing of peacekeeping operations	7	7	7	7
5. Notes to the General Assembly on the administrative and budgetary aspects of the financing of peacekeeping operations	4	3	4	4
6. Reports to the General Assembly on estimates in respect of special political missions, good offices and other political initiatives authorized by the General Assembly and/or the Security Council	6	7	6	6
Substantive services for meetings (number of three-hour meetings)	110	72	70	73
7. Meetings of the Fifth Committee of the General Assembly	60	52	45	52
8. Meetings of the Advisory Committee on Administrative and Budgetary Questions	50	20	25	21
C. Substantive deliverables				
Consultation, advice and advocacy: consultations with all Member States on financial matters regarding field operations; specific consultations with all troop- and police-contributing countries on liabilities of missions; and advice to substantive committees of the General Assembly on potential budgetary implications.				
E. Enabling deliverables				
Administration: advice and guidance on budgeting and financial stewardship for 13 active field operations; quarterly payments to troop- and police-contributing countries; formulation of resource requirements to support the assessment and planning for new, expanding, transitioning and liquidating field operations; policy and guidance on property management, including the Property Management Manual and performance monitoring and reporting; supplemental instructions for preparation of IPSAS financial reports on property, plant and equipment; training on property management; advice and support on Umoja relating to property management; and oversight and technical guidance on major capital projects, ongoing maintenance and alteration projects.				

Component 3 Programme planning and budgeting

Objective

29A.80 The objective, to which this component contributes, is to ensure the effective and efficient deliberations by Member States on the results to which the Secretariat contributes, on the translation of mandates into workplans and on the resources required for the work of the Secretariat in line with its mandates, and to ensure the effective and efficient management of resources.

Strategy

29A.81 To contribute to the objective, the component will continue to:

- (a) Issue strategic guidance on the preparation of the programme budget and engage with Member States from the early stages of the budget preparation process;
- (b) Finalize and present to the legislative bodies the Secretary-General's annual programme budgets and the budget of the International Residual Mechanism for Criminal Tribunals, the budget performance reports and other reports on budgetary matters, including statements of programme budget implications and revised programme budget proposals, in accordance with the Financial Regulations and Rules of the United Nations and the Regulations and Rules Governing Programme Planning, the Programme Aspects of the Budget, the Monitoring of Implementation and the Methods of Evaluation;
- (c) Provide substantive services on budgetary matters to the Fifth Committee of the General Assembly, the Committee for Programme and Coordination and the Advisory Committee on Administrative and Budgetary Questions and provide online tools accessible to Member States in order to facilitate deliberations on budgetary matters;
- (d) Provide strategic guidance on budgeting and financial stewardship, including on managing spending authorities, develop policies, methodologies and tools in that regard and provide advice on all budgetary matters.

29A.82 The above-mentioned work is expected to result in:

- (a) Increased transparency and strengthened dialogue between the Secretariat and Member States;
- (b) Effective implementation of programmes while ensuring the prudent use of resources;
- (c) Improved accuracy of programme budgets.

Programme performance in 2023

Spending review improves link between budget input, mandate delivery and results in the Economic and Social Commission for Western Asia

29A.83 In 2023, in response to General Assembly resolution [77/262](#), the process for a spending review was developed and piloted at the Economic and Social Commission for Western Asia (ESCWA). The process, among others, is intended to strengthen the links between the programme plan and budget formulation, thus reinforcing results-based budgeting, and calls for an in-depth review by programme managers of post and non-post resources with a view to optimizing the level and types of resources required for mandate delivery. At ESCWA, the process secured more systematic engagement of programme managers in reviewing financial and human resource performance and applying lessons learned to the budget proposals, resulting in optimized resource proposals for 2024.

29A.84 Progress towards the objective is presented in the performance measure below (see table 29A.22).

Table 29A.22
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
The General Assembly requests the Secretary-General to clearly link the budget inputs to tangible results (resolution 76/245 , para. 21)	The General Assembly requested the Secretary-General to preserve the optimal functioning of all programmes by improving the link between proposed resources and programme delivery (resolution 77/267 , para. 32)	The General Assembly commended the participation of ESCWA in the spending review and confirmed the approach as a reorganization of existing resources to more efficiently deliver on mandates (resolution 78/252 , para. 56)

Planned results for 2025

Result 1: additional opportunity for early engagement by Member States

Programme performance in 2023 and target for 2025

- 29A.85 The component’s work contributed to two rounds of early engagement by Member States to enable smooth deliberations by Member States that culminated in the adoption of the budget resolutions on 22 December, which met the planned target.
- 29A.86 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29A.23).

Table 29A.23
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Two rounds of early engagement sessions with Member States on the implementation of General Assembly resolutions regarding the budget presentation format (February and September)	Early engagement by Member States on the implementation of General Assembly resolutions regarding the budget presentation format (February)	Two rounds of early engagement sessions by Member States on the alignment between budgetary documents and legislative intent (February) and on the proposed programme budget, Advisory Committee on Administrative and Budgetary Questions recommendations and upcoming supplementary budgetary proposals (September)	Two rounds of early engagement sessions by Member States on the implementation of General Assembly resolutions (February) and items to be discussed in the main session (September)	Two rounds of early engagement sessions by Member States on the implementation of General Assembly guidance on the budget proposals (February) and budgetary items to be discussed in the main session, including recosting (September)

Result 2: improved accuracy of budget proposals

Programme performance in 2023 and target for 2025

- 29A.87 The component’s work contributed to the budget reflecting improved accuracy of recosting estimates, which met the planned target.

29A.88 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29A.24).

Table 29A.24
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Budget approved based on standard recosting that relies on the CPI (consumer price index)	Budget approved based on the CPI and tailored recosting for energy and travel	Budget reflecting improved accuracy of recosting estimates, based on the comparison of estimated and actual impact of recosting (A/78/614, annex II)	The application of a tailored recosting to a select group of items results in a lower variance between the estimated and actual impact of recosting	Reduced variances between the estimated and actual impact of recosting

Result 3: enhanced transparency on the programme budget implications process for Member States

Proposed programme plan for 2025

29A.89 It is stipulated in rule 153 of the rules of procedure of the General Assembly that no resolution involving expenditure shall be recommended by a committee for approval by the Assembly unless it is accompanied by an estimate of expenditure prepared by the Secretary-General. Accordingly, the subprogramme reviews approximately 600 draft resolutions and decisions of various intergovernmental bodies every year, informing Member States of whether the adoption of the resolution or decision would entail budgetary implications and, as needed, providing an oral statement or a statement of programme budget implications.

Lessons learned and planned change

29A.90 The lesson for the subprogramme was that ad hoc and last-minute demands for clarity on the programme budget implications process continued to emerge. In applying the lesson, the subprogramme will expand outreach activities to Member States by expanding the audience and frequency of its early briefings, including the provision of guidance material, on the programme budget implications process.

29A.91 Expected progress towards the objective is presented in the performance measure below (see table 29A.25).

Table 29A.25
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	One Main Committee (Fifth Committee) receives a briefing, at its request, on the programme budget implications process	Three Main Committees (Third, Fifth and Sixth Committees) receive a briefing, at their request, on the programme budget implications process	All six Main Committees receive a briefing opportunity early in their sessions on the programme budget implications process	Member States from all six Main Committees have access to information at the start of their session on the programme budget implications process through a detailed guide available on a portal

Deliverables

29A.92 Table 29A.26 lists all deliverables of the component.

Table 29A.26

Subprogramme 2, component 3: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	87	85	84	85
Reports to:				
1. The General Assembly on the proposed programme budget, including programme plan and performance information	48	47	47	47
2. The General Assembly on the proposed budget, revised estimates and performance information for the International Residual Mechanism for Criminal Tribunals	3	3	3	3
3. The General Assembly on revised estimates resulting from resolutions and decisions adopted by the Economic and Social Council and the Human Rights Council	2	2	3	2
4. The General Assembly on the programme budget implications of draft resolutions	10	15	13	15
5. The General Assembly on financial and budgetary matters	24	18	18	18
Substantive services for meetings (number of three-hour meetings)	176	179	202	179
6. Meetings of the Fifth Committee of the General Assembly and the Committee for Programme and Coordination	97	91	107	91
7. Meetings of the Advisory Committee on Administrative and Budgetary Questions	79	88	95	88
B. Generation and transfer of knowledge

8. Oral statements of programme budget implications arising from draft resolutions	110	129	104	129
9. Letters to the Advisory Committee on Administrative and Budgetary Questions on extrabudgetary posts or positions at the level of D-1 and higher	10	22	12	22
10. Guidance material on the programme budget implications process	–	–	–	1
C. Substantive deliverables				
Consultation, advice and advocacy: briefings for Member States on programme planning and budgetary matters, including training sessions for new delegates; advice on potential budgetary implications of approximately 600 draft resolutions and decisions of the Main Committees of the General Assembly; and written responses to the Advisory Committee on Administrative and Budgetary Questions and the Fifth Committee.				
E. Enabling deliverables				
Administration: advice and guidance on budgetary issues and policies relating to programme planning and budgeting for 28 programmes and 41 budget sections.				

Subprogramme 3 Human resources

Component 1 Global strategy and policy

Objective

29A.93 The objective, to which this component contributes, is to ensure a decentralized, agile, field-focused management paradigm for the effective and transparent management of human resources and a high-performing, diverse and engaged workforce.

Strategy

- 29A.94 To contribute to the objective, the component will further develop, update and enhance the recruitment system to ensure that it is effective, fair, efficient and agile and to enable the United Nations to have a diverse workforce and foster a culture of ethics, integrity, transparency and accountability in the Organization. Specifically, the component will:
- (a) Steer efforts for equitable geographical distribution under the system of desirable ranges, in accordance with General Assembly resolution [77/278](#);
 - (b) Provide strategic guidance on human resources supported by an enabling policy framework to fulfil clients' mandates, in which team, individual and organizational performance are aligned and human resources risks are transparently and effectively managed, as characterized by an accountable Organization, and foster innovation as a means of improving programmatic delivery of human resources in support of cultural change across the Organization;
 - (c) Establish strategic policy imperatives anchored in guidance and feedback from entities, in particular from the field, continue to provide authoritative policy interpretation to ensure consistency, fairness and the equitable treatment of staff in the global Secretariat, and oversee the setting of salaries and benefits for locally recruited staff members by applying methodologies established by the International Civil Service Commission;
 - (d) Actively engage on all aspects of relations between staff and management and work with other organizations of the United Nations common system on salaries and allowances to advance the work of the High-level Committee on Management and the Human Resources Network of the United Nations System Chief Executives Board for Coordination, and through the International Civil Service Commission, including by leading the implementation of the United Nations workplace mental health and well-being strategy across the United Nations system;
 - (e) Continue to develop efforts towards mutual recognition over time, which calls for entities within the United Nations common system to operate according to the principle of mutual recognition of best practices in terms of policies and procedures, and lead efforts to enhance harmonization and improve efficiency in the United Nations system;
 - (f) Continue to improve talent management in the Organization and, in particular, work towards implementing the new approach to mobility and organizational learning, adopting approaches that incorporate new values and behaviours into talent management, ensuring the universality of candidate assessment methods and strengthening the performance management framework;
 - (g) Inform talent management actions, such as the upskilling of staff or the creation of new job profiles, to enable the workforce of the Organization to meet the future demands identified through strategic workforce planning, and to attract the best talent with due regard to geographical representation and gender parity priorities;
 - (h) Provide workforce data to external stakeholders for analyses of staff demographics, Member State representation and workforce trends.
- 29A.95 The above-mentioned work is expected to result in:
- (a) A culture of staff mobility that accelerates the mobility process across the Organization, in particular movements between Headquarters and field duty stations, in order to build an agile, adaptable and motivated workforce required to ensure effective delivery of the mandates;
 - (b) Talent acquisition focused on current workforce gaps and future needs and enhancement of existing talent through learning and development, mobility and effective performance management and career satisfaction support;
 - (c) Gender parity at all levels;
 - (d) Recruitment of staff on as wide a geographical basis as possible, a reduced number of unrepresented and underrepresented Member States, and progress made on bringing as many Member States within their desirable range.

Programme performance in 2023

Simplified policy framework

29A.96 The component’s work has continued to develop a simplified policy framework that supports the strategic outcome of accountability and enables the Organization to effectively deliver human resources services.

29A.97 Progress towards the objective is presented in the performance measure below (see table 29A.27).

Table 29A.27

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	–	Availability of updated and simplified policies on downsizing, parental leave and mobility, as well as revisions to policies on staff selection system and the administration of temporary appointments

Planned results for 2025

Result 1: strategic workforce planning approach to identify future workforce needs

Programme performance in 2023 and target for 2025

29A.98 The component’s work contributed to entities identifying and addressing needed workforce capabilities, which met the planned target.

29A.99 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29A.28).

Table 29A.28

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Entities benefit by having increased knowledge/awareness of priority workforce capabilities for 2022 for recruitment and learning action	Entities have increased knowledge/awareness of priority workforce capabilities for 2023	Entities have access to and use the newly developed job profiles to address priority workforce capabilities	Entities utilize, with increasing frequency, newly developed and updated job profiles to address priority workforce capabilities	Entities have access to and use an increased number of newly developed job profiles to address priority workforce capabilities

Result 2: a more diverse workforce

Programme performance in 2023 and target for 2025

29A.100 The component’s work also contributed to a strengthened recruitment process, including the issuance of the Reasonable Accommodation Guidelines, which met the planned target.

29A.101 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29A.29).

Table 29A.29
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Strengthened recruitment process, including through the availability of the Reasonable Accommodation Guidelines	<p>Programme managers have access to analytics to track geographical representation and gender statistics in the application pipeline and monitor progress</p> <p>Increase in the number of qualified candidates added to the talent pools from unrepresented and underrepresented Member States</p> <p>Programme managers use updated and newly developed generic job profiles</p>	<p>Increased prevalence of future capabilities appearing in job openings based on new generic job profiles</p> <p>Programme managers will have greater insight into equitable geographical distribution and gender statistics and monitor progress</p>

Result 3: fewer unrepresented and underrepresented Member States in the desirable ranges system
Proposed programme plan for 2025

29A.102 Accelerating progress towards bringing each unrepresented and underrepresented Member State within its desirable range remains a priority. The component has been targeting efforts towards attracting qualified candidates from unrepresented and underrepresented Member States through the building of partnerships with Member States and other stakeholders.

Lessons learned and planned change

29A.103 The lesson for the component was that targeted and sustained efforts were integral for talent outreach activities to be impactful and to gain insights through active and meaningful engagements and partnerships with the Member States. In applying the lesson, the component will further enhance purposeful partnerships with Member States to position the United Nations as a top employer for its nationals by creating awareness among the local population, providing country labour market trends and skill insights and leveraging its national resources and networks to reach qualified candidates.

29A.104 Expected progress towards the objective is presented in the performance measure below (see figure 29A.VI).

Figure 29A.VI
Performance measure: number of unrepresented and underrepresented Member States in the desirable ranges system

Deliverables

29A.105 Table 29A.30 lists all deliverables of the component.

Table 29A.30

Subprogramme 3, component 1: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	3	2	6	2
1. Reports to the General Assembly	3	2	6	2
Substantive services for meetings (number of three-hour meetings)	129	77	129	129
Meetings of:				
2. The Advisory Committee on Administrative and Budgetary Questions	6	6	6	6
3. The Fifth Committee of the General Assembly	35	21	35	35
4. The International Civil Service Commission	88	50	88	88
E. Enabling deliverables				
Administration:				
Human resources policies and procedures, including on conditions of service and delegation of authority; advice and guidance to Secretariat entities on human resources-related rules and policies; salary surveys; and provision of classification advice and related appeals.				
Talent management strategies, policies, processes and tools pertaining to workforce diversity, inclusion, mobility and outreach, leveraging innovation, creativity and best practices, including a new workforce diversity toolkit, a full set of approximately 60 profiles of unrepresented and underrepresented Member States to enable targeted outreach; outreach with a focus on online channels and platforms, including participation in approximately 30 career events organized with academia and professional networks; servicing of the Staff-Management Committee; strategic workforce planning deliverables, including new job profiles and workforce analytics; and Member States' dashboards of workforce demographics, including support for users in permanent missions.				
Performance management and staff development strategies, including learning initiatives to build strategic skills and behaviours required by staff with various levels of leadership and managerial responsibilities, such as leadership programmes and senior leadership support programme for Assistant Secretaries-General and Under-Secretaries-General; strategic advice, tools and guidance on organizational development, including the implementation of values and behaviours; workforce diversity and inclusion; professional and substantive skills development programmes, including 6 mandated corporate learning programmes and substantive skills programmes; strategies and tools for career satisfaction and staff mobility; frameworks, strategies, tools and guidance on performance management, including managerial effectiveness; enhanced learning management system; and learning needs analysis to identify high-priority and emerging staff capacity needs.				

Component 2 Administrative law

Objective

- 29A.106 The objective, to which this component contributes, is to strengthen accountability in line with the standards of conduct by all categories of personnel.

Strategy

- 29A.107 To contribute to the objective, the component will:
- (a) Deploy and use a global case management system and identify lessons learned, including in relation to critical incidents involving serious reputational risks affecting the Organization's core values and norms, and develop tools and guidance material for senior leaders;
 - (b) Engage in capacity-building, including through the online information-sharing platform ALD Connect, direct outreach to senior managers and the ongoing development of tools and guidance materials to support senior managers in carrying out their responsibilities and exercising their authority;
 - (c) Review disciplinary matters for sanctioning purposes, represent the Secretary-General before the United Nations Dispute Tribunal regarding appeals against administrative decisions, continue to expand screening for integrity for the Secretariat, and continue to review and update policies relating to the conduct of personnel.
- 29A.108 The above-mentioned work is expected to result in:
- (a) Enhanced oversight across the Secretariat and monitoring of matters that affect the reputation of the Organization, and the timely review and handling of misconduct matters;
 - (b) Well-informed decision-making by senior managers in relation to the management of personnel;
 - (c) An enhanced culture of individual accountability.

Programme performance in 2023

Strengthened transparency for cases of misconduct, including sexual exploitation and abuse

- 29A.109 The component's work expanded the Secretariat's functional capacity across the administration of justice system, which included 10 sessions on ALD Connect covering a diverse range of topics, including the prevention of sexual exploitation and abuse and victim support, and raising awareness of the compendium of administrative measures and of the new caselaw portal for the administration of justice system. Sessions also covered the preparation of risk management tools and systems, quality assurance exercises, strategic communication and the new Member State module for cases of misconduct, including sexual exploitation and abuse cases, launched in 2023.
- 29A.110 Progress towards the objective is presented in the performance measure below (see table 29A.31).

Table 29A.31
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
The Case Management Tracking System in use in all entities of the Secretariat	Approximately 95 per cent of stakeholders across the Secretariat use the Case Management Tracking System to log, monitor and track their cases, as well as interact with the Administrative Law Division	100 per cent of stakeholders across the Secretariat use the Case Management Tracking System to log, monitor and track their cases, as well as interact with the Administrative Law Division Member States have access to a dedicated online platform that provides information on misconduct complaints, including those on sexual exploitation and abuse

Planned results for 2025

Result 1: risk management for well-informed decision-making in relation to personnel management

Programme performance in 2023 and target for 2025

- 29A.111 The component’s work contributed to senior managers and other stakeholders having a clearer understanding of the administration of justice system and framework to ascertain risks for sensitive decisions, including consulting with the Administrative Law Division for strategic advice with increased frequency prior to making sensitive conduct-related management decisions, which met the planned target.
- 29A.112 Progress towards the objective and the target for 2025 are presented in the performance measure below see table 29A.32).

Table 29A.32
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Delivered training to 100 per cent of newly appointed senior managers	Senior managers consulted the Administrative Law Division with increased frequency prior to taking sensitive conduct-related management decisions	Senior managers have a clear understanding of the administration of justice system and framework to ascertain risks for sensitive decisions	Senior managers regularize the practice of seeking advice prior to taking sensitive conduct-related decisions	Senior managers actively use all available tools, including those on risk management, and ClearCheck (expanded to other forms of misconduct) to inform decision-making

Result 2: prevention of sexual harassment in the Secretariat through a holistic, system-wide and victim-centric approach

Programme performance in 2023 and target for 2025

- 29A.113 The component’s work contributed to 36 United Nations system organizations using ClearCheck (an increase from 33 in 2022), which met the planned target.

29A.114 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29A.33).

Table 29A.33
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	Approximately 48 per cent increase in the number of ClearCheck screening requests received (from 81,071 in 2021 to 120,068 in 2022)	36 United Nations system organizations use ClearCheck (compared with 33 in 2022)	Increased reporting of behaviour that constitutes sexual harassment	ClearCheck database includes other forms of misconduct

Result 3: adjustments to the Secretariat’s policy framework and management practices facilitated by United Nations Dispute Tribunal judgments

Proposed programme plan for 2025

29A.115 The identification of trends in administrative decision-making processes can help to mitigate potential financial and reputational risk to the Organization.

Lessons learned and planned change

29A.116 The lesson for the component was that litigation cases before the United Nations Dispute Tribunal provided valuable insights into how best to advise clients on approaches to decision-making. In applying in the lesson, the component will identify trends in the outcome of cases before the internal justice system and advise clients on judicially recognized standards that apply to decision-making and related administrative processes. This presents an opportunity to strengthen policies and ensure the application of the legal standards recognized by the Organization’s internal justice system and to mitigate risk.

29A.117 Expected progress towards the objective is presented in the performance measure below (see table 29A.34).

Table 29A.34
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	75 per cent of administrative decisions (non-disciplinary) before the United Nations Dispute Tribunal are upheld	75 per cent of administrative decisions (non-disciplinary) before the United Nations Dispute Tribunal are upheld	75 per cent of administrative decisions (non-disciplinary) before the United Nations Dispute Tribunal are upheld, contributing to adjustments to the policy framework and management practices through a regular review of judgments

Deliverables

29A.118 Table 29A.35 lists all deliverables of the component.

Table 29A.35

Subprogramme 3, component 2: deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	1
1. Report for the General Assembly	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	23	22	23	22
Meetings of:				
2. The Advisory Committee on Administrative and Budgetary Questions	5	5	5	5
3. The Fifth Committee of the General Assembly	10	10	10	10
4. The Special Committee on Peacekeeping Operations	2	2	2	2
5. The Fourth Committee of the General Assembly	2	1	2	1
6. The Sixth Committee of the General Assembly	3	3	3	3
7. The Committee for Programme and Coordination	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: advice on conduct issues to other international organizations (e.g., African Union and United Nations System Chief Executives Board for Coordination entities); and advocacy with Member States on conduct and discipline issues.				
Databases and substantive digital materials: public database and United Nations standards of conduct website.				
D. Communication deliverables				
Digital platforms and multimedia content: website relating to conduct and discipline.				
E. Enabling deliverables				
Administration: implementation and oversight, including updating, of the Organization’s conduct and discipline policies; development and maintenance of the strategic framework for response to incidents in order to meet the Organization’s duty of care obligations, including staff security; and training of the global network of conduct and discipline focal points (more than 200 practitioners).				
Internal justice and oversight: representation of the Secretary-General before the United Nations Dispute Tribunal in cases challenging administrative decisions, including challenges to disciplinary sanctions; facilitation of informal dispute resolution in partnership with relevant Secretariat entities; and advice to all Secretariat entities on conduct and discipline and administration of justice matters, as well as on critical incidents involving serious reputational risks affecting the Organization’s core values and norms.				

Subprogramme 4 Business transformation and accountability

Objective

29A.119 The objective, to which this subprogramme contributes, is to ensure a results-oriented, data-driven, agile Organization that is efficient, accountable, transparent, compliant and driven by lessons learned and continuous improvements.

Strategy

- 29A.120 To contribute to the objective, the subprogramme will:
- (a) Focus on the Organization's systems of accountability by evaluating overall organizational performance trends, assessing the alignment of roles and responsibilities and monitoring the exercise of delegated authority, monitoring the senior managers' compacts, mainstreaming the use of evaluation as part of the programme planning cycle, and coordinating the Secretariat's interaction with oversight bodies and identifying trends in their recommendations;
 - (b) Carry out capacity-building activities to support all United Nations entities in identifying, assessing, evaluating and controlling risk, using an enterprise risk management approach, and support the achievement of mandated programmatic results by training all entities in results-based management;
 - (c) Support the implementation of the data strategy of the Secretariat, enable entities to have access to management data from Secretariat systems and to gain access to or design analytical tools supporting data-driven decision-making, and lead and coordinate a portfolio of business transformation and innovation projects.
- 29A.121 The above-mentioned work is expected to result in:
- (a) A reinforced accountability culture in the Organization in the areas of risk awareness, monitoring performance and the exercise of delegated authority;
 - (b) Greater use of enterprise data and data analytics in decision-making and programme delivery;
 - (c) Teams across the Secretariat adopting agile methodology and innovation and strengthening new collaboration practices using online platforms.

Programme performance in 2023

Adoption of the Umoja strategic management application tool to support results-based management

- 29A.122 The systematic and timely monitoring of progress towards achieving expected results and deliverables can help with effective management of the implementation of the programme plan. The Umoja strategic management application tool was rolled out in the Secretariat to enable entities to capture their approved programme plans and monitor their implementation throughout the year. It also includes features such as a performance dashboard, enabling managers to obtain an overview of their entity's programme performance status at any given time.
- 29A.123 The subprogramme established a dedicated capacity in April 2022 to support the mainstreaming of the Umoja strategic management application tool across the Organization by providing assistance and advice to entities on its use. The subprogramme provided targeted assistance, such as working sessions, one-on-one training and tailor-made workshops, with the objective of strengthening the entities' capacity to use the tool for monitoring the progress made in achieving their results and deliverables.
- 29A.124 Progress towards the objective is presented in the performance measure below (see figure 29A.VII).

Figure 29A.VII
Performance measure: number of entities that provided complete monitoring updates in the Umoja strategic management application at the end of the monitoring period

(Percentage)

Planned results for 2025

Result 1: capacity-building in data science and visualization through the in-house Kamino training programme

Programme performance in 2023 and target for 2025

29A.125 The subprogramme’s work contributed to the training of 282 participants who completed the Kamino training programme, which exceeded the planned target of 150 participants.

29A.126 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 29A.VIII).

Figure 29A.VIII
Performance measure: number of participants trained in data science and visualization having completed the Kamino programme (annual)

Result 2: strengthened exercise of delegation of authority

Programme performance in 2023 and target for 2025

- 29A.127 The subprogramme’s work contributed to the improved use of delegated authority, demonstrated by the global trends on key performance indicators and entities’ use of enhanced tools and targeted analysis of performance results to inform action at the first line of defence, which met the planned target.
- 29A.128 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29A.36).

Table 29A.36
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
–	Heads of entity have access to and use the delegation of authority framework, including policies, processes and tools	Improved use of delegated authority, as evidenced by the delegation of authority framework, and the global trends on key performance indicators	Further improvement in the use of delegated authority as demonstrated by the delegation of authority framework, including key performance indicators	Further improvement in the use of delegated authority as demonstrated by the delegation of authority framework, following targeted analysis of performance against select indicators

Result 3: increased use of internal evaluation by smaller entities to inform decision-making

Proposed programme plan for 2025

- 29A.129 The Secretary-General published the administrative instruction titled “Evaluation in the United Nations Secretariat” ([ST/AI/2021/3](#)) in 2021 to increase the use and usefulness of internal (or self-) evaluation as a management tool. The subprogramme, in partnership with the Office of Internal Oversight Services, is supporting entities that conduct evaluations as part of the programme cycle.

Lessons learned and planned change

- 29A.130 The lesson for the subprogramme was that, although the work done to date has helped to increase the number of entities conducting evaluations, this was particularly challenging for smaller entities, which did not employ staff with evaluation experience nor have sufficient consultancy resources to bring in external expertise. In applying the lesson, the subprogramme will change the support provided to smaller entities from the current advisory approach to a more direct support model through the centralized provision of evaluation and project management expertise. The objective is to enable three additional smaller entities to commission internal evaluations annually (established in [ST/AI/2021/3](#)).
- 29A.131 Expected progress towards the objective is presented in the performance measure below (see table 29A.37).

Table 29A.37
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	–	–	3 additional entities commission internal evaluations

Deliverables

29A.132 Table 29A.38 lists all deliverables of the subprogramme.

Table 29A.38
Subprogramme 4: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	3	3	3	3
1. Report to the General Assembly on accountability	1	1	1	1
2. Reports of the Secretary-General on the implementation of the recommendations of the Board of Auditors	2	2	2	2
Substantive services for meetings (number of three-hour meetings)	11	12	12	12
3. Hearings of the Advisory Committee on Administrative and Budgetary Questions	3	4	4	4
4. Meetings of the General Assembly	4	4	4	4
5. Meetings of the Independent Audit Advisory Committee	4	4	4	4
E. Enabling deliverables				
Administration: approximately 20 briefing sessions for incoming senior managers on governance, accountability and related monitoring mechanisms in use by the Administration; support for implementing the administrative instruction on evaluation in the United Nations Secretariat to all Secretariat entities; quarterly key performance indicators report covering approximately 230 entities with delegation of authority; enhancements to the delegation of authority portal; senior managers' compacts performance assessment for 70 heads of entity; workshops, briefings and guidance to approximately 190 compact focal points; enterprise-wide outreach, advocacy campaigns, and network and training opportunities to raise awareness of change management, business innovation and new internal ways of working; continuous improvements in analytics and corporate dashboards; staff capability development programme for data science and analytics, from foundation to advanced level; training and guidance on results-based management; 2 workshops on enterprise risk management with approximately 130 managers and focal points (approximately 60 entities); and workshop for approximately 120 oversight focal points.				

Subprogramme 5 Addressing racism in the workplace

Objective

29A.133 The objective, to which this subprogramme contributes, is to ensure a workplace free from racism and racial discrimination, in which every staff member feels valued and respected and is treated with dignity.

Strategy

- 29A.134 To contribute to the objective, the subprogramme will:
- (a) Implement the strategic action plan by driving progress towards a racism-free Secretariat through oversight, coordination and monitoring of all anti-racism initiatives;
 - (b) Review and address existing or potential racial bias in institutional policies and practices and promote data transparency;
 - (c) Promote advocacy and awareness-raising programmes to support personnel and improve organizational culture with regard to racism;
 - (d) Strengthen accountability mechanisms within the Organization by setting clear standards for investigating and adjudicating racism allegations;
 - (e) Address institutional and systemic racism by putting in place leadership accountability mechanisms;
 - (f) Advocate for system-wide anti-racism initiatives by collaborating and building synergies with United Nations system entities and other relevant partners to share best practices and lessons learned.
- 29A.135 The above-mentioned work is expected to result in:
- (a) An institutionalized anti-racism culture fully embedded in policies, procedures and practices within the Organization, ensuring zero tolerance for racism and racial discrimination;
 - (b) The empowerment and equitable racial representation of staff at all levels and categories within the Organization;
 - (c) Increased trust in internal processes of administration to mediate, investigate and adjudicate fairly allegations of racism and provide racial justice.

Programme performance in 2023

An enabling environment to address racism in the Organization

- 29A.136 Following the launch, in 2022, of the strategic action plan to address racism in the United Nations Secretariat targeting interpersonal, institutional and systemic forms of racism, the subprogramme undertook a series of initiatives to create an enabling environment to address racism. It launched the “United against Racism” live talk series, sparking awareness and knowledge on addressing racism in the workplace. The subprogramme engaged directly with personnel from across United Nations entities, fostering open dialogue and gathering crucial insights into workplace racism. Informed by engagements across the Organization, the subprogramme developed a three-pronged action approach – advocacy, transparency and accountability – to guide anti-racism efforts within the Organization. In parallel, the subprogramme conducted a comprehensive review of the Secretariat’s anti-racism efforts, as reflected in the report to the seventy-eighth session of the General Assembly ([A/78/384](#)), resulting in the establishment of the Anti-Racism Office, under the substantive leadership of the Special Adviser on Addressing Racism in the Workplace and the managerial oversight of the Under-Secretary-General for Management Strategy, Policy and Compliance, to take the lead in addressing racism and racial discrimination in the Secretariat.
- 29A.137 Progress towards the objective is presented in the performance measure below (see table 29A.39).

Table 29A.39
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	–	United Nations Secretariat entities appointed 180 anti-racism advocates across 103 entities to champion and drive the implementation of the strategic action plan at the entity level

Planned result for 2025

Result 1: strengthened accountability systems to address allegations of racism in the workplace

Proposed programme plan for 2025

- 29A.138 The subprogramme contributes to the strengthening of the internal justice system by setting standards for investigating and adjudicating claims of racism and racial discrimination.
Lessons learned and planned change
- 29A.139 The lesson for the subprogramme was the importance of focusing on policy review and reform. Staff surveys and direct engagement with personnel at the entity level demonstrated (a) the limits of individual training and personal development in addressing racism and discrimination; and (b) opportunities to review and improve hiring practices, performance evaluations and access to resources with respect to removing bias and discriminatory practices.
- 29A.140 In applying the lesson, the subprogramme will, in conjunction with its advocacy and awareness-raising efforts, focus on strengthening the Organization’s regulatory frameworks (policies, procedures and practices) in various areas of staff selection, career development and administration of justice to ensure an organizational culture change that supports anti-racism and promotes respect and dignity for all within the Secretariat. One of the first milestones will entail working with the Administrative Law Division to amend the Secretary-General’s bulletin on addressing discrimination, harassment, including sexual harassment, and abuse of authority ([ST/SGB/2019/8](#)). The revisions will include explicit definitions of racism and racial discrimination, outlining how they manifest themselves in the workplace.
- 29A.141 Expected progress towards the objective is presented in the performance measure below (see table 29A.40).

Table 29A.40
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Officials, including judges and Office of Internal Oversight Services investigators, have increased knowledge of racism in the workplace, to enable more effective investigations and assessment of complaints of racism	Staff Counsellors, the Office of the United Nations Ombudsman and Mediation Services, conduct and discipline focal points, the Administrative Law Division, affinity groups and other entities possess specialized expertise in providing support to United Nations personnel encountering racism and racial discrimination	Availability of the revision of Secretary-General’s bulletin ST/SGB/2019/8 , on prohibited conduct, which includes updated provisions for racial discrimination

Deliverables

29A.142 Table 29A.41 lists all deliverables of the subprogramme.

Table 29A.41
Subprogramme 5: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies			
Parliamentary documentation (number of documents)	1	–	1
1. Report to the General Assembly on addressing racism in the workplace	–	–	1
2. Revised estimates on addressing racism in the workplace	1	–	–
Substantive services for meetings (number of three-hour meetings)	2	–	2
3. Advisory Committee on Administrative and Budgetary Questions	1	–	1
4. Fifth Committee of the General Assembly	1	–	1
E. Enabling deliverables			
Administration: 15 training sessions to provide knowledge and raise awareness on anti-racism to United Nations staff and leadership; 20 awareness and engagement dialogue sessions; 12 “United against Racism” live talks; 8 global online anti-racism conversations; 8 quarterly meetings with anti-racism advocates; 2 annual anti-racism retreats with all strategic action plan implementing departments and offices; a dashboard for staff on composition, demographics and movements of personnel on iSeek; 12 anti-racism advocacy visits to offices away from Headquarters, peacekeeping and peacebuilding missions, and economic and social commissions; a dedicated intranet site on anti-racism in the workplace; 8 podcasts on anti-racism; 6 quarterly anti-racism online newsletters; 4 anti-racism communications and awareness-raising campaigns with posters and other social media resources; and 1 global anti-racism conference with approximately 150 participants involving anti-racism advocates, members of strategic action plan implementing departments and offices, and other affinity groups from within the United Nations system.			

B. Proposed post and non-post resource requirements for 2025

Overview

29A.143 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 29A.42 to 29A.44.

Table 29A.42

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2023 expenditure	2024 approved	Changes				2025 estimate (before recosting)

29A.144 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 29A.45 to 29A.47 and figure 29A.IX.

29A.145 As shown in tables 29A.45 (1) and 29A.46 (1), the overall resources proposed for 2025 amount to \$67,034,900 before recosting, reflecting a net increase of \$239,100 (or 0.4 per cent) compared with the approved budget for 2024. Resource changes result from technical adjustments and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Distribution of proposed resources for 2025 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

29A.146 As shown in table 29A.45 (1), resource changes reflect a net increase of \$166,300, as follows:

- (a) **Subprogramme 2, component 1, Finance** (decrease of \$60,200). The decrease of \$60,200 under consultants relates to the removal of non-recurrent provisions associated with the consultancy to strengthen International Public Sector Accounting Standards reporting that were approved for 2024 and are no longer required in 2025;

- (b) **Subprogramme 3, component 1, Global strategy and policy** (decrease of \$1,200). The decrease of \$1,200 under furniture and equipment relates to the removal of non-recurrent provisions for standard common services costs associated with one additional temporary position that was approved for 2024;
- (c) **Subprogramme 5, Addressing racism in the workplace** (net increase of \$227,700). The net increase of \$227,700 reflects the higher provision at continuing vacancy rates for three posts (1 P-5, 1 P-3 and 1 General Service (Other level)) established in 2024 pursuant to General Assembly resolution [78/253](#) that were subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts (\$231,400), offset in part by the removal, under furniture and equipment, of non-recurrent provisions for standard common services costs associated with the posts mentioned above that were approved for 2024 (\$3,700).

Other changes

29A.147 As shown in table 29A.45 (1), resource changes reflect an increase of \$72,800, as follows:

- (a) **Subprogramme 4, Business transformation and accountability** (increase of \$72,800). The increase of \$72,800 reflects a provision for consultancies, to be centrally managed by the subprogramme, to strengthen the use of evaluations as a management tool across the Secretariat by increasing the conduct of evaluations by smaller entities that do not conduct them (\$90,000), offset in part by the discontinuation of two consultancies on enterprise risk management (\$17,200).

Other assessed resources

29A.148 As reflected in tables 29A.45 (2) and 29A.46 (2), other assessed resources amount to \$59,571,700. The resources would complement regular budget resources and provide for the requirements indicated in the report of the Secretary-General on the support account for peacekeeping operations for the period from 1 July 2024 to 30 June 2025 ([A/78/746](#)).

Extrabudgetary resources

29A.149 As reflected in tables 29A.45 (3) and 29A.46 (3), extrabudgetary resources amount to \$34,110,800. The resources would complement regular budget resources and would be used mainly to provide for 124 posts (9 P-5, 24 P-4, 21 P-3, 7 P-2, 13 General Service (Principal level), 40 General Service (Other level) and 10 Local level) to perform, among others, system-wide jointly financed activities relating to local salary surveys and personnel mental health and well-being, activities relating to personnel conduct and discipline, as well as in support of victims of sexual exploitation and abuse, activities to backstop operations funded from central programme support costs, and activities to backstop operations funded from cost recovery. In addition, financial resources from central programme support costs would also fund the extrabudgetary resources share of Organization-wide costs, such as the Umoja enterprise resource planning solution (including business support resources) and the development of an efficiency model for the provision of management services.

29A.150 The extrabudgetary resources under the present section are subject to the oversight of the Department of Management Strategy, Policy and Compliance, which has delegated authority from the Secretary-General.

Executive direction and management

29A.151 The executive direction and management component comprises the Office of the Under-Secretary-General, including the Inter-Agency and Intergovernmental Service, the Office of the Controller and the Office of the Assistant Secretary-General for Human Resources.

29A.152 The Under-Secretary-General for Management Strategy, Policy and Compliance is responsible for the overall direction and management of the Department and for providing the Secretary-General with

strategic advice on management issues. The Under-Secretary-General represents the Secretary-General on management issues before relevant expert and intergovernmental bodies, such as the Advisory Committee on Administrative and Budgetary Questions and the Fifth Committee, the International Civil Service Commission and inter-agency coordination mechanisms, including the High-level Committee on Management of the United Nations System Chief Executives Board for Coordination, and in the conduct of staff-management consultations. The Under-Secretary-General oversees and provides direction to the Assistant Secretary-General for Programme Planning, Finance and Budget, Controller; the Assistant Secretary-General for Human Resources; the Director of the Business Transformation and Accountability Division; and the Director of the Enterprise Resource Planning Solution Division. The Under-Secretary-General provides management oversight support to the Director of the Anti-Racism Office and, with the Under-Secretary-General for Operational Support, provides direction and strategic guidance to the Assistant Secretary-General, Chief Information Technology Officer.

- 29A.153 The Office of the Under-Secretary-General provides leadership in the development and delivery of integrated organizational management strategies, policies and models that support a decentralized, field-focused paradigm in which managers are empowered through the new enhanced delegation of authority framework. It provides direction to take advantage of lessons learned and innovative methods to ensure continuous management improvements to meet evolving requirements throughout the Secretariat. It liaises with Member States and other external entities on management-related issues and fosters coordination internally within the Secretariat, as well as externally with the funds, programmes and specialized agencies of the United Nations system, to build partnerships and promote best practices.
- 29A.154 The Under-Secretary-General is assisted by the Controller, who provides strategic and policy leadership on all planning, programming, budgetary and financial matters and on the administration of the Financial Regulations and Rules of the United Nations, and by the Assistant Secretary-General for Human Resources, who provides strategic leadership for the simplified and streamlined human resources policy framework and the mainstreaming of a gender perspective, equitable geographical distribution and accessibility into all facets of the work of the Organization through integrated strategies and policies. Working together closely under the guidance of the Under-Secretary-General, the Controller and the Assistant Secretary-General for Human Resources provide leadership in adapting strategies and policies to support new and innovative business models and enable managers to be more effective and agile in the delivery of their programmes.
- 29A.155 The Controller represents the Secretary-General in the committees of the General Assembly, the Advisory Committee on Administrative and Budgetary Questions, the Committee for Programme and Coordination and the Independent Audit Advisory Committee in the presentation of all programme and budget documents, including those relating to the regular budget, the peacekeeping budgets and international tribunals, as well as the financial statements of the Organization. The Controller advises the Secretary-General and the Under-Secretary-General for Management Strategy, Policy and Compliance on policy relating to the budgets and finances of the United Nations and the related plans and work programmes. Through the Office of Programme Planning, Finance and Budget, the Controller ensures that the financial policy framework enables efficient mandate delivery. The Director of the Finance Division, in addition to existing responsibilities under subprogramme 2, component 1, supports the Controller directly with regard to overseeing cross-cutting functions, such as financial policy and the Committee on Contributions, and deputizes for the Controller on all financial policies relating to United Nations system entities and other partners of the Secretariat. As the Deputy Controller, the Director of the Finance Division enables appropriate burden-sharing with the Controller in addressing matters relating to complex and critical financial management in a proactive manner.
- 29A.156 The Assistant Secretary-General for Human Resources leverages technologies and pursues innovative and holistic approaches to transform the organizational culture, strengthen duty of care, promote inclusion, accessibility and workforce diversity, and drive the creation of a supportive and healthy workplace. The Office of Human Resources responds proactively to issues arising in the formal and informal system of administration of justice to ensure the efficient, effective and fair

implementation of the Organization’s policies, core values and norms. It builds on the integration of the conduct and discipline function for the entire Secretariat and for all categories of personnel to increase consistency, transparency and accountability in the application of the standards of conduct.

29A.157 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Department is integrating environmental management practices into its operations. In line with its functional responsibilities, the Department will continue to mainstream environmental sustainability management into the Secretariat policy framework and the enterprise management and accountability system. Operationally the Department will continue to prioritize the reduction in its travel-related greenhouse gas emissions by optimizing the use of online collaborative and conferencing platforms, as well as streamlining and combining travel requirements.

29A.158 Information on the timely submission of documentation and advance booking for air travel is reflected in table 29A.48. The Department will continue to implement measures to improve compliance rates with the advance purchase of air tickets through the earlier planning of events and nominations of travellers, raising the awareness of programme managers and travellers and minimizing exceptions. In 2023, the Department continued to submit nearly all of its documents within the prescribed timelines.

Programme support

- 29A.171 The Business Partner Service assists the Under-Secretary-General in the discharge of the Department’s responsibilities in the areas of human resources management, finance and general administration.
- 29A.172 The Business Partner Service serves as a business partner for the secretariats of the Advisory Committee on Administrative and Budgetary Questions, the Board of Auditors and the Independent Audit Advisory Committee in carrying out their financial, personnel and administrative responsibilities and administers the official travel of the members of the Committee for Programme and Coordination and the Committee on Contributions.

29A.173 The proposed regular budget resources for 2025 amount to \$1,813,700 and reflect no change compared with the approved budget for 2024. Additional details on the distribution of the proposed resources for 2025 are reflected in table 29A.61 and figure 29A.XXI.

^a Reassignment.

^b Dual reporting to the Department of Management Strategy, Policy and Compliance and the Department of Operational Support.

Annex II

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 3 component 1, Global strategy and policy	1	GS (OL)	Reassignment of a post of Human Resources Assistant as Data Analysis Assistant	<p>The Office of Human Resources takes a comprehensive approach to strategic workforce planning across the Organization on the basis of data-driven tools and reports that will shape the future workforce of the Organization. Support for ongoing improvements and efficiencies in the talent management process, in the context of overseeing long-term planning for human resources while anticipating future needs on the basis of strategic imperatives and expected results, will be increasingly necessary in the coming years. There is a need to be able to draw upon human resources data from a variety of sources, fostering innovation and efficiency through an integrated position and people management system.</p> <p>There is insufficient human resources data-related technical expertise available in the Office to easily extract reports or obtain industry-standard visualizations of data to engage in data analysis. The profiles of the current functions are not meeting the needs because they focus on programme management-related responsibilities, whereas the need is for data-focused functions, given the mandate of the component.</p>

Abbreviation: GS (OL), General Service (Other level).

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 29B.1 The Department of Operational Support is the operational arm of the Secretariat and the client-facing interface for operational support matters in the Secretariat's management structure, which exists to support the objective of effective mandate delivery, in partnership with Secretariat entities and other clients. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolutions [72/266 B](#) and [73/281](#). The Department delivers rapid, effective, efficient, responsible and, where required, customized enabling solutions that help partners to meet their mandates, including in the most challenging operating environments.

Strategy and external factors for 2025

- 29B.2 For 2025, the Department will enable effective mandate delivery through the provision of operational support. To implement its programme, the Department will work with client entities to define requirements and co-create solutions in the areas of end-to-end supply chain management, uniformed personnel support, human resources, diverse training services, business process improvement and medical and occupational health and safety, as well as information and communications technology solutions through the Office of Information and Communications Technology. It will, in exceptional cases, exercise delegated authority on behalf of clients across the Secretariat.
- 29B.3 The Department will work to deliver holistic support solutions in complex operating environments. This will involve enhancing agility to respond to escalated situations, strengthened institutional and operational cooperation with regional organizations and ensuring that the Secretariat's presence does not pose environmental risks and leaves a positive legacy in host countries and communities.
- 29B.4 The Department will ensure that its support meets the needs of a diverse client base. This includes improved delivery of supply chain solutions utilizing a variety of tools, including scenario planning exercises. It also entails streamlining interactions between Headquarters and the field on support issues, strengthening governance of client service and enhancing effective application of delegation of authority.
- 29B.5 The Department will also continue to improve service delivery through technology and skills and by further embedding a client-centric culture. This will be focused on process improvement, improved operational performance management and standardization of operational processes, as well as ongoing work to embed a client-centric environment and culture across the Department.
- 29B.6 With regard to cooperation with other entities at the global, regional, national and local levels, the Department will reinforce its collaboration with Member States and regional organizations, including through capacity-building activities, knowledge exchange and functional arrangements in diverse areas of operational support, in order to achieve the scale and effectiveness needed to address complex challenges.
- 29B.7 With regard to inter-agency coordination and liaison, the Department will strengthen the Secretariat-wide service delivery architecture, enhancing operational integration where feasible. The Department will continue to address the issue of mutual recognition and seek collaboration opportunities and synergies in the spirit of One United Nations.
- 29B.8 With regard to external factors, the Department considered applicable risks identified in its risk register and, accordingly, the overall plan for 2025 is based on the following planning assumptions:
- (a) Supply chain disruptions will not impact effective and efficient supply chain solutions to client entities;

- (b) Requirements for crisis response and liquidation processes will not exceed the Department's capacity to respond, including with regard to repatriation of contingent-owned equipment.
- 29B.9 The Department integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, activities will include camp design methodologies, improvements in the area of women's health, staffing initiatives such as the senior women talent pipeline, and advice to field entities, upon request, to enable them to meet targets related to gender equality. In order to encourage a more equitable approach to the Organization's supply chain, the Department will continue to strengthen outreach and training for vendors, including for women-owned businesses.
- 29B.10 In line with the United Nations Disability Inclusion Strategy, the Department will support efforts to improve accessibility for persons with disabilities to the United Nations premises, including the planned renovation of the DC-2 building.

Legislative mandates

- 29B.11 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

72/266 A ; 72/266 B ; 73/281 ; 77/267	Shifting the management paradigm in the United Nations	78/253	Special subjects relating to the proposed programme budget for 2024

3. Committee for Programme and Coordination	1	1	1	1
4. Special Committee on Peacekeeping Operations	1	1	1	1
E. Enabling deliverables				
Administration: six meetings of the Management Client Board.				

Evaluation activities

29B.13 The evaluation of the generic job opening forecasting methodology based on the analysis of data relating to roster health, conducted by the Department and completed in 2023, has guided the proposed programme plan for 2025.

29B.14 In response to the results of the evaluation referenced above, the Department will strengthen the capacity of its clients by providing more refined and robust roster analysis and fact sheets to enable them to prioritize their needs and forecast upcoming requirements.

29B.15 The following evaluations are planned for 2025:

- (a) An evaluation conducted by the Department of the Uniformed Capacities Management system (subprogramme 3, component 2);
- (b) Joint evaluation conducted by the Department of Management Strategy, Policy and Compliance, the Department of Operational Support and the Office of Information and Communications Technology on information and communications technology security.

Programme of work

Subprogramme 1 Support operations

Component 1 Human resources support

Objective

- 29B.16 The objective, to which this component contributes, is to strengthen the human resources capacity of all Secretariat entities, enable improved, simplified human resources processes and offer the Organization talented and diverse staffing pools.

Strategy

- 29B.17 To contribute to the objective, the component will:
- (a) Support Secretariat entities in the exercise of delegated authority in the area of human resources, including through:
 - (i) Specialized advisory support and guidance to human resources business partners across the Secretariat, including on dispute prevention and resolution, non-staff capacities and other entity-specific operational human resources needs;
 - (ii) Active engagement and regular analysis of support requests, with a view to communicating required policy changes to the Department of Management Strategy, Policy and Compliance on the basis of client needs;
 - (iii) Simplification and digitization of human resources processes, tools and procedures, such as recruitment, onboarding, testing and examination services, non-staff capacities and workforce planning, in cooperation with the Office of Human Resources and the Office of Information and Communications Technology;
 - (b) Offer high-quality and diverse pools of candidates by managing rosters across all job families;
 - (c) Administer the young professionals programme.
- 29B.18 The above-mentioned work is expected to result in:
- (a) Secretariat entities accountably, effectively and efficiently exercising their delegated human resources authority in support of their mandates;
 - (b) Increased efficiencies and measurable reductions in delays and redundancies in human resources processes;
 - (c) Strengthened capacity for the timely identification and recruitment of candidates and talent that are the best fit.

Programme performance in 2023

Field missions complete human resources aspects of restructuring and downsizing including transition and eventual closure

- 29B.19 The subprogramme provided extensive support to field missions during the downsizing, transition and liquidation process, including serving as the Staff-Management Group secretariat and assisting with all aspects of operational implementation of the downsizing policy, such as mitigating measures, supporting communications efforts, data clean-up and advisory and legal support.

With respect to the United Nations Multidimensional Integrated Stabilization Mission in Mali (MINUSMA) and the United Nations Integrated Transition Assistance Mission in the Sudan (UNITAMS), the subprogramme was involved in all aspects of the drawdown process, providing expanded support in key areas where field missions were lacking resources and capacities, including liaising with the Department of Management Strategy, Policy and Compliance for guidance on the downsizing policy (ST/AI/2023/1) issued in January 2023. This support will be extended to other entities affected by restructuring, downsizing and drawdown in 2024.

29B.20 Progress towards the objective is presented in the performance measure below (see table 29B.2).

Table 29B.2

Result 1: improved young professionals programme

Programme performance in 2023 and target for 2025

29B.21 The subprogramme’s work contributed to Member States and candidates benefiting from improvements in talent outreach and the examination process, through candidate screening process simplifications and a change in the hosting of the testing platform, yielding a reduced timeline for the examination cycle, which met the planned target. In addition, various infographics were created and “young professionals programme success stories” were added to the United Nations Careers portal to promote the programme.

29B.22 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29B.3).

Table 29B.3
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
At least 50 per cent of appointed young professionals programme candidates are from unrepresented/underrepresented countries	Member States and staff contribute to the comprehensive evaluation study of the young professionals programme	Member States and candidates benefit from the implementation of improvements suggested in the study in the areas of talent outreach in the examination process, placements, reassignments and career support	At least 55 per cent of appointed young professionals programme candidates are from unrepresented/underrepresented countries	At least 65 per cent of appointed young professionals programme candidates are from unrepresented/underrepresented countries
Positive results obtained in relation to gender parity in the newly established rosters		Stakeholders benefit from improved communications and guidance		

Result 2: Secretariat entities engage in workforce planning and organizational design**Programme performance in 2023 and target for 2025**

- 29B.23 The subprogramme's work contributed to clients having access to an organizational design guide to enable decision-making on how the entity should be structured and functioned to achieve its goals, which met the planned target. The subprogramme's work also contributed to clients having access to dedicated briefing sessions on workforce capabilities, to be able to progressively incorporate the priority workforce capabilities, which did not meet the planned target of clients having access to the workforce capabilities toolkit. The target was not met owing to reprioritization of the component's work and consequent postponement of the issuance of the toolkit until 2024.
- 29B.24 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29B.4).

Table 29B.4

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
<p>Clients have access to the workforce planning nationalization guide and learning opportunities through online workforce planning course</p> <p>Workforce planning and organizational design network established, with 45 client entities represented</p>	<p>Clients have access to overview of entry level positions to guide utilization of P-1 and P-2 and guidance on rejuvenation of the workforce</p> <p>Clients have increased opportunities to share best practices in the workforce planning and organizational design network, with 59 client entities represented</p>	<p>Clients have access to the workforce capabilities briefing sessions to be able to progressively incorporate the priority workforce capabilities, (e.g., data analytics and management, digital transformation and innovation). Clients have access to an organizational design guide to decide how the entity should be structured and function in order to achieve its goals</p>	<p>Clients have access to dedicated workshops on the workforce capabilities in order to address their specific workforce needs</p>	<p>Clients have access to, and utilize, data-driven roster health analysis to forecast their upcoming requirements</p>

Result 3: improved performance management across the Secretariat**Proposed programme plan for 2025**

- 29B.25 The subprogramme provides guidance and operational support to client entities on the full range of human resources decision-making, including in the area of performance management, with a view to maximizing staff potential, fostering a culture of continuous improvement, and improving organizational effectiveness and individual accountability.

Lessons learned and planned change

- 29B.26 The lesson for the subprogramme, based on the increasing number of performance management support requests from clients, was the need to enhance client entities' capacity to manage performance, in particular on addressing underperformance and on conflict prevention. In applying the lesson, the subprogramme will design a "train-the-trainers" programme for human resources personnel from client entities across the Secretariat, enabling them to provide consistent training, guidance and advice to staff with supervisory responsibilities on various aspects of performance management, including development of workplans, providing feedback, addressing underperformance and resolving conflict.

The subprogramme will also provide more dedicated operational support to client entities, upon request, to address issues of greater complexity.

29B.27 Expected progress towards the objective is presented in the performance measure below (see table 29B.5).

Table 29B.5
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
–	–	Managers and human resources practitioners in 48 client entities gain capacity and understanding on the different stages of the performance cycle and their responsibilities at each stage	Human resource personnel in client entities utilize “train-the-trainers” programme to enhance managers’ capacity in the area of performance management	Managers are empowered to better manage performance and respond to issues related to performance management through guidance, briefings and training

Deliverables

29B.28 Table 29B.6 lists all deliverables of the component.

Table 29B.6
Subprogramme 1, component 1: deliverables for 2025, by category and subcategory

<i>Category and subcategory</i>
<p>E. Enabling deliverables</p> <p>Administration: advice and guidance to Secretariat entities on all human resources issues, including escalation to the Department of Management Strategy, Policy and Compliance regarding authoritative policy interpretation, when necessary; non-staff administration and recruitment improvements; advice on attaining targets related to gender equality; talent programmes focused on field mission recruitment (e.g. senior women talent pipeline); examinations and tests, including the competitive examination for language positions for approximately 5,000 candidates, the young professionals programme for approximately 2,000 candidates and the language proficiency examination for approximately 6,000 candidates; placement of approximately 60 young professionals programme roster candidates and reassignment of young professional staff members after their initial two years of service; roster assessment and schedule determination for refreshing rosters across 23 job families; updated procedures and tools for the recruitment of national staff in field missions; guidance packages, advice and capacity-building on human resources delegation of authority, performance management, non-staff administration, workforce planning, organizational design and roster management to facilitate the human resources planning process for all Secretariat entities; tools in the Inspira talent management platform; official status files in largely digital format for the efficient administration of peacekeeping personnel and towards a Secretariat-wide personnel records management system; and enhanced Umoja functionalities in support of human resources processes globally.</p>

**Component 2
Capacity development and operational training**

Objective

29B.29 The objective, to which this component contributes, is to ensure that all Secretariat entities have the operational capacities necessary to effectively deliver on the mandates entrusted to them.

Strategy

29B.30 To contribute to the objective, the component will:

- (a) Develop, design and deliver diverse training and capacity-development services in partnership with Secretariat entities, focused on operational needs, as well as enhance knowledge management and strengthen the effectiveness of operational capacities through support for standardization and process improvement initiatives, incorporating linguistically diverse delivery modalities, where possible;
- (b) Develop, design and deliver training programmes on various operational areas, systems and processes, including governance improvement, administration, support areas and Umoja, with an emphasis on eLearning and change management techniques, where appropriate;
- (c) Expand the range and content of training programmes and learning resources to improve multilingualism.

29B.31 The above-mentioned work is expected to result in:

- (a) Stronger organizational governance by senior leadership teams, as well as better trained and empowered staff to support operational decision-making, resource management and improved operational processes;
- (b) Knowledge management and learning management platforms reaching the widest possible spectrum of day-to-day practitioners across the Secretariat and strengthened awareness and competence with regard to resource stewardship and other operational responsibilities;
- (c) Greater linguistic proficiency and diversity and improved communication capacities across the Secretariat in support of multilingualism.

Programme performance in 2023

More collaborative approach to developing operational guidance

29B.32 In response to feedback on the traditional guidance consultation process from various entities, the component undertook a business process improvement initiative to streamline and conduct efficiently operational guidance consultation processes and increase the participation of all respective operational components in guidance development. Following a scoping exercise and discussions with stakeholders, the component commissioned the development of a custom application that enables hundreds of staff members across the globe to concurrently contribute to a draft guidance document while maintaining traceability, clarity and version control. The Operational Guidance Consultation System, launched on the United Nations Knowledge Gateway in May 2023, prioritizes a seamless user experience to encourage broader participation in the consultation process. The System has proven successful at its objectives of enhancing the quality of operational guidance, by including the client's perspective, increasing transparency of guidance development, encouraging increased contributions from staff in field missions and strengthening the practitioners' ownership of guidance, which should lead to improved compliance, consistency and operational effectiveness.

29B.33 Progress towards the objective is presented in the performance measure below (see figure 29B.I).

Figure 29B.I

Performance measure: average number of contributions from staff to operational guidance (annual)

Planned results for 2025

Result 1: enhanced language and communication skills of United Nations personnel

Programme performance in 2023 and target for 2025

29B.34 The component’s work contributed to an additional five self-study courses and two self-assessment tools available to all United Nations Secretariat staff, permanent mission personnel and eligible participants in language courses, which met the planned target.

29B.35 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29B.7).

Table 29B.7

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Variety of hybrid and online learning formats available to users Partial alignment of pre-existing courses with the United Nations Language Framework	Staff and permanent mission personnel have access to training on new topics, such as strategic writing skills for the United Nations and webinars introducing the United Nations guidelines for gender-inclusive language use, in line with United Nations Language Framework coverage 10-hour self-paced train-the-trainer course available for United Nations Language Framework users, including a library of ready-to-use materials for language learning and assessment	Additional five self-study courses and two self-assessment tools available to all United Nations Secretariat staff, permanent mission personnel and eligible participants in language courses	Learning managers across the Secretariat have access to additional resources and tools, including language samples, to improve application and use of the United Nations Language Framework	All Secretariat learners have access to enhanced language learning opportunities and can identify their language levels through new or revamped language learning resources, including language assessment tools

Result 2: effective resource stewardship in the Secretariat**Programme performance in 2023 and target for 2025**

- 29B.36 The component’s work contributed to nine operational learning solutions built and developed in collaboration with clients, utilizing a blended approach of online, virtual and/or face-to-face training, to improve proficiency in the effective management of resources, which met the planned target.
- 29B.37 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 29B.II).

Figure 29B.II

Performance measure: number of learning solutions on effective resource management available to client entities (cumulative)**Result 3: UNTold: collective learning and innovation across the United Nations system****Proposed programme plan for 2025**

- 29B.38 The subprogramme’s “UNTold” initiative showcases successful and innovative best practices for operational support that can be replicated across the United Nations system, with a view to fostering collective learning and reducing redundancy of efforts. Through video documentaries, virtual discussions and a central information repository, the initiative leverages existing knowledge from the United Nations system to build organizational capacity and encourage teams to learn from others’ experience and apply these insights in their own work. Recent examples showcased by UNTold include the use of drones to support reforestation in Somalia and a virtual operations centre to facilitate operations planning without the necessity of physical presence.

Lessons learned and planned change

- 29B.39 The lesson for the subprogramme, which UNTold underscores, is the value of leveraging interactive learning means and channels for a more collaborative approach to knowledge-sharing and utilization within the Organization. In applying the lesson, the subprogramme will enhance visibility and expand engagement in UNTold sessions by diversifying communication strategies, fostering collaborations and partnerships, promoting multilingualism and establishing feedback mechanisms.
- 29B.40 Expected progress towards the objective is presented in the performance measure below (see figure 29B.III).

Figure 29B.III
Performance measure: number of United Nations personnel engaged in UNTold interactive learning sessions (annual)

Deliverables

29B.41 Table 29B.8 lists all deliverables of the component.

Table 29B.8
Subprogramme 1, component 2: deliverables for 2025, by category and subcategory

Category and subcategory

E. Enabling deliverables

Administration: in-person, online and blended capacity development programmes and initiatives; in-person and virtual governance improvement programme for approximately 16 senior leadership staff from 2 United Nations Secretariat entities; at least 6 learning products on inclusive communication in all 6 United Nations official languages, including instructor-led training and self-paced content for 500 beneficiaries, and illustrative samples (text, video and audio) to demonstrate language production at the various United Nations levels; instructor-led and self-paced language and communication training in all 6 official United Nations languages, including direct provision at United Nations Headquarters and other duty stations, with approximately 350 initiatives and promotion of comparable online language learning licences in 14 Secretariat entities; training on the use of updated and simplified enterprise system workflows and business process improvement; knowledge management products, guidance and best practices for more than 120 thematic areas to simplify and harmonize operational processes to 51,000 Secretariat staff members through the Knowledge Gateway; and embedded accessibility tools for persons with disabilities in the Knowledge Gateway.

Component 3 Health-care management and occupational safety and health

Objective

29B.42 The objective, to which this component contributes, is to ensure the health and well-being of the United Nations workforce.

Strategy

29B.43 To contribute to the objective, the component will:

- (a) Ensure standardized credentialing for United Nations health-care personnel and ensure that health-care personnel with appropriate qualifications and skills are deployed to all field duty stations;

- (b) Implement health-care quality and patient safety standards at all United Nations health-care facilities above level 1+ and above by assessing facilities, training medical personnel in health-care quality and patient safety standards and assessment methodologies and reviewing data from the hospital evaluation tool;
- (c) Promote a culture of safety at all level 1+ and above health-care facilities by implementing a clinical adverse event reporting system to support data collection for surveillance and the reporting of patient safety risks and adverse events and by administering a culture of safety survey;
- (d) Develop evidence-based chronic disease prevention and health promotion programmes and policies, based on a disease surveillance system, for implementation by United Nations medical services globally;
- (e) Implement the components of an occupational safety and health management system for Secretariat entities, including an incident reporting system and a monitoring and evaluation system, through support for an oversight body, the development of policy and standards and training;
- (f) Modernize business processes, including for the collection of medical entitlements through the electronic medical record system, the improved capture of the cause of sickness absences and the integration of systems covering incidents, sickness, work-related medical evacuations and service-incurred compensation;
- (g) Undertake workplace and meeting risk assessments at United Nations Headquarters and implement mitigation strategies to prevent workplace illness and injury;
- (h) Implement support measures for women's health, including training for the United Nations health-care workforce on provision of gender-sensitive medical services.

29B.44 The above-mentioned work is expected to result in:

- (a) A reduction in adverse events and preventable harm by enhancing the health and well-being of personnel, thereby contributing to reduced absenteeism and improved productivity in the workplace and resulting in a reduced financial impact on the Organization;
- (b) Continued mitigation of occupational health and safety risks;
- (c) Improved compliance of field and referral hospitals with United Nations health-care quality and patient safety standards that meet the needs of United Nations health-care professionals and staff.

Programme performance in 2023

Towards improved resilience and psychosocial well-being of United Nations security personnel through a pilot suicide prevention programme

29B.45 Many United Nations personnel live and work under various levels of stress and are confronted with, or are called upon to respond to, critical incidents and emergencies. In 2021, in response to concerns surrounding the resilience and psychosocial well-being of United Nations security professionals, the subprogramme, through its Staff Counsellors Office, initiated a pilot suicide prevention programme in coordination with the Department of Safety and Security. A literature review on suicide risks in persons with military, police or security backgrounds was conducted, in addition to information sessions, surveys and individual meetings with security professionals to gather information on gaps in current knowledge and processes that the programme could help to address. With the support of a specialist in suicide prevention and trauma, the pilot programme was launched in May 2023. The programme is aimed at raising awareness about suicide risk and mental health, establishing "gatekeepers" (personnel trained with skills to identify a colleague in distress and how to approach, initiate a conversation and assist in getting support), changing the service culture and reducing stigma so that personnel feel safe to seek support. Through the pilot programme, 66 security officers received gatekeeper training during 2023.

29B.46 Progress towards the objective is presented in the performance measure below (see table 29B.9).

Table 29B.9
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	–	66 security officers gained knowledge and skills to identify a colleague in distress and assist in accessing appropriate support

Planned results for 2025

Result 1: health-care quality and patient safety standards implemented in health-care facilities above level 1+ and above in field missions for enhanced patient safety

Programme performance in 2023 and target for 2025

29B.47 The component’s work contributed to increased knowledge of medical personnel on health-care quality and patient safety, with 45 hospital commanders and other medical personnel in peacekeeping health facilities certified in health-care quality and patient safety standards, which exceeded the planned target of 30; 5 medical personnel trained and certified as assessors, which did not meet the planned target of 10; and 80 per cent of trained level 1+ and above health facility practitioners certified, which did not meet the planned target of 100 per cent. The planned targets of 10 medical personnel trained and certified as assessors and 100 per cent of trained level 1+ and above health facility practitioners certified were not met owing to challenges in evaluating the assessors and the engagement of the participants on the level 1+ and above course.

29B.48 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 29B.IV).

Figure 29B.IV
Performance measure: increased knowledge of medical personnel, hospital commanders and level 1+ and above health facility practitioners of health-care quality and patient safety (annual)

Result 2: a safe and healthy environment for female civilian and uniformed personnel in peace operations

Programme performance in 2023 and target for 2025

- 29B.49 The component's work contributed to 321 field medical personnel having access to training on women's health, who reported improved knowledge and capabilities for gender-sensitive services, which exceeded the planned target of 150 field medical personnel.
- 29B.50 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 29B.V).

Figure 29B.V

Performance measure: number of field medical personnel who have access to training on women's health and who report improved knowledge and capabilities for gender-sensitive services (annual)

Result 3: United Nations personnel use preventive health services to improve their health and well-being

Proposed programme plan for 2025

- 29B.51 The component organizes health promotions programmes that encourage healthy lifestyles among United Nations personnel throughout the world. To assess impact, the subprogramme has been conducting the United Nations Staff Health and Wellness Survey among Secretariat personnel, which provides insights into the overall well-being of personnel and their access to health services.

Lessons learned and planned change

- 29B.52 The lesson for the subprogramme, based on the results of the 2023 survey, was that health promotion programmes which target specific areas of health can be effective in fostering positive changes in lifestyle and habits. The survey also highlighted the need to promote more preventive health measures to improve the well-being of United Nations personnel. In applying the lesson, the subprogramme will conduct health promotion campaigns, focused on preventive health and adopting active lifestyles, to increase awareness of the importance of preventive health measures and increase the number of personnel accessing preventive health services. The subprogramme will also continue to utilize survey findings to inform future health promotion campaigns and improve health and well-being policies.
- 29B.53 Expected progress towards the objective is presented in the performance measure below (see figure 29B.VI).

Figure 29B.VI
Performance measure: improved health and well-being of United Nations personnel^a

^a The survey is conducted biennially. Data for 2022 (actual) and 2024 (planned) reflect the latest available data.

Deliverables

29B.54 Table 29B.10 lists all deliverables of the component.

Table 29B.10

Subprogramme 1, component 3: deliverables for 2025, by category and subcategory

Category and subcategory

E. Enabling deliverables

Health-care management and occupational safety and health: credentialing process for health-care personnel in compliance with the guidelines for technical clearances and the technical skills framework; psychosocial services, including mental health services; medical clearance of 4,000 personnel for recruitment and travel and immunizations of 3,000 personnel annually; guidance on global occupational health and safety services; audit reports on incident investigations performed by duty stations within the field safety programme; occupational health and safety policy and standards; specialist workplace accommodation reviews; field health support plans for field duty stations and field missions, upon request; assessment of field hospitals for compliance with health-care quality and patient safety standards, and training medical personnel on those standards; clinical audits of field health-care facilities; patient experience surveys; weekly webinars for medical personnel and online courses on women’s health and emergency hemotherapy; training on occupational health and safety issues and on medical entitlement for field health case managers; guidance for public health emergencies; and assessments on emergency preparedness, including for mass casualty events; and health support preparedness.

Subprogramme 2 Supply chain management

Component 1 Integrated supply chain management

Objective

29B.55 The objective, to which this component contributes, is to ensure the availability of the right goods and services at the right place, the right time and the right costs for effective and efficient mandate implementation by United Nations Secretariat client entities.

Strategy

- 29B.56 To contribute to the objective, the component will:
- (a) Improve alignment of the Secretariat's end-to-end supply chain with the 2030 Agenda for Sustainable Development and operationalize 24-month rolling supply chain planning, for continuous monitoring and update of supply chain plans to meet operational requirements and priorities;
 - (b) Identify and ensure the availability of appropriate sourcing options and solutions, such as global and regional systems contracts, local procurement, letters of assist and memorandums of understanding, or the leveraging of existing stock, integrating practices that are client-centric, effective, efficient and gender-sensitive;
 - (c) Intensify outreach efforts, including through targeted outreach to Member States and the enhanced use of business seminars, in particular for women-owned and disability-inclusive businesses and vendors from developing countries and countries with economies in transition;
 - (d) Maintain the list of strategic goods and services sourced through Headquarters to improve risk management in procurement, economies of scale and standardization;
 - (e) Support all entities with the timely and effective sourcing and delivery of goods and services, including the fulfilment of unforeseen requirements.
- 29B.57 The above-mentioned work is expected to result in:
- (a) The availability of the right goods and services at the right time, while taking into consideration their whole-life cost;
 - (b) Client entities gaining access to appropriate, effective and efficient sourcing and delivery solutions to implement their mandates;
 - (c) A more diversified vendor roster for more inclusive and effective international competition;
 - (d) The availability of an adequate supply of vaccines, medical equipment and supplies and transportation services.

Programme performance in 2023

Safe evacuation of United Nations personnel in the Sudan

- 29B.58 The component supports client entities with timely and effective sourcing and delivery of goods and services, including the fulfilment of unforeseen requirements. In April 2023, the conflict in the Sudan necessitated the unexpected evacuation of over 1,000 personnel from the country. The component played a critical role in facilitating the road movement of personnel to Port Sudan and, from there, coordinated with Member States to transport individuals by sea to Jeddah, Saudi Arabia. Long-term aviation contracts for air assets previously established by the component were utilized to facilitate the onward air travel of passengers from Jeddah. Dedicated flights were also provided by the component between Port Sudan and Nairobi: one flight to carry passengers and another flight carrying cash to support United Nations operations in Port Sudan. The component also activated arrangements for standby air cargo services, through an existing letter of assist, to successfully deliver much-needed cargo to continue operations in Port Sudan, such as personal protective equipment, camping cots, rations, trauma bags and air conditioning units. In addition to providing transportation arrangements, the component facilitated arrangements to supply the road convoy with fuel during the initial evacuation.
- 29B.59 Progress towards the objective is presented in the performance measure below (see table 29B.11).

Table 29B.11
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	–	Safe evacuation of over 1,000 United Nations personnel from Sudan

Planned results for 2025

Result 1: enhanced competition in United Nations procurement through a focus on vendors from developing countries and countries with economies in transition

Programme performance in 2023 and target for 2025

- 29B.60 The subprogramme’s work contributed to increased awareness among vendors from developing countries and countries with economies in transition regarding options for collaboration on procurement with the United Nations, including through multilingual vendor registration and training on how to do business with the Organization, which met the planned target.
- 29B.61 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29B.12).

Table 29B.12
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Awareness among vendors from developing countries and countries with economies in transition is increased regarding options for collaboration on procurement with the United Nations	Increased awareness among vendors, in particular vendors from developing countries and countries with economies in transition, regarding options for collaboration on procurement with the United Nations, through intensified outreach efforts, multilingual vendor registration and targeted outreach to vendors living with a disability and women-owned businesses	Awareness among vendors from developing countries and countries with economies in transition is increased regarding options for collaboration on procurement with the United Nations, including through multilingual vendor registration and training on how to do business with the Organization	5 per cent increase in the proportion of businesses from developing countries and countries with economies in transition invited to submit bids, proposals or quotations	5 per cent increase in the proportion of businesses from developing countries and countries with economies in transition invited to submit bids, proposals or quotations

Result 2: reduced environmental footprint through effective supply chain management

Programme performance in 2023 and target for 2025

- 29B.62 The component’s work contributed to the selection of a vendor for a turnkey renewable energy contract, which did not meet the planned target of client entities having access to turnkey renewable energy solutions. The target was not met owing to complexities which required extensive coordination and consultation with stakeholders, including market research to find a fit-for-purpose solution. By the end of 2023, a vendor was selected, and the contract is expected to be awarded in 2024.

29B.63 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29B.13).

Table 29B.13
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Client entities have access to an additional 5 system contracts on waste management and 4 contracts on waste and wastewater treatment	Peacekeeping missions have access to guidance on improved fuel utilization	Selection of vendor for turnkey renewable energy solutions	Client entities have access to 3 system contracts for hybrid vehicles, solar surface electric pumps and solar submersible deep well pumps	Peacekeeping missions increase the proportion of energy consumed through renewable sources to 6 per cent

Result 3: Diversified participation in United Nations business opportunities

Proposed programme plan for 2025

29B.64 To promote a more inclusive procurement process, the component formed a partnership with the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) and International Trade Centre SheTrade initiative and conducted dedicated outreach and capacity-development training for women-owned and disability-inclusive business, which led to increased participation of these groups in United Nations procurement opportunities, as shown through their registration in the United Nations Global Marketplace.

Lessons learned and planned change

29B.65 The lesson for the component was that targeted outreach focused on specific audiences is more effective in raising awareness and facilitating their participation in procurement exercises. In applying the lesson, the component will conduct further tailored outreach, including training for women-owned and disability inclusive businesses to enable these groups’ increased participation in United Nations procurement opportunities.

29B.66 Expected progress towards the objective is presented in the performance measure below (see figure 29B.VII).

Figure 29B.VII
Performance measure: number of women-owned and disability-inclusive businesses registered in the United Nations Global Marketplace

Deliverables

29B.67 Table 29B.14 lists all deliverables of the component.

Table 29B.14

Subprogramme 2, component 1: deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	–	1
1. Report of the Secretary-General on supply chain activities to the General Assembly (biennial report)	1	1	–	1
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	33	31	54	54
2. Seminars on how to do business with the United Nations for suppliers from developing countries and countries with economies in transition	33	31	54	54
C. Substantive deliverables				
Consultation, advice and advocacy: advice on 100 local procurement authority requests from client entities.				
D. Communication deliverables				
Outreach programmes, special events and information materials: briefings for 6 international partners, including Member States, on functional arrangements within areas of logistical cooperation in all field missions, system-wide cooperation on business operation projects and procurement cases with the United Nations entities procurement network; and outreach to vendors.				
Digital platforms and multimedia content: e-catalogue for goods and services; Ariba eTendering platform; supply chain performance management framework; business intelligence reports for all functions in the Secretariat-wide supply chain, including on supply chain performance; dedicated virtual space to encourage innovation and excellence in supply chain management; and annual update of Secretariat procurement statistics.				
E. Enabling deliverables				
Administration: advisory services on procurement matters for 44 client entities, including on optimal acquisition plans, sourcing solutions, systems contracts, procurement modalities and other supply chain matters; category management and planning for the end-to-end supply chain, including through the issuance of standard operating procedures, online sourcing support service community of practice and category-specific communities of practice, where applicable, such as fuel and rations; system contracts; annual supply chain plan and strategic sourcing; operationalized mutual recognition, in line with the promulgated supply chain operational guidance on cooperation with United Nations organizations; collaborative contracts, such as for a fleet management vehicle-tracking system; global systems contracts and turnkey contracts, air transportation service contracts and other contracts; vendor registration documents in the 6 official United Nations languages; deployment and rotation cycles and solutions sourced for uniformed personnel and associated cargo by air, naval and ground transport modalities; strategic level support within the logistics specialist areas; system-wide aviation regulatory framework; guidance on aviation safety, including that related to air service vendors; operational guidance, manuals, contract performance evaluation tools and best practices on supply chain management; Umoja master data management and data quality assurance; risk management for fuel and rations; electronic fuel management system; and implementation and review of new sustainable supply chain technologies.				

Component 2 Uniformed capabilities support

Objective

29B.68 The objective, to which this component contributes, is to ensure the efficient and effective functioning of the peace and security pillar of the United Nations.

Strategy

29B.69 To contribute to the objective, the component will:

- (a) Serve as the single point of contact for troop- and police-contributing countries on all administrative and logistical issues related to force generation, memorandums of understanding, contingent-owned equipment and reimbursement;
- (b) Support the periodic review by the General Assembly of the reimbursement framework associated with uniformed capabilities deployed in formed units, support the negotiation and finalization of memorandums of understanding with troop- and police-contributing countries, expeditiously process applicable reimbursements in line with the decisions of the Assembly and facilitate the strategic integration of relevant performance data related to deployed contingent-owned equipment;
- (c) Provide a streamlined reimbursement process involving an enhanced memorandum of understanding and payment processes;
- (d) Provide strategic and operational support and foster enhanced partnerships with troop- and police-contributing countries.

29B.70 The above-mentioned work is expected to result in:

- (a) Servicing of the General Assembly during the periodic review of the reimbursement framework for formed units and the implementation of all derivative guidance;
- (b) Streamlined and timely payments to troop- and police-contributing countries for uniformed personnel and contingent-owned equipment deployed in formed units, letter-of-assist reimbursements, death and disability claims and ad hoc claims;
- (c) Increased transparency and accountability of the reimbursement process and the real-time availability of data to Member States, Headquarters and field missions.

Programme performance in 2023

Post-traumatic stress disorder claims settled

29B.71 In 2021, at the request of the General Assembly, the subprogramme conducted a study of post-traumatic stress-disorder in uniformed personnel participating in United Nations peace operations, to provide a holistic analysis of the policy, legal, administrative and financial aspects of the matter of compensating claims for disability due to post-traumatic stress-disorder and to develop recommendations for a sustainable and appropriate approach to the management of post-traumatic stress-disorder in uniformed military and police personnel deployed to United Nations peace operations. The study was conducted through a working group, steered by an advisory board with Member States and subject matter experts. Having considered the report of the Secretary-General ([A/76/662](#)), the General Assembly, in its resolution [76/275](#), decided to adopt a pay-as-you-go approach to compensation for adjudicated claims and requested the Secretary-General to take concrete measures to expedite the settlement of claims. In 2023, the subprogramme finalized a study on post-traumatic stress-disorder prevention and mitigation and conducted claims awareness campaigns and one-on-one briefings on the claims submission procedure to several Member States.

29B.72 Progress towards the objective is presented in the performance measure below (see table 29B.15).

Table 29B.15
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
The General Assembly considers post-traumatic stress disorder study and report of the Secretary-General based on data collection, interviews and a scientific literature review prepared by an advisory board	The General Assembly, in its resolution 76/275, adopted a pay-as-you-go approach to compensation for adjudicated claims	170 post-traumatic stress disorder claims settled

Planned results for 2025

Result 1: contingent-owned equipment policies, procedures, standards and definitions considered

Programme performance in 2023 and target for 2025

- 29B.73 The component’s work contributed to standards and rates of reimbursement for contingent-owned equipment being updated on the basis of the recommendations of the 2023 Working Group on Contingent-Owned Equipment, which met the planned target.
- 29B.74 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29B.16).

Table 29B.16
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Member States provided instructions on preparing issue papers and national cost data submissions	Pre-sessional bureau of the 2023 meeting of the Working Group on Contingent-Owned Equipment was convened	Standards and rates of reimbursement for contingent-owned equipment updated on the basis of the recommendations of the 2023 Working Group on Contingent-Owned Equipment	Implementation of the decisions of the General Assembly on the standards for and rates of reimbursement for contingent-owned equipment	Completion of the mandated studies from the 2023 Working Group on Contingent-Owned Equipment Pre-sessional bureau of the 2026 Working Group on Contingent-Owned Equipment convened

Result 2: single point of contact in the areas of administrative, logistical and financial support for troop- and police-contributing countries for faster reimbursement

Programme performance in 2023 and target for 2025

- 29B.75 The component’s work contributed to the certification of 5,901 reimbursement claims, with 100 per cent of claims certified within the mandated three-month timeline, which exceeded the planned target of 5,000 claims.
- 29B.76 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 29B.VIII).

Figure 29B.VIII

Performance measure: number of reimbursement claims (uniformed personnel and contingent-owned equipment) certified within the mandated three months following the end of the preceding quarter (annual)

Result 3: a secure one-stop-gateway for Member States to submit claims and access information on their deployments to peace operations

Proposed programme plan for 2025

29B.77 Every year, the component processes approximately 2 billion dollars in claims and reimbursements. Previously, information to troop- and police-contributing countries on memorandums of understanding and reimbursements was provided through multiple email exchanges. In 2022, the component launched a Member States Portal for Uniformed Capabilities Support, providing troop- and police-contributing countries with secure access to basic information related to their deployments in peace operations.

Lessons learned and planned change

29B.78 The lesson for the component was the importance of strengthening communication with Member States and the need to simplify processes for them to submit claims. In applying the lesson, the component will facilitate the submission of various claims by Member States through the portal and provide direct access to supporting documents for reimbursements, including payment letters, information on quarterly contingent-owned equipment performance for each military and police unit deployed and quarterly verification reports. The portal will also be enhanced with a repository of historical information, complemented by a search tool. These additional functionalities will improve communication and increase the transparency of transactional data pertaining to reimbursements made to troop- and police-contributing countries.

29B.79 Expected progress towards the objective is presented in the performance measure below (see table 29B.17).

Table 29B.17
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Member States Portal for Uniformed Capabilities Support provides basic information and visualizations	New functionalities of Member States Portal for Uniformed Capabilities Support developed and tested	Troop- and police-contributing countries use Member States Portal for Uniformed Capabilities Support to submit claims and securely access memorandums of understanding and reimbursement information

Deliverables

29B.80 Table 29B.18 lists all deliverables of the component.

Table 29B.18
Subprogramme 2, component 2: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	2	1	–	–
Reports of the:				
1. 2023 Working Group on Contingent-Owned Equipment	1	1	–	–
2. Secretary-General on the 2023 Working Group on Contingent-Owned Equipment	1	1	–	–
Substantive services for meetings (number of three-hour meetings)	5	5	5	5
3. Meeting of intergovernmental bodies, including the Fifth Committee and the Working Group on Contingent-Owned Equipment	5	5	5	5
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	10	10	10	20
4. Training events on the various aspects of memorandums of understanding and contingent-owned equipment policies and procedures, as well as death and disability compensation claims (for Member States)	10	23	10	20
E. Enabling deliverables				
Administration: reimbursement framework for formed units, including: the quadrennial survey on standard uniformed personnel reimbursements; administration of the Member States Portal for Uniformed Capabilities Support; training for Secretariat entities and all field missions with formed units on the reimbursement framework; new and amended statements of unit requirements, memorandums of understanding, letters of assist and agreements for military and police contingents deployed to field missions or pledged to the rapid deployment level of the Peacekeeping Capability Readiness System and participation in advisory, predeployment, rapid deployment-level, contingent-owned equipment verification and other visits to troop- and police-contributing countries; reimbursements to military and police personnel and for contingent-owned equipment deployed to field missions on memorandums of understanding or letters of assist, including through the calculation of premiums, deductions and death and disability and post-traumatic stress disorder compensation; servicing of the Contingent-Owned Equipment/Memorandum of Understanding Management Review Board; comparative performance analysis and management decision reports.				

Subprogramme 3 Special activities

Objective

- 29B.81 The objective, to which this subprogramme contributes, is to ensure effective and efficient operational support responses by the Secretariat, including for unique and escalated requirements.

Strategy

- 29B.82 To contribute to the objective, the subprogramme will:
- (a) Lead and coordinate the Secretariat's operational support response to emerging situations and other unique and surge-level requirements, including through planning support and monitoring, shared situational awareness, the provision of surge and specialized capacities and the facilitation of coordinated efforts;
 - (b) Build on the existing foundation of major service providers in the global operational support architecture to facilitate, coordinate and provide specialist advice for the continuous effort to reduce duplication and fragmentation in service delivery while increasing integration, harmonization, improvements and innovation;
 - (c) Facilitate a robust value-for-money and resource stewardship agenda to inform efficient, effective and responsive operational support functions across the Secretariat;
 - (d) Coordinate and maintain bilateral and other multiparty relationships with key non-Secretariat partners in operational support, including on the implementation of Security Council resolution [2719 \(2023\)](#).
- 29B.83 The above-mentioned work is expected to result in:
- (a) Sustainable and multidimensional operational response to escalated situations and unique requirements;
 - (b) Fit-for-purpose support solutions that leverage existing capacities and expertise across the Secretariat and with United Nations agencies, funds and programmes to enhance responsiveness, interoperability and operational continuity;
 - (c) Mutually beneficial collaboration between Secretariat and non-Secretariat entities, including Member States and regional organizations, that addresses priority needs across Secretariat entities;
 - (d) Measurable gains in efficiency and responsiveness across the Secretariat operational support architecture, including deepened cooperation in support operations with United Nations agencies, funds and programmes;
 - (e) Secretariat entities having access to guidance on operational support resourcing priorities and standards that is responsive to evolving requirements.

Programme performance in 2023

Surge capacity for the transition and expansion of field operations

- 29B.84 The subprogramme increased its focus on support responses to escalated situations and incidents facing the Secretariat, which, through planning and monitoring, resulted in appropriate coordinated support efforts for the deployment of surge and specialized capacities. The subprogramme implemented the strategic review of the United Nations Support Mission in Libya (UNSMIL) and supported the transition of UNITAMS, the expansion of the United Nations Office for West Africa and the Sahel (UNOWAS) mandate following the closure of MINUSMA and the expansion of the standing surge capacity. The standing surge capacity has served as an effective mechanism to provide staff on short-term assignments for durations of up to 90 days to address critical gaps in an entity during escalated situations. In 2023, in

partnership with the Department of Safety and Security, a pool of security experts was established in the standing surge capacity. The pool of experts for operational support roles was also expanded, to broaden the staff available during a surge. The standing surge capacity supported deployments to the offices of the Resident Coordinators in Mali and Burkina Faso and established a new partnership for the African Union.

29B.85 Progress towards the objective is presented in the performance measure below (see figure 29B.IX).

Figure 29B.IX

Performance measure: strengthened surge capacity for the transition and expansion of field operations

Planned results for 2025

Result 1: robust value-for-money and resource stewardship agenda to inform operational support functions across the Secretariat

Programme performance in 2023 and target for 2025

29B.86 The subprogramme’s work contributed to 90 per cent of Secretariat entities receiving enhanced, consistent and improved administrative support services through formal service provision agreements that include standard cost recovery and improved client service from regional and global service providers, which met the planned target.

29B.87 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 29B.X).

Figure 29B.X

Performance measure: percentage of Secretariat entities that receive enhanced, consistent and improved administrative support services through formal service provision agreements that include standard cost recovery and improved client service from regional and global service providers^a

^a The presentation of the performance measure has been modified to quantitative graph format.

Result 2: mutually beneficial collaboration in support operations through a support partnerships framework

Programme performance in 2023 and target for 2025

- 29B.88 The subprogramme's work contributed to strengthened bilateral and other multiparty relationships with key partners to foster mutually beneficial collaboration between the Department and non-Secretariat entities, as well as to access by Secretariat entities to a central information repository on operational support framework agreements that informs and guides operational engagement with established support partners, which met the planned target.
- 29B.89 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29B.19).

Table 29B.19

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	Active engagement of the African Union in the development of a joint United Nations-African Union road map to renew the knowledge and expertise exchange programme	Two operational support framework agreements established with the African Union that provide an overarching framework to promote responsive solutions to operational challenges faced by key partners in security	United Nations Support Office in Somalia enabled to provide operational support to non-United Nations security forces in Somalia, in compliance with international human rights and humanitarian laws and in line with the human rights due diligence policy	Mechanisms in place to enhance collaboration in operational support between the African Union and the United Nations in accordance with Security Council resolution 2719 (2023)
	Support implications for the proposed reconfiguration of African Union operations in Somalia reviewed by the African Union, the United Nations and other key partners to inform the Security Council's consideration of a future direction	Secretariat entities have access to a central repository of information on operational support framework agreements	Strengthened engagement of the African Union, European Union and other regional organizations, enabling mutual understanding and interoperability on operational support matters	

Result 3: enhanced through-life management of operational support functions by entities undergoing transitions

Proposed programme plan for 2025

- 29B.90 The subprogramme provides direct support to entities faced with special circumstances through operational planning guidance and has undertaken efforts to address the management of a wide range of field-based administrative and logistic functions during transition periods.

Lessons learned and planned change

29B.91 The lesson for the subprogramme was that many aspects of operational support require constant attention and oversight to prevent an accumulation of issues that become apparent only during major transitions. This tendency significantly complicates the transition process by imposing an unexpected additional workload during already operationally intense periods of activity. In applying the lesson, the subprogramme will develop a tool, underpinned by key performance indicators, to enable managers to easily monitor a range of operational support functions shown to contribute to this issue, such as through-life asset disposal or the maintenance of appropriate human resources records. This tool will initially be developed in conjunction with, and utilized by, those field entities expected to undergo transitions but will be able to be used across the operational support portfolio.

29B.92 Expected progress towards the objective is presented in the performance measure below (see table 29B.20).

Table 29B.20
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	–	One field entity pilots the beta version of operational support monitoring tool	Operational monitoring tool and related training available to field entities

Deliverables

29B.93 Table 29B.21 lists all deliverables of the subprogramme.

Table 29B.21
Subprogramme 3: deliverables for 2025, by category and subcategory

Category and subcategory
E. Enabling deliverables
Administration: 52 regular situational response and awareness reports, standardized procedures for escalated situations and an emerging situation data management platform; deployments of surge and specialized support capacities within 10 days; administration of residual entity liquidation issues; support partnerships, including arrangements that address client priority needs; coordination, advice and direct project management support for 6 integration and improvement working groups; training programme and package on the use of the operational monitoring tool deployed to entities undergoing transitions.

**Subprogramme 4
Administration, New York**

Objective

29B.94 The objective, to which this subprogramme contributes, is to ensure a safe and fit-for-purpose physical environment at Headquarters and responsive facilities, as well as administrative, logistical, information and other services in support of the efficient functioning of the Organization and a public informed of the work of the United Nations.

Strategy

29B.95 To contribute to the objective, the subprogramme will:

- (a) Proactively maintain and operate the Headquarters buildings to achieve efficiencies, promote a modern workplace and preserve the property value of the campus, with an emphasis on reviewing building components completed more than 10 years ago and improving accessibility for persons with disabilities and environmental sustainability;
- (b) Regularly adjust the long-term planning of office accommodation to support the needs of entities in New York, centred on implementing the recommendations from the mandated assessment of the real estate portfolio (see General Assembly resolution [75/253 C](#));
- (c) Provide efficient, timely and cost-effective services to clients in New York in the areas of building management, office space, asset and official gift management, inventory and warehouse management, travel and transportation, mail and pouch services, event management, postal administration and catering and other commercial operations;
- (d) Provide effective archives and records management services to Secretariat entities globally and strengthen the subprogramme's capacity to manage the accelerated shift from paper to digital archives;
- (e) Provide specialized human resources support in the areas of onboarding, separations and the processing of complex entitlements (including education grants, dependency allowances and rental subsidies) for the staff of all Headquarters-based United Nations entities and relevant field locations;
- (f) Coordinate and manage commercial insurance policies to mitigate and transfer risk pertaining to property, terrorism and liability programmes, as well as the malicious acts insurance policy, for the Organization, including offices away from Headquarters and peacekeeping and special political missions; adjudicate claims emanated from these insurance programmes and obtain settlements from the insurers; and provide insurance advice for vendor, memorandum of understanding and pro bono contracts and agreements;
- (g) Ensure accurate and timely disbursement of salaries and related allowances for all staff based at United Nations Headquarters and international staff in field missions and all field staff from various entities administered by Headquarters;
- (h) Process other disbursements in respect of the financial obligations of the Organization and process the tax reimbursement claims of United States taxpayers;
- (i) Provide postal, gift, archival and information services to the public in New York and globally.

29B.96 The above-mentioned work is expected to result in:

- (a) A highly functional, more inclusive and sustainable campus that symbolizes the ideals of the United Nations;
- (b) High client satisfaction and cost-efficiency in the provision of services;
- (c) Increased public awareness of the past and current work of the Organization.

Programme performance in 2023

Systems upgraded for United Nations-issued travel documents

29B.97 In its first major upgrade since 2012, the subprogramme updated the United Nations-issued travel documents, namely, the United Nations laissez-passers and the certificate identity documents, with the latest cryptographic algorithms for electronic passports, a chip embedded in its cover and numerous modern physical security print features. The booklet design included original artwork from the United Nations Postal Administration design team. The subprogramme deployed new booklet personalization

systems, required to issue these enhanced travel booklets, in collaboration with key stakeholders. The booklets adhere to the latest international standards and the International Civil Aviation Organization’s recommendations for emergency travel documents. The upgrade also ensures that United Nations-issued travel documents remain compatible with the border control systems employed by Member States and maintain the trust that Member States bestow on these documents to accurately reflect the privileges and immunities entitled to their holders under the relevant conventions.

29B.98 Progress towards the objective is presented in the performance measure below (see table 29B.22).

Table 29B.22
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	Planning, gathering of requirements and development of a request for proposals to initiate a new procurement exercise for United Nations laissez-passer booklets and related systems	United Nations staff use travel documents that are compatible with border control systems

Planned results for 2025

Result 1: office space aligned with the needs of the Organization

Programme performance in 2023 and target for 2025

29B.99 The subprogramme’s work contributed to the consideration by the General Assembly of a strategic assessment of the workplace and to the alignment of United Nations Headquarters office space with the needs of the Organization by vacating the DC-1 building and reassigning personnel into remaining buildings, which met the planned target.

29B.100 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29B.23).

Table 29B.23
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
The General Assembly approved the Secretary-General’s recommendation to close out the flexible workplace project and re-evaluate future needs	Office space aligned with the current needs of the Organization by reassigning personnel from the DC1 Building into remaining buildings, mainly into flexible workplace in the Secretariat Building, in preparation for vacating the lease in March 2023	The General Assembly took note of the report of the Secretary-General on the assessment of the workplace at United Nations Headquarters (A/78/325) DC-1 lease vacated	Real estate portfolio further reduced and Falchi Building is vacated Plans to optimize the alignment of office space with evolving needs are finalized on the basis of the General Assembly’s recommendations on the strategic assessment of the real estate portfolio	Completion of phases 1 and 2 of the DC-2 renovation project, with 6 floors converted to flexible workplace

Result 2: shorter wait time, improved accuracy of estimates and other improvements enabled by simpler and harmonized payroll and accounts payable processes

Proposed programme plan for 2025

- 29B.101 The subprogramme's work contributed to an average lead time of 1 working day for off-cycle payments to be processed for personnel at Headquarters and 3 other payroll offices (Economic Commission for Latin America and the Caribbean, the United Nations Office at Vienna and the Kuwait Joint Support Office), which met the planned target for 2023.
- 29B.102 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29B.24).

Table 29B.24

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Average lead time of 7 working days for off-cycle payments to be processed for personnel at Headquarters	Average lead time of 1 working day for off-cycle payments to be processed for personnel at Headquarters	Average lead time of 1 working day for off-cycle payments to be processed for personnel at Headquarters and 3 other payroll offices	Average lead time of 1 working day for off-cycle payments to be processed for personnel at Headquarters and all payroll offices globally Improved accuracy of estimates of resource requirements by client entities based on full adherence to payroll processes. For example, the Office of Programme Planning, Finance and Budget more accurately estimates salary costs and the impact of vacancy rates	Offices globally receive automated monthly payroll batch and invoice processing

Result 3: historical records digitally preserved

Proposed programme plan for 2025

- 29B.103 The subprogramme has increasingly been receiving digital records from Secretariat entities over the past 20 years. At present, almost all records transferred to the subprogramme are born digital (i.e. a hard-copy version never existed), including those of political missions and peacekeeping operations, and evidence collected or received by investigative bodies. These sensitive documents are often transferred in specialized systems and formats and need to be managed under specific conditions.

Lessons learned and planned change

- 29B.104 The lesson for the subprogramme was that managing these records requires expertise, dedicated workflows and specialized systems. In applying the lesson, the subprogramme will develop a digital strategy to manage these records, as well as a road map for future-proofing incoming records, in order to preserve digital records of enduring and permanent value. It will develop its capacity and

that of Secretariat entities to support the digital preservation strategy and identify systems and workflows with other stakeholders to securely manage, preserve and provide access to the historical records of the United Nations.

29B.105 Expected progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29B.25).

Table 29B.25
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	–	Processes established to dispose digital records, in accordance with approved retention schedules, that no longer need to be kept by the United Nations	A comprehensive inventory of the digital records available to Secretariat entities

Deliverables

29B.106 Table 29B.26 lists all deliverables of the subprogramme.

Table 29B.26
Subprogramme 4: deliverables for 2025, by category and subcategory

Category and subcategory
<p>D. Communication deliverables</p> <p>External and media relations: information and reception services to visitors, delegates and the general public, including responses to approximately 20,000 enquiries on the current and past work of the United Nations.</p> <p>Library services: archives, records and information management services to all entities at United Nations Headquarters and field missions; guidance on recordkeeping for Secretariat entities; security-screened, catalogued, stored and preserved paper and digital records; and digitized legacy paper archives.</p> <p>E. Enabling deliverables</p> <p>Logistics: 1,703,000 square feet of owned and leased premises, facilities and assets, including gifts, managed and maintained; office accommodations provided for approximately 8,250 personnel; completion of approximately 8,000 service requests for facilities and commercial services; conferences and special events logistics; warehousing and transportation services; approximately 35,000 travel requests and travel documents, lump-sum calculations and host country registrations processed; airline agreements; mail services; and processing of approximately 650,000 postal, courier and diplomatic pouch shipment and messenger services.</p> <p>Administration: administrative support services, including specialized human resources support in the areas of onboarding and the processing of complex entitlements, dependency benefits and rental subsidies for approximately 8,250 staff of all Headquarters-based United Nations entities and relevant field locations; transactions and claims for 6,600 staff members in the area of tax reimbursement; management of 18 commercial insurance programmes covering \$2.68 billion in assets under the global property and terrorism insurance policies, 180,000 personnel under the malicious acts policy and 30,000 vehicles of diverse types under the worldwide auto policy, including the adjudication of related claims; insurance advice and review of certificates of insurance for 150 contracts and agreements; payroll for 26,000 staff and retirees, including assignment and separation payments; pension schedules for all entities at United Nations Headquarters and offices away from Headquarters; troop- and contingent-owned equipment reimbursements; payments to vendors, consultants and individual contractors; annual declaration exercise; annual rental subsidy monitoring exercise; and management of insurance policies.</p>

B. Proposed post and non-post resource requirements for 2025

Overview

29B.107 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 29B.27 to 29B.29.

Table 29B.27

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2023 expenditure	2024 approved	Changes				2025 estimate (before recosting)

29B.108 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 29B.30 to 29B.32 and figure 29B.XI.

29B.109 As shown in tables 29B.30 (1) and 29B.31 (1), the overall resources proposed for 2025 amount to \$96,003,700 before recosting, reflecting a net decrease of \$242,300 (or 0.3 per cent) compared with the approved budget for 2024. Resource changes result from technical adjustments, new and expanded mandates and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

29B.110 As shown in table 29B.30 (1), resource changes reflect a net decrease of \$398,500, as follows:

- (a) **Subprogramme 2, component 1, Integrated supply chain.** A decrease of \$32,900 under consultants relating to the removal of a non-recurrent provision for consultancy services for the expansion of the contract performance rating tool and instant feedback system to all Secretariat entities, including offices away from Headquarters and the regional commissions in 2024;
- (b) **Subprogramme 4, Administration, New York.** A decrease of \$457,100, which reflects the net effect of: (i) an increase of \$69,000 relating to the higher provision at continuing vacancy rates for one post (P-3) established in 2024 pursuant to General Assembly resolution [78/252](#), which was subject to a 50 per cent vacancy rate in accordance with the established practice for the costing of new posts; and (ii) a decrease of \$526,100 under general operating expenses relating to the removal of a non-recurrent provision for office space alterations for 38 posts and temporary positions established under section 8, Legal affairs, section 9, Economic and social affairs, section 10, Least developed countries, landlocked developing countries and small island developing States, and section 28, Global communications, pursuant to General Assembly resolutions [78/252](#) and [78/253](#) (section IX);
- (c) **Programme support.** An increase of \$91,500 relating to the higher provision at continuing vacancy rates for one post (P-5) established in 2024, pursuant to General Assembly resolution [78/252](#), which was subject to a 50 per cent vacancy rate in accordance with the established practice for the costing of new posts.

New and expanded mandates

29B.111 As presented in table 29B.30 (1), resources changes reflect an increase of \$71,000 under subprogramme 4, Administration, New York, for a non-recurrent provision under general operating expenses for office space alteration for five posts proposed for establishment under section 10, Least

developed countries, landlocked developing countries and small island developing States, pursuant to General Assembly resolution [78/233](#) (see [A/79/6 \(Sect. 10\)](#) for additional details).

Other changes

29B.112 As shown in table 29B.30 (1), resource changes reflect a net increase of \$85,200, as follows:

- (a) **Subprogramme 1, component 2: Capacity development and operational training.** The increase of \$29,400 reflects the net effect of:
 - (i) An increase of \$22,200 under consultants, reflecting additional requirements for specialized consultancy services in support of multilingualism, Enhanced Training for High-level Operational Support and advanced training for heads of operational support on special skills required to handle complexities in these operational areas. The increase is partially offset by reduced requirements for consultancy services in the area of personal preparedness, owing to completion of training development in that area;
 - (ii) An increase of \$57,400 under contractual services, attributable to higher requirements for technical services in support of multilingualism, as well as operational and capacity-development programmes, such as business process improvement and knowledge management areas, in view of projected demands from clients and expected requirements in these areas;
 - (iii) A decrease of \$50,200 under furniture and equipment attributable to lower requirements for specialized eLearning licences in support of multilingualism, including language and communication skills training, due to changes in the design, development and delivery of the multilingualism projects planned for 2025;
- (b) **Subprogramme 1, component 3, Health-care management and occupational safety and health.** The net decrease of \$29,400, mainly under other staff costs, which reflects the proposed redeployment of one general temporary assistance position of Senior Medical Officer (P-5) from New York to Brindisi, to cover emergency preparedness and response to mass casualty events. The redeployment of the position would allow for physical location and time zones closer to duty stations outside of United Nations Headquarters and would provide for more efficient communications and considerably shorter travel times for deployment in emergencies outside of New York. The scope of the position encompasses all aspects related to trauma care, from single casualty and casualty evacuation (CASEVAC) to mass casualty incident preparedness and response and the development of a casualty tracking system;
- (c) **Subprogramme 4, Administration, New York.** The increase of \$85,200 reflecting a non-recurrent provision under general operating expenses for office space alteration for six general temporary assistance positions proposed for establishment in New York under section 30, Internal oversight (see [A/79/6 \(Sect. 30\)](#) for additional details).

Other assessed resources

29B.113 As reflected in tables 29B.30 (2) and 29B.31 (2), other assessed resources under the support account for peacekeeping operations for 2025 amount to \$116,337,500. The resources would complement regular budget resources and provide for the requirements indicated in the report of the Secretary-General ([A/78/746](#)).

Extrabudgetary resources

29B.114 As reflected in tables 29B.30 (3) and 29B.31 (3), extrabudgetary resources for 2025 amount to \$63,121,100. The resources would complement regular budget resources and would be used mainly to provide for 82 posts (5 P-5, 9 P-4, 12 P-3, 5 P-2/1, 12 General Service (Principal level), 36 General Service (Other level), 3 Trades and Crafts) and non-post resources. The resources would be used to:

- (a) Strengthen capacities for renewable energy in peacekeeping operations;

- (b) Provide support and services to agencies, funds and programmes in human resources, capacity development and health-care management in the following areas: language proficiency examinations, language and communications programmes and the administration of special exams; and the facilitation of rostering and medical consultations, travel health advisories, immunizations and other medical administrative matters, such as medical clearances, sick leave certification and recommendations for medical evacuations/repatriations. Extrabudgetary resources support the client offices funded from extrabudgetary sources in the areas of facilities management and office space, travel and transportation and pouch and mail services, human resources services for processing separations, onboarding and complex entitlements, operational and transactional functions consisting of payroll, accounts payable and commercial insurance, and the processing of tax advances and settlements of federal and state taxes for United States citizens and residents employed by the United Nations and its agencies, funds and programmes;
 - (c) Support procurement actions in the areas of corporate support services for field and Headquarters operations and continuation of the project to implement gender-sensitive designs for infrastructure;
 - (d) Support the triangular partnership programme, a capacity-building model aimed at training uniformed personnel in the peacekeeping-enabling capacity through collaboration among Member States with expertise and resources, troop-contributing countries and the Secretariat.
- 29B.115 The extrabudgetary resources under the present section are subject to the oversight of the Department, which has delegated authority from the Secretary-General.

Executive direction and management

- 29B.116 The executive direction and management component comprises the Offices of the Under-Secretary-General, the Assistant Secretary-General for Support Operations and the Assistant Secretary-General for Supply Chain Management.
- 29B.117 The overall responsibilities of the executive direction and management component include the following functions:
- (a) The overall direction, supervision and management of the Department in the implementation of its mandates and its approved programme of work, including co-chairing of the Management Client Board by the Under-Secretary-General, jointly with the Under-Secretary-General for Management Strategy, Policy and Compliance, and assisted by the Assistant Secretaries-General for Support Operations and for Supply Chain Management;
 - (b) Provision of leadership and direction to support clients across the Secretariat, through guidance and advisory services in their exercise of authorities for the successful implementation of mandates relating to human resources, health-care management and occupational health and safety, as well as capacity development and operational training;
 - (c) Overall administration and management of all the activities of the Office of Supply Chain Management and the provision of leadership and direction relating to the implementation and coordination of the organizational entities, which together form the Organization's integrated supply chain and uniformed capabilities support.
- 29B.118 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), the Department is mainstreaming environmental management practices into its operations through a variety of Secretariat-wide and facility management projects. The Department's long-term approach includes providing technical guidance and advisory support to peacekeeping operations and field-based special political missions to facilitate and implement the Department's environment strategy for peace operations, the environmental

Section 29B Department of Operational Support

management of the United Nations campus and facilities, and the environmental initiatives in the area of supply chain management. As requested by the General Assembly in its resolution [76/274](#), the Department developed the Way Forward: Environment Strategy for Peace Operations 2023–2030 to ensure continuity with the work done in environmental management in the context of peace operations.

29B.119 Information on the timely submission of documentation and advance booking for air travel is reflected in table 29B.33.

29B.120 The Department has improved its compliance rate by issuing frequent reminders about the policy, developing activity calendars to anticipate trips and encouraging early engagement with relevant stakeholders by strengthening coordination and communication with partners. In addition, internal controls were applied to limit non-compliant trips, such as escalation to senior management and provision of strong justification, and limited exceptions allowed such as external factors including delays in the processing of travel documents and visas, security clearances and trip criticality. The Department will continue to monitor its compliance rate, ensure timely scheduling of meetings and emphasize travel policy requirements to meeting participants. In 2023, the Department continued to submit all its documents within the prescribed timelines.

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 29C.1 The Office of Information and Communications Technology is responsible for the delivery of information and communications technology (ICT) in the United Nations. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolutions [63/262](#) and [72/266](#) B.

Strategy and external factors for 2025

- 29C.2 In 2025, the Office will continue to implement programmes that support the strategic goals of ensuring an environment where interoperability allows information to flow effectively throughout the Organization, facilitating coherent and integrated mandate implementation, where ICT is leveraged as a critical operational and strategic enabler for the work of the United Nations and where the Organization is protected from rapidly escalating threats to ICT security.
- 29C.3 Almost every aspect of the work undertaken in the United Nations relies on technology. The Office continues to provide resilient and secure global network and ICT systems, platforms and applications that enable collaboration and communication across the Secretariat and throughout the wider United Nations common system. As a principle of management reform, a balance between centrally provided enterprise services and solutions and those provided closest to the point of delivery is critical. In 2025, the Office will ensure that ICT operational capabilities are preserved, secured and resilient. The Office will also support mandate delivery by Secretariat entities through the development and deployment of innovative technologies and data services and solutions that facilitate their programmatic delivery.
- 29C.4 As demonstrated during the move to remote working arrangements during the coronavirus disease (COVID-19) pandemic, the adoption of enterprise platforms that are cloud-based, where United Nations personnel can collaborate and connect regardless of their location, proved critical for the Organization as it adapted to new ways of working. The shift to enterprise platforms from legacy applications will continue, leading to a more cohesive, coherent and resilient ICT ecosystem, as will the shift to cloud-based services. As these services evolve and become ubiquitous, they will be combined with innovative and frontier technologies to provide a more effective user experience and increased interoperability. It should be noted, however, that the increased use of technology exposes the United Nations to additional risks and threats. The Office will therefore continue to adopt a balanced approach, taking into account policy, people, ICT security and operational delivery.
- 29C.5 In the specific context of ICT security, which forms one of the core areas of the Office's work, challenges continue to grow in scale, pervasiveness and complexity. In response, the Office has initiated the deployment of proactive threat-hunting capabilities to replace the reactive intrusion detection systems that were used previously. This transition was designed to reduce reliance on outsourced services and strengthen internal capacity, while a clear focus is kept on United Nations operations. Other key initiatives requiring significant effort are also under way, including network segmentation, which is instrumental in containing threats and limiting the impact of successful attacks, the upgrade of various security solutions to protect end user devices, digital identities and cloud-based services, and increased interactive awareness campaigns.
- 29C.6 The Office will support efforts to transform the Organization into one that more effectively uses data and information to support decision-making and inform strategic direction. This work will be aligned with the Data Strategy of the Secretary-General for Action by Everyone, Everywhere, as one component of the Secretary-General's "quintet of change". The effective use of data across the

Secretariat requires cross-cutting efforts, with the Office leading any such efforts relating to technology and the establishment of services and capacities that support the use of data in advancing the programmes of the Organization. While contributing to many of the related work streams, the Office will take the lead in the creation of technology enablers that support the exchange, reconciliation, storage and governance of data. Analytics and data solutions will also continue to be implemented, and associated standards and architecture will be formulated to achieve a consistent approach to data. Efforts will be made to improve the use of data at both the strategic and the tactical levels, with enterprise reporting as a complement to self-service reporting at the point of delivery. The Office will also support areas such as policy formulation and the governance of information management. The continued shift to cloud-based services will also be instrumental to the implementation of the Data Strategy, because such services reduce barriers to combining and sharing data, and enable multiple entities within the Secretariat, as well as Member States and partners, to contribute to and improve data sets in all areas of United Nations work.

- 29C.7 Innovation is one of the Office's core areas of work, and the Office will continue to provide access to technologies that can support a wide range of needs across the United Nations. Frontier technologies, such as artificial intelligence, blockchain and computer vision, will support the work of the Organization and mandate delivery globally, through, for example, the use of machine-learning computer systems to reduce manual work. Conversational artificial intelligence has already been applied to ensure more intuitive and efficient access to information. These solutions are designed to be foundational, to ensure that they can be integrated into the various systems in use across the Organization.
- 29C.8 The Office will advance its work in digital transformation, strengthening project and programme management to ensure that all ICT- and data-related projects are implemented in accordance with prevailing industry project and programme management methodologies. The Office will also strengthen relationships with partners both within the Secretariat and externally.
- 29C.9 With regard to inter-agency coordination and liaison, the Office will continue to collaborate with agencies, funds and programmes. This will be done through the United Nations System Chief Executives Board for Coordination Digital and Technology Network, which is co-chaired by the Assistant Secretary-General/Chief Information Technology Officer and serves as a mechanism to collaborate, harmonize and explore possibilities for shared ICT services. The Office will also continue to ensure access to Secretariat platforms for personnel from United Nations agencies, funds and programmes, in order to facilitate collaboration across the larger United Nations common system and support coherence in mandate delivery.
- 29C.10 With regard to external factors, the Office considered applicable risks identified in its risk register, and, accordingly, the overall plan for 2025 is based on the planning assumption that there will be adequate voluntary contributions to complement regular budget resources to carry out the activities of the Office.
- 29C.11 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate. The Office will continue to coordinate and host events, both virtual and in-person, to promote women in technology within the Secretariat and to highlight the contributions of women to mandate delivery across all programmes.
- 29C.12 In line with the United Nations Disability Inclusion Strategy, the Office will continue to improve the accessibility of enterprise applications and public information websites for persons with disabilities, including by adding functionality to, remediating or configuring existing websites and applications in accordance with the established Accessibility Guidelines for United Nations Websites.

Legislative mandates

- 29C.13 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

<p>63/262</p> <p>69/262, sect. II</p> <p>70/248 A, sect. V</p>	<p>Information and communications technology, enterprise resource planning, and security, disaster recovery and business continuity</p> <p>Questions relating to the programme budget for the biennium 2014–2015: information and communications technology in the United Nations</p> <p>Special subjects relating to the proposed programme budget for the biennium 2016–2017: information and communications technology in the United Nations</p>	<p>71/272 B, sect. III</p> <p>72/262 C, sect. I</p>	<p>Special subjects relating to the programme budget for the biennium 2016–2017: status of implementation of the information and communications technology strategy for the United Nations</p> <p>Special subjects relating to the programme budget for the biennium 2018–2019: status of implementation of the information and communications technology strategy for the United Nations</p>

Deliverables

29C.14 Table 29C.1 lists all cross-cutting deliverables of the programme.

Table 29C.1
Cross-cutting deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	–	1	–
1. Report of the Secretary-General on the status of implementation of the information and communications technology strategy for the United Nations	1	–	1	–
Substantive services for meetings (number of three-hour meetings)	5	3	5	3
Meetings of:				
2. The Fifth Committee	2	1	2	1
3. The Committee for Programme and Coordination	1	1	1	1
4. The Advisory Committee on Administrative and Budgetary Questions	2	1	2	1

Evaluation activities

29C.15 The following evaluations to be conducted by the Office are planned for 2025:

- (a) Evaluation of completed mandatory ICT security trainings, performance of fake phishing exercises and ICT security incidents affecting end users;
- (b) Evaluation of cloud resources, with a focus on consolidation and optimization to enhance cost monitoring and reporting, closely aligned with Organizational needs through effective information management.

Programme of work

**Subprogramme 1
 Strategy and technology innovation**

Objective

29C.16 The objective, to which this subprogramme contributes, is to enhance an innovative, secure, unified digital space for the United Nations.

Strategy

- 29C.17 To contribute to the objective, the subprogramme will continue to focus on the establishment of strategies, policies and governance, including the development of technology strategies aligned with the Organization's priorities, the establishment of technical procedures and guidelines, and a review of standards and architecture. Specifically, the subprogramme will:
- (a) Provide advisory services covering information technology, innovation, and data and information management;
 - (b) Develop technology road maps to envisage and define how United Nations technologies should be implemented in support of the core mandates of the United Nations (see General Assembly resolution 69/292, sect. II, preambular paragraph 3), taking into account organizational needs, as well as strategic direction and innovation;
 - (c) Work closely with United Nations clients to identify their key data, information and technology requirements or challenges and, in close collaboration with internal and external partners, provide innovative, integrated and secure technology solutions, such as artificial intelligence, machine learning and distributed ledger technology, and an enabling environment to meet clients' needs;
 - (d) Support United Nations entities in reducing the level of risk to the image, resources, data, operations and safety of the personnel and assets of the United Nations and ensure that information security risks do not hamper efforts to implement United Nations mandates or adversely affect support to Member States, through the provision of specific security guidance, the performance of system security reviews and the conduct of information security awareness training;
 - (e) Promote information security campaigns and the use of advanced security features, support and implement security measures, and strengthen proactive threat management capabilities;
 - (f) Promote the effective use of data, facilitate access to data across the Organization by leveraging modern technology, strengthen data literacy by co-leading the implementation of the Data Strategy of the Secretary-General and govern information and data management.
- 29C.18 The above-mentioned work is expected to result in:
- (a) Better awareness of innovation techniques and new technologies, and increased capacity for Secretariat entities to deliver on mandates;
 - (b) Strengthened resilience of the Organization, better end user awareness of information security threats and reduced exposure of the digital data and infrastructure of the United Nations to various security threats;
 - (c) Integrated, secure and innovative use of information and data by United Nations entities;
 - (d) A coherent ICT landscape in the Secretariat through compliance with policies, procedures and guidelines, as well as common standards, strategies and architecture.

Programme performance in 2023

Digital transformation enabled by the use of open-source systems

- 29C.19 The open-source paradigm is based on the idea that content reuse need not stop at organizational boundaries. By sharing source code freely under a licence that permits copying, modification and redistribution, open-source projects allow collaborative development that benefits a larger community. The subprogramme focuses on creating increasingly open and accessible systems for the United Nations that can provide the capacity to advance its mandate.
- 29C.20 The subprogramme implemented an open-source strategy focusing on three pillars: (a) building a strong policy framework for the governed and safe use of open-source systems; (b) building the internal capacity of United Nations personnel; and (c) building necessary technologies, including repositories to disseminate open-source code with the wide open-source community.

Table 29C.2
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	Adoption of open-source use by leveraging contributions to United Nations projects from external open-source communities	United Nations intellectual property safeguarded, and the security of published open-source software enabled by comprehensive policies

Planned results for 2025

Result 1: enhanced management of the Organization’s master data

Programme performance in 2023 and target for 2025

- 29C.21 The subprogramme’s work contributed to a common understanding of the management and use of master data, with departments and offices having access to authoritative master data sets through a master data registry, which met the planned target.
- 29C.22 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29C.3).

Table 29C.3
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Assessment of the status of master data in the Organization to identify departments’ master data sets	A common understanding of the management and use of master data by bringing together master data focal points from different entities Commencement of the development of a pilot master data registry	Departments and offices have access to a master data registry with improved master data that have been assessed to ensure consistency and accuracy, minimizing duplication and enabling a common understanding of the use of data	Strengthened technical capabilities for master data management are embedded in the enterprise data architecture Pilot environment available to strengthens clients’ master data management capabilities	Authoritative master data sets from two business domains are streamlined and accessible to Secretariat users from a central hub in line with the enterprise data architecture

Result 2: advance mandate implementation through partnerships on innovative technology

Programme performance in 2023 and target for 2025

- 29C.23 The subprogramme’s work contributed to the Joint United Nations Programme on HIV/AIDS using two new technology solutions developed by young innovators to raise awareness of HIV/AIDS, and to strengthened engagement across the United Nations system on digital transformation and innovation through a joint declaration with the International Telecommunications Union covering several areas, including emerging technologies and innovation for digital inclusion, which met the planned target.
- 29C.24 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29C.4).

Table 29C.4
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	<p>Member States have access to financial intelligence through the strengthening by United Nations entities of their ability to collect, analyse and share intelligence</p> <p>Innovators from the general public submitted concepts on open-source software solutions for Sustainable Development Goals 4 and 11 through open innovation competitions in partnership with the European Commission</p>	<p>The Joint United Nations Programme on HIV/AIDS makes use of two new technology solutions developed by young innovators to raise awareness of HIV/AIDS</p> <p>Strengthened engagement across the United Nations system through a joint declaration with the International Telecommunications Union on digital transformation and innovation issues</p>	<p>Strengthened response and reduction in technological gaps for the just transitions in vulnerable places project in support of Sustainable Development Goal 11, through joint private-public partnerships and United Nations inter-agency mechanisms</p>	<p>Member States, the Secretariat, innovators and open-source leaders share knowledge and best practices on the use of open-source technologies for sustainable development</p>

Result 3: enhanced effectiveness in mandate delivery by leveraging generative artificial intelligence

Proposed programme plan for 2025

29C.25 The General Assembly has repeatedly recognized the potential of ICT and digital transformation to achieve the 2030 Agenda for Sustainable Development and other internationally agreed development goals. In its resolution [78/132](#), the Assembly stressed the need to better realize the benefits and address the challenges of artificial intelligence. The subprogramme has been supporting entities in strengthening their mandate delivery through innovative technology solutions, including generative artificial intelligence. For instance, the subprogramme initiated work to securely connect non-sensitive United Nations data to large language models to enable the automated generation of content and insights. To build awareness and ensure the responsible use of artificial intelligence, the subprogramme delivered a new course on generative artificial intelligence and issued initial guidance on its use and risks.

Lessons learned and planned change

29C.26 The lesson for the subprogramme was that early engagement with entities is critical for the successful deployment of new technology solutions, as it enables identification of the necessary skills and capacity and ensures that critical governance requirements are in place prior to the deployment of solutions. In applying the lesson, the subprogramme will develop further guidance and instruments and provide training for staff and personnel and will support United Nations entities in deploying solutions such as generative artificial intelligence to strengthen their mandate delivery.

29C.27 Expected progress towards the objective is presented in the performance measure below (see table 29C.5).

Table 29C.5
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Staff have access to initial guidance on and training on generative artificial intelligence	Three entities process documents more efficiently through the use of generative artificial intelligence for strengthened mandate delivery	Five additional entities process documents more efficiently through the use of generative artificial intelligence for strengthened mandate delivery

Deliverables

29C.28 Table 29C.6 lists all deliverables of the subprogramme.

Table 29C.6
Subprogramme 1: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory

E. Enabling deliverables

Information and communications technology: ICT and information management policies and standards; enterprise architecture, ICT risks and compliance oversight mechanism; analytics and innovation guidelines for oversight and accountability; analytics and frontier technology solutions accessible to Secretariat entities; repeatable technology solutions and conversational artificial intelligence solutions; expert advice to Secretariat entities on information management; policies and procedures for data privacy and mechanisms for oversight of adherence to data privacy principles; disaster recovery plan for critical systems; and information security framework across Secretariat entities, comprising a framework document on information security and security assessment of systems and entities.

Subprogramme 2 Operations support

Objective

29C.29 The objective, to which this subprogramme contributes, is to achieve an optimized ICT infrastructure and technology environment for all United Nations entities, within which the Organization’s global technology solutions, systems and applications are used securely and in an intuitive manner.

Strategy

29C.30 To contribute to the objective, the subprogramme will continue to implement and upgrade enterprise systems and infrastructure to enable the Secretariat and Member States to effectively deliver on the Organization’s work. Specifically, the subprogramme will:

- (a) Implement global enterprise solutions that provide users with a single place to meet, communicate, share files and collaborate within the larger United Nations common system;
- (b) Enable enterprise systems and infrastructure to operationalize the Data Strategy of the Secretary-General by implementing self-service analytics and other advanced analytics tools;

- (c) Implement and support data-driven initiatives, such as the Unite Aware technology platform, which will continue to be rolled out globally and will support data-driven decision-making by senior management in peace operations and enable situational awareness;
- (d) Promote and extend the utilization of geographic information systems services;
- (e) Implement an effective blend of hosting, which is transforming how the Organization hosts its data and applications, and consolidate the Organization's data, primarily in a United Nations-managed computing environment;
- (f) Create a cross-cutting client service desk approach to provide support for ICT services as well as enterprise applications such as Umoja, Inspira and Unite Mail;
- (g) Provide broadcast, audiovisual and conferencing technologies to support intergovernmental meetings as well as the work of Secretariat entities.

29C.31 The above-mentioned work is expected to result in:

- (a) The facilitation of mandate delivery by Secretariat entities by means of modern, resilient and secure global ICT infrastructure and services;
- (b) Greater collaboration across the United Nations common system that supports the Secretariat in the execution of its mandates with greater agility;
- (c) A modern and secure technology environment that provides simplified access to the Organization's data and serves as the foundation for the Data Strategy of the Secretary-General;
- (d) A highly capable workforce that is familiar with the systems and processes and derives insights and information that support data-driven decision-making;
- (e) Timely resolution of incidents and service requests, with end users expressing increased satisfaction with ICT enterprise services, which serves to increase engagement and communication with clients;
- (f) Improvements in the access to intergovernmental meetings, including in respect of remote participation, the access of Secretariat services to verbatim report-writing and translation, and the access of other audiences to interpretation, broadcasting and webcasting capabilities.

Programme performance in 2023

Unite Service Desk that meets client needs and satisfaction

29C.32 The Unite Service Desk remains critical to enable the work of United Nations personnel, providing support for enterprise applications such as Umoja, Unite Mail, SharePoint and Teams, as well as other ICT services across the Secretariat. In 2023, the subprogramme continued to ensure that the levels of client service delivery remained high by ensuring the prompt resolution of issues, proactive follow-up with client-centric engagement and an ongoing analysis of client feedback to refine the service offering. The subprogramme has undertaken an assessment of the current configuration of the Unite Service Desk to explore and implement the most effective modality for service delivery and maintain a high client satisfaction rate, taking into consideration the increasing work volume each year. As a result of the assessment, a more streamlined, optimized and fit-for-purpose service offering is sought that will ensure that service delivery is both effective and efficient, utilizing the global footprint of the Secretariat.

29C.33 Progress towards the objective is presented in the performance measure below (see figure 29C.I).

Figure 29C.I
Performance measure: rate of client satisfaction with services delivered (annual)
 (Percentage)

Planned results for 2025

Result 1: modernization of voice communications

Programme performance in 2023 and target for 2025

- 29C.34 The subprogramme contributed to 50 additional users with access to desktop telephone services using Teams, which did not meet the planned target of 6,500 users. The target was not met owing to the additional information required to obtain the relevant approvals from the ICT governance mechanisms.
- 29C.35 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 29C.II).

Figure 29C.II
Performance measure: number of users with access to desktop telephone services using Teams (cumulative)

Result 2: improved wireless infrastructure coverage for delegates and staff at United Nations Headquarters

Programme performance in 2023 and target for 2025

- 29C.36 The subprogramme contributed to the cumulative total installation of 1,193 Wi-Fi access points and reductions in Wi-Fi incidents to 50 incidents, which did not meet the planned targets of 1,625 Wi-Fi access points and 42 Wi-Fi incidents. The target for access points was not met owing largely to

competing priorities stemming from ageing equipment, necessitating the prioritization of installations in critical and high-traffic areas such as the General Assembly Hall and the major conference rooms (1, 2 and 4). The target for Wi-Fi incidents was not met owing to increased reports of issues regarding ageing access points across the United Nations premises.

29C.37 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 29C.III).

Figure 29C.III

Performance measure: increased number of Wi-Fi access points results in a decrease in the number of Wi-Fi incidents

Result 3: strengthened governance of technologies that support intergovernmental meetings

Proposed programme plan for 2025

29C.38 The subprogramme provides broadcast and conferencing technology services to facilitate intergovernmental meetings at Headquarters and supports the technical infrastructure that facilitates the delivery of broadcast content. The subprogramme additionally provides similar services throughout the Secretariat. Systems managed through the subprogramme include audiovisual equipment, sound reinforcement systems, video production and distribution systems, digital signage and, crucially, the conference management and simultaneous interpretation system.

Lessons learned and planned change

29C.39 The lesson for the subprogramme, as ageing equipment approaches replacement, was to prioritize consistency, interoperability and scalability across communication, conferencing and broadcast technologies. In the absence of a standardized architecture, these systems may not work together seamlessly, which could lead to communication challenges, inefficiencies and technical issues. In applying the lesson, the subprogramme will establish a task force that will take the lead in the creation of a global technology architecture and framework for broadcast and conferencing in the Secretariat.

29C.40 Expected progress towards the objective is presented in the performance measure below (see table 29C.7).

Table 29C.7
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	Each entity seeks technical clearance from the Office for non-standard local technology purchases	Secretariat entities nominate members for the working group on broadcasting and conferencing interoperability	The working group establishes the global architecture, as well as related standards and guidelines on broadcasting and conferencing, to guide future technology investments	Broadcast and conferencing technologies are standardized, interoperable and resilient as Secretariat entities adhere to the global architecture and framework for all technology investments in broadcasting and conferencing

Deliverables

29C.41 Table 29C.8 lists all deliverables of the subprogramme.

Table 29C.8
Subprogramme 2: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Conference and secretariat services for meetings (number of three-hour meetings) ^a	12 700	8 478	12 700	12 700
Meetings of intergovernmental and expert bodies	12 700	8 478	12 700	12 700
E. Enabling deliverables				
Information and communications technology: hardware and infrastructure, and software and applications.				

^a The Broadcast and Conference Support Section of the Office of Information and Communications Technology facilitates meeting services for intergovernmental meetings in New York only.

Subprogramme 3 Enterprise solutions

Objective

29C.42 The objective, to which this subprogramme contributes, is to ensure the effective and efficient implementation of programmatic mandates by Secretariat entities.

Strategy

29C.43 To contribute to the objective, the subprogramme will:

- (a) Continue to develop bespoke software solutions that support mandate delivery and the Sustainable Development Goals by partnering with Secretariat entities and leveraging emerging technologies to meet evolving challenges and mandates;

- (b) Actively support the digital transformation of the Secretariat by designing process automation and knowledge management solutions for departments and offices;
- (c) Implement the Data Strategy of the Secretary-General by delivering technical solutions for data exchange between systems through an enterprise platform;
- (d) Enhance identity management by leveraging cloud technology, upgrade service management solutions, enhance talent management, manage the United Nations safety and security information systems, and design and operate the enterprise web content management platform.

29C.44 The above-mentioned work is expected to result in:

- (a) Facilitation of contributions to the Sustainable Development Goals through technology solutions, as articulated by programmatic mandates;
- (b) Enriched functionality for uniformed capabilities management;
- (c) Faster automation of administrative support processes;
- (d) Expanded data-sharing between and among the Organization’s stakeholders, coordination and cooperation within and across the Secretariat and the broader United Nations system;
- (e) Faster recruitment process for the Secretariat;
- (f) Increased availability of information for professional security officers to perform their duties of protecting United Nations personnel across the United Nations system;
- (g) Public information websites compliant with the Secretariat’s standards.

Programme performance in 2023

Harnessing low code for the digital transformation of the Organization

29C.45 Low code is a modern approach that enables non-specialist personnel to develop quick and small applications that make their work more efficient, while offering information technology specialists a rapid way of designing scalable enterprise solutions. When coupled with application programme interface management, a centralized mechanism for data-sharing among systems, it can boost the digital transformation of the Organization. The subprogramme ran a conference on low code and application programme interface management that was attended by 70 participants from 22 Secretariat entities and three United Nations agencies. The conference brought substantial benefits to the Secretariat by creating a cohesive community of low code developers to share knowledge, build capacity, avoid duplication and facilitate innovation, which contributed to making progress towards the objective by directly supporting the Secretary-General’s “quintet of change”.

29C.46 Progress towards the objective is presented in the performance measure below (see table 29C.9).

Table 29C.9

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
Discovery and sharing with Secretariat entities of low code technology	Secretariat entities build capacity in low code development, facilitating the digital transformation of the Secretariat	A community of low code developers share knowledge, strengthen capacity, avoid duplication and facilitate innovation

Planned results for 2025

Result 1: enhanced standards, security, multilingualism and accessibility of United Nations public information websites

Programme performance in 2023 and target for 2025

29C.47 The subprogramme’s work contributed to onboarding seven additional websites to the Enterprise Content Management platform, including the United Nations careers portal, as well as websites related to international support measures for the least developed countries and the United Nations Decade of Action on Nutrition (2016–2025), which met the planned target.

29C.48 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 29C.IV).

Figure 29C.IV

Performance measure: number of websites hosted on the Enterprise Content Management platform (cumulative)

Result 2: process automation and knowledge management solutions to support the digital transformation of the Secretariat

Programme performance in 2023 and target for 2025

29C.49 The subprogramme’s work contributed to automating three Secretariat business processes to centrally store 98,094 official status files of personnel, analyse and send 2,541,069 notifications of job openings to target candidates and compute accurately 135,434 telecommunication bills from 60 commercial vendors in field missions and at Headquarters. While these projects were not initially planned for 2023, the subprogramme took concerted efforts to deliver the three technology solutions given the needs of client departments.

29C.50 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29C.10).

Table 29C.10
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	<p>Centralized official status file in use by the Department of Operational Support and the United Nations Office at Nairobi</p> <p>Bot to analyse and send notifications of job openings to target candidates in use by hiring managers</p> <p>Accurate computation of commercial vendor telecommunication bills in use by field missions and at Headquarters</p>	<p>Three process automation or knowledge management solutions in place, in which departments make use of process automation tools to reduce processing time and paperwork and simplify workflows</p>	<p>Three additional process automation or knowledge management solutions in place, in which departments make use of process automation tools to reduce processing time and paperwork and simplify workflows</p>

Result 3: timely custom information technology solutions for mandate delivery

Proposed programme plan for 2025

29C.51 Mandate delivery by substantive entities is facilitated by information technology solutions that are developed by the subprogramme. For example, the e-TIR (Transports Internationaux Routiers) mobile application, developed for the Economic Commission for Europe and used by border customs officers and truck drivers to accelerate customs procedures across borders, promotes transparency and information-sharing among member States.

Lessons learned and planned change

29C.52 The lesson for the subprogramme was that the development of specific solutions requires robust understanding of the substantive mandates, which technology specialists often lack. In applying the lesson, the subprogramme will set up integrated project teams with programmatic entities early in the project life cycles to develop a thorough understanding of business needs and constraints, costs and schedules and propose the most appropriate technology solutions.

29C.53 Expected progress towards the objective is presented in the performance measure below (see table 29C.11).

Table 29C.11
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Making Cities Resilient 2030 campaign in use by the United Nations Office for Disaster Risk Reduction	Disaster risk resilience scorecard in use by the United Nations Office for Disaster Risk Reduction	Online solution for information and networking among uniformed women in use by the Department of Peace Operations and the Department of Political and Peacebuilding Affairs	Three additional custom information technology solutions available to support mandate delivery by Secretariat entities	Three additional custom information technology solutions available to support mandate delivery by Secretariat entities
Global Partnership on Marine Litter in use by the United Nations Environment Programme	Security Council resolution 2589 (2021) knowledge base in use by the Department of Peace Operations	Assessment tool to evaluate performance of private-public partnership projects in use by the Economic Commission for Europe, and an application to accelerate customs procedures across borders		
Data collection and analysis platform in use by the United Nations Office on Drugs and Crime	Plastic pollution CounterMEASURE II in use by the United Nations Environment Programme	Information management centre to report, validate and analyse programmatic activities in use by the Department of Global Communications		

Deliverables

29C.54 Table 29C.12 lists all deliverables of the subprogramme.

Table 29C.12
Subprogramme 3: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory

E. Enabling deliverables

Information and communications technology: content management solutions for the Secretariat; ongoing development and support for the enterprise web management platform, including security, standards and multilingualism compliance, used by Secretariat entities, field missions and permanent missions; enterprise talent and performance management solutions; integration with Azure; Umoja support, including uniformed capabilities management solution with enhanced functionality for statement of unit requirements, memorandums of understanding, claims and calculations, as well as supporting the Member State portal interface with uniformed capabilities management; support for service management solutions for approximately 25,500 users; safety and security solutions for 100,000 users; support for Security Council resolution 2605 (2021) by extending functionalities of the national police recruitment system to cover tour of duty, leave management, strength planning, project and budget management; expansion of misconduct and sexual exploitation and abuse ecosystem, inclusion of additional types of misconduct and consolidation of reporting; strengthened business intelligence capabilities to enhance strategic planning; roll-out of global vehicle acquisition system across United Nations entities; application integration mechanism used by 65 applications; solutions to support mandate delivery of programmatic entities.

B. Proposed post and non-post resource requirements for 2025

Overview

29C.55 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 29C.13 to 29C.15.

Table 29C.13

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2023 expenditure	2024 approved	Changes				Total	Percentage	2025 estimate (before recosting)

^a Includes one temporary post (P-4) under subprogramme 2.

29C.56 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 29C.16 to 29C.17 and figure 29C.V.

29C.57 As shown in tables 29C.16 (1) and 29C.17 (1), the overall resources proposed for 2025 amount to \$53,789,000 before recosting, reflecting a net decrease of \$66,400 (or 0.1 per cent) compared with the approved budget for 2024. Resource changes result from technical adjustments and new and expanded mandates. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

29C.58 As shown in table 29C.16 (1), resource changes reflect a decrease of \$152,600, as follows:

- (a) **Subprogramme 2, Operations support.** A decrease of \$49,800 under contractual services related to the removal of non-recurrent provisions for conference services for 2024 in support of: (i) implementation of the outcomes of the International Conferences on Financing for Development, pursuant to General Assembly resolution [78/231](#) (\$20,900); and (ii) the Ad Hoc Committee to Elaborate a Comprehensive International Convention on Countering the Use of

Information and Communications Technologies for Criminal Purposes, pursuant to Assembly resolution [75/282](#) (\$28,900);

- (b) **Subprogramme 3, Enterprise solutions.** A decrease of \$102,800 under contractual services related to the removal of non-recurrent provisions for 2024 in support of General Assembly decision 77/512, for the open-ended working group on security of and in the use of information and communications technologies 2021–2025, established pursuant to Assembly resolution [75/240](#).

New and expanded mandates

29C.59 As shown in table 29C.16 (1), resource changes reflect an increase of \$86,200, as follows:

Subprogramme 2, Operations support. The increase relates to additional requirements under contractual services for conference services in support of: (a) revitalization of the work of the General Assembly (\$46,400), pursuant to General resolution [77/335](#); (b) transparency in armaments (\$14,900), pursuant to Assembly resolution [77/69](#); and (c) further modalities of the Fourth International Conference on Financing for Development (\$24,900), pursuant to Assembly resolution [78/271](#).

Other assessed resources

29C.60 As reflected in tables 29C.16 (2) and 29C.17 (2), other assessed resources amount to \$34,852,400. The resources would complement regular budget resources and provide for the requirements indicated in report [A/78/746](#).

Extrabudgetary resources

29C.61 As reflected in tables 29C.16 (3) and 29C.17 (3), extrabudgetary resources amount to \$67,180,000 and would complement regular budget resources. The resources, which include funds recovered from United Nations Headquarters entities, peacekeeping operations and special political missions, together with voluntary contributions, would provide for 13 posts (1 P-4, 1 P-3, 2 General Service (Principal level) and 9 General Service (Other level)) and would be used to provide ICT services such as a personal computing core package, collaboration and communication tools, network access, a telephone system, service desk support for computers, and desktop and enterprise applications. Services would include the development and deployment of tailored technology solutions to support mandate delivery by substantive departments and offices, such as solutions that help to ensure the safety and security of United Nations system personnel, the training of uniformed personnel, rapid deployment, and public broadcasting and data analysis capabilities.

29C.62 The extrabudgetary resources are subject to the oversight of the Office of Information and Communications Technology, which has delegated authority from the Secretary-General.

Executive direction and management

29C.63 The executive direction and management component comprises the Office of the Assistant Secretary-General for Information and Communications Technology and the Enterprise Programme Management Section. In General Assembly resolutions [69/262](#), [70/248](#) and [71/272 B](#), the central authority of the Chief Information Technology Officer was reaffirmed and strengthened with regard to information security and the overall direction and performance of ICT activities within the Organization.

29C.64 The main responsibilities of the executive direction and management component include:

- (a) Provision of overall strategic direction and central leadership for the establishment and implementation of Organization-wide ICT;

- (b) Planning and coordination of ICT activities Secretariat-wide, including infrastructure and enterprise systems, with a view to achieving coherence and coordination in the area of ICT within the work of the United Nations and between the Secretariat and funds, programmes and specialized agencies of the Organization;
- (c) Provision of overall strategic planning and management and coordination of the work of the internal organizational units.

29C.65 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Office of Information and Communications Technology is integrating environmental management practices into its operations. The Office will continue to provide departments and offices with solutions to support the achievement of the Goals and will continue to reduce its infrastructure footprint in data centres by moving to the cloud, thus reducing its environmental impact.

29C.66 Information on the timely submission of documentation and advance booking for air travel is reflected in table 29C.19. The Office continues to make efforts to fully comply with the advance purchase policy directive and has taken a number of steps to ensure that air travel is booked as early as possible. Travel requests that do not meet the two-week timeline are directed to the Head of Office for validation of mitigating circumstances before final review and approval. Owing in part to the implementation of such measures, the rate of compliance has considerably increased since 2021. Regarding submission of parliamentary documentation, the Office plans to submit in 2024 the report of the Secretary-General on the status of implementation of the ICT strategy for the United Nations.

Table 29C.19

Compliance rate

(Percentage)

	2021 actual	2022 actual	2023 actual	2024 planned	2025 planned
Timely submission of documentation	n/a	n/a	n/a	100	n/a
Air tickets purchased at least two weeks before the commencement of travel	63	72	84	100	100

29C.67 The proposed regular budget resources for 2025 amount to \$3,301,800 and reflect no change compared with the approved budget for 2024. Additional details on the distribution of the proposed resources for 2025 are reflected in table 29C.20 and figure 29C.VI.

Table 29C.20

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 29D.1 The United Nations Office at Nairobi was established by the Secretary-General on 1 January 1996 as a successor to the United Nations Common Services Unit at Nairobi and the two separate divisions of administration of the United Nations Environment Programme (UNEP) and the United Nations Human Settlements Programme (UN-Habitat). In its resolution [53/242](#), the General Assembly requested the Secretary-General to strengthen the Office and encouraged the Director-General of the United Nations Office at Nairobi to take steps to increase the level of utilization of the Office. The Office was established to strengthen the United Nations presence in Nairobi and to achieve economies of scale, and provides management, information and communications technology (ICT) and administrative services to the United Nations complex in Nairobi. Under a memorandum of understanding and specific service arrangements, the Office provides the Nairobi-based headquarters and globally dispersed offices of UNEP and UN-Habitat with a full range of administrative and other support services. As a designated global and regional service provider, the Office provides human resources administration, payroll and finance services, international travel, recruitment of consultants and procurement services to the resident coordinator system and to Secretariat offices with a regional presence, such as the Office of the United Nations High Commissioner for Human Rights, the International Residual Mechanism for Criminal Tribunals, the United Nations information centres in the Africa region and the International Court of Justice. With the introduction of the Kenya Common Back Office, the United Nations Office at Nairobi provides ICT, local procurement and local recruitment services to more than 70 offices of United Nations agencies, funds and programmes operating in or from Kenya and other United Nations system entities, including special political missions and peacekeeping support operations operating from Kenya.

Strategy and external factors for 2025

- 29D.2 In 2025, the Office will support its clients within the existing inter-agency and governance frameworks, increase its client portfolio and forge stronger partnerships in the region. It will advance its engagement in the efficiency agenda, including in common premises and the global shared services architecture, working closely with the Department of Operational Support. The Office will increase its level of utilization through partnerships with other United Nations entities.
- 29D.3 For 2025, the Office will maintain optimal service delivery and strengthen monitoring of key performance indicators. To increase the efficiency and effectiveness of its services, the Office will strengthen its financial management, internal control systems, risk framework and communication strategy, including through regular surveys and a client relations management platform.
- 29D.4 The United Nations treatment facility will serve United Nations personnel and other patients, and the Office will provide medical and logistical support, including for evacuations, to United Nations entities in the region.
- 29D.5 Major infrastructure projects, namely the renovation of blocks A to J and the conference facilities, remain high on the programme agenda. The Office will make greater use of the 142-acre Gigiri compound through increased use of outdoor spaces.
- 29D.6 The Office will deepen its engagement with the host country Government in support of its mandate and the clients that it serves. As the main interlocutor with the Government of Kenya, it will play a key coordination role in the establishment of humanitarian hubs for United Nations entities in the region.

- 29D.7 With regard to inter-agency coordination and liaison, the Office will continue to work with the United Nations system organizations based in Nairobi, including through the common services governance framework, in support of the reform of the United Nations development system.
- 29D.8 With regard to the external factors, the overall plan for 2025 is based on the following planning assumptions:
- (a) Nairobi-based organizations of the United Nations common system maintain a commitment to collaborate with the United Nations Secretariat on ongoing activities;
 - (b) The extrabudgetary funding situation of client offices continues to allow for planning and implementation of the Office's activities.
- 29D.9 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate. It continues to support the Secretary-General's system-wide strategy on gender parity, provides guidance to clients on how to integrate gender parity throughout the recruitment process and keeps hiring managers and human resources focal points in client entities informed of the impact of selection decisions.
- 29D.10 In line with the United Nations Disability Inclusion Strategy, the Office will ensure that all major repairs and replacements at the United Nations complex in Nairobi consider and address accessibility concerns. Moreover, the Office will strengthen an inclusive organizational culture that is supportive of staff members with disabilities and staff who have dependants with disabilities, offering regular training opportunities on disability inclusion, organizing awareness-raising events and communicating available benefits and entitlements with regard to disabilities. These activities will be pursued with the active involvement of persons with disabilities and their representative organizations.

Legislative mandates

- 29D.11 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

53/242	Report of the Secretary-General on environment and human settlements	75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
74/271 ; 77/280	Progress towards an accountability system in the United Nations Secretariat	78/253	Special subjects relating to the proposed programme budget for 2024

Subprogramme 1 Programme planning, finance and budget

General Assembly resolutions

41/213	Review of the efficiency of the administrative and financial functioning of the United Nations	42/211	Implementation of General Assembly resolution 41/213
------------------------	--	------------------------	--

Subprogramme 2 Human resources management

General Assembly resolutions

59/164	Improvement of the status of women in the United Nations system	77/256	United Nations common system
63/271	Amendments to the Staff Regulations	77/278	Human resources management
73/281	Shifting the management paradigm in the United Nations	78/248	Administration of justice at the United Nations

**Subprogramme 3
Support services**

General Assembly resolution

69/273 Procurement

**Subprogramme 4
Information and communications technology operations**

General Assembly resolutions

63/262	Information and communications technology, enterprise resource planning, and security, disaster recovery and business continuity	69/262	Questions relating to the programme budget for the biennium 2014–2015 (sect. II, Information and communications technology in the United Nations)
63/269	Information and communications technology, disaster recovery and business continuity for the United Nations: arrangements for the secondary data centre at Headquarters	70/238 B	Financial reports and audited financial statements, and reports of the Board of Auditors (sect. II, Report of the Board of Auditors on progress in the handling of information and communications technology affairs in the Secretariat)

Deliverables

29D.12 Table 29D.1 lists all cross-cutting deliverables of the programme.

Table 29D.1

Cross-cutting deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	7	7	7	7
Meetings of:				
1. The Advisory Committee on Administrative and Budgetary Questions	3	3	3	3
2. The Committee for Programme and Coordination	1	1	1	1
3. The Fifth Committee	3	3	3	3

Evaluation activities

- 29D.13 The Joint Inspection Unit evaluation on the review of the quality, effectiveness, efficiency and sustainability of health insurance schemes in the United Nations system organizations, completed in 2023, has guided the proposed programme plan for 2025.
- 29D.14 In response to the results of the evaluation referenced above, the Office will liaise within the Secretariat to implement coordinated responses to the recommendations.
- 29D.15 An evaluation to be conducted by the United Nations Office at Nairobi on the impact of the Kenya Common Back Office is planned for 2025.

Programme of work

Subprogramme 1

Programme planning, finance and budget

Objective

- 29D.16 The objective, to which this subprogramme contributes, is to ensure the sound, effective and efficient financial management and reporting by client offices.

Strategy

- 29D.17 To contribute to the objective, the subprogramme will:
- (a) Oversee the financial management and internal control of the regular budget and extrabudgetary funds of the programme and that of its clients;
 - (b) Streamline the financial procedures and workflows of client offices and ensure strict adherence to the Financial Regulations and Rules of the United Nations, including through assurance and visibility of United Nations resources management, monitored by improved financial dashboards for the programme and client entities;
 - (c) Maintain the financial accounts of its clients, improve the financial integrity of data, prepare the financial statements in compliance with the International Public Sector Accounting Standards (IPSAS), support the internal and external audit processes, produce accurate and timely financial reports for donors and manage funding arrangements with implementing partners;
 - (d) Support client offices on results-based management and to implement the enhanced delegation of authority framework;
 - (e) Establish appropriate service rates and service requirements and monitor service statistics and client satisfaction;
 - (f) Monitor and manage the financial risks of reform initiatives mandated to the United Nations Office at Nairobi.
- 29D.18 The above-mentioned work is expected to result in:
- (a) Operational efficiency and improved stewardship of donor funds and other resources, through increased transparency and accountability, in accordance with the enhanced delegation of authority framework;
 - (b) An unqualified audit opinion of the Board of Auditors for UNEP and UN-Habitat;
 - (c) Enhanced visibility for Member States on the impact of their contributions to the programme and the project implementation of client entities.

Programme performance in 2023

Endorsement and establishment of the Common Back Office in Kenya

- 29D.19 As part of the United Nations Common Back Office initiative, Kenya was selected as one of the countries to participate in the initial phase of the global roll-out of the initiative. The Kenya Common Back Office operating model and governance framework was established in July 2022, along with a reference group comprising members from nine client representatives and the United Nations Secretariat. Since 1 January 2024, the United Nations Office at Nairobi has been providing 66 mandatory and 13 optional categories of 223 common back office services.

29D.20 In 2023, the subprogramme supported Kenya Common Back Office proposals by establishing the service rates for its services, including by submitting proposals, assessing survey data collected on service requirements, and determining the appropriate budget for service design and corresponding service rates. The proposed service rates for the Kenya Common Back Office were presented to the technical and finance working groups of the Common Services Management Team and were subsequently endorsed by the Executive Committee for the Kenya Common Back Office and the Common Services Board. The approval of the mandatory service rates allowed the implementation of the Kenya Common Back Office to start as planned on 1 January 2024, as the first flagship of the Secretary-General’s Common Back Office reform initiative.

29D.21 Progress towards the objective is presented in the performance measure below (see figure 29D.I).

Figure 29D.I

Performance measure: number of United Nations Office at Nairobi common services available to client entities in Kenya (annual)

Planned results for 2025

Result 1: improved client experience with fewer payroll corrections

Programme performance in 2023 and target for 2025

29D.22 The subprogramme payrollled 4,232 staff members, with the rate of payroll corrections at 0.6 per cent, which did not meet the planned target of 0.5 per cent. The target was not achieved due to delays in the renewal of employment contracts.

29D.23 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 29D.II).

Figure 29D.II
Performance measure: percentage of payroll corrections

Result 2: improved management of resources and operational efficiency of clients through the provision of dashboards

Programme performance in 2023 and target for 2025

- 29D.24 The subprogramme developed the grants and accounts payable key performance indicator dashboards, which did not meet the planned target of clients using the grants and accounts payable key performance indicator dashboards. The target was not met due to the need to verify data accuracy before the launch of the dashboards. The dashboards will be made available to clients in 2024 following the validation of data accuracy.
- 29D.25 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29D.2).

Table 29D.2
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Clients use implementing partner monitoring and implementing partner advance details	Clients use the status of position funding dashboard	Grants and accounts payable key performance indicator dashboards developed but client access not yet provisioned	Clients use improved dashboards integrated with Umoja Analytics and additional key performance indicators on payroll and separation payments Increased transparency and accuracy through automation in billing statistics collection and processes	Improved reporting on facility projects and assets of the United Nations Office at Nairobi through dashboards integrated with Umoja Analytics (phase 2)

Result 3: improved assets accounting for United Nations Office at Nairobi buildings, facilities and infrastructure

Proposed programme plan for 2025

29D.26 The United Nations Office at Nairobi is responsible for two ongoing major capital construction projects (the renovation project for office blocks A to J and the conference facilities upgrade project) and multiple major maintenance and improvement projects for the United Nations Office at Nairobi complex. The subprogramme ensures that financial accounting of the construction projects is accurate, timely and in accordance with IPSAS. The Office is developing a master plan for the United Nations complex in Gigiri to ensure that planning for all projects is captured under one umbrella and to facilitate the assessment and oversight of the budget and funding requirements for the operation, maintenance and replacement of the assets.

Lessons learned and planned change

29D.27 The lesson for the subprogramme was the importance of establishing an appropriate assets accounting structure during the initial phase of construction projects to facilitate the recognition of assets under construction, the timely recording of capitalizable assets in line with relevant IPSAS criteria for accurate financial statements, and the timely financial reporting on project implementation. In applying the lesson, the subprogramme will establish an assets accounting structure and support the development of a master plan for the United Nations Office at Nairobi complex that will ensure that assets under construction are properly accounted for, their costs are capitalized in a structured manner and financial reporting is accurate and completed in a timely manner.

29D.28 Expected progress towards the objective is presented in the performance measure below (see figure 29D.III).

Figure 29D.III
Performance measure: comprehensiveness of recording of capitalizable assets under construction in the financial statements

(Percentage of capitalizable assets recorded)

Deliverables

29D.29 Table 29D.3 lists all deliverables of the subprogramme.

Table 29D.3

Subprogramme 1: deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	30	28	30	30
1. Training events on financial topics	30	28	30	30
Publications (number of publications)	2	2	2	2
2. Publications on financial statement volumes for UNEP and UN-Habitat	2	2	2	2
D. Communication deliverables				
Digital platforms and multimedia content: quarterly Programme Planning, Finance and Budget Section newsletter for client offices.				
E. Enabling deliverables				
Administration: financial management, including risk management, preparation and implementation of budgets and resource proposals; management of posts and 22,000 grants; financial reporting and accounting, including 1,400 donor reports; cash and revenue management; accounting services; cost recovery services; payment services; payroll and disbursements for 4,250 personnel; guidance on all financial matters; management of after-service health insurance claims for approximately 400 staff and their dependants and beneficiaries.				

Subprogramme 2

Human resources management

Objective

29D.30 The objective, to which this subprogramme contributes, is to ensure the acquisition, development and retention of a competent, diverse, adaptable and healthy workforce with the highest standards of efficiency and integrity.

Strategy

29D.31 To contribute to the objective, the subprogramme will:

- (a) Facilitate the recruitment process of personnel for its clients, ensuring fair and competitive recruitment processes;
- (b) Develop and refine tools to streamline the recruitment process and assist hiring managers in their evaluation of candidates, in collaboration with United Nations Headquarters and other offices away from Headquarters;
- (c) Foster greater interest from women and applicants from underrepresented countries, including through guidance to hiring managers and entities to promote the selection of qualified candidates from these categories;
- (d) Develop and implement diverse training programmes for staff skills and competencies, in collaboration with other United Nations entities as well as external partners through jointly held training sessions;
- (e) Develop internal knowledge platforms as a service for human resources and administrative focal points in Nairobi and in client entities at outposted duty stations to facilitate monitoring, reporting and benchmarking of key performance indicators;
- (f) Implement outreach programmes for all staff members, through briefings and intranet platforms, on benefits and entitlements and the related authorization processes;

- (g) Deliver a comprehensive health and well-being programme, including through promotion and awareness-raising on staff mental health and physical well-being, health assessments and advice.

29D.32 The above-mentioned work is expected to result in:

- (a) Increased knowledge and skills of staff members;
- (b) Standardized services for clients across geographically dispersed locations;
- (c) Improved ability of client entities to respond to their shifting operational requirements;
- (d) Increased staff productivity.

Programme performance in 2023

United Nations staff members in Kenya benefit from health and well-being programmes

29D.33 Staff health and well-being is a critical factor in effective staff engagement and productivity. This includes access to mental health services through the facilitation of staff counselling, access to health and well-being programmes, health risk assessments and advice. In the preparation of the Kenya Common Back Office, the subprogramme expanded the scope of the Joint Medical Service to incorporate services related to mental and occupational health. In 2023, the subprogramme delivered a series of well-being campaigns to educate about awareness and prevention of, and intervention on, illnesses.

29D.34 Progress towards the objective is presented in the performance measure below (see figure 29D.IV).

Figure 29D.IV

Performance measure: number of personnel utilizing health and wellness programmes and user experience rating

Planned results for 2025

Result 1: improved human resources services for a global client base

Programme performance in 2023 and target for 2025

29D.35 The subprogramme's work contributed to 4,780 staff members receiving comprehensive human resources services across 158 countries, which did not meet the planned target of 4,800 staff and 165 countries. The target was not met because some client entities scaled down their country presence.

29D.36 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 29D.V).

Figure 29D.V

Performance measure: number of staff members receiving comprehensive human resources services and countries in which services are delivered (annual)

Result 2: increased effectiveness and efficiency of the staff recruitment process

Programme performance in 2023 and target for 2025

29D.37 The subprogramme's work contributed to the timely completion of 87 per cent of offer management processes, which exceeded the planned target of 70 per cent; and the timely completion of 76 per cent of post classification processes and 93 per cent of processes for the development and posting of job openings, which did not meet the planned targets of 86 per cent and 95 per cent, respectively. The target was not met due to delays experienced in workflows for post classification. To ensure that the classification targets are met in 2025, additional staff have been certified as classifiers.

29D.38 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 29D.VI).

Figure 29D.VI
Performance measure: percentage of recruitment processes completed within established timelines

Result 3: staff and personnel acquire new knowledge and skills to improve organizational effectiveness

Proposed programme plan for 2025

29D.39 Training and upskilling of United Nations staff are essential for the Organization to adapt to changing demands. The subprogramme has worked to foster a culture of learning in order to improve organizational effectiveness and strengthen mandate delivery. In addition to ensuring compliance with mandatory learning courses by all staff and personnel, the subprogramme offers training services in a wide range of content areas and language courses in the six official languages of the United Nations.

Lessons learned and planned change

29D.40 The lesson for the subprogramme was the increased demand for learning and the upgrading of skills in the light of the engagement of the United Nations Office at Nairobi in the Common Back Office initiative. In applying the lesson, the subprogramme will liaise with the United Nations Secretariat and United Nations entities, agencies, funds and programmes to better understand their organizational learning needs and make available more diverse training opportunities.

29D.41 Expected progress towards the objective is presented in the performance measure below (see figure 29D.VII).

Figure 29D.VII
Performance measure: number of personnel completing instructor-facilitated classes and language programmes, and mandatory course compliance rate

Deliverables

29D.42 Table 29D.4 lists all deliverables of the subprogramme.

Table 29D.4

Subprogramme 2: deliverables for 2025, by category and subcategory

Category and subcategory

E. Enabling deliverables

Administration: first-level review in administration of justice process; training and career development made available to 7,192 United Nations common system staff; performance management; inter-agency learning coordination of Nairobi-based entities; administration of 120 tests; 25 health campaigns; expert advice and guidance on staff selection processes and staff and non-staff hiring; annual staff survey on local salaries; administration of staff benefits and entitlements; outreach activities and guidance on human resources policies; administration of onboarding and separation from service; contract management; medical consultations; staff counselling services.

Subprogramme 3 Support services

Objective

29D.43 The objective, to which this subprogramme contributes, is to ensure the efficient, environmentally sound and effective functioning of client offices with regard to conference and facilities management, host country services, asset management, travel and transportation, mail and pouch services, commercial activities and procurement services, as well as archives and records management.

Strategy

29D.44 To contribute to the objective, the subprogramme will:

- (a) Provide sustainable and efficient solutions with a specific focus on the management of waste, energy, water and wastewater in accordance with International Organization for Standardization (ISO) 14001, including through implementation, monitoring and audit of the environmental management system and by reducing emissions, improving environmental reporting and providing training on environmental sustainability and best practices;
- (b) Manage clients' changing workspace needs by maximizing usage and optimizing working conditions in the available office space, including through redesign, in consultation with client entities, and through revisions of office space standards, to support the operational requirements of each tenant as the Office continues to roll out flexible workplace strategies;
- (c) Assist clients with the migration from traditional archiving to more efficient filing and technology-based solutions;
- (d) Provide staff transport solutions through an efficient distribution between internal and external transport service providers;
- (e) Provide immediate and effective travel services, especially leading up to major scheduled meetings;
- (f) Provide client-centric and solution-oriented procurement services to client entities and continuously strive to maximize value for money with due consideration to whole-life costs and effective international competition, enhanced through extensive geographical outreach and minimized transactional costs;
- (g) Maintain the Office's environmental management system, including requisite ISO 14001:2015 pre-certification external audit and post-certification annual surveillance activities, training and awareness.

29D.45 The above-mentioned work is expected to result in:

- (a) Improved physical infrastructure, optimized use of space and enhanced environmental management to support a sustainable, safe and flexible working environment;
- (b) Efficient and convenient host country services for all clients, including remote service options to keep clients and staff safe;
- (c) Efficient and convenient transport solutions in use by all clients;
- (d) Efficient and convenient procurement services available virtually to all global clients.

Programme performance in 2023

Evacuees receive logistical support, host country facilitation and office accommodation in Kenya

29D.46 The subprogramme provided crisis management coordination across all United Nations agencies, funds and programmes in Kenya and headquarters entities in support of evacuation flights for all staff, dependants and implementing partners from the Sudan. Daily coordination meetings and real-time communication channels were established to share information and coordinate evacuee airport arrivals into Kenya. Support included gaining exceptional approval from the Government of Kenya to allow the arrival of all evacuees, including non-documented travellers. Validation of residency status for all evacuees was arranged with host country departments, and logistics were coordinated to ensure that all evacuated individuals were transported safely to a hotel or medical facility. Temporary flexible working arrangements for evacuated United Nations personnel were initially

provided at hotels, and subsequently temporary office space was made available at the United Nations Gigiri campus for evacuated staff.

29D.47 Progress towards the objective is presented in the performance measure below (see table 29D.5).

Table 29D.5
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	–	482 individuals (including staff, dependants and implementing partners) evacuated from the Sudan received logistical support, office accommodation and host country support

Planned results for 2025

Result 1: improved stewardship of physical assets and equipment

Programme performance in 2023 and target for 2025

29D.48 The subprogramme’s work contributed to 68 per cent of serialized items physically verified, which exceeded the planned target of 55 per cent.

29D.49 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 29D.VIII).

Figure 29D.VIII
Performance measure: percentage of serialized items physically verified (annual)

Result 2: improved energy efficiency of the United Nations premises in Nairobi

Programme performance in 2023 and target for 2025

- 29D.50 The subprogramme’s work contributed to the implementation of the solar photovoltaic systems in the annex (logistics building), which met the planned target.
- 29D.51 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29D.6).

Table 29D.6
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	Solar photovoltaic installation completed on the new annex (logistics building)	Annex (logistics building) with solar photovoltaic systems in operation, and used temporarily as swing space	Complete construction/ installation of solar photovoltaic systems as part of the new office blocks comprising six office blocks and four logistics blocks Two blocks in the annex (logistics building) to be confirmed as energy-neutral following a full year of operation	Full operation of newly constructed office blocks and refurbished blocks using solar photovoltaic systems

Result 3: new meeting and collaboration areas for delegates, staff and personnel

Proposed programme plan for 2025

- 29D.52 Meeting and collaboration spaces play a crucial role in promoting communication, teamwork and productivity. Building on the successful introduction of external working pods during the coronavirus disease (COVID-19) pandemic, the subprogramme facilitated the renovation and redesign of office space and the building of new space to enhance the working environment, including the completion of additional flexible workspaces within the P and Q office blocks. These new flexible workspaces have proved popular, providing additional functional and adaptable spaces for collaboration, beyond regular meeting rooms and catering areas.

Lessons learned and planned change

- 29D.53 The lesson for the subprogramme was the need to further incorporate considerations related to environmental sustainability into the redesign of workspaces, and to leverage the benefits from the natural environment of the United Nations Gigiri campus. In applying the lesson, the subprogramme will create additional spaces for collaboration, in particular outdoor workspace environments such as rooftop spaces, terraces and pods. As part of these efforts, the subprogramme is also focused on a reforestation programme for the campus to make outdoor work and collaboration spaces more usable and ultimately foster a better working environment.
- 29D.54 Expected progress towards the objective is presented in the performance measure below (see figure 29D.IX).

Figure 29D.IX

Performance measure: number of additional seats available for meeting and collaboration (cumulative)

Deliverables

29D.55 Table 29D.7 lists all deliverables of the subprogramme.

Table 29D.7

Subprogramme 3: deliverables for 2025, by category and subcategory

Category and subcategory

E. Enabling deliverables

Administration: management and maintenance of United Nations-owned land/buildings (142 acres), including its newly built 6 office blocks and 4 logistics blocks, 11 refurbished M–X office blocks and 8 office blocks for the UNEP and UN-Habitat facilities, totalling 75 office floors, and 14 conference rooms; management of office space, redesign of office layouts and configurations to serve the needs of the United Nations offices, other Secretariat departments and offices of other entities in Nairobi.

Logistics: receipt and inspection; issuance of 400 laissez-passer and 16,000 travel requests; travel arrangements for staff and meeting participants; handling of privileges and immunities for 60 United Nations entities; procurement, sourcing and issuance support of 5,000 goods and services purchase orders; inventory advice, warehousing and disposal; shipment of official property, bulk consignments including for conferences, and the removal of personal effects; mail, pouch, distribution, registry and archiving services.

Subprogramme 4 Information and communications technology operations

Objective

29D.56 The objective, to which this subprogramme contributes, is to advance the efficient and effective implementation of client entities’ substantive programmes through innovative technology solutions, while maintaining secure, coherent and resilient technology services and infrastructure backbone.

Strategy

- 29D.57 To contribute to the objective, the subprogramme will:
- (a) Develop proposals for end-to-end software and hardware solutions in consultation with client entities and provide advice and technical support on the implementation of new technologies;
 - (b) Support the roll-out of the Kenya Common Back Office and establish and maintain business relationships with clients to manage needs and requests;
 - (c) Develop and enhance existing innovative processes to enable testing and adoption of new technologies and solutions while supporting the accessibility, reliability, consistency and sustainability of those solutions;
 - (d) Collaborate closely with the Department for General Assembly and Conference Management in Nairobi, and with other subprogrammes to align and centralize under this subprogramme the end-to-end responsibilities of technical audiovisual services, engineering support and ICT infrastructure services for conference services at the Office.
- 29D.58 The above-mentioned work is expected to result in:
- (a) Fulfilment of client entities' business needs through the agile implementation of new and innovative technologies;
 - (b) Empowerment of client entities to make effective decisions through access to more timely and responsive services;
 - (c) Effective and efficient implementation of client entities' substantive programmes.

Programme performance in 2023

More efficient and integrated information and communications technology services through onboarding of additional clients and campus-wide technological upgrades

- 29D.59 In 2023, the subprogramme successfully onboarded 53 new United Nations client entities to its services. The organization updated its ICT value proposition, unbundling services and refining offerings through bilateral engagements with entities, demonstrating a commitment to adaptability and responsiveness. The year also marked other notable achievements, such as the integration of Internet protocol telephony into Microsoft Teams and the successful retendering of Internet service provider services and server room consolidation, which enhanced security through network segmentation. The subprogramme also implemented innovative solutions, such as applications, surveys and business intelligence reports, to enable adaptability and informed decision-making.
- 29D.60 Progress towards the objective is presented in the performance measure below (see figure 29D.X).

Figure 29D.X
Performance measure: clients onboarded to information and communications technology services (cumulative)

Planned results for 2025

Result 1: intuitive service experience and assured service availability for clients

Programme performance in 2023 and target for 2025

29D.61 The subprogramme’s work contributed to increased client access to the single one-stop Kenya Service Hub portal, with approximately 2,000 service requests during 2023, which met the planned target.

29D.62 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29D.8).

Table 29D.8
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
<p>Clients have access to digital forms and added workflow applications, with basic reporting on data captured</p> <p>A client survey on the effectiveness of the catalogue informs the selection of a new client relationship management software</p>	<p>Clients’ needs are fully integrated into a Secretariat-wide catalogue ready for migration to new client relationship management software</p>	<p>Business agility, better innovation and increased security for clients through a unified client relationship management platform</p> <p>Approximately 2,000 requests submitted through the Kenya Service Hub</p>	<p>Business agility and increased visibility for clients through streamlined processes for the submission and monitoring of requests, and enhanced service management reporting</p>	<p>Additional non-Secretariat entities start using the Kenya Service Hub platform</p>

Result 2: strengthened security of information and communications technology for the Office and its clients

Programme performance in 2023 and target for 2025

- 29D.63 The subprogramme implemented strengthened information security governance, risk management and control processes to reduce data compromises, and implemented the digital security recommendations of the Office of Internal Oversight Services on data confidentiality, integrity and availability, which met the planned target.
- 29D.64 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29D.9).

Table 29D.9
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Integration of vulnerability management and vulnerability assessments in compliance with Office of Information and Communications Technology policies	Nairobi-based ICT systems' security maturity strengthened by several security maturity level assessments and addressing the related critical recommendations	Nairobi-based ICT systems further strengthened by implementing the remaining recommendations and findings from 2022	Clients adopt best practices to improve ICT security, leading to a 10 per cent reduction in the risk of information security breaches	Information technology governance, information security and enterprise risk management are fully aligned with Secretariat security standards, policies, procedures and guidelines

Result 3: improved alignment of information and communications technology policies and practices in the United Nations

Proposed programme plan for 2025

- 29D.65 In 2023, the subprogramme successfully piloted the implementation of the common back office ICT services for 53 new onboarded United Nations entities in Kenya and managed a seamless transition from previous service agreements to the new common back office value proposition for existing clients. The subprogramme further adapted its services and rate cards to align with emerging technologies, common back office standard services and clients' operational needs.

Lessons learned and planned change

- 29D.66 The lesson for the subprogramme was the need for substantial alignment and integration in policies and practices across the wider United Nations system on information security, access control and platform standardization. In applying the lesson, the subprogramme will engage with United Nations agencies, funds and programmes (non-Secretariat entities) to gain a deeper understanding of their operations and ICT requirements and leverage these insights to secure greater buy-in and adoption of the common back office in other countries, fostering the implementation of a single ICT standard throughout the United Nations system.
- 29D.67 Expected progress towards the objective is presented in the performance measure below (see figure 29D.XI).

Figure 29D.XI
Performance measure: percentage of Nairobi-based United Nations Secretariat and non-Secretariat entities adopting all standard information and communications technology service lines

Deliverables

29D.68 Table 29D.10 lists all deliverables of the subprogramme.

Table 29D.10
Subprogramme 4: deliverables for 2025, by category and subcategory

Category and subcategory

E. Enabling deliverables

Information and communications technology: security for information technology systems and data for 53 United Nations entities; technical support to 2,600 end users; personal computing, voice, Internet, data and communication services for 4,000 users; information security compliance, software distribution and printing services for 2,500 users; network connectivity services to 26 clients, with an average of 1,000 network ports connected; cloud and data centre hosting services covering 318 physical server units and 148 virtual machines; operation and maintenance of 15 application systems in a secure environment; maintenance of 3,000 information technology equipment items; 2 outreach campaigns for staff.

B. Proposed post and non-post resource requirements for 2025

Overview

29D.69 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 29D.11 to 29D.13.

Table 29D.11

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2023 expenditure ^a	2024 approved	Changes				2025 estimate (before recosting)

29D.70 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 29D.14 to 29D.16 and figure 29D.XII.

29D.71 As shown in tables 29D.14 (1) and 29D.15 (1), the overall resources proposed for 2025 amount to \$15,492,600 before recosting, reflecting a net decrease of \$2,861,400 (or 15.6 per cent) compared with the approved budget for 2024. Resource changes result from technical adjustments. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

29D.72 As shown in table 29D.14 (1), resource changes reflect a decrease of \$2,861,400, as follows:

Subprogramme 3, Support services. The decrease of \$2,861,400 relates to the removal of non-recurrent requirements approved for 2024 by the General Assembly in its resolution [78/253](#) relating to the provision for project management costs of the major construction projects for: (a) the replacement of office blocks A to J (\$770,200); and (b) addressing the deteriorating conditions and limited capacity of the conference services facilities (\$2,091,200). The related resource requirements for 2025 will be presented later in the year as part of the progress reports on the construction projects.

Extrabudgetary resources

29D.73 As reflected in tables 29D.14 (2) and 29D.15 (2), extrabudgetary resources amount to \$27,422,800. The resources would complement regular budget resources and would be used mainly to provide for 299 posts (1 P-5, 9 P-4, 12 P-3, 12 National Professional Officer and 265 Local level). In addition, these resources would support various activities relating to administrative support, common back offices, common services and commercial operations provided to the United Nations Environment Programme, the United Nations Human Settlements Programme (UN-Habitat) and the resident coordinator system, as well as all United Nations agencies, funds and programmes located in Kenya.

29D.74 The extrabudgetary resources under the present section are subject to the oversight of the Director-General of the Office, who has delegated authority from the Secretary-General.

Executive direction and management

29D.75 The executive direction and management component comprises the Office of the Director of Administration and the Organizational Resilience Management Unit.

29D.76 The main responsibilities of the executive direction and management component include the overall direction, supervision and management of administrative and related support services provided by the Office to its client organizations.

29D.77 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Office is integrating environmental management practices into its operations. The Office broadened its waste management and recycling management initiatives by obtaining ISO 14001:2015 certification in environmental management systems in January 2023. The certification is focused on operations such as energy, water, wastewater and waste management in relation to facilities, safety, catering, medical, conferencing, printing and publication services on which the Office will continue to focus from an environmental sustainability perspective.

29D.78 Information on the timely submission of documentation and advance booking for air travel is reflected in table 29D.17. Apart from factors such as medical evacuations or urgent requirements, the Office continues to enforce official travel planning and monitoring to comply in full with the advance booking policy for air travel. The Office did not submit parliamentary documents to the Department for General Assembly and Conference Management and does not plan to submit any such reports in 2025.

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 29E.1 The United Nations Office at Geneva was established in 1947 pursuant to General Assembly resolution 24 (I) and successive resolutions of the Assembly. The Office is responsible for providing administrative and support services to entities in Geneva and their field offices, and to other organizations of the United Nations common system, in accordance with policies, procedures and practices established by the Under-Secretary-General for Management Strategy, Policy and Compliance, the Under-Secretary-General for Operational Support and the Assistant Secretary-General/Chief Information Technology Officer. The Office is also responsible for providing support services to the intergovernmental processes of the Organization in line with its role as a major conference centre for international diplomacy. This includes providing technical conference support services as part of the conferencing ecosystem, which enables the work of Member States and client entities.

Strategy and external factors for 2025

- 29E.2 In compliance with General Assembly resolution 2 (I), the Office will offer administrative and support services in English and French. These services will include direction, management and coordination in the areas of human resources, financial and budgetary resources, information and communications technology (ICT), central support services and library services at the Office. The Office will function as landlord and manage the United Nations premises, which accommodate almost 70 tenants. The Office will also play a critical role in supporting United Nations meetings and events. From providing audiovisual and ICT support to maintaining conference rooms and equipment, the Office will remain an essential component of the conferencing network in Geneva. The Office is in advanced planning with United Nations Headquarters to establish the Office as the principal backup for Headquarters payroll, vendor payments and cashier services in the context of business continuity and disaster recovery, and will implement policy and other functions, as determined by the Under-Secretaries-General referred to in paragraph 29E.1 above.
- 29E.3 The Office will provide financial, budgetary and accounting services, as well as guidance and advice, in accordance with the Financial Regulations and Rules of the United Nations and relevant standards. In addition, the Office will provide staff development and learning services, career support and coaching, staff mental health and well-being activities, and medico-administrative occupational safety and health, human resources and legal advisory services. The Office will provide procurement, commercial activities, transportation, travel and other central support services for the Secretariat and the specialized agencies. It will also provide travel, procurement support and assistance in hiring consultants to 18 resident coordinator offices in Europe in support of the development pillar. In addition, the Office will provide regional ICT services and library, records, archives and knowledge services in support of the implementation of the mandated programmes and activities of the Secretariat. The Office will further ensure coordination and implementation of recommendations of oversight bodies at the Office, as well as the business continuity of administrative support for other entities in Geneva in emergency cases.
- 29E.4 Physical renovation works at the historic buildings of the Palais des Nations under the strategic heritage plan are projected to continue through 2026. These works will improve energy efficiency, modernize the conferencing infrastructure and ensure that buildings comply with host country building codes for fire safety, energy and accessibility while preserving the principles of the original design and historical features of existing buildings.

- 29E.5 The Office will proactively optimize space utilization to accommodate additional entities at the Palais des Nations. The Office will also analyse operation and maintenance requirements of the buildings post-strategic heritage plan to ensure the best mix of internal and contractual resources to efficiently manage these buildings and their technologically advanced components. Lastly, the Office will move forward with introducing modern preventive and regular building maintenance to safeguard Member States' investment through the strategic heritage plan.
- 29E.6 Client service will remain a priority in 2025. Client board meetings will be held quarterly to promote open and transparent service delivery. The Office will further improve operations in administration and support in collaboration with Geneva-based Secretariat and United Nations system entities, as well as other Secretariat service providers. To maximize client support effectiveness, the Office will further develop its Client Support Centre, which delivers tier-2 level support and accommodates 20,000 client visits and 12,000 client calls annually. Growing demand for and the escalating technical complexity of delivering side events, cultural events and activities now require a more efficient event support model. To achieve this, the Office will establish an event support centre for these types of events. Subprogramme 4 will deliver phase I (design and development of the centre) and, concurrently, subprogramme 3 will deliver phase II (establishing centralized audiovisual support for client entities and Member States (see subprogrammes 3 and 4). In addition, the Office will begin to offer dedicated support for client entities moving to or relocating from the Palais des Nations (see subprogramme 1). The Office will also conduct its annual client entity and end-user surveys, and a new, comprehensive communications strategy will bolster these initiatives.
- 29E.7 The Office will implement activities across all subprogrammes to support the Secretary-General's reform initiatives, including providing expertise in support of global administrative operational processes; supporting digital transformation, the Secretary-General's strategy on new technologies and the Data Strategy of the Secretary-General for Action by Everyone, Everywhere; providing capacity-building to the resident coordinator system; and strengthening financial management and internal control systems and the risk management framework
- 29E.8 With regard to inter-agency coordination and liaison, the Office will collaborate with other Geneva-based United Nations system organizations and international governmental organizations, coordinating the Common Procurement Activities Group. The Office will continue to own and administer the global United Nations contracts, continue to conduct annual daily subsistence allowance surveys, coordinate periodic cost of living surveys, conduct place-to-place surveys and monitor the consumer price index at Geneva. The Office will work closely with other facilities managers of international organizations in Geneva to enhance inter-agency coordination on relevant policies and procedures. The Office will further collaborate with other United Nations libraries to digitize the official documents of the United Nations and will advance the streamlining of library activities, which will benefit from a common library management system used by the libraries at the Office, United Nations Headquarters, the Economic Commission for Latin America and the Caribbean, the Economic Commission for Africa and the Economic and Social Commission for Asia and the Pacific.
- 29E.9 With regard to the external factors, the overall plan for 2025 is based on the planning assumption that client offices will have sufficient extrabudgetary resources for services provided by the Office, when applicable.
- 29E.10 The Office integrates a gender perspective into its operational activities, deliverables and results, as appropriate. It will contribute to improving gender equality in 2025 in the offices that it supports, in line with the Secretary-General's system-wide strategy on gender parity, through consultations and briefings to hiring managers and human resources focal points in client entities regarding the impact of selection decisions, including advice on targeted outreach of job openings through established human resources networks and the targeted promotion of career opportunities in the United Nations, to improve equitable geographical representation in the Organization.
- 29E.11 In line with the United Nations Disability Inclusion Strategy, in 2025 the Office will continue to implement its disability inclusion action plan and support the strategic heritage plan in its efforts to incorporate accessibility features in renovation works.

Legislative mandates

29E.12 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

24 (I)	Transfer of certain functions, activities and assets of the League of Nations	78/253	Special subjects relating to the proposed programme budget for 2024
70/255; 72/303	Progress towards an accountability system in the United Nations Secretariat		

Subprogramme 1 Programme planning, finance and budget

General Assembly resolutions

41/213	Review of the efficiency of the administrative and financial functioning of the United Nations	77/267	Shifting the management paradigm in the United Nations: review of changes to the budgetary cycle
42/211	Implementation of General Assembly resolution 41/213		

Subprogramme 2 Human resources management

General Assembly resolutions

58/144	Improvement of the status of women in the United Nations system	73/281	Shifting the management paradigm in the United Nations
63/271	Amendments to the Staff Regulations	77/256 A–B	United Nations common system
72/254	Human resources management	78/248	Administration of justice at the United Nations

Subprogramme 3 Support services

General Assembly resolutions

58/263	Report of the Joint Inspection Unit on the revenue-producing activities of the United Nations system	58/277	Report of the Joint Inspection Unit on the management audit review of outsourcing in the United Nations and the United Nations funds and programmes
58/276	Outsourcing practices	69/273	Procurement

Subprogramme 4 Information and communications technology operations

General Assembly resolutions

57/304	Information and communication technology strategy	63/269	Information and communications technology, disaster recovery and business continuity for the United Nations: arrangements for the secondary data centre at Headquarters
63/262	Information and communications technology, enterprise resource planning, and security, disaster recovery and business continuity	69/262	Questions relating to the programme budget for the biennium 2014–2015 (Sect. II, Information and communications technology in the United Nations)

**Subprogramme 5
Library services**

General Assembly resolution

356 (IV) Budget appropriations for the financial year
1950

Deliverables

29E.13 Table 29E.1 lists all cross-cutting deliverables of the programme.

Table 29E.1

Cross-cutting deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>

Meetings of:				
1. The Advisory Committee on Administrative and Budgetary Questions	2	2	2	2
2. The Committee for Programme and Coordination	1	1	1	1
3. The Fifth Committee	2	2	2	2

Evaluation activities

29E.14 The evaluation of the Total Digital Access to the League of Nations Archives Project system and platform, completed in 2023, has guided the proposed programme plan for 2025.

29E.15 In response to the results of the evaluation referenced above, the Office incorporated recommendations and lessons learned to inform its work referenced in paragraph 29E.8 above to collaborate with other United Nations libraries to digitize the official documents of the United Nations and to help to inform future digitization projects, in particular those relating to subprogramme 5.

29E.16 A project evaluation to be conducted under subprogramme 3, on optimized warehouse storage space for clients, is planned for 2025.

Programme of work

**Subprogramme 1
Programme planning, finance and budget**

Objective

29E.17 The objective, to which this subprogramme contributes, is to ensure sound, effective and efficient financial management by client offices.

Strategy

29E.18 To contribute to the objective, the subprogramme will:

- (a) Monitor budget implementation, report budget and financial information and conduct financial management and accounts control by coordinating with Headquarters and providing timely

advice to client entities regarding a broad range of financial services, spanning from payments and disbursements services to payroll, accounting, medical insurance, and trust funds and budget management;

- (b) Provide assistance, guidance and training to programme managers and administrative units of client organizations on financial management and budgetary matters;
- (c) Perform financial and administrative procedures, including internal financial controls and monitoring strict compliance with the Financial Regulations and Rules of the United Nations and the financial policies of the United Nations;
- (d) Identify ways to achieve a faster and more efficient client response, including through digital transformation and innovative tools in line with the Secretary-General’s strategy on new technologies;
- (e) Monitor the implementation of oversight bodies’ recommendations.

29E.19 The above-mentioned work is expected to result in improved integrity of financial data and enhanced overall management of programme budget and extrabudgetary resources.

Programme performance in 2023

Client confidentiality ensured in design of new Client Support Centre

29E.20 In 2022, the subprogramme conducted an internal evaluation of the Client Support Centre, given the need to submit updated business requirements to the strategic heritage plan for the design of its permanent home. The evaluation identified problems in its current location that affected client confidentiality. Those issues included an open floor plan, insufficient private consultation rooms, a lack of privacy between the waiting area and reception desks, and a shortage of reception desks. In response, in 2023 the subprogramme collaborated with service providers to redesign the Centre’s layout in its new location. The revised layout was formally presented to architects working on the strategic heritage plan, and all stakeholders approved the changes in June 2023. Consequently, the architectural plans were modified to incorporate those adjustments, leading to an improved redesign for clients.

29E.21 Progress towards the objective is presented in the performance measure below (see table 29E.2).

Table 29E.2
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
Clients serviced remotely	<p>Clients in the Client Support Centre:</p> <ul style="list-style-type: none"> • Receive support from 5 front office reception desks • Have access to 5 confidential client consultation booths 	<p>Redesign of Centre provided clients with access to a quieter, privacy-conducive environment, including:</p> <ul style="list-style-type: none"> • 8 front office reception desks with privacy panels • 2 dedicated rooms for client calls • A dedicated back-office work area • 10 confidential client consultation booths

Planned results for 2025

Result 1: tailored and targeted operational monitoring through customized financial dashboards

Programme performance in 2023 and target for 2025

- 29E.22 The subprogramme's work contributed to five additional clients having access to customized dashboards to facilitate their ability to monitor accounts and operations, which met the planned target.
- 29E.23 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29E.3).

Table 29E.3

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Clients access additional standardized financial reports	Four clients with access to customized dashboards to facilitate their ability to monitor accounts and operations through specific financial indicators	Five additional clients have access to customized dashboards to facilitate their ability to monitor accounts and operations through specific financial indicators	Clients have access to customized dashboards with amendments to ensure continued relevance of financial indicators	Clients have access to dashboards with additional refinements and customizations in accordance with feedback from client surveys

Result 2: improved client service at Client Support Centre

Programme performance in 2023 and target for 2025

- 29E.24 The subprogramme's work contributed to upgrading the Client Support Centre phone system, optimizing caller queuing and automating call transfer functions, resulting in a 24 per cent decrease in dropped calls, which met the planned target.
- 29E.25 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29E.4).

Table 29E.4

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Clients are serviced remotely	Clients have access to both in-person and remote services	Clients have access to improved telephone support, as illustrated by a 24 per cent decrease in dropped calls	Clients have more optimized service offerings	Clients have improved access to support and additional resources through enhancements made to Client Support Centre website

Result 3: entities have access to dedicated support when moving to or relocating from the Palais des Nations

Proposed programme plan for 2025

29E.26 The Client Support Centre offers centralized support to staff and clients, the end users of administrative services. This centralized model does not exist for client entities moving to or relocating from the Palais des Nations. These entities must engage directly with each subprogramme responsible for delivering required services, necessitating interaction with multiple contacts.

Lessons learned and planned change

29E.27 The lesson for the subprogramme was that, while documentation and online guidance were valuable initial steps to address support issues, navigating multiple points of entry across administrative service lines could still lead to confusion and inefficiency. In applying the lesson, the subprogramme will introduce a centralized client support model, assigning dedicated support for client entities moving to or relocating from the Palais des Nations. The client relationship manager will offer intensive support, guiding the entity through each step of the process. This will be supplemented by online tools, documentation and other reference materials.

29E.28 Expected progress towards the objective is presented in the performance measure below (see table 29E.5).

Table 29E.5
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Clients have access to guidance documentation for entity onboarding/offboarding	One client entity has access to a new pilot centralized support model	All client entities moving to or leaving the Palais des Nations use the new centralized support model

Deliverables

29E.29 Table 29E.6 lists all deliverables of the subprogramme.

Table 29E.6
Subprogramme 1: deliverables for 2025, by category and subcategory

Category and subcategory
E. Enabling deliverables
Administration: financial management, risk management and internal control, and preparation and implementation of resource proposals; management of more than 700 posts; financial reporting and accounting; cash and revenue management; management of service arrangements with 50 client entities across 120 service lines; processing of payroll for more than 7,500 staff members across the world and more than 300,000 payments and disbursements annually; guidance and advice on all budgetary and financial matters; provision of medical insurance to more than 36,000 staff, retirees and dependents; processing of more than 490,000 medical invoices annually; administration of compensation claims; and delivery of quarterly client board meetings.

Subprogramme 2 Human resources management

Objective

- 29E.30 The objective, to which this subprogramme contributes, is to ensure a competent, diverse, adaptable and healthy workforce, to advance the highest standards of efficiency, competence and integrity and to ensure resilient organizational change.

Strategy

- 29E.31 To contribute to the objective, the subprogramme will:
- (a) Support clients in talent acquisition and development by creating an enabling work environment, providing advisory services to clients, developing internal human resources analytics capabilities aligned to the Data Strategy of the Secretary-General for Action by Everyone, Everywhere, and paying special attention to staff welfare and mental health;
 - (b) Promote multilingualism and provide learning and development activities such as training sessions and briefings on performance management, innovation and flexibility, navigation of workplace changes and the creation of a harmonious workplace;
 - (c) Generate new opportunities for learning and knowledge exchange through the Knowledge and Learning Commons by partnering with the Library of the United Nations Office at Geneva;
 - (d) Work with the human resources subnetwork of the Security Management Team to ensure a coherent approach to common human resources issues and challenges.
- 29E.32 The above-mentioned work is expected to result in:
- (a) Empowered decision-making based on enhanced business insight;
 - (b) Improved capacity of staff to successfully navigate workplace changes, embrace innovation and adopt new ways of working internally;
 - (c) Improved capacity of teams to work in a more agile and flexible manner;
 - (d) Increased awareness of the existing mechanisms to address improper conduct and of the individual responsibility of staff to foster a harmonious work environment.

Programme performance in 2023

Staff participate in streamlined and harmonized language programmes and competence assessments

- 29E.33 To help to promote multilingualism in the United Nations system, starting in 2017, the subprogramme, in collaboration with the Language and Communications Training Unit, embarked on a project to create a common United Nations Language Framework for language learning and assessment in the six official United Nations languages. Classes and course materials for the six languages were revised and all 3,500 participants in the Office's language training programme now take classes aligned to the new Framework. The Framework offers a structured and standardized approach to language learning and assessment across the Organization using four levels of language competence. It ensures both consistency across language standards for learning and uniformity in language assessments for career development and geographical mobility.
- 29E.34 Progress towards the objective is presented in the performance measure below (see figure 29E.I).

Figure 29E.I

Performance measure: number of Geneva-based language course recipients taking classes aligned to the United Nations Language Framework and their satisfaction with the new language training programme (annual percentage)

■ Percentage of Geneva-based language course recipients taking classes aligned to the United Nations Language Framework.
 ▨ Percentage of Geneva-based language course recipients giving satisfaction rating of good or excellent.

Planned results for 2025

Result 1: better service and support for clients through new human resources capacity and tools for data analytics

Programme performance in 2023 and target for 2025

- 29E.35 The subprogramme’s work contributed to clients having access to a tool to simulate the effect of recruitment and retirement on both gender equality and geographical distribution, which exceeded the planned target of simulation of the effect of recruitment and retirement on gender equality.
- 29E.36 The subprogramme’s work contributed to the development and testing of a tool to evaluate team well-being and performance, which did not meet the planned target of clients having access to a tool to evaluate team well-being and performance. The target was not met owing to the unforeseen temporary unavailability of additional data analysis capabilities.
- 29E.37 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29E.7).

Table 29E.7
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
18 staff members increased their knowledge of and received certification in human resources data analytics	Automated reports for data analysis and Microsoft Power BI reports improve client services related to review of recruitment timelines, gender equality and workforce planning Visualization tool and several data simulation tools	Clients have access to a tool to simulate the effect of recruitment and retirement on gender equality and geographical distribution A tool to evaluate team well-being and performance was tested	Clients have access to and utilize real-time human resources data analysis and forecasting for several human resources variables to support clients' recruitment plans and decision-making	Clients have access to an additional set of reports related to provision of Human Resources Management Service core services and ability to monitor service delivery

Result 2: a more inclusive and supportive work environment

Programme performance in 2023 and target for 2025

- 29E.38 The subprogramme’s work contributed to staff having access to webinars on burnout prevention, regular burnout-related materials through “What’s New” broadcasts, dedicated focal points in client entities, discussions with an expert on burnout from the Geneva University Hospital and a working group on burnout prevention, enabling an increased awareness of signs of burnout and access to resources to help to prevent it, which met the planned target.
- 29E.39 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29E.8).

Table 29E.8
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Staff received briefing sessions on the United Nations System Mental Health and Well-Being Strategy and the Secretary-General’s Disability Inclusion Strategy	Staff have access to reasonable accommodation guidelines	Staff have an increased awareness of signs of burnout and have access to resources to help to prevent it	Staff have increased access to mental health and well-being support	Staff have access to on-demand, tailored programmes and trainings on mental health and well-being issues

Result 3: staff and external applicants better understand the United Nations recruitment process and make informed career-related decisions

Proposed programme plan for 2025

- 29E.40 The 2019 and 2021 United Nations Staff Engagement Surveys highlighted staff’s need for enhanced career development support and increased clarity on recruitment processes and policies. Since 2021, the subprogramme has introduced the “Career Tips Thursday” series, comprising 26 monthly one-hour webinars for United Nations Geneva-based staff, and new material for six half-day training webinars, known as the “Career Support Suites”, to help staff to better understand the United Nations recruitment process and make informed career-related decisions.

Lessons learned and planned change

- 29E.41 The lesson for the subprogramme was that there was growing demand for those initiatives, including by other United Nations duty stations and Member States. In applying the lesson, the subprogramme will extend the Career Tips Thursday series to all United Nations staff, including those in downsizing entities and other organizations of the United Nations common system. In addition, it will be used for Member State briefings and outreach to widen the audience and broaden the applicant pool.
- 29E.42 Expected progress towards the objective is presented in the performance measure below (see table 29E.9).

Table 29E.9
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Approximately 10,000 end users (staff and public globally) participated in the Career Tips Thursday series	A 3 per cent increase in end users participating in the Career Tips Thursday series following use for Member State briefings and outreach to broaden applicant pool	Staff have access to career development initiatives, which respond to United Nations Staff Engagement Survey results

Deliverables

- 29E.43 Table 29E.10 lists all deliverables of the subprogramme.

Table 29E.10
Subprogramme 2: deliverables for 2025, by category and subcategory

Category and subcategory

D. Communication deliverables

Outreach programmes, special events and information materials: job fairs and career presentations to identify prospective candidates, including female candidates, from unrepresented and underrepresented Member States; and knowledge-sharing in the area of human resources and staff health and well-being.

E. Enabling deliverables

Administration: talent management and job classification; administration of approximately 3,150 staff contracts; advice and guidance on human resources policies, including on the Staff Regulations and Rules and staff selection system; training on organizational and managerial competencies, substantive and technical skills, language and communications, and career development for more than 9,000 staff members and others annually; administration of assessment tests; staff counselling services and psychological support; conduct of staff surveys, including on cost of living and daily subsistence allowance; 8,400 host country residence permits obtained in liaison with local authorities; occupational health and medico-administrative services for 15,000 client staff in Geneva and field offices, medical consultations and advice, medical emergency preparedness, health and well-being campaigns; and learning, career development and performance management.

Internal justice and oversight: legal services provided to the Office and 20 client entities; act as legal counsel for the Organization before the United Nations Dispute Tribunal; act as Office legal adviser in human resources matters, including in cases of alleged misconduct; act to defend the Organization’s position before the Management Advice and Evaluation Section; act as negotiator on behalf of the Organization settlement agreements and work with the United Nations Ombudsman and Mediation Services; act as conduct and discipline focal point at the Office, provide regular information updates on legal and ethical topics to Office staff and client entities; and provide regular briefings for managers on best practices and lessons learned from current legal jurisprudence to increase awareness and compliance.

Subprogramme 3 Support services

Objective

- 29E.44 The objective, to which this subprogramme contributes, is to ensure the efficient, environmentally responsible and effective functioning of the United Nations Office at Geneva with regard to premises, office and conference facilities management; asset management; travel and transportation; mail and pouch services; procurement; and commercial activities.

Strategy

- 29E.45 To contribute to the objective, the subprogramme will:
- (a) Provide services in the areas of facilities management, assistance with conference activities, special events, project management, and property and space management;
 - (b) Equip meeting and conference rooms with advanced technologies, infrastructure and equipment to support virtual and blended meetings, in accordance with available funding;
 - (c) Provide procurement services, including collaborative procurement activities with other United Nations organizations and agencies based in Geneva through the Common Procurement Activities Group;
 - (d) Provide services in the areas of contract management, travel, administration of diplomatic privileges, visas, United Nations travel documents, transportation, mail and pouch services, warehousing and sustainable environmental management;
 - (e) Support the implementation of the strategic heritage plan, ensuring that solutions are in place to minimize the impact of any potential disruptions during renovation of the historic buildings of the Palais des Nations and operation of the new building H.
- 29E.46 The above-mentioned work is expected to result in:
- (a) An optimized use of space and the provision of high-quality logistical services and support to client entities;
 - (b) Modern, high-quality conference support services, including the availability of conference rooms equipped for multilingualism;
 - (c) Clients' procurement needs being met;
 - (d) Improved workplace safety and conditions in the Palais des Nations and its annexes.

Programme performance in 2023

Reduced wait times for visitor and participant entry for conferences, events and meetings

- 29E.47 A number of upgrades were required at Pregny Gate to bolster the security infrastructure and expedite and streamline the entry of participants attending conferences, events and meetings at the Palais des Nations. As part of those upgrades, the subprogramme held consultations with Security and Safety Services to define the scope of work and undertook a feasibility study to assess the technical specifications, structural constraints and compliance with building codes and standards. Those consultations and studies informed the selection of modernized security features, including speed gates, bulletproof booths and revolving doors. Digital badges for visitors were introduced, replacing the outdated traditional paper badges.
- 29E.48 Progress towards the objective is presented in the performance measure below (see table 29E.11).

Table 29E.11
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	–	Visitors and participants experience a 67 per cent reduction in wait times to enter the Palais des Nations following introduction of digital badges

Planned results for 2025

Result 1: optimized warehouse storage space for clients

Programme performance in 2023 and target for 2025

- 29E.49 The subprogramme’s work contributed to clients having access to efficiently managed warehouse storage through a space management application, which met the planned target.
- 29E.50 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29E.12).

Table 29E.12
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Development and launch of warehouse space management application	Positive client feedback on the space management application piloted with the Office of the United Nations High Commissioner for Refugees	Clients have access to efficiently managed warehouse storage through the space management application	Clients have access to additional storage space following further optimization of warehouse storage capacity	Clients utilize 100 per cent of all available warehouse storage space
Identification of pilot client				

Result 2: United Nations Office at Geneva campus preserved for future generations

Programme performance in 2023 and target for 2025

- 29E.51 The subprogramme’s work contributed to the drafting of a study to assess the ongoing preventive maintenance and operational costs for building H, which did not meet the planned target of delivering a long-term maintenance strategy for building H. The target was not met because there were technical issues with some systems in building H that prevented completion of the comprehensive long-term maintenance strategy.
- 29E.52 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29E.13).

Table 29E.13
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Availability of a study to assess the ongoing preventive maintenance and operational costs for building H	Protection of Member States’ investment through an assessment study of the renovated areas of the Palais des Nations delivered by the strategic heritage plan that identifies long-term preventive maintenance requirements	Long-term maintenance strategy for buildings fully handed over by strategic heritage plan in place to protect Member States’ investment

Result 3: event support centre, phase II: improved audiovisual support used by Member States and client entities

Proposed programme plan for 2025

29E.53 The landscape for hosting the Organization’s side events, cultural events and activities has transformed in recent years. Traditional audiovisual setups, once sufficient, are now expected to integrate advanced technology to seamlessly blend in-person and online components.

Lessons learned and planned change

29E.54 The lesson for the subprogramme was that hosting a blend of in-person and virtual elements at the same event required new processes and audiovisual specialists to collaborate with colleagues across several subprogrammes to deliver those services. In applying the lesson, the subprogramme will establish phase II of the Office’s event support centre, offering centralized, improved and proactive audiovisual support. This includes providing individual consultations to guide client entities and Member States through the audiovisual technicalities of planning events with blended in-person and virtual elements.

29E.55 Expected progress towards the objective is presented in the performance measure below (see table 29E.14).

Table 29E.14
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	–	Member State and client entity audiovisual needs and scenarios identified and incorporated into event support centre process road map	Member States and client entities use the centralized, improved and proactive audiovisual support for side events, cultural events and activities

Deliverables

29E.56 Table 29E.15 lists all deliverables of the subprogramme.

Table 29E.15

Subprogramme 3: deliverables for 2025, by category and subcategory

Category and subcategory

E. Enabling deliverables

Administration: travel arrangements (27,600), visas and laissez-passer for Geneva-based United Nations Secretariat entities and other entities based at the Geneva campus; and management and maintenance of Office campus (215,381 m² containing 2,871 offices, 49 conference rooms, and 85 meeting rooms).

Logistics: full procurement services (amounting to \$54.5 million); physical verification of 36,000 serialized equipment items and fixed assets; shipment of official property, bulk consignments for conferences (102,900 kg), 80 import/export requests for personal effects and distribution services (approximately 128,400 items) for United Nations offices and other United Nations entities.

Subprogramme 4 Information and communications technology operations

Objective

29E.57 The objective, to which this subprogramme contributes, is to advance the efficient and effective implementation of client entities' substantive programmes through technologies, including a coherent enterprise ICT system and enterprise architecture; access to ICT-related technological innovations; and a secure, coherent and resilient technology application hosting and infrastructure landscape.

Strategy

29E.58 To contribute to the objective, the subprogramme will:

- (a) Manage a portfolio of end-to-end hardware and software solutions and implement new technologies for clients on the basis of their business objectives;
- (b) Build resilient technological capacity to meet client objectives by acquiring knowledge and expertise on relevant solutions, migrating to the most cost-effective sourcing options, exploiting economies of scale, adopting innovative technologies and discontinuing legacy systems;
- (c) Manage the use of ICT resources by engaging and leading the ICT community and entities of the United Nations system in Geneva and elsewhere in Europe in the definition, adoption and deployment of ICT governance policies and procedures, as well as oversee and support ICT strategy implementation and provide security in the use of ICT services.

29E.59 The above-mentioned work is expected to result in:

- (a) Clients whose administrative and management decision-making processes are facilitated and empowered by new and innovative information technology solutions;
- (b) Client entities gaining access to cost-effective services and solutions that optimize the use of resources to achieve business goals;
- (c) A safe and reliable ICT environment for all United Nations Secretariat entities in Geneva.

Programme performance in 2023

A more secure, reliable and trusted digital environment for clients

29E.60 The growing complexity and frequency of information security threats have required the adoption of cutting-edge practices to effectively protect the Organization's information assets. In 2023, the

subprogramme successfully completed the deployment of micro-segmentation infrastructure within the data centre. Furthermore, the subprogramme instituted a robust vulnerability and threat management process and implemented round-the-clock monitoring and alerts for security threats through a third-party provider. The new service includes recommended action to take when a threat is identified, and it proved its effectiveness by identifying and neutralizing multiple threats promptly.

29E.61 Progress towards the objective is presented in the performance measure below (see table 29E.16).

Table 29E.16
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	Critical client data and systems better protected from security threats	Critical client data and systems protected with no serious breaches

Planned results for 2025

Result 1: incorporation of the needs of persons with disabilities into information and communications technology solution offerings

Programme performance in 2023 and target for 2025

29E.62 The subprogramme’s work contributed to 12 applications for accessibility assessed and 3 development teams with increased capability to incorporate accessibility into the development life cycle and approval process for new software applications, which met the planned target.

29E.63 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29E.17).

Table 29E.17
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
ICT systems disability inclusion requirements are addressed on an ad hoc or on-demand basis	Digital accessibility framework definition and design created, and development of related processes, tools and procedures started	12 applications for accessibility assessed and 3 development teams with capability to incorporate accessibility into the development life cycle and approval process for new software applications	Clients have access to new ICT accessibility services to evaluate and upgrade existing or new solutions to the required level of disability inclusion	Clients’ quality of service measured against web content accessibility guidelines, which ensure that websites, web applications, and digital content are accessible to everyone, including individuals with various disabilities

Result 2: experience of conference participants and organizers improved through technology

Programme performance in 2023 and target for 2025

29E.64 The subprogramme’s work contributed to phased availability of the new features for conference participants in buildings A, AB and C, which met the planned target.

29E.65 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29E.18).

Table 29E.18
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Conference stakeholders identify technological requirements for modern multilateral conferencing centre	Design and conduct of a mock-up for simulation of new features for conference participants and validation of the new architecture	Phased availability of the new features for conference participants in buildings A, AB and C	Conference participants have full access to the new features in conference rooms for buildings A, AB and C, and new architecture integrated into the design New functionality for conference participants integrated into design of building E	Conference participants have full access to new features in all buildings completed by the strategic heritage plan in 2025

Result 3: event support centre, phase I: clients utilize a single point of contact and online tool to organize cultural events, side events and activities

Proposed programme plan for 2025

29E.66 Following the coronavirus disease (COVID-19) pandemic, the Office expanded its service offerings for cultural events, side events and activities. As demand for those services grew, the complexities involved in supporting them cut across subprogrammes, requiring extensive cross-collaboration and leaving clients and service providers struggling to identify whom to contact for event support. In 2021 and 2022, the subprogramme took initial steps to resolve those coordination issues using technology.

Lessons learned and planned change

29E.67 The lesson for the subprogramme was that coordination issues and client struggles remained. In applying the lesson, the subprogramme will design and develop a new event support centre, encompassing all Office event support services, including information technology, audiovisual, moving, security and catering services. This includes cataloguing event services, identifying trained staff, creating standard event solutions and developing a digital platform for the centre’s operations.

29E.68 Expected progress towards the objective is presented in the performance measure below (see table 29E.19).

Table 29E.19
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	Staff book meeting rooms in building H including for blended in-person and virtual meetings	Staff have access to automated technology to facilitate the holding of blended meetings in building H	Clients provide input to enable the development of a digital platform to streamline centre operations	Clients have access to single point of contact and online tool to request event services and support operations

Deliverables

29E.69 Table 29E.20 lists all deliverables of the subprogramme.

Table 29E.20
Subprogramme 4: deliverables for 2025, by category and subcategory

Category and subcategory

E. Enabling deliverables

Information and communications technology: provision of security for information technology systems and data; connectivity services; hosting services; voice, video and data communications services; operation and maintenance of application systems in a secure environment; technical support for approximately 5,000 end users; and advisory services on business solutions.

Subprogramme 5 Library services

Objective

29E.70 The objective, to which this subprogramme contributes, is to ensure the preservation of and enhanced access to past, present and future knowledge of the United Nations, to mobilize this knowledge and to increase knowledge-sharing, education and dialogue among Member States and between Member States and the international community.

Strategy

29E.71 To contribute to the objective, the subprogramme will:

- (a) Provide access to United Nations documents and publications both online and paper-based resources and to external knowledge resources that provide information about the Organization’s areas of work; guarantee access to paper-based resources stored in the building; and focus on online and virtual client services, owing to the planned closure of the Library building and other records storage areas in the Palais des Nations during the strategic heritage plan renovation works;
- (b) Provide knowledge tools that bring together key information resources on United Nations issues and global agendas, manage the Office’s art collection and digitize and preserve archives and official documents, in collaboration with other United Nations libraries and archives;

- (c) Provide guidance on records management standards and best practices across the Office and at other Secretariat entities in Geneva through the provision of staff training, advisory services and records management services;
- (d) Transfer official records of the United Nations, both physical and digital, to the Records Management Unit for long-term preservation;
- (e) Provide support for cultural diplomacy, connect diplomats with United Nations staff, experts and global citizens through discussion and learning events, and organize learning events and cultural activities, including virtual and blended events.

29E.72 The above-mentioned work is expected to result in:

- (a) More informed participation and subsequent decision-making by diplomats and staff;
- (b) Improved transparency and accountability for the Organization;
- (c) Preservation of institutional and historical memory;
- (d) A vibrant online and on-site cultural activities programme that enables Member States to showcase their art and culture through exhibitions, film screenings and other events;
- (e) Alternative learning opportunities for United Nations staff and diplomats on topics that support career development and the implementation of United Nations policies and agendas.

Programme performance in 2023

Increased usage of curated information resources relating to the work of the International Law Commission

29E.73 During the annual sessions of the International Law Commission, the subprogramme offers dedicated spaces, facilities, customized reference services and a tailored resource guide. In 2022, this support expanded to include a dedicated subject expert with virtual chat service, an online welcome package and a broader resource guide with multilingual bibliographies. Acknowledging the Commission's need for up-to-date information, as highlighted in General Assembly resolution [77/103](#), the subprogramme further expanded its offerings in 2023 with the Conference Primer Pro package, aiding new Commission members to quickly understand discussion topics so that they could prepare well-informed statements. This comprehensive package included pre- and post-meeting reference services, increased resource purchases and subscriptions in international law, a special collection on current Commission topics, and expanded multilingual bibliographies, all of which increased the use of curated information resources (e.g., virtual chat service, resource guides, bibliographies, international law subscriptions and reference services) by 31 per cent in one year, as noted in the report of the Commission on its seventy-fourth session ([A/78/10](#)).

29E.74 Progress towards the objective is presented in the performance measure below (see figure 29E.II).

Figure 29E.II
Performance measure: number of curated information resources used by International Law Commission recipients (annual)

Planned results for 2025

Result 1: increased accessibility by clients to a wealth of digital information

Programme performance in 2023 and target for 2025

- 29E.75 The subprogramme’s work contributed to 18 new products and services that facilitate client information access and navigation, exceeding the planned target of 15 new products and services.
- 29E.76 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 29E.III).

Figure 29E.III
Performance measure: number of new products and services developed that facilitate client information access and navigation (annual)

Result 2: improved access to information for achieving the Sustainable Development Goals

Programme performance in 2023 and target for 2025

- 29E.77 The subprogramme’s work contributed to the updating of the accessibility and search features for the online Sustainable Development Goal research guide and the provision and customization of the digital archives platform for more pertinent search results, which met the planned target.
- 29E.78 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29E.21).

Table 29E.21
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Sustainable Development Goals research guide with updated content	Online availability of a further enhanced Sustainable Development Goals research guide	Recipients have access to improved search features for online Sustainable Development Goal research guide and to a customized digital archives platform	Enhanced access to digital collections and United Nations Conference on Trade and Development paper archives through partnerships	Clients of other information management institutions and networks use packaged Sustainable Development Goal information and metadata
Ongoing digitization and online publishing of League of Nations archives	Digitization of League of Nations archives finalized, with 14 million pages			

Result 3: increased availability of tools for clients to gain access to and use information resources efficiently and responsibly

Proposed programme plan for 2025

- 29E.79 The subprogramme provides worldwide access to information resources for the United Nations community and researchers. With its vast online information in diverse formats, special skills are required to efficiently and responsibly gain access to, evaluate and use these resources. In 2021 and 2022, the subprogramme customized training modules to facilitate access to United Nations archives and documents. In 2023, the subprogramme released “library and archives quick-starts”, a series of recorded events with instructions on how to use digital tools such as Global Search and the archives online catalogue. It also facilitated access to the Sustainable Development Goal research guide and the digital archives.

Lessons learned and planned change

- 29E.80 The lesson for the subprogramme was that, while clients found current service offerings helpful, expanding its product offerings and providing systematic, ongoing and in-depth guidance to staff, diplomats and academics researching United Nations topics would maximize their impact. In applying the lesson, the subprogramme will establish a formal training and guidance programme with content centred on gaining access to, evaluating and using sources efficiently and responsibly. Training will utilize various media to cater to different learning styles. The programme will also draw on existing networks and partnerships.
- 29E.81 Expected progress towards the objective is presented in the performance measure below (see figure 29E.IV).

Figure 29E.IV
Performance measure: number of new tools (literacy guidance and learning products and services) available to clients (cumulative)

Deliverables

29E.82 Table 29E.22 lists all deliverables of the subprogramme.

Table 29E.22

Subprogramme 5: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	40	48	40	25^a
Events for diplomats and United Nations staff on the processes, working mechanisms and rules of the Secretariat and for career development	40	48	40	25 ^a
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services on records management for 400 clients.				
Outreach programmes, special events and information materials: cultural activities, including exhibitions, concerts and films; guided tours of the Library, archives and exhibitions of the United Nations Museum Geneva; discussion panels and conferences for cultural exchange, education and dialogue on key United Nations issues; and exhibitions in the Library and at the United Nations Museum Geneva.				
Library services: knowledge services to enable evidence-based policymaking and research for 12,000 diplomats, delegates, United Nations staff and academics worldwide; creation and maintenance of web pages of official records and documents; unified resource management system for the Office and three United Nations Secretariat libraries; print and electronic information resources; management of 15,000 linear metres of United Nations and League of Nations archives and records in paper form; and access to on-site and online archives and records.				

^a Owing to strategic heritage plan renovations, library spaces will be closed. Therefore, on-site events cannot be held. The projected 25 events will instead be held online.

B. Proposed post and non-post resource requirements for 2025

Overview

29E.83 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 29E.23 to 29E.25.

Table 29E.23

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2023 expenditure ^a	2024 approved	Changes				2025 estimate (before recosting)	
			Technical adjustments	New/expanded mandates	Other	Total		Percentage

29E.84 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 29E.26 to 29E.28 and figure 29E.V.

29E.85 As shown in tables 29E.26 (1) and 29E.27 (1), the overall resources proposed for 2025 amount to \$89,387,100 before recosting, reflecting a net increase of \$700 (or less than 0.01 per cent) compared with the approved budget for 2024. Resource changes result from technical adjustments, new and expanded mandates, and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

29E.86 As reflected in table 29E.26 (1), resource changes reflect a decrease of \$21,500, as follows:

- (a) **Subprogramme 3, Support services** (decrease of \$9,000). The decrease relates to:
 - (i) The removal of a non-recurrent provision under general operating expenses for meeting support for 2024 related to Human Rights Council resolution [51/33](#) (\$700); and
 - (ii) A decrease under general operating expenses related to the cost-neutral outward redeployment of funds previously budgeted for meeting services to section 24, Human rights, of the proposed programme budget for the provision of travel of participants for in-person meetings (\$18,800); offset in part by
 - (iii) An increase due to adjustments pursuant to paragraph 7 of General Assembly resolution [78/252](#), in which the Assembly endorsed the recommendations of the Advisory Committee on Administrative and Budgetary Questions contained in its report ([A/78/7](#)) on the consolidation of resources to implement mandates of the Human Rights Council, specifically its resolutions [47/21](#) and [54/9](#) (\$10,500);
- (b) **Subprogramme 4, Information and communications technology operations** (decrease of \$12,500). This decrease under contractual services relates to the cost-neutral outward redeployment of funds previously budgeted for meeting services to section 24, Human rights, of the proposed programme budget for the provision of travel of participants for in-person meetings.

New and expanded mandates

29E.87 As reflected in table 29E.26 (1), resource changes reflect an increase of \$62,700, as follows:

- (a) **Subprogramme 3, Support services** (increase of \$50,100). This increase relates to additional requirements under general operating expenses for contractual sound operators and accessibility

services (\$30,800), hybrid meeting audiovisual support services (\$13,400) and operating costs for office accommodation (\$5,900) pursuant to General Assembly resolutions [77/69](#), [78/20](#), [78/47](#) and [78/238](#) and Human Rights Council resolutions [52/14](#), [52/15](#), [53/3](#), [54/16](#), [54/17](#), [54/27](#) and [54/35](#);

- (b) **Subprogramme 4, Information and communications technology operations** (increase of \$12,600). This increase relates to additional requirements under contractual services for information technology support for hybrid meetings, and for the office accommodation costs for additional staff in the Geneva branch of the Office for Disarmament Affairs, pursuant to General Assembly resolution [78/47](#).

Other changes

29E.88 As reflected in table 29E.26 (1), resource changes reflect a net decrease of \$40,500 which affect mainly the operational requirements projected for 2025, as follows:

- (a) **Subprogramme 3, Support services** (increase of \$40,400). This increase under general operating expenses relates to the cost-neutral inward redeployment of funds previously budgeted under section 2, General Assembly and Economic and Social Council affairs and conference management, of the proposed programme budget, under the Division of Conference Management, Geneva, for the provision of support services to meetings and conferences requiring accessibility services, which are provided by the Division of Administration;
- (b) **Subprogramme 4, Information and communications technology operations** (increase of \$5,800). This increase under contractual services relates to the cost-neutral inward redeployment of funds previously budgeted under section 2, General Assembly and Economic and Social Council affairs and conference management, of the proposed programme budget, under the Division of Conference Management, Geneva, for the provision of information technology support to meetings and conferences requiring accessibility services, which are provided by the Division of Administration;
- (c) **Subprogramme 5, Library services** (decrease of \$86,700). This decrease relates to:
- (i) An increase of \$104,300 under posts resulting from the proposed establishment of one P-3 post (see annex II);
 - (ii) A decrease of \$156,700 under posts resulting from the proposed abolishment of one General Service (Other level) post (*ibid.*);
 - (iii) A decrease of \$34,300 under general temporary assistance due to an anticipated reduced need for manual acquisitions tasks performed by temporary staff, as higher-level professional competencies are required to manage the shift of materials to digital formats (*ibid.*).

Extrabudgetary resources

29E.89 As reflected in tables 29E.26 (2) and 29E.27 (2), extrabudgetary resources amount to \$50,670,500. The resources would complement regular budget resources and would be used mainly to provide for 178 posts (3 P-5, 20 P-4, 35 P-3, 2 P-2, 3 General Service (Principal level), 115 General Service (Other level)) and \$26,333,900 non-post resources to perform the various functions in the areas of finance and budget services (e.g. accounting services, grant support, and payroll processing and disbursement), human resources management (e.g. staff and recruitment administration, staff development and learning, medico-administrative services and human resources legal and policy advisory services), support services (e.g. travel processing, mail and pouch handling, procurement, conference support, ground transportation and facilities management), information and telecommunication technology services (e.g. personal computing, communications, conference support, hosting and storage) and record-keeping and library advisory services.

- 29E.90 The projected increase under subprogramme 4 is due mainly to increased licence costs as well as higher demand related to design and editing software.
- 29E.91 The extrabudgetary resources under the present section are subject to the oversight of the United Nations Office at Geneva, which has delegated authority from the Secretary-General.
- 29E.92 In-kind contributions would provide for government-provided rent-free premises with an estimated value of \$4,370,200.

Executive direction and management

- 29E.93 The United Nations Office at Geneva, in particular the Division of Administration, is responsible for the implementation of the programme of work under section 29E. The core functions of the Division include providing direction and coordination in human resources management, financial resources management, ICT, central support services and library services at the United Nations Office at Geneva, including the management and utilization of United Nations premises and the coordination of human resources, finance and administrative policies with other Geneva-based organizations.
- 29E.94 The Division of Administration continues to provide administrative and other support services to Secretariat departments and offices and other entities of the United Nations system. Such services are provided to the United Nations funds and programmes, specialized agencies and other organizations of the United Nations system on a reimbursable basis, and a number of Geneva-based operations rely on the aforementioned services, in particular in the context of expanding humanitarian and human rights activities.
- 29E.95 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), the Office has an environmental sustainability steering group and an environmental management system in line with the guidelines and best practices of the United Nations system. In 2023, the Office signed two landmark initiatives, the Ambition Negawatt Vision charter and the 2050Today charter. The Negawatt charter is an agreement with Services Industriels de Genève, the local utility company, which underlines the shared commitment to environmental protection and sustainable development. The 2050Today charter establishes a framework for Geneva-based international organizations, permanent missions and civil society entities to work together to measurably reduce greenhouse gas emissions. Under both charters, the Office will develop action plans to tackle important emission sources and target areas that consume the most energy. Also in 2023, work continued on the energy centre, the project to heat the Palais des Nations using heat pumps that extract thermal energy from Lake Geneva water. Once completed, the energy centre is forecast to provide around 80 per cent of the heat requirement of the Palais des Nations from renewable sources, leading to substantial reductions in greenhouse gas emissions. Furthermore, the Office recycled 93 per cent of its office waste. The Office's cleaning contract fully incorporates all environmental requirements, including waste recycling, energy and water savings, and the use of environmentally friendly detergents. Other initiatives in 2023 included the continued electrification of the Office's vehicle fleet with the purchase of two fully electric vehicles.
- 29E.96 Information on the timely submission of documentation and advance booking for air travel is reflected in table 29E.29. The Office continues to make every effort to comply in full with the advance purchase policy directive and has undertaken a number of steps to ensure that air travel is booked as early as possible. Travel requests that are not submitted for certification 21 days before travel are routed to the Director of Administration for validation of mitigating circumstances before final review and approval. The Office did not submit parliamentary documents to the Department for General Assembly and Conference Management and does not plan to submit any such reports in 2025.

Table 29E.29
Compliance rate
 (Percentage)

Annex II

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 5, Library services	1	P-3	Establishment of 1 post of Librarian	To manage the increasing complexity of requisitioning and processing in the digital publishing industry, as well as the storage and management of 45,000 linear metres of books and journals. These tasks require high-level professional knowledge in librarianship, outstanding planning and organization skills, negotiation skills and financial knowledge. The post also has supervisory responsibilities.
Subprogramme 5, Library services	(1)	GS (OL)	Abolishment of 1 post of Library Assistant	Made possible by the establishment of a post of Librarian (P-3) mentioned above.
Subprogramme 4, Information and communications technology operations	–	P-4	Reassignment of 1 post of Telecommunications Officer to Programme Management Officer	The responsibilities of the Telecommunications Officer profile have become obsolete due to technological evolution and no longer support current needs. The proposed Programme Management Officer role better reflects the managerial nature of the positions at the P-4 level in subprogramme 4, requiring strategic and programmatic focus applied to the information technology field.
Subprogramme 3, Support services	–	GS (OL)	Reassignment of 1 post of Property Management Assistant to Programme Analysis Assistant	In recent years and in line with the Secretary-General's initiatives emphasizing the importance of data and data analysis, the subprogramme needs to automate various processes and make wider use of technology tools, requiring data analysis functions to be embedded within the United Nations Office at Geneva support services. The post of Property Management Assistant will therefore be reassigned as a Programme Analysis Assistant to address the new demands of the Service. The post will contribute to capacity-building in analytics and generate data-driven analysis to support decision-making.

Abbreviation: GS (OL), General Service (Other level).

Overall orientation

Mandates and background

- 29F.1 The United Nations Office at Vienna was established in 1979 pursuant to General Assembly resolution [31/194](#) with the objective of providing administrative support to the United Nations Secretariat units located in Vienna, including the United Nations Office on Drugs and Crime (UNODC), the Office for Outer Space Affairs, the International Trade Law Division of the Office of Legal Affairs, the secretariat of the United Nations Scientific Committee on the Effects of Atomic Radiation, the United Nations Information Service, the Office of Internal Oversight Services, the Office for Disarmament Affairs, the regional office of the Office of the United Nations Ombudsman and Mediation Services and the United Nations Register of Damage Caused by the Construction of the Wall in the Occupied Palestinian Territory. Under the terms of the tripartite memorandum of understanding of 1977 and subsequent amendments to it, the Office also provides support and administrative services, garage operations, language training and communication services on a common services basis to other international organizations based in the Vienna International Centre, namely the International Atomic Energy Agency, the United Nations Industrial Development Organization and the Preparatory Commission for the Comprehensive Nuclear-Test-Ban Treaty Organization.

Strategy and external factors for 2025

- 29F.2 The Office will continue to provide administrative services, including the provision of an enabling policy framework and enhanced decision-making through continuous monitoring, data analysis and reporting. The strategy for 2025 will continue to include: (a) coordinating with Headquarters and providing timely advice to the entities serviced on all policy and administrative matters; (b) strengthening internal financial controls and streamlining financial procedures and guidelines to ensure effective financial management; (c) targeting enhancement of leadership, learning and career support activities guided by a performance management system supporting increased accountability, staff engagement, workplace flexibility and empowerment while ensuring a diverse and inclusive workplace; (d) maintaining efficient and cost-effective travel and transportation services through best practices; (e) promoting environmental sustainability in coordination with all departments and offices; (f) strengthening the capacity of procurement staff through online training and guidance notes to procurement practitioners; (g) monitoring significant pronouncements of the International Public Sector Accounting Standards Board and improving financial data integrity; (h) integrating new technologies into the organizational business toolkit; and (i) increasing compliance with technology standards, guidelines and methodologies, information and communications technology (ICT) policies and enterprise architecture. To the extent possible, these services are supported by multilingual teams responding to requests in all official languages of the Organization.
- 29F.3 Under the leadership of the Department of Operational Support, the Office will continue to support the strengthening of the collective learning approach to service harmonization and improvements across the global operational support architecture to increase overall satisfaction with regard to client services.
- 29F.4 With regard to the external factors, the overall plan for 2025 is based on the planning assumption that the extrabudgetary funding available to client offices and the support requirements for services provided by the Office remain stable.
- 29F.5 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate, including through the implementation of the Strategy for Gender Equality and the Empowerment of Women (2022–2026) of the United Nations Office at Vienna and UNODC. It will also support clients in attaining gender parity targets and will track and report on progress in

promoting gender equality and the empowerment of women, in line with the Secretary-General's system-wide strategy on gender parity.

- 29F.6 In line with the United Nations Disability Inclusion Strategy, the Office and other organizations based in Vienna, as members of the joint committee responsible for managing the Common Fund for Financing Major Repairs and Replacements at the Vienna International Centre, will ensure that the accessibility report commissioned by the host country is used to prioritize the necessary renovations, updates and repairs within the Common Fund. The Office will create a more inclusive and supportive culture for staff members who have disabilities and staff who have dependants with disabilities. This will involve offering training on disability inclusion, providing clear information about benefits and entitlements related to disabilities and organizing events to raise awareness about disability inclusion. The Office will engage with and involve persons with disabilities and their representative organizations in these efforts.

Legislative mandates

- 29F.7 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

31/194	Utilization of office accommodation and conference facilities at the Donaupark Centre in Vienna	74/271; 77/280	Progress towards an accountability system in the United Nations Secretariat
58/278	Report of the Joint Inspection Unit on common and joint services of United Nations system organizations at Vienna		

Subprogramme 1 Programme planning, finance and budget

General Assembly resolutions

41/213	Review of the efficiency of the administrative and financial functioning of the United Nations	77/267	Shifting the management paradigm in the United Nations: review of changes to the budgetary cycle
42/211	Implementation of General Assembly resolution 41/213		

Subprogramme 2 Human resources management

General Assembly resolutions

59/164	Improvement of the status of women in the United Nations system	77/256 77/278	United Nations common system Human resources management
63/271	Amendments to the Staff Regulations	78/248	Administration of justice at the United Nations
73/281	Shifting the management paradigm in the United Nations		

Subprogramme 3 Support services

General Assembly resolutions

58/276; 58/277	Report of the Joint Inspection Unit on the management audit review of outsourcing in the United Nations	58/278 69/273	Report of the Joint Inspection Unit on common and joint services of United Nations system organizations at Vienna Procurement
----------------	---	------------------	--

**Subprogramme 4
Information and communications technology operations**

General Assembly resolutions

63/262	Information and communications technology, enterprise resource planning, and security, disaster recovery and business continuity	69/262	Questions relating to the programme budget for the biennium 2014–2015 (sect. II, Information and communications technology in the United Nations)
63/269	Information and communications technology, disaster recovery and business continuity for the United Nations: arrangements for the secondary data centre at Headquarters	78/243	Information and communications technology strategy

Deliverables

29F.8 Table 29F.1 lists all cross-cutting deliverables of the programme.

Table 29F.1

Cross-cutting deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	3	3	3	3
1. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
2. Meetings of the Committee for Programme and Coordination	1	1	1	1
3. Meetings of the Fifth Committee	1	1	1	1

Evaluation activities

- 29F.9 The evaluation on ICT security conducted by the United Nations Office at Vienna and completed in 2023 has guided the proposed programme plan for 2025.
- 29F.10 In response to the results and lessons of the evaluation referenced above, subprogramme 4 enhanced the collaboration and communication mechanisms in the disaster recovery plan to ensure that the plan can be executed in the absence of key stakeholders and to enhance systems redundancy.
- 29F.11 An evaluation to be conducted by the United Nations Office at Vienna of the accessibility of the Vienna International Centre for persons with disabilities and the services the Centre offers to meet the requirements of the United Nations Disability Inclusion Strategy is planned for 2025.

Programme of work

**Subprogramme 1
Programme planning, finance and budget**

Objective

- 29F.12 The objective, to which this subprogramme contributes, is to ensure sound, effective and efficient financial management by client offices.

Strategy

- 29F.13 To contribute to the objective, the subprogramme will:
- Continue to strengthen the monitoring of budget performance, financial management and control, and improve reporting;
 - Provide advice, assistance, guidance and training to programme managers and administrative units of client offices on financial management and budgetary matters;
 - Streamline financial processes and guidelines and regularly review workflow procedures to identify ways to achieve a more efficient and faster client response;
 - Strengthen internal financial controls, monitor financial performance and risks and ensure integrity of organizational financial data;
 - Monitor the implementation of recommendations from oversight bodies and ensure strict compliance with the Financial Regulations and Rules of the United Nations and the financial policies of the United Nations.
- 29F.14 The above-mentioned work is expected to result in:
- Improved accessibility and understanding of financial information by client offices;
 - Increased accountability by client offices;
 - Improved integrity of financial data;
 - Enhanced overall management of programme budget and extrabudgetary financial resources.

Programme performance in 2023

Reduced payroll-related reconciliation efforts by clients of the United Nations Office at Vienna

- 29F.15 The subprogramme oversees the issuance of over 23,000 financial authorizations to the United Nations Development Programme (UNDP) and the processing of over 100,000 invoices annually for its clients. The subprogramme has proactively responded to operational complexities arising from the new UNDP enterprise resource planning system and changes to the UNDP invoice templates in 2023. In collaboration with UNDP, the subprogramme's efforts have yielded improved invoice quality and progress in addressing timeliness.
- 29F.16 Recognizing a specific improvement opportunity, the subprogramme initiated the reconfiguration of the United Nations Office at Vienna portal for payroll-related invoice processing, reducing reconciliation efforts by the Office's clients. The streamlined process will simplify the verification of payroll supplementary information against payroll-related invoices, ensuring a more agile operation in the coming years.

Table 29F.2

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
UNDP invoices reconciled and processed through the invoices reconciliation portal	UNDP invoices reconciled and processed through the invoices reconciliation portal. Engagement with UNDP on the potential impact of implementation of its new enterprise resource planning system	UNDP invoice templates changed following implementation of its new enterprise resource planning system. The invoices reconciliation portal was reconfigured, tested and implemented, resulting in a reduction of approximately 60 per cent in payroll-related reconciliation efforts

Planned results for 2025

Result 1: improved asset management through re-engineered business processes

Programme performance in 2023 and target for 2025

29F.17 The subprogramme’s work contributed to client field offices increasing compliance with the International Public Sector Accounting Standards (IPSAS) requirements on project assets accounting through adjustments in the accounting policy and changes in the assets under construction management process, which met the planned target.

29F.18 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29F.3).

Table 29F.3
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Client field offices benefit from joint review of asset register, and correction of errors in accounting and in asset records, with parallel delivery of training and ongoing guidance	Client field offices benefit from improved accuracy of the assets register, better understanding on the status of assets and IPSAS requirements	Client field offices increase compliance with IPSAS requirements on project assets accounting through adjustments in the accounting policy and changes in the assets under construction management process	Client field offices are fully compliant with IPSAS requirements on project assets accounting	Clients provide positive feedback on simplified processes and reduced workload

Result 2: improved stewardship of resources

Programme performance in 2023 and target for 2025

29F.19 The subprogramme’s work contributed to the certification of 31 substantive staff as focal points in budgetary and accounting matters and the financial regulations and rules of the organization, which exceeded the planned target of 20.

29F.20 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 29F.I).

Figure 29F.I
Performance measure: number of substantive staff certified as focal points in budgetary and accounting matters and the financial regulations and rules of the organization (cumulative)

Result 3: improved financial accounting and reporting through implementation of IPSAS 47: Revenue

Proposed programme plan for 2025

29F.21 With the issuance of two new IPSAS in May 2023, IPSAS 47: Revenue and IPSAS 48: Transfer expenses, which together provide revised principles for the recognition and measurement of public sector revenue and transfer expenses, the subprogramme would need to adapt its accounting policies, procedures and systems to comply with the requirements of these new standards by 1 January 2026. In 2023, the subprogramme contributed to the development of system-wide guidance on IPSAS 47.

Lessons learned and planned change

29F.22 The lesson for the subprogramme in implementing current IPSAS revenue standards was the need for consistent interpretation and accounting treatment across United Nations system entities and corresponding operational procedures. In applying the lesson, the subprogramme will align its policies with the guidance from the Task Force on Accounting Standards. In addition, the subprogramme will validate accounting treatments for each donor arrangement against IPSAS 47 and collaborate with Headquarters to modify operational procedures in order to enable enhanced transparency, comparability and usefulness of financial information for oversight bodies.

29F.23 Expected progress towards the objective is presented in the performance measure below (see table 29F.4).

Table 29F.4

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	System-wide policy guidance on IPSAS 47 established	Clients have access to entity-specific policies and adopt revised procedures on the basis of system-wide guidance	90 per cent of clients' donor agreements assessed for accounting treatment under IPSAS 47, ensuring readiness for transition in 2026

Deliverables

29F.24 Table 29F.5 lists all deliverables of the subprogramme.

Table 29F.5

Subprogramme 1: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	2	2	2	2
1. Consolidated budget for UNODC for the biennium	1	1	–	1
2. Performance report for UNODC for the biennium	–	–	1	–
3. Annual financial report and audited financial statements for UNODC	1	1	1	1

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

E. Enabling deliverables

Administration: financial management, including risk management and internal control, preparation and implementation of budgets and other resource proposals; management of approximately 2,700 posts; financial reporting and accounting, including 1,800 donor reports; cash and revenue management; cost recovery; issuance of 23,500 UNDP financial authorizations, payments, payroll and disbursements for 1,700 staff members; administration of 13,000 banking details for business partners; guidance and advice on all financial matters; management of after-service health insurance claims for 800 beneficiaries; and management of 8,000 grants.

Subprogramme 2 Human resources management

Objective

- 29F.25 The objective, to which this subprogramme contributes, is to ensure the attraction, development and retention of a competent, diverse, adaptable and healthy workforce with the highest standards of efficiency, competence and integrity, giving due regard to geographical representation, inclusivity and gender balance.

Strategy

- 29F.26 To contribute to the objective, the subprogramme will:
- (a) Foster and reinforce an enabling working environment for its clients with regard to service delivery, talent management and organizational culture, through human resources services to clients in Vienna and in UNODC field offices;
 - (b) Implement talent outreach and attraction initiatives to enhance gender equality, geographical representation and disability inclusion;
 - (c) Support personnel through talent development initiatives and promoting workplace flexibility;
 - (d) Reinforce a culture of zero tolerance against prohibited conduct, including through the implementation of multiple initiatives of the United Nations System Chief Executives Board for Coordination.
- 29F.27 The above-mentioned work is expected to result in improved staff engagement, motivation, productivity and well-being, thereby contributing to the delivery of the Organization's mandates.

Programme performance in 2023

Simplified process for outside activity requests

- 29F.28 The United Nations permits staff members to participate in outside activities that contribute to the enhancement of professional and technical skills. Staff are required to obtain prior approval to engage in outside activities. From 2021 to 2023, the subprogramme improved the management of requests by redesigning the electronic tool supporting the process. The result is a single-source database for all outside activity requests, available remotely to all staff, who receive real-time updates on the status of their requests, increasing decision transparency and communication for the recipient.
- 29F.29 Progress towards the objective is presented in the performance measure below (see table 29F.6).

Table 29F.6
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	–	Staff use a simplified and transparent process for submission, review and approval of outside activity requests through a single-source database

Planned results for 2025

Result 1: career and professional development supported by increased number of certified coaches

Programme performance in 2023 and target for 2025

- 29F.30 The subprogramme’s work contributed to 49 certified coaches to ensure sustainability of the organizational culture change by strengthening best practices within the clients’ units and by providing career development and performance management support, which exceeded the planned target of 48.
- 29F.31 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 29F.II).

Figure 29F.II
Performance measure: number of certified coaches to ensure sustainability of the organizational culture change (cumulative)

Result 2: an agile organization with a culture of learning and innovation

Programme performance in 2023 and target for 2025

- 29F.32 The subprogramme’s work contributed to a culture of learning and innovation, with 36 clients out of 45 reporting improved confidence in applying innovative approaches to their work, which exceeded the planned target of 20 clients.
- 29F.33 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 29F.III).

Figure 29F.III

Performance measure: number of clients reporting improved confidence in applying innovative approaches to their work (annual)

Result 3: towards inclusion of persons with disabilities in the workforce

Proposed programme plan for 2025

29F.34 To realize the United Nations Disability Inclusion Strategy, staff at all levels need to understand disability inclusion and be able to apply it to their work. The subprogramme is increasing awareness and staff capacity with a view to becoming a more inclusive organization. The subprogramme coordinated training and awareness-raising activities, including a disability awareness week and celebration of the International Day of Persons with Disabilities. It also helped to establish a network for persons with disabilities for United Nations personnel in Vienna to serve as a forum for conveying concerns, provide peer support and gain insights into accessibility measures.

Lessons learned and planned change

29F.35 The lesson for the subprogramme was the need to meet the high demand of staff members interested in learning about disability inclusion. In applying the lesson, the subprogramme will increase its awareness-raising and expand its training on disability inclusion, including through collaboration with and benefiting from the expertise of civil society organizations. These efforts will foster a better working environment for United Nations personnel with disabilities and enable client entities to integrate considerations related to disability inclusion into their programmes.

29F.36 Expected progress towards the objective is presented in the performance measure below (see table 29F.7).

Table 29F.7

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Staff participate in the first disability inclusion awareness trainings	Network of persons with disabilities established	Election of the first executive committee of the network of persons with disabilities	Persons with disabilities report satisfaction and well-being at a level similar to that of the general staff body	The United Nations Office at Vienna achieves “meets requirements” rating for indicator 14, “capacity development for staff”, of the United Nations Disability Inclusion Strategy

Deliverables

29F.37 Table 29F.8 lists all deliverables of the subprogramme.

Table 29F.8

Subprogramme 2: deliverables for 2025, by category and subcategory

Category and subcategory

D. Communication deliverables

Outreach programmes, special events and information materials: 25 targeted outreach programmes, including special events aligned with the system-wide strategy, information and broadcast materials, job fairs and career presentations for approximately 2,500 potential candidates.

E. Enabling deliverables

Administration: human resources services to 3,500 personnel; classification and reclassification of over 400 posts, outreach and recruitment for 380 staff posts, 2,300 non-staff engagement processes, human resources policies and legal advice; staff counselling; talent management; issuance and renewal of appointments and contracts; training on organizational and managerial competencies; 3 orientation programmes for new personnel; medical services in collaboration with other Vienna-based entities; awareness-raising programmes on prohibited conduct and the Enabling Environment Guidelines for the United Nations System for all staff.

Internal justice and oversight: 1,000 requests for legal and policy advice to colleagues in the discharge of their official functions, and advice to senior officials and staff on the application of the Staff Regulations and Rules of the United Nations and other administrative issuances, including legal positions for administrative reviews and cases brought by staff to the Management Advice and Evaluation Section and the Office of the United Nations Ombudsman and Mediation Services; assistance in receiving, assessing and processing complaints and reports of alleged misconduct; discharging the role of the conduct and discipline focal point; awareness-raising on matters related to the administration of justice at the United Nations.

Subprogramme 3 Support services

Objective

29F.38 The objective, to which this subprogramme contributes, is to ensure the efficient, environmentally sound and effective functioning of client offices with regard to conference and facilities management, property management, travel and transportation, mail and pouch services, procurement, engagement of implementing partners, commercial activities, records management and library services.

Strategy

29F.39 To contribute to the objective, the subprogramme will:

- (a) Implement and manage an effective supply chain by building on the related Umoja functionality;
- (b) Implement an environmental management system in line with the United Nations Secretariat environmental policy;
- (c) Improve the business continuity approach through further integration with other parts of the organizational resilience management system;
- (d) Provide property management services, diplomatic pouch and mail services and manage records;
- (e) Provide various travel-related services, including advice, training and policy guidance;
- (f) Provide process and policy guidance on engagement of implementing partners;
- (g) Provide regular support to clients on changing workspace needs within the constraints of limited office space;
- (h) Engage in outreach on library services.

- 29F.40 The above-mentioned work is expected to result in:
- (a) Effective and sustainable use of United Nations property, including office space;
 - (b) Effective management of clients’ travel resources;
 - (c) An effective environmental management system;
 - (d) Increased use of information resources contained in the library for informed decision-making by clients and Member States;
 - (e) Improved planning and sourcing of all goods and services;
 - (f) A robust business continuity plan;
 - (g) Timely and accurate management of documents and mail.

Programme performance in 2023

Improved performance in physical verification of equipment and asset records in United Nations Office on Drugs and Crime field offices

- 29F.41 The subprogramme conducts and oversees the physical verification of equipment and assets in 78 UNODC field offices. In 2022, it was observed that many records had errors, were incomplete or had not been verified. In response, in 2023, the subprogramme provided customized on-the-job training sessions, by assisting in the correction of errors and records verification, resulting in improved staff knowledge of property management rules and procedures. This initiative has been well received and welcomed by client offices.
- 29F.42 Recognizing the improvement, the subprogramme continues to provide individualized sessions to specific offices to further enhance staff knowledge and understanding of procedures and requirements to improve performance in 2024. The improved performance of individual UNODC field offices will further increase Member States’ confidence in UNODC.

Table 29F.9
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
–	Inconsistencies identified in physical verification of equipment	9 field offices identified in 2022 received customized on-the-job training, resulting in verification and correction of erroneous records

Planned results for 2025

Result 1: improved environmental sustainability through the establishment of an environmental management system

Programme performance in 2023 and target for 2025

- 29F.43 The subprogramme’s work contributed to consultations on the scope of an environmental management system, which did not meet the planned target of improved environmental sustainability through the development of an initial version of the local environmental management system. The target was not met due to delays in identifying the criteria for baseline assessment with other Vienna-based organizations.
- 29F.44 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29F.10).

Table 29F.10
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	Review of the environmental impact of the United Nations Office at Vienna and its clients	Consultations to determine the scope of an environmental management system	More harmonized and consistent environmental management practices by client offices through the operationalization of the local environmental management system	Implementation of the environmental management system at the United Nations Office at Vienna

Result 2: improved supply chain management

Programme performance in 2023 and target for 2025

- 29F.45 The subprogramme’s work contributed to clients having access to and the required capabilities to utilize a contract administration tracking tool to better monitor contract expiry dates, enabling improved planning, which met the planned target.
- 29F.46 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29F.11).

Table 29F.11
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Clients have access to contract administration tracking tool for supply chain planning and contract management	Clients have increased and up-to-date visibility of the status and costs of their procurement requirements	Simplified procurement process for vendors and Tender Opening Committee members through an e-tendering platform

Result 3: improved monitoring of implementing partners

Proposed programme plan for 2025

- 29F.47 The subprogramme provides administrative support to several Secretariat units in their engagement with external partners. The subprogramme provides a framework, advice and guidance to programme managers who collaborate with external partners in the implementation of projects to fulfil the Organization’s mandates.

Lessons learned and planned change

- 29F.48 The lesson for the subprogramme was that programme managers are not always aware of the legal obligations of external partners as they relate to financial and substantive reporting. In applying the lesson, the subprogramme will provide additional training and guidance to strengthen understanding of the legal agreements. The subprogramme will improve monitoring systems using available functionality in the Umoja grantor module. This would alert programme managers of deviations by

external partners and contribute to ensuring that reporting obligations of external partners are fulfilled in a timely and consistent manner.

29F.49 Expected progress towards the objective is presented in the performance measure below (see figure 29F.IV).

Figure 29F.IV

Performance measure: percentage of reports by external partners delivered on time (annual)

Deliverables

29F.50 Table 29F.12 lists all deliverables of the subprogramme.

Table 29F.12

Subprogramme 3: deliverables for 2025, by category and subcategory

Category and subcategory

D. Communication deliverables

Library services: knowledge services for 3,000 library clients; digitized official documents available online; print and electronic information resources with on-site and online access.

E. Enabling deliverables

Administration: travel arrangements (16,600 trips), visas (400) and laissez-passer (300) for staff and meeting participants for Vienna-based United Nations Secretariat entities and more than 130 UNODC field office locations; active agreements with implementing partners (260); management and maintenance of the United Nations Office at Vienna (total footprint of approximately 16,500 square metres).

Logistics: full procurement services for 2,400 items; physical verification of 8,000 assets and equipment; monitoring of United Nations property records at the Vienna International Centre and 130 UNODC field office locations; shipment of official property, bulk consignments for conferences and removal of personal effects and related insurance requirement for staff; and mail, pouch and distribution services of around 90,000 items (or 114 tons).

Subprogramme 4

Information and communications technology operations

Objective

29F.51 The objective, to which this subprogramme contributes, is to advance the efficient and effective implementation of client entities’ substantive programmes through technologies, including a coherent enterprise ICT system and enterprise architecture, access to ICT-related technological innovations and a secure, coherent and resilient technology application hosting and infrastructure landscape.

Strategy

- 29F.52 To contribute to the objective, the subprogramme will:
- (a) Place client offices' programme objectives and business needs at the centre of decisions involving ICT service offerings and the implementation of new technologies;
 - (b) Support enterprise application deployments and integrate local service delivery mechanisms to avoid replication of globally available services;
 - (c) Strengthen security in the use of ICT and data protection through the implementation of vulnerability management, continuous monitoring, the protection of classified information and related policies and procedures;
 - (d) Promote cloud computing through using Secretariat-wide systems contracts and increase compliance with technology standards, guidelines and methodologies by cooperating with the regional technology centres and the Office of Information and Communications Technology.
- 29F.53 The above-mentioned work is expected to result in:
- (a) Clients having improved user experience in ICT service delivery;
 - (b) Conformance with global United Nations Secretariat standards and technical procedures;
 - (c) Clients who are empowered during the decision-making process and whose administrative and management tasks are facilitated through access to appropriate information technology tools;
 - (d) Reduced fragmentation of digital tools and services, with staff incorporating tools and services seamlessly into their daily business workflows with increased effectiveness, efficiency and satisfaction;
 - (e) Greater scalability, with systems that are more adaptable to changing needs.

Programme performance in 2023

Enhanced user protection and global incident coordination

29F.54 In response to the need to fortify ICT security measures at the United Nations Office at Vienna/UNODC, the new United Nations Secretariat endpoint protection strategy was implemented in Vienna, prioritizing advancements in user protection against evolving ICT security threats. The system increased transparency and streamlined the coordination of information security incidents, resulting in more timely responses.

29F.55 Progress towards the objective is presented in the performance measure below (see table 29F.13).

Table 29F.13

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
–	Global content management restricted under the end-user protection provided	New endpoint protection strategy implemented with new vendor in compliance with globally managed content policy and central reporting requirements

Planned results for 2025

Result 1: integration of needs of persons with disabilities in information and communications technology solutions

Programme performance in 2023 and target for 2025

- 29F.56 The subprogramme’s work contributed to improved accessibility of new websites developed in 2023 for users with disabilities through the integration of accessibility checks into website development processes, which met the planned target.
- 29F.57 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29F.14).

Table 29F.14
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Disability inclusion actions regarding ICT systems taken on an ad hoc or on-demand basis and websites improved through accessibility guidelines	Improved accessibility of UNODC websites for users with disabilities, with a 97/100 score for unodc.org in online site accessibility scans Enhanced understanding of content managers on disability inclusion and the importance of descriptive content design	Improved accessibility of new websites for users with disabilities through the integration of accessibility checks into website development processes	Content managers create accessible websites and ICT systems using new website development tools	Content managers apply improved accessibility best practices that were provided through ongoing training and workshops

Result 2: improved information and communications technology security of the United Nations Office at Vienna and its clients

Programme performance in 2023 and target for 2025

- 29F.58 The subprogramme’s work contributed to improved ICT security by initiating additional procedures, processes and controls to implement recommendations from 2022, which met the planned target.
- 29F.59 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 29F.15).

Table 29F.15
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Integration of vulnerability management and vulnerability assessments in compliance with Office of Information and Communications Technology policies	Vienna-based ICT systems security maturity strengthened by several security maturity level assessments and addressing critical recommendations	Improved ICT security of Vienna-based ICT systems through implementation of remaining recommendations from 2022	Strengthened security maturity of field office ICT systems by dedicated security assessments	Users comply with additional security controls, processes and procedures in both the Vienna headquarters and field offices

Result 3: strengthened information security in the field

Proposed programme plan for 2025

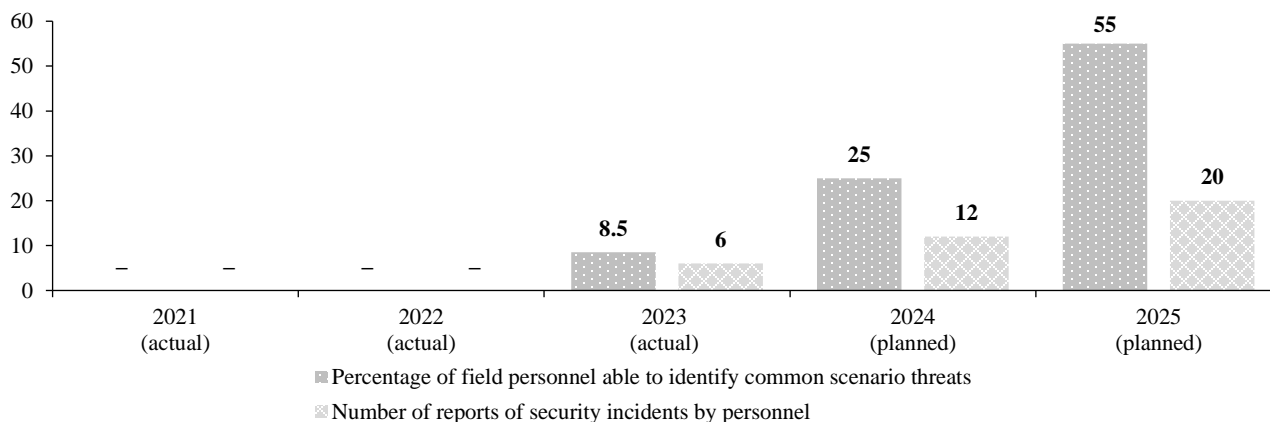

29F.60 As United Nations programmes increasingly rely on digital platforms and networks, a robust awareness of information security among staff members and stakeholders is critical to fortify defences, mitigate risks and uphold the integrity of confidential information. In 2022, the subprogramme conducted an ICT security maturity assessment, which showed the need to improve information security, including information security awareness. In 2023, the subprogramme started to develop an information security awareness programme and rolled out the programme in several field offices of UNODC.

Lessons learned and planned change

29F.61 The lesson for the subprogramme was that while field personnel had a sound understanding of the fundamentals of information security, there was a need for the information security awareness programme to delve deeper into more complex aspects to ensure that they are equipped with the requisite knowledge and skills to navigate the digital landscape securely. In applying the lesson, the subprogramme will further develop its information security awareness programme and enhance it with advanced second-level courses, covering topics such as information technology disaster recovery, and will expand delivery to additional UNODC field offices.

29F.62 Expected progress towards the objective is presented in the performance measure below (see figure 29F.V).

Figure 29F.V
Performance measure: percentage of field personnel able to identify common scenario threats and number of reports by personnel of potential serious security incidents

Deliverables

29F.63 Table 29F.16 lists all deliverables of the subprogramme.

Table 29F.16

Subprogramme 4: deliverables for 2025, by category and subcategory

Category and subcategory

E. Enabling deliverables

Information and communications technology: information security for information technology systems and data; connectivity services for remote devices; hosting services; voice, video and data communications services; operation and maintenance of existing and new application systems in a secure environment; technical support for approximately 3,000 end users; and advisory services on business solutions.

B. Proposed post and non-post resource requirements for 2025

Overview

29F.64 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 29F.17 to 29F.19.

Table 29F.17

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2023 expenditure ^a	2024 approved	Changes				2025 estimate (before recosting)	
			Technical adjustments	New/expanded mandates	Other	Total		Percentage
Posts	10 141.3	10 020.1	–	–	–	–	–	10 020.1

29F.65 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 29F.20 to 29F.22 and figure 29F.VI.

29F.66 As shown in tables 29F.20 (1) and 29F.21 (1), the overall resources proposed for 2025 amount to \$20,366,000 before recosting, reflecting no change compared with the approved budget for 2024. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

29F.67 As reflected in tables 29F.20 (2) and 29F.21 (2), the United Nations Office at Vienna expects to receive extrabudgetary contributions that complement regular budget resources and support the delivery of its mandates. The resources will be used mainly for delivering administrative services. In 2025, extrabudgetary resources are estimated at \$24,402,800 and would provide for 90 posts, as presented in table 29F.21 (2).

29F.68 The extrabudgetary resources under the present section are subject to the oversight of the United Nations Office at Vienna in accordance with the delegated authority from the Secretary-General.

Executive direction and management

- 29F.69 The executive direction and management component comprises the Office of the Director of the Division for Management.
- 29F.70 The main responsibilities of the executive direction and management component include the provision of leadership and direction regarding the management of administrative, conference and related support services for United Nations entities located in Vienna.
- 29F.71 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), the United Nations Office at Vienna and UNODC are integrating environmental management practices into their operations. The Vienna headquarters is a climate neutral facility, running 100 per cent on renewable energy. Since 2020, the Vienna-based organizations of the United Nations common system have started to renew entrances, replaced existing air-curtains and upgraded or refurbished all elevator cabins. While some of these projects have been completed in parts of the compound, they are still ongoing in others, combined with an increased focus on upgrading air conditioning units and on replacing pipes and insulation and lighting systems throughout the Vienna International Centre from the 1978 standards. These projects, which will continue throughout 2025 and beyond, will result in a further reduction in the environmental impact of the Vienna International Centre as they will increase energy efficiency.
- 29F.72 Information on the timely submission of documentation and advance booking for air travel is reflected in table 29F.23. Compliance rates continued to be monitored with the introduction of a new mission travel request application, as well as awareness-raising sessions with staff.

Table 29F.23

Compliance rate

(Percentage)

	2021 actual	2022 actual	2023 actual	2024 planned	2025 planned
Timely submission of documentation	100	100	100	100	100
Air tickets purchased at least two weeks before the commencement of travel	43	71	73	100	100

- 29F.73 The proposed regular budget resources for 2025 amount to \$396,400 and reflect no change compared with the approved budget for 2024. Additional details on the distribution of the proposed resources for 2025 are reflected in table 29F.24 and figure 29F.VII.

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 30.1 The Office of Internal Oversight Services (OIOS) is responsible for assisting the Secretary-General in fulfilling his internal oversight responsibilities in respect of the resources and staff of the Organization through the provision of internal audit, inspection and evaluation, and investigation services. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolutions [48/218 B](#), [54/244](#), [59/272](#), [64/263](#), [69/253](#) and [74/257](#). The Office will continue to maintain its operational independence in carrying out its objectives. The Independent Audit Advisory Committee provides the Office with advice to strengthen the programme's risk-based planning and budgeting.

Strategy and external factors for 2025

- 30.2 In support of the Secretary-General's focus on building a more sustainable and inclusive future and on reforming the Organization to better deliver against this vision, the strategy for 2025 prioritizes internal oversight coverage of the work of the Organization in the following management areas: (a) implementation of the reforms of the management, peace and security, and development pillars; (b) strengthening of organizational culture; (c) procurement and supply chain management, including management of fraud and corruption risks; (d) management of mission drawdown or transition; and (e) strengthening of the protection against retaliation (whistle-blower) system. The Office will also continue to cover the programmes and strategies of the Organization, including cross-cutting areas such as the provision of support to Member States on the achievement of the Sustainable Development Goals and the implementation of the Secretary-General's strategies on gender equality, racial equality, environmental sustainability, disability inclusion and data.
- 30.3 Effective engagement with the senior leadership of the Organization will help the programme to identify risks to the Organization and provide timely assurance and advice on issues relating to the efficient, economical, effective and ethical management of the Organization's resources.
- 30.4 The Office will strengthen the delivery of its mandated activities by: (a) strengthening the use of enterprise risk management in planning internal audit and evaluation and inspection activities (subprogrammes 1 and 2); (b) enhancing the methodology for measuring the impact of audit recommendations (subprogramme 1); (c) enhancing guidance for thematic and outcome evaluations of programmes (subprogramme 2); and (d) enhancing guidance on using data analytics to improve investigation planning and the timeliness of investigations (subprogramme 3).
- 30.5 With regard to cooperation with other entities at the global, regional, national and local levels, the Office will consult closely on its programme of work with the Board of Auditors and the Joint Inspection Unit and liaise, as appropriate, with relevant offices involved in the internal justice system of the Organization.
- 30.6 With regard to inter-agency coordination and liaison, the Office will share knowledge on good practices and innovations in oversight methodologies with the other internal oversight functions of the United Nations system through the meetings of the Representatives of Internal Audit Services of the United Nations Organizations, the United Nations Representatives of Investigative Services and the United Nations Evaluation Group.
- 30.7 With regard to the external factors, the overall plan for 2025 is based on the planning assumption that the Office will have unimpeded access to the staff and records of the Organization and other required information.

- 30.8 The Office integrates a gender perspective into its operational activities, deliverables and results, as appropriate. Subprogrammes 1 and 2 will cover the management of risks relating to mainstreaming a gender perspective. Subprogramme 3 will continue to implement a gender perspective in its victim-centred methodology for investigations of sexual exploitation and abuse and workplace sexual harassment.
- 30.9 In line with the United Nations Disability Inclusion Strategy, the Office will further advance disability inclusion by covering the management of risks relating to implementation of the Strategy.

Legislative mandates

- 30.10 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

48/218 B ; 60/254	Review of the efficiency of the administrative and financial functioning of the United Nations	61/275	Terms of reference for the Independent Audit Advisory Committee and strengthening the Office of Internal Oversight Services
59/272	Review of the implementation of General Assembly resolutions 48/218 B and 54/244	72/266 A and B	Shifting the management paradigm in the United Nations
60/1	2005 World Summit Outcome	74/257	Review of the implementation of General Assembly resolutions 48/218 B , 54/244 , 59/272 , 64/263 and 69/253
61/245	Comprehensive review of governance and oversight within the United Nations and its funds, programmes and specialized agencies

Deliverables

- 30.11 Table 30.1 lists all cross-cutting deliverables of the programme.

Table 30.1
Cross-cutting deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	2	2	2	2
1. Report on the activities of the Office of Internal Oversight Services (Parts I and II)	2	2	2	2
Substantive services for meetings (number of three-hour meetings)	28	30	26	17
Meetings of:				
2. The Fifth Committee	8	11	8	8
3. The Committee for Programme and Coordination	14	13	12	3
4. The Advisory Committee on Administrative and Budgetary Questions	2	2	2	2
5. The Independent Audit Advisory Committee	4	4	4	4
C. Substantive deliverables				
Databases and substantive digital materials: comprehensive database and dashboard for monitoring the status of implementation of the approximately 1,000 open recommendations of the Office.				
E. Enabling deliverables				
Content on communications platforms, briefings and presentations on oversight activities; and refresher training to programme managers on the Office’s recommendation monitoring system.				

Evaluation activities

- 30.12 The independent external quality assessments of the investigations function (subprogramme 3, completed in 2022) and the internal audit function (subprogramme 1, completed in 2023) have guided the proposed programme plan for 2025.
- 30.13 In response to the result of the evaluations referenced above, OIOS has developed an action plan to improve areas such as work planning, the use of information and communications technology (ICT) and quality assurance.

Programme of work

Subprogramme 1 Internal audit

Objective

- 30.14 The objective, to which this subprogramme contributes, is to improve the efficiency, economy, effectiveness and impact of the Organization’s programmes, in keeping with best management practices.

Strategy

- 30.15 To contribute to the objective, the subprogramme will:
- (a) Conduct internal audit activities to recommend improvements to key controls and processes and identify accountability issues, with a strengthened focus on providing assurance as to whether Secretariat entities have adequately and effectively implemented the new delegation of authority, as well as on the effectiveness and efficiency of programme performance monitoring and reporting and service delivery;

- (b) Support the efforts undertaken by the Department of Management Strategy, Policy and Compliance to strengthen the United Nations Secretariat accountability system, through assurance and advice to the Department;
 - (c) Focus on data governance and data security in the use of ICT in the Organization;
 - (d) Strengthen annual work-planning processes by identifying and monitoring audit assignments that systematically cover United Nations cross-cutting priorities in the management, programme and strategy areas (including reforms, organization culture, procurement and supply chain, mission drawdown or transition and Sustainable Development Goal support) and take into consideration a gender perspective, disability inclusion, racism, human rights and the environment, as appropriate;
 - (e) Implement recommendations resulting from the external quality assessment of the internal audit function.
- 30.16 The above-mentioned work is expected to result in:
- (a) Strengthened accountability and transparency in the use of resources by United Nations organizations and entities;
 - (b) Improved risk identification and mitigation by United Nations organizations and entities;
 - (c) High quality of internal audit assurance provided to the Secretary-General, heads of organizations and entities and Member States on the adequacy and effectiveness of risk management and internal control systems.

Programme performance in 2023

Strengthened information and communications technology security and organizational resilience

- 30.17 Managing the heightened risks and vulnerabilities associated with digital information is needed to protect the Organization's data and its integrity, maintain confidentiality, prevent cyberincidents and ensure business continuity.
- 30.18 In 2023, the subprogramme continued to oversee the management of ICT risks and preparedness, issuing 14 audit memorandums and reports in 2023 (adding to the 13 that were issued in 2022). Over the past two years, 49 of the 217 accepted recommendations issued by the subprogramme have been implemented, strengthening ICT security governance, risk management and controls to improve the protection of information and assets and the continuity of the Organization's operations.
- 30.19 Progress towards the objective is presented in the performance measure below (see figure 30.I).

Figure 30.I

Performance measure: audit recommendations implemented that strengthen information and communications technology security and organizational resilience

Planned results for 2025

Result 1: strengthened accountability system in the United Nations Secretariat

Programme performance in 2023 and target for 2025

- 30.20 The subprogramme's work contributed to strengthened organizational accountability, as informed by three thematic assessments on aspects of the accountability system, as well as the availability of 22 recommendations and the development of action plans by client management, where relevant, to address areas of improvement, which met the planned target.
- 30.21 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 30.2).

Table 30.2

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Strengthened organizational accountability through advice on the extent to which the accountability system is relevant, efficient and effective, as informed by 8 thematic assessments in the evaluation of the accountability system: enterprise resource management; planning and budgeting; delegation of authority; budget implementation and financial management; internal control system; information systems; ethics and integrity; and human resources management, learning and development strategies	Strengthened organizational accountability, informed by 2 thematic assessments included in the evaluation of the accountability system: programme delivery and organizational performance; the Business Transformation and Accountability Division within the Department of Management Strategy, Policy and Compliance as enabler of the accountability system	Strengthened organizational accountability, informed by 5 thematic assessments on aspects of the accountability system: the flexible workspace project (mandated by the General Assembly); financial disclosure programme managed by the Ethics Office; and 3 assignments on implementation of the delegation of authority framework in 3 entities	Implementation of recommendations and associated management plans of action to strengthen the accountability system, informed by 3 audits of programme performance monitoring and reporting; financial and administrative management; and service delivery	Implementation of recommendations and associated management plans of action to strengthen the accountability system, informed by 5 audits of enterprise risk management; staff engagement process; fraud risk management and reporting cases of fraud and presumptive fraud; budget formulation and monitoring; and results-based management
MINUSMA, MINUSCA, UNMISS, UNIFIL, and UNSOM/UNSOS receive advisories on the performance of delegation of authority for human resources, financial, procurement and property	Availability of 28 action points and advice to strengthen the accountability system, and development of action plans by entity management, where relevant	Availability of 22 recommendations to strengthen the accountability system, and development of action plans by entity management, where relevant		

Abbreviations: MINUSCA, United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic; MINUSMA, United Nations Multidimensional Integrated Stabilization Mission in Mali; UNIFIL, United Nations Interim Force in Lebanon; UNMISS, United Nations Mission in South Sudan; UNSOM, United Nations Assistance Mission in Somalia; UNSOS, United Nations Support Office in Somalia.

Result 2: increased accountability through transparent exercise of the delegation of authority
Programme performance in 2023 and target for 2025

- 30.22 The subprogramme’s work resulted in the acceptance of 29 audit recommendations relating to strengthening the implementation of the delegation of authority framework, representing 4 per cent of the total recommendations accepted in 2023, which did not meet the planned target of 12 per cent.
- 30.23 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 30.II).

Figure 30.II

Performance measure: audit recommendations accepted that strengthen the implementation of the delegation of authority framework in the Organization (annual)

Result 3: strengthened monitoring systems to improve performance management to support programme delivery

Proposed programme plan for 2025

- 30.24 The subprogramme has been systematically integrating assessments of programme performance frameworks into its audits of mandated programmes. The results of these audits have underscored the importance of evidence-based decision-making for managing programme performance and the delivery of results.

Lessons learned and planned change

- 30.25 The lesson for the subprogramme, underscored by the Data Strategy of the Secretary-General for Action by Everyone, Everywhere, was that comprehensive programme performance management systems supported by timely and quality data were central to monitoring and measuring progress on the implementation of mandates.
- 30.26 In applying the lesson, the subprogramme will conduct dedicated assessments of selected programme performance management systems, including the Umoja programme performance monitoring and reporting modules.
- 30.27 Expected progress towards the objective is presented in the performance measure below (see figure 30.III).

Figure 30.III

Performance measure: audit recommendations accepted that strengthen programme performance management

Deliverables

30.28 Table 30.3 lists all deliverables of the subprogramme.

Table 30.3

Subprogramme 1: deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	2	1	–	1
1. Audit of the implementation of flexible workplace project at United Nations Headquarters (resolution 75/253 C)	1	1	–	–
2. Biennial report on procurement (resolutions 72/266 B and 74/256)	1	–	–	1
B. Generation and transfer of knowledge				
Publications (number of publications)	150	121	150	140
3. Internal audit reports (assurance and advisory)	150	121	150	140

Subprogramme 2 Inspection and evaluation

Objective

30.29 The objective, to which this subprogramme contributes, is to strengthen relevance, efficiency, effectiveness and impact in the implementation of programmes and legislative mandates of the Organization and improve decision-making, accountability and learning.

Strategy

- 30.30 To contribute to the objective, the subprogramme will:
- (a) Focus, in conducting evaluations, on subprogramme-level outcomes achieved by Secretariat entities in the areas of the peace and security, sustainable development, human rights and humanitarian assistance;
 - (b) Support accountability for programme improvement through the monitoring of the implementation of evaluation recommendations and their outcomes, including by conducting triennial reviews of OIOS evaluation reports;
 - (c) Integrate the Secretary-General's cross-cutting strategies into evaluation design and implementation;
 - (d) Refine its inspection and evaluation methodology and develop appropriate evaluation design and data collection techniques;
 - (e) Provide evaluation methodological guidance and quality assurance support to Secretariat entities and to the wider Organization, including through collaboration with the Department of Management Strategy, Policy and Compliance, and by developing and implementing community of practice workshops, methodology seminars and other capacity-building measures;
 - (f) Enhance evaluation knowledge-sharing through the production of evaluation newsletters and evaluation synthesis reports;
 - (g) Support system-wide evaluation through collaboration with the United Nations Sustainable Development Group System-wide Evaluation Office.
- 30.31 The above-mentioned work is expected to result in:
- (a) Increased learning and accountability of Secretariat entities towards achieving the planned outcomes of programmes and subprogrammes and drawing upon lessons learned;
 - (b) Strengthened evaluation capacity and performance, and greater use of evaluation results to inform programme planning and achievement of results within the Organization.

Programme performance in 2023

Strengthening strategic results across the Organization

- 30.32 By improving the scope, focus and utility of its thematic evaluations, the subprogramme contributed to strengthening strategic results by identifying cross-cutting risks and lessons that can be applied broadly to improving programmes and strategies across the Organization. OIOS has conducted two thematic evaluations annually over the past three years, with recommendations that have contributed to that goal.
- 30.33 Progress towards the objective is presented in the performance measure below (see table 30.4).

Table 30.4

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
Recommendations accepted relating to improving prevention, risk assessment and monitoring, as well as the overall policy framework guiding the Organization's efforts relating to prevention response and victims' support efforts against sexual exploitation and abuse	Recommendations accepted relating to improving results in the areas of strategic planning, data usage and data-sharing, and advocacy and support efforts under the women and peace and security agenda by 3 peace operations and 3 special political missions	Recommendations accepted relating to integration of the youth, peace and security agenda into policy and practice, increasing knowledge management and communication, formalizing coordination across the Organization and developing a

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
Recommendations accepted relating to addressing factors contributing to poor organizational culture, including trust, misconduct, gender equality, low morale and poor knowledge management in peacekeeping operations	Recommendations accepted relating to improving results in the areas of strengthening strategic planning, political analyses, performance assessment and reporting, and communication, as well as internal structures and processes in 5 peacekeeping missions	strategy and results framework in Headquarters entities, peacekeeping operations and special political missions Recommendations accepted relating to strategic and work planning, data collection and data-sharing, and reporting of results by 55 Secretariat entities to Member States in achieving 2 outcomes under the Sustainable Development Goals

Planned results for 2025

Result 1: more specific and results-oriented evidence of the outcomes of United Nations support to Member States for the 2030 Agenda for Sustainable Development

Programme performance in 2023 and target for 2025

- 30.34 The subprogramme’s work contributed to improved efficiency and effectiveness of mandate delivery through nine subprogramme outcome evaluations and synthesis reports, which exceeded the planned target of eight evaluations and synthesis reports. Unanticipated changes to the workplan resulted in a change in some of the evaluations conducted, as well as two unplanned synthesis reports.
- 30.35 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 30.5).

Table 30.5
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Strengthened programme coherence at the country level through an evaluation of the resident coordinator system Strengthened political affairs components in peacekeeping missions through an evaluation covering 5 missions	Improved efficiency and effectiveness of mandate delivery through 8 evaluations on: macroeconomic policy in subprogrammes in all 5 regional commissions; regional offices in the Development Coordination Office; and rule of law in 2 peacekeeping missions	Improved efficiency and effectiveness of mandate delivery through 9 evaluations and 2 synthesis reports on: coordination of humanitarian action and emergency response; political and peacebuilding affairs; the United Nations Verification Mission in Colombia; rule of law in 3 peacekeeping missions (and an additional synthesis report); the resident	Improved efficiency and effectiveness of mandate delivery through 12 outcome evaluations and synthesis reports in areas such as: Secretariat contribution to the Sustainable Development Goals; OCT; OCHA; DCO, resident coordinator system; thematic outcome evaluation of children and armed conflict mandates; synthesis of outcome evaluation results on	Improved efficiency and effectiveness of mandate delivery through 11 evaluations and synthesis reports in areas such as: the resident coordinator system; support for the United Nations humanitarian response; Headquarters support for peace operations; the Development Account; special envoys; children and armed conflict in peacekeeping

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
		coordinator system policy advice; Sustainable Development Goals support; youth, peace and security; and a synthesis on advancement of gender equality	rule of law in peacekeeping operations; and synthesis of outcome evaluation results on regional economic commissions	operations; and other subprogrammes in selected entities

Abbreviations: DCO, Development Coordination Office; OCHA, Office for the Coordination of Humanitarian Affairs; OCT, Office of Counter-Terrorism.

Result 2: strengthened programmatic performance and achievement of results

Programme performance in 2023 and target for 2025

- 30.36 The subprogramme’s work contributed to more effective programmes through 90 per cent of its recommendations implemented within 24 months, which exceeded the planned target of 85 per cent.
- 30.37 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 30.IV).

Figure 30.IV

Performance measure: percentage of recommendations implemented within 24 months of issuance

Result 3: strengthening the resident coordinator system

Proposed programme plan for 2025

- 30.38 The subprogramme will continue to play its role in ensuring a strengthened resident coordinator system through ongoing evaluations that examine the results achieved, lessons learned and areas for improvement through the support that is provided by Secretariat entities.

Lessons learned and planned change

- 30.39 The lesson for the subprogramme was that, given the scope and scale of the resident coordinator system, a strategic approach was needed to ensure that the subprogramme’s evaluations provided valuable lessons and insights to support decision-making and to improve performance, across multiple aspects of the system. In applying the lesson, the subprogramme will ensure that it provides evaluations that address topics that are relevant and that will, over time, contribute to a greater accountability for results and improved impact.

Section 30 Internal oversight

30.40 Expected progress towards the objective is presented in the performance measure below (see table 30.6).

**Table 30.6
Performance measure**

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
–	–	Recommendations accepted to enhance the achievement of the Sustainable Development Goals through more coherent United Nations policy advice	Recommendations accepted to ensure an effective resident coordinator system in conflict-affected countries, and leading and coordinating responses to humanitarian crises	Recommendations accepted by Development Coordination Office to improve global support for the resident coordinators

Deliverables

30.41 Table 30.7 lists all deliverables of the subprogramme.

**Table 30.7
Subprogramme 2: deliverables for the period 2023–2025, by category and subcategory**

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>

E. Enabling deliverables				
Internal justice and oversight: advisory notes, memorandums and guidance to all Secretariat entities, including training programmes.				

**Subprogramme 3
Investigations**

Objective

30.42 The objective, to which this subprogramme contributes, is to enhance accountability and ethical behaviour within the Organization.

Strategy

30.43 To contribute to the objective, the subprogramme will:

- (a) Receive and record all complaints of possible violations of United Nations regulations, rules and pertinent administrative policies, and decide whether they warrant OIOS investigation or some other action;
- (b) Investigate reports of possible violations of United Nations regulations, rules and pertinent administrative policies;
- (c) Enable prevention of and response to complaints of: (i) sexual misconduct, including sexual exploitation and abuse, as well as sexual harassment; and (ii) fraud and corruption, including procurement fraud and medical insurance fraud;
- (d) Support the investigative capacity and capability of: (i) members of troop contingents who are responsible for undertaking investigations into misconduct; and (ii) officials who are responsible for the appointment of investigative panels or entities into misconduct.

30.44 The above-mentioned work is expected to result in:

- (a) Improved ability of the Secretary-General and his delegates to make appropriate decisions on jurisdictional or disciplinary action or corrective measures;
- (b) Improved ability of United Nations entities to identify and address misconduct;
- (c) Improved detection of issues and better control of risks such as sexual exploitation and abuse, sexual harassment, racial discrimination, fraud and corruption.

Programme performance in 2023

Maintaining the Organization’s ability to protect its resources and hold its personnel accountable by responding to all allegations of misconduct

30.45 Through improved planning that allowed better scoped and more targeted investigations, the subprogramme was able to respond to a continued increase in the number of allegations of misconduct reported to OIOS.

30.46 Progress towards the objective is presented in the performance measure below (see figure 30.V).

Figure 30.V

Performance measure: number of allegations of misconduct addressed through investigations and referrals

Planned results for 2025

Result 1: strengthened accountability and transparency in addressing reports of retaliation

Programme performance in 2023 and target for 2025

- 30.47 The subprogramme’s work contributed to an average completion of time of 11.3 months for protection against retaliation investigations, which did not meet the planned target of 9 months. The target was not met owing to the complexity of these types of investigations.
- 30.48 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 30.VI).

Figure 30.VI
Performance measure: protection against retaliation investigations available to enhance protection for those who report misconduct or wrongdoing (annual)

(Average completion time, in months)

^a No protection against retaliation investigations were closed in 2021.

Result 2: strengthened response to misconduct through improved timeliness of investigations

Programme performance in 2023 and target for 2025

- 30.49 The subprogramme’s work contributed to 45 per cent of all investigations being completed within 12 months, which did not meet the planned target of 80 per cent of all investigations completed in fewer than 12 months. The target was not met owing to record numbers in complaints reported to OIOS, resulting in an unprecedented number of new, more complex investigations.
- 30.50 Progress towards the objective and the target for 2025 presented in the performance measure below (see figure 30.VII).

Figure 30.VII
Performance measure: strengthened response to misconduct (annual)

(Percentage of all investigations completed in fewer than 12 months)

Result 3: strengthened response to misconduct investigations requiring a victim-centred response

Proposed programme plan for 2025

30.51 The investigation into complaints regarding sexual exploitation and abuse and misconduct remains a key priority of the Organization, requiring a swift investigative response that respects both the dignity of those affected by the behaviour and the due process rights of the personnel implicated. As part of this victim-centred approach, the subprogramme keeps victims informed of the investigation process and progress. The subprogramme also ensures that the Organization’s victim-support mechanisms are appropriately informed of those individuals affected by sexual exploitation and abuse to allow for assistance to be provided.

Lessons learned and planned change

30.52 The lesson for the subprogramme was that investigations of sexual exploitation and abuse required sensitive engagement with victims and witnesses, who were frequently part of the local community and could be difficult to identify and were under no obligation to cooperate with an investigation. In applying the lessons, the subprogramme will ensure the availability of qualified experts, including specialist translators, and technical forensic genetic analysis.

30.53 Expected progress towards the objective is presented in the performance measure below (see figure 30.VIII).

Figure 30.VIII
Performance measure: OIOS investigations of sexual exploitation and abuse completed within six months
 (Percentage)

Deliverables

30.54 Table 30.8 lists all deliverables of the subprogramme.

Table 30.8
Subprogramme 3: deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>
B. Generation and transfer of knowledge				
Publications (number of publications)	275	496	275	275
Investigation and closure reports	275	496	275	275
E. Enabling deliverables				
Internal justice and oversight: capacity-building relating to combating fraud and corruption, especially medical insurance fraud, focusing on peace operations.				

B. Proposed post and non-post resource requirements for 2025

Overview

30.55 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 30.9 to 30.11.

Table 30.9

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2023 expenditure ^a	2024 approved	Changes					2025 estimate (before recosting)
			Technical adjustments	New/ expanded mandates	Other	Total	Percentage	
Posts	20 709.4	21 603.8	–	–	–	–	–	21 603.8
Other staff costs	1 327.1	1 778.1	–	–	1 420.1	1 420.1	79.9	3 198.2

Total	116	–	–	–	–	116

30.56 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 30.12 to 30.14 and figure 30.IX.

30.57 As shown in tables 30.12 (1) and 30.13 (1), the overall resources proposed for 2025 amount to \$26,337,300 before recosting, reflecting an increase of \$1,500,000 (or 6.0 per cent) compared with the approved budget for 2024. Resource changes result from other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Overall resource changes

Other changes

30.58 As reflected in table 30.12 (1), resource changes reflect a net increase of \$1,500,000 as follows:

- (a) **Executive direction and management.** The net increase of \$13,700 reflects increased requirements for travel for the Under-Secretary-General for Internal Oversight Services to conduct risk-based strategic planning, monitoring and assurance of mandated activities, as well as to engage in consultations and risk discussions with senior leadership of United Nations entities in these areas;

- (b) **Subprogramme 1, Internal audit.** The net decrease of \$23,900 reflects reduced requirements under: (i) consultancy services resulting from the increased use of in-house capacity and expertise (\$22,500); (ii) travel, owing to the increased use of videoconferencing and teleconferencing (\$3,800); and (iii) general operating expenses (\$6,500) and supplies and materials (\$2,400), reflecting expenditure experience. The decreases are offset in part by increased requirements under: (i) contractual services for training in the new standards of the Institute of Internal Auditors (\$3,800); and (ii) furniture and equipment for the replacement of laptops (\$7,500);
- (c) **Subprogramme 2, Inspection and evaluation.** The net decrease of \$4,000 is due to reduced requirements under: (i) consultancy services resulting from the utilization of in-house capacity and expertise (\$7,900); (ii) travel, owing to the increased use of videoconferencing and teleconferencing (\$7,000); and (iii) supplies and materials (\$500) and furniture and equipment (\$800), reflecting expenditure experience. The decrease is offset in part by increased requirements under: (i) contractual services due to higher provisions for proprietary software licences (\$11,500); and general operating expenses, reflecting expenditure experience (\$700);
- (d) **Subprogramme 3, Investigations.** The net increase of \$1,500,000 results mainly from the proposed establishment of 10 general temporary assistance positions (1 Investigator (P-4), 2 Investigator (P-3) and 3 Investigation Assistant (General Service (Other level)), to be based in New York, and 1 Investigator (P-4), 2 Investigator (P-3) and 1 Investigations Assistant (General Service (Other level)), to be based in Nairobi (\$1,420,100), as well as associated non-post requirements under travel (\$41,700), contractual services (\$13,800), general operating expenses (\$10,000), furniture and equipment (\$13,600), consultants (\$500) and supplies and materials (\$300). The proposal derives from a sustained upward trend in the workload of the subprogramme, with a 174 per cent increase in the number of intakes, a 285 per cent increase in the number of investigation cases and a projected continuing growth in the overall workload. The workload increase has affected the performance of the subprogramme, in which 45 per cent of misconduct investigations were completed in fewer than 12 months in 2023, which did not meet the planned target of 80 per cent, as indicated in para. 30.49 and figure 30.VII above;
- (e) **Programme support.** The increase of \$14,200 reflects the expenditure experience for general operating expenses.

Other assessed resources

- 30.59 As reflected in tables 30.12 (2) and 30.13 (2), other assessed resources amount to \$32,073,200. The resources would complement regular budget resources and provide for the requirements indicated in report of the Secretary-General on the budget for the support account for peacekeeping operations ([A/78/746](#)).

Extrabudgetary resources

- 30.60 As reflected in tables 30.12 (3) and 30.13 (3), extrabudgetary resources amount to \$13,644,400. The resources would complement regular budget resources and would provide for 45 posts (1 D-1, 6 P-5, 15 P-4, 13 P-3, 1 P-2/1 and 9 General Service (Other level)), as well as non-post resources. Post resources would be used mainly to perform audit functions and non-post resources would provide audit coverage in support of United Nations entities funded primarily by extrabudgetary resources.
- 30.61 The extrabudgetary resources under the present section are subject to the oversight of OIOS, in accordance with the delegation of authority by the Secretary-General.

Executive direction and management

- 30.62 The Office of the Under-Secretary-General provides overall strategic planning and monitoring and ensures effective coordination of the workplan for OIOS. The Office of the Under-Secretary-General coordinates the work of the three subprogrammes, liaises with the Board of Auditors and the Joint Inspection Unit and maintains a close working relationship with the oversight functions of the other United Nations system organizations. Furthermore, it provides quality control for the reports of OIOS to the General Assembly, oversees resource utilization and serves as the focal point on performance management and for compliance monitoring of OIOS recommendations.
- 30.63 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Office will continue to take steps to implement the environmental policy of the United Nations Secretariat, including by continuing to reduce its carbon footprint through the use of videoconference facilities for interviews and meetings, ensuring that all printers are set to double-sided printing and encouraging staff to turn off computers and monitors at the end of the workday.
- 30.64 Information on the timely submission of documentation and advance booking for air travel is reflected in table 30.15.
- 30.65 In order to comply with the advance purchase policy directive, the Office continues its efforts by implementing an internal standard operating procedure to ensure that staff schedule flights at least two weeks in advance of planned audits, inspections and investigations. OIOS continues to ensure that videoconferencing or teleconferencing facilities are utilized, if possible, for oversight assignments.

Table 30.15

(Percentage)

	2021 actual	2022 actual	2023 actual	2024 planned	2025 planned
Timely submission of documentation	100	100	100	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	62	88	89	100	100

- 30.66 The proposed regular budget resources for 2025 amount to \$1,743,800 and reflect a net increase of \$13,700 compared with the approved budget for 2024. The net increase is explained in paragraph 30.58 (a). Additional details on the distribution of the proposed resources for 2025 are reflected in table 30.16 and figure 30.X.

Programme support

30.70 The Executive Office provides central administrative services to the Office in the areas of human resources management and financial and general administration, including the provision of advice to senior managers of the Office on administrative, financial, personnel and budgetary matters. In addition, it administers the staff, as well as the financial resources of the Office, at Headquarters, Geneva, Vienna, Nairobi and other duty stations, including the various peacekeeping missions and the International Residual Mechanism for Criminal Tribunals, under the delegation of authority granted by the Secretary-General and in accordance with the regulations and rules of the United Nations.

Section 30 Internal oversight

30.71 The proposed regular budget resources for 2025 amount to \$1,538,500 and reflect a net increase of \$14,200 compared with the appropriation for 2024. The net increase is explained in paragraph 30.58 (e). Additional details on the distribution of the proposed resources for 2025 are reflected in table 30.20 and figure 30.XIV.

I. International Civil Service Commission

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 31.1 The International Civil Service Commission (ICSC) was established pursuant to General Assembly resolution 3357 (XXIX) and is responsible for the regulation and coordination of the conditions of service for the United Nations common system. Under its statute, the Commission is a subsidiary organ of the Assembly. In the exercise of its functions, the Commission is guided by the principles set out in the agreements between the United Nations and other organizations aimed at the development of a single unified international civil service through the application of common personnel standards, methods and arrangements.

Programme of work

Objective

- 31.2 The objective, to which ICSC contributes, is to ensure fair and harmonized conditions of service for staff in the United Nations common system.

Strategy and external factors for 2025

- 31.3 To contribute to the objective, the Commission will:
- (a) Continue to develop and strengthen a common system of salaries, allowances and benefits under the Noblemaire and Flemming principles;
 - (b) Apply the methodologies for determining salaries and post adjustment classifications;
 - (c) Provide guidance and advice on the administration of human resources management policies and systems, including job evaluation standards and tools, and substantive support for all stakeholders;
 - (d) Lend its expertise to stakeholders and work closely with the Human Resources Network of the United Nations System Chief Executives Board for Coordination (CEB);
 - (e) Seek feedback from organizations on the conditions of service of staff;
 - (f) Conduct workshops to educate staff on the work of the Commission and on the benefits and entitlements available to staff of the United Nations common system;
 - (g) Carry out periodic global surveys to solicit information from the staff at large, all in an effort to determine the most appropriate conditions of service;
 - (h) Analyse the conditions of service of staff in difficult duty stations;
 - (i) Conduct comprehensive reviews of the common system compensation package every five years.
- 31.4 In an effort to increase diversity and rejuvenate the workforce within the common system, the Commission will collect information from common system organizations in order to conduct its review and propose relevant updates to the General Assembly on any new developments and improvements as they relate to geographical diversity and the rejuvenation of the workforce.

- 31.5 The above-mentioned work is expected to result in:
- (a) The promotion of geographical diversity and rejuvenation of the workforce;
 - (b) A coherent and effective human resources management system that is aligned closely with the achievement of organizational goals and objectives;
 - (c) Adequate conditions of service for all categories of staff.
- 31.6 With regard to the external factors, the overall plan for 2025 is based on the planning assumption that organizations of the United Nations common system provide timely information, as requested by the Commission, and that they fully implement the Commission's decisions and recommendations.
- 31.7 With regard to cooperation with other entities at the global, regional, national and local levels, the Commission will continue to conduct reference checks with other international organizations, as well as organizations in the public and private sectors, to ascertain whether the organizations of the common system remain competitive and continue to be attractive on the labour market.
- 31.8 With regard to inter-agency coordination and liaison, within the United Nations common system, the Commission will continue to engage with staff and heads of common system organizations through various forums. Engaging with staff and management of the various organizations will strengthen existing partnerships and lead to greater cooperation among stakeholders and full implementation of decisions and recommendations of the Commission and the General Assembly.
- 31.9 The Commission integrates a gender perspective in its operational activities, deliverables and results as appropriate. In 2025, the Commission will update the General Assembly on the implementation of existing gender parity policies in the United Nations common system and report on the implementation of the Commission's recommendations on the issue.
- 31.10 In line with the United Nations Disability Inclusion Strategy, the Commission will review the methodology and level of the disabled child allowance in conjunction with children's and secondary dependants' allowances.

Programme performance in 2023

New parental leave framework to contribute to more equitable career opportunities for women in the common system

- 31.11 In 2022, after a three-year review of parental leave policies within and outside the common system, the Commission reported to the General Assembly that it had decided to replace the existing maternity, paternity and adoption leave provisions with a parental leave provision of 16 weeks for all parents and to provide an additional period of 10 weeks to birth mothers to meet their specific prenatal and postnatal needs ([A/77/30](#), para. 92). In 2023, the Commission held in-depth discussions to help common system organizations adopt the new parental leave framework and monitor its implementation. It is envisaged that this policy would allow women to have more equitable career opportunities with men as they would not be forced to suspend or abandon their careers to provide childcare. Moreover, if men were provided a significant amount of parental leave, they would be more likely to take on shared parental responsibilities, thus relieving some of the load of infant caregiving that women have traditionally carried on their own.
- 31.12 Progress towards the objective is presented in the performance measure below (see table 31.1).

Table 31.1
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	The General Assembly, in resolution 77/256 , welcomed the establishment of the new parental leave framework and encouraged executive heads of other organizations in the common system to follow such practice	21 of the 29 common system organizations reported that they had implemented the new parental leave framework

Planned results for 2025

Result 1: strengthened incentives to promote multilingualism of the workforce in the common system

Programme performance in 2023 and target for 2025

- 31.13 The Commission’s work contributed to the study on workforce diversity in which Commission members provided perspectives and recommendations on multilingualism in the workforce in their relevant contexts as well as to the General Assembly recognizing that multilingualism strengthens workforce diversity and considered policy options to support the adoption and inclusion of multilingualism of the workforce in the programme of work of the Commission, which met the planned target.
- 31.14 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 31.2).

Table 31.2
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	Commission members provide perspectives and recommendations on multilingualism in the workforce in their relevant contexts. The General Assembly, in its resolution 77/256 A–B, recognizes that multilingualism strengthens the workforce diversity and welcomes the inclusion of multilingualism of the workforce in the programme of work of the Commission	Commission members review and the General Assembly considers policy options to support the adoption of more coherent and focused incentives to promote multilingualism in the context of the review of the Framework for Human Resources Management	On the basis of recommendations of ICSC at the conclusion of its review, the General Assembly provides common system organizations with guidance to promote multilingualism and an increasingly diverse workforce	Implementation of ICSC recommendations by common system organizations with guidance to promote multilingualism and an increasingly diverse workforce

Result 2: a common system compensation package that is fit for purpose, competitive and cost-efficient

Programme performance in 2023 and target for 2025

- 31.15 The Commission’s work contributed to the review of the common system compensation package, including the scope, parameters and a detailed timeline and structure of the upcoming review as well as increased participation in the global staff survey, and the General Assembly considered it, which met the planned target.
- 31.16 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 31.3).

Table 31.3
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Preliminary review of the compensation package was considered by the General Assembly	The General Assembly requested a detailed outline of the Commission’s approach for the next review of the common system compensation package, including the structure, parameters and timelines	The General Assembly considered a detailed outline of the review of the common system compensation package, which is expected to commence in 2024	Organizations, staff representatives and staff members indicate their satisfaction with the common system compensation package with a higher response rate than usual	The General Assembly considers a progress report of the Commission for its continued review of the cost-effectiveness, simplification and attractiveness of the compensation package

Result 3: more flexibility afforded to staff working in extreme hardship locations

Proposed programme plan for 2025

- 31.17 For staff in hardship duty stations who could not install their families there have been problems such as isolation from family and the additional costs such as those associated with maintaining another home outside the duty station for family members. After a review of the situation, the Commission decided to recommend some flexibility by allowing an element of choice for staff members. As a result, on a pilot basis, staff members in “E” duty stations where dependants could theoretically be installed were granted the option to install or not install their dependants.

Lessons learned and planned change

- 31.18 The lesson for the Commission, informed by the pilot study, was that similar hardship conditions, including challenges with housing, educational and health facilities conditions, were experienced in other duty stations. In applying the lesson, the Commission will expand the pilot study to those duty stations while offering an allowance at those locations.
- 31.19 Expected progress towards the objective is presented in the performance measure below (see table 31.4).

Table 31.4
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
The pilot study initiated in 2018 at category “E” duty stations showed indications of staff satisfaction as staff took advantage of the option	The General Assembly decided to continue the pilot study and to grant, on a pilot basis also, \$14,000 annually to eligible staff members in category “D” duty stations not designated as non-family until 31 December 2024	Attraction and retention of staff, especially women, in duty stations classified as undergoing extreme hardship	Recommendation of the Commission on the payment of an allowance based on a thorough review of its impact on workforce planning, in different categories of duty stations, including non-family duty stations, and the actual cost to organizations	Approval by the General Assembly of the Commission’s recommendation to regularize the payment of an allowance at duty stations with extreme hardship conditions

Legislative mandates

31.20 The list below provides all mandates entrusted to the Commission.

8. Workshops on the common system compensation package	17	17	14	20
Publications (number of publications)	24	54	24	54
9. Monthly (or bimonthly) revisions and promulgations of post adjustment and rental subsidy thresholds	9	24	9	24
10. Monthly (or bimonthly) revisions and promulgations of approximately 400 daily subsistence allowance rates	9	24	9	24
11. Salaries and allowances booklet	1	1	1	1
12. Post adjustment booklet	2	2	2	2
13. Guide to mobility and hardship scheme and related arrangements	1	1	1	1
14. Information on danger pay locations	1	1	1	1
15. Rest and recuperation framework	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: advice to the United Nations Appeals Tribunal and the International Labour Organization Administrative Tribunal on specific areas relating to human resources management; research papers on specific issues raised by Member States, organizations and staff representatives (restricted documents of the Commission); and information meetings with Member States and organizations outside the United Nations common system.				
E. Enabling deliverables				
Administration: International Civil Service Commission website; substantive documents for the Commission and the Advisory Committee on Post Adjustment Questions reports; and salary surveys and cost-of-living surveys for more than 60 field duty stations.				

B. Proposed post and non-post resource requirements for 2025

Overview

31.22 The proposed jointly financed administrative resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 31.6 to 31.8.

Table 31.6

Overall: evolution of financial resources by object of expenditure (jointly financed)

(Thousands of United States dollars)

Object of expenditure	2023 expenditure	2024 approved	Changes				2025 estimate (before recosting)

Total	47	–	–	–	–	47

- 31.23 Additional details on the distribution of the proposed resources for 2025 are reflected in table 31.10 and figure 31.I.
- 31.24 As shown in table 31.6, the overall resources proposed for 2025 amount to \$13,041,000 before recosting, reflecting a net increase of \$245,300 (or 1.9 per cent) compared with the approved budget for 2024. Resource changes result from technical adjustments. The proposed level of resources provides for the full, efficient and effective implementation of mandates.
- 31.25 In accordance with article 21 of the statute of the Commission, the budget estimates have been established after consultation with the Finance and Budget Network of the High-level Committee on Management of the United Nations System Chief Executives Board for Coordination. In March 2024, the Network reviewed and took note of the budget proposed by the Commission for 2025, expressing concern about the level of resources proposed for travel of staff and travel of representatives, and the modalities for the Commission’s in-person meetings, which have a multiplier effect on the cost for the other United Nations system entities whose representatives are required to travel to attend the meetings and which are encouraged to include in future budget proposals practices and approaches that would lead to future efficiencies. The proposed resources for 2025 that are presented in the present budget fascicle are as proposed by the Commission. The review by the Network was based on the principles that: (a) budgets were expected to reflect the new ways of working and the commitment of the United Nations system to the Greening the Blue initiative and to the Sustainable Development Goals, resulting in a decrease in the proposed provisions for travel and other budget lines, compared with pre-pandemic baselines; (b) the vast majority of United Nations system entities are subject to declining budgets, and all providers of jointly funded activities are strongly encouraged to seek to curtail or reduce discretionary spending; and (c) the views of the relevant inter-agency bodies (i.e. the Human Resources Network for ICSC and the Inter-Agency Security Management Network for the United Nations security management system) that are responsible for the review and technical assessment of the budget proposals should guide the Network during its review process.

Section 31 **Jointly financed administrative activities**

- 31.26 As shown in table 31.10, resource changes result from technical adjustments. The increase of \$245,300 under posts reflects the higher provision for two posts (P-4) established in 2024, pursuant to General Assembly resolution 78/252, which were subject to a 50 per cent vacancy rate in accordance with the established practice for the costing of new posts.
- 31.27 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, ICSC is integrating environmental management practices into its operations. In 2025, the Commission will continue its online repository, where most of its survey materials are deposited, and continue to encourage meeting participants to gain access to documents online, and where not possible, documents have been emailed to meeting participants. Furthermore, with the use of Microsoft Teams, documents are shared with participants without the need to print hard copies. This has significantly reduced the number of documents printed and mailed.
- 31.28 Information on the timely submission of documentation and advance booking for air travel is reflected in table 31.9. The lower travel compliance rate was due to last-minute requests from organizations for the Commission to participate in meetings and training and late decisions by Commission members to attend meetings owing to their own obligations, as well as late visa approval for some Commission members. The Commission is faced with difficulty when staff and members of the Commission are invited to meetings on very short notice to discuss issues affecting staff in the United Nations common system. In 2023, the Commission submitted all its documents within the prescribed timelines.

Table 31.9
Compliance rate
(Percentage)

	2021 actual	2022 actual	2023 actual	2024 planned	2025 planned
Timely submission of documentation	100	97	100	100	100

Grants and contributions	4 591.7	4 896.1	63.8	–	–	63.8	1.3	4 959.9
Total	4 591.7	4 896.1	63.8	–	–	63.8	1.3	4 959.9

31.29 The proposed regular budget resources for 2025 amount to \$4,959,900, and reflect a net increase of \$63,800 (or 1.3 per cent) compared with the approved budget for 2024. As shown in table 31.11, resource changes result from technical adjustments, reflecting: (a) the increase due to the United Nations Secretariat share (\$93,300) of the technical adjustment under jointly funded resources (\$245,300) based on the Secretariat share of the budget of ICSC of 38.0 per cent for 2025, as determined by CEB in accordance with the established methodology; partly offset by (b) a decrease in the United Nations Secretariat share (\$29,500) of the budget of ICSC, from 38.3 per cent for 2024 to 38.0 per cent for 2025.

II. Joint Inspection Unit

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 31.30 The Joint Inspection Unit is mandated, through its statute, as contained in General Assembly resolution 31/192, to review matters bearing on the efficiency of services and the proper use of funds and to provide an independent view aimed at improving management and methods and at achieving greater coordination among the organizations of the United Nations system. The Unit performs inspections and evaluations and issues reports, notes and management letters in which it identifies best practices, proposes benchmarks and facilitates information-sharing among all the organizations of the United Nations system that have adopted its statute.

Programme of work

Objective

- 31.31 The objective, to which the Joint Inspection Unit contributes, is to improve the efficiency, effectiveness and coordination of the United Nations system.

Strategy and external factors for 2025

- 31.32 To contribute to the objective, the Joint Inspection Unit will:
- (a) Ensure that its programme of work includes system-wide reviews in the identified main thematic areas: accountability and oversight functions and systems; management and administration practices; the implementation of policies, strategies and programmes, as well as coordination and collaboration on the realization of internationally agreed development goals, such as the Sustainable Development Goals; and governance arrangements and mechanisms, as well as inter-agency coordination;
 - (b) Undertake system-wide reviews of the management and administration practices and methods of the organizations of the United Nations system in the areas of human and financial resources, administration, results-based management, strategic planning and management, change management, risk management, security and safety and information technology;
 - (c) Focus on system-wide issues that can be assessed across all or multiple organizations in conducting its reviews;
 - (d) Develop and implement effective platforms for the sharing of good practices and knowledge in the various thematic areas of the work of the Unit;
 - (e) Analyse the acceptance and implementation of the Unit's recommendations to establish how rates of acceptance and implementation can be improved and how consideration of the Unit's reports by legislative organs can be more effective.
- 31.33 The above-mentioned work is expected to result in:
- (a) Better information for legislative body decision-making;
 - (b) Improved efficiency and effectiveness of the organizations of the United Nations system;
 - (c) Improved coordination and collaboration of the organizations of the United Nations system.

- 31.34 With regard to the external factors, the overall plan for 2025 is based on the planning assumption that participating organizations fully cooperate with the reviews of the Joint Inspection Unit and that recommendations are accepted and implemented.
- 31.35 With regard to coordination and cooperation within the United Nations system, the Unit will continue its engagement in various forums, including with the Board of Auditors, the Office of Internal Oversight Services and the audit and oversight committees of participating organizations. The engagement of a broad range of actors, including those beyond the traditional inspection sphere, is critical to mobilizing effective responses and pursuing solutions to improve business processes. This means the continued strengthening of existing partnerships with independent internal oversight entities and oversight committees in participating organizations, but also pursuing new ones that can help to foster innovative approaches. The Unit will pursue measures to continue to promote an integrated approach to support the implementation of the recommendations included in its reports.
- 31.36 The Joint Inspection Unit integrates a gender perspective in its operational activities, deliverables and results, as appropriate. The Unit will continue to examine and report on the gender policies and practices of organizations that it has identified for its management and administration reviews.
- 31.37 In line with the United Nations Disability Inclusion Strategy, the Joint Inspection Unit will also continue to accelerate the effective mainstreaming of disability inclusion, including mitigating measures to overcome any challenges while operationalizing disability inclusion.

Programme performance in 2023

More timely responses from participating organizations to requests by the Joint Inspection Unit through improved planning

- 31.38 Following its engagement with participating organizations in the biennial meeting of Joint Inspection Unit focal points in 2023, the Unit responded to widely held views expressed by participating organizations that greater assistance with planning was required for their involvement in the Unit’s reviews. The participating organizations’ expectation of support from the Unit was met with the immediate implementation of a mechanism that would provide transparency and visibility to requests from the Unit and organizations in planning for the multiple requests from the Unit. The Unit developed and applied a two-month activity forecast for participating organizations every month and instituted monthly review by Inspectors of key milestones for each review to ensure progress according to plan. In addition, all monthly meetings of the Inspectors include a standing agenda item for scrutiny of the status of the key milestones of each review in the programme of work.
- 31.39 Progress towards the objective is presented in the performance measure below (see table 31.12).

Table 31.12
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
–	–	Positive feedback from participating organizations on the mechanisms put in place for transparency and visibility and more timely responses from participating organizations to requests by the Joint Inspection Unit

Planned results for 2025

Result 1: increased acceptance of Joint Inspection Unit recommendations

Programme performance in 2023 and target for 2025

- 31.40 The Unit’s work contributed to 77 per cent of recommendations being accepted, which exceeded the planned target of 76 per cent.
- 31.41 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 31.II).

Figure 31.II

Performance measure: rate of acceptance of Joint Inspection Unit recommendations by participating organizations

(Percentage)

Result 2: timely availability of reviews to enable appropriate action by participating organizations to implement recommendations

Programme performance in 2023 and target for 2025

- 31.42 The Unit’s work contributed to 88 per cent, which did not meet the planned target of 100 per cent. The target was not met owing to one review being delayed as priority shifted to finalizing document processing and editorial clearances for a previous review that was completed in 2022.
- 31.43 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 31.III).

Figure 31.III
Performance measure: availability of reviews carried over from the previous year (annual)

(Percentage)

Result 3: enhanced management of administrative and programmatic issues by organizations of the United Nations system through the implementation by the Joint Inspection Unit of strategic and operational recommendations

- 31.44 The Joint Inspection Unit is committed to responding to requests from participating organizations and legislative organs or governing bodies and to making continuous efforts to enhance its effectiveness and to improve the added value, efficiency and quality of the Unit's work with regard to the priorities of legislative bodies and organizations of the United Nations system. The Unit undertook an assessment of the current situation from both strategic and operational perspectives. The self-assessment of the programme was completed in 2022 and produced recommendations which the Inspectors have undertaken to implement over successive years. Of the 48 recommendations, the Unit fully implemented 10 recommendations in 2023 and will implement the remaining recommendations in 2024 and 2025 to address the changes in a prioritized manner.

Lessons learned and planned change

- 31.45 The lesson for the Joint Inspection Unit was that there was a need for procedures for providing further elaboration in the programme of work document to address recommendations from the self-assessment. In applying the lesson, the Unit will include additional information in the programme of work, including the source of projects, the criteria against which decisions were made and how selected topics fit with the Unit's strategic framework, and set a target for the number of reports issued in the year to address the participating organizations' expectations and their planned participation in the Unit's reviews.
- 31.46 Expected progress towards the objective is presented in the performance measure below (see table 31.13).

Table 31.13
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Improved usefulness and impact of Joint Inspection Unit reports for organizations of the United Nations system through more efficient and enhanced data collection and data analytics	Improved usefulness and impact of the Unit’s reports for organizations of the United Nations system through improved formulation of recommendations that would better identify the required elements (i.e. what, by whom, when and for what result/impact)	Improved usefulness and impact of the Unit’s reports for organizations of the United Nations system through outreach and communications to ensure that the results of its reports are disseminated across the United Nations system organizations and to Member States

Legislative mandates

31.47 The list below provides all mandates entrusted to the Joint Inspection Unit.

General Assembly resolutions

31/192 Statute of the Joint Inspection Unit 73/287; 75/270; 76/261 Joint Inspection Unit

Deliverables

31.48 Table 31.14 lists all deliverables of the Joint Inspection Unit.

Total	32	–	–	–	–	32

^a Includes 11 temporary posts for inspectors at the D-2 level.

31.50 Additional details on the distribution of the proposed resources for 2025 are reflected in table 31.19 and figure 31.IV.

31.51 As shown in table 31.15 the overall resources proposed for 2025 amount to \$8,944,800 before recosting, reflecting a net increase of \$217,300 (or 2.5 per cent) compared with the approved budget for 2024. Resource changes result from technical adjustments and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

31.52 In accordance with article 20 of the statute of the Joint Inspection Unit, the budget estimates have been established after consultation with the Finance and Budget Network of the High-level Committee on Management of the United Nations System Chief Executives Board for Coordination. In March 2024, the Network reviewed the budget proposed by the Unit for 2025 and took note of it, expressing support for the plan to update the web-based tracking system and welcoming the intention of the Unit’s secretariat to continue to focus on finding optimal ways of working that would lead to efficiencies with respect to travel requirements. The proposed resources for 2025 that are presented in the present budget fascicle are as proposed by the Unit. The review by the Network was based on the principles outlined in paragraph 31.25 above.

31.53 As shown in table 31.19, resource changes result from technical adjustments and other changes, as follows:

Technical adjustments: The increase of \$103,400 under posts reflects the higher provision for one P-3 post established in 2024 pursuant to General Assembly resolution [78/252](#), which was subject to a 50 per cent vacancy rate in accordance with the established practice for the costing of new posts;

Other changes: The increase of \$113,900 under non-post reflects the non-recurrent development costs (\$140,400) to replace the web-based-tracking system used by the Unit and its participating organizations to monitor the implementation of its recommendations, and the purchase of a new conferencing system (\$12,400) to replace an obsolete unit, as well as increased data-processing services under contractual services (\$1,600), offset in part by reduced requirements under other staff costs (\$21,800), travel of staff (\$3,200), general operating expenses (\$7,900) and supplies and materials (\$7,600) due to concerted efforts by the Unit to find efficiencies under operational costs.

31.54 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), the Joint Inspection Unit will continue to reduce its carbon footprint by reducing the quantity of documentation printed, as well as by limiting travel and maximizing the use of possible alternatives to face-to-face meetings, whenever feasible.

31.55 Information on the timely submission of documentation and advance booking for air travel is reflected in table 31.18. The Joint Inspection Unit requires that, for each of its review projects, a travel plan be submitted to facilitate the advance purchase of the related air tickets. Better advance

Part X Jointly financed administrative activities and special expenses

planning has enabled the Joint Inspection Unit to be almost fully compliant with the target requiring air tickets to be purchased at least two weeks in advance of travel, thus contributing to lower travel costs. In 2023, the Unit continued to submit all its documents within the prescribed timelines.

Table 31.18
Compliance rate
(Percentage)

	2021 actual	2022 actual	2023 actual	2024 planned	2025 planned

Total	2 612.4	2 397.1	(31.4)	–	30.5	(0.9)	0.0	2 396.2

31.56 The proposed regular budget requirements for 2025 amount to \$2,396,200 and reflect a net decrease of \$900 (or 0.04 per cent) compared with the approved budget for 2024. As reflected in table 31.20, resource changes result from technical adjustments and other changes, as follows:

Technical adjustments: A net decrease of \$31,400, reflecting: (a) a decrease in the United Nations Secretariat share of the budget of the Joint Inspection Unit, from 27.5 per cent for 2024 to 26.8 per cent for 2025 (\$59,100), as determined by CEB in accordance with the established methodology; partly offset by (b) an increase due to the technical adjustments under the full jointly financed budget (\$103,400), based on the Secretariat share of the budget of the Unit of 26.8 per cent for 2025;

Other changes: An increase of \$30,500, reflecting the United Nations Secretariat share for 2025 of the proposed increase in jointly funded resources of \$113,900, based on the Secretariat share of the budget of the Unit of 26.8 per cent for 2025.

III. United Nations System Chief Executives Board for Coordination

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 31.57 CEB, composed of the Secretary-General and the executive heads of the organizations of the United Nations system, is responsible for promoting coherence, cooperation and coordination in the policies, programmes and activities of the organizations of the United Nations system in accordance with their mandates and in response to the decisions of intergovernmental bodies. The mandate of CEB derives from the priorities established in relevant General Assembly and Economic and Social Council resolutions and decisions, including Council resolution 13 (III) and decision 2001/321. At a time when the international community is confronted by increasingly complex and interrelated global challenges, coordinated and coherent action by the entities of the United Nations system is imperative. Mobilizing the system's collective capacity is vital to supporting the broad, integrated and accelerated implementation of the 2030 Agenda for Sustainable Development by Member States and the full range of mandates entrusted to United Nations system entities.

Programme of work

Objective

- 31.58 The objective, to which CEB contributes, is to leverage the collective capacity of the organizations of the United Nations system for the effective delivery of mandates.

Strategy and external factors for 2025

- 31.59 To contribute to the objective, CEB will:
- (a) Provide the means for senior leaders of the United Nations system to establish a shared vision, agree on strategic action, pursue policy coherence in both programmatic and administrative areas and coordinate the use of resources, capacities and knowledge;
 - (b) Provide vision and leadership to guide the effective and coherent implementation of mandates by United Nations system organizations;
 - (c) Through its High-level Committee on Programmes:
 - (i) Foster strategic system-wide policy coherence and programme coordination in response to intergovernmental mandates and in support of internationally agreed development goals;
 - (ii) Develop shared strategies, approaches and frameworks to address emerging policy and programme issues requiring system-wide action;
 - (d) Through its High-level Committee on Management:
 - (i) Foster the development of innovative approaches to improve efficiency and simplify business practices and accelerate the harmonization, mutual recognition and integration of business operations, as well as encourage a coordinated approach to multilingualism across CEB member organizations and uphold the commitment to prevent and respond to sexual harassment throughout the United Nations system;

- (ii) Utilize its functional networks on finance and budget, human resources, digitization and technology, procurement and safety and security to disseminate and, where applicable, mutually recognize best practices, innovative management approaches and partnerships in all areas of management and to collect and publish comprehensive system-wide financial and human resources data.
- 31.60 The above-mentioned work is expected to result in:
- (a) Accelerated progress towards the broad and integrated implementation of the 2030 Agenda by Member States and the full range of mandates entrusted to United Nations system entities, including the follow-up to and implementation of any agreed outcomes from the Summit of the Future;
 - (b) A more coherent, coordinated and efficient United Nations system response to global challenges, such as setbacks to sustainable development, inequalities, threats to human rights, climate change and risks of new and emerging technologies;
 - (c) Greater capacity of United Nations system organizations to provide effective management responses that drive systemic change in support of the delivery of mandates, through a focus on providing better data, analysis and communications; innovation and digital transformation; strategic foresight; stronger results orientation; and a work culture that simplifies and encourages collaboration;
 - (d) Improved analytical quality of United Nations system-wide comprehensive, comparable financial and human resources data, evidence-based advancement of the ongoing ICSC comprehensive compensation review and enhanced transparency and accountability regarding system-wide financial flows.
- 31.61 With regard to the external factors, the overall plan for 2025 is based on the planning assumption that member organizations commit themselves and make timely contributions to the issues addressed by CEB.
- 31.62 CEB integrates a gender perspective in its activities, deliverables and results, as appropriate, including in the products of its high-level committees, such as system-wide strategies. The CEB annual human resources statistics will continue to present data on personnel of the United Nations system by category, grade and gender, helping to systematically track gender representation across the system. The CEB secretariat will continue to collaborate with the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) on the implementation of a common methodology for tracking the financial contribution of United Nations activities to gender equality and the empowerment of women. In addition, the High-level Committee on Programmes will continue to address inequalities, including gender equality and women's empowerment, and efforts to strengthen the United Nations system's impact on Sustainable Development Goals 5 and 10 in a coordinated, coherent and complementary manner.
- 31.63 In line with the United Nations Disability Inclusion Strategy, the CEB High-level Committee on Management will continue to accelerate disability inclusion within organizations' internal operations through the activities of its cross-functional networks.

Programme performance in 2023

Establishment of common principles to help advance intergenerational solidarity for the benefit of present and future generations

- 31.64 Intergenerational equity involves a recognition of the importance of thinking, planning and acting for the long term. Building on the long-standing commitment of the United Nations to future generations, the High-level Committee on Programmes established a Core Group on Duties to the Future in 2022 to explore how to operationalize the concepts of intergenerational equity and solidarity within the United Nations system. A discussion paper, "Duties to the future through an intergenerational equity lens", led to an improved understanding of the concepts, opportunities and

challenges and the role of the United Nations system in this area. In 2023, the Core Group developed, through a consultative inter-agency process, the United Nations System Common Principles on Future Generations (CEB/2023/1/Add.1). The CEB-endorsed Common Principles have been complemented by a set of frequently asked questions to support their operationalization across United Nations system planning and programming.

31.65 Progress towards the objective is presented in the performance measure below (see table 31.21).

Table 31.21
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	–	Agreement across the United Nations system on common principles to help advance intergenerational solidarity and greater clarity on terminology

Planned results for 2025

Result 1: a more coherent and modern United Nations system approach for timely, relevant and open data

Programme performance in 2023 and target for 2025

31.66 The CEB secretariat’s work contributed to strengthened coherence and integration in the production of data and statistics through its support for the implementation of the System-wide Road Map for Innovating United Nations Data and Statistics (CEB/2020/1/Add.1), including progress towards the modernization of the United Nations data portal,¹ which promotes improved interoperability of statistical data and benefits from inter-agency cooperation and integration, inter alia, through the joint custodianship of data, which met the planned target.

31.67 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 31.22).

Table 31.22
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
A few significant United Nations system policy initiatives, such as the predictive analytics pilot in the Sahel and the United Nations system contribution on “Beyond GDP”, leverage United Nations statistical community expertise	Additional United Nations system policy initiatives leverage United Nations statistical community expertise, such as the technical and analytical support for efforts to advance beyond gross domestic product (GDP), and	Strengthened coherence and integration in the production of data and statistics	The United Nations statistical community becomes increasingly proactive and takes a leadership role in select United Nations system policy initiatives	The United Nations statistical community increasingly anticipates and meets the data and statistics needs of the United Nations system in an integrated and coordinated manner

	analysis of international data governance approaches and platforms to enable the use of global public good data			

Result 2: mutual recognition as an enabler of management reform across the United Nations system

Programme performance in 2023 and target for 2025

- 31.68 The CEB secretariat’s work contributed to progress in addressing bottlenecks in the application of mutual recognition principles through improved awareness and operationalization of management guidance, which met the planned target.
- 31.69 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 31.23).

Table 31.23
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Several inter-agency initiatives that leverage mutual recognition of best practices established or scaled up	Successful cases of and best practices on mutual recognition identified Strategy established to address obstacles to the operationalization of mutual recognition	Bottlenecks in the application of mutual recognition principles addressed through improved awareness and operationalization of management guidance	Additional inter-agency initiatives that employ mutual recognition	Mainstreaming of shared services enabled by the application of the mutual recognition principle

Result 3: United Nations Digital ID, a building block in enabling interoperability across United Nations organizations

Proposed programme plan for 2025

- 31.70 The United Nations Digital ID initiative is intended to address data fragmentation and transportability across United Nations organizations and to simplify and streamline processes and transactions across all business functions. At its core, the Digital ID is aimed at providing a universal and easy-to-use system-wide identity for all United Nations personnel that can be used from onboarding to retirement. Following the launch by the High-level Committee on Management in 2021, project governance was established, 17 use cases for United Nations Digital ID were identified, and to date six sponsoring organizations have committed to the initiative. The initiative has also led to the development of business requirements, technical specifications branding and a logo. The first use case was focused on separation, allowing staff members to share correct and updated information with the United Nations Joint Staff Pension Fund before they retire. Since then, each sponsoring organization has committed to the go-live timeline in 2024, in line with their internal change and transformation initiatives. The aim is to deliver a first product that can be easily scaled to more organizations and use cases across the United Nations system.

Lessons learned and planned change

- 31.71 The lesson for the CEB secretariat was that multiple and separate identifications exist for the same United Nations staff across different organizations, and time is invested in sharing and verifying human resources and other data between United Nations system entities. In applying the lesson, the initiative will create a universal digital wallet to enable personnel to easily and securely access human resources, medical, pension and other information. It will simplify data-sharing across organizations, reduce duplicate personnel records and streamline personnel movements between United Nations system organizations.
- 31.72 Expected progress towards the objective is presented in the performance measure below (see table 31.24).

Table 31.24
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
–	–	–	Go-live of first use case, focused on maintaining updated human resources and financial data to enable pension benefit calculation by the pension fund for selected sponsoring organizations	The Digital ID available for other use cases and in use in more United Nations organizations which enables efficient data transfer and collaboration across United Nations system organizations

Legislative mandates

- 31.73 The list below provides all mandates entrusted to CEB.

General Assembly resolutions

64/289	System-wide coherence	75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)	78/244	Programme planning

Economic and Social Council resolutions and decisions

13 (III)	Coordination Committee	2001/321	Further consideration of the annual overview review report of the Administrative Committee on Coordination
--------------------------	------------------------	----------	--

Deliverables

- 31.74 Table 31.25 lists all deliverables of CEB.

Table 31.25
Deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>

9. Reports on United Nations system financial, human resources and procurement statistics	3	3	3	3
10. Compilations and analyses of best practices in the areas of human resources, procurement, information technologies and finance and budget	3	3	3	3
C. Substantive deliverables				
Databases and substantive digital materials: United Nations system annual financial and human resources statistics (from approximately 40 reporting entities) available to all Member States and other stakeholders.				
D. Communication deliverables				
Digital platforms and multimedia content: CEB website accessible by all Member States and other stakeholders.				
E. Enabling deliverables				
Administration: summary of deliberations of two regular sessions (each) of CEB, the High-level Committee on Programmes and the High-level Committee on Management; reports for meetings of ICSC on common positions of the United Nations system relating to conditions of service; biannual promulgation of rates for freelance interpreters and translators; accounting guidance and system-wide support papers to United Nations entities; secretariat support for meetings of CEB, the High-level Committee on Programmes and the High-level Committee on Management; secretariat support for the Task Force on Accounting Standards, ad hoc inter-agency taskforce arrangements and United Nations representation at meetings of the Board of the International Public Sector Accounting Standards; maintenance of data management portal for the collection of data for the entire United Nations system on human resources and financial data (annual collection from approximately 40 entities); and annual headcount of United Nations system field staff.				

B. Proposed post and non-post resource requirements for 2025

Overview

31.75 The proposed jointly financed administrative resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 31.26 to 31.28.

Table 31.26

Total	15	–	–	–	–	15

- 31.76 Additional details on the distribution of the proposed resources for 2025 are reflected in table 31.30 and figure 31.V.
- 31.77 As shown in table 31.26, the overall resources proposed for 2025 amount to \$4,489,900 before recosting, reflecting a net increase of \$155,300 (or 3.6 per cent) compared with the approved budget for 2024. Resource changes result from other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.
- 31.78 As the activities of the CEB secretariat are jointly funded by agencies, funds and programmes of the United Nations common system, the budget estimates have been established after consultation with the Finance and Budget Network of the High-level Committee on Management of the United Nations System Chief Executives Board for Coordination. In March 2024, the Network reviewed the budget proposed by the CEB Secretariat (including the IPSAS Task Force) for 2025 and took note of it, expressing support for the requirements related to the CEB Secretariat data initiatives and noting the additional requirement for a temporary P-3 position. The proposed resources for 2025 that are presented in the present budget fascicle are as proposed by CEB. The review by the Network was based on the principles outlined in paragraph 31.62 above.
- 31.79 As shown in table 31.30, resource changes result from other changes, as follows:
- (a) The increase of \$25,700 under posts related to the proposed upward reclassification of a post of Administrative Assistant (General Service (Other level)) to a post of Senior Administrative Assistant (General Service (Principal level)) to strengthen support in CEB data analytics and data management capacity. Additional details are provided in annex II;
 - (b) The increase of \$129,600 under other staff costs relates to a temporary position (P-3) of Programme Officer to support the expansion of regular and ad hoc United Nations system-wide data collection and analysis, as requested by CEB member organizations, in order to advance evidence-based decision-making, in particular in the area of human resources, in conjunction with the ongoing ICSC comprehensive assessment and review of the compensation package for the United Nations common system.
- 31.80 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, CEB is integrating environmental management practices into its operations. In 2025, in line with the Strategy for Sustainability Management in the United Nations System, 2020–2030, the CEB secretariat will continue to ensure that all meetings that it supports are single-use-plastic-free and paper-free to reduce waste and cut carbon emissions, as well to promote an eco-friendly culture.
- 31.81 Information on the timely submission of documentation and advance booking for air travel is reflected in table 31.29. The CEB secretariat will continue to track compliance, including through the use of the travel compliance dashboard. The CEB secretariat continues to make efforts to raise awareness of the staff and managers of the requirement and has encouraged advance planning and

Part X Jointly financed administrative activities and special expenses

nomination of travelling staff to meetings and conferences, whenever possible. In 2023, the CEB continued to submit all its documents within the prescribed timelines.

Total	1 296.1	1 318.6	(20.2)	–	46.5	26.3	1.9	1 344.9

31.82 The proposed regular budget resources for 2025 amount to \$1,344,900 and reflect a net increase of \$26,300 (or 1.9 per cent) compared with the approved budget for 2024. As reflected in table 31.31, resource changes result from technical adjustments and other changes, as follows:

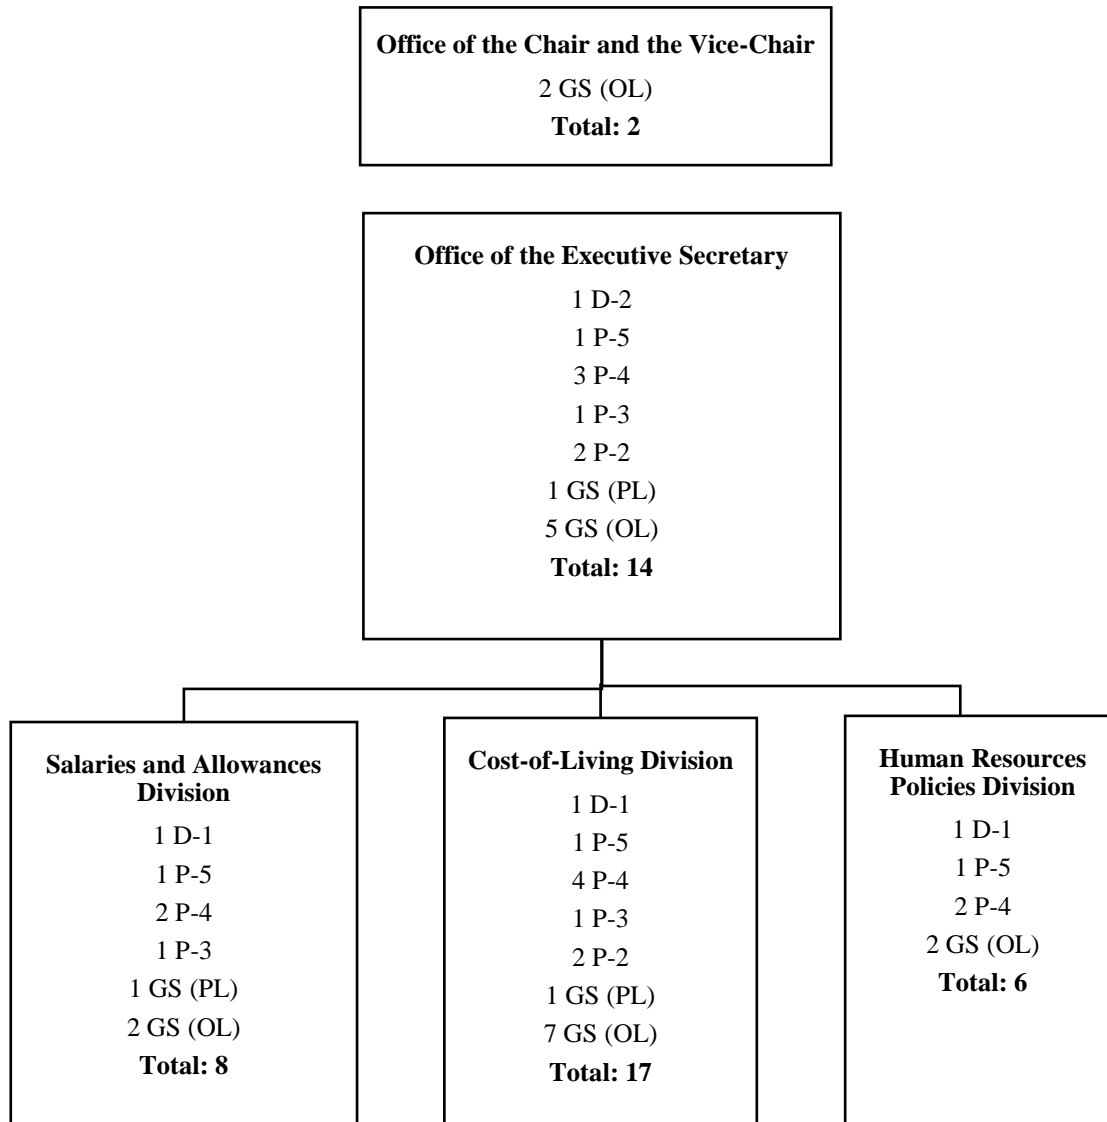

Technical adjustments: A decrease of \$20,200 in the United Nations Secretariat share of the budget of the CEB secretariat from 30.4 per cent for 2024 to 29.9 per cent for 2025, as determined by CEB in accordance with the established methodology;

Other changes: An increase of \$46,500, reflecting the United Nations Secretariat share for 2025 of the proposed increase in jointly funded resources of \$155,300, based on the United Nations Secretariat share of the budget of the CEB secretariat of 29.9 per cent for 2025.

Annex II

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Chief Executives Board	1 (1)	GS (PL) GS (OL)	Reclassification of 1 GS (OL) Administrative Assistant to 1 GS (PL) Senior Administrative Assistant	The proposed upward reclassification reflects new and additional higher-level functions and responsibilities relating to the need to strengthen support (from both administrative and substantive perspectives) to the CEB data analytics and data management capacity. The proposed reclassification would in particular facilitate the expansion of the CEB system-wide financial and human resources statistics, a large and highly complex data initiative.

Abbreviations: CEB, United Nations System Chief Executives Board for Coordination; GS (OL), General Service (Other level); GS (PL), General Service (Principal level).

Annex III

Summary of information on the cost-sharing methodology applied in establishing the United Nations share of jointly financed activities

1. The methodology applied since 1974 in respect of the cost-sharing of the International Civil Service Commission (ICSC) budget is based on the “Consultative Committee on Administrative Questions formula”, which apportions the ICSC costs on the basis of the number of staff, as contained in the personnel statistics published by the United Nations System Chief Executives Board for Coordination (CEB) secretariat. The United Nations share of the costs also includes the shares for the United Nations Relief and Works Agency for Palestine Refugees in the Near East and the Office of the United Nations High Commissioner for Refugees, on the basis of the decision by the General Assembly that the costs relating to these two entities are funded from the regular budget of the United Nations.
2. The methodology applied since 1996–1997 for the cost-sharing of the Joint Inspection Unit budget is derived from the expenditure reported in the audited accounts of the participating organizations, excluding:
 - (a) Expenditure relating to peacekeeping;
 - (b) Expenditure in kind, including the value of donated commodities;
 - (c) A total of 50 per cent of the expenditure of the International Trade Centre corresponding to the share of the World Trade Organization, on the principle that the regular budget of the Centre is funded in equal parts by the United Nations and the World Trade Organization, which does not participate in the work of the Joint Inspection Unit.
3. The methodology applied since 2006 for the cost-sharing of the CEB secretariat’s budget is based on 50 per cent of staff, in accordance with the more recently available personnel statistics, and 50 per cent of total expenditure, in accordance with the more recently available audited financial statements, minus expenditure in kind, excluding expenditure relating to peacekeeping operations.
4. The methodology applied for the cost-sharing of the system-wide International Public Sector Accounting Standards budget is based on the same cost-sharing formula used to apportion the budget of the CEB secretariat, with the exclusion of the International Fund for Agricultural Development, which is not an active member in the International Public Sector Accounting Standards project.

Annex IV

Overview of financial and post resources

The jointly financed budgets of the International Civil Service Commission and the Joint Inspection Unit, as presented in the present fascicle, are for General Assembly consideration and approval, including the United Nations share. The jointly financed budget of United Nations System Chief Executives Board for Coordination is presented for information purposes, while its United Nations share is presented for approval.

* [A/79/50](#).

** In keeping with paragraph 10 of General Assembly resolution [77/267](#), the part consisting of the post and non-post requirements (part III) is submitted through the Advisory Committee on Administrative and Budgetary Questions for the consideration of the General Assembly.

Proposed post and non-post resource requirements for 2025

Overview

- 32.1 Under section 32, Special expenses, resources are provided to cover specific expenditure requirements for: (a) contributions to after-service health insurance; (b) compensatory payments; (c) general insurance charges; (d) bank charges; and (e) pension payments to former Secretaries-General. The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in table 32.1.

Table 32.1

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2023 expenditure	2024 approved	Changes					2025 estimate (before recosting)
			Technical adjustments	New/expanded mandates	Other	Total	Percentage	
Posts	13.0	–	–	–	–	–	–	–
Other staff costs	80 258.7	84 702.8	–	–	–	–	–	84 702.8
Non-staff compensation	448.9	442.8	–	–	–	–	–	442.8
Consultants	48.8	206.2	–	–	(58.8)	(58.8)	(28.5)	147.4
Contractual services	5.9	8.3	–	–	–	–	–	8.3
General operating expenses	3 863.4	3 966.7	–	–	58.8	58.8	1.5	4 025.5
Other	(562.3)	–	–	–	–	–	–	–
Total	84 076.3	89 326.8	–	–	–	–	–	89 326.8

- 32.2 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 32.2 and 32.3 and figure 32.I.

- 32.3 As reflected in table 32.2 (1), the overall resources proposed for 2025 amount to \$89,326,800, before recosting, reflecting no change compared with the approved budget for 2024. Cost-neutral resource changes result from other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Thousands of United States dollars)

Explanation of variances by factor and component

Overall resource changes

Other changes

32.4 As reflected in table 32.2 (1), cost-neutral changes are proposed as follows:

- (a) **Contributions to after-service health insurance.** The decrease of \$58,800 under consultants takes into account the estimated consultancy requirements for 2025. The provision of \$147,400 for consultants would cover specialized consultancy services for the retiree drug subsidy programme and other after-service health insurance programme studies;
- (b) **General insurance.** The increase of \$113,200 relates to the estimated increase in the general liability insurance premium, attributable to the anticipated inclusion of the United Nations Development Corporation Building 2 (DC2) upon finalization of the lease agreement in 2024. In previous years, the United Nations Secretariat was self-insured and maintained a line of credit with a financial institution that gives access to funding should there be an incident that warrants a claim. With the upcoming renewal of the lease, it is expected that the terms of the new agreement would henceforth require that DC2 be covered by the general liability insurance policy;
- (c) **Bank charges.** The decrease of \$54,400 reflects actual expenditure experience. The provision of \$198,000 for 2025 is based on the average expenditure experience for 2022 and 2023, which amounted to \$197,900, and does not take into account gains on exchange rate, which is specific to a budget period.

Other assessed and extrabudgetary resources

- 32.5 As reflected in table 32.2 (2), other assessed resources amount to \$13,332,200. The resources would complement regular budget resources and provide for the requirements indicated in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2024 to 30 June 2025 ([A/78/746](#)).
- 32.6 As reflected in table 32.2 (3), the estimated extrabudgetary resources for contributions to after-service health insurance are estimated at \$7,010,000.

A. Contributions to after-service health insurance

- 32.7 The after-service health insurance programme extends health-care benefits under the United Nations insurance schemes to eligible retirees and their eligible dependants. Coverage is provided on a shared-contribution basis in accordance with a decision taken by the General Assembly at its twenty-first session. Coverage is also provided to staff members whose appointments are terminated as a result of disability. In all cases, coverage is available only to those who are eligible to receive a periodic benefit from the United Nations Joint Staff Pension Fund or under the rules governing compensation for service-incurred death, injury or illness. In accordance with Assembly resolution [38/235](#), the maximum cost-sharing ratio is 2 to 1 between the Organization and the participant.
- 32.8 By its resolution [40/258 A](#), the General Assembly decided to extend after-service health insurance coverage to former locally recruited staff who had participated in the medical expense assistance plan under appendix E to the Staff Rules of the United Nations.
- 32.9 By its resolution [61/264](#), the General Assembly approved changes to the after-service health insurance provisions for new staff members recruited on or after 1 July 2007. Under the terms of that resolution, following retirement, staff members are eligible for cost-sharing of after-service coverage if they have participated in a United Nations-system contributory health insurance plan for a minimum of 10 years at the time of retirement. Staff members recruited before 1 July 2007 who have participated in a United Nations contributory plan for at least 5 years are also eligible, provided that they pay the full premium for the period for which their participation falls short of the 10-year requirement for cost-shared participation.
- 32.10 The General Assembly, in its resolution [64/241](#), requested the Secretary-General to submit to it at its sixty-seventh session a report on managing after-service health insurance liabilities, bearing in mind that the pay-as-you-go principle was one of the viable options. The Assembly also requested the Secretary-General to continue to validate the accrued liabilities with the figures audited by the Board of Auditors and to include that information and the outcome of the validation in the requested report. The report of the Secretary-General on managing after-service health insurance liabilities ([A/68/353](#)) was submitted to the Assembly at its sixty-eighth session. The Assembly, in its resolution [68/244](#), endorsed the recommendation of the Advisory Committee on Administrative and Budgetary Questions on the continuation of the pay-as-you-go approach to the funding of the after-service health insurance liabilities. It also requested the Secretary-General to examine the option of broadening the mandate of the United Nations Joint Staff Pension Fund, to include the cost-effective, efficient and sustainable administration of after-service health insurance benefits, taking into account the advantages and disadvantages of that option, including its financial and legal implications, and to report thereon at the seventieth session of the Assembly, as well as to undertake a survey of current health-care plans for active and retired staff within the United Nations system, to explore options to increase efficiency and contain costs and to report thereon at its seventieth session. In his report on managing after-service health insurance ([A/73/662](#)), informed in large part by the work of the inter-agency Working Group on After-Service Health Insurance, the Secretary-General continued to apprise the Assembly of the work undertaken in response to its request. In its resolution on managing after-service health insurance (resolution [73/279 B](#)), the Assembly endorsed the recommendations contained in the report of the Advisory Committee ([A/73/792](#)), including that the Secretary-General further explore options for the improvement of efficiency and the containment of costs, including

Part X Jointly financed administrative activities and special expenses

liabilities associated with current and future staff, with a view to reducing the Organization’s expenditure on health insurance plans and its after-service health insurance obligations.

- 32.11 The report of the Secretary-General on managing after-service health insurance liabilities (A/76/373) was submitted to the General Assembly at its seventy-sixth session. In the report, the Secretary-General responded to the Assembly’s request and set out a comprehensive proposal on after-service health insurance funding.
- 32.12 The proposed regular budget resources for 2025 amount to \$82,997,700 and reflect a decrease of \$58,800 compared with the approved budget for 2024. The proposed change is explained in paragraph 32.4 above. Additional details on the distribution of the proposed resources for 2025 are reflected in table 32.4 and figure 32.II.

Table 32.4 Contributions to after-service health insurance: evolution of financial resources

Figure 32.II Contributions to after-service health insurance: distribution of proposed resources for 2025 (before recosting)

(Thousands of United States dollars)

B. Compensatory payments

- 32.13 The requirements under compensatory payments provide for compensation to members of commissions, committees or similar United Nations bodies in the event of death, injury or illness attributable to service with the United Nations. The responsibilities of the United Nations in this area, as well as the rules governing compensatory payments, are detailed in Secretary-General’s bulletin [ST/SGB/103/Rev.1](#).
- 32.14 Compensation is also provided to staff members or their dependants in the event of death, injury or illness attributable to the performance by the staff member of official duties on behalf of the United Nations. The compensation is governed by the specific rules under appendix D to the Staff Regulations and Rules of the United Nations ([ST/SGB/2018/1](#)).
- 32.15 The costs incurred on both those accounts may include monthly survivor benefits for life, monthly disability benefits for life, lump-sum indemnities for permanent disabilities, funeral expenses, sick leave credit and medical expenses.
- 32.16 The proposed regular budget resources for 2025 amount to \$1,852,500 and reflect no change compared with the approved budget for 2024. Additional details on the distribution of proposed resources for 2025 are reflected in table 32.5 and figure 32.III.

C. General insurance

- 32.17 The provisions under general insurance relate mainly to insurance on the buildings and property at Headquarters, as well as in Addis Ababa (Economic Commission for Africa), Santiago (Economic Commission for Latin America and the Caribbean) and Beirut (Economic and Social Commission for Western Asia). The United Nations Offices at Geneva, Vienna and Nairobi, as well as the Economic and Social Commission for Asia and the Pacific in Bangkok, separately maintain property and liability coverage for their offices locally. General insurance also covers automobile liability insurance at Headquarters, liability insurance for aircraft used for travel by the Secretary-General but not owned by the United Nations, and insurance for other air travel of staff. In addition, in accordance with General Assembly resolution 41/210, the United Nations has established a self-insurance plan for general liability risk in respect of acts occurring in the Headquarters district in New York. The provisions also cover a stand-alone insurance policy for acts of terrorism, which, following the events of 11 September 2001, was established effective 2003 as a result of limitations in the scope of insurance coverage for risks, such as acts of terrorism that would normally have been covered under the general policies.
- 32.18 The outreach initiatives continued to encourage additional markets to bid for coverage of risks to the United Nations. Some limitations in the scope of insurance coverage, however, continue to be prevalent. Two such examples are the flood coverage restrictions introduced in the wake of storm Sandy in New York and the continued requirement for specific insurance for acts of terrorism that were covered under the general policies before the events of 11 September 2001. Actual premiums will be driven by the United Nations claims experience for previous years, and by the general state of insurance markets at the time of the renewal of the policy. The damages sustained by the Economic and Social Commission for Western Asia (currently estimated at \$6 million) to its building and the contents thereof as a result of the explosion in Beirut on 4 August 2020 and other property losses continue to have an impact on the property insurance renewal premium. In addition to loss history, insurance premiums are also affected by market conditions and capacity, that is, the number of underwriters in the marketplace willing to insure the risk at the time of renewal, inflation and reinsurance costs. The insurance marketplace is constantly evolving on the basis of global economic conditions, natural and human-made disasters or regulatory requirements, and insurers' perception of specific risks relating to the United Nations.
- 32.19 The proposed regular budget resources for 2025 amount to \$3,835,800 and reflect an increase of \$113,200 compared with the approved budget for 2024. The proposed change is explained in paragraph 32.4 above. Additional details on the distribution of the proposed resources for 2025 are reflected in table 32.6 and figure 32.IV.

D. Bank charges

32.20 The bank charges include fees for account maintenance, electronic fund transfers and other banking services used by the United Nations.

32.21 The proposed regular budget resources for 2025 amount to \$198,000 and reflect a decrease of \$54,400 compared with the approved budget for 2024. The proposed change is explained in paragraph 32.4 above. Additional details on the distribution of the proposed resources for 2025 are reflected in table 32.7 and figure 32.V.

E. Pension payments to former Secretaries-General

- 32.22 This component covers the retirement allowances for a former Secretary-General and for the widows of two former Secretaries-General at the half rate on the basis of the maximum retirement benefit payable as from 1 February 2024.
- 32.23 The proposed regular budget resources for 2025 amount to \$442,800 and reflect no change compared with the approved budget for 2024. Additional details on the distribution of the proposed resources for 2025 are reflected in table 32.8 and figure 32.VI.

^a Monthly expenditure for after-service health insurance is charged on a pay-as-you-go basis to the regular budget and adjusted periodically at Headquarters on the basis of the actual expenditure for the corresponding months, with approximately 15 per cent apportioned to peacekeeping operations and 8 per cent to extrabudgetary resources.

^b December 2023 expenditure includes year-end adjustments.

^c Includes Medical Insurance Plan after-service health insurance participants who are now included in Umoja, starting in 2023.

Indicative estimates for the major construction projects in 2025	17

* A/79/50.

** In keeping with paragraph 10 of General Assembly resolution 77/267, the part consisting of the programme plan and programme performance information (part II) is submitted through the Committee for Programme and Coordination for the consideration of the Assembly.

Overview

- 33.1 The present section covers the resources to fund capital investment requirements for the construction, alteration, periodic maintenance and improvement of, and upgrades to, facilities, buildings, equipment and general infrastructure across the global United Nations Secretariat, including for safety and security, conferencing and information and communications technology (ICT). To ensure a coherent and systematic approach to capital expenditure requirements across the Organization, such resources are requested under the present section. Section 33 does not include requirements related to posts or staffing costs in connection with the administration and management of the projects and activities proposed in the present section; those costs are included under the respective sections of the proposed programme budget for 2025 for United Nations Headquarters, the United Nations Office at Geneva, the United Nations Office at Vienna, the United Nations Office at Nairobi, the Economic Commission for Latin America and the Caribbean (ECLAC), the Economic and Social Commission for Asia and the Pacific (ESCAP), the Economic Commission for Africa (ECA), the Economic and Social Commission for Western Asia (ESCWA), the United Nations Truce Supervision Organization (UNTSO) and the Office of the United Nations Special Coordinator for the Middle East Peace Process.
- 33.2 The resources proposed are in line with the International Public Sector Accounting Standards and encompass requirements for projects that result in an increase of the value of the asset and/or extend its useful life, including: (a) projects of a capital-intensive and of a structural nature that would substantially improve facilities or infrastructure; and (b) projects to repair, replace and/or upgrade existing installations (e.g. heating, ventilation, air conditioning, conferencing equipment, physical security equipment) along with the underlying infrastructure, hardware and other components or related systems required for their operation (e.g. electrical, information technology and other networks, associated hardware and systems). The proposed projects comprise both one-time projects and new and continuing multi-year projects. In addition, pursuant to the decision of the General Assembly in its resolution [77/263 A](#) and previous resolutions, the proposals under the present section include a provision for the annual repayments of the loans from the host country (Switzerland) to finance the strategic heritage plan of the United Nations Office at Geneva until the Assembly decides otherwise.
- 33.3 In accordance with General Assembly resolution [78/253](#) and previous resolutions, the Global Asset Management Policy Service (in the Field Operations Finance Division of the Office of Programme Planning, Finance and Budget in the Department of Management Strategy, Policy and Compliance) is responsible for the provision of guidance, support and technical advice to offices away from Headquarters and the regional commissions with regard to the planning, management and monitoring of capital investment projects related to major construction and renovation.
- 33.4 At Headquarters, the projects proposed to be funded under section 33 fall under the responsibility of the Department of Operational Support in respect of facilities, the Department of Safety and Security in respect of safety and security, and the Office of Information and Communications Technology in respect of enterprise technology networks. The administrative services in Geneva, Vienna and Nairobi and at the regional commissions are responsible for the implementation of the projects at their respective duty stations. In respect of conferencing equipment and systems, the Department for General Assembly and Conference Management is responsible for determining business requirements while the Office of Information and Communications Technology is responsible for the standardization and implementation of the projects.
- 33.5 With regard to safety and security, projects to upgrade and enhance capabilities for the protection of United Nations staff and premises globally are evaluated by, and subsequently implemented in close coordination with, the Department of Safety and Security to ensure optimal standardization, such as in the ongoing implementation of the multi-year access control project across the Secretariat.
- 33.6 With regard to information and telecommunications technology, the Office of Information and Communications Technology provides central leadership in the establishment and implementation of Organization-wide ICT strategy and standards in the modernization of information systems and

the improvement of information and communications technology services. The Office directs and oversees the operation and upgrade of the global ICT infrastructure at Headquarters, offices away from Headquarters and the regional commissions, including through regular reviews. In addition, the Office operates and maintains the infrastructure and equipment for conferencing services at Headquarters. Upgrades are implemented through annual projects to upgrade the enterprise networks. Such projects also serve to progressively standardize systems, including the related infrastructure and equipment, to ensure comparable standards of functionality, quality and reliability of the related services across the Organization, including in respect of telecommunications.

- 33.7 Pursuant to the submission of the reports of the Secretary-General on capital investment planning ([A/77/519](#), [A/78/536](#) and [A/78/536/Corr.1](#)), the Secretariat is currently working on an updated comprehensive plan for priority capital investments that will be required across the Organization in the years beyond 2025, to be submitted to the General Assembly at the main part of its seventy-ninth session. The report will include updated information on the priority implementation requirements identified through the capital investment planning programme of work from 2022 through 2024, including potential implementation schedules and related estimates of financial requirements. As directed by the Assembly, the related resource proposals will subsequently be formulated in the context of future relevant budget submissions, taking into account any guidance received from the Assembly. The resources proposed for 2025 under this section, as detailed below, are required for the continuation of existing multi-year projects that are linked to the programme of capital investments presented in the most recent capital investment planning report, and for urgent new projects to be implemented in 2025, which are not in the longer-term scope of the capital investment planning report.
- 33.8 In line with the request from the General Assembly, in its resolution [75/252](#), to include indicative estimates for the major construction projects in the proposed programme budget under section 33 for information purposes only, a table with the requested information related to those capital projects is provided in the annex. Such estimates may be revised in the progress reports for each project to reflect the implementation status and associated resource requests. As the estimates are provided for information purposes only, the resources for those projects, including for the corresponding project management teams under the respective budget sections other than section 33, are not proposed as part of the resources submitted herewith for section 33; in continuation of past practice, these resources will be requested in the context of the forthcoming annual progress reports of the Secretary-General to be submitted at the main part of the seventy-ninth session of the Assembly.

Proposed resource requirements for 2025

Overview of resources

- 33.9 The overall resources proposed for 2025 amount to \$45,030,400 before recosting, reflecting a net decrease of \$56,445,700 (or 54.2 per cent) compared with the appropriation for 2024. Resource changes result from two factors, as explained in paragraphs 33.10 and 33.11 below, namely: (a) technical adjustments (a decrease of \$71,428,400); and (b) other changes (an increase of \$14,982,700). The distribution of the proposed resources is reflected in table 33.1.

Abbreviations: DSS, Department of Safety and Security; UNOG, United Nations Office at Geneva; UNON, United Nations Office at Nairobi; UNOV, United Nations Office at Vienna; UNSCO, Office of the United Nations Special Coordinator for the Middle East Peace Process.

^a Includes an amount of \$2,856,900 for the annual repayment in 2025 of the loan related to the strategic heritage plan.

^b Indicative estimates for 2025 for the major construction projects are provided in the annex for information purposes only.

Technical adjustments

- 33.10 Resource changes reflecting a decrease of \$71,428,400 are due to the removal of non-recurrent requirements for the projects approved for 2024 by the General Assembly in its resolution [78/253](#), namely: (a) the strategic heritage plan of the United Nations Office at Geneva (\$24,776,200); (b) the replacement of office blocks A to J at the United Nations Office at Nairobi (\$14,107,700); (c) the renovation of the conference service facilities at the United Nations Office at Nairobi (\$9,837,000); (d) the seismic mitigation retrofit and life-cycle replacements project at ESCAP premises, in Bangkok (\$987,700); (e) the renovation of the North Building at ECLAC, in Santiago (\$9,622,600); and (f) the renovation of Africa Hall at ECA (\$12,097,200). Where necessary, the resources for those projects for 2025 will be requested in the forthcoming related progress reports of the Secretary-General, which will be submitted for consideration during the main part of the seventy-ninth session of the Assembly.

Other changes

- 33.11 Resource changes reflect an increase of \$14,982,700, as follows: (a) \$2,856,600 under alteration, upgrades and major maintenance programmes; (b) \$1,342,000 under information and communications technology; (c) \$7,140,200 under the global standardization upgrade of conferencing systems, equipment and installation; and (d) \$3,647,900 under safety and security projects.
- 33.12 The resources under section 33 undergo reprogramming, including redistribution for each budget period, because they cover a portfolio of activities of which only a portion is a recurrent requirement, the remainder being either one-time or multi-year projects. Each proposed programme budget for a new budget period reflects the completion of non-recurrent activities and the introduction of newly programmed, non-recurrent investment requirements.

Nature of proposed activities

- 33.13 Table 33.2 breaks down the resource requirements into: (a) one-time projects; and (b) new and continuing multi-year phased projects. The breakdown by subcategory allows the aggregate portfolio of activities proposed under section 33 to be viewed in terms of nature and duration by location.

Abbreviations: OICT, Office of Information and Communications Technology; UNOG, United Nations Office at Geneva; UNON, United Nations Office at Nairobi; UNOV, United Nations Office at Vienna.

A. Resource requirements by duty station

1. Headquarters (including global implementation projects)

Resource requirements (before recosting): \$18,223,200

- 33.14 As summarized in table 33.3, the total provision of \$18,223,200 would provide for continuing multi-year projects, including: (a) the annual maintenance and upgrade of ICT core infrastructure (\$4,460,100); (b) upgrades for safety and security (\$3,015,300); and (c) standardization upgrades for conferencing equipment, systems and infrastructure (\$10,747,800).
- 33.15 Under improvement of ICT infrastructure, the resources proposed include: (a) the annual upgrading of the enterprise network infrastructure in the United Nations Headquarters technology rooms to support mandated ICT services for the Secretariat, General Assembly and conference buildings (\$2,300,000); (b) the consolidated maintenance contract at Headquarters, offices away from Headquarters and the regional commissions to support full coverage of the enterprise network equipment, ensuring the same level of service across duty stations, which has become increasingly important owing to the growing requirements of central enterprise applications (\$1,629,400); and (c) the maintenance and renewal of the Check Point firewall software at Headquarters, including hardware and software licences necessary to keep the Organization protected against cyberattacks and data leakage (\$530,700).
- 33.16 Under upgrades for safety and security, the proposed resources amounting to \$3,015,300 would be required for the continuation of multi-year projects aimed at bolstering security capabilities across the Secretariat, General Assembly, conference and Annex buildings. The proposal encompasses: (a) continuing the implementation of the compartmentalization of the electronic access control system, including the upgrading of hardware and software components that serve as a first line of defence and allow enhanced visitor tracking by using a smart card-based system that meets headquarters minimum operating security standards for secure access control (\$1,283,000); and (b) continuing the upgrades to a main security post, which provides dedicated access for delegates and their vehicles, by introducing additional ballistic protection and increasing the space that houses the security officers and systems required to control the entry/exit points (\$1,732,300).
- 33.17 The global standardization upgrade of conferencing systems at Headquarters, including equipment and installation (\$10,747,800), as presented in the report of the Secretary-General on capital investment planning ([A/78/536](#) and [A/78/536/Corr.1](#)), will serve to: (a) address the growing risk of malfunction and failure across conferencing operations at Headquarters due to ageing equipment and increasing obsolescence; and (b) establish a global standard for systems, equipment, infrastructure and installation modalities to support conferencing and broadcasting services. The General Assembly had already approved \$3.6 million in section 33 of the programme budget for 2024 for the urgent replacement of the most critical equipment that was at heightened risk of failure. The current proposal is part of a multi-year systematic upgrade of the entire conferencing infrastructure. The Headquarters upgrade will also guide the plans for conferencing systems and equipment at the new conference centre in Nairobi, as well as the upgrades being considered for the regional commissions in Santiago and Addis Ababa, so that comparable standards of service can be assured across duty stations, as mandated by the Assembly.
- 33.18 The scope of the multi-year conferencing upgrade would cover all equipment and systems across 18 conference rooms and 6 engineering rooms supporting the operations at Headquarters. The 18 conference rooms include conference rooms 1 to 12, five chambers (the General Assembly Hall, the Trusteeship Council Chamber, the Economic and Social Council Chamber, the Security Council Chamber and the Security Council Consultations Room) and the Press Briefing Room. The six engineering rooms are the Master Control room, the Integrated Broadcast Equipment room, the Video Network operations room, the Conference Control room, the Conferencing Broadcasting studio and the Media Operations room. Conference rooms A–D and other smaller meeting rooms are not in the scope of this upgrade plan owing to the absence, currently, of comparable systems in those rooms; their inclusion in the future need not be ruled out.

- 33.19 In terms of scale, the comprehensive upgrade would cover all equipment, systems and related installation components for seven core areas: (a) congress microphone and simultaneous interpretation; (b) audiovisual equipment and systems; (c) media asset management and broadcast automation; (d) permanent broadcast facility systems and the core router; (e) installation set-ups across all 18 rooms with associated hardware infrastructure, including connecting to the primary technology centre; (f) automated applications and tools for synchronization, diagnostics and quality control; and (g) cross-implementation requirements.
- 33.20 Section III of the report of the Secretary-General on capital investment planning contained a comprehensive overview and estimate of the investment requirements for this implementation plan for the period 2025–2028. Based on detailed planning undertaken since then, an integrated project master plan has been developed, consolidating all planned activities, covering 11 main groups of equipment and systems across all 24 rooms, broken down by room and year, and reflecting integration requirements, dependencies and installation sequences. A four-year implementation schedule entails the procurement of 16,110 assets, 7,064 audio installations (predominantly the devices used by delegates to listen to the interpreters, known as “ear-shells”), 2,893 congress microphone and simultaneous interpretation installations, 56 camera and associated component installations and 119 other installations across the interpretation booths.
- 33.21 The total cost of the upgrade has been estimated at \$82.5 million over four years, comprising: (a) \$63.5 million to procure the assets (prior to escalation costs); (b) \$8.5 million to engage specialist contractors to support the installations; (c) \$6.6 million for escalation costs at 9.1 per cent (inflation and unit-price increases for the period 2025–2028); and (d) \$3.9 million to cover the estimated 5 per cent contingency for the total project estimate. The resources proposed for 2025 under this section total \$10,747,800 to cover three large conference rooms and the associated infrastructure requirements in the six engineering rooms. The remaining conference rooms, including the chambers, would be upgraded from 2026 to 2028; the precise numbers and sequencing each year will be determined based on the assessment by the Department for General Assembly and Conference Management of the feasibility of reducing conferencing facilities each year, as these rooms and chambers are being upgraded.
- 33.22 The resource requirements for Headquarters are summarized in table 33.3.

Table 33.3

Resource requirements by nature of project, Headquarters (including global implementation projects)

(Thousands of United States dollars)

<i>Description</i>	<i>Amount</i>
B. New and continuing multi-year projects	
1. Continuation of multi-year projects	
Improvement of ICT infrastructure (Headquarters)	2 830.7
Improvement of ICT infrastructure (global)	1 629.4
Improvement of safety and security infrastructure	3 015.3
Standardization upgrades of conferencing equipment, systems and infrastructure	10 747.8
Total	18 223.2

2. United Nations Office at Geneva

Resource requirements (before recosting): \$7,016,900

- 33.23 The provision of \$7,015,700 would be required to fund continuing multi-year activities (\$6,215,700) and new activities (\$800,000).

- 33.24 Under the continuing multi-year activities, the resources would provide for: (a) the collection and disposal of hazardous materials (\$100,000); (b) the replacement of shatter-resistant film on windows across campus (\$130,000); (c) the development of capacity to respond to ICT vulnerabilities and threats (\$180,000); (d) the replacement of outdated technological infrastructure equipment (\$950,000); and (e) the strengthening of the security screening and detection system, including the installation of revolving doors at access points to the historical buildings in the Palais des Nations campus that can be activated by electronic access control only, in order to prevent the possibility of more than one person entering at the same time, thus ensuring that access to the interior of the buildings is permitted only to authorized pre-accredited individuals (\$2,000,000). The provision also includes an amount of \$2,856,900 (SwF 2,502,000) for the annual repayments to the host country of the loan related to the strategic heritage plan, in line with General Assembly resolutions [74/263](#) and [75/253](#) A–C.
- 33.25 Under new multi-year activities, the resources would provide for: (a) the assessment and replacement of the emergency generators (\$200,000); (b) the assessment and replacement of corroded heating pipes at the end of their lifespan (\$100,000); and (c) the upgrade and expansion of the screening and detection systems to enhance security detection and improve capabilities at screening points, including implementing state-of-the-art technologies such as advanced imaging techniques, artificial intelligence algorithms and the use of data analytics to improve the accuracy and efficiency of threat detection (\$500,000).
- 33.26 The selection of the proposed projects has been made in close consultation with the strategic heritage plan project team to ensure that the proposed works would not need to be redone in the future and that only essential needs and urgent repairs, particularly at the Palais des Nations, are considered while the overall renovation project is under way.
- 33.27 The resource requirements for the United Nations Office at Geneva are summarized in table 33.4.

Table 33.4

Resource requirements by nature of project, United Nations Office at Geneva

(Thousands of United States dollars)

<i>Description</i>	<i>Amount</i>
B. New and continuing multi-year projects	
1. Continuation of multi-year projects	
Major maintenance of facilities and general infrastructure	100.0
Improvement of ICT infrastructure	1 130.0
Safety and security improvements	2 130.0
Repayment of the loan for the strategic heritage plan	2 856.9
Subtotal, B.1	6 216.9
2. New multi-year projects	
Major maintenance of facilities and general infrastructure	300.0
Safety and security improvements	500.0
Subtotal, B.2	800.0
Total	7 016.9

3. United Nations Office at Vienna

Resource requirements (before recosting): \$1,637,500

- 33.28 The total provision of \$1,637,500 would continue to cover both the share of the United Nations Office at Vienna to finance the maintenance and upgrades of the Vienna International Centre, which is managed by the United Nations Industrial Development Organization (UNIDO) on a cost-shared

basis through an agreement among the organizations based at the Centre and the host Government (with regard to major maintenance projects), as well as the share of the United Nations Office at Vienna in respect of the safety and security installations at the Centre, together with the associated ICT components. The requested amount is calculated on the basis of the current share of the Office, which is 23.661 per cent of the total alteration and improvement requirements and 11.831 per cent of the total major maintenance requirements. This share is based on a composite of the space, staff and workload of the four organizations in determining the respective share of costs.

- 33.29 For 2025, the contribution of the United Nations Office at Vienna to the Common Buildings Management Fund for the periodic repairs, upgrades and maintenance of the Vienna International Centre amounts to \$1,376,500. A provision of \$151,000 is included to cover requirements to fund the Check Point firewall software for information security and protection against cyberattacks. A provision of \$110,000 is required for a one-time project to replace the control unit of the backup generator for critical ICT systems in the data room, which should be implemented in conjunction with the replacement of the control units of UNIDO, also scheduled for 2025.
- 33.30 The resource requirements are summarized in table 33.5.

Table 33.5

Improvement of ICT infrastructure	110.0
Subtotal, A	110.0
B. New and continuing multi-year projects	
1. Continuation of multi-year projects	
Improvement of facilities and general infrastructure	638.3
Major maintenance of facilities and general infrastructure	738.2
Improvement of ICT infrastructure	151.0
Subtotal, B.1	1 527.5
Total	1 637.5

4. United Nations Office at Nairobi***Resource requirements (before recosting): \$1,635,000***

- 33.31 The total provision of \$1,635,000 would provide for: (a) one-time projects (\$50,000); and (b) new and continuing multi-year projects (\$1,585,000).
- 33.32 Under one-time projects, the provision of \$50,000 would cover the upgrades to replace lightning protection for the existing blocks M–X.
- 33.33 Under the multi-year continuing projects, a provision of \$1,485,000 would provide for: (a) the ongoing comprehensive buildings and external areas accessibility upgrades project; (b) the annual renewal of the Check Point firewall software for information security and protection against cyberattacks (\$70,000); (c) the upgrade and provision of ICT active components (\$435,000); (d) the enhancement of security systems infrastructure, including network switches (\$480,000); and (e) the establishment of a modern security operations centre, including the refitting and re-establishment of a radio room and communications equipment (\$200,000).

- 33.34 Resources proposed for new multi-year safety and security projects would provide for: (a) the enhancement of active-shooter mitigation measures (\$50,000); and (b) the design of a modern fire station, which is needed to provide rapid response to fires and emergencies within the Office’s expansive compound (\$50,000).
- 33.35 The resource requirements are summarized in table 33.6.

Table 33.6

Improvement of facilities and general infrastructure	300.0
Improvement of ICT infrastructure	505.0
Safety and security improvements	680.0
Subtotal, B.1	1 485.0
2. New multi-year projects	
Safety and security improvements	100.0
Subtotal, B.2	100.0
Total	1 635.0

5. Economic Commission for Africa

Resource requirements (before recosting): \$8,550,000

- 33.36 The total provision of \$8,550,000 would provide for: (a) the continuation of multi-year projects (\$7,550,000); and (b) new multi-year activities (\$1,000,000).
- 33.37 Under continuing multi-year projects, the resources proposed would provide for: (a) technical design services to help the Commission finalize its capital investment plan to renovate and upgrade the compound in Addis Ababa, including components related to engineering, architecture, facilities, environment, accessibility and safety and security, and the related project planning (\$900,000); (b) continuation of the reconstruction of the subregional office in Yaoundé to bring it into compliance with United Nations safety and security policies as well as address issues such as fire safety, egress, structural integrity and workspace environment to ensure compliance with international standards (\$2,500,000); (c) the refurbishment of 1,454 m² within the Niger Building, level 2, as part of a pilot project for the implementation of flexible workspace, which will establish a precedent for future refurbishment works in the remaining office floors of the Niger Building and other buildings on the Addis Ababa campus (\$150,000); and (d) the strengthening, hardening and compartmentalizing of the Commission’s compound, including the perimeter wall and gates, following a recommendation issued by the Department of Safety and Security after carrying out an assessment in August 2022, in which it identified obsolete security capacity and the need to upgrade and reinforce capabilities across the entire range of operations in the Addis Ababa compound (\$4,000,000).

- 33.38 A new multi-year project, the refurbishment of the Zambezi Building cladding, is the result of a technical survey which revealed the need for the removal and reinstallation of large patches of the granite claddings across the building, as well as smaller scale maintenance and repair, in order to avoid further erosion and safety risks (\$1,000,000).
- 33.39 The resource requirements are summarized in table 33.7.

6. Economic Commission for Latin America and the Caribbean

Resource requirements (before recosting): \$1,991,800

- 33.40 The total provision of \$1,991,800 would provide for the implementation of: (a) one-time projects (\$179,800); and (b) new and continuing multi-year projects (\$1,812,000).
- 33.41 The provision of \$179,800 would provide for the emergency remodelling of the Fernando Fajnzylber Conference Room at ECLAC headquarters, including upgrades and repairs to its roof insulation and its sun-control and heating, ventilation and air-conditioning systems and a comprehensive treatment to protect the wood furnishings across the facility.
- 33.42 A provision of \$1,175,000 would cover the continuation of projects, including: (a) the annual maintenance of physical security and safety systems (\$190,000); (b) the continuation of cybersecurity operations (\$215,000); (c) the continuation of the digital transformation project (\$585,000); (d) ongoing interventions to improve accessibility (\$65,000); and (e) the software support agreement and server renewal for the access control and closed-circuit television systems (\$120,000).
- 33.43 The proposal for new multi-year projects amounts to \$637,000, including: (a) architectural and engineering services to determine the scope of design for the upgrade, retrofitting and expansion of the Auditorium (\$322,000); (b) the restoration of interior panels and furniture in the Raúl Prebisch Conference Room (\$215,000); (c) the upgrading of the Commission’s statistical and geospatial databanks and platforms (\$100,000); and (d) the partial emergency upgrade of conferencing equipment in the Celso Furtado Conference Room (\$100,000).
- 33.44 The resource requirements are summarized in table 33.8.

Total	1 991.8

7. Economic and Social Commission for Asia and the Pacific***Resource requirements (before recosting): \$1,836,000***

- 33.45 The total of \$1,836,000 would provide for: (a) one-time projects (\$350,000); and (b) new and continuing multi-year projects (\$1,486,000).
- 33.46 The provision of \$350,000 would provide for one-time projects, including: (a) the replacement of shatter-resistant film on windows (\$200,000); and (b) strengthening security screening and detection, including explosives detectors (\$150,000).
- 33.47 Resources amounting to \$1,486,000 would provide for new (\$394,000) and continuing (\$1,092,000) initiatives, including: (a) the upgrading of existing fire alarm systems with audible and visible warning systems to comply with the accessibility requirements in the Service Building and the Conference Centre (\$194,000); (b) the replacement of outdated access control devices with standardized devices that have high flaps that resist forced opening (\$100,000); (c) the upgrading of existing operating video management software (\$100,000); (d) the renovation of audiovisual facilities (conference room 1) (\$560,000); (e) the renovation of the visitors' entrance, including moving the screening of conference participants to the perimeter rather than inside the Conference Centre, which would also create a more convenient pickup and drop-off location, and accessibility measures to ensure easy access by staff and participants to the premises (\$440,000); and (f) asbestos abatement, to continue the removal of low-risk asbestos-containing material discovered during surveying (\$92,000).
- 33.48 The resource requirements are summarized in table 33.9.

Table 33.9

8. Economic and Social Commission for Western Asia***Resource requirements (before recosting): \$3,235,000***

- 33.49 The total provision of \$3,235,000 would provide for multi-year projects, including: (a) new projects (\$180,000); and (b) continuing projects (\$3,055,000).
- 33.50 The provision of \$180,000 would provide for: (a) the overhaul of major electrical and mechanical equipment and systems for the United Nations House's operations and business continuity (\$130,000); and (b) the support and maintenance of physical security systems (\$50,000).
- 33.51 A provision of \$3,055,000 would cover the requirements for: (a) the continuation of the accessibility improvements project (\$1,200,000); (b) the ongoing replacement of heating, ventilation and air-conditioning systems (\$1,080,000); (c) the implementation of solar photovoltaic panels and power backup systems (\$350,000); (d) the ongoing upgrade of integrated security systems in the information technology infrastructure (\$195,000); and (e) the continuation of the installation of a fire alarm system that allows for the pinpointing of an exact location (an "addressable" system) (\$230,000).
- 33.52 The resources requirements are summarized in table 33.10.

9. United Nations Truce Supervision Organization

Resource requirements (before recosting): \$905,000

- 33.53 The total provision of \$905,000 would provide for: (a) one-time projects (\$95,000); and (b) continuing multi-year projects (\$810,000).
- 33.54 The provision of \$95,000 would provide for the disposal of obsolete or broken equipment and materials across the compound to comply with local environmental codes, including but not limited to the materials and equipment currently stored in the 35 sea containers across the compound.
- 33.55 Resources amounting to \$810,000 would provide for: (a) the continuation of periodic maintenance and repairs across the complex in Jerusalem (\$300,000); and (b) specialized expertise for the architectural and engineering components of the master plan to design the comprehensive renovation and modernization plan for the Jerusalem compound, including the bill of quantities that will support the procurement process for the construction phase (\$510,000).
- 33.56 The resource requirements are summarized in table 33.11.

A. Proposed programme plan for 2025 and programme performance in 2023

Overall orientation

Mandates and background

- 34.1 The Department of Safety and Security is responsible for providing leadership, operational support and oversight of the United Nations security management system. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolution [59/276](#), by which the Department was established. The Department enables the United Nations to carry out its operations and programmes globally and provides support to approximately 180,000 personnel and 400,000 of their dependants in more than 125 States.
- 34.2 The security environment in which the United Nations operates remains highly complex and unpredictable, owing to multiple factors, including war, conflict, civil unrest and crime, as well as the expansion by non-State armed groups of their scope and capabilities by exploiting unaddressed grievances, the indifference to international humanitarian law of some actors and unprecedented levels of climate change-induced migration, in specific contexts, which interact with social, political and economic drivers in places where the United Nations is called to deliver its mandates.

Strategy and external factors for 2025

- 34.3 The Department will continue to implement its activities and strengthen its capabilities in support of United Nations mandates and objectives through a risk-based approach tailored to the needs of United Nations system entities in carrying out their programmes while keeping their personnel safe in complex and challenging operating environments.
- 34.4 The Department's focus will continue to be on resilience, efficiency and results. The emphasis on resilience and efficiency is based on the risks that the operational environment poses to the Department's ability to carry out its mission, as articulated in its enterprise risk management system. The Department will continue to strengthen its resilience through the development of country programmes that articulate the Department's contributions to United Nations results as presented in the United Nations Sustainable Development Cooperation Framework and in humanitarian response plans. The dedicated training provided to those country offices developing their programmes will continue in 2025, with tangible improvement in results orientation anticipated throughout the year. The Department will continue to identify and remedy gaps in strategic and operational readiness across locations through standing expertise and thorough quality assurance of security plans. The Department will maintain capacities and partnerships to enhance its response to sudden, large-scale crises, drawing on rapidly deployable assets from across the Department's varied sources of security expertise and in tandem with other United Nations entities for a cohesive response.
- 34.5 In addition, the Department will pursue operational efficiency through a range of initiatives designed to meet increased demands within existing means, including through the implementation of a digital transformation project designed in 2023. This effort, derived from the Data Strategy of the Secretary-General for Action by Everyone, Everywhere, will focus on better leveraging data for decision-making, digitizing relevant work processes, ensuring the interoperability of systems and increasing digital literacy across the workforce. Finally, efficiency will remain a central dimension in the Department's conduct and analysis of thematic evaluations, compliance monitoring missions and lessons learned exercises.
- 34.6 The Department will continue to implement the multi-year standardized access control project to upgrade the United Nations security infrastructure, as presented in the reports of the Secretary-General on capital investment planning ([A/77/519](#) and [A/78/536](#) and [A/78/536/Corr.1](#)).

- 34.7 The Department will update and enhance its training programme in support of integrated security workforce performance and its ability to tailor security services to the needs of United Nations programmes around the world. The Department's advocacy and communication efforts will further stress, concretely and transparently, how its work and its requirements have a beneficial effect on the delivery of United Nations mandates. The Department will also continue to pursue geographical representation and diversity in the profile of its workforce, as essential drivers of effective mandate implementation.
- 34.8 With regard to cooperation with other entities at the global, regional, national and local levels, the Department will implement its focus on enabling close collaboration with implementing partners of the United Nations, including non-governmental organizations, notably through the Saving Lives Together framework, which promotes security-related information-sharing and best practice exchanges between the United Nations and international non-government organizations.
- 34.9 The Department will continue to play a leadership role, through the Inter-Agency Security Management Network, in the development, updating and implementation of system-wide security policies aimed at enabling United Nations operations within acceptable risk levels, and tactical measures, including personnel security training and awareness. The Department will also collaborate with the Network to strengthen collective compliance with security policies. Furthermore, the Department will continue to participate in inter-agency coordination mechanisms, including the High-level Committee on Management of the United Nations System Chief Executives Board for Coordination and its networks.
- 34.10 With regard to the external factors, the Department considered applicable risks identified in its risk register and, accordingly, the overall plan for 2025 is based on the following planning assumptions:
- (a) Crises and security environments will evolve quickly and unpredictably, and the ability of the United Nations to gain safe access to areas and communities for programme delivery will continue to be challenged. Simultaneous large-scale and complex emergencies will continue to require agility, flexibility and rapid security responses to support the scale-up, and adjustment as required, of the United Nations presence and humanitarian programmes;
 - (b) Security needs will remain high during drawdowns and withdrawals of United Nations peace operations, and active engagement with Member States will be required when such transitions occur;
 - (c) Personnel of the United Nations and its premises will continue to face direct and indirect threats, including from threat actors using innovative and advanced techniques, which will require new and specialized responses from the United Nations security management system;
 - (d) Host Governments will continue to provide security support to the United Nations; and in some cases, this support may need to be supplemented depending on the security context and capacities;
 - (e) Demand for enhanced levels of security risk analysis, training, advice, responses and solutions to support the security needs and obligations of United Nations Designated Security Officials and of members of the Security Management Team will continue.
- 34.11 The Department integrates a gender perspective in its operational activities, deliverables and results, as appropriate. The Department will further strengthen its gender-sensitive approach to security management. It will also continue to refine its approach to creating a safe working environment for United Nations staff and operations and increasing awareness of and taking action to prevent sexual exploitation and abuse, among other matters.
- 34.12 In line with the United Nations Disability Inclusion Strategy, the Department will build a supportive environment for persons with disabilities. It will continue to incorporate disability inclusion into its risk management process and engage with organizations of persons with disabilities when developing measures to enable the accessibility of premises and to ensure the safety and security of persons with disabilities. It will maintain a regular review of accommodation and accessibility for staff and delegates with disabilities and will monitor their satisfaction with the level of support received.

Legislative mandates

34.13 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions and decisions

54/192; 55/175; 78/118	Safety and security of humanitarian personnel and protection of United Nations personnel	59/276, sect. XI	Questions relating to the programme budget for the biennium 2004–2005: strengthened and unified security management system for the United Nations
56/255, sect. VIII	Special subjects relating to the proposed programme budget for the biennium 2002–2003: safety and security of United Nations personnel	61/263	Strengthened and unified security management system
56/286	Strengthening the security and safety of United Nations premises	74/299	Improving global road safety
Decision 57/567	Inter-organizational security measures: framework for accountability for the United Nations field security management system		

Security Council resolution

1502 (2003)

Deliverables

34.14 Table 34.1 lists all cross-cutting deliverables of the programme.

Table 34.1

Cross-cutting deliverables for the period 2023–2025, by category and subcategory

Category and subcategory	2023 planned	2023 actual	2024 planned	2025 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	1
1. Report on the safety and security of humanitarian personnel and protection of United Nations personnel	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	3	3	3	3
Meetings of:				
2. The Fifth Committee	1	1	1	1
3. The Committee for Programme and Coordination	1	1	1	1
4. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
B. Generation and transfer of knowledge				
Technical materials	2	2	2	2
5. Security Policy Manual	1	1	1	1
6. Designated Official and Security Management Team Handbook	1	1	1	1
E. Enabling deliverables				
Safety and security: internal United Nations security management system policies, procedures and guidelines, technical support briefings on security policies, procedures and guidelines of the United Nations security management system for more than 150 designated officials for security and security decision makers and for 4,000 security professionals and United Nations personnel in the field and at Headquarters; and security-related platforms, including the United Nations Security Managers Information Network and the programme criticality database used in all 41 high- and very high-risk areas of operations.				

Evaluation activities

- 34.15 The following evaluations conducted by the Department and completed in 2023 have guided the proposed programme plan for 2025:
- (a) Independent evaluation of the Department's psychosocial and well-being strategy;
 - (b) Independent evaluation of the emergency trauma bag training.
- 34.16 In response to the results of the evaluations referenced above, the Department will adjust its support in the context of the psychosocial and well-being strategy, notably by strengthening the peer network of the United Nations security management system, and will also better integrate a gender perspective into its emergency trauma bag training.
- 34.17 Two evaluations to be conducted by the Department are planned for 2025, the subjects of which are to be determined.

Programme of work

Subprogramme 1 Security and safety services

Objective

- 34.18 The objective, to which this subprogramme contributes, is to ensure a safe and secure environment for all United Nations personnel, delegates, dignitaries and other visitors while conducting activities at United Nations Headquarters, offices away from Headquarters and regional commissions and while attending special events hosted by the United Nations at external locations.

Strategy

- 34.19 To contribute to the objective, the subprogramme will continue to provide strategic coordination and management of the security and safety services at eight duty stations, as well as operational guidance and technical supervision with regard to security risk management, physical security, close protection, crisis management, fire safety, recruitment, resilience, training and oversight of security and safety projects at those locations.
- 34.20 The above-mentioned work is expected to result in:
- (a) Safe, secure and efficient access of delegates, staff and visitors to United Nations premises and external special events;
 - (b) Smooth delivery of United Nations mandates and programmes at United Nations premises and external special events.

Programme performance in 2023

Safety of an increased number of delegates, personnel and participants at United Nations conferences and external events

- 34.21 Faced with the task of providing security support for five overlapping external events in five countries in the final quarter of 2023 and 15 major external events for the year, the subprogramme reached out to partners across the Department and the integrated security workforce in putting together multiple teams to ensure the safety and security of conference participants. For instance, for the twenty-eighth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, held in Dubai, United Arab Emirates, the subprogramme established a team consisting of 122 security personnel drawn from 15 duty stations. This enabled the

subprogramme to successfully plan, coordinate and execute the security and safety operation for what was the largest United Nations gathering ever held, with 116,762 registered participants and 149 Heads of State present. This exceptional measure was critical in meeting the increased demand for security services brought about by an increased level of registered participation.

34.22 Progress towards the objective is presented in the performance measure below (see figure 34.I).

Figure 34.I

Performance measure: safety and security of participants in the sessions of the Conference of the Parties to the United Nations Framework Convention on Climate Change ensured amid increased demand for security services (annual)

Planned results for 2025

Result 1: safety and security of United Nations staff, delegates and premises during critical incidents

Programme performance in 2023 and target for 2025

34.23 The subprogramme’s work contributed to improved coordination with 10 host countries in response to critical incidents, through the coordination of 195 joint exercises with host country law enforcement partners in the areas of fire safety, active shooter training, evacuation drills and explosive detection, which met the planned target.

34.24 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 34.2).

Table 34.2
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
United Nations first responders have access to improved and updated training, with practical exercises and a victim-centred approach	Increased preparedness for an adequate and effective response to critical incidents	Improved coordination with host countries in response to critical incidents, including with regard to fire safety, active shooter training, evacuation drills	All partners participate in joint security operation exercises with host country law enforcement and emergency services agencies in real-life scenarios	All partners at external conference venues participate in joint security operation exercises with host country law enforcement and emergency services agencies

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
		and explosive detection	A peer evaluation assesses joint security operations as having an adequate level of preparedness and effectiveness to respond to critical incidents, including initial response time and incident resolution timelines	

Result 2: delegates and participants experience a uniform and consistent approach to security- and safety-related matters for conferences and special events held at external venues

Programme performance in 2023 and target for 2025

- 34.25 The subprogramme’s work contributed to the implementation of minimum operating security standards by event security coordinators for external events, ensuring consistency in the approach to services received by delegates for physical security screening and the collection of credentials, in line with the benchmarks established at Headquarters, which met the planned target.
- 34.26 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 34.3).

Table 34.3
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	Delegates receive security and safety services, including collection of credentials and physical security screening, according to the expertise and experience of the event security coordinator and interaction with the host country security counterpart	Delegates receive security and safety services that are consistent across conferences and are in line with benchmarks established at Headquarters	The length of time for the collection of credentials and for security screening at all conferences and special events held at external venues does not exceed the benchmarks established at Headquarters	Efficient access for conference participants, with all conferences and special events at external venues having separate dedicated lanes for delegates, United Nations staff and external service staff for physical security screening and collection of credentials

Result 3: improved ease of movement of delegates and staff across duty stations

Proposed programme plan for 2025

34.27 The subprogramme operates physical and electronic security systems at all eight duty stations. The access control system applications currently used by each of these eight duty stations are not interoperable with the current access control credentials issued locally by the other duty stations.

Lessons learned and planned change

34.28 The lesson for the subprogramme was that it needed to simplify processes for delegates and staff travelling between duty stations. In applying the lesson, the subprogramme will facilitate the access of delegates and staff to United Nations premises without the requirement to issue new identification cards whenever they travel between duty stations. The subprogramme will bring all eight duty stations together to operate under a common security platform, which will eliminate the manual process of issuing credentials and improve the ease of movement of delegates and staff across the eight duty stations.

34.29 Expected progress towards the objective is presented in the performance measure below (see table 34.4).

Table 34.4
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	Delegates and staff members have credentials which allow access to premises at the issuing duty station only	A common operating system and online infrastructure is established to support a common credential access control card across all eight duty stations for delegates and staff	Physical infrastructure is in place to facilitate the ease of access of delegates and staff travelling between the eight duty stations under a common platform for access control

Deliverables

34.30 Table 34.5 lists all deliverables of the subprogramme.

Table 34.5
Subprogramme 1: deliverables for 2025, by category and subcategory

Category and subcategory
E. Enabling deliverables
Safety and security: security and access control for approximately 6 million people per year at United Nations Headquarters, offices away from Headquarters and regional economic and social commissions; security support for approximately 84 United Nations special events and conferences held away from United Nations premises; approximately 9,000 close protection operations for senior United Nations officials and visiting dignitaries; 2,600 security incident investigations; 2,400 fire safety checks.

Subprogramme 2

Field operations

Objective

- 34.31 The objective, to which this subprogramme contributes, is to ensure the safety and security of personnel and the security of United Nations premises and assets in the United Nations field duty stations to enable the implementation of United Nations mandates, programmes and activities worldwide.

Strategy

- 34.32 To contribute to the objective, the subprogramme will:
- (a) Provide operational security support for United Nations field programme delivery and field programme personnel through effective and timely security coordination and advice;
 - (b) Provide consistent operational guidance for field operations in the preparation for and management of security crises;
 - (c) Deploy security professionals in a rapid and timely fashion to countries, missions and areas, including those affected by crisis situations and security contingencies;
 - (d) Conduct security assessment missions to field locations to review and assess local security management processes and procedures;
 - (e) Conduct regional workshops and global conferences for all of the Department's senior field security professionals to share operational best practices and lessons learned and to ensure consistent security management practices and procedures;
 - (f) Develop its capacity to capture and analyse data and deliver analytical products for security decision makers.
- 34.33 The above-mentioned work is expected to result in:
- (a) Improved effectiveness and relevance of security risk management processes;
 - (b) Enhanced capacity to enable United Nations programmes to be carried out in high-risk environments, in line with the United Nations goal to stay and deliver;
 - (c) Enhanced ability of security decision makers to take risk-informed decisions;
 - (d) Enhanced and streamlined security management measures in the field.

Programme performance in 2023

United Nations programme delivery maintained during crises

- 34.34 The subprogramme enabled the United Nations to fulfil its critical mandates across the globe, including in areas characterized as high risk and very high risk. The subprogramme deployed crisis management expertise and surge capacity in 2023, providing additional security assistance to enable United Nations response in locations affected by crises. For instance, the subprogramme supported the delivery of humanitarian assistance in Afghanistan, Haiti, the Syrian Arab Republic, Türkiye and Ukraine, among other countries. In Haiti, additional analysis capacity enabled increased access to areas of Port-au-Prince for the delivery of humanitarian assistance. The subprogramme also supported hostage incident management, as well as security preparations in the context of elections in numerous countries. These efforts have contributed to enabling the United Nations response to numerous crises that occurred in 2023.
- 34.35 Progress towards the objective is presented in the performance measure below (see figure 34.II).

Figure 34.II
Performance measure: number of countries or territories where surge capacity was deployed to enable United Nations programme delivery (annual)

Planned results for 2025

Result 1: enhanced security decision-making through timely and relevant data and analytical information

Programme performance in 2023 and target for 2025

- 34.36 The subprogramme’s work contributed to decision makers having timely and better contextualized security data, including, for instance, on geography-based trends related to insecurity, which enabled greater situational awareness and identification of potential high-risk locations, which met the planned target.
- 34.37 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 34.6).

Table 34.6
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
A total of 317 security personnel (120 from the Department of Safety and Security and 197 from the United Nations security management system) enhanced their knowledge and skills in the use of security threat information	Enhanced security decision-making by security personnel through access to structured data and analytical information, segregating facts from analytical judgments, with clear meaning and significance for programme delivery, including in high-risk and kinetic environments, such as in Haiti, where analytical products provided a detailed assessment of kidnapping risks and allowed for a focused response	Decision makers had timely and better contextualized data, including on geography-based trends related to insecurity, which enabled greater situational awareness and identification of potential high-risk locations	Decision makers have access to a more rapid and agile security threat information cycle for analysis and dissemination through targeted data access and streaming technology, tailored for regional differences	Decision makers have access to richer, more targeted data, with strategic foresight analysis and better visualization

Result 2: improved coherence and consistency of security management processes and procedures to better enable United Nations operations across field operations globally

Programme performance in 2023 and target for 2025

- 34.38 The subprogramme's work contributed to improved quality and consistency of local security management processes and procedures, with local security decision makers benefiting from improvements in the security risk management process and tools and using the Safety and Security Incident Recording System dashboard to gain real-time insights into the security and safety landscape, which met the planned target.
- 34.39 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 34.7).

Table 34.7

Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
–	Field operations adopted recommendations related to risk mitigation measures, such as in Somalia, where United Nations operations mainstreamed security analysis and operational responses into programming and budgeting, as well as the availability of timely and up-to-date information to Member States	Improved quality and consistency of local security management processes, procedures and tools, with local security decision makers using the Safety and Security Incident Recording System dashboard to gain real-time insights into the security and safety landscape	Improved coherence and consistency of security management processes and procedures deployed by field operations globally Field operations more readily identify indications of possible emerging security threats to United Nations programme delivery through heightened and targeted assistance	Improved accounting for United Nations personnel in the field during crisis incidents by local security decision makers, through enhanced data management and analysis

Result 3: improved preparedness and response to crises

Proposed programme plan for 2025

- 34.40 The subprogramme has been responding to an increased number of crises around the globe. In recent years, it has worked on developing crisis response capacity. In 2023, crisis management plans, enhanced support capabilities and capacity-building were further developed in anticipation of potential crises. Further, a crisis coordination mechanism was established to improve information flow and ensure more efficient responses to crises in high-risk countries.

Lessons learned and planned change

- 34.41 The lesson for the subprogramme was the need to increase preparedness to respond to and manage crises in a more structured manner, and across multiple regions, simultaneously. In applying the lesson, the subprogramme will further develop crisis management preparedness for United Nations Designated Security Officials, security professionals and other members of crisis management teams to enable effective leadership and decision-making in times of crisis.
- 34.42 Expected progress towards the objective is presented in the performance measure below (see table 34.8).

Table 34.8
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	–	A crisis coordination mechanism was established to improve information flow and ensure more efficient response to crises in high-risk countries	United Nations Designated Security Officials, security professionals and other members of crisis management teams are aware of and utilize security management processes and procedures to effectively respond to any specific crisis	Timely coordination and response, with a crisis coordination mechanism established, as required, within 72 hours of a specific crisis

Deliverables

34.43 Table 34.9 lists all deliverables of the subprogramme.

Table 34.9
Subprogramme 2: deliverables for 2025, by category and subcategory

Category and subcategory
<p>E. Enabling deliverables</p> <p>Safety and security: approximately 20 security assessment visits annually, as well as security services and surge deployments in response to emerging and newly identified needs; approximately 600 security risk management reviews; approximately 360 records per month entered into the Safety and Security Incident Recording System; approximately 5,500 premises records maintained in the premises database; workshops and training on crisis management/preparedness, analysis, security management, leadership and best practices for key security personnel of United Nations security management systems.</p>

Subprogramme 3 Partnerships and specialized support

Objective

34.44 The objective, to which this subprogramme contributes, is to ensure the safety and security of United Nations operations, premises and personnel and to improve the efficiency and effectiveness of the security operations and security management system of the United Nations.

Strategy

34.45 To contribute to the objective, the subprogramme will:

- (a) Implement an information management strategy to provide the United Nations security management system with the operational backbone required for efficient, data-driven approaches

to security risk management and to build and manage business processes and technology for all aspects of security delivery, including personal protective services, emergency communications, critical incident stress management, physical security and road safety;

- (b) Provide leadership, coordination and oversight for safety and security training, including on topics such as resilience-building, security risk management and operational safeguarding;
- (c) Increase and diversify strategic partnerships with regional and global networks in the field of close protection expertise with the intention of benchmarking and aligning United Nations protective services to international best practices;
- (d) Provide leadership and coordination for a rapid psychosocial support response in the aftermath of critical incidents and collaborate with the United Nations system and external partners to build the psychological resilience of United Nations security management system personnel;
- (e) Lead the development of physical security guidance, standards and technical specifications and undertake physical security assessments of United Nations premises worldwide;
- (f) Coordinate the development of United Nations-system wide security policy and guidance as the secretariat for the Inter-agency Security Management Network.

34.46 The above-mentioned work is expected to result in:

- (a) Effective prevention of and coherent response to security incidents by United Nations security management system actors, through timely decision-making and enhanced access to data;
- (b) Effective management of risks for the movement of senior United Nations officials;
- (c) Mitigation of the short- and long-term psychological impact of exposure to critical incidents on United Nations security management system personnel;
- (d) Reduction of physical security risks to United Nations premises and personnel;
- (e) Reduction of road crash fatalities for United Nations security management system personnel.

Programme performance in 2023

Physical security experts enabled programme delivery in high-risk areas while saving lives

34.47 Physical security experts ensure that personnel are protected from the most lethal threats – bombs and bullets – while on United Nations premises, including headquarters buildings and all field locations. Their work – providing designs, specifications and recommendations for blast and ballistic protection for buildings, vehicles and personnel – supports continued United Nations activities globally. Having this expertise in-house has expedited critical security solutions because of the knowledge of such experts on the United Nations and their ability to rapidly deploy. In 2023, the subprogramme provided direct support for the design and implementation of physical security measures to protect over 220 United Nations premises and 2,200 personnel. This support included 117 instances of technical advice, 34 training sessions, 2 additional information bulletins and 21 physical security and blast vulnerability assessments. These efforts have helped to ensure the safety and security of United Nations personnel and to enable continued programme delivery in high-risk areas.

34.48 Progress towards the objective is presented in the performance measure below (see table 34.10).

Table 34.10
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)
–	–	<p>Bunkers designed by the subprogramme protected United Nations personnel in Gaza until they were evacuated.</p> <p>Protection designs of the subprogramme enabled United Nations personnel in Mogadishu to live and work in buildings at risk from missiles</p>

Planned results for 2025

Result 1: improved management and strategic use of information and data to inform security services across the United Nations security management system

Programme performance in 2023 and target for 2025

- 34.49 The subprogramme’s work contributed to security professionals having access to relevant data and information for decision-making, including accurate staff presence information through the electronic travel advisory geolocation feature, enhanced situational awareness data and country resource details, all embedded in one integrated platform, which met the planned target.
- 34.50 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 34.11).

Table 34.11
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
–	Improved data accessibility and enhanced information-sharing across the United Nations security management system through technological solutions	Security professionals have access to relevant data and information for decision-making, including accurate staff presence information, enhanced situational awareness data and country resource details embedded in one integrated platform	Security professionals have access to new information management tools, enabling decision-making informed by up-to-date and tailored data	Security professionals have access to data insights, and can develop tailored analytics for data-based decision-making

Result 2: security personnel certified to enable programme delivery with an acceptable level of risk

Programme performance in 2023 and target for 2025

- 34.51 The subprogramme's work contributed to 1,126 security personnel having been certified to provide precise and effective security management advice, enabling programme delivery with an acceptable level of risk, which exceeded the planned target of 300 certified security personnel.
- 34.52 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 34.III).

Figure 34.III

Performance measure: number of security personnel certified to provide precise and effective security management advice, enabling programme delivery with an acceptable level of risk (cumulative)

Result 3: consistent and coherent operations across the United Nations security management system

Proposed programme plan for 2025

- 34.53 The environment in which the United Nations and its partners operate has become more complex, and the threats that personnel face have increased in scope and severity. The subprogramme is responsible for developing and updating system-wide security policies and guidelines, and for facilitating awareness of evolving United Nations security management system guidance among approximately 4,000 security professionals and decision-makers, enabling them to effectively fulfil their functions.

Lessons learned and planned change

- 34.54 The lesson for the subprogramme was the persistent gap between policy and practice, necessitating continual updating of existing United Nations security management system policies and procedures to better reflect and address the operational complexities faced by approximately 180,000 security management system personnel in more than 125 countries. In applying the lesson, the subprogramme will continue to collaborate closely with members of the Inter-Agency Security Management Network, security professionals and other experts to identify further gaps in policy and guidance and will facilitate the systematic review of and substantive and technical updates to existing security management system guidance.
- 34.55 Expected progress towards the objective is presented in the performance measure below (see table 34.12).

Table 34.12
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
	United Nations security management system security focal points and security decision makers receive regular briefings on emerging safety and security trends and timely assistance	United Nations security management system security focal points and security decision makers have expanded access to and are informed of changes to system policies and guidelines	United Nations security management system security focal points and security decision makers identify emerging gaps in existing guidance	All United Nations security management system security focal points and security decision makers are aware of and apply updated system policies and guidelines that take into account their operational realities

Deliverables

34.56 Table 34.13 lists all deliverables of the subprogramme.

Table 34.13
Subprogramme 3: deliverables for 2025, by category and subcategory

Category and subcategory

E. Enabling deliverables

Safety and security: emotional first aid and critical incident psychosocial support for United Nations security management system personnel; stress management training for personnel in field duty stations; technical supervision sessions for United Nations field counsellors; dedicated assessments of the physical security of United Nations premises globally; topical guidance, physical security training and analysis of data provided by the physical security assessment application; security training throughout the United Nations security management system; travel tracking and coordination of protective operations related to the movement of senior United Nations officials; planning and coordination of personal protection services with respective Missions; mandatory certification training for close protection officers; training on digital tools, dashboard and site development and deployment services; technical secretariat services for the Inter-Agency Security Management Network and its steering group.

B. Proposed post and non-post resource requirements for 2025

Overview

- 34.57 Given the dual responsibility of the Department of Safety and Security to provide for both the safety and security of staff, delegates and visitors at the main locations of the United Nations, as well as at their premises, and the safety and security of the United Nations system field operations, the activities of the Department are financed both from the regular budget and on a cost-sharing basis with other organizations covered by the security management system in the field.
- 34.58 The functions and activities of the Department that are jointly financed with other organizations of the security management system are those under:
- Security and safety services (subprogramme 1);
 - Field operations (subprogramme 2);
 - Partnerships and specialized support (subprogramme 3);
 - Programme support.
- 34.59 With regard to the jointly financed activities of the United Nations security management system, the financial responsibility of each participating organization is based on its proportional share of the personnel operating in the field. The principles of the cost-sharing arrangement were adopted by the General Assembly in its resolution [56/255](#). Following the recommendation of the Assembly, in its resolution [61/263](#), on achieving a workable cost-sharing arrangement, the High-level Committee on Management of CEB agreed that field-related security costs would be apportioned on the basis of actual percentages of staff according to data provided by CEB. Subsequently, the Secretary-General outlined revised cost-sharing arrangements for the cost of the United Nations security management system (see [A/62/641](#)). In October 2021, the High-level Committee on Management endorsed a revision of the cost-sharing arrangement (see CEB/2021/HLCM/FB/5), effective from 2023, which, while preserving the principles adopted by the Assembly in its resolution [56/255](#), updated the membership fee, which had not been changed since its establishment; addressed the principle of equitability by having all organizations pay a membership fee and reinforced the notion of shared ownership for the system; and ensured that organizations in countries of the Organisation for Economic Co-operation and Development pay their fair share of the security costs.
- 34.60 Based on the cost-sharing arrangement, the Secretariat share for security and safety services is 15.6 per cent for 2025, which is based on the CEB field staff census as at 31 December 2023, compared with 17.0 per cent for 2024, which was based on the census as at 31 December 2022. The level of resources proposed for 2025 for the jointly financed activities of the United Nations security management system presented in this budget fascicle was reviewed by the Finance and Budget Network of the High-level Committee on Management in March 2024. The Network took note of the budget proposal, and the proposed resources for 2025 for jointly funded activities in the present budget fascicle are as proposed by the Department.
- 34.61 In addition to the jointly financed field activities described above, separate local cost-sharing arrangements govern the provision of security and safety services at the United Nations Office at Vienna, as well as other duty stations. The cost-sharing arrangements in Vienna are based on a formula agreed upon by the four organizations located at the Vienna International Centre; similarly, the cost-sharing arrangements at the other duty stations are agreed upon locally by the participating organizations. The Secretariat share for security and safety services at the United Nations Office at Vienna is 23.7 per cent for 2025, compared with 27.3 per cent provisioned for 2024. Those security and safety services relate to subprogramme 1.
- 34.62 The Department strives for the most effective ways of delivering its mandates and has been carrying out reviews of the activities and processes required to produce deliverables.

- 34.63 Pursuant to paragraph 20 of General Assembly resolution [77/262](#), the Department carried out a spending review as part of its proposed programme budget exercise. With the engagement of all programme managers, this review was carried out for each subprogramme and component of the Department, and included in-depth analysis of post complement and functional profiles, as well as non-post resources, with a view to determining the optimal level and types of resources required to implement the Department's mandates and to achieve results.
- 34.64 Previously, in 2023, the Department completed a review of its internal structures with a focus on service delivery and the grouping of complementary roles and functions. Findings of the review revealed that in order to increase coherence between a range of services and the policies that underpin them and to leverage partnerships that can make such services more effective, the partnerships and policy functions should be consolidated in the Department. The result of this review informed the proposed programme budget for 2024, which resulted in the Division of Specialized Operational Support being renamed the Division of Partnerships and Specialized Support, and the proposed redeployment of four posts (1 P-5, 1 P-3, 1 P-2 and 1 General Service (Other level)) from executive direction and management to subprogramme 3. The review also considered continuing, critical and essential functions that were carried out by temporary positions in support of the 24/7 security and safety operations and the pass and ID offices in several duty stations, including in Bangkok, New York and Santiago, and recommended the conversion of 12 temporary positions (5 General Service (Other level) and 7 Local level) to posts, to provide long-term stability in the execution of those functions. This proposal was included in the proposed programme budget for 2024.
- 34.65 In addition, a further review conducted by the Department later in 2023, amid recent crises, identified vulnerabilities and gaps in the Department's response to crises and recommended the immediate strengthening of the Department's strategic resilience functions, inclusive of emergency response, to enable the United Nations to continue to deliver on its programmes, mandates and activities, including humanitarian programmes. The related resources, including 19 new posts (2 P-5, 7 P-4, 5 P-3, 2 P-2 and 3 General Service (Other level)) and non-post resources were included in the revised estimates relating to the proposed programme budget for 2024 under section 34, Safety and security ([A/78/530](#)) and then approved by the General Assembly in its resolution [78/253](#).
- 34.66 In the context of the proposed programme budget for 2025, the spending review carried out by the Department identified further gaps with regard to evaluation in terms of enabling and supporting the dissemination and implementation of a results-based focus across the Department. As a result, the Department proposes the redeployment of one Programme Management Officer (P-3) from subprogramme 3 to executive direction and management.
- 34.67 Further, and in parallel to the spending review, a comprehensive workforce planning exercise was carried out throughout the Department, including retirement projections. The Department used the workforce planning methodology issued by the Office of Human Resources to identify skills gaps and is seeking ways to address these issues through additional training. As such, the workforce planning exercise highlighted the need for the continual review of the workforce and work processes to keep pace with the evolving demand for innovative tools to support data-driven policy solutions, and to maintain a vibrant work environment.
- 34.68 In addition, the spending review identified areas in which resources could be optimally used to support the implementation of the Department's mandate. For example, under subprogramme 1, owing to the recent replacement of office equipment and the completion of the revamp of the armoury room in Beirut, the spending review highlighted related resources under furniture and equipment and contractual services that are being proposed for redeployment to supplies and materials and general operating expenses to provide for the acquisition of ballistic helmets and the rental of a shooting range for firearms training in 2025.
- 34.69 Furthermore, the Finance and Budget Network, in its document CEB/2023/HLCM/FB/1, requested the Department of Safety and Security to work with United Nations entities to conduct a holistic review of the United Nations security management system footprint and security budgets, local cost-shared security budget and jointly financed activities budget, setting out system security

requirements, entity roles and responsibilities, sources of funding and related trends over the past five years, inclusive of all member organizations of the system, as well as the location and profile of posts.

- 34.70 The United Nations security management system resources review was conducted by an independent expert, with the aim of documenting through a data-driven approach how the system is resourced to provide security services to United Nations personnel, premises, assets and operations at the country, regional and global levels. The initial results of data analysis and the five-year trend from 2018 to 2022 clearly indicate that resources for jointly financed activities had no real growth despite increased security risks and inflation. The trends and variations in locally cost-shared security budgets and the sources of security funding by system entities have to be examined further from an organizational and risk management perspective. Informed by the findings of this review, the Department will engage with the Finance and Budget Network in 2024 and explore avenues for predictable and sustainable funding for the system that meets the needs for the foreseeable future.
- 34.71 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in tables 34.14 to 34.16. Similarly, the proposed gross budget for jointly financed activities is reflected in tables 34.17 to 34.21. The gross jointly financed budget of the Department is also presented to the General Assembly for its consideration and approval, in accordance with established practice.

Resource requirements for regular budget activities

34.72 Additional details on the distribution of the proposed resources for 2025 are reflected in tables 34.22 to 34.24 and figure 34.IV.

34.73 As reflected in tables 34.22 (1) and 34.23 (1), the overall resources proposed for 2025 amount to \$140,039,200 before recosting, reflecting a net decrease of \$1,194,900 (or 0.8 per cent) compared with the approved budget for 2024. Resource changes result from technical adjustments and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes (regular budget)

Technical adjustments

34.74 As reflected in table 34.22 (1), resource changes reflect a net decrease of \$1,694,900, as follows:

(a) **Executive direction and management.** The increase of \$1,534,400 is the net effect of:

- (i) An increase of \$1,596,000 under posts, which reflects the higher provision for 19 posts (2 P-5, 7 P-4, 5 P-3, 2 P-2 and 3 General Service (Other level)) established in 2024 pursuant to General Assembly resolution [78/253](#), which were subject to a 50 per cent vacancy rate in accordance with the established practice for the costing of new posts;

- (ii) A decrease of \$61,600 under furniture and equipment, reflecting the removal of non-recurrent provisions for office automation, laptops and communication equipment related to the 19 posts mentioned in paragraph 34.74 (a) (i) above;
- (b) **Subprogramme 1, Security and safety services.** A decrease of \$1,000,200 under grants and contributions, consisting of:
 - (i) A decrease of \$415,900 relating to the removal of non-recurrent security personnel requirements for the renovation of the Africa Hall at the Economic Commission for Africa in Addis Ababa (\$250,900) and the replacement of blocks A to J at the United Nations Office at Nairobi (\$165,000), pursuant to Assembly resolution [78/253](#) (parts XIV and XVI);
 - (ii) A decrease of \$584,300, which reflects the Secretariat share (23.7 per cent for 2025, compared with 27.3 per cent provisioned for 2024) of the costs of the jointly financed activities at the United Nations Office at Vienna (\$581,700), and a reduction in the United Nations percentage share (15.6 per cent for 2025, compared with 17.0 per cent for 2024) in the cost of jointly financed field security operations, based on the CEB field staff census as at 31 December 2023 (\$2,600);
- (c) **Subprogramme 2, Field operations.** A decrease of \$2,083,500 under grants and contributions, consisting of:
 - (i) A decrease of \$1,903,100, reflecting a lower Secretariat percentage share (15.6 per cent for 2025, compared with 17.0 per cent for 2024) in the cost of jointly financed field security operations, based on the CEB field staff census as at 31 December 2023;
 - (ii) A decrease of \$180,400, which reflects a reduction in the United Nations percentage share (10.3 per cent for 2025, compared with 15.1 per cent provisioned for 2024) in the malicious acts insurance policy, on the basis of a census of participating entities, including new entities that joined the programme;
- (d) **Subprogramme 3, Partnerships and specialized support.** A decrease of \$125,700 under grants and contributions, which reflects a lower Secretariat percentage share (15.6 per cent for 2025, compared with 17.0 per cent for 2024) in the cost of jointly financed field security operations, based on the CEB field staff census as at 31 December 2023;
- (e) **Programme support.** A decrease of \$19,900 under grants and contributions, which reflects a lower Secretariat percentage share (15.6 per cent for 2025, compared with 17.0 per cent for 2024) in the cost of jointly financed field security operations, based on the CEB field staff census as at 31 December 2023.

Other changes

34.75 As reflected in table 34.22 (1), resource changes reflect a net increase of \$500,000 as follows:

- (a) **Executive direction and management.** The increase of \$188,400 is attributable to the cost-neutral inward redeployment of 1 P-3 post from the Strategic Partnerships and Policy Section under subprogramme 3 to the Strategic Planning Service, as explained in annex II. The proposed redeployment reflects the outcome of the spending review carried out by the Department, which identified gaps with regard to evaluation in terms of enabling and supporting the dissemination and implementation of a results-based focus across the Department;
- (b) **Subprogramme 1, Security and safety services.** An increase of \$500,000 under travel of staff is proposed for the travel of Security Officers who accompany senior United Nations officials during their travel, taking into account recent experience. One of the main functions of the Department in New York is to ensure the protection of the Secretary-General, the Deputy Secretary-General and the President of the General Assembly, especially in relation to close protection during their travels;

- (c) **Subprogramme 3, Partnerships and specialized support.** The decrease of \$188,400 is attributable to the cost-neutral outward redeployment of one P-3 post to executive direction and management, as explained in paragraph 34.75 (a) above.

Overall resource changes (jointly financed activities)

Technical adjustments

- 34.76 As reflected in table 34.17, resource changes reflect an increase of \$142,000 under subprogramme 2, Field operations. The increase reflects the higher provision for five National Professional Officer posts established in 2024 pursuant to General Assembly resolution 78/252, which were subject to a 50 per cent vacancy rate in accordance with the established practice for the costing of new posts.

Other assessed

- 34.77 As reflected in tables 34.22 (2) and 34.23 (2), other assessed resources under the support account for peacekeeping operations amount to \$3,834,500. The resources would complement regular budget resources and provide for the requirements indicated in the report of the Secretary-General (A/78/746).

Extrabudgetary resources

- 34.78 As reflected in tables 34.22 (3) and 34.23 (3), extrabudgetary resources amount to \$24,985,500. The resources would complement regular budget resources and would be used mainly to provide security services to other agencies and organizations in various locations, special events within and surrounding the premises, and humanitarian operations amid unstable conditions in various locations, including in field offices, and for reimbursable services provided for the close protection officer certification programme, Safe and Secure Approaches in Field Environments training and other related activities.
- 34.79 The extrabudgetary resources under the present section are subject to the oversight of the Department, which has delegated authority from the Secretary-General.

Executive direction and management

- 34.80 The Under-Secretary-General for Safety and Security is responsible for the overall direction, supervision and management of the Department in the implementation of its mandates and its approved programme of work. The Under-Secretary-General is the Chair of the United Nations security management system and is assisted in the internal functioning and day-to-day management of the Department by the Assistant Secretary-General.
- 34.81 In managing the Department, the Under-Secretary-General is supported by the Strategic Planning Service, which is responsible for strategic planning and risk management, operational resilience and emergency response, strategic communications, gender and inclusivity, corporate governance, evaluation, compliance monitoring, lessons learned, best practices and innovation. Together, these areas enable the dissemination and implementation of a results-based focus across the Department, in line with United Nations mandates, objectives and values at the global and country levels.
- 34.82 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Department is integrating environmental management practices into its operations, including in the requisition of goods and services that contribute to and support environmental stability, resilience and sustainability.
- 34.83 Information on the timely submission of documentation and advance booking for air travel is reflected in table 34.25.

Section 34 Safety and security

34.84 The Department will continue to make efforts to implement advance travel planning and the early nomination of travellers. In the event of rapid security surge redeployment and close protection-related travel, the Department will work more closely with the travel unit and the agent to reserve tickets in advance on the basis of a preliminary itinerary. Despite an improvement in compliance in 2023 compared with 2021 and 2022, the low compliance rate in 2023 was attributable primarily to rapid security surges in volatile security environments, which made advance planning challenging. Compliance with documentation deadlines remained at 100 per cent.

Table 34.25
Compliance rate

(Percentage)

	2021 actual	2022 actual	2023 actual	2024 planned	2025 planned

34.85 The proposed regular budget resources for 2025 amount to \$7,374,600 and reflect a net increase of \$1,722,800 compared with the approved budget for 2024. The proposed increase is explained in paragraphs 34.74 (a) and 34.75 (a). Additional details on the distribution of the proposed resources for 2024 are reflected in table 34.26 and figure 34.V.

* [A/79/50](#).

** In keeping with paragraph 10 of General Assembly resolution [77/267](#), the part consisting of the post and non-post resource requirements is submitted through the Advisory Committee on Administrative and Budgetary Questions for the consideration of the Assembly.

A. Overall orientation

Mandates and background

- 35.1 The Development Account was established in 1997 by the General Assembly in its resolution [52/12 B](#) as a mechanism to fund capacity development projects of the economic and social entities of the United Nations, namely, the Department of Economic and Social Affairs of the Secretariat, the Economic Commission for Africa (ECA), the Economic Commission for Europe (ECE), the Economic and Social Commission for Asia and the Pacific (ESCAP), the Economic and Social Commission for Western Asia (ESCWA), the Economic Commission for Latin America and the Caribbean (ECLAC), the United Nations Conference on Trade and Development (UNCTAD), the United Nations Environment Programme (UNEP), the United Nations Human Settlements Programme (UN-Habitat) and the United Nations Office on Drugs and Crime (UNODC). All projects funded through the Account build on the mandates and the comparative advantages of the 10 implementing entities.
- 35.2 The Development Account supports developing countries in their implementation of the 2030 Agenda for Sustainable Development in response to expressed needs and demands from Member States, and supports the recommendations and decisions made during intergovernmental processes and by the relevant governing bodies of the implementing entities.

Strategy

- 35.3 The Development Account provides its 10 non-resident implementing entities of the United Nations Secretariat with predictable funds to assist developing countries in the economic and social priority areas of the United Nations development agenda for which capacity development assistance is needed, the Secretariat has a clear comparative advantage and there is demand from Member States. Projects build on the normative and analytical capacities of the entities. They are carried out over a four-year period, with an average budget of \$700,000, and involve work with multiple countries, encouraging South-South learning and experience-sharing and later feeding findings into intergovernmental processes and analytics. Under the overarching theme of the seventeenth tranche, “Supporting Member States in accelerating actions to adapt to and mitigate climate change with a focus on social and economic resilience in pursuit of the 2030 Agenda”, 26 proposed projects (see annex I) are spread across all regions (see figure 35.II), supporting all Sustainable Development Goals (see figure 35.III) and often supporting countries with special needs (see figure 35.I). Five of the projects are aimed at enhancing the statistical capacity of countries, in order to address issues related to climate change (see para. 35.6 for additional details). In total, the seventeenth tranche includes nine projects that will be jointly executed by Development Account entities. Furthermore, partnerships continue to be essential to all projects, including collaboration within and outside of the United Nations system.
- 35.4 Over 90 per cent of the proposed projects of the seventeenth tranche support countries with special needs, namely, least developed countries, landlocked developing countries and small island developing States. Figure 35.I shows the number of projects supporting countries with special needs. These numbers are likely to increase as implementing entities finalize the target countries of their projects. Some projects are focused exclusively on these groups of countries, such as the following projects: using science, technology and innovation to advance climate resilience in small island developing States (project B); accelerating urban resilience and pro-poor climate action in landlocked developing countries and small island developing States in the Caribbean and Africa (project J); and climate action and food system transformation in Arab least developed countries (project Q).

Figure 35.I
Projects supporting countries with special needs^a

^a Projects can have beneficiary countries from multiple groups, and some countries with special needs can belong to two groups.

35.5 Figure 35.II illustrates how the proposed projects of the seventeenth tranche are spread across different regions. While projects are proposed for all regions of the world, Africa continues to have the highest number of proposed projects, as in previous tranches.

Figure 35.II
Number of projects by geographical area^a

^a One project can contribute to more than one region.

35.6 Under the overall theme of the tranche, several topics have emerged as areas in which multiple projects will be providing support. As mentioned above, five of the proposed projects focus on climate change-related statistics, including by building the capacity of selected countries to: (a) monitor maritime transport, tourism, trade, fisheries and ecosystem services in the Caribbean to inform evidence-based climate change and trade policies (project A); (b) produce climate change and disaster-related statistics with a gender perspective (project G); (c) produce policy-relevant, internationally comparable and accessible statistics and data for climate change mitigation and adaptation in Europe and Central Asia (project M); (d) produce nationally relevant and multidimensional sets of climate change-related statistics in Asia and the Pacific (project R); and (e) generate statistics and indicators to monitor climate change and the impact of economic activities on climate change in Latin America and the Caribbean (project U). In addition, there are also projects focused on using data to reduce illegal deforestation

(project K) and to map and monitor solar energy access (project O). Food systems, which are one of the six transitions regarded as transformative entry points with catalytic and multiplier effects across the Sustainable Development Goals,¹ are the focus of project Q, on food system transformation for Arab least developed countries, and project Y, on accelerating food system transformation in Africa, while projects C and W focus more specifically on enhancing the resilience of smallholder farmers to climate change in sub-Saharan Africa and in Latin America and the Caribbean, respectively.

35.7 The proposed projects also contribute to all of the Sustainable Development Goals, as outlined in figure 35.III, with all projects contributing to Goal 13 on climate action, in line with the theme of the tranche, and a notable number of projects contributing to Goal 1 on poverty; Goal 5 on gender equality; Goal 8 on decent work and economic growth; and Goal 17 on partnerships for the Goals.

Figure 35.III

Contribution of projects of the seventeenth tranche to the Sustainable Development Goals^a

^a One project can contribute to more than one goal.

35.8 Partnerships are essential to the implementation of Development Account projects. The proposed projects will be implemented with partners from the United Nations Secretariat and the wider United Nations system, including United Nations country teams as relevant, as well as governments and national, regional and international organizations. Resident coordinators will also be informed about the national project activities and engaged to support the projects at various levels. This helps to ensure that Development Account projects leverage the comparative strengths of both national and international partners to better achieve transformational change, respond to identified national needs while avoiding duplication of work, and work alongside national and local governments and organizations to strengthen their capacity throughout project implementation, which also strengthens the sustainability of project results.

35.9 As illustrated in figure 35.IV, all proposed projects will be implemented in partnership with other entities within the United Nations system, including the resident coordinator offices. The number of partnerships is likely to further increase as projects are finalized following the General Assembly's consideration and approval of the present budget fascicle and the projects proposed therein.

¹ <https://unsdg.un.org/resources/six-transitions-investment-pathways-deliver-sdgs>.

Figure 35.IV
Partnerships in Development Account projects^a

^a One project can partner with multiple partners.

- 35.10 The involvement of resident coordinator offices in Development Account projects takes different forms. Since one of the responsibilities of resident coordinator offices is to coordinate United Nations operational activities for development within a country, it is expected that such offices will be informed about all projects and related national activities. Beyond this, resident coordinator offices might provide support for a particular project by identifying and/or inviting meeting and workshop participants, identifying partners and government counterparts, disseminating project outputs, fine-tuning the modalities and activities of projects to national contexts, identifying synergies with other projects or initiatives in the subject area, identifying a stakeholder engagement strategy and mobilizing supplementary resources. In addition, depending on the project, there might be more in-depth engagement with the United Nations country team. Development Account entities are in some cases members of the country team and participate in the common country analysis and United Nations Sustainable Development Cooperation Framework, and other members of the country team are sometimes also partners in the implementation of projects.
- 35.11 In addition to the partnership arrangements described above, nine of the proposed projects of the seventeenth tranche will be led jointly by multiple Development Account entities. Joint projects build on natural areas of synergy and cooperation between Development Account entities and involve a more extensive partnership between entities, whereby each of the jointly implementing entities is responsible for the delivery of specific deliverables and receives a part of the total project budget. Entities work jointly throughout the project cycle, from the design of the project to its implementation, as well as throughout the reporting, monitoring and evaluation phases. These projects also include the formation of a steering committee, comprising representatives from all entities, that meets throughout the project's life cycle to facilitate dialogue and cooperation, resolve any issues that arise, facilitate monitoring of the project's performance and ensure that the projects are efficient and effective in achieving results at the country level. Since joint projects require a more work-intensive governance structure and coordination, they are only undertaken in areas where there is a clear advantage to doing so. The table in annex I provides further details on which projects will be jointly implemented.
- 35.12 The Development Account and the regular programme of technical cooperation continue to complement each other. Each implementing entity has mechanisms in place at the programme and subprogramme levels to ensure consistency and synergy between the regular programme and the Development Account. While the Development Account funds medium-term interventions that are

executed over a period of up to four years in primarily subregional, but also regional and global settings, building national capacities, the regular programme funds short-term, small-scale interventions, responding in a flexible manner to often urgent and not easily predictable national development needs. Consequently, the programming, implementation, monitoring and evaluation approaches of the regular programme and the Development Account are distinctly different. A decentralized approach is used for managing the regular programme, so instead of direct coordination between the two programmes, the implementing entities maintain a good overview of the planned activities financed from the regular programme, the Development Account and extrabudgetary resources while ensuring that these activities build on and do not duplicate one another.

Evaluation activities

- 35.13 Evaluation has been cemented as an essential component of the Development Account programme management function. The processes and procedures to support the planning, implementation, monitoring and evaluation of projects, including joint projects with a larger budget, have been strengthened based on the findings and lessons learned from the evaluations of the tenth tranche Programme on Statistics and Data, short-term coronavirus disease (COVID-19) joint projects and the eleventh tranche projects. This includes, among other things: (a) the enhancement of guidance on project planning, implementation and monitoring, in particular with regard to project logic (theory of change), target country selection, partnerships and joint projects; (b) the introduction of additional support and quality assurance tools and mechanisms to aid in the development of project documents; and (c) the issuance of a guidance note on terminal evaluation of joint projects.
- 35.14 At the project level, the evaluations of 11 out of 22 twelfth tranche projects are currently under way, guided by the Development Account project evaluation guidelines and a supplementary guidance note and updated report template. A guidance note has also been issued to support the thirteenth tranche project evaluations to be conducted in 2025, while roughly half of the fourteenth tranche projects have been selected for evaluation on the basis of their strategic importance and relevance to entity mandates, pressing knowledge gaps or potential for replication or scaling up. The Development Account evaluation focal points network, consisting of the evaluation units of the 10 implementing entities, has maintained regular communication through virtual meetings and email, discussing critical issues pertaining to the evaluation function and exchanging lessons learned and good practices. The planning of the next programme-level evaluation will be initiated in the second half of 2024, in consultation with the evaluation focal points network and other relevant stakeholders.

B. Proposed resource requirements for 2025

- 35.15 As reflected in table 35.1, the overall resources proposed for 2025 amount to \$18,473,900 before recosting, reflecting a net decrease of \$29,000. The proposed level of resources provides for the full, efficient and effective implementation of mandates. Four (1 P-5, 2 P-4 and 1 P-2) Development Account-related management posts are funded under section 9, Economic and social affairs.

Table 35.1
Evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Regular budget

Object of expenditure	2023 expenditure	2024 appropriation	Changes				2025 estimate (before recosting)	
			Technical adjustments	New/expanded mandates	Other	Total		Percentage
Grants and contributions	16 491.3	18 502.9	(1 029.0)	–	1 000	(29.0)	(0.2)	18 473.9

Explanation of variances by factor

Technical adjustments

- 35.16 As shown in table 35.1, resource changes reflect a decrease of \$1,029,000 under grants and contributions, which relates to the removal of a non-recurrent provision approved for 2024 by the Assembly in its resolution [78/252](#).

Other changes

- 35.17 As reflected in table 35.1, an increase of \$1,000,000 under grants and contributions is proposed to allow the proposed projects to provide broader and more in-depth capacity development support to developing countries. This would include delivering targeted, country-level capacity development support for additional target countries, including additional activities to provide more in-depth country-level assistance and to broaden the dissemination of project results, such as knowledge products, lessons learned and the sharing of countries' experiences, to a larger number of countries.

Multi-year account

- 35.18 The General Assembly, in its resolution [54/15](#), decided to establish a multi-year account for the Development Account. The resources proposed for the Account for 2025 are for the implementation of the projects over a four-year period (2025–2028). Within the multi-year account, the breakdown of resource requirements by object of expenditure for the seventeenth tranche of projects is presented in table 35.2.

Table 35.2
Summary of resource requirements by object of expenditure (before recosting)

(Thousands of United States dollars)

Object of expenditure	Amount
Other staff costs	740.5
Consultants	6 670.2
Travel of staff	2 462.7
Contractual services	2 798.5

Part XIII Development Account

<i>Object of expenditure</i>	<i>Amount</i>
General operating expenses	1 392.9
Grants and contributions	4 409.1
Total	18 473.9

- 35.19 Development Account projects are designed to provide the efficient and effective use of resources. The resource requirements are based on concept notes, which provide project descriptions and initial plans for project implementation. After the General Assembly’s review of the proposed budget by the end of 2024, the implementing entities will launch projects based on project documents that include detailed analyses, deliverables, timelines and budgets, and will complete the identification of target countries.
- 35.20 Other staff costs (general temporary assistance) represent 4 per cent of the total budget and are used for short-term needs to carry out the activities of the projects, such as organizing workshops and data collection.
- 35.21 Given that the implementing entities are mostly non-resident in project target countries and that all projects have country-level activities, travel of staff is required for projects, representing an average of 13 per cent of the total resources, a 1 per cent reduction compared with the sixteenth tranche. While projects typically include an e-learning component, and incorporating such elements is useful for maximizing efficiencies and broadening outreach, these tools cannot replace all face to-face delivery modalities in their effectiveness.
- 35.22 The projects typically utilize national consultants to support project implementation at the national level, as well as for collating and exchanging national and regional best practices. International consultants, including regional consultants, are often required for projects involved in new subject areas, which require expertise that may not be available within the country or the implementing entity. International and regional consultants are also used for external programme and project evaluations and related activities representing 4 per cent of the total tranche budget. International consultants comprise approximately 17 per cent of the total number of consultants and work-months, while 83 per cent of the consultants for the seventeenth tranche projects are national or regional. In terms of cost, international consultants represent 27 per cent of the total.

Table 35.3
Summary of consultancy requirements^a

<i>Type of consultant</i>	<i>Number of consultants</i>	<i>Number of work-months</i>	<i>Cost (thousands of United States dollars)</i>
International ^b	114	613	3 276.6
National	166	664	2 807.6
Total	280	1 277	6 084.2

^a This table does not include the cost of consultant travel.

^b The requirements under international consultants include 67 regional consultants (405 work-months) at a total cost of \$1,636,200.

- 35.23 Contractual services are used to engage national and local institutions or organizations to assist with the implementation of national components of the projects, including studies, local pilots, consultations and workshops. They also often include elements of capacity development for the institutions and organizations themselves. Venue rentals, conference service costs and communications costs associated with workshops, training events, seminars or expert group meetings typically fall under the general operating expenses category. More specifically, projects may have the following costs in this category: interpretation and translation services; editing and printing of documents for workshops; web development; reserving venues for workshops;

development of online courses; customization of an online platform that uses artificial intelligence; and other technical areas of work.

- 35.24 The costs of workshop participants (travel and allowances), under grants and contributions, represent on average 24 per cent of the project budgets. Projects typically use national workshops for training, coordination and consensus-building. Most projects also include a smaller number of regional workshops, which are typically used for South-South cooperation and the sharing of lessons learned between the target countries. Regional and interregional workshops are often used to share the findings with larger audiences and are often organized in connection with other intergovernmental meetings or events to reduce costs.
- 35.25 Project deliverables fall under four general categories, as detailed in table 35.4. These deliverables are expected to have a strong focus on the national level, to help to ensure national ownership and prioritization of national processes and institutions. They are also expected to focus on different capacity development aspects (e.g. skills, institutions and an enabling environment) for increased and sustainable impact.

Table 35.4
Summary of deliverables (2025–2028 plan)

<i>Quantified deliverables: B. Generation and transfer of knowledge</i>		<i>Non-quantified deliverables: C. Substantive deliverables</i>	
<i>Seminars, workshops and training events (number of days for all projects)</i>	<i>Technical materials (number of materials for all projects)</i>	<i>Consultation, advice and advocacy (number of projects including these deliverables)</i>	<i>Databases and substantive digital materials (number of projects including these deliverables)</i>

Annex I

Projects proposed for funding from the Development Account (for the period 2025–2028)

Proposed projects and objectives

Implementing entities, partnerships and budgets

- A. Evidence-based climate action through artificial intelligence and data innovation in Caribbean small island developing States

Objective: To enhance the statistical and analytical capacities of selected Caribbean nations in utilizing data science and artificial intelligence in combination with novel and national sources for the timely monitoring of maritime transport, tourism, trade, fisheries and ecosystem services related to the coastal areas and the analysis of their CO₂ emissions, as well as the associated environmental-economic accounts, to formulate and promote evidence-based national and regional climate change and trade policies

- B. Science, technology and innovation for integrated climate action for small island developing States

Objective: To strengthen the capacity of government officials and stakeholders in targeted small island developing States to utilize science, technology and innovation effectively for advancing climate resilience and nature-based solutions in alignment with the Sustainable Development Goals

- C. Promoting climate-resilient agricultural cooperatives for rural small-holder farmers

Objective: To enhance the capacity of selected countries in sub-Saharan Africa to develop inclusive and sustainable policies and strategies for promoting climate-resilient agricultural cooperatives for rural small-holder farmers

- D. Climate-smart trade facilitation for economic and climate resilience in Africa and Asia-Pacific

Objective: To strengthen the capacity of three countries in Africa and Asia-Pacific, in particular least developed countries, landlocked developing countries and small island developing States, to calculate, measure and implement climate-smart trade facilitation reforms to reduce CO₂ emissions and build resilient and greener trade processes

- E. Stronger and greener productive capacities for just transitions in Caribbean small island developing States

Objective: To strengthen and green productive capacities in selected Caribbean small island developing States, with the goal of boosting just transitions that align with the unique needs of small island developing States and advancing economic transformation

The Department of Economic and Social Affairs, jointly with UNCTAD and in collaboration with ECLAC, UNEP and resident coordinator offices (\$1,004,400)

The Department of Economic and Social Affairs, jointly with ECA and in collaboration with UNEP and resident coordinator offices (\$740,100)

The Department of Economic and Social Affairs in collaboration with resident coordinator offices (\$684,600)

UNCTAD in collaboration with ESCAP, ECA, UNEP and resident coordinator offices (\$824,600)

UNCTAD in collaboration with the Department of Economic and Social Affairs, ECLAC and resident coordinator offices (\$824,600)

<p>F. Sustainable product export strategies and traceability for a green, sustainable and inclusive economy in Asia</p> <p><i>Objective:</i> To improve the ability of public and private stakeholders in selected Asian developing countries to build national productive and export capacity in sustainable products while contributing to their achievement of nationally determined contribution targets and the Sustainable Development Goals</p>	<p>UNCTAD in collaboration with ESCAP and resident coordinator offices (\$824,600)</p>
<p>G. Measuring climate change with a gender dimension for better adaptation and mitigation policies</p> <p><i>Objective:</i> To strengthen the capacity of selected low, lower-middle- and upper-middle-income countries to produce climate change and disaster-related statistics, taking into consideration a gender perspective, and enhance analytical capacities to develop policies to adapt to and mitigate climate change</p>	<p>UNEP, jointly with the Department of Economic and Social Affairs and in collaboration with ECA, ECLAC, ESCAP, ESCWA and resident coordinator offices (\$761,200)</p>
<p>H. Safer, healthier and cleaner transport in Africa</p> <p><i>Objective:</i> To strengthen national capacities of selected developing countries to accelerate action for resilient, low-carbon mobility in Africa that is inclusive, healthy, safe and comfortable for people that walk and cycle</p>	<p>UNEP, jointly with UN-Habitat and in collaboration with ECA and resident coordinator offices (\$761,200)</p>
<p>I. Equitable and climate-resilient sanitation services for low-income urban communities in South and South-East Asia</p> <p><i>Objective:</i> To strengthen capacities of selected countries in South and South-East Asia in providing equitable and climate-resilient sanitation services for low-income communities</p>	<p>UN-Habitat, jointly with ESCAP and in collaboration with resident coordinator offices (\$729,000)</p>
<p>J. Accelerating urban resilience and pro-poor climate action in landlocked developing countries and small island developing States in the Caribbean and Africa</p> <p><i>Objective:</i> To improve capacity to accelerate urban resilience and climate action to reduce climate change vulnerability in selected landlocked developing countries and small island developing States in the Caribbean and Africa</p>	<p>UN-Habitat, jointly with UNEP and in collaboration with ECA, ECLAC and resident coordinator offices (\$793,400)</p>
<p>K. Detection and disruption of illicit financial flows related to illegal logging and trafficking to reduce illegal deforestation</p> <p><i>Objective:</i> To strengthen the capacity of selected Member States to detect and disrupt illicit financial flows related to illegal logging and trafficking, and to reduce illegal deforestation</p>	<p>UNODC in collaboration with resident coordinator offices (\$684,600)</p>
<p>L. Improved climate knowledge and disaster risk governance for mine tailings facilities in Central Asia</p> <p><i>Objective:</i> To enhance capacities of national environmental authorities and industry in Central Asia to adapt to and mitigate the impacts of climate change on mine tailings management facilities for safer and more resilient societies</p>	<p>ECE, jointly with ESCAP and in collaboration with resident coordinator offices (\$565,600)</p>

<p>M. Better statistics and data for effective, inclusive and transparent climate action in Europe and Central Asia</p> <p><i>Objective:</i> To strengthen the capacity of national statistical systems of selected countries for producing policy-relevant, internationally comparable and accessible statistics and data for effective, inclusive and transparent climate change mitigation and adaptation</p>	<p>ECE in collaboration with ESCAP and resident coordinator offices (\$565,600)</p>
<p>N. Leveraging trade for a just transition to a low-carbon and circular economy in the Western Balkans, Southern Caucasus and Central Asia</p> <p><i>Objective:</i> To strengthen national capacities to shape trade policies to address climate change in the Central Asia, Southern Caucasus and Western Balkans subregions</p>	<p>ECE in collaboration with UNCTAD, ESCAP and resident coordinator offices (\$565,600)</p>
<p>O. Improved mapping and monitoring of solar energy access for enhanced climate policy action and socioeconomic resilience in ESCWA member States</p> <p><i>Objective:</i> To enhance the capacities of selected ESCWA member States to map and monitor developments in solar energy access to strengthen data-driven analysis and improve evidence-based policymaking for climate action and socioeconomic resilience</p>	<p>ESCWA in collaboration with resident coordinator offices (\$586,800)</p>
<p>P. Better policies for accelerated transition to a circular economy and enhanced climate action in Arab States</p> <p><i>Objective:</i> To enhance the capacities of selected countries in the Arab region to adopt circular economy practices among small and medium-sized enterprises to facilitate accelerated climate action and foster sustainable socioeconomic development</p>	<p>ESCWA in collaboration with resident coordinator offices (\$544,500)</p>
<p>Q. Bridging the climate-food nexus: coherent climate action and food system transformation for resilient Arab least developed countries</p> <p><i>Objective:</i> To strengthen the capacity of Arab least developed countries to align food system transformation with climate action and integrate climate assessments into policy design for more sustainable and resilient food systems</p>	<p>ESCWA in collaboration with resident coordinator offices (\$565,600)</p>
<p>R. Better production and use of statistics for effective climate action in Asia and the Pacific</p> <p><i>Objective:</i> To strengthen the capacity of selected countries in Asia and the Pacific to produce nationally relevant and multidimensional sets of climate change-related statistics for effective climate action</p>	<p>ESCAP in collaboration with ECE and resident coordinator offices (\$634,300)</p>

S. Low-carbon and resilient transport action plans in Asia and the Pacific

ESCAP, jointly with ECE and in collaboration with resident coordinator offices (\$634,300)

Objective: To strengthen the capacity of selected countries in Asia and the Pacific to implement low-carbon and resilient transport action plans to accelerate climate action through transport

T. Sustainable cooling to address climate change and inequality in small island developing States of the Asia-Pacific region

ESCAP, jointly with UNEP and in collaboration with resident coordinator offices (\$634,300)

Objective: To strengthen the capacity of selected countries in Asia and the Pacific to develop and implement national cooling action plans that integrate passive cooling strategies and increase the efficiency of active cooling to support energy efficiency, climate objectives, and the resilience of populations and energy systems

U. Better climate change statistics and indicators in Latin America and the Caribbean

ECLAC in collaboration with the Department of Economic and Social Affairs and resident coordinator offices (\$634,300)

Objective: To improve technical capacities in Latin American and Caribbean countries for generating statistics and indicators to monitor climate change and the impact of economic activities on climate change

V. Labour inclusion to address climate change and its impacts on the future of work in Latin America and the Caribbean

ECLAC in collaboration with resident coordinator offices (\$634,300)

Objective: To enhance the capacity of selected developing countries in Latin America and the Caribbean to develop policies and strategies for the inclusion of green labour in a just transition, reducing the social impacts of changes

W. Rural agricultural value chains and climate-smart technology policies at the subnational level in Latin America and the Caribbean

ECLAC in collaboration with UNEP and resident coordinator offices (\$634,300)

Objective: To enhance the response of small-scale farmers to climate change by strengthening subnational policies and capacities to scale up climate-smart agricultural technologies and achieve economic and social upgrading along rural value chains

X. Empowering African small and medium-sized enterprises in the agrifood industry for sustainable transition

ECA in collaboration with resident coordinator offices (\$634,300)

Objective: To strengthen the capacity of selected African countries to design and implement policies on small and medium-sized enterprises to support sustainable transition in the agrifood industry

Proposed projects and objectives

Implementing entities, partnerships and budgets

Y. Accelerating food system transformation for resilience to climate change in Africa

ECA in collaboration with resident coordinator offices (\$634,300)

Objective: To strengthen the capacity of selected African countries to improve the resilience of food systems to climate change and variability

Z. Innovative climate action to accelerate green industrialization in the Southern Africa region

ECA in collaboration with UNEP, UNCTAD and resident coordinator offices (\$634,300)

Objective: To strengthen the capacity of selected countries to develop and implement innovative green economy policies and strategies that foster inclusive and sustainable industrialization in Southern Africa

Abbreviations: ECA, Economic Commission for Africa; ECE, Economic Commission for Europe; ECLAC, Economic Commission for Latin America and the Caribbean; ESCAP, Economic and Social Commission for Asia and the Pacific; ESCWA, Economic and Social Commission for Western Asia; UNCTAD, United Nations Conference on Trade and Development; UNEP, United Nations Environment Programme; UN-Habitat, United Nations Human Settlements Programme; UNODC, United Nations Office on Drugs and Crime.

Annex II

Mandates of the Development Account

The programme of work will continue to be guided by all mandates entrusted to it as detailed in the list below.

List of mandates

General Assembly resolutions

52/12 B	Renewing the United Nations: a programme for reform	52/235 ; 53/220 A and B; 54/15 ; 56/237	Development Account

Seventy-ninth session

Item 139 of the preliminary list*

Proposed programme budget for 2025

Proposed programme budget for 2025

Part XIV

Staff assessment

Section 36

Staff assessment

* [A/79/50](#).

Proposed post and non-post resource requirements for 2025

Overview

- 36.1 The proposed regular budget resources for 2025, including the breakdown of resource changes, as applicable, are reflected in the table below.

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2023 expenditure	2024 approved	Changes				2025 estimate (before recosting)	
			Technical adjustments	New/expanded mandates	Other	Total		Percentage
Other (staff assessment)	305 372.6	314 075.0	3 458.8	1 389.7	(407.5)	4 441.0	1.4	318 516.0

- 36.2 In accordance with the established budgetary practice, provisions for staff assessment are made by applying the rates contained in regulation 3.3 of the Staff Regulations and Rules of the United Nations to the assessable emoluments of United Nations staff. The staff assessment amounts resulting from the application of such rates are consolidated under the present section, while the provisions for salaries are presented under other budget sections. The provisions for salaries represent the net amounts, while the gross amounts include the addition of staff assessment to the net salary provisions. The gross and net amounts relating to each budget section are presented in the annex to the present document.
- 36.3 Amounts from staff assessment are credited upfront to Member States to offset assessments for the budget period, with the exception of staff assessment credits withheld and credited to the Tax Equalization Fund for the reimbursement of taxes on emoluments of United Nations staff members, as envisaged in General Assembly resolution [973 \(X\) A](#). The amount proposed under the present section is also reflected under income section 1, Income from staff assessment ([A/79/6 \(Income sect. 1\)](#)).
- 36.4 The overall resources proposed for 2025 amount to \$318,516,000 before recosting, reflecting a net increase of \$4,441,000 (or 1.4 per cent) compared with the approved budget for 2024. Resource changes result from three factors: (a) technical adjustments; (b) new and expanded mandates; and (c) other changes.

Explanation of variances by factor

Technical adjustments

- 36.5 As presented in the table above, resource changes reflect a net increase of \$3,458,800, comprising:
- An increase relating to the additional posts and general temporary assistance positions proposed in support of the various mandates of the Human Rights Council in the context of the resource consolidation proposed for 2025;
 - Additional provisions for 205 new and reassigned posts and positions approved pursuant to General Assembly resolutions [78/252](#) and [78/273](#), which were subject to a 50 per cent vacancy rate in 2024 and are now budgeted at continuing rates in accordance with the established practice for the costing of these posts;
 - A decrease associated with the removal of non-recurrent provisions approved for 2024.

New and expanded mandates

- 36.6 As presented in the table above, resource changes reflect an increase of \$1,389,700, which is attributable mainly to the proposed establishment of 98 additional posts under various sections of the proposed programme budget for 2025.

Other changes

- 36.7 As reflected in the table above, resource changes reflect a net decrease of \$407,500, attributable mainly to the proposed changes in posts and positions in the special political missions, offset in part by a net increase of 17 posts and additional general temporary assistance provisions under various sections of the proposed programme budget for 2025.

Overall: evolution of resources by budget section, showing net and gross amounts (before recosting)

Proposed programme budget for 2025

Proposed programme budget for 2025

Income section 1

Income from staff assessment

* A/79/50.

Income from staff assessment

(Thousands of United States dollars)

	<i>2023 actual</i>	<i>2024 approved</i>	<i>2025 estimate (before recosting)</i>	<i>Increase/ (decrease)</i>
Staff assessment requirements provisioned under:				
Section 36, Staff assessment	305 372.6	314 075.0	318 516.0	4 441.0
Income section 3, Services to the public	2 056.4	2 064.7	2 064.7	–
Total, income from staff assessment	307 429.0	316 139.7	320 580.7	4 441.0

IS1.1 The estimates under income section 1 comprise the total provision proposed under section 36, Staff assessment (\$318,516,000), and the staff assessment portion of the proposed post expenditure under income section 3, Services to the public (\$2,064,700).

IS1.2 The revenue from staff assessment is credited to the Tax Equalization Fund established by the General Assembly in its resolution [973 \(X\) A](#). The estimated staff assessment revenue approved by the Assembly is used to offset assessments on Member States in line with the established practice.

G. Television and similar services	80.0	90.0	10.0
H. Miscellaneous income	5 970.9	7 689.6	1 718.7
Total	30 675.2	33 890.3	3 215.1

A. Income from rental of premises

IS2.1 The expected income under this heading, in the amount of \$12,342,500, the details of which are shown in table IS2.2, relate to the payment of rent by a number of specialized agencies and other entities connected with the activities of the Organization for the occupancy of United Nations premises in New York, Geneva, Nairobi, Addis Ababa, Bangkok and Santiago. Under the terms of the agreement with the Government of Austria, the United Nations does not charge rent for the space provided for other tenants on its premises in Vienna, and rental income generated in Vienna would devolve to the Government of Austria.

IS2.2 The estimated increase of \$1,506,900 in rental income is due mainly to:

- (a) The planned move of the Office of the United Nations High Commissioner for Human Rights from the Giuseppe Motta building into the Palais des Nations compound in Geneva (the rental charges only apply to the Office's extrabudgetary activities), and the final phase of the implementation of recommendations made by the working group on global rental practices at United Nations premises, whereby extrabudgetary funded operations of United Nations offices and departments accommodated at the Palais des Nations (i.e., the Office for the Coordination of Humanitarian Affairs, the United Nations Conference on Trade and Development, the Economic Commission for Europe and the Office of Internal Oversight Services) have been asked to pay the full rental rate instead of operating expenses (i.e. spendable) only. This change has been implemented in a phased manner over a period of four years starting in 2021 and ending in 2025 (\$1,244,000);
- (b) The adjustment of rate of rental charges, and new space arrangements for the existing and new occupants in the Economic Commission for Africa (\$186,100);
- (c) The return to full occupancy in the Economic and Social Commission for Asia and the Pacific following the completion of the seismic mitigation project as well as an increase in the rental rate in 2025 (\$75,000).

Table IS2.2
Income from rental of premises

(Thousands of United States dollars)

<i>Source</i>	<i>2024 approved estimates</i>	<i>2025 proposed estimates</i>	<i>Increase (decrease)</i>
Headquarters, New York	1 047.3	1 047.3	–
United Nations Office at Geneva	2 465.0	3 709.0	1 244.0
United Nations Office at Nairobi	3 430.0	3 430.0	–
Economic Commission for Africa, Addis Ababa	2 941.2	3 127.3	186.1
Economic Commission for Latin America and the Caribbean, Santiago	79.1	80.9	1.8
Economic and Social Commission for Asia and the Pacific, Bangkok	873.0	948.0	75.0
Total	10 835.6	12 342.5	1 506.9

B. Reimbursement for services provided to specialized agencies and others

IS2.3 The expected income under this heading is set out in table IS2.3. The total estimated income of \$209,700 reflects a decrease of \$30,100, which is attributable mainly to a reduction of mail and pouch services requested by clients at the United Nations Office at Vienna.

Table IS2.3
Reimbursement for services provided to specialized agencies and others

(Thousands of United States dollars)

<i>Source</i>	<i>2024 approved estimates</i>	<i>2025 proposed estimates</i>	<i>Increase (decrease)</i>
United Nations Office at Vienna	147.4	118.6	(28.8)
Economic Commission for Africa	92.4	91.1	(1.3)
Total	239.8	209.7	(30.1)

C. Interest income

IS2.4 It is projected that interest income in the amount of \$12 million, reflecting no change compared with the estimates for 2024, would be earned on general fund balances held in the cash pool during 2025 on the basis of an estimated average positive cash balance of \$400 million and expectations of a 3 per cent average interest rate environment in 2025. This is in line with the 2024 estimate based on the same balance and interest rate assumptions, and is in line with the market outlook for interest rates in the United States of America.

D. Sale of used equipment

IS2.5 The expected income under this heading is set out in table IS2.4. Sale of used equipment is estimated at \$133,700 for 2025, reflecting a net increase of \$9,600 compared with the estimates approved for 2024. The estimates under this heading vary from year to year on the basis of the equipment that has been identified for sale at the time of preparation of the report. The net increase of \$9,600 in 2025

reflects mainly higher estimated proceeds from the planned sale of equipment and furniture at the Economic Commission for Africa (\$15,700), partially offset by lower estimated proceeds from the planned sale of used vehicles and equipment and furniture at Headquarters (\$6,100).

Table IS2.4

Sale of used equipment

(Thousands of United States dollars)

<i>Source</i>	<i>2024 approved estimates</i>	<i>2025 proposed estimates</i>	<i>Increase (decrease)</i>
Headquarters, New York	42.5	36.4	(6.1)
Economic Commission for Africa, Addis Ababa	69.6	85.3	15.7
Economic and Social Commission for Asia and the Pacific, Bangkok	12.0	12.0	–
Total	124.1	133.7	9.6

E. Refund of previous years' expenditures

- IS2.6 An estimated amount of \$1,252,500 in 2025, reflecting no change compared with the estimate for 2024, is anticipated to be refunded from prior years' expenditures. The level of refunds is influenced by external factors and is therefore difficult to predict with accuracy. Accordingly, for 2025, the estimate is being maintained at the same level as 2024.

F. Contributions of non-member States

- IS2.7 Under the terms of rule 160 of the rules of procedure of the General Assembly and regulation 3.9 of the Financial Regulations and Rules of the United Nations, States that are not members of the United Nations but participate in certain activities of the Organization contribute towards the expenses of such activities at rates to be determined by the Assembly. By its resolution [44/197 B](#), the Assembly endorsed the revised assessment procedures for non-member States contained in paragraphs 50 to 52 of the report of the Committee on Contributions ([A/44/11](#), [A/44/11/Add.1](#) and [A/44/11/Add.1/Corr.1](#)). These procedures provide for assessment of contributions on the basis of a flat annual fee at the beginning of each year. That fee was calculated for each non-member State on the basis of a varying proportion of the applicable rate of assessment, which was applied to the applicable assessment base. The assessment base equals the total net assessment for the United Nations regular budget for the year, adjusted for tax refunds. By its resolution [58/1 B](#), the Assembly endorsed the recommendation of the Committee that the flat annual fee percentage of the Holy See should be fixed at 50 per cent of the notional rate of assessment and that further periodic review of the percentage should be suspended. By its decision [68/548](#), the Assembly decided that the State of Palestine was to be called upon to contribute towards the expenses of the Organization on the basis of the same procedure. The total contribution from these two non-member States is projected to be \$172,300 for 2025, reflecting no change compared with the estimates for 2024.

G. Television and similar services

- IS2.8 Income from television and similar services, such as publication fees charged when the images within the United Nations Photo Library are used in commercially published print monographs and service fees and royalty fees charged for the research, screening and duplication of the United Nations video and film collection, is estimated at \$90,000 for 2025, reflecting an increase of \$10,000 compared with the estimate for 2024. The increase is primarily due to an increase in the number of paying clients relying on archival footage to produce or repurpose audiovisual content.

H. Miscellaneous income

IS2.9 Various receipts that cannot properly be classified under any of the preceding subheadings, such as contributions from agencies, funds and programmes for their prorated share of the costs of the administration of justice, are included under this heading. The expected income under this heading is set out in table IS2.5. Given its nature, miscellaneous income is, for the most part, difficult to predict with accuracy. The estimate of \$7,689,600 for 2025 reflects a net increase of \$1,718,700 compared with the estimate approved for 2024. The net increase of \$1,718,700 in 2025 reflects a higher anticipated share of agencies, funds and programmes for the costs of the administration of justice based on the average amounts realized in 2021, 2022 and 2023 (\$2,026,300), partially offset by the lower share of peacekeeping operations for the costs of the administration of justice to be funded from the support account (\$307,600).

	Number	Details
Approved for 2024	64	2 P-5, 4 P-4, 4 P-3, 3 P-2/1, 7 GS (PL), 42 GS (OL), 2 SS
Proposed for 2025	64	2 P-5, 4 P-4, 4 P-3, 3 P-2/1, 7 GS (PL), 42 GS (OL), 2 SS

- IS3.1 The activities and operations under this section, which are carried out at Headquarters, Geneva, Vienna, Nairobi, Addis Ababa and Bangkok, are coordinated and managed by the following organizational units: (a) the Department of Global Communications; (b) the Department of Economic and Social Affairs; (c) the Department of Management Strategy, Policy and Compliance; (d) the Department of Operational Support; (e) the United Nations Office at Geneva; (f) the United Nations Office at Vienna; (g) the United Nations Office at Nairobi; (h) the Economic Commission for Africa (ECA); and (i) the Economic and Social Commission for Asia and the Pacific (ESCAP).
- IS3.2 The revenue projection for 2024 included in the report of the Secretary-General ([A/78/6 \(Income sect. 3\)](#)) reflected a net deficit of \$807,200. In its resolution [78/252](#), the General Assembly decided to increase the income expected under income section 3 by \$1.2 million, resulting in an estimated net revenue of nil (covering the recosting adjustment) for 2024, as approved by the Assembly in its resolution [78/254 B](#).
- IS3.3 The projected aggregate net deficit in respect of all services to the public for 2025 (\$2,723,700) reflects a decrease in the net revenue by \$2,623,600, compared with the estimated net revenue of nil approved by the Assembly for 2024, as shown in table IS3.4. The decrease in the net revenue for 2025 is based on best estimates of realistic income to be achieved in 2025 and it is affected mainly by United Nations Postal Administration operations, the sale of United Nations publications and catering operations at United Nations Headquarters in New York.
- IS3.4 The percentage distribution of the total gross revenue and expenditure for services to the public for 2025 is shown in table IS3.3.

Note: The following abbreviations are used in the tables: GS (OL), General Service (Other level); GS (PL), General Service (Principal level); SS, Security Service.

- IS3.5 The Facilities and Commercial Activities Service of the Division of Administration in the Department of Operational Support provides the management and coordination of the activities of the United Nations Postal Administration, which will continue to publicize the work and achievements of the United Nations and its specialized agencies through philatelic sales.
- IS3.6 Operations are consolidated into two entities: (a) the United Nations Postal Administration, New York office; and (b) the United Nations Postal Administration, European office, in Vienna. Each entity reports to the Chief of the United Nations Postal Administration and the Chief of the Facilities and Commercial Activities Service in New York. In addition, the United Nations Postal Administration maintains a retail counter at the Palais des Nations in Geneva and a sales office in Beijing.
- IS3.7 The United Nations Postal Administration continues to face challenges as a result of declining philatelic markets and ageing of its core customer group. The downward trend in the European and North American markets was compounded by significantly lower sales than expected in China. The new 2023 United Nations stamps did not generate sufficient interest in the Chinese market and the China National Philatelic Agency, which has been the largest single buyer of United Nations stamps over the past few years.
- IS3.8 In an effort to respond to changing market conditions, the United Nations Postal Administration engaged a consulting company with specialized expertise to assess its revenue-generating potential. One recommendation from the consultant was to position the United Nations Postal Administration as a unique and valuable communications asset for the Organization. The United Nations stamps have been chronicling the Organization's commitment to address critical world issues and build a better world for the past 73 years. They can help to tie the past initiatives of the United Nations to its current activities and continue to tell the Organization's story in a unique way.
- IS3.9 The recommendations also included: (a) modernizing the marketing and e-commerce operations of the United Nations Postal Administration, with deeper integration with other United Nations communications and public information initiatives, where appropriate; (b) expansion of United Nations Postal Administration products and their sale to include United Nations stamps-themed merchandise, with the aim of introducing United Nations stamps to a younger customer base; and (c) leveraging external service providers for on-demand order fulfilment and avoiding the risk of holding merchandising inventory.
- IS3.10 The United Nations Postal Administration plans to go live with the new sales system and e-commerce website in 2025. The implementation of the system has been delayed as a result of operational issues with the implementing partner and additional requirements that need to be incorporated into the system on the basis of the recommendations of the consultant. The United Nations Postal Administration will continue to offer a multilingual website to attract customers from around the world and increase its social media presence by linking the new United Nations stamps and stamp-themed products to the current activities, initiatives and communication goals at the United Nations.
- IS3.11 The United Nations Postal Administration will continue to innovate and improve upon the new types of postage stamps introduced in recent years, including United Nations cryptostamps, stamps linked to multimedia content and specialized "made to order" stamp sheets. In addition, the popular "Lunar New Year", "Sport for Peace", "Endangered Species" and "World Heritage" stamp series will continue to be featured in the annual programme of issuances.
- IS3.12 The United Nations Postal Administration works closely with other postal administrations, dealers and philatelic agents to promote and distribute United Nations stamps around the world. It regularly works with governmental organizations and permanent missions to the United Nations to issue stamps to commemorate world events, prominent people and international days and anniversaries. It also proposes and jointly issues stamps with other postal administrations yearly and will continue to do so in 2025.
- IS3.13 The United Nations Postal Administration has and will continue to represent the Organization at international stamp shows throughout the world to increase public awareness of United Nations

philatelic products and contribute to the outreach objectives of the Organization. It is an active member of the Universal Postal Union and participates in its conferences and meetings.

- IS3.14 The overall revenue for 2025 is projected to be \$2,975,700. The downward projection compared with 2024 is attributable mainly to the declining sales of postage stamps in all major philatelic markets, as indicated in paragraph IS3.7 above. The United Nations Postal Administration plans to build income from the sale of United Nations stamp-themed merchandise to supplement its traditional income from postage stamps, with the objective of bringing its operations back to profitability.
- IS3.15 Table IS3.11 lists all deliverables, by category and subcategory, for 2025.

Table IS3.11

Deliverables for 2025, by category and subcategory

Category and subcategory

D. Communication deliverables

Outreach programmes, special events and information materials: philatelic bulletins and materials in English, French, German and Italian; United Nations postage stamps and postal stationery, including the subject, design and quantity, for an average of 7 stamp issues per year, and United Nations stamp-themed merchandise.

Resource requirements (before recosting)

- IS3.16 The amount of \$4,252,300 would provide for the financing of 18 posts, as shown in table IS3.10, of which 11 posts (1 P-5, 3 General Service (Principal level) and 7 General Service (Other level)) would be located in New York and 7 posts (1 General Service (Principal level) and 6 General Service (Other level)) would be located in Vienna, as well as non-post requirements. United Nations Postal Administration operations retain a core of General Service staff to fulfil key operational functions, such as graphic design, marketing, sales, order processing, invoicing, customer service, inventory control and accounting, and rely on a team of contracted personnel to meet the Postal Administration's production and order fulfilment workloads.
- IS3.17 Non-post resources in the amount of \$1,615,200 would provide for other staff costs, hospitality, travel of staff, contractual services, general operating expenses, supplies and materials, and furniture and equipment.

IS3.18 The activities programmed for 2025 are aimed at enhancing understanding of the role, work and concerns of the United Nations and to encourage the exchange of ideas, information and knowledge in support of the goals of the Organization. The objective is to improve the visibility of United Nations publications and increase their readership in all formats through the targeted acquisition, marketing, sale, distribution, licensing and publishing of reports, books, periodicals, selected documents, databases, e-books, mobile applications and other electronic products. These activities, including the operation of the United Nations Bookshop at Headquarters, are carried out by the Sales and Marketing Section in the Outreach Division of the Department of Global Communications at Headquarters. A related aim is to generate revenues for the Organization while supporting the widest possible dissemination of United Nations information to the public. The Publications Board, under the chairmanship of the Director of the Outreach Division, has overall oversight of the publications programme.

- IS3.19 The proposed plan for 2025 continues to emphasize the consolidation of the electronic publishing programme accompanied by the creation and sale of a wider selection of publications for the general public, as follows:
- (a) The electronic publishing programme is based on adding value to publications through aggregation and services. Two main platforms constitute the foundation of the programme:
 - (i) The United Nations iLibrary continues to increase in scope. This subscription-based platform provides access to over 10,000 United Nations publications and other substantial digital content such as data and working papers, allowing the publication of more multilingual content and searches by Sustainable Development Goal;
 - (ii) The e-commerce website (<https://shop.un.org>) promotes the work of the Organization and provides direct access to United Nations publications in print and digital formats for purchase by the general public around the world. The launch of additional functionalities and an updated interface as well as the ability to sell merchandise online, anticipated in 2025, is expected to increase usage and sales;
 - (b) A wider distribution of electronic products, such as e-books and data products through new channels, will continue to be a priority;
 - (c) A larger, geographically diverse network of print-on-demand capability will support the print programme and e-commerce sales, reducing the time needed for production in an environmentally sustainable manner;
 - (d) The development of attractive print publications for the general public, focusing on the youth and younger children markets, is a key component of the programme;
 - (e) In addition, the plan includes the strengthening of the rights and licensing activities relating to the commercial use of the Sustainable Development Goals logo and icons as well as digital content for institutional customers worldwide, including data aggregators, for further redistribution.
- IS3.20 The publishing industry continues to change significantly, with electronic publications and aggregated platforms progressively becoming mainstream reading and research choices. At the same time, global book sales across all publishers are stagnating. United Nations publications are no exception to this global trend. In the light of the scaling back of physical book acquisitions by academic libraries and other principal institutional customers, electronic publishing continues to play an increasing role, not only as a way to deliver multilingual content to the customer but also, most importantly, to reach audiences and stimulate thought-provoking discussions and debate on the most critical issues of world affairs. The faster, mobile-responsive United Nations iLibrary platform improves usability and discoverability, which are necessary for the future success of United Nations publications in the current market environment.
- IS3.21 In this context, electronic publishing becomes essential, not only as a way to deliver content, but also to enhance the visibility of United Nations knowledge. The Sales and Marketing Section will continue to leverage existing and new opportunities. These include: (a) business and revenue opportunities primarily related to new distribution channels in print and digital content, including licensing digital and other content to third parties and aggregators for further redistribution, which the Section will diligently pursue; and (b) visibility opportunities that require continued development of back-office systems, specifically with regard to the way in which the Section assigns metadata, bibliographic information, keywords and other tags to the content published by the Organization so that it can be found on the web more easily by researchers, scholars and students.
- IS3.22 The Sales and Marketing Section will continue to focus on important supporting and auxiliary activities such as title management for cataloguing of bibliographic and marketing metadata and on the continuing management of the e-commerce website for the execution of orders for publications and merchandise. Other activities include the optimization and expanded use of third-party digital asset management and distribution systems and management of file processing for print, web and

accessible e-book products and its integration into print-on-demand facilities at various geographic locations. In the promotional sphere, the Section will continue to effectively deploy new technologies, including social media tools, to execute cutting-edge marketing campaigns to expand the reach of United Nations publications.

IS3.23 Table IS3.15 lists all deliverables, by category and subcategory, for 2025.

Table IS3.15

Deliverables for 2025, by category and subcategory

Category and subcategory

D. Communication deliverables

Outreach programmes, special events and information materials: United Nations publications, periodicals, data and subscription products, and other print and digital published materials in all official languages, for sale and dissemination; United Nations Bookshops in New York and Geneva; and organization of “meet the author” events.

External and media relations: advertising, publicity, social media campaigns, newsletters and participation in the principal international publishing industry events, directly or through authorized representatives; and collaboration with the publishing industry on the promotion of the Sustainable Development Goals and other United Nations priorities.

Digital platforms and multimedia content: management of the United Nations iLibrary and the e-commerce platform (<https://shop.un.org>) to efficiently aggregate and disseminate United Nations publications in all six official languages.

Resource requirements (before recosting)

IS3.24 The amount of \$5,821,700 would provide for the financing of 21 posts, as shown in table IS3.14, as well as non-post requirements.

IS3.25 Non-post resources in the amount of \$2,794,500 would provide for other staff costs, hospitality, travel of staff, contractual services, general operating expenses, supplies and materials, and furniture and equipment.

IS3.26 The activities related to services for visitors, including guided tour operations and briefing programmes, are the responsibility of the Department of Global Communications, which oversees the Visitors Section at Headquarters and the Visitors Services at the United Nations Offices at Geneva, Vienna and Nairobi. The objective is to promote an informed understanding of the purpose, role and work of the United Nations to the widest possible audience and to promote United Nations premises as an attraction for the general public and for specialized groups, including school groups and university students from all Member States. In line with the Department's global communications strategy, there is a strong emphasis on inspiring visitors' actions and engagement in pursuing and promoting the Organization's aims, in particular the achievement of the Sustainable Development Goals.

IS3.27 In all four Visitors Section/Services (New York, Geneva, Vienna and Nairobi), in-person and online activities continue to generate revenue while fulfilling their outreach mandates. All four duty stations are prioritizing proactive marketing campaigns, updates and improvements to the tour route and further expansion of partnerships with civil society, academia, municipalities and the tourism industry. The Department plans to continue offering both in-person and online tours and briefings to the general public and other groups in all four duty stations and in several languages, upon request.

^a In-person and online visitors.

Headquarters

- IS3.28 The Visitors Section at Headquarters organizes guided tours, as well as briefing programmes and outside speaking engagements, in which United Nations officials address groups of students, representatives of non-governmental organizations (NGOs) and other audiences on a range of issues related to the work of the United Nations. Since the reopening of operations at Headquarters in April 2022, all activities continue to be offered both online and in person, with the aim of reaching a wider global audience.
- IS3.29 In addition, the Section plans to continue offering a range of in-person and online thematic tours that were introduced in previous years, including the Black history tour, the focus on women tour, the art tour, the architecture tour, the children's tour and the garden tour. A diverse and multi-age audience participate in these tours, including high-level government officials, very important persons (VIPs), educators and students, and concierges from leading New York City hotels, as well as United Nations staff and delegates.
- IS3.30 The Section also plans to continue working with a service provider for the digital travel marketing campaign to attract a larger number of visitors coming to, or already in, New York, both locally and abroad. The vendor partners with cruise ship, airline and car rental companies to identify potential customers through algorithms. As tourists plan their activities in New York (tours, museums, historical sites, shows, etc.), an advertisement of the United Nations tour pops up on their mobile phone or computer screen, allowing them to purchase tour tickets.
- IS3.31 As part of ongoing efforts to innovate, generate additional income and enhance the visitor experience, the Section plans to offer a virtual reality experience as an add-on service to the guided tour. Through the power of virtual reality technology, the Section aims to transport visitors directly to the front lines of United Nations humanitarian efforts and peacekeeping operations to highlight efforts to sustain peace, climate action initiatives, and the empowerment of women and youth. The Section purchased 12 virtual reality sets to this effect and intends to hire individual contractors to provide staff for the added service.
- IS3.32 The Section relies on a core staff of fixed-term, full-time tour guides who conduct tours in person and online in more than a dozen languages, as well as specialized tours on a range of subjects relevant to the work of the United Nations. To maintain a flexible operation, the Section will continue to rely on additional temporary staff hired as individual contractors for peak seasons.

Geneva

- IS3.33 At the United Nations Office at Geneva, the Visitors Service continues to deliver tours in 12 languages for groups, individual visitors and dignitaries. Youth groups continue to represent about 80 per cent of planned groups. The guided tour operation in Geneva is currently experiencing quantitative limitations to its operation owing to the closing down of about half of the Geneva compound since mid-2022 because of the work to refurbish the Palais des Nations under the strategic heritage plan. Owing to safety considerations vis-à-vis the construction site and to spatial restrictions linked to the closure of some buildings, several measures were taken, such as: (a) a reduction in the size of the tours to smaller groups, which reduced the ratio of visitors per guide; (b) restrictions imposed by security considerations on the number of groups permitted on the compound at any given time; and (c) the closure of the tours on United Nations holidays and major conferences.
- IS3.34 Despite these challenges, the Geneva Visitors Service continues to offer a high-quality alternative tour route, which has received positive feedback and continues to generate increasing demand. The alternative tour route is offered to groups and individual visitors and for private tours. Despite the severity of the challenges at stake, the number of visitors in Geneva has been growing at a fast rate, with an increase of about 60 per cent between 2022 and 2023. While the refurbishment work at the Palais des Nations will continue in 2025, it is hoped that the growth in the number of visitors will continue, owing to the opening on weekends from April to September after the planned relocation of the Visitors Service to the new centre under construction, which is expected to take place in 2025.

- IS3.35 In addition to on-site tours of the Palais des Nations, online tours developed in 2021 are also expected to be offered in 2025. The Visitors Service will continue to offer tours adapted to the renovation work linked to the strategic heritage plan, modifying routes with new elements and including information products in various formats. Adaptations of public information support material for visitors who are visually and audibly impaired are also proposed. The move of the Visitors Service's sales operation online in 2021 continues to improve customer service.
- IS3.36 Owing to a combined effect of upward cost pressures and restrictions on the number of visitors, such as a smaller volume of visitors on the premises, a lower number of visitors per guide and the additional administrative cost of accrediting visitors, which increase the operating costs, the Geneva Visitors Service proposes to offset these factors by increasing the pricing of guided tours for 2025 for schoolchildren and young people. The price of tickets for these categories will be increased as follows: from SwF 11 to SwF 14 per person for children from 6 to 13 years of age, and from SwF 12 to SwF 15 per person for young people from 14 to 17 years of age. The ticket prices of the other categories will remain at the level of 2024, i.e. at SwF 22 per person for adults, and at SwF 18 per person for university students and senior citizens. A special price level is suggested for non-official tours for permanent missions to the United Nations in Geneva at SwF 15 per person. Online tours will remain at a flat rate of SwF 170 per tour, and private tours for up to five persons will remain at a flat rate of SwF 280 per tour.

Vienna

- IS3.37 At the United Nations Office at Vienna, the Visitors Service continues to deliver guided tours and lectures in more than a dozen languages, with a special focus on children and young people. The Service has succeeded in sustaining demand while vastly increasing revenue per visitor in recent years, thanks to attention to and investment in the quality of the customer experience at the United Nations in Vienna. According to visitor surveys conducted throughout 2023, 94 per cent of visitors gave their visit to the United Nations in Vienna top marks. The Service has also earned a "certificate of excellence" on one of the most popular online review sites. Moreover, visitor surveys continue to demonstrate the powerful impact of Vienna guided tours in delivering on the communications mandate of the Department of Global Communications and inspiring support for the Organization. In 2023, the share of visitors reporting a "very positive" opinion of the United Nations doubled from 23 per cent to 55 per cent after a United Nations Vienna tour, whereas the share reporting a neutral or negative opinion fell from 24 per cent to 6 per cent.
- IS3.38 In Vienna, a flexible, hybrid operating model has succeeded in continuously increasing visitor numbers, income and net revenue since in-person tours were allowed to gradually resume in September 2021. Adequate staff support in recent years has been key to allowing the Service to work with Vienna-based organizations to improve exhibits on the tour route and offer higher-quality service in the United Nations Vienna Visitors' Centre in order to justify very robust pricing by local standards, and to pursue promotional outreach and partnerships to attract revenue-strong visitors, such as tourists and professional groups, in a highly competitive local tourist market.
- IS3.39 Standard ticket prices in 2025 are €15 for adults, €13 for students and retirees and €7 for schoolchildren. As of 2023, the Service had regained more than 80 per cent of its annual visitor volume from before the coronavirus disease (COVID-19) pandemic and increased annual revenue by 25 per cent against 2019 income.

Nairobi

- IS3.40 The Visitors Service in Nairobi plans on promoting partnerships, including with schools and global travel agencies, that are vital for keeping the Service a prominent global attraction for everyone, including international tourists. The Service is expected to continue offering online tours while charging a modest fee where possible to offset operating costs.
- IS3.41 For 2025, the Service will continue to offer physical tours through the United Nations complex and deliver virtual briefings, which can reach an additional audience who are not able to visit physically.

To revive demand, and with a focus on the physical tours through the complex, the Service will invest in marketing and outreach campaigns to known and new target groups.

IS3.42 Table IS3.20 lists all deliverables, by category and subcategory, for 2025.

Table IS3.20

Deliverables for 2025, by category and subcategory

Category and subcategory

D. Communication deliverables

Outreach programmes, special events and information materials: guided tours, including the development of different tour concepts for general audiences, including young people and children, as well as VIP tours for high-level officials and goodwill ambassadors in approximately 20 languages, offered at Headquarters and the United Nations Offices at Geneva, Vienna and Nairobi; design and production of exhibits and interactive tour materials for visitors to all four duty stations in multiple languages; briefing programmes at Headquarters and United Nations Offices, as well as outside speaking engagements, on various United Nations issues presented by Secretariat officials in response to requests from academic institutions, NGOs and other groups; videoconferences linking groups away from Headquarters and United Nations Offices with Secretariat and/or mission officials; and engagement with visitors for promotional purposes and as multipliers of United Nations communications priorities, including on social media and through partnerships with local actors in the educational and tourism sectors in New York, Geneva, Vienna and Nairobi.

Resource requirements (before recosting)

IS3.43 The amount of \$5,930,000 would provide for the financing of 15 posts, as shown in table IS3.18, for the public services of the Department of Global Communications (Headquarters: 2 P-3, 1 General Service (Principal level) and 7 General Service (Other level); Geneva: 1 P-3 and 2 General Service (Other level); Vienna: 1 P-2; and Nairobi: 1 P-2), as well as non-post requirements.

IS3.44 Non-post resources in the amount of \$3,709,700 would provide for other staff costs, hospitality, travel of staff, contractual services, general operating expenses, supplies and materials, and furniture and equipment.

4. Revenue services of the Department of Economic and Social Affairs

Table IS3.21

Estimates of gross and net revenue (before recosting)

(Thousands of United States dollars)

	<i>2024 approved estimate</i>	<i>2025 estimate</i>	<i>2025 increase (decrease)</i>
Statistics			
Gross revenue	1 267.0	1 597.1	330.1
<i>Less expenses against revenue</i>	755.5	855.6	100.1
Total net revenue	511.5	741.5	230.0

Table IS3.22
Summary of requirements by category of expenditure

(Thousands of United States dollars)

	2023 expenditure	2024 approved	Changes		2025 estimate (before recosting)
			Amount	Percentage	
Non-post	787.5	755.5	100.1	13.2	855.6
Total	787.5	755.5	100.1	13.2	855.6

IS3.45 In 2025, the sales activities of the Department of Economic and Social Affairs under the present section will complement the work of the Statistics Division. The general objective of the activities is to ensure a high-level quality of the databases of the Division, including their metadata. These databases cover the international trade in goods and services statistics (UN Comtrade database), the database on business statistics, the database on national accounts statistics, the classifications registry, the global enterprise group registers and other databases of the Division. The activities also include the facilitation of data exchange between international agencies and countries and the training on and use of the Statistical Data and Metadata Exchange. Within this general objective, the activities are also intended to assist developing countries to improve the quality, availability and dissemination of their official statistics for inclusion in the databases of the Division, thereby ensuring the continued value of such data for the customer base.

IS3.46 The increase in the gross revenue for 2025 is estimated on the basis of the new average revenue per transaction from October 2022 to December 2023 and on projections of historical monthly transactions. The new UN Comtrade, launched in September 2022, provided new data variables and more powerful data services. As a result of these new data services and more intensive marketing activities, monthly revenues have steadily increased. It is expected that UN Comtrade will continue to attract a wide and growing audience of large data users with added services and products, such as the Trade Data Lake, and access to an extended scope of data items. The increase in the gross revenue for 2025 is based on recent realized revenue trends.

Resource requirements (before recosting)

IS3.47 The amount of \$855,600 for non-post resources, reflecting an increase of \$100,100, would provide for other staff costs, travel of staff, contractual services, general operating expenses, supplies and materials, furniture and equipment, and grants and contributions. The proposed increase is to cover additional contractual services in order to improve and maintain trade data tools for international trade and related economic statistics and to acquire ship tracking data hosted on the United Nations Global Platform, including the cost of hosting and cloud services for UN Comtrade and other relevant databases and tools.

5. Sale of gift items

Table IS3.23
Estimates of gross and net revenue (before recosting)

(Thousands of United States dollars)

	2024 approved estimate	2025 estimate	2025 increase (decrease)
Headquarters gift shop			
Gross revenue	400.0	600.0	200.0
Less expenses against revenue	–	–	–
Total net revenue	400.0	600.0	200.0

- IS3.48 The gift shop at Headquarters provides staff, members of delegations and visitors with United Nations mementos and souvenirs, as well as handicrafts and other souvenirs from around the world. The gift shop at Headquarters is operated by a contractor that is required to provide the United Nations with a percentage of gross sales and a utilities fee.
- IS3.49 The gift shop reopened on 1 June 2022 after being closed since March 2020 owing to the COVID-19 pandemic. Since its reopening, sales have remained significantly lower than 2019 levels, but it is expected that the commissions will gradually increase as the numbers of visitors and events at United Nations Headquarters stabilize in 2025.

6. Garage operations

IS3.50 The garage operations at Headquarters, Geneva and Bangkok provide parking facilities for delegates and staff under conditions and at rates established by the United Nations.

IS3.51 At Headquarters, the revenue projections for 2025 are informed by actual revenues in 2023, which were affected by the increased use of flexible working arrangements by staff compared with the levels prior to the pandemic. It is assumed that this trend will continue and that external market conditions, including fuel prices, will lead to reduced utilization of the garage despite the issuance of additional permits. It is expected that the New York City congestion pricing programme will be in effect in 2025 and is likely to have an impact on the demand for parking and utilization of the garage, leading to additional variance.

IS3.52 The garage rates were last revised effective September 2022 and, pursuant to paragraph 63 of General Assembly resolution [77/262](#), as well as paragraph 76 of Assembly resolution [78/252](#), no adjustment in garage rates will be made in 2024.

IS3.53 However, as inflationary pressures are expected to further increase the costs, and revenues are expected to be affected by the New York City congestion pricing programme, the General Assembly may wish to consider adjusting the garage fees applicable to staff to ensure the self-sufficiency of the garage administration office at Headquarters. It should also be noted that the fees applicable to delegates have not been adjusted since 1984. In order to realign the revenue potential of the garage operation and ensure that it remains self-supporting, the Assembly may also wish to consider adjusting the fees applicable to delegates in line with the cost-of-living index.

IS3.54 The Administration is required to issue guidance and make operational policy changes from time to time to ensure the safe and effective management of parking facilities for delegates and staff at United Nations garages in Headquarters, Geneva and Bangkok. These changes may involve, for example, adjusting permit types, volume and application criteria as well as procedures for payments and recovery of fees.

Resource requirements (before recosting)

IS3.55 The amount of \$1,242,300 would provide for the financing of six posts, as shown in table IS3.26 (Headquarters: 2 General Service (Other level) and 2 Security Service; and Geneva: 2 General Service (Other level)), as well as non-post requirements.

IS3.56 Non-post resources in the amount of \$354,300 would provide for other staff costs, contractual services, general operating expenses, and supplies and materials.

7. Catering operations

IS3.57 The United Nations catering contract at Headquarters, signed on 31 December 2015, was due to expire on 31 December 2022. The new solicitation exercise was postponed to early 2023 to ensure that the proposed new contracting modality would be consistent with General Assembly resolution [39/67](#) and that any necessary approvals would be satisfied prior to the issuance of the proposed request for proposals for the services. The current contract, which was amended to a subsidy model

during the pandemic to mitigate the vendor's losses, was extended to allow sufficient time to complete the new solicitation. Six of the seven dining locations were operating as at 15 January 2024 to meet current demand and manage the subsidies, which remain necessary, within approved levels. Historically, food operations at Headquarters have relied on external catering events for profitability, because the cafeterias have typically generated losses owing to narrow margins. To mitigate losses, the availability of the various dining facilities will continue to be evaluated on an ongoing basis and adjusted as required.

- IS3.58 The solicitation for the new catering contract, which was open to all vendors, was initially launched in February 2023 and was unsuccessful. The solicitation was then relaunched in February 2024, in full compliance with United Nations regulations, taking into account the recommendations resulting from the independent assessment conducted in 2021, as well as improvements in market conditions. It is offering bidders the option to propose a "profit and loss" model, whereby they would be responsible for the financial result of the operation at the onset of the contract, or start with a "subsidy" model first and transition to a "profit and loss" model once specific targets are met. The procurement exercise is expected to conclude by the end of 2024 and arrangements to extend the contract with the existing provider will be made as necessary to ensure continuity of services.
- IS3.59 Pending the new contract terms, 2025 estimates are projected using the current situation whereby a subsidy would continue to be required. Based on the assumption that catering revenue would increase but be partly offset by higher costs for the gradual opening of the cafes and from inflationary impact, continued losses are expected. No gross revenue is projected as any profit generated by the vendor over the course of the year would serve to reduce the subsidy paid.
- IS3.60 The catering service at ESCAP is provided for the benefit of staff, delegates and participants in meetings of non-United Nations entities and conferences held on the premises. The catering operation in Bangkok generates incidental revenue, estimated at \$73,100 for 2025.

Resource requirements (before recosting)

- IS3.61 The amount of \$2,049,800 would provide for the financing of one post (P-4) in the Division of Administration at Headquarters, as well as non-post requirements for Headquarters and Bangkok.
- IS3.62 Non-post resources in the amount of \$1,766,700 would provide for other staff costs, contractual services, general operating expenses, and furniture and equipment.

8. Other commercial operations

(Thousands of United States dollars)

	2023 expenditure	2024 approved	Changes		2025 estimate (before recosting)
			Amount	Percentage	
Posts	–	–	–	–	–
Non-post	295.5	275.8	–	–	275.8
Total	295.5	275.8	–	–	275.8

- IS3.63 The main entrance to the Visitors' Centre of the Vienna International Centre is expected to undergo refurbishment commencing in 2025, subject to the availability of co-financing from other Vienna-based organizations, such as the International Atomic Energy Agency, the Comprehensive Nuclear-Test-Ban Treaty Organization and the United Nations Industrial Development Organization. During this period, commercial activities will be suspended, resulting in no anticipated income or expenditure for 2025.
- IS3.64 The total gross revenue of the United Nations Conference Centre at ESCAP is estimated at \$350,000 for 2025, the same level as estimated for 2024.
- IS3.65 The United Nations Conference Centre at ECA provides conference halls and exhibition facilities to other United Nations agencies, NGOs, intergovernmental organizations, government offices and others, for a fee. However, owing to the COVID-19 pandemic, face-to-face meetings were curtailed drastically, and more meetings took place via a hybrid format. In addition, local conditions also resulted in a slow market and consequently the income from the rental of the Conference Centre dropped significantly. The Africa Hall conference room and two meeting rooms will be fully operational by 2025 and, on the basis of this assumption, the rental of the Conference Centre is estimated at \$39,100 for 2025. The ongoing maintenance costs of the Conference Centre are budgeted under section 18, Economic and social development in Africa.

Resource requirements (before recosting)

- IS3.66 The amount of \$275,800 for non-post resources would provide for other staff costs, travel of staff, contractual services, general operating expenses, supplies and materials, and furniture and equipment.

B. Programme support
