# BIODIVERSITY in UNESCO

UNESCO's action on biodiversity reflects the multi-sectoral nature of its mandate including:

## Knowledge dimensions

- Science and traditional knowledge on biodiversity

## On the ground conservation, sustainable use and management

- World Natural Heritage Sites
- Biosphere Reserves

## Education

- Biodiversity education, including in education for sustainable development

## Cultural dimensions

- Links between biological and cultural diversity – intangible heritage, languages, values, beliefs

United Nations Educational,  
Scientific and Cultural Organization

# UNESCO & The Convention on Biological Diversity

**Through its Programmes, UNESCO promotes integrated approaches to CBD implementation with the focus on:**

- Integration of the three objectives of the Convention - conservation, sustainable use and access and benefit sharing
- Integration of environmental, social, economic and cultural aspects of biodiversity challenge
- Increased focus on addressing the causes of biodiversity degradation and loss

United Nations Educational,  
Scientific and Cultural Organization

# INTEGRATED APPROACH TO CBD IMPLEMENTATION

Example of Biosphere Reserves as means of implementing the 3 goals of the CBD

## Key Objectives

- Conserve biological and cultural diversity
- Promote sustainable economic development
- Research, monitoring, education and training

## Zoning System

as means to meet the challenges of biodiversity management in multi-use areas with the objective of sustainable development

## Organizational/governance arrangements

enabling involvement and participation and dialogue between all actors in management and decision-making processes

United Nations Educational,  
Scientific and Cultural Organization

## BIOCULTURAL APPROACH TO ABS

Promotion of Biosphere Reserves as means of implementing access & benefit sharing provisions under the CBD

Relevant objectives under 1995 Seville Strategy for Biosphere Reserves :

- Preserving **genetic resources, species, ecosystems and landscapes.**
- Promoting **conservation and sustainable use, through the transfer of appropriate technologies, including traditional knowledge**
- Ensuring that **benefits derived from the use of natural resources are equitably shared with the stakeholders.**

In accordance with these objectives— promotion of bio-cultural approaches to access and benefit sharing

United Nations Educational,  
Scientific and Cultural Organization

# BRINGING ABS TO BIOSPHERE RESERVES

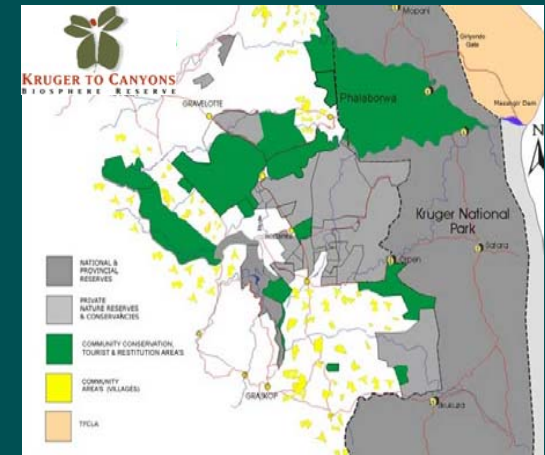

**Pilot in Kruger to Canyons Biosphere Reserve, South Africa**  
In collaboration with GIZ (ABS Capacity Development Initiative) Natural Justice  
K2C Biosphere Committee

**Biological diversity**

**Cultural diversity**

**Institutional fragmentation**

**Testing Bio-cultural Protocols** as tools that can contribute to operationalization of ABS provisions in biosphere reserves while promoting the achievements of:

- The three objectives of the CBD
- The three objectives of biosphere reserves

United Nations Educational,  
Scientific and Cultural Organization

# BRINGING ABS TO BIOSPHERE RESERVES

## Success of the Bushbuckridge Healers Biocultural Protocol

- The process of development of the protocol as important as the protocol itself
- It allowed traditional healers community to organize itself and define common challenges
- To articulate their contribution to *in situ* conservation
- To define prior informed consent regarding access to their lands and traditional knowledge
- To describe ways and means of knowledge sharing
- To understand their rights according to national and international law
- To formulate a call to stakeholders for respect of customary laws and related needs.

United Nations Educational,  
Scientific and Cultural Organization

# BRINGING ABS TO BIOSPHERE RESERVES

## BCP- Follow up

- Formation of **Kukula Traditional Healers Association**
- Assessment of areas currently unavailable to healers and enabling support of management authorities to allow their access into these areas
- **Local cosmetics partnership** development between the healers and the local cosmetics company
- **Educating and Awareness** Creation on the bio-prospecting laws and the rights of traditional healers as regards the protection of and sharing of their traditional knowledge

United Nations Educational,  
Scientific and Cultural Organization

## **ABS – CHALLENGES and OPPORTUNITIES in The WORLD NETWORK OF BIOSPHERE RESERVES**

- **Further awareness raising** – through Man and the Biosphere (MAB) Programme; regional and thematic networks of biosphere reserves
- **Building on the experience from Kruger to Canyons Biosphere Reserve** – sharing of lessons with other biosphere reserves
- **Capacity building** – training of biosphere managers and development of appropriate tools
- **Reaching out to other stakeholders** - particularly scientists and researches involved in biosphere reserves research
- **Further understanding the links between biological and cultural diversity and their implications for the implementation of the CBD and its protocols** – UNESCO-CBD Joint Programme

United Nations Educational,  
Scientific and Cultural Organization

## **FUTURE PRIORITIES OF UNESCO's WORK RELATED TO BIODIVERSITY**

**Implementation of UNESCO Biodiversity Initiative** – established in 2010 to enhance coordination among different biodiversity related activities in the field of science, education and culture

**More focused work around Aichi Biodiversity Targets** - mainly the targets on

- education and public awareness (Target 1)
- protected areas (Target 11)
- traditional and indigenous knowledge (Target 18)
- science technology and innovation (Target 19 )
- access and benefit sharing (Target 16)

**Contribution to the work of the Intergovernmental Panel on Biodiversity and Ecosystem Services (IPBES)** with particular emphasis on integration of traditional and scientific knowledge systems
